Super. In Merlin (looking closer) I did see that he has claims contact with COVID 19 patient. The local concern is how much he was out and about in the community while symptomatic. More detail about his COVID 19 contact would also be helpful. Outreach to Orange CHD has not been fruitful this morning. Perhaps you have greater luck through epi on call etc..

I spoke with Orange Epi. The case was at the political event a Mar-A-Lago on Sunday. He was notified this week of a possible exposure and went to the doctor to be checked after he was notified. He does not know who the case was to whom he was exposed.

He has been very cooperative and has provided a thorough list of contacts including [redacted]. Orange Epi has divided the list and is in the process of following up.

They will also get Merlin updated ASAP.

Dr Jean,

We were just informed of this change as non of us received it yesterday or today via DOH blast

We agree that anyone with moderate or severe symptoms needs Airborne isolation and N95 on employees in addition to PPE for COVId

The question is on low disease, asymptomatic or non admitted is it ok to proceed w droplet and contact and not All as we don't have enough ED rooms to screen patients same for outpatient clinics

AMERICAN OVERSIGHT

The latest guidelines you provided are contradictory with the WHO and CDC.

We need your recommendations on implementation as most clinics or any clinician suspecting COvId will not be able to place patients in All

Kind Regards,

Lilian Abbo, MD, FIDSA

Dr Jean,

We were just informed of this change as non of us received it yesterday or today via DOH blast

We agree that anyone with moderate or severe symptoms needs Airborne isolation and N95 on employees in addition to PPE for COVId

The question is on low disease, asymptomatic or non admitted is it ok to proceed w droplet and contact and not All as we don't have enough ED rooms to screen patients same for outpatient clinics

The latest guidelines you provided are contradictory with the WHO and CDC.

We need your recommendations on implementation as most clinics or any clinician suspecting COvId will not be able to place patients in All

Kind Regards,

Lilian Abbo, MD, FIDSA
Chief Infection Prevention and Antimicrobial Stewardship
Jackson Health System
Professor of Infectious Diseases

Hi Dr. Jean

Please see Orlando Sentinel Report about FL DOH Expanding testing criteria yesterday. Do you have that guidance as I was not able to find it on FDOH website nor I recall receiving it.

Can you please send us that document.

Subject: Per our conversation: Suggested messaging

Hello again, Alberto,
Per our conversation, in the event DOH-Volusia is contacted by media for information (written or on-camera) regarding the church exposure, DOH-Volusia is requesting the ability to fulfill both types of requests using the information. Responses to anticipated follow-up questions also are provided for approval below. Additional guidance/message points are welcome:

Reminder: The information on this potential exposure already is being distributed grass-roots style by the pastor and case.

Tell us about the DOH response or 'what's going on at the church?'

- A known case attended XXX church before she tested positive for COVID-19.
- Following CDC guidance, our epidemiology staff worked with the case to determine people who may have in close contact.
- Through the investigation, DOH-Volusia determined those who attended church activities were at low risk for exposure.
- Working with the pastor, DOH-Volusia was able to define those who were in attendance at the church activities.
- We worked with the pastor to provide information to that defined audience.
- As is standard in contact tracing, anyone who was determined to be at increased risk of exposure has been contacted by our epidemiology staff and asked to self-isolate for 14 days and monitor for symptoms.

Is it safe for people to go to church or other similar gatherings?

Currently we have no evidence of community spread in Volusia County. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;

AMERICAN OVERSIGHT

- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

- The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

What should seniors or high-risk people do? (Need specific message for seniors/high-risk groups since CDC has been saying they should practice social distancing measures.) Suggestion:

If you are at higher risk of getting very sick from COVID-19, you should:

- Stock up on supplies.
- Take everyday precautions to keep space between yourself and others.
- When you go out in public, keep away from others who are sick, limit close contact and wash your hands often.
- Avoid crowds as much as possible.
- Avoid cruise travel and non-essential air travel.
- During a COVID-19 outbreak in your community, stay home as much as possible to further reduce your risk of being exposed.

What should churches do?

- CDC has prevention guidance for the faith-based community. Cdc.gov/coronavirus

Suggested response to follow up questions:

- That information is part of an epi investigation. I do not have access to that information. Those at increased risk have been contacted and provided info.

Thank you, Alberto.

- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

- The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

What should seniors or high-risk people do? (Need specific message for

AMERICAN OVERSIGHT

seniors/high-risk groups since CDC has been saying they should practice social distancing measures.) Suggestion:

If you are at higher risk of getting very sick from COVID-19, you should:

- Stock up on supplies.
- Take everyday precautions to keep space between yourself and others.
- When you go out in public, keep away from others who are sick, limit close contact and wash your hands often.
- Avoid crowds as much as possible.
- Avoid cruise travel and non-essential air travel.
- During a COVID-19 outbreak in your community, stay home as much as possible to further reduce your risk of being exposed.

What should churches do?

- CDC has prevention guidance for the faith-based community. Cdc.gov/coronavirus

Suggested response to follow up questions:

- That information is part of an epi investigation. I do not have access to that information. Those at increased risk have been contacted and provided info.

Thank you, Alberto.

3/16/20

Good Morning,

Sorry, for the delay, I was out Friday, 3/13/20.
Below is the official response received.

From: Statewide Travel Management System
Sent: Friday, March 13, 2020 7:14 AM
To: zzzz feedback, DEPCS_STMS <DEPCS_STMS@flhealth.gov>; Statewide Travel Management System <StatewideTravelManagementSystem@flhealth.gov>
Subject: RE: HELP- Travel moratorium?

We haven't received any notification of this. If and when we do, it will go out to everyone, just like during a hurricane.

Additionally, this was shared Friday, 3/13/20, which I trust you received.

From: DOH COMMUNICATIONS OFFICE
Sent: Friday, March 13, 2020 9:20 AM
Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.
Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:
Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.

AMERICAN OVERSIGHT

- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Happy Day

Valencia College is going mostly online due to some of their students being near an instructor at a conference, who has the virus. The students are fine, no symptoms.

From: Sandy Shugart <sshugart@valenciacollege.edu>
Sent: Thursday, March 12, 2020 5:05 PM
To: Hebda, Kathy <Kathy.Hebda@fldoe.org>
Subject: SIGNIFICANT UPDATE VALENCIA'S RESPONSE TO COVID - 19

Dear Kathy:

This is certainly a fast moving set of issues. Our response has changed in the past couple of hours.

We've had a few exposures come to light in the past 24 hours. No symptomatic or confirmed infections. This has led us to adjust our plans. A message will go out this evening.

Valencia is closing to students for the coming week. Faculty and staff will report. We will use the week to move the vast majority of instruction to online through the end of the term, with classes resuming Monday March 23. The third of the classes that are already online will continue as planned. Classes that cannot be taught online (welding, ballet, etc.) will resume Monday, as well, in the face to face format. Since next week is spring break for OCPS and SDOC are next week, this should have no immediate effect on dual enrollment students. Many will move to online sections

AMERICAN OVERSIGHT

the following week.

We will also use the week without students to sort out a variety of other matters – leave for employees who are asked to self-quarantine, coordination with clinical partners in nursing and allied health, policies for working from home, procedures for summer registration, etc.). The school districts will be on spring break for the week we are closed, so we will not be creating any complications for their dual enrollment students.

Meanwhile, we are canceling study abroad for the remainder of the term. Summer trips are under close review. Most travel for staff and faculty has been cancelled. Those who travelled overseas are self-isolating. We did have a couple of faculty and students attend a conference in Ft. Lauderdale last week and we learned another participant was subsequently tested positively for the virus. We are communicating with them to contain any risk associated with them. We have no other known risks at this time. We will make the call on Commencement by April 1.

In common cause,

Sandy

From: Lewandowski, Patty A
To: Blackmore, Carina; Jenkins, Patrick H; Schmitz, Ann
Cc: Cooksey, Samantha; Heberlein-Larson, Lea A.
Subject: RE: Testing of Asymptomatic Persons
Date: Wednesday, March 11, 2020 2:56:48 PM

This is what Lea found:

Symptomatic only

Per the FDA letter of authorization:
authorization under Section 564(c) of the
Act are met, I am authorizing the emergency use of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel (as described in the scope Section of this letter (Section II)) in individuals who
meet CDC criteria for 2019-nCoV testing for the presumptive detection of 2019-nCoV

CDC criteria is:

As availability of diagnostic testing for COVID-19 increases, clinicians will be able to access laboratory tests for diagnosing COVID-19 through clinical laboratories performing tests authorized by FDA under an Emergency Use Authorization (EUA). Clinicians will also be able to access laboratory testing through public health laboratories in their jurisdictions.

This expands testing to a wider group of symptomatic patients. Clinicians should use their judgment to determine if a patient has signs and symptoms compatible with COVID-19 and whether the patient should be tested. Decisions on which patients receive testing should be based on the local epidemiology of COVID-19, as well as the clinical course of illness. Most patients with confirmed COVID-19 have developed fever[1] and/or symptoms of acute respiratory illness (e.g., cough, difficulty breathing). Clinicians are strongly encouraged to test for other causes of respiratory illness, including infections such as influenza.

Epidemiologic factors that may help guide decisions on whether to test include: any persons, including healthcare workers[2], who have had close contact[3] with a laboratory-confirmed[4] COVID-19 patient within 14 days of symptom onset, or a history of travel from affected geographic areas[5] (see below) within 14 days of symptom onset.

Awareness that depending on how the CHDs view this as essential travel or not, traveling to the certified training was scheduled for the end of this month into April. As we don't currently have a remote learning option, don't have testing options remotely and need hands on training for the soils piece of things, we are struggling to provide another option but postponing until later in April. Your thoughts would be appreciated. This could elevate to you and county health systems as soon as we make any announcement.

From: DOH COMMUNICATIONS OFFICE
Sent: Friday, March 13, 2020 9:20 AM
Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

AMERICAN OVERSIGHT

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Awareness that depending on how the CHDs view this as essential travel or not, traveling to the certified training was scheduled for the end of this month into April. As we don't currently have a remote learning option, don't have testing options remotely and need hands on training for the soils piece of things, we are struggling to provide another option but postponing until later in April. Your thoughts would be appreciated. This could elevate to you and county health systems as soon as we make any announcement.

Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

AMERICAN OVERSIGHT

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Subject: RE: Visit went well- covid

Thank you for the update Dr. Thomas.

- Was he symptomatic on the yesterday's flight?
- Can you provide the flight information for March 9? Did he fly while symptomatic?
- After symptoms have resolved, or he is feeling better and afebrile for at least 24 hours with only a lingering cough, he can get tested for clearance purposes. NP and OP swabs should be collected every other day until there are two consecutive negative results.

Subject: Visit went well- covid

Good afternoon,
We are heading back from client home. All phone numbers that we had were incorrect.
The client indicated that his onset of illness was March 9th- fever 101 F and slight dry cough, no shortness of breath or difficulty breathing. He has been in Palm From Feb 23rd until March 9th. He left Palm Beach for Ny on March 9th and felt unwell and decided to get evaluated at Ny hospital. Chest X-ray negative, flu negative and doc decided to just test for Covid. Covid was incidental finding. He says he has not been coughing and did not have fever again without use of antipyretics.

AMERICAN OVERSIGHT

He went to hospital since he had history of pneumonia 2 yrs ago and was concerned that he might be having one again, so went to get checked out, he really didn't feel sick per say.
He attended synagogue in Palm Beach on March 6 and 7th. Hosted a dinner with friends at his house on Feb 27th. These are only group settings in Palm Beach. While in New York they didn't do much between March 9-11th.
They provided good phone numbers and email and are equipped with FaceTime feature. They are compliant with home quarantine. And have plenty of food at home. Will fill in with additional info as needed. They were provided with thermometers and face masks.
He asked if he needed to be retested to be clear when 14 days quarantine is up? If so how and where? They don't have a provider in Palm Beach county.
Also we are provided with information on closest hospitals to them in the event they needed to go to the hospital as well as our 24/7 phone contact.

Hi Alex -- sorry I missed your call. Thank you for calling me back.

My question is whether the county or state have ordered any public or quasi-public places to disinfect or take extra precautions because of the coronavirus.

In particular, have any actions been directed at Mar-a-Lago, or the Breakers or the Everglades Club on Palm Beach?

thank you,

Hi Maria,

The woman presented to a healthcare facility (hospital) that has the capability to test. For whatever reason, they chose not collect samples and to run the test. I don't see anywhere in our guidance where we are to collect samples from these folks.

I have copied Carina Blackmore and Scott Pritchard to provide assurance.

Our current priority is as follows.

1. Nursing homes and ALFs which we have several with respiratory illness (likely flu) but we will be testing for COVID – don't want to miss these folks
2. Other outbreak facilities – we investigated Devareaux today
3. Contacts to known cases of COVID – have and will swab as resources allow
4. Travel to level three countries; China, Europe and Iran – have and will swab as resources allow
5. Travel anywhere else. See the map below. The rest of the world is orange which would include the states of NY, Washington and California.

