Dear Colleagues:
Final CDC Considerations for School Closure Draft attached. See below for media briefing information.

Media Advisory

For Immediate Release
Friday, March 13, 2020

Contact: CDC Media Relations
(404) 639-3286

CDC Media Telebriefing: Update on COVID-19

What The Centers for Disease Control and Prevention (CDC) will provide an update to media on the COVID-19 response.

Who Nancy Messonnier, M.D., Director,
National Center for Immunization and Respiratory Diseases

When 1:00 p.m. ET Friday, March 13, 2020

Dial-In

Non-Media:888-795-0855
International: 1-630-395-0498
PASSCODE: 2125064

Important Instructions
Due to anticipated high volume, please plan to dial in to the telebriefing 15 minutes before the start time.

Media: If you would like to ask a question during the call, press *1 on your touchtone phone. Press *2 to withdraw your question. You may queue up at any time. You will hear a tone to indicate your question is pending.

TRANSCRIPT
A transcript will be available following the briefing at CDC's web site:www.cdc.gov/media.

###

U.S. Department of Health and Human Services

CDC works 24/7protecting America's health, safety and security. Whether diseases start at home or abroad, are curable or preventable, chronic or acute, or from human activity or deliberate attack, CDC responds to America's most pressing health threats. CDC is headquartered in Atlanta and has experts located throughout the United States and the world.

Kind Regards,

State Coordination Task Force

(Sent by BCC to PHEP directors, state epidemiologists, state health officials, public health laboratory directors, BCHC, and national and federal partners)

ADVANCES: WEEK OF MARCH 15, 2020

By NSF Staff

TALLAHASSEE --- Amid a series of public- and private-sector shutdowns spurred by the rapidly spreading novel coronavirus, Florida officials are refusing to cancel Tuesday's presidential primary elections.

Democrats can choose from more than a dozen candidates on the ballot, although the primary has basically boiled down to a two-man race between former Vice President Joe Biden and U.S. Sen. Bernie Sanders of Vermont.

Republicans also can cast ballots as President Donald Trump continues to build his re-election campaign....

Importance:	High

Talk to CDC SME yesterday, she reassured me that they are moving a similar direction, might end up being slightly shorter time period, and guidance should be released soon. Please let me know why I can message this approach to our CHDs in the interim. We will work on a FL version of this helpful document to explain the process.

Subject: TN Criteria for release for isolation and quarantine

Hi all –

See attached guidance TDH will be following for releasing cases and contacts from isolation/quarantine. (This is different than the 7 days I previously said).

Attaching the powerpoint in case anyone would like to adapt for their own use.

Julie

---

The American Veterinary Medical Association (AVMA) has updated their COVID-19 webpage https://www.avma.org/resources-tools/animal-health-and-welfare/covid-19. They are "…working with federal agencies, including the CDC and FDA; gathering expertise from veterinarians and others working in public health and disaster response; collaborating with state veterinary medical and species-specific organizations, the AAVMC, veterinary schools, and the AAVSB; and other colleagues across the healthcare system…"

I've attached the two FAQ documents posted on the AVMA website (current as of 3-15-20). The guidelines for veterinarians and clinics may be useful for animal shelters as well.

Thank you,
LER

---

The HIV/AIDS Section, in collaboration with the Bureau of Public Health Pharmacy is pleased to announce:

1. Two updates to the Test and Treat (T&T) formulary, and
2. The approved use of manufacturers' pharmaceutical samples for T&T in County Health Departments (CHDs) as a cost savings measure.

Test and Treat Formulary Updates

A. Symtuza® (a co-formulated tablet of Prezcobix® and Descovy®) is now available for the Test and Treat Issuance Program. Practitioners in the CHD are asked to use existing Prezcobix®/Descovy® stock before using Issuance Program Symtuza®.

B. New a regimen for women living with HIV intending to conceive:

- Raltegravir 400 mg (Isentress®) twice daily with or without food
  WITH
- Tenofovir disoproxil fumarate 300 mg/emtricitabine 200 mg (Truvada®) one tablet daily with or without food

Manufacturers' Pharmaceutical Samples

In fiscal year 2018-2019, the Department spent approximately $6,080,429 on T&T medications. As a potential cost-savings measure for the Department, we ask that CHD practitioners consider the use of manufacturer samples and vouchers for T & T clients, as appropriate, and in accordance with the Bureau of Public Health Pharmacy's Policy DOHP 395-1, which states CHD practitioners are allowed to obtain manufacturer samples.

There are two types of samples available with the current T & T formulary:

Symtuza® vouchers which are submitted along with a prescription to most retail pharmacies for the client to receive a bottle of Symtuza® at no cost (one per lifetime); or

Biktarvy® sample packages which are requested and maintained per the DOH Policy 395-1.

Please see the attached manufacturer pharmaceutical representative rosters to contact your representative. (Symtuza® is available through Janssen and Biktarvy® is available through Gilead).

Please feel free to direct any questions or concerns to Dr. Jeff Beal, HIV Section medical director at Jeff.Beal@flhealth.gov or Jeannette Iriye, HIV Section registered nurse consultant at Jeannette.Iriye@flhealth.gov.

Together, we can end the HIV epidemic in Florida.

AMERICAN OVERSIGHT

Aging Report Accountant - 031620.xlsx

Greetings:

The following charges are pending the Accountant sign-off in Works. These aged charges will need to be approved immediately, as they are over the 10 day mark. If you need assistance, please don't hesitate to contact Purchasing Card Administration. In addition, this is also provided at the link below.
Thanks.

Aging Report AH - APR - 031220.xlsx
Importance: High

Greetings:

The following charges are pending the Accountholder or Approver sign-off in Works. These aged charges will need to be approved immediately, as they are over the 10 day mark. If you need assistance, please don't hesitate to contact Purchasing Card Administration. In addition, this is also provided at the link below.
Thanks.

Mission: "To protect, promote & improve the health of all people in Florida through integrated state, county, & community efforts."

Please note: Florida has a very broad public records law. Most written communications to or from state officials regarding state business are public records available to the public and media upon request. Your email communications may therefore be subject to public disclosure.

AMERICAN OVERSIGHT

From: Central Purchasing
Subject: BULLETIN: Updates to Assigned Buyer Codes (MFMP)/ New Staff
Date: Wednesday, March 18, 2020 11:53:35 AM
Attachments: Buyer Code Assigments.xlsx

With our two new staff members joining the Central Purchasing Office team, the MFMP Buyer Code Assignments have been updated.

With the exception of Buyer Code 007, all CHDs/programs now have an assigned buyer. Those assigned 007 will continue to be worked by all Central Purchasing Office staff until this last vacancy is filled. We will send a final updated spreadsheet accordingly.

Please join us in welcoming Amber Wyartt (Buyer Code 005) and Niki Overstreet (Buyer Code 008) to the team!

From: Central Purchasing <CentralPurchasing@flhealth.gov>
Sent: Monday, February 24, 2020 11:32 AM
Subject: BULLETIN: Updates to Assigned Buyer Codes (MFMP)

Due to reorganization of workload within the Central Purchasing Office, we have updated the assigned Buyer Code Assignments (available in SharePoint). Effective immediately, please use the buyer code assigned to your CHD/ program when submitting purchasing requisitions. This does not affect PR's already in the approval flow process.

The list has been provided as an excel document and has three separate tabs. We kept the old format (tab 1) for familiarity reasons, however a new format has been generated (tab 2) to make the document easier to search/filter. The third tab merely identifies the Central Purchasing Office staff members assigned to each buyer code.

CHDs/programs assigned a "Vacant" buyer code will be worked by all Central Purchasing Office Staff until the positions are filled. When those positions are filled, we will update the spreadsheet accordingly.

Please make sure you review the new assignments prior to submitting new requisitions.

Thank you.

Subject: CDC COVID-19 Case Count Confirmation 03/11/2020
Date: Wednesday, March 11, 2020 6:54:03 PM
Attachments: CSTE COVID-19 Response New CDC Standard Process for Displaying Reported... (141 KB).msg
Attachment1_ReportingUpdates_2020March8.docx

Dear Partners,

As described in an email sent from the CSTE COVID-19 Leadership Team (see attached), CDC is instituting a standard process for confirming publicly reported cases by jurisdiction.

What you need to do/know now:

- We will conduct case confirmation **daily** (for web posting Monday–Friday). As the response evolves, the frequency of these requests will likely decrease.
- At the bottom of this email, you will find a table with the current preliminary case counts we have for each jurisdiction **as of 4 pm ET on Wednesday, March 11**.
- By **9 am ET Thursday, March 12**, please confirm case counts for your jurisdiction (your numbers **as of 4 pm ET Wednesday, March 11)** using the CDC Case Confirmation Portal (data are collected via Epi Info and stored on a secure CDC server):

https://go.usa.gov/xdftq

What you need to know about how your information will be presented:

- These data represent cases detected and tested in the United States through U.S. public health surveillance systems since January 21, 2020. They do not include people who returned to the United States via State Department-chartered flights. **We ask that the preliminary information shared in this email not be distributed.**
- What will be shared on the CDC website (updated daily at 12 pm, ET):
  - **The total case count** [presumptive + lab-confirmed], i.e., the actual number of *total* cases (e.g., 0, 6, 35) will be posted. **EXCEPTION**: **Jurisdictions with one to five cases will be depicted as a range: "1–5 cases"**
  - Other information shared will be used for internal awareness and will not be shared publicly at this time.

What you need to do/know later:

- DCIPHER users can update and analyze their own jurisdiction's data at: https://dcipher.cdc.gov/. If your jurisdiction does not currently have DCIPHER users, but you would like to move to Phase 2 reporting as described in the attached guidance, please email eocevent118@cdc.gov to confirm your readiness.

Sincerely,

CDC COVID-19 Epidemiology Task Force

2019nCoV_PUICRF instructions_2020Mar15_final_clean.docx

Dear Partners,

CDC continues to institute a standard process for confirming publicly reported cases by jurisdiction.

What you need to do/know now:

- We will conduct case confirmation **daily** (for web posting Monday–Friday). As the response evolves, the frequency of these requests will likely decrease.
- At the bottom of this email, you will find a table with the following:
  - current preliminary case counts we have for each jurisdiction **as of 4 pm ET on Monday, March 16**.
  - general community level transmission characterization (current options: Yes [community transmission is occurring], Undetermined, N/A)
- By **9 am ET Tuesday, March 17**, please use the CDC Case Confirmation Portal (data are collected via Epi Info and stored on a secure CDC server) to:
  - confirm case counts for your jurisdiction (your numbers **as of 4 pm ET Monday, March 16)**
  - if needed, modify your "community level transmission characterization" by using the "additional information" field in the link below

https://go.usa.gov/xdftq

What you need to know about how your information will be presented:

- These data represent cases detected and tested in the United States through U.S. public health surveillance systems since January 21, 2020. They do not include people who returned to the United States via State Department-chartered flights. **We ask that the preliminary information shared in this email not be distributed.**
- What will be shared on the CDC website (updated daily at 12 pm, ET):
  - **The total case count**, i.e., the actual number of *total* cases (e.g., 0, 6, 35) will be posted. **EXCEPTION**: **Jurisdictions with one to five cases will be depicted as a range: "1–5 cases"**
  - General community level transmission characterization
  - Other information shared will be used for internal awareness and will not be shared publicly at this time.

What you need to do/know later:

- DCIPHER users can update and analyze their own jurisdiction's data at: https://dcipher.cdc.gov/. If your jurisdiction does not currently have DCIPHER users, but you would like to move to Phase 2 reporting as described in the attached guidance, please email eocevent118@cdc.gov to confirm your readiness.

Resending updated guidance [initially sent on 3/15]: See Attachment 1 that addresses commonly asked questions and the effects of new laboratory testing guidance on use of the National Case Report Form. Key changes are highlighted in yellow. These updates are reflected in the National Case Report Form Instruction Guide (attachment: 2019nCoV_PUICRF instructions_2020Mar15_final), which will be posted to the CDC website later this week.

Sincerely,

CDC COVID-19 Epidemiology Task Force

Jurisdiction	Code	Total cases reported*	Deaths reported**	Community Transmission

Dear Partners,

CDC continues to institute a standard process for confirming publicly reported cases by jurisdiction.

What you need to do/know now:

- We will conduct case confirmation **daily** (for web posting Monday–Friday). As the response evolves, the frequency of these requests will likely decrease.
- At the bottom of this email, you will find a table with the following:
  - current preliminary case counts we have for each jurisdiction **as of 4 pm ET on Tuesday, March 17**.
  - general community level transmission characterization
- By **9 am ET Wednesday, March 18**, **please use the CDC Case Confirmation Portal** (data are collected via Epi Info and stored on a secure CDC server) to:
  - confirm case counts for your jurisdiction (your numbers **as of 4 pm ET Tuesday, March 17)**
  - if needed, modify your "community level transmission characterization"

https://go.usa.gov/xdtyJ

What you need to know about how your information will be presented:

- These data represent cases detected and tested in the United States through U.S. public health surveillance systems since January 21, 2020. They do not include people who returned to the United States via State Department-chartered flights. **We ask that the preliminary information shared in this email not be distributed.**
- What will be shared on the CDC website (updated daily at 12 pm, ET):
  - **The total case count**, i.e., the actual number of *total* cases (e.g., 0, 6, 35) will be posted. **EXCEPTION**: **Jurisdictions with one to five cases will be depicted as a range: "1–5 cases"**
  - Community level transmission characterization
  - Other information shared will be used for internal awareness and will not be shared publicly at this time.

What you need to do/know later:

- DCIPHER users can update and analyze their own jurisdiction's data at: https://dcipher.cdc.gov/. If your jurisdiction does not currently have DCIPHER users, but you would like to move to Phase 2 reporting as described in the attached guidance, please email eocevent118@cdc.gov to confirm your readiness.

Sincerely,

CDC COVID-19 Epidemiology Task Force

Attachments:	CDC+ HAN+ 430_Info+ and+ Guidance+ about+ Global+ Travel+ on+ Cruise+ Ships.pdf

The following is a message from FLHAN Everbridge System.

Summary

The Centers for Disease Control and Prevention (CDC) recommends all persons defer any travel on cruise ships, including river cruises, worldwide because of the increased risk of SARS-CoV-2 transmission onboard ships. Deferring travel is especially important for older adults and all people with serious chronic medical conditions (such as heart disease, diabetes or lung disease), because of their increased risk for severe disease. This health update provides information to clinicians and state and local health departments about the current coronavirus disease 2019 (COVID-19) situation and the risks associated with travel on cruise ships, including river cruises.

If you need assistance please contact flhealthsystems@flhealth.gov

CDC Reports first known employee with COVID-19 Infection

The Centers for Disease Control and Prevention (CDC) today confirmed the first case of 2019 novel coronavirus disease (COVID-2019) in a CDC employee. Laboratory testing done at CDC confirmed this diagnosis. This individual is in good condition and is isolated to prevent spread of infection to others. Our best wishes go to the employee for a rapid and full recovery.

This individual was not involved in the COVID-19 response, has not been present in the CDC workplace since March 6, and was asymptomatic at that time. Staff working in the same unit are teleworking while we will do a deep cleaning of the office space.

After developing symptoms, the individual took the appropriate action and stayed home. CDC will handle each case with the utmost respect to privacy, while also informing potentially affected staff and taking swift measures to mitigate spread of the virus. Please understand that out of respect for individual privacy, there are details about this case (or others moving forward) that we will not be able to share.

CDC is considering and taking all necessary actions to further protect the health and safety of our workforce. CDC has been taking proactive steps to reduce the risk of infection among its workforce. These steps have included encouraging sick employees to stay home, increasing the frequency of cleaning CDC facilities, canceling large meetings and staff travel, increasing the use of teleworking among staff, and encouraging social distancing and other preventive measures.

AMERICAN OVERSIGHT

The health and safety of the CDC workforce is a top priority for the agency. CDC will continue to assess and improve ways to protect staff from COVID-19 and other health risks. For more information about COVID-19, see https://www.cdc.gov/coronavirus/2019-nCoV/index.html

Cc: scott.rivkees@flhealth.gov; Jennifer Love; Eddie Segev
Subject: CDC Requirement
Date: Tuesday, March 17, 2020 3:48:33 PM

Hello Dr. Villalta –

One of the requirements just presented by CDC is as follows:

1. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

Is this something you could help arrange? The air ambulance company is not doing so.

Thanks,

Eleni

Subject:	CDC Vital Signs: Screening for Colorectal Cancer
Date:	Thursday, March 12, 2020 9:06:07 AM
Attachments:	FACT SHEET_Vital Signs_March 2020_3-6-2020_FINAL.pdf MMWR VS_March 12__Colorectal Cancer_mm6910-H.pdf

---

Dear Colleagues:

This month's CDC *Vital Signs* report focuses on **screening for colorectal cancer**. Please see the attachments for more information and advance copies of the *Vital Signs* materials. This latest edition of *Vital Signs* will be released **today, Thursday, March 12, 2020, at 1:00 pm (EDT)**. **All attached materials are EMBARGOED until 1:00 pm (EDT)**.

If you have any questions, please send them to cstltsdirector@cdc.gov.

Sincerely,

José T. Montero, MD, MHCDS
Director, Center for State, Tribal, Local, and Territorial Support
Centers for Disease Control and Prevention

Dear Colleague:

Today, the Centers for Disease Control and Prevention (CDC) will post on its website a new *Vital Signs* report on colorectal cancer screening in the U.S. The findings show that many adults wait too long to get screened. Colorectal cancer is the second biggest cancer killer in the U.S. but is highly preventable. Screening catches abnormal growths (polyps) in the colon and rectum before they become cancers. Testing for colorectal cancer is recommended beginning at age 50, but only half of adults have gotten a screening test in their early 50s.

According to the Vital Signs report:

- 68.8% of adults were up to date with screening: 79.2% of those age 65–75, but only 63.3% of those age 50–64.
- At ages 50–64, screening was lowest among those without health insurance (32.6%) and highest among those with a reported household income of $75,000 or more (70.8%).
- Among states, the screening rate was highest in Massachusetts (76.5%) and lowest in Wyoming (57.8%).

About 20%–30% of adults screened will have precancerous polyps in their colon. About nine out of every 10 people whose colorectal cancers are found early and treated appropriately are still alive five years later.

There are several test options available that can be done either at home or in a clinic to prevent or detect cancer early. The six different ways to get screened for colorectal cancer are the fecal

AMERICAN OVERSIGHT

occult blood test (FOBT), the fecal immunochemical test (FIT), the multi-target stool DNA (FIT-DNA) test, computed tomographic colonography (CTC), sigmoidoscopy, or colonoscopy. Different tests may be best for different people; a healthcare provider can explain the benefits and drawbacks of each.

This issue of *Vital Signs* addresses some of the common questions people have about colorectal cancer screening and highlights what healthcare providers and individuals can do to ensure on-time screening.

Thank you for your continued hard work and ongoing collaboration. Please visit the *Vital Signs* website to learn more about colorectal cancer and the importance of screening. We also encourage you to share these materials with your colleagues.

Sincerely,

AMERICAN OVERSIGHT

From:	Chapman, Shay
To:	Roberson, Shamarial
Cc:	Traul, Robert; Isaac, Sean; Jordan, Melissa Murray
Subject:	CHD Dental Clinic Guidance
Date:	Tuesday, March 17, 2020 8:27:27 AM
Importance:	High

Shamarial,

Please see the information below that we propose Dr. Traul send out to the CHD Dental Directors.

The Florida Department of Health (FDOH) acknowledges the growing concern and risks the public and dental professionals face from COVID-19. All dental providers and healthcare professionals play an important role in mitigating the spread of COVID-19. Please review the CDC Guidance for Healthcare Professionals.

On March 16, 2020 federal recommendations were released suggesting social distance and the prevention of groups ten or more. Also on March 16, 2020 the American Dental Association released ADA Guidance to postpone elective procedures for the next three weeks.

Due to the extraordinary situation, the Florida Department of Health recommends dental programs postpone elective procedures for the next three weeks and reassess the situation at that time. Concentrating on the provision of emergency dental care will serve the public and alleviate any emergencies from placing more stress on hospitals and emergency rooms. Clinics should establish procedures to provide care for these patients after taking appropriate precautions to limit the risk of spreading COVID-19. The FDOH recommends all living in Florida practice social distancing and take steps to limit the risk of spreading COVID-19.

Thanks,
Shay

CIFOR Third Edition Guidelines_Facebook.png

Hi CIFOR Promote DT,

We hope everyone is well. In lieu of having our Promote DT meeting this month, please see below for updates and input needed.

1. **Spring Meeting Announcement**
   - Due to various employee travel bans at the state, local and federal levels, CSTE is developing alternative plans for the Spring meeting. More information will be shared in an all-Council email.

2. **3rd Ed Guidelines Updates**
   - 3rd Ed Guidelines Printing Needs survey – The printing needs survey at the following link: https://app.smartsheet.com/b/form/15cdaf107153491db9d67870d6699187. This form hosted on Smartsheet allows anyone with the link to fill out the form. Additionally, it allows us to maintain and track the number of guidelines requested as well as track the status of the request. Please see the three attached pdf files to see the form, the tracking sheet and the confirmation receipt. Please provide any feedback on the form to India.

   - Update on 3rd Ed Guidelines Printing Status – The Guidelines are nearing completion with graphic design and formatting. As of today, we've received Chapters 1-6, the table of contents and the acknowledgements. Following the completion, a full layout will be provide for review prior to sending to the printers. The printers are prepared to produce the guidelines in 4 weeks. In the interim, the pdf version will be available online on the CIFOR website.

   - New 3rd Ed Guidelines Cover - Please see the final cover attached (page 1). FSIS asked that we remove the live cattle and replace it with a burger.

   - Options for Guidelines promotion if some/all of the spring and summer conferences are postponed or cancelled. Any suggestions would be helpful (e.g. webinar series, etc.)

AMERICAN OVERSIGHT

- Postcard flyers – is there still a need for printed postcards since many upcoming in-person meetings/conferences are being cancelled?

-

- Promotional blurbs
    - Finalized blurbs for the 3rd Ed. Guidelines are forthcoming. Attached are draft blurbs and are currently being reviewed by CSTE's communications specialist. Once finalized, India will send the promotional blurbs to the Council to send out via respective communication channels prior to the digital copies being released onto the CIFOR website.

Let us know if you have any questions.

Thanks,
Amy

Palm Beach County resident, 6, tests positive for coronavirus
Date Collected Mar 18, 2020 2:04 PM EDT
Category Local
Source WFLX Fox 29
Market West Palm Beach, FL
Language English
March 18, 2020 at 1:52 PM EDT - Updated March 18 at 2:12 PM The Florida Department of Health in Palm Beach County confirmed that a 6-year-old child has tested positive for coronavirus. Health department spokesman Alex Shaw told Contact 5 the child tested positive in New York, and the case is currently under investigation. FOX 29 has contacted Palm Beach County school officials to see if they have been notified about the case. It is the youngest confirmed coronavirus case in the state.

'Not a hurricane': Florida officials provide residents with a list of what not to do in a pandemic
Date Collected Mar 18, 2020 1:58 PM EDT
Category Local
Source FOX 13 News.com
Market Tampa, FL
Language English
Floridians are no strangers to preparing for hurricanes. But that experience doesn't translate to pandemics, as state officials want to point out. The Florida Department of Emergency Management is reminding residents that preparations for the coronavirus are different than what needs to be done in advance of a storm. The department posted a graphic with a list of what to do -- and what not to do. At the top of the list, they encouraged Floridians to practice social distancing in order to protect those most at risk. But on the other side, they reminded people not to hoard supplies, buy unlimited amounts of water, or fill up their bathtubs. If you feel sick: The Florida Department of Health has opened a COVID-19 Call Center at 1-866-779-6121. Agents will answer questions around the clock. Questions may also be emailed to covid-19@flhealth.gov. Email responses will be sent during call center hours.

Coronavirus: Testing criteria for elderly, medically frail
Date Collected Mar 18, 2020 1:52 PM EDT

AMERICAN OVERSIGHT

FLORIDA — According to the Florida Department of Health and Florida Agency for Health Care Administration, the first criterion the elderly and medically frail must meet for COVID-19 testing is that they must be 65 or older or have a serious underlying medical condition. The second criterion is that they must have a new onset fever of 100.4 or greater and a cough or other respiratory symptoms including shortness of breath. Samples may be sent to commercial labs (Quest or LabCorp) or hospitals with COVID-19 testing capability. They can also be sent to the Florida Department of Health's public health labs

Third Citrus County resident tests positive for coronavirus
Date Collected Mar 18, 2020 1:38 PM EDT
Category Local
Source Citrus County Chronicle
Market Crystal River, FL
Language English
The Florida Department of Health today announced the third positive test result for coronavirus in Citrus County. The person is an 80-year-old man who traveled to Delaware, the health department reported. The number of travel-related cases is two; with one known contact case. The DOH stated, "a person can be both a travel-related case and a known contact case, just one of those, neither of those, or be pending investigation." A 60-year-old woman was Citrus County's first confirmed case. The DOH said the woman had traveled to Switzerland. The number of cases in Florida is now at 314, per the DOH; while 1,225 people have tested negative. In addition, 954 test results are pending. Health Department advises of possible COVID-19 contact SECO Energy was informed late Tuesday afternoon that a SECO Energy warehouse administrative employee may have had an exposure to a Citrus County resident who has been tested for COVID-19 but results are not available. The employee serves in an administrative role with the cooperative and has limited contact with the public and other employees. The employee is asymptomatic and has been placed in quarantine as a precaution along with the employees with whom he was in contact. The reliability of SECO's electric service plays a critical role in SECO members' health and wellbeing. To keep its employees healthy and ready to serve its members, the cooperative has made changes to mitigate health risks related to member and public interaction.

Brevard's top health official 'self-isolating' after cruise
Date Collected Mar 18, 2020 1:30 PM EDT
Category Local
Source Florida Today
Author Rick Neale
Market Melbourne, FL
Language English
Brevard County's top-ranking health official is "self-isolating" after she went on a cruise last week. Maria Stahl, administrator of the Florida Department of Health in Brevard County, has returned to work as the new coronavirus pandemic continues shuttering the American economy. "Maria is self-

AMERICAN OVERSIGHT

isolating and is in constant contact with DOH-Brevard staff and emergency management," Anita Stremmel, assistant county Health Department director, wrote in a Wednesday morning email. "She is performing her usual duties, in addition to COVID-19 response duties," Stremmel wrote. Last week, President Donald Trump declared a national emergency amid the spread of COVID-19 across the country. Brevard officials also declared a local state of emergency last week.

FLORIDA TODAY requested an interview with Stahl and sent a short list of questions to Stremmel, who serves as the department's Brevard public information officer. Unanswered questions included details on Stahl's cruise — such as dates, port of departure, destinations and cruise line — plus the day she returned to work and whether she is working from home. Since March 8, the Centers for Disease Control and Prevention and the U.S. State Department have recommended that travelers — particularly those with underlying health conditions — defer all cruise ship travel worldwide. Last week, Port Canaveral tenants Carnival, Disney Cruise Line, Norwegian and Royal Caribbean suspended operations during the COVID-19 pandemic. "Cruise passengers are at increased risk of person-to-person spread of infectious diseases, including COVID-19, and outbreaks of COVID-19 have been reported on several cruise ships," the CDC website said Wednesday, among other cruise ship travel warnings. "Cruise travelers should stay home for 14 days after returning from travel, monitor their health, and practice social distancing," the website said.

Last week, Stremmel said Stahl would follow CDC guidelines that were in effect at the time upon her return. Stremmel also said Stahl's cruise did not travel to any countries that had been deemed Level 2 or 3 by the CDC. On March 3, Stahl addressed media about the coronavirus during a series of briefings at the Emergency Operations Center in Rockledge. More than 200 people attended, including county, municipal and public safety officials. Stahl became Brevard's health administrator in November 2016. She has 37 years of public health practice experience, and she has managed various public health programs in Brevard since 1995, according to her bio on the agency website.

Martin County beaches, parks to stay open

MARTIN COUNTY, Fla. — While the Treasure Coast has yet to see its first confirmed case of coronavirus, county leaders continue to meet daily to decide what to close and what to keep open. There was a big turnout at Stuart Beach on Wednesday. The bigger problem was not social distancing, but watching out for man o' war. The Martin County Sheriff's Office had a robust presence as some school resource officers have been temporarily moved to other assignments. On Wednesday, Martin County leaders decided to keep all county beaches open for the foreseeable future. "The beaches are important now that you have so many students in particular both from college and primary schools home," said Martin County Commissioner Ed Ciampi. "The concept of keeping all young people in the house away from their friends presents a different type of problem." Parks are also open, but the libraries have closed after they were used for Florida's primary election

AMERICAN OVERSIGHT

on Tuesday. The Florida Department of Health in Martin County is stressing that anyone feeling sick should check with their primary care doctor first. So far, the health department has only tested eight people. "We're looking at a substantial issue," said Rob Raineri, who heads the non-profit House of Hope. Raineri told commissioners on Wednesday that his agency could see four times as many people asking for financial help starting in April. "The restaurant industry, all the hospitality industry, a lot of hourly people that are being sent home early or furloughed," said Raineri. Raineri is hoping that with kids home from schools and universities, they may be able to lend a hand and volunteer where it's appropriate.

Florida Coronavirus Update: More Than 300 Cases, Nearly Half Are In Miami-Dade & Broward
Date Collected Mar 18, 2020 2:11 PM EDT

Source CBS Miami
Market Miami, FL
Language English
MIAMI (CBSMiami) — Nearly half of all coronavirus cases in Florida are in Miami-Dade and Broward counties. In Florida, the number of cases climbed to 314 on Wednesday afternoon. Eighty of those cases are in Broward and 76 are in Miami-Dade. The next-highest total was Palm Beach County, with 19 cases. The Florida Department of Health says the virus is now in 31 counties. Of the 314 statewide cases, 289 involved Florida residents who are in the state. The other 25 involved non-Florida residents in the state. Meanwhile, six Florida residents had been diagnosed with the virus and isolated out of the state. The highly contagious respiratory disease, known as COVID-19, has caused the deaths of seven Florida residents. The virus is hitting men and older Floridians hardest, with 59 percent of the confirmed cases involving males and 41 percent involving people ages 60 and older.

recommendations and guidelines."

City of Naples closes beaches and pier; Collier County closes beach parking to limit beachgoers
Date Collected Mar 18, 2020 3:20 PM EDT
Category Local
Source WINK TV
Author WINK News
Market Fort Myers, FL
Language English
In an effort to mitigate the spread of the novel coronavirus (COVID-19) and alignment with CDC guidance and Governor DeSantis's Executive Order 20-68, the City of Naples will be closing all public beaches within city limits beginning today through Monday, March 30th. The Pier will be closed at 3:30 p.m. Wednesday; all other beach accesses, beach restroom facilities, parking areas, Lowdermilk Park, and walkways will be closed at 5:00 p.m. Wednesday.

The City of Naples is making its decisions based on guidance from the Florida Department of Health (FDOH) and the Centers for Disease Control and Prevention (CDC). The closures could be extended as the City responds to the public health crisis and direction from the FDOH and CDC. To stay up-to-date on information and guidance for COVID-19, visit the Florida Department of Health website (www.floridahealth.gov) or contact the Collier County Health Department at (239) 252-8200. You can also reach the FDOH Call Center for COVID-19 at (866) 779-6121, Monday through Friday, 8 a.m.-midnight.

For City of Naples residents, Emergency Management has activated a COVID-19 hotline (239) 213-4902 that will be available Monday through Friday, 8:00 a.m. – 5:00 pm. COLLIER COUNTY In an effort to limit the spread of COVID-19, Collier County Government announced that effective sunset Wednesday (March 18, 2020), Collier County beach parking facilities will be closed to the public until further notice. In addition, Collier Area Transit is discontinuing operation of the Beach Bus route 29 until further notice.

These actions are in keeping with CDC COVID-19 guidelines and the Governor's Executive Order to limit large gatherings and encourage social distancing. All Collier County beach access points, outside the City of Naples, will remain open to the public at this time. GOVERNOR'S STATE-WIDE GUIDANCE The Governor is directing parties accessing public beaches in the state of Florida to follow the Centers for Disease Control and Prevention (CDC) guidance by limiting their gatherings to no more than 10 persons

How did Florida hire 100 epidemiologists in a weekend? Here's how.
Date Collected Mar 18, 2020 4:07 PM EDT

AMERICAN OVERSIGHT

Market Saint Petersburg, FL
Language English

TALLAHASSEE — Last week, Florida health officials found themselves overwhelmed. The state's disease experts were working around the clock to trace the rapidly spreading coronavirus, and the state needed more of them. A lot more. But that posed a problem: How in the world do you find public health professionals who investigate the patterns and causes of disease — otherwise known as epidemiologists — who weren't already working to combat the once-in-a-lifetime pandemic? Answer: Florida's universities.

In an unprecedented gathering of resources, the state has recruited 100 professors and students from five universities to help the state understand the coronavirus, known as COVID-19, and how it's spreading. Those professors and students are being hired part-time to do what epidemiologists do: interview people with coronavirus about their history and symptoms, trace their contacts and enter that information into databases. They will be working in coordination with the Florida Department of Health's 264 infectious disease epidemiologists, but they will not be going out in the field to interview coronavirus patients.

Instead, they'll be conducting interviews by phone. Academics and health officials say they couldn't remember the state ever going on such a hiring spree. "To gather the need for this many epidemiologists, I don't know if there's ever been a situation like this," said Janice Zgibor, a professor and associate dean for academic affairs at the University of South Florida's College of Public Health. "I haven't heard of it in my lifetime."

And the state did it over a weekend. On Saturday, officials starting contacting universities. By Sunday, they had hundreds of applicants. Zgibor, who has a Ph.D. in epidemiology, was asked to "gather the troops" at USF. When she heard the idea, she thought it was "genius."

The idea came from Department of Health Deputy Secretary Shamarial Roberson, who has a background in epidemiology. "Based on that experience, I knew exactly where to find them," Roberson said.

The professors and students are coming from Florida State University, the University of Florida, Florida Agricultural and Mechanical University, the University of South Florida and University of Central Florida.

While the public often thinks of epidemiologists as people walking around in biohazard suits, the study of infectious diseases is just one specialty in the field. Epidemiology is a broad field that includes the study of chronic diseases, opioids and vaccines, for example. Regardless of the specialty, epidemiologists share common data-driven methods. They need the who/what/when/where of diseases to track common traits and understand how they spread: How old is the person? How did they contract it? Who else might they have shared it with?

AMERICAN OVERSIGHT

For that reason, not all the students and professors are necessarily infectious disease experts. Cindy Prins, director of the University of Florida's Master of Public Health program, said the state was looking for people with experience interviewing patients and analyzing data. She had no problem finding people willing to sign up. She said the state chose 25 doctoral and masters students and five faculty members, including herself. "For students in particular, they just really want to help right now," said Prins, who has a background in infection control. "They want to do something."

Market Orlando, FL
Language English
After sticking with a strict set of rules, the Florida Department of Health has finally expanded the testing criteria for COVID-19, allowing physicians to order a test based on their clinical judgment, mirroring what the CDC has been recommending. According to new clinical guidance issued in an email to providers on Sunday, clinicians can choose to order a COVID-19 test even if their patient doesn't fall within these six categories: contact with someone who has COVID-19; history of international or cruise travel; history of visits to domestic locations with community spread of the virus; hospitalization with acute lower respiratory illness of unknown origin; 65 years and older with chronic health problems; and being immunocompromized. The previous criteria only included history of travel, contact with someone who has COVID-19 and lower respiratory illness of known origin. Clinicians weren't given the liberty to use their own judgment. If doctors choose to order a test for their patients within or outside the six criteria, they need to collect the samples and send them to their health-care facility or a commercial lab like LabCorp and Quest. Samples collected from patients who fall within the state's six criteria can also be sent to one of the state's three public health laboratories. As of Sunday, Florida had 136 confirmed cases of COVID-19 among its residents, including four deaths. Since March, 1, when the first two cases of the illness were reported by the state, 684 people have tested negative and 514 tests are pending results. The number of tests in Florida has climbed steadily in recent days because commercial labs have come on board and expanded the testing capacity in the state.

The Florida Department of Health launched an interactive COVID-19 map on Monday to help residents keep up with the latest information on cases in the state. The map breaks down the number of cases in each county and gives an overview of information. That includes the total number of cases in that county, the age range, the gender of the patients and how many of the cases are travel related. The department also announced it would be updating its website twice a day with the latest numbers.

AMERICAN OVERSIGHT

Market Fort Myers, FL
Language English
As of Tuesday morning, there are 160 positive cases of coronavirus (COVID-19) in Florida. This number includes 18 cases of non-Florida residents diagnosed in the state. There are 5 total deaths in Florida. In Southwest Florida, there are 11 total cases, with one in Charlotte County, four in Lee County, and six in Collier County. More than 4,600 people have tested positive for the new COVID-19 disease in the U.S. and at least 71 have died. Globally, the death toll was just over 7,300 on Tuesday. While more than 183,000 people have caught the virus around the world, almost half have already recovered, and the vast majority of cases remain mild. The latest numbers from the state health department includes an Orange County patient-resident who died Monday after testing positive for COVID-19. The patient was a 68-year-old woman. Her test was performed in California following travel to Asia. IF YOU FEEL SICK: The Florida Department of Health has opened a 24-hour COVID-19 Call Center at 1-866-779-6121. Questions may also be emailed to covid-19@flhealth.gov. Email responses will be sent during call center hours.

Subject: COVID-19 Questions for Counties with Active Cases Call
Date: Friday, March 13, 2020 9:54:24 AM

Good Morning,

Thank you for taking the time to conference with counites that have active cases. The Pasco IMT is forwarding questions prior to the call to assist with streamlining and using your time effectively.

- We are getting an extremely high volume of calls for testing of people do not meet BPHL or commercial testing criteria. Can we please clarify with private providers that commercial testing priorities are for the following cohorts? Are we performing commercial testing on all referrals from these cohorts at the CHDs? How do we manage expectations of those who do not meet testing criteria?
    - Hospitalized patients who have signs and symptoms compatible with COVID-19 in order to inform decisions related to infection control.
    - Other symptomatic individuals such as, older adults and individuals with chronic medical conditions and/or an immunocompromised state that may put them at higher risk for poor outcomes (e.g., diabetes, heart disease, receiving immunosuppressive medications, chronic lung disease, chronic kidney disease).
    - Any persons including healthcare personnel[2], who within 14 days of symptom onset had close contact[3] with a suspect or laboratory-confirmed[4] COVID-19 patient, or who have a history of travel from affected geographic areas[5] (see below) within 14 days of their symptom onset.
    - https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html

- With symptomatic older, immunocompromised, etc. clients, are we testing all of these clients without private providers screening for flu/respiratory panel beforehand?

AMERICAN OVERSIGHT

- Are we working with the private healthcare systems to develop a plan for the potential volume of tests that may need to be performed?

- Can private providers perform initial testing and CHDs manage clearance testing to reduce strains on local CHDs? We do not currently have supplies on hand to test the number of people who have been referred to us by private providers just this morning.

- When can we expect sampling supplies and PPE to come from logistics? Our requests have been submitted to ready-ops. We have also independently ordered these supplies several times over the last month and received no shipments.

Sincere Thanks,

Jennifer Gray, RN

THE WHITE HOUSE

State and Local Leaders,

President Donald J. Trump is leveraging the full power of the Federal Government to protect the health and safety of the American people. The President's emergency declaration will give healthcare providers on the front lines of this pandemic the flexibility they need to respond. The Trump Administration is working to rapidly expand coronavirus testing across the nation and make sure Americans who need them have access. Below you will find additional information. You can find the latest information on COVID-19 HERE.

Recent Actions & Updates

President Donald J. Trump Directs FEMA Support Under Emergency Declaration for COVID-19

- Presidential Proclamation Here
- Letter from President Donald J. Trump on Emergency Determination Under the Stafford Act to U.S. Department of Homeland Security, Department of Treasury, U.S. Department of Health & Human Services, and Federal Emergency Management Agency. The letter includes specific recommendation to governors including:
    - "In order to meet the challenges caused by this emergency pandemic, **I have encouraged all State and local governments to activate their Emergency Operations Centers and to review their emergency preparedness plans.** In the meantime, I expect FEMA to continue to review all ways in which it can provide assistance to States consistent with the authorities provided to it by this letter and by statute."
    - "I **encourage all governors and tribal leaders to consider requesting Federal assistance under this provision of the Stafford Act, pursuant to the statutory criteria**. I stand ready to expeditiously consider any such request."

AMERICAN OVERSIGHT

- President Donald J. Trump Has Mobilized the Full Resources of the Federal Government to Respond to the Coronavirus
- FEMA Fact Sheet

Memorandum on Expanding State-Approved Diagnostic Tests

- Full Memorandum Here
- Secretary Azar Designates Admiral Giroir to Coordinate COVID-19 Diagnostic Testing Efforts
- The FDA is working to help significantly speed up testing and expand accessibility for Americans. The FDA issued emergency approval for a new commercial coronavirus test by Roche that will help greatly expand testing nationwide. FDA: "The FDA authorized the Roche cobas SARS-CoV-2 Test, the third Emergency Use Authorization (EUA) granted for a diagnostic test during the COVID-19 outbreak. Laboratories can immediately run tests on Roche's high-volume platform, which will greatly increase national testing capacity."
- FDA gives flexibility to New York State Department of Health, FDA issues Emergency Use Authorization Diagnostic

Framework Mitigation Strategies for Communities with Local COVID-19 Transmission

Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts.

- A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(more here; 10-page frame work for States, localities, and communities).*
- CDC mitigation strategies for Santa Clara (CA), Seattle (WA), New Rochelle (NY), Florida, and Massachusetts.

Other Actions & Updates

- HHS Funds Development of COVID-19 Diagnostic Tests

Centers for Medicare & Medicaid Services (CMS) announced critical new measures designed to keep America's nursing home residents safe from COVID-19 taking the form of a memorandum and is based on the newest recommendations from the Centers for Disease Control and Prevention (CDC).

AMERICAN OVERSIGHT

Federal Motor Carrier Safety Administration (FMCSA) - Emergency Declaration- Hours of Service Relief: FMCSA has issued an Emergency Declaration covering all 50 states and the District of Columbia to provide hours of service relief to drivers transporting emergency relief. Specifically, the declaration provides for regulatory relief for commercial motor vehicle operations providing direct assistance supporting emergency relief efforts, and will cover the shipment of: medical supplies and equipment related to the testing, diagnosis and treatment of COVID-19; supplies and equipment, including masks, gloves, hand sanitizer, soap and disinfectants, necessary for healthcare worker, patient and community safety, sanitation, and prevention of COVID-19 spread in communities; food for emergency restocking of stores; equipment, supplies and persons necessary for establishment and management of temporary housing and quarantine facilities related to COVID-19; persons designated by Federal, State or local authorities for transport for medical, isolation or quarantine purposes; and personnel to provide medical or other emergency services. The declaration does not cover routine commercial deliveries, or transportation of mixed loads of essential supplies and/or persons and goods or persons not related to emergency needs. Effective immediately, the declaration will remain in effect for the duration of the emergency or until 11:59 P.M. (ET), April 11, 2020, whichever occurs sooner.

U.S. Department of Housing & Urban Development (HUD) Quick Guide to CDBG Eligible Activities to Support Infectious Disease Response

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

AMERICAN OVERSIGHT

Sincerely,

Nic

---

Fact Sheet on H.R. 6021 – Families First Coronavirus Response Act

Following extensive negotiations with Congress, President Trump announced his support for legislation to help American workers and families impacted by the coronavirus.

- The President is committed to ensuring American workers and families have the support they need, and this legislation follows through on that.
- The Administration engaged in extensive discussions with Congress to secure key provisions and changes in language.
- As a result of the Administration's efforts, substantial improvements were made from the initial bill.

This delivers on President Trump's plan to help American workers and their families who have been harmed by the coronavirus outbreak.

- The legislation establishes tax credits to provide paid sick and family medical leave for employment interruptions related to coronavirus.
    - This will provide support for employees with coronavirus, under quarantine, caring for someone affected, or with children whose school has closed.
- Eligible employers will receive a dollar-for-dollar tax credit for any paid leave they provide under this program.
- Importantly, employees will be able to receive the paid leave directly from their employer, rather than an inefficient government run program.

AMERICAN OVERSIGHT

    - We are partnering with businesses, not imposing an unfunded mandate on them.

- The legislation also incentivizes states to ease access to unemployment benefits, assisting Americans who may be unemployed due to the impact of the virus.

- In order to help families and the most vulnerable, the bill provides funding and flexibility for emergency nutritional aid for senior citizens, women, children, and low-income families.

To protect the health of our citizens, the legislation provides free coronavirus testing for all Americans who need it.

- This includes free testing through commercial insurance, Medicare, Medicaid, CHIP, Indian Health Service, and TRI-CARE.
- Every American who needs a test, should be able to get a test regardless of their financial circumstances.

Fact Sheet – President Donald J. Trump Has Mobilized the Full Resources of the Federal Government to Respond to the Coronavirus

MOBILIZING ALL FEDERAL RESOURCES: President Donald J. Trump is leveraging the full power of the Federal Government to protect the health and safety of the American people.

- President Trump is exercising statutory authorities to declare a national emergency in response to the coronavirus.
- The unprecedented action the President is taking invites States, territories, and tribes to access over $42 billion in existing funding to combat the coronavirus.
    - The Administration has taken decisive action to ensure State, local, and tribal leaders have the resources they need to provide protective measures for their communities.
    - The Small Business Administration also has authority and available funding to make over $7 billion in loans to qualifying small businesses to assist economic recovery.
- President Trump is directing further actions across his Administration in response to the coronavirus.
    - The Centers for Medicare and Medicaid Services has announced guidance to limit medically unnecessary visits to nursing homes to protect vulnerable elderly Americans
    - The Secretary of the Education will be waiving interest on all student loans held by the Federal Government.
    - The President is directing the Department of Energy to purchase large quantities of crude oil for the strategic reserve.
- The President is urging every State to set up emergency operational centers and

AMERICAN OVERSIGHT

is asking every hospital to activate its emergency preparedness plan.

EMPOWERING HEALTHCARE PROVIDERS: The President's emergency declaration will give healthcare providers on the front lines of this pandemic the flexibility they need to respond.

- President Trump continues to cut through every piece of unnecessary red tape that may hinder our response efforts and make every Federal resource available.
- The President will empower the Secretary of Health and Human Services (HHS) to waive provisions of certain laws and regulations and give maximum flexibility to healthcare providers to care for their patients.
- The declaration will provide HHS with critical authorities to waive:
    - Certain laws to enable telehealth, remote doctors' visits, and hospital check-ins
    - Licensing requirements so doctors from other states can provide services in areas with the greatest need.
    - Critical Access Hospital requirements to allow those hospitals to have more beds and longer lengths of stay
    - The requirement of a 3-day hospital stay prior to admission to a nursing home.
    - Rules hindering hospitals' ability to bring additional physicians on board or obtain needed office space.
    - Restrictions on where hospitals can care for patients.
- The Administration will be working to eliminate every obstacle possible to ensure healthcare providers can deliver Americans the care they need.

RAPIDLY EXPANDING TESTING: The Trump Administration is working to rapidly expand coronavirus testing across the nation and make sure Americans who need them have access.

- President Trump is mobilizing resources across the Federal Government to accelerate testing and expand access for more Americans.
    - The President wants to make sure that those who need a test can get a test safely, quickly, and conveniently.
- The Administration is working with the private sector to open up drive-through testing collection sites in critical areas impacted by the coronavirus.
- The Administration is working with Google to develop a website Americans can go to determine whether a test is needed and, if so, facilitate testing at a nearby location.
- The Food and Drug Administration is issuing emergency authorization for new commercial coronavirus tests that will help significantly expand testing across the country.
    - One new test produced by Roche has already been authorized and authorization is coming for another test very shortly.
    - Up to 2 million additional tests are expected to be available next week

AMERICAN OVERSIGHT

thanks to these efforts.

- President Trump and his Administration are working to provide maximum flexibility for States to approve labs for coronavirus testing.
- HHS recently announced it is providing funding to help accelerate the development of two rapid diagnostic tests.
- The Administration has designated Assistant Secretary for Health Brett Giroir to take the lead in coordinating testing efforts to ensure seamless access for patients, doctors, and hospitals.
- The Administration continues to cut red tape that restricted who qualifies for testing.

Updated - Background & Additional Information for State & Local Officials

U.S. Department of Health & Human Services (HHS)

- The Department of Health and Human Services is committed to providing as much information as possible to prepare communities for response to COVID-19. The Department, through the Centers for Disease Control and Prevention, the Food and Drug Administration, and other agencies, continuously provide guidance to healthcare providers, laboratories, communities, and state and local officials for dealing with suspected or confirmed cases of COVID-19. The most up-to-date information can be found at **www.coronavirus.gov**.
- Wednesday, March 12, CDC **announced** the imminent release of almost $600 million to support state and local authorities respond to the COVID-19 outbreak. Full funding amounts are **here**,
- Framework Mitigation Strategies for Communities with Local COVID-19 Transmission: Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts.
    - A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(more* **here***; 10-page frame work for States, localities, and communities)*.
    - CDC mitigation strategies for **Santa Clara** (CA), **Seattle** (WA), **New Rochelle** (NY), **Florida**, and **Massachusetts**.
- The CDC has been actively working to address the need for testing across the country. You can find more information about testing **here**. We encourage review of the **Updated Guidance on Evaluating and Testing Persons for Coronavirus Disease 2019**, as well as the recently updated the **FAQ website for laboratories** to determine best practices for testing.
- The U.S. Public Health Service Commissioned Corps has deployed hundreds of officers to help with this response. As America's Health Responders, the Commissioned Corps is currently very involved in assisting the CDC with airport

AMERICAN OVERSIGHT

screenings, deploying staff to support hospitals, among other important missions. Find out more about Commissioned Corps activities **here**.

- Part of preparedness includes a robust blood supply. The current situation around COVID-19 heightens the need for a ready blood supply, please encourage your health community members to keep their appointments to donate blood.
- CDC released updated **guidance** on infection prevention and control recommendations for healthcare workers. Healthcare workers are fighting this outbreak on the front lines, and this guidance is intended to provide assistance to healthcare settings that are handling suspected or confirmed cases of COVID-19. This guidance is applicable to all U.S. healthcare settings.
- Centers for Medicare & Medicaid Services (CMS)
    - *Flexibility and Relief for State Medicaid Agencies*: The national emergency declaration also enables CMS to grant state and territorial Medicaid agencies a wider range of flexibilities under section 1135 waivers. States and territories are now encouraged to assess their needs and request these available flexibilities, which are outlined in the Medicaid and CHIP Disaster Response Toolkit. Examples of flexibilities available to states under section 1135 waivers include the ability to permit out-of-state providers to render services, temporarily suspend certain provider enrollment and revalidation requirements to promote access to care, allow providers to provide care in alternative settings, waive prior authorization requirements, and temporarily suspend certain pre-admission and annual screenings for nursing home residents. For more information and to access the toolkit, visit **here**.
    - *Waivers and Flexibilities for Hospitals and other Healthcare Facilities*: CMS will temporarily waive or modify certain Medicare, Medicaid, and CHIP requirements. CMS will also issue several blanket waivers, listed on the website below, and the CMS Regional Offices will review other provider-specific requests. These waivers provide continued access to care for beneficiaries. For more information on the waivers CMS has granted, visit **here**.
    - *Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance*: As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found **here** (3/9). The Press Release can be found **here** and all CMS guidance related to COVID-19 can be found **here**.

U.S. Small Business Administration (SBA)

- The Small Business Administration will work directly with state Governors to provide targeted, low-interest loans to small businesses and non-profits that have been severely impacted by the Coronavirus (COVID-19). The SBA's Economic Injury Disaster Loan program provides small businesses with working capital loans of up to $2 million that can provide vital economic support to small businesses to help overcome the temporary loss of revenue they are experiencing. More **here**.
- The Coronavirus Preparedness and Response Supplemental expanded the disaster definition for the Small Business Administration's Economic Injury Disaster Loans (EIDL) to include COVID-19. Economic Injury Disaster Loans are SBA loans that are available to eligible Small Businesses, Small agricultural cooperatives, and most non-profits that have experienced substantial economic injury as a result of a

AMERICAN OVERSIGHT

disaster.

    - EIDLs are available in areas that are declared a disaster area by the SBA.
    - There has to be an SBA Disaster Declaration in an area for EIDL loans to be made available, which originates from a request made by the Governor.
    - To assist in the efforts, the SBA engages with States' Emergency Response Teams to help them comply with the requirements before a request is made.
- EIDL Loan Details
    - Entities that can apply for EIDL loans are eligible Small Businesses, Small agricultural cooperatives, and most private nonprofit organizations.
    - EIDL Loans are up to $2million and have terms as long as 30 years.
- State and local officials who have been contacted by Small Businesses that may have been affected should share that information with their Governor or the State's Emergency Response Officials. More information on SBA's disaster loans, including eligibility and how to apply for loans, can be found here: **www.SBA.gov/disaster**.

U.S. Department of Education (DoED)

- The Department of Education has established a dedicated Coronavirus **webpage**, which includes resources for institutions of higher education and for K-12.
    - The website includes **guidance** for students at institutions of higher education, and covers Coronavirus-related scenarios that could impact students who are enrolled in study abroad programs, students who meet full-time requirements but fall below 12 credit hours, students who are quarantined and miss class, campuses that have temporarily stopped offering ground-based classes to prevent the spread of Coronavirus, and foreign schools that serve Americans who receive Federal financial aid. Also see a **letter from the Office for Civil Rights** that addresses potential discrimination associated with coronavirus.
- The Department is working on additional information for families and communities including:
    - Information regarding certain flexibilities under the Every Student Succeeds Act, or "ESSA;"
    - Information regarding services to children with disabilities;
    - A fact sheet from our Office for Civil Rights on the risk of Coronavirus in schools while protecting the civil rights of students; and
    - Information on the Family Education Records Privacy Act, or "FERPA," as it pertains to K-12 and higher education students.
- The Department will continue to update its website, ed.gov/coronavirus. Please direct education related questions to **COVID-19@ed.gov**.

U.S. Department of Transportation (DOT)

- The U.S. Department of Transportation, in its important supporting role, has and will continue to coordinate with transportation stakeholders, foreign counterparts and other federal agencies to manage the risk in the United States.
- DOT continues to ensure: an active air bridge remains in place for the safe return of Americans from affected areas; airlines are funneling passenger flights to one of the eleven designated U.S. airports equipped to health-screen Americans returning from affected areas; continued air and sea cargo traffic between the US and China; health protocols are established to protect the crews of aircraft continuing to fly between the US and foreign locations; and, dissemination of health messages about the virus, for airlines to use to inform their passengers.

