Dear Mehreen,

On October 6, 2022, the Missouri Department of Health and Senior Services received your request for records regarding documentation held by DHSS regarding Dobbs v. Jackson Women's Health and correspondence from seelcted DHSS officials.

Please find the attached invoice for records responsive to your request.

Electronic payments can be submitted using link below, **you must have your Invoice**

AMERICAN OVERSIGHT

number to submit payment electronically [minimum convenience fee of 2.0% plus $ 0.25 will apply to all transactions].

https://magic.collectorsolutions.com/magic-ui/payments/mo-health-senior-serv/202201

or

Submit check or money order payments to the address below with a copy of your invoice:

Fee Receipt Unit
Department of Health and Senior Services
PO Box 570
Jefferson City, Mo 65102

Final review and redaction of closed or confidential information could take 4-8 weeks, dependent on staff reviewer availability, Sunshine Law requests already in review, and day-to-day business. Final review will not begin until payment is received, all amounts listed on invoice are estimates, and these amounts are subject to change.

Please note that we will consider this request closed and not take any further action if we do not receive payment from you within thirty (30) days from the date of this letter.

From: DHSS Records Requests
Sent: Friday, October 7, 2022 9:48 AM
To: 'AO Records' <records@americanoversight.org>
Subject: RE: Sunshine Request from: Mehreen Rasheed 3-day response

AMERICAN OVERSIGHT

Dear Mehreen,

On October 6, 2022, the Missouri Department of Health and Senior Services received your request for records regarding documentation held by DHSS regarding Dobbs v. Jackson Women's Health and correspondence from selected DHSS officials. I am responding within three business days as required by §610.023.3, RSMo.

We are actively working to fulfill your request. Records shall be extensively reviewed to protect closed or confidential information under Missouri Law. §610.021, RSMo.

At this time, the Department is working on a significant number of Sunshine Law Requests and as a result, we will need additional time to provide you with an estimated cost and number of responsive records. Due to the extensive process of search, review and obtainment of records, we estimate that your request will be fulfilled by November 7, 2022.

Before providing responsive records, the Department must:

1. Process and review the Sunshine Law request;
2. Notify relevant staff members of the request to obtain physical, electronic or other potentially responsive records that are not immediately accessible to the staff reviewers(s), if applicable.
3. Staff reviewer will then review the records to determine if they are responsive to the request;
4. Staff reviewer converts all responsive records in an accessible and useable format; and
5. Compile or print the responsive documents.

Please note that the above process is dependent upon the availability of other Department staff members to locate records, the volume of the request, other active Department Sunshine Law Requests, and the on-going work of staff reviewers.

§610.026, RSMo allows for collection of fees, including search, research, and staff time for retrieving, identifying, providing the requested records. Please note, that an invoice will be sent to you for any charges incurred in the fulfillment of your request prior to release of responsive records. The department charges $25.79 per hour for clerical time and ten cents per page for paper copies not larger than nine inches by fourteen inches.

Sincerely,

Christy A. Higgins

To: DHSS Records Requests <RecordsRequests@health.mo.gov>
Subject: Re: Sunshine Request from: Mehreen Rasheed

Dear Christy,

Thank you for your email. My apologies, we ran into a delay mailing the check for the previous Sunshine Request (sent on September 6, labeled "MO-SOS-22-0920") due to some employee leave schedules, but we should be able to get that sent out to you next week.

As to your question, we would like both requests to be fulfilled. As you can see, MO-SOS-22-0920 seeks *all* emails, text messages, etc. of Acting Director Nickelson during the brief periods of time specified, while part 2(i) of the Oct. 5 request (MO-SOS-22-1078) seeks the emails of Director Nickelson only containing the specified key terms for a different date range. In the event there is any overlap in responsive records on the two days that the date ranges overlap (June 24-25, 2022), your office may eliminate the duplicative records from your second response. In other words, no need to send us the same documents twice.

I'd be happy to discuss any other questions or concerns about this request. Thank you so much for your attention to this matter.

Best,
Mehreen

Address *	American Oversight 1030 15th ST NW Washington, District of Columbia 20005 United States
Subject of request *	Re: Sunshine Law Request
Details of request *	

Re: Sunshine Law Request

Dear Custodian of Records:

Pursuant to the Missouri Sunshine Law, Mo. Rev. Stat. § 610.010 et seq., American Oversight makes the following request for records.

Requested Records

American Oversight requests that your office produce copies of the following records within three business days:

1. All final decision memoranda, directives, policy interpretations, or guidance provided to, signed, approved, or otherwise adopted by the Department of Health and Senior Services regarding abortion, contraception, or reproductive health following the U.S. Supreme Court's decision in Dobbs v. Jackson Women's Health.

2. All email communications (including emails, email attachments, complete email chains, calendar invitations, and calendar invitation attachments) sent by any of the officials listed below containing any of the following key terms:

Key Terms:
a. Dobbs
b. Roe
c. Abortion
d. Pregnancy
e. Pregnant
f. Terminate
g. Fetus
h. Unborn
i. "Planned Parenthood"
j. "Trigger law"
k. "Trigger ban"
l. Contraception
m. "Birth control"
n. Abortifacient
o. Mifepristone
p. Misoprostol
q. Ectopic

Officials:
i. Acting Director Paula Nickelson
ii. Deputy Director Dr. Laura Naught
iii. Michael Oldweiler, Office of Governmental Policy and Legislation

In an effort to accommodate your office and reduce the number of potentially responsive records to be processed and produced, American Oversight has limited its request to emails sent by the specified officials. To be clear, however, American Oversight still requests that complete email chains be produced, displaying both sent and received messages. This means, for example, that both Director Nickelson's response to an email containing one of the listed key terms and the initial received message are responsive to this request and should be produced.

Please provide all responsive records from June 24, 2022, through the date the search is conducted.

Fee Waiver Request

In accordance with Mo. Rev. Stat. § 610.026.1(1), American Oversight requests a waiver of fees associated with processing this request for records. Disclosure of the requested records is in the public interest because it will likely contribute to a better understanding of relevant government procedures by the general public in a significant way. Moreover, the request is primarily and fundamentally for non-commercial purposes.

American Oversight requests a waiver of fees because disclosure of the requested information "is likely to contribute significantly to public understanding of the operations or activities of [a] public governmental body." The public has a significant interest in top state health officials' response to changes in state abortion laws. Records with the potential to shed light on this matter would contribute significantly to public understanding of operations of the government, including guidance issued by or to state health officials in the wake of the Dobbs v. Jackson Women's Health decision. American Oversight is committed to transparency and makes the responses agencies provide to public records requests publicly available, and the public's understanding of the government's activities would be enhanced through American Oversight's analysis and publication of these records.

This request is primarily and fundamentally for non-commercial purposes. As a 501(c)(3) nonprofit, American Oversight does not have a commercial purpose and the release of the information requested is not in American Oversight's financial interest. American Oversight's mission is to promote transparency in government, to educate the public about government activities, and to ensure the accountability of government officials. American Oversight uses the information gathered, and its analysis of it, to educate the public through reports, press releases, or other media. American Oversight also makes materials it gathers available on its public website and promotes their availability on social media platforms, such as Facebook and Twitter.

American Oversight has also demonstrated its commitment to the public disclosure of documents and creation of editorial content through regular substantive analyses posted to its website. Examples reflecting this commitment to the public disclosure of documents and the creation of editorial content include the posting of records and analysis related to the organization's investigations into misconduct and corruption in state governments; posting records and analysis of federal and state governments' responses to the Coronavirus pandemic; posting records received as part of American Oversight's "Audit the Wall" project to gather and analyze information related to the Trump administration's proposed construction of a barrier along the U.S.-Mexico border, and analyses of what those records reveal; and the posting of records related to an ethics waiver received by a senior Department of Justice attorney and an analysis of what those records demonstrated regarding the Department's process for issuing such waivers.

Accordingly, American Oversight qualifies for a fee waiver.

Guidance Regarding the Search & Processing of Requested Records

In connection with its request for records, American Oversight provides the following guidance regarding the scope of the records sought and the search and processing of records:

§ Please search all locations and systems likely to have responsive records, regardless of format, medium, or physical characteristics.
§ In conducting your search, please understand the terms "record," "document," and "information" in their broadest sense, to include any written, typed, recorded, graphic, printed, or audio material of any kind. We seek records of any kind, including electronic records, audiotapes, videotapes, and photographs, as well as letters, emails, facsimiles, telephone messages, voice mail messages and transcripts, notes, or minutes of any meetings, telephone conversations or discussions.

§ Our request for records includes any attachments to those records or other materials enclosed with those records when they were previously transmitted. To the extent that an email is responsive to our request, our request includes all prior messages sent or received in that email chain, as well as any attachments to the email.
§ Please search all relevant records or systems containing records regarding agency business. Do not exclude records regarding agency business contained in files, email accounts, or devices in the personal custody of your officials, such as personal email accounts or text messages.
§ In the event some portions of the requested records are properly exempt from disclosure, please disclose any reasonably segregable non-exempt portions of the requested records. If a request is denied in whole, please state specifically why it is not reasonable to segregate portions of the record for release.
§ Please take appropriate steps to ensure that records responsive to this request are not deleted by the agency before the completion of processing for this request. If records potentially responsive to this request are likely to be located on systems where they are subject to potential deletion, including on a scheduled basis, please take steps to prevent that deletion, including, as appropriate, by instituting a litigation hold on those records.
Conclusion

If you have any questions regarding how to construe this request for records or believe that further discussions regarding search and processing would facilitate a more efficient production of records of interest to American Oversight, please do not hesitate to contact American Oversight to discuss this request. American Oversight welcomes an opportunity to discuss its request with you before you undertake your search or incur search or duplication costs. By working together at the outset, American Oversight and your agency can decrease the likelihood of costly and time-consuming litigation in the future.
Where possible, please provide responsive material in an electronic format by email. Alternatively, please provide responsive material in native format or in PDF format on a USB drive. Please send any responsive material being sent by mail to American Oversight, 1030 15th Street NW, Suite B255, Washington, DC 20005. If it will accelerate release of responsive records to American Oversight, please also provide responsive material on a rolling basis.
We share a common mission to promote transparency in government. American Oversight looks forward to working with your agency on this request. If you do not understand any part of this request, please contact Mehreen Rasheed at records@americanoversight.org or (202) 848-1320. Also, if American Oversight's request for a fee waiver is not granted in full, please contact us immediately upon making such a determination.