Good afternoon,

I heard about the woman from NY who presented to Viera with fever, cough, and nausea and who wasn't tested.

Given the guidelines and the fact that NY has community spread, don't we need to test her?

I think we need to clarify that 3rd bullet on the new guidelines – travel from affected geographic with widespread community transmission. The CDC shows NY, WA, and CA as having community transmission.

Jared:

Harbor Pilots are going aboard the cruise ships that have Corona virus outbreaks in Port Everglades. Is there anyway we could get some N95 masks for pilots going aboard those cruise ships?

The Port is a $34 billion economic driver for Florida and there are 17 pilots in Port Everglades. If the pilots were to get the virus it could have a very bad affect on the economy.

Anything that could be done to get N95 masks would greatly be appreciated.

Good afternoon Vicky,

Thank you for reaching out to us regarding your concern with the homeless population and COVID-19. The department has a process in place to respond to the needs of these clients should a case arise. If the individual does not need an acute care clinical setting, we will find temporary shelter for the individual to recover during the 14-day self-isolation period. This is a similar process that is implemented when we are encountered with homeless clients who have Tuberculosis.

Thank you,

Yesenia D. Villalta, APRN, DNP, MSN
Florida Department of Health in Miami-Dade County

Dr. Villalta and Team…

We share many of the concerns outlined in the below article.

Homeless at 'double risk' of getting, spreading coronavirus

AMERICAN OVERSIGHT

https://wsvn.com/news/us-world/homeless-at-double-risk-of-getting-spreading-coronavirus/

We understand that "yes" to 1) travel and fever OR 2) travel and respiratory symptoms are key to commence testing.

If a transient person tests positive at a hospital site, what are the protocols…

1. If individual was recently in shelter
2. If individual was unsheltered

Who would notify us?

I'm concerned our facilities do not have the footprint to provide isolation/quarantine. Also, what measures would we then take at facilities where exposure occurred? Many of our folks have underlying health conditions.

We are being as proactive as we can with available resources with sheltered and unsheltered populations using the guidance previously provided.

Sincerely, Vicki

Subject: Unsheltered Persons - COVID-19

Frank...

On the heels of the COVID-19 conversation yesterday, I feel strongly that we need to take some additional measures particularly for our unsheltered population. Through OEM, the Homeless Trust would like to request the following from the Director of Florida's Division of Emergency Management, Jared Moskowitz, for distribution to unsheltered homeless persons. Our unsheltered population is between 1,000 and 1,100, but as you know we experience constant inflow as this is a very transient population.

- 3,000 units of 4 oz. hand sanitizer

We will pass this out to unsheltered persons, along with the educational information providing on stopping the spread of germs.

AMERICAN OVERSIGHT

We'd also like to further equip our **50 outreach workers** (City of Miami, City of Miami Beach, plus specialized outreach teams with Camillus) who regularly engage, transport, and assist homeless the following:

- Wipes
- Gloves
- Surgical Mask
- Plastic bags for contaminated food, garbage, belongings.

It's my understanding that there is a scarcity of many of these items in South Florida, and supply chains are stretched thin.
While our shelters have ramped up efforts, they too, could soon be faced with shortages. We continue to monitor the situation.

Subject: CDC Requirement

Hello Dr. Villalta –

One of the requirements just presented by CDC is as follows:

1. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

Is this something you could help arrange? The air ambulance company is not doing so.

Thanks,

Eleni

Dear Eleni,

Here are the steps, and all persons are copied for coordination purposes:

- Holly Love is preparing a detailed list of the 47 persons to be evacuated including:
  - Name
  - Partner/Spouse
  - Citizenship
  - Age
  - Any comorbid Medical conditions which may affect triage decisions
  - Symptomatic vs. Non-symptomatic
- Dr. Barth Green will direct his Medical staff to triage the arrival of these patients to either Jackson Memorial Hospital or Hotel St. Michel in Coral Gables, depending on their physical condition. In order to do so, **Dr. Green needs to know the location and arrival time of the aircraft.**
- Dotan will arrange for Dr. Green to receive 60 Novel Coronavirus (2019-nCoV)/COVID-19 Quest test kits from my office later tonight… to his home if necessary.
- Stephanie Buchler will assist the courier of the samples if need be, from JMH to Quest Labs

Hope this helps,

Dr. Ben Shore

Dear Eleni,

Dr. Barth Green, who reads in copy, is the Global Coordinator for CDC. He will accept all 47 US nationals from the Silver Explorer, providing that Bec Ware, R.N. can provide him details about these people. Minutes ago, I spoke with Bec, and she will provide Dr. Green with the information that he needs, including their marital status, their physical condition, where they are landing and what time they are to arrive at Miami International Airport. He will have a Medical team waiting to greet these folks, to screen them, and to triage them accordingly.

Until then, I will arrange for Dr. Green to receive 60 Quest Novel Coronavirus (2019-nCoV)/COVID-19 test kits from my office, so that he can make final determinations on those who are ill.

Dear Barth,

Attached you will find Quest collection instructions. Ms. Stephanie Buchler, who reads in copy, can provide information about courier specimen pickup if necessary.

Hope this helps,

Dr. Ben Shore

Many thanks, Jason. I'm still not getting any press releases directly to my inbox and congressional staff aren't receiving updates either – can you help me get to the bottom of this?

I've attached emails for FL delegation Chiefs, Legislative Directors, and Health Legislative Assistants. If you're able to add email addresses, we need to add all of them so offices have access to the latest information from DEM, DOH, and the Joint Information Center without us having to provide individually.

If you can't add those emails, please let me know so I can set up a system to push out information from my end.

Thanks again,
Katherine Anne

FOR IMMEDIATE RELEASE
March 12, 2020

Contact: Joint Information Center on COVID-19 for the State of Florida
(850) 815-4940, ESF14@em.myflorida.com

The State of Florida Issues Updates on COVID-19

The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis announced that the State has ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. Governor DeSantis has also recommended that local authorities strongly consider canceling mass gatherings. Centers for Disease Control and Prevention (CDC) defines a mass event or gathering as 1,000 individuals or more. Practically speaking, a mass gathering is a large enough assembly of individuals that will put a strain on local resources. The Governor also suspended non-essential instate and

AMERICAN OVERSIGHT

all out-of-state travel for state employees for 30 days.

Yesterday, March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

New Positive Cases

Earlier today, the Florida Department of Health announced one new case of COVID-19 in Seminole County.

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

COVID-19 Cases

COVID Chart

* The Department of Health will confirm cases reported by commercial labs.
** A known history of exposure to COVID-19 outside of the state.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel and Cruises Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the

AMERICAN OVERSIGHT

United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

-

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

AMERICAN OVERSIGHT

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will now be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.
- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.
- The APD Senior Leadership Team began hosting twice weekly COVID-19 conference calls with the Superintendents of the agency's facilities in Marianna, Gainesville, Chattahoochee and the Developmental Disabilities Defendant Program.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during press conferences on Monday, March 9th and Wednesday, March 11th to address Florida's recent actions regarding COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up information.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff are following up with them on an individual basis for questions and answers for COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we are providing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, staff has provided specific technical assistance to all AAAs regarding completing assessments, safe delivery of home-delivered meals, and procurement of cleaning supplies.
- Arranged a conference call with a representative from the Area Agencies on Aging as well as the Florida Association of Aging Services Providers and GA Foods. Discussed the current messaging from ACL and the CDC as it relates to the Aging Network.
- Conducted a Florida Association of the Area Agencies on Aging (F4A) conference call with all contract managers and AAA Executive Directors March 11 at 2:00 p.m. to provide a daily update regarding COVID-19.
- The Department of Elder Affairs has distributed DOH website information as a resource for PACE providers to use and distribute to seniors. and provided the Executive Orders. DOEA has circulated additional information and long-term care provider conference call invitations with presentations by DOH and AHCA to the PACE providers.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, the Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also

AMERICAN OVERSIGHT

implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.
- Volunteer Florida is preparing information to be shared with Supervisors of Elections about Volunteer Connect, Florida's official volunteer opportunities platform. Through the platform, offices can post/promote volunteer opportunities, including poll work.
- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- Out of an abundance of caution, two temporary school closures have been reported in Okaloosa and Hillsborough County for cleaning. At this time, no Florida student has contracted COVID-19. To stay up to date on school information, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department of Health. Inmates will continue to have access to mail, phone calls and video visitation. Legal visits will not be impacted.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
    - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
    - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
    - Have had contact with someone who has been or is under investigation for COVID-19
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.

AMERICAN OVERSIGHT

- DOS has provided guidance to all 67 county Supervisors of Elections regarding assisted living facilities and poll worker staff matters. The message included guidance to screen poll workers and clerks beforehand to determine their recent travel status or if they are showing active symptoms of COVID-19 and reminding supervisors of the option to designate alternate polling locations for nursing homes, centers for independent living continuing care retirement living communities and assisted living facilities.
- DOS has identified stakeholders including libraries, museums, cultural facilities and are developing plans to communicate information and resources about COVID-19 to those stakeholders.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV is encouraging Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA employees at Florida's three highway welcome centers continue to be provided with the latest COVID-19 information and resources to help keep the traveling public informed.
- Preventive health resources and options have been communicated to all VISIT FLORIDA staff, with new updates and information relayed accordingly.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.
- VISIT FLORIDA continues to follow all direction from the Executive Office of the Governor and Florida Department of Health in the dissemination of alerts and safety information through social media and VISIT FLORIDA's network of Destination Marketing Organization and business partners.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.

AMERICAN OVERSIGHT

- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE has reviewed its COOP and identified members who can work from home. FDLE has ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.

AMERICAN OVERSIGHT

- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close

AMERICAN OVERSIGHT

Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health

AMERICAN OVERSIGHT

of all people in Florida through integrated state, county and community efforts.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

AMERICAN OVERSIGHT

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health

AMERICAN OVERSIGHT

Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121**. **The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

AMERICAN OVERSIGHT

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.

AMERICAN OVERSIGHT

- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Follow us on Facebook, Instagram and Twitter at @HealthyFla. For more information please visit www.FloridaHealth.gov.

Katherine Anne,

Thank you for bringing this back up. I'm happy to help. Can you send me the additions in a spreadsheet? The emails that came through did not have an attachment.

Thank you,

Jason

Many thanks, Jason. I'm still not getting any press releases directly to my inbox and congressional staff aren't receiving updates either – can you help me get to the bottom of this?

I've attached emails for FL delegation Chiefs, Legislative Directors, and Health Legislative Assistants. If you're able to add email addresses, we need to add all of them so offices have access to the latest information from DEM, DOH, and the Joint Information Center without us having to provide individually.

If you can't add those emails, please let me know so I can set up a system to push out information from my end.

Thanks again,
Katherine Anne

AMERICAN OVERSIGHT

Contact: Joint Information Center on COVID-19 for the State of Florida
(850) 815-4940, ESF14@em.myflorida.com

The State of Florida Issues Updates on COVID-19

The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis announced that the State has ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. Governor DeSantis has also recommended that local authorities strongly consider canceling mass gatherings. Centers for Disease Control and Prevention (CDC) defines a mass event or gathering as 1,000 individuals or more. Practically speaking, a mass gathering is a large enough assembly of individuals that will put a strain on local resources. The Governor also suspended non-essential instate and all out-of-state travel for state employees for 30 days.

Yesterday, March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

New Positive Cases

Earlier today, the Florida Department of Health announced one new case of COVID-19 in Seminole County.

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

COVID-19 Cases

COVID Chart

* The Department of Health will confirm cases reported by commercial labs.
** A known history of exposure to COVID-19 outside of the state.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at

AMERICAN OVERSIGHT

home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel and Cruises Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.

AMERICAN OVERSIGHT

Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will now be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.
- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.
- The APD Senior Leadership Team began hosting twice weekly COVID-19 conference calls with the Superintendents of the agency's facilities in Marianna, Gainesville, Chattahoochee and the Developmental Disabilities Defendant Program.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during press conferences on Monday, March 9th and Wednesday, March 11th to address Florida's recent actions regarding COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up information.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff are following up with them on an individual basis for questions and answers for COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we are providing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, staff has provided specific technical assistance to all AAAs regarding completing assessments, safe delivery of home-delivered meals, and procurement of cleaning supplies.
- Arranged a conference call with a representative from the Area Agencies on Aging as well as the Florida Association of Aging Services Providers and GA Foods. Discussed the current messaging from ACL and the CDC as it relates to the Aging Network.
- Conducted a Florida Association of the Area Agencies on Aging (F4A) conference call with all contract managers and AAA Executive Directors March 11 at 2:00 p.m. to provide a daily update regarding COVID-19.
- The Department of Elder Affairs has distributed DOH website information as a resource for PACE providers to use and distribute to seniors. and provided the Executive Orders. DOEA has circulated additional information and long-term care provider conference call invitations with presentations by DOH and AHCA to the PACE providers.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with

AMERICAN OVERSIGHT

Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, the Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.
- Volunteer Florida is preparing information to be shared with Supervisors of Elections about Volunteer Connect, Florida's official volunteer opportunities platform. Through the platform, offices can post/promote volunteer opportunities, including poll work.
- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- Out of an abundance of caution, two temporary school closures have been reported in Okaloosa and Hillsborough County for cleaning. At this time, no Florida student has contracted COVID-19. To stay up to date on school information, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department of Health. Inmates will continue to have access to mail, phone calls and video visitation. Legal visits will not be impacted.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
    - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
    - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
    - Have had contact with someone who has been or is under investigation for COVID-19
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.