AMERICAN OVERSIGHT

- The U.S. government's travel restrictions and advisories have been a remarkably effective 'first layer' of containment. These travel requirements delayed the arrival of the virus to the United States, giving the nation precious time to prepare further measures, and plan for mitigation. This achievement took the cooperation of nearly 200 commercial airlines, a like number of overseas airports, and the Civil Aviation Authority of China.
- External Stakeholder outreach is being actively conducted throughout the modes of transportation in DOT. DOT has already hosted calls with stakeholders for the Federal Aviation Administration, Federal Transit Authority, Federal Motor Carrier Safety Administration, and others. Additional calls are scheduled for outreach to additional stakeholders in all surface transportation, maritime, and labor.

U.S. Department of Labor (DOL)

- The Occupational Safety and Health Administration (OSHA) developed COVID-19 **planning guidance** for employers to implement engineering, administrative, and work practice controls and personal protective equipment (PPE). The guidance is intended for planning purposes – employers and workers should use the planning guidance to help identify risk levels in workplace settings and to determine any appropriate control measures to implement.
- The U.S. Office of Personnel Management (OPM), an independent agency that serves as the chief human resources agency and personnel policy manager for the Federal Government, issued **guidance** for Federal Agencies regarding COVID-19 and human resources policies.
- DOL announced new guidance outlining flexibilities that States have in administering their unemployment (UI) programs to assist Americans affected by the COVID-19 outbreak. Under the guidance, federal law.

U.S. Department of Housing & Urban Development (HUD)

- The health and well-being of our country's most vulnerable citizens is Secretary Ben Carson's highest priority. At the direction of Secretary Carson senior HUD, officials have developed an Infectious Disease Toolkit for Continuum of Care homeless shelters (CoC). This includes specific documents addressing preparedness in shelters and encampment settings. More **here**.
- HUD has sent communication to CoC and Housing Opportunities for Persons With AIDS (HOPWA) grantees, highlighting the importance of infectious disease preparedness and linking to CDC and Healthcare for the Homeless resources: **Infectious Disease Preparedness Among Homeless Assistance Providers**
- HUD is coordinating with the CDC, Healthcare for the Homeless, United States Interagency Council on Homelessness (USICH) on messaging and cross-promoting resource materials. This will continue on an ongoing basis. Also, the Department is reaching out to Health Resources and Services Administration (HRSA) and Substance Abuse and Mental Health Services Administration (SAMHSA) for future coordination.
- HUD has plenty of resources for your communities including:
    - Communities can use their unspent Emergency Solutions Grants and Continuum of Care Program funds to help address needs related to coronavirus. Additionally, a portion of CDBG funds are also available for public services, including health care.
    - Technical Assistance is available for ESG and CoC Program recipients if requested. Additionally, communities that want to amend their CDBG plans,

AMERICAN OVERSIGHT

can reach out to their CPD representative if they need assistance.

U.S. Department of Agriculture (USDA)

- USDA Secretary Sonny Perdue **announced proactive flexibilities** to allow meal service during school closures to minimize potential exposure to the coronavirus. During an unexpected school closure, schools can leverage their participation in one of USDA's summer meal programs to provide meals at no cost to students. Under normal circumstances, those meals must be served in a group setting. However, in a public health emergency, the law allows USDA the authority to waive the group setting meal requirement, which is vital during a social distancing situation.
- USDA intends to use all available program flexibilities and contingencies to serve program participants across our 15 nutrition programs. USDA has already begun to issue waivers to ease program operations and protect the health of participants. USDA is receiving requests for waivers on an ongoing basis. As of today, USDA has been asked to waive congregate feeding requirements in Washington, California, Maryland, Alaska, Utah, Pennsylvania, Wyoming, Maine, Kansas, New Jersey, New York, South Carolina, South Dakota, and Virginia and USDA has granted those requests.
- For more information about the coronavirus response across USDA, please visit: **www.usda.gov/coronavirus**.

U.S. Department of Homeland Security (DHS)

- While the overall risk to the American public remains low, actions by DHS and the administration are decreasing the strain on public health officials by screening incoming travelers, expediting the processing of U.S. citizens returning from China, and ensuring resources are focused on the health and safety of the American people. It is important to recognize, that while there is a significant focus on containing and mitigating the spread of COVID-19, all departments and agencies of DHS are continuing to perform their regular duties with no impact on their mission.
- DHS is working to recognize, detect, and assist individuals attempting to enter the U.S. through our, airports, land ports, or waterways who may be carrying the virus: Cruise Lines International Association, CDC, USCG, and CBP. DHS is working with the Department of State, HHS, and the senior public health leadership with the Government of Mexico to prepare for any COVID-19 cases identified along the South West Border. This effort includes coordination with state, and local Public Health Officials to develop reporting and response courses of action.
- FEMA has rostered 56 four-person Incident Management Assistance Teams.
- The Countering Weapons of Mass Destruction Office, which contains the National Biosurveillance Integration Center and the Chief Medical Officer, has maintained close coordination with our Components and U.S. Government partners regarding the status of the outbreak and associated U.S. Government response actions.
- *Presidential Proclamation to Protect the Homeland from Travel-Related Coronavirus Spread:* On Thursday, March 12, President Donald J. Trump signed a **Presidential Proclamation**, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. *This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.*

COVID-19: Background & Additional Information

Background

Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Since the beginning of the outbreak, President Trump has taken unprecedented steps – including prudent travel restrictions and an early containment strategy – to protect the health of Americans in response to the coronavirus. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response (**President Donald J. Trump Has Taken Unprecedented Steps to Respond To the Coronavirus and Protect the Health and Safety of Americans**). The Coronavirus Task Force and broader Administration have and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk to the average American remains low. All agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

Local Preparedness Tips

- Response is locally executed, state managed, and federally supported.
- Ensuring clear, open lines of communication with the public and making information and guidance readily available.
- Proactively sharing and disseminating *verified and accurate* guidance and information such as HHS/CDC **guidance for families, businesses, and schools**.
- Reviewing Federal guidance such as the HHS/CDC **Community Mitigation Framework**.
- Coordinating with State and local health authorities.
- Reviewing local preparedness plans and strategies.

Presidential Proclamation to Protect the Homeland from Travel-Related Coronavirus Spread

On Thursday, March 12, President Donald J. Trump signed a **Presidential Proclamation**, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. *This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.*

Framework Mitigation Strategies for Communities with Local COVID-19 Transmission

Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts.

- A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(more here; 10-page frame work for States, localities, and communities)*
- CDC mitigation strategies for Santa Clara (CA), Seattle (WA), and New Rochelle (NY)

Thanks,
Nic

Background & Additional Information for State & Local Officials

U.S. Department of Health & Human Services (HHS)

- The Department of Health and Human Services is committed to providing as much information as possible to prepare communities for response to COVID-19. The Department, through the Centers for Disease Control and Prevention, the Food and Drug Administration, and other agencies, continuously provide guidance to healthcare providers, laboratories, communities, and state and local officials for dealing with suspected or confirmed cases of COVID-19. The most up-to-date information can be found at **www.coronavirus.gov**.
- Wednesday, March 12, CDC **announced** the imminent release of almost $600 million to support state and local authorities respond to the COVID-19 outbreak. Full funding amounts are **here**.
- CDC released their "**Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission**." This is a guide for communities describing possible coronavirus transmission. Community mitigation strategies are often the most available interventions to help slow the transmission of COVID-19 in communities.
- The CDC has been actively working to address the need for testing across the country. You can find more information about testing **here**. We encourage review of the **Updated Guidance on Evaluating and Testing Persons for Coronavirus Disease 2019**, as well as the recently updated the **FAQ website for laboratories** to determine best practices for testing.

AMERICAN OVERSIGHT

- The U.S. Public Health Service Commissioned Corps has deployed hundreds of officers to help with this response. As America's Health Responders, the Commissioned Corps is currently very involved in assisting the CDC with airport screenings, deploying staff to support hospitals, among other important missions. Find out more about Commissioned Corps activities **here**.
- Part of preparedness includes a robust blood supply. The current situation around COVID-19 heightens the need for a ready blood supply, please encourage your health community members to keep their appointments to donate blood.
- CDC released updated **guidance** on infection prevention and control recommendations for healthcare workers. Healthcare workers are fighting this outbreak on the front lines, and this guidance is intended to provide assistance to healthcare settings that are handling suspected or confirmed cases of COVID-19. This guidance is applicable to all U.S. healthcare settings.

U.S. Small Business Administration (SBA)

- The Small Business Administration will work directly with state Governors to provide targeted, low-interest loans to small businesses and non-profits that have been severely impacted by the Coronavirus (COVID-19). The SBA's Economic Injury Disaster Loan program provides small businesses with working capital loans of up to $2 million that can provide vital economic support to small businesses to help overcome the temporary loss of revenue they are experiencing.
- The Coronavirus Preparedness and Response Supplemental expanded the disaster definition for the Small Business Administration's Economic Injury Disaster Loans (EIDL) to include COVID-19. Economic Injury Disaster Loans are SBA loans that are available to eligible Small Businesses, Small agricultural cooperatives, and most non-profits that have experienced substantial economic injury as a result of a disaster.
    - EIDLs are available in areas that are declared a disaster area by the SBA.
    - There has to be an SBA Disaster Declaration in an area for EIDL loans to be made available, which originates from a request made by the Governor.
    - To assist in the efforts, the SBA engages with States' Emergency Response Teams to help them comply with the requirements before a request is made.
- EIDL Loan Details
    - Entities that can apply for EIDL loans are eligible Small Businesses, Small agricultural cooperatives, and most private nonprofit organizations.
    - EIDL Loans are up to $2million and have terms as long as 30 years.
- State and local officials who have been contacted by Small Businesses that may have been affected should share that information with their Governor or the State's Emergency Response Officials. More information on SBA's disaster loans, including eligibility and how to apply for loans, can be found here: **www.SBA.gov/disaster**

U.S. Department of Education (DoED)

- The Department of Education has established a dedicated Coronavirus **webpage**, which includes resources for institutions of higher education and for K-12.
    - The website includes **guidance** for students at institutions of higher education, and covers Coronavirus-related scenarios that could impact students who are enrolled in study abroad programs, students who meet full-time requirements but fall below 12 credit hours, students who are quarantined and miss class, campuses that have temporarily stopped offering ground-based classes to prevent the spread of Coronavirus, and foreign schools that serve Americans who receive Federal financial aid. Also see a

AMERICAN OVERSIGHT

letter from the Office for Civil Rights that addresses potential discrimination associated with coronavirus.

- The Department is working on additional information for families and communities including:
  - Information regarding certain flexibilities under the Every Student Succeeds Act, or "ESSA;"
  - Information regarding services to children with disabilities;
  - A fact sheet from our Office for Civil Rights on the risk of Coronavirus in schools while protecting the civil rights of students; and
  - Information on the Family Education Records Privacy Act, or "FERPA," as it pertains to K-12 and higher education students.
- The Department will continue to update its website, ed.gov/coronavirus. Please direct education related questions to COVID-19@ed.gov.

U.S. Department of Transportation (DOT)

- The U.S. Department of Transportation, in its important supporting role, has and will continue to coordinate with transportation stakeholders, foreign counterparts and other federal agencies to manage the risk in the United States.
- DOT continues to ensure: an active air bridge remains in place for the safe return of Americans from affected areas; airlines are funneling passenger flights to one of the eleven designated U.S. airports equipped to health-screen Americans returning from affected areas; continued air and sea cargo traffic between the US and China; health protocols are established to protect the crews of aircraft continuing to fly between the US and foreign locations; and, dissemination of health messages about the virus, for airlines to use to inform their passengers.
- The U.S. government's travel restrictions and advisories have been a remarkably effective 'first layer' of containment. These travel requirements delayed the arrival of the virus to the United States, giving the nation precious time to prepare further measures, and plan for mitigation. This achievement took the cooperation of nearly 200 commercial airlines, a like number of overseas airports, and the Civil Aviation Authority of China.
- External Stakeholder outreach is being actively conducted throughout the modes of transportation in DOT. DOT has already hosted calls with stakeholders for the Federal Aviation Administration, Federal Transit Authority, Federal Motor Carrier Safety Administration, and others. Additional calls are scheduled for outreach to additional stakeholders in all surface transportation, maritime, and labor.

U.S. Department of Labor (DOL)

- The Occupational Safety and Health Administration (OSHA) developed COVID-19 planning guidance for employers to implement engineering, administrative, and work practice controls and personal protective equipment (PPE). The guidance is intended for planning purposes – employers and workers should use the planning guidance to help identify risk levels in workplace settings and to determine any appropriate control measures to implement.
- The U.S. Office of Personnel Management (OPM), an independent agency that serves as the chief human resources agency and personnel policy manager for the Federal Government, issued guidance for Federal Agencies regarding COVID-19 and human resources policies.
- DOL announced new guidance outlining flexibilities that States have in administering their unemployment (UI) programs to assist Americans affected by the COVID-19 outbreak. Under the guidance, federal law.

AMERICAN OVERSIGHT

U.S. Department of Housing & Urban Development (HUD)

- The health and well-being of our country's most vulnerable citizens is Secretary Ben Carson's highest priority. At the direction of Secretary Carson senior HUD, officials have developed an Infectious Disease Toolkit for Continuum of Care homeless shelters (CoC). This includes specific documents addressing preparedness in shelters and encampment settings. More **here**.
- HUD has sent communication to CoC and Housing Opportunities for Persons With AIDS (HOPWA) grantees, highlighting the importance of infectious disease preparedness and linking to CDC and Healthcare for the Homeless resources: **Infectious Disease Preparedness Among Homeless Assistance Providers**
- HUD is coordinating with the CDC, Healthcare for the Homeless, United States Interagency Council on Homelessness (USICH) on messaging and cross-promoting resource materials. This will continue on an ongoing basis. Also, the Department is reaching out to Health Resources and Services Administration (HRSA) and Substance Abuse and Mental Health Services Administration (SAMHSA) for future coordination.
- HUD has plenty of resources for your communities including:
    - Communities can use their unspent Emergency Solutions Grants and Continuum of Care Program funds to help address needs related to coronavirus. Additionally, a portion of CDBG funds are also available for public services, including health care.
    - Technical Assistance is available for ESG and CoC Program recipients if requested. Additionally, communities that want to amend their CDBG plans, can reach out to their CPD representative if they need assistance.

U.S. Department of Agriculture (USDA)

- USDA Secretary Sonny Perdue **announced proactive flexibilities** to allow meal service during school closures to minimize potential exposure to the coronavirus. During an unexpected school closure, schools can leverage their participation in one of USDA's summer meal programs to provide meals at no cost to students. Under normal circumstances, those meals must be served in a group setting. However, in a public health emergency, the law allows USDA the authority to waive the group setting meal requirement, which is vital during a social distancing situation.
- USDA intends to use all available program flexibilities and contingencies to serve program participants across our 15 nutrition programs. USDA has already begun to issue waivers to ease program operations and protect the health of participants. USDA is receiving requests for waivers on an ongoing basis. As of today, USDA has been asked to waive congregate feeding requirements in Washington, California, Maryland, Alaska, Utah, Pennsylvania, Wyoming, Maine, Kansas, New Jersey, New York, South Carolina, South Dakota, and Virginia and USDA has granted those requests.
- For more information about the coronavirus response across USDA, please visit: **www.usda.gov/coronavirus**.

U.S. Department of Homeland Security (DHS)

- While the overall risk to the American public remains low, actions by DHS and the administration are decreasing the strain on public health officials by screening incoming travelers, expediting the processing of U.S. citizens returning from China, and ensuring resources are focused on the health and safety of the American people.

AMERICAN OVERSIGHT

It is important to recognize, that while there is a significant focus on containing and mitigating the spread of COVID-19, all departments and agencies of DHS are continuing to perform their regular duties with no impact on their mission.

- DHS is working to recognize, detect, and assist individuals attempting to enter the U.S. through our, airports, land ports, or waterways who may be carrying the virus: Cruise Lines International Association, CDC, USCG, and CBP. DHS is working with the Department of State, HHS, and the senior public health leadership with the Government of Mexico to prepare for any COVID-19 cases identified along the South West Border. This effort includes coordination with state, and local Public Health Officials to develop reporting and response courses of action.
- FEMA has rostered 56 four-person Incident Management Assistance Teams.
- The Countering Weapons of Mass Destruction Office, which contains the National Biosurveillance Integration Center and the Chief Medical Officer, has maintained close coordination with our Components and U.S. Government partners regarding the status of the outbreak and associated U.S. Government response actions.

Recent Announcements

SBA To Provide Disaster Loans for Small Businesses Impacted by Coronavirus (COVID-19)
On Thursday, March 12, SBA Administrator Jovita Carranza issued the following statement: "The President took bold, decisive action to make our 30 million small businesses more resilient to Coronavirus-related economic disruptions. Small businesses are vital economic engines in every community and state, and they have helped make our economy the strongest in the world. Our Agency will work directly with state Governors to provide targeted, low-interest disaster recovery loans to small businesses that have been severely impacted by the situation. Additionally, the SBA continues to assist small businesses with counseling and navigating their own preparedness plans through our network of 68 District Offices and numerous Resource Partners located around the country. The SBA will continue to provide every small business with the most effective and customer-focused response possible during these times of uncertainty." SBA's Economic Injury Disaster Loans offer up to $2 million in assistance for a small business. These loans can provide vital economic support to small businesses to help overcome the temporary loss of revenue they are experiencing. More information can be found **here**.

CDC to Award Over $560 Million to State & Local Jurisdictions in Support of COVID-19 Response
The Department of Health and Human Services (HHS) is announcing another upcoming action by the Centers for Disease Control and Prevention (CDC) to provide resources to state and local jurisdictions in support of our nation's response to the coronavirus disease 2019 (COVID-19). The $8.3 billion dollar Supplemental passed by Congress included **statutory language** which prescribed the exact formula for disbursing the money: states will receive 90% of their **2019 CDC PHEP grants**. This marks the first tranche of funding to states from the $8.3 billion supplemental. Your state health officers are receiving a letter today from CDC outlining what is needed to receive the funding, essentially they need to submit a spend plan and they will receive guidance on what that spend plan should contain. More **here**.

Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance
As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found here (3/9). The Press Release can be found here

AMERICAN OVERSIGHT

and all CMS guidance related to COVID-19 can be found **here**.

COVID-19: Background & Additional Information

Background

Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Since the beginning of the outbreak, President Trump has taken unprecedented steps – including prudent travel restrictions and an early containment strategy – to protect the health of Americans in response to the coronavirus. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response (**President Donald J. Trump Has Taken Unprecedented Steps to Respond To the Coronavirus and Protect the Health and Safety of Americans**). The Coronavirus Task Force and broader Administration have and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk to the average American remains low. All agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

- External Stakeholder outreach is being actively conducted throughout the modes of transportation in DOT. DOT has already hosted calls with stakeholders for the Federal Aviation Administration, Federal Transit Authority, Federal Motor Carrier Safety Administration, and others. Additional calls are scheduled for outreach to additional stakeholders in all surface transportation, maritime, and labor.

U.S. Department of Labor (DOL)

- The Occupational Safety and Health Administration (OSHA) developed COVID-19 planning guidance for employers to implement engineering, administrative, and work practice controls and personal protective equipment (PPE). The guidance is intended for planning purposes – employers and workers should use the planning guidance to help identify risk levels in workplace settings and to determine any appropriate control measures to implement.
- The U.S. Office of Personnel Management (OPM), an independent agency that serves as the chief human resources agency and personnel policy manager for the Federal Government, issued guidance for Federal Agencies regarding COVID-19 and human resources policies.
- DOL announced new guidance outlining flexibilities that States have in administering their unemployment (UI) programs to assist Americans affected by the COVID-19 outbreak. Under the guidance, federal law.

AMERICAN OVERSIGHT

U.S. Department of Housing & Urban Development (HUD)

- The health and well-being of our country's most vulnerable citizens is Secretary Ben Carson's highest priority. At the direction of Secretary Carson senior HUD, officials have developed an Infectious Disease Toolkit for Continuum of Care homeless shelters (CoC). This includes specific documents addressing preparedness in shelters and encampment settings. More **here**.
- HUD has sent communication to CoC and Housing Opportunities for Persons With AIDS (HOPWA) grantees, highlighting the importance of infectious disease preparedness and linking to CDC and Healthcare for the Homeless resources: **Infectious Disease Preparedness Among Homeless Assistance Providers**
- HUD is coordinating with the CDC, Healthcare for the Homeless, United States Interagency Council on Homelessness (USICH) on messaging and cross-promoting resource materials. This will continue on an ongoing basis. Also, the Department is reaching out to Health Resources and Services Administration (HRSA) and Substance Abuse and Mental Health Services Administration (SAMHSA) for future coordination.
- HUD has plenty of resources for your communities including:
    - Communities can use their unspent Emergency Solutions Grants and Continuum of Care Program funds to help address needs related to coronavirus. Additionally, a portion of CDBG funds are also available for public services, including health care.
    - Technical Assistance is available for ESG and CoC Program recipients if requested. Additionally, communities that want to amend their CDBG plans, can reach out to their CPD representative if they need assistance.

U.S. Department of Agriculture (USDA)

- USDA Secretary Sonny Perdue **announced proactive flexibilities** to allow meal service during school closures to minimize potential exposure to the coronavirus. During an unexpected school closure, schools can leverage their participation in one of USDA's summer meal programs to provide meals at no cost to students. Under normal circumstances, those meals must be served in a group setting. However, in a public health emergency, the law allows USDA the authority to waive the group setting meal requirement, which is vital during a social distancing situation.
- USDA intends to use all available program flexibilities and contingencies to serve program participants across our 15 nutrition programs. USDA has already begun to issue waivers to ease program operations and protect the health of participants. USDA is receiving requests for waivers on an ongoing basis. As of today, USDA has been asked to waive congregate feeding requirements in Washington, California, Maryland, Alaska, Utah, Pennsylvania, Wyoming, Maine, Kansas, New Jersey, New York, South Carolina, South Dakota, and Virginia and USDA has granted those requests.
- For more information about the coronavirus response across USDA, please visit: **www.usda.gov/coronavirus**.

U.S. Department of Homeland Security (DHS)

- While the overall risk to the American public remains low, actions by DHS and the administration are decreasing the strain on public health officials by screening incoming travelers, expediting the processing of U.S. citizens returning from China, and ensuring resources are focused on the health and safety of the American people.

AMERICAN OVERSIGHT

It is important to recognize, that while there is a significant focus on containing and mitigating the spread of COVID-19, all departments and agencies of DHS are continuing to perform their regular duties with no impact on their mission.

- DHS is working to recognize, detect, and assist individuals attempting to enter the U.S. through our, airports, land ports, or waterways who may be carrying the virus: Cruise Lines International Association, CDC, USCG, and CBP. DHS is working with the Department of State, HHS, and the senior public health leadership with the Government of Mexico to prepare for any COVID-19 cases identified along the South West Border. This effort includes coordination with state, and local Public Health Officials to develop reporting and response courses of action.
- FEMA has rostered 56 four-person Incident Management Assistance Teams.
- The Countering Weapons of Mass Destruction Office, which contains the National Biosurveillance Integration Center and the Chief Medical Officer, has maintained close coordination with our Components and U.S. Government partners regarding the status of the outbreak and associated U.S. Government response actions.

Recent Announcements

SBA To Provide Disaster Loans for Small Businesses Impacted by Coronavirus (COVID-19)
On Thursday, March 12, SBA Administrator Jovita Carranza issued the following statement: "The President took bold, decisive action to make our 30 million small businesses more resilient to Coronavirus-related economic disruptions. Small businesses are vital economic engines in every community and state, and they have helped make our economy the strongest in the world. Our Agency will work directly with state Governors to provide targeted, low-interest disaster recovery loans to small businesses that have been severely impacted by the situation. Additionally, the SBA continues to assist small businesses with counseling and navigating their own preparedness plans through our network of 68 District Offices and numerous Resource Partners located around the country. The SBA will continue to provide every small business with the most effective and customer-focused response possible during these times of uncertainty." SBA's Economic Injury Disaster Loans offer up to $2 million in assistance for a small business. These loans can provide vital economic support to small businesses to help overcome the temporary loss of revenue they are experiencing. More information can be found **here**.

CDC to Award Over $560 Million to State & Local Jurisdictions in Support of COVID-19 Response
The Department of Health and Human Services (HHS) is announcing another upcoming action by the Centers for Disease Control and Prevention (CDC) to provide resources to state and local jurisdictions in support of our nation's response to the coronavirus disease 2019 (COVID-19). The $8.3 billion dollar Supplemental passed by Congress included **statutory language** which prescribed the exact formula for disbursing the money: states will receive 90% of their **2019 CDC PHEP grants**. This marks the first tranche of funding to states from the $8.3 billion supplemental. Your state health officers are receiving a letter today from CDC outlining what is needed to receive the funding, essentially they need to submit a spend plan and they will receive guidance on what that spend plan should contain. More **here**.

Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance
As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found here (3/9). The Press Release can be found here

AMERICAN OVERSIGHT

and all CMS guidance related to COVID-19 can be found **here**.

COVID-19: Background & Additional Information

Background

Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Since the beginning of the outbreak, President Trump has taken unprecedented steps – including prudent travel restrictions and an early containment strategy – to protect the health of Americans in response to the coronavirus. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response (**President Donald J. Trump Has Taken Unprecedented Steps to Respond To the Coronavirus and Protect the Health and Safety of Americans**). The Coronavirus Task Force and broader Administration have and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk to the average American remains low. All agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

Up-To-Date Information

THE WHITE HOUSE

State and Local Leaders,

President Donald J. Trump is leveraging the full power of the Federal Government, in partnership with state, local, and tribal leaders, and private sector partners, to protect the health and safety of the American people. The President's emergency declarations will give healthcare providers and officials on the front lines of this pandemic the flexibility they need to respond. The Trump Administration is working to rapidly expand coronavirus testing across the nation and make sure Americans who need them have access. Below you will find additional information. You can find the latest information on COVID-19 HERE.

Recent Actions & Updates

President Donald J. Trump Directs FEMA Support Under Emergency Declaration for COVID-19

- Presidential Proclamation Here
- Letter from President Donald J. Trump on Emergency Determination Under the Stafford Act to U.S. Department of Homeland Security, Department of Treasury, U.S. Department of Health & Human Services, and Federal Emergency Management Agency. The letter includes specific recommendation to governors including:
  - "In order to meet the challenges caused by this emergency pandemic, **I have encouraged all State and local governments to activate their Emergency Operations Centers and to review their emergency preparedness plans.** In the meantime, I expect FEMA to continue to review all ways in which it can provide assistance to States consistent with the authorities provided to it by this letter and by statute."
  - "I **encourage all governors and tribal leaders to consider requesting Federal assistance under this provision of the Stafford Act, pursuant to the statutory criteria**. I stand ready to expeditiously consider any such request."

Memorandum on Expanding State-Approved Diagnostic Tests

- Full Memorandum Here
- Secretary Azar Designates Admiral Giroir to Coordinate COVID-19 Diagnostic Testing Efforts
- The FDA is working to help significantly speed up testing and expand accessibility for Americans. The FDA issued emergency approval for a new commercial coronavirus test by Roche that will help greatly expand testing nationwide. FDA: "The FDA authorized the Roche cobas SARS-CoV-2 Test, the third Emergency Use Authorization (EUA) granted for a diagnostic test during the COVID-19 outbreak. Laboratories can immediately run tests on Roche's high-volume platform, which will greatly increase national testing capacity."
- FDA gives flexibility to New York State Department of Health, FDA issues Emergency Use Authorization Diagnostic

Framework Mitigation Strategies for Communities with Local COVID-19 Transmission

Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts.

- A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(more here; 10-page frame work for States, localities, and communities).*
- CDC mitigation strategies for Santa Clara (CA), Seattle (WA), New Rochelle (NY), Florida, and Massachusetts.

Other Actions & Updates

- HHS Funds Development of COVID-19 Diagnostic Tests

Centers for Medicare & Medicaid Services (CMS) announced critical new measures designed to keep America's nursing home residents safe from COVID-19 taking the form of a memorandum and is based on the newest recommendations from the Centers for Disease Control and Prevention (CDC).

AMERICAN OVERSIGHT

Federal Motor Carrier Safety Administration (FMCSA) - Emergency Declaration- Hours of Service Relief: FMCSA has issued an Emergency Declaration covering all 50 states and the District of Columbia to provide hours of service relief to drivers transporting emergency relief. Specifically, the declaration provides for regulatory relief for commercial motor vehicle operations providing direct assistance supporting emergency relief efforts, and will cover the shipment of: medical supplies and equipment related to the testing, diagnosis and treatment of COVID-19; supplies and equipment, including masks, gloves, hand sanitizer, soap and disinfectants, necessary for healthcare worker, patient and community safety, sanitation, and prevention of COVID-19 spread in communities; food for emergency restocking of stores; equipment, supplies and persons necessary for establishment and management of temporary housing and quarantine facilities related to COVID-19; persons designated by Federal, State or local authorities for transport for medical, isolation or quarantine purposes; and personnel to provide medical or other emergency services. The declaration does not cover routine commercial deliveries, or transportation of mixed loads of essential supplies and/or persons and goods or persons not related to emergency needs. Effective immediately, the declaration will remain in effect for the duration of the emergency or until 11:59 P.M. (ET), April 11, 2020, whichever occurs sooner.

Fact Sheet on H.R. 6021 – Families First Coronavirus Response Act

Following extensive negotiations with Congress, President Trump announced his support for legislation to help American workers and families impacted by the coronavirus.

- The President is committed to ensuring American workers and families have the support they need, and this legislation follows through on that.
- The Administration engaged in extensive discussions with Congress to secure key provisions and changes in language.
- As a result of the Administration's efforts, substantial improvements were made from the initial bill.

This delivers on President Trump's plan to help American workers and their families who have been harmed by the coronavirus outbreak.

- The legislation establishes tax credits to provide paid sick and family medical leave for employment interruptions related to coronavirus.
    - This will provide support for employees with coronavirus, under quarantine, caring for someone affected, or with children whose school has closed.
- Eligible employers will receive a dollar-for-dollar tax credit for any paid leave they provide under this program.
- Importantly, employees will be able to receive the paid leave directly from their employer, rather than an inefficient government run program.

AMERICAN OVERSIGHT

    - We are partnering with businesses, not imposing an unfunded mandate on them.

- The legislation also incentivizes states to ease access to unemployment benefits, assisting Americans who may be unemployed due to the impact of the virus.

- In order to help families and the most vulnerable, the bill provides funding and flexibility for emergency nutritional aid for senior citizens, women, children, and low-income families.

To protect the health of our citizens, the legislation provides free coronavirus testing for all Americans who need it.

- This includes free testing through commercial insurance, Medicare, Medicaid, CHIP, Indian Health Service, and TRI-CARE.
- Every American who needs a test, should be able to get a test regardless of their financial circumstances.

Fact Sheet – President Donald J. Trump Has Mobilized the Full Resources of the Federal Government to Respond to the Coronavirus

MOBILIZING ALL FEDERAL RESOURCES: President Donald J. Trump is leveraging the full power of the Federal Government to protect the health and safety of the American people.

- President Trump is exercising statutory authorities to declare a national emergency in response to the coronavirus.
- The unprecedented action the President is taking invites States, territories, and tribes to access over $42 billion in existing funding to combat the coronavirus.
    - The Administration has taken decisive action to ensure State, local, and tribal leaders have the resources they need to provide protective measures for their communities.
    - The Small Business Administration also has authority and available funding to make over $7 billion in loans to qualifying small businesses to assist economic recovery.
- President Trump is directing further actions across his Administration in response to the coronavirus.
    - The Centers for Medicare and Medicaid Services has announced guidance to limit medically unnecessary visits to nursing homes to protect vulnerable elderly Americans
    - The Secretary of the Education will be waiving interest on all student loans held by the Federal Government.
    - The President is directing the Department of Energy to purchase large quantities of crude oil for the strategic reserve.
- The President is urging every State to set up emergency operational centers and is asking every hospital to activate its emergency preparedness plan.

AMERICAN OVERSIGHT

EMPOWERING HEALTHCARE PROVIDERS: The President's emergency declaration will give healthcare providers on the front lines of this pandemic the flexibility they need to respond.

- President Trump continues to cut through every piece of unnecessary red tape that may hinder our response efforts and make every Federal resource available.
- The President will empower the Secretary of Health and Human Services (HHS) to waive provisions of certain laws and regulations and give maximum flexibility to healthcare providers to care for their patients.
- The declaration will provide HHS with critical authorities to waive:
    - Certain laws to enable telehealth, remote doctors' visits, and hospital check-ins
    - Licensing requirements so doctors from other states can provide services in areas with the greatest need.
    - Critical Access Hospital requirements to allow those hospitals to have more beds and longer lengths of stay
    - The requirement of a 3-day hospital stay prior to admission to a nursing home.
    - Rules hindering hospitals' ability to bring additional physicians on board or obtain needed office space.
    - Restrictions on where hospitals can care for patients.
- The Administration will be working to eliminate every obstacle possible to ensure healthcare providers can deliver Americans the care they need.

RAPIDLY EXPANDING TESTING: The Trump Administration is working to rapidly expand coronavirus testing across the nation and make sure Americans who need them have access.

- President Trump is mobilizing resources across the Federal Government to accelerate testing and expand access for more Americans.
    - The President wants to make sure that those who need a test can get a test safely, quickly, and conveniently.
- The Administration is working with the private sector to open up drive-through testing collection sites in critical areas impacted by the coronavirus.
- The Administration is working with Google to develop a website Americans can go to determine whether a test is needed and, if so, facilitate testing at a nearby location.
- The Food and Drug Administration is issuing emergency authorization for new commercial coronavirus tests that will help significantly expand testing across the country.
    - One new test produced by Roche has already been authorized and authorization is coming for another test very shortly.
    - Up to 2 million additional tests are expected to be available next week thanks to these efforts.

AMERICAN OVERSIGHT

- President Trump and his Administration are working to provide maximum flexibility for States to approve labs for coronavirus testing.
- HHS recently announced it is providing funding to help accelerate the development of two rapid diagnostic tests.
- The Administration has designated Assistant Secretary for Health Brett Giroir to take the lead in coordinating testing efforts to ensure seamless access for patients, doctors, and hospitals.
- The Administration continues to cut red tape that restricted who qualifies for testing.

Updated - Background & Additional Information for State & Local Officials

U.S. Department of Health & Human Services (HHS)

- The Department of Health and Human Services is committed to providing as much information as possible to prepare communities for response to COVID-19. The Department, through the Centers for Disease Control and Prevention, the Food and Drug Administration, and other agencies, continuously provide guidance to healthcare providers, laboratories, communities, and state and local officials for dealing with suspected or confirmed cases of COVID-19. The most up-to-date information can be found at **www.coronavirus.gov**.
- Wednesday, March 12, CDC **announced** the imminent release of almost $600 million to support state and local authorities respond to the COVID-19 outbreak. Full funding amounts are **here**,
- Framework Mitigation Strategies for Communities with Local COVID-19 Transmission: Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts.
    - A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(more* **here***; 10-page frame work for States, localities, and communities).*
    - CDC mitigation strategies for **Santa Clara** (CA), **Seattle** (WA), **New Rochelle** (NY), **Florida**, and **Massachusetts**.
- The CDC has been actively working to address the need for testing across the country. You can find more information about testing **here**. We encourage review of the **Updated Guidance on Evaluating and Testing Persons for Coronavirus Disease 2019**, as well as the recently updated the **FAQ website for laboratories** to determine best practices for testing.
- The U.S. Public Health Service Commissioned Corps has deployed hundreds of officers to help with this response. As America's Health Responders, the Commissioned Corps is currently very involved in assisting the CDC with airport screenings, deploying staff to support hospitals, among other important missions.

AMERICAN OVERSIGHT

Find out more about Commissioned Corps activities **here**.

- Part of preparedness includes a robust blood supply. The current situation around COVID-19 heightens the need for a ready blood supply, please encourage your health community members to keep their appointments to donate blood.
- CDC released updated **guidance** on infection prevention and control recommendations for healthcare workers. Healthcare workers are fighting this outbreak on the front lines, and this guidance is intended to provide assistance to healthcare settings that are handling suspected or confirmed cases of COVID-19. This guidance is applicable to all U.S. healthcare settings.
- Centers for Medicare & Medicaid Services (CMS)
    - *Flexibility and Relief for State Medicaid Agencies*: The national emergency declaration also enables CMS to grant state and territorial Medicaid agencies a wider range of flexibilities under section 1135 waivers. States and territories are now encouraged to assess their needs and request these available flexibilities, which are outlined in the Medicaid and CHIP Disaster Response Toolkit. Examples of flexibilities available to states under section 1135 waivers include the ability to permit out-of-state providers to render services, temporarily suspend certain provider enrollment and revalidation requirements to promote access to care, allow providers to provide care in alternative settings, waive prior authorization requirements, and temporarily suspend certain pre-admission and annual screenings for nursing home residents. For more information and to access the toolkit, visit **here**.
    - *Waivers and Flexibilities for Hospitals and other Healthcare Facilities*: CMS will temporarily waive or modify certain Medicare, Medicaid, and CHIP requirements. CMS will also issue several blanket waivers, listed on the website below, and the CMS Regional Offices will review other provider-specific requests. These waivers provide continued access to care for beneficiaries. For more information on the waivers CMS has granted, visit **here**.
    - *Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance*: As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found **here** (3/9). The Press Release can be found **here** and all CMS guidance related to COVID-19 can be found **here**.

U.S. Small Business Administration (SBA)

- The Small Business Administration will work directly with state Governors to provide targeted, low-interest loans to small businesses and non-profits that have been severely impacted by the Coronavirus (COVID-19). The SBA's Economic Injury Disaster Loan program provides small businesses with working capital loans of up to $2 million that can provide vital economic support to small businesses to help overcome the temporary loss of revenue they are experiencing. More **here**.
- The Coronavirus Preparedness and Response Supplemental expanded the disaster definition for the Small Business Administration's Economic Injury Disaster Loans (EIDL) to include COVID-19. Economic Injury Disaster Loans are SBA loans that are available to eligible Small Businesses, Small agricultural cooperatives, and most non-profits that have experienced substantial economic injury as a result of a disaster.

AMERICAN OVERSIGHT

    - EIDLs are available in areas that are declared a disaster area by the SBA.
    - There has to be an SBA Disaster Declaration in an area for EIDL loans to be made available, which originates from a request made by the Governor.
    - To assist in the efforts, the SBA engages with States' Emergency Response Teams to help them comply with the requirements before a request is made.
- EIDL Loan Details
    - Entities that can apply for EIDL loans are eligible Small Businesses, Small agricultural cooperatives, and most private nonprofit organizations.
    - EIDL Loans are up to $2million and have terms as long as 30 years.
- State and local officials who have been contacted by Small Businesses that may have been affected should share that information with their Governor or the State's Emergency Response Officials. More information on SBA's disaster loans, including eligibility and how to apply for loans, can be found here: **www.SBA.gov/disaster**.

U.S. Department of Education (DoED)

- The Department of Education has established a dedicated Coronavirus **webpage**, which includes resources for institutions of higher education and for K-12.
    - The website includes **guidance** for students at institutions of higher education, and covers Coronavirus-related scenarios that could impact students who are enrolled in study abroad programs, students who meet full-time requirements but fall below 12 credit hours, students who are quarantined and miss class, campuses that have temporarily stopped offering ground-based classes to prevent the spread of Coronavirus, and foreign schools that serve Americans who receive Federal financial aid. Also see a **letter from the Office for Civil Rights** that addresses potential discrimination associated with coronavirus.
- The Department is working on additional information for families and communities including:
    - Information regarding certain flexibilities under the Every Student Succeeds Act, or "ESSA;"
    - Information regarding services to children with disabilities;
    - A fact sheet from our Office for Civil Rights on the risk of Coronavirus in schools while protecting the civil rights of students; and
    - Information on the Family Education Records Privacy Act, or "FERPA," as it pertains to K-12 and higher education students.
- The Department will continue to update its website, ed.gov/coronavirus. Please direct education related questions to **COVID-19@ed.gov**.

U.S. Department of Transportation (DOT)

- The U.S. Department of Transportation, in its important supporting role, has and will continue to coordinate with transportation stakeholders, foreign counterparts and other federal agencies to manage the risk in the United States.
- DOT continues to ensure: an active air bridge remains in place for the safe return of Americans from affected areas; airlines are funneling passenger flights to one of the eleven designated U.S. airports equipped to health-screen Americans returning from affected areas; continued air and sea cargo traffic between the US and China; health protocols are established to protect the crews of aircraft continuing to fly between the US and foreign locations; and, dissemination of health messages about the virus, for airlines to use to inform their passengers.
- The U.S. government's travel restrictions and advisories have been a remarkably

AMERICAN OVERSIGHT

effective 'first layer' of containment. These travel requirements delayed the arrival of the virus to the United States, giving the nation precious time to prepare further measures, and plan for mitigation. This achievement took the cooperation of nearly 200 commercial airlines, a like number of overseas airports, and the Civil Aviation Authority of China.

- External Stakeholder outreach is being actively conducted throughout the modes of transportation in DOT. DOT has already hosted calls with stakeholders for the Federal Aviation Administration, Federal Transit Authority, Federal Motor Carrier Safety Administration, and others. Additional calls are scheduled for outreach to additional stakeholders in all surface transportation, maritime, and labor.

U.S. Department of Labor (DOL)

- The Occupational Safety and Health Administration (OSHA) developed COVID-19 **planning guidance** for employers to implement engineering, administrative, and work practice controls and personal protective equipment (PPE). The guidance is intended for planning purposes – employers and workers should use the planning guidance to help identify risk levels in workplace settings and to determine any appropriate control measures to implement.
- The U.S. Office of Personnel Management (OPM), an independent agency that serves as the chief human resources agency and personnel policy manager for the Federal Government, issued **guidance** for Federal Agencies regarding COVID-19 and human resources policies.
- DOL announced new guidance outlining flexibilities that States have in administering their unemployment (UI) programs to assist Americans affected by the COVID-19 outbreak. Under the guidance, federal law.

U.S. Department of Housing & Urban Development (HUD)

- The health and well-being of our country's most vulnerable citizens is Secretary Ben Carson's highest priority. At the direction of Secretary Carson senior HUD, officials have developed an Infectious Disease Toolkit for Continuum of Care homeless shelters (CoC). This includes specific documents addressing preparedness in shelters and encampment settings. More **here**.
- HUD has sent communication to CoC and Housing Opportunities for Persons With AIDS (HOPWA) grantees, highlighting the importance of infectious disease preparedness and linking to CDC and Healthcare for the Homeless resources: **Infectious Disease Preparedness Among Homeless Assistance Providers**
- HUD is coordinating with the CDC, Healthcare for the Homeless, United States Interagency Council on Homelessness (USICH) on messaging and cross-promoting resource materials. This will continue on an ongoing basis. Also, the Department is reaching out to Health Resources and Services Administration (HRSA) and Substance Abuse and Mental Health Services Administration (SAMHSA) for future coordination.
- HUD has plenty of resources for your communities including:
    - Communities can use their unspent Emergency Solutions Grants and Continuum of Care Program funds to help address needs related to coronavirus. Additionally, a portion of CDBG funds are also available for public services, including health care.
    - Technical Assistance is available for ESG and CoC Program recipients if requested. Additionally, communities that want to amend their CDBG plans, can reach out to their CPD representative if they need assistance.

AMERICAN OVERSIGHT

U.S. Department of Agriculture (USDA)

- USDA Secretary Sonny Perdue **announced proactive flexibilities** to allow meal service during school closures to minimize potential exposure to the coronavirus. During an unexpected school closure, schools can leverage their participation in one of USDA's summer meal programs to provide meals at no cost to students. Under normal circumstances, those meals must be served in a group setting. However, in a public health emergency, the law allows USDA the authority to waive the group setting meal requirement, which is vital during a social distancing situation.
- USDA intends to use all available program flexibilities and contingencies to serve program participants across our 15 nutrition programs. USDA has already begun to issue waivers to ease program operations and protect the health of participants. USDA is receiving requests for waivers on an ongoing basis. As of today, USDA has been asked to waive congregate feeding requirements in Washington, California, Maryland, Alaska, Utah, Pennsylvania, Wyoming, Maine, Kansas, New Jersey, New York, South Carolina, South Dakota, and Virginia and USDA has granted those requests.
- For more information about the coronavirus response across USDA, please visit: **www.usda.gov/coronavirus**.

U.S. Department of Homeland Security (DHS)

- While the overall risk to the American public remains low, actions by DHS and the administration are decreasing the strain on public health officials by screening incoming travelers, expediting the processing of U.S. citizens returning from China, and ensuring resources are focused on the health and safety of the American people. It is important to recognize, that while there is a significant focus on containing and mitigating the spread of COVID-19, all departments and agencies of DHS are continuing to perform their regular duties with no impact on their mission.
- DHS is working to recognize, detect, and assist individuals attempting to enter the U.S. through our, airports, land ports, or waterways who may be carrying the virus: Cruise Lines International Association, CDC, USCG, and CBP. DHS is working with the Department of State, HHS, and the senior public health leadership with the Government of Mexico to prepare for any COVID-19 cases identified along the South West Border. This effort includes coordination with state, and local Public Health Officials to develop reporting and response courses of action.
- FEMA has rostered 56 four-person Incident Management Assistance Teams.
- The Countering Weapons of Mass Destruction Office, which contains the National Biosurveillance Integration Center and the Chief Medical Officer, has maintained close coordination with our Components and U.S. Government partners regarding the status of the outbreak and associated U.S. Government response actions.
- *Presidential Proclamation to Protect the Homeland from Travel-Related Coronavirus Spread:* On Thursday, March 12, President Donald J. Trump signed a **Presidential Proclamation**, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. *This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.*

COVID-19: Background & Additional Information

Background

Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Since the beginning of the outbreak, President Trump has taken unprecedented steps – including prudent travel restrictions and an early containment strategy – to protect the health of Americans in response to the coronavirus. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response (**President Donald J. Trump Has Taken Unprecedented Steps to Respond To the Coronavirus and Protect the Health and Safety of Americans**). The Coronavirus Task Force and broader Administration have and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk to the average American remains low. All agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

Good Morning,

The White House Task Force on Coronavirus and the Centers for Disease Control & Prevention have released two helpful documents for State, local, tribal, and community leaders.

- **Actions for All Americans** *(4-page slide deck)*
- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

You can find additional information about both documents and resources below.

Actions for All Americans *(4-page slide deck)*

- Keeping the workplace safe
- Keeping the school safe
- Keeping the home safe
- Keeping commercial establishments safe

A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(10-page frame work for States, localities, and communities)*
Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts. Framework includes:

- Local Factors to Consider for Determining Mitigation Strategies
- Community mitigation strategies by setting and by level of community

AMERICAN OVERSIGHT

transmission or impact of COVID-19

- Potential mitigation strategies for public health functions

Recent Actions

- HHS Supports Development of First High-Throughput COVID-19 Diagnostic Test (click here)

What You Need To Know: President Trump and the Administration Are Taking a Whole-Of-Government Approach to Protecting the American People

Top Line

- The risk to the American public remains low.

AMERICAN OVERSIGHT

- The Coronavirus Task Force is marshalling a whole-of government response to COVID-19 and driving collaboration between Federal-State-Tribal-Local stakeholders.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. In addition, all state labs have the test and are empowered to conduct the test themselves. Complementing these efforts, leading commercial laboratories in the country will soon have tests available for local doctors, pharmacies, and broadly to the American public.

President Trump has made the safety, security and health of the American people his top priority from day one.

- There is no higher priority for President Trump than protecting the health and safety of Americans.
- In 2018, President Trump signed the **National Biodefense Strategy**, which improves speed of action in situations such as this.
- While additional cases are expected, the general risk to the average American remains low, and the Administration is taking measures to keep the threat low.

Since the very beginning of the coronavirus outbreak, the President has taken an unprecedented whole-of-government approach to protect the American people.

- President Trump took unprecedented action and suspended all travel into the United States from China and has issued subsequent screening measures and guidance on travel from other impacted areas across the globe.
- Issuing a public health emergency declaration on January 31.
- Establishing the White House task force to combat the coronavirus spread. The Task Force is coordinating and marshalling the full resources and capabilities of the Federal government to respond to the coronavirus.
- Forging relationships and collaboration between the public and private sectors.
- Remained in close contact with our Nation's governors and other key stakeholders.
- *The Washington Times:* ***Thanks to Trump Administration, the United States has a Coronavirus Plan of Action***.
- *Dr. Marc Siegel:* ***Coronavirus Public Health Response Has Been Handled Well***

Actions for All Americans *(4-page slide deck)*

- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

While the overall threat to the American public remains low, the President has directed the White House Task Force to take all steps to ensure the health and well-being of the American people and we are well-prepared.

- Americans do not need to change their day-to-day lives but should stay informed and practice good hygiene.
- There are good tried and true hygiene practices which can be very effective to reduce the chance of getting sick.
- Travelers are encouraged to always exercise healthy travel habits when traveling and to follow appropriate guidance (*see* **here**). At this time, there are no domestic

AMERICAN OVERSIGHT

travel restrictions in the United States.

- We are working rapidly on therapeutics and vaccines and have launched the first U.S. clinical trial for an investigational antiviral.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. Between March 2nd and 5th, more than 900,000 tests were distributed across the country.
- The United States has the finest public health system in the world and knows the playbook to respond to infectious disease outbreaks.

Local, State, tribal, & Federal coordinated preparedness & response efforts.

- Federal officials have been working diligently to communicate with State, local, and tribal officials on the Federal government's efforts to prepare and respond to COVID-1.
- Our Nation's Governors have participated in-person and on conference call briefings with Federal partners on January 30, February 9, February 20, March 2, and March 9. These communications remain ongoing.
- White House, OMB, HHS, DHS, DOT, and State Department Officials met with over 40 State, county, and city health officials from over 30 States and territories to thank them for their leadership and to continue discussions on the Federal-State-Local partnership to prepare and respond to COVID-19 (February 25).
- HHS, CDC, DHS, and Federal partners have held numerous national briefing calls with State, local, tribal, private-sector, and community leaders.
- The Trump Administration is partnering with State, local, and tribal elected and appointed leaders' associations.

- Reviewing local preparedness plans and strategies.

What You Need To Know: President Trump and the Administration Are Taking a Whole-Of-Government Approach to Protecting the American People

Top Line

- The risk to the American public remains low.

AMERICAN OVERSIGHT

- The Coronavirus Task Force is marshalling a whole-of government response to COVID-19 and driving collaboration between Federal-State-Tribal-Local stakeholders.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. In addition, all state labs have the test and are empowered to conduct the test themselves. Complementing these efforts, leading commercial laboratories in the country will soon have tests available for local doctors, pharmacies, and broadly to the American public.

President Trump has made the safety, security and health of the American people his top priority from day one.

- There is no higher priority for President Trump than protecting the health and safety of Americans.
- In 2018, President Trump signed the **National Biodefense Strategy**, which improves speed of action in situations such as this.
- While additional cases are expected, the general risk to the average American remains low, and the Administration is taking measures to keep the threat low.

Since the very beginning of the coronavirus outbreak, the President has taken an unprecedented whole-of-government approach to protect the American people.

- President Trump took unprecedented action and suspended all travel into the United States from China and has issued subsequent screening measures and guidance on travel from other impacted areas across the globe.
- Issuing a public health emergency declaration on January 31.
- Establishing the White House task force to combat the coronavirus spread. The Task Force is coordinating and marshalling the full resources and capabilities of the Federal government to respond to the coronavirus.
- Forging relationships and collaboration between the public and private sectors.
- Remained in close contact with our Nation's governors and other key stakeholders.
- *The Washington Times:* ***Thanks to Trump Administration, the United States has a Coronavirus Plan of Action***.
- *Dr. Marc Siegel:* ***Coronavirus Public Health Response Has Been Handled Well***

Actions for All Americans *(4-page slide deck)*

- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

While the overall threat to the American public remains low, the President has directed the White House Task Force to take all steps to ensure the health and well-being of the American people and we are well-prepared.

- Americans do not need to change their day-to-day lives but should stay informed and practice good hygiene.
- There are good tried and true hygiene practices which can be very effective to reduce the chance of getting sick.
- Travelers are encouraged to always exercise healthy travel habits when traveling and to follow appropriate guidance (*see* **here**). At this time, there are no domestic

AMERICAN OVERSIGHT

travel restrictions in the United States.

- We are working rapidly on therapeutics and vaccines and have launched the first U.S. clinical trial for an investigational antiviral.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. Between March 2nd and 5th, more than 900,000 tests were distributed across the country.
- The United States has the finest public health system in the world and knows the playbook to respond to infectious disease outbreaks.

Local, State, tribal, & Federal coordinated preparedness & response efforts.

- Federal officials have been working diligently to communicate with State, local, and tribal officials on the Federal government's efforts to prepare and respond to COVID-1.
- Our Nation's Governors have participated in-person and on conference call briefings with Federal partners on January 30, February 9, February 20, March 2, and March 9. These communications remain ongoing.
- White House, OMB, HHS, DHS, DOT, and State Department Officials met with over 40 State, county, and city health officials from over 30 States and territories to thank them for their leadership and to continue discussions on the Federal-State-Local partnership to prepare and respond to COVID-19 (February 25).
- HHS, CDC, DHS, and Federal partners have held numerous national briefing calls with State, local, tribal, private-sector, and community leaders.
- The Trump Administration is partnering with State, local, and tribal elected and appointed leaders' associations.

AMERICAN OVERSIGHT

From: Baker, Michael (OS/IEA)
To: Baker, Michael (OS/IEA)
Subject: COVID-19 Updates for Friday, March 13, 2020
Date: Friday, March 13, 2020 9:14:46 PM

Dear State and Local Partners:

Every day brings new information and developments on COVID-19, many of which impact your efforts to address the Coronavirus. We value our strong partnership with you all as we continue to work on the COVID-19 response. We aim to ensure that you have access to the resources and information that you need for your communities.

Here are key highlights:

National Emergency Declaration: Today, President Trump signed a National Emergency Declaration in response to COVID-19. The Emergency Declaration will allow HHS to provide emergency funding to state and local entities (up to $50 billion) and specifically will enable HHS to waive provisions of certain laws and regulations to provide increased flexibility to healthcare providers. Additional flexibilities will be able to be exercised around the use of telehealth, state licensing requirements for providers to practice in areas of greatest need, increasing the supply of providers, loosening restrictions on where hospitals can care for patients within a hospital, and flexibilities on the number of beds and lengths of stay for Critical Access Hospitals.