Sincerely,

/s/ Mehreen Rasheed
Mehreen Rasheed

AMERICAN OVERSIGHT

From: GOVERNING Saturday
To: Nickelson, Paula
Subject: Abortion has become a flashpoint across America
Date: Saturday, August 6, 2022 9:05:01 AM

View in browser

GOV logo RGB_lg

THIS WEEK IN GOVERNING AUGUST 6, 2022

AMERICAN OVERSIGHT

Elizabeth Hotaling, right, calls the implications of an anti-abortion amendment “devastating” and “far-reaching.” (Alan Greenblatt/Governing)

Latecomers arriving for early morning mass kneel quickly and cross themselves. Twice during the Sunday service at Wichita’s Cathedral of the Immaculate Conception, they are instructed to vote in favor of an amendment on the Aug. 2 ballot in Kansas, which would make clear there is no right to abortion under the state constitution. “The sanctity of life is a bedrock principle of the Catholic Church,” the Rev. John Sherlock says from the pulpit. “It is imperative that you vote yes on the Value Them Both Amendment.”

Across Central Avenue from the cathedral, a small group of women hold up signs calling on parishioners and passing motorists to oppose the amendment. As the bells toll at the start of the second mass of the day, Elizabeth Hotaling, one of the protesters, says, “When a religion starts to impose its beliefs on others, it’s no

AMERICAN OVERSIGHT

longer a religion — it's tyranny."

Abortion has become a flashpoint across America, but it's an especially heated topic in Kansas. Voters will face ballot measures this fall in several states to block or protect abortion rights, including California, Kentucky and Vermont. Kansas will not only vote first, but will decide on a measure that could have the most immediate effect. READ MORE

After Roe: What's next for abortion access, law, and politics

Thursday, July 14, 2022, 12-1 pm ET

Register for free to submit your questions.

In overturning Roe v. Wade, the U.S. Supreme Court has ignited fundamental legal and political questions and radically shifted the healthcare landscape. Amidst the furor, those who want to keep abortion safe and legal ponder the path forward. This panel of experts from across Harvard will assess the fallout, evaluate a variety of responses to the ruling, and share their roadmaps to a post-Roe America.

Secretary Xavier Becerra

AMERICAN OVERSIGHT

FACT SHEET: President Biden Announces Actions In Light of Today's Supreme Court Decision on Dobbs v. Jackson Women's Health Organization

Today, President Biden announced actions that his Administration is taking to protect women who will face the grave consequences of today's Supreme Court decision. This decision expressly took away a Constitutional right from the American people that it had recognized for nearly 50 years – a woman's right to choose, free from government interference.

This decision will have devastating consequences in the lives of women around the country.

The President made clear that the only way to secure a woman's right to choose is for Congress to restore the protections of *Roe* as federal law. Until then, he has announced two actions the Administration is taking to protect women.

AMERICAN OVERSIGHT

Protecting the Right to Seek Medical Care

As the Attorney General made clear, women must remain free to travel safely to another state to seek the care they need.

A person has the right to travel between states for whatever reason they want – it is no one else's business – especially the government's. If a woman lives in a state that restricts abortion, the Supreme Court's decision does not prevent her from traveling from her home to a state that allows it.

If any state or local official tries to interfere with women exercising this basic right, the Biden Administration will fight that deeply un-American attack.

Protecting Access to Medication

The President directed the Secretary of Health and Human Services to protect women's access to critical medications for reproductive health care that are approved by the Food and Drug Administration—including essential preventive health care like contraception and medication abortion.

More than 20 years ago, the FDA approved mifepristone to safely end an early pregnancy; this drug is also commonly used to treat miscarriages. The American Medical Association and the American College of Obstetricians and Gynecologists wrote to President Biden and Vice President Harris, asking the federal government to protect access to this care. In the face of threats from state officials saying they will try to ban or severely restrict access to medication for reproductive health care, the President directed the Secretary of Health and Human Services to identify all ways to ensure that mifepristone is as widely accessible as possible in light of the FDA's determination that the drug is safe and effective—including when prescribed through telehealth and sent by mail.

AMERICAN OVERSIGHT

From: Dr. Alveda King
To: Nickelson, Paula
Subject: Born into a movement
Date: Saturday, June 25, 2022 8:02:44 AM

America First Policy Institute

Friend,

Like so many Christians, I weep for my past sins. In my younger days, I didn't always see the intrinsic value of life. **I've had two abortions.** For far too long, **I supported the left's worldview that does not understand how precious each and every life is, no matter the stage.**

But God had another plan for me. He has such a beautiful and unique way of shaping us and changing our hearts through the experiences, people, obstacles, and opportunities He puts us in our path. By God's grace, I came to recognize the truth that ***Life is a precious gift which must be protected, from womb to tomb.***

In 1983, I became a Christian and dedicated my life to God. Soon after, I heard his calling to use my voice as a defender of the sanctity of life. As the niece of Dr. Martin Luther King Jr., **I've learned that God calls all of us to use our voices to stand up for what we believe in, especially in defense of society's most vulnerable.** **Will you stand with me in my fight to protect life from the womb to the tomb? >>**

The left refuses to recognize the reality that a baby in the womb is a fully human life and want to allow abortion up to the point of birth. They want us to

AMERICAN OVERSIGHT

see abortion as a "choice" regarding the mother's body—but the baby in the womb is a child to be loved and cherished, not a "choice."

Become a pro-life warrior and join me in advocating for the protection of life in a world where so many lives are not valued. >>

[I Stand for Life]

It's NEVER too late to make a difference in this world. In fact, I would not be here today had my mother, a pregnant college student, chosen abortion over life. I was saved for a reason, and God's plan often works in mysterious and unpredictable ways. By His grace, I have found my life purpose in doing my part to be a voice for the voiceless. Will you join me in doing the same?

[Stand with me]

Your support makes a difference,

Dr. Alveda King
Chair, Center for American Values

Subject: CALL INVITE - Thursday 6/30: Advancing Human Dignity in a Post-Roe America
Date: Thursday, June 30, 2022 9:02:02 AM

America First Policy Institute

Dear Friend,

Last Friday's historic *Dobbs* decision really marks the end of the beginning for the pro-life movement's efforts to protect women and children from abortion and to stop the Left's attempts to push for taxpayer-funded abortions up until the moment of birth. Nearly 50 years after *Roe vs. Wade* was decreed for all 50 states by seven unelected Justices, the Court will now allow the citizens of each state to try and find a solution to this perennial controversy, in a way that honors both women and unborn children.

Here at AFPI, we celebrate a return to the Constitution by our Nation's highest Court, with meaningful wins in the past week on the issues of life, the First and Second Amendments, and school choice. But there is much more work to be done. The underlying factors that lead women to seek abortion still exist as does the Left's desire to advance radical policies like late-term abortions. In contrast, we believe in a holistic approach to this societal challenge.

REGISTER FOR THE CALL

Please join our leadership on Thursday, June 30 at 3 pm eastern time for a very important discussion on the path forward in a Post-*Roe* America. We will hear from these amazing leaders:

AMERICAN OVERSIGHT

- Kellyanne Conway, Chair of the Center for the American Child, will discuss the battle for hearts and minds for the cause of life, as well as our efforts to promote adoption and reform the broken foster care system;
- Dr. Alveda King, Chair of the Center for the American Dream, will discuss the civil rights aspect of the pro-life issue;
- Dr. Heidi Overton, Director of the Center for a Healthy America, will discuss the medical dimensions of this debate and how a commitment to patient care requires a pro-life perspective that honors both mother and child; and
- Pastor Paula White, Chair of the Center for American Values, will discuss the imperative to defend the God-given right to life and her many years of pastoral efforts to support women in crisis pregnancies.

As a mom of five—including four daughters—this issue is incredibly important to our family, as I'm sure it is for yours as well. Join us as we plot the path forward. **You may RSVP by clicking here.** You don't want to miss this discussion, and we hope to speak with you then!

Sincerely,

Ashley Hayek

To: MMWR-MEDIA@LISTSERV.CDC.GOV
Subject: CDC Press Release: Four in 5 pregnancy-related deaths in the U.S. are preventable
Date: Monday, September 19, 2022 8:38:10 AM

Press Release

For Immediate Release
Monday, September 19, 2022

Contact: CDC Media Relations
(404) 639-3286

Four in 5 pregnancy-related deaths in the U.S. are preventable

Data highlight opportunities to better protect moms

More than 80% of pregnancy-related deaths were preventable, according to 2017-2019 data from Maternal Mortality Review Committees (MMRCs), which are representatives of diverse clinical and non-clinical backgrounds who review the circumstances around pregnancy-related deaths to identify recommendations to prevent future deaths. Information from MMRCs in 36 U.S. states on leading causes of death by race and ethnicity can be used to prioritize interventions that can save lives and reduce health disparities.

"The report paints a much clearer picture of pregnancy-related deaths in this country," said Wanda Barfield, M.D., M.P.H., director of CDC's Division of Reproductive Health at the National Center for Chronic Disease Prevention and Health Promotion. "The majority of pregnancy-related deaths were preventable, highlighting the need for quality improvement initiatives in states, hospitals, and communities that ensure all people who are pregnant or postpartum get the right care at the right time."