AMERICAN OVERSIGHT

- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS has provided guidance to all 67 county Supervisors of Elections regarding assisted living facilities and poll worker staff matters. The message included guidance to screen poll workers and clerks beforehand to determine their recent travel status or if they are showing active symptoms of COVID-19 and reminding supervisors of the option to designate alternate polling locations for nursing homes, centers for independent living continuing care retirement living communities and assisted living facilities.
- DOS has identified stakeholders including libraries, museums, cultural facilities and are developing plans to communicate information and resources about COVID-19 to those stakeholders.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV is encouraging Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA employees at Florida's three highway welcome centers continue to be provided with the latest COVID-19 information and resources to help keep the traveling public informed.
- Preventive health resources and options have been communicated to all VISIT FLORIDA staff, with new updates and information relayed accordingly.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.
- VISIT FLORIDA continues to follow all direction from the Executive Office of the Governor and Florida Department of Health in the dissemination of alerts and safety information through social media and VISIT FLORIDA's network of Destination Marketing Organization and business partners.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

AMERICAN OVERSIGHT

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE has reviewed its COOP and identified members who can work from home. FDLE has ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Michelle –

Slight change of plans. Upon arrival at MIA, Royal Caribbean will now be arranging individual charter flights for the passengers who are cleared by CDC to return to their home cities/states.

Our team has asked that CDC provide something in writing tomorrow that we can provide to the charter companies indicating that the passenger(s) boarding the charter flights have been cleared to fly commercially. We do not want the charters to deny boarding to these passengers simply because they have arrived in MIA from a cruise ship.

Thanks,

Eleni

Sorry - now with Eleni from RC. Again, due-outs are:

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

All -

Thank you for joining the call today. Leah - I don't believe I have everyone from CDC who was on the call, including Rachel - please add if that's the case.

I've listed the do-outs that I'm tracking below, and this chain can serve as the new, smaller group of folks working on the Brazil/Chile RC ships.

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Dear Eleni,
Could you kindly clarify Dr. Green at CDC? Is that CDC as in Centers for Disease Control and Prevention or is that a typo? If yes, we do not know him – could you kindly share his contact information?

Most importantly, you need to work with and have the approval of the Florida State and Local Health Departments – Dr. Rivkees, the Florida Surgeon General and Dr. Roberson, the Deputy Surgeon General are on this email.

Best,
Michelle

Hi Michelle –

Below please see an update on care for guests upon arrival at MIA.

Dr. Barth Green, the Global Coordinator for CDC, will accept all 45 US nationals from the Silver Explorer, providing that Bec Ware, R.N. can provide him details about these people. Minutes ago, I spoke with Bec, and she will provide Dr. Green with the information that he needs, including their marital status, their physical condition, where they are landing and what time they are to arrive at Miami International Airport. He will have a Medical team waiting to greet these folks, to screen them, and to triage them accordingly.

Until then, I will arrange for Dr. Green to receive 60 Quest Novel Coronavirus (2019-nCoV)/COVID-19 test kits from my office, so that he can make final determinations on those who are ill. Ms. Stephanie Buchler will follow Quest collection instructions and will ensure courier specimen pickup, if necessary.

Dr. Green will direct his Medical staff to triage the arrival of these patients to either Jackson Memorial Hospital or Hotel St. Michel in Coral Gables, depending on their physical condition.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

AMERICAN OVERSIGHT

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
    a. Send ship and flight manifests to CDC.
    b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
    c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
    d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
    a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
    b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
    a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
    b. CDC Quarantine Station staff are available for illness response, as per protocol.
    c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
    d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
    a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
    b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
    a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.
        i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.

AMERICAN OVERSIGHT

ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf

b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Dear Eleni,
Could you kindly clarify Dr. Green at CDC? Is that CDC as in Centers for Disease Control and Prevention or is that a typo? If yes, we do not know him – could you kindly share his contact information?

Most importantly, you need to work with and have the approval of the Florida State and Local Health Departments – Dr. Rivkees, the Florida Surgeon General and Dr. Roberson, the Deputy Surgeon General are on this email.

Best,
Michelle

Hi Michelle –

Below please see an update on care for guests upon arrival at MIA.

Dr. Barth Green, the Global Coordinator for CDC, will accept all 45 US nationals from the Silver Explorer, providing that Bec Ware, R.N. can provide him details about these people. Minutes ago, I spoke with Bec, and she will provide Dr. Green with the information that he needs, including their marital status, their physical condition, where they are landing and what time they are to arrive at Miami International Airport. He will have a Medical team waiting to greet these folks, to screen them, and to triage them accordingly.

Until then, I will arrange for Dr. Green to receive 60 Quest Novel Coronavirus (2019-nCoV)/COVID-19 test kits from my office, so that he can make final determinations on those who are ill. Ms. Stephanie Buchler will follow Quest collection instructions and will ensure courier specimen pickup, if necessary.

AMERICAN OVERSIGHT

Dr. Green will direct his Medical staff to triage the arrival of these patients to either Jackson Memorial Hospital or Hotel St. Michel in Coral Gables, depending on their physical condition.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
   a. Send ship and flight manifests to CDC.
   b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
   c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
   d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
   a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
   b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate

AMERICAN OVERSIGHT

any passengers who become ill during travel and to assist at arrival in US

5. Upon arrival at airport in US
    a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
    b. CDC Quarantine Station staff are available for illness response, as per protocol.
    c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
    d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
    a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
    b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
    a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.
        i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.
        ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf
    b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
    a. Send ship and flight manifests to CDC.
    b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
    c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
    d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire

AMERICAN OVERSIGHT

completed

   a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking

   b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.

3. Passengers without any symptoms can board charter flights.

4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US

5. Upon arrival at airport in US

   a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.

   b. CDC Quarantine Station staff are available for illness response, as per protocol.

   c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.

   d. Passengers who are not ill will be allowed to continue their travel on commercial flights.

6. After arrival

   a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.

   b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.

7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

   a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.

      i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.

      ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf

   b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

AMERICAN OVERSIGHT

Hi Michelle –

Thank you for the guidance … very helpful! I think we are prepared to be in full compliance with perhaps a few items remaining to be addressed. I will forward to our operations team to make sure we are good to go.

Thanks for your help!

Eleni

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
   a. Send ship and flight manifests to CDC.
   b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
   c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
   d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
   a. General screening questionnaire provided by CDC, or other questionnaire as per

AMERICAN OVERSIGHT

local/national authorities at port administered to passengers/crew disembarking

   b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.

3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
   a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
   b. CDC Quarantine Station staff are available for illness response, as per protocol.
   c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
   d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
   a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
   b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
   a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.
      i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.
      ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf
   b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
    a. Send ship and flight manifests to CDC.
    b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
    c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
    d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
    a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
    b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.

AMERICAN OVERSIGHT

4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
    a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
    b. CDC Quarantine Station staff are available for illness response, as per protocol.
    c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
    d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
    a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
    b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
    a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.
        i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.
        ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf
    b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Dear Eleni,
Please clarify your request and the plan – which passengers are you referring to? The air ambulance passengers or the ones who are not ill and are coming in the larger charter?

As I wrote earlier, CDC will not be conducting any health screening. For the passengers who are not arriving by air ambulance, CBP/CWMD would screen the passengers based on their own protocol. CDC Quarantine Station staff will be available to respond to any illness events, as requested by CBP.

For the air ambulance, they need assessment – I understood that you have made arrangements with Dr. Barth Green/University of Miami, who is not affiliated with CDC. He/his team would make an assessment of those 6 individuals.

Michelle –

Slight change of plans. Upon arrival at MIA, Royal Caribbean will now be arranging individual charter flights for the passengers who are cleared by CDC to return to their home cities/states.

Our team has asked that CDC provide something in writing tomorrow that we can provide to the charter companies indicating that the passenger(s) boarding the charter flights have been cleared to

AMERICAN OVERSIGHT

fly commercially. We do not want the charters to deny boarding to these passengers simply because they have arrived in MIA from a cruise ship.

Thanks,

Eleni

Sorry - now with Eleni from RC. Again, due-outs are:

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

AMERICAN OVERSIGHT

I've listed the do-outs that I'm tracking below, and this chain can serve as the new, smaller group of folks working on the Brazil/Chile RC ships.

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared

AMERICAN OVERSIGHT

by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and

AMERICAN OVERSIGHT

have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

AMERICAN OVERSIGHT

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.

AMERICAN OVERSIGHT

- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Many thanks, Jason. I'm still not getting any press releases directly to my inbox and congressional staff aren't receiving updates either – can you help me get to the bottom of this?

I've attached emails for FL delegation Chiefs, Legislative Directors, and Health Legislative Assistants. If you're able to add email addresses, we need to add all of them so offices have access to the latest information from DEM, DOH, and the Joint Information Center without us having to provide individually.

If you can't add those emails, please let me know so I can set up a system to push out information from my end.

Thanks again,
Katherine Anne

The State of Florida Issues Updates on COVID-19

The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis announced that the State has ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. Governor DeSantis has also recommended that local authorities strongly consider canceling mass gatherings. Centers for Disease Control and Prevention (CDC) defines a mass event or gathering as 1,000 individuals or more. Practically speaking, a mass gathering is a large enough assembly of individuals that will put a strain on local resources. The Governor also suspended non-essential instate and all out-of-state travel for state employees for 30 days.

Yesterday, March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

New Positive Cases

Earlier today, the Florida Department of Health announced one new case of COVID-19 in Seminole County.

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Chart

* The Department of Health will confirm cases reported by commercial labs.
** A known history of exposure to COVID-19 outside of the state.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel and Cruises Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

AMERICAN OVERSIGHT

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.

AMERICAN OVERSIGHT

- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will now be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.
- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.
- The APD Senior Leadership Team began hosting twice weekly COVID-19 conference calls with the Superintendents of the agency's facilities in Marianna, Gainesville, Chattahoochee and the Developmental Disabilities Defendant Program.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during press conferences on Monday, March 9th and Wednesday, March 11th to address Florida's recent actions regarding COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up information.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff are following up with them on an individual basis for questions and answers for COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we are providing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, staff has provided specific technical assistance to all AAAs regarding completing assessments, safe delivery of home-delivered meals, and procurement of cleaning supplies.
- Arranged a conference call with a representative from the Area Agencies on Aging as well as the Florida Association of Aging Services Providers and GA Foods. Discussed the current messaging from ACL and the CDC as it relates to the Aging Network.
- Conducted a Florida Association of the Area Agencies on Aging (F4A) conference call with all contract managers and AAA Executive Directors March 11 at 2:00 p.m. to provide a daily update regarding COVID-19.
- The Department of Elder Affairs has distributed DOH website information as a resource for PACE providers to use and distribute to seniors. and provided the Executive Orders. DOEA has circulated additional information and long-term care provider conference call invitations with presentations by DOH and AHCA to the PACE providers.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, the Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.
- Volunteer Florida is preparing information to be shared with Supervisors of Elections about Volunteer Connect, Florida's official volunteer opportunities platform. Through the platform, offices can post/promote volunteer opportunities, including poll work.
- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.

AMERICAN OVERSIGHT

Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- Out of an abundance of caution, two temporary school closures have been reported in Okaloosa and Hillsborough County for cleaning. At this time, no Florida student has contracted COVID-19. To stay up to date on school information, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department of Health. Inmates will continue to have access to mail, phone calls and video visitation. Legal visits will not be impacted.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS has provided guidance to all 67 county Supervisors of Elections regarding assisted living facilities and poll worker staff matters. The message included guidance to screen poll workers and clerks beforehand to determine their recent travel status or if they are showing active symptoms of COVID-19 and reminding supervisors of the option to designate alternate polling locations for nursing homes, centers for independent living continuing care retirement living communities and assisted living facilities.
- DOS has identified stakeholders including libraries, museums, cultural facilities and are developing plans to communicate information and resources about COVID-19 to those stakeholders.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.

