(4) Laboratories located out of state, licensed under Part I, Chapter 483, F.S., who collect specimens in Florida or who receive the initial order for testing from a practitioner, blood bank, plasmapheresis center or other health care provider located in Florida, shall report in the same way as if the findings had been made by a laboratory located in Florida.

(5) Upon the Department's implementation of its Electronic Laboratory Reporting System (ELR) for laboratory findings suggestive of or diagnostic of diseases or conditions, reports will be submitted electronically to the Department using Health Level Seven (HL7) version 2.3.1 format or ASCII delimited flat files which reflect comparable content to HL 7 version 2.3.1. utilized by the Department of Health. The CDC Implementation Guide, Health Level Seven Specifications for Electronic Laboratory-Based Reporting of Public Health Information, October 1997, using version 2.3.1 of the Health Level Seven (HL7) Standard Protocol, incorporated by reference, is available online at: http://www.cdc.gov/nedss/ELR/HL7Spec.pdf.

(a) The Department's ELR System shall include:

1. The initial contact with the reporting laboratory,
2. A content review and testing of the laboratories' HL7 transmissions; and,
3. The transition from testing to production for the HL7 laboratory transmissions.

(b) The Department and laboratory will agree on a date of implementation;

(c) Laboratories reporting electronically through ELR and the Department shall agree to a date that the transmission of findings suggestive of or diagnostic of diseases or conditions listed in the Table of Notifiable Diseases or Conditions, Rule 64D-3.029, F.A.C., electronically in HL7 version 2.3.1 format to the Department is acceptable and considered good faith reporting and the laboratory will no longer be required to submit paper forms pursuant to subsection 64D-3.031(3), F.A.C.;

(d) The Department shall ensure access to the laboratory findings suggestive of or diagnostic of disease or conditions listed in the Table of Notifiable Diseases or Conditions to authorized representatives of the Department.

(6) This section does not prohibit a laboratory from making a report by telephone, in writing, or facsimile to the county health department having jurisdiction for the area in which the office of the submitting practitioner or the patient's residence is located.

(7)(a) In order to study disease incidence, each laboratory licensed to perform tests for any notifiable disease or condition shall report the test volume for each related diagnostic test performed for the notifiable diseases listed in Rule 64D-3.029, F.A.C.

(b) Reports are to be filed annually on or before April 1 of each year to the Department electronically in a format agreed upon by the department and the laboratory with the following information:

1. Type of diagnostic test,
2. Patient's date of birth,
3. Patient's sex,
4. Race,
5. Ethnicity (specify if of Hispanic descent or not of Hispanic descent).

(8) Each laboratory licensed to perform tests for any reportable disease or condition shall make its records for such diseases or conditions available for on-site inspection by the Department or its authorized representatives.

Rulemaking Authority 381.0011(2), 381.003(2), 381.0031(7), (8), 384.33, 392.66 FS. Law Implemented 381.0011, 381.003, 381.0031(2), 384.25(1), 392.53(1) FS. History–New 11-20-06, Amended 11-24-08.

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West

AMERICAN OVERSIGHT

Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV), Zika virus (ZIKV), and California encephalitis group viruses (CEV). Malaria, a parasitic mosquito-borne disease is also included. During the period of March 8-14, 2020, the following arboviral activity was recorded in Florida.

WNV activity: No human cases of WNV infection were reported this week. No horses with WNV infection were reported this week. No sentinel chickens tested positive for antibodies to WNV this week. In 2020, 30 sentinel chickens have been reported from nine counties.

SLEV activity: No human cases of SLEV infection were reported this week. No sentinel chickens tested positive for antibodies to SLEV this week. In 2020, no positive samples have been reported.

EEEV activity: No human cases of EEEV infection were reported this week. No horses with EEEV infection were reported this week. Two sentinel chickens tested positive for antibodies to EEEV this week in Citrus and Orange counties. In 2020, 12 sentinel chickens, one horse, and one mosquito pool have been reported from five counties.

International Travel-Associated Dengue Fever Cases: One case of dengue fever was reported this week in a person that had international travel. In 2020, 18 travel-associated cases have been reported.

Dengue Fever Cases Acquired in Florida: No cases of locally acquired dengue fever were reported this week. In 2020, one case of locally acquired dengue fever has been reported.

International Travel-Associated Chikungunya Fever Cases: No cases of chikungunya fever were reported this week in persons that had international travel. In 2020, no travel-associated chikungunya fever cases have been reported.

Chikungunya Fever Cases Acquired in Florida: No cases of locally acquired chikungunya fever were reported this week. In 2020, no cases of locally acquired chikungunya fever have been reported.

International Travel-Associated Zika Fever Cases: No cases of Zika fever were reported this week in persons that had international travel. In 2020, no travel-associated Zika fever cases have been reported.

Zika Fever Cases Acquired in Florida: No cases of locally acquired Zika fever were reported this week. In 2020, no cases of locally acquired Zika fever have been reported.

Advisories/Alerts: Monroe County is currently under a mosquito-borne illness advisory. Miami-Dade County is currently under a mosquito-borne illness alert. No other counties are currently under mosquito-borne illness advisory or alert.

There is a Level 2 Travel Health Notice for Nigeria related to the transmission of yellow fever virus. There are also Level 1 Travel Health Notices for Central and South America, Mexico, the Caribbean, Asia, the Pacific Islands, Africa, and the Middle East related to the transmission of dengue virus, for Burundi related to Malaria transmission, and for Ethiopia

AMERICAN OVERSIGHT

related to chikungunya transmission. Additional information on travel health notices can be found at the following link: wwwnc.cdc.gov/travel/notices. For a map of arboviral disease activity in the United States visit: wwwn.cdc.gov/arbonet/maps/ADB_Diseases_Map/index.html.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 39 new positive cases of coronavirus disease (COVID-19). Earlier today, the Florida Department of Health confirmed the death of a 77-year old male in Lee County who had previously tested positive for COVID-19. Yesterday, Governor Ron DeSantis sent a letter to Health and Human Services requesting the release of 61 Florida residents from Georgia, many of whom are elderly, who were previously aboard the Grand Princess voyage outside of California.

To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 55-year old female in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 79-year old female from Connecticut has tested positive for COVID-19 in Baker County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 72-year old female in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old female in Citrus County has tested positive for COVID-10. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 64-year old female in St. Johns County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 71-year old male in Volusia County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 70-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 47-year old male in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 67-year old male in Pasco County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 32-year old female in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 17-year old male from Cuba has tested positive in Hillsborough County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 28-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 58-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 25-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 62-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 74-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 65-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 42-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 52-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 65-year old female from New York has tested positive for COVID-19 in Alachua County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 63-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain

AMERICAN OVERSIGHT

isolated until cleared by public health officials.

- A 30-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 66-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 83-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 76-year old male in Collier County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 28-year old male in Collier County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.

COVID-19 Cases

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

*Definition of travel-related: A known history of exposure to COVID-19 associated with travel outside of Florida.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including over 10 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified multiple, positive COVID-19 cases that are connected and associated with Port Everglades in Broward County, Florida.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.
- Governor DeSantis requested that Health and Human Services send home the 61 Floridians that were previously aboard the Grand Princess cruise line, home from isolation from Dobbins Air Reserve Base, Georgia.
- Governor DeSantis has directed the Department of Health to hire additional epidemiologists from university health programs to help with workload.

AMERICAN OVERSIGHT

- Governor DeSantis has directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and ALF licenses for 90 days to remove distraction from patient care.
- Governor DeSantis directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes to all visitors for the next 30 days.
- Governor DeSantis directed the Department of Highway Safety and Motor Vehicles to suspend drivers' license renewal requirements for 30 days.
- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).
- Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.
- Florida Department of Education Commissioner Richard Corcoran has provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. In addition, the Department of Education announced that the start of state testing will be delayed by a minimum of two weeks.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 39 new positive cases of coronavirus disease (COVID-19). Earlier today, the Florida Department of Health confirmed the death of a 77-year old male in Lee County who had previously tested positive for COVID-19. Yesterday, Governor Ron DeSantis sent a letter to Health and Human Services requesting the release of 61 Florida residents from Georgia, many of whom are elderly, who were previously aboard the Grand Princess voyage outside of California.

To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 55-year old female in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 79-year old female from Connecticut has tested positive for COVID-19 in Baker County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 72-year old female in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old female in Citrus County has tested positive for COVID-10. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 64-year old female in St. Johns County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 71-year old male in Volusia County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 70-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 47-year old male in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 67-year old male in Pasco County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 32-year old female in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 17-year old male from Cuba has tested positive in Hillsborough County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 28-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 58-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 25-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 62-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 74-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 65-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 42-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 52-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 65-year old female from New York has tested positive for COVID-19 in Alachua County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 63-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including over 10 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified multiple, positive COVID-19 cases that are connected and associated with Port Everglades in Broward County, Florida.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.
- Governor DeSantis requested that Health and Human Services send home the 61 Floridians that were previously aboard the Grand Princess cruise line, home from isolation from Dobbins Air Reserve Base, Georgia.
- Governor DeSantis has directed the Department of Health to hire additional epidemiologists from university health programs to help with workload.

AMERICAN OVERSIGHT

- Governor DeSantis has directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and ALF licenses for 90 days to remove distraction from patient care.
- Governor DeSantis directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes to all visitors for the next 30 days.
- Governor DeSantis directed the Department of Highway Safety and Motor Vehicles to suspend drivers' license renewal requirements for 30 days.
- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).
- Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.
- Florida Department of Education Commissioner Richard Corcoran has provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. In addition, the Department of Education announced that the start of state testing will be delayed by a minimum of two weeks.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 25 new positive cases of coronavirus disease (COVID-19) in Florida and the death of a Florida resident in California. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 68-year old female Orange County resident tested positive for COVID-19. This test was performed in California following travel to Asia. This person is deceased.
- A 41-year old male in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 54-year old male in Osceola County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 51-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 67-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 62-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is not a travel related case.
- A 29-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with close contact with a traveler.
- A 69-year old male, non-Florida resident visiting from Europe tested positive for COVID-19 in Alachua County.
- A 59-year old female in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 65-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 77-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 59-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 39-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 83-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 41-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 22-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 19-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 58-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 43-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the

AMERICAN OVERSIGHT

world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in

AMERICAN OVERSIGHT

Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the

AMERICAN OVERSIGHT

world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in

AMERICAN OVERSIGHT

Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

AMERICAN OVERSIGHT

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 25 new positive cases of coronavirus disease (COVID-19) in Florida and the death of a Florida resident in California. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 68-year old female Orange County resident tested positive for COVID-19. This test was performed in California following travel to Asia. This person is deceased.
- A 41-year old male in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 54-year old male in Osceola County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 51-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 67-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 62-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is not a travel related case.
- A 29-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with close contact with a traveler.
- A 69-year old male, non-Florida resident visiting from Europe tested positive for COVID-19 in Alachua County.
- A 59-year old female in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 65-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 77-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 59-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 39-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 83-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 41-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 22-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 19-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 58-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 43-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the

AMERICAN OVERSIGHT

world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 15 new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

These 15 new positive cases were tested in Florida Department of Health labs. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Cases

- A 73-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 74-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 50-year old male New York resident who is currently in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 70-year old male Massachusetts resident in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 24-year old female in Alachua County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 70-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 83-year old male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 57-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 28-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 25-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case.
- A 20-year old female Texas resident in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 68-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This case is associated with Port Everglades.
- A 36-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 49-year old female Hillsborough County resident has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with travel to Europe.
- A 77-year old male in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

chart

AMERICAN OVERSIGHT

chart

* The Department of Health will confirm cases reported by commercial labs.

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.

AMERICAN OVERSIGHT

- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 15 new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

These 15 new positive cases were tested in Florida Department of Health labs. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Cases

- A 73-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 74-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 50-year old male New York resident who is currently in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 70-year old male Massachusetts resident in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 24-year old female in Alachua County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 70-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 83-year old male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 57-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 28-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 25-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case.
- A 20-year old female Texas resident in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 68-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This case is associated with Port Everglades.
- A 36-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 49-year old female Hillsborough County resident has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with travel to Europe.
- A 77-year old male in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

AMERICAN OVERSIGHT

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Florida Department of Health Announces New Positive COVID-19 Case in Florida, Test Performed by AdventHealth Altamonte Springs

TALLAHASSEE — The Florida Department of Health has received notification of one new positive case of coronavirus disease (COVID-19) in Florida. This test was performed through a partnership with AdventHealth Altamonte Springs.* To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

New Positive Cases

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

COVID-19 Cases

chart

* The Department of Health will confirm cases reported by commercial labs.

AMERICAN OVERSIGHT

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

Florida Department of Health Announces New Positive COVID-19 Case in Florida, Test Performed by AdventHealth Altamonte Springs

TALLAHASSEE — The Florida Department of Health has received notification of one new positive case of coronavirus disease (COVID-19) in Florida. This test was performed through a partnership with AdventHealth Altamonte Springs.* To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

New Positive Cases

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

COVID-19 Cases

chart

* The Department of Health will confirm cases reported by commercial labs.

AMERICAN OVERSIGHT

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and

AMERICAN OVERSIGHT

- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Follow us on Facebook, Instagram and Twitter at @HealthyFla. For more information please visit www.FloridaHealth.gov.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 39 new positive cases of coronavirus disease (COVID-19). Earlier today, the Florida Department of Health confirmed the death of a 77-year old male in Lee County who had previously tested positive for COVID-19. Yesterday, Governor Ron DeSantis sent a letter to Health and Human Services requesting the release of 61 Florida residents from Georgia, many of whom are elderly, who were previously aboard the Grand Princess voyage outside of California.

To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 55-year old female in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 79-year old female from Connecticut has tested positive for COVID-19 in Baker County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 72-year old female in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old female in Citrus County has tested positive for COVID-10. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 64-year old female in St. Johns County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 71-year old male in Volusia County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 70-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 47-year old male in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 67-year old male in Pasco County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 32-year old female in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 17-year old male from Cuba has tested positive in Hillsborough County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 28-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 58-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 25-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 62-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 74-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 65-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 42-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 52-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 65-year old female from New York has tested positive for COVID-19 in Alachua County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 63-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain

AMERICAN OVERSIGHT

isolated until cleared by public health officials.

- A 30-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 66-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 83-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 76-year old male in Collier County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 28-year old male in Collier County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including over 10 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified multiple, positive COVID-19 cases that are connected and associated with Port Everglades in Broward County, Florida.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.
- Governor DeSantis requested that Health and Human Services send home the 61 Floridians that were previously aboard the Grand Princess cruise line, home from isolation from Dobbins Air Reserve Base, Georgia.
- Governor DeSantis has directed the Department of Health to hire additional epidemiologists from university health programs to help with workload.

AMERICAN OVERSIGHT

- Governor DeSantis has directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and ALF licenses for 90 days to remove distraction from patient care.
- Governor DeSantis directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes to all visitors for the next 30 days.
- Governor DeSantis directed the Department of Highway Safety and Motor Vehicles to suspend drivers' license renewal requirements for 30 days.
- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).
- Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.
- Florida Department of Education Commissioner Richard Corcoran has provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. In addition, the Department of Education announced that the start of state testing will be delayed by a minimum of two weeks.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces One Additional Positive COVID-19 Case in Florida for March 12th

TALLAHASSEE — Tonight, the Florida Department of Health announced one additional positive case of coronavirus disease (COVID-19), bringing the total confirmed new cases for Thursday, March 12th to 17 individuals who tested positive for COVID-19. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

This latest positive COVID-19 case was tested in a Florida Department of Health lab. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Case

- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with exposure to an international traveler.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
  - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

AMERICAN OVERSIGHT

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Florida Department of Health Announces One Additional Positive COVID-19 Case in Florida for March 12th

TALLAHASSEE — Tonight, the Florida Department of Health announced one additional positive case of coronavirus disease (COVID-19), bringing the total confirmed new cases for Thursday, March 12th to 17 individuals who tested positive for COVID-19. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

This latest positive COVID-19 case was tested in a Florida Department of Health lab. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Case

- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with exposure to an international traveler.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
  - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Florida Division of Emergency Management Issues Emergency Order to Protect Residents in Nursing Homes, Assisted Living Facilities and Other Long-Term Care Facilities

TALLAHASSEE, Fla. – Today, at Governor DeSantis' direction, Florida Division of Emergency Management Director Jared Moskowitz issued an Emergency Order temporarily restricting visitation to nursing homes, assisted living facilities (ALFs), adult family-care homes, long-term care facilities and adult group homes.

By restricting visitation, the state is taking proactive measures to limit the potential of COVID-19 entering those facilities. This order has been issued in recognition of the fact that the elderly and those with underlying medical conditions are at higher risk for serious illness from COVID-19. This is also consistent with directions given by the Federal Centers for Medicare and Medicaid Services.

People who will now be restricted from visiting nursing homes, ALFs, adult family-care homes, long-term care facilities and adult group homes include:

- Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours;
- Any person showing or presenting symptoms of cough, fever, shortness of breath, or sore throat;
- Any person who has or may have been in close contact with a person(s) infected with COVID-19 who has not tested negative for COVID-19 is prohibited from visiting a facility until 14 days after their interaction with the person(s) who is infected with COVID-19;
- Any person who traveled internationally is prohibited from visiting a facility until 14 days after their return to the United States;
- Any person who traveled on a cruise ship is prohibited from visiting a facility until 14 days after their return to the United States;
- Any person who has been in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility within 14 days of their presence in the community with community spread; or
- Any person who resides in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility.

View this email in your browser

The following message was sent to all students, faculty, and staff this afternoon. Please continue to monitor fsu.edu/coronavirus for more updates regarding the COVID-19.

FLORIDA STATE UNIVERSITY ANNOUNCES U.S. DOMESTIC TRAVEL RESTRICTIONS

To combat the spread of the coronavirus, Florida State University officials have issued the following travel restrictions, which take effect immediately (Thursday, March 12, 2020).

- All university-sponsored domestic (U.S.) and international travel is canceled until further notice.
- All university-sponsored domestic travel that was previously approved by FSU Travel Services is canceled and must be reevaluated by your respective university vice president for reapproval. Only travel deemed essential by a university vice president will be reapproved. All other previously approved domestic travel is canceled.
- Any new university sponsored domestic or international travel requests must be approved by a university vice president, who will determine if it is essential.

AMERICAN OVERSIGHT

- The university strongly recommends all students, staff and faculty refrain from domestic and international travel except for emergency purposes.
- The university requires that all students, faculty and staff who have traveled anywhere internationally to self-quarantine for 14 days upon their return.
- Florida State University requests that students, faculty and staff avoid all cruise ship travel and ferry boat travel worldwide. The university requires all individuals who have been on a cruise ship or ferry boat to self-quarantine for 14 days upon reentry to the U.S.
- Students who travel outside the Tallahassee area and later return to their off-campus residences in Tallahassee should not return to nor visit campus for any reason until on-campus instruction resumes. This includes for use of the Leach Student Recreation Center, FSU Libraries, any Seminole Dining facilities, FSU Bookstores and Seminole Athletics venues/facilities.
- Students who choose to remain in the university residence halls on campus during spring break and during the period of online instruction will not be allowed to travel away from the Tallahassee area and come back to their residence hall or the main campus facilities until on-campus instruction resumes.

These university restrictions and guidelines are based on recommendations from the U.S. Centers for Disease Control & Prevention (CDC), the U.S. Department of State, the Florida Department of Health and the Leon County Department of Health.

Florida State University strongly recommends you draft a plan in case you are required to self-quarantine for a 14-day period for any reason.

Your plan should include a possible quarantine location that is not a shared living space, residence hall or multi-occupancy apartment.

If a student needs to self-quarantine or self-isolate, the university has made plans for them to be able to continue with their coursework remotely.

Faculty and staff who need to self-quarantine should contact Human Resources to discuss available options.

FSU will continue to follow CDC, state and county health department guidelines, which means those who are required to self-quarantine, should practice social distancing as explained here: https://www.cdc.gov/coronavirus/2019-ncov/travelers/after-travel-precautions.html.

Good Evening,

The attached reflects final revisions by myself, Cassandra, and the SSG.

I am using Adobe Pro to make edits and I'm unable to edit the links. I have copied Micheal Wydotis for assistance with the last two links in the "additional guidance" section of the document.

Dr. Blackmore please review and provide final approval on the content. Per Cassandra this document needs to be made available by tomorrow morning.

Thanks,
Chrishonda 850-321-3912

Subject: RE: Chart

The CDC link underneath the Flhealth.gov link is not correct. If we can get a word version I can update. I also would like to have my comms guy in epi Mike Wydotis take a look to ensure correct brand guides, etc. are up to par before we sent to Dr. B., and I know he'd want it in Word to make edits if needed.

If he identifies any edits, we'll send back to Cassandra before sending to Dr. B

Thanks,
Amy

All,
As of this very moment, the exclusion recommendation is anyone that has:

- been on a cruise anywhere,
- left the US,
- been to one of the domestic "red dot" areas (more info to come on that), or
- been on a commercial airplane in the LAST TWO WEEKS.

These people should self-isolate for 14 days from the date of their last known exposure risk.

Attached is guidance I received from my DMS contact here at the SEOC.

As you know, the situation is changing rapidly and this information is valid as of the time I send it.

To: DCF.All.Members <DCF.All.Members@myflfamilies.com>
Subject: DCF HR 2020-032:**IMPORTANT** Leave Information Related to COVID-19

TO: All DCF Employees
PURPOSE: To notify you on leave use as it relates to Coronavirus Disease 2019 (COVID-19). Please adhere to the following:

- When on personal travel, state employees should follow the Centers for Disease Control and Prevention (CDC) best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- Employees who travel or who live with an individual who has traveled internationally will not be allowed to return to work for 14 days upon return to the United States. If an employee is unable to return to work due to the stipulations mentioned above, available annual, sick, or personal leave (personal leave includes personal holiday and any compensatory leave) must be used. Employees who can work remotely may be able to do so with supervisor/management approval. Employees without available leave or approval to receive sick leave donations in accordance with the department's Sick Leave Transfer Plan, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the CDC or a state public health agency will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual, or personal leave during this 14-day period. Employees who can work remotely may be able to do so with supervisor/management approval. Employees without available

AMERICAN OVERSIGHT

leave or approval to receive sick leave donations in accordance with the department's Sick Leave Transfer Plan, and who are unable to work remotely, may be subject to leave without pay.

- Employees who self-isolate due to possible exposure, even if not displaying symptoms of COVID-19, upon request of the Supervisor must provide appropriate supporting information and/or documentation. Employee will need to utilize available sick, annual, or personal leave during this 14-day period. Employees who can work remotely may be able to do so with supervisor/management approval. Employees without available leave or approval to receive sick leave donations in accordance with the department's Sick Leave Transfer Plan, and who are unable to work remotely, may be subject to leave without pay.

- Employees who have taken sick leave as a result of displaying possible COVID-19 symptoms such as fever, cough, runny nose, etc. may return to work once they no longer pose a health hazard to fellow employees which will require a medical release.

NOTE: Administrative leave may **not** be utilized at this time. Administrative leave may only be utilized as outlined in CFOP 60-40, Chapter 8, Leave for Disasters and Other Emergency Conditions.

Please see the attached Frequently Asked Questions (FAQs) for additional information.

If you have any questions regarding leave use, please contact your local Human Resources Business Partner. Requests/questions related to working remotely should be directed to your supervisor/management.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and provide guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities.

Thank you.

ATTENTION: PLEASE DO NOT REPLY TO THIS EMAIL. This email address is not monitored and any requests submitted to this email address will not be responded to or processed. If you have questions or need assistance, the appropriate contact information is indicated above. Or you may create a ticket in the MyHR411 Self Service Portal. Please visit http://eww.dcf.state.fl.us/myhr411/SelfService/ to find training on how to create tickets and view communications regarding the use of the Human Resources self-service portal.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 39 new positive cases of coronavirus disease (COVID-19). Earlier today, the Florida Department of Health confirmed the death of a 77-year old male in Lee County who had previously tested positive for COVID-19. Yesterday, Governor Ron DeSantis sent a letter to Health and Human Services requesting the release of 61 Florida residents from Georgia, many of whom are elderly, who were previously aboard the Grand Princess voyage outside of California.

To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 55-year old female in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 79-year old female from Connecticut has tested positive for COVID-19 in Baker County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 72-year old female in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old female in Citrus County has tested positive for COVID-10. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 64-year old female in St. Johns County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 71-year old male in Volusia County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 70-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 47-year old male in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 67-year old male in Pasco County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 32-year old female in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 17-year old male from Cuba has tested positive in Hillsborough County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 28-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 58-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 25-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 62-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 74-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 65-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 42-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 52-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by

public health officials.

- A 65-year old female from New York has tested positive for COVID-19 in Alachua County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 63-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 30-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 66-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 83-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 76-year old male in Collier County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 28-year old male in Collier County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.

COVID-19 Cases

AMERICAN OVERSIGHT

untitled

AMERICAN OVERSIGHT

*Definition of travel-related: A known history of exposure to COVID-19 associated with travel outside of Florida.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including over 10 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified multiple, positive COVID-19 cases that are connected and associated with Port Everglades in Broward County, Florida.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.
- Governor DeSantis requested that Health and Human Services send home the 61 Floridians that were previously aboard the Grand Princess cruise line, home from isolation from Dobbins Air Reserve Base, Georgia.
- Governor DeSantis has directed the Department of Health to hire additional epidemiologists from university health programs to help with workload.

AMERICAN OVERSIGHT

- Governor DeSantis has directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and ALF licenses for 90 days to remove distraction from patient care.
- Governor DeSantis directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes to all visitors for the next 30 days.
- Governor DeSantis directed the Department of Highway Safety and Motor Vehicles to suspend drivers' license renewal requirements for 30 days.
- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).
- Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.
- Florida Department of Education Commissioner Richard Corcoran has provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. In addition, the Department of Education announced that the start of state testing will be delayed by a minimum of two weeks.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

To: Satter, Jonathan <Jonathan.Satter@dms.myflorida.com>
Subject: IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease

AMERICAN OVERSIGHT

Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

Subject: Re: Orlando Sentinel reporting FDOH updated testing criteria

Dr Jean,

We were just informed of this change as non of us received it yesterday or today via DOH blast

We agree that anyone with moderate or severe symptoms needs Airborne isolation and N95 on employees in addition to PPE for COVId

The question is on low disease, asymptomatic or non admitted is it ok to proceed w droplet and contact and not AII as we don't have enough ED rooms to screen patients same for outpatient clinics

The latest guidelines you provided are contradictory with the WHO and CDC.

We need your recommendations on implementation as most clinics or any clinician suspecting COvId will not be able to place patients in AII

Kind Regards,

Lilian Abbo, MD, FIDSA

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Governor Ron DeSantis is in constant communication with Florida Division of Emergency Management Director Jared Moskowitz and State Surgeon General Dr. Scott Rivkees as the State of Florida continues to monitor and respond to the threat of COVID-19.

Today, in a briefing at the State Emergency Operations Center, Governor DeSantis announced the following:

- At the Governor's direction, a public-private partnership has been put in place between Memorial Healthcare in Broward and the National Guard to set up a mobile testing unit.
- Governor DeSantis has directed the Department of Business and Professional Regulation Secretary Halsey Beshears, in coordination with the Florida Department of Health, to issue social distancing guidance to restaurants and bars.
- Governor DeSantis sent a letter to the federal Small Business Administration to turn on the SBA loan program for small businesses.
- Governor DeSantis directed the Department of Management Services Secretary Jonathan Satter to allow state employees to donate and transfer their available leave time to other state employees to mitigate the impacts of school closures.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

More Information on COVID-19

To find the most up-to-date information and guidance on COVID-19, please visit the Department of Health's dedicated COVID-19 webpage. For more information about current travel advisories issued by the U.S. Department of State, please visit the travel advisory website.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneezing into a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from any other destination with community transmission should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, he or she should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has taken to prepare for and Respond to COVID-19

Yesterday, the Governor provided several additional updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis requested that Health and Human Services send home the 61 Floridians that were previously aboard the Grand Princess Cruise line, home from isolation from Dobbins Air Reserve Base, Georgia.
- Governor DeSantis directed the Department of Health to hire additional epidemiologists from university health programs to help with workload.
- Governor DeSantis directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and assisted living facility licenses for 90 days to remove distraction from patient care.
- Governor DeSantis directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes to all visitors for the next 30 days.
- Governor DeSantis directed the Department of Highway Safety and Motor Vehicles to suspend drivers' license renewal requirements for 30 days.
- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency. The State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- The Department of Health (DOH) established an Incident Management Team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call center for questions regarding COVID-19.
- DOH developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- DOH implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- The DOH distributed CDC Interim Guidance for public health personnel evaluating Persons under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- DOH distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- DOH implemented testing at all three State Public Health Laboratories.
- DOH distributed updated CDC guidance for schools to CHDs and the Department of Education.
- DOH distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

AGENCY FOR HEALTH CARE ADMINISTRATION

- The Agency for Health Care Administration (AHCA) will be granting a 90-day extension to all licenses for health care providers and regulated facilities.
- AHCA is distributing information regarding regulatory flexibilities created by waivers from CMS related to skilled nursing facilities, critical access hospitals, home health agencies, durable medical equipment, provider enrollment, etc.
- AHCA participated in a collaborative call with the Florida Health Care Association, Florida Hospital Association and LeadingAge Florida to discuss patient transfer arrangements between health care facilities such as nursing homes and hospitals.
- The Florida Medicaid Program announced coverage of commercial testing for COVID-19 for dates of service back to February 4.
- AHCA submitted requests to the Centers for Medicare and Medicaid Services (CMS) for flexibility for Florida's program under the federal declaration of a state of emergency.
- Secretary Mayhew participated in a call with hospitals, laboratory administrators and associations regarding hospital testing.

AGENCY FOR PERSONS WITH DISABILITIES

- The Agency for Persons with Disabilities' (APD) three state-run centers in Marianna, Gainesville, and Chattahoochee, as well as APD-licensed group homes, are restricting visitors in compliance with the Executive Order to protect the health and safety of our customers.
- APD Adult Day Training programs across the state are screening visitors for possible exposure to COVID-19 using a visitor questionnaire. The questionnaire is also being used to screen visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA), in coordination with the Administration for Community Living (ACL), facilitated a virtual Town Hall

AMERICAN OVERSIGHT

meeting at the request of Hallandale Beach Mayor Joy Cooper. More than 2,700 seniors were online for the meeting. Charlotte Mather Taylor, Executive Director of the Aging and Disability Resource Center (ADRC) of Broward County, led the discussion with participation from ACL Representative Constantino Miskos, Chen Senior Medical Center, and representatives from Emergency Medical Services. Their primary topics of conversation centered on the work being done, specifically by the Area Agency on Aging, to continue to provide people resources and services to maximize support during COVID-19.

- Through Departmental Leadership and the Area Agency on Aging contract managers, DOEA provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the safe delivery of home-delivered meals to prevent spread of respiratory infection.
- DOEA continues to provide updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, they are provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.
- The Vision 2020: Looking Towards Your Age-Friendly Future Tour to five communities across Florida originally planned for April 20th - April 24th and co-hosted by the Department and AARP has been postponed to protect the health and wellness of seniors, volunteers and staff.
- All Serving Health Insurance Needs of Elders (SHINE) participation in scheduled outreach events, presentations, and in-person SHINE/Senior Medicare Patrol (SMP) counseling has been suspended until further notice. SHINE volunteers and staff will continue to provide counseling services, but the services will be conducted over-the-phone with future considerations for the use of webinars and Facebook LIVE.
- DOEA Secretary Prudom held a conference call with The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors to discuss the suspension of face-to-face assessments. CARES assessors will provide reviews through phone or tele-technology to reduce client/staff exposure and reduce spread.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the provision on completing assessments for multiple program types, specifically for clients who have chosen to self-isolate.
- DOEA provided updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers, and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- The Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is having preliminary conversations with Mass Care on the anticipated needs of volunteers. The agency is working together to plan for volunteers and develop volunteer safety guidelines to ensure that they are protected.
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.

FLORIDA DEPARTMENT OF EDUCATION

- Commissioner of the Florida Department of Education (FDOE) Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks. To stay up to date on school closure information, visit: org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online

AMERICAN OVERSIGHT

learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, and their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- The State University System will continue to evaluate the effectiveness of remote learning and the need to teach remotely in order to protect our students and the university community.
- The State University System will continue to work with the Florida Department of Health and the Emergency Operations Center to determine if the initial two weeks of remote learning is sufficient.
- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING - While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- All state universities have implemented campus-wide critical incident or emergency management teams that are meeting regularly to prepare for the impacts of the COVID-19 virus.
- All universities are preparing to transition to remote instructional delivery for a two-week period during March and early April, depending on each institution's Spring Break, and are informing students not to return to campus during this period.
- The Board of Governors will be conducting its March meeting via conference call and will not have a face-to-face meeting at USF as was originally scheduled.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.

- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19.

- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State's museum properties are taking precautions to ensure the health of visitors amid concerns of COVID-19. As part of daily site and museum operations, The Grove Museum has increased the frequency of disinfecting regularly touched interactive surfaces such as touchscreens, display cases, and tactile panels. Additionally, Museum staff ensure that door handles, flat surfaces, kitchen equipment, shared office equipment, bathrooms, etc., are all frequently sanitized. Finally, The Grove Museum has taken measures to make all staff and volunteers aware of the steps everyone should take to help contain the spread of COVID-19 such as hand washing, self-isolation when feeling ill, following recommendations from health officials and seeking medical evaluation immediately if COVID-19 symptoms appear.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor Ron DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.

AMERICAN OVERSIGHT

- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- Pursuant to Executive Order 20-52 issued by Governor Ron DeSantis, FDOT Secretary Thibault has suspended size and weight restrictions for divisible loads on any vehicles transporting emergency equipment, services, supplies, and necessary agricultural commodities on state roads.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- Pursuant to Executive Order 20-52, FLHSMV Executive Director Rhodes waived commercial truck hours of service regulations and other related regulations so that emergency supplies, equipment, commodities and resources can be moved more quickly and efficiently throughout the state.
- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to complete transactions for driver licenses, ID cards, motor vehicle or vessel registrations, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association as well as Tax Collectors across the state to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor Ron DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/.

VISIT FLORIDA

- To protect the health and safety of the traveling public and staff, VISIT FLORIDA's four welcome centers will be closed until further notice.
- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

AMERICAN OVERSIGHT

The Florida Department of Law Enforcement (FDLE) Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

FLORIDA DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

- The Florida Department of Business and Professional Regulation (DBPR) is incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices. Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises.

FLORIDA DEPARTMENT OF MANAGEMENT SERVICES

- The Florida Department of Management Services' (DMS) Emergency Support Function-7 (ESF-7) Logistics team continues to coordinate with the Department of Health and the Division of Emergency Management on identifying the equipment or supplies that may be necessary for a mass response to COVID-19.
- DMS' Division of Human Resource Management has provided guidance to agencies on implementing preventive actions in the workplace, reporting symptoms, using leave, utilizing health insurance benefits, and applying travel restrictions and telework policies.
- DMS' Division of State Group Insurance continues to coordinate with health plan providers to ensure that state employee health plan members receive the health benefits that can assist them and their dependents if needed.
- DMS' Division of Real Estate Development and Management (REDM) continues to provide guidance to agency facility managers across the state on steps to take to prevent workplace contamination and to pre-position environmental vendors to mobilize in the event a viricidal cleaning is needed.
- DMS' Division of Real Estate Development and Management continues to identify, purchase, and distribute additional hand sanitizing gel and cleaning supplies to state-maintained facilities.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with users and vendor of the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with statewide public safety communications personnel on their plans to ensure emergency communications systems are not impacted by potential reductions in staffing resources.

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

- Currently all Florida State Parks and campgrounds, and Office of Resilience and Coastal Protection facilities (aquatic preserves and National Estuarine Research Reserves), remain open to the public. However, in an abundance of caution and consistent with Center for Disease Control and Prevention guidance, DEP announced on March 13 that it is cancelling all events and activities at these facilities effective immediately and until further notice.
    - This includes DEP events and includes activities such as tours and visitor centers that involve large groups and/or or people in close proximity to others. People with questions regarding any privately scheduled event should check with the host of the event or the facility directly. For the latest closure and cancellation information, please visit floridastateparks.org.
- If your travel plans have changed and you need to modify camping or cabin reservations, please visit ReserveAmerica.com, call Reserve America at 1-800-326-3521 or TDD 888-433-0287 or text to 904-204-3216.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE, Fla. - The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Governor Ron DeSantis is in constant communication with Florida Division of Emergency Management Director Jared Moskowitz and State Surgeon General Dr. Scott Rivkees as the State of Florida continues to monitor and respond to the threat of COVID-19.

Today, in a briefing at the Florida Emergency Operations Center, Governor DeSantis announced the following:

Education

- Governor Ron DeSantis today made several announcements to keep Florida's students, instructional staff and faculty safe. He announced that all remaining assessments for school readiness and voluntary prekindergarten and all testing requirements for K-12 will be cancelled for the 2019-2020 school year.
- Governor DeSantis also provided more flexibility to local school districts so they can install and establish additional remote learning opportunities for students, including the ability to purchase devices and internet services.

Information on Restaurants, Bars, Nightclubs and Beaches

- Governor Ron DeSantis issued an Executive Order that will reduce density and crowds in restaurants, bars, nightclubs and beaches to mitigate the spread of Coronavirus (COVID-19).
- **Bars and Nightclubs**
  - Under the direction of Governor DeSantis, all bars and nightclubs throughout Florida will close for the next 30 days. Information is available on the website of Florida's Department of Business & Professional Management (DBPR).
- **Beaches**
  - The Governor is directing parties accessing public beaches in the state of Florida to follow the Centers for Disease Control and Prevention (CDC) guidance by limiting their gatherings to no more than 10 persons.
- **Restaurants**
  - Restaurants across the state of Florida will now be required to limit customer entry to 50 percent of capacity. Seating must be staggered and limited to ensure seated parties are separated by a distance of at least six feet, in accordance with CDC guidelines. Restaurants are encouraged to remain open and expand take-out and delivery services. Information is available on the website for DBPR.

Reemployment Assistance

- Governor DeSantis reminded Floridians that if their employment has been negatively impacted because of mitigation efforts to stop the spread of COVID-19, these Floridians may be eligible to receive Reemployment Assistance.
  - Individuals who are eligible for Reemployment Assistance may include:
    - Those who are quarantined by a medical professional or a government agency,

AMERICAN OVERSIGHT

    - Those who are laid off or sent home without pay for an extended period by their employer due to COVID-19 concerns; and
    - Those who are caring for an immediate family member who is diagnosed with COVID-19
- Governor DeSantis and the Department of Economic Opportunity (DEO) encourage any Floridian whose employment has been negatively impacted as a result of COVID-19 to visit Floridajobs.org and click on the Reemployment Assistance Service Center to learn more about the program and to watch a short video on how to apply.

Private businesses assisting Floridians

- Governor DeSantis also applauded steps taken by private businesses such as FPL, Duke Energy, TECO, and Uber who are taking steps to assist Floridians with electric bills and delivering free meals to health care workers.

Presidential Preference Primary Election

- Leading up to today's Presidential Preference Primary Election, Governor DeSantis directed Secretary of State Laurel M. Lee to work with Supervisors of Elections throughout Florida to ensure a smooth election. Throughout the day, the Florida Division of Elections remained in constant contact with local elections officials to ensure voters who had not voted prior to election day, had the opportunity to cast their ballot. **The Department of State proactively worked with emergency management officials to ensure that Supervisors had the necessary resources for sanitization and cleaning at polling places to help ensure the safety of voters on Election Day.** Secretary of State Laurel M. Lee held a press conference to share updates from the day, once polls have closed statewide, that will be available for viewing on the Florida Channel.

More Information on COVID-19
To find the most up-to-date information and guidance on COVID-19, please visit the Department of Health's dedicated COVID-19 webpage. For information and advisories from the Centers for Disease Control (CDC), please visit the CDC COVID-19 website. For more information about current travel advisories issued by the U.S. Department of State, please visit the travel advisory website.
For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**
What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneezing into a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from any other destination with community transmission should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, he or she should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the state has taken to prepare for and respond to COVID-19:

DEPARTMENT OF HEALTH

- At the direction of Governor DeSantis, State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.
- Established an Incident Management Team to coordinate response operations.
- Defined a high-level phased response strategy for COVID-19.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined the calls.
- Established a public call center for questions regarding COVID-19. The call center launched Monday, March 2.
- Developed and distributed COVID-19 presentation materials to County Health Departments (CHD) for use at community meetings.
- Activated the Joint Information Center in coordination with the Division of Emergency Management.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUI) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Approved and disseminated an updated Clinician Screening Tool for identifying COVID-19 PUIs.
- Distributed a health care provider letter regarding enhanced surveillance and preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.

AMERICAN OVERSIGHT

- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated laboratory guidance regarding implementation of testing at State Public Health Laboratories.
- Developing a laboratory surge plan.
- Developing a clinician-level briefing for medical audiences.
- Identifying and monitoring close contacts of presumptive cases. Any close contacts with symptoms will be tested.
- Implemented private lab testing.
- Developed and disseminated pandemic planning guidance.
- Advised CHDs and HCCs to retain expired personal protective equipment until further until further notice.
- Continued development of public information resources.
- Developing infographics for first responders (fire, law enforcement and EMS) regarding infection control and personal protection for COVID-19.
- At the Governor's direction, a public-private partnership has been put in place between Memorial Healthcare in Broward and the National Guard to set up a mobile testing unit.
- At the direction of Governor DeSantis hiring additional epidemiologists from university health programs to help with workload.
- Governor DeSantis directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and assisted living facility licenses for 90 days to remove distraction from patient care.

THE DIVISION OF EMERGENCY MANAGEMENT

- Today, Governor Ron DeSantis and Division of Emergency Management Director Jared Moskowitz announced that Florida is continuing to order supplies and personal protective equipment in an effort to mitigate and contain the spread of COVID-19 in the state.
- After conducting a thorough assessment of needs, Director Moskowitz has requested the following supplies through Direct Federal Assistance. Supplies are being delivered on a rolling basis, and inventory is being distributed throughout the state 24 hours a day.
  - 5 mobile intensive care units
  - 5,000 ventilators
  - 5,000 hospital beds
  - 50,000 two oz. bottles of hand sanitizer
  - 250,000 coveralls
  - 500,000 gloves
  - 500,000 gowns
  - 500,000 collection kits
  - 100,000 16 oz. bottles of hand sanitizers
  - 150,000 Personal Protective Equipment kits, including coveralls, gowns, and goggles
  - 2 million N95 face masks
- Director Moskowitz is working with the federal government to determine if there is capacity to add US Navy Mercy-Class ships at Florida ports.
- Three field hospitals are being deployed:
  - One field hospital is currently staged in Orlando and can be deployed to other areas in the state as needed.
  - One field hospital is on its way to Broward County and will be set up there.
  - One field hospital is on its way to Ocala and will be staged there and deployed to other areas as needed.
- Mobile COVID-19 testing is also being implemented.

AGENCY FOR HEALTH CARE ADMINISTRATION

- Secretary Mayhew is working directly with hospitals and large health systems to identify potential vacant wings or buildings to provide additional hospital inpatient capacity should it become necessary.
- On March 16, Florida became the first state to receive CMS approvalof its 1135 Medicaid Waiver giving AHCA more flexibility for its COVID-19 response efforts. This federal action lifts Medicaid prior authorization requirements for critical health care services and allows for expedited provider enrollment.
- AHCA distributed a provider alert to licensed health care providers regarding the Division of Emergency Management's new Emergency Order tightening visitation restrictions at residential and long-term care facilities.
- AHCA, in coordination with the DEM and the Department, is hosting ongoing statewide calls for nursing homes, assisted living facilities, intermediate care facilities, the Agency for Persons with Disabilities, group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting visitors and providing updates.
- AHCA, in coordination with DEM and the Department, is hosting ongoing statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- After previously opening an event on the Emergency Status System (ESS) for hospitals to enter census information, emergency room status updatesand isolation beds, AHCA expanded the ESS event to track nursing homes and assisted living facility bed capacity, effective March 15.
- The Agency for Health Care Administration (AHCA) will be granting a 90-day extension to all licenses for health care providers and regulated facilities.
- AHCA is distributing information regarding regulatory flexibilities created by waivers from the Centers for Medicare and Medicaid Services (CMS) related to skilled nursing facilities, critical access hospitals, home health agencies, durable medical equipment, provider enrollment, etc.
- AHCA participated in a collaborative call with the Florida Health Care Association, Florida Hospital Association and LeadingAge Florida to discuss patient transfer arrangements between health care facilities such as nursing homes and hospitals.
- The Florida Medicaid Program announced coverage of commercial testing for COVID-19 for dates of service back to February 4.

AGENCY FOR PERSONS WITH DISABILITIES

- APD is implementing telework for employees throughout the state as directed by Governor DeSantis to reduce possible exposure to COVID-19.
- APD and AHCA are hosting a conference call today with provider association leaders to share information on modifications to some existing policies and practices during this state of emergency.
- The agency's three state-run centers in Marianna, Gainesville and Chattahoochee, as well as APD-licensed group homes, are restricting visitors in compliance with the Executive Order to protect the health and safety of our customers.
- APD Adult Day Training programs across the state are screening visitors for possible exposure to COVID-19 using a visitor questionnaire. The questionnaire is also being used to screen visitors coming into APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- DOEA hosted a Program of All-Inclusive Care for the Elderly (PACE) conference call. All PACE providers are following CDC guidelines for clients, staff, and vendors. They have called clients to check their status and make sure there are no outstanding needs, they have implemented disaster plans, and they have shared information across the state and with partner agencies.

AMERICAN OVERSIGHT

- DOEA is coordinating with AHCA to ensure PACE providers continue to receive updated information on testing facilities.
- DOEA continues to provide technical assistance to Area Agencies on Aging (AAA) regarding program flexibilities including meals, transportation, respite monitoring, service delivery models, EHEAP, health and wellness activities, outreach, board meetings, office closures, work from home, HIPPA, and IT concerns.
- DOEA coordinated the delivery of over 3,000 shelf stable meals to a Miami-Dade County senior center who had expressed concern over some clients going without meals.
- DOEA continues to maintain and disseminate county-level statistics on the number and types of services for use in modeling statewide service interruptions. When service interruptions occur, the local Area Agency for Aging (AAA) providers call clients impacted by service interruptions to offer alternative assistance.
- DOEA's Serving Health Insurance Needs of Elders (SHINE) / Senior Medicare Patrol program offered to send all online training modules to the 11 Aging and Disability Resource Centers. The distribution of training modules to active and pending volunteers would allow volunteers to train from home, on their own time, over the next several weeks and serve as a re-certification process.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families' (DCF) Office of Child Welfare is sending regular communication about COVID-19 specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19). An FAQ document for providers was also posted prominently on DCF's Child Care webpage.
- DCF's Office of Child Welfare is disseminating a survey to licensed child care providers to assess closures throughout the state. Currently, the decision to close is at the discretion of each individual facility.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF is leading status update calls with both internal leadership and leadership from external contracted partners. For the time being, these calls will take place twice weekly, every Tuesday and Friday.
- DCF General Services staff throughout the state are working with lessors and janitorial contractors to increase sanitizing measures in office buildings, especially restrooms and common areas. They also began taking inventory of sanitizing supplies (disinfecting wipes, Lysol spray, hand-sanitizer, etc.) and are ordering more as needed.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility. At this time, there are no cases of patients or facility staff testing positive for COVID-19.
- DCF's Office of Economic Self-Sufficiency is communicating with DEO regarding work requirements and CareerSource operations and availability.
- DCF's Office of Economic Self-Sufficiency implemented screening procedures, including a set of questions that must be asked prior to entry, at all economic self-sufficiency storefronts.

FLORIDA DEPARTMENT OF VETERANS' AFFAIR

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- All VA Vet Centers in Florida providing readjustment counseling and outreach services to veterans and families are open and implementing enhanced screening protocols. At this time, veterans may appear in person or opt in advance for an optional phone consultation.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences. In addition, cemetery personnel will be discouraged from handshaking and any unnecessary physical contact to minimize the potential transmission of germs and viruses until the pandemic conditions are under control.
- Suspension of VA Travel Board Hearings - The Board of Veterans' Appeals (U.S. Department of Veterans Affairs) is suspending Travel Boards until May 1, 2020, due to COVID-19 response efforts. The Board will work with veterans and veteran service organizations and representatives to continue video hearings and provide virtual hearings where possible.
- All FDVA and VA facilities remain fully operational.

DEPARTMENT OF MILITARY AFFAIRS

- There have been over 598 Florida National Guardsmen placed on state active duty in support of COVID-19.
- The Florida National Guard is activating all of their medical professionals (Army Combat medic specialists and Air Force medical technicians) to support Florida Department of Health's drive-through screening operations. Guardsmen have reported in and formed Task Force Medical already.
- The Florida National Guard has activated soldiers to augment the State Logistics Readiness Center in Central Florida.
- The Florida National Guard has activated Guardsmen to augment the State Emergency Operations Center.

VOLUNTEER FLORIDA

- Volunteer Florida is encouraging volunteers to screen themselves for COVID-19 (per CDC and Florida Department of Health guidelines) before serving.
- Volunteer Florida will be participating in a call with Voluntary Organizations Active in Disaster (VOAD) partners today to discuss the anticipated needs of volunteers.
- Volunteer Florida is pushing out VOAD organizational guidance to ESF-15 partners.
- Volunteer Florida is working with state counterparts and FEMA to develop volunteer plans.
- Volunteer Florida's National Service Department has discussed using AmeriCorps members in food banks as feeding needs increase.
- Volunteer Florida continues to work with Mass Care on the anticipated needs of volunteers.
- Volunteer Florida has asked all VOADpartners to review their continuity of operations so that there is no service delivery disruption.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF EDUCATION

- Commissioner of the Florida Department of Education (FDOE) Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks. To stay up to date on school closure information, visit: org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, and their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- The SUS has directed all state universities to continue remote instruction through the end of the Spring semester.
- All students who can return home should return home.
- The SUS has directed that traditional on-campus commencement ceremonies will not be held in May. Instead, each university is directed to develop an alternate schedule or method of delivery.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Volunteer activities within correctional institutions statewide have been suspended.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled internationally or on a cruise within the last 14 days.
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath.
  - Have had contact with someone who has been or is under investigation for COVID-19.