Increasing Capacity for Testing: The Administration designated Assistant Secretary for Health, ADM Brett Giroir, M.D., to take the lead in coordinating testing efforts to ensure seamless access for patients, doctors, and hospitals. HHS is working to help expedite the availability of tests by utilizing the private sector and allowing states to offer and develop their own tests. Yesterday, the FDA authorized a diagnostic test developed by Roche, to rapidly expand the capacity and timeliness of testing for COVID-19 diagnostics. The FDA also approved the New York State Department of Health to directly authorize labs to begin patient testing. More information about these actions can be found here. For technical information on diagnostic testing, FDA posted frequently asked questions related to the development and performance of diagnostic testing.

With help from public-health and private-sector lab capabilities, HHS has also enabled states and healthcare providers to implement sample collection for pre-screened patients, similar to what is being done at the Mayo Clinic and Minnesota Department of Health, by the Colorado Health Department and by the University of Washington. CMS has also published the Medicare reimbursement amounts to providers for COVID-19 testing, which can be found here.

Lab Test Questions – As public and private testing labs continue to gear up capabilities and review the new options being created through the FDA, they may have questions. To help answer those questions that are technical in nature, the FDA has stood up a 24/7 hotline for things related to COVID-19: 1-888-INFO-FDA or 1-888-463-6332.

Essential Health Benefit Coverage of COVID-19: The FAQs released today, March 13, detail existing federal rules governing health coverage provided through the individual and small group insurance markets that apply to the diagnosis and treatment of COVID-19. The FAQs clarify which COVID-related services, including testing, isolation/quarantine, and vaccination, are generally currently covered as EHBs in these markets. The purpose of the FAQs is to provide guidance to Americans enrolled in individual or small group market health plans, including HealthCare.gov consumers. As questions and issues continue to come to CMS, they will be addressed and added to these FAQs. The document can be found here.

AMERICAN OVERSIGHT

Community Response: All communities can take measures to reduce the spread of COVID-19. Everyone has a role to play in getting ready and staying healthy. CDC has released updated information on Preventing the Spread of COVID-19 in Communities as well as issuing considerations for school closures.

Surgical Masks and Gowns: The FDA sent a letter to healthcare providers on conservation strategies for personal protective equipment. The recommendations include strategies for conventional, contingency and crisis level of supplies.

Cruise Advisory: CDC and the State Department recommend travelers, particularly those with underlying health issues, defer all cruise ship travel worldwide. At this point, all passengers from the Grand Princess cruise have disembarked from the ship.

If there are any questions, please don't hesitate to reach out.

Sincerely,
Darcie

AMERICAN OVERSIGHT

From: Nikki Fried
To: Courtney Coppola
Subject: COVID-19: How we're protecting consumers.
Date: Thursday, March 12, 2020 3:14:54 PM

Courtney,

As your Commissioner of Agriculture and Consumer Services, your safety is my greatest concern. With new cases of the coronavirus COVID-19 announced daily in Florida, my department is working to reduce the risk of its spread by making sure places that millions of Floridians visit daily -- like grocery stores, convenience stores, and gas stations -- are following best sanitation and food safety practices.

Our department is working with businesses to ensure that they are sanitizing shopping carts and basket handles, offering sanitizing supplies to customers, and that food stores are following food safety guidelines.

Everything counts when it comes to limiting the spread of viruses.

Studies have shown that human coronaviruses can live on surfaces like plastic, glass, or metal for up to nine days. Here are some things you can do as consumers to protect yourselves and others.

- Wipe down surfaces with disinfecting wipes at the gas pump, in the gym, at the coffee shop, or any public place. Don't reuse the wipe.
- Apply hand sanitizer to your hands after pumping gas or wash hands for at least 20 seconds or more with soap. Wash your hands often -- before preparing food, after coughing or touching a pet -- for at least 20 seconds with soap. Use disposable products to dry your hands or wash reusable cloths at 140 degrees Fahrenheit after each use.
- Wash your hands even when wearing gloves. Germs can spread to hands when removing gloves.
- Disinfect and dry commonly-used surfaces like countertops and cutting boards, because dampness can help viruses survive and thrive.
- If you have questions about the public health impacts of COVID-19, please call the Florida Department of Health's 24/7 COVID-19 Call Center at +1 (866) 779-6121 or email COVID-19@flhealth.gov.

We're continuing to monitor the COVID-19 situation closely, and being proactive in

AMERICAN OVERSIGHT

protecting consumers and businesses.

Thank you,

Nikki

Sent: Friday, March 13, 2020 9:20 AM
To: WPCG30@LISTSERV.CDC.GOV
Subject: Re: [External] Re: Update on Hong Kong Dog

All,
I agree with Juia. My curmudgeonly take from a lot of time in public health. We know a little bit about corona viruses in general, about droplet transmission of viruses, and how to work a public health problem before we have a lot of data. Bathing the dog with a normal shampoo and regular PPE (gloves and apron) on entry if you are worried. No extraordinary PPE should be needed. Think about it. Even if the pet were covered in virus (and pets are hardly hard, impervious surfaces), bathing it with a shampoo will get rid of the virus and it is not likely that someone bathing a dog will touch their face with soaped up gloved hands. And if they do, we all know that soap does bad things to the virus. Wetting the animal will not aerosolize the virus and we know it is droplet transmitted--few if any indications from human literature about re-aerosolization from medical procedures.

If you had a pet with symptoms, it would be the first in the world and you can best bet that USDA and OIE (and a host of other acronym agencies) will get involved in a second and the pet will be tested every which way known.

And as in all public health outbreaks, if we get information that would change those recommendations, we will and will communicate that to our colleagues. Wish you all could have a quiet weekend (but I also wish I were empress of the universe).

Regards,
Gail

>> Thanks for this update. It seems as if this dog is still being housed at the animal keeping facility. Do we know the plan and conditions for this dog's release? Is there a particular concern that is informing his quarantine at this point? I continue to emphasize here, as we receive an increasing number of questions about this aspect of COVID-19 response, that there is no evidence that pets either become ill with COVID-19 or are any significant source for human illness and the best way pet owners can protect their pets is to protect themselves from becoming ill with COVID-19. For veterinarians, I have been encouraging review of the CDC guidance for workplace preparedness and offering thoughts about best practices associated with clients who present for appointments who are ill with symptoms compatible with COVID-19. Are there any other messages that we should be sharing with animal healthcare providers, shelters and/or pet owners at this time?

>>>
>>> March 12, 2020
>>>
>>> A blood test of a pet dog, which had earlier repeatedly tested weak positive for COVID-19, has shown a negative result, the Agriculture, Fisheries & Conservation Department announced today.

AMERICAN OVERSIGHT

The department collected samples from the dog five times for tests since late February and detected low levels of the virus in its nasal and oral cavity samples.

A blood sample was taken from it on March 3 for a serological test, which resulted in a negative result, indicating that there is not a strong immune response and that there are currently not measurable amounts of antibodies in the blood.

The negative serological test result does not suggest that the dog is not infected with the virus.

It is known in some asymptomatic or mild cases of human infections with other types of coronavirus that antibodies may not always develop. It is also not uncommon to have a negative result in the earlier stages of infection as it often takes 14 days or more for measurable levels of antibodies to be detected.

Another blood sample will be taken later for further testing.

Additionally, the department, together with the University of Hong Kong's School of Public Health, has conducted gene sequencing of the COVID-19 virus from the dog and its close human contacts who were confirmed to be infected.

They discovered that the viral sequences are very similar, indicating that the virus likely spread from the infected people to the dog.

The animal has not shown any signs of the disease and it is currently under quarantine at the animal keeping facility at the Hong Kong Port of Hong Kong-Zhuhai-Macao Bridge.

The department will continue to monitor the dog closely.

As COVID-19 is a new disease, it will work together with the Department of Health in handling relevant cases.

There currently is no evidence that pet animals can be a source of infection of COVID-19, the department added.

Pet owners should not be overly concerned and under no circumstances should they abandon their pets.

Good morning,

Please see below for today's AM collection of Coronavirus Disease 2019 (COVID-19) information, gathered for your awareness:

- CDC Mass Gatherings Guidance [Link]
  - Please see below for a message from CDC regarding mass gatherings guidance nationwide:

    "Large events and mass gatherings can contribute to the spread of COVID-19 in the United States via travelers who attend these events and introduce the virus to new communities. Examples of large events and mass gatherings include conferences, festivals, parades, concerts, sporting events, weddings, and other types of assemblies. These events can be planned not only by organizations and communities but also by individuals. Therefore, CDC, in accordance with its guidance for large events and mass gatherings, recommends that for the next 8 weeks, organizers (whether groups or individuals) cancel or postpone in-person events that consist of ***50 people*** *or more throughout the United States. Events of any size should only be continued if they can be carried out with adherence to guidelines for protecting vulnerable populations, hand hygiene, and social distancing. When feasible, organizers could modify events to be virtual."*
- CDC Health Alert Network (HAN) 430: Information and Guidance about Global Travel on Cruise Ships, Including River Cruises, due to COVID-19 [Link]
  - This **CDC HAN Update** was issued on March 15, 2020, and recommends all persons defer any travel on cruise ships, including river cruises, worldwide because of the increased risk of SARS-CoV-2 transmission onboard ships.
- CDC COCA Call: Coronavirus Disease 2019 (COVID-19) Update and Infection Prevention and

AMERICAN OVERSIGHT

Control Recommendations [Attachment]

- CDC Clinician Outreach and Community Activity (COCA) will host a webinar **tomorrow, Tuesday March 17 at 2:00 pm EDT**, focusing on current information about COVID-19 as it relates to long-term care facilities, including nursing homes. Topics will include infection prevention and control guidance, steps facilities should take to prepare, and available resources.

- OSHA Guidance: Healthcare Respiratory Protection Annual Fit-Testing for N95 Filtering Facepieces During the COVID-19 Outbreak [Link]
  - Please see below for a message from CDC's State Coordination Task Force (SCTF), dated March 15, 2020:

    "Yesterday the Occupational Safety and Health Administration (OSHA) released Temporary Enforcement Guidance - Healthcare Respiratory Protection Annual Fit-Testing for N95 Filtering Facepieces During the COVID-19 Outbreak. The guidance can be found here: https://www.osha.gov/memos/2020-03-14/temporary-enforcement-guidance-healthcare-respiratory-protection-annual-fit. A fit test is required for anyone wearing a respirator to protect against COVID-19. Annual fit test can be temporarily suspended if employee has already been fit tested to that respirator.

    See relevant bullets from memo below:

    - *Perform initial fit tests for each HCP with the same model, style, and size respirator that the worker will be required to wear for protection against COVID-19 (initial fit testing is essential to determine if the respirator properly fits the worker and is capable of providing the expected level of protection);*
    - *Inform workers that the employer is temporarily suspending the annual fit testing of N95 filtering facepiece respirators to preserve and prioritize the supply of respirators for use in situations where they are required to be worn."*

  - for Tuesday, March 10, 2020
- Reminder: CSTE COVID-19 Response Resource Repository [Link]
  - As CSTE continues to respond to the international outbreak of COVID-19, the National Office has created a **COVID-19 Response Resource Repository Basecamp** for CSTE members working at STLT health departments. The purpose of this repository is to facilitate the sharing of health department-created guidance documents, resources, or other useful tools that may be helpful to other STLT jurisdictions during their response. To sign-up and access the Basecamp, please visit this link. *Note:* The Basecamp also includes rules and instructions for use and how to adjust notification settings.

Sent to State Epidemiologists, Deputy State Epidemiologists, CLUE, Infectious Disease Points of Contact, and the CSTE Executive Board

Good afternoon,

Please see below for today's PM collection of Coronavirus Disease 2019 (COVID-19) information, gathered for your awareness:

- List of CLIA Certified Labs from CMS [Attachment]
  - APHL and CSTE secured a list of Clinical Laboratory Improvement Amendments (CLIA) certified laboratories from CMS. The list excludes CLIA–waived laboratories, and we hope it will be helpful in identifying laboratories that have the potential to bring on testing for COVID-19. APHL has shared this list with their membership as well. We encourage you to coordinate with your state laboratory partners as necessary.
- FDA FAQs on Diagnostic Testing for SARS-CoV-2 [Attachment, Link]
  - Please see below for a message from CDC Laboratory Outreach Communication System (LOCS):

    "On March 10, 2020, the Food and Drug Administration (FDA) posted answers to frequently asked questions (FAQs) on Diagnostic Testing for SARS-CoV-2. This LOCS message is to raise awareness about these FDA FAQs among clinical laboratories that could potentially be asked to perform testing. Topics covered include information on:
    - Confirmatory testing for presumptive positive results;
    - Additional thermal cyclers for the CDC Emergency Use Authorization (EUA) assay;
    - Additional extraction platforms and reagents for the CDC EUA assay;
    - Acceptable alternatives to the assay positive control material;
    - Acceptable alternatives to the assay extraction control material"

AMERICAN OVERSIGHT

- CDC Recommendations for Long-Term Care Facilities, Nursing Homes [Link]
    - This webpage includes "*COVID-19* ***Preparedness Checklist*** *for Nursing Homes and other Long-Term Care Settings,*" which is also directly linked here.
- CDC Interim Guidance for Risk Assessment and Public Health Management of HCP with Potential Exposure in a Healthcare Setting to Patients with COVID-19 [Link]
    - Updated on March 7, 2020

To: StateESF8.Planning; Blackmore, Carina
Subject: Concern Asymptomatic Screening and Negative Results
Date: Monday, March 16, 2020 10:33:22 AM

It is becoming increasingly concerning that persons who are in their 14 day self-quarantine period, that receive a negative test think that ends their quarantine. With increasing availability of testing, we need to ensure that persons know just because you may have received a negative test during the 14 days, you still need to stay quarantined for the whole time.

WHAT IT MEANS FOR LAWYERS

BigLaw Poised To Weather Financial Impact Of COVID-19

The majority of large law firms are well-positioned to weather an economic slowdown related to the novel coronavirus pandemic after many increased their capital reserves and implemented good financial hygiene following the last recession, experts told Law360.

Under Pressure: Legal Aid Attys Brace For Virus's Impacts

As the entire legal industry continues reacting to the spread of COVID-19, the legal aid community is bracing for its expected impact on their services for underserved communities. And in some parts of the country, providers are already weathering the effects.

4 Key Coronavirus Insurance Coverage Battlegrounds

Property and liability insurers are bracing for an uptick in claims across virtually every line of coverage due to the outbreak of the novel coronavirus, as companies lose money by shutting down large-scale events and businesses face supply chain troubles. Here, Law360 looks at four types of coverage that are especially ripe for disputes.

EXPERT ANALYSIS

Local Gov'ts Have An Important Role In Fighting Coronavirus

Following state and federal declarations of emergency in the U.S. in response to the coronavirus outbreak, local authorities and health officials must have a seat at the decision-making table as they know their own communities best and have valuable information to share, say Mary-Christine Sungaila and Marco Pulido of Haynes and Boone.

More Details On Brevard County Coronavirus Case
Date Collected Mar 17, 2020 12:58 PM EDT
Category Local
Source Brevard Times
Author Brevard Times
Market Melbourne, FL
Language English
The Florida Department of Health has released more details of the first presumptive positive case of coronavirus in Brevard County that was identified on Monday, March 16, 2020. The COVID-19 patient is a female whose contraction of the virus was travel-related and not community transmitted. The age of the Brevard County coronavirus patient has not yet been released. Also, the Florida Department of Health has not revealed whether the patient is a Florida resident or out-of-state visitor.

What Floridians should do if they think they have COVID-19
Date Collected Mar 17, 2020 12:40 PM EDT
Category Local
Source First Coast News
Market Jacksonville, FL
Language English
There are several steps you can take if you believe you have contracted the coronavirus also known as COVID-19.

1. Contact your primary care provider People who believe they may have been exposed to COVID-19 should call ahead to their primary care provider. The provider should use the following set of Florida Department of Health criteria to determine if the person meets qualifications for testing. The patient must be exhibiting symptoms of acute lower respiratory illness (e.g., fever, cough, and shortness of breath) AND meet one or more of the following criteria: Persons who have had close contact with a laboratory-confirmed COVID-19 case Persons hospitalized with acute lower respiratory illness of unknown origin 3. History of travel to or from an affected geographic area with widespread community transmission History of international travel or a cruise 5. =65 with chronic health conditions Immunocompromised persons If the patient does not meet the above criteria, testing may occur based on the clinician's judgment. The health care provider is responsible for specimen collection, handling and shipping.

2. No primary care provider? Reach out to the Florida Department of Health If people believe they may have been exposed to COVID-19, but do not have a primary care provider, they can call ahead to the Florida Department of Health for guidance. The COVID-19 Call Center available 24/7 at 866-779-6121. You can also call 904-253-1850. If someone from the department feels that the person meets the criteria for testing, they will be given instructions on what to do. We do not recommend that people just show up at the Department without speaking to someone first. If a person feels they

AMERICAN OVERSIGHT

are experiencing life-threating symptoms, they should go to the emergency room.

DeSantis orders Florida bars, nightclubs closed for 30 days
Date Collected Mar 17, 2020 12:40 PM EDT
Category Local
Source Jacksonville Daily Record
Market Jacksonville, FL
Language English
Florida Gov. Ron DeSantis has ordered all bars and nightclubs statewide to close at 5 p.m. March 17 and remain closed for the next 30 days as officials attempt to slow the spread of the new coronavirus. In a 10:50 a.m. news conference, DeSantis said the new restrictions will follow a similar decision in California and the latest guidance released March 16 by the Centers for Disease Control and Prevention in Atlanta and the White House. President Donald Trump said March 16 in a White House news briefing that guidance includes limiting gatherings to no more than 10 people. The governor said his administration also will limit restaurants statewide to 50% normal capacity. This follows local orders March 16 from Jacksonville Mayor Lenny Curry limiting the capacity of gathering places and "nonessential retail" outlets in Duval County to no more than 50 people.

DeSantis will advise the Florida Board of Governors to move state university and colleges to remote learning for the remainder of the spring semester. He said he expects an official announcement from the board today. As of 5 p.m. March 16, the Florida Department of Health reported 160 confirmed cases of COVID-19, the disease caused by the new coronavirus, in the state. City Director of Public Affairs Nikki Kimbleton said the mayor will hold a 3 p.m. news conference March 17.

DeSantis said people cannot gather in groups of more than 10 people on Florida's beaches and must keep more than 6 feet of distance between people. "I think some of the steps we're taking will reduce density, reduce crowds and that's the best thing we can do at this point," he said. Kimbleton said City Hall received multiple emails and phone calls March 17 about Duval County business and venues not following the city order. She said at least 30 city code enforcement officers will be sent out March 17 to distribute written guidance to help businesses come into compliance. As of 11:25 a.m. March 17, the order does not apply to grocery stores and other building uses such as manufacturing facilities, office buildings, warehouses and fulfillment centers. She said that city officials could require businesses to shut down if they do not comply with Curry's mandate.

Tallahassee Memorial Hospital working on drive-thru COVID-19 sample collection site at Northwood Centre
Date Collected Mar 17, 2020 1:13 PM EDT
Category Local
Source WTXL-TV
Market Midway, FL
Language English
TALLAHASSEE, Fla.(WTXL) — Tallahassee Memorial Healthcare is taking steps to help fight coronavirus spread by opening Tallahassee's first drive-thru sample collection site for patients who that have been ordered by a doctor to receive a test. The drive-thru sample collection site will open

AMERICAN OVERSIGHT

at the Northwood Centre parking lot in the coming days, though an official open date has not been set. TMH stresses that the drive-thru collection site is not a community-wide screening and testing drive-thru location. While the site is not a drive-thru testing site, it is a centralized sample collection site for patients who have been ordered by their doctor to get a COVID-19 test. Samples will only be collected from patients who have already been evaluated and have a physician order for COVID-19 testing. "Drive-thru specimen collection is one way to mitigate the spread of the virus by allowing people to remain in their vehicles without exposing others to infection," TMH said in a statement sent to ABC 27. TMH officials say they're also telling local doctors to only order COVID-19 testing for patients who meet the criteria set by the Florida Department of Health. For more on what those requirements are, click here. So far, no cases of coronavirus have been confirmed in Leon County. "We are working diligently to launch this sample collection site as quickly as possible and look forward to announcing the opening soon," TMH wrote in a statement.

Florida Expands Coronavirus Testing Criteria To Allow Doctors Discretion
Date Collected Mar 17, 2020 1:54 PM EDT
Category Organization
Source WJCT
Author Jessica Palombo
Market United States
Language English
As of March 15, the state of Florida has expanded its criteria for coronavirus testing to allow doctors to test at their discretion. The new state Department of Health guidance is a significant expansion of the previous criteria, which restricted testing mainly to those who traveled internationally or were exposed to a confirmed case of COVID-19. The new DOH testing guidance for doctors is as follows: Test if your patient is exhibiting symptoms of acute lower respiratory illness (e.g., fever, cough, and shortness of breath) AND meets one or more of the following criteria: Persons who have had a close contact with a laboratory-confirmed COVID-19 case Persons hospitalized with acute lower respiratory illness of unknown origin History of travel to or from an affected geographic area with widespread community transmission History of international travel or a cruise =65 with chronic health conditions Immunocompromised persons If your patient does not meet the above criteria, testing may occur based on clinician's judgement.

Gov. DeSantis closing bars as COVID-19 deaths hit six in Florida; local option on beach closures
Date Collected Mar 17, 2020 2:08 PM EDT
Category Local
Source Florida Phoenix
Author Michael Moline
Market Tallahassee, FL
Language English
Gov. Ron DeSantis has ordered the closure of bars across Florida and taken steps to kick out any college students still on Florida campuses as the death toll from the COVID-19 pandemic reached six

AMERICAN OVERSIGHT

in the state.

During a short news conference in the state Capitol — following which he took no questions — the governor identified the latest fatality as a 77-year-old man at an assisted living facility in Broward County. The man had suffered "significant underlying medical problems," he said. The Florida Department of Health sent a "strike team" to check on the other residents. "All individuals at the facility are isolated and are being evaluated," DeSantis said.

Today's death case follows a report Monday evening from the state health department, saying an Orange County individual had died from COVID-19, making it the 5th death in Florida. The department has reported a total of 192 COVID-19 cases within Florida as of late Tuesday. Of that number 173 involved Florida residents and 19 non-resident cases.

The forced closure of bars and nightclubs will begin at 5 p.m. Tuesday and extend for 30 days. DeSantis cited reports that crowds have been congregating in these establishments despite urgent calls that people avoid large gatherings. According to an executive order released later Tuesday, the mass closings will be accomplished through a ban on alcohol sales at bars, pubs, and nightclubs that derive more than half their revenues through such sales. As for restaurants, they may remain open if they enforce social distance between diners — 6 feet, to be precise — and operate at half capacity, DeSantis said. The preference, however, is to rely on take-out and delivery orders. And employees must be screened for symptoms of infection by the new coronavirus that's been linked to COVID-19. He warned of potential "stealth carriers" — people who've been exposed to the virus but remain asymptomatic but can still transmit infections. "Nobody really has a handle on that. If they're not meeting in those big groups, then the chance of that being passed on is less."

The governor had been publicly pondering how hard to crack down on popular gathering spots since at least Sunday evening. DeSantis plans to leave local leaders considerable flexibility to regulate use of beaches, within statewide standards that no more than 10 people can group together and that beachgoers generally maintain a safe distance from each other.

Officials at the White House "really want to see a lot of action over the next 15 days. I think some of the steps we're taking will really help reduce density, reduce crowds. And I think that's probably the best thing that we can do at this point." Florida's public universities had planned to rely on remote learning for two weeks following the end of Spring Break. However, DeSantis said he planned to lean on the university system's Board of Governors to send students to their hometowns for the remainder of the semester. "The goal of that is that the students not stay congregated on campus but actually return home. We think that will be safer for everybody and we think that the universities are equipped to be able to handle the remote learning." The problem is that "a lot of students have just been congregating at the universities and going out and doing things there. That's not something we want," DeSantis said.

Similar gatherings — some unruly — have been reported elsewhere within the United States. "Look at that CDC guidance: I think the No. 1 thing is, we don't want large crowds of people congregating right now. We want to have enough isolation so that the virus has more difficulty spreading throughout the community," DeSantis said. The moves are consistent with the guidance President

AMERICAN OVERSIGHT

Trump issued Monday evening, DeSantis said. “This is the floor for Florida for the foreseeable future,” the governor said. Individual cities, including Miami, will likely go further in restricting public gatherings with his blessing. “This is a virus that is affecting the whole state, but I think if affects different communities differently. The response may not always be the same on every little thing. We have a number of counties that have not had a single case. And so I feel this makes the most sense. It gives the flexibility to locals to go further if they want to, but also recognizes that we do have some areas where we haven’t seen this yet.”

State parks limit hours of operation due to coronavirus
Date Collected Mar 17, 2020 2:39 PM EDT
Category Local
Source WCTV6
Author News Service Florida
Market Tallahassee, FL
Language English
TALLAHASSEE, Fla. (WCTV) -- Florida parks will open during set daytime hours for the next two months, with campground and overnight accommodations closed completely starting Friday, the Department of Environmental Protection announced Tuesday. The action concerning the parks comes as state officials respond to the rapidly increasing number of coronavirus cases in Florida. The state park system will honor existing camping reservations that begin on March 18, but individuals that made those plans must arrive prior to 5 p.m.

Wednesday, officials said. After Wednesday, existing reservations will be canceled and refunded, the state agency said in a release. State parks had been operating during daylight hours, but the change announced Tuesday limits sets visitation between 8 a.m. and 5 p.m. The Department of Environmental Protection is also canceling "all events, activities, special event reservations, pavilion rentals and overnight reservations" for the next 60 days. “All staff are fully informed and utilizing the protocol urged by the CDC (Centers for Disease Control and Prevention)and Florida Department of Health,” DEP officials said in a Tuesday press release. “Surfaces and areas that are frequently touched are consistently disinfected throughout the day, and all facilities are regularly and thoroughly cleaned to protect visitor safety.”

The state agency also is closing three Office of Resilience and Coastal Protection facilities --- Apalachicola National Estuarine Research Reserve, Guana Tolomato Matanzas National Estuarine Research Reserve and Rookery Bay National Estuarine Research Reserve. No timeline was given for the facilities to reopen. The changes are in accord with guidance from the CDC “to avoid the gathering of large groups of people,” the press release said.

DOH: 192 COVID-19 cases in the state

AMERICAN OVERSIGHT

TALLAHASSEE — To keep Florida residents and visitors safe, informed and aware about the status of the virus, The Florida Department of Health has launched a COVID-19 dashboard that will be updated twice daily. Today, as of 10 a.m., there are 192 total Florida cases. One person has died in Broward County who tested positive for COVID-19. This death is associated with an Assisted Living Facility.

New Florida cases include:
32 additional positive COVID-19 cases (31 Florida residents and 1 non-Florida resident) reported to the Florida Department of Health.
There are currently 173 positive cases in Florida residents and 19 positive cases in non-Florida residents. Florida recently partnered with private laboratories around the state to expand COVID-19 laboratory testing capacity. This partnership will increase the number of tests conducted each day and ensure Floridians receive the critical health information they need in a timely manner.

Expansion to private laboratories changes the COVID-19 testing landscape in Florida. Private laboratories will run tests as they receive swab samples from practitioners. Testing and reporting times will vary among commercial and DOH laboratories. Demographic information may be updated during investigations.

These twice daily reports reflect the state's efforts to accurately and transparently share information. Florida's COVID-19 Data and Surveillance Dashboard More Information on COVID-19 To find the most up-to-date information and guidance on COVID-19, please visit the Department of Health's dedicated COVID-19 webpage. For information and advisories from the Centers for Disease Control (CDC), please visit the CDC COVID-19 website. For more information about current travel advisories issued by the U.S. Department of State, please visit the travel advisory website. For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling 1-866-779-6121. The Call Center is available 24 hours per day. Inquiries may also be emailed to COVID-19@flhealth.gov.

Local Department of Health offers to ease steps for coronavirus testing
Date Collected Mar 17, 2020 3:45 PM EDT
Category Local
Source Citrus County Chronicle
Author Fred Hiers
Market Crystal River, FL
Language English
As the coronavirus spreads and people become more fearful and want to be tested, the Florida Department of Health has released these new procedures and guidelines for the people and health care providers. Who should contact the Department of Health in Citrus County or health care provider? If you are experiencing symptoms of a fever, have a cough and or difficulty breathing call your DOH or your doctor's office. People going to their health care provider will be asked some questions, according to the Department of Health. · Did you have close contact with a confirmed case of COVID-19 and are experiencing symptoms?

AMERICAN OVERSIGHT

· Are you located in an area where there is confirmed community spread?
· Are you experiencing unexplained respiratory illness that requires hospitalization?
· Have you traveled to or from an affected geographic area with community transmission in the last 14 days and have a fever or symptoms of lower respiratory illness?

"If the answer is yes to any of those questions, that person will be tested," according to the DOH. Additionally, a person can be tested at the discretion of their local health care provider if they do not meet the above criteria. "Health care providers should use their judgment to determine if a patient has signs and symptoms compatible with COVID-19 and whether the patient should be tested," the DOH said. "If a local health care provider thinks a patient should be tested but they don't have the supplies or personal protective equipment to collect the specimens at their office, providers can call the Florida Department of Health at Citrus County at 352-527-0068 and DOH-Citrus will direct the provider to a facility that testing is available." Testing specimens will be sent to commercial labs such as Quest Diagnostics and LabCorp. "People who are sick should stay home. It's also important for people to not self-diagnose. If someone in our community is ill, we encourage them to call their health care provider," according to the DOH.

Coronavirus: Beaches to remain open, so long as folks follow the rules
Date Collected Mar 17, 2020 4:18 PM EDT
Category Local
Source Daytona Beach News Journal
Author Casmira Harrison
Market Daytona Beach, FL
Language English
Volusia County will be keeping the beaches open, but it will have the authority to close ramps as needed to make sure it doesn't get too crowded.

On Tuesday, as the County Council weighed whether or not to close beach ramps due to coronavirus concerns, council members appeared to be leaning toward keeping them open and giving the county manager the leeway to shut ramps down as needed. An executive order by Gov. Ron DeSantis smack in the middle of the meeting conversation made what the council was set to do a whole lot easier.

DeSantis' order made clear, parties accessing the beaches of Volusia County "shall limit their gatherings to no more than ten persons, distancing themselves from other parties by 6 feet." And the county manager will have the authority to limit access to the beach, the order states. So that's the direction the County Council gave - at least until 5 p.m. on March 24, when the state of emergency is either rescinded or extended by council.

Asked what the penalty would be for people who don't comply with the rules to limit their beach party to 10 people and stay six feet away from one another, County Attorney Mike Dyer said technically, the rule breaker could face a 2nd degree misdemeanor. But Dyer said that is the strictest penalty. "It could be as simple as saying, don't do that," said Dyer. This is a breaking news update.

Florida deploys 3 field hospitals, requests medical supplies
Date Collected Mar 18, 2020 8:17 AM EDT

Source Raleigh News & Observer
Author BOBBY CAINA CALVAN and FREIDA FRISAROThe

Market Smithfield, NC
Language English
Health officials in Florida are deploying three field hospitals across the state to help combat the new coronavirus. In an email sent Tuesday night, Emergency Management Director Jared Moskowitz announced that one field hospital is currently staged in Orlando and can be sent to other areas of the state if needed. Another field hospital is on its way to Broward County, which has the highest number of confirmed cases of COVID-19. The county had 55 of the state's 216 cases, Moskowitz said. Mobile COVID-19 testing is also being implemented in Broward, and the National Guard has been deployed to assist there. In addition, Moskowitz is working with federal officials to determine whether the state can add U.S. Navy Mercy-Class hospital ships at Florida ports.

As of Tuesday night, Florida health officials said 216 people had tested positive for COVID-19, including

AMERICAN OVERSIGHT

21 out of state residents who tested positive in Florida and six Florida residents who tested positive elsewhere, according to the state's dashboard. Moskowitz also said the emergency management agency is requesting supplies from the federal government. These include: five mobile intensive care units, 5,000 ventilators, hospital beds, 250,000 coveralls, 500,000 gloves, 500,000 gowns, 500,000 collection kits, 100,000 16-ounce bottles of hand sanitizer and 150,000 personal protective kits that include coveralls, gowns and goggles. He is also requesting 2 million N95 face masks.

The supplies are being delivered on a rolling basis, and inventory is being distributed throughout the state 24 hours a day, the email said. Gov. Ron DeSantis on Tuesday also ordered bars and nightclubs in Florida to close for 30 days and directed restaurants to operate at 50% of their maximum capacity to allow for social distancing. State school officials said public schools would remain closed until April 15 and announced the suspension of mass campus gatherings, including sports events.

DeSantis announced that four University of Florida students tested positive for COVID-19. At the governor's prompting, Florida's university system said students should return home for remote learning for the rest of the spring semester. University officials also canceled traditional cap-and-gown graduation ceremonies in May, and directed campuses to reschedule or devise alternatives, perhaps even holding virtual graduation ceremonies for the 46,000 students who won't be able to march.

So far, six deaths attributed to coronavirus have been reported in Florida, including two announced Tuesday: a 77-year-old man who lived in an assisted living facility in Fort Lauderdale and a Manatee County resident. Without naming the facility, Florida Surgeon General Scott Rivkees on Tuesday said 218 residents live there. Scott Wyman, chief of staff for Fort Lauderdale's mayor, identified the facility as the Atria Willow Wood assisted living community. He said five firefighters and a police officer were in contact with residents at the facility. They are self-isolating, officials said.

The virus causes only mild or moderate symptoms, such as fever and cough, for most people, but older adults and those with existing health problems can develop severe complications, including pneumonia. According to the World Health Organization, people with mild illness recover in about two weeks, while those with more severe illness may take three to six weeks to recover. DeSantis had mostly refrained from issuing mandates and left localities to their own judgment on how to limit public activities. He acted more decisively after President Donald Trump issued stricter guidelines Monday. The governor said his order does not preclude the hardest-hit area from taking more actions. Communities from Key West to Orlando and Jacksonville sought to help contain the virus by shutting down attractions or limiting hours at public establishments like restaurants.

Department of Health confirms Polk's 1st COVID-19 case

According to the Florida Department of Health in Polk County the first positive case of COVID-19 has been identified - a 44-year-old female. According to state data, the case was not immediately designated as travel-related and is under investigation. Polk among 30 counties now with confirmed cases. Polk County joined 29 other counties in Florida with confirmed cases of the novel coronavirus following the release of updated cases Tuesday night. According to the Florida Department of Health in Polk County the first positive case of COVID-19 has been identified — a 44-year-old female. According to state data, the case was not immediately designated as travel-related and is under investigation. Where the woman lives was not released. DOH-Polk said “it is conducting its contact investigation to identify persons who may have been in contact with the suspected positive individual. This is all the information available to us at this time.” The state reported that there are now 216 COVID-19 cases in Florida, jumping by 24 on

AMERICAN OVERSIGHT

Tuesday. Those new cases include: – 22 Florida residents and 2 non-Florida residents – There are currently 195 positive cases in Florida residents and 21 positive cases in non-Florida residents. It was also reported the state's death toll reached seven with a death to the virus confirmed in Manatee County. To date, of the 216 cases, 119 are men, 96 are women and one was listed as unknown, according to the state. The highest concentration of cases is in the 60-69 age group with 52, followed by 70-79 with 29, 40-49 and 50-59 with 27 each, 20-29 with 25, 30-39 with 12, 80-plus with 11 and 10-19 with 9. State data shows through Tuesday that 26 COVID-19 tests have been conducted in Polk with 10 awaiting results, 15 confirmed negative and the one positive case. In all, 57 of Florida's 67 counties have submitted COVID-19 tests, according to the state. There have been a total of 2,294 people tested, with 216 positive tests, 2,294 negative tests and 1,061 tests pending results.

Coronavirus in Florida: 216 cases, 7 deaths

TAMPA, Fla. (WFLA) – The Florida Department of Health reported 24 additional cases of coronavirus Tuesday night, bringing the total number of cases to 216. Seven people have died of the virus in Florida, the most recent being a patient in Manatee County. The health department also reported the first case of the virus in Polk County and more cases in Hillsborough, Manatee and Sarasota counties. According to the health department, 216 people were ill with the virus in Florida. This includes 195 Florida residents and 21 people from out of state. Another five Florida residents with the virus were "repatriated" to the U.S., but their location was not disclosed. There are currently 29 cases in the Tampa Bay area: Hillsborough County: 9 Manatee County: 7 Pinellas County: 4 Sarasota County: 4 Polk County: 1 Pasco County: 2 Citrus County: 2 The state is currently monitoring 832 people. The department said it is now able to test more people for the virus after partnering with private libraries around the state. There are currently 6,496 cases of coronavirus in the United States. More than 100 people have died. For more information on coronavirus in Florida, visit the health department's COVID-19 webpage or the live DOH Dashboard here.

State adds 3 field hospitals, including 1 in Orlando The Florida Division of Emergency Management is ordering additional hospital supplies and personal protective equipment in response to COVID-19's spread across Florida, and three field hospitals are being deployed throughout the state. One field hospital is currently staged in Orlando, the Florida Department of Health said, and can be relocated throughout the state as needed. Separate field hospitals are in transit to Broward County and Ocala. The Broward field hospital will remain in the county, while Ocala's can be moved if necessary.

Among the items FDEM Director Jared Moscowitz is requesting through Direct Federal Assistance are five mobile intensive care units, 5,000 hospital beds and 5,000 ventilators, to be distributed across the state. The full list of requested supplies is below:
*5 mobile intensive care units
*5,000 ventilators
*5,000 hospital beds
*50,000 two oz. bottles of hand sanitizer

AMERICAN OVERSIGHT

*250,000 coveralls
*500,000 gloves
*500,000 gowns
*500,000 collection kits
*100,000 16 oz. bottles of hand sanitizers
*150,000 Personal Protective Equipment kits, including coveralls, gowns, and goggles
*2 million N95 face masks Supplies are being delivered on a rolling basis throughout Florida at all hours.

Area hospitals delaying elective surgeries amid virus AdventHealth, Orlando Health and the Orlando VA hospital said Tuesday they want to delay elective surgeries and procedures. AdventHealth is asking physicians to defer "elective, non-time sensitive" procedures and surgeries, but will continue to perform emergency and urgent procedures. "Every decision we make is to protect patients, physicians and team members, and ultimately, our greater community. As the region's leading health care provider, we have a sobering responsibility to halt the spread of COVID-19," said Dr. Neil Finkler, Chief Medical Officer for Acute Care Services at AdventHealth. Orlando Health is leaving the decision up to surgeons, endoscopists or proceduralists to determine what in the patient's best interest. But it noted that is has the capability to perform outpatient surgeries at several ambulatory surgical centers around the region.

At the Orlando VA hospital, in addition to postponing non-urgent elective procedures, the facility will use virtual appointments as much as possible, Other VA facilities in Florida, South Georgia and the Caribbean are taking the same precautions. The hospital is also restricting visitors. A veteran will be allowed to have one visitor if needed to help the veteran getting to an appointment, provide support to a patient in a palliative or hospice care unit, or to be there for veterans having major procedures, the VA announced on Tuesday. The restrictions are in addition to those announced last week, including mandatory and enhanced screening for all patients, employees, and visitors, and restricted visitations to certain units.

Florida Blue, the state's leading health insurer, announced that it is adding a free-to-member virtual care partner, Teladoc, for seniors and others on its Medicare Advantage plans, and waiving the virtual care copay for many commercial and Affordable Care Act members to encourage use of Teladoc if it is offered as part of their plan. Additionally, during this crisis, Florida Blue's network of primary care doctors and specialists will be able to treat patients virtually at their normal office visit rates. Sanitas Medical Centers, which exclusively serves thousands of Florida Blue members at locations across Florida, continues to offer free bilingual virtual care to its current patients via its mySanitas Chat website, and the Sanitas mobile app.

Orlando malls adjust to coronavirus, but don't close doors Malls across the Orlando area are limiting hours and taking other precautions as coronavirus has shoppers staying home and away from large groups. At Altamonte Mall, the Easter bunny has been postponed and the mall hours have changed to noon to 7 p.m. Monday through Saturday and noon to 6 p.m. Sunday, according to its website. Hand sanitizer dispensers have also been installed in the mall. Florida Mall has modified its hours to 11 a.m. to 7 p.m. Monday through Saturday and noon to 6 p.m. Sunday. Mall at Millenia's hours were the same as of Tuesday morning, but some of its businesses have cut back or temporarily closed, according to its website.

By the numbers Here's a look at the latest cases in the state and region, updated at 6 p.m. Tuesday.

Life continued to shrink for Florida residents on Tuesday as universities, community colleges and bars were ordered to close and the number of coronavirus cases statewide swelled to 216, including a 25-year-old man and a 19-year-old in Palm Beach County.

Further, state education officials announced that public and private K-12 schools would remain closed until April 15, with remote education replacing in-class learning. The two new confirmed cases in the county, that brings the total to 13, are among the youngest people in Florida to be sickened by the virus that has now claimed seven lives statewide.

AMERICAN OVERSIGHT

Florida's single-day toll of those confirmed with the illness: 56. A 77-year-old Broward County man died at an assisted living facility, health officials announced early Tuesday. While a seventh death was announced at 7 p.m., no details were available. Likewise, state officials provided no information about how the two young people in Palm Beach County contracted the disease or where they live.

In the case of the 19-year-old, they didn't even reveal the person's gender. Gov. Ron DeSantis had announced that four University of Florida students had tested positive. One had traveled overseas and one or two of the others may have visited New York or other coronavirus hot spots, he said. Broward facility At an afternoon news conference, DeSantis said the 77-year-old, with underlying health conditions, may not be the only person to die of COVID-19 at the Fort Lauderdale assisted living facility. Multiple media outlets identified it as Atria Willow Wood on Commercial Boulevard. Tests are being done to determine whether at least two additional people who recently died at the facility were infected with the coronavirus, said state Surgeon General Scott Rivkees.

The confirmed death at the facility on Commercial Boulevard is the type of possible nightmare scenario DeSantis sought to avoid when he cut off visitation to such facilities, forcing family members to find new ways to meet with loved ones inside. Since the pandemic began, the governor has repeatedly mentioned that 29 deaths in Washington state are linked to a single nursing home. A "strike force team" tested residents of the Fort Lauderdale nursing home and placed them in isolation, Rivkees said.

But, even as DeSantis insisted steps were being taken to protect Florida residents and the number of confirmed cases increased by 56 in one day, there was disturbing evidence that there are not enough testing kits are available. Drive-thru overwhelmed The only drive-thru testing center in Palm Beach County announced it is no longer accepting appointments because it doesn't have enough testing kits. "Until we receive additional test kits, we are unable to further schedule any testing appointments," said Yolette Bonnet, CEO of FoundCare, which began testing from the parking lot of its Palm Springs office Monday.

DeSantis insisted that more kits would be arriving soon. Further, he said, results are now available within 48 hours. In steps that illustrate the drastic measures that are being taken to contain the virus, DeSantis ordered all bars and nightclubs to close at 5 p.m. and remain shuttered for at least 30 days. He also required restaurants to cut their crowd capacities in half and keep patrons at least 6 feet apart. Takeout and delivery should be the new normal, he said. That will be the only option in Boca Raton. City officials banned all sit-down dining, saying restaurants can offer only delivery or drive-thru services

While giving local officials the option of closing beaches, DeSantis said groups at the beach should be limited to 10 people. Beachgoers should remain at least 6 feet apart.

Hours after DeSantis announced the new restrictions at a morning news conference, officials ordered all state universities and community colleges to close for the remainder of the spring semester. Students will be required to complete their coursework remotely. All commencement exercises are canceled. School's out til April 15 At about 5 p.m., state Education Commissioner Richard Corcoran announced that K-12 schools would remain closed until at least April 15. Materials would be provided so students could learn while they remain off-campus, he said.

AMERICAN OVERSIGHT

Further, standardized testing will be suspended this year, DeSantis said. That means students who normally would have needed to pass a state exam to graduate from high school or advance to fourth grade will not have to do so this year. Students can be held back if their parents think it is necessary, DeSantis said.

The various steps are needed to control the "stealth carriers," those who are carrying the virus but show no symptoms, the governor said. "If people are not meeting in a big groups, the chances of them passing it on is less," DeSantis said.

Of the 13 confirmed cases in Palm Beach County, seven contracted the coronavirus while traveling, state health officials said. Nine are men and two are women. State officials offered no information about the gender of the two others. The 13 range in age from 19 to 76, they said. One of the women lives in Palm Beach, according to town officials. One of the men is believed to live in Majestic Isles, west of Boynton Beach. He is believed to be the passenger on a JetBlue flight that arrived at Palm Beach International Airport last week. Others who were on the flight said he indicated he learned he had tested positive en route. All of the more than 100 passengers were interviewed by county health officials and told to report back if they experienced any symptoms.

With worries over the recent death at the assisted living facility, Broward County continues to be epicenter of the outbreak in Florida. It now has 48 confirmed cases. Miami-Dade County has the second-highest number with 40. Palm Beach County, the third-most-populous county in the state behind the two other South Florida counties, ranks third. Early on, DeSantis blamed overseas travelers and visitors from New York for bringing the virus to the Sunshine State. But, there is evidence it is spreading among state residents. State health officials said 42 people got the virus after having contact with someone who was infected here. They reported that 58 infected people had traveled before they tested positive. Another 56 cases involve people who both traveled and came in contact with an infected person. So, far, 2,294 people have been tested, health officials said. Of those, 1,017 have been declared coronavirus-free and 1,061 people are awaiting results. They said they are monitoring an additional 832 people.

Coronavirus: Northeast Florida COVID-19 cases rises to 22, 13 in Duval

Date Collected Mar 18, 2020 11:23 AM EDT

Source Florida Times-Union
Market Jacksonville, FL
Language English

The Florida Department of Health announced Wednesday morning the number of Northeast Floridians with COVID-19 has continued to grow. As of Wednesday morning, the dashboard said there were 314 positive cases in Florida, including 289 residents and 25 non-residents who've tested positive for COVID-19. Of the Duval cases, 12 of the 13 were Florida residents. Tuesday evening, Gov. Ron DeSantis significantly loosened the restrictions around testing qualifications, saying all elderly people and anyone with an underlying health condition could now get tested.. The state Department of Health's dashboard provides less information about the individual COVID-19 cases, grouping them

AMERICAN OVERSIGHT

together by sex and providing an age range, instead of person-by-person. It does however separate the number of travel-related cases.

Here's what we know.
Duval • Total Cases: 13 • Travel-Related Cases: 1 • Age Range: 22-91 • Men: 11 • Women: 2
Clay • Total Cases: 4 • Travel-Related Cases: 0 • Age Range: 55-70 • Men: 2 • Women: 2
St. Johns • Total Cases: 4 • Travel-Related Cases: 3 • Age Range: 49-64 • Men: 1 • Women: 1
Nassau • Total Cases: 1 • Travel-Related Cases: 1 • Age Range: NA • Men: 1 • Women: 0

Coronavirus cases in Florida jump by nearly 100 overnight; now at 314
Date Collected Mar 18, 2020 11:27 AM EDT

Source FOX 13 News.com
Market Tampa, FL
Language English

TAMPA, Fla. - The known cases of COVID-19 coronavirus in Florida jumped by nearly 100 overnight, reaching 314. Forty-two of the cases are in the Tampa Bay area, but the largest concentration remains in South Florida. The new statistics were released by the Florida Department of Health late Wednesday morning.

Of the 314 cases, 283 are Florida residents and six are Floridians who are out of state. The remaining 25 cases are non-Florida residents here in the Sunshine State. Broward County still leads the state with 80 cases, many of which were tied to the cruise port. But neighboring Miami-Dade County now has 76 cases. Hillsborough has the highest number of cases in the Tampa Bay area with 13.

The numbers only represent the known cases in Florida; 954 test results are pending and many people are still waiting to be tested. By the numbers: Citrus: Cases went up from 2 to 3 Pasco: 2 to 3 Hillsborough: 7 to 13 Sarasota: 2 to 4 Manatee 7 to 8 Broward: 55 to 80 Miami-Dade: 43 to 76 Palm Beach: 13 to 19 Polk: Still only has one case Hernando, Hardee, Desoto and Highlands have no reported cases

Yesterday, the state ordered bars and nightclubs to close in order to slow the spread of the virus, and the governor said public school campuses will remain closed until at least April 15. The Bay Area's beaches remain open and busy, but local officials are asking beachgoers to social distance in the sand and avoid gathering in groups larger than 10.

Drive-through coronavirus testing began this morning for some BayCare patients. Only those who meet CDC criteria for testing and have a doctor's order can currently be tested at those locations, though.

If you feel sick: The Florida Department of Health has opened a COVID-19 Call Center at 1-866-779-6121. Agents will answer questions around the clock. Questions may also be emailed to covid-19@flhealth.gov. Email responses will be sent during call center hours.

A 61-year-old Manatee County man is among the nearly 100 new cases in Florida of people who have tested positive for COVID-19, the disease caused by the novel coronavirus. Since Tuesday evening, the number of positive cases of COVID-19 in Florida jumped from 216 to 314, according to the latest data released by the Florida Department of Health late Wednesday morning. Among those cases, there are now 289 Florida residents who have tested positive. The death toll in Florida remains at seven, with the most recent death being reported in Manatee County on Tuesday evening. Details of that death have not been made public by state or local department of health officials. Local emergency management and public safety officials said they learned of the death through the same news released sent to news organizations.

I have attached the 5 pm COVID-19 report. This includes new tables summarizing the cities and counties of residence for the cases with no known travel or contact with confirmed cases.

Do we want to add the number of hospitalized cases in addition to deaths?

Please let me know if you have any questions!

Department of Homeland Security Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

WASHINGTON – In order to help prevent the spread of travel-related cases of coronavirus in the United States, today the Department of Homeland Security (DHS) Acting Secretary Chad F. Wolf issued a Notice of Arrival Restrictions outlining the process for American citizens, legal permanent residents, and their immediate families who are returning home after recently visiting certain European countries (listed below), China, and Iran.

Effective for flights taking off at 11:59 PM EDT on Friday, March 13th, Americans returning from all restricted countries will now be required to travel through the following 13 airports:

- Boston-Logan International Airport (BOS), Massachusetts
- Chicago O'Hare International Airport (ORD), Illinois
- Dallas/Fort Worth International Airport (DFW), Texas
- Detroit Metropolitan Airport (DTW), Michigan
- Daniel K. Inouye International Airport (HNL), Hawaii
- Hartsfield-Jackson Atlanta International Airport (ATL), Georgia
- John F. Kennedy International Airport (JFK), New York
- Los Angeles International Airport, (LAX), California
- Miami International Airport (MIA), Florida
- Newark Liberty International Airport (EWR), New Jersey
- San Francisco International Airport (SFO), California
- Seattle-Tacoma International Airport (SEA), Washington
- Washington-Dulles International Airport (IAD), Virginia

Upon arrival, travelers will proceed to standard customs processing. They will then continue to enhanced entry screening where the passenger will be asked about their medical history, current condition, and asked for contact information for local health authorities. Passengers will then be given written guidance about COVID-19 and directed to proceed to their final destination, and immediately home-quarantine in accordance with CDC best practices.

AMERICAN OVERSIGHT

"While the overall risk of serious infection from the coronavirus to the general public remains low at this time, the Trump administration is taking these aggressive measures to keep the risk low, requiring all Americans returning from affected areas in Europe to be funneled through 13 airports for screening upon their return to the U.S.," said Acting Secretary Wolf. "To minimize disruptions to travelers, TSA, CBP, and air carriers are working to identify qualifying passengers before their scheduled flights. These passengers will be rerouted to one of the 13 airports by their airline at no cost to them."

Wolf continued: "I understand this new process will be disruptive to some travelers, however this action is needed to protect the general public from further exposure and spread of the coronavirus. Once back in the U.S. it is imperative that individuals honor self-quarantine directives to help protect their loved-ones and communities."

President Trump determined that the potential for widespread transmission of the coronavirus by infected individuals seeking to enter the United States threatens the security of the homeland. Therefore, the Department is taking action in furtherance of the public health interests advanced by the March 11th presidential proclamation which suspends entry to nearly all foreign nationals who have been in certain European countries, China and Iran at any point during the 14 days prior to their scheduled travel to the U.S.

These European countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This Presidential Proclamation does not apply to U.S. citizens, legal permanent residents, nor their family members under the age of 21, and other individuals who are identified in the proclamation. Nor does it apply to cargo and economic shipping.

For further information, please visit Coronavirus.gov or DHS.gov/Coronavirus.

EIGHT MORE CORONAVIRUS CASES IN FLORIDA

By Christine Sexton

TALLAHASSEE --- The Florida Department of Health late Tuesday announced eight new positive cases of the novel coronavirus, with seven of the cases described as “travel-related” and involving Florida residents.

Three of the new cases involved residents of Collier County, according to the health department. The eighth case involves a Georgia resident who is in Florida, with the Georgia Department of Public Health leading the epidemiological investigation into the person.

In all, 21 Florida residents have been diagnosed in Florida with the respiratory disease known as COVID-19, a Department of Health news release said. Two have died.…

To: EIN@LIST.UIOWA.EDU
Subject: EIN clinical: Possible treatment for COVID-19 (2)
Date: Tuesday, March 17, 2020 9:02:09 AM

ORIGINAL MESSAGE:

With the understanding that everything right now is anecdotal, wondering whether people have had any experience using off label antivirals for treating Covid-19, particularly whether your sense is that there has been any clinical response to Kaletra, Prescobix, chloroquine, hydroxychloroquine or ribavirin.
--Shelley M. Gordon, M.D.,Ph.D., San Francisco, CA
I don't know what the availability of remdesivir will be. I can't help but wonder about hyperimmune globulin here.
--Steve Hennigan, MD, Fayetteville, AR
I am hearing more about hydroxychloroquine, Kaletra, tocilizumab, azithromycin for COVID treatment in addition to compassionate use remdesivir. There seems very little good data on the former agents (other than in vitro data for hydroxychloroquine and Kaletra) and only remdesivir seems to have organized trials at least in the US.
--Edward Liu, Neptune, NJ
Are any members of the community willing to share their experience with repurposed currently available medications in the treatment of COVID-19, preferably in the most severe cases?
--Arnold Lentnek, New York, NY

Date: Mon 16 Mar 2020 08:52
From: Matthew Kuehnert <Matthew_Kuehnert@mtf.org>

Concerning convalescent plasma as possible treatment, there is an effort being led by FDA and NIH to establish collection and evaluation. A group at Johns Hopkins is involved led by Arturo Casadevall.