AMERICAN OVERSIGHT

- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV is encouraging Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA employees at Florida's three highway welcome centers continue to be provided with the latest COVID-19 information and resources to help keep the traveling public informed.
- Preventive health resources and options have been communicated to all VISIT FLORIDA staff, with new updates and information relayed accordingly.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.
- VISIT FLORIDA continues to follow all direction from the Executive Office of the Governor and Florida Department of Health in the dissemination of alerts and safety information through social media and VISIT FLORIDA's network of Destination Marketing Organization and business partners.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE has reviewed its COOP and identified members who can work from home. FDLE has ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

AMERICAN OVERSIGHT

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

The State of Florida Issues Updates on COVID-19

AMERICAN OVERSIGHT

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

table

AMERICAN OVERSIGHT

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

AMERICAN OVERSIGHT

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners

AMERICAN OVERSIGHT

and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to

AMERICAN OVERSIGHT

help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.

AMERICAN OVERSIGHT

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Date: Saturday, March 14, 2020 7:56:21 AM

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

AMERICAN OVERSIGHT

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners

AMERICAN OVERSIGHT

and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.

AMERICAN OVERSIGHT

- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

AMERICAN OVERSIGHT

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

Commissioner Doug Underhill

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

AMERICAN OVERSIGHT

Table

table

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.

AMERICAN OVERSIGHT

- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National

AMERICAN OVERSIGHT

Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA
- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION
- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM
- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE
- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION
- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing

AMERICAN OVERSIGHT

response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES
- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY
- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA
- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE
- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION
- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT
- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

AMERICAN OVERSIGHT

The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.

- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

AMERICAN OVERSIGHT

Table

table

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.

AMERICAN OVERSIGHT

- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National

AMERICAN OVERSIGHT

Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA
- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION
- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM
- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE
- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION
- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing

AMERICAN OVERSIGHT

response to the COVID-19 virus.

- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

AMERICAN OVERSIGHT

The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.

- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Why can't we use Q-tips? Not sterile but clean? Then put into VTM. Who cares if they are not sterile since there is no other exposure to COVID?

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

AMERICAN OVERSIGHT

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

table

AMERICAN OVERSIGHT

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

AMERICAN OVERSIGHT

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners

AMERICAN OVERSIGHT

and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to

AMERICAN OVERSIGHT

help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.

AMERICAN OVERSIGHT

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

AMERICAN OVERSIGHT

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

Commissioner Doug Underhill

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

AMERICAN OVERSIGHT

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners

AMERICAN OVERSIGHT

and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to

AMERICAN OVERSIGHT

help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.

AMERICAN OVERSIGHT

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

Commissioner Doug Underhill

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

AMERICAN OVERSIGHT

Table

table

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.

AMERICAN OVERSIGHT

- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National

AMERICAN OVERSIGHT

Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA
- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION
- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM
- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE
- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION
- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing

AMERICAN OVERSIGHT

response to the COVID-19 virus.

- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

AMERICAN OVERSIGHT

The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.

- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

AMERICAN OVERSIGHT

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

table

AMERICAN OVERSIGHT

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

AMERICAN OVERSIGHT

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners

AMERICAN OVERSIGHT

and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to

AMERICAN OVERSIGHT

help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.

AMERICAN OVERSIGHT

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

Commissioner Doug Underhill

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

AMERICAN OVERSIGHT

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions.

AMERICAN OVERSIGHT

Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the

AMERICAN OVERSIGHT

Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and

AMERICAN OVERSIGHT

monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.

AMERICAN OVERSIGHT

- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities

AMERICAN OVERSIGHT

to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

My staff think that the nylon swabs in the GC/Chlamydia specimen collection supplies could be used for oral and nasal swabbing?

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

AMERICAN OVERSIGHT

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

table

chart

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

AMERICAN OVERSIGHT

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

AMERICAN OVERSIGHT

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.

AMERICAN OVERSIGHT

- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative

AMERICAN OVERSIGHT

measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.

AMERICAN OVERSIGHT

- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

AMERICAN OVERSIGHT

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

AMERICAN OVERSIGHT

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

table

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions.

AMERICAN OVERSIGHT

Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
  - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the

AMERICAN OVERSIGHT

Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and

AMERICAN OVERSIGHT

monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.

AMERICAN OVERSIGHT

- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities

AMERICAN OVERSIGHT

to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Subject: communications test

Emerald Coast Healthcare Coalition is conducting our quarterly communications test which seems very timely with everything going on due to coronavirus - this test ensures that we maintain communication with our partners
Please respond to me only - do not copy all
Please send email answering YES that you received my communication for this test
Thank you

--

Ann Hill, Executive Director
Emerald Coast Healthcare Coalition
850-585-1679

AMERICAN OVERSIGHT

From: Oliver, Sara Elizabeth (CDC/DDID/NCIRD/DBD)
To: Blackmore, Carina (CDC flhealth.gov)
Cc: Schrodt, Caroline (CDC/DDID/NCEZID/DHCPP)
Subject: RE: cdc consult
Date: Wednesday, March 11, 2020 9:17:47 PM

Dr. Blackmore:

Caroline is not working tonight, but I'm happy to work with you and discuss any questions. I think our cruise ship team is likely the best group to involve with this. I can see if they are able to discuss tonight, but it might be tomorrow AM before we are able to pull everyone together. Would that be OK? I'm also happy to have a call with you to clarify the questions as well before we set up the larger conference call. Let me know what would be best-

Thanks-

Sara Oliver, MD, MSPH
LCDR, U.S. Public Health Service
Medical Director, CDC COVID Clinical Call Unit

Hi Caroline. We would be interested in a consult to discuss the port situation and your recommendations to minimize exposure to employees and passengers. Are u still willing to set this up? Thanks Carina

Subject: RE: cdc consult

Dr. Blackmore:

I communicated to our morning team that there was follow up needed with you all.

AMERICAN OVERSIGHT

Separately, FL health leadership (FL Surgeon General I think?) reached out to Jay Butler here at CDC separately to discuss issues, involving our cruise ship task force. Chris Jones, the lead for our call unit, followed up and was told that local leadership was connected with staff at the Miami Quarantine station and that there were no additional questions.

Are there remaining issues you would like to discuss? We can have a call tonight or set up additional calls in the AM. Apologize for the miscommunication: we were told all was taken care of. Happy to help in any way we can!

Sara

Subject: communications test

Emerald Coast Healthcare Coalition is conducting our quarterly communications test which seems very timely with everything going on due to coronavirus - this test ensures that we maintain communication with our partners
Please respond to me only - do not copy all
Please send email answering YES that you received my communication for this test
Thank you

--

Ann Hill, Executive Director
Emerald Coast Healthcare Coalition
850-585-1679

Hi Amie.

Thank you for your email. We completely understand how COVID-19 response efforts are affecting CHD workloads and that it is the priority. To that end, absolutely do not worry about the March 31st deadline. Our Health Improvement Planning team is willing to assist at any time and once things get to a better pace.

Thank you, and let us know if we can do anything to help you.

Jennifer

AMERICAN OVERSIGHT

Hi Jennifer,

Can we request an extension for the six pack documents due date (3/31)? My preparedness planners in each county and nursing directors are the leads for reaccreditation and the six pack documents, we are spending the majority of our days answering COVID questions, meetings, FIT testing, etc. and I don't foresee that slowing down. Your staff have been great assisting, but we do not have extra staff in my three small counties to hand off these roles.

Thanks,
Amie

Subject: questions
Importance: High

Do you have a few minutes to answer questions about clinical steps for COVID-19 testing? Dr. Rivkees wants an updated checklist for clinicians and MQA is the lead. They want step by step instructions on who needs to get testing at CHD and send to BPHL and who can get a private provider to write an order for testing and go to a commercial lab.

Also – they want step by step about collection through delivery of specimens for testing and how results are reported.

THANKS!!!

Subject: RE: staff
Date: Monday, March 16, 2020 11:00:42 AM

While disease is still believed to be rare in a given community, like currently in Duval, we should still be encouraging exclusion of medium and high risk HCP.

https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html

If patient was wearing a mask, she is medium risk and should be excluded for 14 days and monitored.
If patient was not wearing a mask, she is high risk and should be excluded for 14 days and monitored. Certainly the highest priority for stricter approach.

HCP in the high- or medium-risk category should undergo active monitoring, including restriction from work in any healthcare setting until 14 days after their last exposure. If they develop any fever (measured temperature >100.0oF or subjective fever) OR respiratory symptoms consistent with COVID-19 (e.g., cough, shortness of breath, sore throat)* they should immediately self-isolate (separate themselves from others) and notify their local or state public health authority and healthcare facility promptly so that they can coordinate consultation and referral to a healthcare provider for further evaluation.

Additional Considerations and Recommendations:

While contact tracing and risk assessment, with appropriate implementation of HCP work restrictions, of potentially exposed HCP remains the recommended strategy for identifying and reducing the risk of transmission of COVID-19 to HCP, patients, and others, it is not practical or achievable in all situations. Community transmission of COVID-19 in the United States has been reported in multiple areas. This development means some recommended actions (e.g., contact tracing and risk assessment of all potentially exposed HCP) are impractical for implementation by healthcare facilities. In the setting of community transmission, all HCP are at some risk for exposure to COVID-19, whether in the workplace or in the community. Devoting resources to contact tracing and retrospective risk assessment could divert resources from other important infection prevention and control activities. Facilities should shift emphasis to more routine practices, which include asking HCP to report recognized exposures, regularly monitor themselves for fever and symptoms of respiratory infection and not report to work when ill. Facilities should develop a plan for how they will screen for symptoms and evaluate ill HCP. This could include having HCP report absence of fever and symptoms prior to starting work each day.

Facilities could consider allowing asymptomatic HCP who have had an exposure to a COVID-19 patient to continue to work after options to improve staffing have been exhausted and in consultation with their occupational health program. These HCP should still report temperature and absence of symptoms each day prior to starting work. Facilities could have exposed HCP wear a facemask while at work for the 14 days after the exposure event if there is a sufficient supply of facemasks. If HCP develop even mild symptoms consistent with COVID-19, they must cease patient care activities, don a facemask (if not already wearing),

Carina, one of our NBS testing staff works part time weekends as a phlebotomist at a hospital and she was notified this morning that a patient she drew blood from in the ER on 03/04/2020 tested positive for COV-19. She was told by the hospital to wear a face mask and let them know if any symptoms.

She is wearing a mask now, can she continue to work or does she need be sent home? Please advise- thanks

munger@ag.state.mn.us
Cc: BORUP Amanda * OLCC <Amanda.Borup@oregon.gov>
Subject: [EXTERNAL] RE: COVID19 Guidance to Providers

We circulated the NJ DOH and CDC guidance for businesses (https://www.nj.gov/health/cd/documents/topics/NCOV/Guide%20for%20businesses_3-4-2020.pdf [nj.gov] and https://www.cdc.gov/coronavirus/2019-ncov/community/organizations/businesses-employers.html [cdc.gov])

Since NJ has declared a public health emergency and DOH is the regulatory agency, we also have broad authority to waive regulations for healthcare facilities, and are hosting a call with the industry on Monday to discuss ways to continue to serve the patient population but allow for some social distancing (our dispensaries can get pretty crowded at peak times).

We are also advising patients to have at least a 14 day supply of medical cannabis on hand, like any other medication, in the event they are asked to quarantine.

Very interested to hear what others are doing, thanks for starting this thread.

Best,

Jeff

Hi all,
Currently developing some material for our veterinarians here in Australia.
A question came up from one veterinarian regarding any risk of ferrets - given their role as an animal disease model for SARS-COV-1.
Does anyone have any thoughts or perspectives on this?
Cheers
Guy

Sent: Friday, March 13, 2020 9:20 AM
To: WPCG30@LISTSERV.CDC.GOV
Subject: Re: [External] Re: Update on Hong Kong Dog

All,
I agree with Juia. My curmudgeonly take from a lot of time in public health. We know a little bit about corona viruses in general, about droplet transmission of viruses, and how to work a public health problem before we have a lot of data. Bathing the dog with a normal shampoo and regular PPE (gloves and apron) on entry if you are worried. No extraordinary PPE should be needed. Think about it. Even if the pet were covered in virus (and pets are hardly hard, impervious surfaces), bathing it with a shampoo will get rid of the virus and it is not likely that someone bathing a dog will touch their face with soaped up gloved hands. And if they do, we all know that soap does bad things to the virus. Wetting the animal will not aerosolize the virus and we know it is droplet transmitted--few if any indications from human literature about re-aerosolization from medical procedures.

If you had a pet with symptoms, it would be the first in the world and you can best bet that USDA and OIE (and a host of other acronym agencies) will get involved in a second and the pet will be tested every which way known.

And as in all public health outbreaks, if we get information that would change those recommendations, we will and will communicate that to our colleagues. Wish you all could have a quiet weekend (but I also wish I were empress of the universe).