- All non-critical inmate transfers have been suspended.
- New commitments and intakes have been restricted.
- Outside inmate work squads have been restricted.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- FDOT coordinated with transit agencies throughout the state to ensure the safe return of the Florida residents who were quarantined in Georgia and had previously been aboard the Grand Princess voyage outside of California.
- FDOT is coordinating with other state and local agencies to help ensure mobility around the temporary testing site in Broward County. Once the site is open, FDOT plans to publicize testing site information on highway advisory radio.
- FDOT completed a request to provide necessary supplies to harbor pilots working at seaports.
- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department continue to host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- Pursuant to Executive Order 20-52 issued by Governor DeSantis, FDOT Secretary Thibault has suspended size and weight restrictions for divisible loads on any vehicles transporting emergency equipment, services, supplies, and necessary agricultural commodities on state roads.
- COVID-19 educational materials have been posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials have been posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- At the direction of Governor Ron DeSantis, the Florida Department of Highway Safety and Motor has issued an Emergency Orderextending all Florida driver licenses and identification cards that will expire in the next 30 days.
- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an

AMERICAN OVERSIGHT

office location, to complete transactions for driver licenses, ID cards, motor vehicle or vessel registrations, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association as well as Tax Collectors across the state to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.
- FLHSMV has been in regular communication with the American Association of Motor Vehicle Administrators and other state motor vehicle administrators to discusses best practices and strategies related to COVID-19 preparations and response.
- Pursuant to Executive Order 20-52 issued by Governor Ron DeSantis, FLHSMV Executive Director Rhodes has waived commercial truck hours of service regulations and other related regulations so that emergency supplies, equipment, commodities and resources can be moved more quickly and efficiently throughout the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor Ron DeSantis activated the Florida Small Business Emergency Bridge Loan Program to support small businesses impacted by COVID-19. The bridge loan program, managed by the Florida Department of Economic Opportunity (DEO), provides short-term, interest-free loans to small businesses that experienced economic injury from COVID-19. The application period is open and runs through May 8, 20. Interested businesses should visit orgfor more information.
- Governor DeSantis has requested the federal Small Business Administration (SBA) make the Economic Injury Disaster Loan program available for Florida's small businesses impacted by COVID-19. The Florida Department of Economic Opportunity (DEO) stands ready to assist Florida's small businesses in accessing this funding when available.
- Governor Ron DeSantis has activated the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by DEO, will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/.

VISIT FLORIDA

- VISIT FLORIDA is wholly focused on providing health and safety information to travelers and Floridians. This includes the activation of Florida Now, which includes the latest updates from state emergency response professionals hosted on VisitFlorida.com. All promotional media has been paused.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19
- To protect the health and safety of the traveling public and staff, VISIT FLORIDA's four welcome centers will be closed until further notice.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida. VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department has added a dedicated COVID-19 webpage for child support customers at com/childsupport/coronavirus.The new page provides comprehensive information for alternative options for handling many routine child support case activities without visiting a local child support office. Efforts also include rescheduling genetic testing sample collection appointments and postponing other types of appointments.
- The Department of Revenue is advising child support customers who are scheduled for court hearings related to their child support cases to check with the local courts where the hearings are scheduled in case the courts have new requirements, such as appearing telephonically.
- The Department of Revenue has established a dedicated team to address tax-related issues pertaining to COVID-19 and has created an email address, COVID19TAXHELP@floridarevenue.com, where taxpayers can send questions and concerns. The Department encourages all taxpayers to use our e-services applications to file and pay taxes or contact our call center at (850) 488-6800.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in the public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has issued Informational Memorandum OIR-20-03Mdirecting all insurers and other entities regulated by OIR to review and update their business continuity and/or continuity of operations plans. Companies are directed to immediately contact OIR if their continuity plans are activated and/or if business operations become compromised so it can work with insurers to avoid any disruption in consumer services.
- OIR Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01Mto all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and DOH information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
- Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
  OIR has issued Informational Memorandum OIR-20-02Mas a reminder to all health insurers, health maintenance organizations, and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has issued notices to all of its employees providing resources regarding COVID-19 and outlining the steps recommended by the Centers for Disease Control and Florida Department of Health to take preventative health measures.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- Florida Department of Law Enforcement (FDLE) is working with state and local agencies and the Florida National Guard to set up testing collection sites in multiple locations across Florida.
- The Florida Department of Law Enforcement (FDLE) Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified screening protocols and procedures for youth taken into custody by law enforcement who are brought to juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice has sent a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has instituted additional screening measures for outside vendors who work within juvenile facilities and non-essential travel of staff members has been stopped. Visitors are limited to business-related visitors only (i.e., vendors, no personal visitors, no volunteers at this time). The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted. Clinical personnel, however, are still permitted to visit youth for treatment purposes, and attorneys are still permitted to conduct legal visits with youth.

FLORIDA DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

- DBPR shared information with all agency staff statewide pertaining to the declaration of a state public health emergency, state response protocols as ordered in EO 20-51, and FDOH information and resources available on the dedicated FDOH COVID-19 webpage. DBPR communication with staff has emphasized the best practices and preventive steps recommended by FDOH for impeding the spread of respiratory illnesses.
- DBPR's Emergency Coordinating Officer and State Mass Care Coordinator is supporting the initiation of FDOH's joint information center and providing assistance as requested of State Emergency Support Function 6.
- DBPR added a web banner with information on COVID-19 and link to the Florida Department of Health's dedicated COVID-19 webpage at http://www.floridahealth.gov/COVID-19.
- DBPR is incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices. Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises.
- DBPR has suspended all official business visits, including inspections, that involve licenses located at a facility covered under the visitation restrictions implemented pursuant to FDEM Emergency Order 20-002.
- DBPR issued an emergency to extend license renewal deadlines and renewal requirements for a period of 30 days for licenses with an existing renewal deadline occurring in the months of March or April, 2020.
- DBPR is monitoring release of CDC guidance related to recommendations for bars and restaurants and will coordinate with FDOH on state guidance when recommendations are released by CDC.
- DBPR is establishing a dedicated emergency information page with direct links to the FDOH COVID-19 webpage as well as information on agency emergency orders, schedule and meeting changes for divisions and boards, and other important departmental information during this emergency.
- DBPR is providing guidance to appointed professional licensing boards related to procedural considerations and available technology options for remote, web-based or telephonic board meetings.
- DBPR hosted a senior management meeting with all program directors on Monday, 03.16.2020, to discuss the latest departmental actions and preparations associated with COVID-19 in Florida.

FLORIDA DEPARTMENT OF MANAGEMENT SERVICES

- DMS Secretary Jonathan Satter issued an emergency order that waived rules to allow for state employees to use any type of accrued leave for instances related to COVID-19, including self-isolation after potential exposure, staying home with children due to child care or school closures, and time needed to take care of dependents like an elder parent. The order also waived rules to expand the ability for employees to donate leave to fellow employees.
- Governor DeSantis directed the Department of Management Services Secretary Jonathan Satter to allow state employees to donate and transfer their available leave time to other state employees to mitigate the impacts of school closures.
- The Florida Department of Management Services' (DMS) Emergency Support Function-7 (ESF-7) Logistics team continues to coordinate with the Department of Health and the Division of Emergency Management on identifying the equipment or supplies that may be necessary for a mass response to COVID-19.
- DMS' Division of Human Resource Management has provided guidance to agencies on implementing preventive actions in the workplace, reporting symptoms, using leave, utilizing health insurance benefits, and applying travel restrictions and telework policies.
- DMS' Division of State Group Insurance continues to coordinate with health plan providers to ensure that state employee health plan members receive the health benefits that can assist them and their dependents if needed.
- DMS' Division of Real Estate Development and Management (REDM) continues to provide guidance to agency facility managers across the state on steps to take to prevent workplace contamination and to pre-position environmental vendors to mobilize in the event a viricidal cleaning is needed.
- DMS' Division of Real Estate Development and Management continues to identify, purchase, and distribute additional hand sanitizing gel and cleaning supplies to state-maintained facilities.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with users and vendor of the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with statewide public safety communications personnel on their plans to ensure emergency communications systems are not impacted by potential reductions in staffing resources.

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

- Florida State Parks remain open for recreational day use; however, all State Parks have adjusted their operating hours to 8 a.m. to 5 p.m.The Department continues to monitor new developments closely and will make further adjustments as necessary based on any new Department of Health or CDC guidance received to ensure protection of our staff and visitors. For the latest information on park operating hours and operational status, please visit floridastateparks.org.
- Effective March 17, DEP is cancelling all events, activities, special event reservations, pavilion rentals and camping reservations at Florida State Parks for the next 60 days.
    - Existing overnight camping reservations that begin Wednesday, March 18, will be honored. Visitors must arrive prior to 5 p.m. on March 18,to secure their reservation. After Wednesday, all reservations moving forward will be cancelled and refunded. Beginning Friday, March 20, campgrounds and all overnight accommodations will be fully closed.

AMERICAN OVERSIGHT

ReserveAmerica, the Florida State Parks partner in camping reservations, will reach out to all affected parties to refund camping reservations. ReserveAmerica can also be reached directly at 1-800-326-3521or TDD 888-433-0287 if visitors have questions or need to modify existing reservations.

- DEP's Office of Resilience and Coastal Protection facilities will also be closing the following centers until further notice: Apalachicola National Estuarine Research Reserve, Guana Tolomato Matanzas (GTM) National Estuarine Research Reserveand Rookery Bay National Estuarine Research Reserve.

Hello Dr. Villalta –

One of the requirements just presented by CDC is as follows:

1. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

Is this something you could help arrange? The air ambulance company is not doing so.

Thanks,

Eleni

Sent: Tuesday, March 17, 2020 8:27 AM
To: Roberson, Shamarial
Cc: Traul, Robert; Isaac, Sean; Jordan, Melissa Murray
Subject: CHD Dental Clinic Guidance

Shamarial,

Please see the information below that we propose Dr. Traul send out to the CHD Dental Directors.

The Florida Department of Health (FDOH) acknowledges the growing concern and risks the public and dental professionals face from COVID-19. All dental providers and healthcare professionals play an important role in mitigating the spread of COVID-19. Please review the CDC Guidance for Healthcare Professionals.

On March 16, 2020 federal recommendations were released suggesting social distance and the prevention of groups ten or more. Also on March 16, 2020 the American Dental Association released ADA Guidance to postpone elective procedures for the next three weeks.

Due to the extraordinary situation, the Florida Department of Health recommends dental programs postpone elective procedures for the next three weeks and reassess the situation at that time. Concentrating on the provision of emergency dental care will serve the public and alleviate any emergencies from placing more stress on hospitals and emergency rooms. Clinics should establish procedures to provide care for these patients after taking

AMERICAN OVERSIGHT

appropriate precautions to limit the risk of spreading COVID-19. The FDOH recommends all living in Florida practice social distancing and take steps to limit the risk of spreading COVID-19.

Thanks,
Shay

HI, Carina

We are looking at current EPI capacity within CHDs and planning for surge support. Can you please provide a spreadsheet with the following information

1. CHDs
2. Cases to date
3. # of EPI Staff
4. Regional EPI positions
5. Any other variable that would inform the decision for additional staff support (e.g. new staff)

Also, Paul and I would like 10 minutes of your time on this and other topics. Please call his cell

Thank you
~Beth

Secretary, attached are the list you request for the hospital bed availability information. One is a printable list of the CEOs with 40% occupancy or less and the other is overall bed availability stats by county (one for all beds and one for just class 1 hospitals – wasn't sure which one you wanted). Both sheets should be formatted to print. Let me know if you have any questions.
Thanks,

Ryan Fitch - CHIEF OF CENTRAL SERVICES

It isn't pretty but here is a draft of the hospital version. Has the map, hover over the dots for more information. Grid at the bottom has CEO name and contact info for the facilities on the map (multiple phone numbers and type of line) as well as census data. You can change the percentages you are interested in using the slider bar (or type in the percent…has to be as a decimal so 0.6=60%). It is defaulted at 60% available (aka 40% full). I can have the experts clean this up Monday but I think this is the general idea you were looking for. Please let me know if you have any changes or things to add and I will see what I can do. Link is below

Subject: FW: End of isolation for confirmed cases

Dr. Blackmore, Swing by when you want to discuss and develop our plan. I am leaning toward the 14 day or 72 hours after Sx resolution.

Scott Pritchard, MPH
Interim Director
Infectious Disease Prevention and Investigations Section
Bureau of Epidemiology
850-245-4406

From: Doyle, Tim <Tim.Doyle@flhealth.gov>
Sent: Thursday, March 12, 2020 12:02 PM
To: Pritchard, Scott <Scott.Pritchard@flhealth.gov>
Subject: End of isolation for confirmed cases

Scott – Attached is a compilation of related information.
Key points:

- I found 2 states that have guidance independent of testing
  - WA 7 days or 72 hrs after symptom resolution
  - TN 14 days or 72 hrs after symptom resolution
- Attached NEJM paper is the only thing I could find for new virus and shows most upper respiratory specimens are PCR negative by 15 days.
- Papers on SARS and MERS show longer shedding period in stool and resp specimens, up to median 27 days and range up to 50-100 days.
- CDC guidance has not been updated as far as I can tell, but does seem to permit some flexibility to account for variety of factors, including serial test negative.

So if you want a test independent criteria, based on preliminary assessment, I would suggest we align with the more conservative TN criteria, which is stated below:

TN (source: email from CEFO in TN, couldn't find anything on web)
14 days or 72 hours after symptom resolution, whichever is longer. No serial testing.

AMERICAN OVERSIGHT

HH contacts must stay home for at least 14 days, or 7 days after case's symptom resolution, whichever is longer and presuming the HH contact remains asymptomatic.

This seems like a more reasonable time period based on the limited findings in the NEJM paper.

Tim

Subject: FL Call Follow-up

Hello Everyone,

Thank you for chatting with us today.

As I mentioned the CDC Healthcare Infection Control can be reached for further TA viaeocevent141@cdc.gov or via phone at 404-414-8385

I think your biggest challenge is going to be figuring out the contracted staff and how they have interacted with other facilities. It would be reasonable to apply many of the below listed concepts to other at risk facilities based upon how these staff moved to detect cases earlier among residents and staff. If helpful someone from our team developed a rapid facility phone assessment which could be deployed (attached).

Here are some good links:

AMERICAN OVERSIGHT

LTC guidance which can apply to AL: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/prevent-spread-in-long-term-care-facilities.html
General IPC guidance: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
Criteria for return to work for HCP (healthcare personnel):https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/hcp-return-work.html

Please remember many of the docs I have attached are not CDC cleared. Some were created as tools by our field team or by other jurisdictions so feel free to modify to your own needs.

A couple important points and lessons learned from other states:

1. Ensure a good active monitoring system for residents (at least once a day although more often if possible). They should be mindful (as you know) the elderly may present in other and potentially less dramatic fashion especially if they have baseline lung disease. I have attached a symptom/temp checking that we created for HCP but could be modified for use with residents.
2. Likewise a good monitoring system for all HCP is key. They should be self-monitoring with delegation (i.e., they know who to call with symptoms) when at home and then have a symptom/temp check before starting their shift. This pre-shift check could happen upon facility arrival or via something like facetime before leaving for work. Just make sure they take their temp and show while on facetime.
3. Implement universal masking for HCP while in the facility. Attached is a PPE strategy for LTC which accounts for shortages in gowns and extend use of masks and eye protection. In addition, I have attached some docs about general PPE for all HCF which we do expect to be posted to the web soon.
4. Ideally gowns, gloves, mask/respirator, eye should be used for all cases, PUIs, and anyone with unknown respiratory illness. Again may need to refer to the PPE strategy doc if not doable. NTEC has a good video that helps with donning and doffing: https://repository.netecweb.org/items/show/688
5. Restrict visitors. Any visitor that must enter should have symptom/temp check, masked, and controlled movement in and out of resident rooms. I have attached an example letter to families that can be modified.
6. Restrict resident movements, no congregate settings.
7. I have attached some cleaning consideration as well to include the use of nursing/CNAs to wipe high touch surfaces for cases or PUIs instead of EVS.
8. I have also attached a line list if you want it.
9. Contact tracing and risk assessment is not practical in this setting and ideally time should be spent in the above activities plus IPC. We understand that work restricting staff may shutter the entire facility and thus the emphasis of the good monitoring of HCP. We discuss this in the new risk assessment at the very bottom of the page:https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html
10. You and other PH staff should be wearing a facemask when you enter the facility and institute self-monitoring as well.

AMERICAN OVERSIGHT

Please feel free to reach out with questions.

Best,
Elizabeth and Nicola

9. Contact tracing and risk assessment is not practical in this setting and ideally time should be spent in the above activities plus IPC. We understand that work restricting staff may shutter the entire facility and thus the emphasis of the good monitoring of HCP. We discuss this in the new risk assessment at the very bottom of the page:https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html
10. You and other PH staff should be wearing a facemask when you enter the facility and institute self-monitoring as well.

Please feel free to reach out with questions.

Best,
Elizabeth and Nicola

Hello Everyone,

Thank you for chatting with us today.

As I mentioned the CDC Healthcare Infection Control can be reached for further TA viaeocevent141@cdc.gov or via phone at 404-414-8385

I think your biggest challenge is going to be figuring out the contracted staff and how they have interacted with other facilities. It would be reasonable to apply many of the below listed concepts to other at risk facilities based upon how these staff moved to detect cases earlier among residents and staff. If helpful someone from our team developed a rapid facility phone assessment which could be deployed (attached).

Here are some good links:

AMERICAN OVERSIGHT

LTC guidance which can apply to AL: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/prevent-spread-in-long-term-care-facilities.html
General IPC guidance: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
Criteria for return to work for HCP (healthcare personnel):https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/hcp-return-work.html

Please remember many of the docs I have attached are not CDC cleared. Some were created as tools by our field team or by other jurisdictions so feel free to modify to your own needs.

A couple important points and lessons learned from other states:

1. Ensure a good active monitoring system for residents (at least once a day although more often if possible). They should be mindful (as you know) the elderly may present in other and potentially less dramatic fashion especially if they have baseline lung disease. I have attached a symptom/temp checking that we created for HCP but could be modified for use with residents.
2. Likewise a good monitoring system for all HCP is key. They should be self-monitoring with delegation (i.e., they know who to call with symptoms) when at home and then have a symptom/temp check before starting their shift. This pre-shift check could happen upon facility arrival or via something like facetime before leaving for work. Just make sure they take their temp and show while on facetime.
3. Implement universal masking for HCP while in the facility. Attached is a PPE strategy for LTC which accounts for shortages in gowns and extend use of masks and eye protection. In addition, I have attached some docs about general PPE for all HCF which we do expect to be posted to the web soon.
4. Ideally gowns, gloves, mask/respirator, eye should be used for all cases, PUIs, and anyone with unknown respiratory illness. Again may need to refer to the PPE strategy doc if not doable. NTEC has a good video that helps with donning and doffing: https://repository.netecweb.org/items/show/688
5. Restrict visitors. Any visitor that must enter should have symptom/temp check, masked, and controlled movement in and out of resident rooms. I have attached an example letter to families that can be modified.
6. Restrict resident movements, no congregate settings.
7. I have attached some cleaning consideration as well to include the use of nursing/CNAs to wipe high touch surfaces for cases or PUIs instead of EVS.
8. I have also attached a line list if you want it.
9. Contact tracing and risk assessment is not practical in this setting and ideally time should be spent in the above activities plus IPC. We understand that work restricting staff may shutter the entire facility and thus the emphasis of the good monitoring of HCP. We discuss this in the new risk assessment at the very bottom of the page:https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html
10. You and other PH staff should be wearing a facemask when you enter the facility and institute self-monitoring as well.

Subject: PPE Clarification

The attached poster covers the minimum standards recommended by CDC for PPE use in COVID-19 test collection.

If a CHD includes additional equipment to the PPE list, that is acceptable.

Hopefully this clears any confusion.

Office: 850-595-6500 xt1001

AMERICAN OVERSIGHT

Mission: "To protect, promote and improve the health of all people in Florida through integrated state, county and community efforts."
Vision: "To be the Healthiest State in the Nation"
Values: ICARE (Innovation, Collaboration, Accountability, Responsiveness, Excellence)

PLEASE NOTE: Florida has a very broad public records law. Most written communications to or from state officials
regarding state business are public records available to the public and media upon request. Your email communication may
therefore be subject to public disclosure.

From: Smith, Rita M <Rita.Smith@flhealth.gov>
Sent: Wednesday, March 11, 2020 12:53 PM
To: DL DOH CHD Nursing Directors <DLCHDND@flhealth.gov>; DL CHD Medical Directors <DLCHDMedicalDirectors@flhealth.gov>
Cc: Otis, Aaron <Aaron.Otis@flhealth.gov>
Subject: PPE Clarification

The attached poster covers the minimum standards recommended by CDC for PPE use in COVID-19 test collection.

If a CHD includes additional equipment to the PPE list, that is acceptable.

Hopefully this clears any confusion.

Rita Smith, DNP, APRN, NP-C

Statewide Nursing Director

Public Health Practice Unit

Florida Department of Health

Office of the Deputy Secretary for County Health Systems

4052 Bald Cypress Way

Tallahassee, Florida 32399
Office: (850) 245-4036

Mobile: (850) 363-8410

The State of Florida Issues Updates on COVID-19

TALLAHASSEE, Fla. — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Governor Ron DeSantis is in constant communication with Florida Division of Emergency Management Director Jared Moskowitz and State Surgeon General Dr. Scott Rivkees as the State of Florida continues to monitor and respond to the threat of COVID-19.

Today, in a briefing at the State Emergency Operations Center, Governor DeSantis announced the following:

- Governor DeSantis announced he is going to supplement federal Small Business Administration (SBA) loans. The Governor activated the Florida Small Business Emergency Loan Program. Up to $50 million has been allocated for the program.
- Governor Ron DeSantis directed the Department of Revenue to provide flexibility on the deadlines of taxes due such as corporate income tax and sales tax to assist businesses that are adversely impacted from COVID-19 mitigation measures.
- Floridians throughout the state are lending a hand to stop the spread of COVID-19:
  - Members of the Florida House of Representatives have been activated to their National Guard units,
  - The Players Championship donated thousands of pounds of food to Feeding Northeast Florida,
  - Miami-Dade County school administrators are handing out computers and mobile devices, and
  - Comcast agreed to provide free WiFi for the next 60 days to kids who do not have it.

- The Miami Dolphins, Jacksonville Jaguars and the Orange County Convention Center have agreed to open their parking lots to stage supplies and locate testing sites.
- Restaurants throughout the state including Jimmy John's in Tallahassee and Toasted Restaurant in Orange County are providing children with free lunch throughout the week.
- Drive through testing sites are expected to open, throughout the state, in addition to the first proposed state site at Memorial Healthcare System in Broward. So far, sites are being developed in in Myers, Pensacola, West Palm Beach and Tallahassee.
- The Floridians who were at held at the Dobbins Air Reserve Base are on their way back to Florida; 15 Floridians have elected to stay at the base to care for their family members.
- On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of

AMERICAN OVERSIGHT

Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

More Information on COVID-19

To find the most up-to-date information and guidance on COVID-19, please visit the Department of Health's dedicated COVID-19 webpage. For information and advisories from the Centers for Disease Control (CDC), please visit the CDC COVID-19 website. For more information about current travel advisories issued by the U.S. Department of State, please visit the travel advisory website.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneezing into a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from any other destination with community transmission should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, he or she should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the state has taken to prepare for and respond to COVID-19:

DEPARTMENT OF HEALTH

- At the direction of Governor DeSantis, State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.
- Established an Incident Management Team to coordinate response operations.
- Defined a high-level phased response strategy for COVID-19.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined the calls.
- Established a public call center for questions regarding COVID-19. The call center launched Monday, March 2.
- Developed and distributed COVID-19 presentation materials to County Health Departments (CHD) for use at community meetings.
- Activated the Joint Information Center in coordination with the Division of Emergency Management.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUI) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Approved and disseminated an updated Clinician Screening Tool for identifying COVID-19 PUIs.
- Distributed a health care provider letter regarding enhanced surveillance and preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated laboratory guidance regarding implementation of testing at State Public Health Laboratories.
- Developing a laboratory surge plan.
- Developing a clinician-level briefing for medical audiences.
- Identifying and monitoring close contacts of presumptive cases. Any close contacts with symptoms will be tested.
- Implemented private lab testing.
- Developed and disseminated pandemic planning guidance.
- Advised CHDs and HCCs to retain expired personal protective equipment until further until further notice.
- Continued development of public information resources.
- Developing infographics for first responders (fire, law enforcement and EMS) regarding infection control and personal protection for COVID-19.
- At the Governor's direction, a public-private partnership has been put in place between Memorial Healthcare in Broward and the National

AMERICAN OVERSIGHT

Guard to set up a mobile testing unit.
- At the direction of Governor DeSantis hiring additional epidemiologists from university health programs to help with workload.
- Governor DeSantis directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and assisted living facility licenses for 90 days to remove distraction from patient care.

AGENCY FOR HEALTH CARE ADMINISTRATION

- AHCA distributed a provider alert to licensed health care providers regarding the Division of Emergency Management's new Emergency Order tightening visitation restrictions at residential and long-term care facilities.
- AHCA, in coordination with the DEM and the Department, is hosting ongoing statewide calls for nursing homes, assisted living facilities, intermediate care facilities, the Agency for Persons with Disabilities, group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting visitors and providing updates.
- AHCA, in coordination with DEM and the Department, is hosting ongoing statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- After previously opening an event on the Emergency Status System (ESS) for hospitals to enter census information, emergency room status updates and isolation beds, AHCA expanded the ESS event to track nursing homes and assisted living facility bed capacity, effective March 15.
- The Agency for Health Care Administration (AHCA) will be granting a 90-day extension to all licenses for health care providers and regulated facilities.
- AHCA is distributing information regarding regulatory flexibilities created by waivers from the Centers for Medicare and Medicaid Services (CMS) related to skilled nursing facilities, critical access hospitals, home health agencies, durable medical equipment, provider enrollment, etc.
- AHCA participated in a collaborative call with the Florida Health Care Association, Florida Hospital Association and LeadingAge Florida to discuss patient transfer arrangements between health care facilities such as nursing homes and hospitals.
- The Florida Medicaid Program announced coverage of commercial testing for COVID-19 for dates of service back to February 4.
- AHCA submitted requests to CMS for flexibility for Florida's program under the federal declaration of a state of emergency.

AGENCY FOR PERSONS WITH DISABILITIES

- The agency's three state-run centers in Marianna, Gainesville and Chattahoochee, as well as APD-licensed group homes, are restricting visitors in compliance with the Executive Order to protect the health and safety of our customers.
- APD Adult Day Training programs across the state are screening visitors for possible exposure to COVID-19 using a visitor questionnaire. The questionnaire is also being used to screen visitors coming into APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA), in coordination with the Administration for Community Living (ACL), facilitated a virtual Town Hall meeting at the request of Hallandale Beach Mayor Joy Cooper. More than 2,700 seniors were online for the meeting. Charlotte Mather Taylor, Executive Director of the Aging and Disability Resource Center (ADRC) of Broward County, led the discussion with participation from ACL Representative Constantino Miskos, Chen Senior Medical Center, and representatives from Emergency Medical Services. Their primary topics of conversation centered on the work being done, specifically by the Area Agency on Aging, to continue to provide people resources and services to maximize support during COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, DOEA provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the safe delivery of home-delivered meals to prevent spread of respiratory infection.
- DOEA continues to provide updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, they are provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.
- "The Vision 2020: Looking Towards Your Age-Friendly Future Tour" to five communities across Florida originally planned for April 20th - April 24th and co-hosted by the Department and AARP has been postponed to protect the health and wellness of seniors, volunteers and staff.
- All Serving Health Insurance Needs of Elders (SHINE) participation in scheduled outreach events, presentations, and in-person SHINE/Senior Medicare Patrol (SMP) counseling has been suspended until further notice. SHINE volunteers and staff will continue to provide counseling services, but the services will be conducted over-the-phone with future considerations for the use of webinars and Facebook LIVE.
- DOEA Secretary Prudom held a conference call with The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors to discuss the suspension of face-to-face assessments. CARES assessors will provide reviews through phone or tele-technology to reduce client/staff exposure and reduce spread.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the provision on completing assessments for multiple program types, specifically for clients who have chosen to self-isolate.
- DOEA provided updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers, and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families' (DCF) Office of Child Welfare is sending regular communication about COVID-19 specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19). An FAQ document for providers was also posted prominently on DCF's Child Care webpage.
- DCF's Office of Child Welfare is disseminating a survey to licensed child care providers to assess closures throughout the state. Currently, the decision to close is at the discretion of each individual facility.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF is leading status update calls with both internal leadership and leadership from external contracted partners. For the time being, these calls will take place twice weekly, every Tuesday and Friday.

AMERICAN OVERSIGHT

- DCF General Services staff throughout the state are working with lessors and janitorial contractors to increase sanitizing measures in office buildings, especially restrooms and common areas. They also began taking inventory of sanitizing supplies (disinfecting wipes, Lysol spray, hand-sanitizer, etc.) and are ordering more as needed.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility. At this time, there are no cases of patients or facility staff testing positive for COVID-19.
- DCF's Office of Economic Self-Sufficiency is communicating with DEO regarding work requirements and CareerSource operations and availability.
- DCF's Office of Economic Self-Sufficiency implemented screening procedures, including a set of questions that must be asked prior to entry, at all economic self-sufficiency storefronts.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

DEPARTMENT OF MILITARY AFFAIRS

- There have been over 200 Florida National Guardsmen placed on state active duty in support of COVID-19.
- The Florida National Guard is activating all of their medical professionals (Army Combat medic specialists and Air Force medical technicians) to support Florida Department of Health's drive-through screening operations. Guardsmen have reported in and formed Task Force Medical already.
- The Florida National Guard has activated soldiers to augment the State Logistics Readiness Center in Central Florida.

VOLUNTEER FLORIDA

- Volunteer Florida is working with state counterparts and FEMA to develop volunteer plans.
- Volunteer Florida's National Service Department has discussed using AmeriCorps members in food banks as feeding needs increase.
- Volunteer Florida is having conversations with Mass Care on the anticipated needs of volunteers. Together, we are working on a plan for volunteers with volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.

FLORIDA DEPARTMENT OF EDUCATION

- Commissioner of the Florida Department of Education (FDOE) Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks. To stay up to date on school closure information, visit: org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, and their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- The State University System will continue to evaluate the effectiveness of remote learning and the need to teach remotely in order to protect our students and the university community.
- The State University System will continue to work with the Florida Department of Health and the Emergency Operations Center to determine if the initial two weeks of remote learning is sufficient.
- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING - While students are encouraged to remain off-campus, each university should develop a plan for providing

AMERICAN OVERSIGHT

residential accommodations for students who need assistance or must remain in place.
- All state universities have implemented campus-wide critical incident or emergency management teams that are meeting regularly to prepare for the impacts of the COVID-19 virus.
- All universities are preparing to transition to remote instructional delivery for a two-week period during March and early April, depending on each institution's Spring Break, and are informing students not to return to campus during this period.
- The Board of Governors will be conducting its March meeting via conference call and will not have a face-to-face meeting at USF as was originally scheduled.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.

- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:

  - Have traveled internationally or on a cruise within the last 14 days.
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath.
  - Have had contact with someone who has been or is under investigation for COVID-19.
- All non-critical inmate transfers have been suspended.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Division of Elections offers a toll-free Voter Assistance Hotline, 1.866.308.6739 (in English and Español), available Monday - Friday, 8:00 am - 5:00 pm ET, with extended hours during statewide elections. For hearing or speech impaired, please contact the Division using the Florida Relay Service, 1.800.955.8771 (TDD), 1.800.955.8770 (Voice), or 1.877.955.8773 (Español). Voters can also contact their local Supervisor of Elections
- The Florida Department of State is in constant communication with Supervisors of Elections regarding Tuesday's Presidential Preference Primary Election and is providing guidance and information to voters through traditional and social media messages:
- The Florida Department of State been informing voters of the various options Florida provides in order to cast their ballot ahead of Tuesday's election and on Election Day. Further, we have assured Florida's voters that otherwise healthy poll workers can work on Election Day. DOS has notified voters who have been ordered to self-isolate or who are experiencing symptoms of COVID-19 and who have not yet voted, of the option to have someone pick up their ballot for them.
  - As with any election, before a voter goes to the polls on Tuesday, they should check with their local Supervisor of Elections. Now more than ever, it is critical that we continue to provide voters with clear and consistent information regarding polling place locations. The most current and up-to-date polling place information (per 71, Florida Statutes) is going to be on the voter's respective **Supervisor of Elections website**.
  - The Division of Elections website provides prominent placement of the Voter Information Lookup where voters can check their voter status and find their polling place information. This polling place information is linked to the voters' respective Supervisor of Elections database. The most current and up-to-date polling place information (per 71, Florida Statutes) is going to be from the voter's respective **Supervisor of Elections.**
- The Florida Department of State continues to support and work with local Supervisors of Elections and Emergency Management officials to ensure the Supervisors needs are met regarding sanitization and cleaning needs for the Presidential Preference Primary Election on Tuesday.

FLORIDA DEPARTMENT OF TRANSPORTATION

- FDOT is coordinating with other state and local agencies to help ensure mobility around the temporary testing site in Broward County. Once the site is open, FDOT plans to publicize testing site information on highway advisory radio.
- FDOT completed a request to provide necessary supplies to harbor pilots working at seaports.
- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- Pursuant to Executive Order 20-52 issued by Governor DeSantis, FDOT Secretary Thibault has suspended size and weight restrictions for divisible loads on any vehicles transporting emergency equipment, services, supplies, and necessary agricultural commodities on state roads.
- COVID-19 educational materials have been posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials have been posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- At the direction of Governor Ron DeSantis, Florida Department of Highway Safety and Motor Vehicles Executive Director Terry L. Rhodes has issued an Emergency Order extending all Florida driver licenses and identification cards that will expire in the next 30 days.
- Pursuant to Executive Order 20-52, FLHSMV Executive Director Rhodes waived commercial truck hours of service regulations and other related regulations so that emergency supplies, equipment, commodities and resources can be moved more quickly and efficiently throughout the state.
- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an

AMERICAN OVERSIGHT

office location, to complete transactions for driver licenses, ID cards, motor vehicle or vessel registrations, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association as well as Tax Collectors across the state to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis has requested the federal Small Business Administration (SBA) make the Economic Injury Disaster Loan program available for Florida's small businesses impacted by COVID-19. The Florida Department of Economic Opportunity (DEO) stands ready to assist Florida's small businesses in accessing this funding when available.
- Governor Ron DeSantis has activated the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by DEO, will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/.

VISIT FLORIDA

- VISIT FLORIDA is wholly focused on providing health and safety information to travelers and Floridians. This includes the activation of Florida Now, which includes the latest updates from state emergency response professionals hosted on VisitFlorida.com.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19
- To protect the health and safety of the traveling public and staff, VISIT FLORIDA's four welcome centers will be closed until further notice.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue is advising child support customers who are scheduled for court hearings related to their child support cases to check with the local courts where the hearings are scheduled in case the courts have new requirements, such as appearing telephonically.
- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- Florida Department of Law Enforcement (FDLE) is working with state and local agencies and the Florida National Guard to set up testing collection sites in multiple locations across Florida.

- The Florida Department of Law Enforcement (FDLE) Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.

- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.

- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.

- The Florida Department of Juvenile Justice has modified screening protocols and procedures for youth taken into custody by law enforcement who are brought to juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with law enforcement partners statewide.

- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The

AMERICAN OVERSIGHT

Florida Department of Juvenile Justice has sent a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.

- The Florida Department of Juvenile Justice has instituted additional screening measures for outside vendors who work within juvenile facilities and non-essential travel of staff members has been stopped. Visitors are limited to business-related visitors only (i.e., vendors, no personal visitors, no volunteers at this time). The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted. Clinical personnel, however, are still permitted to visit youth for treatment purposes, and attorneys are still permitted to conduct legal visits with youth.

FLORIDA DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).
- Governor DeSantis has directed the Department of Business and Professional Regulation Secretary Halsey Beshears, in coordination with the Florida Department of Health, to issue social distancing guidance to restaurants and bars.
- Governor DeSantis sent a letter to the federal Small Business Administration to turn on the SBA loan program for small businesses.
- The Florida Department of Business and Professional Regulation (DBPR) has suspended all official business visits, including inspections, that involve licenses located at a facility covered under the visitation restrictions implemented pursuant to FDEM Emergency Order 20-002.
- DBPR is incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices. Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises.

FLORIDA DEPARTMENT OF MANAGEMENT SERVICES

- Governor DeSantis directed the Department of Management Services Secretary Jonathan Satter to allow state employees to donate and transfer their available leave time to other state employees to mitigate the impacts of school closures.
- The Florida Department of Management Services' (DMS) Emergency Support Function-7 (ESF-7) Logistics team continues to coordinate with the Department of Health and the Division of Emergency Management on identifying the equipment or supplies that may be necessary for a mass response to COVID-19.
- DMS' Division of Human Resource Management has provided guidance to agencies on implementing preventive actions in the workplace, reporting symptoms, using leave, utilizing health insurance benefits, and applying travel restrictions and telework policies.
- DMS' Division of State Group Insurance continues to coordinate with health plan providers to ensure that state employee health plan members receive the health benefits that can assist them and their dependents if needed.
- DMS' Division of Real Estate Development and Management (REDM) continues to provide guidance to agency facility managers across the state on steps to take to prevent workplace contamination and to pre-position environmental vendors to mobilize in the event a viricidal cleaning is needed.
- DMS' Division of Real Estate Development and Management continues to identify, purchase, and distribute additional hand sanitizing gel and cleaning supplies to state-maintained facilities.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with users and vendor of the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with statewide public safety communications personnel on their plans to ensure emergency communications systems are not impacted by potential reductions in staffing resources.

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

- All State Parks have adjusted their operating hours to 8 a.m. to 5 p.m. daily. The Department continues to monitor new developments closely and will make further adjustments as necessary based on any new Department of Health or CDC guidance received to ensure protection of our staff and visitors. For the latest information on park operating hours and operational status, please visit floridastateparks.org.
- Currently all Florida State Parks and campgrounds, and Office of Resilience and Coastal Protection facilities (aquatic preserves and National Estuarine Research Reserves), remain open to the public. However, in an abundance of caution and consistent with Center for Disease Control and Prevention (CDC) guidance, DEP announced on March 13 that it is cancelling all events and activities at these facilities effective immediately and until further notice.
  - This includes DEP events and includes activities such as tours and visitor centers that involve large groups and/or or people in close proximity to others. People with questions regarding any privately scheduled event should check with the host of the event or the facility directly. For the latest closure and cancellation information, please visit floridastateparks.org.
- If your travel plans have changed and you need to modify camping or cabin reservations, please visit ReserveAmerica.com, call Reserve America at 1-800-326-3521 or TDD 888-433-0287 or text to 904-204-3216.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE, Fla. — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Governor Ron DeSantis is in constant communication with Florida Division of Emergency Management Director Jared Moskowitz and State Surgeon General Dr. Scott Rivkees as the State of Florida continues to monitor and respond to the threat of COVID-19.

Today, in a briefing at the State Emergency Operations Center, Governor DeSantis announced the following:

- Governor DeSantis announced he is going to supplement federal Small Business Administration (SBA) loans. The Governor activated the Florida Small Business Emergency Loan Program. Up to $50 million has been allocated for the program.
- Governor Ron DeSantis directed the Department of Revenue to provide flexibility on the deadlines of taxes due such as corporate income tax and sales tax to assist businesses that are adversely impacted from COVID-19 mitigation measures.
- Floridians throughout the state are lending a hand to stop the spread of COVID-19:
  - Members of the Florida House of Representatives have been activated to their National Guard units,
  - The Players Championship donated thousands of pounds of food to Feeding Northeast Florida,
  - Miami-Dade County school administrators are handing out computers and mobile devices, and
  - Comcast agreed to provide free WiFi for the next 60 days to kids who do not have it.

- The Miami Dolphins, Jacksonville Jaguars and the Orange County Convention Center have agreed to open their parking lots to stage supplies and locate testing sites.
- Restaurants throughout the state including Jimmy John's in Tallahassee and Toasted Restaurant in Orange County are providing children with free lunch throughout the week.
- Drive through testing sites are expected to open, throughout the state, in addition to the first proposed state site at Memorial Healthcare System in Broward. So far, sites are being developed in in Myers, Pensacola, West Palm Beach and Tallahassee.
- The Floridians who were at held at the Dobbins Air Reserve Base are on their way back to Florida; 15 Floridians have elected to stay at the base to care for their family members.
- On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of

AMERICAN OVERSIGHT

Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

More Information on COVID-19

To find the most up-to-date information and guidance on COVID-19, please visit the Department of Health's dedicated COVID-19 webpage. For information and advisories from the Centers for Disease Control (CDC), please visit the CDC COVID-19 website. For more information about current travel advisories issued by the U.S. Department of State, please visit the travel advisory website.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneezing into a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from any other destination with community transmission should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, he or she should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the state has taken to prepare for and respond to COVID-19:

DEPARTMENT OF HEALTH

- At the direction of Governor DeSantis, State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.
- Established an Incident Management Team to coordinate response operations.
- Defined a high-level phased response strategy for COVID-19.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined the calls.
- Established a public call center for questions regarding COVID-19. The call center launched Monday, March 2.
- Developed and distributed COVID-19 presentation materials to County Health Departments (CHD) for use at community meetings.
- Activated the Joint Information Center in coordination with the Division of Emergency Management.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUI) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Approved and disseminated an updated Clinician Screening Tool for identifying COVID-19 PUIs.
- Distributed a health care provider letter regarding enhanced surveillance and preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated laboratory guidance regarding implementation of testing at State Public Health Laboratories.
- Developing a laboratory surge plan.
- Developing a clinician-level briefing for medical audiences.
- Identifying and monitoring close contacts of presumptive cases. Any close contacts with symptoms will be tested.
- Implemented private lab testing.
- Developed and disseminated pandemic planning guidance.
- Advised CHDs and HCCs to retain expired personal protective equipment until further until further notice.
- Continued development of public information resources.
- Developing infographics for first responders (fire, law enforcement and EMS) regarding infection control and personal protection for COVID-19.
- At the Governor's direction, a public-private partnership has been put in place between Memorial Healthcare in Broward and the National

AMERICAN OVERSIGHT

Guard to set up a mobile testing unit.
- At the direction of Governor DeSantis hiring additional epidemiologists from university health programs to help with workload.
- Governor DeSantis directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and assisted living facility licenses for 90 days to remove distraction from patient care.

AGENCY FOR HEALTH CARE ADMINISTRATION

- AHCA distributed a provider alert to licensed health care providers regarding the Division of Emergency Management's new Emergency Order tightening visitation restrictions at residential and long-term care facilities.
- AHCA, in coordination with the DEM and the Department, is hosting ongoing statewide calls for nursing homes, assisted living facilities, intermediate care facilities, the Agency for Persons with Disabilities, group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting visitors and providing updates.
- AHCA, in coordination with DEM and the Department, is hosting ongoing statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- After previously opening an event on the Emergency Status System (ESS) for hospitals to enter census information, emergency room status updates and isolation beds, AHCA expanded the ESS event to track nursing homes and assisted living facility bed capacity, effective March 15.
- The Agency for Health Care Administration (AHCA) will be granting a 90-day extension to all licenses for health care providers and regulated facilities.
- AHCA is distributing information regarding regulatory flexibilities created by waivers from the Centers for Medicare and Medicaid Services (CMS) related to skilled nursing facilities, critical access hospitals, home health agencies, durable medical equipment, provider enrollment, etc.
- AHCA participated in a collaborative call with the Florida Health Care Association, Florida Hospital Association and LeadingAge Florida to discuss patient transfer arrangements between health care facilities such as nursing homes and hospitals.
- The Florida Medicaid Program announced coverage of commercial testing for COVID-19 for dates of service back to February 4.
- AHCA submitted requests to CMS for flexibility for Florida's program under the federal declaration of a state of emergency.

AGENCY FOR PERSONS WITH DISABILITIES

- The agency's three state-run centers in Marianna, Gainesville and Chattahoochee, as well as APD-licensed group homes, are restricting visitors in compliance with the Executive Order to protect the health and safety of our customers.
- APD Adult Day Training programs across the state are screening visitors for possible exposure to COVID-19 using a visitor questionnaire. The questionnaire is also being used to screen visitors coming into APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA), in coordination with the Administration for Community Living (ACL), facilitated a virtual Town Hall meeting at the request of Hallandale Beach Mayor Joy Cooper. More than 2,700 seniors were online for the meeting. Charlotte Mather Taylor, Executive Director of the Aging and Disability Resource Center (ADRC) of Broward County, led the discussion with participation from ACL Representative Constantino Miskos, Chen Senior Medical Center, and representatives from Emergency Medical Services. Their primary topics of conversation centered on the work being done, specifically by the Area Agency on Aging, to continue to provide people resources and services to maximize support during COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, DOEA provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the safe delivery of home-delivered meals to prevent spread of respiratory infection.
- DOEA continues to provide updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, they are provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.
- "The Vision 2020: Looking Towards Your Age-Friendly Future Tour" to five communities across Florida originally planned for April 20th - April 24th and co-hosted by the Department and AARP has been postponed to protect the health and wellness of seniors, volunteers and staff.
- All Serving Health Insurance Needs of Elders (SHINE) participation in scheduled outreach events, presentations, and in-person SHINE/Senior Medicare Patrol (SMP) counseling has been suspended until further notice. SHINE volunteers and staff will continue to provide counseling services, but the services will be conducted over-the-phone with future considerations for the use of webinars and Facebook LIVE.
- DOEA Secretary Prudom held a conference call with The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors to discuss the suspension of face-to-face assessments. CARES assessors will provide reviews through phone or tele-technology to reduce client/staff exposure and reduce spread.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the provision on completing assessments for multiple program types, specifically for clients who have chosen to self-isolate.
- DOEA provided updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers, and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families' (DCF) Office of Child Welfare is sending regular communication about COVID-19 specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19). An FAQ document for providers was also posted prominently on DCF's Child Care webpage.
- DCF's Office of Child Welfare is disseminating a survey to licensed child care providers to assess closures throughout the state. Currently, the decision to close is at the discretion of each individual facility.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF is leading status update calls with both internal leadership and leadership from external contracted partners. For the time being, these calls will take place twice weekly, every Tuesday and Friday.

AMERICAN OVERSIGHT

- DCF General Services staff throughout the state are working with lessors and janitorial contractors to increase sanitizing measures in office buildings, especially restrooms and common areas. They also began taking inventory of sanitizing supplies (disinfecting wipes, Lysol spray, hand-sanitizer, etc.) and are ordering more as needed.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility. At this time, there are no cases of patients or facility staff testing positive for COVID-19.
- DCF's Office of Economic Self-Sufficiency is communicating with DEO regarding work requirements and CareerSource operations and availability.
- DCF's Office of Economic Self-Sufficiency implemented screening procedures, including a set of questions that must be asked prior to entry, at all economic self-sufficiency storefronts.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

DEPARTMENT OF MILITARY AFFAIRS

- There have been over 200 Florida National Guardsmen placed on state active duty in support of COVID-19.
- The Florida National Guard is activating all of their medical professionals (Army Combat medic specialists and Air Force medical technicians) to support Florida Department of Health's drive-through screening operations. Guardsmen have reported in and formed Task Force Medical already.
- The Florida National Guard has activated soldiers to augment the State Logistics Readiness Center in Central Florida.

VOLUNTEER FLORIDA

- Volunteer Florida is working with state counterparts and FEMA to develop volunteer plans.
- Volunteer Florida's National Service Department has discussed using AmeriCorps members in food banks as feeding needs increase.
- Volunteer Florida is having conversations with Mass Care on the anticipated needs of volunteers. Together, we are working on a plan for volunteers with volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.

FLORIDA DEPARTMENT OF EDUCATION

- Commissioner of the Florida Department of Education (FDOE) Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks. To stay up to date on school closure information, visit: org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, and their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- The State University System will continue to evaluate the effectiveness of remote learning and the need to teach remotely in order to protect our students and the university community.
- The State University System will continue to work with the Florida Department of Health and the Emergency Operations Center to determine if the initial two weeks of remote learning is sufficient.
- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING - While students are encouraged to remain off-campus, each university should develop a plan for providing

AMERICAN OVERSIGHT

residential accommodations for students who need assistance or must remain in place.
- All state universities have implemented campus-wide critical incident or emergency management teams that are meeting regularly to prepare for the impacts of the COVID-19 virus.
- All universities are preparing to transition to remote instructional delivery for a two-week period during March and early April, depending on each institution's Spring Break, and are informing students not to return to campus during this period.
- The Board of Governors will be conducting its March meeting via conference call and will not have a face-to-face meeting at USF as was originally scheduled.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.

- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:

  - Have traveled internationally or on a cruise within the last 14 days.
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath.
  - Have had contact with someone who has been or is under investigation for COVID-19.
- All non-critical inmate transfers have been suspended.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Division of Elections offers a toll-free Voter Assistance Hotline, 1.866.308.6739 (in English and Español), available Monday - Friday, 8:00 am - 5:00 pm ET, with extended hours during statewide elections. For hearing or speech impaired, please contact the Division using the Florida Relay Service, 1.800.955.8771 (TDD), 1.800.955.8770 (Voice), or 1.877.955.8773 (Español). Voters can also contact their local Supervisor of Elections
- The Florida Department of State is in constant communication with Supervisors of Elections regarding Tuesday's Presidential Preference Primary Election and is providing guidance and information to voters through traditional and social media messages:
- The Florida Department of State been informing voters of the various options Florida provides in order to cast their ballot ahead of Tuesday's election and on Election Day. Further, we have assured Florida's voters that otherwise healthy poll workers can work on Election Day. DOS has notified voters who have been ordered to self-isolate or who are experiencing symptoms of COVID-19 and who have not yet voted, of the option to have someone pick up their ballot for them.
  - As with any election, before a voter goes to the polls on Tuesday, they should check with their local Supervisor of Elections. Now more than ever, it is critical that we continue to provide voters with clear and consistent information regarding polling place locations. The most current and up-to-date polling place information (per 71, Florida Statutes) is going to be on the voter's respective **Supervisor of Elections website**.
  - The Division of Elections website provides prominent placement of the Voter Information Lookup where voters can check their voter status and find their polling place information. This polling place information is linked to the voters' respective Supervisor of Elections database. The most current and up-to-date polling place information (per 71, Florida Statutes) is going to be from the voter's respective **Supervisor of Elections.**
- The Florida Department of State continues to support and work with local Supervisors of Elections and Emergency Management officials to ensure the Supervisors needs are met regarding sanitization and cleaning needs for the Presidential Preference Primary Election on Tuesday.

FLORIDA DEPARTMENT OF TRANSPORTATION

- FDOT is coordinating with other state and local agencies to help ensure mobility around the temporary testing site in Broward County. Once the site is open, FDOT plans to publicize testing site information on highway advisory radio.
- FDOT completed a request to provide necessary supplies to harbor pilots working at seaports.
- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- Pursuant to Executive Order 20-52 issued by Governor DeSantis, FDOT Secretary Thibault has suspended size and weight restrictions for divisible loads on any vehicles transporting emergency equipment, services, supplies, and necessary agricultural commodities on state roads.
- COVID-19 educational materials have been posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials have been posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- At the direction of Governor Ron DeSantis, Florida Department of Highway Safety and Motor Vehicles Executive Director Terry L. Rhodes has issued an Emergency Order extending all Florida driver licenses and identification cards that will expire in the next 30 days.
- Pursuant to Executive Order 20-52, FLHSMV Executive Director Rhodes waived commercial truck hours of service regulations and other related regulations so that emergency supplies, equipment, commodities and resources can be moved more quickly and efficiently throughout the state.
- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an

AMERICAN OVERSIGHT

office location, to complete transactions for driver licenses, ID cards, motor vehicle or vessel registrations, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association as well as Tax Collectors across the state to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis has requested the federal Small Business Administration (SBA) make the Economic Injury Disaster Loan program available for Florida's small businesses impacted by COVID-19. The Florida Department of Economic Opportunity (DEO) stands ready to assist Florida's small businesses in accessing this funding when available.
- Governor Ron DeSantis has activated the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by DEO, will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/.