See his recent paper on this topic discussed in following link
https://hub.jhu.edu/2020/03/13/covid-19-antibody-sera-arturo-casadevall/

Date: Mon 16 Mar 2020 11:28
From: pmurrayid <pmurrayid@aol.com>

My first two COVID patients were severely ill when I got them 6 days ago. They were at a community hospital with no intensivists. One needed to be intubated about 36 hours after admission. That first day I called just about everyone I knew until I managed to connect with an intensivist in northern California who had seven patients in his ICU, five of whom were on ventilators. He was my lifeline and even though anecdotes are anecdotes, when you are sitting there facing catastrophe, an anecdote makes you feel in control even a little bit and there's a lot to be said for that. He said that proning the patient was is helping a lot in his cases. It took me 24 hours to get compassionate use approval for remdesivir. By that time the patient had been moved to the associated tertiary care hospital for proning and had been started on Kaletra, which precludes the use of remdesivir. As of this morning, five days into his admission, he remains on the ventilator and is about the same. (By the way, if you do not have the ability to prone in your ICU, some people are looking at using repurposed spinal surgery tables for this purpose.) I started the other patient on Kaletra since he was not sick enough for remdesivir compassionate use. The first day I was very excited because his saturation improved significantly and he was much more comfortable. However yesterday his saturation had dropped, so we will see. I have no idea if the improvement was coincidental or where we will go from here.

What I have learned is I don't have time to do everything myself all at once. My pharmacist has been amazing. She found a WHO website that lists all the drugs that are being attempted for repurposing and gives you some basic

AMERICAN OVERSIGHT

information about them. I don't have the URL but you should be able to find it fairly easily at the WHO website.

The clinical things I learned from these cases are that the respiratory status can change abruptly and dramatically. They can go from feeling like they're doing better to being desperately hypoxic in just a few minutes. Both of mine have had diarrhea, the first one on admission. I have heard a rumor that diarrhea is a less frequent symptom but it is a marker for more severe illness, but I do not know if that is really true. One was not febrile at all on admission and has only had a couple of intermittent temperature spikes to 103. Both reported very very profound weakness. Both patients reported that when their temperature started to go up prior to admission and they took Tylenol, they had very profuse drenching sweats. I am now checking LDH, d-dimer and liver functions on all my rule outs. I am following these daily but have no idea if they are a usable marker of response to treatment? Both of these people met criteria for local county health department testing so I had the results in 24 hours. I can't imagine how horrible this would be if I was still awaiting testing. The good thing is that once you've seen a few really ill ones, your clinical intuition will make getting that test result less nerve-wracking.

Some questions I would like to see addressed are as follows.
From those who have seen a lot of cases, is there anything worth following such as LDH that might give us an idea of how the patient is going?
I have discovered that one of the other hospitals in my area is already set up with Gilead as a remdesivir investigational protocol site for short course versus long course. Apparently there are some of these out there and I don't know if they follow the same criteria as the compassionate use protocol criteria. Does Gilead or any other resource have a central area that clarifies this and gives us a list of centers?
Since many of us in the ID community are over the magic age of 65, what are people's thoughts about the increased risk to "elderly" physicians working in this area? This is especially stressful for our families, even though we may be too tired and distracted to even think about it.

I feel like I am definitely reliving the early days of AIDS but at a massively accelerated pace and with much more concern of personal risk. Making up medicine as you go has always been very frightening, but for our younger colleagues who are used to having a protocol for everything it must be extremely difficult. I am so grateful to the dedicated people who run the EIN for their work and for getting the EIN back into this format.

Thank you so much.
Patricia Murray MD, FIDSA
Santa Monica, CA

From: Francis Riedo, MD <FXRiedo@evergreenhealthcare.org>

Colleagues, Evergreen Healthcare is one of the NIH study sites for the Adaptive Trial of Remdesivir. Our principle focus is enrollment. Once we became a study site, compassionate use remdesivir was stopped.

We desperately need data. Taking a page from the Ebola response, you can look back and see the field littered with therapeutics that looked promising but ultimately were shown to be ineffective.

We have tried hydroxychloroquine but too early to tell if effective.
Would help if there were a trial to collect data and determine efficacy.
Seeing other things be thrown around: interferon, lopinavir, darunavir, zinc, tocilizumab.

Setting up a mini P&T of hospitalist, pulm and ID with pharmacy to see if we can make any sense of it. Perhaps some of you who are not yet busy would consider coordinating a trial.

I will also just take this opportunity to ask you to assist the vulnerable populations in nursing homes, reach out and make sure they are following the best guidelines on PPE, visitation, communal activities and monitoring staff.

One message is that by the time you find a single case in a nursing home, there is probably already fairly significant transmission within that facility.

A final note of thanks and gratitude to all who have been supportive and so helpful.

From: Navneet Gill <navgill777@gmail.com>

I have a 53 yo male with COVID-19 without past medical history. Day 9 of hospitalization. He reported being sick 2 weeks prior to presentation. Hospitalized due to SOB. He is mildly hypoxic on 3L NC. Labs are all normal. His other symptom is fatigue. He has been febrile, but for last 72hrs no fevers. I haven't given him any treatment other than supportive care.

Questions:
1. Do I need to start any antivirals? I figured I don't need to since he is stable.
2. When can I retest?
3. Any other input appreciated!!

Do we have colleagues in China participating in this EIN listserv?
I read an interesting article on 24 contacts (http://www.int-med.uiowa.edu/Research/EIN/Hu2020ClinChar24Asxcontacts.pdf) who were infected--none of whom had severe disease. The article mentioned casually that all of the patients were treated with "interferon atomization". These minimally symptomatic patients were also treated with a variety of other agents--lopinavir, darunavir and IV immunoglobulin.

I imagine that the Chinese have tried/formally evaluated many plausible treatments.

AMERICAN OVERSIGHT

I would tell her the absolute risk is somewhere between 1% and 5%. Using the widely reported average mortality of 8% for people aged 70-79, this would encompass a risk of contracting COVID-19 from ~10% (unlikely but possible) to ~60% (significantly more likely than not).

I would tell her not to go, and also point out that the airlines are deeply discounting tickets way out into the future. Priceline quotes me $292 to fly round trip from Newark to Paris 6 months from today. Why not reschedule?

From: Anuj Malik <anujscmalik@gmail.com>

If the risk of dying in individuals in their 70s from this virus is, say 5% on the higher end, and the acquisition risk per day is 0.1 % during travel, then the risk would be 0.05 x 0.001 = 0.00005 per day, that is 5 individuals per 100000 individuals, or 1 in 20000 per day, multiplied by 3 weeks would be 21/20000. So for the entire trip about 1/1000 chance of dying.
Of course, I have no idea, and I don't think anyone does, of quantifying the risk of acquisition per day during travel to any particular location with any verifiable accuracy.

Perhaps Socrates may help - "I know that I do not know", and "that is all I know".
(Tongue in cheek)

Cheers.

AMERICAN OVERSIGHT

From: EIN on behalf of Emerging Infections Network
To: EIN@LIST.UIOWA.EDU
Subject: EIN epi: Ambulatory SARS-COV-2 testing (3)
Date: Wednesday, March 11, 2020 8:42:11 AM

ORIGINAL MESSAGE:

Currently the CDC recommends "HCP collecting specimens for testing for SARS-CoV-2, the virus that causes COVID-19, from patients with known or suspected COVID-19 (i.e., PUI) should adhere to Standard, Contact, and Airborne Precautions, including the use of eye protection. These procedures should take place in an AIIR or in an examination room with the door closed. Ideally, the patient should not be placed in any room where room exhaust is recirculated within the building without HEPA filtration."
https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
Up to this point in the outbreak, ambulatory testing for SARS-CoV-2 has not been performed at our institution's ambulatory care sites. The testing has been limited to patients who met PUI definitions by the CDC and state labs. Both LabCorp and Quest Labs will be offering SARS-CoV-2 testing by Monday March 9th. This will potentially allow for more extensive testing as the adherence to PUI definitions will be relaxed. The ambulatory sites for our organization have not received fit testing nor do they have N-95 masks (we are not planning to start fit testing either). Does anyone have suggestions on how to handle the increased demand for testing? Should primary care be able to perform NP testing with surgical masks and face shields? Are "drive-by" testing sites the best option?

From: Schutte, Kirsten <Kirsten.Schutte@asante.org>

Oregon has created provisional guidance, posted on their website
https://www.oregon.gov/oha/PH/DISEASESCONDITIONS/DISEASESAZ/Pages/emerging-respiratory-infections.aspx, and updated yesterday.
https://www.oregon.gov/oha/PH/DISEASESCONDITIONS/DISEASESAZ/Emerging%20Respitory%20Infections/COVID-19-Provisional-Guidance-Healthcare-Infection-Prevention-Control.pdf

Although NP and OP sample collection is not being considered as an aerosol generating procedure, our health system is working to set up an outpatient testing site, and is considering extended use of respirators for persons who would be working a several hour shift with sole purpose to collect samples (given that we think our staff would feel better protected and given potential increased risk with cumulative exposures).

From: Ranjani Kalyan <arkid7@gmail.com>

We have the same concerns. Many outpatient offices have no viral swabs, PPE, or staff resources to even handle a "drive by" testing. They are referring these patients that are symptomatic to the ED. The ED will likely get inundated with these outpatients who just want to get tested because they "were told to do so."

This is concerning in how it will clog up our EDs, likely close down offices to such patients, and use up resources on potentially minimally symptomatic patients.

Any direction in this would be helpful.

Ranjani Kalyan
Roseville, CA

Date: Tues 10 Mar 2020 18:06
From: Mark Herbert <bugdoc90@yahoo.com>

Dr. Lampen -- Both the LabCorp and Quest links indicate that only samples meeting CDC criteria will be tested. No sign of relaxation of criteria on 3/9.

Mark Herbert
Columbus, OH

Date: Tues 10 Mar 2020 19:41
From: John Hostetler <jhostetler30@gmail.com>

I believe outpatient testing should become a burden of public health departments who should set up testing centers that doctors can refer patients to regardless of insurance. Public health could be guardians of limited supplies of PPE to be used for this purpose. It is in all of our best interests that testing be easy and without regard to income or insurance. Our private practice offices are not offering testing regardless of its availability from commercial labs because of safety and cost issues. That leaves the potential for many undiagnosed cases to continue to spread in the community.

Colleagues, I've hesitated to send this query, because there's a subjective nature to this question. Personally, at the bedside over the years, it seems there's an acquired sense of the organisms we see. I can only describe this as differing infectious agents having their own personality. One can almost feel it standing at the bedside. Those of you who have spent time caring for patients with Covid-19... what does it FEEL like? Does this feel like a virulent organism? I understand perhaps the most accurate vision is reflected by the published outcome numbers. Nevertheless, I feel compelled to ask. How does this feel? Those of you who find this question bordering on meaninglessness, by all means, feel free to ignore this.

From: Jon Rosenberg <jrhcepi@gmail.com>

Severity (deaths, ICU admissions and ventilator requirement well beyond our current capacity) should no longer be a matter of doubt and discussion.

Preprint publications from today on the effects of mitigation measures, mostly social distancing, all positive, are below. Modeling shows we are already a week late; waiting any further, and waiting for a sharp increase in reported positive tests (representing about 1/10 of prevalence at best) is likely to be disastrous. All 7 health officers for the 6 San Francisco Bay Area counties today imposed identical mandatory shelter-in-place orders: https://813dcad3-2b07-4f3f-a25e-23c48c566922.filesusr.com/ugd/ee8930_a998c171ca374279b8b131e54746b25a.pdf. These measures are no longer subject for debate, though school closures are the most controversial (there is increasing evidence of high rates of asymptomatic infection in 10-30 yo, but uncertainty about transmission); the question will be how long they can be maintained.

Impact of self-imposed prevention measures and short-term government intervention on mitigating and delaying a COVID-19 epidemic
https://www.medrxiv.org/content/10.1101/2020.03.12.20034827v1
Early-initiated short-term government-imposed social distancing can buy time for healthcare systems to prepare for an increasing COVID-19 burden

AMERICAN OVERSIGHT

Evaluating the effect of public health intervention on the global-wide spread trajectory of Covid-19
https://www.medrxiv.org/content/10.1101/2020.03.11.20033639v1
Delaying intervention 4 weeks after March 8, 2020 would cause the maximum number of cumulative cases of death increase from 7,174 to 133,608 and the ending points of the epidemic postponed from Jun 25 to Aug 22.

Generalized logistic growth modeling of the COVID-19 outbreak in 29 provinces in China and in the rest of the world
https://www.medrxiv.org/content/10.1101/2020.03.11.20034363v1
The extreme containment measures implemented by China were very effective with some instructive variations across provinces. For other countries, it is almost inevitable to see the continuation of the outbreak in the coming months. Japan and Italy are in serious situations with no short-term end to the outbreak to be expected. There is a significant risk concerning the upcoming July 2020 Summer Olympics in Tokyo. Iran's situation is highly uncertain with unclear and negative future scenarios, while South Korea is approaching the end of the outbreak. Both Europe and the USA are at early stages of the outbreak, posing significant health and economic risks to the world in absence of serious measures.

Impact assessment of non-pharmaceutical interventions against COVID-19 and influenza in Hong Kong: an observational study
https://www.medrxiv.org/content/10.1101/2020.03.12.20034660v1
Containment measures, social distancing measures and changes in population behaviour have successfully prevented spread of COVID-19. The social distancing measures and behavioural changes led to a substantial reduction in influenza transmission in early February 2020. However, it may be challenging to avoid fatigue and sustain these measures and population behaviours as COVID-19 continues to spread globally.

Preliminary evaluation of voluntary event cancellation as a countermeasure against the COVID-19 outbreak in Japan as of 11 March, 2020
https://www.medrxiv.org/content/10.1101/2020.03.12.20035220v1
Results demonstrated that VEC can reduce COVID-19 infectiousness by 35%, but R0 remains higher than one.

More news from our testing in NYC--the phone line and day 1 of our COVID clinic.

I spoke to a nurse who cared for a man in SAR after his inpatient stay for CHF. He didn't look so good, so he had a flu swab done. Once the flu swab was negative, he was taken out of droplet isolation, only to find out that he tested COVID+. It is likely that COVID will disproportionately manifest with less obvious symptomatology in the chronically sick (CHF, ESRD, transplant, cancer patients).

I believe we must prioritize our testing for inpatients lest the hospitals contribute to transmission by unrecognized cases. Deja vu viz TB in the elderly.

So many people want testing since they have typical symptoms but will likely just increase opportunity for transmission if they come to hospital. This was indicated in the WONDERFUL informational sheet from our NYC DOH. Those people need to stay home. Their desire to know should not trump safety and the real need to identify the hidden cases.

That said, should universal precautions include masks for all during an epidemic like this--at least in a hospital where people can be trained in proper use?

From: Willeford, Wesley <Wesley.Willeford@jcdh.org>

[We should not use] too narrow of a definition of immunocompromised. Of course, those with a BMT, SOT, or those actively on chemotherapy are going to be at high risk for adverse outcomes related to COVID-19. For SARS-CoV-2, the bar for immunocompromised seems to be set much lower with common chronic medical issue. As the Chinese CDC reported, the death rate steadily climbs with each decade of life. While we may have a simple bedside test in the future, we most assuredly do not have one at the moment, and access to testing is one of the most critical problems with which we are dealing. [We need] to look at what is going on in Italy and what has happened in China. There is the persistent insistence by naysayers that because this pandemic may not cause a large degree of harm to those who are younger, it does not mean that people will not be affected adversely. Many people around the country have parents, grandparents, and loved ones who are incredibly vulnerable to this infection.

Thanks everyone for your thoughtful comments. Of course, a certain amount of social distancing cannot hurt and may well help, and the ID community should definitely keep a unified front.
Unfortunately, in our highly digital society, the definition of "right amount" can never be reached. No institution of any kind wants to take the risk of being highlighted as a place where transmission has occurred, and we are having an explosion of reflexive cancellations that are not always in everyone's best interest. A completely shut down society loses the infrastructure to keep the hospitals running and the people fed. The long term impact on the financially vulnerable will be heavy. No one knows how to balance these risks against the emerging impact of a new virus. It would seem that we are confronting the first major pandemic of this newly structured society, and we shall have to learn again as we go.

I'll add one further opinion. While some of this is perhaps a kneejerk (e.g. cancelling March Madness completely. Probably could have let the kids play in the absence of fans), we are hampered by many of the factors noted [in this thread]. Hence, we are taking aggressive measures with regard to social distancing. Clearly, a lack of testing severely diminishes our ability to make appropriate risk prevention decisions. This has been a huge failure on behalf of our emergency planning system.

The mortality rate appears to be on the order of 10x higher than that for seasonal flu, and we have a population that is completely naïve to this pathogen. Hence the projection that 1/4 to 1/3 of the entire US population would be infected. Mass gatherings of people may not just linearly increase person-to-person transmission, but significantly amplify and disseminate transmission. Even if eventually the same number of people were to become infected, the capacity of our health system to absorb this epidemic has a lot to do with the rapidity of the increase in case numbers.

From: Arnold Lentnek <arnold.lentnek@gmail.com>

Thank you, Dr. Davis. You have the courage to publicly express what many of us (or at least I) privately think.

I too am amazed at the impending collapse of the world economy due to what is for most a trivial illness. Yes, I fully appreciate the 1% (or is it 0.1%) of immunocompromised patients at risk of a lethal illness. But those same individuals are similarly at risk for fatal illness from an incredible array of usually innocuous fungi, bacteria and viruses. My last case of persistent Norovirus infection in a BMT did not shut down the US economy.

Irrational, magical thought is as much a part of the human experience as is insight and reason. Salem MA 1693 is not really that far from Washington DC 2020. Ultimately, we will have rapid, "bedside" probably PCR-based test akin to RST or Influenza that will allow identification of the acute epidemiology of COVID-19. When combined with a seroassay this will (finally) allow the medical community to understand this infection.

Probably before then, we will have a repurposed HIV agent shown to be clinically effective against SARS-COV19. Only then will we be ready to move on to the next "crisis".

I agree there seems to be overwhelming, uncalled for mass panic regarding COVID-19 when most cases are relatively mild. Meanwhile, at my hospital we are continuing to see a heavy burden of severe influenza cases which is far more common but no one seems to care.

Unlike prior heavy influenza seasons, this is a novel virus (so it is like a pandemic flu in that sense, which has had public health planning for many years because of how substantial the mortality can become). Modern application of these extreme social distancing measures may be one of several factors in combination with heightened hygiene practices that may slow down the epidemic and limit the burden on the healthcare system.

From: Francis Riedo, MD <FXRiedo@evergreenhealthcare.org>

Dr. Davis -- The young seem to get sick and then recover. Data in the large Chinese cohort showed no mortality in those <10yo.

The elderly, particularly with comorbidities, do poorly. The CFR for these elderly patients is staggering.

Yes there are many analogies with influenza but in the absence of a vaccine or a therapeutic intervention, prevention is all you have. One of the tools is social distancing and decreasing large communal events.

Stay Well.

I have been increasingly amazed by the mass cancellations and calls for various forms of quarantine during the current outbreak. As I understand it, these kinds of measures are typically ineffective, especially with a highly contagious and often mild or asymptomatic infection. Am I missing something new about this virus that makes these measures somehow appropriate now as opposed to prior heavy influenza seasons? I wonder if the novelty of the situation, combined with flood of information (real and imagined) available online, has skewed our judgement.

I don't think it's feasible to use masks for all, as we are going to run out of PPE. Hospitals are already burning through PPE at an alarming rate and we aren't seeing an ongoing supply. We know COVID-19 is in our communities. There should be a low threshold for testing in the hospital setting, of course within the right clinical scenario.

Jasmin Chaudhary, MD
Salem, OR

Date: Tues 17 Mar 2020 14:02
From: Francis Riedo, MD <FXRiedo@evergreenhealthcare.org>

Colleagues -- In the last 6 months, our community hospital had 5 confirmed flu deaths. In the last 18 days, we have had over 2 dozen COVID-19 deaths.

It disproportionately affects elderly and compromised but not exclusively. One interesting observation is that even elderly in our local affected nursing homes were asymptomatic carriers. Elderly can present with altered status, subtle signs. Young can present with minor sniffles—of little concern because they do well—but serve as transmission vectors carrying SARS-CoV-2 to the susceptible.

Some individual leaders are still not getting it. Even last weekend, we were hearing pushback from institutions unwilling to cancel elective procedures.

Cannot agree more with Dr. Rosenberg. Act now to decrease transmission. If you don't, you will see the effects in 10-14 days. Do not be misled by the low case counts in your community. Limitations on testing have provided an incomplete picture. There is significant transmission going on now. Most of those will not access medical care (or need to). The young will do reasonably well, the vulnerable not so well.

Look at your local SNF, long term stays, adult family homes, group residential homes, psychiatric facilities and prevent infection in those settings. They are like mini cruise ships in terms of epidemiology. The attack rates once introduced are staggering. If even 2% end up in your critical care units, the numbers will rapidly push you to capacity in terms of space and especially staff.
Goal is to reduce the load.

While we do our best to prevent infection and care for those affected, allow me to close on some positive notes:

AMERICAN OVERSIGHT

The efforts of Jeff Duchin, Meagan Kay and the entire team at Public Health Seattle King County cannot be overstated.
The NIH remdesivir trial headed by Dr. John Beigel is enrolling patients and we have been fortunate to be one of the NIH study sites contributing to that effort – headed here by Dr. Diego Lopez de Castilla.
POC testing materials are being validated in a separate study here
A Phase 1 trial on the mRNA vaccine started in Seattle at the VTEU headed by Dr Lisa Jackson.
We are grateful for the individuals who have stepped forward to participate in these studies.
Remember that social distance should not mean social isolation.

Finally, be grateful for your colleagues and the hospital and home care staff you work with and for your families.

With gratitude for this group.

From: Davis, James M <james-davis@uiowa.edu>

Thanks to Jon Rosenberg for the collection of recent publications.

I would say that, in the present moment, there isn't much debate to be had about taking many of the measures underway, including social distancing and carefully considered cancellations of public meetings. Such is the nature of these difficult, in-the-moment decisions.

After the fact, though, I suggest we keep an open mind to review and improve our approaches to balance help versus harm in a changing world. The rapid production of these and other manuscripts on the subject is both laudable and useful. They cannot however constitute settled science. The intention to treat analysis awaits...

Subject: EIN infection prevention: HCW return to work after COVID-19 (2)
Date: Wednesday, March 18, 2020 8:44:46 AM

ORIGINAL MESSAGE:

Is anyone restricting the type of patient that a HCW with documented COVID-19 can care for after returning to work by CDC criteria? Are they being allowed to care for elderly or immunosuppressed patients or other patients at high risk of death? Should they be retested for persistent shedding first?
Ellen Neuhaus, MD, Vernon, CT

Date: Tues 17 Mar 2020 11:51
From: Curry, Scott <currysr@musc.edu>

Our state health department is mirroring interim CDC guidance and asking that all HCWs get 2 negative NP specimens for work clearance after asymptomatic. It's going to be a big drain on limited lab resources, but so far no persistent detection among mildly ill HCWs at our center. SC DHEC has stopped asking for oropharyngeal swabs so as not to double the lab burden per sampling.

Scott Curry, MD
Assistant Professor of Medicine
Associate Hospital Epidemiologist

Stephen J. Nelson, MA, MD, FCAP
District Medical Examiner
< sent from my iPad >

Begin forwarded message:

Subject: [EXTERNAL]: RE: COVID-19

Good morning,

As a point of clarification, please be aware that medical examiners shall accept jurisdiction and certify death certificates on all cases with suspected COVID-19 deaths. As COVID-19 has been deemed a Public Health Emergency, deaths relating to it fall directly in line with Florida Statute 406.11(1)(a)11. In an effort to prevent possible spreading of the virus in air controlled environments, autopsies are not expected to be performed on decedents with confirmed COVID-19 diagnoses prior to death, however, that decision may be left to professional judgement. Regardless of if an autopsy or external examination is performed, any suspected COVID-19 deaths will need to be certified by the medical examiner and reported to MEC Staff.

As requested by the Department of Health, MEC Staff are also conductng a brief survey of each office's Personal Protective Equipment (PPE). Please notify us with the answers to the questions listed below by close of

AMERICAN OVERSIGHT

business Friday.

1. What kind of PPE does your office have on hand?
2. How long will your on-hand PPE inventory last if you are unable to obtain any new shipments of PPE?
3. What PPE will you need most quickly in the event that you are unable to obtain any new shipments of PPE?

Synopsis for March 13, 2020

Investigation of Presumptive HIV Transmission Associated with Hospitalization Using Nucleotide Sequence Analysis — New York, 2017

Healthcare associated transmission of HIV is rare in the United States. However, investigations of acute HIV infection in people with recent healthcare exposure and no traditional risk factors should consider whether healthcare-associated transmission likely occurred.

Healthcare-associated transmission of HIV is rare in the United States. Adherence to standard precautions, including recommended injection safety measures, can help to prevent spread of bloodborne pathogens, including HIV, in healthcare settings. This report described an investigation of an acute HIV infection in a person without traditional risk factors for HIV who received care in a hospital and several other healthcare settings. In this incident, epidemiologic and nucleotide sequence data provided support for likely healthcare-associated transmission.

Screening for Alcohol Use and Brief Counseling of Adults — 13 States and the District of Columbia, 2017

Use of validated tools to screen all adults for excessive alcohol use - including binge drinking -can help healthcare providers advise adults who drink too much. Advice should include the impact of excessive alcohol use on the patient's health and helping interested patients take steps to reduce their drinking.

Binge drinking increases the risk for injuries, fetal-alcohol-spectrum disorders, and some chronic diseases like breast cancer. This report found that although 81% of US adults in 13 states and the District of Colombia reported being asked by their healthcare provider about alcohol use, only about 38% reported being asked about binge drinking during a routine check-up in the last two years. Binge drinking is five or more drinks on an occasion for men and four or more drinks for women. Among adults who reported being asked about their alcohol use at checkup in the past two years and currently binge drinking, 4 out of 5 patients were not counseled to reduce their drinking at that checkup. Routine alcohol screening and brief counseling has been shown to be effective at reducing binge drinking and is recommended for all adults.

AMERICAN OVERSIGHT

Vital Signs: Colorectal Cancer Screening Test Use — United States, 2018

Colorectal cancer screening is recommended for adults of average risk beginning at age 50. Yet only 1 in 2 adults are up to date with colorectal cancer screening by their early 50s (ages 50-54). People younger than 50 years need to be informed about the benefit of screening so that screening can start promptly at age 50 years.

There's a reason colorectal cancer is the second largest cancer killer in the U.S.: many people wait too long to get screened. Colorectal cancer is highly preventable, and screening for colorectal cancer is recommended for adults of average risk beginning at age 50. On-time screening can prevent or detect colorectal cancer early when treatment is more effective. Yet only 1 in 2 adults are up to date with colorectal cancer screening by their early 50s (ages 50-54), compared to more than 4 in 5 in their early 70s, according to the latest Vital Signs report by the Centers for Disease Control and Prevention. Many kinds of colorectal cancer screening tests can be done in the clinic or at home. It is important for adults to discuss best and preferred options with their healthcare provider.

Notes from the Field: Opioid-Involved Overdose Deaths with Fentanyl or Fentanyl Analogs Detected — 28 States and the District of Columbia, July 2016-December 2018

Overdose deaths involving the fentanyl analogs carfentanil, furanylfentanyl, acrylfentanyl, and cyclopropylfentanyl declined and contributed to overall declines in opioid-involved overdose deaths during 2018 among a subset of states. However, overdose deaths involving fentanyl increased over time. There are indications that fentanyl analogs may be reemerging, suggesting a continued need to test for fentanyl analogs.

Opioid-involved overdose deaths linked to illicitly manufactured fentanyl have rapidly increased since 2013. During July 2016-December 2018, 26,104 opioid overdose deaths were reported in 10 states participating in CDC's State Unintentional Drug Overdose Reporting System (SUDORS), including 5,803 overdose deaths in which at least one fentanyl analog was detected. The five most commonly detected fentanyl analogs were acetylfentanyl, carfentanil, furanylfentanyl, cyclopropylfentanyl, and acrylfentanyl. The declines in overdose deaths with fentanyl analogs detected, and increases in deaths with fentanyl detected, suggests a shift away from illicit fentanyl analog distribution to distribution of illicitly manufactured fentanyl. Recent reports, however, indicate that some fentanyl analogs might be reemerging. Tracking specific drugs involved in overdose deaths is critical because the risk for overdose for fentanyl and fentanyl analogs varies substantially.

AMERICAN OVERSIGHT

Notes from the Field: Carbapenemase-Producing Klebsiella pneumoniae in a Ventilator-Capable Skilled Nursing Facility — Maricopa County, Arizona, July-November 2018

Following CDC infection control recommendations in nursing homes helps prevent the spread of antibiotic-resistant germs among this vulnerable population. This includes washing hands or using hand sanitizer before and after physical contact with nursing home residents and housing residents with the same antibiotic-resistant germ in neighboring rooms so nursing staff are less likely to pass the germ to other residents.

Maricopa County Department of Public Health (MCDPH) in Arizona investigated a cluster of two genetically similar antibiotic-resistant bacterial infections in residents of the ventilator-capable unit of a nursing home to look for healthcare-associated bacterial spread. Nursing home staff worked with MCDPH to screen ventilator-capable unit residents for the bacteria. Three residents were colonized with the antibiotic-resistant bacteria, further suggesting healthcare-associated spread. After a facility site visit, MCDPH recommended improvement of hand hygiene practices and housing residents with the antibiotic-resistant bacteria in the same or neighboring rooms to decrease the risk of staff spreading the bacteria to others. Ventilator-capable unit residents were re-screened 8 weeks later. No new residents were colonized with the antibiotic-resistant bacteria, suggesting that the implemented public health recommendations helped to prevent healthcare-associated spread.

Synopsis for March 20, 2020

Global Epidemiology of Tuberculosis and Progress Toward Meeting Global Targets — Worldwide, 2018

Worldwide, tuberculosis (TB) is the leading cause of death from a single infectious disease and is especially deadly for people living with human immunodeficiency virus (HIV) infection. While recent trends point to modest progress towards global TB targets, more focus and commitment is needed to find, cure, and prevent TB.

A recent CDC evaluation of global progress towards achieving the objectives of the World Health Organization's End Tuberculosis Strategy reveals modest decreases in the number of people with TB and the number of TB-related deaths. In 2018, an estimated 10 million people had new or relapsing cases of TB, and 1.5 million TB-related deaths occurred, representing 2% and 5% declines from 2017, respectively. There was substantial progress in TB preventive treatment initiation among people with HIV, with numbers almost doubling from 2017 to 2018. Further efforts are needed by public health partners to decrease TB incidence and deaths and to increase the numbers of people receiving TB curative and preventive treatment in order to meet the global targets for 2035 and end the public health burden of TB.

Tuberculosis — United States, 2019

Progress towards eliminating tuberculosis (TB) in the United States has slowed, underscoring the need to ramp up TB prevention efforts.

Provisional 2019 data from CDC's national TB surveillance system show the lowest number of TB cases in the United States on record, but the pace of decline has slowed in recent years. TB cases declined 1.1% between 2018 and 2019 (from 9,021 to 8,920 cases), while TB rates declined 1.6% (from 2.8 to 2.7 cases/100,000 people). TB elimination requires maintaining and strengthening current TB control priorities while expanding targeted testing and treatment for high-risk people with longstanding, untreated latent TB infection. CDC is working with public health partners and primary care providers to encourage testing and treatment for latent TB infection as a routine and integral part of healthcare for at-risk patients.

AMERICAN OVERSIGHT

Drug and Opioid-Involved Overdose Deaths - United States, 2017-2018

From 2017 to 2018, U.S. overdose death rates involving all opioids, prescription opioids, and heroin decreased 2%, 13.5%, and 4.1%, respectively. However, deaths involving synthetic opioids (excluding methadone) increased by 10%.

CDC reports that in 2018, there were 46,802 opioid-involved overdose deaths in the United States. While the opioid-involved overdose death rate decreased 2.0% from 2017 to 2018, 69.5% of all drug overdose deaths still involved an opioid. Overdose death rates involving prescription opioids decreased by 13.5%, and overdose death rates involving heroin decreased by 4.1% from 2017 to 2018. Although these decreases are encouraging, the overdose death rate involving synthetic opioids increased by 10.0% in that same time period, and synthetic opioids were involved in more than 67.0% of all opioid overdose deaths in 2018.

Variation in Adult Outpatient Opioid Prescription Dispensing by Age and Sex — United States, 2008-2018

Efforts to improve opioid prescribing need to consider the unique needs of women and older adults while using multimodal approaches to pain management.

This report examines differences in opioid prescription fill rates among different demographic groups. Using retail pharmacy dispensing data from IQVIA, national trends in opioid prescription fill rates for adult outpatients were examined from 2008 through 2018. Overall findings indicate that opioid prescription fill rates were significantly higher among women of all ages and adults aged 65 years and older. Even while there was an overall decline in opioid prescription fill rates during this time period, disparities persisted. These findings highlight efforts to improve opioid prescribing, and the need for healthcare providers to consider the unique needs of women and older adults when it comes to pain management.

Delayed Identification of Infants Who Are Deaf or Hard of Hearing — Minnesota, 2012-2016

Health disparities and inequities contributed to significant delays in the diagnosis of hearing loss among infants in Minnesota. Public health initiatives that target certain populations could improve timely identification, reduce the risk for language delay, and enhance outcomes in children who are deaf or hard of hearing.

The findings of this report show delays in the diagnosis of hearing loss among infants in Minnesota were more often found among infants with a low birth weight, infants born to mothers under the age of 25, and infants born in rural areas. Early Hearing Detection and Intervention programs can use this data to guide the design and application of targeted public health recommendations and actions. These recommendations and actions can improve outcomes for children who are deaf and hard of hearing.

Surveillance Summaries: National Toxic Substances Incidents Program —Nine States, 2010-2014

Public health and safety professionals who prepare for or respond to chemical incidents can use the findings in this report to understand the patterns and causes of these incidents, which can improve prevention efforts and preparation for future incidents and injuries.

In 2010, the Agency for Toxic Substances and Disease Registry (ATSDR) initiated the National Toxic Substance Incidents Program (NTSIP); it was retired in 2014. Nine state health departments provided chemical incident surveillance data during 2010-2014 that can be used to prepare for and prevent chemical incidents and injuries. During 2010-2014, participating state health departments reported 22,342 incidents, of which 13,529 (60.6%) met the case definition for acute toxic substance incidents, and included 5,134 injured people, of whom 190 died. NTSIP incidents were 1.8 times more likely and injured people were 10 times more likely to be associated with fixed facilities than with transportation. Natural gas, carbon monoxide, ammonia, and chemicals used in illegal methamphetamine production were the most frequent substances in fixed-facility incidents. The most frequently injured people were members of the public (43.6%), including students. Injured first responders, particularly police, frequently were not wearing any chemically protective equipment. Respiratory system problems (23.9%) were the most frequently reported symptoms among injured people and, in a related finding, volatilization was the most frequent type of release in incidents with injured people.

Subject: Emerald Coast Healthcare Coalition Information
Date: Monday, March 16, 2020 1:31:41 PM
Attachments: dem-order-no-20-002-in-re-covid-19-public-health-emergency-issued-03-11-2020.pdf
Clinical Guidance Chart_3-15-20_Final-1.pdf

In an abundance of preparedness and caution, your Healthcare Coalition has canceled all upcoming meetings, trainings, and exercises as many of our healthcare partners and members are engaged in or preparing for or responding to the COVID-19 effort.

Please continue to monitor the Florida Department of Health COVID website for the most up to date information on the situation in Florida. http://www.floridahealth.gov/diseases-and-conditions/covid-19/

Please see the attached: Florida Division of Emergency Management Order No. 20-002 prohibiting visitors to certain types of health care facilities within the State. Please read carefully to determine if your facility falls under this order and to understand the actions you may need to take to comply.

The COVID-19 Call Center is available 24/7 (866) 779-6121 or email COVID-19@FLHealth.gov

Please contact me or anyone in our office if we can assist you during this response.

Kimberly Martin

The following items have been added to the Emergency Coordination Community Library.

In the Preparedness and Protection folder:

- CMS Revised Guidance for Infection Control and Prevention of COVID-19 in Nursing Homes: CMS is providing additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19, including revised guidance for visitation.

- Temporary Guidance for Annual Fit Testing for N95 Filtering Facepieces During COVID-19: OSHA released temporary guidance for annual fit testing of N95 filtering facepieces during the COVID-19 outbreak.

- Critical Care Utilization for the COVID-19 Outbreak in Lombardy, Italy: This JAMA

AMERICAN OVERSIGHT

article discusses the early experience and forecast during an emergency response.

In the Legal/State Policy folder:

- ASTHO Summary: State Interventions to Mitigate COVID-19: This document summarizes recent updates on state and territorial intervention actions for community mitigation of COVID-19.

In the Travel folder:

- Information and Guidance about Global Travel on Cruise Ships due to COVID-19: The CDC recommends all persons defer any travel on cruise ships, including river cruises, worldwide because of the increased risk of SARS-CoV-2 transmission onboard ships.

The following items have been added to the Emergency Coordination Community Library.

In the Basics folder:

- **Actions for All Americans:** Information on keeping the workplace, school, home and commercial establishments safe.
- **CDC Daily Key Points as of March 11, 2020**

In the Preparedness and Protection folder:

AMERICAN OVERSIGHT

- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission:** A 10-page framework to protect communities from getting and spreading respiratory illnesses like COVID-19. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts. The framework includes:
  - Local Factors to Consider for Determining Mitigation Strategies
  - Community mitigation strategies by setting and by level of community transmission or impact of COVID-19
  - Potential mitigation strategies for public health functions
- **Preventing COVID-19 Spread in Communities:** Provides information to prepare and take action against COVID-19. Information is specific for home, school, college/university, work, community/faith based organizations, large community/mass gatherings, healthcare settings, first responders and homeless shelters.
- **Guidance for Skilled Nursing Facilities to Prevent COVID-19**: Five actions recommended by the AHCA to prevent the entry of COVID-19 into skilled nursing facilities.
- **Healthcare Supply of Personal Protective Equipment:** FAQ's, checklists for healthcare facilities, strategies for optimizing the supply of N95 respirators, and release of stockpiled N95 respirators.
- **Safer Drug Use During COVID-19 Outbreak:** Tips for safer drug use during the outbreak.
- **Prepare Your Office and Patients with the Latest Information on Coronavirus**: AAFP collection of resources to address family physician needs.

In the Laboratory folder:

- **APHL Laboratory Alert March 11, 2020:** APHL and CSTE secured a list of CLIA certified laboratories from CMS. The list excludes CLIA –waived laboratories and will hopefully be helpful in identifying laboratories that have the potential to bring on testing for COVID-19.

Enviros Say Simpler Project Reviews Will Hollow Out NEPA

Environmental groups and some left-leaning states have blasted the Trump administration's proposal to ease review standards for major projects, saying they would turn a blind eye to consequences NEPA is meant to guard against, while some industry groups said the changes properly rolled back cumbersome obligations that restrain development.

Analysis

Oil Price Drop May Deliver Knockout To Shaky Energy Cos.

The latest oil price collapse will accelerate the pace of U.S. oil and gas bankruptcies, and industry watchers say the fallout includes a bumper crop of unwanted assets that could drive many companies out of existence while producing a host of environmental and contractual headaches.

BASF Wants No More Delays On Dicamba Class Cert. Battle

BASF Corp. complained Tuesday about repeated delays on the key question of class certification in major litigation over the pesticide dicamba, urging the federal court that oversaw a $265 million first trial in the litigation not to budge on next week's briefing deadline — despite requests from plaintiffs and fellow dicamba maker Monsanto.

NJ Appeals Court Unsure Of Utility Customers' Sandy Claims

A New Jersey appellate panel on Wednesday challenged customers' stance that electric and gas utilities should have preemptively suspended service before their homes were destroyed in fires during Superstorm Sandy, with one judge saying that holding the companies responsible would create "almost an unreasonable standard."

EXPERT ANALYSIS

How Companies Can Conspire To Save The Planet

Businesses looking to cooperatively advance social goals like environmental protection may find themselves at risk of violating antitrust laws. But concerted lobbying for government action as well as jointly establishing voluntary green standards can pass legal scrutiny, say Demian Ordway and Peter Brody at Holwell Shuster.

Opinion

New Pipelines Are Needed To Close Law School Diversity Gap

Pipeline programs that focus on increasing underrepresented law school applicants beyond those with traditionally favored credentials will help close law schools' diversity gap better than existing programs that aid high achievers already being admitted to law school, says Aaron Taylor at AccessLex Institute.

MMWR Early Release: Evaluation of the Effectiveness of Surveillance and Containment Measures for the First 100 Patients with COVID-19 in Singapore — January 2–February 29, 2020
Singapore implemented a multipronged surveillance and containment strategy that contributed to enhanced case ascertainment and slowing of the outbreak. Based on review of the first 100 cases, the mean interval from symptom onset to isolation was 5.6 days and declined after approximately 1 month. Report available at https://tinyurl.com/unf9zfg.

Forum: Respiratory Illness
Topic: Coronavirus disease 2019 (COVID-2019)
Posted By: Megan Gumke
Message Title: CDC Notification - Multiple Cruise Ships COVID-19 Cases Identified

The Centers for Disease Control and Prevention (CDC) has been notified of multiple cruise ships with COVID-19-positive travelers diagnosed by state and local health departments—all after the travelers disembarked the ship. CDC continues to recommend that travelers, particularly those with underlying health issues, defer all cruise ship travel worldwide and considers these travelers at medium risk for COVID-19.

The following is a list of the cruise ships that CDC is aware of, that have had at least one case of COVID-19 identified among passengers after they left the ship. Please be on alert for COVID-19 among any symptomatic persons with a history of cruise ship travel, including river cruises, in the 14 days previous to symptom onset.

CDC is aware of travelers diagnosed by state and local health departments with COVID-19 who were passengers on the following cruise ships:

- Azamara Quest: voyage departing 2/10/20 and any subsequent voyages
- Royal Caribbean Majesty of the Seas: voyage departing 2/29/20 and any subsequent voyages
- MSC Meraviglia: voyage departing 3/1/20 and any subsequent voyages
- Norwegian Bliss: voyage departing 3/1/20 and any subsequent voyages
- Costa Luminosa: voyage departing 3/5/20 and any subsequent voyages
- Celebrity Summit: voyage departing 3/7/20 and any subsequent voyages

CDC is working with the affected cruise lines to ensure that travelers from affected ships receive notifications of potential exposure to COVID-19.

Please do not give out these numbers to anyone. If you receive a call and need to direct the caller to the current on-call staff, **route them through the answering service at 850-245-4401**. This ensures phone numbers are not saved and called when the individual may not be working a shift. It is important calls make it to the current on-call staff.

If you experience any problems getting through to the 850-245-4401 line, please call 850-601-1220. That number will also route you to the answering service.

-
COVID-19 Call Center available 24/7 +1 (866) 779-6121 or email COVID-19@flhealth.gov **(Link to COVID Page)**

Escambia County has its first confirmed case of the coronavirus, according to the Florida Department of Health. An Escambia County man was the first case confirmed in the county. That case, along with four other new cases statewide, were announced Monday evening, bringing the total number of cases to 160 in Florida.

Shortly before the health department announced the news, Escambia County declared a local state of emergency. Both the county and city of Pensacola announced they have canceled all publicly permitted events with more than 50 people in response to the coronavirus. On top of permitted events, Pensacola also canceled all facility reservations and rentals with more than 50 people. Officials will reassess the situation in eight weeks, following the guidelines issued from the Centers for Disease Control and Prevention.

The county also activated its Emergency Operations Center on Monday afternoon. "We are proactively activating the EOC and declaring a local state of emergency to ensure we have the appropriate resources for this unprecedented event," Escambia County Emergency Manager Eric Gilmore said in a county press release. "We encourage the public to follow CDC guidance for social distancing and proper health and hygiene to prevent the spread of COVID-19 in Escambia County." On top of events that have already been canceled, the city's planned Census 2020 Kick-Off Event on Wednesday and AARP tax-aide services at the Pensacola Library, Molino Branch Library and Southwest Branch Library have been canceled. City parks will remain open, but all programs are being suspended, with the exception of the city's spring break programs for school-aged children and senior citizen meal program done in partnership with the Council on Aging of West Florida.

City community centers will be closed to the public. The county's community centers remain open at this point, but the county will likely be closing them soon, county spokeswoman Laura Coale said Monday. Later in the day, the CDC issued another revision to its guidelines and called for communities to limit gatherings of people to 10 or less. Escambia County Administrator Janice Gilley told the News Journal she would have to speak with commissioners to decide how the county would respond. "This is a very fluid incident," Gilley said. "And so I think it would be very difficult to make any definitive statements at this moment, because as you saw today, we went from 50 before 8 a.m., to the president speaking about 10 in a gathering at 2:30 pm. So, I don't want to make a definitive statement about that yet until we can have a chance to see what the impact is in Escambia County."

Robinson said Monday morning that he would not be ordering any restaurants or other businesses to close, but said that could change, especially if the Pensacola area sees community spread of the coronavirus. "Community spread is important," Robinson said. "Obviously, if we get to that point, it'll change what we end up doing. But at this point, we do not see community spread. So, the things we're implementing in the way we go about, day to day, in Escambia County, at this point is because of that. If things change, we will change, and we will probably institute new policies."

AMERICAN OVERSIGHT

Until Monday, it was difficult to get a coronavirus test in the area, with local doctors advising patients with symptoms to stay home and self-quarantine as a test was not available. The first drive-thru testing clinic was opened Monday and the Ascension Sacred Heart call center screened more than 500 calls and sent 61 people for nose swab tests.

During his morning press conference, Robinson said he believes there are probably people in the community who have the virus and are not showing symptoms, but defended his position of not taking further action until there was community spread of the virus. "We haven't gotten to that stage at this particular time," Robinson said. "Again, other communities, both within the United States and the state of Florida are already there. We are not there. That doesn't say we won't get there. But we are positioning ourselves with certain thresholds. When we hit those thresholds, we will institute new policies."

Although there were no cases yet confirmed, Robinson said small businesses, especially restaurant owners, should begin planning for the worst. "If we reach a certain impact, I would tell restaurants to begin to think how they can either provide food for delivery or take-out in the event that something does happen with community spread," Robinson said. "Again, anything can change, and we will change with the circumstances." Robinson said he would be drafting a letter to the state and the federal government requesting a financial assistance program for workers who miss out on work because of closures related to the coronavirus. "Even though there'll be this period of slowdown, we want them to be able to keep their job as best they can," Robinson said.

192 positive cases of COVID-19 in Florida
Date Collected Mar 17, 2020 11:10 AM EDT

TALLAHASSEE, Fla. - Florida Gov. Ron DeSantis says 192 people have tested positive for the novel coronavirus in the state, he announced Tuesday morning. Of those 192 people, 173 are Florida residents, according to the Florida Department of Health. Additionally, there are six residents suffering from the disease in other states. Gov. DeSantis said 4 students from the University of Florida tested positive; 1 of those students had been traveling internationally.

DeSantis also announced another death in the state, saying a 77-year-old man in Broward County died Monday evening. That death brings the number to six in Florida. To slow the spread of the virus, nearly all public events in the state have been canceled. During Tuesday morning's press conference, the governor said all bars and nightclubs in the state would close for 30 days, beginning 5 p.m. Tuesday. He said all restaurants would be required to screen their employees and operate at 50%

AMERICAN OVERSIGHT

capacity. Gatherings of more than 10 people will be banned on beaches, DeSantis said.

If you feel sick The Florida Department of Health has opened a COVID-19 Call Center at 1-866-779-6121. Agents will answer questions Monday through Friday, 8 a.m. to 5 p.m. Questions may also be emailed to covid-19@flhealth.gov. Email responses will be sent during call center hours.

In the Keys, 16 people have been tested for COVID-19 so far, state says

Sixteen people have been tested for the novel coronavirus as of Monday evening, according to newly released data from the state. Of the 16, five have come back with results: negative. The remaining 11 tests haven't produced results yet. Monroe is home to about 74,000 people.

There were no reported cases of COVID-19 in the Keys as of Tuesday morning. The Keys' top health department officer said testing is ramping up due to the greater ability to test people. "It looks like finally everyone's complained enough to the communications director that they decided to list the number of tests in each county," Department of Health in Monroe County Administrator Bob Eadie said. "Any physician that utilizes a private lab now has all the supplies they need and can make all the tests they want.

The capacity for testing has ramped up so you're not just using the public health labs." Eadie said, "If you think you need to be tested, you need to self-isolate. Shortness of breath and a fever. You should be seeking medical care." Until Monday, the Florida Department of Health in Monroe County wasn't sharing test breakdown information, citing patient privacy and a state directive That's changed. "As of last night, the state Department of Health is now sharing the breakdown by county," Kristen Livengood, the spokeswoman for Monroe County government, said on Tuesday morning. "If you look on our Facebook page, you can see everyone is like, 'Can you break down the numbers by county,' which we didn't have the number before."

Livengood on Tuesday morning was organizing an online media press briefing, which will be attended by County Mayor Heather Carruthers and Eadie. About 25,000 live in Key West, which on Monday shut down tourist attractions such as the Southernmost Point buoy, the Sunset Celebration at Mallory Square and Smathers Beach and postponed a number of large events, including the Conch Republic Independence Days Celebration, which was set for the week of April 17.

Coronavirus in Florida: Half of cases involve people 60 or older, according to state data
Date Collected Mar 17, 2020 10:50 AM EDT
Category Local
Source Tampa Bay Times
Author Zachary T. SampsonGeneral Assignment Reporter

Market Saint Petersburg, FL
Language English
Florida health officials as of Monday night had tracked 160 known cases of coronavirus, including 18 visitors isolated in the state and six Floridians who were diagnosed elsewhere. The state early Tuesday announced the case total had risen to 192, including 173 Floridians, and that a sixth person had died, a 77-year-old man who had been at a Broward County assisted living facility.

Half of the 160 people are 60 or older, in an age range that doctors consider to be more at risk to severe symptoms from the disease. The Department of Health lists 24 of the patients as between 70 and 79 years old and another nine as 80 or older. Men account for 90 cases, women 70. The numbers make clear just how vulnerable Florida is to an outbreak of coronavirus compared to other parts of America. It has a greater share of residents in their 70s, 80s or older than any other state. The disease, known as COVID-19, causes symptoms including cough and shortness of breath and can lead to severe respiratory infections, especially in elderly people and those with chronic health trouble. "The eye of this storm is disproportionately focused on our most vulnerable," said Mary Mayhew, secretary of the Florida Agency for Health Care Administration, specifically referencing the "elderly and medically frail." As such, the state instituted a month-long ban on nearly all visitors to nursing homes and assisted-living facilities.

The tally of coronavirus cases is assuredly an undercount for the true prevalence of the illness. Limited early testing, a problem across the country, means the United States does not have a comprehensive accounting of infections. Gov. Ron DeSantis has repeatedly said that some people might be carrying the disease without suffering severe symptoms, especially younger individuals who might not seek testing.

The biggest share of Florida's known cases to date tie to Broward County — 47 patients, or 29 percent. Miami-Dade is connected to another 25 cases, including one person isolated outside of Florida, according to the Department of Health. In Tampa Bay, Hillsborough has five cases, Pinellas has four and Pasco has two. Those cases include patients who traveled to Colorado, New York, Ireland, Egypt and Italy. According to the latest state data, the case of a 17-year-old boy in Hillsborough County and a 58-year-old man in Pinellas County did not, as of Monday, have clear ties to travel or other people infected with the disease. According to the Centers for Disease Control and Prevention, when patients do not know how they might have come into contact with the coronavirus, that is a sign of "community spread." The state reported that visits to emergency departments from people reporting a cough have ticked up for the past two weeks.

Testing has also increased as private labs and hospitals develop obtain equipment to become more involved. The state reported 426 tests in Broward, including 226 that have not returned a result yet.

AMERICAN OVERSIGHT

Hillsborough had as of Monday reported 57 tests, including 19 awaiting a result; Pinellas had 102 tests including 65 awaiting a result; and Pasco had 24 tests including seven awaiting a result. Hernando County had three tests awaiting a result and no positive cases. With private providers like Quest Diagnostics and LabCorp now running samples, the state said there might be a delay in reporting some results. The majority of tests to date, as reported by the Department of Health, have gone through three state health laboratories in Miami (458), Jacksonville (301) and Tampa (292).

State confirms second Citrus coronavirus case
Date Collected Mar 17, 2020 11:38 AM EDT

Source Citrus County Chronicle

Market Crystal River, FL
Language English
11:45 a.m. Tuesday — Gov. Ron DeSantis announced Florida's sixth death from the coronavirus Tuesday, a nursing home patient in Broward County. He also said four University of Florida students had tested positive for the virus, bringing the total number of cases to 192, and leading the governor to call for remote learning at all Florida universities.

The governor also said all bars and nightclubs in the state must suspend service for 30 days, and that restaurant must limit capacity to 50%. All restaurant employees must be screened for the virus. According to DeSantis, Florida has also banned gatherings of larger than 10 on beaches.

11 a.m. Tuesday — Citrus County Fair canceled. Here is the fair Association statement from its Facebook page: "The 2020 Citrus County Fair has been canceled. We are following the guidelines of the CDC, Department of Health and our Community Leadership. We think this action to protect the health and safety of our community is best. "The sale animal projects will receive information soon on new procedures. All other Livestock Shows have been canceled. We will post updates when we have more information. "Thanks for your support and understanding."

10:48 a.m. Tuesday — The Florida Department of Health on Tuesday confirmed a second Citrus County resident has test positive for the coronavirus, according to its website. According to the latest information, it was a male, between the age of 60 and 64, who tested positive. No further information was available on the agency's website. On Sunday, the DOH said a 60-year-old Citrus woman tested positive for the virus. Her case was travel-related, officials said. "This individual is isolated and will continue to remain isolated until cleared by public health officials," the DOH news release said about the woman.

New case of COVID-19 in Okaloosa County

BAY COUNTY, Fla. (WJHG/WECP) - According to the Florida Department of Health, there is a new case of the coronavirus COVID-19 in Okaloosa County. Health officials also say confirmed cases in Florida residents is now up to 173, with 32 new cases reported since last night. Health officials say six people have died from the virus, the latest a Broward County person who lived in an assisted living facility. They also say there are 19 cases in non-Florida residents here in the state. For more of a breakdown of the numbers, you can look at the Florida Department of Health COVID-19 Dashboard.

rapid facility phone assessment.docx

Hello Everyone,

Thank you for chatting with us today.