Regards,
Gail

AMERICAN OVERSIGHT

Casey,
Thanks for this update. It seems as if this dog is still being housed at the animal keeping facility. Do we know the plan and conditions for this dog's release? Is there a particular concern that is informing his quarantine at this point? I continue to emphasize here, as we receive an increasing number of questions about this aspect of COVID-19 response, that there is no evidence that pets either become ill with COVID-19 or are any significant source for human illness and the best way pet owners can protect their pets is to protect themselves from becoming ill with COVID-19. For veterinarians, I have been encouraging review of the CDC guidance for workplace preparedness and offering thoughts about best practices associated with clients who present for appointments who are ill with symptoms compatible with COVID-19. Are there any other messages that we should be sharing with animal healthcare providers, shelters and/or pet owners at this time?
Thank you for your work.
Julie

Pet dog blood test result released

March 12, 2020

A blood test of a pet dog, which had earlier repeatedly tested weak positive for COVID-19, has shown a negative result, the Agriculture, Fisheries & Conservation Department announced today.

The department collected samples from the dog five times for tests since late February and detected low levels of the virus in its nasal and oral cavity samples.

A blood sample was taken from it on March 3 for a serological test, which resulted in a negative result, indicating that there is not a strong immune response and that there are currently not measurable amounts of antibodies in the blood.

The negative serological test result does not suggest that the dog is not infected with the virus.

It is known in some asymptomatic or mild cases of human infections with other types of coronavirus that antibodies may not always develop. It is also not uncommon to have a negative result in the earlier stages of infection as it often takes 14 days or more for measurable levels of antibodies to be detected.

Another blood sample will be taken later for further testing.

AMERICAN OVERSIGHT

Additionally, the department, together with the University of Hong Kong's School of Public Health, has conducted gene sequencing of the COVID-19 virus from the dog and its close human contacts who were confirmed to be infected.

They discovered that the viral sequences are very similar, indicating that the virus likely spread from the infected people to the dog.

The animal has not shown any signs of the disease and it is currently under quarantine at the animal keeping facility at the Hong Kong Port of Hong Kong-Zhuhai-Macao Bridge.

The department will continue to monitor the dog closely.

As COVID-19 is a new disease, it will work together with the Department of Health in handling relevant cases.

There currently is no evidence that pet animals can be a source of infection of COVID-19, the department added.

Pet owners should not be overly concerned and under no circumstances should they abandon their pets.

Hi all,
Currently developing some material for our veterinarians here in Australia.
A question came up from one veterinarian regarding any risk of ferrets - given their role as an animal disease model for SARS-COV-1.
Does anyone have any thoughts or perspectives on this?
Cheers
Guy

> I agree with Juia. My curmudgeonly take from a lot of time in public health. We know a little bit about corona viruses in general, about droplet transmission of viruses, and how to work a public health problem before we have a lot of data. Bathing the dog with a normal shampoo and regular PPE (gloves and apron) on entry if you are worried. No extraordinary PPE should be needed. Think about it. Even if the pet were covered in virus (and pets are hardly hard, impervious surfaces), bathing it with a shampoo will get rid of the virus and it is not likely that someone bathing a dog will touch their face with soaped up gloved hands. And if they do, we all know that soap does bad things to the virus. Wetting the animal will not aerosolize the virus and we know it is droplet transmitted--few if any indications from human literature about re-aerosolization from medical procedures.

AMERICAN OVERSIGHT

If you had a pet with symptoms, it would be the first in the world and you can best bet that USDA and OIE (and a host of other acronym agencies) will get involved in a second and the pet will be tested every which way known.

And as in all public health outbreaks, if we get information that would change those recommendations, we will and will communicate that to our colleagues. Wish you all could have a quiet weekend (but I also wish I were empress of the universe).

Regards,

Gail

<julia.murphy@vdh.virginia.gov> wrote:

Casey,

Thanks for this update. It seems as if this dog is still being housed at the animal keeping facility. Do we know the plan and conditions for this dog's release? Is there a particular concern that is informing his quarantine at this point? I continue to emphasize here, as we receive an increasing number of questions about this aspect of COVID-19 response, that there is no evidence that pets either become ill with COVID-19 or are any significant source for human illness and the best way pet owners can protect their pets is to protect themselves from becoming ill with COVID-19. For veterinarians, I have been encouraging review of the CDC guidance for workplace preparedness and offering thoughts about best practices associated with clients who present for appointments who are ill with symptoms compatible with COVID-19. Are there any other messages that we should be sharing with animal healthcare providers, shelters and/or pet owners at this time?

Thank you for your work.

Julie

To: WPCG30@LISTSERV.CDC.GOV
Subject: Re: COVID19
Date: Tuesday, March 17, 2020 8:30:53 AM

It appears there are two take-home messages in this article:

1) "Pigs, ferrets, cats and non-human primates contain largely favorable 2019-nCoV-contacting residues in their ACE2, and hence may serve as animal models or intermediate hosts for 2019-nCoV. It is worth noting that SARS-CoV was isolated in wild palm civets near Wuhan in 2005 (9), and its RBD had already been well adapted to civet ACE2 (except for residue 487). Thus, bats and other wild animals in and near Wuhan should be screened for both SARS-CoV and 2019-nCoV."
2) "There are certainly other factors that affect the infectivity and pathogenesis of 2019-nCoV and will need to be investigated."

Although receptor compatibility may be conducive to attachment in pigs, ferrets, cats and NH primates, infectivity and pathogenesis may not be ideal for colonization and disease. Hopefully we get more information from researchers in the very near future. Since we are dealing with full-blown panic within some sectors of the veterinary community in Louisiana, I believe it prudent to stress both points.

Good Evening,

The attached reflects final revisions by myself, Cassandra, and the SSG.

I am using Adobe Pro to make edits and I'm unable to edit the links. I have copied Micheal Wydotis for assistance with the last two links in the "additional guidance" section of the document.

Dr. Blackmore please review and provide final approval on the content. Per Cassandra this document needs to be made available by tomorrow morning.

Subject: Concern Asymptomatic Screening and Negative Results

It is becoming increasingly concerning that persons who are in their 14 day self-quarantine period, that receive a negative test think that ends their quarantine. With increasing availability of testing, we need to ensure that persons know just because you may have received a negative test during the 14 days, you still need to stay quarantined for the whole time.

Emily,

Thank you for taking my call this evening. As discussed I received a call from Dr. Paula Thaqi, the Director for the Broward County Health Department (cc'd above) to let us know that some of our partner agencies have concerns about this ship docking tomorrow morning due to the death described below. The feeling is that these concerns could be addressed by COVID-19 testing prior to allowing the ship into port. I understand that you are initiating further discussion at CDC regarding this situation and look forward to your response.

Hi Patrick and Ann,
Attached is the death investigation report submitted to us by the ship physician. He has also provided the additional summary below. CDC is recommending that the ship release the body to the ME. Please let us know if the ME has any questions that we can assist with.

Information:
37 yr old female guest. Us citizen. No recent travel out of the US.
Known with underlying chronic lung disease.
Presented to medical centre 14-Mrach-2020 in septic shock and respiratory failure due to a Broncho-Pneumonia.
Guest was admitted into the medical centre and treated with planned medical disembarkation in Key West on arrival on 15-March-2020.
Her condition deteriorated in the early hours of the morning 15-March-2020 and despite active resuscitation she subsequently passed away.

Thanks and all the best,
Emily

AMERICAN OVERSIGHT

From: Thaqi, Paula M
To: Roberson, Shamarial
Subject: Re: Death on Holland America Nieuw Statendam
Date: Sunday, March 15, 2020 2:39:35 AM

Good evening,

As evidenced by the email chain, the CDC Miami Quarantine station was informed of the death of a passenger aboard the Nieuw Statendam due to respiratory illness. The DGMQ opined that passengers could disembark as scheduled. Due to concerns expressed by Broward County and the Sheriff, they were asked to reconsider and rendered the same opinion. I understand from our conversation that a subsequent conference call was held with CDC and they again declined to stop the disembarkation of passengers from this ship pending the testing for COVID-19 of the deceased passenger. As we discussed, it has been conveyed to me that our County Administration and Sheriff are not clearing passengers to disembark and would like a public statement from CDC regarding their opinion. The ship is scheduled to dock today at 5:30am. Thank you for your assistance with this matter.

Best regards,
Paula

Good Afternoon Joni

I have been following this

I notice that some industries have already published information

https://www.just-food.com/news/coronavirus-sanderson-farms-introduces-strict-guidelines-for-employees_id143293.aspx?utm_source=espresso&utm_medium=email&utm_campaign=17-03-2020&utm_content=358345&utm_term=1-59

There is biweekly coordination call with FEMA and industry partners

CAUTION: This email originated from outside of DHS. DO NOT click links or open attachments unless you recognize and/or trust the sender. Contact your component SOC with questions or concerns.

For Widest Dissemination

Business and Infrastructure Partners:

You are invited to attend a business and infrastructure partners call concerning the Novel Coronavirus 2019 (COVID-19), hosted by the Department of Homeland Security's Cybersecurity and Infrastructure Security Agency (CISA) and FEMA's Office of Response and Recovery Logistics Management Directorate. The teleconference will include an overview of the current situation, a discussion on supply chain issues, updates from available regions or sectors, and will conclude with an open forum for questions and information sharing.
These calls will occur twice weekly until further notice.

Date: Tuesdays and Thursdays, Starting March 17th - until further notice
Time: 3:00 pm Eastern

Dial-In #: 1-800-593-7177
Passcode/PIN: 7963614

The conference line will open 10 minutes prior to the call.

Business and Infrastructure partners are also invited to access the FEMA NBEOC dashboard via the following link:

https://fema.connectsolutions.com/nbeoc

Please contact the CISA Integrated Operations Coordination Center (CIOCC) watch if you have any questions.

Respectfully,

CISA Integrated Operations Coordination Center (CIOCC)
Cybersecurity and Infrastructure Security Agency (CISA)
Office: 202-282-9201 | Email: CIOCC@CISA.dhs.gov

Got it. Misunderstood the question. So you are trying to figure out what happens to the animals that have been shipped to a slaughter plant if the plant closes after the animals have arrived is the question. Is FSIS giving any guidance? Any analagous situations (like floods, fire, hurricanes)?

Subject: New Talking Points - Animals and COVID-19

This message may be from an external email source.
Do not select links or open attachments unless verified. Report all suspicious emails to Minnesota IT Services Security Operations Center.

Dear NASPHV Colleagues,

We wanted to share an update on COVID-19 and CDC's latest talking points on COVID-19 and pets and other animals.

AMERICAN OVERSIGHT

If a state public health veterinarian needs to consult with the CDC COVID-19 One Health Team, you can reach us 24/7 by calling the CDC Emergency Operations Center at 770-488-7100.

- On 28 February, the Hong Kong Agriculture, Fisheries and Conservation Department (AFCD) reported that a pet dog that had contact with a person infected with COVID-19 tested "weak positive to COVID-19 " through nose and mouth samples.
    - AFCD reports that this dog does not have any symptoms of illness and the dog is currently being monitored in quarantine.
    - Repeat testing of this dog will be conducted during quarantine to help determine if the dog has really been infected or not.
    - CDC is working with human and animal health partners to monitor this situation and will continue to provide updates as information becomes available.
    - *AFCD official report available at https://www.info.gov.hk/gia/general/202002/28/P2020022800013.htm*

- To date, CDC has not received any reports of pets or other animals becoming sick with COVID-19. At this time, there is no evidence that pets, including dogs, can spread COVID-19.

- There is no reason to think that any animals, including pets, in the United States might be a source of infection with this new coronavirus. However, it is important to include pets in your family's preparedness planning efforts including having a 2 week supply of pet food and pet medicines available.

    - *For more information on preparing for your pet, please visit https://www.cdc.gov/healthypets/emergencies/pet-disaster-prep-kit.html*

- This is an evolving situation, and we will continue to provide updates as new information becomes available.

- Since other infectious diseases can spread between animals and people, it's always a good idea to wash your hands after being around animals or handling animals, their food, or supplies.

AMERICAN OVERSIGHT

- For more information on the many benefits of pet ownership, as well as staying safe and healthy around animals including pets, livestock, and wildlife, visit CDC's Healthy Pets, Healthy People website (www.cdc.gov/healthypets).

- To see more from CDC on Animal's and COVID-19, please visit https://www.cdc.gov/coronavirus/2019-ncov/faq.html#2019-nCoV-and-animals

District Medical Examiner
< sent from my iPad >

Begin forwarded message:

Subject: [EXTERNAL]: RE: COVID-19

Good morning,

As a point of clarification, please be aware that medical examiners shall accept jurisdiction and certify death certificates on all cases with suspected COVID-19 deaths. As COVID-19 has been deemed a Public Health Emergency, deaths relating to it fall directly in line with Florida Statute 406.11(1)(a)11. In an effort to prevent possible spreading of the virus in air controlled environments, autopsies are not expected to be performed on decedents with confirmed COVID-19 diagnoses prior to

AMERICAN OVERSIGHT

death, however, that decision may be left to professional judgement. Regardless of if an autopsy or external examination is performed, any suspected COVID-19 deaths will need to be certified by the medical examiner and reported to MEC Staff.