Key Findings:
Among pregnancy-related deaths with information on timing, 22% of deaths occurred during pregnancy, 25% occurred on the day of delivery or within 7 days after, and 53% occurred between 7 days to 1 year after pregnancy.

The leading underlying causes of pregnancy-related death include:

- Mental health conditions (including deaths to suicide and overdose/poisoning related to substance use disorder) (23%)
- Excessive bleeding (hemorrhage) (14%)
- Cardiac and coronary conditions (relating to the heart) (13%)
- Infection (9%)
- Thrombotic embolism (a type of blood clot) (9%)

AMERICAN OVERSIGHT

- Cardiomyopathy (a disease of the heart muscle) (9%)
- Hypertensive disorders of pregnancy (relating to high blood pressure) (7%)

The leading underlying cause of death varied by race and ethnicity. Cardiac and coronary conditions were the leading underlying cause of pregnancy-related deaths among non-Hispanic Black people, mental health conditions were the leading underlying cause for Hispanic and non-Hispanic White people, and hemorrhage was the leading underlying cause for non-Hispanic Asian people.

American Indian or Alaska Native data highlighted

American Indian or Alaska Native (AI/AN) people are disproportionally impacted by pregnancy-related deaths. A second report uses an approach for classifying AI/AN populations that includes those who also identify as multi-racial or of Hispanic ethnicity.

Based on a review of pregnancy-related deaths among AI/AN people, mental health conditions and hemorrhage were the most common underlying causes of death, accounting for 50% of deaths with a known underlying cause. Most pregnancy-related deaths of AI/AN people (93%) were determined to be preventable. About 64% of deaths occurred between 7 days to 1 year after pregnancy.

Everyone can help prevent pregnancy-related deaths

More than half (53%) of pregnancy-related deaths happen up to one year after delivery. It is critical for all healthcare professionals to ask whether their patient is pregnant or has been pregnant in the last year to inform diagnosis and treatment decisions. Healthcare systems, communities, families, and other support systems need to be aware of the serious pregnancy-related complications that can happen during and after pregnancy. Listen to the concerns of people who are pregnant and have been pregnant during the last year and help them get the care they need.

Examples of prevention recommendations from MMRCs include wider access to insurance coverage to improve prenatal care initiation and follow-up after pregnancy, providing opportunities to prevent barriers to transportation to care, and the need for systems of referral and coordination.

Maternal Mortality Review Committees are the best source for prevention strategies

MMRCs are multidisciplinary committees that convene at the state or local level to comprehensively review deaths during or within one year of pregnancy. Their goal is to understand circumstances surrounding each death and develop recommendations for action to prevent deaths in the future.

This is the first information to be released under the Enhancing Reviews and Surveillance to Eliminate Maternal Mortality, a CDC-funded program to support agencies and organizations

AMERICAN OVERSIGHT

that manage MMRCs. CDC also supports the Maternal Mortality Review Information Application (MMRIA) to standardize reporting of data from MMRCs. This report reflects efforts undertaken by jurisdictions to improve their MMRC processes and use MMRIA to document and disseminate information.

Recently, CDC significantly expanded its investment in efforts to eliminate preventable pregnancy-related deaths, with new awards totaling $2.8 million to support additional MMRCs in nine jurisdictions. CDC now supports MMRCs in 39 states and one U.S. Territory. Building this important infrastructure will help better understand and prevent pregnancy-related deaths in the U.S.

Additional information:
State Strategies for Preventing Pregnancy-Related Deaths: A Guide for MMRC Data to Action provides MMRCs and their partners with a guide to help facilitate implementation of data-informed strategies to prevent pregnancy-related deaths.

For information on ways to support people who are pregnant and postpartum, visit CDC's Hear Her campaign.

How health orgs address ongoing pandemic provider burnout

A recent study revealed physician burnout on a national scale is increasing the frequency of premature retirement and attrition rates. The impact of this has been acutely felt in rural Texas, where 40 percent of rural hospitals are vulnerable to closure, according to NRHA. Additionally, Eastern Oklahoma VA Health Care System is **using music therapy to help veterans** heal from PTSD and other types of trauma, and NRHA's Rural Horizons Magazine recently featured a story on how a **statewide music therapy program in Pennsylvania** is helping health care providers cope with pandemic stress. There has been an influx of sessions on rural provider burnout, mental health, and treatment and retention strategies in the agenda for **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference**, so be sure to join us **Sept. 20-23**.

COVID bailout rescued some hospitals while enriching others

AMERICAN OVERSIGHT

The Provider Relief Fund served as a lifeline for many hospitals that might not have withstood the pandemic — but analyses show the funds also exacerbated the gap between the industry's haves and have-nots, disproportionately rewarding wealthy hospitals. A recent report from North Carolina shows **how seven of the state's largest hospital systems** profited from billions of COVID relief funds and Medicare payments. So far this year, **six hospitals have closed** due to a variety of factors, including cash flow challenges and dwindling patient volumes. The bipartisan **Save America's Rural Hospitals Act** was recently introduced to the 117th Congress to raise the rural health safety net, which is crucial to the survival of rural communities and facilities. Interested in **advocating on behalf of rural health**? Sign up to participate in NRHA's rural health advocacy campaigns, and review NRHA's updated advocacy 101 guide.

How climate change, drought worsens rural suicide rates

New research has found suicide increases during drought among men in Australia's rural communities, and the problem may be exacerbated due to climate change. The study calls for urgent plans for adaptation and global action to mitigate climate change and avoid impacts on vulnerable communities that are at risk of worsening natural hazards, such as rural communities in California and the American Southwest that **have experienced extreme droughts** in recent years, along with depression, suicide, and other psychological impacts. Join NRHA and clinic and CAH leaders from across the country in our hometown of Kansas City to focus on the best ways to provide behavioral health care and more at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23**.

As COVID wanes, some changes to rural hospitals remain

Some rural hospitals hope to retain measures implemented in response to the pandemic, but when the public health emergency expires, funding for some innovations may not continue. NRHA COO Brock Slabach says rural hospitals are evaluating procedural changes and looking for Congress to act to allow them to maintain the flexibility that helped them stay above water financially. "Now that the pandemic is easing and maybe one day will be over, I hope that we don't put rural hospitals back on the back burner and underfund them and continue to… not value them as important parts of the health care system in times of disaster or pandemic," Slabach says. Join NRHA and CAH leaders from across the country in our hometown of Kansas City to focus on controlling the post-pandemic fate of rural hospitals and more at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23**.

One nurse's fears for rural women as Roe v. Wade overturned

With the Supreme Court overturning Roe v. Wade, some abortion rights supporters fear the next battle will be over abortion pills. It's a big concern for women in rural parts of the United States including North Carolina, where registered nurse Laura McNeill-Hoel sees what she calls a reproductive rights desert. "We have these pockets of the country where women don't have any access to birth control, morning after pills, abortions; where we end up creating places where, and if you look at the statistics, typically are in of pockets of poverty," she says. **Commentary from NRHA COO Brock Slabach** was featured in NRHA Today last week the day prior to the ruling by the judiciary: "We have maternity deserts in rural areas all over the country. If, as expected, Roe is overturned, we could have real capacity issues with many more live births."

New case studies on LGBTQ+ health in rural areas

New research by NRHA members from the University of Minnesota Rural Health

AMERICAN OVERSIGHT

Research Center look at LGBTQ+ health in rural areas, including how small-town Pride celebrations promote social connectedness and well-being; how rural community organizations are building inclusive environments for LGBTQ+ residents; improving access to LGBTQ+-friendly care in rural areas; and **social and emotional support during the pandemic** by sexual orientation and rurality. An additional West Virginia University study looks at **common barriers to care for rural LGBTQ+ residents**. Learn how to enhance care for the most vulnerable rural populations by joining NRHA and leaders from across the country at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23** in our hometown of Kansas City, Mo.

Your chance to be a Rural Health Fellow, speak in San Diego

NRHA's Rural Health Fellows program is a yearlong, intensive training program that develops leaders who can articulate a clear and compelling vision for rural America. Each year, NRHA selects 10 to 15 highly motivated individuals who have proven their dedication to improving the health of rural Americans through their educational or professional experience. The submission period for 2023 Rural Health Fellows applications is now open. Additionally, **NRHA is now accepting session and research presentation proposals** for the nation's largest gathering of rural health pros, our Annual Rural Health Conference and Rural Hospital Innovation Summit, which will be held May 16-19, 2023 in San Diego, Calif. Any person with an interest in rural health is invited to submit session proposals or original research for presentation during these events.

NRHA supports legislation to boost fight against fentanyl

Four U.S. representatives will introduce the House companion to Sen. Chuck Grassley's (R-Ia.) Stop Pills That Kill Act. NRHA supports this bipartisan, bicameral legislation, which seeks to deter narcotics traffickers and strengthen the nationwide fight against fentanyl by implementing new penalties for counterfeit pill production. NRHA also supports Sen. John Cornyn's (R-Texas) bipartisan **Safer Communities Act**, which contains additional tools and resources for communities to address criminal misuse of firearms and also offers mental health support. Interested in **advocating on behalf of rural health**? Sign up to participate in NRHA's rural health advocacy campaigns and be sure to review NRHA's updated advocacy 101 guide.

Curt Mueller is NRHA's 2022 outstanding researcher

NRHA recently honored the association's **2022 Rural Health Award recipients** at our Annual Rural Health Conference. NRHA's Rural Health Awards are given each year to individuals and organizations in the field of rural health who have dedicated their time and talents to improving the health and well-being of others. Curt Mueller is this year's **NRHA Outstanding Researcher Award winner**. In his role as a senior fellow in public health at the NORC Walsh Center for Health Services Research in Washington, D.C., Mueller has been a dedicated rural health services researcher whose work has had a direct influence on public health

Rural Horizons spotlight

NRHA's latest Rural Horizons Magazine now available online

The **latest issue of NRHA's Rural Horizons**, the association's quarterly magazine, is now available online featuring three new articles on timely topics including **talking pandemic challenges and podcasts with NRHA President Beth O'Connor**.