VISIT FLORIDA

- VISIT FLORIDA is wholly focused on providing health and safety information to travelers and Floridians. This includes the activation of Florida Now, which includes the latest updates from state emergency response professionals hosted on VisitFlorida.com.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19
- To protect the health and safety of the traveling public and staff, VISIT FLORIDA's four welcome centers will be closed until further notice.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue is advising child support customers who are scheduled for court hearings related to their child support cases to check with the local courts where the hearings are scheduled in case the courts have new requirements, such as appearing telephonically.
- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- Florida Department of Law Enforcement (FDLE) is working with state and local agencies and the Florida National Guard to set up testing collection sites in multiple locations across Florida.

- The Florida Department of Law Enforcement (FDLE) Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.

- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.

- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.

- The Florida Department of Juvenile Justice has modified screening protocols and procedures for youth taken into custody by law enforcement who are brought to juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with law enforcement partners statewide.

- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The

AMERICAN OVERSIGHT

Florida Department of Juvenile Justice has sent a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.

- The Florida Department of Juvenile Justice has instituted additional screening measures for outside vendors who work within juvenile facilities and non-essential travel of staff members has been stopped. Visitors are limited to business-related visitors only (i.e., vendors, no personal visitors, no volunteers at this time). The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted. Clinical personnel, however, are still permitted to visit youth for treatment purposes, and attorneys are still permitted to conduct legal visits with youth.

FLORIDA DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).
- Governor DeSantis has directed the Department of Business and Professional Regulation Secretary Halsey Beshears, in coordination with the Florida Department of Health, to issue social distancing guidance to restaurants and bars.
- Governor DeSantis sent a letter to the federal Small Business Administration to turn on the SBA loan program for small businesses.
- The Florida Department of Business and Professional Regulation (DBPR) has suspended all official business visits, including inspections, that involve licenses located at a facility covered under the visitation restrictions implemented pursuant to FDEM Emergency Order 20-002.
- DBPR is incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices. Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises.

FLORIDA DEPARTMENT OF MANAGEMENT SERVICES

- Governor DeSantis directed the Department of Management Services Secretary Jonathan Satter to allow state employees to donate and transfer their available leave time to other state employees to mitigate the impacts of school closures.
- The Florida Department of Management Services' (DMS) Emergency Support Function-7 (ESF-7) Logistics team continues to coordinate with the Department of Health and the Division of Emergency Management on identifying the equipment or supplies that may be necessary for a mass response to COVID-19.
- DMS' Division of Human Resource Management has provided guidance to agencies on implementing preventive actions in the workplace, reporting symptoms, using leave, utilizing health insurance benefits, and applying travel restrictions and telework policies.
- DMS' Division of State Group Insurance continues to coordinate with health plan providers to ensure that state employee health plan members receive the health benefits that can assist them and their dependents if needed.
- DMS' Division of Real Estate Development and Management (REDM) continues to provide guidance to agency facility managers across the state on steps to take to prevent workplace contamination and to pre-position environmental vendors to mobilize in the event a viricidal cleaning is needed.
- DMS' Division of Real Estate Development and Management continues to identify, purchase, and distribute additional hand sanitizing gel and cleaning supplies to state-maintained facilities.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with users and vendor of the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with statewide public safety communications personnel on their plans to ensure emergency communications systems are not impacted by potential reductions in staffing resources.

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

- All State Parks have adjusted their operating hours to 8 a.m. to 5 p.m. daily. The Department continues to monitor new developments closely and will make further adjustments as necessary based on any new Department of Health or CDC guidance received to ensure protection of our staff and visitors. For the latest information on park operating hours and operational status, please visit floridastateparks.org.
- Currently all Florida State Parks and campgrounds, and Office of Resilience and Coastal Protection facilities (aquatic preserves and National Estuarine Research Reserves), remain open to the public. However, in an abundance of caution and consistent with Center for Disease Control and Prevention (CDC) guidance, DEP announced on March 13 that it is cancelling all events and activities at these facilities effective immediately and until further notice.
  - This includes DEP events and includes activities such as tours and visitor centers that involve large groups and/or or people in close proximity to others. People with questions regarding any privately scheduled event should check with the host of the event or the facility directly. For the latest closure and cancellation information, please visit floridastateparks.org.
- If your travel plans have changed and you need to modify camping or cabin reservations, please visit ReserveAmerica.com, call Reserve America at 1-800-326-3521 or TDD 888-433-0287 or text to 904-204-3216.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 25 new positive cases of coronavirus disease (COVID-19) in Florida and the death of a Florida resident in California. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 68-year old female Orange County resident tested positive for COVID-19. This test was performed in California following travel to Asia. This person is deceased.
- A 41-year old male in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 54-year old male in Osceola County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 51-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 67-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 62-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is not a travel related case.
- A 29-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with close contact with a traveler.
- A 69-year old male, non-Florida resident visiting from Europe tested positive for COVID-19 in Alachua County.
- A 59-year old female in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 65-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 77-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 59-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 39-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until

AMERICAN OVERSIGHT

cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 83-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 41-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 22-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 19-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 58-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 43-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

COVID-19 Cases

AMERICAN OVERSIGHT

Chart

AMERICAN OVERSIGHT

Chart part 2

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

AMERICAN OVERSIGHT

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 15 new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

These 15 new positive cases were tested in Florida Department of Health labs. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Cases

- A 73-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 74-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 50-year old male New York resident who is currently in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 70-year old male Massachusetts resident in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 24-year old female in Alachua County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 70-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.
- A 83-year old male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 57-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 28-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 25-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until

AMERICAN OVERSIGHT

cleared by public health officials. This is a travel related case.

- A 20-year old female Texas resident in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 68-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This case is associated with Port Everglades.
- A 36-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 49-year old female Hillsborough County resident has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with travel to Europe.
- A 77-year old male in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including

AMERICAN OVERSIGHT

COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced eight new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified three positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.

AMERICAN OVERSIGHT

- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 39 new positive cases of coronavirus disease (COVID-19). Earlier today, the Florida Department of Health confirmed the death of a 77-year old male in Lee County who had previously tested positive for COVID-19. Yesterday, Governor Ron DeSantis sent a letter to Health and Human Services requesting the release of 61 Florida residents from Georgia, many of whom are elderly, who were previously aboard the Grand Princess voyage outside of California.

To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 55-year old female in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 79-year old female from Connecticut has tested positive for COVID-19 in Baker County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 72-year old female in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old female in Citrus County has tested positive for COVID-10. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 64-year old female in St. Johns County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 71-year old male in Volusia County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 48-year old female in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 70-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 47-year old male in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 67-year old male in Pasco County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 32-year old female in Hillsborough County has tested positive for COVID-19. This is a domestic travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 17-year old male from Cuba has tested positive in Hillsborough County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. Further details to follow.
- A 28-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 58-year old female in Miami-Dade County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.

- A 52-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 65-year old female from New York has tested positive for COVID-19 in Alachua County. This individual is isolated and will continue to remain isolated until cleared by public health officials. The epidemiological investigation is ongoing.
- A 63-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 30-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 60-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 66-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 83-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 20-year old female in Broward County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 76-year old male in Collier County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials.
- A 28-year old male in Collier County has tested positive for COVID-19. This is a travel related case. This individual is isolated and will continue to remain isolated until cleared by public health officials.

COVID-19 Cases

AMERICAN OVERSIGHT

untitled

*Definition of travel-related: A known history of exposure to COVID-19 associated with travel outside of Florida.

International Travel

AMERICAN OVERSIGHT

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
  - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including over 10 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified multiple, positive COVID-19 cases that are connected and associated with Port Everglades in Broward County, Florida.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.
- Governor DeSantis requested that Health and Human Services send home the 61 Floridians that were previously aboard the Grand Princess cruise line, home from isolation from Dobbins Air Reserve Base, Georgia.
- Governor DeSantis has directed the Department of Health to hire additional epidemiologists from university health programs to help with workload.
- Governor DeSantis has directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and ALF licenses for 90 days to remove distraction from patient care.
- Governor DeSantis directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes to all visitors for the next 30 days.
- Governor DeSantis directed the Department of Highway Safety and Motor Vehicles to suspend drivers' license renewal requirements for 30 days.
- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).

AMERICAN OVERSIGHT

- Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.
- Florida Department of Education Commissioner Richard Corcoran has provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. In addition, the Department of Education announced that the start of state testing will be delayed by a minimum of two weeks.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces One Additional Positive COVID-19 Case in Florida for March 12th

TALLAHASSEE — Tonight, the Florida Department of Health announced one additional positive case of coronavirus disease (COVID-19), bringing the total confirmed new cases for Thursday, March 12th to 17 individuals who tested positive for COVID-19. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

This latest positive COVID-19 case was tested in a Florida Department of Health lab. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Case

- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with exposure to an international traveler.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
  - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

AMERICAN OVERSIGHT

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

AMERICAN OVERSIGHT

chart

* The Department of Health will confirm cases reported by commercial labs.

** A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Subject: RE: Follow-up -

Carina – sorry about the delay in getting back to you – been a fairly hectic day. A couple of things –

On asymptomatic infection – there is an increasing literature on the potential role of asymptomatic infection in transmission of the virus. I'm attaching three papers that address this topic – not necessarily the best, but I had them handy. Bottom line – asymptomatic infection occurs, and clearly can play a role in the transmission cycle (and in contact tracing).

With regard to surveillance – am attaching a "one pager" from Ira Longini's modeling group here at UF. Point three deals with surveillance – and I think this is the way to go. We're doing that here – we're starting to enroll everyone who comes to the Shands ED with reports/concerns about exposure in our IRB-approved research study, and are then screening them for COVID-19. If we could set up similar studies/ongoing sample collection in ED's in key cities in Florida, we could get at least a feel for the extent of infection in various communities. Would probably need your help in setting things up, but we could work with you to make the contacts with ED directors at key centers. Key would be getting IRB approval on a rapid basis for a state-wide study – which is really where we would really need your help. However, should be possible to expedite it as a "minimal risk" study. And then there is the cost – we can get things going, but at some point would need help in covering costs of running the study. Let me know what you think –

Regards!

Glenn

AMERICAN OVERSIGHT

Subject: RE: Follow-up -

[External Email]
OK. We discussed this internally today and there are a few things we would love to have your help assessing:

1. Understand the role of asymptomatic infection-what article were you referring to the other day. I have not found it. Nor do I see asymptomatic transmission as something highly relevant from someone else.
2. Clarify transmission dynamics (environmental/droplet/ aerosol etc)
3. Detailed clinical abstraction/risk factor analysis of cases
4. Sentinel surveillance of outpatient providers
5. School based surveillance

One concern I have is the timing. We need strategic sentinel surveillance stood up very soon. I am not sure we have time to wait for modeling data, nor am I sure it will be very helpful. Our population is so mobile so my preference would be to pursue the type of structured, focused, and systematic surveillance effort you are proposing across the state.

Subject: Follow-up -

Just to provide a follow-up to our discussion from yesterday – I met today with Ira Longini and our modeling team. They should have a strategy for screening/surveillance by the end of the day tomorrow. They are in the process of applying several different models to the Florida situation, and should have something together that can be used for predicting severity and duration within the next week or two. Will keep you posted as things progress.

Regards!

Subject: Heads up: city locations of cases/contacts in media

Good morning,
FYI: Volusia County's sheriff unilaterally released the cities of residence of cases and close contacts that are under isolation. This likely will have statewide ramifications.

DOH-Volusia found out this morning... by reading the paper. It's likely the sheriff pulled the info from the location info provided to EMS, per state direction.

At this point I know nothing more than what's in this story but wanted the DOH Central Office team to know as quickly as possible.

Subject: Homeland Security Acting Secretary Chad F. Wolf's Statement on Presidential Proclamation To Protect the Homeland from Travel-Related Coronavirus Spread

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Homeland Security Acting Secretary Chad F. Wolf's Statement on Presidential Proclamation To Protect the Homeland from Travel-Related Coronavirus Spread

(WASHINGTON) Today President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf:

"Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus.

"In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

Subject: Info on COVID-19

Good Morning Mayor

Hope this email finds you well. As promised, please find below the CDC recommendations for preventing the spread of Coronavirus Disease 2019 in Homes. I also included the link for your information.

https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-prevent-spread.html#precautions

As discussed, please follow these recommendations. I would add to stay stress free, get plenty of rest, eat well and exercise as tolerated. As you know 80% of people who are infected with the virus have mild symptoms, it is important that you take good care of yourself. You also need to stay in isolation separate yourself from other people and animals in your home. One of our senior staff will contact you daily through phone to check on your health status until the end of the 14 days. It is important as well that you monitor your health, if you develop any symptoms such as fever, cough, or shortness of breath, please contact your health care provider as soon as you can and let him know about your symptoms.

The Department will continue to monitor your health. We want to ensure you stay healthy until the end of the 14 day period.

If you have any questions, please do not hesitate to contact us.

Best of Luck, Mr. Mayor.

Kindest regards,

AMERICAN OVERSIGHT

Coronavirus Disease 2019 (COVID-19)

Preventing the Spread of Coronavirus Disease 2019 in Homes and Residential Communities

Interim Guidance

Update: February 14, 2020

(This guidance provides clarification regarding evaluation for home isolation and a new section with information regarding preventative steps for household members, intimate partners, and caregivers in a nonhealthcare setting of a person with symptomatic, laboratory-confirmed COVID-19.)

This interim guidance is based on what is currently known about the epidemiology of COVID-19 and the transmission of other viral respiratory diseases. CDC will update this interim guidance as needed and as additional information becomes available.

Coronaviruses are a large family of viruses, some causing illness in people and others that circulate among animals, including camels, cats, and bats. Rarely, animal coronaviruses can infect people exposed to infected animals, and then spread among people, as has been seen with MERS-CoV and SARS-CoV, and likely now with SARS-CoV-2, the virus that causes COVID-19. This interim guidance may help prevent this virus from spreading among people in their homes and in other residential communities.

This interim guidance is intended for:

- People with confirmed or suspected COVID-19, including persons under investigation, who do not need to be hospitalized and who can receive care at home (see Interim Guidance for Implementing Home Care of People Not Requiring Hospitalization for Coronavirus Disease 2019 (COVID-19));
- People with confirmed COVID-19, who were hospitalized and then determined to be medically stable to go home (see Interim Guidance for Implementing Home Care of People Not Requiring Hospitalization for Coronavirus Disease 2019 (COVID-19));
- Household members, intimate partners, and caregivers in a nonhealthcare setting of a person with symptomatic, laboratory-confirmed COVID-19.

AMERICAN OVERSIGHT

Prevention steps for

People with confirmed or suspected COVID-19 (including persons under investigation) who do not need to be hospitalized

and

People with confirmed COVID-19 who were hospitalized and determined to be medically stable to go home

Your healthcare provider and public health staff will evaluate whether you can be cared for at home. If it is determined that you do not need to be hospitalized and can be isolated at home, you will be monitored by staff from your local or state health department. You should follow the prevention steps below until a healthcare provider or local or state health department says you can return to your normal activities.

Stay home except to get medical care

People who are mildly ill with COVID-19 are able to isolate at home during their illness. You should restrict activities outside your home, except for getting medical care. Do not go to work, school, or public areas. Avoid using public transportation, ride-sharing, or taxis.

Separate yourself from other people and animals in your home

People: As much as possible, you should stay in a specific room and away from other people in your home. Also, you should use a separate bathroom, if available.

Animals: You should restrict contact with pets and other animals while you are sick with COVID-19, just like you would around other people. Although there have not been reports of pets or other animals becoming sick with COVID-19, it is still recommended that people sick with COVID-19 limit contact with animals until more information is known about the virus. When possible, have another member of your household care for your animals while you are sick. If you are sick with COVID-19, avoid contact with your pet, including petting, snuggling, being kissed or licked, and sharing food. If you must care for your pet or be around animals while you are sick, wash your hands before and after you interact with pets and wear a facemask. See COVID-19 and Animals for more information.

Call ahead before visiting your doctor

If you have a medical appointment, call the healthcare provider and tell them that you

AMERICAN OVERSIGHT

have or may have COVID-19. This will help the healthcare provider's office take steps to keep other people from getting infected or exposed.

Wear a facemask

You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) or pets and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then people who live with you should not stay in the same room with you, or they should wear a facemask if they enter your room.

Cover your coughs and sneezes

Cover your mouth and nose with a tissue when you cough or sneeze. Throw used tissues in a lined trash can. Immediately wash your hands with soap and water for at least 20 seconds or, if soap and water are not available, clean your hands with an alcohol-based hand sanitizer that contains at least 60% alcohol.

Clean your hands often

Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing, or sneezing; going to the bathroom; and before eating or preparing food. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry.

Soap and water are the best option if hands are visibly dirty. Avoid touching your eyes, nose, and mouth with unwashed hands.

Avoid sharing personal household items

You should not share dishes, drinking glasses, cups, eating utensils, towels, or bedding with other people or pets in your home. After using these items, they should be washed thoroughly with soap and water.

Clean all "high-touch" surfaces everyday

High touch surfaces include counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables. Also, clean any surfaces that may have blood, stool, or body fluids on them. Use a household cleaning spray or wipe, according to the label instructions. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.

AMERICAN OVERSIGHT

Monitor your symptoms

Seek prompt medical attention if your illness is worsening (e.g., difficulty breathing). **Before** seeking care, call your healthcare provider and tell them that you have, or are being evaluated for, COVID-19. Put on a facemask before you enter the facility. These steps will help the healthcare provider's office to keep other people in the office or waiting room from getting infected or exposed. Ask your healthcare provider to call the local or state health department. Persons who are placed under active monitoring or facilitated self-monitoring should follow instructions provided by their local health department or occupational health professionals, as appropriate. When working with your local health department check their available hours.

If you have a medical emergency and need to call 911, notify the dispatch personnel that you have, or are being evaluated for COVID-19. If possible, put on a facemask before emergency medical services arrive.

Discontinuing home isolation

Patients with confirmed COVID-19 should remain under home isolation precautions until the risk of secondary transmission to others is thought to be low. The decision to discontinue home isolation precautions should be made on a case-by-case basis, in consultation with healthcare providers and state and local health departments.

Recommended precautions for household members, intimate partners, and caregivers in a nonhealthcare setting[1] of

A patient with symptomatic laboratory-confirmed COVID-19

or

A patient under investigation

Household members, intimate partners, and caregivers in a nonhealthcare setting may have close contact[2] with a person with symptomatic, laboratory-confirmed COVID-19 or a person under investigation. Close contacts should monitor their health; they should call their healthcare provider right away if they develop symptoms suggestive of COVID-19 (e.g., fever, cough, shortness of breath) (see Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential Coronavirus Disease 2019 (COVID-19) Exposure in Travel-associated or Community Settings.)

Close contacts should also follow these recommendations:

AMERICAN OVERSIGHT

- Make sure that you understand and can help the patient follow their healthcare provider's instructions for medication(s) and care. You should help the patient with basic needs in the home and provide support for getting groceries, prescriptions, and other personal needs.
- Monitor the patient's symptoms. If the patient is getting sicker, call his or her healthcare provider and tell them that the patient has laboratory-confirmed COVID-19. This will help the healthcare provider's office take steps to keep other people in the office or waiting room from getting infected. Ask the healthcare provider to call the local or state health department for additional guidance. If the patient has a medical emergency and you need to call 911, notify the dispatch personnel that the patient has, or is being evaluated for COVID-19.
- Household members should stay in another room or be separated from the patient as much as possible. Household members should use a separate bedroom and bathroom, if available.
- Prohibit visitors who do not have an essential need to be in the home.
- Household members should care for any pets in the home. Do not handle pets or other animals while sick. For more information, see COVID-19 and Animals.
- Make sure that shared spaces in the home have good air flow, such as by an air conditioner or an opened window, weather permitting.
- Perform hand hygiene frequently. Wash your hands often with soap and water for at least 20 seconds or use an alcohol-based hand sanitizer that contains 60 to 95% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry. Soap and water should be used preferentially if hands are visibly dirty.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- The patient should wear a facemask when you are around other people. If the patient is not able to wear a facemask (for example, because it causes trouble breathing), you, as the caregiver, should wear a mask when you are in the same room as the patient.
- Wear a disposable facemask and gloves when you touch or have contact with the patient's blood, stool, or body fluids, such as saliva, sputum, nasal mucus, vomit, urine.
    - Throw out disposable facemasks and gloves after using them. Do not reuse.
    - When removing personal protective equipment, first remove and dispose of gloves. Then, immediately clean your hands with soap and water or alcohol-based hand sanitizer. Next, remove and dispose of facemask, and immediately clean your hands again with soap and water or alcohol-based hand sanitizer.
- Avoid sharing household items with the patient. You should not share dishes, drinking glasses, cups, eating utensils, towels, bedding, or other items. After the

AMERICAN OVERSIGHT

patient uses these items, you should wash them thoroughly (see below "Wash laundry thoroughly").

- Clean all "high-touch" surfaces, such as counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables, every day. Also, clean any surfaces that may have blood, stool, or body fluids on them.
    - Use a household cleaning spray or wipe, according to the label instructions. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.
- Wash laundry thoroughly.
    - Immediately remove and wash clothes or bedding that have blood, stool, or body fluids on them.
    - Wear disposable gloves while handling soiled items and keep soiled items away from your body. Clean your hands (with soap and water or an alcohol-based hand sanitizer) immediately after removing your gloves.
    - Read and follow directions on labels of laundry or clothing items and detergent. In general, using a normal laundry detergent according to washing machine instructions and dry thoroughly using the warmest temperatures recommended on the clothing label.
- Place all used disposable gloves, facemasks, and other contaminated items in a lined container before disposing of them with other household waste. Clean your hands (with soap and water or an alcohol-based hand sanitizer) immediately after handling these items. Soap and water should be used preferentially if hands are visibly dirty.
- Discuss any additional questions with your state or local health department or healthcare provider. Check available hours when contacting your local health department.

Footnotes

[1]Home healthcare personnel should refer to Interim Infection Prevention and Control Recommendations for Patients with Known or Patients Under Investigation for Coronavirus Disease 2019 (COVID-19) in a Healthcare Setting.

[2]Close contact is defined as—

a) being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period of time; close contact can occur while caring for, living with, visiting, or sharing a health care waiting area or room with a COVID-19 case

– or –

AMERICAN OVERSIGHT

b) having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on).

We would like to share these criteria with all LTCFs in FL via multiple channels as soon as possible.

Case definition of events for immediate reporting to county health departments by long term care facilities (skilled nursing facilities, assisted living facilities, independent living facilities)
Please report any instances of the following:

1. A laboratory confirmed case of COVID-19 among a staff member or resident of the facility; *(note: DOH will likely already be aware of this via ELR)*
2. A facility resident or staff member determined to be a close contact of a laboratory confirmed case of COVID-19. *Note: close contact is household member or someone in close proximity (<6 feet) for more than 10 minutes.*
3. Any clusters of 3 or more residents/staff identified within a 72 hour period, with influenza like illness (ILI), pneumonia, or severe respiratory illness requiring further evaluation.
4. Any deaths among residents/staff due to respiratory illness.

Leon County COVID-19 Operational Update

March 12, 2020

As the novel coronavirus (COVID-19) continues to spread with more than 120,000 cases globally, Leon County Emergency Management is committed to actively monitoring the disease and coordinating preparedness efforts with local health officials, healthcare providers, first responders, and other critical emergency response functions. On Tuesday, March 10 at 8 a.m., Leon County activated the Emergency Operations Center by request of the Florida Department of Health in Leon County to assist in convening agencies, providing coordination, and aligning public information efforts.

While no cases of COVID-19 have been reported in Leon County, and while the Centers for Disease Control and Prevention has ruled Florida an area of low risk, now is the best time for residents and businesses to prepare.

During the COVID-19 public health emergency, the Florida Department of Health is the lead agency and County Emergency Management serves in support of the local health experts.

Significant Changes Since Last Update

- **State health experts and Governor recommend limiting or canceling mass gatherings.** This recommendation comes from the Florida Department of Health and was issued by Governor Ron DeSantis at a press conference. For us at Leon County, consistent with the recommendation, we have postponed Leon Works and other similar events until further notice. Also, County Emergency Management is strongly encouraging local event organizers to consider limiting or canceling mass events in Leon County at this time.
- **Springtime Tallahassee and Word of South canceled due to COVID-19.**
- **Newsboys and Jamey Johnson concerts at the Capital City Amphitheater canceled.**
- **Malicious website pretending to be global COVID-19 map**. A malicious website pretending to be the

AMERICAN OVERSIGHT

live map for Coronavirus COVID-19 Global Cases by Johns Hopkins University is circulating on the internet waiting for unwitting internet users to visit the website. Visiting the website infects the user with the AZORult trojan, an information stealing program which can exfiltrate a variety of sensitive data. It is likely being spread via infected email attachments, malicious online advertisements, and social engineering. Furthermore, anyone searching the internet for a Coronavirus map could unwittingly navigate to this malicious website. Learn more.

- **Governor restricts senior living facility visitation**. Gov. Ron DeSantis placed limits Wednesday on who can visit Florida's nursing homes and other assisted living facilities, bidding to protect the state's sizeable and vulnerable elderly population from the new coronavirus. The governor's order prohibits anyone who recently arrived from a foreign country from visiting nursing and assisted care facilities. More here.
- **COVID-19 price gouging hotline started.** Following Executive Order 20-52, Attorney General Ashley Moody today activated Florida's Price Gouging Hotline for all consumers in the state. The opening of the hotline comes as Governor Ron DeSantis declares a state of emergency in response to positive test results of 20 coronavirus-infected patients in Florida. The Attorney General's Price Gouging Hotline can only be activated following a state of emergency declaration issued by the Governor and covers essential commodities outlined in Florida Statute, Section 501.160.
    - For a list of the commodities covered under the state's price gouging laws during the COVID-19 state of emergency, click here.
    - Violators of the price gouging statute are subject to civil penalties of $1,000 per violation and up to a total of $25,000 for multiple violations committed in a single 24-hour period. For more information on price gouging, please click here.
    - Price gouging can be reported by calling 1(866) 9NO-SCAM or by visiting MyFloridaLegal.com. For tips on reporting price gouging, click here.
- **Honor Flight Tallahassee postponed.** With the U.S. Centers for Disease Control and Prevention's recently issued advisory that adults over the age of 60 are particularly at risk of infection and should avoid all nonessential air travel, the Honor Flight Tallahassee Board of Directors has made the decision to postpone the April 18, 2020 flight. Guardian training scheduled for April 4, 2020 and April 11, 2020 has also been postponed. At this time, a rescheduled flight date has not been determined.
- **Florida Department of Corrections suspends visitation.** Following the State of Emergency issued in response to Coronavirus Disease 2019 (COVID-19) in Florida, the Florida Department of Corrections (FDC) has suspended visitation at all correctional institutions statewide. FDC has no known or suspected cases of COVID-19 at this time. More here.
- **Added CDC environmental cleaning disinfection recommendations.** Current evidence suggests that novel coronavirus may remain viable for hours to days on surfaces made from a variety of materials. See more below.

Stay Informed on COVID-19

In coordination with the Florida Department of Health (FDOH) in Leon County, the County recommends the following sources to assist with community mitigation and preparedness. While health experts are working around the clock to learn more about COVID-19, you can also stay informed as new information becomes available.

Also, FDOH has activated a 24/7 COVID-19 call center at (866) 779-6121. Leon County residents can also call the County Health Department at (850) 404-6300, Monday through Friday from 8 a.m. to 5 p.m. Also, the

AMERICAN OVERSIGHT

best resource for Florida-specific COVID-19 information remains the following FDOH website: www.FLHealth.gov/COVID-19 .

Office and School Closures

- Florida State University will conduct all classes online the two weeks following spring break (March 23-April 6). More here.
- Florida A&M University will conduct all classes online the two weeks following spring break (March 23-April 6). More here.
- Tallahassee Community College will conduct all classes online the two weeks following spring break (March 23-April 6). More here.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow the **new CDC guidelines**, summarized below:

- **Level 3:** Mandatory 14-day self-isolation and practice social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- **Level 2 and Cruises:** Monitor your health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Households

- **Getting Your Household Ready for Coronavirus Disease** – The Center for Disease Control offers guidance to help plan for any possible community transmission of COVID-19. We want to help everyone prepare to respond to this public health threat.
- **Cleaning and Disinfecting Households** – The Center for Disease Control states cleaning of visibly dirty surfaces followed by disinfection is a best practice measure for prevention of COVID-19 and other viral respiratory illnesses in households and community settings.
- **Center for Disease Control's COVID-19 Situation Summary** – Updated regularly, the CDC maintains a webpage that provides updated information as it becomes available with updated guidance.

Businesses

- **Center for Disease Control – Interim Business and Workplace Guidance** – This resource is from King County, Washington and is based on CDC guidance to employers. The guide walks business leaders through all the steps to plan, prepare, and if needed, implement action plans.

AMERICAN OVERSIGHT

- **Occupational Safety and Health Administration: Control and Prevention** – OSHA provides general guidance for all U.S. workers and employers including those unlikely to have occupational exposures to COVID-19 and those with potential occupational exposures to COVID-19. The general guidance provides information about environmental decontamination and worker training and includes additional resources for specific groups and their employers.
- **World Health Organization: Workplace Readiness** – WHO experts produced a guide of simple ways to prevent the spread of COVID-19 in the workplace. The guide provides simple precautions to implement now and planning measures to consider in case COVID-19 arrives in the community. Topics include preventative measures, travel considerations, and contingency planning.
- **Cleaning and Disinfecting Recommendations for Community Facilities** - Cleaning of visibly dirty surfaces followed by disinfection is a best practice measure for prevention of COVID-19 and other viral respiratory illnesses in community settings.Transmission of coronavirus in general occurs much more commonly through respiratory droplets than through fomites. Current evidence suggests that novel coronavirus may remain viable for hours to days on surfaces made from a variety of materials.

Schools

- **Leon County Schools: COVID-19** – Local resource from Leon County Schools that references important information and provides parents and students with important updates.
- **Guidance for Administrations of Childcare and K-12 Schools** – A CDC guide for administrators at both the school and district level to plan, prepare, and respond to COVID-19. This resource provides information for schools which do not have COVID-19 identified in their community and for schools with identified cases of COVID-19 in their communities.

Healthcare Providers

- **Clinical Guidance for Management of Patients with Confirmed COVID-19** – Offers information about the time from illness onset to hospital admission, clinical management, and treatment.
- **Infection Prevention and Control** – A CDC guide for healthcare settings to protect employees, patients, and visitors from unnecessary exposure to COVID-19.
- **Strategies to Prevent the Spread of COVID-19 in Long-Term Care Facilities** – General strategies from the CDC to prevent the introduction and/or spread of COVID-19 in LTCF. Many of the strategies suggested are used daily to detect and prevent the spread of other respiratory viruses like the flu.

Travel Restrictions and Guidance

- **CDC Information for Travel** – Includes information about COVID-19 for travelers and travel-related industries and provides a risk assessment level per country.
- **Travel Frequently Asked Questions and Answers** – The CDC offers an in-depth frequently asked question page discussing airline and cruise travel, business travel, and guidance upon returning from travel.
- **Department of State Travel Advisories** – This online Department of State resource includes official travel advisories, information about screening procedures, and a list of embassy websites that provides the updated COVID-19 information on each country.

AMERICAN OVERSIGHT

Download the Leon County Citizens Connect Mobile Application – Relaunched in 2017, the Leon County Citizens Connect app puts timely emergency notifications at your fingertips through push notifications on your smartphone or other device. Be the first to know of any emergency management messaging or service changes by downloading the app on the Apple Store or the Google Play Store.

Take Action to Stay Prepared

Now is the time to be ready and reflect on your personal preparedness and plans. At this time, experts do not recommend social distancing or isolating yourself unless you are sick or suspect transmission. To remain well, practice good hygiene measures like washing your hands and using hand sanitizer with an alcohol content of 60 percent or greater. Also, it is not too late in the season to receive a flu vaccine, as recommended by the CDC. Getting sick back-to-back (from flu and another respiratory illness such as COVID-19) can be severely challenging. Mitigate your risk now.

According to the CDC, the most effective ways to prevent transmission of not only COVID-19 but any respiratory illness is to avoid being exposed by washing your hands and cleaning regularly used surfaces (more info can be found here).

- For information about handwashing, see CDC's Handwashing website.
- For information specific to healthcare, see CDC's Hand Hygiene in Healthcare Settings.
- These are everyday habits that can help prevent the spread of several viruses. CDC does have specific guidance for travelers.

For local businesses, the CDC also recommends the following guidance to prevent workplace exposures to acute respiratory illnesses in non-healthcare settings. These guidelines discuss sick leave, doctor's notes, telecommuting and other considerations.

Also, if you are a business owner, please consider posting proper handwashing posters and signs in your bathroom locations to encourage good hygiene.

Leon County's Emergency Management Role

During the COVID-19 public health emergency, the Florida Department of Health is the lead agency and County Emergency Management serves in support of the local health experts.

Like with H1N1 swine flu (2009), Ebola (2014), and the Zika virus (2016), County Emergency Management serves as the coordinating and command liaison between our local Florida Department of Health and the many local and state agencies who help prepare and respond, such as law enforcement, schools, universities, tourism, and more. Like with previous communicable diseases, the Florida Department of Health is the lead agency at both the state and local levels, and health officials will be providing guidance and public information messaging at every stage.

Beginning on Jan. 21, County Emergency Management staff began close coordination with the Florida Department of Health and other healthcare experts. Building on that coordinating role, Emergency

AMERICAN OVERSIGHT

Management now:

- Convenes regular coordinating calls with K-12 school, university, healthcare, and emergency response representatives to ensure continuity of operations and information exchange;
- Stands ready to convene more responding agencies at the Emergency Operations Center to assist health experts in coordinating any public health emergency response, similar to the efforts before and after a natural disaster;
- Provides expert operational guidance across 18 different emergency support functions in support of the Florida Department of Health in Leon County's operations and response;
- Receives regular statewide and local briefings on the developing situation;
- Coordinates joint information and messaging to ensure accurate, vetted, and unified messaging on COVID-19 and disease transmission.

Continue to follow www.LeonCountyFL.gov/eip for any local updates or changes to services.

Good evening Ms. Coppola,

Dr. Rivkees gave me your name and email to forward these letters sent by Princess Cruise Line to passengers and crew of the Sky Princess voyages on 2/22 and 2/29. Alberto Moscoso (cc'd here) was involved with the crafting of the letters.

Thank you and please acknowledge receipt.

Here is a comparison of the cases that we have in our data versus what is posted on the website. The rows highlighted in yellow are cases that are either new cases that should be on the website and aren't OR are cases that are currently posted and shouldn't be.

Of note, there are 2 cases on the website that aren't close to anything we have in Merlin:

Order	County	Age	Sex
38	[redacted]	68	Female
45	[redacted]	67	Female

Any ideas on how we can figure out who those people are?

Thanks!
Leah

COVID-19 UPDATE (37): CHINA (HONG KONG), ANIMALS, DOG, PRELIMINARY SEROLOGY NEGATIVE
****
A ProMED-mail post
<http://www.promedmail.org>
ProMED-mail is a program of the
International Society for Infectious Diseases
<http://www.isid.org>

Date: Thu 12 Mar 2020
Source: Press release, Government of Hong Kong SAR [edited]
<https://www.info.gov.hk/gia/general/202003/12/P2020031200670.htm>

A spokesman for the Agriculture, Fisheries and Conservation Department (AFCD) said today [Thu 12 Mar 2020] that the blood test result of a pet dog which had repeatedly tested weakly positive for COVID-19 virus is negative.

The AFCD collected samples from the dog 5 times for tests since late February [2020] and detected low levels of the COVID-19 virus from its nasal and oral cavity samples. A blood sample was also taken from the dog on [3 Mar 2020] for serological testing and the result is negative. The negative result indicates that there is not a strong immune response and that there are not measurable amounts of antibodies in the blood at this stage.

The negative serological test result does not suggest that the dog has not been infected with the virus. It is known in some asymptomatic or mild cases of human infections with other types of coronavirus that antibodies may not always develop. It is also not uncommon in the earlier stages of infections to have a negative result as it often takes 14 days or more for measurable levels of antibodies to be detected (see comment). Another blood sample will be taken later for further testing.

AMERICAN OVERSIGHT

On the other hand, the Department, together with the School of Public Health of the University of Hong Kong, has conducted gene sequencing of the COVID-19 virus found from the dog and its close contact persons who were confirmed infected. The viral sequences are very similar. The sequence results indicate that the virus likely spread from the infected persons and subsequently infected the dog.

The dog has not shown any signs of the disease related to COVID-19. It is currently under quarantine at the animal keeping facility at the Hong Kong Port of Hong Kong-Zhuhai-Macao Bridge. The Department will continue to closely monitor the dog which tested weakly positive for the COVID-19 virus and repeat the test later. It will only be returned to its owner when the test result is negative. The Department has stepped up cleansing and disinfection of the facility.

COVID-19 is a newly emerged disease and the situation is still evolving. The AFCD will continue to work together with the Department of Health in handling relevant cases.

The spokesman reminded pet owners to adopt good hygiene practices (including handwashing before and after being around or handling animals, their food, or supplies, as well as avoiding kissing them) and to maintain a clean and hygienic household environment. People who are sick should avoid contacting animals. If there are any changes in the health condition of the pets, advice from a veterinarian should be sought as soon as possible.

ProMED-mail
<promed@promedmail.org>

[The initiative to check the potential role of animals, including company animals, in the epidemiology of COVID-19 presents a One Health approach, the need for which has been highlighted since the very initial stages of the event-to-become-pandemic in Wuhan. In this respect, the following piece of information, extracted from the 'WHO-China Joint Mission on COVID-19, 16-24 Feb 2020' (page 8, "Zoonotic origins") is noteworthy:

"COVID-19 is a zoonotic virus. From phylogenetics analyses undertaken with available full genome sequences, bats appear to be the reservoir of COVID-19 virus, but the intermediate host(s) has not yet been identified. However, 3 important areas of work are already underway in China to inform our understanding of the zoonotic origin of this outbreak.

"These include early investigations of cases with symptom onset in Wuhan throughout December 2019, environmental sampling from the Huanan Wholesale Seafood Market and other area markets, and the collection of detailed records on the source and type of wildlife species sold at the Huanan market and the destination of those animals after the market was closed."

AMERICAN OVERSIGHT

The absence of tests from the animals on the market has been underlined in previous posts; the fact that the animals on the market were not culled has not been published hitherto. When becoming available, the collected detailed records on their sources, types, and about their respective destination(s), will be useful.

Wishfully, animal-health specialists were included among the members of the WHO Joint Mission (listed in annex A of the report which is available at
<https://www.who.int/docs/default-source/coronaviruse/who-china-joint-mission-on-covid-19-final-report.pdf>
(40 pages, published 28 Feb 2020).

It may be assumed that the tests applied on the serum of the COVID-19-suspected Pomeranian dog are similar to the serological tests, recently validated in China for the diagnosis of COVID-19 in humans. They were published on Wed 4 Mar 2020, in the website of the National Commission of Health; see art 5 "Diagnostic criteria", referring to tests for the detection of "COVID-19-specific IgM antibodies" and "COVID-19-specific IgG antibodies" at
<http://www.gov.cn/zhengce/2020-03/04/content_5486710.htm>.

In a press release which followed on Thu 5 Mar 2020, it was stated that high IgM levels usually indicate a recent infection, while elevated IgG levels suggest the patient has entered the recovery stage or has completely recovered. "No matter how you cut it, if you find antibodies it proves there's been an infection". The press release is available at
<https://www.caixinglobal.com/2020-03-05/latest-coronavirus-diagnostic-plan-adds-new-tests-to-beat-false-negatives-101524535.html>.

Field application of automated chemiluminescent immunoassay kit to detect serum IgM and IgG antibodies to 2019-nCoV of 736 subjects, including confirmed COVID-19 patients, non-COVID-19 fever patients, other disease patients, and medical staff as well as healthy people, has been published online, on 4 Mar 2020 (Ref 1). The authors reported that COVID-19 patients were becoming reactive (positive) for specific anti-2019-nCoV IgM antibodies from 7-12 days after the onset of morbidity, followed closely by the IgG; that the levels of specific IgM and IgG antibodies increased with the progression of the disease, and that the trend of IgM and IgG changes in different cases was not exactly the same.

FAO and OIE currently state: "There is no current evidence of dogs playing a role in the spread of COVID-19. As a general practice, when caring for any kind of animals, always wash your hands before and after you interact with them."

Subject: Per our conversation: Suggested messaging

Hello again, Alberto,
Per our conversation, in the event DOH-Volusia is contacted by media for information (written or on-camera) regarding the church exposure, DOH-Volusia is requesting the ability to fulfill both types of requests using the information. Responses to anticipated follow-up questions also are provided for approval below. Additional guidance/message points are welcome:

Reminder: The information on this potential exposure already is being distributed grass-roots style by the pastor and case.

Tell us about the DOH response or 'what's going on at the church?'

- A known case attended XXX church before she tested positive for COVID-19.
- Following CDC guidance, our epidemiology staff worked with the case to determine people who may have in close contact.
- Through the investigation, DOH-Volusia determined those who attended church activities were at low risk for exposure.
- Working with the pastor, DOH-Volusia was able to define those who were in attendance at the church activities.

AMERICAN OVERSIGHT

We worked with the pastor to provide information to that defined audience.
- As is standard in contact tracing, anyone who was determined to be at increased risk of exposure has been contacted by our epidemiology staff and asked to self-isolate for 14 days and monitor for symptoms.

Is it safe for people to go to church or other similar gatherings?

Currently we have no evidence of community spread in Volusia County. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

- The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

What should seniors or high-risk people do? (Need specific message for seniors/high-risk groups since CDC has been saying they should practice social distancing measures.) Suggestion:

If you are at higher risk of getting very sick from COVID-19, you should:

- Stock up on supplies.
- Take everyday precautions to keep space between yourself and others.
- When you go out in public, keep away from others who are sick, limit close contact and wash your hands often.
- Avoid crowds as much as possible.
- Avoid cruise travel and non-essential air travel.
- During a COVID-19 outbreak in your community, stay home as much as possible to further reduce your risk of being exposed.

What should churches do?

AMERICAN OVERSIGHT

- CDC has prevention guidance for the faith-based community. Cdc.gov/coronavirus

Suggested response to follow up questions:

- That information is part of an epi investigation. I do not have access to that information. Those at increased risk have been contacted and provided info.

Thank you, Alberto.

How did Florida hire 100 epidemiologists in a weekend? Here's how.

Tampa Bay Times
Lawrence Mower
March 18, 2020

TALLAHASSEE — Last week, Florida health officials found themselves overwhelmed. The state's disease experts were working around the clock to trace the rapidly spreading coronavirus, and the state needed more of them.

A lot more.

But that posed a problem: How in the world do you find public health professionals who investigate the patterns and causes of disease — otherwise known as epidemiologists — who weren't already working to combat the once-in-a-lifetime pandemic?

Answer: Florida's universities.

In an unprecedented gathering of resources, the state has recruited 100 professors and students from five universities to help the state understand the coronavirus, known as COVID-19, and how it's spreading.

Those professors and students are being hired part-time to do what epidemiologists do: interview people with coronavirus about their history and symptoms, trace their contacts and enter that information into databases.

They will be working in coordination with the Florida Department of Health's 264 infectious disease epidemiologists, but they will not be going out in the field to interview coronavirus patients. Instead, they'll be conducting interviews by phone.

Academics and health officials say they couldn't remember the state ever going on such a hiring spree.

"To gather the need for this many epidemiologists, I don't know if there's ever been a

AMERICAN OVERSIGHT

situation like this," said Janice Zgibor, a professor and associate dean for academic affairs at the University of South Florida's College of Public Health. "I haven't heard of it in my lifetime."

And the state did it over a weekend. On Saturday, officials starting contacting universities. By Sunday, they had hundreds of applicants.

Zgibor, who has a Ph.D. in epidemiology, was asked to "gather the troops" at USF. When she heard the idea, she thought it was "genius."

The idea came from Department of Health Deputy Secretary Shamarial Roberson, who has a background in epidemiology.

"Based on that experience, I knew exactly where to find them," Roberson said.

The professors and students are coming from Florida State University, the University of Florida, Florida Agricultural and Mechanical University, the University of South Florida and University of Central Florida.

While the public often thinks of epidemiologists as people walking around in biohazard suits, the study of infectious diseases is just one specialty in the field. Epidemiology is a broad field that includes the study of chronic diseases, opioids and vaccines, for example.

Regardless of the specialty, epidemiologists share common data-driven methods. They need the who/what/when/where of diseases to track common traits and understand how they spread: How old is the person? How did they contract it? Who else might they have shared it with?

For that reason, not all the students and professors are necessarily infectious disease experts. Cindy Prins, director of the University of Florida's Master of Public Health program, said the state was looking for people with experience interviewing patients and analyzing data.

She had no problem finding people willing to sign up. She said the state chose 25 doctoral and masters students and five faculty members, including herself.

"For students in particular, they just really want to help right now," said Prins, who has a background in infection control. "They want to do something."

Please note that under Florida law correspondence sent to the Governor's Office, which is not confidential or exempt pursuant to chapter 119 of the Florida Statutes, is a public record made available upon request.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

The Florida Department of Health has confirmed an individual who had previously tested positive for COVID-19 has died. The individual was a 77-year old male in Lee County.

Governor Ron DeSantis is in constant communication with Florida Division of Emergency Management Director Jared Moskowitz and State Surgeon General Dr. Scott Rivkees as the State of Florida continues to monitor and respond to the threat of COVID-19.

During a press conference at the State Emergency Operations Center Saturday, the Governor provided several additional updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis requested that Health and Human Services send home the 61 Floridians that were previously aboard the Grand Princess cruise line, home from isolation from Dobbins Air Reserve Base, Georgia.
- Governor DeSantis has directed the Department of Health to hire additional epidemiologists from university health programs to help with workload.
- Governor DeSantis has directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and ALF licenses for 90 days to remove distraction from patient care.
- Governor DeSantis directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes to all visitors for the next 30 days.
- Governor DeSantis directed the Department of Highway Safety and Motor Vehicles to suspend drivers' license renewal requirements for 30 days.
- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Florida Department of Education Commissioner Richard Corcoran has provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. In addition, the Department of Education announced that the start of state testing will be delayed by a minimum of two weeks.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

International Travel

AMERICAN OVERSIGHT

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including over 10 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified multiple, positive COVID-19 cases that are connected and associated with Port Everglades in Broward County, Florida.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121**. **The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of

AMERICAN OVERSIGHT

facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

    - Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.
    - Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

AGENCY FOR HEALTH CARE ADMINISTRATION

- AHCA participated in a collaborative call with the Florida Health Care Association, Florida Hospital Association and LeadingAge Florida to discuss patient transfer arrangements between health care facilities such as nursing homes and hospitals.
- The Florida Medicaid Program announced coverage of commercial testing for COVID-19 for dates of service back to February 4.
- AHCA submitted requests to the Centers for Medicare and Medicaid Services (CMS) for flexibility for Florida's program under the federal declaration of a state of emergency.
- Secretary Mayhew participated in a call with hospitals, laboratory administrators and associations regarding hospital testing.
- AHCA is working with nursing homes on recently released guidance further restricting visitor and vendor access to ensure the health and safety of facility residents.

AGENCY FOR PERSONS WITH DISABILITIES

- APD's chief of staff sent a directive to employees following Governor Ron DeSantis' guidance on travel which restricts individuals conducting international travel and those taking cruises from immediately returning to work. They will be required to self-quarantine for 14 days.
- APD is developing a Frequently Asked Questions (FAQ) document for providers and Waiver Support Coordinators related to COVID-19.
- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19.
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- DOEA Secretary Prudom held a conference call with The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors to discuss the suspension of face-to-face assessments. CARES assessors will provide reviews through phone or tele-technology to reduce client/staff exposure and reduce spread.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the provision on completing assessments for multiple program types, specifically for clients who have chosen to self-isolate.
- DOEA provided updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers, and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.

AMERICAN OVERSIGHT

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.

- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is having preliminary conversations on the anticipated needs of volunteers. We are working together to plan for needed volunteers and develop volunteer safety guidelines to ensure the protection of our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary.

FLORIDA DEPARTMENT OF EDUCATION

- Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks. To stay up to date on school closure information, visit: org/em-response.

- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.

AMERICAN OVERSIGHT

- RESIDENTIAL HOUSING - While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- All state universities have implemented campus-wide critical incident or emergency management teams that are meeting regularly to prepare for the impacts of the COVID-19 virus.
- All universities are preparing to transition to remote instructional delivery for a two-week period during March and early April, depending on each institution's Spring Break, and are informing students not to return to campus during this period.
- The Board of Governors will be conducting its March meeting via conference call and will not have a face-to-face meeting at USF as was originally scheduled.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.

- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.

- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:

  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State's museum properties are taking precautions to ensure the health of visitors amid concerns of COVID-19. The Museum of Florida History has removed the guest sign in book; education staff members now record the visitor information. Museum staff members are cleaning all push buttons for life casts, dioramas, and other touchable exhibits as identified; sanitizing wheelchairs after every use; and wiping bench surfaces and survey podium with disinfecting wipes. Additional hand sanitizer dispensers have been placed at the entrance and exit of The Museum of Florida History. Further, the Museum has turned off touchscreen survey and is offering paper surveys. Finally, in an effort to ensure the continued health of our employees, Museum staff members are using disinfecting wipes on phones and keyboards and COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor Ron DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- Pursuant to Executive Order 20-52 issued by Governor Ron DeSantis, FDOT Secretary Thibault has suspended size and weight restrictions for divisible loads on any vehicles transporting emergency equipment, services, supplies, and necessary agricultural commodities on state roads.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor Ron DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/.

VISIT FLORIDA

AMERICAN OVERSIGHT

- To protect the health and safety of the traveling public and staff, VISIT FLORIDA's four welcome centers will be closed until further notice.
- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- FDLE Commissioner Rick Swearingen sent directions to all supervisors with information about sick or at-risk members, use of leave, telecommuting, business and personal travel followed by a message to all members.
- At the direction of Governor Ron DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols during a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

- DBPR shared information with all agency staff statewide pertaining to the declaration of a state public health emergency, state response protocols as ordered in EO 20-51, and FDOH information and resources available on the dedicated FDOH COVID-19 webpage. DBPR communication with staff has emphasized the best practices and preventive steps recommended by FDOH for impeding the spread of respiratory illnesses.
- DBPR's Emergency Coordinating Officer and State Mass Care Coordinator is supporting the initiation of FDOH's joint information center and providing assistance as requested of State Emergency Support Function 6.
- DBPR added a web banner with information on COVID-19 and link to the Florida Department of Health's dedicated COVID-19 webpage at http://www.floridahealth.gov/COVID-19.
- DBPR's Emergency Coordinating Officer and State Mass Care Coordinator is supporting the initiation of FDOH's joint information center and providing assistance as requested of State Emergency Support Function 6.
- DBPR is incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices. Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises.