As requested by the Department of Health, MEC Staff are also conductng a brief survey of each office's Personal Protective Equipment (PPE). Please notify us with the answers to the questions listed below by close of business Friday.

1. What kind of PPE does your office have on hand?
2. How long will your on-hand PPE inventory last if you are unable to obtain any new shipments of PPE?
3. What PPE will you need most quickly in the event that you are unable to obtain any new shipments of PPE?

Thank you,

Subject: COVID-19

Good afternoon,

As you are probably aware, Governor DeSantis has issued an Executive Order directing a Public Health Emergency and establishing Florida's Response Protocol for COVID-19. If you work any COVID-19 related death cases, please fill out the attached form completely for each case and forward them to me as soon as possible.

The Public Health Emergency currently exists for the entire State of Florida.

Thank you,

Sent: Thursday, March 12, 2020 12:02 PM
To: Pritchard, Scott <Scott.Pritchard@flhealth.gov>
Subject: End of isolation for confirmed cases

Scott – Attached is a compilation of related information.
Key points:

- I found 2 states that have guidance independent of testing
  - WA 7 days or 72 hrs after symptom resolution
  - TN 14 days or 72 hrs after symptom resolution
- Attached NEJM paper is the only thing I could find for new virus and shows most upper respiratory specimens are PCR negative by 15 days.
- Papers on SARS and MERS show longer shedding period in stool and resp specimens, up to median 27 days and range up to 50-100 days.
- CDC guidance has not been updated as far as I can tell, but does seem to permit some flexibility to account for variety of factors, including serial test negative.

So if you want a test independent criteria, based on preliminary assessment, I would suggest we align with the more conservative TN criteria, which is stated below:

TN (source: email from CEFO in TN, couldn't find anything on web)
14 days or 72 hours after symptom resolution, whichever is longer. No serial testing.

AMERICAN OVERSIGHT

HH contacts must stay home for at least 14 days, or 7 days after case's symptom resolution, whichever is longer and presuming the HH contact remains asymptomatic.

This seems like a more reasonable time period based on the limited findings in the NEJM paper.

Tim

Subject: RE: Florida Cruise Ship Summary 3.17.20 4 pm

Hi Mr. McGough,
I wanted to update you about the situation with Royal Caribbean and the flights from Chile and Brazil

1. There has been no movement on any flights from Brazil
2. AT 6:30 PM EST, Ms. Kalisch from Royal Caribbean emailed us to tell us that the Government of Chile had put a hold on their flights
3. At around 6:44 PM, I received a call from Dr. Rivkees, the Florida Surgeon General who told me that the Governor was not going to allow any flights to land and disembark passengers in Miami until there was a solid plan articulated by the Cruise company.
4. Right after that call we notified the State Department and copied DHS. We also notified Eleni Kalisch and told her to contact the State of Florida to coordinate a plan(we gave her the relevant phone numbers)
5. At approximately 7:30 Eleni Kalisch emailed that the flight from Chile was going to proceed, but she never responded about contacting Florida state or local authorities despite multiple emails from CDC telling her to do so
6. At 10:07 she told us that the flight would be departing Chile at 12:10 AM local time and arriving in Miami at 9:10 AM EST

Attached is the last email chain starting at 10:20 when Eleni told us there is a slight change of plans which states that CDC will be screening her passengers. We have told her multiple times that CDC will not be screening passengers. We asked her to contact us by phone right away (11PM), but she has not done so. We believe that the flight may have already departed and we are concerned that

AMERICAN OVERSIGHT

no one has signed off on this from Florida and that a clear and reasonable plan has not been sent any of us.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 25 new positive cases of coronavirus disease (COVID-19) in Florida and the death of a Florida resident in California. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 68-year old female Orange County resident tested positive for COVID-19. This test was performed in California following travel to Asia. This person is deceased.
- A 41-year old male in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 54-year old male in Osceola County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 51-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 67-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 62-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is not a travel related case.
- A 29-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with close contact with a traveler.
- A 69-year old male, non-Florida resident visiting from Europe tested positive for COVID-19 in Alachua County.
- A 59-year old female in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 65-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 77-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated

AMERICAN OVERSIGHT

until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 59-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 39-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 83-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 41-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 22-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 19-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 58-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 43-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

COVID-19 Cases

Chart

AMERICAN OVERSIGHT

Chart part 2

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

AMERICAN OVERSIGHT

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

AMERICAN OVERSIGHT

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads

AMERICAN OVERSIGHT

of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

Subject: Info on COVID-19

Good Morning Mayor

Hope this email finds you well. As promised, please find below the CDC recommendations for preventing the spread of Coronavirus Disease 2019 in Homes. I also included the link for your information.

https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-prevent-spread.html#precautions

As discussed, please follow these recommendations. I would add to stay stress free, get plenty of rest, eat well and exercise as tolerated. As you know 80% of people who are infected with the virus have mild symptoms, it is important that you take good care of yourself. You also need to stay in isolation separate yourself from other people and animals in your home. One of our senior staff will contact you daily through phone to check on your health status until the end of the 14 days. It is important as well that you monitor your health, if you develop any symptoms such as fever, cough, or shortness of breath, please contact your health care provider as soon as you can and let him know about your symptoms.

AMERICAN OVERSIGHT

The Department will continue to monitor your health. We want to ensure you stay healthy until the end of the 14 day period.

If you have any questions, please do not hesitate to contact us.

Best of Luck, Mr. Mayor.

Kindest regards,

Coronavirus Disease 2019 (COVID-19)

Preventing the Spread of Coronavirus Disease 2019 in Homes and Residential Communities

Interim Guidance

Update: February 14, 2020

(This guidance provides clarification regarding evaluation for home isolation and a new section with information regarding preventative steps for household members, intimate partners, and caregivers in a nonhealthcare setting of a person with symptomatic, laboratory-confirmed COVID-19.)

This interim guidance is based on what is currently known about the epidemiology of COVID-19 and the transmission of other viral respiratory diseases. CDC will update this interim guidance as needed and as additional information becomes available.

Coronaviruses are a large family of viruses, some causing illness in people and others that circulate among animals, including camels, cats, and bats. Rarely, animal coronaviruses can infect people exposed to infected animals, and then spread among people, as has been seen with MERS-CoV and SARS-CoV, and likely now with SARS-CoV-2, the virus that causes COVID-19. This interim guidance may help prevent this virus from spreading among people in their homes and in other residential communities.

This interim guidance is intended for:

- People with confirmed or suspected COVID-19, including persons under investigation, who do not need to be hospitalized and who can receive care at home

AMERICAN OVERSIGHT

(see Interim Guidance for Implementing Home Care of People Not Requiring Hospitalization for Coronavirus Disease 2019 (COVID-19));

- People with confirmed COVID-19, who were hospitalized and then determined to be medically stable to go home (see Interim Guidance for Implementing Home Care of People Not Requiring Hospitalization for Coronavirus Disease 2019 (COVID-19));
- Household members, intimate partners, and caregivers in a nonhealthcare setting of a person with symptomatic, laboratory-confirmed COVID-19.

Prevention steps for

People with confirmed or suspected COVID-19 (including persons under investigation) who do not need to be hospitalized

and

People with confirmed COVID-19 who were hospitalized and determined to be medically stable to go home

Your healthcare provider and public health staff will evaluate whether you can be cared for at home. If it is determined that you do not need to be hospitalized and can be isolated at home, you will be monitored by staff from your local or state health department. You should follow the prevention steps below until a healthcare provider or local or state health department says you can return to your normal activities.

Stay home except to get medical care

People who are mildly ill with COVID-19 are able to isolate at home during their illness. You should restrict activities outside your home, except for getting medical care. Do not go to work, school, or public areas. Avoid using public transportation, ride-sharing, or taxis.

Separate yourself from other people and animals in your home

People: As much as possible, you should stay in a specific room and away from other people in your home. Also, you should use a separate bathroom, if available.

Animals: You should restrict contact with pets and other animals while you are sick with COVID-19, just like you would around other people. Although there have not been reports of pets or other animals becoming sick with COVID-19, it is still recommended that people sick with COVID-19 limit contact with animals until more information is known about the virus. When possible, have another member of your household care for

AMERICAN OVERSIGHT

your animals while you are sick. If you are sick with COVID-19, avoid contact with your pet, including petting, snuggling, being kissed or licked, and sharing food. If you must care for your pet or be around animals while you are sick, wash your hands before and after you interact with pets and wear a facemask. See COVID-19 and Animals for more information.

Call ahead before visiting your doctor

If you have a medical appointment, call the healthcare provider and tell them that you have or may have COVID-19. This will help the healthcare provider's office take steps to keep other people from getting infected or exposed.

Wear a facemask

You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) or pets and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then people who live with you should not stay in the same room with you, or they should wear a facemask if they enter your room.

Cover your coughs and sneezes

Cover your mouth and nose with a tissue when you cough or sneeze. Throw used tissues in a lined trash can. Immediately wash your hands with soap and water for at least 20 seconds or, if soap and water are not available, clean your hands with an alcohol-based hand sanitizer that contains at least 60% alcohol.

Clean your hands often

Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing, or sneezing; going to the bathroom; and before eating or preparing food. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry.

Soap and water are the best option if hands are visibly dirty. Avoid touching your eyes, nose, and mouth with unwashed hands.

Avoid sharing personal household items

You should not share dishes, drinking glasses, cups, eating utensils, towels, or bedding with other people or pets in your home. After using these items, they should be washed thoroughly with soap and water.

AMERICAN OVERSIGHT

Clean all “high-touch” surfaces everyday

High touch surfaces include counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables. Also, clean any surfaces that may have blood, stool, or body fluids on them. Use a household cleaning spray or wipe, according to the label instructions. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.

Monitor your symptoms

Seek prompt medical attention if your illness is worsening (e.g., difficulty breathing). **Before** seeking care, call your healthcare provider and tell them that you have, or are being evaluated for, COVID-19. Put on a facemask before you enter the facility. These steps will help the healthcare provider’s office to keep other people in the office or waiting room from getting infected or exposed. Ask your healthcare provider to call the local or state health department. Persons who are placed under active monitoring or facilitated self-monitoring should follow instructions provided by their local health department or occupational health professionals, as appropriate. When working with your local health department check their available hours.

If you have a medical emergency and need to call 911, notify the dispatch personnel that you have, or are being evaluated for COVID-19. If possible, put on a facemask before emergency medical services arrive.

Discontinuing home isolation

Patients with confirmed COVID-19 should remain under home isolation precautions until the risk of secondary transmission to others is thought to be low. The decision to discontinue home isolation precautions should be made on a case-by-case basis, in consultation with healthcare providers and state and local health departments.

Recommended precautions for household members, intimate partners, and caregivers in a nonhealthcare setting[1] of

A patient with symptomatic laboratory-confirmed COVID-19

or

AMERICAN OVERSIGHT

A patient under investigation

Household members, intimate partners, and caregivers in a nonhealthcare setting may have close contact[2] with a person with symptomatic, laboratory-confirmed COVID-19 or a person under investigation. Close contacts should monitor their health; they should call their healthcare provider right away if they develop symptoms suggestive of COVID-19 (e.g., fever, cough, shortness of breath) (see Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential Coronavirus Disease 2019 (COVID-19) Exposure in Travel-associated or Community Settings.)

Close contacts should also follow these recommendations:

- Make sure that you understand and can help the patient follow their healthcare provider's instructions for medication(s) and care. You should help the patient with basic needs in the home and provide support for getting groceries, prescriptions, and other personal needs.
- Monitor the patient's symptoms. If the patient is getting sicker, call his or her healthcare provider and tell them that the patient has laboratory-confirmed COVID-19. This will help the healthcare provider's office take steps to keep other people in the office or waiting room from getting infected. Ask the healthcare provider to call the local or state health department for additional guidance. If the patient has a medical emergency and you need to call 911, notify the dispatch personnel that the patient has, or is being evaluated for COVID-19.
- Household members should stay in another room or be separated from the patient as much as possible. Household members should use a separate bedroom and bathroom, if available.
- Prohibit visitors who do not have an essential need to be in the home.
- Household members should care for any pets in the home. Do not handle pets or other animals while sick. For more information, see COVID-19 and Animals.
- Make sure that shared spaces in the home have good air flow, such as by an air conditioner or an opened window, weather permitting.
- Perform hand hygiene frequently. Wash your hands often with soap and water for at least 20 seconds or use an alcohol-based hand sanitizer that contains 60 to 95% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry. Soap and water should be used preferentially if hands are visibly dirty.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- The patient should wear a facemask when you are around other people. If the patient is not able to wear a facemask (for example, because it causes trouble breathing), you, as the caregiver, should wear a mask when you are in the same room as the patient.
- Wear a disposable facemask and gloves when you touch or have contact with the patient's blood, stool, or body fluids, such as saliva, sputum, nasal mucus, vomit,

AMERICAN OVERSIGHT

urine.