NRHA recently sat down with NRHA President and longtime NRHA member Beth O'Connor to learn more about her rural health priorities, her goals as NRHA president, and why she is excited to get back to in-person events.

"In the future — beyond the pandemic — we need a greater emphasis on the importance of making sure everyone has good access to primary care. I think sometimes we get so caught up in the disparities and access to specialists and telehealth and other pieces of the puzzle that we forget that just basic checkups are services that some people don't have a way to get to," O'Connor says.

Rural Horizons features articles carefully selected to engage and inform everyone working to improve rural health care. You can subscribe in print by **becoming an NRHA member**. **Email the editors to submit an abstract** for potential publication, get information on editorial content, or purchase issues.

AMERICAN OVERSIGHT

Opinion: Why COVID vaccination in rural schools is important

Three members of the National Rural Education Association recently wrote about how protection from the worst of COVID-19 through vaccination supports the learning of students, the health of families, and the spirits of communities. Everyone in the United States is now eligible for the shot except babies under six months of age and those with contraindications to vaccination – but for the last two months, the pace of new rural vaccinations has remained flat. Additionally, former HHS secretary Eric Hargan recently wrote about why we must **end the public health emergency carefully**. NRHA has developed the **Rural Vaccine Confidence Initiative** to help rural health stakeholders communicate COVID-19 vaccine efficacy and safety in their own words at the local level.

Webinar today: What clinicians need to know about monkeypox

HRSA and CDC are hosting an information session on the monkeypox outbreak at **noon CDT June 30**. The presentation will discuss the role of HRSA and HRSA-supported organizations in the public health response. Topics include identifying symptoms, where to refer patients, and much more. This webinar is intended for clinicians, including those serving in HRSA-supported health centers, Ryan White HIV/AIDS Program-funded clinics, and rural health clinics. Additionally, the **CMS Innovation Center is hosting a webinar** at **2 p.m. CDT June 30** providing an overview of the new Enhancing Oncology Model and application process.

Rural mental health and value of sharing lived experiences

Recognizing the value of sharing deeply personal accounts of mental illness is the message of Jeff Ditzenberger, a farmer who attempted suicide. His own challenges confronting and managing his bipolar II disorder while returning to farming motivated Ditzenberger to found TUGS, a mental health nonprofit with the mission to address the stigma surrounding mental health challenges and suicide. Additionally, a new report shows that **older people in New York are dying** from drug overdose or suicide at much higher rates now compared with a decade ago. Join NRHA and clinic and CAH leaders from across the country in our hometown of Kansas City to focus on the best ways to provide behavioral health care and more at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23**.

Rising fuel prices pose challenges for EMS providers

High fuel prices are beginning to take their toll on emergency responders. "We were averaging about $5,000 per month so now we're looking at about anywhere between $11,000 and $13,000 added fuel cost," says Robertson County, Texas, EMS Director Steven Von Gonten. According to the Texas Organization of Rural and Community Hospitals, an NRHA member, Texas leads the nation in rural hospital closures, making the situation even more critical for EMS providers in rural areas where the closest hospital may be more than 40 miles away. Additionally, investments are being made to **grow rural transit in Mississippi**, with goals to help residents get to work, the hospital, or grocery stores. Experts say public transit can be a game-changer for many of the state's rural communities.

Journal of Rural Health seeking papers for special section

NRHA's Journal of Rural Health is soliciting articles on the impact of the Flex Program on

AMERICAN OVERSIGHT

CAHs and systems of care in rural communities. Topics include the impact of the program on CAHs and rural systems of care in recognition of its 25th anniversary; the impact of the program on quality improvement and financial stability; and more. All manuscripts will be evaluated according to the journal's standard review process and **must be submitted electronically**. Authors should state in their cover letters that they are submitting in response to this call for papers on the 25th anniversary of the Flex Program and CAHs. **Guidelines on required format** may be found on the JRH website. The submission deadline is **Oct. 1**. Don't miss your chance to celebrate CAHs and learn from the best at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23** in our hometown of Kansas City, Mo.

NRHA member to expand rural health care in West Virginia

Boone Memorial Health, an NRHA member, was already well known for pioneering efforts to treat black lung disease and substance abuse disorder. Now it will be setting up more satellite clinics and doing more community outreach for health care treatment, education, and prevention. Additionally, the Arkansas Rural Health Partnership, also an NRHA member, has partnered with University of Arkansas for Medical Sciences to **hire four community health workers**, who will help people in Chicot County navigate the health care system by answering basic health care questions and providing education and resources to the public.

New transparency law may change how patients shop for care

A new Colorado law prohibits hospitals that haven't posted their prices from suing patients over unpaid bills, but the bigger impact of the legislation may be indirect, as customers use those prices to decide where to get care. California hospitals were also recently reminded that they must provide written notice to patients in their native language of the **availability of "charity care" and how to apply**. Californians have the right to request payment assistance even if they have health insurance or are undocumented, and uninsured patients can demand a written estimate of the out-of-pocket cost they will be expected to pay.

Hospital-at-home study focuses on rural health deserts

Appalachian Regional Healthcare, based in Lexington, Ky., will use Biofourmis' virtual care and AI-based predictive analytics technology to support a new rural home hospital program delivering acute hospital-level care inside patients' homes, including a clinical trial studying this care model in rural areas. Appalachian Regional joins Blessing Health System as one of only two U.S. participants selected for the program, which will **equip patients with wearable biosensors**, blood-pressure cuffs, pulse oximeters, and weight scales to collect physiologic data from home.

Survey: Identifying gaps in care for rural epilepsy patients

You are invited to participate in research to better understand the gaps in knowledge and practice among the non-epilepsy specialist medical community who serve people with epilepsy. This survey is being distributed by researchers from the American Epilepsy Society and the Dartmouth-Hitchcock Medical Center in New Hampshire. Assessment results will be used to develop educational content for this community of providers. Survey responses will remain anonymous and confidential. The survey will take approximately 15

Tomorrow: Learn about the rural emergency hospital model

A recent Health Affairs podcast provides an update on CMS rules on price transparency and rural emergency hospitals, including conditions of participation these facilities must meet to participate in the Medicare and Medicaid programs. Many stakeholders have **praised the REH model's ability** to preserve the availability of emergency and outpatient care in rural areas, while **NRHA COO Brock Slabach notes** that among many in Washington there's still a "general suspicion about this program being valuable." Join NRHA's Government Affairs team for listening sessions at **11 a.m. CST tomorrow, July 15** and **11 a.m. CST July 20** on CMS' newly proposed rule on REH and CAH conditions of participation, including an overview of the regulations and time for questions. Plan to join NRHA and CAH leaders from across the country in our hometown of Kansas City to further explore the REH model and other regulations at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23**.

NRHA updates Rural Vaccine Confidence Initiative toolkit

You know better than anyone that vaccine hesitancy among rural Americans means COVID-19 will linger in rural communities – unless something more is done to increase vaccination

AMERICAN OVERSIGHT

rates. To help rural leaders communicate vaccine safety and efficacy in their own words at the local level, NRHA has recently added new and updated materials to our Rural Vaccine Confidence Initiative, including website landing page copy, frequently asked questions, and more. These free and easy-to-use communication tools are developed around three specific audiences: hospitals and senior leadership, business and community partners, and whole communities. Additionally, CMS **recently launched a new toolkit** to help pediatricians and physicians talk to parents and patients about pediatric vaccination.

Let's meet in the middle: Reconnect with RHC, CAH colleagues

Whether it's your first time in town or a yearly pre-COVID destination, NRHA would love to welcome you to our hometown of Kansas City, Mo., to connect with friends and colleagues and be inspired by unique attractions. NRHA is excited to welcome clinic and CAH stakeholders back to KC to share knowledge and resources with colleagues from all over the country. Join us for **NRHA's Rural Health Clinic Conference** **Sept. 20-21**, and celebrate 25 years of CAHs at our **Critical Access Hospital Conference** **Sept. 21-23**. Virtual attendees will have the opportunity to watch plenary and concurrent sessions streaming live throughout each day of the event along with bonus recorded content available for later viewing. We'll reconnect in a great location where you can take the free streetcar from Union Station to the River Market and attractions in between, including the Crossroads Arts district and Power and Light for nightlife. We look forward to seeing you soon.

15 health care responses to Roe v. Wade reversal

Hospitals and medical associations have reacted to the Supreme Court's decision to overturn Roe v. Wade by calling attention to the consequences it will have on vulnerable populations and the increased demand providers will see in states where abortion services are still accessible. In the West, many providers serving rural areas were **already struggling to meet demand** in a region where staffing shortages and long travel distances are barriers to reproductive services. "We are already understaffed and under-resourced for deliveries in rural areas," **says NRHA COO Brock Slabach**. "We have maternity deserts in rural areas all over the country." **Recent research by NRHA members** at the University of Minnesota looks at racial inequities in the availability of evidence-based supports for maternal and infant health, finding that rural residents who are Black, Indigenous, and people of color experience poorer pregnancy-related health outcomes.