As I mentioned the CDC Healthcare Infection Control can be reached for further TA via eocevent141@cdc.gov or via phone at 404-414-8385

I think your biggest challenge is going to be figuring out the contracted staff and how they have interacted with other facilities. It would be reasonable to apply many of the below listed concepts to other at risk facilities based upon how these staff moved to detect cases earlier among residents and staff. If helpful someone from our team developed a rapid facility phone assessment which could be deployed (attached).

Here are some good links:
LTC guidance which can apply to AL: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/prevent-spread-in-long-term-care-facilities.html
General IPC guidance: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
Criteria for return to work for HCP (healthcare personnel): https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/hcp-return-work.html

Please remember many of the docs I have attached are not CDC cleared. Some were created as tools by our field team or by other jurisdictions so feel free to modify to your own needs.

A couple important points and lessons learned from other states:

1. Ensure a good active monitoring system for residents (at least once a day although more often if possible). They should be mindful (as you know) the elderly may present in other and potentially less dramatic fashion especially if they have baseline lung disease. I have attached a symptom/temp checking that we created for HCP but could be modified for use with residents.
2. Likewise a good monitoring system for all HCP is key. They should be self-monitoring with delegation (i.e., they know who to call with symptoms) when at home and then have a symptom/temp check before starting their shift. This pre-shift check could happen upon

AMERICAN OVERSIGHT

facility arrival or via something like facetime before leaving for work. Just make sure they take their temp and show while on facetime.

3. Implement universal masking for HCP while in the facility. Attached is a PPE strategy for LTC which accounts for shortages in gowns and extend use of masks and eye protection. In addition, I have attached some docs about general PPE for all HCF which we do expect to be posted to the web soon.
4. Ideally gowns, gloves, mask/respirator, eye should be used for all cases, PUIs, and anyone with unknown respiratory illness. Again may need to refer to the PPE strategy doc if not doable. NTEC has a good video that helps with donning and doffing: https://repository.netecweb.org/items/show/688
5. Restrict visitors. Any visitor that must enter should have symptom/temp check, masked, and controlled movement in and out of resident rooms. I have attached an example letter to families that can be modified.
6. Restrict resident movements, no congregate settings.
7. I have attached some cleaning consideration as well to include the use of nursing/CNAs to wipe high touch surfaces for cases or PUIs instead of EVS.
8. I have also attached a line list if you want it.
9. Contact tracing and risk assessment is not practical in this setting and ideally time should be spent in the above activities plus IPC. We understand that work restricting staff may shutter the entire facility and thus the emphasis of the good monitoring of HCP. We discuss this in the new risk assessment at the very bottom of the page: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html
10. You and other PH staff should be wearing a facemask when you enter the facility and institute self-monitoring as well.

Please feel free to reach out with questions.

Best,
Elizabeth and Nicola

---

Good afternoon, Courtney

I am directing ESF8Planning to send the case-by-case data statistics received from the Bureau of Epidemiology (Leah Eisenstein) to Health Officers at the 11am and 5pm intervals **only** as established per our Communications battle rhythm. It is increasing unmanageable for me to personally handle this task and timely dissemination is paramount. ESF8Planning is already copied on the approved data set and has agreed to manage this tasks morning forward.

Thank you
~Beth

Hey all,

I think Taj has some pretty good skills as far as analysis and coding. His offer is something for us to keep in mind.
Taj used to be a FL EIS fellow, then got his PhD, and now is a professor.
I responded to him saying that I would look into where he could help (and answered his flu report question).

To: Atrubin, David L. <David.Atrubin@flhealth.gov>
Subject: Assistance with COVID-19

David,

Not sure who else to reach out to, but I just wanted to let you know that if BOE or OCHD needs assistance with the response, I am available to assist in any way I can. As a note, I was activated at the DCHD EOC in 2009 during H1N1 and I have more FEMA trainings than I know what to do with. I am also currently a contractor working for FDOH to assist with genomics/bioinformatics. So that may make things easier to loop me in. Just let me know, even if it is just case reports!

Also, are you guys still releasing the flu-view reports? I have been trying to keep tabs, but March 1-7 (week 10) is the last update. Is week 11 due to be released soon?

Hang in there!

Best,
Taj

Subject: CDC Requirement

Hello Dr. Villalta –

One of the requirements just presented by CDC is as follows:

1. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

Is this something you could help arrange? The air ambulance company is not doing so.

Thanks,

AMERICAN OVERSIGHT

The Florida Department of Health (FDOH) acknowledges the growing concern and risks the public and dental professionals face from COVID-19. All dental providers and healthcare professionals play an important role in mitigating the spread of COVID-19. Please review the CDC Guidance for Healthcare Professionals.

On March 16, 2020 federal recommendations were released suggesting social distance and the prevention of groups ten or more. Also on March 16, 2020 the American Dental Association released ADA Guidance to postpone elective procedures for the next three weeks.

Due to the extraordinary situation, the Florida Department of Health recommends dental programs postpone elective procedures for the next three weeks and reassess the situation at that time. Concentrating on the provision of emergency dental care will serve the public and alleviate any emergencies from placing more stress on hospitals and emergency rooms. Clinics should establish procedures to provide care for these patients after taking appropriate precautions to limit the risk of spreading COVID-19. The FDOH recommends all living in Florida practice social distancing and take steps to limit the risk of spreading COVID-19.

Colonel Moran,
Some communications have transpired before we have had an opportunity discuss testing. Dr. Rowlinson and I were notified that NAX Jax would be routing COVID-19 testing for Guantanamo base to a DOD facility in Dayton Ohio; however, I am understanding this is under your purview. Additionally, Dr. Rowlinson was advised by Dr. Deussing, stationed at the CDC EOC, that it would be preferable for us to perform testing.
We are certainly willing and able to assist by conducting COVID-19 testing with a reasonable volume with the understanding that once commercial reference laboratories are fully operational and available, testing will be diverted to those laboratory facilities.
Please advise on how you would like to proceed.

Subject: COVID 19 testing (UNCLASSIFIED)

CLASSIFICATION: UNCLASSIFIED

Patty
I received your name through our CDC contacts. Our office is responsible for the health of all US service members currently assigned to Central/South America and much of the Caribbean. If one of our deployers fell ill with COVID-19 in our Area of Responsibility, then they would be treated at host nation hospital or one of our few overseas military medical facilities (depending upon their location). While we expect that their initial test would be done by a host nation lab, the Dept of Defense requires confirmatory testing with a CDC-approved lab. We have one site (Cuba - Guantanamo Bay) that does not have any host nation services nearby that they can use. In their case, we have a small military hospital on their island (caring for a population of 6000 people). Routinely all of their specialty labs go to Naval Hospital Jacksonville. If a patient is sick enough in Cuba, then they will be medically-evacuated to South FL.

We are trying to determine what CDC-approved lab we can use for COVID-19 testing. I understand we had a relationship with the FL Dept of Health to run Zika samples for the DoD years back.

Our team here reached out this AM to the FL Dept of Health Miami lab. Mr. Henry Uribarri, in the Epidemiology Department (at 305-470--6955), was very helpful. While he stated they can assist us, I wanted to make sure you that there were no concerns from your office regarding supporting DoD overseas sites.

I would anticipate that if we have samples to run they would be sent thru the mail to the receiving

AMERICAN OVERSIGHT

lab. This would be for asymptomatic or mildly symptomatic. Patients who are severely ill that require med-evac would be sent back to the US through other channels & those samples can then be run at their gaining US hospital. One exception to that plan is for our troops in Cuba. Since their labs normally go to Jacksonville and our Naval Hospital works with the Jacksonville health dept, ideally those samples would be able to go that facility instead of Miami.

In the future as US reference labs gain capability to do testing, we could shift to that model as needed.

Please let me know your thoughts. I'm at the #s below if it's easier to chat. Know you are very busy - appreciate your help!

Good afternoon,

Please see the attached **Situation Report #1** regarding **COVID-19**.

Also attached is a brief overview of **Community Lifelines**.

The Department of Homeland Security and the Federal Emergency Management Agency provide the following definitions of **Community Lifelines**:

- Lifelines are the most fundamental services in the community that, when stabilized, enable all other aspects of society to function.
- Lifelines are the integrated network of assets, services, and capabilities that are used day-today to support the recurring needs of the community.

Thank you,

Florida Department of Health Announces New Positive COVID-19 Case in Florida, Test Performed by AdventHealth Altamonte Springs

TALLAHASSEE — The Florida Department of Health has received notification of one new positive case of coronavirus disease (COVID-19) in Florida. This test was performed through a partnership with AdventHealth Altamonte Springs.* To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

New Positive Cases

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases

AMERICAN OVERSIGHT

in Florida.

COVID-19 Cases

* The Department of Health will confirm cases reported by commercial labs.

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.

AMERICAN OVERSIGHT

- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Subject: COVID-19 Update

To All,

The COVID-19 virus is changing how we do things.
Please read the latest update. We will continue to update as we know more.

The Florida Department of Health (FDOH) acknowledges the growing concern and risks the public and dental professionals face from COVID-19. All dental providers and healthcare professionals play an important role in mitigating the spread of COVID-19. Please review the CDC Guidance for Healthcare Professionals.

On March 16, 2020 federal recommendations were released suggesting social distance and the prevention of groups ten or more. Also on March 16, 2020 the American Dental Association released ADA Guidance to postpone elective procedures for the next three weeks.

Due to the extraordinary situation, the Florida Department of Health recommends dental

AMERICAN OVERSIGHT

programs postpone elective procedures for the next three weeks and reassess the situation at that time. Concentrating on the provision of urgent dental care will serve the public and alleviate any emergencies from placing more stress on hospitals and emergency rooms. Clinics should establish procedures to provide care for these patients after taking appropriate precautions to limit the risk of spreading COVID-19, including screening of patients and caregivers prior to their arrival in our dental offices. The FDOH recommends all living in Florida practice social distancing and take steps to limit the risk of spreading COVID-19.

Thank you all for your help.
Bob

Subject: COVID-19 Update: Resources for All Americans & Framework for Mitigation

Good Morning,

The White House Task Force on Coronavirus and the Centers for Disease Control & Prevention have released two helpful documents for State, local, tribal, and community leaders.

- **Actions for All Americans** *(4-page slide deck)*
- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

You can find additional information about both documents and resources below.

Actions for All Americans *(4-page slide deck)*

AMERICAN OVERSIGHT

- Keeping the workplace safe
- Keeping the school safe
- Keeping the home safe
- Keeping commercial establishments safe

A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(10-page frame work for States, localities, and communities)*
Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts. Framework includes:

- Local Factors to Consider for Determining Mitigation Strategies
- Community mitigation strategies by setting and by level of community transmission or impact of COVID-19
- Potential mitigation strategies for public health functions

Recent Actions

- HHS Supports Development of First High-Throughput COVID-19 Diagnostic Test (click here)
- CMS Issues Key Protective Mask Guidance for Healthcare Workers (click here)
- CMS Issues Clear, Actionable Guidance to Providers about COVID-19 Virus (click here)
- CMS Issues Call to Action for Hospital Emergency Departments to Screen Patients for Coronavirus (click here)
- Telehealth Benefits in Medicare are a Lifeline for Patients During Coronavirus Outbreak (click here)

Thanks,
Nic

Background & Additional Information (*Updated*)

AMERICAN OVERSIGHT

Background: Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Decisive action from President Trump at the beginning of the COVID-19 outbreak—including prudent travel restrictions and an early containment strategy—has given State and local officials and private sector partners time to prepare. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response. The Coronavirus Task Force and broader Administration have worked and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk for the average American remains low, and all agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

Up-To-Date Information: The most up-to-date information and guidance can be found via the Centers for Disease Control and Prevention Coronavirus Disease 2019 website: HERE. The Coronavirus Task Force holds frequent national briefings which can be viewed live: HERE. You are also encouraged to follow HHS, CDC, and other agency social media channels for up-to-date information.

Local Preparedness Tips: Responses locally executed, state managed, and federally supported.

- Ensuring clear, open lines of communication with the public and making information and guidance readily available.
- Sharing and disseminating *verified and accurate* guidance and information.
- Coordinating with State and local health authorities (a complete list of State & Territorial Health Department Websites can be found **here**)
- Reviewing local preparedness plans and strategies.

What You Need To Know: President Trump and the Administration Are Taking a Whole-Of-Government Approach to Protecting the American People

AMERICAN OVERSIGHT

Top Line

- The risk to the American public remains low.
- The Coronavirus Task Force is marshalling a whole-of government response to COVID-19 and driving collaboration between Federal-State-Tribal-Local stakeholders.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. In addition, all state labs have the test and are empowered to conduct the test themselves. Complementing these efforts, leading commercial laboratories in the country will soon have tests available for local doctors, pharmacies, and broadly to the American public.

President Trump has made the safety, security and health of the American people his top priority from day one.

- There is no higher priority for President Trump than protecting the health and safety of Americans.
- In 2018, President Trump signed the **National Biodefense Strategy**, which improves speed of action in situations such as this.
- While additional cases are expected, the general risk to the average American remains low, and the Administration is taking measures to keep the threat low.

Since the very beginning of the coronavirus outbreak, the President has taken an unprecedented whole-of-government approach to protect the American people.

- President Trump took unprecedented action and suspended all travel into the United States from China and has issued subsequent screening measures and guidance on travel from other impacted areas across the globe.
- Issuing a public health emergency declaration on January 31.
- Establishing the White House task force to combat the coronavirus spread. The Task Force is coordinating and marshalling the full resources and capabilities of the Federal government to respond to the coronavirus.
- Forging relationships and collaboration between the public and private sectors.

AMERICAN OVERSIGHT

- Remained in close contact with our Nation's governors and other key stakeholders.
- *The Washington Times:* ***Thanks to Trump Administration, the United States has a Coronavirus Plan of Action***.
- *Dr. Marc Siegel:* ***Coronavirus Public Health Response Has Been Handled Well***
- **Actions for All Americans** *(4-page slide deck)*
- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

While the overall threat to the American public remains low, the President has directed the White House Task Force to take all steps to ensure the health and well-being of the American people and we are well-prepared.

- Americans do not need to change their day-to-day lives but should stay informed and practice good hygiene.
- There are good tried and true hygiene practices which can be very effective to reduce the chance of getting sick.
- Travelers are encouraged to always exercise healthy travel habits when traveling and to follow appropriate guidance (*see* **here**). At this time, there are no domestic travel restrictions in the United States.
- We are working rapidly on therapeutics and vaccines and have launched the first U.S. clinical trial for an investigational antiviral.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. Between March 2nd and 5th, more than 900,000 tests were distributed across the country.
- The United States has the finest public health system in the world and knows the playbook to respond to infectious disease outbreaks.

Local, State, tribal, & Federal coordinated preparedness & response efforts.

- Federal officials have been working diligently to communicate with State, local, and tribal officials on the Federal government's efforts to prepare and respond to COVID-1.
- Our Nation's Governors have participated in-person and on conference call briefings with Federal partners on January 30, February 9, February 20, March 2, and March 9. These communications remain ongoing.
- White House, OMB, HHS, DHS, DOT, and State Department Officials met with over 40 State, county, and city health officials from over 30 States and territories to thank them for their leadership and to continue discussions on the Federal-State-Local partnership to prepare and respond to COVID-19 (February 25).
- HHS, CDC, DHS, and Federal partners have held numerous national briefing calls with State, local, tribal, private-sector, and community leaders.
- The Trump Administration is partnering with State, local, and tribal elected and appointed leaders' associations.

Recent Actions: Below, please find pertinent updates on pertinent Administrations actions.

Local Preparedness Tips: Responses locally executed, state managed, and federally supported.

- Ensuring clear, open lines of communication with the public and making information and guidance readily available.
- Sharing and disseminating *verified and accurate* guidance and information.
- Coordinating with State and local health authorities (a complete list of State & Territorial Health Department Websites can be found **here**)
- Reviewing local preparedness plans and strategies.

What You Need To Know: President Trump and the Administration Are Taking a Whole-Of-Government Approach to Protecting the American People

AMERICAN OVERSIGHT

Top Line

- The risk to the American public remains low.
- The Coronavirus Task Force is marshalling a whole-of government response to COVID-19 and driving collaboration between Federal-State-Tribal-Local stakeholders.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. In addition, all state labs have the test and are empowered to conduct the test themselves. Complementing these efforts, leading commercial laboratories in the country will soon have tests available for local doctors, pharmacies, and broadly to the American public.

President Trump has made the safety, security and health of the American people his top priority from day one.

- There is no higher priority for President Trump than protecting the health and safety of Americans.
- In 2018, President Trump signed the **National Biodefense Strategy**, which improves speed of action in situations such as this.
- While additional cases are expected, the general risk to the average American remains low, and the Administration is taking measures to keep the threat low.

Since the very beginning of the coronavirus outbreak, the President has taken an unprecedented whole-of-government approach to protect the American people.

- President Trump took unprecedented action and suspended all travel into the United States from China and has issued subsequent screening measures and guidance on travel from other impacted areas across the globe.
- Issuing a public health emergency declaration on January 31.
- Establishing the White House task force to combat the coronavirus spread. The Task Force is coordinating and marshalling the full resources and capabilities of the Federal government to respond to the coronavirus.
- Forging relationships and collaboration between the public and private sectors.

AMERICAN OVERSIGHT

- Remained in close contact with our Nation's governors and other key stakeholders.
- *The Washington Times:* ***Thanks to Trump Administration, the United States has a Coronavirus Plan of Action***.
- *Dr. Marc Siegel:* ***Coronavirus Public Health Response Has Been Handled Well***
- **Actions for All Americans** *(4-page slide deck)*
- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

While the overall threat to the American public remains low, the President has directed the White House Task Force to take all steps to ensure the health and well-being of the American people and we are well-prepared.

- Americans do not need to change their day-to-day lives but should stay informed and practice good hygiene.
- There are good tried and true hygiene practices which can be very effective to reduce the chance of getting sick.
- Travelers are encouraged to always exercise healthy travel habits when traveling and to follow appropriate guidance (*see* **here**). At this time, there are no domestic travel restrictions in the United States.
- We are working rapidly on therapeutics and vaccines and have launched the first U.S. clinical trial for an investigational antiviral.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. Between March 2nd and 5th, more than 900,000 tests were distributed across the country.
- The United States has the finest public health system in the world and knows the playbook to respond to infectious disease outbreaks.

Local, State, tribal, & Federal coordinated preparedness & response efforts.

- Federal officials have been working diligently to communicate with State, local, and tribal officials on the Federal government's efforts to prepare and respond to COVID-1.
- Our Nation's Governors have participated in-person and on conference call briefings with Federal partners on January 30, February 9, February 20, March 2, and March 9. These communications remain ongoing.
- White House, OMB, HHS, DHS, DOT, and State Department Officials met with over 40 State, county, and city health officials from over 30 States and territories to thank them for their leadership and to continue discussions on the Federal-State-Local partnership to prepare and respond to COVID-19 (February 25).
- HHS, CDC, DHS, and Federal partners have held numerous national briefing calls with State, local, tribal, private-sector, and community leaders.
- The Trump Administration is partnering with State, local, and tribal elected and appointed leaders' associations.

Recent Actions: Below, please find pertinent updates on pertinent Administrations actions.

Subject: COVID-19 Update: Resources for All Americans & Framework for Mitigation

Good Morning,

The White House Task Force on Coronavirus and the Centers for Disease Control & Prevention have released two helpful documents for State, local, tribal, and community leaders.

- **Actions for All Americans** *(4-page slide deck)*
- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

You can find additional information about both documents and resources below.

Actions for All Americans *(4-page slide deck)*

- Keeping the workplace safe

AMERICAN OVERSIGHT

- Keeping the school safe
- Keeping the home safe
- Keeping commercial establishments safe

A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(10-page frame work for States, localities, and communities)*
Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts. Framework includes:
- Local Factors to Consider for Determining Mitigation Strategies
- Community mitigation strategies by setting and by level of community transmission or impact of COVID-19
- Potential mitigation strategies for public health functions

Recent Actions

Background & Additional Information (*Updated*)

AMERICAN OVERSIGHT

Background: Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Decisive action from President Trump at the beginning of the COVID-19 outbreak—including prudent travel restrictions and an early containment strategy—has given State and local officials and private sector partners time to prepare. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response. The Coronavirus Task Force and broader Administration have worked and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk for the average American remains low, and all agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

Up-To-Date Information: The most up-to-date information and guidance can be found via the Centers for Disease Control and Prevention Coronavirus Disease 2019 website: HERE. The Coronavirus Task Force holds frequent national briefings which can be viewed live: HERE. You are also encouraged to follow HHS, CDC, and other agency social media channels for up-to-date information.

Subject: RE: COVID-19 Update: Resources for All Americans & Framework for Mitigation

Good Afternoon,

As a follow-up to this morning's update, below you will find details on CDC's awarding of over $560 million State and local jurisdictions in support of COVID-19 response, and community mitigation strategies for Seattle (WA) and Santa Clara (CA).

CDC to Award Over $560 Million to State & Local Jurisdictions in Support of COVID-19 Response (more here)
The Department of Health and Human Services (HHS) is announcing another upcoming action by the Centers for Disease Control and Prevention (CDC) to provide resources to state and local jurisdictions in support of our nation's response to the coronavirus disease 2019 (COVID-19). The $8.3 billion dollar Supplemental passed by Congress included statutory language which prescribed the exact formula for disbursing the money: states will receive 90% of their 2019 CDC PHEP grants. This marks the first tranche of funding to states from the $8.3 billion supplemental. Your state health officers are receiving a letter today from CDC outlining what is needed to receive the funding, essentially they need to submit a spend plan and they will receive guidance on what that spend plan should contain.

White House Coronavirus Task Force Announces Community Mitigation Strategies for Seattle, Santa Clara
The White House Coronavirus Task Force today recommended 30-day mitigation strategies for Seattle-King, Pierce, and Snohomish County, Washington, and Santa Clara County, California due to widespread transmission of coronavirus disease 2019 (COVID-19). These

AMERICAN OVERSIGHT

mitigation activities are designed to address the effects of COVID-19 on areas that are experiencing community spread.

"President Trump has made clear that the Task Force must move decisively to protect the health and safety of the American people," said Vice President Mike Pence. "These recommendations outline a whole-of-community approach to immediately minimize the impacts of coronavirus in these cities and towns. I look forward to the continued partnership between the Task Force and State and local leaders."

Earlier today, Vice President Pence spoke with California Governor Gavin Newsom and Washington Governor Jay Inslee about these community mitigation strategies. The Task Force and the Centers for Disease Control and Prevention (CDC) have worked closely with state and local leaders in California, Washington, and around the Nation to develop these strategies. Additionally, CDC has teams in these areas working with public health partners to respond to the situation on the ground.

Cooperation with communities, businesses, and healthcare organizations is necessary to implement extensive community mitigation activities with the goal of protecting:

- Individuals at risk for severe illness, including persons with underlying health conditions including immune suppression and especially seniors with underlying health conditions;
- The healthcare workforce; and
- Critical infrastructure workforces.

Due to widespread community transmission of COVID-19 in these communities, examples of mitigation strategies for these areas include, but are not limited to:

- Individuals should practice protective measures (e.g., hand washing);
- Schools should conduct regular health checks of students, staff, and visitors;
- Senior living facilities should implement social distancing measures;
- Workplaces should encourage staff to telework and expand sick leave policies;
- Community and faith-based organizations should move gatherings of any size to video-accessible venues or postpone/cancel; and
- Healthcare facilities should implement triage before entering facilities.

In making these recommendations, the Task Force considered guidance from multiple Federal agencies, including technical advice from CDC. These community mitigation strategies are recommended for 30 days, after which local and state public health officials, in coordination with CDC will reassess the individual community situations.

Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance

As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found here (3/9). The Press Release can be found here and all CMS guidance related to COVID-19 can be found here.

Below you will find addition information.

Subject: COVID-19 Update: Resources for All Americans & Framework for Mitigation

Good Morning,

The White House Task Force on Coronavirus and the Centers for Disease Control & Prevention have released two helpful documents for State, local, tribal, and community leaders.

- **Actions for All Americans** *(4-page slide deck)*
- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

You can find additional information about both documents and resources below.

Actions for All Americans *(4-page slide deck)*
- Keeping the workplace safe
- Keeping the school safe
- Keeping the home safe
- Keeping commercial establishments safe

A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(10-page frame work for States, localities, and communities)*
Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts. Framework includes:
- Local Factors to Consider for Determining Mitigation Strategies
- Community mitigation strategies by setting and by level of community transmission

AMERICAN OVERSIGHT

or impact of COVID-19
- Potential mitigation strategies for public health functions

Recent Actions

Background & Additional Information (*Updated*)

Background: Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Decisive action from President Trump at the beginning of the COVID-19 outbreak—including prudent travel restrictions and an early containment strategy—has given State and local officials and private sector partners time to prepare. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response. The Coronavirus Task Force and broader Administration have worked and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk for the average American remains low, and all agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and***

Local Preparedness Tips: Responses locally executed, state managed, and federally supported.

- Ensuring clear, open lines of communication with the public and making information and guidance readily available.
- Sharing and disseminating *verified and accurate* guidance and information.
- Coordinating with State and local health authorities (a complete list of State & Territorial Health Department Websites can be found **here**)
- Reviewing local preparedness plans and strategies.

What You Need To Know: President Trump and the Administration Are Taking a Whole-Of-Government Approach to Protecting the American People

Top Line

- The risk to the American public remains low.
- The Coronavirus Task Force is marshalling a whole-of government response to COVID-19 and driving collaboration between Federal-State-Tribal-Local stakeholders.
- The Federal Government has been able to provide tests to all the state jurisdictions

AMERICAN OVERSIGHT

and labs that have requested it. In addition, all state labs have the test and are empowered to conduct the test themselves. Complementing these efforts, leading commercial laboratories in the country will soon have tests available for local doctors, pharmacies, and broadly to the American public.

President Trump has made the safety, security and health of the American people his top priority from day one.

- There is no higher priority for President Trump than protecting the health and safety of Americans.
- In 2018, President Trump signed the **National Biodefense Strategy**, which improves speed of action in situations such as this.
- While additional cases are expected, the general risk to the average American remains low, and the Administration is taking measures to keep the threat low.

Since the very beginning of the coronavirus outbreak, the President has taken an unprecedented whole-of-government approach to protect the American people.

- President Trump took unprecedented action and suspended all travel into the United States from China and has issued subsequent screening measures and guidance on travel from other impacted areas across the globe.
- Issuing a public health emergency declaration on January 31.
- Establishing the White House task force to combat the coronavirus spread. The Task Force is coordinating and marshalling the full resources and capabilities of the Federal government to respond to the coronavirus.
- Forging relationships and collaboration between the public and private sectors.
- Remained in close contact with our Nation's governors and other key stakeholders.
- *The Washington Times:* ***Thanks to Trump Administration, the United States has a Coronavirus Plan of Action***.
- *Dr. Marc Siegel:* ***Coronavirus Public Health Response Has Been Handled Well***
- **Actions for All Americans** *(4-page slide deck)*
- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

While the overall threat to the American public remains low, the President has directed the White House Task Force to take all steps to ensure the health and well-being of the American people and we are well-prepared.

- Americans do not need to change their day-to-day lives but should stay informed and practice good hygiene.
- There are good tried and true hygiene practices which can be very effective to reduce the chance of getting sick.
- Travelers are encouraged to always exercise healthy travel habits when traveling and to follow appropriate guidance (*see* **here**). At this time, there are no domestic travel restrictions in the United States.
- We are working rapidly on therapeutics and vaccines and have launched the first U.S. clinical trial for an investigational antiviral.

AMERICAN OVERSIGHT

- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. Between March 2nd and 5th, more than 900,000 tests were distributed across the country.
- The United States has the finest public health system in the world and knows the playbook to respond to infectious disease outbreaks.

Local, State, tribal, & Federal coordinated preparedness & response efforts.

- Federal officials have been working diligently to communicate with State, local, and tribal officials on the Federal government's efforts to prepare and respond to COVID-1.
- Our Nation's Governors have participated in-person and on conference call briefings with Federal partners on January 30, February 9, February 20, March 2, and March 9. These communications remain ongoing.
- White House, OMB, HHS, DHS, DOT, and State Department Officials met with over 40 State, county, and city health officials from over 30 States and territories to thank them for their leadership and to continue discussions on the Federal-State-Local partnership to prepare and respond to COVID-19 (February 25).
- HHS, CDC, DHS, and Federal partners have held numerous national briefing calls with State, local, tribal, private-sector, and community leaders.
- The Trump Administration is partnering with State, local, and tribal elected and appointed leaders' associations.

Recent Actions: Below, please find pertinent updates on pertinent Administrations actions.

HI, Carina

We are looking at current EPI capacity within CHDs and planning for surge support. Can you please provide a spreadsheet with the following information

1. CHDs
2. Cases to date
3. # of EPI Staff
4. Regional EPI positions
5. Any other variable that would inform the decision for additional staff support (e.g. new staff)

Also, Paul and I would like 10 minutes of your time on this and other topics. Please call his cell

Thank you

Subject: Cruise ships debarking

Hi, cruise ships have been debarking in Miami and Fort Lauderdale without any health screenings for the passengers. I've contacted Port Everglades, and they said to reach out to you because the Celebrity Summit, which debarked this morning, had been cleared by the CDC and the Health Department. What does that mean? What goes into such a clearing? And why is there no health screening?

Thank you.

Florida deploys 3 field hospitals, requests medical supplies
Date Collected Mar 18, 2020 8:17 AM EDT
Category Local
Source Raleigh News & Observer
Author BOBBY CAINA CALVAN and FREIDA FRISAROThe

Market Smithfield, NC
Language English
Health officials in Florida are deploying three field hospitals across the state to help combat the new coronavirus. In an email sent Tuesday night, Emergency Management Director Jared Moskowitz announced that one field hospital is currently staged in Orlando and can be sent to other areas of the state if needed. Another field hospital is on its way to Broward County, which has the highest number of

AMERICAN OVERSIGHT

confirmed cases of COVID-19. The county had 55 of the state's 216 cases, Moskowitz said. Mobile COVID-19 testing is also being implemented in Broward, and the National Guard has been deployed to assist there. In addition, Moskowitz is working with federal officials to determine whether the state can add U.S. Navy Mercy-Class hospital ships at Florida ports.

As of Tuesday night, Florida health officials said 216 people had tested positive for COVID-19, including 21 out of state residents who tested positive in Florida and six Florida residents who tested positive elsewhere, according to the state's dashboard. Moskowitz also said the emergency management agency is requesting supplies from the federal government. These include: five mobile intensive care units, 5,000 ventilators, hospital beds, 250,000 coveralls, 500,000 gloves, 500,000 gowns, 500,000 collection kits, 100,000 16-ounce bottles of hand sanitizer and 150,000 personal protective kits that include coveralls, gowns and goggles. He is also requesting 2 million N95 face masks.

The supplies are being delivered on a rolling basis, and inventory is being distributed throughout the state 24 hours a day, the email said. Gov. Ron DeSantis on Tuesday also ordered bars and nightclubs in Florida to close for 30 days and directed restaurants to operate at 50% of their maximum capacity to allow for social distancing. State school officials said public schools would remain closed until April 15 and announced the suspension of mass campus gatherings, including sports events.

DeSantis announced that four University of Florida students tested positive for COVID-19. At the governor's prompting, Florida's university system said students should return home for remote learning for the rest of the spring semester. University officials also canceled traditional cap-and-gown graduation ceremonies in May, and directed campuses to reschedule or devise alternatives, perhaps even holding virtual graduation ceremonies for the 46,000 students who won't be able to march.

So far, six deaths attributed to coronavirus have been reported in Florida, including two announced Tuesday: a 77-year-old man who lived in an assisted living facility in Fort Lauderdale and a Manatee County resident. Without naming the facility, Florida Surgeon General Scott Rivkees on Tuesday said 218 residents live there. Scott Wyman, chief of staff for Fort Lauderdale's mayor, identified the facility as the Atria Willow Wood assisted living community. He said five firefighters and a police officer were in contact with residents at the facility. They are self-isolating, officials said.

The virus causes only mild or moderate symptoms, such as fever and cough, for most people, but older adults and those with existing health problems can develop severe complications, including pneumonia. According to the World Health Organization, people with mild illness recover in about two weeks, while those with more severe illness may take three to six weeks to recover. DeSantis had mostly refrained from issuing mandates and left localities to their own judgment on how to limit public activities. He acted more decisively after President Donald Trump issued stricter guidelines Monday. The governor said his order does not preclude the hardest-hit area from taking more actions. Communities from Key West to Orlando and Jacksonville sought to help contain the virus by shutting down attractions or limiting hours at public establishments like restaurants.

Department of Health confirms Polk's 1st COVID-19 case

According to the Florida Department of Health in Polk County the first positive case of COVID-19 has been identified - a 44-year-old female. According to state data, the case was not immediately designated as travel-related and is under investigation. Polk among 30 counties now with confirmed cases. Polk County joined 29 other counties in Florida with confirmed cases of the novel coronavirus following the

AMERICAN OVERSIGHT

release of updated cases Tuesday night. According to the Florida Department of Health in Polk County the first positive case of COVID-19 has been identified — a 44-year-old female. According to state data, the case was not immediately designated as travel-related and is under investigation. Where the woman lives was not released. DOH-Polk said "it is conducting its contact investigation to identify persons who may have been in contact with the suspected positive individual. This is all the information available to us at this time." The state reported that there are now 216 COVID-19 cases in Florida, jumping by 24 on Tuesday. Those new cases include: – 22 Florida residents and 2 non-Florida residents – There are currently 195 positive cases in Florida residents and 21 positive cases in non-Florida residents. It was also reported the state's death toll reached seven with a death to the virus confirmed in Manatee County. To date, of the 216 cases, 119 are men, 96 are women and one was listed as unknown, according to the state. The highest concentration of cases is in the 60-69 age group with 52, followed by 70-79 with 29, 40-49 and 50-59 with 27 each, 20-29 with 25, 30-39 with 12, 80-plus with 11 and 10-19 with 9. State data shows through Tuesday that 26 COVID-19 tests have been conducted in Polk with 10 awaiting results, 15 confirmed negative and the one positive case. In all, 57 of Florida's 67 counties have submitted COVID-19 tests, according to the state. There have been a total of 2,294 people tested, with 216 positive tests, 2,294 negative tests and 1,061 tests pending results.

Coronavirus in Florida: 216 cases, 7 deaths

TAMPA, Fla. (WFLA) – The Florida Department of Health reported 24 additional cases of coronavirus Tuesday night, bringing the total number of cases to 216. Seven people have died of the virus in Florida, the most recent being a patient in Manatee County. The health department also reported the first case of the virus in Polk County and more cases in Hillsborough, Manatee and Sarasota counties. According to the health department, 216 people were ill with the virus in Florida. This includes 195 Florida residents and 21 people from out of state. Another five Florida residents with the virus were "repatriated" to the U.S., but their location was not disclosed. There are currently 29 cases in the Tampa Bay area: Hillsborough County: 9 Manatee County: 7 Pinellas County: 4 Sarasota County: 4 Polk County: 1 Pasco County: 2 Citrus County: 2 The state is currently monitoring 832 people. The department said it is now able to test more people for the virus after partnering with private libraries around the state. There are currently 6,496 cases of coronavirus in the United States. More than 100 people have died. For more information on coronavirus in Florida, visit the health department's COVID-19 webpage or the live DOH Dashboard here.

State adds 3 field hospitals, including 1 in Orlando The Florida Division of Emergency Management is ordering additional hospital supplies and personal protective equipment in response to COVID-19's spread across Florida, and three field hospitals are being deployed throughout the state. One field hospital is currently staged in Orlando, the Florida Department of Health said, and can be relocated throughout the state as needed. Separate field hospitals are in transit to Broward County and Ocala. The Broward field hospital will remain in the county, while Ocala's can be moved if necessary.

Among the items FDEM Director Jared Moscowitz is requesting through Direct Federal Assistance are

AMERICAN OVERSIGHT

five mobile intensive care units, 5,000 hospital beds and 5,000 ventilators, to be distributed across the state. The full list of requested supplies is below:
*5 mobile intensive care units
*5,000 ventilators
*5,000 hospital beds
*50,000 two oz. bottles of hand sanitizer
*250,000 coveralls
*500,000 gloves
*500,000 gowns
*500,000 collection kits
*100,000 16 oz. bottles of hand sanitizers
*150,000 Personal Protective Equipment kits, including coveralls, gowns, and goggles
*2 million N95 face masks Supplies are being delivered on a rolling basis throughout Florida at all hours.

Area hospitals delaying elective surgeries amid virus AdventHealth, Orlando Health and the Orlando VA hospital said Tuesday they want to delay elective surgeries and procedures. AdventHealth is asking physicians to defer "elective, non-time sensitive" procedures and surgeries, but will continue to perform emergency and urgent procedures. "Every decision we make is to protect patients, physicians and team members, and ultimately, our greater community. As the region's leading health care provider, we have a sobering responsibility to halt the spread of COVID-19," said Dr. Neil Finkler, Chief Medical Officer for Acute Care Services at AdventHealth. Orlando Health is leaving the decision up to surgeons, endoscopists or proceduralists to determine what in the patient's best interest. But it noted that is has the capability to perform outpatient surgeries at several ambulatory surgical centers around the region.

At the Orlando VA hospital, in addition to postponing non-urgent elective procedures, the facility will use virtual appointments as much as possible, Other VA facilities in Florida, South Georgia and the Caribbean are taking the same precautions. The hospital is also restricting visitors. A veteran will be allowed to have one visitor if needed to help the veteran getting to an appointment, provide support to a patient in a palliative or hospice care unit, or to be there for veterans having major procedures, the VA announced on Tuesday. The restrictions are in addition to those announced last week, including mandatory and enhanced screening for all patients, employees, and visitors, and restricted visitations to certain units.

Florida Blue, the state's leading health insurer, announced that it is adding a free-to-member virtual care partner, Teladoc, for seniors and others on its Medicare Advantage plans, and waiving the virtual care copay for many commercial and Affordable Care Act members to encourage use of Teladoc if it is offered as part of their plan. Additionally, during this crisis, Florida Blue's network of primary care doctors and specialists will be able to treat patients virtually at their normal office visit rates. Sanitas Medical Centers, which exclusively serves thousands of Florida Blue members at locations across Florida, continues to offer free bilingual virtual care to its current patients via its mySanitas Chat website, and the Sanitas mobile app.

Orlando malls adjust to coronavirus, but don't close doors Malls across the Orlando area are limiting hours and taking other precautions as coronavirus has shoppers staying home and away from large groups. At Altamonte Mall, the Easter bunny has been postponed and the mall hours have changed to noon to 7 p.m. Monday through Saturday and noon to 6 p.m. Sunday, according to its website. Hand sanitizer dispensers have also been installed in the mall. Florida Mall has modified its hours to 11 a.m. to 7 p.m. Monday through Saturday and noon to 6 p.m. Sunday. Mall at Millenia's hours were the same as of Tuesday morning, but some of its businesses have cut back or temporarily closed, according to its website.

By the numbers Here's a look at the latest cases in the state and region, updated at 6 p.m. Tuesday.

Subject: RE: Drive Through Planning Documents

Hi all,

Thanks again for your time this afternoon. Below is the latest from AdventHealth on COVID-19 testing procedures. We appreciate your assistance in communicating these guidelines with the public as appropriate.

***

COVID-19 Testing at AdventHealth:

AdventHealth confirms it is testing patients who meet evaluation criteria for novel coronavirus (COVID-19) in Florida.

The acquisition of three specialized testing devices allows AdventHealth to alleviate the testing burden from public agencies, while also providing patients and physicians expanded access to the test.

Because of limited supplies and resources, the test will only be facilitated with a physician's order for patients who meet the evaluation criteria as defined by the Centers for Disease Control and Prevention.

Frequently Asked Questions

Q: Where do I go if I want to be tested?

If you are sick and exhibiting symptoms (fever, cough, shortness of breath), you should seek treatment with your primary care physician or Centra Care. Physicians are stringently adhering to the testing criteria set by the Centers for Disease Control and Prevention to determine if a patient qualifies for a COVID-19 test. A doctor will likely test you for other illnesses, such as the flu, before ordering a COVID-19 test.

Please note: The public cannot come to an AdventHealth hospital, physician practice or Centra Care and order their own COVID-19 test.

Q: Should I go to the ER if I think I need a COVID-19 test?

Unless you are experiencing severe respiratory distress, such as shortness of breath or chest pain, you should not go to an ER for a COVID-19 test. Physicians at AHMG practices and Centra Care can take a collection sample from those patients who meet the testing criteria as set by CDC. The emergency department should be used only by those having a medical emergency, such as chest pain or shortness of breath.

Q: What should I do if I think I might have COVID-19?

If you have travelled internationally or been on a cruise, you should self-quarantine for 14 days immediately upon returning from your travels, even if you aren't experiencing symptoms. If you

AMERICAN OVERSIGHT

develop a fever, cough or shortness of breath during those 14 days, contact your physician and disclose your travel history. Your physician will advise you of next steps. If you are experiencing chest pain or shortness of breath, go to the ER.

Q: Can I get a coronavirus test at AdventHealth if I am not sick?
No. If you're not sick, it's unlikely that you have COVID-19. Currently all tests are designated for those who are exhibiting symptoms and meet the testing criteria set by the Centers for Disease Control and Prevention.

Q: I have a fever and cough. Will I be automatically tested for COVID-19?
No. Fever and cough are common symptoms for other illnesses, including the flu. Physicians will evaluate your symptoms, travel history, potential for exposure and other factors and determine if a test is appropriate. They will also test you for other viruses, including the flu.

Q: How can I be tested?
A physician must order a COVID-19 test, and will only order a test if the patient meets the testing criteria as defined by the CDC.

Q: Where can I be tested?
A physician must order a COVID-19 test. If a doctor deems it appropriate to test you for COVID-19, the sample would be collected in the physician's office. The test itself is conducted through an AdventHealth lab. (This lab is not the same as the consumer-facing labs where patients go for outpatient bloodwork.)

Q: Are the results instantaneous?
No. Unlike a flu test, which can be administered on-site with quick results, the COVID-19 test takes up to seven days from the time of collection sample to results being shared with the patient. During that time, patients will be instructed to follow CDC guidelines and isolate themselves.

Q: When would I get results from a test?
Up to seven days after administration of the test.

Q: Does AdventHealth share results with the Florida Department of Health?
Yes. AdventHealth will share positive COVID-19 test results with the Florida Department of Health as required by regulation.

Q: Does AdventHealth have an unlimited number of testing supplies?
No. There is a limited number of testing supplies. In order to be good stewards of our resources and quickly identify those who have the highest likelihood of infection, we must limit tests only to those who meet the criteria as set by the CDC.

Q: I have questions about COVID-19 or AdventHealth's testing capabilities. Whom can I call?
Call the AdventHealth Coronavirus Information Line at 877-VIRUSHQ or visit www.CoronavirusSignsAndSymptoms.com.

Q: Are the tents at AdventHealth hospitals for testing?
The tents are not currently in use and are part of our preparedness efforts. There are no drive-thru testing sites at AdventHealth today.

Aaron,
This is the most up to date one version.

Dr. Blackmore, can you please fill update just the below:

CASES TO DATE
- 751 persons under investigation
- 478 negatives
- 52 total cases reported
- o 46 in Florida residents
  - 40 diagnosed in Florida
  - 6 diagnosed and isolated in another state
- o 6 confirmed positive (non-Florida resident)
- 3 deaths
- 221 tests in state results pending
- 1413 people monitored to date
- 365 of that 1413 are currently being monitored

Of the 17 new cases identified today (4) were in Broward, (2) Palm Beach, (1) Lee, (1) Miami-Dade, Seminole (1), Alachua (1), Duval (1), Volusia (1), Clay (1), Hillsborough (1) and (3) out-of-state residents.

**** THIS DOES NOT FULLY REFLECT PRIVATE LAB TESTING ACTIVITIES IN FLORIDA. THERE IS A DELAY IN PRIVATE LAB TESTING BEING INCORPORATED INTO OFFICIAL REPORTING SYSTEMS***

---

Dr. Blackmore, Swing by when you want to discuss and develop our plan. I am leaning toward the 14 day or 72 hours after Sx resolution.

Scott Pritchard, MPH
Interim Director
Infectious Disease Prevention and Investigations Section
Bureau of Epidemiology
850-245-4406

From: Doyle, Tim <Tim.Doyle@flhealth.gov>
Sent: Thursday, March 12, 2020 12:02 PM
To: Pritchard, Scott <Scott.Pritchard@flhealth.gov>
Subject: End of isolation for confirmed cases

Scott – Attached is a compilation of related information.
Key points:

- I found 2 states that have guidance independent of testing
  - WA 7 days or 72 hrs after symptom resolution
  - TN 14 days or 72 hrs after symptom resolution
- Attached NEJM paper is the only thing I could find for new virus and shows most upper respiratory specimens are PCR negative by 15 days.
- Papers on SARS and MERS show longer shedding period in stool and resp specimens, up to median 27 days and range up to 50-100 days.
- CDC guidance has not been updated as far as I can tell, but does seem to permit some flexibility to account for variety of factors, including serial test negative.

So if you want a test independent criteria, based on preliminary assessment, I would suggest we align with the more conservative TN criteria, which is stated below:

TN (source: email from CEFO in TN, couldn't find anything on web)
14 days or 72 hours after symptom resolution, whichever is longer. No serial testing.
HH contacts must stay home for at least 14 days, or 7 days after case's symptom resolution, whichever is longer and presuming the HH contact remains asymptomatic.

This seems like a more reasonable time period based on the limited findings in the NEJM paper.

Tim

Subject: FL Call Follow-up

Hello Everyone,

Thank you for chatting with us today.

As I mentioned the CDC Healthcare Infection Control can be reached for further TA viaeocevent141@cdc.gov or via phone at 404-414-8385

I think your biggest challenge is going to be figuring out the contracted staff and how they have interacted with other facilities. It would be reasonable to apply many of the below listed concepts to other at risk facilities based upon how these staff moved to detect cases earlier among residents and staff. If helpful someone from our team developed a rapid facility phone assessment which could be deployed (attached).

Here are some good links:
LTC guidance which can apply to AL: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/prevent-spread-in-long-term-care-facilities.html
General IPC guidance: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
Criteria for return to work for HCP (healthcare personnel):https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/hcp-return-work.html

Please remember many of the docs I have attached are not CDC cleared. Some were created as tools by our field team or by other jurisdictions so feel free to modify to your own needs.

A couple important points and lessons learned from other states:

AMERICAN OVERSIGHT

1. Ensure a good active monitoring system for residents (at least once a day although more often if possible). They should be mindful (as you know) the elderly may present in other and potentially less dramatic fashion especially if they have baseline lung disease. I have attached a symptom/temp checking that we created for HCP but could be modified for use with residents.
2. Likewise a good monitoring system for all HCP is key. They should be self-monitoring with delegation (i.e., they know who to call with symptoms) when at home and then have a symptom/temp check before starting their shift. This pre-shift check could happen upon facility arrival or via something like facetime before leaving for work. Just make sure they take their temp and show while on facetime.
3. Implement universal masking for HCP while in the facility. Attached is a PPE strategy for LTC which accounts for shortages in gowns and extend use of masks and eye protection. In addition, I have attached some docs about general PPE for all HCF which we do expect to be posted to the web soon.
4. Ideally gowns, gloves, mask/respirator, eye should be used for all cases, PUIs, and anyone with unknown respiratory illness. Again may need to refer to the PPE strategy doc if not doable. NTEC has a good video that helps with donning and doffing: https://repository.netecweb.org/items/show/688
5. Restrict visitors. Any visitor that must enter should have symptom/temp check, masked, and controlled movement in and out of resident rooms. I have attached an example letter to families that can be modified.
6. Restrict resident movements, no congregate settings.
7. I have attached some cleaning consideration as well to include the use of nursing/CNAs to wipe high touch surfaces for cases or PUIs instead of EVS.
8. I have also attached a line list if you want it.
9. Contact tracing and risk assessment is not practical in this setting and ideally time should be spent in the above activities plus IPC. We understand that work restricting staff may shutter the entire facility and thus the emphasis of the good monitoring of HCP. We discuss this in the new risk assessment at the very bottom of the page:https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html
10. You and other PH staff should be wearing a facemask when you enter the facility and institute self-monitoring as well.

Please feel free to reach out with questions.

Best,
Elizabeth and Nicola

Coronavirus (COVID-19) Protocol 3.12.20[2].pdf
Pinellas Action Steps.docx

Dr. Rivkees, Samantha, please forgive my informality, but I wanted to get this to you as soon as possible.

I wanted to pass along to you a working example of what the FQHCs have in place for response to COVID-19 "on-the-ground" protocols. Attached are protocols that are in operation at one center, but it gives you the idea as to how our centers are focused. Also, a document with the action steps this FQHC has taken will provide you with an idea of the level of internal and external engagement our centers are at.

Given the extraordinary circumstances surrounding this particular issue, we have run through most supplies necessary for assuring staff and patient safety. I am asking for assistance in moving our needs for PPE and test kits towards the top of the requests. PPE, more critical. As of today, I've have calls from centers, with these protocols in place, and health departments telling people who are calling them to report to an FQHC. We certainly want to be able to handle the influx of patients, but we must have these two items in order to keep people calm and get them tested. In limited places we are working to get the testing kits from LabCorp, Quest, I have been told. But not very many locations. With over 600 sites across the state, it is a real problem to hear about people being told to come to the health center only to find they cannot provide the testing because they can't get PPE or kits.. The protocols attached clearly indicate the expectation of having the resources.

We all appreciate the efforts you are making. True leadership is finding and using all assets available and that is certainly what you are doing. FACHC believes strongly that the approach the state is taking is the right one. We are at a place though where we are only being held back by something out of our control.

Thank you.
Andy

Good morning Dr. Roberson,

In our meeting earlier this week, you indicated that the state lab in Jacksonville could handle any COVID-19 testing needs we might have from our University Health Center. I have copied our Health Center Director, Dr. Amy Magnuson. Please let us know the appropriate protocol to get future specimens to Jacksonville for testing.

Thank you in advance,
Renisha Gibbs

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 15 new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

These 15 new positive cases were tested in Florida Department of Health labs. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Cases

- A 73-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 74-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 50-year old male New York resident who is currently in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 70-year old male Massachusetts resident in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 24-year old female in Alachua County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 70-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 83-year old male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 57-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 28-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 25-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case.
- A 20-year old female Texas resident in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 68-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This case is associated with Port Everglades.
- A 36-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until

AMERICAN OVERSIGHT

cleared by public health officials. This is a travel-related case.

- A 49-year old female Hillsborough County resident has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with travel to Europe.
- A 77-year old male in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

COVID-19 Cases

AMERICAN OVERSIGHT

chart

chart

AMERICAN OVERSIGHT

* The Department of Health will confirm cases reported by commercial labs.

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your

AMERICAN OVERSIGHT

nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 15 new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

These 15 new positive cases were tested in Florida Department of Health labs. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Cases

- A 73-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 74-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 50-year old male New York resident who is currently in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 70-year old male Massachusetts resident in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 24-year old female in Alachua County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 70-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 83-year old male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 57-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

COVID-19 Cases

chart

chart

AMERICAN OVERSIGHT

* The Department of Health will confirm cases reported by commercial labs.

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your

AMERICAN OVERSIGHT

nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Date: Sunday, March 15, 2020 9:34:42 AM

FYI, I shared this email with our hospital and ID leadership this AM. Discussed with Carina and am copying her.

We plan to get out email to nursing homes/ALF/communal living to screen all staff/contractors for respiratory illness, international or cruise ship travel and also travel to the three states below in last 14 days and to exclude staff/contractors from working in facility or serving clients in their homes who have had such travel or symptoms. We are planning a call with these partners again on Tuesday. Of course by that time this guidance may need to be updated! Everything moving fast.

It is imperative to protect the most vulnerable among us. I had sent a press release on Friday to alert elders who receive home health care in their homes about who should be excluded from their homes but know I can't for these 3 US states at this time.

Good luck

Subject: FW: Florida Department of Health Announces New Positive COVID-19 Cases in Florida

Hospital and Infectious Diseases Leadership

37 new cases since yesterday, although FLHealth lists 106 total. For many epidemiology investigation ongoing. Cases now in Duval, St. Johns, and Clay (NE Florida). Large increase in cases in SE FL, especially Broward County.

CDC Travel Guidance for 3/15/2020 –

Level 3 Countries – Widespread – Travelers recommended to avoid ALL non-essential travel
China, Iran, and most of Europe (which also include entry restrictions to US)
South Korea

Level 2 Countries – All other countries. Sustained community spread globally – CDC recommends older adults (60 and older) and people of any age with serious chronic medical conditions at increased risk for severe disease consider postponing nonessential travel.

The Federal Government and CDC has not designated any US hotspots. But this is situational awareness of what is going on in three critical states.
As of March 14, 8PM ET: New York has 613 cases with 269 in NYC and 178 in Westchester County. Greater than 10 cases each in Nassau, Suffolk, Rockland counties.
As of March 14, 2:45 PM PT: Washington State has 642 cases with 387 in King County and 154 in Snohomish County. Greater than 10 cases in Pierce County.
As of March 13, 2020 8 AM PT: California has 247 cases. On the CA Public Health website, community transmission is occurring in Yolo, Sacramento, Solano, Contra Costa, San Francisco, San Mateo, Santa Clara, and Riverside counties.

While there is no recommended yet on travel from within the US, consider broadening your travel questioning for testing older adults and people of any age with serious chronic medical conditions who have traveled to US hotspots in past 14 days. Consider trying to ascertain if any nursing home patient presenting to ED has had any visitors or staff at the facility who have cared for them and traveled to these US hotspots in past 14 days.

Please make sure that your staff DO NOT come to work with any respiratory illness! Important to emphasize to staff how critical it is to NOT come to work sick.

Thanks for your support.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 39 new positive cases of coronavirus disease (COVID-19). Earlier today, the Florida Department of Health confirmed the death of a 77-year old male in Lee County who had previously tested positive for COVID-19. Yesterday, Governor Ron DeSantis sent a letter to Health and Human Services requesting the release of 61 Florida residents from Georgia, many of whom are elderly, who were previously aboard the Grand Princess voyage outside of California.