  - Throw out disposable facemasks and gloves after using them. Do not reuse.
  - When removing personal protective equipment, first remove and dispose of gloves. Then, immediately clean your hands with soap and water or alcohol-based hand sanitizer. Next, remove and dispose of facemask, and immediately clean your hands again with soap and water or alcohol-based hand sanitizer.

- Avoid sharing household items with the patient. You should not share dishes, drinking glasses, cups, eating utensils, towels, bedding, or other items. After the patient uses these items, you should wash them thoroughly (see below "Wash laundry thoroughly").
- Clean all "high-touch" surfaces, such as counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables, every day. Also, clean any surfaces that may have blood, stool, or body fluids on them.
  - Use a household cleaning spray or wipe, according to the label instructions. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.
- Wash laundry thoroughly.
  - Immediately remove and wash clothes or bedding that have blood, stool, or body fluids on them.
  - Wear disposable gloves while handling soiled items and keep soiled items away from your body. Clean your hands (with soap and water or an alcohol-based hand sanitizer) immediately after removing your gloves.
  - Read and follow directions on labels of laundry or clothing items and detergent. In general, using a normal laundry detergent according to washing machine instructions and dry thoroughly using the warmest temperatures recommended on the clothing label.
- Place all used disposable gloves, facemasks, and other contaminated items in a lined container before disposing of them with other household waste. Clean your hands (with soap and water or an alcohol-based hand sanitizer) immediately after handling these items. Soap and water should be used preferentially if hands are visibly dirty.
- Discuss any additional questions with your state or local health department or healthcare provider. Check available hours when contacting your local health department.

CDC Confirms Possible Instance of Community Spread of COVID-19 in U.S.

The Centers for Disease Control and Prevention (CDC) has confirmed an infection with the virus that causes COVID-19 in California in a person who reportedly did not have relevant travel history or exposure to another known patient with COVID-19.

At this time, the patient's exposure is unknown. It's possible this could be an instance of community spread of COVID-19, which would be the first time this has happened in the United States. Community spread means spread of an illness for which the source of infection is unknown. It's also possible, however, that the patient may have been exposed to a returned traveler who was infected.

This case was detected through the U.S. public health system — picked up by astute clinicians. This brings the total number of COVID-19 cases in the United States to 15.

The federal government has been working closely with state, local, tribal, and territorial partners, as well as public health partners, to respond to this public health threat. Unprecedented, aggressive efforts have been taken to contain the spread and mitigate the impact of this virus.

This is a rapidly evolving situation. CDC will continue to update the public as circumstances warrant. For more information about COVID-19 visit www.cdc.gov/covid19.

###

U.S. Department of Health and Human Services

CDC works 24/7 protecting America's health, safety and security. Whether diseases start at home or abroad, are curable or preventable, chronic or acute, or from human activity or deliberate attack, CDC responds to America's most pressing health threats. CDC is headquartered in Atlanta and has experts located throughout the United States and the world.

Subject: Re: NSF RAPID proposal

Dear Dr. Lanza,

We are writing a proposal to the National Science Foundation on reducing the risk of COVID-19 transmission in crowded locations. I have attached a 1-page summary. I was wondering if you can provide a letter of collaboration for it. The text of the letter, in the NSF template would be along the following lines, addressed to "National Science Foundation":

"If the proposal submitted by Dr. Ashok Srinivasan entitled "Collaborative:RAPID:Leveraging New Data Sources to Analyze the Risk of COVID-19 in Crowded Locations" is selected for funding by NSF, it is my intent to collaborate and/or commit resources as detailed in the Project Description or the Facilities, Equipment or Other Resources section of the proposal."

In the facilities document, I would write:

"Dr. John Lanza is Director of the Escambia County Health Department. He will provide input and feedback on the practicality of ideas that we analyze for decreasing epidemic risk."

Please feel free to edit the text above. Thanks.

AMERICAN OVERSIGHT

In the biosketch, can you replace #d ii - iv with anything that will highlight your accomplishments related to infectious diseases or public health. For example, you could mention that you are a practicing physician (mentioning any specialty, board certification, or hospital affiliation). You could also mention anything related you did in the military, such as preparation for an epidemic or being in some committee related to public health. If you have mentored students, you could mention that too. Thanks.

Let us say we get snapshots of the videos at high risk locations. Can we get an undergraduate student to manually note these characteristics? Would this work? I guess we would also need to apply for IRB for that. Purdue has done an IRB at their end. We could do something similar.

AMERICAN OVERSIGHT

Ashok.
Thanks for allowing me to review the proposal.
Some areas of interest in airline passenger travel-
1. The TSA screening area. Passengers waiting to be screened stand and walk slowly in long lines weaving back and forth in alternate directions. They face adjacent lines of passengers going in opposite directions.
2. The boarding process at the gate. Passengers cluster in large unorganized groups waiting for their boarding group to be called for most airlines except for Southwest Airlines which directs passengers to line up in adjacent lines.
3. The boarding process in the jetway and aircraft. Single file lines in the jetway slowly moving. Early versus late seating and the amount of exposure from people passing by seated passengers.
Sincerely,
Wes Farr

For example, you could mention that you are a practicing physician (mentioning any specialty, board certification, or hospital affiliation). You could also mention anything related you did in the military, such as preparation for an epidemic or being in some committee related to public health. If you have mentored students, you could mention that too. Thanks.

AMERICAN OVERSIGHT

We had currently not planned on that, except for possibly detecting masks. (More strictly, we were looking to identify partly covered faces.) One possibility is to do it manually. Let us say we get snapshots of the videos at high risk locations. Can we get an undergraduate student to manually note these characteristics? Would this work? I guess we would also need to apply for IRB for that. Purdue has done an IRB at their end. We could do something similar.

I spoke with Orange Epi. The case was at the political event a Mar-A-Lago on Sunday. He was notified this week of a possible exposure and went to the doctor to be checked after he was notified. He does not know who the case was to whom he was exposed.

He has been very cooperative and has provided a thorough list of contacts including 12 people who took a private plane to the event. Orange Epi has divided the list and is in the process of following up.

They will also get Merlin updated ASAP.

Removed one bullet, made other highlighted changes. Shamarial is okay with it.

Tell us about the DOH response or 'what's going on at the church?'

- A known case attended XXX church before she tested positive for COVID-19.
- Following CDC guidance, our epidemiology staff worked with the case to determine people who may have been in close contact.
- Working with the pastor, DOH-Volusia was able to define those who were in attendance at the church activities and the risk level of the exposure of those individuals.
- We worked with the pastor to provide information to that defined audience.
- As is standard in contact tracing, anyone who was determined to be at increased risk of exposure has been contacted by our epidemiology staff is asked to self-isolate for 14 days or monitor their health.

Hello again, Alberto,
Per our conversation, in the event DOH-Volusia is contacted by media for information (written or on-camera) regarding the church exposure, DOH-Volusia is requesting the ability to fulfill both types of requests using the information. Responses to anticipated follow-up questions also are provided for approval below. Additional guidance/message points are welcome:

Reminder: The information on this potential exposure already is being distributed grass-roots style by the pastor and case.

Tell us about the DOH response or 'what's going on at the church?'

- A known case attended XXX church before she tested positive for COVID-19.
- Following CDC guidance, our epidemiology staff worked with the case to determine people who may have in close contact.
- Through the investigation, DOH-Volusia determined those who attended church activities were at low risk for exposure.
- Working with the pastor, DOH-Volusia was able to define those who were in attendance at the church activities.
- We worked with the pastor to provide information to that defined audience.
- As is standard in contact tracing, anyone who was determined to be at increased risk of exposure has been contacted by our epidemiology staff and asked to self-isolate for 14 days and monitor for symptoms.

Is it safe for people to go to church or other similar gatherings?

Currently we have no evidence of community spread in Volusia County. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular

AMERICAN OVERSIGHT

household cleaning spray or wipe.

- The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

What should seniors or high-risk people do? (Need specific message for seniors/high-risk groups since CDC has been saying they should practice social distancing measures.) Suggestion:

If you are at higher risk of getting very sick from COVID-19, you should:

- Stock up on supplies.
- Take everyday precautions to keep space between yourself and others.
- When you go out in public, keep away from others who are sick, limit close contact and wash your hands often.
- Avoid crowds as much as possible.
- Avoid cruise travel and non-essential air travel.
- During a COVID-19 outbreak in your community, stay home as much as possible to further reduce your risk of being exposed.

What should churches do?

- CDC has prevention guidance for the faith-based community. Cdc.gov/coronavirus

Suggested response to follow up questions:

- That information is part of an epi investigation. I do not have access to that information. Those at increased risk have been contacted and provided info.

Thank you, Alberto.

Subject: Status of Chile charter (Silver Express pax)

I am slimming the chain to take our overseas colleagues off for right now. Please add DHS and others in the US as needed. Adding the State Department COVID coordination unit and consular reps.

Eleni - we understand the charter from Chile is scheduled to land in MIA between 1200-1300 EDT, and that FL state authorities have said non FL residents will not be allowed to continue onward to home unless moved to another charter.

Can you give us the latest? We are concerned both about Amcits on this flight as well as future charters by RC or other charters seeking to land in FL.

Thanks - Doug

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

Dear Eleni,
Please clarify your request and the plan – which passengers are you referring to? The air ambulance passengers or the ones who are not ill and are coming in the larger charter?

As I wrote earlier, CDC will not be conducting any health screening. For the passengers who are not arriving by air ambulance, CBP/CWMD would screen the passengers based on their own protocol. CDC Quarantine Station staff will be available to respond to any illness events, as requested by CBP.

For the air ambulance, they need assessment – I understood that you have made arrangements with Dr. Barth Green/University of Miami, who is not affiliated with CDC. He/his team would make an assessment of those 6 individuals.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

Michelle –

Slight change of plans. Upon arrival at MIA, Royal Caribbean will now be arranging individual charter flights for the passengers who are cleared by CDC to return to their home cities/states.

AMERICAN OVERSIGHT

Our team has asked that CDC provide something in writing tomorrow that we can provide to the charter companies indicating that the passenger(s) boarding the charter flights have been cleared to fly commercially. We do not want the charters to deny boarding to these passengers simply because they have arrived in MIA from a cruise ship.

Thanks,

Eleni

Subject: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

Sorry - now with Eleni from RC. Again, due-outs are:

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

AMERICAN OVERSIGHT

Thank you for joining the call today. Leah - I don't believe I have everyone from CDC who was on the call, including Rachel - please add if that's the case.

I've listed the do-outs that I'm tracking below, and this chain can serve as the new, smaller group of folks working on the Brazil/Chile RC ships.

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

If say 5-6 hours, probably sooner. If it gets to the lab soon. We have an extraction run that it can go on that we're holding up for it. If it gets delayed for several hours, they're going to start working on the mountain that we received overnight and will have to stop things to put it on.

Subject: RE: Testing of Asymptomatic Persons

This is what Lea found:

Symptomatic only

Per the FDA letter of authorization:
authorization under Section 564(c) of the
Act are met, I am authorizing the emergency use of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel (as described in the scope Section of this letter (Section II)) in individuals who
meet CDC criteria for 2019-nCoV testing for the presumptive detection of 2019-nCoV

CDC criteria is:

As availability of diagnostic testing for COVID-19 increases, clinicians will be able to access laboratory tests for diagnosing COVID-19 through clinical laboratories performing tests authorized by FDA under an Emergency Use Authorization (EUA). Clinicians will also be able to access laboratory testing through public health laboratories in their jurisdictions.

This expands testing to a wider group of symptomatic patients. Clinicians should use their judgment to determine if a patient has signs and symptoms compatible with COVID-19 and whether the patient should be tested. Decisions on which patients receive testing should be based on the local epidemiology of COVID-19, as well as the clinical course of illness. Most patients with confirmed COVID-19 have developed fever[1] and/or symptoms of acute respiratory illness (e.g., cough, difficulty breathing). Clinicians are strongly encouraged to test for other causes of respiratory illness, including infections such as influenza.

Epidemiologic factors that may help guide decisions on whether to test include: any persons, including healthcare workers[2], who have had close contact[3] with a laboratory-confirmed[4] COVID-19 patient within 14 days of symptom onset, or a history of travel from affected geographic areas[5] (see below) within 14 days of symptom onset.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 63-year old male New York resident who is currently in St. Johns County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case where this individual traveled from New York to attend Daytona Bike Week in Daytona, Florida. The New York Department of Health is leading the epidemiological investigation for this individual.
- A 56-year old male in Miami-Dade County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 70-year old male in Broward County tested as positive. He is isolated and will continue to remain isolated until cleared by public health officials. This individual attended an Emergency Medical Services (EMS) Conference in Tampa, Florida. The epidemiological investigation is underway.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Cases

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified three positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation,

AMERICAN OVERSIGHT

response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.

- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Follow us on Facebook, Instagram and Twitter at @HealthyFla. For more information please visit www.FloridaHealth.gov.

For updates on COVID-19, please visit http://floridahealth.gov/COVID-19 or call 866-779-8121.

Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-

AMERICAN OVERSIGHT

risk or who have dependents or care for those with underlying conditions or vulnerabilities.

- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Good morning,

I need some guidance regarding the Regional Coordinator's ability to travel during this restriction. Part of their job requires them to travel to different clinics within their regions. However, under the current situation, I would feel better if they cancelled all travel until this restriction has been lifted.

From: NASPHV Group on behalf of Murphy, Julia
To: WPCG30@LISTSERV.CDC.GOV
Subject: Re: Update on Hong Kong Dog
Date: Friday, March 13, 2020 7:07:03 AM

Casey,
Thanks for this update. It seems as if this dog is still being housed at the animal keeping facility. Do we know the plan and conditions for this dog's release? Is there a particular concern that is informing his quarantine at this point? I continue to emphasize here, as we receive an increasing number of questions about this aspect of COVID-19 response, that there is no evidence that pets either become ill with COVID-19 or are any significant source for human illness and the best way pet owners can protect their pets is to protect themselves from becoming ill with COVID-19. For veterinarians, I have been encouraging review of the CDC guidance for workplace preparedness and offering thoughts about best practices associated with clients who present for appointments who are ill with symptoms compatible with COVID-19. Are there any other messages that we should be sharing with animal healthcare providers, shelters and/or pet owners at this time?
Thank you for your work.
Julie

On Fri, Mar 13, 2020, 1:46 AM Barton Behravesh, Casey (CDC/DDID/NCEZID/OD) <dlx9@cdc.gov wrote:

>
> A blood test of a pet dog, which had earlier repeatedly tested weak positive for COVID-19, has shown a negative result, the Agriculture, Fisheries & Conservation Department announced today.
>
> The department collected samples from the dog five times for tests since late February and detected low levels of the virus in its nasal and oral cavity samples.
>
> A blood sample was taken from it on March 3 for a serological test, which resulted in a negative result, indicating that there is not a strong immune response and that there are currently not measurable amounts of antibodies in the blood.
>
> The negative serological test result does not suggest that the dog is not infected with the virus.
>
> It is known in some asymptomatic or mild cases of human infections with other types of coronavirus that antibodies may not always develop. It is also not uncommon to have a negative result in the earlier stages of infection as it often

AMERICAN OVERSIGHT

takes 14 days or more for measurable levels of antibodies to be detected.

Another blood sample will be taken later for further testing.

Additionally, the department, together with the University of Hong Kong's School of Public Health, has conducted gene sequencing of the COVID-19 virus from the dog and its close human contacts who were confirmed to be infected.

They discovered that the viral sequences are very similar, indicating that the virus likely spread from the infected people to the dog.

The animal has not shown any signs of the disease and it is currently under quarantine at the animal keeping facility at the Hong Kong Port of Hong Kong-Zhuhai-Macao Bridge.

The department will continue to monitor the dog closely.

As COVID-19 is a new disease, it will work together with the Department of Health in handling relevant cases.

There currently is no evidence that pet animals can be a source of infection of COVID-19, the department added.

Pet owners should not be overly concerned and under no circumstances should they abandon their pets.

Subject: RE: Woman From NY - Need State Epi guidance

Hi Maria,

The woman presented to a healthcare facility (hospital) that has the capability to test. For whatever reason, they chose not collect samples and to run the test. I don't see anywhere in our guidance where we are to collect samples from these folks.

I have copied Carina Blackmore and Scott Pritchard to provide assurance.

Our current priority is as follows.

1. Nursing homes and ALFs which we have several with respiratory illness (likely flu) but we will be testing for COVID – don't want to miss these folks
2. Other outbreak facilities – we investigated Devareaux today
3. Contacts to known cases of COVID – have and will swab as resources allow
4. Travel to level three countries; China, Europe and Iran – have and will swab as resources allow
5. Travel anywhere else. See the map below. The rest of the world is orange which would include the states of NY, Washington and California.

Bruce

Subject: Woman From NY

Good afternoon,

I heard about the woman from NY who presented to Viera with fever, cough, and nausea and who wasn't tested.

Given the guidelines and the fact that NY has community spread, don't we need to test her?

I think we need to clarify that 3rd bullet on the new guidelines – travel from affected geographic with widespread community transmission. The CDC shows NY, WA, and CA as having community transmission.

Subject: CDC Requirement

Hello Dr. Villalta –

One of the requirements just presented by CDC is as follows:

1. For an air ambulance/medical evacuation flight, passengers should go to pre-determined

AMERICAN OVERSIGHT

clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

Is this something you could help arrange? The air ambulance company is not doing so.

Thanks,

Eleni

Hi Michelle –

Thank you for the guidance … very helpful! I think we are prepared to be in full compliance with perhaps a few items remaining to be addressed. I will forward to our operations team to make sure we are good to go.

Thanks for your help!

Eleni

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
   a. Send ship and flight manifests to CDC.
   b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
   c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
   d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
   a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
   b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
   a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
   b. CDC Quarantine Station staff are available for illness response, as per protocol.
   c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
   d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
   a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
   b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

AMERICAN OVERSIGHT

a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.

   i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.

   ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf

b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Sorry - now with Eleni from RC. Again, due-outs are:

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

AMERICAN OVERSIGHT

Thank you for joining the call today. Leah - I don't believe I have everyone from CDC who was on the call, including Rachel - please add if that's the case.

I've listed the do-outs that I'm tracking below, and this chain can serve as the new, smaller group of folks working on the Brazil/Chile RC ships.

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

FOR IMMEDIATE RELEASE
March 12, 2020

Contact: Joint Information Center on COVID-19 for the State of Florida
(850) 815-4940, ESF14@em.myflorida.com

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 57-year old male in Lee County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 65-year old male in Broward County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 61-year old male in Broward County tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with Port Everglades.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological for the fourth person connected to Port Everglades is ongoing.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department

AMERICAN OVERSIGHT

or health care provider and self-isolate for 14 Days.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.

AMERICAN OVERSIGHT

- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

Commissioner Doug Underhill

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
  - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have

AMERICAN OVERSIGHT

tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:
- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health
- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION
- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these

AMERICAN OVERSIGHT

providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19

AMERICAN OVERSIGHT

preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies

AMERICAN OVERSIGHT

to keep Florida top-of-mind for potential vacationers.

- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

Commissioner Doug Underhill

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

AMERICAN OVERSIGHT

table

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
  - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have

AMERICAN OVERSIGHT

tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:
- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health
- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION
- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these

AMERICAN OVERSIGHT

providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19

AMERICAN OVERSIGHT

preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies

AMERICAN OVERSIGHT

to keep Florida top-of-mind for potential vacationers.

- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

AMERICAN OVERSIGHT

Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.

- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

table

chart

tbl

AMERICAN OVERSIGHT

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

AMERICAN OVERSIGHT

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing

AMERICAN OVERSIGHT

them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.

- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
    - Inmates will continue to have access to mail, email, phone calls and video visitation.
    - Legal visits will not be impacted.

AMERICAN OVERSIGHT

    - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
    - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
    - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
    - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:

AMERICAN OVERSIGHT

- Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
- Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
- Work with public health officials to do everything possible to prepare and respond; and
- Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.

- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

AMERICAN OVERSIGHT

Table

table

chart

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.

AMERICAN OVERSIGHT

- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed

AMERICAN OVERSIGHT

with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses

AMERICAN OVERSIGHT

creating additional capacity for members to work remotely.

- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

John J. Lanza, MD, PhD, MPH, FAAP
Director
Florida Department of Health in
Escambia County
www.EscambiaHealth.com
Office: 850-595-6500 xt1001

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

Commissioner Doug Underhill

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.

AMERICAN OVERSIGHT

- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed

AMERICAN OVERSIGHT

with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
    - Inmates will continue to have access to mail, email, phone calls and video visitation.
    - Legal visits will not be impacted.
    - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
    - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
    - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
    - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses

AMERICAN OVERSIGHT

creating additional capacity for members to work remotely.

- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

Commissioner Doug Underhill

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

AMERICAN OVERSIGHT

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.

AMERICAN OVERSIGHT

- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.

- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to

AMERICAN OVERSIGHT

help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

AMERICAN OVERSIGHT

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take

AMERICAN OVERSIGHT

action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

table

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.

AMERICAN OVERSIGHT

- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.

AMERICAN OVERSIGHT

- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing

AMERICAN OVERSIGHT

enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.

- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid

AMERICAN OVERSIGHT

touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.
- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and

AMERICAN OVERSIGHT

FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.

- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

Date: Friday, March 13, 2020 7:29:41 AM

I have gotten multiple questions from planners about how best to handle pets from a covid19!household if they can't take care of pet. Hospitalized for instance. Can they be fomites for the virus. Type of ppe if a vet has to take care of a pet that has been in a household with a confirmed case. What if we had a pet with symptoms in a household with a case how could specimens be taken

Thanks for any thoughts

AMERICAN OVERSIGHT

The department collected samples from the dog five times for tests since late February and detected low levels of the virus in its nasal and oral cavity samples.

A blood sample was taken from it on March 3 for a serological test, which resulted in a negative result, indicating that there is not a strong immune response and that there are currently not measurable amounts of antibodies in the blood.

The negative serological test result does not suggest that the dog is not infected with the virus.

It is known in some asymptomatic or mild cases of human infections with other types of coronavirus that antibodies may not always develop. It is also not uncommon to have a negative result in the earlier stages of infection as it often takes 14 days or more for measurable levels of antibodies to be detected.

Another blood sample will be taken later for further testing.

Additionally, the department, together with the University of Hong Kong's School of Public Health, has conducted gene sequencing of the COVID-19 virus from the dog and its close human contacts who were confirmed to be infected.

They discovered that the viral sequences are very similar, indicating that the virus likely spread from the infected people to the dog.

The animal has not shown any signs of the disease and it is currently under quarantine at the animal keeping facility at the Hong Kong Port of Hong Kong-Zhuhai-Macao Bridge.

The department will continue to monitor the dog closely.

As COVID-19 is a new disease, it will work together with the Department of Health in handling relevant cases.

There currently is no evidence that pet animals can be a source of infection of COVID-19, the department added.

Pet owners should not be overly concerned and under no circumstances should they abandon their pets.

All,
I agree with Juia. My curmudgeonly take from a lot of time in public health. We know a little bit about corona viruses in general, about droplet transmission of viruses, and how to work a public health problem before we have a lot of data. Bathing the dog with a normal shampoo and regular PPE (gloves and apron) on entry if you are worried. No extraordinary PPE should be needed. Think about it. Even if the pet were covered in virus (and pets are hardly hard, impervious surfaces), bathing it with a shampoo will get rid of the virus and it is not likely that someone bathing a dog will touch their face with soaped up gloved hands. And if they do, we all know that soap does bad things to the virus. Wetting the animal will not aerosolize the virus and we know it is droplet transmitted--few if any indications from human literature about re-aerosolization from medical procedures.

If you had a pet with symptoms, it would be the first in the world and you can best bet that USDA and OIE (and a host of other acronym agencies) will get involved in a second and the pet will be tested every which way known.

And as in all public health outbreaks, if we get information that would change those recommendations, we will and will communicate that to our colleagues. Wish you all could have a quiet weekend (but I also wish I were empress of the universe).

Regards,
Gail

Pet dog blood test result released

March 12, 2020

A blood test of a pet dog, which had earlier repeatedly tested weak positive for COVID-19, has shown a negative result, the Agriculture, Fisheries & Conservation Department announced today.

The department collected samples from the dog five times for tests since late February and detected low levels of the virus in its nasal and oral cavity samples.

A blood sample was taken from it on March 3 for a serological test, which resulted in a negative result, indicating that there is not a strong immune response and that there are currently not measurable amounts of antibodies in the blood.

The negative serological test result does not suggest that the dog is not infected with the virus.

It is known in some asymptomatic or mild cases of human infections with other types of coronavirus that antibodies may not always develop. It is also not uncommon to have a negative result in the earlier stages of infection as it often takes 14 days or more for measurable levels of antibodies to be detected.

AMERICAN OVERSIGHT

Another blood sample will be taken later for further testing.

Additionally, the department, together with the University of Hong Kong's School of Public Health, has conducted gene sequencing of the COVID-19 virus from the dog and its close human contacts who were confirmed to be infected.

They discovered that the viral sequences are very similar, indicating that the virus likely spread from the infected people to the dog.

The animal has not shown any signs of the disease and it is currently under quarantine at the animal keeping facility at the Hong Kong Port of Hong Kong-Zhuhai-Macao Bridge.

The department will continue to monitor the dog closely.

As COVID-19 is a new disease, it will work together with the Department of Health in handling relevant cases.