New bill aims to make pandemic rural hospital aid permanent

A new report highlights **rural challenges moving out of the pandemic**, with NRHA member George Pink noting that federal pandemic relief funds "probably prevented many rural hospitals from closing. **The bipartisan Rural Hospital Support Act** aims to extend critical federal financial aid programs that have helped keep rural hospitals afloat. The new **rural emergency hospital designation** also aims to prevent rural hospital closures. The Center for Optimizing Rural Health invites rural hospitals to apply for the **Vulnerable Rural Hospital Assistance Program**, which helps rural hospitals tackle pressing challenges. The application deadline is **July 31**. The bipartisan **Save America's Rural Hospitals Act** was also recently introduced to the 117th Congress with the goal to raise the rural health safety net. Interested in **advocating on behalf of rural health**? Sign up to participate in NRHA's rural health advocacy campaigns, and review NRHA's updated advocacy 101 guide.

University creates community college pathway to med school

AMERICAN OVERSIGHT

UC Davis recently received a grant to create a pre-med pathway for rural college students in an effort to boost the number of primary care physicians in underserved parts of Northern California. In Wisconsin, a new intensive "boot camp" offers training to help rural family doctors and nurses **identify and treat addiction** in their communities. Additionally, HHS recently **awarded more than $155 million** to expand training for primary care residents in underserved and rural communities. Join NRHA and clinic and CAH leaders from across the country in our hometown of Kansas City to focus on growing, supplementing, and keeping your workforce at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23**. Rural health needs those who go above and beyond. That's why **NRHA's Career Center is your resource** for qualified health care professionals.

Partnership expands mental health outreach in rural Arkansas

The Arkansas Rural Health Partnership, an NRHA member, is trying to fill the state's mental health care gap by teaching people about mental health first aid, which prepares participants to interact with a person experiencing a mental health crisis. With limited options for treatment, many people with mental health issues wind up in jail or prison, where court-ordered programs are **sometimes the only way to get help**. CMS recently issued the new **Physician Fee Schedule proposed rule**, which would expand access to behavioral health services, ACOs, cancer screening, and dental care in rural and underserved areas. Join NRHA and clinic and CAH leaders from across the country in our hometown of Kansas City to focus on the best ways to provide behavioral health care and more at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23**.

Coming soon: ECHO series, children's hospital funding

The University of Kansas Medical Center is **hosting an ECHO series at noon CDT** every Thursday in August on tickborne diseases. HRSA is accepting applications through **Aug. 1** for the **Children's Hospitals Graduate Medical Education Payment Program**, which aims to compensate for the disparity in the level of federal GME funding for freestanding children's teaching hospitals versus other types of teaching hospital. Finally, the American Epilepsy Society and the Dartmouth-Hitchcock Medical Center **are conducting a survey** to better understand the gaps in knowledge and practice among the non-epilepsy specialist medical community who serve people with epilepsy.

Black Americans may have less access to certified stroke care

Structural discrimination may reduce access to certified stroke center care for Black Americans, an observational study suggested. Black, racially segregated communities had the highest likelihood of hospitals with certified stroke in models not accounting for population size, but after adjusting for population and hospital size, patients in these communities were 26 percent less likely to have access to care at a certified stroke center. Additionally, **recent research by NRHA members** at the University of Minnesota Rural Health Research Center looks at racial inequities in the availability of evidence-

based supports for maternal and infant health, finding that rural residents who are Black, Indigenous, and people of color experience poorer pregnancy-related health outcomes.

Meet NRHA's 2022 practitioner of the year James Green

NRHA recently honored the association's **2022 Rural Health Award recipients** at our Annual Rural Health Conference. NRHA's Rural Health Awards are given each year to individuals and organizations in the field of rural health who have dedicated their time and talents to improving the health and well-being of others. James Ellis Green is **NRHA's 2022 Rural Health Practitioner of the Year**. A family and general physician running a solo practice in Gainesville, Ga., Green has been a respected and loved member of the Northeast Georgia Latinx community for more than 30 years. He is known for his appreciation of Latin culture and compassionate care of immigrants.

NRHA opportunity spotlight

Your chance to be a Rural Health Fellow, speak in San Diego

NRHA's Rural Health Fellows program is a yearlong, intensive training program that develops leaders who can articulate a clear and compelling vision for rural America.

Each year, NRHA selects 10 to 15 highly motivated individuals who have proven their dedication to improving the health of rural Americans through their educational or professional experience.

The submission period for 2023 Rural Health Fellows applications is now open.

Additionally, **NRHA is now accepting session and research presentation proposals** for the nation's largest gathering of rural health pros, our Annual Rural Health Conference and Rural Hospital Innovation Summit, which will be held May 16-19, 2023 in San Diego, Calif.

Any person with an interest in rural health is invited to submit session proposals or original research for presentation during these events.

AMERICAN OVERSIGHT

Impact of affiliation mixed for rural U.S. hospitals

Recent research shows that affiliation may protect some financially distressed rural hospitals from closure but **could raise the risk of closure** for those that are already financially stable. The report details findings from a 13-year cohort study among the rural U.S. hospitals that faced financial distress in 2007. Among 2,237 rural hospitals operating in 2007, 140 had closed by 2019. The number of independent hospitals decreased from 68.9 percent in 2007 to 47 percent in 2019, and the proportion that were affiliated increased from 31.1 percent to 46.7 percent. The bipartisan **Save America's Rural Hospitals Act** was recently introduced to the 117th Congress with the goal to raise the rural health safety net, crucial to the survival of rural communities and the facilities that serve them.

Today: NRHA webinar series on medical device cybersecurity

NRHA partner **Sensato will host a three-part webinar series** starting at **1 p.m. CDT today, July 14** on medical device cybersecurity, including how to comply, detect, and respond. Join this three-part training series to learn how to make sure patients connected to medical devices are the first consideration in your medical device cybersecurity incident response program. Patient safety is achieved by going beyond just deploying software. Learn how to get your IT and biomedical teams to work together to effectively respond to a medical device cybersecurity attack.

NRHA member on rural hospital partnership value proposition

The latest Rural Health Rising podcast from NRHA member Hillsdale Hospital discusses how health care partnerships are critical to rural hospitals, as well as how they benefit the partnering organizations. Eric Shell of Stroudwater Associates looks at the value rural hospitals bring to their partner organizations and how to leverage that value. **As one example of an exceptional collaboration**, Healthy Hillsboro, a partnership between Southern Illinois University Medicine Department of Population Science and Policy and Hillsboro Area Hospital, received **NRHA's 2022 Outstanding Rural Health Program Award**. Join NRHA and CAH leaders from across the country in our hometown of Kansas City to focus on best practices by partnering with the nation's highest rated facilities at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23**.

Journal of Rural Health seeking papers for special section

NRHA's Journal of Rural Health is soliciting articles on the impact of the Flex Program on CAHs and systems of care in rural communities. Topics include the impact of the program on CAHs and rural systems of care in recognition of its 25th anniversary; the impact of the program on quality improvement and financial stability; and more. All manuscripts will be evaluated according to the journal's standard review process and **must be submitted electronically**. Authors should state in their cover letters that they are submitting in response to this call for papers on the 25th anniversary of the Flex Program and CAHs. **Guidelines on required format** may be found on the JRH website. The submission deadline is **Oct. 1**. Don't miss your chance to celebrate CAHs and learn from the best at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23** in our hometown of Kansas City.

AMERICAN OVERSIGHT

New Rural Health Voice podcast discusses veterans' health

We just celebrated Independence Day and Rural America has a proud history of volunteering for military service, so the latest episode of the Rural Health Voice podcast hosted by NRHA President Beth O'Connor of the Virginia Rural Health Association looks at how we can return the favor and take care of our veterans. Paul Crews, executive director of Veterans Administration Mid-Atlantic Health Care Network, joins O'Connor to discuss the resources available to rural veterans.

New research on rural self-rated LGBTQAI+ health, ACEs

New research by NRHA members from the University of Minnesota Rural Health Research Center looks at rural-urban differences in self-rated health among gay, lesbian, and bisexual adults, particularly the intersections of sexual orientation, geographic context, and race/ethnicity and their associations with self-rated health. Additionally, in a recent interview with Rural Health Information Hub, **NRHA member Elizabeth Crouch** of the Rural and Minority Health Research Center discusses insights on rural adverse and positive childhood experiences based on her research.

Book featuring NRHA leadership recognized for global impact

Featuring commentary and insight from NRHA CEO Alan Morgan and NRHA President Beth O'Connor, the new book Masks, Misinformation, and Making Do has been selected to be part of the **Knowledge Unlatched Focus Collection 2023: Global Health**. Earlier this year, KU joined forces with some of the world's most established academic publishers to create a **multi-disciplinary collection of 20 quality scholarly titles** exploring global health from every angle and perspective.

Rural health automation should no longer be an afterthought

Deploying advanced technologies is often an afterthought, especially for rural hospitals struggling to retain talent and navigate the increasingly complex regulatory environment. However, new technologies empower providers to streamline their operations, reduce the time spent on administrative tasks, and conserve increasingly precious resources. Additionally, remote patient monitoring can **provide essential services to expectant mothers** in rural areas, and health leaders say hospitals are changing, with their business models becoming **increasingly built on outpatient, same-day discharges**.

Nursing homes in rural America: A chartbook

A new chartbook on nursing homes in rural America from RUPRI Center for Rural Health Policy Analysis, an NRHA member, documents nursing home availability at the county level and identifies counties without nursing homes. The chartbook also evaluates the supply of nursing home beds per 1,000 population aged 65 and older and identifies county-level nursing home availability for counties with and without hospitals with swing beds. Finally, the authors describe the resident and nursing home characteristics including occupancy levels, payer mix, demographics, and health care needs, as well as summarize data for the noncore, micropolitan, and metropolitan counties.