FLORIDA DEPARTMENT OF MANAGEMENT SERVICES

- DMS' Emergency Support Function-7 (ESF-7) Logistics team continues to coordinate with the Department of Health and the Division of Emergency Management on identifying the equipment or supplies that may be necessary for a mass response to COVID-19.
- DMS' Division of Human Resource Management has provided guidance to agencies on implementing preventive actions in the workplace, reporting symptoms, using leave, utilizing health insurance benefits, and applying travel restrictions and telework policies.
- DMS' Division of State Group Insurance continues to coordinate with health plan providers to ensure that state employee health plan members receive the health benefits that can assist them and their dependents if needed.
- DMS' Division of Real Estate Development and Management (REDM) continues to provide guidance to agency facility managers across the state on steps to take to prevent workplace contamination and to pre-position environmental vendors to mobilize in the event a viricidal cleaning is needed.
- DMS' Division of Real Estate Development and Management continues to identify, purchase, and distribute additional hand sanitizing gel and cleaning supplies to state-maintained facilities.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with users and vendor of the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with statewide public safety communications personnel on their plans to ensure emergency communications systems are not impacted by potential reductions in staffing resources.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

AMERICAN OVERSIGHT

For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.

AMERICAN OVERSIGHT

- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.

- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:

  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19

AMERICAN OVERSIGHT

- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.

AMERICAN OVERSIGHT

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis announced that the State has ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. Governor DeSantis has also recommended that local authorities strongly consider canceling mass gatherings. Centers for Disease Control and Prevention (CDC) defines a mass event or gathering as 1,000 individuals or more. Practically speaking, a mass gathering is a large enough assembly of individuals that will put a strain on local resources. The Governor also suspended non-essential instate and all out-of-state travel for state employees for 30 days.

Yesterday, March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

New Positive Cases

Earlier today, the Florida Department of Health announced one new case of COVID-19 in Seminole County.

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Chart

* The Department of Health will confirm cases reported by commercial labs.
** A known history of exposure to COVID-19 outside of the state.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel and Cruises Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

AMERICAN OVERSIGHT

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing

AMERICAN OVERSIGHT

homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will now be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.
- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.
- The APD Senior Leadership Team began hosting twice weekly COVID-19 conference calls with the Superintendents of the agency's facilities in Marianna, Gainesville, Chattahoochee and the Developmental Disabilities Defendant Program.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during press conferences on Monday, March 9th and Wednesday, March 11th to address Florida's recent actions regarding COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up information.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff are following up with them on an individual basis for questions and answers for COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we are providing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, staff has provided specific technical assistance to all AAAs regarding completing assessments, safe delivery of home-delivered meals, and procurement of cleaning supplies.
- Arranged a conference call with a representative from the Area Agencies on Aging as well as the Florida Association of Aging Services Providers and GA Foods. Discussed the current messaging from ACL and the CDC as it relates to the Aging Network.
- Conducted a Florida Association of the Area Agencies on Aging (F4A) conference call with all contract managers and AAA Executive Directors March 11 at 2:00 p.m. to provide a daily update regarding COVID-19.
- The Department of Elder Affairs has distributed DOH website information as a resource for PACE providers to use and distribute to seniors. and provided the Executive Orders. DOEA has circulated additional information and long-term care provider conference call invitations with presentations by DOH and AHCA to the PACE providers.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, the Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact

AMERICAN OVERSIGHT

Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.
- Volunteer Florida is preparing information to be shared with Supervisors of Elections about Volunteer Connect, Florida's official volunteer opportunities platform. Through the platform, offices can post/promote volunteer opportunities, including poll work.
- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- Out of an abundance of caution, two temporary school closures have been reported in Okaloosa and Hillsborough County for cleaning. At this time, no Florida student has contracted COVID-19. To stay up to date on school information, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department of Health. Inmates will continue to have access to mail, phone calls and video visitation. Legal visits will not be impacted.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-

AMERICAN OVERSIGHT

19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS has provided guidance to all 67 county Supervisors of Elections regarding assisted living facilities and poll worker staff matters. The message included guidance to screen poll workers and clerks beforehand to determine their recent travel status or if they are showing active symptoms of COVID-19 and reminding supervisors of the option to designate alternate polling locations for nursing homes, centers for independent living continuing care retirement living communities and assisted living facilities.
- DOS has identified stakeholders including libraries, museums, cultural facilities and are developing plans to communicate information and resources about COVID-19 to those stakeholders.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV is encouraging Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA employees at Florida's three highway welcome centers continue to be provided with the latest COVID-19 information and resources to help keep the traveling public informed.
- Preventive health resources and options have been communicated to all VISIT FLORIDA staff, with new updates and information relayed accordingly.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.
- VISIT FLORIDA continues to follow all direction from the Executive Office of the Governor and Florida Department of Health in the dissemination of alerts and safety information through social media and VISIT FLORIDA's network of Destination Marketing Organization and business partners.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.

AMERICAN OVERSIGHT

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE has reviewed its COOP and identified members who can work from home. FDLE has ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 63-year old male New York resident who is currently in St. Johns County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case where this individual traveled from New York to attend Daytona Bike Week in Daytona, Florida. The New York Department of Health is leading the epidemiological investigation for this individual.
- A 56-year old male in Miami-Dade County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 70-year old male in Broward County tested as positive. He is isolated and will continue to remain isolated until cleared by public health officials. This individual attended an Emergency Medical Services (EMS) Conference in Tampa, Florida. The epidemiological investigation is underway.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Cases

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified three positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.

AMERICAN OVERSIGHT

- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 57-year old male in Lee County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 65-year old male in Broward County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 61-year old male in Broward County tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with Port Everglades.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological for the fourth person connected to Port Everglades is ongoing.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 57-year old male in Lee County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 65-year old male in Broward County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 61-year old male in Broward County tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with Port Everglades.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological for the fourth person connected to Port Everglades is ongoing.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health

AMERICAN OVERSIGHT

Department or health care provider and self-isolate for 14 Days.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.

AMERICAN OVERSIGHT

- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 63-year old male New York resident who is currently in St. Johns County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case where this individual traveled from New York to attend Daytona Bike Week in Daytona, Florida. The New York Department of Health is leading the epidemiological investigation for this individual.
- A 56-year old male in Miami-Dade County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 70-year old male in Broward County tested as positive. He is isolated and will continue to remain isolated until cleared by public health officials. This individual attended an Emergency Medical Services (EMS) Conference in Tampa, Florida. The epidemiological investigation is underway.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified three positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Governor Ron DeSantis is in constant communication with Florida Division of Emergency Management Director Jared Moskowitz and State Surgeon General Dr. Scott Rivkees as the State of Florida continues to monitor and respond to the threat of COVID-19.

Today, in a briefing at the State Emergency Operations Center, Governor DeSantis announced the following:

- At the Governor's direction, a public-private partnership has been put in place between Memorial Healthcare in Broward and the National Guard to set up a mobile testing unit.
- Governor DeSantis has directed the Department of Business and Professional Regulation Secretary Halsey Beshears, in coordination with the Florida Department of Health, to issue social distancing guidance to restaurants and bars.
- Governor DeSantis sent a letter to the federal Small Business Administration to turn on the SBA loan program for small businesses.
- Governor DeSantis directed the Department of Management Services Secretary Jonathan Satter to allow state employees to donate and transfer their available leave time to other state employees to mitigate the impacts of school closures.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

More Information on COVID-19

To find the most up-to-date information and guidance on COVID-19, please visit the Department of Health's dedicated COVID-19 webpage. For information and advisories from the Centers for Disease Control (CDC), please visit the CDC COVID-19 website. For more information about current travel advisories issued by the U.S. Department of State, please visit the travel advisory website.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high

AMERICAN OVERSIGHT

blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneezing into a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from any other destination with community transmission should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, he or she should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has taken to prepare for and Respond to COVID-19

Yesterday, the Governor provided several additional updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis requested that Health and Human Services send home the 61 Floridians that were previously aboard the Grand Princess Cruise line, home from isolation from Dobbins Air Reserve Base, Georgia.
- Governor DeSantis directed the Department of Health to hire additional epidemiologists from university health programs to help with workload.
- Governor DeSantis directed the Agency for Health Care Administration (AHCA) to extend all existing nursing home and assisted living facility licenses for 90 days to remove distraction from patient care.
- Governor DeSantis directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes to all visitors for the next 30 days.
- Governor DeSantis directed the Department of Highway Safety and Motor Vehicles to suspend drivers' license renewal requirements for 30 days.
- Governor DeSantis directed all agencies to suspend for 30 days licensing and registration renewal requirements for existing processional licenses (e.g. realtors).

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency. The State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- The Department of Health (DOH) established an Incident Management Team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call center for questions regarding COVID-19.
- DOH developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- DOH implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- The DOH distributed CDC Interim Guidance for public health personnel evaluating Persons under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- DOH distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- DOH implemented testing at all three State Public Health Laboratories.
- DOH distributed updated CDC guidance for schools to CHDs and the Department of Education.
- DOH distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

AGENCY FOR HEALTH CARE ADMINISTRATION

- The Agency for Health Care Administration (AHCA) will be granting a 90-day extension to all licenses for health care providers and regulated facilities.
- AHCA is distributing information regarding regulatory flexibilities created by waivers from CMS related to skilled nursing facilities, critical access hospitals, home health agencies, durable medical equipment, provider enrollment, etc.
- AHCA participated in a collaborative call with the Florida Health Care Association, Florida Hospital Association and LeadingAge Florida to discuss patient transfer arrangements between health care facilities such as nursing homes and hospitals.
- The Florida Medicaid Program announced coverage of commercial testing for COVID-19 for dates of service back to February 4.
- AHCA submitted requests to the Centers for Medicare and Medicaid Services (CMS) for flexibility for Florida's program under the federal declaration of a state of emergency.

AMERICAN OVERSIGHT

- Secretary Mayhew participated in a call with hospitals, laboratory administrators and associations regarding hospital testing.

AGENCY FOR PERSONS WITH DISABILITIES

- The Agency for Persons with Disabilities' (APD) three state-run centers in Marianna, Gainesville, and Chattahoochee, as well as APD-licensed group homes, are restricting visitors in compliance with the Executive Order to protect the health and safety of our customers.
- APD Adult Day Training programs across the state are screening visitors for possible exposure to COVID-19 using a visitor questionnaire. The questionnaire is also being used to screen visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA), in coordination with the Administration for Community Living (ACL), facilitated a virtual Town Hall meeting at the request of Hallandale Beach Mayor Joy Cooper. More than 2,700 seniors were online for the meeting. Charlotte Mather Taylor, Executive Director of the Aging and Disability Resource Center (ADRC) of Broward County, led the discussion with participation from ACL Representative Constantino Miskos, Chen Senior Medical Center, and representatives from Emergency Medical Services. Their primary topics of conversation centered on the work being done, specifically by the Area Agency on Aging, to continue to provide people resources and services to maximize support during COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, DOEA provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the safe delivery of home-delivered meals to prevent spread of respiratory infection.
- DOEA continues to provide updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, they are provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.
- The Vision 2020: Looking Towards Your Age-Friendly Future Tour to five communities across Florida originally planned for April 20th - April 24th and co-hosted by the Department and AARP has been postponed to protect the health and wellness of seniors, volunteers and staff.
- All Serving Health Insurance Needs of Elders (SHINE) participation in scheduled outreach events, presentations, and in-person SHINE/Senior Medicare Patrol (SMP) counseling has been suspended until further notice. SHINE volunteers and staff will continue to provide counseling services, but the services will be conducted over-the-phone with future considerations for the use of webinars and Facebook LIVE.
- DOEA Secretary Prudom held a conference call with The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors to discuss the suspension of face-to-face assessments. CARES assessors will provide reviews through phone or tele-technology to reduce client/staff exposure and reduce spread.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance to all Executive Directors regarding the provision on completing assessments for multiple program types, specifically for clients who have chosen to self-isolate.
- DOEA provided updated information on current closures and possible future temporary closures of specific services at Congregate Meal Sites, Senior Centers, and Adult Day Care Centers on our website homepage and all corresponding program pages. Clients are guided to contact the specific location for alternative services, provided the Area Agency on Aging helpline, and directed to the DOH website with any additional questions on COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- The Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is having preliminary conversations with Mass Care on the anticipated needs of volunteers. The agency is working together to plan for volunteers and develop volunteer safety guidelines to ensure that they are protected.
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF EDUCATION

- Commissioner of the Florida Department of Education (FDOE) Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks. To stay up to date on school closure information, visit: org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, and their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- The State University System will continue to evaluate the effectiveness of remote learning and the need to teach remotely in order to protect our students and the university community.
- The State University System will continue to work with the Florida Department of Health and the Emergency Operations Center to determine if the initial two weeks of remote learning is sufficient.
- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING - While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- All state universities have implemented campus-wide critical incident or emergency management teams that are meeting regularly to prepare for the impacts of the COVID-19 virus.
- All universities are preparing to transition to remote instructional delivery for a two-week period during March and early April, depending on each institution's Spring Break, and are informing students not to return to campus during this period.
- The Board of Governors will be conducting its March meeting via conference call and will not have a face-to-face meeting at USF as was originally scheduled.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.

- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19.

- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State's museum properties are taking precautions to ensure the health of visitors amid concerns of COVID-19. As part of daily site and museum operations, The Grove Museum has increased the frequency of disinfecting regularly touched interactive surfaces such as touchscreens, display cases, and tactile panels. Additionally, Museum staff ensure that door handles, flat surfaces, kitchen equipment, shared office equipment, bathrooms, etc., are all frequently sanitized. Finally, The Grove Museum has taken measures to make all staff and volunteers aware of the steps everyone should take to help contain the spread of COVID-19 such as hand washing, self-isolation when feeling ill, following recommendations from health officials and seeking medical evaluation immediately if COVID-19 symptoms appear.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor Ron DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- Pursuant to Executive Order 20-52 issued by Governor Ron DeSantis, FDOT Secretary Thibault has suspended size and weight restrictions for divisible loads on any vehicles transporting emergency equipment, services, supplies, and necessary agricultural commodities on state roads.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- Pursuant to Executive Order 20-52, FLHSMV Executive Director Rhodes waived commercial truck hours of service regulations and other related regulations so that emergency supplies, equipment, commodities and resources can be moved more quickly and efficiently throughout the state.
- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to complete transactions for driver licenses, ID cards, motor vehicle or vessel registrations, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association as well as Tax Collectors across the state to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor Ron DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/.

VISIT FLORIDA

- To protect the health and safety of the traveling public and staff, VISIT FLORIDA's four welcome centers will be closed until further notice.
- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.

AMERICAN OVERSIGHT

- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

FLORIDA DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

- The Florida Department of Business and Professional Regulation (DBPR) is incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices. Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises.

FLORIDA DEPARTMENT OF MANAGEMENT SERVICES

- The Florida Department of Management Services' (DMS) Emergency Support Function-7 (ESF-7) Logistics team continues to coordinate with the Department of Health and the Division of Emergency Management on identifying the equipment or supplies that may be necessary for a mass response to COVID-19.
- DMS' Division of Human Resource Management has provided guidance to agencies on implementing preventive actions in the workplace, reporting symptoms, using leave, utilizing health insurance benefits, and applying travel restrictions and telework policies.
- DMS' Division of State Group Insurance continues to coordinate with health plan providers to ensure that state employee health plan members receive the health benefits that can assist them and their dependents if needed.
- DMS' Division of Real Estate Development and Management (REDM) continues to provide guidance to agency facility managers across the state on steps to take to prevent workplace contamination and to pre-position environmental vendors to mobilize in the event a viricidal cleaning is needed.
- DMS' Division of Real Estate Development and Management continues to identify, purchase, and distribute additional hand sanitizing gel and cleaning supplies to state-maintained facilities.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with users and vendor of the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.
- DMS' Division of State Technology-Public Safety Unit continues to coordinate with statewide public safety communications personnel on their plans to ensure emergency communications systems are not impacted by potential reductions in staffing resources.

FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION

- Currently all Florida State Parks and campgrounds, and Office of Resilience and Coastal Protection facilities (aquatic preserves and National Estuarine Research Reserves), remain open to the public. However, in an abundance of caution and consistent with Center for Disease Control and Prevention guidance, DEP announced on March 13 that it is cancelling all events and activities at these facilities effective immediately and until further notice.
    - This includes DEP events and includes activities such as tours and visitor centers that involve large groups and/or or people in close proximity to others. People with questions regarding any privately scheduled event should check with the host of the event or the facility directly. For the latest closure and cancellation information, please visit floridastateparks.org.
- If your travel plans have changed and you need to modify camping or cabin reservations, please visit ReserveAmerica.com, call Reserve America at 1-800-326-3521 or TDD 888-433-0287 or text to 904-204-3216.

From: Certified Associates <info@cmmdr.com>
Sent: Friday, March 13, 2020 11:38 AM
To: zzzz Feedback, Medical Marijuana Use <MedicalMarijuanaUse@flhealth.gov>
Subject: URGENT - 2nd Request - COVID-19

Dear Office of Medical Mariuana Use;

This is our 2nd request as we consider this a health emergency.

Due to the rapid spread, and Department of Health announcement regarding Covid-19, we are asking that telemedicine be implemented immediately.

We also know that the virus is much more widespread in Florida due to the lack of testing. We have a very large patient base of elderly patients and patients with autoimmunde disorders.

As outlined in the Dept of Health rules and regulations medical marijuana patients are required to be seen by the physician in person and telemedicine is not allowed for medical marijuana certifications.

We are asking for this specific rule to be suspended for doctors who are actively seeing medical marijuana patients in the state of Florida, in light of the covid19 outbreak. The Department of Health announced "people at risk" should isolate themselves from others.
This is the vast majority of our patients. Elderly and those suffering from autoimmune conditions. Florida is unique in that we also have a large population of seasonal patients who come from other

AMERICAN OVERSIGHT

states. Physicians and hospitals widely use telemedicine.
Patients can get home deliveries of their medical marijuana. This is an urgent and reasonable request in light of this pandemic.

We are certain that without telemedicine being an option, the risk to our patients, physicians, and staff contracting and spreading covid19 will dramatically increase.

In addition, we have physicians and staff members who are also seriously "high risk".

Continuity of care is important to us, and if containment zones are implemented in FLorida physicians and staff may not be able to reach patients.

This is an airborne virus that handwashing and and sanitization will not combat on their own.

For these numerous reasons we are asking that you suspend the DOH rule that physicians be in the same room, and implement access to telemedicine immediately.

Thank you for your consideration.

Drew

> What is the current capacity in Miami-Dade and Broward to test for COVID 19? The samples collected for testing and shipped through the county health departments are sent to and tested at one of the three state health labs in Jacksonville, Tampa, and Miami. Regional capacity is adequate to absorb current needs. With the addition of commercial lab testing capabilities, additional testing capacity is now available for those that may not meet CDC criteria for testing but wish to be tested.
>
> How many tests are currently available and how many tests can be processed in a day in Miami-Dade and Broward Counties? This number changes as new test kits arrive and are distributed according to regional/county need. Regional capacity to process tests are adequate to absorb current needs. The Department can support current testing needs, but is unaware of the exact testing capacity that may be available at private and commercial labs.
>
> What are the current rules for allowing someone to be tested? Refer to http://www.floridahealth.gov/diseases-and-conditions/COVID-19/providers/index.html
>
> Is the test accurate for people who do not have symptoms? If a person is positive for COVID-19, but asymptomatic, the test will still confirm that they are positive.
>

AMERICAN OVERSIGHT

> Can anyone who has come into contact with the BHI Employee be tested? Refer to http://www.floridahealth.gov/diseases-and-conditions/COVID-19/providers/index.html
>
> If so, what is the process for informing them and getting them tested? Refer to http://www.floridahealth.gov/diseases-and-conditions/COVID-19/chd/index.html
>
> Can the person that travelled with the BHI Employee from New York be retested since our Employee was positive? If an individual meets the criteria for CDC testing, DOH can test them. Others not meeting that criteria but wishing to be tested may contact their health care provider to obtain testing. http://www.floridahealth.gov/diseases-and-conditions/COVID-19/providers/index.html

>
> What type of COVID 19 does she have (L or S)? We are unable to comment on personal health information or provide other identifying information for any individual that tests positive for COVID-19. However, the COVID-19 test results show either a positive or negative result.
>
> What is the Health Department doing to trace and contact people who were potentially exposed? The Department's employees engage in in-depth epidemiological investigations including contact tracing based on information provided from persons under investigation or monitoring and additional supportive documentation that the Department finds related to that persons contacts. For additional information, refer to http://www.floridahealth.gov/diseases-and-conditions/COVID-19/chd-guidance/index.html
>
> Will the Health department be cleaning public areas that may have the virus and what is that process and when will it be done? At present, public building and structure cleaning crews are asked to increase the frequency of the currently recommended sanitation practices. Additional guidance can be found at: http://www.floridahealth.gov/diseases-and-conditions/COVID-19/need-to-know/Prevention.html
>
> Can any resident be tested if they want? Guidance is found here: http://www.floridahealth.gov/diseases-and-conditions/COVID-19/providers/index.html. If an individual doesn't meet the CDC parameters for testing, their health care provider may still order a test upon request of the individual and it can be tested through a private lab.
>
> Will the Health Dept or EOC provide updates to the elected's and Manager's in re to the numbers of individuals possibly infected or positive in our area? New positive cases are updated on the Department's website. A daily press release is posted with all cases reported along with new ones that state the county, sex, and source (international traveler or other identified source).

Dr. Blackmore:

AMERICAN OVERSIGHT

I communicated to our morning team that there was follow up needed with you all. Separately, FL health leadership (FL Surgeon General I think?) reached out to Jay Butler here at CDC separately to discuss issues, involving our cruise ship task force. Chris Jones, the lead for our call unit, followed up and was told that local leadership was connected with staff at the Miami Quarantine station and that there were no additional questions.

Are there remaining issues you would like to discuss? We can have a call tonight or set up additional calls in the AM. Apologize for the miscommunication: we were told all was taken care of. Happy to help in any way we can!

Stephen J. Nelson, MA, MD, FCAP
District Medical Examiner
< sent from my iPad >

Begin forwarded message:

Subject: [EXTERNAL]: RE: COVID-19

Good morning,

As a point of clarification, please be aware that medical examiners shall accept jurisdiction and certify death certificates on all cases with suspected COVID-19 deaths. As COVID-19 has been deemed a Public Health Emergency, deaths relating to it fall directly in line with Florida Statute 406.11(1)(a)11. In an effort to prevent possible spreading of the virus in air controlled environments, autopsies are not expected to be performed on decedents with confirmed COVID-19 diagnoses prior to death, however, that decision may be left to professional judgement. Regardless of if an autopsy or external examination is performed, any suspected COVID-19 deaths will need to be certified by the medical examiner and reported to MEC Staff.

As requested by the Department of Health, MEC Staff are also conductng

AMERICAN OVERSIGHT

a brief survey of each office's Personal Protective Equipment (PPE). Please notify us with the answers to the questions listed below by close of business Friday.

1. What kind of PPE does your office have on hand?
2. How long will your on-hand PPE inventory last if you are unable to obtain any new shipments of PPE?
3. What PPE will you need most quickly in the event that you are unable to obtain any new shipments of PPE?

None that I know of. By the way, tomorrow we are reaching out to all the ALF and SNF. We planned several approaches

1. Calling all of them if possible to discuss prevention measures and guidance
2. Blast emails to all
3. Send everbridge with the same information in three languages

Any information that you think we should share with them besides the guidance, please forward it to me. I can include in the package I am preparing for them.

Thank you.

Epi data for Miami Dade report

- I would include the basic epi data in the screenshot below. for age we can do 5 year age ranges or whatever y'all think is best. If there is other epi data you would like to show, go for it (rate per 100,000, symptoms, hospitalizations, deaths, etc).
- Include syndromic data however you would like to show it (table, chart, etc.)

We can build on this report if it needs to be produced daily. They will also let us know if we need to add more.

I know the direction is not great, but I appreciate the work on this. These requests come in one on top of the other without warning. We are working to get extra staffing to help ease the burden.

Miami-Dade County, Florida

Total Cases: 76
Miami-Dade Residents: 72
Miami-Dade Residents Treated Elsewhere: 1
Non-Miami-Dade Residents: 3

Demographics:
Men: 45
Women: 31
Age Range: 18-88

More Information:

Travel-Related Cases: 26
Known Contact with Case: 15
Note: A person can be both a travel-related case and a known contact case, just one of those, neither of those, or be pending investigation.

Hi Gigi,

Please see the attached report and Scott's inquiry below. Leadership is asking for some insight into the epidemiology of your current cases. An idea of if you are seeing any specific clusters or outbreaks in ALF/LTCFs would be helpful.

Thanks,
Ann

Epi data for Miami Dade report

- I would include the basic epi data in the screenshot below. for age we can do 5 year age ranges or whatever y'all think is best. If there is other epi data you would like to show, go for it (rate per 100,000, symptoms, hospitalizations, deaths, etc).
- Include syndromic data however you would like to show it (table, chart, etc.)

We can build on this report if it needs to be produced daily. They will also let us know if we need to add more.

I know the direction is not great, but I appreciate the work on this. These requests come in one on top of the other without warning. We are working to get extra staffing to help ease the burden.

Miami-Dade County, Florida

Total Cases: 76
Miami-Dade Residents: 72
Miami-Dade Residents Treated Elsewhere: 1
Non-Miami-Dade Residents: 3

Demographics:
Men: 45
Women: 31
Age Range: 18-88

More Information:

Travel-Related Cases: 26
Known Contact with Case: 15
Note: A person can be both a travel-related case and a known contact case, just one of those, neither of those, or be pending investigation.

GAME ON? IT DEPENDS ON THE GAMBLING VENUE

By Dara Kam

TALLAHASSEE --- Amid mandatory nightclub closures and voluntary restaurant shutdowns, gamblers across Florida face a patchwork of options if they want to place bets in a state grappling with the rapidly spreading novel coronavirus.

Many racetracks and jai alai frontons have suspended operations, in keeping with the White House's advice this week against gatherings of 10 people or more.

But other operators of state-licensed cardrooms have opted to keep facilities open, adding extra sanitation measures designed to combat the highly contagious disease known as COVID-19 and trying to implement "social distancing," as recommended by the federal Centers for Disease Control and Prevention.…

Teammates,

I was just notified that we currently have 4 FLNG Soldiers in isolation due to either exposure to COVID-positive patients prior to being activated to State Active Duty, or due to exhibiting COVID symptoms since they were activated.

We're working through the details, but this is a scenario we have been preparing for, and is not unexpected. If we were able to activate them under 502(f) authority, they would be eligible for federal benefits instead of the state's Workman's Comp, which would be a better scenario for the Soldier and the State of Florida. If they get ill from the virus and require extensive treatment, the federal benefits afforded by a 502(f) activation could be substantial. The attached info paper discusses the issue in greater detail.

Every TAG in the nation is pushing to get the Feds to authorize 502(f) since this situation is only going to get worse with time. I encourage Governor DeSantis to continue to support this initiative and will be presenting him with a letter tomorrow requesting his endorsement for this as well.

As an aside, there are 30 Broward County 1st responders in quarantine due to exposure to COVID-positive patients. Our Drive-thru team will be testing them with collection and sampling kits tomorrow as part of their practice for opening the lanes on Friday.

I'm available to answer any questions you may have...

Thanks!

V/R,

Eif

AMERICAN OVERSIGHT

From: Office of Intergovernmental Affairs (IGA)
To: scott.rivkees@flhealth.gov
Subject: Homeland Security Acting Secretary Chad F. Wolf s Statement on Presidential Proclamation To Protect the Homeland from Travel-Related Coronavirus Spread
Date: Wednesday, March 11, 2020 10:13:44 PM

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Homeland Security Acting Secretary Chad F. Wolf's Statement on Presidential Proclamation To Protect the Homeland from Travel-Related Coronavirus Spread

(WASHINGTON) Today President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf:

"Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus.

"In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

   a. Participation by the NGA Center for Best Practices

II. ***ASTHO Government Affairs Update***: Carolyn Mullen
   - ASTHO March 12 Legislative Alert

III. Discussion Topic #1: ***Preventing and Controlling COVID-19 Outbreaks in Nursing Homes and Assisted Living Facilities***: David R. Gifford MD MPH, Senior Vice President and Chief Medical Officer, AHCA/NCAL

AMERICAN OVERSIGHT

See attached materials to guide the discussion.

- *(CDC, published March 10)* Interim Additional Guidance for Infection Prevention and Control for Patients with Suspected or Confirmed COVID-19 in Nursing Homes: Provides clinical recommendations as well as mitigation strategies such as visitor, healthcare personnel and resident restrictions.
- *(CDC, updated March 10, 2020)* Interim Infection Prevention and Control Recommendations for Patients with Suspected or Confirmed Coronavirus Disease 2019 (COVID-19) in Healthcare Settings: Includes updated PPE recommendations for the care of patients with known or suspected COVID-19 and considerations for designating entire units within the facility, with dedicated HCP, to care for known or suspected COVID-19 patients and options for extended use of respirators, facemasks, and eye protection on such units.

IV. Discussion Topic #2: ***Community Mitigation Strategies and Tactics***: Howard Zucker (SHO-NY, Tentative)-The New Rochelle Containment Zone Approach

- *(CDC, published March 11 2020)* Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission outlines actions by setting and level of transmission that "local and state health departments can recommend in their community to both prepare for and mitigate community transmission of COVID-19." The framework recommends that states activate their community emergency plans, which may provide additional authorities and coordination needed for interventions to be implemented. It also outlines local factors and characteristics that need to be taken into consideration when determining a mitigation approach.
- CDC 30 day recommendations on mitigation strategies to New Rochelle (Westchester County), Santa Clara, Seattle-King, Pierce and Snohomish Counties, Florida, and Massachusetts.
- (*CDC, published March 12, 2020*) Consideration for School Closures

V. General Discussion

Subject:	IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP
Date:	Thursday, March 12, 2020 8:51:11 PM
Attachments:	image001.png image002.png image003.png image004.png

---

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to

AMERICAN OVERSIGHT

work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

From:	State and Local Readiness (CDC)
To:	State and Local Readiness (CDC)
Subject:	INVITATION: Briefing Call on COVID-19 TODAY (March 12) at 2:00 p.m. ET
Date:	Thursday, March 12, 2020 12:49:34 PM
Attachments:	image001.png

State and Local Leaders,

On **Thursday, March 12, at 2:00 p.m. Eastern Time**, please join Senior Administration Officials for a briefing call on COVID-19 (coronavirus) regarding President Trump issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries. Additional details can be found below. We will also provide an update on implementing mitigation strategies for communities with local COVID-transmission (A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission).

Briefing Call Registration on 212(f) & Community Mitigation Strategies

- **Date: Today,** Thursday, March 11
- **Time:** 2:00 PM ET (please note time zone)
- **Call-In Registration**: **CLICK HERE**
- **Note:** You must RSVP to join the call. Upon successful registration, you will receive dial-in details to the email address you use to register. Note that multiple people cannot dial-in using the same registration information.

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

Sincerely,
Zach

AMERICAN OVERSIGHT

President Donald J. Trump Has Taken Unprecedented Steps to Respond to The Coronavirus and Protect the Health and Safety Of Americans

"Together we are putting into policy a plan to prevent, detect, treat and create a vaccine against coronavirus to save lives in America and the world. America will get it done!" – President Donald J. Trump

President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf: "Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus. In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

RESTRICTING TRAVEL FROM IMPACTED AREAS: President Donald J. Trump is taking further action to curb the spread of the coronavirus to the United States from other countries.

- President Trump is issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries.
    - Section 212(f) of the INA only applies to the movement of human beings, not goods or cargo.
- The restriction applies to foreign nationals who have been in the Schengen Area, 26 countries in Europe with open borders agreements, in the last 14 days.
- Those who are exempt from these restrictions, such as American citizens, will be directed to a limited number of airports where screening can take

AMERICAN OVERSIGHT

place.
- There is extensive travel back and forth between Europe that heightens the risk here in the United States.

LOOKING OUT FOR AMERICAN BUSINESSES AND WORKERS: President Donald J. Trump is committed to protecting American businesses and workers from the impacts of coronavirus.

- The President is announcing an economic assistance package to help support businesses and workers who have been harmed by this outbreak.

- President Trump has instructed the Small Business Administration (SBA) to exercise available authority to provide loans to businesses affected by the coronavirus.
    - These loans will help overcome disruptions caused by the coronavirus.
    - The President is calling on Congress to increase funding for this program by an additional $50 billion.
- The President will be instructing the Department of the Treasury to defer tax payments for certain individuals and businesses negatively impacted by the coronavirus.
    - This action will provide more than $200 billion of additional liquidity to the economy.
- President Trump is calling on Congress to immediately pass payroll tax relief.
- The President announced that he will soon be taking emergency action to provide financial relief for workers who are ill, quarantined, or caring for others due to the coronavirus.
    - The President also called on Congress to take action to extend this relief for workers.

LEADING AN AGGRESSIVE, WHOLE-OF-GOVERNMENT APPROACH: President Trump has taken unprecedented steps to protect the health of Americans in response to the coronavirus.

- The President is leveraging all of our resources to respond to the coronavirus, bringing together government and private industry in a collaborative response.
- The Trump Administration declared a public health emergency in January to bolster response efforts.
- President Trump took early action to help curb the spread of the virus from other countries to the United States, providing important time for response and preparations.
    - In January, President Trump acted quickly to restrict travel from foreign nationals traveling from China.
    - In February, the President restricted travel for individuals recently traveling from Iran.
    - The Administration put into place mandatory screening for all

AMERICAN OVERSIGHT

travelers coming into the country from Italy and South Korea.
    - Travel advisories for severely impacted areas like Italy and South Korea have been raised to their highest level.
- Today, the President directed his Administration to make general-use face masks available to our healthcare workers.
    - The Administration's actions will help make millions of general-use respirators available to keep healthcare workers safe and mitigate transmission of the virus.
- President Trump signed into law more than $8 billion to fund response efforts.
- The Administration has taken bold steps to incentivize the development of therapeutics and vaccines to treat and prevent the spread of the coronavirus.
- Working across the public and private sectors, the Trump Administration continues to drastically expand testing capacity.
    - More than 1 million tests have been distributed nationwide, with another 4 million tests being shipped out by the end of the week.
    - Testing is now available in every State lab in the country and commercial labs are now deploying tests, which will help generate a dramatic increase in availability.
- The Trump Administration has released guidance on how to keep businesses, schools, community gathering places, and families safe.
    - From the start, President Trump has made keeping the public informed a top priority.
- The Administration has announced that health plans with health savings accounts will be able to cover coronavirus testing and treatment without co-payments.

ICYMI | Vice President Pence Discusses the Coronavirus Response on the Morning Shows

Earlier this morning, Vice President Pence joined Good Morning America, The Today Show, Fox & Friends, New Day, and CBS This Morning to discuss the steps that this administration is taking to combat the coronavirus.

ON ABC's GOOD MORNING AMERICA

AMERICAN OVERSIGHT

WATCH HERE.

From very early on, President Trump took decisive action to put the health of the American people first.

> "We all have known from the beginning that the coronavirus would continue to spread across this country, and it's one of the reasons why, from very early on, President Trump took decisive action to put the health of the American people first, not only declaring a public health emergency in January, but in that same month he suspended all travel from China -- an unprecedented move -- and quarantined Americans that were returning from the region. Since that time, George, we've -- we've issued travel advisories for areas of South Korea, Italy; screened all persons coming on direct flights. But, frankly, as we watched the epicenter of the coronavirus shift from China and South Korea to Europe, the President thought it was proper for us to impose a 30-day suspension on all travel from continental Europe."

The President, again, made another unprecedented decision in suspending all travel from Europe, because we want to stop the flow of people bringing the coronavirus here.

> "The reality is that, really, just two weeks ago, in Italy, there were less than 500 cases and now there's 12,000 cases in Italy, George. We have tens of thousands of people that travel to the United States from Europe every day. Seventy percent of new cases in the world were in Europe. And when we looked yesterday at the -- what was then the 35 states where we had cases, about 30 of them could be traced to contacts with Europe. And so the President, again, made another unprecedented decision in suspending all travel from Europe, because we essentially want -- we essentially want to stop the flow of people bringing the coronavirus here, but then continuing to surge resources, particularly into California, Washington State, New York, and other communities where we've seen community spread. It's a combination of efforts that's being driven by the top health experts in the world on our task force. But the President -- the President showed again yesterday a willingness to take decisive action on multiple levels to protect the American

AMERICAN OVERSIGHT

people."

We want to send a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus, you should not be worried about the cost of testing or treatment.

> "We're making steady progress. We're going to continue to make a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus or you have symptoms, we don't want people to be worried about the cost of testing, to be worried about the cost of treatment... As the President made clear last night, we're working with Congress and exploring actions the President can take to make sure that hourly wage earners know that you can stay home without risking losing a paycheck or losing your job if you feel if you feel that you've been exposed to the coronavirus."

ON NBC's TODAY SHOW

WATCH HERE.

From early on in this effort, we have addressed the testing issue. We made changes through the FDA that allowed for state labs and hospitals to engage in testing.

> "From early on in this effort we've been addressing the testing issue. We made changes through the FDA that allowed for state labs and university hospitals and hospitals to engage in testing. And I'm pleased to report every state lab in America can do testing now. Many university laboratories are doing it. Washington State – the University of Washington is doing extraordinary work. but we are literally working hour by hour to expand the testing and we think the key Savannah is going to be what we call commercial laboratories like LabCorp and Quest who are already spinning up production at the president's direction last week on tests that can be available on a broad basis in the days ahead for the American people. we're making real progress but rest assured we're going to continue to drive forward."

The American people should know that President Trump has no

AMERICAN OVERSIGHT

higher priority than the health, safety and well-being of the American people.

> "The American people should know that President Trump has no higher priority than the health and safety and wellbeing of the people in this country. You can go to coronavirus.gov right now to find out what every American can do to keep yourself, your family, your workplace and your school safe. But you can rest assured we're going to focus on communities where we've had community spread, and the President's action yesterday suspending travel from Europe is one more example of how he's putting the health of America first."

ON FOX NEWS' FOX & FRIENDS

WATCH HERE AND HERE.

The President has called this a whole-of-government approach, but he has also called this is a whole-of-America approach.

> "The President, you know, he said this was a whole-of-government approach but he also said this is a whole-of-America approach. So he's brought in business leaders from nursing homes; yesterday, banking; hospitals, and the rest. But one of the things we did that's most important on testing was the President brought in the leaders of the top commercial laboratories in the country who, as we speak, have already approved a test that is being spun up. It's being sent out to market. Quest, LabCorp, the largest commercial laboratories in the country, are working very closely with our administration. We're clearing the red tape out of the way. That's going to be the way that, in the days ahead, we're going to -- we're going to have broad-based testing available all across the country."

We are working together to contain the spread of the coronavirus. And we will get through this.

> "Our goal, as the coronavirus spreads in this country -- and the vast majority who would contract it will have flu-like symptoms and recover. Our goal nonetheless is to hold down that overall number as much as

AMERICAN OVERSIGHT

possible. And we will do that with the continuing cooperation of American families, schools, businesses, and states. And that's the vision President Trump has. All of us working together will get through this."

We are focusing on supporting efforts at the state and local level in Washington State, and in California. CDC issued strong guidelines for those communities about public activities, large gatherings and at schools. We will continue simply to follow the data on this.

"Make no mistake about it: We are also focusing on supporting efforts at the state and local level in California, in Washington State, and in California. CDC issued very strong guidelines for those communities about public activities, large gatherings, schools. And we'll continue simply to follow the data on this and make strong recommendations where we have what's known as "community spread. But for every American, right now, as the President said last night, it's a good time to use common sense. Wash your hands often. Clean, you know, often-used surfaces. All that information is available at Coronavirus.gov. So we're going to try and mitigate the spread in this country but also prevent, through the President's decisive action last night, people from bringing the coronavirus into the United States any further from Europe."

We are encouraging best practices for every American. We are focusing on communities where we have community spread.

"I want to say to your viewers, just as the President said last night, the risk to the average American of contracting the coronavirus remains low, but we do know that seniors with serious underlying chronic health conditions are particularly vulnerable to very serious outcomes. And so we're encouraging best practices for every American. We're focusing on communities where we have community spread."

Those with a family member who is a senior citizen should support them in engaging in good hygiene and good health practices.

"For any American that's watching today that has a family member or a loved one who's a senior citizen with a serious underlying health condition, this is a very good time to help and to support them to be able to avoid public places, and everyone around them to engage in good hygiene and good practices to protect those that are most vulnerable."

ON CNN's NEW DAY

AMERICAN OVERSIGHT

WATCH HERE AND HERE.

We have been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear.

> "We're not doing a travel ban as our strategy. The suspending all travel for 30 days from Europe is a part of the strategy. The other part is an aggressive mitigation strategy. I spoke to the governors of New York, Washington State, and California tomorrow -- or yesterday. CDC issued strong guidance to those areas where we have community spread. We've flowed resources. We've flowed support to those areas. And so it's a combination of strategies that the President has employed here. As he says, it's "all hands on deck," "a whole-of-government approach," but it's also a whole-of-America approach. We've literally been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear."

Any American who is concerned about being exposed to the coronavirus, should call their doctor and get tested.

> "Anyone who's looking on today who might be concerned that they were exposed to coronavirus or have symptoms should call their doctor. Their doctor, with any question, can call their state laboratory and be able to find out how they can have a test processed."

We are making steady progress. We don't want anybody to avoid having a test because they are concerned financially.

> "But make no mistake about it: We're making steady progress. We've made changes at the FDA in January, at the President's direction. And the American people can be confident we're going to continue to roll out the test. And maybe most significant on that score is that the President brought health insurance companies in last week and they all agreed to waive the co-pays on testing. We expanded testing to Medicare and Medicaid patients. And we also expanded coverage for treatment, and health insurance companies expanded coverage for treatment. We don't

AMERICAN OVERSIGHT

want anybody to avoid having a test because they're concerned financially."

The risk to the average American remains low.

"I want people to know that the risk to contracting the coronavirus, according to all of our experts, for the average American remains low. Most people that contract it, will have flu-like symptoms and recover."

ON CBS This Morning

WATCH HERE.

We are going to continue to put in every effort in place to protect the health and safety of the American people.

"The President took the unprecedented step of suspending all travel from China which was the originating country of this virus. We also established travel advisories, and we've been screening passengers on all direct flights from South Korea and Italy. But with the epicenter of this epidemic now moving from China and South Korea to Europe, yesterday the President again took the unprecedented step of suspending all travel from Europe for the next 30 days, and that in combination with our strong mitigation efforts in communities that are experiencing what our experts call community spread, areas of California, Washington State, and New York, we're going to continue to put every effort at home and with regard to these travel restrictions in place to protect the health and safety of the American people."

In the days ahead, we are going to continue to see the availability of tests at your local doctor and your local pharmacy expand.

"Testing is happening in every state lab in the country. Many university hospitals have taken the FDA test, like the University of Washington, is doing a great job expanding testing capabilities. But the biggest piece on the testing is that our commercial labs that the President brought in last week, companies like Quest and LabCorp, have already had approved a new test that they several days ago had begun to take to market which

AMERICAN OVERSIGHT

they can do in a vast and expansive way across the country. And literally in the days ahead, we're going to continue to see the availability of tests at your local doctor, ultimately at your local pharmacy, continue to expand."

When President Trump learned that 70% of the new cases this week, around the world, were in Europe, he took decisive action to protect the American people.

"Make no mistake about it: All the new cases in the world, this week, 70% of the new cases were in Europe. And the increase has been dramatic. When the President imposed the travel advisory and we began screening all flights, all passengers coming into the United States from Italy two weeks ago, there were roughly 500 coronavirus cases. Now there's 12,000, about 1,000 in Germany, about 1,000 in France. That's the reason why the President essentially said full stop, we're going to suspend all travel, and that American citizens coming home and legal residents will be funneled through 13 different airports. They'll get an initial health screening coming in. But we're going to ask everyone returning to our country to self-quarantine for 14 days."

State and Local Leaders,

On **Thursday, March 12, at 2:00 p.m. Eastern Time**, please join Senior Administration Officials for a briefing call on COVID-19 (coronavirus) regarding President Trump issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries. Additional details can be found below. We will also provide an update on implementing mitigation strategies for communities with local COVID-transmission (A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission).

Briefing Call Registration on 212(f) & Community Mitigation Strategies

- **Date: Today,** Thursday, March 11
- **Time:** 2:00 PM ET (please note time zone)
- **Call-In Registration:CLICK HERE**
- **Note:** You must RSVP to join the call. Upon successful registration, you will receive dial-in details to the email address you use to register. Note that multiple people cannot dial-in using the same registration information.

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

AMERICAN OVERSIGHT

Sincerely,

The White House Office of Intergovernmental Affairs

President Donald J. Trump Has Taken Unprecedented Steps to Respond to The Coronavirus and Protect the Health and Safety Of Americans

"Together we are putting into policy a plan to prevent, detect, treat and create a vaccine against coronavirus to save lives in America and the world. America will get it done!" – President Donald J. Trump

President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf:"Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus.In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

RESTRICTING TRAVEL FROM IMPACTED AREAS: President Donald J. Trump is taking further action to curb the spread of the coronavirus to the United States

AMERICAN OVERSIGHT

from other countries.

- President Trump is issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries.
  - Section 212(f) of the INA only applies to the movement of human beings, not goods or cargo.
- The restriction applies to foreign nationals who have been in the Schengen Area, 26 countries in Europe with open borders agreements, in the last 14 days.
- Those who are exempt from these restrictions, such as American citizens, will be directed to a limited number of airports where screening can take place.
- There is extensive travel back and forth between Europe that heightens the risk here in the United States.

LOOKING OUT FOR AMERICAN BUSINESSES AND WORKERS: President Donald J. Trump is committed to protecting American businesses and workers from the impacts of coronavirus.

- The President is announcing an economic assistance package to help support businesses and workers who have been harmed by this outbreak.
- President Trump has instructed the Small Business Administration (SBA) to exercise available authority to provide loans to businesses affected by the coronavirus.
  - These loans will help overcome disruptions caused by the coronavirus.
  - The President is calling on Congress to increase funding for this program by an additional $50 billion.
- The President will be instructing the Department of the Treasury to defer tax payments for certain individuals and businesses negatively impacted by the coronavirus.
  - This action will provide more than $200 billion of additional liquidity to the economy.
- President Trump is calling on Congress to immediately pass payroll tax relief.
- The President announced that he will soon be taking emergency action to provide financial relief for workers who are ill, quarantined, or caring for others due to the coronavirus.
  - The President also called on Congress to take action to extend this relief for workers.

LEADING AN AGGRESSIVE, WHOLE-OF-GOVERNMENT APPROACH: President Trump has taken unprecedented steps to protect the health of Americans in response to the coronavirus.

- The President is leveraging all of our resources to respond to the coronavirus, bringing together government and private industry in a collaborative response.

AMERICAN OVERSIGHT

- The Trump Administration declared a public health emergency in January to bolster response efforts.
- President Trump took early action to help curb the spread of the virus from other countries to the United States, providing important time for response and preparations.
  - In January, President Trump acted quickly to restrict travel from foreign nationals traveling from China.
  - In February, the President restricted travel for individuals recently traveling from Iran.
  - The Administration put into place mandatory screening for all travelers coming into the country from Italy and South Korea.
  - Travel advisories for severely impacted areas like Italy and South Korea have been raised to their highest level.
- Today, the President directed his Administration to make general-use face masks available to our healthcare workers.
  - The Administration's actions will help make millions of general-use respirators available to keep healthcare workers safe and mitigate transmission of the virus.
- President Trump signed into law more than $8 billion to fund response efforts.
- The Administration has taken bold steps to incentivize the development of therapeutics and vaccines to treat and prevent the spread of the coronavirus.
- Working across the public and private sectors, the Trump Administration continues to drastically expand testing capacity.
  - More than 1 million tests have been distributed nationwide, with another 4 million tests being shipped out by the end of the week.
  - Testing is now available in every State lab in the country and commercial labs are now deploying tests, which will help generate a dramatic increase in availability.
- The Trump Administration has released guidance on how to keep businesses, schools, community gathering places, and families safe.
  - From the start, President Trump has made keeping the public informed a top priority.
- The Administration has announced that health plans with health savings accounts will be able to cover coronavirus testing and treatment without co-payments.

ICYMI| Vice President Pence Discusses the Coronavirus Response on the Morning Shows

Earlier this morning, Vice President Pence joined Good Morning America, The Today Show, Fox & Friends, New Day, and CBS This Morning to discuss the steps that this administration is taking to combat the coronavirus.

AMERICAN OVERSIGHT

ON ABC's GOOD MORNING AMERICA

WATCH HERE.

From very early on, President Trump took decisive action to put the health of the American people first.

> "We all have known from the beginning that the coronavirus would continue to spread across this country, and it's one of the reasons why, from very early on, President Trump took decisive action to put the health of the American people first, not only declaring a public health emergency in January, but in that same month he suspended all travel from China -- an unprecedented move -- and quarantined Americans that were returning from the region. Since that time, George, we've -- we've issued travel advisories for areas of South Korea, Italy; screened all persons coming on direct flights. But, frankly, as we watched the epicenter of the coronavirus shift from China and South Korea to Europe, the President thought it was proper for us to impose a 30-day suspension on all travel from continental Europe."

The President, again, made another unprecedented decision in suspending all travel from Europe, because we want to stop the flow of people bringing the coronavirus here.

> "The reality is that, really, just two weeks ago, in Italy, there were less than 500 cases and now there's 12,000 cases in Italy, George. We have tens of thousands of people that travel to the United States from Europe every day. Seventy percent of new cases in the world were in Europe. And when we looked yesterday at the -- what was then the 35 states where we had cases, about 30 of them could be traced to contacts with Europe. And so the President, again, made another unprecedented decision in suspending all

AMERICAN OVERSIGHT

travel from Europe, because we essentially want -- we essentially want to stop the flow of people bringing the coronavirus here, but then continuing to surge resources, particularly into California, Washington State, New York, and other communities where we've seen community spread. It's a combination of efforts that's being driven by the top health experts in the world on our task force. But the President -- the President showed again yesterday a willingness to take decisive action on multiple levels to protect the American people."

We want to send a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus, you should not be worried about the cost of testing or treatment.

"We're making steady progress. We're going to continue to make a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus or you have symptoms, we don't want people to be worried about the cost of testing, to be worried about the cost of treatment... As the President made clear last night, we're working with Congress and exploring actions the President can take to make sure that hourly wage earners know that you can stay home without risking losing a paycheck or losing your job if you feel if you feel that you've been exposed to the coronavirus."

ON NBC's TODAY SHOW

WATCH HERE.

From early on in this effort, we have addressed the testing issue. We made changes through the FDA that allowed for state labs and hospitals to engage in testing.

"From early on in this effort we've been addressing the testing issue. We made changes

AMERICAN OVERSIGHT

through the FDA that allowed for state labs and university hospitals and hospitals to engage in testing. And I'm pleased to report every state lab in America can do testing now. Many university laboratories are doing it. Washington State – the University of Washington is doing extraordinary work. but we are literally working hour by hour to expand the testing and we think the key Savannah is going to be what we call commercial laboratories like LabCorp and Quest who are already spinning up production at the president's direction last week on tests that can be available on a broad basis in the days ahead for the American people. we're making real progress but rest assured we're going to continue to drive forward."

The American people should know that President Trump has no higher priority than the health, safety and well-being of the American people.