To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 55-year old female in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 79-year old female from Connecticut has tested positive for COVID-19 in Baker County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 72-year old female in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old female in Citrus County has tested positive for COVID-10. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 64-year old female in St. Johns County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 71-year old male in Volusia County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 70-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 47-year old male in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 67-year old male in Pasco County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 32-year old female in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 17-year old male from Cuba has tested positive in Hillsborough County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 28-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 58-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including over 10 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified multiple, positive COVID-19 cases that are connected and associated with Port Everglades in Broward County, Florida.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

- The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

AMERICAN OVERSIGHT

- Governor DeSantis requested that Health and Human Services send home the 61 Floridians that were previously aboard the Grand Princess cruise line, home from isolation from Dobbins Air Reserve Base, Georgia.
- Governor DeSantis has directed the Department of Health to hire additional epidemiologists from university health programs to help with workload.
- Governor DeSantis has directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and ALF licenses for 90 days to remove distraction from patient care.
- Governor DeSantis directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes to all visitors for the next 30 days.
- Governor DeSantis directed the Department of Highway Safety and Motor Vehicles to suspend drivers' license renewal requirements for 30 days.
- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).
- Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.
- Florida Department of Education Commissioner Richard Corcoran has provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. In addition, the Department of Education announced that the start of state testing will be delayed by a minimum of two weeks.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces One Additional Positive COVID-19 Case in Florida for March 12th

TALLAHASSEE — Tonight, the Florida Department of Health announced one additional positive case of coronavirus disease (COVID-19), bringing the total confirmed new cases for Thursday, March 12th to 17 individuals who tested positive for COVID-19. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

This latest positive COVID-19 case was tested in a Florida Department of Health lab. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Case

- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with exposure to an international traveler.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
  - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

COVID-19 Cases

chart

AMERICAN OVERSIGHT

chart

* The Department of Health will confirm cases reported by commercial labs.

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.

AMERICAN OVERSIGHT

Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Good afternoon, Susan! Jeanne Lane asked me to route this through you to review and see if there are any formatting issues that can be tightened. I apologize if you have seen some of these slides before. We have combined materials from three presentations for a webinar coming up.

I'm interested specifically in ratios of materials to white space/readability at a desktop screen, slide-to-slide element transitions, and overall theme uniformity. I appreciate any help you can offer.

Good evening Scott,

Please see the questions below from Pediatric Associates, a very large group of pediatric practices in South Florida, about the Provider Algorithm that we have shared with all of our licensed healthcare providers along with the guidance we have been providing on an ongoing basis. They have asked for clarification of the algorithm and answers to their other questions before a media interview tomorrow. With regard to his need for swabs and PPE, that can be requested through the resource request process through the Health Care Coalition that was released today. I spoke to Carina and she said you would be the best person to call their CEO C. Rocky Slonaker, MD, CPCO, FAAP Chief Medical Officer / Corporate Compliance Officer and address his concerns. His contact information is below. Thank you so much.

Meredith, Please pass these questions along to Renee:

Algorithm Sent on 3/10:

It is suggest that patients meeting criteria A-D be referred to the Health Dept. When we refer those patients, only a portion is being tested (most are not in our limited experience). I called the nurses myself and they stated they are only testing patients:

1. With Symptoms and Close Contact COVID-19

or

2. With Symptoms and Travel to affected geographic area

She said they are not testing same gathering (not close contact); not testing on a cruise ship with a positive case, not testing anyone who is NOT symptomatic. MUST HAVE SYMPTOMS ALWAYS

The algorithm suggests community contact with COVID-19 and symptoms, or > 65, chronic medical condition, or immunocompromised AND symptoms: Come to office and consider testing at commercial lab.

Patients and media have picked up on this. Those last two categories are problematic depending on how you define "Confirmed" COVID-19 and how you define Chronic Medical Condition.

Questions:

1. What is the definition of "PART OF AN OUTBREAK OF SUSPECTED COVID-19" as you define it to test it?
   a. Is a princess cruise contact part of an outbreak?
   b. Is returned from Westchester, NY prior to quarantine part of a suspected outbreak?
      i. We need to understand so we don't send someone to the CHD only to have them referred back to us.
2. Fever: Is it truly allowed to be subjective?
   a. This is very common in PEDS
3. Confirmed Case: Is this based on the parent/patients description or would the CHD validate for us?

4. Quest has 5 swabs per office / LabCorp has 3 swabs per office and cannot tell us how often they will replenish.

AMERICAN OVERSIGHT

a. Any advice on who we test since the CHRONIC MEDICAL CONDITION and/or allowing a non-validated report of CONFIRMED CASE ? is about 15-20% of our sick visits right now. I would literally use all 5 swabs within 2-3 hours of one morning.
b. Any better definition of CHRONIC MEDICAL CONDITION
i. We have seen the CDC use SEVERE UNDERLYING HEALTH CONDITION but don't want to create a sub-algorithm.
5. Assuming we get more SWABS at some point, but we are running out of PPE and already do not have enough N-95:
a. You agree we cannot perform the high risk procedure of testing if we have no one fit tested for N-95?

The local hospitals are testing, but they are saying only inpatient or severely compromised coming through the ER. We do not have enough supplies to possibly test everyone who meets the algorithm criteria.
Will you be providing a more detailed algorithm given the allocation challenges with SWABS and PPE ? or do you expect clinicians to create their own algorithm when supplies are limited?

Thank you ? Sincerely ? for taking the time to answer as I have 200+ clinicians who are very frustrated that so many patients identify as qualifying, there isn't enough tests, there isn't enough N-95, and the algorithm is so non-specific as it relates to Pediatrics. We are struggling with guiding them on who to triage further and who to choose to test.

Good morning, Team,

FYI: I'm sharing a news story and social media post by Volusia County's sheriff. This action could affect your counties if your sheriffs follow suit. DOH Comms/ESF14 has been advised.

We did not know about this in advance but assume the info was gleaned from the EMS system.

This is the only info I have. I wanted to provide it to you to give you prep time, etc.

Regards,

Here's the Sheriff's personal Facebook page that releases this letter:

Subject: Home COVID-19 testing and isolation support

Traditionally individuals suffering from flu or cold symptoms have been encouraged to visit retail health clinics, urgent care centers, their personal physician, a free clinic, their nursing home health provider, or other health care practitioner.

AMERICAN OVERSIGHT

With COVID-19, the objective becomes remote diagnosis and isolation support to avoid further transmission to other individuals in these care locations.

To improve virus containment efforts in Florida, Spectrum Medical Partners (SMP) and the Health Council of East Central Florida have accelerated a planned joint venture to team trained paramedics conducting on-site screening with physicians skilled in telemedicine and the use of advanced new technology in population care, surveillance, and risk mitigation.

Community paramedics will be available to conduct home screening in line with the Florida Department of Health enhanced surveillance and preparedness procedure.

Spectrum Medical Partners' unique new telemedicine system will allow statewide access to more than 80 nurses and 250 physicians including internists, infectious disease doctors, physiatrists, and psychologists.

Individual quarantine

When an individual enters self-quarantine, regular outreach will be established and maintained. Using the SMP IMED app, the individual in quarantine will have 24/7 access to telemedicine with medical and psychological support and counseling. Remote physiological monitoring with alerts and escalation capabilities will identify the need for a virtual provider or in-person paramedic visit. Daily nurse check-ins for monitoring temperature, oxygen, pulse, and patient reassurance will be provided. Three-way video conferencing will connect the patient with family, the local health department, and the SMP physician. If quarantine is broken, this technology can notify authorities based on community and state specific protocols.

Nursing home safety

The same technology will support nursing home safety. An electronic survey will be required for staff and visitor access. Video access screening by a trained nurse creates a uniform process that also will enable real-time tracking through centralized data for epidemiological usage in case of infections. Nursing home staff training and support will be provided.

School safety

Similarly, training in disease management and 24/7 access to a medical professional will be available to school staff members.

Spectrum Medical Partners

Spectrum Medical Partners is a leading provider in hospital medicine and post-acute services. The company utilizes over 400 medical doctors and nurse practitioners serving patients in area hospitals in the Central Florida and West Florida markets and over 70 skilled nursing facilities and other post-acute settings. Spectrum Medical Partners' growth has been driven by its mission of being a leader in provider support to value-based care partners throughout the health care continuum.

AMERICAN OVERSIGHT

Health Council of East Central Florida

The Health Council of East Central Florida, Inc. is a private, non-profit health care planning organization providing research, program development, and evaluation services that enable community-based health organizations to improve population health.

Subject: IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

AMERICAN OVERSIGHT

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have

AMERICAN OVERSIGHT

questions, please call John Apthorp at (850) 922-1274.

President Donald J. Trump Has Taken Unprecedented Steps to Respond to The Coronavirus and Protect the Health and Safety Of Americans
"Together we are putting into policy a plan to prevent, detect, treat and create a vaccine against coronavirus to save lives in America and the world. America will get it done!" – President Donald J. Trump

President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf: "Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus. In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

RESTRICTING TRAVEL FROM IMPACTED AREAS: President Donald J. Trump is taking further action to curb the spread of the coronavirus to the

AMERICAN OVERSIGHT

United States from other countries.

- President Trump is issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries.
  - Section 212(f) of the INA only applies to the movement of human beings, not goods or cargo.
- The restriction applies to foreign nationals who have been in the Schengen Area, 26 countries in Europe with open borders agreements, in the last 14 days.
- Those who are exempt from these restrictions, such as American citizens, will be directed to a limited number of airports where screening can take place.
- There is extensive travel back and forth between Europe that heightens the risk here in the United States.

LOOKING OUT FOR AMERICAN BUSINESSES AND WORKERS: President Donald J. Trump is committed to protecting American businesses and workers from the impacts of coronavirus.

- The President is announcing an economic assistance package to help support businesses and workers who have been harmed by this outbreak.
- President Trump has instructed the Small Business Administration (SBA) to exercise available authority to provide loans to businesses affected by the coronavirus.
  - These loans will help overcome disruptions caused by the coronavirus.
  - The President is calling on Congress to increase funding for this program by an additional $50 billion.
- The President will be instructing the Department of the Treasury to defer tax payments for certain individuals and businesses negatively impacted by the coronavirus.
  - This action will provide more than $200 billion of additional liquidity to the economy.
- President Trump is calling on Congress to immediately pass payroll tax relief.
- The President announced that he will soon be taking emergency action to provide financial relief for workers who are ill, quarantined, or caring for others due to the coronavirus.
  - The President also called on Congress to take action to extend this relief for workers.

LEADING AN AGGRESSIVE, WHOLE-OF-GOVERNMENT APPROACH: President Trump has taken unprecedented steps to protect the health of Americans in response to the coronavirus.

- The President is leveraging all of our resources to respond to the coronavirus, bringing together government and private industry in a collaborative response.
- The Trump Administration declared a public health emergency in January to bolster response efforts.
- President Trump took early action to help curb the spread of the virus from other countries to the United States, providing important time for response and preparations.
  - In January, President Trump acted quickly to restrict travel from foreign nationals traveling from China.
  - In February, the President restricted travel for individuals recently traveling from Iran.
  - The Administration put into place mandatory screening for all travelers coming into the country from Italy and South Korea.
  - Travel advisories for severely impacted areas like Italy and South Korea have been raised to their highest level.

AMERICAN OVERSIGHT

- Today, the President directed his Administration to make general-use face masks available to our healthcare workers.
  - The Administration's actions will help make millions of general-use respirators available to keep healthcare workers safe and mitigate transmission of the virus.
- President Trump signed into law more than $8 billion to fund response efforts.
- The Administration has taken bold steps to incentivize the development of therapeutics and vaccines to treat and prevent the spread of the coronavirus.
- Working across the public and private sectors, the Trump Administration continues to drastically expand testing capacity.
  - More than 1 million tests have been distributed nationwide, with another 4 million tests being shipped out by the end of the week.
  - Testing is now available in every State lab in the country and commercial labs are now deploying tests, which will help generate a dramatic increase in availability.
- The Trump Administration has released guidance on how to keep businesses, schools, community gathering places, and families safe.
  - From the start, President Trump has made keeping the public informed a top priority.
- The Administration has announced that health plans with health savings accounts will be able to cover coronavirus testing and treatment without co-payments.

ICYMI | Vice President Pence Discusses the Coronavirus Response on the Morning Shows

Earlier this morning, Vice President Pence joined Good Morning America, The Today Show, Fox & Friends, New Day, and CBS This Morning to discuss the steps that this administration is taking to combat the coronavirus.

ON ABC's GOOD MORNING AMERICA

WATCH HERE.

From very early on, President Trump took decisive action to put the health of the American people first.

AMERICAN OVERSIGHT

"We all have known from the beginning that the coronavirus would continue to spread across this country, and it's one of the reasons why, from very early on, President Trump took decisive action to put the health of the American people first, not only declaring a public health emergency in January, but in that same month he suspended all travel from China -- an unprecedented move -- and quarantined Americans that were returning from the region. Since that time, George, we've -- we've issued travel advisories for areas of South Korea, Italy; screened all persons coming on direct flights. But, frankly, as we watched the epicenter of the coronavirus shift from China and South Korea to Europe, the President thought it was proper for us to impose a 30-day suspension on all travel from continental Europe."

The President, again, made another unprecedented decision in suspending all travel from Europe, because we want to stop the flow of people bringing the coronavirus here.

"The reality is that, really, just two weeks ago, in Italy, there were less than 500 cases and now there's 12,000 cases in Italy, George. We have tens of thousands of people that travel to the United States from Europe every day. Seventy percent of new cases in the world were in Europe. And when we looked yesterday at the -- what was then the 35 states where we had cases, about 30 of them could be traced to contacts with Europe. And so the President, again, made another unprecedented decision in suspending all travel from Europe, because we essentially want -- we essentially want to stop the flow of people bringing the coronavirus here, but then continuing to surge resources, particularly into California, Washington State, New York, and other communities where we've seen community spread. It's a combination of efforts that's being driven by the top health experts in the world on our task force. But the President -- the President showed again yesterday a willingness to take decisive action on multiple levels to protect the American people."

We want to send a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus, you should not be worried about the cost of testing or treatment.

"We're making steady progress. We're going to continue to make a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus or you have symptoms, we don't want people to be worried about the cost of testing, to be worried about the cost of treatment... As the President made clear last night, we're working with Congress and exploring actions the President can take to make sure that hourly wage earners know that you can stay home without risking losing a paycheck or losing your job if you feel if you feel that you've been exposed to the coronavirus."

ON NBC's TODAY SHOW

AMERICAN OVERSIGHT

WATCH HERE.

From early on in this effort, we have addressed the testing issue. We made changes through the FDA that allowed for state labs and hospitals to engage in testing.

> "From early on in this effort we've been addressing the testing issue. We made changes through the FDA that allowed for state labs and university hospitals and hospitals to engage in testing. And I'm pleased to report every state lab in America can do testing now. Many university laboratories are doing it. Washington State – the University of Washington is doing extraordinary work. but we are literally working hour by hour to expand the testing and we think the key Savannah is going to be what we call commercial laboratories like LabCorp and Quest who are already spinning up production at the president's direction last week on tests that can be available on a broad basis in the days ahead for the American people. we're making real progress but rest assured we're going to continue to drive forward."

The American people should know that President Trump has no higher priority than the health, safety and well-being of the American people.

> "The American people should know that President Trump has no higher priority than the health and safety and wellbeing of the people in this country. You can go to coronavirus.gov right now to find out what every American can do to keep yourself, your family, your workplace and your school safe. But you can rest assured we're going to focus on communities where we've had community spread, and the President's action yesterday suspending travel from Europe is one more example of how he's putting the health of America first."

ON FOX NEWS' FOX & FRIENDS

AMERICAN OVERSIGHT

WATCH HERE AND HERE.

The President has called this a whole-of-government approach, but he has also called this is a whole-of-America approach.

> "The President, you know, he said this was a whole-of-government approach but he also said this is a whole-of-America approach. So he's brought in business leaders from nursing homes; yesterday, banking; hospitals, and the rest. But one of the things we did that's most important on testing was the President brought in the leaders of the top commercial laboratories in the country who, as we speak, have already approved a test that is being spun up. It's being sent out to market. Quest, LabCorp, the largest commercial laboratories in the country, are working very closely with our administration. We're clearing the red tape out of the way. That's going to be the way that, in the days ahead, we're going to -- we're going to have broad-based testing available all across the country."

We are working together to contain the spread of the coronavirus. And we will get through this.

> "Our goal, as the coronavirus spreads in this country -- and the vast majority who would contract it will have flu-like symptoms and recover. Our goal nonetheless is to hold down that overall number as much as possible. And we will do that with the continuing cooperation of American families, schools, businesses, and states. And that's the vision President Trump has. All of us working together will get through this."

We are focusing on supporting efforts at the state and local level in Washington State, and in California. CDC issued strong guidelines for those communities about public activities, large gatherings and at schools. We will continue simply to follow the data on this.

> "Make no mistake about it: We are also focusing on supporting efforts at the state and local level in California, in Washington State, and in California. CDC issued very strong guidelines for those communities about public activities, large gatherings, schools. And we'll continue simply to follow the data on this and make strong recommendations where we have what's known as "community spread. But for every American, right now, as the President said last night, it's a good time to use

AMERICAN OVERSIGHT

common sense. Wash your hands often. Clean, you know, often-used surfaces. All that information is available at Coronavirus.gov. So we're going to try and mitigate the spread in this country but also prevent, through the President's decisive action last night, people from bringing the coronavirus into the United States any further from Europe."

We are encouraging best practices for every American. We are focusing on communities where we have community spread.

"I want to say to your viewers, just as the President said last night, the risk to the average American of contracting the coronavirus remains low, but we do know that seniors with serious underlying chronic health conditions are particularly vulnerable to very serious outcomes. And so we're encouraging best practices for every American. We're focusing on communities where we have community spread."

Those with a family member who is a senior citizen should support them in engaging in good hygiene and good health practices.

"For any American that's watching today that has a family member or a loved one who's a senior citizen with a serious underlying health condition, this is a very good time to help and to support them to be able to avoid public places, and everyone around them to engage in good hygiene and good practices to protect those that are most vulnerable."

ON CNN's NEW DAY

WATCH HERE AND HERE.

We have been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear.

"We're not doing a travel ban as our strategy. The suspending all travel for 30 days from Europe is a part of the strategy. The other part is an aggressive mitigation strategy. I spoke to the governors of New York, Washington State, and California tomorrow -- or yesterday. CDC issued strong guidance to those areas where we have community spread. We've flowed resources. We've flowed support to those areas. And so it's a combination of strategies that the President has employed here. As he says, it's "all hands on deck," "a whole-of-government approach," but it's also a

AMERICAN OVERSIGHT

whole-of-America approach. We've literally been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear."

Any American who is concerned about being exposed to the coronavirus, should call their doctor and get tested.

"Anyone who's looking on today who might be concerned that they were exposed to coronavirus or have symptoms should call their doctor. Their doctor, with any question, can call their state laboratory and be able to find out how they can have a test processed."

We are making steady progress. We don't want anybody to avoid having a test because they are concerned financially.

"But make no mistake about it: We're making steady progress. We've made changes at the FDA in January, at the President's direction. And the American people can be confident we're going to continue to roll out the test. And maybe most significant on that score is that the President brought health insurance companies in last week and they all agreed to waive the co-pays on testing. We expanded testing to Medicare and Medicaid patients. And we also expanded coverage for treatment, and health insurance companies expanded coverage for treatment. We don't want anybody to avoid having a test because they're concerned financially."

The risk to the average American remains low.

"I want people to know that the risk to contracting the coronavirus, according to all of our experts, for the average American remains low. Most people that contract it, will have flu-like symptoms and recover."

ON CBS This Morning

WATCH HERE.

We are going to continue to put in every effort in place to protect the health and safety of the American people.

"The President took the unprecedented step of suspending all travel from China which was the originating country of this virus. We also established travel

AMERICAN OVERSIGHT

advisories, and we've been screening passengers on all direct flights from South Korea and Italy. But with the epicenter of this epidemic now moving from China and South Korea to Europe, yesterday the President again took the unprecedented step of suspending all travel from Europe for the next 30 days, and that in combination with our strong mitigation efforts in communities that are experiencing what our experts call community spread, areas of California, Washington State, and New York, we're going to continue to put every effort at home and with regard to these travel restrictions in place to protect the health and safety of the American people."

In the days ahead, we are going to continue to see the availability of tests at your local doctor and your local pharmacy expand.

"Testing is happening in every state lab in the country. Many university hospitals have taken the FDA test, like the University of Washington, is doing a great job expanding testing capabilities. But the biggest piece on the testing is that our commercial labs that the President brought in last week, companies like Quest and LabCorp, have already had approved a new test that they several days ago had begun to take to market which they can do in a vast and expansive way across the country. And literally in the days ahead, we're going to continue to see the availability of tests at your local doctor, ultimately at your local pharmacy, continue to expand."

When President Trump learned that 70% of the new cases this week, around the world, were in Europe, he took decisive action to protect the American people.

"Make no mistake about it: All the new cases in the world, this week, 70% of the new cases were in Europe. And the increase has been dramatic. When the President imposed the travel advisory and we began screening all flights, all passengers coming into the United States from Italy two weeks ago, there were roughly 500 coronavirus cases. Now there's 12,000, about 1,000 in Germany, about 1,000 in France. That's the reason why the President essentially said full stop, we're going to suspend all travel, and that American citizens coming home and legal residents will be funneled through 13 different airports. They'll get an initial health screening coming in. But we're going to ask everyone returning to our country to self-quarantine for 14 days."

New coronavirus stable for hours on surfaces

SARS-CoV-2 stability similar to original SARS virus.

This scanning electron microscope image shows SARS-CoV-2 (yellow)-also known as 2019-nCoV, the virus that causes COVID-19-isolated from a patient in the U.S., emerging from the surface of cells (blue/pink) cultured in the lab.*NIAID-RML*

What

The virus that causes coronavirus disease 2019 (COVID-19) is stable for several hours to days in aerosols and on surfaces, according to a new study from National Institutes of Health, CDC, UCLA and Princeton University scientists in *The New England Journal of Medicine*. The scientists found that severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) was detectable in aerosols for up to three hours, up to four hours on copper, up to 24 hours on cardboard and up to two to three days on plastic and stainless steel. The results provide key information about the stability of SARS-CoV-2, which causes COVID-19 disease, and suggests that people may acquire the virus through the air and after touching contaminated objects. The study information was widely shared during the past two weeks after the researchers placed the contents on a preprint server to quickly share their data with colleagues.

The NIH scientists, from the National Institute of Allergy and Infectious Diseases' Montana facility at Rocky Mountain Laboratories, compared how the environment

AMERICAN OVERSIGHT

affects SARS-CoV-2 and SARS-CoV-1, which causes SARS. SARS-CoV-1, like its successor now circulating across the globe, emerged from China and infected more than 8,000 people in 2002 and 2003. SARS-CoV-1 was eradicated by intensive contact tracing and case isolation measures and no cases have been detected since 2004. SARS-CoV-1 is the human coronavirus most closely related to SARS-CoV-2. In the stability study the two viruses behaved similarly, which unfortunately fails to explain why COVID-19 has become a much larger outbreak.

The NIH study attempted to mimic virus being deposited from an infected person onto everyday surfaces in a household or hospital setting, such as through coughing or touching objects. The scientists then investigated how long the virus remained infectious on these surfaces.

The scientists highlighted additional observations from their study:

- If the viability of the two coronaviruses is similar, why is SARS-CoV-2 resulting in more cases? Emerging evidence suggests that people infected with SARS-CoV-2 might be spreading virus without recognizing, or prior to recognizing, symptoms. This would make disease control measures that were effective against SARS-CoV-1 less effective against its successor.
- In contrast to SARS-CoV-1, most secondary cases of virus transmission of SARS-CoV-2 appear to be occurring in community settings rather than healthcare settings. However, healthcare settings are also vulnerable to the introduction and spread of SARS-CoV-2, and the stability of SARS-CoV-2 in aerosols and on surfaces likely contributes to transmission of the virus in healthcare settings.

The findings affirm the guidance from public health professionals to use precautions similar to those for influenza and other respiratory viruses to prevent the spread of SARS-CoV-2:

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

Dear NPHIC Members:
Attached please find the CDC COVID-19 daily key points for Tuesday, March 10, 2020. These are cleared to share with your staff and other partners. Note, the attached are for internal use and not to be posted on public websites.

We've also added more resources to the NPHIC Coronavirus webpage. Below are some of the recent NPHIC member shared COVID-19 communication documents:

- **Guidance for Dental Offices** (Rhode Island Dept. of Health)
- **Guidance for Athletic Administrators and Coaches** (Rhode Island Dept. of Health)
- **Snohmish Health District** (WA) has offered their materials – they've a lot of materials on their website at www.snohd.org/ncov2019. NPHIC members can feel free to use/share as needed. They also have posters that they created in multiple languages that NPHIC members can modify to add their logo and add "adapted from the Snohomish Health District" at the bottom. Just email communications@snohd.org for those files.
    - https://www.snohd.org/DocumentCenter/View/3363 - for businesses
    - https://www.snohd.org/DocumentCenter/View/3349 - for schools & childcare

NPHIC member request for resources - If anyone has any of these resources noted below, if you

AMERICAN OVERSIGHT

can please send to me, I will add to our resources:

Does anyone have:

- NPHIC members who may be working to create **guidance and messaging geared towards farmworkers** who live in group housing
- Has anyone **created videos or social graphics that have taken a lighthearted approach to alternate ways to greet people** instead of hugs/handshakes?
- Alternately, has anyone created signage for public facing staff that says – we love our customers, but prefer not to shake hands to reduce the spread of germs (or something like that)?

Thank you!!!

Subject: MS Oceania Riviera Medical Log Review - Due in Port 3/16

Good evening,

We have reviewed the Medical information provided for three Voyages of the **MS Oceania Riviera**. We did not receive the complete logs, but received 'Maritime Conveyance Cumulative Influenza/Influenza-Like Illness (ILI) Form'.

Voyage A: 2/14-2/26; Guests 1208, Crew 774; ILI reported in 1 passenger;

Voyage B: 2/26-3/11; Guests 1177; Crew 775; No ILI reported; Passenger medivac'd off ship to St John USVI on 3/9; specimen COVID-19 positive reported out 3/15 by CDC lab;

Voyage C: 3/11 – 3/16; Guests 470; Crew 776; No ILI reported; ship doctor reported no passengers or crew were quarantined.

ILI incidence did not exceed the outbreak threshold on either of the three voyages.

On Detail to COVID-19 Response

Paul,

AMERICAN OVERSIGHT

Please see below summary of available to me information on three voyages for MS Oceania Riviera (only Maritime conveyance forms were received for each of the voyages). I did not receive actual medical logs.
Voyage A (2/14-2/26) had 1 pax with ILI.
Voyage B (2/26-3/11) had no reported ILI.
Voyage C (3/11-3/16) doctor reported that no patient was in isolation/ quarantine during this current voyage.
Thank you,
Katya

EXTERNAL EMAIL

Good evening Oceania Riviera Doctor,

Please send a copy of your medical/influenza-like illness logs for the past two voyages to the CDC Quarantine Station at QS-Miami@cdc.gov as soon as possible.

Our medical officer is also asking if you have done any isolation/quarantine of crew or passengers during this current voyage.

We need this information as soon as possible.

Dear NPHIC Members:

Media Statement

For Immediate Release
Wednesday, February 26, 2020

Contact: CDC Media Relations
(404) 639-3286

CDC Confirms Possible Instance of Community Spread of COVID-19 in U.S.

The Centers for Disease Control and Prevention (CDC) has confirmed an infection with the virus that causes COVID-19 in California in a person who reportedly did not have relevant travel history or exposure to another known patient with COVID-19.

At this time, the patient's exposure is unknown. It's possible this could be an instance of community spread of COVID-19, which would be the first time this has happened in the United States. Community spread means spread of an illness for which the source of infection is unknown. It's also possible, however, that the patient may have been exposed to a returned traveler who was infected.

This case was detected through the U.S. public health system — picked up by astute clinicians. This brings the total number of COVID-19 cases in the United States to 15.

The federal government has been working closely with state, local, tribal, and territorial partners, as well as public health partners, to respond to this public health threat. Unprecedented, aggressive efforts have been taken to contain the spread and mitigate the impact of this virus.

This is a rapidly evolving situation. CDC will continue to update the public as circumstances warrant. For more information about COVID-19 visit www.cdc.gov/covid19.

More on chloroquine for sharing with Dr. Lanza and Tallahassee. Chloroquine was the stuff I was taking in India and Bhutan in '83 to keep from getting malaria. Alas, I happened to be traveling through one of the few parts of the world at that time where the strain of malaria was chloroquine resistant. So endeth my days a blood donor.

To: Wesley Farr <wfarr@uwf.edu>
Cc: Lanza, John J <JohnJ.Lanza@flhealth.gov>
Subject: Re: NSF RAPID proposal

Dear Dr. Lanza,

We are writing a proposal to the National Science Foundation on reducing the risk of COVID-19 transmission in crowded locations. I have attached a 1-page summary. I was wondering if you can provide a letter of collaboration for it. The text of the letter, in the NSF template would be along the following lines, addressed to "National Science Foundation":

"If the proposal submitted by Dr. Ashok Srinivasan entitled "Collaborative:RAPID:Leveraging New Data Sources to Analyze the Risk of COVID-19 in Crowded Locations" is selected for funding by NSF, it is my intent to collaborate and/or commit resources as detailed in the Project Description or the Facilities, Equipment or Other Resources section of the proposal."

In the facilities document, I would write:

"Dr. John Lanza is Director of the Escambia County Health Department. He will provide input and

AMERICAN OVERSIGHT

feedback on the practicality of ideas that we analyze for decreasing epidemic risk."

Please feel free to edit the text above. Thanks.

Let us say we get snapshots of the videos at high risk locations. Can we get an undergraduate student to manually note these characteristics? Would this work? I guess we would also need to apply for IRB for that. Purdue has done an IRB at their end. We could do something similar.

Subject: FW: COVID-19 update - 15 new positive cases announced

AMERICAN OVERSIGHT

I have no idea who our case is, there is nothing in Merlin, we have no 49/F PUIs. Can you figure that out this morning?

From: Watler, Kevin <Kevin.Watler@flhealth.gov>
Sent: Thursday, March 12, 2020 10:56 PM
Subject: COVID-19 update - 15 new positive cases announced

This information is the latest COVID-19 update as of 10:45 p.m. March 12, 2020

The Florida Department of Health has announced 15 new positive cases of coronavirus disease (COVID-19) in Florida. One of them is a Hillsborough County resident.

These 15 new positive cases were tested in Florida Department of Health labs. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Cases

- A 73-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 74-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 50-year old male New York resident who is currently in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 70-year old male Massachusetts resident in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 24-year old female in Alachua County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 70-year old male in Volusia County has tested positive for COVID-19. This

AMERICAN OVERSIGHT

individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.

- A 83-year old male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 57-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 28-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 25-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case.
- A 20-year old female Texas resident in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 68-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This case is associated with Port Everglades.
- A 36-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- **A 49-year old female Hillsborough County resident has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with travel to Europe.**
- A 77-year old male in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

AMERICAN OVERSIGHT

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

* The Department of Health will confirm cases reported by commercial labs.

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

AMERICAN OVERSIGHT

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.

AMERICAN OVERSIGHT

- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;

AMERICAN OVERSIGHT

- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Subject: Fwd: Heads up: city locations of cases/contacts in media

Good morning,
FYI: Volusia County's sheriff unilaterally released the cities of residence of cases and close contacts that are under isolation. This likely will have statewide ramifications.

DOH-Volusia found out this morning... by reading the paper. It's likely the sheriff pulled the info from the location info provided to EMS, per state direction.

At this point I know nothing more than what's in this story but wanted the DOH Central Office team to know as quickly as possible.

Subject: Re: Orlando Sentinel reporting FDOH updated testing criteria

Dr Jean,

We were just informed of this change as non of us received it yesterday or today via DOH blast

We agree that anyone with moderate or severe symptoms needs Airborne isolation and N95 on employees in addition to PPE for COVId

The question is on low disease, asymptomatic or non admitted is it ok to proceed w droplet and contact and not All as we don't have enough ED rooms to screen patients same for outpatient clinics

The latest guidelines you provided are contradictory with the WHO and CDC.

We need your recommendations on implementation as most clinics or any clinician suspecting COvId will not be able to place patients in All

Kind Regards,

AMERICAN OVERSIGHT

Hi Dr. Jean

AMERICAN OVERSIGHT

Please see Orlando Sentinel Report about FL DOH Expanding testing criteria yesterday. Do you have that guidance as I was not able to find it on FDOH website nor I recall receiving it.

Can you please send us that document.

thanks

Ohio State Dental Board COVID-19 Advisory 2020-01, March 16, 2020 (For optimal viewing, please use a desk top screen)

The State Dental Board has been closely monitoring the spread of the coronavirus. As Dentists, Hygienists & staff we are a part of the healthcare community and have a responsibility in the prevention and mitigation efforts of the administration during this outbreak. Dentists are also in of the highest risk categories for both transmission and contraction of the Coronavirus as a majority of the procedures we perform creates significant aerosols in the operatories. As a part of the healthcare community and the community at large, we have to protect the safety of our patients and staff. The OSDB is closely monitoring the situation and decided to have these recommendations to the practicing dentists. This is a very difficult decision, but it comes at a critical time and it is our responsibility to take leadership in this situation and have protocols in place to reduce the spread and impact of Coronavirus amongst the communities we practice and live. The plan & recommendations will change as the situation demands and evolves.

These recommendations to the dental profession are intended to reduce the risk of patients' exposure to COVID-19 and to preserve PPE and supplies, while still allowing access to necessary and emergency dental services that will maintain the oral health of the citizens of Ohio and keep them out of the hospital ER.

Governor Mike DeWine contacted the Board and the Ohio Dental Association and asked for our help in addressing the spread of COVID-19. As integral parts of the medical community, we are being called to review our inventories and appointment books, and make the adjustments to provide mutual aid and relief to our partners in the medical and surgical communities.

Governor DeWine has requested the following:

A review of inventories and identification of any surplus personal protective equipment and supplies. Once

AMERICAN OVERSIGHT

identified, contact your local Emergency Management Agency about sharing these goods with local hospitals and medical clinics for COVID-19 patients and clinicians. EMA contact list can be found here: https://webeoctraining.dps.ohio.gov/ohiocountyEMADirectorList/countyemalist_web.aspx

Please reschedule elective procedures including but not limited to:

- Any cosmetic or aesthetic procedures, such as veneers, teeth bleaching, or cosmetic bonding
- All routine hygiene appointments
- Any orthodontic procedures not including those that relieve pain and infection or restore oral function or are trauma-related
- Initiation of any crowns, bridges, or dentures that do not address or prevent pain or restore normal oral functioning
- Any periodontal plastic surgery
- Extraction of asymptomatic non-carious teeth
- Recall visits for periodontally healthy patients
- Delay all appointments for high risk patients, including ASA 2 and 3 patients, unless it is an emergency

By sharing supplies we are directly supporting our fellow clinicians as they undertake the greatest viral threat in modern history. By rescheduling elective procedures we are doing our part to prevent community spread.

We urge you to undertake the two above strategies and consider the following additional measures:

o Use cell phone triage - use the cell phone to take a picture of the area and text to the dentist
o Have a detailed questionnaire/conversation before scheduling appointments and prior to any procedure about flu like symptoms, travel abroad for self and family/friends/co-workers etc. to permit a thorough evaluation of the patient
o Consider taking the temperature of the patient at the outset
o Reconsider scheduling high risk patients unless they need emergency treatment
o Careful evaluation of the need for scheduling of ASA 2 & 3 patients
o Use of 1% hydrogen peroxide rinse prior to examination of the oral cavity by the patient to reduce microbial load
o Use of rubber dam isolation & high volume suction to limit aerosol in treatment procedures
o Proper disinfection protocol between patients with a possible repeat of the protocol for a 2nd time.

<u>To prevent over-crowding of waiting areas or the possible spread of infection</u>

§ Consider having patients wait in their cars instead of the waiting areas to prevent inadvertent spread of the virus (call patient when surgical area is ready for treatment)
§ Consider staggering appointment times to reduce waiting room exposure
§ Consider rescheduling elective procedures on ASA 2 & 3 patients (https://www.asahq.org/standards-and-guidelines/asa-physical-status-classification-system)
§ Have front desk staff take measures to prevent exposure
§ Have sterilization staff, lab technicians and auxiliary staff take adequate measures to prevent exposure
§ Limit access to waiting room use to only patients. Accompanying individuals have to wait in their respective transportation.
§ Remove all magazines/toys etc from waiting area to prevent contamination.

Thank you for your understanding and cooperation as we manage through these very difficult and unprecedented times.

[As mentioned previously, this website is constantly updated as new information comes in, so it is likely that when you read this post, the numbers will not match the linked numbers because they will have been updated since the post was prepared.

According to the data on the Johns Hopkins website, the total number of cases of COVID-19 worldwide is now 119 132, with 80 954 cases reported by China. There are now a total of 38 034 confirmed cases of COVID-19 reported from 114 countries/locations outside mainland China, representing an increase of 5183 cases reported in the past 24 hours, with Italy accounting for 977 of the newly reported cases, Iran for 881 of newly reported cases, and South Korea for 277 of newly reported cases. There were 12 other countries with more than 50 newly confirmed cases in the past 24 hours were: Spain, 622; France, 575; Germany, 389; USA, 367; Norway, 195; Denmark, 172; Switzerland, 117; Sweden, 107; Japan, 70; Netherlands, 61; UK, 61; and Austria, 51. Of the 12 countries 10 are in Europe. A global total of 4284 deaths have been reported, 1126 outside mainland China.

For the 13th consecutive day, more cases have been reported from outside mainland China than within mainland China. - Mod.MPP]

[2] China: China National Health Commission 9 Mar 2020
Date: Tue 10 Mar 2020
Source: China National Health Commission [in Chinese, machine trans., edited]
<http://www.nhc.gov.cn/xcs/yqtb/202003/b4abcf83e53d4284b2981c75917385eb.shtml>

At 04:00 on [10 Mar 2020], 31 provinces (autonomous regions, municipalities) and the Xinjiang Production and Construction Corps reported 24 new confirmed cases, 22 new deaths (22 in Hubei), and 31 new suspected cases.

On the same day, 1578 cases were cured and discharged, 3235 persons were removed from close contact with medical observation, and 302 severe cases were reduced.

As of 24:00 on [10 Mar 2020], according to reports from 31 provinces (autonomous regions, municipalities) and the Xinjiang Production and Construction Corps, there were 16 145 confirmed cases (including 4492 severe cases), 61 475 cured cases, and 3158 who died. A total of 80 778 confirmed cases have been reported, and there are currently 285 suspected cases. A total of 675 886 close contacts have been tracked, and 14 607 close contacts are still in medical observation.

There were 13 new confirmed cases in Hubei (13 in Wuhan), 1471 new cases cured (1212 in Wuhan), 22 new deaths (19 in Wuhan), and 15 671 confirmed cases (14 514 in Wuhan). Among them, 4412 were severe cases (4217 in Wuhan). A total of 49 056 discharged patients were cured (33 041 in Wuhan), a total of 3046 deaths (2423 in Wuhan), and a total of 67 773 confirmed cases (49 978 in Wuhan). There were 6 new suspected cases (6 in Wuhan) and 198 suspected cases (192 in Wuhan).

At 04:00 on [10 Mar 2020], 10 newly diagnosed imported cases were reported (6 in Beijing, 2 in Shanghai, 1 in Shandong, and 1 in Gansu). As of 24:00 on [10 Mar 2020], a total of 79 imported confirmed cases were reported overseas.

A total of 177 confirmed cases were reported from Hong Kong, Macao, and Taiwan: 120 cases in the Hong Kong Special Administrative Region (65 cases discharged, 3 deaths), 10 cases in the Macau Special Administrative Region (10 cases discharged), and 47 cases in Taiwan (17 cases discharged, 1 death).

<promed@promedmail.org>

[According to the report above, a total of 80 778 cases of confirmed COVID-19 have now been reported from China, representing an increase of 24 cases in the past 24 hours, of which 13 (54.2%) were in Hubei province. It is the 4rd consecutive day that the number of newly reported cases in a 24 hour period was less than 50. As I mentioned in yesterday's post (http://promedmail.org/post/20200310.7070560), daily case counts less than 20 were last reported in mid-January 2020 when the conclusion was there still had not been person-to-person transmission identified (see Novel coronavirus (04): China (HU), Thailand ex China, WHO http://promedmail.org/post/20200114.6889527, section [3] for discussion). While there are still suspected cases reported that presumably are waiting for laboratory confirmation, fingers are crossed this adequately represents China approaching interruption of transmission of the SARS-CoV-2. In addition, 22 deaths were reported, all of them by Hubei province. Five new cases were reported from Hong Kong.

Of note is the increasing numbers of imported cases mentioned with 10 newly imported cases (6 in Beijing, 2 in Shanghai, 1 in Shandong, and 1 in Gansu), bringing the total number of imported cases to 79. If the imported cases are counted in the daily totals, then 41.7% of the newly confirmed cases mentioned in today's (10 Mar 2020) update were imported cases. A challenge will be to prevent importations from starting new chains of transmission.

[Note that the reporting interval is now midnight to midnight, presenting the full calendar day. In the past 24 hours, the tally of confirmed cases of COVID-19 in South Korea has increased by 242 cases and 6 deaths. The epicenter of this outbreak is still Daegu province with 5794 reported cases and the surrounding province of Gyeongbuk with 1135 reported cases. Provinces reporting near or more than 100 cases include Gyeonggi (175). Seoul (193), Chungnam (112), and Busan (98).

While the number of newly confirmed cases today (10 Mar 2020) is 111 more cases than reported yesterday (9 Mar 2020) when 131 new cases were reported, the numbers are still significantly less than seen earlier. What bears watching is Seoul, where the daily increase In the past 24 hours was 52 cases, representing 21.5% of the daily increase in newly confirmed cases.

B. Italy: 10 149 cases, 631 deaths
Date: Tue 10 Mar 2020
Source: Italian Government Health Ministry [in Italian, machine trans., edited]
<http://www.salute.gov.it/portale/news/p3_2_1_1_1.jsp?lingua=italiano&menu=notizie&p=dalministero&id=4192>

Cases in Italy as of 6:00 pm 10 Mar 2020

Regarding health monitoring related to the spread of the new coronavirus [SARS-CoV-2] on the national territory, there are 10 149 total cases. At the moment 8514 people are positive for the virus.

AMERICAN OVERSIGHT

1004 people have recovered. There are 5038 patients hospitalized with symptoms, 877 in intensive care, and 2599 are in home isolation.

There have been 631 reported deaths, this number can be confirmed only after the Istituto Superiore di Sanità has established the actual cause of death.

The Head of Civil Protection and Emergency Commissioner, Angelo Borrelli, announced that 280 more people recovered than yesterday [9 Mar 2020]; he also invited all citizens to inquire exclusively through official channels, so as not to encourage the spread of fake news.

The number of people infected in the individual regions is as follows: (change from previous day in parentheses)
- Lombardy: 5791 (322)
- Emilia-Romagna: 1533 (147)
- Veneto: 856 (112)
- Marche: 394 (71)
- Piedmont: 453 (103)
- Tuscany: 264 (56)
- Lazio: 116 (14)
- Campania: 127 (7)
- Liguria: 141 (32)
- Friuli Venezia Giulia: 116 (23)
- Sicily: 62 (8)
- Puglia: 59 (9)
- Umbria: 37 (9)
- Molise: 15 (1)
- Autonomous Province of Trento: 52 (19)
- Abruzzo: 38 (8)
- Autonomous Province of Bolzano: 38 (29)
- Aosta Valley: 17 (2)
- Sardinia: 19 20 (1)
- Calabria: 13 (2)
- Basilicata 7 (2)

Total: 10 149 (977)

Communicated by:
ProMED-mail
<promed@rpromedmail.org>

[The tally of confirmed cases of COVID-19 in Italy is now 10 149, including 631 deaths, up from 9172 cases and 463 deaths reported on 9 Mar 2020. Cases continue to be concentrated in Lombardy (5791), the epicenter of the outbreak, Emilia-Romagna (1533), and Venice (856), all in the northern part of the country. These 3 provinces account for 59.5% of newly confirmed cases in the past 24 hours.

72 hours ago, Italy announced a lockdown for the northern provinces where the outbreak was concentrated. 48 hours ago this was changed to be country wide. We shouldn't expect to see an impact until at least 1 incubation period has passed, as there are newly infected individuals who are still in their incubation period. The Public Health world is looking at Italy to see if this is feasible and if it has an impact in terms of slowing down transmission of the virus.

A dashboard similar to the Hopkins dashboard, including a map, produced by Italy showing the situation in real time, can be found at <http://opendatadpc.maps.arcgis.com/apps/opsdashboard/index.html#/b0c68bce2cce478eaac82fe38d4138b1>.

C. Iran: 7161 cases, 237 deaths
Date: Wed 11 Mar 2020 12:29 AM IRST
Source: Rappler, Agence France-Presse (AFP) report [edited]
<https://www.rappler.com/world/regions/middle-east/254046-iran-coronavirus-death-toll-march-10-2020>

Iran on Tuesday [10 Mar 2020], reported 54 new deaths from the novel coronavirus in the past 24 hours, the highest single-day toll since the start of the country's outbreak. The latest deaths bring the number of those killed by the virus in the Islamic republic to 291, the health ministry's spokesman Kianoush Jahanpour said in a televised conference.

AMERICAN OVERSIGHT

He added that 881 new cases had been confirmed, bringing the total number of people infected to an official 8042. But "2731 people, which is about 10 times the number of dear countrymen we've lost, have recovered and been discharged from hospitals," Jahanpour said.

The outbreak of the virus in Iran is one of the deadliest outside China, where the disease originated.

With 2114 cases, the capital Tehran remains the worst-hit province. The northern province of Mazandaran climbed to 2nd place with 253 new cases, bringing the total there to 886, followed by 751 in Qom, the Shiite pilgrimage city south of Tehran where the country's 1st cases were reported.

Mazandaran is a popular tourist spot bordering the Caspian Sea, and is particularly popular during holidays for the Iranian New Year, which this year starts on [20 Mar 2020]. Iran is yet to officially impose quarantines but authorities have repeatedly called on people to refrain from travelling and have resorted to closing hotels and other accommodation to discourage travel. "As we said and expected in recent days, Mazandaran has almost reached the top of the chart" in terms of infections and is second only to Tehran, Jahanpour said. "Our warnings against travelling to Mazandaran may be more understandable today," he added.

Iran's fatalities include several politicians and government officials, as well as some hospital staff.

Iran's supreme leader Ayatollah Ali Khamenei agreed on Tuesday [10 Mar 2020] to designate hospital staff who died after contracting the virus as "martyrs," following a suggestion by the health minister, according to the official IRNA [Islamic Republic News Agency] news agency. In the Islamic republic, the families of those designated martyrs usually receive financial aid and other benefits from the state.

The supreme leader also cancelled his annual speech in Mashhad city to mark the Persian new year due to concerns about the virus outbreak and health authorities' calls "to avoid gatherings and travel." According to health ministry figures, 222 people have been infected by the virus in the Khorasan Razavi province, where Mashhad is located.

Apart from direct fatalities, 44 people have died from methanol poisoning in Iran after rumors that drinking alcohol could help cure or protect from the disease.

<promed@promedmail.org>

[In the past 24 hours, the number of cases of COVID-19 confirmed in Iran has grown from 7161 to 8042 an increase of 881 newly confirmed cases. The number of deaths has also increased from 237 to 291, an increase of 54 deaths in the past 24 hours.

Qom, while the apparent original epicenter of this outbreak, is located to the south west of Tehran in central Iran. Tehran is now the epicenter of the outbreak with 2114 (an increase of 309 cases from yesterday, 10 Mar 2020) confirmed cases. Mazandaran reported 886 cases (an increase of 253 cases in the past 24 hours, and Qom, with 751 cases in 3rd place. Cases have now been confirmed in all of the 31 provinces in the country.

Another media report mentioned that drones were being used to disinfect grounds around hospitals treating COVID-19 cases, spraying sterilizing liquids in areas around hospitals and other high risk areas. 3 10-minute rounds spraying the emergency unit entrances, the hospital buildings, and areas where COVID-19 patients were treated. [5] USA, NY containment zone
Date: Tue 10 Mar 2020
Source: New York State Governor press release [edited]
<https://www.governor.ny.gov/news/governor-cuomo-accepts-recommendation-state-health-commissioner-new-emergency-measures-contain>

Governor Andrew M Cuomo today [10 Mar 2020] accepted the recommendation of State Health Commissioner Dr Howard Zucker for new emergency measures to contain the novel coronavirus [SARS-CoV-2] cluster in New Rochelle. The area currently has 108 confirmed cases and is considered a "cluster." The protocols include closing schools, houses of worship, and other large gathering facilities within a 1-mile radius [1.6 km] in New Rochelle for a 2-week period, from [Thu 12 Mar 2020 to Wed 25 Mar 2020].

The Governor has deployed National Guard troops to a Health Department command post in New Rochelle to assist with the outbreak. The troops are mobilizing to deliver food to homes and help with cleaning public spaces in the containment area.

The Governor confirmed 31 additional cases of novel coronavirus, bringing the statewide total to 173 confirmed cases in New York State. Of the 173 total individuals who tested positive for the virus, the geographic breakdown is as follows:
Westchester: 108 (10 new)
New York City: 36 (17 new)
Nassau: 19 (2 new)
Rockland: 6 (2 new)
Saratoga: 2
Suffolk: 1
Ulster: 1

The Governor also announced the State will partner with Northwell Health to set up a satellite testing facility in New Rochelle. Visits would operate by appointment only. More information will be posted soon on the State Department of Health website.

"The largest cluster of confirmed coronavirus cases in the country is located in New Rochelle, and as the numbers continue to go up we need a special public health strategy to contain it," Governor Cuomo said. "We are moving from containment to mitigation, and because much of the transmission of this disease tends to happen on a geographic basis, we

AMERICAN OVERSIGHT

are attacking this hotspot at the source. As the number of positive cases rises, I am urging all New Yorkers to remember the bottom line: we talk about all this stuff to keep the public informed -- not to incite fear -- and if you are not a member of the vulnerable population then there is no reason for excess anxiety."

New York State Health Commissioner Dr. Howard Zucker said, "As we see the number of cases continue to rise based upon close contacts with persons who are positive for COVID-19, there is a particular need to reduce the opportunity for further close contacts. These opportunities include schools, churches, synagogues, and other event spaces where large numbers of people gather and remain together for extended periods of time. Although we believe that the risk generally to New Yorkers is low, I have recommended this strategy to reduce opportunities for further spread with the goal of reducing the number of new cases we are seeing in New Rochelle."

The list of facilities in the containment area is being promulgated in consultation with local partners including the County Executive and the Mayor of New Rochelle. The State will work with impacted schools to ensure any child who currently depends on food assistance programs will continue to relieve those benefits during the 2-week period.

--

ProMED-mail
<promed@promedmail.org>

[A map of the containment area can be found at <https://newrochelleny.com/coronavirus>, in addition to a chronologic briefing of the outbreak and starting with the index case.

The mitigation measures as described are not as strict as those implemented by China and Italy. They are primarily directed towards eliminating large people gatherings, in schools, event locales, and religious houses of worship. It does not mention if movie theaters and other theaters will be closed. Will these measures slow down the transmission? 2 weeks is one incubation period, is that long enough to demonstrate an impact? We await the results of this strategy.

A map of New York State showing counties can be seen at <http://www.nysl.nysed.gov/genealogy/counties.htm> and a HealthMap/ProMED-mail map at <http://healthmap.org/promed/p/234>. The counties with confirmed cases are in the south eastern extension of the state and are in close proximity to New York City. - Mod.MPP

[6] Hypertension as risk factor for poor outcome
Date: Tue 10 Mar 2020 3:41 AM GMT+1
Source: Bloomberg News [edited]
<https://www.bloomberg.com/news/articles/2020-03-09/top-virus-doctor-says-high-blood-pressure-is-major-death-risk>

Patients with hypertension appear to be at a higher risk of dying from the coronavirus, said a top Chinese intensive care doctor who's been treating critically ill patients since mid-January [2020]. While there's been no published research yet explaining why, Chinese doctors working in Wuhan, the central Chinese city where the virus first emerged, have noticed that infected patients with that underlying illness are more likely to slip into severe distress and die.

Of a group of 170 patients who died in January [2020] in Wuhan -- the 1st wave of casualties caused by a pathogen that's now raced around the world -- nearly half had hypertension. "That's a very high ratio," said Du Bin, director of the intensive care unit at Peking Union Medical College Hospital, in an interview with Bloomberg over the phone from Wuhan. He was among a team of top doctors sent to the devastated city 2 months ago to help treat patients there.

"From what I was told by other doctors and the data I can see myself, among all the underlying diseases, hypertension is a key dangerous factor," said Du, one of the most respected critical care experts in China. "Though there is no research published on that yet, we believe hypertension could be an important factor causing patients to deteriorate, leading to a bad prognosis."

As the outbreak picks up speed in Europe and the US, plunging countries like Italy into crisis, doctors are struggling to treat the highly-infectious pathogen that's infected over 108 000 people globally in just 3 months. Understanding the course of the disease and

AMERICAN OVERSIGHT

identifying individuals at greatest risk are critical for optimizing care for a global contagion that's killed more than 3700 people since emerging in China in December [2019]

Answers may lie in studying the large pool of patients in China, where more than 15 000 remain hospitalized although new infections have slowed dramatically. The disease turns critical in 6% of patients and deterioration can happen very quickly. "We'll keep an eye on old people and those with high blood pressure. They are the key focus," said Du.

Besides the hypertension factor, Du's other insights into treating the disease are:
- Move aggressively to ventilate
Du said that doctors should not hesitate to escalate measures for patients facing respiratory distress, as organ failure can set in quickly after. That means doctors should intervene aggressively with invasive ventilation measures -- inserting a tube into a patient's throat or cutting the throat open to create an airway -- when low blood oxygen levels can't be improved by less invasive measures.

Almost half of the patients who require invasive mechanical ventilation end up dying, but most of those who recover are those who were put on invasive ventilation early, said Du. "Patients need to use invasive ventilation as early as possible, there's no point of doing it late," he said.

Respiratory therapists -- doctors that specialize in ventilation and oxygen treatment -- are becoming all the more important in treating patients critically ill with COVID-19 as they are more knowledgeable and can fine-tune ventilators to suit patient conditions.

- No 'magic bullets' in drugs
There is growing anticipation over drugs being developed to treat the virus, with investors adding billions to the market value of pharmaceutical companies testing treatments now. But Du said drugs alone cannot save patients, especially those in severe condition. The experience of SARS, the epidemic 17 years ago that sickened almost 8000 people, showed that most patients can be cured without a specific anti-viral drug, said Du. And the abundance of antibiotics has not prevented deaths by bacterial infections, he added. "When there's a virus infection, we hope there's a drug that can kill the virus and change the clinical outcome. But there's no magic bullet."