... political spectrum. Sen. Jill Schupp, D-St. Louis County, introduced a bill that would expand the coverage. Her legislation was eventually combined into a bipartisan bill, sponsored by Sen. Elaine Gannon, a Republican from southeast Missouri. The bill, which would have used the federal framework, was stalled by gridlock in the deeply divided Senate. According to 2018 data recently released by the **Missouri Department of Health and Senior Services**, Black mothers in Missouri have maternal mortality rates four times those of white parents. In Missouri, according to the report, 63% of pregnancy-related deaths occur between 43 days to a year after childbirth. Most pregnancy-related deaths in Missouri are preventable, the report continues. In 2018, mental health conditions were considered the leading cause of pregnancy-related deaths in ... added. "I just think getting them in the door for 60 days just isn't going to cut it. We need more time." From 2012 to 2014 in Missouri, 6.4% of women were diagnosed with gestational

AMERICAN OVERSIGHT

diabetes, which is a factor in mortality rates. In the same period, 26% of pregnancy-related deaths in the state were due to cardiomyopathy, a heart disease, which is mostly diagnosed in the postpartum period. The **DHSS** report recommends that the state should extend Medicaid coverage to one year after childbirth for all conditions, including medical, mental health and substance use disorder. Although there seems to be a bipartisan consensus that the expansion is necessary for Missouri's mothers, it is no small cost to fund. The Senate bill's fiscal analysis had a $4.4 million estimate in state costs for the 2023 ... to treat the children long-term who were born to these moms that didn't receive the care that you needed early on," Alford said. "You'll just have a better prognosis if intervention is early on." According to the proposed legislation's fiscal analysis, 4,565 women who received Medicaid benefits during pregnancy would likely have qualified for the extended coverage Numbers from 2018 provided by **DHSS** found that 46,455 people who were enrolled in state-provided pregnancy coverage lost coverage after 60 days. Some of those parents moved to other assistance, but nearly 20,000 received no further coverage. What issues in Missouri complicate coverage? Other issues contribute to the disparity in maternal mortality rates, according to Sheldon Weisgrau, vice president of health policy at the Missouri ... Putting aside that Missouri is worse than the national average, both overall and for Black women, access to health care is not the only reason for the disparities between Black mothers and white mothers in maternal mortality," Weisgrau said. "But that said, access to health care is an important factor." Half of Missouri's Black mothers experienced "late entry into prenatal care," according to the **DHSS** report. Another issue for Missouri's mothers is parental leave. Missouri does not require employers to provide paid family leave, often forcing pregnant people to make the choice between a paycheck and postpartum recovery, according to the report. Thirty percent of white mothers received paid maternity leave, while 20% of Black mothers received paid maternity leave. Weisgrau concluded that ...

... political spectrum. Sen. Jill Schupp, D-St. Louis County, introduced a bill that would expand the coverage. Her legislation was eventually combined into a bipartisan bill, sponsored by Sen. Elaine Gannon, a Republican from southeast Missouri. The bill, which would have used the federal framework, was stalled by gridlock in the deeply divided Senate. According to 2018 data recently released by the **Missouri Department of Health and Senior Services**, Black mothers in Missouri have maternal mortality rates four times those of white parents. In Missouri, according to the report, 63% of pregnancy-related deaths occur between 43 days to a year after childbirth. Most pregnancy-related deaths in Missouri are preventable, the report continues. In 2018, mental health conditions were considered the leading cause of pregnancy-related deaths in ... added. "I just think getting them in the door for 60 days just isn't going to cut it. We need more time." From 2012 to 2014 in Missouri, 6.4% of women were diagnosed with gestational

AMERICAN OVERSIGHT

diabetes, which is a factor in mortality rates. In the same period, 26% of pregnancy-related deaths in the state were due to cardiomyopathy, a heart disease, which is mostly diagnosed in the postpartum period. The **DHSS** report recommends that the state should extend Medicaid coverage to one year after childbirth for all conditions, including medical, mental health and substance use disorder. Although there seems to be a bipartisan consensus that the expansion is necessary for Missouri's mothers, it is no small cost to fund. The Senate bill's fiscal analysis had a $4.4 million estimate in state costs for the 2023 ... to treat the children long-term who were born to these moms that didn't receive the care that you needed early on," Alford said. "You'll just have a better prognosis if intervention is early on." According to the proposed legislation's fiscal analysis, 4,565 women who received Medicaid benefits during pregnancy would likely have qualified for the extended coverage Numbers from 2018 provided by **DHSS** found that 46,455 people who were enrolled in state-provided pregnancy coverage lost coverage after 60 days. Some of those parents moved to other assistance, but nearly 20,000 received no further coverage. What issues in Missouri complicate coverage? Other issues contribute to the disparity in maternal mortality rates, according to Sheldon Weisgrau, vice president of health policy at the Missouri ... Putting aside that Missouri is worse than the national average, both overall and for Black women, access to health care is not the only reason for the disparities between Black mothers and white mothers in maternal mortality," Weisgrau said. "But that said, access to health care is an important factor." Half of Missouri's Black mothers experienced "late entry into prenatal care," according to the **DHSS** report. Another issue for Missouri's mothers is parental leave. Missouri does not require employers to provide paid family leave, often forcing pregnant people to make the choice between a paycheck and postpartum recovery, according to the report. Thirty percent of white mothers received paid maternity leave, while 20% of Black mothers received paid maternity leave. Weisgrau concluded that ...

Children as young as 6 months can now receive a COVID-19 vaccine in Columbia beginning Monday. The Columbia/Boone County Public Health and Human Services (PHHS) will offer the Pfizer-BioNTech vaccine to children between the age of 6 months and 4 years, according to a news release. The **Missouri Department of Health and Senior Services** announced on June 21 that it would be following the Centers for Disease Control and Prevention's recommendation of vaccines for children between the ages of 6 months and 5 years. The vaccine will be offered in a 3-dose series. The first and second doses should be separated by at least three weeks and the second and third doses should be separated by at least eight weeks, according to the release ...

The ripple effects of a monumental Supreme Court ruling on abortion will continue to dominate national and local news coverage this week. Here are seven key developments to watch locally: Clinics: Planned Parenthood has notified the **Missouri Department of Health and Senior Services** that it is ceasing abortion care in the state. Currently, there is only one clinic providing abortions in Missouri, and that's in St. Louis. Planned Parenthood says it will stay open but pivot to providing only contraceptives, preventive care and testing for sexually transmitting infections. In Kansas, there are four abortion clinics and Planned Parenthood says it's preparing to open another ...

Abortion Access is Public Health

Tuesday, July 26, 2022
12:00 to 1:00 p.m. PT

Register

Access to quality sexual and reproductive health services, including abortion, is key to a person's well-being. On June 24th, the Supreme Court overturned Roe v. Wade and Planned Parenthood of Southeastern Pa. v. Casey, which has implications for federally protected abortion access and state laws that are aimed at limiting abortion access.

The **July session** of *Hot Topics in Practice* will share why abortion access is a public health issue and how Washington state has addressed it through a public health framework.

During this one-hour webinar, Cynthia Harris and Rizza Cea with the Washington State

AMERICAN OVERSIGHT

Department of Health's Sexual and Reproductive Health Program will share why and how the state approaches abortion access with a public health framework. Regardless of the Supreme Court ruling on Roe v. Wade, access to abortion remains legal in Washington State. Washington state will continue to support reproductive health access and abortion access using a public health framework through current state laws and legislation. As other states pass stricter abortion laws that limit access, Washington state is strengthening their position and resources in efforts that center equity and reproductive justice.

The Washington State Department of Health's Sexual and Reproductive Health Program receives state and federal funding to provide sexual and reproductive health services. Federal and state funding supports Title X services through 16 contractors across the state. Title X is a federal grant program dedicated to providing individuals with comprehensive family planning and related preventive health services such as STI screening and treatment, contraception, and cancer screening. Focus populations are uninsured and underinsured, BIPOC, Hispanic, limited English proficiency, adolescents, and people who live in rural locations. Abortion services are not allowed under this grant, but Title X clinics are required to provide all options counseling including abortion, and Title X clinics can provide abortion services separate from this project. The Sexual and Reproductive Health Program supports access to abortion services with state funding.

Better understand why abortion access is a public health issue and how your organization can better integrate this information into your work. **Register today**.

Title 19—DEPARTMENT OF HEALTH AND SENIOR SERVICES
Division 10— Office of the Director
Chapter 15—Abortions

PROPOSED AMENDMENT

19 CSR 10-15.010 [*Report of Induced Termination of Pregnancy*] **Abortion Report.** The Department of Health and Senior Services is amending the title of this rule and section one (1).

PURPOSE: This amendment modifies the title of this rule, the incorporated ITOP Report, and language within, to align with the new abortion requirement following enactment of Section 188.017, RSMo, subsequent to Roe v. Wade being overturned. The Abortion Report will now require the physician's certification that a medical emergency of the pregnant woman existed, necessitating the abortion.