"The American people should know that President Trump has no higher priority than the health and safety and wellbeing of the people in this country. You can go to coronavirus.gov right now to find out what every American can do to keep yourself, your family, your workplace and your school safe. But you can rest assured we're going to focus on communities where we've had community spread, and the President's action yesterday suspending travel from Europe is one more example of how he's putting the health of America first."

ON FOX NEWS' FOX & FRIENDS

WATCH HERE AND HERE.

The President has called this a whole-of-government approach, but he has also called this is a whole-of-America approach.

AMERICAN OVERSIGHT

"The President, you know, he said this was a whole-of-government approach but he also said this is a whole-of-America approach. So he's brought in business leaders from nursing homes; yesterday, banking; hospitals, and the rest. But one of the things we did that's most important on testing was the President brought in the leaders of the top commercial laboratories in the country who, as we speak, have already approved a test that is being spun up. It's being sent out to market. Quest, LabCorp, the largest commercial laboratories in the country, are working very closely with our administration. We're clearing the red tape out of the way. That's going to be the way that, in the days ahead, we're going to -- we're going to have broad-based testing available all across the country."

We are working together to contain the spread of the coronavirus. And we will get through this.

"Our goal, as the coronavirus spreads in this country -- and the vast majority who would contract it will have flu-like symptoms and recover. Our goal nonetheless is to hold down that overall number as much as possible. And we will do that with the continuing cooperation of American families, schools, businesses, and states. And that's the vision President Trump has. All of us working together will get through this."

We are focusing on supporting efforts at the state and local level in Washington State, and in California. CDC issued strong guidelines for those communities about public activities, large gatherings and at schools. We will continue simply to follow the data on this.

"Make no mistake about it: We are also focusing on supporting efforts at the state and local level in California, in Washington State, and in California. CDC issued very strong guidelines for those communities about public activities, large gatherings, schools. And we'll continue simply to follow the data on this and make strong recommendations where we have what's known as "community spread. But for every American, right now, as the President said last night, it's a good time to use common sense. Wash your hands often. Clean, you know, often-used surfaces. All that information is available at Coronavirus.gov. So we're going to try and mitigate the spread in this country but also prevent, through the President's decisive action last night, people from bringing the coronavirus into the United States any further from Europe."

We are encouraging best practices for every American. We are focusing on communities where we have community spread.

"I want to say to your viewers, just as the President said last night, the risk to the average American of contracting the coronavirus remains low, but we do know that seniors with serious underlying chronic health conditions are particularly vulnerable to

AMERICAN OVERSIGHT

very serious outcomes. And so we're encouraging best practices for every American. We're focusing on communities where we have community spread."

Those with a family member who is a senior citizen should support them in engaging in good hygiene and good health practices.

"For any American that's watching today that has a family member or a loved one who's a senior citizen with a serious underlying health condition, this is a very good time to help and to support them to be able to avoid public places, and everyone around them to engage in good hygiene and good practices to protect those that are most vulnerable."

ON CNN's NEW DAY

WATCH HERE AND HERE.

We have been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear.

"We're not doing a travel ban as our strategy. The suspending all travel for 30 days from Europe is a part of the strategy. The other part is an aggressive mitigation strategy. I spoke to the governors of New York, Washington State, and California tomorrow -- or yesterday. CDC issued strong guidance to those areas where we have community spread. We've flowed resources. We've flowed support to those areas. And so it's a combination of strategies that the President has employed here. As he says, it's "all hands on deck," "a whole-of-government approach," but it's also a whole-of-America approach. We've literally been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to

AMERICAN OVERSIGHT

bear."

Any American who is concerned about being exposed to the coronavirus, should call their doctor and get tested.

"Anyone who's looking on today who might be concerned that they were exposed to coronavirus or have symptoms should call their doctor. Their doctor, with any question, can call their state laboratory and be able to find out how they can have a test processed."

We are making steady progress. We don't want anybody to avoid having a test because they are concerned financially.

"But make no mistake about it: We're making steady progress. We've made changes at the FDA in January, at the President's direction. And the American people can be confident we're going to continue to roll out the test. And maybe most significant on that score is that the President brought health insurance companies in last week and they all agreed to waive the co-pays on testing. We expanded testing to Medicare and Medicaid patients. And we also expanded coverage for treatment, and health insurance companies expanded coverage for treatment. We don't want anybody to avoid having a test because they're concerned financially."

The risk to the average American remains low.

"I want people to know that the risk to contracting the coronavirus, according to all of our experts, for the average American remains low. Most people that contract it, will have flu-like symptoms and recover."

ON CBS This Morning

AMERICAN OVERSIGHT

WATCH HERE.

We aregoing to continue to put in every effort in place to protect the health and safety of the American people.

> "The President took the unprecedented step of suspending all travel from China which was the originating country of this virus. We also established travel advisories, and we've been screening passengers on all direct flights from South Korea and Italy. But with the epicenter of this epidemic now moving from China and South Korea to Europe, yesterday the President again took the unprecedented step of suspending all travel from Europe for the next 30 days, and that in combination with our strong mitigation efforts in communities that are experiencing what our experts call community spread, areas of California, Washington State, and New York, we're going to continue to put every effort at home and with regard to these travel restrictions in place to protect the health and safety of the American people."

Inthe days ahead, we are going to continue to see the availability of tests at your local doctor and your local pharmacy expand.

> "Testing is happening in every state lab in the country. Many university hospitals have taken the FDA test, like the University of Washington, is doing a great job expanding testing capabilities. But the biggest piece on the testing is that our commercial labs that the President brought in last week, companies like Quest and LabCorp, have already had approved a new test that they several days ago had begun to take to market which they can do in a vast and expansive way across the country. And literally in the days ahead, we're going to continue to see the availability of tests at your local doctor, ultimately at your local pharmacy, continue to expand."

When President Trump learned that 70% of the new cases this week, around the world, were in Europe, he took decisive action to protect the American people.

> "Make no mistake about it: All the new cases in the world, this week, 70% of the new cases were in Europe. And the increase has been dramatic. When the President imposed the travel advisory and we began screening all flights, all passengers coming into the United States from Italy two weeks ago, there were roughly 500 coronavirus cases. Now there's 12,000, about 1,000 in Germany, about 1,000 in France. That's the reason why the President essentially said full stop, we're going to suspend all travel, and that American citizens coming home and legal residents will be funneled through 13 different airports. They'll get an initial health screening coming in. But we're going to ask everyone returning to our country to self-quarantine for 14 days."

AMERICAN OVERSIGHT

From: Office of Intergovernmental Affairs (IGA)
To: carina.blackmore@flhealth.gov
Subject: INVITATION: Briefing Call on COVID-19 TODAY (March 12) at 2:00 p.m. ET
Date: Thursday, March 12, 2020 12:43:37 PM
Attachments: image001.png
image002.jpg
image003.jpg
image004.jpg
image005.jpg
image006.jpg

State and Local Leaders,

On **Thursday, March 12, at 2:00 p.m. Eastern Time**, please join Senior Administration Officials for a briefing call on COVID-19 (coronavirus) regarding President Trump issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries. Additional details can be found below. We will also provide an update on implementing mitigation strategies for communities with local COVID-transmission (A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission).

Briefing Call Registration on 212(f) & Community Mitigation Strategies

- **Date: Today,** Thursday, March 11
- **Time:** 2:00 PM ET (please note time zone)
- **Call-In Registration:CLICK HERE**
- **Note:** You must RSVP to join the call. Upon successful registration, you will receive dial-in details to the email address you use to register. Note that multiple people cannot dial-in using the same registration information.

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

AMERICAN OVERSIGHT

Sincerely,

The White House Office of Intergovernmental Affairs

President Donald J. Trump Has Taken Unprecedented Steps to Respond to The Coronavirus and Protect the Health and Safety Of Americans

"Together we are putting into policy a plan to prevent, detect, treat and create a vaccine against coronavirus to save lives in America and the world. America will get it done!" – President Donald J. Trump

President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf:"Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus.In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

RESTRICTING TRAVEL FROM IMPACTED AREAS: President Donald J. Trump is taking further action to curb the spread of the coronavirus to the United States

AMERICAN OVERSIGHT

from other countries.

- President Trump is issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries.
  - Section 212(f) of the INA only applies to the movement of human beings, not goods or cargo.
- The restriction applies to foreign nationals who have been in the Schengen Area, 26 countries in Europe with open borders agreements, in the last 14 days.
- Those who are exempt from these restrictions, such as American citizens, will be directed to a limited number of airports where screening can take place.
- There is extensive travel back and forth between Europe that heightens the risk here in the United States.

LOOKING OUT FOR AMERICAN BUSINESSES AND WORKERS: President Donald J. Trump is committed to protecting American businesses and workers from the impacts of coronavirus.

- The President is announcing an economic assistance package to help support businesses and workers who have been harmed by this outbreak.
- President Trump has instructed the Small Business Administration (SBA) to exercise available authority to provide loans to businesses affected by the coronavirus.
  - These loans will help overcome disruptions caused by the coronavirus.
  - The President is calling on Congress to increase funding for this program by an additional $50 billion.
- The President will be instructing the Department of the Treasury to defer tax payments for certain individuals and businesses negatively impacted by the coronavirus.
  - This action will provide more than $200 billion of additional liquidity to the economy.
- President Trump is calling on Congress to immediately pass payroll tax relief.
- The President announced that he will soon be taking emergency action to provide financial relief for workers who are ill, quarantined, or caring for others due to the coronavirus.
  - The President also called on Congress to take action to extend this relief for workers.

LEADING AN AGGRESSIVE, WHOLE-OF-GOVERNMENT APPROACH: President Trump has taken unprecedented steps to protect the health of Americans in response to the coronavirus.

- The President is leveraging all of our resources to respond to the coronavirus, bringing together government and private industry in a collaborative response.

AMERICAN OVERSIGHT

- The Trump Administration declared a public health emergency in January to bolster response efforts.
- President Trump took early action to help curb the spread of the virus from other countries to the United States, providing important time for response and preparations.
  - In January, President Trump acted quickly to restrict travel from foreign nationals traveling from China.
  - In February, the President restricted travel for individuals recently traveling from Iran.
  - The Administration put into place mandatory screening for all travelers coming into the country from Italy and South Korea.
  - Travel advisories for severely impacted areas like Italy and South Korea have been raised to their highest level.
- Today, the President directed his Administration to make general-use face masks available to our healthcare workers.
  - The Administration's actions will help make millions of general-use respirators available to keep healthcare workers safe and mitigate transmission of the virus.
- President Trump signed into law more than $8 billion to fund response efforts.
- The Administration has taken bold steps to incentivize the development of therapeutics and vaccines to treat and prevent the spread of the coronavirus.
- Working across the public and private sectors, the Trump Administration continues to drastically expand testing capacity.
  - More than 1 million tests have been distributed nationwide, with another 4 million tests being shipped out by the end of the week.
  - Testing is now available in every State lab in the country and commercial labs are now deploying tests, which will help generate a dramatic increase in availability.
- The Trump Administration has released guidance on how to keep businesses, schools, community gathering places, and families safe.
  - From the start, President Trump has made keeping the public informed a top priority.
- The Administration has announced that health plans with health savings accounts will be able to cover coronavirus testing and treatment without co-payments.

ICYMI| Vice President Pence Discusses the Coronavirus Response on the Morning Shows

Earlier this morning, Vice President Pence joined Good Morning America, The Today Show, Fox & Friends, New Day, and CBS This Morning to discuss the steps that this administration is taking to combat the coronavirus.

AMERICAN OVERSIGHT

ON ABC's GOOD MORNING AMERICA

WATCH HERE.

From very early on, President Trump took decisive action to put the health of the American people first.

> "We all have known from the beginning that the coronavirus would continue to spread across this country, and it's one of the reasons why, from very early on, President Trump took decisive action to put the health of the American people first, not only declaring a public health emergency in January, but in that same month he suspended all travel from China -- an unprecedented move -- and quarantined Americans that were returning from the region. Since that time, George, we've -- we've issued travel advisories for areas of South Korea, Italy; screened all persons coming on direct flights. But, frankly, as we watched the epicenter of the coronavirus shift from China and South Korea to Europe, the President thought it was proper for us to impose a 30-day suspension on all travel from continental Europe."

The President, again, made another unprecedented decision in suspending all travel from Europe, because we want to stop the flow of people bringing the coronavirus here.

> "The reality is that, really, just two weeks ago, in Italy, there were less than 500 cases and now there's 12,000 cases in Italy, George. We have tens of thousands of people that travel to the United States from Europe every day. Seventy percent of new cases in the world were in Europe. And when we looked yesterday at the -- what was then the 35 states where we had cases, about 30 of them could be traced to contacts with Europe. And so the President, again, made another unprecedented decision in suspending all

AMERICAN OVERSIGHT

travel from Europe, because we essentially want -- we essentially want to stop the flow of people bringing the coronavirus here, but then continuing to surge resources, particularly into California, Washington State, New York, and other communities where we've seen community spread. It's a combination of efforts that's being driven by the top health experts in the world on our task force. But the President -- the President showed again yesterday a willingness to take decisive action on multiple levels to protect the American people."

We want to send a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus, you should not be worried about the cost of testing or treatment.

"We're making steady progress. We're going to continue to make a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus or you have symptoms, we don't want people to be worried about the cost of testing, to be worried about the cost of treatment... As the President made clear last night, we're working with Congress and exploring actions the President can take to make sure that hourly wage earners know that you can stay home without risking losing a paycheck or losing your job if you feel if you feel that you've been exposed to the coronavirus."

ON NBC's TODAY SHOW

WATCH HERE.

From early on in this effort, we have addressed the testing issue. We made changes through the FDA that allowed for state labs and hospitals to engage in testing.

"From early on in this effort we've been addressing the testing issue. We made changes

AMERICAN OVERSIGHT

through the FDA that allowed for state labs and university hospitals and hospitals to engage in testing. And I'm pleased to report every state lab in America can do testing now. Many university laboratories are doing it. Washington State – the University of Washington is doing extraordinary work. but we are literally working hour by hour to expand the testing and we think the key Savannah is going to be what we call commercial laboratories like LabCorp and Quest who are already spinning up production at the president's direction last week on tests that can be available on a broad basis in the days ahead for the American people. we're making real progress but rest assured we're going to continue to drive forward."

The American people should know that President Trump has no higher priority than the health, safety and well-being of the American people.

"The American people should know that President Trump has no higher priority than the health and safety and wellbeing of the people in this country. You can go to coronavirus.gov right now to find out what every American can do to keep yourself, your family, your workplace and your school safe. But you can rest assured we're going to focus on communities where we've had community spread, and the President's action yesterday suspending travel from Europe is one more example of how he's putting the health of America first."

ON FOX NEWS' FOX & FRIENDS

WATCH HERE AND HERE.

The President has called this a whole-of-government approach, but he has also called this is a whole-of-America approach.

AMERICAN OVERSIGHT

"The President, you know, he said this was a whole-of-government approach but he also said this is a whole-of-America approach. So he's brought in business leaders from nursing homes; yesterday, banking; hospitals, and the rest. But one of the things we did that's most important on testing was the President brought in the leaders of the top commercial laboratories in the country who, as we speak, have already approved a test that is being spun up. It's being sent out to market. Quest, LabCorp, the largest commercial laboratories in the country, are working very closely with our administration. We're clearing the red tape out of the way. That's going to be the way that, in the days ahead, we're going to -- we're going to have broad-based testing available all across the country."

We are working together to contain the spread of the coronavirus. And we will get through this.

"Our goal, as the coronavirus spreads in this country -- and the vast majority who would contract it will have flu-like symptoms and recover. Our goal nonetheless is to hold down that overall number as much as possible. And we will do that with the continuing cooperation of American families, schools, businesses, and states. And that's the vision President Trump has. All of us working together will get through this."

We are focusing on supporting efforts at the state and local level in Washington State, and in California. CDC issued strong guidelines for those communities about public activities, large gatherings and at schools. We will continue simply to follow the data on this.

"Make no mistake about it: We are also focusing on supporting efforts at the state and local level in California, in Washington State, and in California. CDC issued very strong guidelines for those communities about public activities, large gatherings, schools. And we'll continue simply to follow the data on this and make strong recommendations where we have what's known as "community spread. But for every American, right now, as the President said last night, it's a good time to use common sense. Wash your hands often. Clean, you know, often-used surfaces. All that information is available at Coronavirus.gov. So we're going to try and mitigate the spread in this country but also prevent, through the President's decisive action last night, people from bringing the coronavirus into the United States any further from Europe."

We are encouraging best practices for every American. We are focusing on communities where we have community spread.

"I want to say to your viewers, just as the President said last night, the risk to the average American of contracting the coronavirus remains low, but we do know that seniors with serious underlying chronic health conditions are particularly vulnerable to

AMERICAN OVERSIGHT

very serious outcomes. And so we're encouraging best practices for every American. We're focusing on communities where we have community spread."

Those with a family member who is a senior citizen should support them in engaging in good hygiene and good health practices.

"For any American that's watching today that has a family member or a loved one who's a senior citizen with a serious underlying health condition, this is a very good time to help and to support them to be able to avoid public places, and everyone around them to engage in good hygiene and good practices to protect those that are most vulnerable."

ON CNN's NEW DAY

WATCH HERE ANDHERE.

We have been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear.

"We're not doing a travel ban as our strategy. The suspending all travel for 30 days from Europe is a part of the strategy. The other part is an aggressive mitigation strategy. I spoke to the governors of New York, Washington State, and California tomorrow -- or yesterday. CDC issued strong guidance to those areas where we have community spread. We've flowed resources. We've flowed support to those areas. And so it's a combination of strategies that the President has employed here. As he says, it's "all hands on deck," "a whole-of-government approach," but it's also a whole-of-America approach. We've literally been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to

AMERICAN OVERSIGHT

bear."

Any American who is concerned about being exposed to the coronavirus, should call their doctor and get tested.

"Anyone who's looking on today who might be concerned that they were exposed to coronavirus or have symptoms should call their doctor. Their doctor, with any question, can call their state laboratory and be able to find out how they can have a test processed."

We are making steady progress. We don't want anybody to avoid having a test because they are concerned financially.

"But make no mistake about it: We're making steady progress. We've made changes at the FDA in January, at the President's direction. And the American people can be confident we're going to continue to roll out the test. And maybe most significant on that score is that the President brought health insurance companies in last week and they all agreed to waive the co-pays on testing. We expanded testing to Medicare and Medicaid patients. And we also expanded coverage for treatment, and health insurance companies expanded coverage for treatment. We don't want anybody to avoid having a test because they're concerned financially."

The risk to the average American remains low.

"I want people to know that the risk to contracting the coronavirus, according to all of our experts, for the average American remains low. Most people that contract it, will have flu-like symptoms and recover."

ON CBS This Morning

AMERICAN OVERSIGHT

WATCH HERE.

We aregoing to continue to put in every effort in place to protect the health and safety of the American people.

> "The President took the unprecedented step of suspending all travel from China which was the originating country of this virus. We also established travel advisories, and we've been screening passengers on all direct flights from South Korea and Italy. But with the epicenter of this epidemic now moving from China and South Korea to Europe, yesterday the President again took the unprecedented step of suspending all travel from Europe for the next 30 days, and that in combination with our strong mitigation efforts in communities that are experiencing what our experts call community spread, areas of California, Washington State, and New York, we're going to continue to put every effort at home and with regard to these travel restrictions in place to protect the health and safety of the American people."

Inthe days ahead, we are going to continue to see the availability of tests at your local doctor and your local pharmacy expand.

> "Testing is happening in every state lab in the country. Many university hospitals have taken the FDA test, like the University of Washington, is doing a great job expanding testing capabilities. But the biggest piece on the testing is that our commercial labs that the President brought in last week, companies like Quest and LabCorp, have already had approved a new test that they several days ago had begun to take to market which they can do in a vast and expansive way across the country. And literally in the days ahead, we're going to continue to see the availability of tests at your local doctor, ultimately at your local pharmacy, continue to expand."

When President Trump learned that 70% of the new cases this week, around the world, were in Europe, he took decisive action to protect the American people.

> "Make no mistake about it: All the new cases in the world, this week, 70% of the new cases were in Europe. And the increase has been dramatic. When the President imposed the travel advisory and we began screening all flights, all passengers coming into the United States from Italy two weeks ago, there were roughly 500 coronavirus cases. Now there's 12,000, about 1,000 in Germany, about 1,000 in France. That's the reason why the President essentially said full stop, we're going to suspend all travel, and that American citizens coming home and legal residents will be funneled through 13 different airports. They'll get an initial health screening coming in. But we're going to ask everyone returning to our country to self-quarantine for 14 days."

image004.jpg
image005.jpg
image006.jpg

State and Local Leaders,

On **Thursday, March 12, at 2:00 p.m. Eastern Time**, please join Senior Administration Officials for a briefing call on COVID-19 (coronavirus) regarding President Trump issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries. Additional details can be found below. We will also provide an update on implementing mitigation strategies for communities with local COVID-transmission (A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission).

Briefing Call Registration on 212(f) & Community Mitigation Strategies

- **Date: Today,** Thursday, March 11
- **Time:** 2:00 PM ET (please note time zone)
- **Call-In Registration:CLICK HERE**
- **Note:** You must RSVP to join the call. Upon successful registration, you will receive dial-in details to the email address you use to register. Note that multiple people cannot dial-in using the same registration information.

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

AMERICAN OVERSIGHT

Sincerely,

The White House Office of Intergovernmental Affairs

President Donald J. Trump Has Taken Unprecedented Steps to Respond to The Coronavirus and Protect the Health and Safety Of Americans

"Together we are putting into policy a plan to prevent, detect, treat and create a vaccine against coronavirus to save lives in America and the world. America will get it done!" – President Donald J. Trump

President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf:"Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus.In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

RESTRICTING TRAVEL FROM IMPACTED AREAS: President Donald J. Trump is taking further action to curb the spread of the coronavirus to the United States

AMERICAN OVERSIGHT

from other countries.

- President Trump is issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries.
  - Section 212(f) of the INA only applies to the movement of human beings, not goods or cargo.
- The restriction applies to foreign nationals who have been in the Schengen Area, 26 countries in Europe with open borders agreements, in the last 14 days.
- Those who are exempt from these restrictions, such as American citizens, will be directed to a limited number of airports where screening can take place.
- There is extensive travel back and forth between Europe that heightens the risk here in the United States.

LOOKING OUT FOR AMERICAN BUSINESSES AND WORKERS: President Donald J. Trump is committed to protecting American businesses and workers from the impacts of coronavirus.

- The President is announcing an economic assistance package to help support businesses and workers who have been harmed by this outbreak.
- President Trump has instructed the Small Business Administration (SBA) to exercise available authority to provide loans to businesses affected by the coronavirus.
  - These loans will help overcome disruptions caused by the coronavirus.
  - The President is calling on Congress to increase funding for this program by an additional $50 billion.
- The President will be instructing the Department of the Treasury to defer tax payments for certain individuals and businesses negatively impacted by the coronavirus.
  - This action will provide more than $200 billion of additional liquidity to the economy.
- President Trump is calling on Congress to immediately pass payroll tax relief.
- The President announced that he will soon be taking emergency action to provide financial relief for workers who are ill, quarantined, or caring for others due to the coronavirus.
  - The President also called on Congress to take action to extend this relief for workers.

LEADING AN AGGRESSIVE, WHOLE-OF-GOVERNMENT APPROACH: President Trump has taken unprecedented steps to protect the health of Americans in response to the coronavirus.

- The President is leveraging all of our resources to respond to the coronavirus, bringing together government and private industry in a collaborative response.

AMERICAN OVERSIGHT

- The Trump Administration declared a public health emergency in January to bolster response efforts.
- President Trump took early action to help curb the spread of the virus from other countries to the United States, providing important time for response and preparations.
  - In January, President Trump acted quickly to restrict travel from foreign nationals traveling from China.
  - In February, the President restricted travel for individuals recently traveling from Iran.
  - The Administration put into place mandatory screening for all travelers coming into the country from Italy and South Korea.
  - Travel advisories for severely impacted areas like Italy and South Korea have been raised to their highest level.
- Today, the President directed his Administration to make general-use face masks available to our healthcare workers.
  - The Administration's actions will help make millions of general-use respirators available to keep healthcare workers safe and mitigate transmission of the virus.
- President Trump signed into law more than $8 billion to fund response efforts.
- The Administration has taken bold steps to incentivize the development of therapeutics and vaccines to treat and prevent the spread of the coronavirus.
- Working across the public and private sectors, the Trump Administration continues to drastically expand testing capacity.
  - More than 1 million tests have been distributed nationwide, with another 4 million tests being shipped out by the end of the week.
  - Testing is now available in every State lab in the country and commercial labs are now deploying tests, which will help generate a dramatic increase in availability.
- The Trump Administration has released guidance on how to keep businesses, schools, community gathering places, and families safe.
  - From the start, President Trump has made keeping the public informed a top priority.
- The Administration has announced that health plans with health savings accounts will be able to cover coronavirus testing and treatment without co-payments.

ICYMI| Vice President Pence Discusses the Coronavirus Response on the Morning Shows

Earlier this morning, Vice President Pence joined Good Morning America, The Today Show, Fox & Friends, New Day, and CBS This Morning to discuss the steps that this administration is taking to combat the coronavirus.

AMERICAN OVERSIGHT

ON ABC's GOOD MORNING AMERICA

WATCH HERE.

From very early on, President Trump took decisive action to put the health of the American people first.

> "We all have known from the beginning that the coronavirus would continue to spread across this country, and it's one of the reasons why, from very early on, President Trump took decisive action to put the health of the American people first, not only declaring a public health emergency in January, but in that same month he suspended all travel from China -- an unprecedented move -- and quarantined Americans that were returning from the region. Since that time, George, we've -- we've issued travel advisories for areas of South Korea, Italy; screened all persons coming on direct flights. But, frankly, as we watched the epicenter of the coronavirus shift from China and South Korea to Europe, the President thought it was proper for us to impose a 30-day suspension on all travel from continental Europe."

The President, again, made another unprecedented decision in suspending all travel from Europe, because we want to stop the flow of people bringing the coronavirus here.

> "The reality is that, really, just two weeks ago, in Italy, there were less than 500 cases and now there's 12,000 cases in Italy, George. We have tens of thousands of people that travel to the United States from Europe every day. Seventy percent of new cases in the world were in Europe. And when we looked yesterday at the -- what was then the 35 states where we had cases, about 30 of them could be traced to contacts with Europe. And so the President, again, made another unprecedented decision in suspending all

AMERICAN OVERSIGHT

travel from Europe, because we essentially want -- we essentially want to stop the flow of people bringing the coronavirus here, but then continuing to surge resources, particularly into California, Washington State, New York, and other communities where we've seen community spread. It's a combination of efforts that's being driven by the top health experts in the world on our task force. But the President -- the President showed again yesterday a willingness to take decisive action on multiple levels to protect the American people."

We want to send a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus, you should not be worried about the cost of testing or treatment.

"We're making steady progress. We're going to continue to make a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus or you have symptoms, we don't want people to be worried about the cost of testing, to be worried about the cost of treatment... As the President made clear last night, we're working with Congress and exploring actions the President can take to make sure that hourly wage earners know that you can stay home without risking losing a paycheck or losing your job if you feel if you feel that you've been exposed to the coronavirus."

ON NBC's TODAY SHOW

WATCH HERE.

From early on in this effort, we have addressed the testing issue. We made changes through the FDA that allowed for state labs and hospitals to engage in testing.

"From early on in this effort we've been addressing the testing issue. We made changes

AMERICAN OVERSIGHT

through the FDA that allowed for state labs and university hospitals and hospitals to engage in testing. And I'm pleased to report every state lab in America can do testing now. Many university laboratories are doing it. Washington State – the University of Washington is doing extraordinary work. but we are literally working hour by hour to expand the testing and we think the key Savannah is going to be what we call commercial laboratories like LabCorp and Quest who are already spinning up production at the president's direction last week on tests that can be available on a broad basis in the days ahead for the American people. we're making real progress but rest assured we're going to continue to drive forward."

The American people should know that President Trump has no higher priority than the health, safety and well-being of the American people.

"The American people should know that President Trump has no higher priority than the health and safety and wellbeing of the people in this country. You can go to coronavirus.gov right now to find out what every American can do to keep yourself, your family, your workplace and your school safe. But you can rest assured we're going to focus on communities where we've had community spread, and the President's action yesterday suspending travel from Europe is one more example of how he's putting the health of America first."

ON FOX NEWS' FOX & FRIENDS

WATCH HERE AND HERE.

The President has called this a whole-of-government approach, but he has also called this is a whole-of-America approach.

AMERICAN OVERSIGHT

"The President, you know, he said this was a whole-of-government approach but he also said this is a whole-of-America approach. So he's brought in business leaders from nursing homes; yesterday, banking; hospitals, and the rest. But one of the things we did that's most important on testing was the President brought in the leaders of the top commercial laboratories in the country who, as we speak, have already approved a test that is being spun up. It's being sent out to market. Quest, LabCorp, the largest commercial laboratories in the country, are working very closely with our administration. We're clearing the red tape out of the way. That's going to be the way that, in the days ahead, we're going to -- we're going to have broad-based testing available all across the country."

We are working together to contain the spread of the coronavirus. And we will get through this.

"Our goal, as the coronavirus spreads in this country -- and the vast majority who would contract it will have flu-like symptoms and recover. Our goal nonetheless is to hold down that overall number as much as possible. And we will do that with the continuing cooperation of American families, schools, businesses, and states. And that's the vision President Trump has. All of us working together will get through this."

We are focusing on supporting efforts at the state and local level in Washington State, and in California. CDC issued strong guidelines for those communities about public activities, large gatherings and at schools. We will continue simply to follow the data on this.

"Make no mistake about it: We are also focusing on supporting efforts at the state and local level in California, in Washington State, and in California. CDC issued very strong guidelines for those communities about public activities, large gatherings, schools. And we'll continue simply to follow the data on this and make strong recommendations where we have what's known as "community spread. But for every American, right now, as the President said last night, it's a good time to use common sense. Wash your hands often. Clean, you know, often-used surfaces. All that information is available at Coronavirus.gov. So we're going to try and mitigate the spread in this country but also prevent, through the President's decisive action last night, people from bringing the coronavirus into the United States any further from Europe."

We are encouraging best practices for every American. We are focusing on communities where we have community spread.

"I want to say to your viewers, just as the President said last night, the risk to the average American of contracting the coronavirus remains low, but we do know that seniors with serious underlying chronic health conditions are particularly vulnerable to

AMERICAN OVERSIGHT

very serious outcomes. And so we're encouraging best practices for every American. We're focusing on communities where we have community spread."

Those with a family member who is a senior citizen should support them in engaging in good hygiene and good health practices.

"For any American that's watching today that has a family member or a loved one who's a senior citizen with a serious underlying health condition, this is a very good time to help and to support them to be able to avoid public places, and everyone around them to engage in good hygiene and good practices to protect those that are most vulnerable."

ON CNN's NEW DAY

WATCH HERE ANDHERE.

We have been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear.

"We're not doing a travel ban as our strategy. The suspending all travel for 30 days from Europe is a part of the strategy. The other part is an aggressive mitigation strategy. I spoke to the governors of New York, Washington State, and California tomorrow -- or yesterday. CDC issued strong guidance to those areas where we have community spread. We've flowed resources. We've flowed support to those areas. And so it's a combination of strategies that the President has employed here. As he says, it's "all hands on deck," "a whole-of-government approach," but it's also a whole-of-America approach. We've literally been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to

AMERICAN OVERSIGHT

bear."

Any American who is concerned about being exposed to the coronavirus, should call their doctor and get tested.

"Anyone who's looking on today who might be concerned that they were exposed to coronavirus or have symptoms should call their doctor. Their doctor, with any question, can call their state laboratory and be able to find out how they can have a test processed."

We are making steady progress. We don't want anybody to avoid having a test because they are concerned financially.

"But make no mistake about it: We're making steady progress. We've made changes at the FDA in January, at the President's direction. And the American people can be confident we're going to continue to roll out the test. And maybe most significant on that score is that the President brought health insurance companies in last week and they all agreed to waive the co-pays on testing. We expanded testing to Medicare and Medicaid patients. And we also expanded coverage for treatment, and health insurance companies expanded coverage for treatment. We don't want anybody to avoid having a test because they're concerned financially."

The risk to the average American remains low.

"I want people to know that the risk to contracting the coronavirus, according to all of our experts, for the average American remains low. Most people that contract it, will have flu-like symptoms and recover."

ON CBS This Morning

AMERICAN OVERSIGHT

WATCH HERE.

We aregoing to continue to put in every effort in place to protect the health and safety of the American people.

> "The President took the unprecedented step of suspending all travel from China which was the originating country of this virus. We also established travel advisories, and we've been screening passengers on all direct flights from South Korea and Italy. But with the epicenter of this epidemic now moving from China and South Korea to Europe, yesterday the President again took the unprecedented step of suspending all travel from Europe for the next 30 days, and that in combination with our strong mitigation efforts in communities that are experiencing what our experts call community spread, areas of California, Washington State, and New York, we're going to continue to put every effort at home and with regard to these travel restrictions in place to protect the health and safety of the American people."

Inthe days ahead, we are going to continue to see the availability of tests at your local doctor and your local pharmacy expand.

> "Testing is happening in every state lab in the country. Many university hospitals have taken the FDA test, like the University of Washington, is doing a great job expanding testing capabilities. But the biggest piece on the testing is that our commercial labs that the President brought in last week, companies like Quest and LabCorp, have already had approved a new test that they several days ago had begun to take to market which they can do in a vast and expansive way across the country. And literally in the days ahead, we're going to continue to see the availability of tests at your local doctor, ultimately at your local pharmacy, continue to expand."

When President Trump learned that 70% of the new cases this week, around the world, were in Europe, he took decisive action to protect the American people.

> "Make no mistake about it: All the new cases in the world, this week, 70% of the new cases were in Europe. And the increase has been dramatic. When the President imposed the travel advisory and we began screening all flights, all passengers coming into the United States from Italy two weeks ago, there were roughly 500 coronavirus cases. Now there's 12,000, about 1,000 in Germany, about 1,000 in France. That's the reason why the President essentially said full stop, we're going to suspend all travel, and that American citizens coming home and legal residents will be funneled through 13 different airports. They'll get an initial health screening coming in. But we're going to ask everyone returning to our country to self-quarantine for 14 days."

President Donald J. Trump Has Taken Unprecedented Steps to Respond to The Coronavirus and Protect the Health and Safety Of Americans

"Together we are putting into policy a plan to prevent, detect, treat and create a vaccine

AMERICAN OVERSIGHT

against coronavirus to save lives in America and the world. America will get it done!" – President Donald J. Trump

President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf: "Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus. In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

RESTRICTING TRAVEL FROM IMPACTED AREAS: President Donald J. Trump is taking further action to curb the spread of the coronavirus to the United States from other countries.

- President Trump is issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries.
  - Section 212(f) of the INA only applies to the movement of human beings, not goods or cargo.
- The restriction applies to foreign nationals who have been in the Schengen Area, 26 countries in Europe with open borders agreements, in the last 14 days.
- Those who are exempt from these restrictions, such as American citizens, will be directed to a limited number of airports where screening can take place.
- There is extensive travel back and forth between Europe that heightens the risk here in the United States.

LOOKING OUT FOR AMERICAN BUSINESSES AND WORKERS: President Donald J. Trump is committed to protecting American businesses and workers from the impacts of coronavirus.

- The President is announcing an economic assistance package to help support businesses and workers who have been harmed by this outbreak.
- President Trump has instructed the Small Business Administration (SBA) to exercise available authority to provide loans to businesses affected by the coronavirus.
  - These loans will help overcome disruptions caused by the coronavirus.
  - The President is calling on Congress to increase funding for this program by an additional $50 billion.
- The President will be instructing the Department of the Treasury to defer tax payments

AMERICAN OVERSIGHT

for certain individuals and businesses negatively impacted by the coronavirus.
  - This action will provide more than $200 billion of additional liquidity to the economy.
- President Trump is calling on Congress to immediately pass payroll tax relief.
- The President announced that he will soon be taking emergency action to provide financial relief for workers who are ill, quarantined, or caring for others due to the coronavirus.
  - The President also called on Congress to take action to extend this relief for workers.

LEADING AN AGGRESSIVE, WHOLE-OF-GOVERNMENT APPROACH: President Trump has taken unprecedented steps to protect the health of Americans in response to the coronavirus.

- The President is leveraging all of our resources to respond to the coronavirus, bringing together government and private industry in a collaborative response.
- The Trump Administration declared a public health emergency in January to bolster response efforts.
- President Trump took early action to help curb the spread of the virus from other countries to the United States, providing important time for response and preparations.
  - In January, President Trump acted quickly to restrict travel from foreign nationals traveling from China.
  - In February, the President restricted travel for individuals recently traveling from Iran.
  - The Administration put into place mandatory screening for all travelers coming into the country from Italy and South Korea.
  - Travel advisories for severely impacted areas like Italy and South Korea have been raised to their highest level.
- Today, the President directed his Administration to make general-use face masks available to our healthcare workers.
  - The Administration's actions will help make millions of general-use respirators available to keep healthcare workers safe and mitigate transmission of the virus.
- President Trump signed into law more than $8 billion to fund response efforts.
- The Administration has taken bold steps to incentivize the development of therapeutics and vaccines to treat and prevent the spread of the coronavirus.
- Working across the public and private sectors, the Trump Administration continues to drastically expand testing capacity.
  - More than 1 million tests have been distributed nationwide, with another 4 million tests being shipped out by the end of the week.
  - Testing is now available in every State lab in the country and commercial labs are now deploying tests, which will help generate a dramatic increase in availability.
- The Trump Administration has released guidance on how to keep businesses, schools, community gathering places, and families safe.
  - From the start, President Trump has made keeping the public informed a top priority.
- The Administration has announced that health plans with health savings accounts will be able to cover coronavirus testing and treatment without co-payments.

ICYMI | Vice President Pence Discusses the Coronavirus Response on the Morning Shows

AMERICAN OVERSIGHT

Earlier this morning, Vice President Pence joined Good Morning America, The Today Show, Fox & Friends, New Day, and CBS This Morning to discuss the steps that this administration is taking to combat the coronavirus.

ON ABC's GOOD MORNING AMERICA

WATCH HERE.

From very early on, President Trump took decisive action to put the health of the American people first.

> "We all have known from the beginning that the coronavirus would continue to spread across this country, and it's one of the reasons why, from very early on, President Trump took decisive action to put the health of the American people first, not only declaring a public health emergency in January, but in that same month he suspended all travel from China -- an unprecedented move -- and quarantined Americans that were returning from the region. Since that time, George, we've -- we've issued travel advisories for areas of South Korea, Italy; screened all persons coming on direct flights. But, frankly, as we watched the epicenter of the coronavirus shift from China and South Korea to Europe, the President thought it was proper for us to impose a 30-day suspension on all travel from continental Europe."

The President, again, made another unprecedented decision in suspending all travel from Europe, because we want to stop the flow of people bringing the coronavirus here.

> "The reality is that, really, just two weeks ago, in Italy, there were less than 500 cases and now there's 12,000 cases in Italy, George. We have tens of thousands of people that travel to the United States from Europe every day. Seventy percent of new cases in the world were in Europe. And when we looked yesterday at the -- what was then the 35 states where we had cases, about 30 of them could be traced to contacts with Europe. And so the President, again, made another unprecedented decision in suspending all travel from Europe, because we essentially want -- we essentially want to stop the flow of people bringing the coronavirus here, but then continuing to surge resources, particularly into California, Washington State, New York, and other communities where we've seen community spread. It's a combination of efforts that's being driven by the top health experts in the world on

AMERICAN OVERSIGHT

our task force. But the President -- the President showed again yesterday a willingness to take decisive action on multiple levels to protect the American people."

We want to send a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus, you should not be worried about the cost of testing or treatment.

"We're making steady progress. We're going to continue to make a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus or you have symptoms, we don't want people to be worried about the cost of testing, to be worried about the cost of treatment... As the President made clear last night, we're working with Congress and exploring actions the President can take to make sure that hourly wage earners know that you can stay home without risking losing a paycheck or losing your job if you feel if you feel that you've been exposed to the coronavirus."

ON NBC's TODAY SHOW

WATCH HERE.

From early on in this effort, we have addressed the testing issue. We made changes through the FDA that allowed for state labs and hospitals to engage in testing.

"From early on in this effort we've been addressing the testing issue. We made changes through the FDA that allowed for state labs and university hospitals and hospitals to engage in testing. And I'm pleased to report every state lab in America can do testing now. Many university laboratories are doing it. Washington State – the University of Washington is doing extraordinary work. but we are literally working hour by hour to expand the testing and we think the key Savannah is going to be what we call commercial laboratories like LabCorp and Quest who are already spinning up production at the president's direction last week on tests that can be available on a broad basis in the days ahead for the American people. we're making real progress but rest assured we're going to continue to drive forward."

The American people should know that President Trump has no higher priority than the health, safety and well-being of the American people.

AMERICAN OVERSIGHT

"The American people should know that President Trump has no higher priority than the health and safety and wellbeing of the people in this country. You can go to coronavirus.gov right now to find out what every American can do to keep yourself, your family, your workplace and your school safe. But you can rest assured we're going to focus on communities where we've had community spread, and the President's action yesterday suspending travel from Europe is one more example of how he's putting the health of America first."

ON FOX NEWS' FOX & FRIENDS

WATCH HERE AND HERE.

The President has called this a whole-of-government approach, but he has also called this is a whole-of-America approach.

"The President, you know, he said this was a whole-of-government approach but he also said this is a whole-of-America approach. So he's brought in business leaders from nursing homes; yesterday, banking; hospitals, and the rest. But one of the things we did that's most important on testing was the President brought in the leaders of the top commercial laboratories in the country who, as we speak, have already approved a test that is being spun up. It's being sent out to market. Quest, LabCorp, the largest commercial laboratories in the country, are working very closely with our administration. We're clearing the red tape out of the way. That's going to be the way that, in the days ahead, we're going to -- we're going to have broad-based testing available all across the country."

We are working together to contain the spread of the coronavirus. And we will get through this.

"Our goal, as the coronavirus spreads in this country -- and the vast majority who would contract it will have flu-like symptoms and recover. Our goal nonetheless is to hold down that overall number as much as possible. And we will do that with the continuing cooperation of American families, schools, businesses, and states. And that's the vision President Trump has. All of us working together will get through this."

We are focusing on supporting efforts at the state and local level in Washington State, and in California. CDC issued strong guidelines for those

AMERICAN OVERSIGHT

communities about public activities, large gatherings and at schools. We will continue simply to follow the data on this.

> "Make no mistake about it: We are also focusing on supporting efforts at the state and local level in California, in Washington State, and in California. CDC issued very strong guidelines for those communities about public activities, large gatherings, schools. And we'll continue simply to follow the data on this and make strong recommendations where we have what's known as "community spread. But for every American, right now, as the President said last night, it's a good time to use common sense. Wash your hands often. Clean, you know, often-used surfaces. All that information is available at Coronavirus.gov. So we're going to try and mitigate the spread in this country but also prevent, through the President's decisive action last night, people from bringing the coronavirus into the United States any further from Europe."

We are encouraging best practices for every American. We are focusing on communities where we have community spread.

> "I want to say to your viewers, just as the President said last night, the risk to the average American of contracting the coronavirus remains low, but we do know that seniors with serious underlying chronic health conditions are particularly vulnerable to very serious outcomes. And so we're encouraging best practices for every American. We're focusing on communities where we have community spread."

Those with a family member who is a senior citizen should support them in engaging in good hygiene and good health practices.

> "For any American that's watching today that has a family member or a loved one who's a senior citizen with a serious underlying health condition, this is a very good time to help and to support them to be able to avoid public places, and everyone around them to engage in good hygiene and good practices to protect those that are most vulnerable."

ON CNN's NEW DAY

WATCH HERE AND HERE.

We have been meeting with industry leaders in one relevant industry after

AMERICAN OVERSIGHT

another to ensure that the full resources of America are being brought to bear.

> "We're not doing a travel ban as our strategy. The suspending all travel for 30 days from Europe is a part of the strategy. The other part is an aggressive mitigation strategy. I spoke to the governors of New York, Washington State, and California tomorrow -- or yesterday. CDC issued strong guidance to those areas where we have community spread. We've flowed resources. We've flowed support to those areas. And so it's a combination of strategies that the President has employed here. As he says, it's "all hands on deck," "a whole-of-government approach," but it's also a whole-of-America approach. We've literally been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear."

Any American who is concerned about being exposed to the coronavirus, should call their doctor and get tested.

> "Anyone who's looking on today who might be concerned that they were exposed to coronavirus or have symptoms should call their doctor. Their doctor, with any question, can call their state laboratory and be able to find out how they can have a test processed."

We are making steady progress. We don't want anybody to avoid having a test because they are concerned financially.

> "But make no mistake about it: We're making steady progress. We've made changes at the FDA in January, at the President's direction. And the American people can be confident we're going to continue to roll out the test. And maybe most significant on that score is that the President brought health insurance companies in last week and they all agreed to waive the co-pays on testing. We expanded testing to Medicare and Medicaid patients. And we also expanded coverage for treatment, and health insurance companies expanded coverage for treatment. We don't want anybody to avoid having a test because they're concerned financially."

The risk to the average American remains low.

> "I want people to know that the risk to contracting the coronavirus, according to all of our experts, for the average American remains low. Most people that contract it, will have flu-like symptoms and recover."

<u>ON CBS This Morning</u>

AMERICAN OVERSIGHT

WATCH HERE.

We are going to continue to put in every effort in place to protect the health and safety of the American people.

> "The President took the unprecedented step of suspending all travel from China which was the originating country of this virus. We also established travel advisories, and we've been screening passengers on all direct flights from South Korea and Italy. But with the epicenter of this epidemic now moving from China and South Korea to Europe, yesterday the President again took the unprecedented step of suspending all travel from Europe for the next 30 days, and that in combination with our strong mitigation efforts in communities that are experiencing what our experts call community spread, areas of California, Washington State, and New York, we're going to continue to put every effort at home and with regard to these travel restrictions in place to protect the health and safety of the American people."

In the days ahead, we are going to continue to see the availability of tests at your local doctor and your local pharmacy expand.

> "Testing is happening in every state lab in the country. Many university hospitals have taken the FDA test, like the University of Washington, is doing a great job expanding testing capabilities. But the biggest piece on the testing is that our commercial labs that the President brought in last week, companies like Quest and LabCorp, have already had approved a new test that they several days ago had begun to take to market which they can do in a vast and expansive way across the country. And literally in the days ahead, we're going to continue to see the availability of tests at your local doctor, ultimately at your local pharmacy, continue to expand."

When President Trump learned that 70% of the new cases this week, around the world, were in Europe, he took decisive action to protect the American people.

> "Make no mistake about it: All the new cases in the world, this week, 70% of the new cases were in Europe. And the increase has been dramatic. When the President imposed the travel advisory and we began screening all flights, all passengers coming into the United States from Italy two weeks ago, there were roughly 500 coronavirus cases. Now there's 12,000, about 1,000 in Germany, about 1,000 in France. That's the reason why the President essentially said full stop, we're going to

AMERICAN OVERSIGHT

suspend all travel, and that American citizens coming home and legal residents will be funneled through 13 different airports. They'll get an initial health screening coming in. But we're going to ask everyone returning to our country to self-quarantine for 14 days."

State and Local Leaders,

On **Thursday, March 12, at 2:00 p.m. Eastern Time**, please join Senior Administration Officials for a briefing call on COVID-19 (coronavirus) regarding President Trump issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries. Additional details can be found below. We will also provide an update on implementing mitigation strategies for communities with local COVID-transmission (A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission).

Briefing Call Registration on 212(f) & Community Mitigation Strategies

- **Date: Today,** Thursday, March 11
- **Time:** 2:00 PM ET (please note time zone)
- **Call-In Registration**: **CLICK HERE**
- **Note:** You must RSVP to join the call. Upon successful registration, you will receive dial-in details to the email address you use to register. Note that multiple people cannot dial-in using the same registration information.

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

Sincerely,
Zach

President Donald J. Trump Has Taken Unprecedented Steps to Respond to The Coronavirus and Protect the Health and Safety Of Americans

"Together we are putting into policy a plan to prevent, detect, treat and create a vaccine

AMERICAN OVERSIGHT

against coronavirus to save lives in America and the world. America will get it done!" – President Donald J. Trump

President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf: "Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus. In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

RESTRICTING TRAVEL FROM IMPACTED AREAS: President Donald J. Trump is taking further action to curb the spread of the coronavirus to the United States from other countries.

- President Trump is issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries.
  - Section 212(f) of the INA only applies to the movement of human beings, not goods or cargo.
- The restriction applies to foreign nationals who have been in the Schengen Area, 26 countries in Europe with open borders agreements, in the last 14 days.
- Those who are exempt from these restrictions, such as American citizens, will be directed to a limited number of airports where screening can take place.
- There is extensive travel back and forth between Europe that heightens the risk here in the United States.

LOOKING OUT FOR AMERICAN BUSINESSES AND WORKERS: President Donald J. Trump is committed to protecting American businesses and workers from the impacts of coronavirus.

- The President is announcing an economic assistance package to help support businesses and workers who have been harmed by this outbreak.
- President Trump has instructed the Small Business Administration (SBA) to exercise available authority to provide loans to businesses affected by the coronavirus.
  - These loans will help overcome disruptions caused by the coronavirus.
  - The President is calling on Congress to increase funding for this program by an additional $50 billion.
- The President will be instructing the Department of the Treasury to defer tax payments

AMERICAN OVERSIGHT

for certain individuals and businesses negatively impacted by the coronavirus.
  - This action will provide more than $200 billion of additional liquidity to the economy.
- President Trump is calling on Congress to immediately pass payroll tax relief.
- The President announced that he will soon be taking emergency action to provide financial relief for workers who are ill, quarantined, or caring for others due to the coronavirus.
  - The President also called on Congress to take action to extend this relief for workers.

LEADING AN AGGRESSIVE, WHOLE-OF-GOVERNMENT APPROACH: President Trump has taken unprecedented steps to protect the health of Americans in response to the coronavirus.

- The President is leveraging all of our resources to respond to the coronavirus, bringing together government and private industry in a collaborative response.
- The Trump Administration declared a public health emergency in January to bolster response efforts.
- President Trump took early action to help curb the spread of the virus from other countries to the United States, providing important time for response and preparations.
  - In January, President Trump acted quickly to restrict travel from foreign nationals traveling from China.
  - In February, the President restricted travel for individuals recently traveling from Iran.
  - The Administration put into place mandatory screening for all travelers coming into the country from Italy and South Korea.
  - Travel advisories for severely impacted areas like Italy and South Korea have been raised to their highest level.
- Today, the President directed his Administration to make general-use face masks available to our healthcare workers.
  - The Administration's actions will help make millions of general-use respirators available to keep healthcare workers safe and mitigate transmission of the virus.
- President Trump signed into law more than $8 billion to fund response efforts.
- The Administration has taken bold steps to incentivize the development of therapeutics and vaccines to treat and prevent the spread of the coronavirus.
- Working across the public and private sectors, the Trump Administration continues to drastically expand testing capacity.
  - More than 1 million tests have been distributed nationwide, with another 4 million tests being shipped out by the end of the week.
  - Testing is now available in every State lab in the country and commercial labs are now deploying tests, which will help generate a dramatic increase in availability.
- The Trump Administration has released guidance on how to keep businesses, schools, community gathering places, and families safe.
  - From the start, President Trump has made keeping the public informed a top priority.
- The Administration has announced that health plans with health savings accounts will be able to cover coronavirus testing and treatment without co-payments.