Instead, teamwork among specialists and nurses in intensive care units can be more crucial in keeping patients alive, he said. "An ICU doctor should work like a conductor in an orchestra to provide life-sustaining treatment while taking into consideration different specialist views," he said.

- Threat of re-infection
Reports that people who have recovered and been discharged from hospital later test positive again -- and even die from the disease -- have ignited fears that the virus can somehow re-emerge. Du said that patients becoming re-infected again within days of leaving the hospital makes no sense "theoretically" as the antibodies in their bloodstream generated from fighting the disease do not disappear so quickly, although they don't necessarily stay forever.

"What we need to look at in terms of those who tested positive again is concerns over the authenticity of their negative results," he said. For example, samples taken from different areas of the same patient could test differently depending on where the virus resides. Test kits made by different manufacturers could also have inconsistencies that impact test results, he said.

- Mild impact on pregnant women, children
Despite their seeming physical vulnerability, pregnant women and children do not seem to be affected by the coronavirus in a serious manner, Du said. This is in contrast to other viruses like influenza. "From what we known, infected pregnant women do not get into a serious situation with the coronavirus," Du said. "With influenza, pregnancy is a high risk factor that can cause severe symptoms and lead to bad outcomes, but not this time."

Children infected with the coronavirus also seem to experience only mild symptoms, said Du. He has not seen any child infections deteriorate to a state which requires intensive care.

Mary Marshall
<mjm2020@googlemail.com>

[This observation was also given by Dr Bruce Aylward, head of the WHO mission that went to China, in an interview upon his return, although I have been unable to locate the interview to link it here. It has been demonstrated that the ACE-2 receptor site is cell entry site for the SARS-CoV-2, The observation that more serious outcomes including death were observed in individuals with hypertension makes one wonder if data are being collected looking at those with hypertension treated with ACE inhibitors versus those using other types of antihypertensive medications.

Kuba K, Imai Y, and Penninger JM postulate that stimulating ACE2 activity might be a means of mitigating acute lung injury, including those seen with ARDS (Acute respiratory distress syndrome) such as seen with SARS-CoV and SARS-CoV-2 infection. In contrast, I wonder if suppression of the ACE2 activity to maintain good blood pressure control may well predispose individuals to more severe acute lung injury due to the absence of ACE2 activity.

Kuba, Imai, and Penninger postulate that enhancing ACE2 activity (as opposed to inhibiting it through ACE inhibitors used for hypertension control,) may well be a strategy for reducing lung damage during events associated with acute lung injury.

ref: Kuba K, Imai Y, Penninger JM. Angiotensin-converting enzyme 2 in lung diseases. Curr Opin Pharmacol. 2006; 6(3): 271-6;

Abstract

The renin-angiotensin system (RAS) plays a key role in maintaining blood pressure homeostasis, as well as fluid and salt balance. Angiotensin II, a key effector peptide of the system, causes vasoconstriction and exerts multiple biological functions. Angiotensin-converting enzyme (ACE) plays a central role in generating angiotensin II from angiotensin I, and capillary blood vessels in the lung are one of the major sites of ACE expression and angiotensin II production in the human body. The RAS has been implicated in the pathogenesis of pulmonary hypertension and pulmonary fibrosis, both commonly seen in chronic lung diseases such as chronic obstructive lung disease. Recent studies indicate that the RAS also plays a critical role in acute lung diseases, especially acute respiratory distress syndrome (ARDS). ACE2, a close homologue of ACE, functions as a negative regulator of the angiotensin system and was identified as a key receptor for SARS (severe acute respiratory syndrome) coronavirus infections. In the lung, ACE2 protects against acute lung injury in several animal models of ARDS. Thus, the RAS appears to play a critical role in the pathogenesis of acute lung injury. Indeed, increasing ACE2 activity might be a novel approach for the treatment of acute lung failure in several diseases.

[7] WHO situation report 50 (as of 10 Mar 2020)
Date: Tue 10 Mar 2020
Source: WHO [edited]
<https://www.who.int/docs/default-source/coronaviruse/situation-reports/20200310-sitrep-50-covid-19.pdf?sfvrsn=55e904fb_2>

AMERICAN OVERSIGHT

*The situation report includes information provided by national authorities as of 10 am CET.

Highlights

- Five new countries/territories/areas (Brunei Darussalam, Mongolia, Cyprus, Guernsey, and Panama) have reported cases of COVID-19 in the past 24 hours.

- As of 9 Mar 2020, a total of 45 States Parties informed WHO of additional health measures they implemented in relation to COVID-19 and provided the public health rationale for these measures. WHO reiterates that measures that restrict the movement of people during this outbreak should be proportionate to the public health risk, short in duration and reviewed regularly as more information about the virus, the disease epidemiology, and clinical characteristics becomes available. For more information, please see 'subject in focus'.

- WHO Director-General in his regular media briefing on [10 Mar 2020] stated that the threat of a pandemic has become very real; however, this would be the 1st pandemic in history that could be controlled. For details, please see <https://www.who.int/dg/speeches/detail/who-director-general-s-opening-remarks-at-the-media-briefing-on-covid-19---9-march-2020>

Subject in focus: travel measures

Travel measures As of [9 Mar 2020], a total of 45 States Parties informed WHO of additional health measures they implemented in relation to COVID-19 and provided the public health rationale for these measures. Many States Parties are implementing additional health measures against countries other than China. WHO has shared this information with States Parties through the Event Information Site secure platform on a weekly basis. In addition, WHO Director-General informed States Parties of the measures and public health rationale provided through 2 Circular Letters - on [6 and 17 Feb 2020].

Table 1. Number of States Parties officially reporting additional health measures that significantly interfere with international traffic (that is, more than 24h delay), under Article 43 of the IHR (2005) (by WHO region) [figures and tables available at the source URL above]

As virus transmission shifts to other countries, measures are currently being implemented against countries other than China (figure 1). The main reasons given for implementing such measures continue to be perceived vulnerabilities/limited country capacity and the nature of the virus epidemiology (figure 2).

WHO also monitors other sources of information: IATA (1), SOS international (2), and countries' official websites. Measures such as flight suspensions are often implemented by industries, which are not bound by the IHR (2005; and such measures are often driven by economic considerations, such as reduced demand, or concerns for crew staff (3). Preliminary analysis shows that in some countries such travel measures may have delayed the importation of new cases, while in other countries the "restrictions" did not stop the importation of new cases.

WHO reiterates that measures that restrict the movement of people during this outbreak should be proportionate to the public health risk, short in duration and reviewed regularly as more information about the virus, the disease epidemiology and clinical characteristics becomes available. See also updated WHO recommendations on international traffic, published on [29 Feb 2020] (4).

Other: Cases on an international conveyance (Diamond Princess): 696 (0) / 7 (0) / Local / 2

Grand total: 32 778 (4105) / 872 (186)

Note: Numbers include both domestic and repatriated cases.
*The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.
**Case classifications are based on WHO case definitions for COVID-19.
***Transmission classification is based on WHO analysis of available official data and may be subject to reclassification as additional data become available. Countries/territories/areas experiencing multiple types of transmission are classified in the highest category for which there is evidence; they may be removed from a given category if interruption of transmission can be demonstrated. It should be noted that even within categories, different

AMERICAN OVERSIGHT

countries/territories/areas may have differing degrees of transmission as indicated by the differing numbers of cases and other factors. Not all locations within a given country/territory/area are equally affected.

Terms:
- Community transmission is evidenced by the inability to relate confirmed cases through chains of transmission for a large number of cases, or by increasing positive tests through routine screening of sentinel samples.
- Local transmission indicates locations where the source of infection is within the reporting location.
- Imported cases only indicates locations where all cases have been acquired outside the location of reporting.
- Under investigation indicates locations where type of transmission has not been determined for any cases.
- Interrupted transmission indicates locations where interruption of transmission has been demonstrated (details to be determined).

****"Territories" include territories, areas, overseas dependencies, and other jurisdictions of similar status

[There are excellent graphs and a map available at the source URL, as well as strategic objectives and preparedness and response information.
- Figure 1: Countries, territories, or areas with reported confirmed cases of COVID-19, 10 Mar 2020.

Communicated by:
ProMED-mail
<promed@promedmail.org>

[The number of countries and territories reporting confirmed cases of COVID-19 outside China continues to grow and now totals 109. This includes 11 countries from the Western Pacific region, 51 countries (including 3 territories) from the European region, 8 countries from the Southeast Asia region, 16 countries (including 1 territory) from the Eastern Mediterranean region, 17 countries (including 4 territories) from the Americas region, and 6 countries from the African region. 61 countries/territories are listed as having local transmission within their countries, with Pakistan, Poland and North Macedonia newly reporting local transmission. Local transmission and clusters of cases were also noted on the cruise ship that was quarantined in Japan (the Diamond Princess) and the cruise ship on the Nile in Egypt.

The total number of cases reported from outside of China is now 28 674 including 686 deaths.

A somewhat repetitive but necessary reminder: it is clear that the number of reported confirmed cases differs from different reporting websites and is somewhat a function of time of day the website is updated. For example, I note the time I've accessed the Johns Hopkins website, but by the time the post is actually finished with the editing process, those numbers have at times significantly changed. Case counting is clearly a moving target, and, depending upon when the website updates, the numbers may be different. I try to start each post with the latest figures for the calendar day (the Hopkins table) and close with the figures from the start of the calendar day (the WHO tables), defining the calendar day as DST (now GMT-4). - Mod.MPP]

Subject: Patients in long-term care facilities

Hello,

After reviewing the updated guidance (attached) we noticed that patients from LTCFs are not specifically mentioned in screening criteria. Given the heightened awareness of these cases, should we be asking providers to report these patients and request BPHL testing?

Yesterday we reported an ALF resident who is undergoing testing for COVID-19 and were instructed to complete a joint inspection of the facility with AHCA. If commercial testing requests are not being reported until there is a positive, I am worried we will be behind in the joint inspection process.

Thank you,

Subject: Per our conversation: Suggested messaging

Hello again, Alberto,

Per our conversation, in the event DOH-Volusia is contacted by media for information (written or on-camera) regarding the church exposure, DOH-Volusia is requesting the ability to fulfill both types of requests using the information. Responses to anticipated follow-up questions also are provided for approval below. Additional guidance/message points are welcome:

Reminder: The information on this potential exposure already is being distributed grass-roots style by the pastor and case.

Tell us about the DOH response or 'what's going on at the church?'

- A known case attended XXX church before she tested positive for COVID-19.
- Following CDC guidance, our epidemiology staff worked with the case to determine people who may have in close contact.
- Through the investigation, DOH-Volusia determined those who attended church activities were at low risk for exposure.
- Working with the pastor, DOH-Volusia was able to define those who were in attendance at the church activities.
- We worked with the pastor to provide information to that defined audience.
- As is standard in contact tracing, anyone who was determined to be at increased risk of exposure has been contacted by our epidemiology staff and asked to self-isolate for 14 days and monitor for symptoms.

AMERICAN OVERSIGHT

Is it safe for people to go to church or other similar gatherings?

Currently we have no evidence of community spread in Volusia County. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;

- Staying home when you are sick and avoiding contact with persons in poor health;

- Avoiding touching your eyes, nose and mouth with unwashed hands;

- Covering your cough or sneeze with a tissue, then disposing of the tissue;

- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;

- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and

- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

- The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

What should seniors or high-risk people do? (Need specific message for seniors/high-risk groups since CDC has been saying they should practice social distancing measures.) Suggestion:

If you are at higher risk of getting very sick from COVID-19, you should:

- Stock up on supplies.
- Take everyday precautions to keep space between yourself and others.
- When you go out in public, keep away from others who are sick, limit close contact and wash your hands often.
- Avoid crowds as much as possible.
- Avoid cruise travel and non-essential air travel.
- During a COVID-19 outbreak in your community, stay home as much as

AMERICAN OVERSIGHT

possible to further reduce your risk of being exposed.

What should churches do?

- CDC has prevention guidance for the faith-based community. Cdc.gov/coronavirus

Suggested response to follow up questions:

- That information is part of an epi investigation. I do not have access to that information. Those at increased risk have been contacted and provided info.

Thank you, Alberto.

Subject: FW: SIGNIFICANT UPDATE VALENCIA"S RESPONSE TO COVID - 19
Date: Thursday, March 12, 2020 5:45:48 PM

Valencia College is going mostly online due to some of their students being near an instructor at a conference, who has the virus. The students are fine, no symptoms.

From: Sandy Shugart <sshugart@valenciacollege.edu>
Sent: Thursday, March 12, 2020 5:05 PM
To: Hebda, Kathy <Kathy.Hebda@fldoe.org>
Subject: SIGNIFICANT UPDATE VALENCIA'S RESPONSE TO COVID - 19

Dear Kathy:

This is certainly a fast moving set of issues. Our response has changed in the past couple of hours.

We've had a few exposures come to light in the past 24 hours. No symptomatic or confirmed infections. This has led us to adjust our plans. A message will go out this evening.

Valencia is closing to students for the coming week. Faculty and staff will report. We will use the week to move the vast majority of instruction to online through the end of the term, with classes resuming Monday March 23. The third of the classes that are already online will continue as planned. Classes that cannot be taught online (welding, ballet, etc.) will resume Monday, as well, in the face to face format. Since next week is spring break for OCPS and SDOC are next week, this should have no immediate effect on dual enrollment students. Many will move to online sections the following week.

We will also use the week without students to sort out a variety of other matters – leave for employees who are asked to self-quarantine, coordination with clinical partners in nursing and allied health, policies for working from home, procedures for summer registration, etc.). The school districts will be on spring break for the week we are closed, so we will not be creating any complications for their dual enrollment students.

Meanwhile, we are canceling study abroad for the remainder of the term. Summer trips are under close review. Most travel for staff and faculty has been cancelled. Those who travelled overseas are self-isolating. We did have a couple of faculty and students attend a conference in Ft. Lauderdale last week and we learned another participant was subsequently tested positively for the virus. We are communicating with them to contain any risk associated with them. We have no other known risks at this time. We will make the call on Commencement by April 1.

In common cause,

Sandy

Courtney,

Per your request attached is the specimen collection capacity numbers.

- 1176 – Total CHDs on-hand
- 0 - State inventory
- 5 - counties with none.
- 27 - counties have less than 10
- DEM orders expected tomorrow will not arrive.
- We don't expect our order to arrive for 2 weeks.

We can work tomorrow to move some from counties with more to the CHDs with none. We borrowed 50 from a hospital for Miami-Dade county who ran out today. They'll have 50 more tonight.

Thanks,
Samantha

The State of Florida Issues Updates on COVID-19

TALLAHASSEE, Fla. - The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Governor Ron DeSantis is in constant communication with Florida Division of Emergency Management Director Jared Moskowitz and State Surgeon General Dr. Scott Rivkees as the State of Florida continues to monitor and respond to the threat of COVID-19.

Today, in a briefing at the Florida Emergency Operations Center, Governor DeSantis announced the following:

Education

- Governor Ron DeSantis today made several announcements to keep Florida's students, instructional staff and faculty safe. He announced that all remaining assessments for school readiness and voluntary prekindergarten and all testing requirements for K-12 will be cancelled for the 2019-2020 school year.
- Governor DeSantis also provided more flexibility to local school districts so they can install and establish additional remote learning opportunities for students, including the ability to purchase devices and internet services.

Information on Restaurants, Bars, Nightclubs and Beaches

- Governor Ron DeSantis issued an Executive Order that will reduce density and crowds in restaurants, bars, nightclubs and beaches to mitigate the spread of Coronavirus (COVID-19).
- **Bars and Nightclubs**
  - Under the direction of Governor DeSantis, all bars and nightclubs throughout Florida will close for the next 30 days. Information is available on the website of Florida's Department of Business & Professional Management (DBPR).
- **Beaches**
  - The Governor is directing parties accessing public beaches in the state of Florida to follow the Centers for Disease Control and Prevention (CDC) guidance by limiting their gatherings to no more than 10 persons.
- **Restaurants**
  - Restaurants across the state of Florida will now be required to limit customer entry to 50 percent of capacity. Seating must be staggered and limited to ensure seated parties are separated by a distance of at least six feet, in accordance with CDC guidelines. Restaurants are encouraged to remain open and expand take-out and delivery services. Information is available on the website for DBPR.

Reemployment Assistance

- Governor DeSantis reminded Floridians that if their employment has been negatively impacted because of mitigation efforts to stop the spread of COVID-19, these Floridians may be eligible to receive Reemployment Assistance.
  - Individuals who are eligible for Reemployment Assistance may include:

AMERICAN OVERSIGHT

    - Those who are quarantined by a medical professional or a government agency,
    - Those who are laid off or sent home without pay for an extended period by their employer due to COVID-19 concerns; and
    - Those who are caring for an immediate family member who is diagnosed with COVID-19
- Governor DeSantis and the Department of Economic Opportunity (DEO) encourage any Floridian whose employment has been negatively impacted as a result of COVID-19 to visit Floridajobs.org and click on the Reemployment Assistance Service Center to learn more about the program and to watch a short video on how to apply.

Private businesses assisting Floridians

- Governor DeSantis also applauded steps taken by private businesses such as FPL, Duke Energy, TECO, and Uber who are taking steps to assist Floridians with electric bills and delivering free meals to health care workers.

Presidential Preference Primary Election

- Leading up to today's Presidential Preference Primary Election, Governor DeSantis directed Secretary of State Laurel M. Lee to work with Supervisors of Elections throughout Florida to ensure a smooth election. Throughout the day, the Florida Division of Elections remained in constant contact with local elections officials to ensure voters who had not voted prior to election day, had the opportunity to cast their ballot. **The Department of State proactively worked with emergency management officials to ensure that Supervisors had the necessary resources for sanitization and cleaning at polling places to help ensure the safety of voters on Election Day.** Secretary of State Laurel M. Lee held a press conference to share updates from the day, once polls have closed statewide, that will be available for viewing on the Florida Channel.

More Information on COVID-19

To find the most up-to-date information and guidance on COVID-19, please visit the Department of Health's dedicated COVID-19 webpage. For information and advisories from the Centers for Disease Control (CDC), please visit the CDC COVID-19 website. For more information about current travel advisories issued by the U.S. Department of State, please visit the travel advisory website.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneezing into a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from any other destination with community transmission should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, he or she should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the state has taken to prepare for and respond to COVID-19:

DEPARTMENT OF HEALTH

- At the direction of Governor DeSantis, State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.
- Established an Incident Management Team to coordinate response operations.
- Defined a high-level phased response strategy for COVID-19.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined the calls.
- Established a public call center for questions regarding COVID-19. The call center launched Monday, March 2.
- Developed and distributed COVID-19 presentation materials to County Health Departments (CHD) for use at community meetings.

AMERICAN OVERSIGHT

- Activated the Joint Information Center in coordination with the Division of Emergency Management.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUI) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Approved and disseminated an updated Clinician Screening Tool for identifying COVID-19 PUIs.
- Distributed a health care provider letter regarding enhanced surveillance and preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated laboratory guidance regarding implementation of testing at State Public Health Laboratories.
- Developing a laboratory surge plan.
- Developing a clinician-level briefing for medical audiences.
- Identifying and monitoring close contacts of presumptive cases. Any close contacts with symptoms will be tested.
- Implemented private lab testing.
- Developed and disseminated pandemic planning guidance.
- Advised CHDs and HCCs to retain expired personal protective equipment until further until further notice.
- Continued development of public information resources.
- Developing infographics for first responders (fire, law enforcement and EMS) regarding infection control and personal protection for COVID-19.
- At the Governor's direction, a public-private partnership has been put in place between Memorial Healthcare in Broward and the National Guard to set up a mobile testing unit.
- At the direction of Governor DeSantis hiring additional epidemiologists from university health programs to help with workload.
- Governor DeSantis directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and assisted living facility licenses for 90 days to remove distraction from patient care.

THE DIVISION OF EMERGENCY MANAGEMENT

- Today, Governor Ron DeSantis and Division of Emergency Management Director Jared Moskowitz announced that Florida is continuing to order supplies and personal protective equipment in an effort to mitigate and contain the spread of COVID-19 in the state.
- After conducting a thorough assessment of needs, Director Moskowitz has requested the following supplies through Direct Federal Assistance. Supplies are being delivered on a rolling basis, and inventory is being distributed throughout the state 24 hours a day.
  - 5 mobile intensive care units
  - 5,000 ventilators
  - 5,000 hospital beds
  - 50,000 two oz. bottles of hand sanitizer
  - 250,000 coveralls
  - 500,000 gloves
  - 500,000 gowns
  - 500,000 collection kits
  - 100,000 16 oz. bottles of hand sanitizers
  - 150,000 Personal Protective Equipment kits, including coveralls, gowns, and goggles
  - 2 million N95 face masks
- Director Moskowitz is working with the federal government to determine if there is capacity to add US Navy Mercy-Class ships at Florida ports.
- Three field hospitals are being deployed:
  - One field hospital is currently staged in Orlando and can be deployed to other areas in the state as needed.
  - One field hospital is on its way to Broward County and will be set up there.
  - One field hospital is on its way to Ocala and will be staged there and deployed to other areas as needed.
- Mobile COVID-19 testing is also being implemented.

AGENCY FOR HEALTH CARE ADMINISTRATION

- Secretary Mayhew is working directly with hospitals and large health systems to identify potential vacant wings or buildings to provide additional hospital inpatient capacity should it become necessary.
- On March 16, Florida became the first state to receive CMS approvalof its 1135 Medicaid Waiver giving AHCA more flexibility for its COVID-19 response efforts. This federal action lifts Medicaid prior authorization requirements for critical health care services and allows for expedited provider enrollment.
- AHCA distributed a provider alert to licensed health care providers regarding the Division of Emergency Management's new Emergency Order tightening visitation restrictions at residential and long-term care facilities.
- AHCA, in coordination with the DEM and the Department, is hosting ongoing statewide calls for nursing homes, assisted living facilities, intermediate care facilities, the Agency for Persons with Disabilities, group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting visitors and providing updates.
- AHCA, in coordination with DEM and the Department, is hosting ongoing statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- After previously opening an event on the Emergency Status System (ESS) for hospitals to enter census information, emergency room status updatesand isolation beds, AHCA expanded the ESS event to track nursing homes and assisted living facility bed capacity, effective March 15.
- The Agency for Health Care Administration (AHCA) will be granting a 90-day extension to all licenses for health care providers and regulated facilities.
- AHCA is distributing information regarding regulatory flexibilities created by waivers from the Centers for Medicare and Medicaid Services (CMS) related to skilled nursing facilities, critical access hospitals, home health agencies, durable medical equipment, provider enrollment, etc.
- AHCA participated in a collaborative call with the Florida Health Care Association, Florida Hospital Association and LeadingAge Florida to discuss patient transfer arrangements between health care facilities such as nursing homes and hospitals.
- The Florida Medicaid Program announced coverage of commercial testing for COVID-19 for dates of service back to February 4.

AMERICAN OVERSIGHT

AGENCY FOR PERSONS WITH DISABILITIES

- APD is implementing telework for employees throughout the state as directed by Governor DeSantis to reduce possible exposure to COVID-19.
- APD and AHCA are hosting a conference call today with provider association leaders to share information on modifications to some existing policies and practices during this state of emergency.
- The agency's three state-run centers in Marianna, Gainesville and Chattahoochee, as well as APD-licensed group homes, are restricting visitors in compliance with the Executive Order to protect the health and safety of our customers.
- APD Adult Day Training programs across the state are screening visitors for possible exposure to COVID-19 using a visitor questionnaire. The questionnaire is also being used to screen visitors coming into APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- DOEA hosted a Program of All-Inclusive Care for the Elderly (PACE) conference call. All PACE providers are following CDC guidelines for clients, staff, and vendors. They have called clients to check their status and make sure there are no outstanding needs, they have implemented disaster plans, and they have shared information across the state and with partner agencies.
- DOEA is coordinating with AHCA to ensure PACE providers continue to receive updated information on testing facilities.
- DOEA continues to provide technical assistance to Area Agencies on Aging (AAA) regarding program flexibilities including meals, transportation, respite monitoring, service delivery models, EHEAP, health and wellness activities, outreach, board meetings, office closures, work from home, HIPPA, and IT concerns.
- DOEA coordinated the delivery of over 3,000 shelf stable meals to a Miami-Dade County senior center who had expressed concern over some clients going without meals.
- DOEA continues to maintain and disseminate county-level statistics on the number and types of services for use in modeling statewide service interruptions. When service interruptions occur, the local Area Agency for Aging (AAA) providers call clients impacted by service interruptions to offer alternative assistance.
- DOEA's Serving Health Insurance Needs of Elders (SHINE) / Senior Medicare Patrol program offered to send all online training modules to the 11 Aging and Disability Resource Centers. The distribution of training modules to active and pending volunteers would allow volunteers to train from home, on their own time, over the next several weeks and serve as a re-certification process.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families' (DCF) Office of Child Welfare is sending regular communication about COVID-19 specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19). An FAQ document for providers was also posted prominently on DCF's Child Care webpage.
- DCF's Office of Child Welfare is disseminating a survey to licensed child care providers to assess closures throughout the state. Currently, the decision to close is at the discretion of each individual facility.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF is leading status update calls with both internal leadership and leadership from external contracted partners. For the time being, these calls will take place twice weekly, every Tuesday and Friday.
- DCF General Services staff throughout the state are working with lessors and janitorial contractors to increase sanitizing measures in office buildings, especially restrooms and common areas. They also began taking inventory of sanitizing supplies (disinfecting wipes, Lysol spray, hand-sanitizer, etc.) and are ordering more as needed.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility. At this time, there are no cases of patients or facility staff testing positive for COVID-19.
- DCF's Office of Economic Self-Sufficiency is communicating with DEO regarding work requirements and CareerSource operations and availability.
- DCF's Office of Economic Self-Sufficiency implemented screening procedures, including a set of questions that must be asked prior to entry, at all economic self-sufficiency storefronts.

FLORIDA DEPARTMENT OF VETERANS' AFFAIR

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- All VA Vet Centers in Florida providing readjustment counseling and outreach services to veterans and families are open and implementing enhanced screening protocols. At this time, veterans may appear in person or opt in advance for an optional phone consultation.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to

AMERICAN OVERSIGHT

proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences. In addition, cemetery personnel will be discouraged from handshaking and any unnecessary physical contact to minimize the potential transmission of germs and viruses until the pandemic conditions are under control.
- Suspension of VA Travel Board Hearings - The Board of Veterans' Appeals (U.S. Department of Veterans Affairs) is suspending Travel Boards until May 1, 2020, due to COVID-19 response efforts. The Board will work with veterans and veteran service organizations and representatives to continue video hearings and provide virtual hearings where possible.
- All FDVA and VA facilities remain fully operational.

DEPARTMENT OF MILITARY AFFAIRS

- There have been over 598 Florida National Guardsmen placed on state active duty in support of COVID-19.
- The Florida National Guard is activating all of their medical professionals (Army Combat medic specialists and Air Force medical technicians) to support Florida Department of Health's drive-through screening operations. Guardsmen have reported in and formed Task Force Medical already.
- The Florida National Guard has activated soldiers to augment the State Logistics Readiness Center in Central Florida.
- The Florida National Guard has activated Guardsmen to augment the State Emergency Operations Center.

VOLUNTEER FLORIDA

- Volunteer Florida is encouraging volunteers to screen themselves for COVID-19 (per CDC and Florida Department of Health guidelines) before serving.
- Volunteer Florida will be participating in a call with Voluntary Organizations Active in Disaster (VOAD) partners today to discuss the anticipated needs of volunteers.
- Volunteer Florida is pushing out VOAD organizational guidance to ESF-15 partners.
- Volunteer Florida is working with state counterparts and FEMA to develop volunteer plans.
- Volunteer Florida's National Service Department has discussed using AmeriCorps members in food banks as feeding needs increase.
- Volunteer Florida continues to work with Mass Care on the anticipated needs of volunteers.
- Volunteer Florida has asked all VOADpartners to review their continuity of operations so that there is no service delivery disruption.

FLORIDA DEPARTMENT OF EDUCATION

- Commissioner of the Florida Department of Education (FDOE) Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks. To stay up to date on school closure information, visit: org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, and their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- The SUS has directed all state universities to continue remote instruction through the end of the Spring semester.
- All students who can return home should return home.
- The SUS has directed that traditional on-campus commencement ceremonies will not be held in May. Instead, each university is directed to develop an alternate schedule or method of delivery.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Volunteer activities within correctional institutions statewide have been suspended.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled internationally or on a cruise within the last 14 days.
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath.
  - Have had contact with someone who has been or is under investigation for COVID-19.

- All non-critical inmate transfers have been suspended.
- New commitments and intakes have been restricted.
- Outside inmate work squads have been restricted.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to COVID-19.

AMERICAN OVERSIGHT

- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- FDOT coordinated with transit agencies throughout the state to ensure the safe return of the Florida residents who were quarantined in Georgia and had previously been aboard the Grand Princess voyage outside of California.
- FDOT is coordinating with other state and local agencies to help ensure mobility around the temporary testing site in Broward County. Once the site is open, FDOT plans to publicize testing site information on highway advisory radio.
- FDOT completed a request to provide necessary supplies to harbor pilots working at seaports.
- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department continue to host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- Pursuant to Executive Order 20-52 issued by Governor DeSantis, FDOT Secretary Thibault has suspended size and weight restrictions for divisible loads on any vehicles transporting emergency equipment, services, supplies, and necessary agricultural commodities on state roads.
- COVID-19 educational materials have been posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials have been posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- At the direction of Governor Ron DeSantis, the Florida Department of Highway Safety and Motor has issued an Emergency Orderextending all Florida driver licenses and identification cards that will expire in the next 30 days.
- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to complete transactions for driver licenses, ID cards, motor vehicle or vessel registrations, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association as well as Tax Collectors across the state to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.
- FLHSMV has been in regular communication with the American Association of Motor Vehicle Administrators and other state motor vehicle administrators to discusses best practices and strategies related to COVID-19 preparations and response.
- Pursuant to Executive Order 20-52 issued by Governor Ron DeSantis, FLHSMV Executive Director Rhodes has waived commercial truck hours of service regulations and other related regulations so that emergency supplies, equipment, commodities and resources can be moved more quickly and efficiently throughout the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor Ron DeSantis activated the Florida Small Business Emergency Bridge Loan Program to support small businesses impacted by COVID-19. The bridge loan program, managed by the Florida Department of Economic Opportunity (DEO), provides short-term, interest-free loans to small businesses that experienced economic injury from COVID-19. The application period is open and runs through May 8, 20. Interested businesses should visit orgfor more information.
- Governor DeSantis has requested the federal Small Business Administration (SBA) make the Economic Injury Disaster Loan program available for Florida's small businesses impacted by COVID-19. The Florida Department of Economic Opportunity (DEO) stands ready to assist Florida's small businesses in accessing this funding when available.
- Governor Ron DeSantis has activated the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by DEO, will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/.

VISIT FLORIDA

- VISIT FLORIDA is wholly focused on providing health and safety information to travelers and Floridians. This includes the activation of Florida Now, which includes the latest updates from state emergency response professionals hosted on VisitFlorida.com. All promotional media has been paused.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19
- To protect the health and safety of the traveling public and staff, VISIT FLORIDA's four welcome centers will be closed until further notice.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida. VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department has added a dedicated COVID-19 webpage for child support customers at com/childsupport/coronavirus.The new page provides comprehensive information for alternative options for handling many routine child support case activities without visiting a local child support office. Efforts also include rescheduling genetic testing sample collection appointments and postponing other types of appointments.
- The Department of Revenue is advising child support customers who are scheduled for court hearings related to their child support cases to check with the local courts where the hearings are scheduled in case the courts have new requirements, such as appearing telephonically.
- The Department of Revenue has established a dedicated team to address tax-related issues pertaining to COVID-19 and has created an email address, COVID19TAXHELP@floridarevenue.com, where taxpayers can send questions and concerns. The Department encourages all

AMERICAN OVERSIGHT

taxpayers to use our e-services applications to file and pay taxes or contact our call center at (850) 488-6800.

- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in the public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has issued Informational Memorandum OIR-20-03Mdirecting all insurers and other entities regulated by OIR to review and update their business continuity and/or continuity of operations plans. Companies are directed to immediately contact OIR if their continuity plans are activated and/or if business operations become compromised so it can work with insurers to avoid any disruption in consumer services.
- OIR Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01Mto all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and DOH information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
- Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
  OIR has issued Informational Memorandum OIR-20-02Mas a reminder to all health insurers, health maintenance organizations, and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has issued notices to all of its employees providing resources regarding COVID-19 and outlining the steps recommended by the Centers for Disease Control and Florida Department of Health to take preventative health measures.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- Florida Department of Law Enforcement (FDLE) is working with state and local agencies and the Florida National Guard to set up testing collection sites in multiple locations across Florida.
- The Florida Department of Law Enforcement (FDLE) Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified screening protocols and procedures for youth taken into custody by law enforcement who are brought to juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice has sent a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has instituted additional screening measures for outside vendors who work within juvenile facilities and non-essential travel of staff members has been stopped. Visitors are limited to business-related visitors only (i.e., vendors, no personal visitors, no volunteers at this time). The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted. Clinical personnel, however, are still permitted to visit youth for treatment purposes, and attorneys are still permitted to conduct legal visits with youth.

FLORIDA DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

- DBPR shared information with all agency staff statewide pertaining to the declaration of a state public health emergency, state response protocols as ordered in EO 20-51, and FDOH information and resources available on the dedicated FDOH COVID-19 webpage. DBPR communication with staff has emphasized the best practices and preventive steps recommended by FDOH for impeding the spread of respiratory illnesses.
- DBPR's Emergency Coordinating Officer and State Mass Care Coordinator is supporting the initiation of FDOH's joint information center and providing assistance as requested of State Emergency Support Function 6.
- DBPR added a web banner with information on COVID-19 and link to the Florida Department of Health's dedicated COVID-19 webpage at http://www.floridahealth.gov/COVID-19.
- DBPR is incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices. Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises.
- DBPR has suspended all official business visits, including inspections, that involve licenses located at a facility covered under the visitation restrictions implemented pursuant to FDEM Emergency Order 20-002.
- DBPR issued an emergency to extend license renewal deadlines and renewal requirements for a period of 30 days for licenses with an existing renewal deadline occurring in the months of March or April, 2020.

AMERICAN OVERSIGHT

- DBPR is monitoring release of CDC guidance related to recommendations for bars and restaurants and will coordinate with FDOH on state guidance when recommendations are released by CDC.
- DBPR is establishing a dedicated emergency information page with direct links to the FDOH COVID-19 webpage as well as information on agency emergency orders, schedule and meeting changes for divisions and boards, and other important departmental information during this emergency.
- DBPR is providing guidance to appointed professional licensing boards related to procedural considerations and available technology options for remote, web-based or telephonic board meetings.
- DBPR hosted a senior management meeting with all program directors on Monday, 03.16.2020, to discuss the latest departmental actions and preparations associated with COVID-19 in Florida.

FLORIDA DEPARTMENT OF MANAGEMENT SERVICES

- DMS Secretary Jonathan Satter issued an emergency order that waived rules to allow for state employees to use any type of accrued leave for instances related to COVID-19, including self-isolation after potential exposure, staying home with children due to child care or school closures, and time needed to take care of dependents like an elder parent. The order also waived rules to expand the ability for employees to donate leave to fellow employees.
- Governor DeSantis directed the Department of Management Services Secretary Jonathan Satter to allow state employees to donate and transfer their available leave time to other state employees to mitigate the impacts of school closures.
- The Florida Department of Management Services' (DMS) Emergency Support Function-7 (ESF-7) Logistics team continues to coordinate with the Department of Health and the Division of Emergency Management on identifying the equipment or supplies that may be necessary for a mass response to COVID-19.
- DMS' Division of Human Resource Management has provided guidance to agencies on implementing preventive actions in the workplace, reporting symptoms, using leave, utilizing health insurance benefits, and applying travel restrictions and telework policies.
- DMS' Division of State Group Insurance continues to coordinate with health plan providers to ensure that state employee health plan members receive the health benefits that can assist them and their dependents if needed.
- DMS' Division of Real Estate Development and Management (REDM) continues to provide guidance to agency facility managers across the state on steps to take to prevent workplace contamination and to pre-position environmental vendors to mobilize in the event a viricidal cleaning is needed.
- DMS' Division of Real Estate Development and Management continues to identify, purchase, and distribute additional hand sanitizing gel and cleaning supplies to state-maintained facilities.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with users and vendor of the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with statewide public safety communications personnel on their plans to ensure emergency communications systems are not impacted by potential reductions in staffing resources.

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

- Florida State Parks remain open for recreational day use; however, all State Parks have adjusted their operating hours to 8 a.m. to 5 p.m.The Department continues to monitor new developments closely and will make further adjustments as necessary based on any new Department of Health or CDC guidance received to ensure protection of our staff and visitors. For the latest information on park operating hours and operational status, please visit floridastateparks.org.
- Effective March 17, DEP is cancelling all events, activities, special event reservations, pavilion rentals and camping reservations at Florida State Parks for the next 60 days.
  - Existing overnight camping reservations that begin Wednesday, March 18, will be honored. Visitors must arrive prior to 5 p.m. on March 18,to secure their reservation. After Wednesday, all reservations moving forward will be cancelled and refunded. Beginning Friday, March 20, campgrounds and all overnight accommodations will be fully closed.
  - ReserveAmerica, the Florida State Parks partner in camping reservations, will reach out to all affected parties to refund camping reservations. ReserveAmerica can also be reached directly at 1-800-326-3521or TDD 888-433-0287 if visitors have questions or need to modify existing reservations.
  - DEP's Office of Resilience and Coastal Protection facilities will also be closing the following centers until further notice: Apalachicola National Estuarine Research Reserve, Guana Tolomato Matanzas (GTM) National Estuarine Research Reserveand Rookery Bay National Estuarine Research Reserve.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These

AMERICAN OVERSIGHT

droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

AMERICAN OVERSIGHT

The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.

- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

AMERICAN OVERSIGHT

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE, Fla. — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Governor Ron DeSantis is in constant communication with Florida Division of Emergency Management Director Jared Moskowitz and State Surgeon General Dr. Scott Rivkees as the State of Florida continues to monitor and respond to the threat of COVID-19.

Today, in a briefing at the State Emergency Operations Center, Governor DeSantis announced the following:

- Governor DeSantis announced he is going to supplement federal Small Business Administration (SBA) loans. The Governor activated the Florida Small Business Emergency Loan Program. Up to $50 million has been allocated for the program.
- Governor Ron DeSantis directed the Department of Revenue to provide flexibility on the deadlines of taxes due such as corporate income tax and sales tax to assist businesses that are adversely impacted from COVID-19 mitigation measures.
- Floridians throughout the state are lending a hand to stop the spread of COVID-19:
  - Members of the Florida House of Representatives have been activated to their National Guard units,
  - The Players Championship donated thousands of pounds of food to Feeding Northeast Florida,
  - Miami-Dade County school administrators are handing out computers and mobile devices, and
  - Comcast agreed to provide free WiFi for the next 60 days to kids who do not have it.
- The Miami Dolphins, Jacksonville Jaguars and the Orange County Convention Center have agreed to open their parking lots to stage supplies and locate testing sites.
- Restaurants throughout the state including Jimmy John's in Tallahassee and Toasted Restaurant in Orange County are providing children with free lunch throughout the week.
- Drive through testing sites are expected to open, throughout the state, in addition to the first proposed state site at Memorial Healthcare System in Broward. So far, sites are being developed in in Myers, Pensacola, West Palm Beach and Tallahassee.
- The Floridians who were at held at the Dobbins Air Reserve Base are on their way back to Florida; 15 Floridians have elected to stay at the base to care for their family members.
- On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

More Information on COVID-19

To find the most up-to-date information and guidance on COVID-19, please visit the Department of Health's dedicated COVID-19 webpage. For information and advisories from the Centers for Disease Control (CDC), please visit the CDC COVID-19 website. For more information about current travel advisories issued by the U.S. Department of State, please visit the travel advisory website.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

AMERICAN OVERSIGHT

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneezing into a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from any other destination with community transmission should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, he or she should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the state has taken to prepare for and respond to COVID-19:

DEPARTMENT OF HEALTH

- At the direction of Governor DeSantis, State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.
- Established an Incident Management Team to coordinate response operations.
- Defined a high-level phased response strategy for COVID-19.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined the calls.
- Established a public call center for questions regarding COVID-19. The call center launched Monday, March 2.
- Developed and distributed COVID-19 presentation materials to County Health Departments (CHD) for use at community meetings.
- Activated the Joint Information Center in coordination with the Division of Emergency Management.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUI) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Approved and disseminated an updated Clinician Screening Tool for identifying COVID-19 PUIs.
- Distributed a health care provider letter regarding enhanced surveillance and preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated laboratory guidance regarding implementation of testing at State Public Health Laboratories.
- Developing a laboratory surge plan.
- Developing a clinician-level briefing for medical audiences.
- Identifying and monitoring close contacts of presumptive cases. Any close contacts with symptoms will be tested.
- Implemented private lab testing.
- Developed and disseminated pandemic planning guidance.
- Advised CHDs and HCCs to retain expired personal protective equipment until further until further notice.
- Continued development of public information resources.
- Developing infographics for first responders (fire, law enforcement and EMS) regarding infection control and personal protection for COVID-19.
- At the Governor's direction, a public-private partnership has been put in place between Memorial Healthcare in Broward and the National Guard to set up a mobile testing unit.
- At the direction of Governor DeSantis hiring additional epidemiologists from university health programs to help with workload.
- Governor DeSantis directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and assisted living facility licenses for 90 days to remove distraction from patient care.

AGENCY FOR HEALTH CARE ADMINISTRATION

AMERICAN OVERSIGHT

- AHCA distributed a provider alert to licensed health care providers regarding the Division of Emergency Management's new Emergency Order tightening visitation restrictions at residential and long-term care facilities.
- AHCA, in coordination with the DEM and the Department, is hosting ongoing statewide calls for nursing homes, assisted living facilities, intermediate care facilities, the Agency for Persons with Disabilities, group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting visitors and providing updates.
- AHCA, in coordination with DEM and the Department, is hosting ongoing statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- After previously opening an event on the Emergency Status System (ESS) for hospitals to enter census information, emergency room status updates and isolation beds, AHCA expanded the ESS event to track nursing homes and assisted living facility bed capacity, effective March 15.
- The Agency for Health Care Administration (AHCA) will be granting a 90-day extension to all licenses for health care providers and regulated facilities.
- AHCA is distributing information regarding regulatory flexibilities created by waivers from the Centers for Medicare and Medicaid Services (CMS) related to skilled nursing facilities, critical access hospitals, home health agencies, durable medical equipment, provider enrollment, etc.
- AHCA participated in a collaborative call with the Florida Health Care Association, Florida Hospital Association and LeadingAge Florida to discuss patient transfer arrangements between health care facilities such as nursing homes and hospitals.
- The Florida Medicaid Program announced coverage of commercial testing for COVID-19 for dates of service back to February 4.
- AHCA submitted requests to CMS for flexibility for Florida's program under the federal declaration of a state of emergency.

AGENCY FOR PERSONS WITH DISABILITIES

- The agency's three state-run centers in Marianna, Gainesville and Chattahoochee, as well as APD-licensed group homes, are restricting visitors in compliance with the Executive Order to protect the health and safety of our customers.
- APD Adult Day Training programs across the state are screening visitors for possible exposure to COVID-19 using a visitor questionnaire. The questionnaire is also being used to screen visitors coming into APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA), in coordination with the Administration for Community Living (ACL), facilitated a virtual Town Hall meeting at the request of Hallandale Beach Mayor Joy Cooper. More than 2,700 seniors were online for the meeting. Charlotte Mather Taylor, Executive Director of the Aging and Disability Resource Center (ADRC) of Broward County, led the discussion with participation from ACL Representative Constantino Miskos, Chen Senior Medical Center, and representatives from Emergency Medical Services. Their primary topics of conversation centered on the work being done, specifically by the Area Agency on Aging, to continue to provide people resources and services to maximize support during COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, DOEA provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the safe delivery of home-delivered meals to prevent spread of respiratory infection.
- DOEA continues to provide updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, they are provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.
- "The Vision 2020: Looking Towards Your Age-Friendly Future Tour" to five communities across Florida originally planned for April 20th - April 24th and co-hosted by the Department and AARP has been postponed to protect the health and wellness of seniors, volunteers and staff.
- All Serving Health Insurance Needs of Elders (SHINE) participation in scheduled outreach events, presentations, and in-person SHINE/Senior Medicare Patrol (SMP) counseling has been suspended until further notice. SHINE volunteers and staff will continue to provide counseling services, but the services will be conducted over-the-phone with future considerations for the use of webinars and Facebook LIVE.
- DOEA Secretary Prudom held a conference call with The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors to discuss the suspension of face-to-face assessments. CARES assessors will provide reviews through phone or tele-technology to reduce client/staff exposure and reduce spread.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the provision on completing assessments for multiple program types, specifically for clients who have chosen to self-isolate.
- DOEA provided updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers, and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families' (DCF) Office of Child Welfare is sending regular communication about COVID-19 specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19). An FAQ document for providers was also posted prominently on DCF's Child Care webpage.
- DCF's Office of Child Welfare is disseminating a survey to licensed child care providers to assess closures throughout the state. Currently, the decision to close is at the discretion of each individual facility.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF is leading status update calls with both internal leadership and leadership from external contracted partners. For the time being, these calls will take place twice weekly, every Tuesday and Friday.
- DCF General Services staff throughout the state are working with lessors and janitorial contractors to increase sanitizing measures in office

AMERICAN OVERSIGHT

buildings, especially restrooms and common areas. They also began taking inventory of sanitizing supplies (disinfecting wipes, Lysol spray, hand-sanitizer, etc.) and are ordering more as needed.

- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility. At this time, there are no cases of patients or facility staff testing positive for COVID-19.
- DCF's Office of Economic Self-Sufficiency is communicating with DEO regarding work requirements and CareerSource operations and availability.
- DCF's Office of Economic Self-Sufficiency implemented screening procedures, including a set of questions that must be asked prior to entry, at all economic self-sufficiency storefronts.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

DEPARTMENT OF MILITARY AFFAIRS

- There have been over 200 Florida National Guardsmen placed on state active duty in support of COVID-19.
- The Florida National Guard is activating all of their medical professionals (Army Combat medic specialists and Air Force medical technicians) to support Florida Department of Health's drive-through screening operations. Guardsmen have reported in and formed Task Force Medical already.
- The Florida National Guard has activated soldiers to augment the State Logistics Readiness Center in Central Florida.

VOLUNTEER FLORIDA

- Volunteer Florida is working with state counterparts and FEMA to develop volunteer plans.
- Volunteer Florida's National Service Department has discussed using AmeriCorps members in food banks as feeding needs increase.
- Volunteer Florida is having conversations with Mass Care on the anticipated needs of volunteers. Together, we are working on a plan for volunteers with volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.

FLORIDA DEPARTMENT OF EDUCATION

- Commissioner of the Florida Department of Education (FDOE) Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks. To stay up to date on school closure information, visit: org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, and their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- The State University System will continue to evaluate the effectiveness of remote learning and the need to teach remotely in order to protect our students and the university community.
- The State University System will continue to work with the Florida Department of Health and the Emergency Operations Center to determine if the initial two weeks of remote learning is sufficient.
- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a

AMERICAN OVERSIGHT

limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.

- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING - While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- All state universities have implemented campus-wide critical incident or emergency management teams that are meeting regularly to prepare for the impacts of the COVID-19 virus.
- All universities are preparing to transition to remote instructional delivery for a two-week period during March and early April, depending on each institution's Spring Break, and are informing students not to return to campus during this period.
- The Board of Governors will be conducting its March meeting via conference call and will not have a face-to-face meeting at USF as was originally scheduled.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
    - Inmates will continue to have access to mail, email, phone calls and video visitation.
    - Legal visits will not be impacted.
    - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
    - Have traveled internationally or on a cruise within the last 14 days.
    - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath.
    - Have had contact with someone who has been or is under investigation for COVID-19.
- All non-critical inmate transfers have been suspended.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Division of Elections offers a toll-free Voter Assistance Hotline, 1.866.308.6739 (in English and Español), available Monday - Friday, 8:00 am - 5:00 pm ET, with extended hours during statewide elections. For hearing or speech impaired, please contact the Division using the Florida Relay Service, 1.800.955.8771 (TDD), 1.800.955.8770 (Voice), or 1.877.955.8773 (Español). Voters can also contact their local Supervisor of Elections
- The Florida Department of State is in constant communication with Supervisors of Elections regarding Tuesday's Presidential Preference Primary Election and is providing guidance and information to voters through traditional and social media messages:
- The Florida Department of State been informing voters of the various options Florida provides in order to cast their ballot ahead of Tuesday's election and on Election Day. Further, we have assured Florida's voters that otherwise healthy poll workers can work on Election Day. DOS has notified voters who have been ordered to self-isolate or who are experiencing symptoms of COVID-19 and who have not yet voted, of the option to have someone pick up their ballot for them.
    - As with any election, before a voter goes to the polls on Tuesday, they should check with their local Supervisor of Elections. Now more than ever, it is critical that we continue to provide voters with clear and consistent information regarding polling place locations. The most current and up-to-date polling place information (per 71, Florida Statutes) is going to be on the voter's respective **Supervisor of Elections website**.
    - The Division of Elections website provides prominent placement of the Voter Information Lookup where voters can check their voter status and find their polling place information. This polling place information is linked to the voters' respective Supervisor of Elections database. The most current and up-to-date polling place information (per 71, Florida Statutes) is going to be from the voter's respective **Supervisor of Elections.**
- The Florida Department of State continues to support and work with local Supervisors of Elections and Emergency Management officials to ensure the Supervisors needs are met regarding sanitization and cleaning needs for the Presidential Preference Primary Election on Tuesday.

FLORIDA DEPARTMENT OF TRANSPORTATION

- FDOT is coordinating with other state and local agencies to help ensure mobility around the temporary testing site in Broward County. Once the site is open, FDOT plans to publicize testing site information on highway advisory radio.
- FDOT completed a request to provide necessary supplies to harbor pilots working at seaports.
- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- Pursuant to Executive Order 20-52 issued by Governor DeSantis, FDOT Secretary Thibault has suspended size and weight restrictions for divisible loads on any vehicles transporting emergency equipment, services, supplies, and necessary agricultural commodities on state roads.
- COVID-19 educational materials have been posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials have been posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.

AMERICAN OVERSIGHT

- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- At the direction of Governor Ron DeSantis, Florida Department of Highway Safety and Motor Vehicles Executive Director Terry L. Rhodes has issued an Emergency Order extending all Florida driver licenses and identification cards that will expire in the next 30 days.
- Pursuant to Executive Order 20-52, FLHSMV Executive Director Rhodes waived commercial truck hours of service regulations and other related regulations so that emergency supplies, equipment, commodities and resources can be moved more quickly and efficiently throughout the state.
- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to complete transactions for driver licenses, ID cards, motor vehicle or vessel registrations, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association as well as Tax Collectors across the state to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis has requested the federal Small Business Administration (SBA) make the Economic Injury Disaster Loan program available for Florida's small businesses impacted by COVID-19. The Florida Department of Economic Opportunity (DEO) stands ready to assist Florida's small businesses in accessing this funding when available.
- Governor Ron DeSantis has activated the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by DEO, will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/.

VISIT FLORIDA

- VISIT FLORIDA is wholly focused on providing health and safety information to travelers and Floridians. This includes the activation of Florida Now, which includes the latest updates from state emergency response professionals hosted on VisitFlorida.com.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19
- To protect the health and safety of the traveling public and staff, VISIT FLORIDA's four welcome centers will be closed until further notice.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue is advising child support customers who are scheduled for court hearings related to their child support cases to check with the local courts where the hearings are scheduled in case the courts have new requirements, such as appearing telephonically.
- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- Florida Department of Law Enforcement (FDLE) is working with state and local agencies and the Florida National Guard to set up testing collection sites in multiple locations across Florida.
- The Florida Department of Law Enforcement (FDLE) Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.

AMERICAN OVERSIGHT

- The Florida Department of Juvenile Justice has modified screening protocols and procedures for youth taken into custody by law enforcement who are brought to juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice has sent a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has instituted additional screening measures for outside vendors who work within juvenile facilities and non-essential travel of staff members has been stopped. Visitors are limited to business-related visitors only (i.e., vendors, no personal visitors, no volunteers at this time). The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted. Clinical personnel, however, are still permitted to visit youth for treatment purposes, and attorneys are still permitted to conduct legal visits with youth.

FLORIDA DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).
- Governor DeSantis has directed the Department of Business and Professional Regulation Secretary Halsey Beshears, in coordination with the Florida Department of Health, to issue social distancing guidance to restaurants and bars.
- Governor DeSantis sent a letter to the federal Small Business Administration to turn on the SBA loan program for small businesses.
- The Florida Department of Business and Professional Regulation (DBPR) has suspended all official business visits, including inspections, that involve licenses located at a facility covered under the visitation restrictions implemented pursuant to FDEM Emergency Order 20-002.
- DBPR is incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices. Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises.

FLORIDA DEPARTMENT OF MANAGEMENT SERVICES

- Governor DeSantis directed the Department of Management Services Secretary Jonathan Satter to allow state employees to donate and transfer their available leave time to other state employees to mitigate the impacts of school closures.
- The Florida Department of Management Services' (DMS) Emergency Support Function-7 (ESF-7) Logistics team continues to coordinate with the Department of Health and the Division of Emergency Management on identifying the equipment or supplies that may be necessary for a mass response to COVID-19.
- DMS' Division of Human Resource Management has provided guidance to agencies on implementing preventive actions in the workplace, reporting symptoms, using leave, utilizing health insurance benefits, and applying travel restrictions and telework policies.
- DMS' Division of State Group Insurance continues to coordinate with health plan providers to ensure that state employee health plan members receive the health benefits that can assist them and their dependents if needed.
- DMS' Division of Real Estate Development and Management (REDM) continues to provide guidance to agency facility managers across the state on steps to take to prevent workplace contamination and to pre-position environmental vendors to mobilize in the event a viricidal cleaning is needed.
- DMS' Division of Real Estate Development and Management continues to identify, purchase, and distribute additional hand sanitizing gel and cleaning supplies to state-maintained facilities.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with users and vendor of the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with statewide public safety communications personnel on their plans to ensure emergency communications systems are not impacted by potential reductions in staffing resources.