19 CSR 10-15.010- [*Report of Induced Termination of Pregnancy*] **Abortion Report**

(1) The **abortion** report [*of induced termination of pregnancy*] will include the following items: name of abortion facility or hospital; the city, town, or location of the abortion facility or hospital; county where the abortion facility or hospital is located; patient identification number; age of patient; marital status of patient; date of [*pregnancy termination*] **abortion**; residence of patient (state, county, city, town, or location); inside city limits (yes or no), and zip code; patient's race; patient's ethnicity; patient's education; previous pregnancy history; number of live births now living; number of live births now dead; number of spontaneous terminations and number of induced terminations; **procedure used to complete abortion;** type of termination procedure **(*check only one (1)*)**; date last normal menses began; clinical estimate of gestation; method of estimating gestational age; biparietal diameter measurement (if gestation age greater than or equal to eighteen (18) weeks by date of last normal menses or clinical estimate**);** name and signature of attending physician; physician's Missouri license number; name of person completing report; fetus viable (yes or no); [*name and signature of concurring physician, if the fetus is viable; and license number of concurring physician.*] **certifications of the physician who performed or induced the abortion: physician certification they have no knowledge that the woman sought the abortion solely because of a prenatal diagnosis, test, or screening indicating Down Syndrome or of the potential of Down Syndrome in the unborn child (yes or no); physician certification they have no knowledge that the woman sought the abortion solely because of the sex or race of the unborn child (yes or no); physician certification that the abortion was due to a "medical emergency," a condition which, based on reasonable medical judgment, so complicates the medical condition of the pregnant woman as to necessitate the immediate abortion of her pregnancy to avert the death of the pregnant woman or for which a delay will create serious risk of substantial**

AMERICAN OVERSIGHT

and irreversible physical impairment of a major bodily function of the pregnant woman (yes or no); (1) Has the patient ever served on active duty in the Armed Forces of the United States and separated from such service under conditions other than dishonorable (yes or no); (2) If answering question (1) in the affirmative, would the patient like to receive information and assistance regarding the agency's veteran services (yes or no). The information shall be reported on the **Abortion** Report [*of Induced Termination of Pregnancy*], which is incorporated by reference in this rule as published [*October 2017*] **October 2022** and may be obtained at www.health.mo.gov or by calling (573) 751-6387. **Within 45 days from the date of abortion, submit this form to: Department of Health and Senior Services, Attention: Bureau of Vital Records, P.O. Box 570, Jefferson City, MO 65102** This rule does not incorporate any subsequent amendments or additions.

AUTHORITY: section **[188.052,]** *188.055***[,]** *192.006, RSMo 2016,* **[and section 188.052, RSMo Supp. 2022.]** *This rule was previously filed as 13 CSR 50-151.010 and 19 CSR 30-15.010. Original rule filed Sept. 30, 1980, effective Jan. 12. 1981. Changed to 19 CSR 10-15.010, July 30, 1998. Amended: filed Oct. 24, 2017, effective April 30, 2018. Amended: filed Sept. 27, 2022.*

PUBLIC COST: This amendment will not cost state agencies or political subdivisions more than five hundred dollars ($500) in the aggregate.

PRIVATE COST: This amendment will not cost private entities more than five hundred dollars ($500) in the aggregate.

NOTICE TO SUBMIT COMMENTS: Anyone may file a statement in support or in opposition to this proposed amendment with the Missouri Department of Health and Senior Services, Attention: Mindy Laughlin, RN, BSN, Deputy Director, Division of Community and Public Health, PO Box 570, Jefferson City, MO 65102. To be considered, comments must be received within thirty (30) days after publication of this notice in the ***Missouri Register****. No public hearing is scheduled.*

Hot Topics in Practice

Abortion Access is Public Health

Tuesday, July 26, 2022
12:00 to 1:00 p.m. PT

Register

Access to quality sexual and reproductive health services, including abortion, is key to a person's well-being. On June 24th, the Supreme Court overturned Roe v. Wade and Planned Parenthood of Southeastern Pa. v. Casey, which has implications for federally protected abortion access and state laws that are aimed at limiting abortion access.

The **July session** of *Hot Topics in Practice* will share why abortion access is a public health issue and how Washington state has addressed it through a public health framework.

During this one-hour webinar, Cynthia Harris and Rizza Cea with the Washington State

AMERICAN OVERSIGHT

Department of Health's Sexual and Reproductive Health Program will share why and how the state approaches abortion access with a public health framework. Regardless of the Supreme Court ruling on Roe v. Wade, access to abortion remains legal in Washington State. Washington state will continue to support reproductive health access and abortion access using a public health framework through current state laws and legislation. As other states pass stricter abortion laws that limit access, Washington state is strengthening their position and resources in efforts that center equity and reproductive justice.

The Washington State Department of Health's Sexual and Reproductive Health Program receives state and federal funding to provide sexual and reproductive health services. Federal and state funding supports Title X services through 16 contractors across the state. Title X is a federal grant program dedicated to providing individuals with comprehensive family planning and related preventive health services such as STI screening and treatment, contraception, and cancer screening. Focus populations are uninsured and underinsured, BIPOC, Hispanic, limited English proficiency, adolescents, and people who live in rural locations. Abortion services are not allowed under this grant, but Title X clinics are required to provide all options counseling including abortion, and Title X clinics can provide abortion services separate from this project. The Sexual and Reproductive Health Program supports access to abortion services with state funding.

Better understand why abortion access is a public health issue and how your organization can better integrate this information into your work. **Register today**.

Presenters

Cynthia Harris (she/her)
Sexual and Reproductive Health Program Manager and Title X Project Director
Washington State Department of Health

Rizza Cea (she/her), DNP, MA, CNM, ARNP
Sexual and Reproductive Health Program Clinical Consultant and Title X Medical Director
Washington State Department of Health

IMPORTANT NOTES ABOUT HOT TOPICS

Speaker slides are posted on our **website** the morning of the webinar. Each session is recorded and made available by the next day. Audio is available through computer or by phone. Closed captioning will also be available during the webinar.

Hot Topics in Practice is a monthly webinar hosted by the Northwest Center for Public Health Practice. Guest speakers from local, state, tribal, and national organizations present on current issues affecting public health practice.

*Up to 1 CPH recertification credit may be earned by viewing this webinar. Visit the **National Board of Public Health Examiners** to learn more.*

GOV logo RGB_lg

THIS WEEK IN GOVERNING AUGUST 6, 2022

AMERICAN OVERSIGHT

Elizabeth Hotaling, right, calls the implications of an anti-abortion amendment “devastating” and “far-reaching.” (Alan Greenblatt/Governing)

Latecomers arriving for early morning mass kneel quickly and cross themselves. Twice during the Sunday service at Wichita’s Cathedral of the Immaculate Conception, they are instructed to vote in favor of an amendment on the Aug. 2 ballot in Kansas, which would make clear there is no right to abortion under the state constitution. “The sanctity of life is a bedrock principle of the Catholic Church,” the Rev. John Sherlock says from the pulpit. “It is imperative that you vote yes on the Value Them Both Amendment.”

Across Central Avenue from the cathedral, a small group of women hold up signs calling on parishioners and passing motorists to oppose the amendment. As the bells toll at the start of the second mass of the day, Elizabeth Hotaling, one of the protesters, says, “When a religion starts to impose its beliefs on others, it’s no

AMERICAN OVERSIGHT

longer a religion — it's tyranny."

Abortion has become a flashpoint across America, but it's an especially heated topic in Kansas. Voters will face ballot measures this fall in several states to block or protect abortion rights, including California, Kentucky and Vermont. Kansas will not only vote first, but will decide on a measure that could have the most immediate effect. READ MORE

Abortion Map 2022: U.S. State Laws After Overturning Roe

On Saturday three more states' trigger laws will go into effect, expanding national abortion restrictions and increasing the number of states in which abortion is illegal to 12. Here's a look at the laws in each state.

After Roe: What's next for abortion access, law, and politics

Thursday, July 14, 2022, 12-1 pm ET

Register for free to submit your questions.

In overturning Roe v. Wade, the U.S. Supreme Court has ignited fundamental legal and political questions and radically shifted the healthcare landscape. Amidst the furor, those who want to keep abortion safe and legal ponder the path forward. This panel of experts from across Harvard will assess the fallout, evaluate a variety of responses to the ruling, and share their roadmaps to a post-Roe America.

Attorney General Merrick Garland

AMERICAN OVERSIGHT

DOJ Statement: **Attorney General Merrick B. Garland Statement on Supreme Court Ruling in Dobbs v. Jackson Women's Health Organization**

Secretary Xavier Becerra

AMERICAN OVERSIGHT

FACT SHEET: President Biden Announces Actions In Light of Today's Supreme Court Decision on Dobbs v. Jackson Women's Health Organization

Today, President Biden announced actions that his Administration is taking to protect women who will face the grave consequences of today's Supreme Court decision. This decision expressly took away a Constitutional right from the American people that it had recognized for nearly 50 years – a woman's right to choose, free from government interference.

This decision will have devastating consequences in the lives of women around the country.

The President made clear that the only way to secure a woman's right to choose is for Congress to restore the protections of *Roe* as federal law. Until then, he has announced two actions the Administration is taking to protect women.

AMERICAN OVERSIGHT

Protecting the Right to Seek Medical Care

As the Attorney General made clear, women must remain free to travel safely to another state to seek the care they need.

A person has the right to travel between states for whatever reason they want – it is no one else's business – especially the government's. If a woman lives in a state that restricts abortion, the Supreme Court's decision does not prevent her from traveling from her home to a state that allows it.

If any state or local official tries to interfere with women exercising this basic right, the Biden Administration will fight that deeply un-American attack.

Protecting Access to Medication

The President directed the Secretary of Health and Human Services to protect women's access to critical medications for reproductive health care that are approved by the Food and Drug Administration—including essential preventive health care like contraception and medication abortion.

More than 20 years ago, the FDA approved mifepristone to safely end an early pregnancy; this drug is also commonly used to treat miscarriages. The American Medical Association and the American College of Obstetricians and Gynecologists wrote to President Biden and Vice President Harris, asking the federal government to protect access to this care. In the face of threats from state officials saying they will try to ban or severely restrict access to medication for reproductive health care, the President directed the Secretary of Health and Human Services to identify all ways to ensure that mifepristone is as widely accessible as possible in light of the FDA's determination that the drug is safe and effective—including when prescribed through telehealth and sent by mail.