ICYMI | Vice President Pence Discusses the Coronavirus Response on the Morning Shows

AMERICAN OVERSIGHT

Earlier this morning, Vice President Pence joined Good Morning America, The Today Show, Fox & Friends, New Day, and CBS This Morning to discuss the steps that this administration is taking to combat the coronavirus.

ON ABC's GOOD MORNING AMERICA

WATCH HERE.

From very early on, President Trump took decisive action to put the health of the American people first.

> "We all have known from the beginning that the coronavirus would continue to spread across this country, and it's one of the reasons why, from very early on, President Trump took decisive action to put the health of the American people first, not only declaring a public health emergency in January, but in that same month he suspended all travel from China -- an unprecedented move -- and quarantined Americans that were returning from the region. Since that time, George, we've -- we've issued travel advisories for areas of South Korea, Italy; screened all persons coming on direct flights. But, frankly, as we watched the epicenter of the coronavirus shift from China and South Korea to Europe, the President thought it was proper for us to impose a 30-day suspension on all travel from continental Europe."

The President, again, made another unprecedented decision in suspending all travel from Europe, because we want to stop the flow of people bringing the coronavirus here.

> "The reality is that, really, just two weeks ago, in Italy, there were less than 500 cases and now there's 12,000 cases in Italy, George. We have tens of thousands of people that travel to the United States from Europe every day. Seventy percent of new cases in the world were in Europe. And when we looked yesterday at the -- what was then the 35 states where we had cases, about 30 of them could be traced to contacts with Europe. And so the President, again, made another unprecedented decision in suspending all travel from Europe, because we essentially want -- we essentially want to stop the flow of people bringing the coronavirus here, but then continuing to surge resources, particularly into California, Washington State, New York, and other communities where we've seen community spread. It's a combination of efforts that's being driven by the top health experts in the world on

AMERICAN OVERSIGHT

our task force. But the President -- the President showed again yesterday a willingness to take decisive action on multiple levels to protect the American people."

We want to send a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus, you should not be worried about the cost of testing or treatment.

"We're making steady progress. We're going to continue to make a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus or you have symptoms, we don't want people to be worried about the cost of testing, to be worried about the cost of treatment... As the President made clear last night, we're working with Congress and exploring actions the President can take to make sure that hourly wage earners know that you can stay home without risking losing a paycheck or losing your job if you feel if you feel that you've been exposed to the coronavirus."

ON NBC's TODAY SHOW

WATCH HERE.

From early on in this effort, we have addressed the testing issue. We made changes through the FDA that allowed for state labs and hospitals to engage in testing.

"From early on in this effort we've been addressing the testing issue. We made changes through the FDA that allowed for state labs and university hospitals and hospitals to engage in testing. And I'm pleased to report every state lab in America can do testing now. Many university laboratories are doing it. Washington State – the University of Washington is doing extraordinary work. but we are literally working hour by hour to expand the testing and we think the key Savannah is going to be what we call commercial laboratories like LabCorp and Quest who are already spinning up production at the president's direction last week on tests that can be available on a broad basis in the days ahead for the American people. we're making real progress but rest assured we're going to continue to drive forward."

The American people should know that President Trump has no higher priority than the health, safety and well-being of the American people.

President Donald J. Trump Has Taken Unprecedented Steps to Respond to The Coronavirus and Protect the Health and Safety Of Americans

"Together we are putting into policy a plan to prevent, detect, treat and create a vaccine against coronavirus to save lives in America and the world. America will get it done!" – President Donald J. Trump

President Donald J. Trump signed a Presidential Proclamation, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.

Statement from DHS Acting Secretary Chad F. Wolf: "Protecting the American people from threats to their safety is the most important job of the President of the United States. The actions President Trump is taking to deny entry to foreign nationals who have been in affected areas will keep Americans safe and save American lives. I applaud the president for making this tough but necessary decision. While these new travel restrictions will be disruptive to some travelers, this decisive action is needed to protect the American public from further exposure to the potentially deadly coronavirus. In January and February, the Administration issued similar travel restrictions on individuals who had been in China and Iran. That action proved to be effective in slowing the spread of the virus to the U.S., while public health officials prepared. In the next 48 hours, in the interest of public health, I intend to issue a supplemental Notice of Arrivals Restriction requiring U.S. passengers that have been in the Schengen Area to travel through select airports where the U.S. Government has implemented enhanced screening procedures."

RESTRICTING TRAVEL FROM IMPACTED AREAS: President Donald J. Trump is taking further action to curb the spread of the coronavirus to the United States from other countries.

- President Trump is issuing a proclamation under section 212(f) of the Immigration and Nationality Act (INA) to restrict travel to the United States from foreign nationals who have recently been in certain European countries.
    - Section 212(f) of the INA only applies to the movement of human beings, not goods or cargo.
- The restriction applies to foreign nationals who have been in the Schengen Area, 26 countries in Europe with open borders agreements, in the last 14 days.

AMERICAN OVERSIGHT

- Those who are exempt from these restrictions, such as American citizens, will be directed to a limited number of airports where screening can take place.
- There is extensive travel back and forth between Europe that heightens the risk here in the United States.

LOOKING OUT FOR AMERICAN BUSINESSES AND WORKERS: President Donald J. Trump is committed to protecting American businesses and workers from the impacts of coronavirus.

- The President is announcing an economic assistance package to help support businesses and workers who have been harmed by this outbreak.

- President Trump has instructed the Small Business Administration (SBA) to exercise available authority to provide loans to businesses affected by the coronavirus.
    - These loans will help overcome disruptions caused by the coronavirus.
    - The President is calling on Congress to increase funding for this program by an additional $50 billion.
- The President will be instructing the Department of the Treasury to defer tax payments for certain individuals and businesses negatively impacted by the coronavirus.
    - This action will provide more than $200 billion of additional liquidity to the economy.
- President Trump is calling on Congress to immediately pass payroll tax relief.
- The President announced that he will soon be taking emergency action to provide financial relief for workers who are ill, quarantined, or caring for others due to the coronavirus.
    - The President also called on Congress to take action to extend this relief for workers.

LEADING AN AGGRESSIVE, WHOLE-OF-GOVERNMENT APPROACH: President Trump has taken unprecedented steps to protect the health of Americans in response to the coronavirus.

- The President is leveraging all of our resources to respond to the coronavirus, bringing together government and private industry in a collaborative response.
- The Trump Administration declared a public health emergency in January to bolster response efforts.
- President Trump took early action to help curb the spread of the virus from other countries to the United States, providing important time for response and preparations.
    - In January, President Trump acted quickly to restrict travel from foreign nationals traveling from China.
    - In February, the President restricted travel for individuals recently

AMERICAN OVERSIGHT

traveling from Iran.
    - The Administration put into place mandatory screening for all travelers coming into the country from Italy and South Korea.
    - Travel advisories for severely impacted areas like Italy and South Korea have been raised to their highest level.
- Today, the President directed his Administration to make general-use face masks available to our healthcare workers.
    - The Administration's actions will help make millions of general-use respirators available to keep healthcare workers safe and mitigate transmission of the virus.
- President Trump signed into law more than $8 billion to fund response efforts.
- The Administration has taken bold steps to incentivize the development of therapeutics and vaccines to treat and prevent the spread of the coronavirus.
- Working across the public and private sectors, the Trump Administration continues to drastically expand testing capacity.
    - More than 1 million tests have been distributed nationwide, with another 4 million tests being shipped out by the end of the week.
    - Testing is now available in every State lab in the country and commercial labs are now deploying tests, which will help generate a dramatic increase in availability.
- The Trump Administration has released guidance on how to keep businesses, schools, community gathering places, and families safe.
    - From the start, President Trump has made keeping the public informed a top priority.
- The Administration has announced that health plans with health savings accounts will be able to cover coronavirus testing and treatment without co-payments.

ICYMI | Vice President Pence Discusses the Coronavirus Response on the Morning Shows

Earlier this morning, Vice President Pence joined Good Morning America, The Today Show, Fox & Friends, New Day, and CBS This Morning to discuss the steps that this administration is taking to combat the coronavirus.

ON ABC's GOOD MORNING AMERICA

AMERICAN OVERSIGHT

WATCH HERE.

From very early on, President Trump took decisive action to put the health of the American people first.

> "We all have known from the beginning that the coronavirus would continue to spread across this country, and it's one of the reasons why, from very early on, President Trump took decisive action to put the health of the American people first, not only declaring a public health emergency in January, but in that same month he suspended all travel from China -- an unprecedented move -- and quarantined Americans that were returning from the region. Since that time, George, we've -- we've issued travel advisories for areas of South Korea, Italy; screened all persons coming on direct flights. But, frankly, as we watched the epicenter of the coronavirus shift from China and South Korea to Europe, the President thought it was proper for us to impose a 30-day suspension on all travel from continental Europe."

The President, again, made another unprecedented decision in suspending all travel from Europe, because we want to stop the flow of people bringing the coronavirus here.

> "The reality is that, really, just two weeks ago, in Italy, there were less than 500 cases and now there's 12,000 cases in Italy, George. We have tens of thousands of people that travel to the United States from Europe every day. Seventy percent of new cases in the world were in Europe. And when we looked yesterday at the -- what was then the 35 states where we had cases, about 30 of them could be traced to contacts with Europe. And so the President, again, made another unprecedented decision in suspending all travel from Europe, because we essentially want -- we essentially want to stop the flow of people bringing the coronavirus here, but then continuing to surge resources, particularly into California, Washington State, New York, and other communities where we've seen community spread. It's a combination of efforts that's being driven by the top health experts in the world on our task force. But the President -- the President showed again yesterday a willingness to take decisive action on multiple levels to protect the American

AMERICAN OVERSIGHT

people."

We want to send a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus, you should not be worried about the cost of testing or treatment.

> "We're making steady progress. We're going to continue to make a very clear message to Americans that if for any reason you believe you've been exposed to the coronavirus or you have symptoms, we don't want people to be worried about the cost of testing, to be worried about the cost of treatment... As the President made clear last night, we're working with Congress and exploring actions the President can take to make sure that hourly wage earners know that you can stay home without risking losing a paycheck or losing your job if you feel if you feel that you've been exposed to the coronavirus."

ON NBC's TODAY SHOW

WATCH HERE.

From early on in this effort, we have addressed the testing issue. We made changes through the FDA that allowed for state labs and hospitals to engage in testing.

> "From early on in this effort we've been addressing the testing issue. We made changes through the FDA that allowed for state labs and university hospitals and hospitals to engage in testing. And I'm pleased to report every state lab in America can do testing now. Many university laboratories are doing it. Washington State – the University of Washington is doing extraordinary work. but we are literally working hour by hour to expand the testing and we think the key Savannah is going to be what we call commercial laboratories like LabCorp and Quest who are already spinning up production at the president's direction last week on tests that can be available on a broad basis in the days ahead for the American people. we're making real progress but rest assured we're going to continue to drive forward."

The American people should know that President Trump has no

AMERICAN OVERSIGHT

higher priority than the health, safety and well-being of the American people.

> "The American people should know that President Trump has no higher priority than the health and safety and wellbeing of the people in this country. You can go to coronavirus.gov right now to find out what every American can do to keep yourself, your family, your workplace and your school safe. But you can rest assured we're going to focus on communities where we've had community spread, and the President's action yesterday suspending travel from Europe is one more example of how he's putting the health of America first."

ON FOX NEWS' FOX & FRIENDS

WATCH HERE AND HERE.

The President has called this a whole-of-government approach, but he has also called this is a whole-of-America approach.

> "The President, you know, he said this was a whole-of-government approach but he also said this is a whole-of-America approach. So he's brought in business leaders from nursing homes; yesterday, banking; hospitals, and the rest. But one of the things we did that's most important on testing was the President brought in the leaders of the top commercial laboratories in the country who, as we speak, have already approved a test that is being spun up. It's being sent out to market. Quest, LabCorp, the largest commercial laboratories in the country, are working very closely with our administration. We're clearing the red tape out of the way. That's going to be the way that, in the days ahead, we're going to -- we're going to have broad-based testing available all across the country."

We are working together to contain the spread of the coronavirus. And we will get through this.

> "Our goal, as the coronavirus spreads in this country -- and the vast majority who would contract it will have flu-like symptoms and recover. Our goal nonetheless is to hold down that overall number as much as

AMERICAN OVERSIGHT

possible. And we will do that with the continuing cooperation of American families, schools, businesses, and states. And that's the vision President Trump has. All of us working together will get through this."

We are focusing on supporting efforts at the state and local level in Washington State, and in California. CDC issued strong guidelines for those communities about public activities, large gatherings and at schools. We will continue simply to follow the data on this.

"Make no mistake about it: We are also focusing on supporting efforts at the state and local level in California, in Washington State, and in California. CDC issued very strong guidelines for those communities about public activities, large gatherings, schools. And we'll continue simply to follow the data on this and make strong recommendations where we have what's known as "community spread. But for every American, right now, as the President said last night, it's a good time to use common sense. Wash your hands often. Clean, you know, often-used surfaces. All that information is available at Coronavirus.gov. So we're going to try and mitigate the spread in this country but also prevent, through the President's decisive action last night, people from bringing the coronavirus into the United States any further from Europe."

We are encouraging best practices for every American. We are focusing on communities where we have community spread.

"I want to say to your viewers, just as the President said last night, the risk to the average American of contracting the coronavirus remains low, but we do know that seniors with serious underlying chronic health conditions are particularly vulnerable to very serious outcomes. And so we're encouraging best practices for every American. We're focusing on communities where we have community spread."

Those with a family member who is a senior citizen should support them in engaging in good hygiene and good health practices.

"For any American that's watching today that has a family member or a loved one who's a senior citizen with a serious underlying health condition, this is a very good time to help and to support them to be able to avoid public places, and everyone around them to engage in good hygiene and good practices to protect those that are most vulnerable."

ON CNN's NEW DAY

AMERICAN OVERSIGHT

WATCH HERE AND HERE.

We have been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear.

> "We're not doing a travel ban as our strategy. The suspending all travel for 30 days from Europe is a part of the strategy. The other part is an aggressive mitigation strategy. I spoke to the governors of New York, Washington State, and California tomorrow -- or yesterday. CDC issued strong guidance to those areas where we have community spread. We've flowed resources. We've flowed support to those areas. And so it's a combination of strategies that the President has employed here. As he says, it's "all hands on deck," "a whole-of-government approach," but it's also a whole-of-America approach. We've literally been meeting with industry leaders in one relevant industry after another to ensure that the full resources of America are being brought to bear."

Any American who is concerned about being exposed to the coronavirus, should call their doctor and get tested.

> "Anyone who's looking on today who might be concerned that they were exposed to coronavirus or have symptoms should call their doctor. Their doctor, with any question, can call their state laboratory and be able to find out how they can have a test processed."

We are making steady progress. We don't want anybody to avoid having a test because they are concerned financially.

> "But make no mistake about it: We're making steady progress. We've made changes at the FDA in January, at the President's direction. And the American people can be confident we're going to continue to roll out the test. And maybe most significant on that score is that the President brought health insurance companies in last week and they all agreed to waive the co-pays on testing. We expanded testing to Medicare and Medicaid patients. And we also expanded coverage for treatment, and health insurance companies expanded coverage for treatment. We don't

AMERICAN OVERSIGHT

want anybody to avoid having a test because they're concerned financially."

The risk to the average American remains low.

"I want people to know that the risk to contracting the coronavirus, according to all of our experts, for the average American remains low. Most people that contract it, will have flu-like symptoms and recover."

ON CBS This Morning

WATCH HERE.

We are going to continue to put in every effort in place to protect the health and safety of the American people.

"The President took the unprecedented step of suspending all travel from China which was the originating country of this virus. We also established travel advisories, and we've been screening passengers on all direct flights from South Korea and Italy. But with the epicenter of this epidemic now moving from China and South Korea to Europe, yesterday the President again took the unprecedented step of suspending all travel from Europe for the next 30 days, and that in combination with our strong mitigation efforts in communities that are experiencing what our experts call community spread, areas of California, Washington State, and New York, we're going to continue to put every effort at home and with regard to these travel restrictions in place to protect the health and safety of the American people."

In the days ahead, we are going to continue to see the availability of tests at your local doctor and your local pharmacy expand.

"Testing is happening in every state lab in the country. Many university hospitals have taken the FDA test, like the University of Washington, is doing a great job expanding testing capabilities. But the biggest piece on the testing is that our commercial labs that the President brought in last week, companies like Quest and LabCorp, have already had approved a new test that they several days ago had begun to take to market which

AMERICAN OVERSIGHT

> they can do in a vast and expansive way across the country. And literally in the days ahead, we're going to continue to see the availability of tests at your local doctor, ultimately at your local pharmacy, continue to expand."

When President Trump learned that 70% of the new cases this week, around the world, were in Europe, he took decisive action to protect the American people.

> "Make no mistake about it: All the new cases in the world, this week, 70% of the new cases were in Europe. And the increase has been dramatic. When the President imposed the travel advisory and we began screening all flights, all passengers coming into the United States from Italy two weeks ago, there were roughly 500 coronavirus cases. Now there's 12,000, about 1,000 in Germany, about 1,000 in France. That's the reason why the President essentially said full stop, we're going to suspend all travel, and that American citizens coming home and legal residents will be funneled through 13 different airports. They'll get an initial health screening coming in. But we're going to ask everyone returning to our country to self-quarantine for 14 days."

THE WHITE HOUSE

State and Local Leaders,

Please join Senior Administration Officials for a briefing call on COVID-19 preparedness, response, and mitigation efforts **TONIGHT (Friday, March 13) at 7:30 p.m. Eastern Time.**

Important Note: Call-in lines will be limited due to quick around to setting up the briefing call. State and local leaders (especially staff) working in the same office are encouraged to dial-in using one call-in line to maximize the number of people who can join *(e.g., governors staff in the same location are encouraged to call-in using one call-in registration).*

Briefing Call Registration

- **Date:** TODAY, Friday, March 13
- **Time:** 7:30 p.m. Eastern Time (please note time zone)
- **Call-In Registration**: CLICK HERE
- **Note:** You must RSVP to join the call. Upon successful registration, you will receive dial-in details to the email address you use to register. Note that multiple people cannot dial-in using the same registration information.

Press Advisory – President Donald J. Trump Directs FEMA Support Under Emergency Declaration for COVID-19 (PRESIDENTIAL PROCLAMATION HERE)
The federal government continues to take aggressive and proactive steps to address the COVID-19 threat as the health and safety of the American people remain a top priority. Today, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207 (the "Stafford Act"). This increases federal support to the Department of Health and Human Services (HHS) in its role as the lead federal agency for the ongoing COVID-19 pandemic response. As a result of the President's decisive, unprecedented action, FEMA is directed to assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public. Today's declaration does not make direct financial assistance available to individuals.

The emergency declaration does not change measures authorized under other federal statutes and HHS remains the lead federal agency directing the federal response to COVID-19. FEMA actions will be in support of HHS and in coordination with state, tribal and

AMERICAN OVERSIGHT

territorial governments. Eligible emergency protective measures taken at the direction or guidance of public health officials in response to this emergency, and not supported by the authorities of another federal agency, will be reimbursed strictly under the FEMA Public Assistance program. FEMA assistance will be provided at a 75 percent Federal cost share. Reimbursable activities typically include emergency protective measures such as the activation of State Emergency Operations Centers, National Guard costs, law enforcement and other measures necessary to protect public health and safety.

Presidential Message to the Congress on Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak (March 13, 2020) (PRESIDENTIAL MESSAGE HERE)
"Pursuant to section 201 of the National Emergencies Act (50 U.S.C. 1621), I hereby report that I have exercised my authority to declare that the outbreak of coronavirus disease (COVID-19) in the United States constitutes a national emergency. This declaration invokes section 1135 of the Social Security Act, 42 U.S.C. 1320b–5, to allow the Secretary of Health and Human Services to exercise the authority under that section to temporarily waive or modify certain requirements of the Medicare, Medicaid, and State Children's Health Insurance programs and of the Health Insurance Portability and Accountability Act Privacy Rule throughout the duration of the public health emergency declared in response to the COVID-19 outbreak."

-
Memorandum on Expanding State-Approved Diagnostic Tests (FULL MEMORANDUM HERE)
"By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows: It is the policy of the United States to take proactive measures to prepare for and respond to public health threats, including the public health emergency involving Coronavirus Disease 2019 (COVID-19), which was declared by the Secretary of Health and Human Services (the "Secretary") on January 31, 2020, pursuant to section 319 of the Public Health Service Act (42 U.S.C. 247d). Our response must include heightened coordination among Federal, State, local, and tribal agencies, and we must offer States the flexibility they need to care for their citizens. In accordance with this principle, the Food and Drug Administration, in coordination with the State of New York, allowed the State flexibility in expediting State-approved COVID-19 testing. Should additional States request flexibility to authorize laboratories within the State to develop and perform tests used to detect COVID-19, the Secretary shall take appropriate action, consistent with law, to facilitate the request."

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

Sincerely,
Nic

AMERICAN OVERSIGHT

COVID-19: Background & Additional Information

Background

Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Since the beginning of the outbreak, President Trump has taken unprecedented steps – including prudent travel restrictions and an early containment strategy – to protect the health of Americans in response to the coronavirus. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response (**President Donald J. Trump Has Taken Unprecedented Steps to Respond To the Coronavirus and Protect the Health and Safety of Americans**). The Coronavirus Task Force and broader Administration have and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk to the average American remains low. All agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

Press Advisory – President Donald J. Trump Directs FEMA Support Under Emergency Declaration for COVID-19 (PRESIDENTIAL PROCLAMATION HERE)
The federal government continues to take aggressive and proactive steps to address the COVID-19 threat as the health and safety of the American people remain a top priority. Today, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207 (the "Stafford Act"). This increases federal support to the Department of Health and Human Services (HHS) in its role as the lead federal agency for the ongoing COVID-19 pandemic response. As a result of the President's decisive, unprecedented action, FEMA is directed to assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public. Today's declaration does not make direct financial assistance available to individuals.

The emergency declaration does not change measures authorized under other federal statutes and HHS remains the lead federal agency directing the federal response to COVID-19. FEMA actions will be in support of HHS and in coordination with state, tribal and

AMERICAN OVERSIGHT

territorial governments. Eligible emergency protective measures taken at the direction or guidance of public health officials in response to this emergency, and not supported by the authorities of another federal agency, will be reimbursed strictly under the FEMA Public Assistance program. FEMA assistance will be provided at a 75 percent Federal cost share. Reimbursable activities typically include emergency protective measures such as the activation of State Emergency Operations Centers, National Guard costs, law enforcement and other measures necessary to protect public health and safety.

Presidential Message to the Congress on Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak (March 13, 2020) (PRESIDENTIAL MESSAGE HERE)
"Pursuant to section 201 of the National Emergencies Act (50 U.S.C. 1621), I hereby report that I have exercised my authority to declare that the outbreak of coronavirus disease (COVID-19) in the United States constitutes a national emergency. This declaration invokes section 1135 of the Social Security Act, 42 U.S.C. 1320b–5, to allow the Secretary of Health and Human Services to exercise the authority under that section to temporarily waive or modify certain requirements of the Medicare, Medicaid, and State Children's Health Insurance programs and of the Health Insurance Portability and Accountability Act Privacy Rule throughout the duration of the public health emergency declared in response to the COVID-19 outbreak."

-
Memorandum on Expanding State-Approved Diagnostic Tests (FULL MEMORANDUM HERE)
"By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows: It is the policy of the United States to take proactive measures to prepare for and respond to public health threats, including the public health emergency involving Coronavirus Disease 2019 (COVID-19), which was declared by the Secretary of Health and Human Services (the "Secretary") on January 31, 2020, pursuant to section 319 of the Public Health Service Act (42 U.S.C. 247d). Our response must include heightened coordination among Federal, State, local, and tribal agencies, and we must offer States the flexibility they need to care for their citizens. In accordance with this principle, the Food and Drug Administration, in coordination with the State of New York, allowed the State flexibility in expediting State-approved COVID-19 testing. Should additional States request flexibility to authorize laboratories within the State to develop and perform tests used to detect COVID-19, the Secretary shall take appropriate action, consistent with law, to facilitate the request."

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

Sincerely,
Nic

AMERICAN OVERSIGHT

COVID-19: Background & Additional Information

Background

Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Since the beginning of the outbreak, President Trump has taken unprecedented steps – including prudent travel restrictions and an early containment strategy – to protect the health of Americans in response to the coronavirus. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response (**President Donald J. Trump Has Taken Unprecedented Steps to Respond To the Coronavirus and Protect the Health and Safety of Americans**). The Coronavirus Task Force and broader Administration have and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk to the average American remains low. All agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

Subject:	INVITE: State & Local Briefing Call on COVID-19 (Wednesday, March 18, 1:00 PM ET)
Date:	Tuesday, March 17, 2020 9:28:21 AM
Attachments:	image001.png

THE WHITE HOUSE

State and Local Elected Officials –

On **Wednesday, March 18, at 1:00 PM ET**, please join Senior Administration Officials for a briefing call on COVID-19 (coronavirus). Registration instructions are below. Please note that this call is intended for state and local elected officials. We encourage you to share this invitation with your county and/or municipal colleagues as well as public health officials.

Important Note: Call-in lines are limited. Please register only if you are able to join the call. State and local leaders (especially staff) working in the same office are encouraged to register once as a group and use one call-in line to maximize the number of people who can join.

Recent Actions

- FDA - Coronavirus (COVID-19) Update: FDA Provides More Regulatory Relief During Outbreak, Continues to Help Expedite Availability of Diagnostics (Click Here)
- CMS Approves First State Request for 1135 Medicaid Waiver in Florida (Click Here)

Briefing Call Registration

Date: Wednesday, March 18
Time: 1:00 PM ET (please note time zone)

AMERICAN OVERSIGHT

Call-In Registration: **CLICK HERE**
Note: You must RSVP to join the call. Upon successful registration, you will receive dial-in details to the email address you use to register. Note that multiple people cannot dial-in using the same registration information.

Below, please find additional information that we continue to update. It includes an overview of the recent Presidential Emergency Declaration, information on the Small Business Administration's disaster assistance program, etc. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance. As a reminder, WH IGA is the primary liaison between the White House and the country's State and local elected officials and Tribal Governments.

Sincerely,

Nic

Recent Announcements

President Donald J. Trump Announces New Guidelines to Address COVID-19 – The President's Guidelines for America: 15 Days to Slow the Spread
Monday, March 16, President Donald J. Trump announced new guidelines to address COVID-19, stop the spread, and protect health. *The President's Coronavirus Guidelines for America: 15 Days to Slow the Spread* can be found **here**.

President Donald J. Trump Directs FEMA Support Under Emergency Declaration for COVID-19
The federal government continues to take aggressive and proactive steps to address the COVID-19 threat as the health and safety of the American people remain a top priority (**President Donald J. Trump Has Mobilized the Full Resources of the Federal Government to Respond to the Coronavirus**). On Friday, March 13, President Trump **declared** a nationwide emergency pursuant to Sec. 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207 (the "Stafford Act") (***Letter from President Donald J. Trump on Emergency Determination Under the Stafford Act***). This increases federal support to the Department of Health and Human Services (HHS) in its role as the lead federal agency for the ongoing COVID-19 pandemic response. As a result of the President's decisive, unprecedented action, FEMA is directed to assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public. FEMA actions will be in support of HHS and in coordination with state, tribal and territorial governments. Eligible emergency protective measures taken at the direction or guidance of public health

AMERICAN OVERSIGHT

officials in response to this emergency, and not supported by the authorities of another federal agency, will be reimbursed strictly under the FEMA Public Assistance program. FEMA assistance will be provided at a 75 percent Federal cost share. Reimbursable activities typically include emergency protective measures such as the activation of State Emergency Operations Centers, National Guard costs, law enforcement and other measures necessary to protect public health and safety. To note, the declaration does not make direct financial assistance available to individuals.. ***Municipalities and counties are encouraged to work directly with their local emergency management offices and through the State Emergency Management Agency for all requests for assistance.*** You can read more about the disaster recovery process here.

Presidential Proclamation To Protect the Homeland from Travel-Related Coronavirus Spread

On Thursday, March 12, President Donald J. Trump signed a **Presidential Proclamation**, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. *This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.*

HUD Releases Quick Guide to CDBG Eligible Activities to Support Infectious Disease Response

CDBG grantees should coordinate with local health authorities before undertaking any activity to support state or local pandemic response. Grantees may use Community Development Block Grant (CDBG) funds for a range of eligible activities that prevent and respond to the spread of infectious diseases such as the coronavirus disease 2019 (COVID-19). The guide can be found **here**.

SBA To Provide Disaster Loans for Small Businesses Impacted by Coronavirus (COVID-19)

On Thursday, March 12, SBA Administrator Jovita Carranza issued the following statement: "The President took bold, decisive action to make our 30 million small businesses more resilient to Coronavirus-related economic disruptions. Small businesses are vital economic engines in every community and state, and they have helped make our economy the strongest in the world. Our Agency will work directly with state Governors to provide targeted, low-interest disaster recovery loans to small businesses that have been severely impacted by the situation. Additionally, the SBA continues to assist small businesses with counseling and navigating their own preparedness plans through our network of 68 District Offices and numerous Resource Partners located around the country. The SBA will continue to provide every small business with the most effective and customer-focused response possible during these times of uncertainty." SBA's Economic Injury Disaster Loans offer up to $2 million in assistance for a small business. These loans can provide vital economic support to small businesses to help overcome the temporary loss of revenue they are experiencing. More information can be found **here**.

CDC to Award Over $560 Million to State & Local Jurisdictions in Support of COVID-19 Response

The Department of Health and Human Services (HHS) is announcing another upcoming action by the Centers for Disease Control and Prevention (CDC) to provide resources to state and local jurisdictions in support of our nation's response to the coronavirus disease

AMERICAN OVERSIGHT

2019 (COVID-19). The $8.3 billion dollar Supplemental passed by Congress included **statutory language** which prescribed the exact formula for disbursing the money: states will receive 90% of their **2019 CDC PHEP grants**. This marks the first tranche of funding to states from the $8.3 billion supplemental. Your state health officers are receiving a letter today from CDC outlining what is needed to receive the funding, essentially they need to submit a spend plan and they will receive guidance on what that spend plan should contain. More **here**.

CDC Releases Mitigation Framework for States, Localities, and Communities
Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts. Framework includes: (i) Local Factors to Consider for Determining Mitigation Strategies, (ii) Community mitigation strategies by setting and by level of community transmission or impact of COVID-19, and (iii) Potential mitigation strategies for public health functions. More **here**.

White House Coronavirus Task Force Announces Community Mitigation Strategies for Seattle-King, Pierce, and Snohomish C, WA Santa Clara, CA and New Rochelle, NY
The White House Coronavirus Task Force has recommended community mitigation strategies for Seattle, Washington and Santa Clara County, California due to widespread transmission of coronavirus disease 2019 (COVID-19). These mitigation activities are designed to address the effects of COVID-19 on areas that are experiencing community spread. You can find the guidance for Seattle, Washington and Santa Clara, California **here**. The Task Force also announced community mitigation strategies for New Rochelle, New York, which can be viewed **here**.

Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance
As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found here (3/9). The Press Release can be found here and all CMS guidance related to COVID-19 can be found **here**.

Federal Agency Action Overview

U.S. Department of Health & Human Services (HHS)

- The Department of Health and Human Services is committed to providing as much information as possible to prepare communities for response to COVID-19. The Department, through the Centers for Disease Control and Prevention, the Food and Drug Administration, and other agencies, continuously provide guidance to healthcare providers, laboratories, communities, and state and local officials for dealing with suspected or confirmed cases of COVID-19. The most up-to-date information can be found at **www.coronavirus.gov**.
- Wednesday, March 12, CDC **announced** the imminent release of almost $600 million to support state and local authorities respond to the COVID-19 outbreak. Full funding amounts are **here**.
- CDC released their "**Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission**." This is a guide for communities describing possible coronavirus transmission. Community mitigation strategies are often the most available interventions to help slow the transmission of COVID-19 in communities.
- The CDC has been actively working to address the need for testing across the country. You can find more information about testing **here**. We encourage review of the **Updated Guidance on Evaluating and Testing Persons for Coronavirus Disease 2019**, as well as the recently updated the **FAQ website**

AMERICAN OVERSIGHT

for laboratories to determine best practices for testing.

- The U.S. Public Health Service Commissioned Corps has deployed hundreds of officers to help with this response. As America's Health Responders, the Commissioned Corps is currently very involved in assisting the CDC with airport screenings, deploying staff to support hospitals, among other important missions. Find out more about Commissioned Corps activities **here**.
- Part of preparedness includes a robust blood supply. The current situation around COVID-19 heightens the need for a ready blood supply, please encourage your health community members to keep their appointments to donate blood.
- CDC released updated **guidance** on infection prevention and control recommendations for healthcare workers. Healthcare workers are fighting this outbreak on the front lines, and this guidance is intended to provide assistance to healthcare settings that are handling suspected or confirmed cases of COVID-19. This guidance is applicable to all U.S. healthcare settings.
- The President's emergency declaration gives HHS important powers to enhance state and local communities' ability to respond to the outbreak, including flexibility around Medicare and Medicaid rules.
    - *Flexibility and Relief for State Medicaid Agencies*: The national emergency declaration also enables CMS to grant state and territorial Medicaid agencies a wider range of flexibilities under section 1135 waivers. States and territories are now encouraged to assess their needs and request these available flexibilities, which are outlined in the Medicaid and CHIP Disaster Response Toolkit. Examples of flexibilities available to states under section 1135 waivers include the ability to permit out-of-state providers to render services, temporarily suspend certain provider enrollment and revalidation requirements to promote access to care, allow providers to provide care in alternative settings, waive prior authorization requirements, and temporarily suspend certain pre-admission and annual screenings for nursing home residents. For more information and to access the toolkit, visit **here**.
    - *Waivers and Flexibilities for Hospitals and other Healthcare Facilities*: CMS will temporarily waive or modify certain Medicare, Medicaid, and CHIP requirements. CMS will also issue several blanket waivers, listed on the website below, and the CMS Regional Offices will review other provider-specific requests. These waivers provide continued access to care for beneficiaries. For more information on the waivers CMS has granted, visit **here**.
    - *Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance*: As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found **here** (3/9). The Press Release can be found **here** and all CMS guidance related to COVID-19 can be found **here**.

U.S. Small Business Administration (SBA)

- The Small Business Administration will work directly with state Governors to provide targeted, low-interest loans to small businesses and non-profits that have been severely impacted by the Coronavirus (COVID-19). The SBA's Economic Injury Disaster Loan program provides small businesses with working capital loans of up to $2 million that can provide vital economic support to small businesses to help overcome the temporary loss of revenue they are experiencing.
- The Coronavirus Preparedness and Response Supplemental expanded the disaster

AMERICAN OVERSIGHT

definition for the Small Business Administration's Economic Injury Disaster Loans (EIDL) to include COVID-19. Economic Injury Disaster Loans are SBA loans that are available to eligible Small Businesses, Small agricultural cooperatives, and most non-profits that have experienced substantial economic injury as a result of a disaster.

  - EIDLs are available in areas that are declared a disaster area by the SBA.
  - There has to be an SBA Disaster Declaration in an area for EIDL loans to be made available, which originates from a request made by the Governor.
  - To assist in the efforts, the SBA engages with States' Emergency Response Teams to help them comply with the requirements before a request is made.
- EIDL Loan Details
  - Entities that can apply for EIDL loans are eligible Small Businesses, Small agricultural cooperatives, and most private nonprofit organizations.
  - EIDL Loans are up to $2million and have terms as long as 30 years.
- State and local officials who have been contacted by Small Businesses that may have been affected should share that information with their Governor or the State's Emergency Response Officials. More information on SBA's disaster loans, including eligibility and how to apply for loans, can be found here: **www.SBA.gov/disaster**

U.S. Department of Education (DoED)

- The Department of Education has established a dedicated Coronavirus **webpage**, which includes resources for institutions of higher education and for K-12.
  - The website includes **guidance** for students at institutions of higher education, and covers Coronavirus-related scenarios that could impact students who are enrolled in study abroad programs, students who meet full-time requirements but fall below 12 credit hours, students who are quarantined and miss class, campuses that have temporarily stopped offering ground-based classes to prevent the spread of Coronavirus, and foreign schools that serve Americans who receive Federal financial aid. Also see a **letter from the Office for Civil Rights** that addresses potential discrimination associated with coronavirus.
- The Department is working on additional information for families and communities including:
  - Information regarding certain flexibilities under the Every Student Succeeds Act, or "ESSA;"
  - Information regarding services to children with disabilities;
  - A fact sheet from our Office for Civil Rights on the risk of Coronavirus in schools while protecting the civil rights of students; and
  - Information on the Family Education Records Privacy Act, or "FERPA," as it pertains to K-12 and higher education students.
- The Department will continue to update its website, ed.gov/coronavirus. Please direct education related questions to **COVID-19@ed.gov**.

U.S. Department of Transportation (DOT)

- The U.S. Department of Transportation, in its important supporting role, has and will continue to coordinate with transportation stakeholders, foreign counterparts and other federal agencies to manage the risk in the United States.
- The U.S. government's travel restrictions and advisories have been a remarkably effective 'first layer' of containment. These travel requirements delayed the arrival of the virus to the United States, giving the nation precious time to prepare further

AMERICAN OVERSIGHT

measures, and plan for mitigation. This achievement took the cooperation of nearly 200 commercial airlines, a like number of overseas airports, and the Civil Aviation Authority of China.

- DOT continues to ensure: an active air bridge remains in place for the safe return of Americans from affected areas; airlines are funneling passenger flights to one of the eleven designated U.S. airports equipped to health-screen Americans returning from affected areas; continued air and sea cargo traffic between the US and China; health protocols are established to protect the crews of aircraft continuing to fly between the US and foreign locations; and, dissemination of health messages about the virus, for airlines to use to inform their passengers.
- External Stakeholder outreach is being actively conducted throughout the modes of transportation in DOT. DOT has already hosted calls with stakeholders for the Federal Aviation Administration, Federal Transit Authority, Federal Motor Carrier Safety Administration, and others. Additional calls are scheduled for outreach to additional stakeholders in all surface transportation, maritime, and labor.
- On March 13, USDOT issued a national emergency declaration to provide hours-of-service regulatory relief to commercial vehicle drivers transporting emergency relief to the nationwide COVID-19 outbreak. The declaration does not cover routine commercial deliveries, or transportation of mixed loads of essential supplies and/or persons and goods or persons not related to emergency needs. Effective immediately, the declaration will remain in effect for the duration of the emergency or until 11:59 P.M. (ET), April 11, 2020, whichever occurs sooner. Learn more **here**.

U.S. Department of Labor (DOL)

- The Occupational Safety and Health Administration (OSHA) developed COVID-19 **planning guidance** for employers to implement engineering, administrative, and work practice controls and personal protective equipment (PPE). The guidance is intended for planning purposes – employers and workers should use the planning guidance to help identify risk levels in workplace settings and to determine any appropriate control measures to implement.
- The U.S. Office of Personnel Management (OPM), an independent agency that serves as the chief human resources agency and personnel policy manager for the Federal Government, issued **guidance** for Federal Agencies regarding COVID-19 and human resources policies.
- DOL announced new guidance outlining flexibilities that States have in administering their unemployment (UI) programs to assist Americans affected by the COVID-19 outbreak. Under the guidance, federal law permits significant flexibility for states to amend their laws to provide UI benefits in multiple scenarios related to COVID-19. Learn more **here**.
- On March 14, DOL issued new temporary enforcement **guidance** for respirator fit-testing in healthcare during the COVID-19 outbreak. The temporary guidance is aimed at ensuring healthcare workers have full access to needed N95 respiratory protection. OSHA recommends that employers supply healthcare personnel who provide direct care to patients with known or suspected coronavirus with other respirators that provide equal or higher protection, such as N99 or N100 filtering facepieces, reusable elastomeric respirators with appropriate filters or cartridges, or powered air purifying respirators. Learn more **here**.

U.S. Department of Housing & Urban Development (HUD)

- The health and well-being of our country's most vulnerable citizens is Secretary Ben Carson's highest priority. At the direction of Secretary Carson senior HUD, officials have developed an Infectious Disease Toolkit for Continuum of Care homeless

AMERICAN OVERSIGHT

shelters (CoC). This includes specific documents addressing preparedness in shelters and encampment settings. More **here**.

- HUD has sent communication to CoC and Housing Opportunities for Persons With AIDS (HOPWA) grantees, highlighting the importance of infectious disease preparedness and linking to CDC and Healthcare for the Homeless resources: **Infectious Disease Preparedness Among Homeless Assistance Providers**.
- HUD released a quick guide to CDBG eligible activities to support infectious disease response. Grantees should coordinate with local health authorities before undertaking any activity to support State or local pandemic response. The guide can be found **here**.
- HUD is coordinating with the CDC, Healthcare for the Homeless, United States Interagency Council on Homelessness (USICH) on messaging and cross-promoting resource materials. This will continue on an ongoing basis. Also, the Department is reaching out to Health Resources and Services Administration (HRSA) and Substance Abuse and Mental Health Services Administration (SAMHSA) for future coordination.
- HUD has plenty of resources for your communities including:
    - Communities can use their unspent Emergency Solutions Grants and Continuum of Care Program funds to help address needs related to coronavirus. Additionally, a portion of CDBG funds are also available for public services, including health care.
    - Technical Assistance is available for ESG and CoC Program recipients if requested. Additionally, communities that want to amend their CDBG plans, can reach out to their CPD representative if they need assistance.

U.S. Department of Agriculture (USDA)

- USDA Secretary Sonny Perdue **announced proactive flexibilities** to allow meal service during school closures to minimize potential exposure to the coronavirus. During an unexpected school closure, schools can leverage their participation in one of USDA's summer meal programs to provide meals at no cost to students. Under normal circumstances, those meals must be served in a group setting. However, in a public health emergency, the law allows USDA the authority to waive the group setting meal requirement, which is vital during a social distancing situation.
- USDA intends to use all available program flexibilities and contingencies to serve program participants across our 15 nutrition programs. USDA has already begun to issue waivers to ease program operations and protect the health of participants. USDA is receiving requests for waivers on an ongoing basis. As of today, USDA has been asked to waive congregate feeding requirements in Washington, California, Maryland, Alaska, Utah, Pennsylvania, Wyoming, Maine, Kansas, New Jersey, New York, South Carolina, South Dakota, and Virginia and USDA has granted those requests.
- For more information about the coronavirus response across USDA, please visit: **www.usda.gov/coronavirus**.

U.S. Department of Homeland Security (DHS)

- While the overall risk to the American public remains low, actions by DHS and the administration are decreasing the strain on public health officials by screening incoming travelers, expediting the processing of U.S. citizens returning from China, and ensuring resources are focused on the health and safety of the American people. It is important to recognize, that while there is a significant focus on containing and

AMERICAN OVERSIGHT

mitigating the spread of COVID-19, all departments and agencies of DHS are continuing to perform their regular duties with no impact on their mission.

- DHS is working to recognize, detect, and assist individuals attempting to enter the U.S. through our, airports, land ports, or waterways who may be carrying the virus: Cruise Lines International Association, CDC, USCG, and CBP. DHS is working with the Department of State, HHS, and the senior public health leadership with the Government of Mexico to prepare for any COVID-19 cases identified along the South West Border. This effort includes coordination with state, and local Public Health Officials to develop reporting and response courses of action.
- FEMA has rostered 56 four-person Incident Management Assistance Teams.
- The Countering Weapons of Mass Destruction Office, which contains the National Biosurveillance Integration Center and the Chief Medical Officer, has maintained close coordination with our Components and U.S. Government partners regarding the status of the outbreak and associated U.S. Government response actions.

Local Preparedness Tips

- Response is locally executed, state managed, and federally supported.
- Ensuring clear, open lines of communication with the public and making information and guidance readily available.
- Proactively sharing and disseminating *verified and accurate* guidance and information such as HHS/CDC **guidance for families, businesses, and schools**.
- Reviewing Federal guidance such as the HHS/CDC **Community Mitigation Framework**.
- Coordinating with State and local health authorities.
- Reviewing local preparedness plans and strategies.

Date:	Tuesday, March 17, 2020 9:28:29 AM
Attachments:	image001.png

THE WHITE HOUSE

State and Local Elected Officials –

On **Wednesday, March 18, at 1:00 PM ET**, please join Senior Administration Officials for a briefing call on COVID-19 (coronavirus). Registration instructions are below. Please note that this call is intended for state and local elected officials. We encourage you to share this invitation with your county and/or municipal colleagues as well as public health officials.

Important Note: Call-in lines are limited. Please register only if you are able to join the call. State and local leaders (especially staff) working in the same office are encouraged to register once as a group and use one call-in line to maximize the number of people who can join.

Recent Actions

- FDA - Coronavirus (COVID-19) Update: FDA Provides More Regulatory Relief During Outbreak, Continues to Help Expedite Availability of Diagnostics (Click Here)
- CMS Approves First State Request for 1135 Medicaid Waiver in Florida (Click Here)

Briefing Call Registration

Date: Wednesday, March 18
Time: 1:00 PM ET (please note time zone)

AMERICAN OVERSIGHT

Call-In Registration: **CLICK HERE**
Note: You must RSVP to join the call. Upon successful registration, you will receive dial-in details to the email address you use to register. Note that multiple people cannot dial-in using the same registration information.

Below, please find additional information that we continue to update. It includes an overview of the recent Presidential Emergency Declaration, information on the Small Business Administration's disaster assistance program, etc. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance. As a reminder, WH IGA is the primary liaison between the White House and the country's State and local elected officials and Tribal Governments.

Sincerely,

Nic

COVID-19: Background & Additional Information

Background

Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Since the beginning of the outbreak, President Trump has taken unprecedented steps – including prudent travel restrictions and an early containment strategy – to protect the health of Americans in response to the coronavirus. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response (**President Donald J. Trump Has Taken Unprecedented Steps to Respond To the Coronavirus and Protect the Health and Safety of Americans**). The Coronavirus Task Force and broader Administration have and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk to the average American remains low. All***

AMERICAN OVERSIGHT

agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed.

Recent Announcements

President Donald J. Trump Announces New Guidelines to Address COVID-19 – The President's Guidelines for America: 15 Days to Slow the Spread
Monday, March 16, President Donald J. Trump announced new guidelines to address COVID-19, stop the spread, and protect health. *The President's Coronavirus Guidelines for America: 15 Days to Slow the Spread* can be found **here**.

President Donald J. Trump Directs FEMA Support Under Emergency Declaration for COVID-19
The federal government continues to take aggressive and proactive steps to address the COVID-19 threat as the health and safety of the American people remain a top priority (**President Donald J. Trump Has Mobilized the Full Resources of the Federal Government to Respond to the Coronavirus**). On Friday, March 13, President Trump **declared** a nationwide emergency pursuant to Sec. 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207 (the "Stafford Act") (***Letter from President Donald J. Trump on Emergency Determination Under the Stafford Act***). This increases federal support to the Department of Health and Human Services (HHS) in its role as the lead federal agency for the ongoing COVID-19 pandemic response. As a result of the President's decisive, unprecedented action, FEMA is directed to assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public. FEMA actions will be in support of HHS and in coordination with state, tribal and territorial governments. Eligible emergency protective measures taken at the direction or guidance of public health

AMERICAN OVERSIGHT

officials in response to this emergency, and not supported by the authorities of another federal agency, will be reimbursed strictly under the FEMA Public Assistance program. FEMA assistance will be provided at a 75 percent Federal cost share. Reimbursable activities typically include emergency protective measures such as the activation of State Emergency Operations Centers, National Guard costs, law enforcement and other measures necessary to protect public health and safety. To note, the declaration does not make direct financial assistance available to individuals.. ***Municipalities and counties are encouraged to work directly with their local emergency management offices and through the State Emergency Management Agency for all requests for assistance.*** You can read more about the disaster recovery process here.

Presidential Proclamation To Protect the Homeland from Travel-Related Coronavirus Spread

On Thursday, March 12, President Donald J. Trump signed a **Presidential Proclamation**, which suspends the entry of most foreign nationals who have been in certain European countries at any point during the 14 days prior to their scheduled arrival to the United States. These countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. *This does not apply to legal permanent residents, (generally) immediate family members of U.S. citizens, and other individuals who are identified in the proclamation.*

HUD Releases Quick Guide to CDBG Eligible Activities to Support Infectious Disease Response

CDBG grantees should coordinate with local health authorities before undertaking any activity to support state or local pandemic response. Grantees may use Community Development Block Grant (CDBG) funds for a range of eligible activities that prevent and respond to the spread of infectious diseases such as the coronavirus disease 2019 (COVID-19). The guide can be found **here**.

SBA To Provide Disaster Loans for Small Businesses Impacted by Coronavirus (COVID-19)

On Thursday, March 12, SBA Administrator Jovita Carranza issued the following statement: "The President took bold, decisive action to make our 30 million small businesses more resilient to Coronavirus-related economic disruptions. Small businesses are vital economic engines in every community and state, and they have helped make our economy the strongest in the world. Our Agency will work directly with state Governors to provide targeted, low-interest disaster recovery loans to small businesses that have been severely impacted by the situation. Additionally, the SBA continues to assist small businesses with counseling and navigating their own preparedness plans through our network of 68 District Offices and numerous Resource Partners located around the country. The SBA will continue to provide every small business with the most effective and customer-focused response possible during these times of uncertainty." SBA's Economic Injury Disaster Loans offer up to $2 million in assistance for a small business. These loans can provide vital economic support to small businesses to help overcome the temporary loss of revenue they are experiencing. More information can be found **here**.

CDC to Award Over $560 Million to State & Local Jurisdictions in Support of COVID-19 Response

The Department of Health and Human Services (HHS) is announcing another upcoming action by the Centers for Disease Control and Prevention (CDC) to provide resources to state and local jurisdictions in support of our nation's response to the coronavirus disease

AMERICAN OVERSIGHT

2019 (COVID-19). The $8.3 billion dollar Supplemental passed by Congress included **statutory language** which prescribed the exact formula for disbursing the money: states will receive 90% of their **2019 CDC PHEP grants**. This marks the first tranche of funding to states from the $8.3 billion supplemental. Your state health officers are receiving a letter today from CDC outlining what is needed to receive the funding, essentially they need to submit a spend plan and they will receive guidance on what that spend plan should contain. More **here**.

CDC Releases Mitigation Framework for States, Localities, and Communities
Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts. Framework includes: (i) Local Factors to Consider for Determining Mitigation Strategies, (ii) Community mitigation strategies by setting and by level of community transmission or impact of COVID-19, and (iii) Potential mitigation strategies for public health functions. More **here**.

White House Coronavirus Task Force Announces Community Mitigation Strategies for Seattle-King, Pierce, and Snohomish C, WA Santa Clara, CA and New Rochelle, NY
The White House Coronavirus Task Force has recommended community mitigation strategies for Seattle, Washington and Santa Clara County, California due to widespread transmission of coronavirus disease 2019 (COVID-19). These mitigation activities are designed to address the effects of COVID-19 on areas that are experiencing community spread. You can find the guidance for Seattle, Washington and Santa Clara, California **here**. The Task Force also announced community mitigation strategies for New Rochelle, New York, which can be viewed **here**.

Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance
As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found here (3/9). The Press Release can be found here and all CMS guidance related to COVID-19 can be found **here**.

Federal Agency Action Overview

U.S. Department of Health & Human Services (HHS)

- The Department of Health and Human Services is committed to providing as much information as possible to prepare communities for response to COVID-19. The Department, through the Centers for Disease Control and Prevention, the Food and Drug Administration, and other agencies, continuously provide guidance to healthcare providers, laboratories, communities, and state and local officials for dealing with suspected or confirmed cases of COVID-19. The most up-to-date information can be found at **www.coronavirus.gov**.
- Wednesday, March 12, CDC **announced** the imminent release of almost $600 million to support state and local authorities respond to the COVID-19 outbreak. Full funding amounts are **here**.
- CDC released their "**Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission**." This is a guide for communities describing possible coronavirus transmission. Community mitigation strategies are often the most available interventions to help slow the transmission of COVID-19 in communities.
- The CDC has been actively working to address the need for testing across the country. You can find more information about testing **here**. We encourage review of the **Updated Guidance on Evaluating and Testing Persons for Coronavirus Disease 2019**, as well as the recently updated the **FAQ website**

AMERICAN OVERSIGHT

for laboratories to determine best practices for testing.

- The U.S. Public Health Service Commissioned Corps has deployed hundreds of officers to help with this response. As America's Health Responders, the Commissioned Corps is currently very involved in assisting the CDC with airport screenings, deploying staff to support hospitals, among other important missions. Find out more about Commissioned Corps activities **here**.
- Part of preparedness includes a robust blood supply. The current situation around COVID-19 heightens the need for a ready blood supply, please encourage your health community members to keep their appointments to donate blood.
- CDC released updated **guidance** on infection prevention and control recommendations for healthcare workers. Healthcare workers are fighting this outbreak on the front lines, and this guidance is intended to provide assistance to healthcare settings that are handling suspected or confirmed cases of COVID-19. This guidance is applicable to all U.S. healthcare settings.
- The President's emergency declaration gives HHS important powers to enhance state and local communities' ability to respond to the outbreak, including flexibility around Medicare and Medicaid rules.
    - *Flexibility and Relief for State Medicaid Agencies*: The national emergency declaration also enables CMS to grant state and territorial Medicaid agencies a wider range of flexibilities under section 1135 waivers. States and territories are now encouraged to assess their needs and request these available flexibilities, which are outlined in the Medicaid and CHIP Disaster Response Toolkit. Examples of flexibilities available to states under section 1135 waivers include the ability to permit out-of-state providers to render services, temporarily suspend certain provider enrollment and revalidation requirements to promote access to care, allow providers to provide care in alternative settings, waive prior authorization requirements, and temporarily suspend certain pre-admission and annual screenings for nursing home residents. For more information and to access the toolkit, visit **here**.
    - *Waivers and Flexibilities for Hospitals and other Healthcare Facilities*: CMS will temporarily waive or modify certain Medicare, Medicaid, and CHIP requirements. CMS will also issue several blanket waivers, listed on the website below, and the CMS Regional Offices will review other provider-specific requests. These waivers provide continued access to care for beneficiaries. For more information on the waivers CMS has granted, visit **here**.
    - *Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance*: As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found **here** (3/9). The Press Release can be found **here** and all CMS guidance related to COVID-19 can be found **here**.

U.S. Small Business Administration (SBA)

- The Small Business Administration will work directly with state Governors to provide targeted, low-interest loans to small businesses and non-profits that have been severely impacted by the Coronavirus (COVID-19). The SBA's Economic Injury Disaster Loan program provides small businesses with working capital loans of up to $2 million that can provide vital economic support to small businesses to help overcome the temporary loss of revenue they are experiencing.
- The Coronavirus Preparedness and Response Supplemental expanded the disaster

AMERICAN OVERSIGHT

definition for the Small Business Administration's Economic Injury Disaster Loans (EIDL) to include COVID-19. Economic Injury Disaster Loans are SBA loans that are available to eligible Small Businesses, Small agricultural cooperatives, and most non-profits that have experienced substantial economic injury as a result of a disaster.

  - EIDLs are available in areas that are declared a disaster area by the SBA.
  - There has to be an SBA Disaster Declaration in an area for EIDL loans to be made available, which originates from a request made by the Governor.
  - To assist in the efforts, the SBA engages with States' Emergency Response Teams to help them comply with the requirements before a request is made.
- EIDL Loan Details
  - Entities that can apply for EIDL loans are eligible Small Businesses, Small agricultural cooperatives, and most private nonprofit organizations.
  - EIDL Loans are up to $2million and have terms as long as 30 years.
- State and local officials who have been contacted by Small Businesses that may have been affected should share that information with their Governor or the State's Emergency Response Officials. More information on SBA's disaster loans, including eligibility and how to apply for loans, can be found here: **www.SBA.gov/disaster**

U.S. Department of Education (DoED)

- The Department of Education has established a dedicated Coronavirus **webpage**, which includes resources for institutions of higher education and for K-12.
  - The website includes **guidance** for students at institutions of higher education, and covers Coronavirus-related scenarios that could impact students who are enrolled in study abroad programs, students who meet full-time requirements but fall below 12 credit hours, students who are quarantined and miss class, campuses that have temporarily stopped offering ground-based classes to prevent the spread of Coronavirus, and foreign schools that serve Americans who receive Federal financial aid. Also see a **letter from the Office for Civil Rights** that addresses potential discrimination associated with coronavirus.
- The Department is working on additional information for families and communities including:
  - Information regarding certain flexibilities under the Every Student Succeeds Act, or "ESSA;"
  - Information regarding services to children with disabilities;
  - A fact sheet from our Office for Civil Rights on the risk of Coronavirus in schools while protecting the civil rights of students; and
  - Information on the Family Education Records Privacy Act, or "FERPA," as it pertains to K-12 and higher education students.
- The Department will continue to update its website, ed.gov/coronavirus. Please direct education related questions to **COVID-19@ed.gov**.

U.S. Department of Transportation (DOT)

- The U.S. Department of Transportation, in its important supporting role, has and will continue to coordinate with transportation stakeholders, foreign counterparts and other federal agencies to manage the risk in the United States.
- The U.S. government's travel restrictions and advisories have been a remarkably effective 'first layer' of containment. These travel requirements delayed the arrival of the virus to the United States, giving the nation precious time to prepare further

AMERICAN OVERSIGHT

measures, and plan for mitigation. This achievement took the cooperation of nearly 200 commercial airlines, a like number of overseas airports, and the Civil Aviation Authority of China.

- DOT continues to ensure: an active air bridge remains in place for the safe return of Americans from affected areas; airlines are funneling passenger flights to one of the eleven designated U.S. airports equipped to health-screen Americans returning from affected areas; continued air and sea cargo traffic between the US and China; health protocols are established to protect the crews of aircraft continuing to fly between the US and foreign locations; and, dissemination of health messages about the virus, for airlines to use to inform their passengers.
- External Stakeholder outreach is being actively conducted throughout the modes of transportation in DOT. DOT has already hosted calls with stakeholders for the Federal Aviation Administration, Federal Transit Authority, Federal Motor Carrier Safety Administration, and others. Additional calls are scheduled for outreach to additional stakeholders in all surface transportation, maritime, and labor.
- On March 13, USDOT issued a national emergency declaration to provide hours-of-service regulatory relief to commercial vehicle drivers transporting emergency relief to the nationwide COVID-19 outbreak. The declaration does not cover routine commercial deliveries, or transportation of mixed loads of essential supplies and/or persons and goods or persons not related to emergency needs. Effective immediately, the declaration will remain in effect for the duration of the emergency or until 11:59 P.M. (ET), April 11, 2020, whichever occurs sooner. Learn more **here**.

U.S. Department of Labor (DOL)

- The Occupational Safety and Health Administration (OSHA) developed COVID-19 **planning guidance** for employers to implement engineering, administrative, and work practice controls and personal protective equipment (PPE). The guidance is intended for planning purposes – employers and workers should use the planning guidance to help identify risk levels in workplace settings and to determine any appropriate control measures to implement.
- The U.S. Office of Personnel Management (OPM), an independent agency that serves as the chief human resources agency and personnel policy manager for the Federal Government, issued **guidance** for Federal Agencies regarding COVID-19 and human resources policies.
- DOL announced new guidance outlining flexibilities that States have in administering their unemployment (UI) programs to assist Americans affected by the COVID-19 outbreak. Under the guidance, federal law permits significant flexibility for states to amend their laws to provide UI benefits in multiple scenarios related to COVID-19. Learn more **here**.
- On March 14, DOL issued new temporary enforcement **guidance** for respirator fit-testing in healthcare during the COVID-19 outbreak. The temporary guidance is aimed at ensuring healthcare workers have full access to needed N95 respiratory protection. OSHA recommends that employers supply healthcare personnel who provide direct care to patients with known or suspected coronavirus with other respirators that provide equal or higher protection, such as N99 or N100 filtering facepieces, reusable elastomeric respirators with appropriate filters or cartridges, or powered air purifying respirators. Learn more **here**.

U.S. Department of Housing & Urban Development (HUD)

- The health and well-being of our country's most vulnerable citizens is Secretary Ben Carson's highest priority. At the direction of Secretary Carson senior HUD, officials have developed an Infectious Disease Toolkit for Continuum of Care homeless

AMERICAN OVERSIGHT

shelters (CoC). This includes specific documents addressing preparedness in shelters and encampment settings. More **here**.

- HUD has sent communication to CoC and Housing Opportunities for Persons With AIDS (HOPWA) grantees, highlighting the importance of infectious disease preparedness and linking to CDC and Healthcare for the Homeless resources: **Infectious Disease Preparedness Among Homeless Assistance Providers**.
- HUD released a quick guide to CDBG eligible activities to support infectious disease response. Grantees should coordinate with local health authorities before undertaking any activity to support State or local pandemic response. The guide can be found **here**.
- HUD is coordinating with the CDC, Healthcare for the Homeless, United States Interagency Council on Homelessness (USICH) on messaging and cross-promoting resource materials. This will continue on an ongoing basis. Also, the Department is reaching out to Health Resources and Services Administration (HRSA) and Substance Abuse and Mental Health Services Administration (SAMHSA) for future coordination.
- HUD has plenty of resources for your communities including:
    - Communities can use their unspent Emergency Solutions Grants and Continuum of Care Program funds to help address needs related to coronavirus. Additionally, a portion of CDBG funds are also available for public services, including health care.
    - Technical Assistance is available for ESG and CoC Program recipients if requested. Additionally, communities that want to amend their CDBG plans, can reach out to their CPD representative if they need assistance.

U.S. Department of Agriculture (USDA)

- USDA Secretary Sonny Perdue **announced proactive flexibilities** to allow meal service during school closures to minimize potential exposure to the coronavirus. During an unexpected school closure, schools can leverage their participation in one of USDA's summer meal programs to provide meals at no cost to students. Under normal circumstances, those meals must be served in a group setting. However, in a public health emergency, the law allows USDA the authority to waive the group setting meal requirement, which is vital during a social distancing situation.
- USDA intends to use all available program flexibilities and contingencies to serve program participants across our 15 nutrition programs. USDA has already begun to issue waivers to ease program operations and protect the health of participants. USDA is receiving requests for waivers on an ongoing basis. As of today, USDA has been asked to waive congregate feeding requirements in Washington, California, Maryland, Alaska, Utah, Pennsylvania, Wyoming, Maine, Kansas, New Jersey, New York, South Carolina, South Dakota, and Virginia and USDA has granted those requests.
- For more information about the coronavirus response across USDA, please visit: **www.usda.gov/coronavirus**.

U.S. Department of Homeland Security (DHS)

- While the overall risk to the American public remains low, actions by DHS and the administration are decreasing the strain on public health officials by screening incoming travelers, expediting the processing of U.S. citizens returning from China, and ensuring resources are focused on the health and safety of the American people. It is important to recognize, that while there is a significant focus on containing and

AMERICAN OVERSIGHT

mitigating the spread of COVID-19, all departments and agencies of DHS are continuing to perform their regular duties with no impact on their mission.

- DHS is working to recognize, detect, and assist individuals attempting to enter the U.S. through our, airports, land ports, or waterways who may be carrying the virus: Cruise Lines International Association, CDC, USCG, and CBP. DHS is working with the Department of State, HHS, and the senior public health leadership with the Government of Mexico to prepare for any COVID-19 cases identified along the South West Border. This effort includes coordination with state, and local Public Health Officials to develop reporting and response courses of action.
- FEMA has rostered 56 four-person Incident Management Assistance Teams.
- The Countering Weapons of Mass Destruction Office, which contains the National Biosurveillance Integration Center and the Chief Medical Officer, has maintained close coordination with our Components and U.S. Government partners regarding the status of the outbreak and associated U.S. Government response actions.

Local Preparedness Tips

- Response is locally executed, state managed, and federally supported.
- Ensuring clear, open lines of communication with the public and making information and guidance readily available.
- Proactively sharing and disseminating *verified and accurate* guidance and information such as HHS/CDC **guidance for families, businesses, and schools**.
- Reviewing Federal guidance such as the HHS/CDC **Community Mitigation Framework**.
- Coordinating with State and local health authorities.
- Reviewing local preparedness plans and strategies.

Importance:	High

Effective immediately, if you are participating in the COVID-19 emergency response efforts either directly or have been identified as surge personnel, travel is being denied regardless of previous approval. The only exception is travel related to the emergency effort of COVID-19. I appreciate your service and efforts as you all are responsible for the safety and well-being of the citizens of Florida.

Thanks,

Patty

Update to CDC HAN 430: Information and Guidance about Global Travel on Cruise Ships, Including River Cruises, due to Coronavirus Disease 2019 (COVID-19) -- March 17, 2020

This HAN, updated on March 17, 2020, includes additional pre-travel advice about in-cabin isolation if patients become sick during a cruise and 14-day quarantine upon completion of a cruise. This is consistent with CDC's Level 3 Travel Warning for cruise ships. See the Recommendations for Clinicians (#1e) and State and Local Health Dept. sections.

AMERICAN OVERSIGHT

From: Bruce Abramson
To: *|Title|* Blackmore
Subject: Internet-based Epidemiological Tool Capable of Improved Coronavirus Tracking
Date: Wednesday, March 18, 2020 7:29:18 AM

View this email in your browser

I'm writing to state and local leaders on the front lines of implementing coherent and appropriate responses to the coronavirus because I would like to share an Internet-based technology capable of collecting and tracking reliable data better than anything I've ever encountered.

The patented RIWI technology was developed specifically for understanding epidemics. It's proven itself in tracking contagion and in extracting health data —including from within closed societies. Though it's been written up in top scientific journals and in the press, it remains relatively unknown.

The RIWI technology has the potential to track contagion and public fear, social distancing behaviors, community health confidence and symptomology trends far more accurately, and in a far timelier manner, than reporting through official sources. It confers significant benefits that standard surveys and polls do not:

- It reaches a far more representative sample of the population; the likelihood of reaching any individual is proportional to their time using the Internet.
- Responses are geolocated and geotagged, yet comply with all applicable privacy regulations (including GDPR and CPPA).
- Response rates are consistently high enough to yield statistically meaningful data, even when asking about sensitive information.
- The data is updated in a steady stream and constantly, making it possible to track daily changes and trends.

The RIWI technology is flexible enough to tailor questions to cover behavior and health conditions before infection, between infection and the onset of symptoms, and after becoming symptomatic. It can help collect data about precursor behaviors and clustering capable of highlighting outbreaks that have not yet occurred. And we are poised to deploy quickly. We should be able to launch useful surveys within 72 hours of contracting, improve the question set

AMERICAN OVERSIGHT

as feedback arrives, and track changing trends.

To give just one example, here is a 2014 article from Forbes describing RIWI's utility in tracking and understanding Ebola. The technology has only improved since then. (Also note that the article's author is currently HHS Regional Director of Region 10, based in Seattle).

Please let me know if you would like to learn more. You can reach me by phone at 202-299-4171, on my personal e-mail, bdabramson@gmail.com, or by replying to this note. I believe that I can help deliver a valuable information service quickly—and improve both the global understanding of this pandemic and the health of your citizens.

Thanks,

-Bruce Abramson

   - See attached materials to guide the discussion.
   - *(CDC, published March 10)* Interim Additional Guidance for Infection Prevention and Control for Patients with Suspected or Confirmed COVID-19 in Nursing Homes: Provides clinical recommendations as well as mitigation strategies such as visitor, healthcare personnel and resident restrictions.
   - *(CDC, updated March 10, 2020)* Interim Infection Prevention and Control Recommendations for Patients with Suspected or Confirmed Coronavirus Disease 2019 (COVID-19) in Healthcare Settings: Includes updated PPE recommendations for the care of patients with known or suspected COVID-19 and considerations for designating entire units within the facility, with dedicated HCP, to care for known or suspected COVID-19 patients and options for extended use of respirators, facemasks, and eye protection on such units.

IV. Discussion Topic #2: ***Community Mitigation Strategies and Tactics***: Howard Zucker (SHO-NY, Tentative)-The New Rochelle Containment Zone Approach
   - *(CDC, published March 11 2020)* Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission outlines actions by setting and level of transmission that "local and state health departments can recommend in their community to both prepare for and mitigate community transmission of COVID-19." The framework recommends that states activate their community emergency plans, which may provide additional authorities and coordination needed for interventions to be implemented. It also outlines local factors and characteristics that need to be taken into consideration when determining a mitigation approach.
   - CDC 30 day recommendations on mitigation strategies to New Rochelle (Westchester County), Santa Clara, Seattle-King, Pierce and Snohomish Counties, Florida, and Massachusetts.
   - (*CDC, published March 12, 2020*) Consideration for School Closures

Subject:	LTCF Outbreak Surveillance
Date:	Tuesday, March 17, 2020 1:06:29 PM
Importance:	High

We would like to share these criteria with all LTCFs in FL via multiple channels as soon as possible.

Case definition of events for immediate reporting to county health departments by long term care facilities (skilled nursing facilities, assisted living facilities, independent living facilities)

Please report any instances of the following:

1. A laboratory confirmed case of COVID-19 among a staff member or resident of the facility; *(note: DOH will likely already be aware of this via ELR)*
2. A facility resident or staff member determined to be a close contact of a laboratory confirmed case of COVID-19. *Note: close contact is household member or someone in close proximity (<6 feet) for more than 10 minutes.*
3. Any clusters of 3 or more residents/staff identified within a 72 hour period, with influenza like illness (ILI), pneumonia, or severe respiratory illness requiring further evaluation.
4. Any deaths among residents/staff due to respiratory illness.

Scott – Attached is a revised proposal for enhanced surveillance and immediate reporting from LTCFs.

Also attached is accompanying guidance document. I based this off the WA DOH guidance, and modified where needed for FL. Where items are highlighted in yellow, it refers back to the LTCF surveillance document.

I will pick this up again on Tuesday when I am back, but feel free to modify or move forward as needed until then.

I will be available via phone/email as always.

---

Dear NPHIC Members:

Attached please find the CDC COVID-19 daily key points for Tuesday, March 10, 2020. These are cleared to share with your staff and other partners. Note, the attached are for internal use and not to be posted on public websites.

We've also added more resources to the NPHIC Coronavirus webpage. Below are some of the recent NPHIC member shared COVID-19 communication documents:

- **Guidance for Dental Offices** (Rhode Island Dept. of Health)
- **Guidance for Athletic Administrators and Coaches** (Rhode Island Dept. of Health)
- **Snohmish Health District** (WA) has offered their materials – they've a lot of materials on their website at www.snohd.org/ncov2019. NPHIC members can feel free to use/share as needed. They also have posters that they created in multiple languages that NPHIC members can modify to add their logo and add "adapted from the Snohomish Health District" at the bottom. Just email communications@snohd.org for those files.
    - https://www.snohd.org/DocumentCenter/View/3363 - for businesses
    - https://www.snohd.org/DocumentCenter/View/3349 - for schools & childcare

NPHIC member request for resources - If anyone has any of these resources noted below, if you can please send to me, I will add to our resources:

Does anyone have:

- NPHIC members who may be working to create **guidance and messaging geared towards farmworkers** who live in group housing
- Has anyone **created videos or social graphics that have taken a lighthearted approach to alternate ways to greet people** instead of hugs/handshakes?
- Alternately, has anyone created signage for public facing staff that says – we love our customers, but prefer not to shake hands to reduce the spread of germs (or something like that)?

Thank you!!!

Laura Espino

Good Day Paul and Kara,

Thank you kindly for reaching out today.

As per telephonic guidance received the evening of 12 March 2020 from Alberto Moscoso and team at Florida Department of Health, as well as Cindy Friedman and Paul Weidle from US CDC, it was recommended that an email notification to be sent to individuals with travel history aboard Sky Princess voyage A [22-29 February 2020] and voyage B [29 February – 7 March]. Attached are the email notifications sent on 13 March 2020.

Thanks,

Dennis Peyton Jr., MPH, CIC

Subject: Line list comparison assignment
Date: Monday, March 16, 2020 10:40:41 AM
Attachments: Line List Comparison 2020-03-16.xlsx

Here is a comparison of the cases that we have in our data versus what is posted on the website. The rows highlighted in yellow are cases that are either new cases that should be on the website and aren't OR are cases that are currently posted and shouldn't be.

Of note, there are 2 cases on the website that aren't close to anything we have in Merlin:

Order	County	Age	Sex
38	[redacted]	68	Female
45	[redacted]	67	Female

Any ideas on how we can figure out who those people are?

Thanks!

Stay home for 14 days from the time you left an area with widespread, ongoing community spread (Level 3 Travel Health Notice countries) and practice social distancing.
Take these steps to monitor your health and practice social distancing:

1. Take your temperature with a thermometer two times a day and monitor for fever. Also watch for cough or trouble breathing.
2. Stay home and avoid contact with others. Do not go to work or school for this 14-day period. Discuss your work situation with your employer before returning to work.
3. Do not take public transportation, taxis, or ride-shares during the time you are practicing social distancing.
4. Avoid crowded places (such as shopping centers and movie theaters) and limit your activities in public.
5. Keep your distance from others (about 6 feet or 2 meters).

https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html

CDC Criteria to Guide Evaluation and Laboratory Testing for COVID-19

Clinicians should continue to work with their local and state health departments to coordinate testing through public health laboratories. In addition, COVID-19 diagnostic testing, authorized by the Food and Drug Administration under an Emergency Use Authorization (EUA), is becoming available in clinical laboratories. This additional testing capacity will allow clinicians to consider COVID-19 testing for a wider group of symptomatic patients.

Clinicians should use their judgment to determine if a patient has signs and symptoms compatible with COVID-19 and whether the patient should be tested. Most patients with confirmed COVID-19 have developed fever[1] and/or symptoms of acute respiratory illness (e.g., cough, difficulty breathing). Priorities for testing may include:

1. Hospitalized patients who have signs and symptoms compatible with COVID-19 in order to inform decisions related to infection control.
2. Other symptomatic individuals such as, older adults and individuals with chronic medical conditions and/or an immunocompromised state that may put them at higher risk for poor outcomes (e.g., diabetes, heart disease, receiving immunosuppressive medications, chronic lung disease, chronic kidney disease).
3. Any persons including healthcare personnel[2], who within 14 days of symptom onset had close contact[3] with a suspect or laboratory-confirmed[4] COVID-19 patient, or who have a history of travel from affected geographic areas[5] (see below) within 14 days of their symptom onset.

There are epidemiologic factors that may also help guide decisions about COVID-19 testing. Documented COVID-19 infections in a jurisdiction and known community transmission may contribute to an epidemiologic risk assessment to inform testing decisions. Clinicians are strongly encouraged to test for other causes of respiratory illness (e.g., influenza).

Mildly ill patients should be encouraged to stay home and contact their healthcare provider by phone for guidance about clinical management. Patients who have severe symptoms, such as difficulty breathing, should seek care immediately. Older patients and individuals who have underlying medical conditions or are immunocompromised should contact their physician early in the course of even mild illness.

COVID-19 Newsletter_03_13_20_Florida edits.pdf

Good evening:

As Florida comes together to address COVID-19, Mayo Clinic remains a committed partner in providing the best care, research and education possible. As Florida's destination for patients seeking answers to their most complex health questions, we are also taking action to protect and support our staff and their families at this time. Below and attached is an update of some of our recent activities related to the pandemic response.

All of us at Mayo Clinic continue to work diligently and ceaselessly to help our patients, communities and staff prepare as we meet the challenges of this public health crisis. We will provide ongoing updates as the pandemic develops, but, as always, if we can be of assistance at any time, please do not hesitate to reach out.

Sincerely,

Layne Smith

Layne M. Smith | Director, State Government Relations| Division of External Relations |904-953-7334 | smith.layne@mayo.edu
Mayo Clinic | 4500 San Pablo Road | Jacksonville, Florida 32224 | www.mayoclinic.org

The latest information from Mayo Clinic March 13, 2020

As the world's most trusted leader in health care, Mayo Clinic is committed to providing a comprehensive response to the global COVID-19 pandemic. We are bringing together Mayo Clinic's unique expertise in patient care, research and education to advance tests and treatments for patients. The information below includes our policies as of today, but the situation is dynamic and information is rapidly evolving. For

AMERICAN OVERSIGHT

additional details and updates, please visit Mayo's COVID-19 News Network site.

Visitation restrictions in place for Mayo Clinic

Mayo Clinic remains open to care for those who need us most, but to protect our patients, effective immediately Mayo Clinic Hospital in Florida has enacted a "no visitors" policy for our hospital inpatient unit. While the no visitor policy applies only to the hospital, Mayo Clinic strongly recommends that all other patients seeking care on campus limit the number of non-patient companions to one. Both patient and companion will be screened upon arrival.

In addition:

- No flower or balloon deliveries will be allowed.
- All Patient Education and Support Group meetings have been suspended through March 31, 2020.
- The Mayo Clinic Volunteer Program has been temporarily suspended and we are asking our volunteers to not return to campus until notified.

Patient information available on Mayo Clinic COVID-19 hotline

Patients who have questions about COVID-19 may call the Mayo Clinic COVID-19 hotline at (904) 953-7100.

Mayo Clinic in Florida developing test for COVID-19

Mayo Clinic is developing and validating a rapid result test for COVID-19, also known as the coronavirus, for Mayo Clinic Laboratories in Florida, and is expected to have it available for patients later this month. Mayo Clinic has been working around the clock to develop the test which will allow patients to receive results within 24 hours. Testing became available in Arizona and Rochester and for Mayo Clinic Health System sites in Minnesota and Wisconsin earlier this week. Please note that capacity in the early stages will be limited to 200-300 people per day but we hope to expand capacity within weeks.

As home to one of the nation's largest reference laboratories, Mayo Clinic has been in close contact with officials from the Centers for Disease Control (CDC), and state health departments and other state and local partners. All positive samples will be sent to state departments of health, local officials, or CDC for appropriate follow-up testing and confirmation. To read more, click here.

Mayo Clinic staff mobilized to respond to pandemic

Mayo Clinic has instituted a Healthcare Incident Command System (HICS) to respond to COVID-19. HICS is a standardized, systematic approach to emergency response. This systematic process is designed to ensure coordination across Mayo Clinic and bring together over 100 staff from areas across the organization to draw on each other's expertise and ensure a cohesive and coordinated response to emergencies to best serve our patients, staff, and communities. Mayo Clinic instituted the HICS to ensure preparedness and responsiveness to the evolving nature of COVID-19.

Mayo Clinic updates staff guidance on telework, travel and large group meetings

On Tuesday, March 10, Mayo Clinic announced updates to staff travel and meeting policies as a precaution to ensure that staff and operations remain healthy and ready to best respond to evolving COVID-19 needs. Mayo Clinic has been following CDC guidelines and decided to take extra precautions to protect our staff and patients.

- Mayo staff who have been exposed to someone with COVID-19 will be asked to telework where possible. We are also implementing flexible policies and protections for workers who become

AMERICAN OVERSIGHT

symptomatic or need assistance to ensure that they receive appropriate care and support.

- Until further notice, Mayo Clinic is restricting non-essential business travel for its staff to all locations (international and domestic), including air or rail travel between Mayo Clinic locations.

- For personal travel and activities, Mayo staff are asked to take precautions to minimize the risk of exposure. CDC guidance currently advises against nonessential travel to affected areas described as having widespread or sustained community transmission.

- Mayo Clinic is suspending hosting large gatherings/events, such as medical conferences and continuing medical education seminars to minimize risk. Mayo is also recommending that large internal meetings be moved to a streamed or videoconference option.

If You Have Symptoms or Suspect You Were Exposed to COVID-19

The signs and symptoms of COVID-19 may appear two to 14 days after exposure and can include fever, cough, shortness of breath or difficulty breathing. The severity of COVID-19 symptoms can range from very mild to severe. People who are older or have existing medical conditions, such as heart disease, may be at higher risk of serious illness. This is similar to what is seen with other respiratory illnesses, such as influenza. Contact your doctor right away if you have COVID-19 symptoms and you've possibly been exposed to the virus. Call your doctor ahead to tell him or her about your symptoms and recent travels and possible exposure before you go to your appointment.

Check the Centers for Disease Control and Prevention website for additional updates on COVID-19. For all your COVID-19 coverage, click here.

***COVID-19 UPDATE* (Florida edition) is prepared by**
Mayo Clinic Division of External Relations and will be published as needed.

Date: Tuesday, March 17, 2020 4:20:51 PM
Attachments: MAYO COVID-19 RDLoincSnomedCodes 3-17-2020.xlsx

Another update on COVID-19 testing and reporting-

- MCL's current respiratory panel tests do not report COVID-19 results, but do report multiple types of coronavirus. (see panel tab on attached spreadsheet)
- COVID test LOINC's and SNOMED options are listed on attached spreadsheet
  - SCOV2, SCV2A / test codes are offered to internal Mayo patients only (not many **out of state** reports have gone out at this time)
  - COVID / test code will be offered to internal patients and external clients (**soon!**)
- Due to social distancing onsite staff are being sent home to work. Mailed (print) reports will not be sent during this time. Notification has been mailed to the receiving sites to set up fax numbers for reporting (if needed). Likely if you are receiving this email (and ELR) this is likely less important information, but sharing for your awareness. Please reach out to me directly or the Reportable Disease Team (507-538-7260) if alternative options need to be implemented for mailed reports.

Please let me know if you have questions/concerns.

Subject: Mayo ELR Workgroup Update: COVID-19 Testing & Reporting
Importance: High

Team,

We have been receiving numerous requests and updates about COVID-19 testing and reporting in recent days from state and local departments of health. We have been holding off on any official announcements to this group until we had some more concrete information to share. Below please find the latest information Corrisa has provided on Mayo's efforts:

Due to increased interest in COVID-19 testing/reporting, Mayo is anticipating bringing up a test: **SARS Coronavirus-2, PCR,Varies** in late March (anticipated March 20, pending no implementation issues). The test will be a Lab Developed Test which will be submitted to FDA for EUA (pending approval at a future date).

AMERICAN OVERSIGHT

Here is a list of LOINC values that will be reported for the test:

TEST ID	TEST CODE NAME	RESULT CODE	LOINC CODE	LOINC CODE DESCRIPTION	LOINC SOURCE REQUIRED	LOINC SOURCE TEXT	LOINC ORGANISM REQUIRED	LOINC ORGANISM / RESULT TEXT
SCOV2	SARS Coronavirus-2, PCR,Varies	608442	41458-1	SARS-CoV RNA XXX Ql NAA+probe	N		N	SARS Coronavirus-2, PCR
SCOV2	SARS Coronavirus-2, PCR,Varies	608446	59464-8	Microbiologist review	N		N	Microbiologist review of results
SCOV2	SARS Coronavirus-2, PCR,Varies	COVS	31208-2	Specimen source XXX	N		N	Specimen source

MCL will set up **all** test reports (positive, negative, invalid, indeterminate) to be sent to the state agencies to meet your surveillance needs, reports will be received via each agency's normal transmission mode.

A new LOINC and SNOMED table is attached with all additions and updates. Notes for changes are included on the tables.
Here are highlights:

- Based on feedback, some test reporting structures have been updated.
- New Mycobacterium organisms added (SNOMED)
- Some new tests that will be implemented March/April
- New NAS reporting (toxicology test reporting for newborns <1 month of age)

Please do not hesitate to reach out to our Mayo ELR Team Distribution List (DLMayoELRTeam@mayo.edu) if you require any additional information or guidance regarding this or any of our ELR results or processes. Once we have the official Test Announcement to be provided to our clients I will send another update along this channel to keep you all in the loop and prepared for receiving these results.

Thanks,
s.

Good Afternoon,

We need guidance on a patient who needs COVID-19 testing. The patient is a Miami Metro Dade police officer. The patient contacted our medical director, Dr. Pete Gutierrez, and informed him that he was in close contact with a person who was asymptomatic and tested positive for COVID-19. Our medical director told the patient that he should self-quarantine until he receives a test.

I called the Miami-Dade Department of Health Epidemiology department **(305) 470-5660** and was told that the patient is low-risk and quarantine.

Our medical offices are in the process of becoming a testing site, but we have the following barriers:

1. We don't have the necessary personal protective equipment; we are in the process of applying for the Department of Health Office of Emergency Management. We have tried to acquire PPE's from our medical suppliers, but they are out of stock.
2. LabCorp **(954) 218-4665** informed us that they don't have Nasopharyngeal swabs, and they are running low on Oropharyngeal swabs. They also can't provide PPEs.
3. Quest (**305) 323-1500** had no response, and we left several messages.

Epidemiology informed me that the patient doesn't qualify for testing that the best recourse is the tell the patient to self-quarantine or look for another organization to test.

I then called The COVID-19 Call Center | **1 (866) 779-6121**, and after 30 minutes on hold, I was told that I have the most recent procedures and to try to contact the Quest and LabCorp in the morning to open an account. I was informed that they have no further information.

I called the State of Florida Infectious Disease Outbreak Related Questions **(850) 245-4401**; I was instructed to continue to reach out to the COVID-19 State Emergency Operations Center (EOC) Emergency Requisition Request. They are also going to send an email to the local health departments to notify me of any changes.

Please inform me of anything else I can do; the Police department is concerned with the impact this may have on their workforce. I want to reassure them I am doing everything in my power to help. You can call me on my cell phone **(305) 216-3417** or my office at **(305)572-2086** if there are any changes. Thank you.

Best Regards,

NURSING HOME VISITS LIMITED AMID CORONAVIRUS FEARS

By Christine Sexton

TALLAHASSEE --- Gov. Ron DeSantis' administration is ordering long-term care facilities to temporarily block people from visiting residents if they have recently traveled internationally, been on cruise ships or been in contact with someone who has the novel coronavirus, known as COVID-19.

"These are important efforts to mitigate the risk to our most vulnerable population to COVID-19, which is our elderly population, particularly those with underlying medical conditions," DeSantis said Wednesday as he announced the directive....

2020 Preparedness Summit Postponed

Due to the intensifying public health emergency caused by the coronavirus disease (COVID-19), NACCHO has made the difficult but necessary decision to postpone the 2020 Preparedness Summit and reschedule it to August 23–26, 2020 at the Anatole Hotel in Dallas, Texas. This decision has been made in the interest of public safety and recognizing that many of you are directly and deeply engaged in response activities in your communities.

We appreciate your patience as we finalize the details related to this rescheduling. Additional information will be sent to registrants next week regarding registration, hotel reservations, and other logistics. Thank you for your continued support and we look forward to seeing you in August.

Coronavirus (COVID-19) Updates

All About Coronavirus

This week, the World Health Organization has declared COVID-19 a global pandemic, meaning that it has spread to multiple countries around the world at the same time. More regions identified community-spread of the virus, multiple legislative responses were floated to address the economic impacts, and hearings galore focused on the response.

Quick Reminder: The input from local health department staff about what you are experiencing on the ground has been *invaluable* to our advocacy efforts. If you have not already provided feedback about your COVID-19 response, or **if you have information to update, please fill out the form** here.

CDC to Award $560 Million to State and Local Health Departments

The Department of Health and Human Services (HHS) has announced upcoming action by the CDC to provide more than $560 million for state and local jurisdictions in support of the nation's response to novel coronavirus (COVID-19). The funding is part of the $8.3 billion emergency supplemental that was passed last week and signed by President Trump. Funding will go to the 62 states, localities, and territories that are funded for public health emergency preparedness grants as well as the cities of Philadelphia and Houston and the Cherokee Nation.

President Announces New Travel Restrictions, Floats tax relief

On Wednesday, President Trump addressed the nation from the Oval Office to announce a 30-day travel ban on foreign visitors from most of Europe in an effort to curb the spread of the virus. The President also announced he would ask Congress to increase funding for the Small Business Administration by $50 billion to help provide economic loans to impacted regions, seek a temporary payroll tax cut for worker, and suspend federal tax payments for businesses.

Congress Plots Next Moves on COVID Relief

On Thursday, the U.S. Capitol Complex announced closures of the House and Senate Office Buildings, as well as the Capital, to most visitors. Some members of Congress announced they were self-quarantining due to exposure to individuals diagnosed with the disease, and a staff member in Senator

AMERICAN OVERSIGHT

Cantwell's office tested positive for virus.

House Democrats introduced their own multi-billion dollar (H.R. 6201) economic stimulus package, proposing spending increases for social safety net programs, paid sick leave for certain workers, wide-spread free COVID testing, funding for children's school lunches, and expanding unemployment insurance.

On the other side of the Hill, Senate Majority Leader Mitch McConnell (R-KY) announced that the Senate will delay its recess scheduled for next week to work on an economic relief package to deal with the COVID-19 outbreak. The House is still scheduled to go on its scheduled break next week and Members of Congress will travel to their home districts.

COVID-19 Hearings

A number of congressional hearings were held this week on COVID-19. A brief synopsis of each is below.

- The House Appropriations Labor, HHS, Education Appropriations Subcommittee held the hearing "Centers for Disease Control (CDC) and Prevention Budget Request for FY2021" that featured CDC Director Dr. Robert Redfield and other CDC officials. In his testimony, Dr. Redfield highlighted several areas within the COVID-19 outbreak response that need funding within the FY 2021 CDC budget. These include strengthening global health security, improving public health data infrastructure, and strengthening local public health workforce. Redfield received many questions about testing failures. Subcommittee Chair Rosa DeLauro (D-CT) and Ranking Member Tom Cole (R-OK) as well as several other members of the subcommittee pledged that they will not cut CDC's budget as the President requested and cited the importance of solid funding for the agency to respond to emergencies like COVID-19.
- The House Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Subcommittee held the hearing "Department of Agriculture Budget Request for FY2021." U.S. Department of Agriculture (USDA) Secretary Sonny Perdue testified before the committee, where he told lawmakers to consider reauthorization for a pandemic food stamp program as part of an economic stimulus package. Perdue was asked by Rep. DeLauro (D-CT) if children can receive free and reduced meals if their schools close. Perdue testified that USDA would waive requirements that students must eat in group settings and allow meals to be served at off-site campus sites like libraries and churches for low-income children who receive free and reduced meals.
- The House Homeland Security Emergency Preparedness, Response, and Recovery Subcommittee held the hearing "Community Perspectives on Coronavirus Preparedness and Response" that featured testimony from four witnesses, including two state health officers. Former White House Ebola response coordinator Ron Klain lauded Congress for passing emergency supplemental funding and added the Administration must ensure funding gets out to state and local health departments as quickly as possible. Assistant Commissioner for the Division of Public Health Infrastructure, Laboratories and Emergency Preparedness for New Jersey Department of Health Christopher Neuwirth testified how New Jersey prepared for COVID-19 coordinating response activities across the state health department. Executive Vice President and Chief Operating Officer for Trust for America's Health Dr. J. Nadine Garcia gave recommendations to Congress and the Administration how they can better respond to infectious disease outbreaks by prioritizing more investment in core public health programs. Dr. Garcia added that there has been complacency about disinvestment in public health preparedness activities and infrastructure such as the workforce.
- The House Small Business Committee held the hearing "The Impact of Coronavirus on America's Small Businesses" to look at how the virus will impact small businesses across the country. Chairwoman Nydia Vel$\diamond$zquez (D-NY) said that small businesses will go through hardships and disruption in the coming months, especially in the tourism industry due to uncertainty and disruptions caused by the virus. Vel$\diamond$zquez saidshe hoped emergency funding will allow for small businesses to access federal loans if they suffer losses related to the outbreak. Rep. Rob Bishop (R-UT) asked if paid leave would undermine small businesses that need workers at the business location rather than telecommuting. Andrew Chau CEO of Boba Guys responded that workers constantly worrying about their next paycheck will not allow them to be at their best, so some security would be beneficial to workers. The House Oversight and Reform Committee held the hearing "Coronavirus Preparedness and Response" featuring National Institutes of Health (NIH) Institute of Allergy and Infectious Diseases Director Anthony Fauci and CDC Director Redfield. Dr. Fauci highlighted the development of a vaccine for coronavirus. COVID-19 vaccine research is expected to enter the Phase 1 clinical trial in about four weeks. Dr. Fauci also testified that there will be more cases and things will get worse than they are now, adding that COVID-19 is ten times more lethal than the flu. Rep. Ro Khanna (D-CA) pointed out that funding for the CDC is only 1.5% of the defense budget. In response to questions, Dr. Redfield testified that cuts in public health funding mean that we are not able to "overprepare" for infectious disease outbreaks and meet the five core competencies of the CDC. These competencies include data modernization, predicative analysis, public health workforce, and global health security. Redfield particularly highlighted how the CDC budget affects local health departments, as about 70% of the CDC budget goes to local, state, and tribal health departments and community based organizations who are the forefront of public health protection.
- The House Committee on Homeland Security held the hearing "Confronting the Coronavirus: The Federal Response" that featured Acting Deputy Secretary for Homeland Security (DHS) Ken Cuccinelli and CDC Deputy Director for Public Health Service and Implementation Science Dr. Stephen Redd. Cuccinelli testified that DHS' top priority is the safety and security of the American people and slowing the spread of the virus. Further, DHS is screening passengers coming in from China, Iran, and Italy at 11 designated airports of entry, but added those coming through most of Europe are not being tested because we do not have the resources to screen 100,000 people entering the country. Dr. Redd testified that the response of CDC is built on decades of experience fighting infectious diseases, the network of public health workers in the field, and the use of public health precautions such as handwashing, staying home when sick, and avoiding large crowds. Dr. Redd said he understood the frustrations of the Congress and American public that more tests are not widely available but reiterated that private screeners can test one million people.
- The House Committee on Appropriations Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies held the hearing "Food and Drug Administration Budget Request for FY2021," featuring testimony from FDA commissioner Dr. Stephen Hahn. COVID-19 remained the main topic, with many of the Members of Congress questioning Dr. Hahn about the effect of COVID-19 on the U.S. drug and medicine supply chain Chairman Sanford Bishop (D-GA) questioned Dr. Hahn about non-CDC labs conducting COVID-19 tests. Dr. Hahn testified that the FDA requires that these labs provide the results within 15 days so that the FDA can conduct an independent scientific review to ensure the accuracy of the tests.

Senators Ask for Clarification about Protecting Private Prisons

Senators Elizabeth Warren (D-MA) and Ed Markey (D-MA) along with 14 other Democratic Senators sent a letter requesting information about the plans the Federal Bureau of Prisons and the private companies the agency contracts with have in place to protect inmates, staff, and their families from COVID-19. There are currently over 175,000 inmates in federal prisons and jails.

Subject: Outstanding Congressional Questions for DOH
Date: Tuesday, March 17, 2020 10:41:38 AM

Courtney/Drew, below are outstanding questions from the congressional delegation. Please provide answers when you have a chance. We're working to lock in details for today's call with the Surgeon General and the delegation - if you can provide answers prior to then, the call will go smoother. Thanks in advance.

(Rep Daniel Webster)
Is there a contact at the FL DOH for local providers who are looking for tests kits? We have a clinic in the Villages trying to get test kits that has asked us for assistance. Sumter County Health Dept told them they didn't have any and that they were letting the private sector take the lead on testing, but couldn't provide them any information on where to get some. I know South Fla is the priority for new tests, but given the most of the Villagers are in the "older adult" would they be sort of 'next in line"?

(Rep Ted Deutch)
We have received several inquiries from constituents who report symptoms of COVID-19 but when they call county health department they are advised to call doctors and then bounced around from docs, to hospitals, to urgent care, and back to fdoh. Is there a way we can get calls diverted to a very clear screening questionnaire that helps people understand either why they don't fit testing criteria or if they do fit, where to go to get tested?
In the meantime, where is the best place to direct constituents who have been bounced around and need a clear answer about testing eligibility and acesss?

(Rep Stephanie Murphy)
1. We have several health care providers in our district who are concerned about access to N95 masks and personal protective equipment. When will we have more and how do they get them?
2. Additionally, they are asking when the State will have a sufficient number of tests to meet the CDC official guidance on who gets tested. I know the guidelines in Florida right now are strict because of lack of supply and capacity. We are hopeful to get to a point that anyone who meets CDC guidelines for a test can get tested.
3. Finally, has the State confirmed that we are indeed in the community spread phase of the virus? If not, why is that the conclusion? If so, what changes are happening as a result?

Please note that under Florida law correspondence sent to the Governor's Office, which is not confidential or exempt pursuant to chapter 119 of the Florida Statutes, is a public record made available upon request.

PG&E Strikes $1B Wildfire Settlement With FEMA

Pacific Gas and Electric Co. struck a $1 billion deal with the Federal Emergency Management Agency to reimburse it for services provided in response to Northern California wildfires caused by the utility, the parties told the judge overseeing PG&E's Chapter 11 bankruptcy Tuesday, while the California emergency agency completely withdrew its claim.

AMERICAN OVERSIGHT

From: Pasley, Cassandra
To: Cooksey, Samantha
Cc: Coppola, Courtney; Roberson, Shamarial
Subject: PPE Sharing
Date: Tuesday, March 17, 2020 3:32:17 PM

Hi Samantha,

Ohio had its practitioners reduce their services and share PPE. See the link below regarding sharing of the PPE.

Ohio State Dental Board COVID-19 Advisory 2020-01, March 16, 2020 (For optimal viewing, please use a desk top screen)

The State Dental Board has been closely monitoring the spread of the coronavirus. As Dentists, Hygienists & staff we are a part of the healthcare community and have a responsibility in the prevention and mitigation efforts of the administration during this outbreak. Dentists are also in of the highest risk categories for both transmission and contraction of the Coronavirus as a majority of the procedures we perform creates significant aerosols in the operatories. As a part of the healthcare community and the community at large, we have to protect the safety of our patients and staff. The OSDB is closely monitoring the situation and decided to have these recommendations to the practicing dentists. This is a very difficult decision, but it comes at a critical time and it is our responsibility to take leadership in this situation and have protocols in place to reduce the spread and impact of Coronavirus amongst the communities we practice and live. The plan & recommendations will change as the situation demands and evolves.

These recommendations to the dental profession are intended to reduce the risk of patients' exposure to COVID-19 and to preserve PPE and supplies, while still allowing access to necessary and emergency dental services that will maintain the oral health of the citizens of Ohio and keep them out of the hospital ER.

Governor Mike DeWine contacted the Board and the Ohio Dental Association and asked for our help in addressing the spread of COVID-19. As integral parts of the medical community, we are being called to review our inventories and appointment books, and make the adjustments to provide mutual aid and relief to our partners in the medical and surgical communities.

Governor DeWine has requested the following:

A review of inventories and identification of any surplus personal protective equipment and supplies. Once identified, contact your local Emergency Management Agency about sharing these goods with local hospitals and medical clinics for COVID-19 patients and clinicians. EMA contact list can be found here: https://webeoctraining.dps.ohio.gov/ohiocountyEMADirectorList/countyemalist_web.aspx

Please reschedule elective procedures including but not limited to:

- Any cosmetic or aesthetic procedures, such as veneers, teeth bleaching, or cosmetic bonding
- All routine hygiene appointments
- Any orthodontic procedures not including those that relieve pain and infection or restore oral function or are trauma-related
- Initiation of any crowns, bridges, or dentures that do not address or prevent pain or restore normal oral

AMERICAN OVERSIGHT

functioning

- Any periodontal plastic surgery
- Extraction of asymptomatic non-carious teeth
- Recall visits for periodontally healthy patients
- Delay all appointments for high risk patients, including ASA 2 and 3 patients, unless it is an emergency

By sharing supplies we are directly supporting our fellow clinicians as they undertake the greatest viral threat in modern history. By rescheduling elective procedures we are doing our part to prevent community spread.

We urge you to undertake the two above strategies and consider the following additional measures:

o Use cell phone triage - use the cell phone to take a picture of the area and text to the dentist
o Have a detailed questionnaire/conversation before scheduling appointments and prior to any procedure about flu like symptoms, travel abroad for self and family/friends/co-workers etc. to permit a thorough evaluation of the patient
o Consider taking the temperature of the patient at the outset
o Reconsider scheduling high risk patients unless they need emergency treatment
o Careful evaluation of the need for scheduling of ASA 2 & 3 patients
o Use of 1% hydrogen peroxide rinse prior to examination of the oral cavity by the patient to reduce microbial load
o Use of rubber dam isolation & high volume suction to limit aerosol in treatment procedures
o Proper disinfection protocol between patients with a possible repeat of the protocol for a 2nd time.

<u>To prevent over-crowding of waiting areas or the possible spread of infection</u>

§ Consider having patients wait in their cars instead of the waiting areas to prevent inadvertent spread of the virus (call patient when surgical area is ready for treatment)
§ Consider staggering appointment times to reduce waiting room exposure
§ Consider rescheduling elective procedures on ASA 2 & 3 patients (https://www.asahq.org/standards-and-guidelines/asa-physical-status-classification-system)
§ Have front desk staff take measures to prevent exposure
§ Have sterilization staff, lab technicians and auxiliary staff take adequate measures to prevent exposure
§ Limit access to waiting room use to only patients. Accompanying individuals have to wait in their respective transportation.
§ Remove all magazines/toys etc from waiting area to prevent contamination.

Thank you for your understanding and cooperation as we manage through these very difficult and unprecedented times.

Subject: RESPONSE _ Travel moratorium? Article?
Date: Monday, March 16, 2020 11:01:38 AM

3/16/20

Good Morning,

Sorry, for the delay, I was out Friday, 3/13/20.
Below is the official response received.

From: Statewide Travel Management System
Sent: Friday, March 13, 2020 7:14 AM
To: zzzz feedback, DEPCS_STMS <DEPCS_STMS@flhealth.gov>; Statewide Travel Management System <StatewideTravelManagementSystem@flhealth.gov>
Subject: RE: HELP- Travel moratorium?

We haven't received any notification of this. If and when we do, it will go out to everyone, just like during a hurricane.

Additionally, this was shared Friday, 3/13/20, which I trust you received.

From: DOH COMMUNICATIONS OFFICE
Sent: Friday, March 13, 2020 9:20 AM
Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-

AMERICAN OVERSIGHT

risk or who have dependents or care for those with underlying conditions or vulnerabilities.

- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Happy Day

To: Johnson, Jennifer S
Subject: RE: 2020 03 12 COVID-19 Call Center Script working DRAFT
Date: Friday, March 13, 2020 11:44:47 AM

It still stated this:

Q28 What do I do if I have symptoms?/Should I be tested for COVID-19?

A: If you develop a fever and symptoms of respiratory illness, such as cough or shortness of breath, within 14 days after travel from a country with transmission of COVID-19, you should call a healthcare professional and mention your recent travel.
If you have had close contact with someone showing these symptoms who has recently traveled from an impacted area, you should call a healthcare professional and mention your close contact and their recent travel.
Your healthcare professional will either perform test in office or coordinate testing with your county health department.

Q32 **How does a healthcare provider/facility obtain testing?**
A: If a healthcare provider has a symptomatic patient, they should contact their local county health department's epidemiology program (provide county's epi contact information) to coordinate care and testing if needed.

Subject: CDC Requirement

Hello Dr. Villalta –

One of the requirements just presented by CDC is as follows:

1. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter

AMERICAN OVERSIGHT

flight.

Is this something you could help arrange? The air ambulance company is not doing so.

Thanks,

Eleni

Subject: CHD Dental Clinic Guidance

Shamarial,

Please see the information below that we propose Dr. Traul send out to the CHD Dental Directors.

The Florida Department of Health (FDOH) acknowledges the growing concern and risks the public and dental professionals face from COVID-19. All dental providers and healthcare professionals play an important role in mitigating the spread of COVID-19. Please review the CDC Guidance for Healthcare Professionals.

On March 16, 2020 federal recommendations were released suggesting social distance and the prevention of groups ten or more. Also on March 16, 2020 the American Dental Association released ADA Guidance to postpone elective procedures for the next three weeks.

Due to the extraordinary situation, the Florida Department of Health recommends dental programs postpone elective procedures for the next three weeks and reassess the situation at that time. Concentrating on the provision of emergency dental care will serve the public and alleviate any emergencies from placing more stress on hospitals and emergency rooms. Clinics should establish procedures to provide care for these patients after taking appropriate precautions to limit the risk of spreading COVID-19. The FDOH recommends all living in Florida practice social distancing and take steps to limit the risk of spreading COVID-19.

Thanks,
Shay

Subject: RE: CHD Dental Clinic Guidance
Date: Tuesday, March 17, 2020 4:27:44 PM
Importance: High

Shay,

Here are my suggestions:

The Florida Department of Health (FDOH) acknowledges the growing concern and risks the public and dental professionals face from COVID-19. All dental providers and healthcare professionals play an important role in mitigating the spread of COVID-19. Please review the CDC Guidance for Healthcare Professionals.

On March 16, 2020 federal recommendations were released suggesting social distance and the prevention of groups ten or more. Also on March 16, 2020 the American Dental Association released ADA Guidance to postpone elective procedures for the next three weeks.

Due to the extraordinary situation, the Florida Department of Health recommends dental programs postpone elective procedures for the next three weeks and reassess the situation at that time. Concentrating on the provision of urgent dental care will serve the public and alleviate any emergencies from placing more stress on hospitals and emergency rooms. Clinics should establish procedures to provide care for these patients after taking appropriate precautions to limit the risk of spreading COVID-19, including screening of patients and caregivers prior to their arrival in our dental offices. The FDOH recommends all living in Florida practice social distancing and take steps to limit the risk of spreading COVID-19.

With those couple of modifications in the last paragraph, it's good to go. Thank you!

Louise St. Laurent

Date: Wednesday, March 11, 2020 6:16:36 PM

Looks good thanks

From: Pritchard, Scott <Scott.Pritchard@flhealth.gov>
Sent: Wednesday, March 11, 2020 5:43 PM
To: Blackmore, Carina <Carina.Blackmore@flhealth.gov>
Subject: RE: CHD EPI Travel Guidance Suggestions RE: UPDATE REGARDING INTERNATIONAL TRAVEL

Added a few things.

Implementation Guidance for CHDs.

For travelers, CHDs are only asked to conduct "self-monitoring with public health supervision" for those persons which DOH is getting Epi-X notifications (Level 3 China and Iran, and specific airline/ship conveyance contact investigations). The character of this activity has not changed.

For level 2, other level 3 countries, and cruises for which DOH is not getting traveler data from CDC, the self-isolation and social-distancing is self-driven by the travelers. When asked about situations in these categories, CHDs should make recommendations in alignment to the statements below. CHDs are not being asked to take responsibility for day to day monitoring of these groups.

For countries that have a level 3 travel advisory (indicating sustained community transmission) persons are being advised to self-isolate and practice social distancing, they should "remain at home" and not go to work or school.

CDC guidance on this topic generally applies: https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html

Medium Risk - Travelers from mainland China (outside Hubei Province) or Iran

- Recommendation to remain at home or in a comparable setting
- Practice social distancing
- Self-monitoring with public health supervision as determined by local priorities
- Recommendation to postpone additional long-distance travel on commercial conveyances after they reach their final destination

Medium Risk - Travelers from other country with widespread transmission

- Recommendation to remain at home or in a comparable setting,
- Practice social distancing
- Self-monitoring
- Recommendation to postpone additional long-distance travel on commercial conveyances after they reach their final destination

AMERICAN OVERSIGHT

Medium Risk - Travelers from country with sustained community transmission

- Practice social distancing
- Self-observation

Self-Isolation: means self-driven separation of a person or group of people known or reasonably believed to be *infected with a communicable disease and potentially infectious* from those who are not infected to prevent spread of the communicable disease. Persons that are self-isolating should practice remain at home and practice social distancing.

Self-monitoring: means people should monitor themselves for fever by taking their temperatures twice a day and remain alert for cough or difficulty breathing. If they feel feverish or develop measured fever, cough, or difficulty breathing during the self-monitoring period, they should self-isolate, limit contact with others, and seek advice by telephone from a healthcare provider or their local health department to determine whether medical evaluation is needed.

Self-observation: means people should remain alert for subjective fever, cough, or difficulty breathing. If they feel feverish or develop cough or difficulty breathing during the self-observation period, they should take their temperature, self-isolate, limit contact with others, and seek advice by telephone from a healthcare provider or their local health department to determine whether medical evaluation is needed.

Social distancing means remaining out of congregate settings, avoiding mass gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Congregate settings are crowded public places where close contact with others may occur, such as shopping centers, movie theaters, stadiums.

UPDATE REGARDING INTERNATIONAL TRAVEL: Department of Health COVID-19 Update

FOR IMMEDIATE RELEASE
March 9, 2020

AMERICAN OVERSIGHT

Contact:
Communications Office
NewsMedia@flhealth.gov
(850) 245-4111

TALLAHASSEE — The Florida Department of Health is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available. The Department will be sending this press release update every morning, seven days per week.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow the **new CDC guidelines**, summarized below:

- **Level 3:** Mandatory 14-day self-isolation and practice social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- **Level 2 and Cruises:** Monitor your health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with coronavirus disease 2019 (COVID-19), including two positive cases in Florida.

COVID-19 Cases

Florida Residents Diagnosed in Florida				
	County	**Age**	**Sex**	**Known History of International Travel**
1	**Manatee**	**63**	**Male**	**No**
2	**Hillsborough**	**29**	**Female**	**Yes**
3	**Santa Rosa**	**71**	**Male**	**Yes**
4	**Broward**	**75**	**Male**	**No**
5	**Broward**	**65**	**Male**	**No**
6	**Lee**	**77**	**Female**	**Yes**
7	**Lee**	**77**	**Male**	**Yes**
8	**Charlotte**	**54**	**Female**	**Yes**

AMERICAN OVERSIGHT

9	**Okaloosa**	**61**	**Female**	**Yes**
10	**Volusia**	**66**	**Female**	**Yes**
11	**Manatee**	**81**	**Female**	**Yes**
12	**Broward**	**67**	**Male**	**No**

COVID-19 Testing Results

- 18 Florida cases (17 Florida residents)
  - 12 diagnosed in Florida
  - 5 diagnosed and isolated in another state
  - 1 confirmed positive non-Florida resident isolated in Florida.
- 115 tests in state results pending
- 140 negatives
- 1,104 people monitored to date
- 302 of 1,104 are currently being monitored

People who have tested positive for COVID-19 will remain in isolation until they test negative.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

- Governor Ron DeSantis issued an Executive Order directing the State Surgeon General to declare a public health emergency.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Established an incident management team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities, and hospitals.
- Established a public call-center for questions regarding COVID-19.
- Developed and distributed the communications approved COVID-19 Presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons

AMERICAN OVERSIGHT

Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments

- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local county health department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently

AMERICAN OVERSIGHT

traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the county health department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

Added a few things.
Implementation Guidance for CHDs.

For travelers, CHDs are only asked to conduct "self-monitoring with public health supervision" for those persons which DOH is getting Epi-X notifications (Level 3 China and Iran, and specific airline/ship conveyance contact investigations). The character of this activity has not changed.

For level 2, other level 3 countries, and cruises for which DOH is not getting traveler data from CDC, the self-isolation and social-distancing is self-driven by the travelers. When asked about situations in these categories, CHDs should make recommendations in alignment to the statements below. CHDs are not being asked to take responsibility for day to day monitoring of these groups.

For countries that have a level 3 travel advisory (indicating sustained community transmission) persons are being advised to self-isolate and practice social distancing, they should "remain at home" and not go to work or school.

CDC guidance on this topic generally applies: https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html

Medium Risk - Travelers from mainland China (outside Hubei Province) or Iran

- Recommendation to remain at home or in a comparable setting
- Practice social distancing
- Self-monitoring with public health supervision as determined by local priorities
- Recommendation to postpone additional long-distance travel on commercial conveyances after they reach their final destination

Medium Risk - Travelers from other country with widespread transmission

- Recommendation to remain at home or in a comparable setting,
- Practice social distancing
- Self-monitoring
- Recommendation to postpone additional long-distance travel on commercial conveyances after they reach their final destination

Medium Risk - Travelers from country with sustained community transmission

- Practice social distancing
- Self-observation

Self-Isolation: means self-driven separation of a person or group of people known or reasonably believed to be *infected with a communicable disease and potentially infectious* from those who are not infected to prevent spread of the communicable disease. Persons that are self-isolating should practice remain at home and practice social distancing.

AMERICAN OVERSIGHT

Self-monitoring: means people should monitor themselves for fever by taking their temperatures twice a day and remain alert for cough or difficulty breathing. If they feel feverish or develop measured fever, cough, or difficulty breathing during the self-monitoring period, they should self-isolate, limit contact with others, and seek advice by telephone from a healthcare provider or their local health department to determine whether medical evaluation is needed.

Self-observation: means people should remain alert for subjective fever, cough, or difficulty breathing. If they feel feverish or develop cough or difficulty breathing during the self-observation period, they should take their temperature, self-isolate, limit contact with others, and seek advice by telephone from a healthcare provider or their local health department to determine whether medical evaluation is needed.

Social distancing means remaining out of congregate settings, avoiding mass gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Congregate settings are crowded public places where close contact with others may occur, such as shopping centers, movie theaters, stadiums.

Can you add a few expectations associated with self isolation and self observation -I am then thinking we can use that elsewhere also

Subject: CHD EPI Travel Guidance Suggestions RE: UPDATE REGARDING INTERNATIONAL TRAVEL

Implementation Guidance for CHDs.

For travelers, CHDs are only asked to conduct "self-monitoring with public health supervision" for those persons which DOH is getting Epi-X notifications (Level 3 China and Iran, and specific airline/ship conveyance contact investigations). The character of this activity has not changed.

For level 2, other level 3 countries, and cruises for which DOH is not getting traveler data from CDC, the self-isolation and social-distancing is self-driven by the travelers. When asked about situations in these categories, CHDs should make recommendations in alignment to the statements below. CHDs are not being asked to take responsibility for day to day monitoring of these groups.

For countries that have a level 3 travel advisory (indicating sustained community transmission) persons are being advised to self-isolate and practice social distancing, they should "remain at home" and not go to work or school.

CDC guidance on this topic generally applies: https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html

Medium Risk - Travelers from mainland China (outside Hubei Province) or Iran

AMERICAN OVERSIGHT

- Recommendation to remain at home or in a comparable setting
- Practice social distancing
- Self-monitoring with public health supervision as determined by local priorities
- Recommendation to postpone additional long-distance travel on commercial conveyances after they reach their final destination

Medium Risk - Travelers from other country with widespread transmission

- Recommendation to remain at home or in a comparable setting,
- Practice social distancing
- Self-monitoring
- Recommendation to postpone additional long-distance travel on commercial conveyances after they reach their final destination

Medium Risk - Travelers from country with sustained community transmission

- Practice social distancing
- Self-observation

Self-Isolation: means self-driven separation of a person or group of people known or reasonably believed to be *infected with a communicable disease and potentially infectious* from those who are not infected to prevent spread of the communicable disease.

Self-observation:

Social distancing means remaining out of congregate settings, avoiding mass gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Congregate settings are crowded public places where close contact with others may occur, such as shopping centers, movie theaters, stadiums.

UPDATE REGARDING INTERNATIONAL TRAVEL: Department of Health COVID-19 Update

FOR IMMEDIATE RELEASE
March 9, 2020

AMERICAN OVERSIGHT

Contact:
Communications Office
NewsMedia@flhealth.gov
(850) 245-4111

TALLAHASSEE — The Florida Department of Health is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available. The Department will be sending this press release update every morning, seven days per week.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow the **new CDC guidelines**, summarized below:

- **Level 3:** Mandatory 14-day self-isolation and practice social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- **Level 2 and Cruises:** Monitor your health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with coronavirus disease 2019 (COVID-19), including two positive cases in Florida.

COVID-19 Cases

9	Okaloosa	61	Female	Yes
10	Volusia	66	Female	Yes
11	Manatee	81	Female	Yes
12	Broward	67	Male	No

COVID-19 Testing Results

- 18 Florida cases (17 Florida residents)
  - 12 diagnosed in Florida
  - 5 diagnosed and isolated in another state
  - 1 confirmed positive non-Florida resident isolated in Florida.
- 115 tests in state results pending
- 140 negatives
- 1,104 people monitored to date
- 302 of 1,104 are currently being monitored

People who have tested positive for COVID-19 will remain in isolation until they test negative.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

- Governor Ron DeSantis issued an Executive Order directing the State Surgeon General to declare a public health emergency.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Established an incident management team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities, and hospitals.
- Established a public call-center for questions regarding COVID-19.
- Developed and distributed the communications approved COVID-19 Presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.

AMERICAN OVERSIGHT

- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local county health department (CHD) and mention their recent travel or close contact.

AMERICAN OVERSIGHT

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the county health department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

    - 5 diagnosed and isolated in another state
    - 1 confirmed positive non-Florida resident isolated in Florida.
- 115 tests in state results pending
- 140 negatives
- 1,104 people monitored to date
- 302 of 1,104 are currently being monitored

People who have tested positive for COVID-19 will remain in isolation until they test negative.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued an Executive Order directing the State Surgeon General to declare a public health emergency.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Established an incident management team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities, and hospitals.
- Established a public call-center for questions regarding COVID-19.
- Developed and distributed the communications approved COVID-19 Presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.

AMERICAN OVERSIGHT

- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local county health department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the county health department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

To: Blackmore, Carina <Carina.Blackmore@flhealth.gov>
Subject: RE: CHD EPI Travel Guidance Suggestions RE: UPDATE REGARDING INTERNATIONAL TRAVEL

Added a few things.

Implementation Guidance for CHDs.

For travelers, CHDs are only asked to conduct "self-monitoring with public health supervision" for those persons which DOH is getting Epi-X notifications (Level 3 China and Iran, and specific airline/ship conveyance contact investigations). The character of this activity has not changed.

For level 2, other level 3 countries, and cruises for which DOH is not getting traveler data from CDC, the self-isolation and social-distancing is self-driven by the travelers. When asked about situations in these categories, CHDs should make recommendations in alignment to the statements below. CHDs are not being asked to take responsibility for day to day monitoring of these groups.

For countries that have a level 3 travel advisory (indicating sustained community transmission) persons are being advised to self-isolate and practice social distancing, they should "remain at home" and not go to work or school.

CDC guidance on this topic generally applies: https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html

Medium Risk - Travelers from mainland China (outside Hubei Province) or Iran

AMERICAN OVERSIGHT

- Recommendation to remain at home or in a comparable setting
- Practice social distancing
- Self-monitoring with public health supervision as determined by local priorities
- Recommendation to postpone additional long-distance travel on commercial conveyances after they reach their final destination

Medium Risk - Travelers from other country with widespread transmission

- Recommendation to remain at home or in a comparable setting,
- Practice social distancing
- Self-monitoring
- Recommendation to postpone additional long-distance travel on commercial conveyances after they reach their final destination

Medium Risk - Travelers from country with sustained community transmission

- Practice social distancing
- Self-observation

Self-Isolation: means self-driven separation of a person or group of people known or reasonably believed to be *infected with a communicable disease and potentially infectious* from those who are not infected to prevent spread of the communicable disease. Persons that are self-isolating should practice remain at home and practice social distancing.

Self-monitoring: means people should monitor themselves for fever by taking their temperatures twice a day and remain alert for cough or difficulty breathing. If they feel feverish or develop measured fever, cough, or difficulty breathing during the self-monitoring period, they should self-isolate, limit contact with others, and seek advice by telephone from a healthcare provider or their local health department to determine whether medical evaluation is needed.

Self-observation: means people should remain alert for subjective fever, cough, or difficulty breathing. If they feel feverish or develop cough or difficulty breathing during the self-observation period, they should take their temperature, self-isolate, limit contact with others, and seek advice by telephone from a healthcare provider or their local health department to determine whether medical evaluation is needed.

Social distancing means remaining out of congregate settings, avoiding mass gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Congregate settings are crowded public places where close contact with others may occur, such as shopping centers, movie theaters, stadiums.

UPDATE REGARDING INTERNATIONAL TRAVEL: Department of Health COVID-19 Update

FOR IMMEDIATE RELEASE
March 9, 2020

Contact:
Communications Office
NewsMedia@flhealth.gov
(850) 245-4111

TALLAHASSEE — The Florida Department of Health is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available. The Department will be sending this press release update every morning, seven days per week.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow the **new CDC guidelines**, summarized below:

- **Level 3:** Mandatory 14-day self-isolation and practice social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- **Level 2 and Cruises:** Monitor your health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with coronavirus disease 2019 (COVID-19), including two positive cases in Florida.

COVID-19 Cases

Florida Residents Diagnosed in Florida				
	County	Age	Sex	Known History of International

AMERICAN OVERSIGHT

				Travel
1	Manatee	63	Male	No
2	Hillsborough	29	Female	Yes
3	Santa Rosa	71	Male	Yes
4	Broward	75	Male	No
5	Broward	65	Male	No
6	Lee	77	Female	Yes
7	Lee	77	Male	Yes
8	Charlotte	54	Female	Yes
9	Okaloosa	61	Female	Yes
10	Volusia	66	Female	Yes
11	Manatee	81	Female	Yes
12	Broward	67	Male	No

COVID-19 Testing Results

- 18 Florida cases (17 Florida residents)
  - 12 diagnosed in Florida
  - 5 diagnosed and isolated in another state
  - 1 confirmed positive non-Florida resident isolated in Florida.
- 115 tests in state results pending
- 140 negatives
- 1,104 people monitored to date
- 302 of 1,104 are currently being monitored

People who have tested positive for COVID-19 will remain in isolation until they test negative.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

- Governor Ron DeSantis issued an Executive Order directing the State Surgeon General to declare a public health emergency.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Established an incident management team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and healthcare stakeholders conference calls to provide

AMERICAN OVERSIGHT

statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 EST.

- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities, and hospitals.
- Established a public call-center for questions regarding COVID-19.
- Developed and distributed the communications approved COVID-19 Presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and

AMERICAN OVERSIGHT

- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local county health department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the county health department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Attachments:	image001.png

Good Afternoon,

As a follow-up to this morning's update, below you will find details on CDC's awarding of over $560 million State and local jurisdictions in support of COVID-19 response, and community mitigation strategies for Seattle (WA) and Santa Clara (CA).

CDC to Award Over $560 Million to State & Local Jurisdictions in Support of COVID-19 Response (more here)
The Department of Health and Human Services (HHS) is announcing another upcoming action by the Centers for Disease Control and Prevention (CDC) to provide resources to state and local jurisdictions in support of our nation's response to the coronavirus disease 2019 (COVID-19). The $8.3 billion dollar Supplemental passed by Congress included statutory language which prescribed the exact formula for disbursing the money: states will receive 90% of their 2019 CDC PHEP grants. This marks the first tranche of funding to states from the $8.3 billion supplemental. Your state health officers are receiving a letter today from CDC outlining what is needed to receive the funding, essentially they need to submit a spend plan and they will receive guidance on what that spend plan should contain.
-

White House Coronavirus Task Force Announces Community Mitigation Strategies for Seattle, Santa Clara

The White House Coronavirus Task Force today recommended 30-day mitigation strategies for Seattle-King, Pierce, and Snohomish County, Washington, and Santa Clara County, California due to widespread transmission of coronavirus disease 2019 (COVID-19). These mitigation activities are designed to address the effects of COVID-19 on areas that are experiencing community spread.

"President Trump has made clear that the Task Force must move decisively to protect the health and safety of the American people," said Vice President Mike Pence. "These recommendations outline a whole-of-community approach to immediately minimize the impacts of coronavirus in these cities and towns. I look forward to the continued partnership between the Task Force and State and local leaders."

Earlier today, Vice President Pence spoke with California Governor Gavin Newsom and Washington Governor Jay Inslee about these community mitigation strategies. The Task Force and the Centers for Disease Control and Prevention (CDC) have worked closely with state and local leaders in California, Washington, and around the Nation to develop these strategies. Additionally, CDC has teams in these areas working with public health partners to respond to the situation on the ground.

Cooperation with communities, businesses, and healthcare organizations is necessary to implement extensive community mitigation activities with the goal of protecting:

AMERICAN OVERSIGHT

- Individuals at risk for severe illness, including persons with underlying health conditions including immune suppression and especially seniors with underlying health conditions;
- The healthcare workforce; and
- Critical infrastructure workforces.

Due to widespread community transmission of COVID-19 in these communities, examples of mitigation strategies for these areas include, but are not limited to:

- Individuals should practice protective measures (e.g., hand washing);
- Schools should conduct regular health checks of students, staff, and visitors;
- Senior living facilities should implement social distancing measures;
- Workplaces should encourage staff to telework and expand sick leave policies;
- Community and faith-based organizations should move gatherings of any size to video-accessible venues or postpone/cancel; and
- Healthcare facilities should implement triage before entering facilities.

In making these recommendations, the Task Force considered guidance from multiple Federal agencies, including technical advice from CDC. These community mitigation strategies are recommended for 30 days, after which local and state public health officials, in coordination with CDC will reassess the individual community situations.

Centers for Medicare & Medicaid Services (CMS) Nursing Home Guidance
As you know, nursing homes and their residents are vulnerable populations for COVID-19. This week, CMS released updated guidance for infection control and prevention of COVID-19 in Nursing Homes which can be found here (3/9). The Press Release can be found here and all CMS guidance related to COVID-19 can be found here.

Below you will find addition information.

Thanks,
Nic

Subject: COVID-19 Update: Resources for All Americans & Framework for Mitigation

AMERICAN OVERSIGHT

Good Morning,

The White House Task Force on Coronavirus and the Centers for Disease Control & Prevention have released two helpful documents for State, local, tribal, and community leaders.

- **Actions for All Americans** *(4-page slide deck)*
- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

You can find additional information about both documents and resources below.

Actions for All Americans *(4-page slide deck)*

- Keeping the workplace safe
- Keeping the school safe
- Keeping the home safe
- Keeping commercial establishments safe

A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission *(10-page frame work for States, localities, and communities)*
Protect yourself and your community from getting and spreading respiratory illnesses like coronavirus disease 2019. Everyone has a role to play in getting ready and staying healthy. CDC is aggressively responding to the global outbreak of COVID-19 and community spread in the United States. CDC's all of community approach is focused to slow the transmission of COVID-19, reduce illness and death, while minimizing social and economic impacts. Framework includes:

- Local Factors to Consider for Determining Mitigation Strategies
- Community mitigation strategies by setting and by level of community transmission or impact of COVID-19
- Potential mitigation strategies for public health functions

Recent Actions

Background & Additional Information (*Updated*)

-
Background: Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Decisive action from President Trump at the beginning of the COVID-19 outbreak—including prudent travel restrictions and an early containment strategy—has given State and local officials and private sector partners time to prepare. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response. The Coronavirus Task Force and broader Administration have worked and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk for the average American remains low, and all agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and***

Local Preparedness Tips: Responses locally executed, state managed, and federally supported.

- Ensuring clear, open lines of communication with the public and making information and guidance readily available.
- Sharing and disseminating *verified and accurate* guidance and information.
- Coordinating with State and local health authorities (a complete list of State & Territorial Health Department Websites can be found **here**)
- Reviewing local preparedness plans and strategies.

What You Need To Know: President Trump and the Administration Are Taking a Whole-Of-Government Approach to Protecting the American People

Top Line

- The risk to the American public remains low.
- The Coronavirus Task Force is marshalling a whole-of government response to COVID-19 and driving collaboration between Federal-State-Tribal-Local stakeholders.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. In addition, all state labs have the test and are empowered to conduct the test themselves. Complementing these efforts, leading commercial laboratories in the country will soon have tests available for local

AMERICAN OVERSIGHT

doctors, pharmacies, and broadly to the American public.

President Trump has made the safety, security and health of the American people his top priority from day one.

- There is no higher priority for President Trump than protecting the health and safety of Americans.
- In 2018, President Trump signed the **National Biodefense Strategy**, which improves speed of action in situations such as this.
- While additional cases are expected, the general risk to the average American remains low, and the Administration is taking measures to keep the threat low.

Since the very beginning of the coronavirus outbreak, the President has taken an unprecedented whole-of-government approach to protect the American people.

- President Trump took unprecedented action and suspended all travel into the United States from China and has issued subsequent screening measures and guidance on travel from other impacted areas across the globe.
- Issuing a public health emergency declaration on January 31.
- Establishing the White House task force to combat the coronavirus spread. The Task Force is coordinating and marshalling the full resources and capabilities of the Federal government to respond to the coronavirus.
- Forging relationships and collaboration between the public and private sectors.
- Remained in close contact with our Nation's governors and other key stakeholders.
- *The Washington Times:* ***Thanks to Trump Administration, the United States has a Coronavirus Plan of Action***.
- *Dr. Marc Siegel:* ***Coronavirus Public Health Response Has Been Handled Well***
- **Actions for All Americans** *(4-page slide deck)*
- **A Framework for Mitigation: Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission** *(10-page frame work for States, localities, and communities)*

While the overall threat to the American public remains low, the President has directed the White House Task Force to take all steps to ensure the health and well-being of the American people and we are well-prepared.

- Americans do not need to change their day-to-day lives but should stay informed and practice good hygiene.
- There are good tried and true hygiene practices which can be very effective to reduce the chance of getting sick.
- Travelers are encouraged to always exercise healthy travel habits when traveling and to follow appropriate guidance (*see* **here**). At this time, there are no domestic travel restrictions in the United States.
- We are working rapidly on therapeutics and vaccines and have launched the first U.S. clinical trial for an investigational antiviral.
- The Federal Government has been able to provide tests to all the state jurisdictions and labs that have requested it. Between March 2nd and 5th, more than 900,000 tests were distributed across the country.
- The United States has the finest public health system in the world and knows the playbook to respond to infectious disease outbreaks.

AMERICAN OVERSIGHT

Local, State, tribal, & Federal coordinated preparedness & response efforts.

- Federal officials have been working diligently to communicate with State, local, and tribal officials on the Federal government's efforts to prepare and respond to COVID-1.
- Our Nation's Governors have participated in-person and on conference call briefings with Federal partners on January 30, February 9, February 20, March 2, and March 9. These communications remain ongoing.
- White House, OMB, HHS, DHS, DOT, and State Department Officials met with over 40 State, county, and city health officials from over 30 States and territories to thank them for their leadership and to continue discussions on the Federal-State-Local partnership to prepare and respond to COVID-19 (February 25).
- HHS, CDC, DHS, and Federal partners have held numerous national briefing calls with State, local, tribal, private-sector, and community leaders.
- The Trump Administration is partnering with State, local, and tribal elected and appointed leaders' associations.

Recent Actions: Below, please find pertinent updates on pertinent Administrations actions.

Attachments:	2020 03 16 COVID-19 Call Center Script FINAL 15mar20 - TOC Updated 2020-03-16 1642 (npd edits).docx

Hi Jennifer,

The topic of "New Questions" should be placed between Q62 and Q63 in the Table of Contents.

The new web site (https://floridahealthcovid19.gov/) that came online today for COVID-19 has now killed some of the hyperlinks I had in the script. This is one example: **Q32 answer**: Clinician Screening Tool http://www.floridahealth.gov/diseases-and-conditions/COVID-19/_documents/ncov-provider-algorithm-2020-02-03.pdf This link now goes to the new homepage.
Another example: DEM Order 20-002 http://www.floridahealth.gov/diseases-and-conditions/COVID-19/_documents/dem-order-no-20-002-in-re-covid-19-public-health-emergency-issued-03-11-2020.pdf - This link also goes to the new homepage.

I added a few new questions at the end of the list.

Please let me know how I may assist further.

Nathan

My canned response:

Thank you for writing to the COVID-19 Call Center.

****Response****

This is an emerging, rapidly evolving situation. The CDC and State of Florida will continue to provide updated information and guidance through their websites.

Please be sure to visit and regularly monitor the Department's dedicated COVID-19 webpage

AMERICAN OVERSIGHT

at www.FloridaHealth.gov/COVID-19. This remains the best and most up-to-date resource for information and guidance regarding COVID-19 in Florida.

You may also visit CDC's website for more information regarding COVID-19 at https://www.cdc.gov/coronavirus/2019-ncov/

The Call Center can be reached by calling 1-866-779-6121 or emailing COVID-19@flhealth.gov and is available 24 hours a day, 7 days a week.

It is becoming increasingly concerning that persons who are in their 14 day self-quarantine period, that receive a negative test think that ends their quarantine. With increasing availability of testing, we need to ensure that persons know just because you may have received a negative test during the 14 days, you still need to stay quarantined for the whole time.

Hi, cruise ships have been debarking in Miami and Fort Lauderdale without any health screenings for the passengers. I've contacted Port Everglades, and they said to reach out to you because the Celebrity Summit, which debarked this morning, had been cleared by the CDC and the Health Department. What does that mean? What goes into such a clearing? And why is there no health screening?

Thank you.

Subject: Daily COVID-19 reports

I have attached the 5 pm COVID-19 report. This includes new tables summarizing the cities and counties of residence for the cases with no known travel or contact with confirmed cases.

Do we want to add the number of hospitalized cases in addition to deaths?

Please let me know if you have any questions!

From: Bialek, Stephanie R. (CDC/DDPHSIS/CGH/DPDM)
To: Blackmore, Carina (CDC flhealth.gov)
Subject: RE: FL request for CDC assistance
Date: Thursday, March 12, 2020 4:12:06 PM

Carina,
In response to your question about assessing risk level of contacts, below is the approach that we have been using. Please let me know if you have additional questions. When you have time, I'd be interested in following up on the questions about port workers.
Stephanie

How contacts are assessed: There is not a precise time-defined criteria for determining what is "prolonged" contact. Low risk is generally considered to be very brief interactions such as a brief greeting conversation, handshake, generally of less than 10 minutes. Medium risk exposures typically include those that include an interaction of 30 minutes or longer within 6 feet such as eating a meal together. Types of exposures that fall between are assessed on a case by case basis and take into consideration careful assessment of all aspects of the interaction including whether the case was symptomatic and how close the contact was to the case.

https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html

Close contact in the guidance above is defined as 1) being within approximately 6 feet of a COVID-19 case for a prolonged period of time; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case or 2) having direct contact with infectious secretions of a COVId-19 case (e.g. being coughed on).
Medium risk exposures include "Being on an aircraft, being seated within 6 feet of a traveler with symptomatic lab-confirmed COVID-19 infection…".
Low risk exposures include "Being in the same indoor environment as a person with symptomatic lab-confirmed COVID-19 for a prolonged period of time but not meeting the definition of close contact

From: Vallone, Gina
To: Wade, Tracy L; Blackmore, Carina; Goff, Kendra F
Subject: RE: Facilities Inquiries
Date: Thursday, March 12, 2020 4:20:40 PM
Attachments: image001.png
Denied Entry (469 KB).msg

The attached email from AHCA indicates that there may be communication between the agencies at the Executive leadership level. Also, AHCA is prioritizing their surveys and focusing on infection control in the ALFs.
The DOH inspections are for safety and sanitation and also incorporate some infection control measures. We currently conduct a group care inspection of the ALF one time per year looking at the entire facility. For the larger facilities with a food permit, we inspect those quarterly.

Perhaps we need to wait a day or two to see what comes down the pipeline to us.

Gina

Subject: RE: Facilities Inquiries

I would think most inspectors don't fit the criteria used (international travel within 14 days, contact with COVID patient, ill etc). so should be able to access. I wonder if a letter from the health officer might help ensuring that these persons don't meet the exclusion criteria?

Subject: RE: Facilities Inquiries

ESF8Planning answered this same question from Samir by sending him a copy of the Executive Order which does not have the answer. The only language I could find in the EO that refers to this issue is:

AMERICAN OVERSIGHT

B. Each State agency may suspend the provisions of any regulatory statute prescribing the procedures for conduct of state business or the orders or rules of that agency, if strict compliance with the provisions of any such statute, order, or rule would in any way prevent, hinder, or delay necessary action in coping with the emergency. This includes, but is not limited to, the authority to suspend any and all statutes, rules, ordinances, or orders which affect leasing, printing, purchasing, travel, and the condition of employment and the compensation of employees. For the purposes of this Executive Order, "necessary action in coping with the emergency" means any emergency mitigation, response, or recovery action: (1) prescribed in the State Comprehensive Emergency Management Plan ("CEMP"); or (2) ordered by the State Coordinating Officer. The requirements of sections 252.46 and 120.54, Florida Statutes, shall not apply to any such suspension issued by a State agency; however, no such suspension shall remain in effect beyond the expiration of this Executive Order, to include any extensions.

There has been no guidance yet. Michael is asking again.

Date: Tuesday, March 17, 2020 11:45:42 PM
Attachments: Chile (37.2 KB).msg

Hi Mr. McGough,

I wanted to update you about the situation with Royal Caribbean and the flights from Chile and Brazil

1. There has been no movement on any flights from Brazil
2. AT 6:30 PM EST, Ms. Kalisch from Royal Caribbean emailed us to tell us that the Government of Chile had put a hold on their flights
3. At around 6:44 PM, I received a call from Dr. Rivkees, the Florida Surgeon General who told me that the Governor was not going to allow any flights to land and disembark passengers in Miami until there was a solid plan articulated by the Cruise company.
4. Right after that call we notified the State Department and copied DHS. We also notified Eleni Kalisch and told her to contact the State of Florida to coordinate a plan(we gave her the relevant phone numbers)
5. At approximately 7:30 Eleni Kalisch emailed that the flight from Chile was going to proceed, but she never responded about contacting Florida state or local authorities despite multiple emails from CDC telling her to do so
6. At 10:07 she told us that the flight would be departing Chile at 12:10 AM local time and arriving in Miami at 9:10 AM EST

Attached is the last email chain starting at 10:20 when Eleni told us there is a slight change of plans which states that CDC will be screening her passengers. We have told her multiple times that CDC will not be screening passengers. We asked her to contact us by phone right away (11PM), but she has not done so. We believe that the flight may have already departed and we are concerned that no one has signed off on this from Florida and that a clear and reasonable plan has not been sent any of us.

Subject: RE: Follow-up -

Carina – sorry about the delay in getting back to you – been a fairly hectic day. A couple of things –

On asymptomatic infection – there is an increasing literature on the potential role of asymptomatic infection in transmission of the virus. I'm attaching three papers that address this topic – not necessarily the best, but I had them handy. Bottom line – asymptomatic infection occurs, and clearly can play a role in the transmission cycle (and in contact tracing).

With regard to surveillance – am attaching a "one pager" from Ira Longini's modeling group here at UF. Point three deals with surveillance – and I think this is the way to go. We're doing that here – we're starting to enroll everyone who comes to the Shands ED with reports/concerns about exposure in our IRB-approved research study, and are then screening them for COVID-19. If we could set up similar studies/ongoing sample collection in ED's in key cities in Florida, we could get at least a feel for the extent of infection in various communities. Would probably need your help in setting things up, but we could work with you to make the contacts with ED directors at key centers. Key would be getting IRB approval on a rapid basis for a state-wide study – which is really where we would really need your help. However, should be possible to expedite it as a "minimal risk" study. And then there is the cost – we can get things going, but at some point would need help in covering costs of running the study. Let me know what you think –

Regards!

Subject: RE: Follow-up -

[External Email]
OK. We discussed this internally today and there are a few things we would love to have your help assessing:

1. Understand the role of asymptomatic infection-what article were you referring to the other day. I have not found it. Nor do I see asymptomatic transmission as something highly relevant from someone else.
2. Clarify transmission dynamics (environmental/droplet/ aerosol etc)
3. Detailed clinical abstraction/risk factor analysis of cases
4. Sentinel surveillance of outpatient providers
5. School based surveillance

One concern I have is the timing. We need strategic sentinel surveillance stood up very soon. I am not sure we have time to wait for modeling data, nor am I sure it will be very helpful. Our population is so mobile so my preference would be to pursue the type of structured, focused, and systematic surveillance effort you are proposing across the state.

Just to provide a follow-up to our discussion from yesterday – I met today with Ira Longini and our modeling team. They should have a strategy for screening/surveillance by the end of the day tomorrow. They are in the process of applying several different models to the Florida situation, and should have something together that can be used for predicting severity and duration within the next week or two. Will keep you posted as things progress.

Regards!

Good evening Scott,

Please see the questions below from Pediatric Associates, a very large group of pediatric practices in South Florida, about the Provider Algorithm that we have shared with all of our licensed healthcare providers along with the guidance we have been providing on an ongoing basis. They have asked for clarification of the algorithm and answers to their other questions before a media interview tomorrow. With regard to his need for swabs and PPE, that can be requested through the resource request process through the Health Care Coalition that was released today. I spoke to Carina and she said you would be the best person to call their CEO C. Rocky Slonaker, MD, CPCO, FAAP Chief Medical Officer / Corporate Compliance Officer and address his concerns. His contact information is below. Thank you so much.

Meredith, Please pass these questions along to Renee:

Algorithm Sent on 3/10:

It is suggest that patients meeting criteria A-D be referred to the Health Dept. When we refer those patients, only a portion is being tested (most are not in our limited experience). I called the nurses myself and they stated they are only testing patients:
1. With Symptoms and Close Contact COVID-19
or
2. With Symptoms and Travel to affected geographic area

She said they are not testing same gathering (not close contact); not testing on a cruise ship with a positive case, not testing anyone who is NOT symptomatic. MUST HAVE SYMPTOMS ALWAYS

The algorithm suggests community contact with COVID-19 and symptoms, or > 65, chronic medical condition, or

AMERICAN OVERSIGHT

immunocompromised AND symptoms: Come to office and consider testing at commercial lab.

Patients and media have picked up on this. Those last two categories are problematic depending on how you define "Confirmed" COVID-19 and how you define Chronic Medical Condition.

Questions:

1. What is the definition of "PART OF AN OUTBREAK OF SUSPECTED COVID-19" as you define it to test it?
   a. Is a princess cruise contact part of an outbreak?
   b. Is returned from Westchester, NY prior to quarantine part of a suspected outbreak?
      i. We need to understand so we don't send someone to the CHD only to have them referred back to us.
2. Fever: Is it truly allowed to be subjective?
   a. This is very common in PEDS
3. Confirmed Case: Is this based on the parent/patients description or would the CHD validate for us?

4. Quest has 5 swabs per office / LabCorp has 3 swabs per office and cannot tell us how often they will replenish.

   a. Any advice on who we test since the CHRONIC MEDICAL CONDITION and/or allowing a non-validated report of CONFIRMED CASE ? is about 15-20% of our sick visits right now. I would literally use all 5 swabs within 2-3 hours of one morning.
   b. Any better definition of CHRONIC MEDICAL CONDITION
      i. We have seen the CDC use SEVERE UNDERLYING HEALTH CONDITION but don't want to create a sub-algorithm.
5. Assuming we get more SWABS at some point, but we are running out of PPE and already do not have enough N-95:
   a. You agree we cannot perform the high risk procedure of testing if we have no one fit tested for N-95?

The local hospitals are testing, but they are saying only inpatient or severely compromised coming through the ER. We do not have enough supplies to possibly test everyone who meets the algorithm criteria.

Will you be providing a more detailed algorithm given the allocation challenges with SWABS and PPE ? or do you expect clinicians to create their own algorithm when supplies are limited?

Thank you ? Sincerely ? for taking the time to answer as I have 200+ clinicians who are very frustrated that so many patients identify as qualifying, there isn't enough tests, there isn't enough N-95, and the algorithm is so non-specific as it relates to Pediatrics. We are struggling with guiding them on who to triage further and who to choose to test.

To: Satter, Jonathan <Jonathan.Satter@dms.myflorida.com>
Subject: IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

AMERICAN OVERSIGHT

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have

Subject: IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available

AMERICAN OVERSIGHT

sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

Press Advisory – President Donald J. Trump Directs FEMA Support Under Emergency Declaration for COVID-19 (PRESIDENTIAL PROCLAMATION HERE)
The federal government continues to take aggressive and proactive steps to address the COVID-19 threat as the health and safety of the American people remain a top priority. Today, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207 (the "Stafford Act"). This increases federal support to the Department of Health and Human Services (HHS) in its role as the lead federal agency for the ongoing COVID-19 pandemic response. As a result of the President's decisive, unprecedented action, FEMA is directed to assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public. Today's declaration does not make direct financial assistance available to individuals.

The emergency declaration does not change measures authorized under other federal statutes and HHS remains the lead federal agency directing the federal response to COVID-19. FEMA actions will be in support of HHS and in coordination with state, tribal and territorial governments. Eligible emergency protective measures taken at the direction or guidance of public health officials in response to this emergency, and not supported by the authorities of another federal agency, will be reimbursed strictly under the FEMA Public Assistance program. FEMA assistance will be provided at a 75 percent Federal cost share. Reimbursable activities typically include emergency protective measures such as the activation of State Emergency Operations Centers, National Guard costs, law enforcement and other measures necessary to protect public health and safety.

Presidential Message to the Congress on Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak (March 13, 2020) (PRESIDENTIAL MESSAGE HERE)
"Pursuant to section 201 of the National Emergencies Act (50 U.S.C. 1621), I hereby report that I have exercised my authority to declare that the outbreak of coronavirus disease (COVID-19) in the United States constitutes a national emergency. This declaration invokes section 1135 of the Social Security Act, 42 U.S.C. 1320b–5, to allow the Secretary of Health and Human Services to exercise the authority under that section to temporarily waive or modify certain requirements of the Medicare, Medicaid, and State Children's Health Insurance programs and of the Health Insurance Portability and Accountability Act Privacy Rule throughout the duration of the public health emergency declared in response to the COVID-19 outbreak."

Memorandum on Expanding State-Approved Diagnostic Tests (FULL MEMORANDUM HERE)
"By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows: It is the policy of the United States to take proactive measures to prepare for and respond to public health threats, including the public health emergency involving Coronavirus Disease 2019 (COVID-19), which was declared by the Secretary of Health and Human Services (the "Secretary") on January 31, 2020, pursuant to section 319 of the Public Health Service Act (42 U.S.C. 247d). Our response must include heightened coordination among Federal, State, local, and tribal agencies, and we must offer States the flexibility they need to care for their citizens. In accordance with this principle, the Food and Drug Administration, in coordination with the State of New

AMERICAN OVERSIGHT

York, allowed the State flexibility in expediting State-approved COVID-19 testing. Should additional States request flexibility to authorize laboratories within the State to develop and perform tests used to detect COVID-19, the Secretary shall take appropriate action, consistent with law, to facilitate the request."

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

Sincerely,
Nic

COVID-19: Background & Additional Information

Background

Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Since the beginning of the outbreak, President Trump has taken unprecedented steps – including prudent travel restrictions and an early containment strategy – to protect the health of Americans in response to the coronavirus. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response (**President Donald J. Trump Has Taken Unprecedented Steps to Respond To the Coronavirus and Protect the Health and Safety of Americans**). The Coronavirus Task Force and broader Administration have and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk to the average American remains low. All agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

I would add the HCW screening criteria.

1. Temperature checks and other risk factor assessment (questionnaire) of employees prior to shift beginning
2. COVID-19 sample collection of all symptomatic employees and residents.

We would like to share these criteria with all LTCFs in FL via multiple channels as soon as possible.

Case definition of events for immediate reporting to county health departments by long term care facilities (skilled nursing facilities, assisted living facilities, independent living facilities)

Please report any instances of the following:

1. A laboratory confirmed case of COVID-19 among a staff member or resident of the facility; *(note: DOH will likely already be aware of this via ELR)*
2. A facility resident or staff member determined to be a close contact of a laboratory confirmed case of COVID-19. *Note: close contact is household member or someone in close proximity (<6 feet) for more than 10 minutes.*
3. Any clusters of 3 or more residents/staff identified within a 72 hour period, with influenza like illness (ILI), pneumonia, or severe respiratory illness requiring further evaluation.
4. Any deaths among residents/staff due to respiratory illness.

Subject: RE: Map
Date: Saturday, March 14, 2020 1:26:22 PM

Okay we fixed our technical problem and are now caught up on cases. I had taken out repatriated cases to match the line list that's posted on our website, but I am fine adding them back in. So including those, we are up to 77 FL cases in the file at the moment. So I think we should go ahead and update the map for today.

The sit report is not using Merlin data, and some of their data don't match ours. I have focused on just making sure we have the right counts in Merlin, but when I tried to reconcile the line list data in Merlin with what's posted online, we had quite a few discrepancies. We should be moving towards using Merlin data rather than using emails to count cases and manage case updates, especially if we want to update a map every few hours.

I would definitely prefer to just update directly from Merlin on a set schedule. But that's definitely a question for Carina!

Thanks for your patience and for trying to help us get organized!

Subject: RE: Map

Leah,

Thanks for looking into this.

Just an FYI, I've noticed this problem across several states so it's not just us, but the JHU map seems to be refreshing at a much more frequent interval, and likely from a direct CDC/WHO source. It currently says Florida has 74 cases. Our Map Data file says we have 68. I don't know if those are the repatriated cases or not, but we should probably include even those in our county counts so we don't look like we're under-reporting. I know the Sit Report for today said Broward has 20 cases, and the Map Data still says Broward has 18, so it may still just be the issue you're working on.

Why don't we set up a four-hour refresh interval? 8 am (post press conference so I'll begin uploading it then), 12 pm, 4 pm, 8 pm? If we're weary about a live feed, that ought to allow us to be transparent with the information while ensuring no inaccurate or flagged data is being uploaded.

Databases can be a real pain in the butt, I know. I don't mean to pester or seem impatient, just want to make sure I'm

AMERICAN OVERSIGHT

doing the best I can do with the information we have.

Thanks!

Subject: RE: Map

Hey all –

I'm checking in to make sure the Map Data file is being updated on a daily schedule. Our sit report for today shows a lot more cases than what's in the map file. I know sometimes we schedule updates through Merlin and it defaults to Monday-Friday, so I wanted to check to see if it's running on weekends.

I also think, for the sake of transparency, we should schedule the update more regularly throughout the day. It might look bad if our map is saying there's only 55 cases, but we're distributing documentation to our response team that says 80 or more. I know there's currently an approval process in place, but as this continues to grow rapidly, it may not be feasible to wait for individual review of each case at 7 am. Plus, it's an inconvenient time to be making the updates for our users right at the start of the day when everyone is using the map feed while I'm working on it.

I trust you guys that the data's accurate. I can hold off on publication in the morning from the previous night's numbers, but I'm getting questions about why our map says 55 but the sit report says 80+ and want to make sure we're all on the same page.

Is it possible for us to go with the code Leah and Lin worked out? I wrote a script to get the data into proper format, concat, collapse, etc, push to server, append to web layers, so we can keep the exact same format that's being outputted now and I won't have to change my code, ha.

All,

After talking to Craig about the process Dr. Blackmore described, the best we can do for a public map is the data that's posted on the webpage, which is officially the last publicly-released count.

We can do a live count, but that would need be an internal map with additional security measures. I have just about finished up the static numbers map, but if we are told to get the live county, I can easily switch it over to our internal servers.

Subject: RE: Map

It's probably at least partially when we got confirmatory lab results and the person becomes a confirmed case (though they confirm several at a time, so we can't really replicate the exact order they are using). Whatever the order is, it doesn't seem to be a system date so that we could reproduce the order consistently. I included an updated query below that uses the date/time a case was confirmed, but it still doesn't exactly match the order on the website currently.

I talked to Dr. Blackmore and she said the order doesn't matter, so I don't think we need to worry too much about it. However, she did say that we need to stay in sync with the data we are reporting to leadership, which happens once a day

AMERICAN OVERSIGHT

around 7:30 am. However, it's possible that as we are reconciling data while producing the report, the numbers/data will change during that timeframe, so it's not as easy as set a job to run at a certain time. What do you think is the best approach here so that we stay in sync? Could I just provide a daily file or something that has the correct data? Or is there a better way?

Thanks so much for the quick assistance!
Leah

Thomas,

In order for this data to updated/maintained on a schedule (not static), even though it is all public information, we need the official OK from either Dr. Blackmore or Scott Pritchard to proceed. A simple email reply saying "OK" will be fine. I have the map ready to go for whenever we receive the OK.

Our database manager was told not to do anything unless she receives a mission request, but the ESF8 incident commander leader has refused to submit mission requests for GIS work, and response work in general. I have filed a complaint about this with her supervising officer, but I would not expect it to change any time soon.

For now, I'll build the map with static data. Keep in mind, this data won't be changed as new cases come in unless we receive authorization for our database admin to allow it.

Sorry for the bureaucratic hiccup. It's been a strange week.

Dear NPHIC Members:

Media Statement

For Immediate Release
Wednesday, February 26, 2020

Contact: CDC Media Relations
(404) 639-3286

CDC Confirms Possible Instance of Community Spread of COVID-19 in U.S.

The Centers for Disease Control and Prevention (CDC) has confirmed an infection with the virus that causes COVID-19 in California in a person who reportedly did not have relevant travel history or exposure to another known patient with COVID-19.

At this time, the patient's exposure is unknown. It's possible this could be an instance of community spread of COVID-19, which would be the first time this has happened in the United States. Community spread means spread of an illness for which the source of infection is unknown. It's also possible, however, that the patient may have been exposed to a returned traveler who was infected.

AMERICAN OVERSIGHT

This case was detected through the U.S. public health system — picked up by astute clinicians. This brings the total number of COVID-19 cases in the United States to 15.

The federal government has been working closely with state, local, tribal, and territorial partners, as well as public health partners, to respond to this public health threat. Unprecedented, aggressive efforts have been taken to contain the spread and mitigate the impact of this virus.

This is a rapidly evolving situation. CDC will continue to update the public as circumstances warrant. For more information about COVID-19 visit www.cdc.gov/covid19.