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

- All State Parks have adjusted their operating hours to 8 a.m. to 5 p.m. daily. The Department continues to monitor new developments closely and will make further adjustments as necessary based on any new Department of Health or CDC guidance received to ensure protection of our staff and visitors. For the latest information on park operating hours and operational status, please visit floridastateparks.org.
- Currently all Florida State Parks and campgrounds, and Office of Resilience and Coastal Protection facilities (aquatic preserves and National Estuarine Research Reserves), remain open to the public. However, in an abundance of caution and consistent with Center for Disease Control and Prevention (CDC) guidance, DEP announced on March 13 that it is cancelling all events and activities at these facilities effective immediately and until further notice.
  - This includes DEP events and includes activities such as tours and visitor centers that involve large groups and/or or people in close proximity to others. People with questions regarding any privately scheduled event should check with the host of the event or the facility directly. For the latest closure and cancellation information, please visit floridastateparks.org.
- If your travel plans have changed and you need to modify camping or cabin reservations, please visit ReserveAmerica.com, call Reserve America at 1-800-326-3521 or TDD 888-433-0287 or text to 904-204-3216.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

AMERICAN OVERSIGHT

Table
table

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed

AMERICAN OVERSIGHT

settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.

AMERICAN OVERSIGHT

Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.

AMERICAN OVERSIGHT

- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.

- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
    - Inmates will continue to have access to mail, email, phone calls and video visitation.
    - Legal visits will not be impacted.
    - FDC has partnered with vendors to provide some complimentary phone and video visitation services.

- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:

    - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
    - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
    - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.

AMERICAN OVERSIGHT

- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
    - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
    - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
    - Work with public health officials to do everything possible to prepare and respond; and

AMERICAN OVERSIGHT

- Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Subject: FW: The State of Florida Issues Updates on COVID-19
Date: Thursday, March 12, 2020 3:13:12 PM
Attachments: Florida Department of Health Announces New Positive COVID-19 Cases in Florida_3.11_1.pdf

---

Hi Jennifer,

We should have our CHARTS staff design a better way for to communicate to the public about recent cases. The table they are using below (it is also on the FDOH website) is confusing.

Just a suggestion!

Thank you,

Kelly Phipps Grove, MS
Strategic Planning Lead, Community Health Assessment
Division of Public Health Statistics and Performance Management

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 57-year old male in Lee County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 65-year old male in Broward County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 61-year old male in Broward County tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with Port Everglades.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological for the fourth person connected to Port Everglades is ongoing.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

AMERICAN OVERSIGHT

The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.

- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been

AMERICAN OVERSIGHT

confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 57-year old male in Lee County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 65-year old male in Broward County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 61-year old male in Broward County tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with Port Everglades.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological for the fourth person connected to Port Everglades is ongoing.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday

AMERICAN OVERSIGHT

at 2:00 EST.

- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 57-year old male in Lee County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 65-year old male in Broward County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 61-year old male in Broward County tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with Port Everglades.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological for the fourth person connected to Port Everglades is ongoing.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday

AMERICAN OVERSIGHT

at 2:00 EST.

- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 63-year old male New York resident who is currently in St. Johns County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case where this individual traveled from New York to attend Daytona Bike Week in Daytona, Florida. The New York Department of Health is leading the epidemiological investigation for this individual.
- A 56-year old male in Miami-Dade County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 70-year old male in Broward County tested as positive. He is isolated and will continue to remain isolated until cleared by public health officials. This individual attended an Emergency Medical Services (EMS) Conference in Tampa, Florida. The epidemiological investigation is underway.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE, Fla. - The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Governor Ron DeSantis is in constant communication with Florida Division of Emergency Management Director Jared Moskowitz and State Surgeon General Dr. Scott Rivkees as the State of Florida continues to monitor and respond to the threat of COVID-19.

Today, in a briefing at the Florida Emergency Operations Center, Governor DeSantis announced the following:

- One additional person has died in Clay County.
- Earlier this week, the state received news that an ALF resident who passed away had tested positive for COVID-19. The state then learned that two additional residents in the same facility passed away. Those individuals tested negative for COVID-19.
- Since February 22, FDOH labs in Miami, Jacksonville, and Tampa have tested more than 1,600 people.
- During the week of March 8, private labs began processing COVID-19 tests. Since then, more than 50 private labs have completed more than 2,050 tests.
- The Florida National Guard is assembling a drive-through testing facility at Broward Memorial Healthcare System.
- To support communities responding to COVID-19, Governor DeSantis has directed FDEM Director Jared Moskowitz to expedite the delivery of more than $170 million in Hurricane Irma reimbursements to cities, counties and hospital districts that have now reached the 50-percent auditing threshold to receive funds.
- To support the volume of calls to the COVID-19 call center and the reemployment assistance call center, Governor DeSantis directed State Surgeon General Dr. Rivkees and DEO Director Ken Lawson to expand the call-handling capacity of those call centers.

More Information on COVID-19

To find the most up-to-date information and guidance on COVID-19, please visit the Department of Health's dedicated COVID-19 webpage. For information and advisories from the Centers for Disease Control (CDC), please visit the CDC COVID-19 website. For more information about current travel advisories issued by the U.S. Department of State, please visit the travel advisory website.
For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

AMERICAN OVERSIGHT

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneezing into a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from any other destination with community transmission should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, he or she should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the state has taken to prepare for and respond to COVID-19:

DEPARTMENT OF HEALTH

- At the direction of Governor DeSantis, State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health (DOH), working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in-state and all out-of-state travel for state employees for 30 days.
- DOH established an Incident Management Team to coordinate response operations.
- DOH defined a high-level phased response strategy for COVID-19.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined the calls.
- DOH established a public call center for questions regarding COVID-19. The call center launched Monday, March 2.
- DOH developed and distributed COVID-19 presentation materials to County Health Departments (CHD) for use at community meetings.
- DOH activated the Joint Information Center in coordination with the Division of Emergency Management.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- DOH distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUI) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- DOH approved and disseminated an updated Clinician Screening Tool for identifying COVID-19 PUIs.
- DOH distributed a health care provider letter regarding enhanced surveillance and preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- DOH implemented testing at all three State Public Health Laboratories.
- DOH distributed updated CDC guidance for schools to CHDs and the Department of Education.
- DOH distributed updated laboratory guidance regarding implementation of testing at State Public Health Laboratories.
- DOH developing a laboratory surge plan.
- DOH developing a clinician-level briefing for medical audiences.
- DOH identifying and monitoring close contacts of presumptive cases. Any close contacts with symptoms will be tested.
- DOH implemented private lab testing.
- DOH developed and disseminated pandemic planning guidance.
- DOH advised CHDs and HCCs to retain expired personal protective equipment until further until further notice.
- DOH continued development of public information resources.
- DOH developing infographics for first responders (fire, law enforcement and EMS) regarding infection control and personal protection for COVID-19.
- At the Governor's direction, a public-private partnership has been put in place between Memorial Healthcare in Broward and the National Guard to set up a mobile testing unit.
- At the direction of Governor DeSantis hiring additional epidemiologists from university health programs to help with workload.
- Governor DeSantis directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and assisted living facility licenses for 90 days to remove distraction from patient care.

THE DIVISION OF EMERGENCY MANAGEMENT

- Yesterday, Governor DeSantis and DEM Director Jared Moskowitz announced that Florida is continuing to order supplies and personal protective equipment in an effort to mitigate and contain the spread of COVID-19 in the state.
- After conducting a thorough assessment of needs, Director Moskowitz has requested the following supplies through Direct Federal Assistance. Supplies are being delivered on a rolling basis, and inventory is being distributed throughout the state 24 hours a day.
  - 5 mobile intensive care units
  - 5,000 ventilators
  - 5,000 hospital beds
  - 50,000 two oz. bottles of hand sanitizer
  - 250,000 coveralls
  - 500,000 gloves

AMERICAN OVERSIGHT

    - 500,000 gowns
    - 500,000 collection kits
    - 100,000 16 oz. bottles of hand sanitizers
    - 150,000 Personal Protective Equipment kits, including coveralls, gowns, and goggles
    - 2 million N95 face masks
- Director Moskowitz is working with the federal government to determine if there is capacity to add US Navy Mercy-Class ships at Florida ports.
- Three field hospitals are being deployed.
- Mobile COVID-19 testing is also being implemented.

AGENCY FOR HEALTH CARE ADMINISTRATION

- Secretary Mayhew is working directly with hospitals and large health systems to identify potential vacant wings or buildings to provide additional hospital inpatient capacity should it become necessary.
- On March 16, Florida became the first state to receive CMS approval of its 1135 Medicaid Waiver giving AHCA more flexibility for its COVID-19 response efforts. This federal action lifts Medicaid prior authorization requirements for critical health care services and allows for expedited provider enrollment.
- AHCA distributed a provider alert to licensed health care providers regarding the Division of Emergency Management's new Emergency Order tightening visitation restrictions at residential and long-term care facilities.
- AHCA, in coordination with the DEM and the Department, is hosting ongoing statewide calls for nursing homes, assisted living facilities, intermediate care facilities, the Agency for Persons with Disabilities, group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting visitors and providing updates.
- AHCA, in coordination with DEM and the Department, is hosting ongoing statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- After previously opening an event on the Emergency Status System (ESS) for hospitals to enter census information, emergency room status updates and isolation beds, AHCA expanded the ESS event to track nursing homes and assisted living facility bed capacity, effective March 15.
- The Agency for Health Care Administration (AHCA) will be granting a 90-day extension to all licenses for health care providers and regulated facilities.
- AHCA is distributing information regarding regulatory flexibilities created by waivers from the Centers for Medicare and Medicaid Services (CMS) related to skilled nursing facilities, critical access hospitals, home health agencies, durable medical equipment, provider enrollment, etc.
- AHCA distributed information to health care providers regarding **guidance and clarifications on DEM's Emergency Order No. 20-006.**
- AHCA participated in a collaborative call with the Florida Health Care Association, Florida Hospital Association and LeadingAge Florida to discuss patient transfer arrangements between health care facilities such as nursing homes and hospitals.
- The Florida Medicaid Program announced coverage of commercial testing for COVID-19 for dates of service back to February 4.

AGENCY FOR PERSONS WITH DISABILITIES

- APD and AHCA hosted a Provider conference call to share information on modifications to some existing policies and practices during this state of emergency due to COVID -19. APD and AHCA are researching responses to additional questions raised during the call. The answers will be posted on apdcares.org.
- APD is implementing telework for employees throughout the state as directed by Governor DeSantis to reduce possible exposure to COVID-19.
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee, as well as APD-licensed group homes, are restricting visitors in compliance with the Executive Order to protect the health and safety of our customers.
- APD Adult Day Training programs across the state are screening visitors for possible exposure to COVID-19 using a visitor questionnaire. The questionnaire is also being used to screen visitors coming into APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance, in addition to CMS guidance, to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Secretary Prudom participated in a conference call with the Administration on Community Living (ACL) and ten other State Units on Aging. He presented an update on what Florida is doing regarding issues and challenges during COVID-19.
- DOEA released an updated **interactive** Elder Needs Index (ENI). *Best opened in Google Chrome.*
- DOEA's Long-Term Care Ombudsman Program (LTCOP) hosted a conference call with regional ombudsman managers to discuss strategies for advocacy during COVID-19 environment.
- LTCOP participated in conference calls with National Association of State Ombudsman (NASOP), Florida Healthcare Association (FHCA), and Consumer Voice with Administration for Community Living (ACL). All concerning COVID-19.
- DOEA participated on a statewide call coordinated by the Florida Association of Service Providers (FASP) statewide regarding COVID-19 issues, trends, and concerns.
- DOEA participated in an Aging and Disability Resource Center (ADRC) workgroup conference call to discuss specific issues related to COVID-19 and statewide waiver requests.
- DOEA coordinated planning with the Agency for Health Care Administration (AHCA) to discuss Adult Day Care Centers and the provision of meals should they close.
- DOEA participated on the United States Department of Agriculture's (USDA) southeast region call regarding COVID-19 as it relates Adult Care Food Programs.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families' (DCF) Office of Child Welfare is sending regular communication about COVID-19 specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19). An FAQ document for providers was also posted prominently on DCF's Child Care webpage.
- DCF's Office of Child Welfare is disseminating a survey to licensed child care providers to assess closures throughout the state. Currently, the decision to close is at the discretion of each individual facility.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF is leading status update calls with both internal leadership and leadership from external contracted partners. For the time being, these calls will take place twice weekly, every Tuesday and Friday.
- DCF General Services staff throughout the state are working with lessors and janitorial contractors to increase sanitizing measures in office buildings, especially restrooms and common areas. They also began taking inventory of sanitizing supplies (disinfecting wipes, Lysol spray, hand-sanitizer, etc.) and are ordering more as needed.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus

AMERICAN OVERSIGHT

prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility. At this time, there are no cases of patients or facility staff testing positive for COVID-19.
- DCF's Office of Economic Self-Sufficiency is communicating with DEO regarding work requirements and CareerSource operations and availability.
- DCF's Office of Economic Self-Sufficiency implemented screening procedures, including a set of questions that must be asked prior to entry, at all economic self-sufficiency storefronts.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care. In addition, we are temporarily suspending admissions in our network of state veterans' homes. Thank you for your understanding.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- The VA Sunshine Healthcare Network (VISN 8) is taking additional steps to slow the spread of COVID-19 to protect healthcare system's capabilities, healthcare workers and veterans. Facilities within the VISN 8 Network include the Bay Pines VA Healthcare System, James A. Haley Veterans' Hospital and Clinics, Miami VA Healthcare System, North Florida/South Georgia Veterans Health System, Orlando VA Healthcare System, VA Caribbean Healthcare System, and the West Palm Beach VA Medical Center.
  - These actions include:
    - VISN 8 facilities are transitioning to virtual appointments to the fullest extent to allow veterans to stay at home, avoid exposure to others and reduce their risk; Veterans with appointments will be contacted several days beforehand to discuss virtual appointment options available to them.
    - Veterans can help with this transition by visiting the VA Video On-Demand webpage for more information: https://mobile.va.gov/content/getting-started-0.
    - Veterans enrolled for care within VISN 8 can continue to use the VISN 8 Clinical Contact Center for 24/7 virtual urgent care by calling 1-877-741-3400 (toll free) or by using the VA Health Chat App. Veterans who are concerned they may have symptoms of Coronavirus, flu or cold should contact the center first before coming to a VA facility.
    - VISN 8 facilities will cease non-urgent elective procedures. Any impacted veterans will be contacted directly by their health care team to reschedule. Urgent and emergent elective procedures will continue during this period.
    - VISN 8 facilities are further restricting visitations. Only one visitor will be permitted per veteran if required to provide assistance moving a patient to and from an appointment, providing support to an inpatient in a palliative or hospice care unit, or for veterans who have major procedures. Visitors who screen positive will not be granted access to the medical centers.
- These newly announced actions do not supersede or replace activities announced by VISN 8 last week. All VISN 8 facilities continue to use mandatory and enhanced screening protocols for all patients, employees and visitors, have restricted visitations to certain units, and have taken many other actions to mitigate the infection and spread of the virus.
- All VA Vet Centers in Florida, which provide readjustment counseling and outreach services to veterans and families, are open and implementing enhanced screening protocols. At this time, veterans may appear in person or opt in advance for an optional phone consultation.
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences. In addition, cemetery personnel will be discouraged from handshaking and any unnecessary physical contact to minimize the potential transmission of germs and viruses until the pandemic conditions are under control.
- Suspension of VA Travel Board Hearings - The Board of Veterans' Appeals (U.S. Department of Veterans Affairs) is suspending Travel Boards until May 1, 2020, due to COVID-19 response efforts. The Board will work with veterans and veteran service organizations and representatives to continue video hearings and provide virtual hearings where possible.
- All FDVA and VA facilities remain fully operational.

DEPARTMENT OF MILITARY AFFAIRS

- There have been 689 Florida National Guardsmen activated in support of COVID-19.
- The Florida National Guard is activating medical professionals (Army Combat Medic Specialists and Air Force Medical Technicians) in support of the Florida Department of Health's (DOH) Drive-Through Screening operations. The Guardsmen have reported in and formed Task Force Medical.
- The Florida National Guard has activated Guardsmen to augment the State Logistics Readiness Center, the State's Logistics Branch, as well as facilitate state wide logistics needs of the Florida National Guard formations on mission.
- The Florida National Guard has activated Guardsmen to augment the State Emergency Operations Center and local emergency management offices across the state.

VOLUNTEER FLORIDA

- Volunteer Florida is encouraging volunteers to screen themselves for COVID-19 (per CDC and Florida Department of Health guidelines) before serving.
- Volunteer Florida is pushing out VOAD organizational guidance to ESF-15 partners.
- Volunteer Florida is working with state counterparts and FEMA to develop volunteer plans.
- Volunteer Florida's National Service Department has discussed using AmeriCorps members in food banks as feeding needs increase.
- Volunteer Florida continues to work with Mass Care on the anticipated needs of volunteers.
- Volunteer Florida has asked all VOAD partners to review their continuity of operations so that there is no service delivery disruption.

FLORIDA DEPARTMENT OF EDUCATION

- Commissioner of the Florida Department of Education (FDOE) Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks. To stay up to date on school closure information, visit: org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.

AMERICAN OVERSIGHT

- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, and their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- The SUS has directed all state universities to continue remote instruction through the end of the spring semester.
- All students who can return home should return home.
- The SUS has directed that traditional on-campus commencement ceremonies will not be held in May. Instead, each university is directed to develop an alternate schedule or method of delivery.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Volunteer activities within correctional institutions statewide have been suspended.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled internationally or on a cruise within the last 14 days.
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath.
  - Have had contact with someone who has been or is under investigation for COVID-19.

- All non-critical inmate transfers have been suspended.
- New commitments and intakes have been restricted.
- Outside inmate work squads have been restricted.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- FDOT coordinated with transit agencies throughout the state to ensure the safe return of the Florida residents who were quarantined in Georgia and had previously been aboard the Grand Princess voyage outside of California.
- FDOT is coordinating with other state and local agencies to help ensure mobility around the temporary testing site in Broward County. Once the site is open, FDOT plans to publicize testing site information on highway advisory radio.
- FDOT completed a request to provide necessary supplies to harbor pilots working at seaports.
- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department continue to host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- Pursuant to Executive Order 20-52 issued by Governor DeSantis, FDOT Secretary Thibault has suspended size and weight restrictions for divisible loads on any vehicles transporting emergency equipment, services, supplies, and necessary agricultural commodities on state roads.
- COVID-19 educational materials have been posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials have been posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- At the direction of Governor Ron DeSantis, the Florida Department of Highway Safety and Motor has issued an Emergency Order extending all Florida driver licenses and identification cards that will expire in the next 30 days.
- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to complete transactions for driver licenses, ID cards, motor vehicle or vessel registrations, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association as well as Tax Collectors across the state to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.
- Pursuant to Executive Order 20-52 issued by Governor Ron DeSantis, FLHSMV Executive Director Rhodes has waived commercial truck hours of service regulations and other related regulations so that emergency supplies, equipment, commodities and resources can be moved more quickly and efficiently throughout the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) has created a Frequently Asked Questions document for individuals whose employment has been negatively impacted by mitigation efforts to stop the spread of COVID-19.
- Governor Ron DeSantis activated the Florida Small Business Emergency Bridge Loan Program to support small businesses impacted by COVID-19. The bridge loan program, managed by DEO, provides short-term, interest-free loans to small businesses that experienced economic injury from COVID-19. The application period is open and runs through May 8, 2020. Interested businesses should visit FloridaDisasterLoan.org for more information.
- Governor DeSantis has requested the federal Small Business Administration (SBA) make the Economic Injury Disaster Loan program available for Florida's small businesses impacted by COVID-19. DEO stands ready to assist Florida's small businesses in accessing this funding when available.
- The Business Damage Assessment survey is activated to assess the impact of COVID-19 on Florida's local business operations. The survey,

AMERICAN OVERSIGHT

managed by DEO, will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/.

VISIT FLORIDA

- VISIT FLORIDA is focused on providing health and safety information to travelers and Floridians. All media has been paused.
- VISIT FLORIDA has activated Florida Now, which includes the latest updates from state emergency response professionals hosted on VisitFlorida.com.
- VISIT FLORIDA is actively planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19
- To protect the health and safety of the traveling public and staff, VISIT FLORIDA's four welcome centers will be closed until further notice.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida. VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- Department of Revenue offices in Broward and Miami-Dade counties are closed to the public beginning Wednesday, March 18. This follows precedent of the Miami-Dade State Attorney's Child Support Office. The Department is redirecting child support customers and taxpayers toward the electronic means detailed below for completing child support and general tax activities.
- The Department has added a dedicated COVID-19 webpage for child support customers at floridarevenue.com/childsupport/coronavirus. The new page provides comprehensive information for alternative options for handling many routine child support case activities without visiting a local child support office. Efforts also include rescheduling genetic testing sample collection appointments and postponing other types of appointments.
- The Department of Revenue is advising child support customers who are scheduled for court hearings related to their child support cases to check with the local courts where the hearings are scheduled in case the courts have new requirements, such as appearing telephonically.
- The Department of Revenue has established a dedicated team to address tax-related issues pertaining to COVID-19 and has created an email address, COVID19TAXHELP@floridarevenue.com, where taxpayers can send questions and concerns. The Department encourages all taxpayers to use our e-services applications to file and pay taxes or contact our call center at (850) 488-6800.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in the public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has issued Informational Memorandum OIR-20-03M directing all insurers and other entities regulated by OIR to review and update their business continuity and/or continuity of operations plans. Companies are directed to immediately contact OIR if their continuity plans are activated and/or if business operations become compromised so it can work with insurers to avoid any disruption in consumer services.
- OIR Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01Mto all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and DOH information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations, and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has issued notices to all of its employees providing resources regarding COVID-19 and outlining the steps recommended by the Centers for Disease Control and Florida Department of Health to take preventative health measures.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- Florida Department of Law Enforcement (FDLE) is working with state and local agencies and the Florida National Guard to set up testing collection sites in multiple locations across Florida.
- The Florida Department of Law Enforcement (FDLE) Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has distributed a COVID-19 legal guidance document to all its law enforcement partners in reference to Governor DeSantis' Executive Order and continues regular communication with them.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified screening protocols and procedures for youth taken into custody by law enforcement who are brought to juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice has sent a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has instituted additional screening measures for outside vendors who work within juvenile facilities and non-essential travel of staff members has been stopped. Visitors are limited to business-related visitors only (i.e., vendors, no personal

AMERICAN OVERSIGHT

visitors, no volunteers at this time). The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted. Clinical personnel, however, are still permitted to visit youth for treatment purposes, and attorneys are still permitted to conduct legal visits with youth.

FLORIDA DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

- DBPR shared information with all agency staff statewide pertaining to the declaration of a state public health emergency, state response protocols as ordered in EO 20-51, and FDOH information and resources available on the dedicated FDOH COVID-19 webpage. DBPR communication with staff has emphasized the best practices and preventive steps recommended by FDOH for impeding the spread of respiratory illnesses.
- DBPR's Emergency Coordinating Officer and State Mass Care Coordinator is supporting the initiation of FDOH's joint information center and providing assistance as requested of State Emergency Support Function 6.
- DBPR added a web banner with information on COVID-19 and link to the Florida Department of Health's dedicated COVID-19 webpage at http://www.floridahealth.gov/COVID-19.
- DBPR is incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices. Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises.
- DBPR has suspended all official business visits, including inspections, that involve licenses located at a facility covered under the visitation restrictions implemented pursuant to FDEM Emergency Order 20-002.
- DBPR hosted a senior management meeting with all program directors on Monday, 03.16.2020, to discuss the latest departmental actions and preparations associated with COVID-19 in Florida.
- DBPR is providing guidance to appointed professional licensing boards related to procedural considerations and available technology options for remote, web-based or telephonic board meetings.
- DBPR issued an emergency order, EO 2020-01 to extend license renewal deadlines and renewal requirements for a period of 30 days for licenses with an existing renewal deadline occurring in the months of March or April, 2020.
- DBPR has distributed the Governor's Executive Order (EO-20-68) regarding bars, nightclubs, beaches, and restaurants to all known e-mail addresses of record for alcoholic beverage, public food service, and public lodging license holders. DBPR will continue to push information and guidance relating to the directives of EO 20-68 to impacted parties through the DBPR Emergency Information Page, social media channels, and outreach to industry and public sector partners.
- DBPR has launched a dedicated emergency information page (http://www.myfloridalicense.com/dbpr/emergency/) with direct links to the FDOH COVID-19 webpage as well as information on agency emergency orders, schedule and meeting changes for divisions and boards, and other important departmental information during this emergency.

FLORIDA DEPARTMENT OF MANAGEMENT SERVICES

- DMS Secretary Jonathan Satter issued an emergency order that waived rules to allow for state employees to use any type of accrued leave for instances related to COVID-19, including self-isolation after potential exposure, staying home with children due to child care or school closures, and time needed to take care of dependents like an elder parent. The order also waived rules to expand the ability for employees to donate leave to fellow employees.
- Governor DeSantis directed the Department of Management Services Secretary Jonathan Satter to allow state employees to donate and transfer their available leave time to other state employees to mitigate the impacts of school closures.
- The Florida Department of Management Services' (DMS) Emergency Support Function-7 (ESF-7) Logistics team continues to coordinate with the Department of Health and the Division of Emergency Management on identifying the equipment or supplies that may be necessary for a mass response to COVID-19.
- DMS' Division of Human Resource Management has provided guidance to agencies on implementing preventive actions in the workplace, reporting symptoms, using leave, utilizing health insurance benefits, and applying travel restrictions and telework policies.
- DMS' Division of State Group Insurance continues to coordinate with health plan providers to ensure that state employee health plan members receive the health benefits that can assist them and their dependents if needed.
- DMS' Division of Real Estate Development and Management (REDM) continues to provide guidance to agency facility managers across the state on steps to take to prevent workplace contamination and to pre-position environmental vendors to mobilize in the event a viricidal cleaning is needed.
- DMS' Division of Real Estate Development and Management continues to identify, purchase, and distribute additional hand sanitizing gel and cleaning supplies to state-maintained facilities.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with users and vendor of the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with statewide public safety communications personnel on their plans to ensure emergency communications systems are not impacted by potential reductions in staffing resources.

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

- Florida State Parks remain open for recreational day use; however, all State Parks have adjusted their operating hours for day use to 8 a.m. to 5 p.m. daily. The Department continues to monitor new developments closely and will make further adjustments as necessary based on any new Department of Health or CDC guidance received to ensure protection of our staff and visitors. For the latest information on park operating hours and operational status, please visit floridastateparks.org.
- Effective March 17, DEP is cancelling all events, activities, special event reservations, pavilion rentals and camping reservations at Florida State Parks for the next 60 days. \
    - Existing overnight camping reservations that begin Wednesday, March 18, will be honored. Visitors must arrive prior to 5 p.m. on March 18, to secure their reservation. After Wednesday, all reservations moving forward will be cancelled and refunded. Beginning Friday, March 20, campgrounds and all overnight accommodations will be fully closed.
    - ReserveAmerica, the Florida State Parks partner in camping reservations, will reach out to all affected parties to refund camping reservations. ReserveAmerica can also be reached directly at 1-800-326-3521 or TDD 888-433-0287 if visitors have questions or need to modify existing reservations.

- DEP's Office of Resilience and Coastal Protection facilities will also be closing the following centers until further notice: Apalachicola National Estuarine Research Reserve, Guana Tolomato Matanzas (GTM) National Estuarine Research Reserve and Rookery Bay National Estuarine Research Reserve
- In order to implement the Governor's directive yesterday to limit crowds on public beaches to less than 10, DEP will reduce the visitor capacity at State Parks with beaches and swimming areas by at least 50 percent beginning Thursday, March 19.

FLORIDA LOTTERY

- Yesterday, the Florida Lottery began limiting public access to the nine district offices across the state to a maximum of ten people at time to follow the CDC's recommendation to avoid social gatherings of more than ten people.
- The Lottery is actively working through various options that would allow the Lottery to continue to process winner claims and pay out prizes to

AMERICAN OVERSIGHT

players without them having to physically be in at Headquarters or a district office building. This includes possibly extending the deadline players have to claim winning tickets. An extensive plan to communicate any Lottery business operations changes to players, retailers, and the public is also being prepared should these changes go into effect.
- The Lottery continues to evaluate mission critical positions that have the ability to telecommute and is preparing accordingly in an effort to keep Lottery operations running should further social distancing be needed in the future.

DEPARTMENT OF STATE

- The Florida Department of State is being proactive in sharing resources from its programs and museum properties that are helpful to communities and families who have been ordered to self-isolate or who are seeking resources during the closure of school and cultural facilities. These resources range from virtual tours to online collections to helpful histories. Families are encouraged to connect with Department of State programs via social media for updates and additional content.

Subject:	FW: Travel Restrictions for Employees of the State Personnel System (COVID-19)
Date:	Friday, March 13, 2020 1:30:14 PM

Awareness that depending on how the CHDs view this as essential travel or not, traveling to the certified training was scheduled for the end of this month into April. As we don't currently have a remote learning option, don't have testing options remotely and need hands on training for the soils piece of things, we are struggling to provide another option but postponing until later in April. Your thoughts would be appreciated. This could elevate to you and county health systems as soon as we make any announcement.

Kendra:

It looks like the ACT will be postponed and this is terrible for us at a local level. We are **DROWNING** and need to get folks certified! Can you please consider some kind of remote learning?

Sincerely,

Cheryl L. Dunn, R.S.

Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

AMERICAN OVERSIGHT

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

They just indicated no leave for AL could be approved within the next 30 days and the attached the governors email indicated no "non-essential travel" can be approved. We would probably not approve any leave for out of county trainings – not sure about the ACT.

Colleagues:

To further assist in your response efforts to the Covid-19 situation, we have revised our previously issued FAQ document to incorporate additional questions related to travel restrictions. Other questions have also been updated based upon the additional guidance provided to you from DMS. Finally, there is also a new link under Question 2, on page one, to the Florida Department of Health's Covid-19 Dashboard, which should be helpful.

Should you have any questions at all, please do not hesitate to contact our staff.

At this time we do not plan to hold a conference call on this document, but we will monitor the number of calls, and if warranted we will do so.

Thank you again for all your efforts in assisting us in meeting the state's needs.

From: StateESF8.Planning
To: Coppola, Courtney
Subject: FW: URGENT - 2nd Request - COVID-19
Date: Friday, March 13, 2020 3:51:17 PM

From: McGinnis, Patrick <Patrick.McGinnis@flhealth.gov>
Sent: Friday, March 13, 2020 2:01 PM
To: StateESF8.Planning <StateESF8.Planning@flhealth.gov>
Subject: FW: URGENT - 2nd Request - COVID-19

Please see the below email.

From: Certified Associates <info@cmmdr.com>
Sent: Friday, March 13, 2020 11:38 AM
To: zzzz Feedback, Medical Marijuana Use <MedicalMarijuanaUse@flhealth.gov>
Subject: URGENT - 2nd Request - COVID-19

Dear Office of Medical Mariuana Use;

This is our 2nd request as we consider this a health emergency.

Due to the rapid spread, and Department of Health announcement regarding Covid-19, we are asking that telemedicine be implemented immediately.

We also know that the virus is much more widespread in Florida due to the lack of testing. We have a very large patient base of elderly patients and patients with autoimmunde disorders.

As outlined in the Dept of Health rules and regulations medical marijuana patients are required to be seen by the physician in person and telemedicine is not allowed for medical marijuana certifications.

We are asking for this specific rule to be suspended for doctors who are actively seeing medical marijuana patients in the state of Florida, in light of the covid19 outbreak. The Department of Health announced "people at risk" should isolate themselves from others.
This is the vast majority of our patients. Elderly and those suffering from autoimmune conditions.
Florida is unique in that we also have a large population of seasonal patients who come from other states. Physicians and hospitals widely use telemedicine.
Patients can get home deliveries of their medical marijuana. This is an urgent and reasonable request in light of this pandemic.

We are certain that without telemedicine being an option, the risk to our patients, physicians, and staff contracting and spreading covid19 will dramatically increase.

In addition, we have physicians and staff members who are also seriously "high risk".

AMERICAN OVERSIGHT

Continuity of care is important to us, and if containment zones are implemented in FLorida physicians and staff may not be able to reach patients.

This is an airborne virus that handwashing and and sanitization will not combat on their own.

For these numerous reasons we are asking that you suspend the DOH rule that physicians be in the same room, and implement access to telemedicine immediately.

Thank you for your consideration.

Subject: Updated COVID-19 Clinical Screening Tool
Importance: High

Good Morning,
Please distribute and implement the use of this new clinical screening tool. Several improvements have been made for it to be more useful to clinical staff.
Please continue to send specimens of **public health priority** to the Bureau of Public Health Laboratories.
It is still recommended that non-priority specimens are sent to commercial laboratories.
If necessary to support your clinical community CHDs may directly send non-priority specimens to LabCorp. Funding is being made available to the Department for LabCorp submissions, please consult your budget staff.

Thanks for everything you are doing!

Sincerely,

AMERICAN OVERSIGHT

Thank you for the update Dr. Thomas.

- Was he symptomatic on the yesterday's flight?
- Can you provide the flight information for March 9? Did he fly while symptomatic?
- After symptoms have resolved, or he is feeling better and afebrile for at least 24 hours with only a lingering cough, he can get tested for clearance purposes. NP and OP swabs should be collected every other day until there are two consecutive negative results.

Subject: Visit went well- covid

Good afternoon,
We are heading back from client home. All phone numbers that we had were incorrect.
The client indicated that his onset of illness was March 9th- fever 101 F and slight dry cough, no shortness of breath or difficulty breathing. He has been in Palm From Feb 23rd until March 9th. He left Palm Beach for Ny on March 9th and felt unwell and decided to get evaluated at Ny hospital. Chest X-ray negative, flu negative and doc decided to just test for Covid. Covid was incidental finding. He says he has not been coughing and did not have fever again without use of antipyretics.
He went to hospital since he had history of pneumonia 2 yrs ago and was concerned that he might be having one again, so went to get checked out, he really didn't feel sick per say.
He attended synagogue in Palm Beach on March 6 and 7th. Hosted a dinner with friends at his house on Feb 27th. These are only group settings in Palm Beach. While in New York they didn't do much between March 9-11th.
They provided good phone numbers and email and are equipped with FaceTime feature. They are compliant with home quarantine. And have plenty of food at home. Will fill in with additional info as

AMERICAN OVERSIGHT

needed. They were provided with thermometers and face masks.
He asked if he needed to be retested to be clear when 14 days quarantine is up? If so how and where? They don't have a provider in Palm Beach county.
Also we are provided with information on closest hospitals to them in the event they needed to go to the hospital as well as our 24/7 phone contact.

Jared:

Harbor Pilots are going aboard the cruise ships that have Corona virus outbreaks in Port Everglades. Is there anyway we could get some N95 masks for pilots going aboard those cruise ships?

The Port is a $34 billion economic driver for Florida and there are 17 pilots in Port Everglades. If the pilots were to get the virus it could have a very bad affect on the economy.

Anything that could be done to get N95 masks would greatly be appreciated.

Good afternoon Molly,

I wanted to share the email that I mentioned to you that went to our members yesterday after our call. This number is 687 of which 20 are AFCHs. We have not had a good return on response as of now only a fraction which we are hopeful is because they are actively working their plans.

Today while at EOC I thought about how AHCA could possibly modify ESS questions to include information that we need to know at this point and moving forward for all licensed entities currently set up. Ie: PPE supply levels, staff/residents with symptoms, visitors turned away and anything else the department considers.

We continue to be concerned about future staffing issues that will arise as numbers of positive and symptomatic cases rise along with the closures of public school and private day cares. While we understand we do not want to compromise the care of our residents/patients it is a realistic question that we need to start addressing along with other questions posed yesterday to you and others to DOH in attached email.

AMERICAN OVERSIGHT

We are here to support the EOC, AHCA and our members so please let us know how we can assist .

Florida Division of Emergency Management Issues Emergency Order to Protect Residents in Nursing Homes, Assisted Living Facilities and Other Long-Term Care Facilities

TALLAHASSEE, Fla. – Today, at Governor DeSantis' direction, Florida Division of Emergency Management Director Jared Moskowitz issued an Emergency Order temporarily restricting visitation to nursing homes, assisted living facilities (ALFs), adult family-care homes, long-term care facilities and adult group homes.

By restricting visitation, the state is taking proactive measures to limit the potential of COVID-19 entering those facilities. This order has been issued in recognition of the fact that the elderly and those with underlying medical conditions are at higher risk for serious illness from COVID-19. This is also consistent with directions given by the Federal Centers for Medicare and Medicaid Services.

People who will now be restricted from visiting nursing homes, ALFs, adult family-care homes, long-term care facilities and adult group homes include:

- Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours;
- Any person showing or presenting symptoms of cough, fever, shortness of breath, or sore throat;
- Any person who has or may have been in close contact with a person(s) infected with COVID-19 who has not tested negative for COVID-19 is prohibited from visiting a facility until 14 days after their interaction with the person(s) who is infected with COVID-19;
- Any person who traveled internationally is prohibited from visiting a facility until 14 days after their return to the United States;
- Any person who traveled on a cruise ship is prohibited from visiting a facility until 14 days after their return to the United States;
- Any person who has been in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility within 14 days of their presence in the community with community spread; or
- Any person who resides in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility.

For a PDF copy of the full Emergency Order, click **HERE**.

Good afternoon. I'm writing a story about Brevard County Health Administrator Maria Stahl taking a cruise out of Tampa this week, then heading into self-quarantine for 14 days upon return this weekend.

Can I get information on her cruise, her planned quarantine, and her plans to work from home? And, how will this affect Brevard County's coronavirus containment/operational efforts?

Thank you very much.

> Your department's lack of disseminating information is concerning at the least and dangerous at worst. As I previously mentioned, the DOH's failure to initially assist my Town with our infected employee, including telling our staff to tell the employee to go to an urgent care after she went to an emergency room and was told she needed to be tested but the hospital itself did not have tests, was shocking. Even worse, our own Town Staff had to cold call hospitals to get her tested without any help from your Office. I had hoped that unfortunately once confirmed as a positive case that your

AMERICAN OVERSIGHT

Office would be expeditiously working to right the initial wrong. To date, that has respectfully not occurred. As of today, two additional employees that worked with our employee that tested positive showed signs and were tested, but done so without the assistance of the DOH. Thankfully, one was negative and the other is not yet known.

With the exception of the diligent staff at the EOC who are providing supplies to our Town, the State of Florida has, in my opinion, put people at risk by not testing asymptomatic individuals and made an already difficult situation worse by purposefully not disseminating information to the community. In fact, the DOH has not made a single call or email since the beginning to our local elected officials. Information to our Staff has also been scarce to nonexistent. Our community call, that our Town initiated on Friday with over 1,100 listeners, provided virtually no useful information from the DOH and from what I heard has frustrated many. Telling residents to call your main Office number sounded futile at best.

Contrary to your statement about testing asymptomatic individuals not being effective, below is an article that refutes your position to not test...

https://www.cnn.com/2020/03/14/health/coronavirus-asymptomatic-spread/index.html

With all due respect, your statements seem to run contrary to the scientific research to date and your lack of knowledge during our two conversations has lead me to even more questions about your Office's ability to handle this situation. It is disconcerting that the Medical Doctor's on your staff or in Tallahassee have not been made available to answer questions and concerns like the ones I have raised since last week.

At this point, the people of Miami-Dade County need medical professionals from the State to not withhold important information and, most importantly, provide testing for anyone that needs it...including people that were potentially exposed or vulnerable but also asymptomatic.

I am also deeply concerned of the Miami Herald's recent reporting that alleged privileged individuals, i.e. elected officials, had tests administered by your Office without showing symptoms contrary to your procedures but also before regular individuals like my constituents are offered tests. This horrible, elitist perception should be immediately corrected.

Please let me know when I will have a response from a Doctor from the DOH in re to my questions and concerns.

I have copied State Senator Jason Pizzo and State Rep. Joe Geller and their COS's so they are aware. After all, it's their constituents at risk too.

Subject: Health Department Questions...

Questions:

What is the current capacity in Miami-Dade and Broward to test for COVID 19?

How many tests are currently available and how many tests can be processed in a day in Miami-Dade and Broward Counties?

What are the current rules for allowing someone to be tested?

Is the test accurate for people who do not have symptoms?

Can anyone who has come into contact with the BHI Employee be tested?

If so, what is the process for informing them and getting them tested?

Can the person that travelled with

AMERICAN OVERSIGHT

the BHI Employee from New York be retested since our Employee was positive?

What type of COVID 19 does she have (L or S)?

What is the Health Department doing to trace and contact people who were potentially exposed?

Will the Health department be cleaning public areas that may have the virus and what is that process and when will it be done?

Can any resident be tested if they want?

Dr. Villalta,

As per our conversations yesterday and on Friday, which I was told by you that the FL Dept of Health would be contacting me to answer the questions I submitted last week, there still has not been any response. To date, my questions have been submitted on three separate occasions.

Your department's lack of disseminating information is concerning at the least and dangerous at worst. As I previously mentioned, the DOH's failure to initially assist my Town with our infected employee, including telling our staff to tell the employee to go to an urgent care after she went to an emergency room and was told she needed to be tested but the hospital itself did not have tests, was shocking. Even worse, our own Town Staff had to cold call hospitals to get her tested without any help from your Office. I had hoped that unfortunately once confirmed as a positive case that your Office would be expeditiously working to right the initial wrong. To date, that has respectfully not occurred. As of today, two additional employees that worked with our employee that tested positive showed signs and were tested, but done so without the assistance of the DOH. Thankfully, one was negative and the other is not yet known.

With the exception of the diligent staff at the EOC who are providing supplies to our Town, the State of Florida has, in my opinion, put people at risk by not testing asymptomatic individuals and made an already difficult situation worse by purposefully not disseminating information to the community. In fact, the DOH has not made a single call or email since the beginning to our local elected officials. Information to our Staff has also been scarce to nonexistent. Our community call, that our Town initiated on Friday with over 1,100 listeners, provided virtually no useful information from the DOH and from what I heard has frustrated many. Telling residents to call your main Office number sounded futile at best.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
    a. Send ship and flight manifests to CDC.
    b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
    c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
    d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
    a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
    b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
    a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
    b. CDC Quarantine Station staff are available for illness response, as per protocol.
    c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
    d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival

AMERICAN OVERSIGHT

a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.

b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.

7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
   a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.

      i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.

      ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf

   b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Dear Dr. Roberson,
Here is the latest update that we received from Royal Caribbean.
I understand that my team lead, Cindy Friedman, has just spoken with Dr. Rivkees who reported that the plan has not been approved by the state at this time.

Best,
Michelle

Hi Michelle –

Below please see an update on care for guests upon arrival at MIA.

Dr. Barth Green, the Global Coordinator for CDC, will accept all 45 US nationals from the Silver Explorer, providing that Bec Ware, R.N. can provide him details about these people. Minutes ago, I spoke with Bec, and she will provide Dr. Green with the information that he needs, including their marital status, their physical condition, where they are landing and what time they are to arrive at Miami International Airport. He will have a Medical team waiting to greet these folks, to screen them, and to triage them accordingly.

Until then, I will arrange for Dr. Green to receive 60 Quest Novel Coronavirus (2019-nCoV)/COVID-19 test kits from my office, so that he can make final determinations on those who are ill. Ms. Stephanie Buchler will follow Quest collection instructions and will ensure courier specimen pickup, if necessary.

Dr. Green will direct his Medical staff to triage the arrival of these patients to either Jackson Memorial Hospital or Hotel St. Michel in Coral Gables, depending on their physical condition.

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
   a. Send ship and flight manifests to CDC.
   b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
   c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
   d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
   a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
   b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
   a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
   b. CDC Quarantine Station staff are available for illness response, as per protocol.

AMERICAN OVERSIGHT

c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.

d. Passengers who are not ill will be allowed to continue their travel on commercial flights.

6. After arrival
   a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.

   b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.

7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
   a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.

      i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.

      ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf

   b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

(850) 815-4940, ESF14@em.myflorida.com

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 57-year old male in Lee County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 65-year old male in Broward County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 61-year old male in Broward County tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with Port Everglades.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological for the fourth person connected to Port Everglades is ongoing.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak

AMERICAN OVERSIGHT

situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.

- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121**. **The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press

AMERICAN OVERSIGHT

conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our

AMERICAN OVERSIGHT

local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared

AMERICAN OVERSIGHT

by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

AMERICAN OVERSIGHT

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.

AMERICAN OVERSIGHT

- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business

AMERICAN OVERSIGHT

partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

AMERICAN OVERSIGHT

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press

AMERICAN OVERSIGHT

conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our

AMERICAN OVERSIGHT

local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis announced that the State has ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. Governor DeSantis has also recommended that local authorities strongly consider canceling mass gatherings. Centers for Disease Control and Prevention (CDC) defines a mass event or gathering as 1,000 individuals or more. Practically speaking, a mass gathering is a large enough assembly of individuals that will put a strain on local resources. The Governor also suspended non-essential instate and all out-of-state travel for state employees for 30 days.

Yesterday, March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

New Positive Cases

Earlier today, the Florida Department of Health announced one new case of COVID-19 in Seminole County.

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Chart

* The Department of Health will confirm cases reported by commercial labs.
** A known history of exposure to COVID-19 outside of the state.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel and Cruises Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

AMERICAN OVERSIGHT

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.

AMERICAN OVERSIGHT

- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will now be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.
- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.
- The APD Senior Leadership Team began hosting twice weekly COVID-19 conference calls with the Superintendents of the agency's facilities in Marianna, Gainesville, Chattahoochee and the Developmental Disabilities Defendant Program.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during press conferences on Monday, March 9th and Wednesday, March 11th to address Florida's recent actions regarding COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up information.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff are following up with them on an individual basis for questions and answers for COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we are providing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, staff has provided specific technical assistance to all AAAs regarding completing assessments, safe delivery of home-delivered meals, and procurement of cleaning supplies.
- Arranged a conference call with a representative from the Area Agencies on Aging as well as the Florida Association of Aging Services Providers and GA Foods. Discussed the current messaging from ACL and the CDC as it relates to the Aging Network.
- Conducted a Florida Association of the Area Agencies on Aging (F4A) conference call with all contract managers and AAA Executive Directors March 11 at 2:00 p.m. to provide a daily update regarding COVID-19.
- The Department of Elder Affairs has distributed DOH website information as a resource for PACE providers to use and distribute to seniors. and provided the Executive Orders. DOEA has circulated additional information and long-term care provider conference call invitations with presentations by DOH and AHCA to the PACE providers.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, the Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.
- Volunteer Florida is preparing information to be shared with Supervisors of Elections about Volunteer Connect, Florida's official volunteer opportunities platform. Through the platform, offices can post/promote volunteer opportunities, including poll work.
- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.

AMERICAN OVERSIGHT

Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- Out of an abundance of caution, two temporary school closures have been reported in Okaloosa and Hillsborough County for cleaning. At this time, no Florida student has contracted COVID-19. To stay up to date on school information, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department of Health. Inmates will continue to have access to mail, phone calls and video visitation. Legal visits will not be impacted.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS has provided guidance to all 67 county Supervisors of Elections regarding assisted living facilities and poll worker staff matters. The message included guidance to screen poll workers and clerks beforehand to determine their recent travel status or if they are showing active symptoms of COVID-19 and reminding supervisors of the option to designate alternate polling locations for nursing homes, centers for independent living continuing care retirement living communities and assisted living facilities.
- DOS has identified stakeholders including libraries, museums, cultural facilities and are developing plans to communicate information and resources about COVID-19 to those stakeholders.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors and stakeholders.

AMERICAN OVERSIGHT

- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV is encouraging Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA employees at Florida's three highway welcome centers continue to be provided with the latest COVID-19 information and resources to help keep the traveling public informed.
- Preventive health resources and options have been communicated to all VISIT FLORIDA staff, with new updates and information relayed accordingly.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.
- VISIT FLORIDA continues to follow all direction from the Executive Office of the Governor and Florida Department of Health in the dissemination of alerts and safety information through social media and VISIT FLORIDA's network of Destination Marketing Organization and business partners.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE has reviewed its COOP and identified members who can work from home. FDLE has ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Subject: questions for Florida Comms POC

Hey Sara,

Thanks for arranging the call.

Here are questions to pass on to Florida epis that will help CDC DGMQ decide on an Epi-X for Sky Princess voyage 2/22-2/29:

AMERICAN OVERSIGHT

1. Does Florida plan to issue a press statement/release regarding the cluster of COVID-19 associated with Port Everglades employees (3 cruise ship greeters & 1 non-greeter)?
2. Does Florida plan to issue an Epi-X regarding persons potentially exposed to the 3 Greeters that worked the Sky Princess terminal on 2/29?
3. If no, would Florida prefer CDC DGMQ to issue an Epi-X regarding persons potentially exposed to the 3 Greeters that worked the Sky Princess terminal on 2/29?
4. Princess Cruise Lines should be contacting Florida re: sending notification letters to any passenger who either embarked or disembarked the Sky Princess on 2/29/20 where the 3 Greeters were stationed. Does Florida have epidemiologic suspicion that this 4-case cluster's exposure source was the Sky Princess cruise ship (or other cruise ship at the port)?

Thanks Much,
Kara

Subject: rule

64D-3.029 Diseases or Conditions to be Reported.

(1) Diseases or conditions listed in subsection (3), below, are identified by the Department as being of public health significance. These diseases or conditions must be reported by the practitioner, hospital, laboratory, or other individuals via telephone (with subsequent written report within 72 hours, see Rules 64D-3.030-.033, F.A.C.), facsimile, electronic data transfer, or other confidential means to the Department, which includes the County Health Departments. Reporters are not prohibited from reporting diseases or conditions not listed by rule. Reports should include all associated testing results performed (e.g. serogroup, serotype, and antimicrobial susceptibility results). Physicians and other healthcare providers using point of care tests for diagnosis of infectious diseases must report test results to the Department when they are indicative of an infectious disease reportable directly to the Department by laboratories unless such point of care testing is subject to routine reflex testing by a supplementary or confirmatory testing the results of which would be reportable.

(2) Definitions to be used with subsection (3), below:

(a) *"Reportable Diseases or Conditions"* – The definitions of "suspected case" and "confirmed case" for reportable diseases or conditions are set forth in "Surveillance Case Definitions for Select Reportable Diseases in Florida," January 2016 version 1.1, incorporated by reference, available online at: https://www.flrules.org/Gateway/reference.asp?No=Ref-07442.

(b) *"Suspect Immediately"* – A reportable condition of urgent public health importance. Report without delay upon the occurrence of any of the following: initial suspicion, receipt of a specimen with an accompanying request for an indicative or confirmatory test, findings indicative thereof, or suspected diagnosis. Reports that cannot timely be made during the County Health Department business day shall be made to the County Health Department after-hours duty official. If unable to do so, the reporter shall contact the Department after-hours duty official at (850)245-4401.

(c) *"Immediately"* – A reportable condition of urgent public health importance. Report without delay upon the occurrence of any of the following: an indicative or confirmatory test, findings indicative thereof, or diagnosis. Reports that cannot timely be made during the County Health Department business day shall be made to the County Health Department after-hours duty official. If unable to do so, the reporter shall contact the Department after-hours duty official at (850)245-4401.

(d) *"Next Business Day"* – Report before the closure of the County Health Department's next business day following suspicion or diagnosis.

(e) *"Other"* – Report consistent with the instruction in and footnotes to subsection (3), below.

(3) "*Table of Reportable Diseases or Conditions to Be Reported*"

Practitioner Reporting					Laboratory Reporting					
	Timeframes					Timeframes				
Reportable Diseases or Conditions	Suspect Immediately	Immediately	Next Business Day	Other	Evidence of current or recent infection with etiological agents and all associated testing results performed should be reported (e.g.		Suspect Immediately	Immediately	Next Business Day	Other

AMERICAN OVERSIGHT

					species, serogroup, serotype, and antimicrobial susceptibility *2 results)	Submit isolates or specimens for confirmation *1				
Any case, cluster of cases, outbreak, or exposure to an infectious or non-infectious disease, condition, or agent found in the general community or any defined setting such as a hospital, school or other institution, not listed in this rule that is of urgent public health significance. This includes human cases, clusters, or outbreaks spread person-to-person, by animals or vectors or from an environmental, food or waterborne source of exposure; those that result from a deliberate act of terrorism; and unexplained deaths possibly due to unidentified infectious or chemical causes.	X	X			Detection in one or more specimens of etiological agents of a disease or condition not listed in this Rule that is of urgent public health significance. This includes the identification of etiological agents that are suspected to be the cause of clusters, or outbreaks spread person-to-person, by animals or vectors or from an environmental, food, or waterborne source of exposure; those that result from a deliberate act of terrorism; and unexplained deaths due to unidentified infectious or chemical causes. Severe acute respiratory disease syndrome-associated with a Coronavirus infection	X	X			Coronavirus associated with severe acute respiratory disease	X	X	X		

AMERICAN OVERSIGHT

64D-3.031 Notification by Laboratories.

(1) Each person or designee who is in charge of a public, federal, private, military or hospital laboratory responsible for receiving the initial order to perform serologic, immunologic, microscopic, biochemical, molecular or cultural tests on specimens derived from a human body or an animal or for collecting the specimen shall report or cause to be reported any laboratory test suggestive of or diagnostic of diseases or conditions listed in the Table of Notifiable Diseases or Conditions, Rule 64D-3.029, F.A.C., per this rule.

(2) Receipt of a laboratory test order requesting the identification of reportable agents shall be considered by the laboratory as an indication of suspected diagnosis. However, laboratories need only to report suspected cases if indicated in the "suspect immediately" column under laboratories in the Table of Notifiable Diseases or Conditions, Rule 64D-3.029, F.A.C.

(3) To allow follow-up of laboratory findings suggestive of or diagnostic of diseases or conditions in the Table of Notifiable Diseases or Conditions, the form upon which the information will be reported shall be furnished by the laboratory that includes the following information:

(a) The Patient's:

1. First and last name, including middle initial,
2. Address including street, city, state and zip code,
3. Phone number, including area code,
4. Date of birth,
5. Sex,
6. Race,
7. Ethnicity (specify if of Hispanic descent or not of Hispanic descent),
8. Pregnancy status if applicable,
9. Social Security number.

(b) The Laboratory:

1. Name, address and telephone number of laboratory performing test,
2. Type of specimen (for example stool, urine, blood, mucus, etc.),
3. Date of specimen collection,
4. Site (for example cervix, eye, etc., if applicable),
5. Date of report,
6. Type of tests performed and results, including reference range, titer when quantitative procedures are performed, and including all available results on speciating, grouping or typing of organisms,
7. Submitting provider's name, address including street, city, zip code and telephone number, including area code,
8. National Provider Identification (NPI) Number.