AMERICAN OVERSIGHT

From: Dr. Alveda King
To: Nickelson, Paula
Subject: Born into a movement
Date: Saturday, June 25, 2022 8:02:44 AM

America First Policy Institute

Friend,

Like so many Christians, I weep for my past sins. In my younger days, I didn't always see the intrinsic value of life. **I've had two abortions.** For far too long, **I supported the left's worldview that does not understand how precious each and every life is, no matter the stage.**

But God had another plan for me. He has such a beautiful and unique way of shaping us and changing our hearts through the experiences, people, obstacles, and opportunities He puts us in our path. By God's grace, I came to recognize the truth that ***Life is a precious gift which must be protected, from womb to tomb.***

In 1983, I became a Christian and dedicated my life to God. Soon after, I heard his calling to use my voice as a defender of the sanctity of life. As the niece of Dr. Martin Luther King Jr., **I've learned that God calls all of us to use our voices to stand up for what we believe in, especially in defense of society's most vulnerable.** **Will you stand with me in my fight to protect life from the womb to the tomb? >>**

The left refuses to recognize the reality that a baby in the womb is a fully human life and want to allow abortion up to the point of birth. They want us to

AMERICAN OVERSIGHT

see abortion as a "choice" regarding the mother's body—but the baby in the womb is a child to be loved and cherished, not a "choice."

Become a pro-life warrior and join me in advocating for the protection of life in a world where so many lives are not valued. >>

[I Stand for Life]

It's NEVER too late to make a difference in this world. In fact, I would not be here today had my mother, a pregnant college student, chosen abortion over life. I was saved for a reason, and God's plan often works in mysterious and unpredictable ways. By His grace, I have found my life purpose in doing my part to be a voice for the voiceless. Will you join me in doing the same?

[Stand with me]

Your support makes a difference,

Dr. Alveda King

Subject: CALL INVITE - Thursday 6/30: Advancing Human Dignity in a Post-Roe America
Date: Thursday, June 30, 2022 9:02:02 AM

America First Policy Institute

Dear Friend,

Last Friday's historic *Dobbs* decision really marks the end of the beginning for the pro-life movement's efforts to protect women and children from abortion and to stop the Left's attempts to push for taxpayer-funded abortions up until the moment of birth. Nearly 50 years after *Roe vs. Wade* was decreed for all 50 states by seven unelected Justices, the Court will now allow the citizens of each state to try and find a solution to this perennial controversy, in a way that honors both women and unborn children.

Here at AFPI, we celebrate a return to the Constitution by our Nation's highest Court, with meaningful wins in the past week on the issues of life, the First and Second Amendments, and school choice. But there is much more work to be done. The underlying factors that lead women to seek abortion still exist as does the Left's desire to advance radical policies like late-term abortions. In contrast, we believe in a holistic approach to this societal challenge.

REGISTER FOR THE CALL

Please join our leadership on Thursday, June 30 at 3 pm eastern time for a very important discussion on the path forward in a Post-*Roe* America. We will hear from these amazing leaders:

AMERICAN OVERSIGHT

- Kellyanne Conway, Chair of the Center for the American Child, will discuss the battle for hearts and minds for the cause of life, as well as our efforts to promote adoption and reform the broken foster care system;
- Dr. Alveda King, Chair of the Center for the American Dream, will discuss the civil rights aspect of the pro-life issue;
- Dr. Heidi Overton, Director of the Center for a Healthy America, will discuss the medical dimensions of this debate and how a commitment to patient care requires a pro-life perspective that honors both mother and child; and
- Pastor Paula White, Chair of the Center for American Values, will discuss the imperative to defend the God-given right to life and her many years of pastoral efforts to support women in crisis pregnancies.

As a mom of five—including four daughters—this issue is incredibly important to our family, as I'm sure it is for yours as well. Join us as we plot the path forward. **You may RSVP by clicking here.** You don't want to miss this discussion, and we hope to speak with you then!

Sincerely,

Ashley Hayek

Subject: CALL INVITE - Thursday 6/30: Advancing Human Dignity in a Post-Roe America
Date: Wednesday, June 29, 2022 11:16:00 AM

America First Policy Institute

Dear Friend,

Last Friday's historic *Dobbs* decision really marks the end of the beginning for the pro-life movement's efforts to protect women and children from abortion and to stop the Left's attempts to push for taxpayer-funded abortions up until the moment of birth. Nearly 50 years after *Roe vs. Wade* was decreed for all 50 states by seven unelected Justices, the Court will now allow the citizens of each state to try and find a solution to this perennial controversy, in a way that honors both women and unborn children.

Here at AFPI, we celebrate a return to the Constitution by our Nation's highest Court, with meaningful wins in the past week on the issues of life, the First and Second Amendments, and school choice. But there is much more work to be done. The underlying factors that lead women to seek abortion still exist as does the Left's desire to advance radical policies like late-term abortions. In contrast, we believe in a holistic approach to this societal challenge.

AMERICAN OVERSIGHT

From: MMWR Media List on behalf of Media@cdc.gov (CDC)
To: MMWR-MEDIA@LISTSERV.CDC.GOV
Subject: CDC Press Release: Four in 5 pregnancy-related deaths in the U.S. are preventable
Date: Monday, September 19, 2022 8:38:10 AM

Press Release

For Immediate Release
Monday, September 19, 2022

Contact: CDC Media Relations
(404) 639-3286

Four in 5 pregnancy-related deaths in the U.S. are preventable

Data highlight opportunities to better protect moms

More than 80% of pregnancy-related deaths were preventable, according to 2017-2019 data from Maternal Mortality Review Committees (MMRCs), which are representatives of diverse clinical and non-clinical backgrounds who review the circumstances around pregnancy-related deaths to identify recommendations to prevent future deaths. Information from MMRCs in 36 U.S. states on leading causes of death by race and ethnicity can be used to prioritize interventions that can save lives and reduce health disparities.

"The report paints a much clearer picture of pregnancy-related deaths in this country," said Wanda Barfield, M.D., M.P.H., director of CDC's Division of Reproductive Health at the National Center for Chronic Disease Prevention and Health Promotion. "The majority of pregnancy-related deaths were preventable, highlighting the need for quality improvement initiatives in states, hospitals, and communities that ensure all people who are pregnant or postpartum get the right care at the right time."

Key Findings:
Among pregnancy-related deaths with information on timing, 22% of deaths occurred during pregnancy, 25% occurred on the day of delivery or within 7 days after, and 53% occurred between 7 days to 1 year after pregnancy.

The leading underlying causes of pregnancy-related death include:

- Mental health conditions (including deaths to suicide and overdose/poisoning related to substance use disorder) (23%)
- Excessive bleeding (hemorrhage) (14%)
- Cardiac and coronary conditions (relating to the heart) (13%)
- Infection (9%)
- Thrombotic embolism (a type of blood clot) (9%)

AMERICAN OVERSIGHT

- Cardiomyopathy (a disease of the heart muscle) (9%)
- Hypertensive disorders of pregnancy (relating to high blood pressure) (7%)

The leading underlying cause of death varied by race and ethnicity. Cardiac and coronary conditions were the leading underlying cause of pregnancy-related deaths among non-Hispanic Black people, mental health conditions were the leading underlying cause for Hispanic and non-Hispanic White people, and hemorrhage was the leading underlying cause for non-Hispanic Asian people.

American Indian or Alaska Native data highlighted

American Indian or Alaska Native (AI/AN) people are disproportionally impacted by pregnancy-related deaths. A second report uses an approach for classifying AI/AN populations that includes those who also identify as multi-racial or of Hispanic ethnicity.

Based on a review of pregnancy-related deaths among AI/AN people, mental health conditions and hemorrhage were the most common underlying causes of death, accounting for 50% of deaths with a known underlying cause. Most pregnancy-related deaths of AI/AN people (93%) were determined to be preventable. About 64% of deaths occurred between 7 days to 1 year after pregnancy.

Everyone can help prevent pregnancy-related deaths

More than half (53%) of pregnancy-related deaths happen up to one year after delivery. It is critical for all healthcare professionals to ask whether their patient is pregnant or has been pregnant in the last year to inform diagnosis and treatment decisions. Healthcare systems, communities, families, and other support systems need to be aware of the serious pregnancy-related complications that can happen during and after pregnancy. Listen to the concerns of people who are pregnant and have been pregnant during the last year and help them get the care they need.

Examples of prevention recommendations from MMRCs include wider access to insurance coverage to improve prenatal care initiation and follow-up after pregnancy, providing opportunities to prevent barriers to transportation to care, and the need for systems of referral and coordination.

Maternal Mortality Review Committees are the best source for prevention strategies

MMRCs are multidisciplinary committees that convene at the state or local level to comprehensively review deaths during or within one year of pregnancy. Their goal is to understand circumstances surrounding each death and develop recommendations for action to prevent deaths in the future.

This is the first information to be released under the Enhancing Reviews and Surveillance to Eliminate Maternal Mortality, a CDC-funded program to support agencies and organizations

AMERICAN OVERSIGHT

that manage MMRCs. CDC also supports the Maternal Mortality Review Information Application (MMRIA) to standardize reporting of data from MMRCs. This report reflects efforts undertaken by jurisdictions to improve their MMRC processes and use MMRIA to document and disseminate information.

Recently, CDC significantly expanded its investment in efforts to eliminate preventable pregnancy-related deaths, with new awards totaling $2.8 million to support additional MMRCs in nine jurisdictions. CDC now supports MMRCs in 39 states and one U.S. Territory. Building this important infrastructure will help better understand and prevent pregnancy-related deaths in the U.S.

Additional information:
State Strategies for Preventing Pregnancy-Related Deaths: A Guide for MMRC Data to Action provides MMRCs and their partners with a guide to help facilitate implementation of data-informed strategies to prevent pregnancy-related deaths.

For information on ways to support people who are pregnant and postpartum, visit CDC's Hear Her campaign.

###

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES

CDC works 24/7 protecting America's health, safety and security. Whether disease start at home or abroad, are curable or preventable, chronic or acute, or from human activity or deliberate attack, CDC responds to America's most pressing health threats. CDC is headquartered in Atlanta and has experts located throughout the United States and the world.

- Rural health automation should no longer be an afterthought
- Nursing homes in rural America: A chartbook

Tomorrow: Learn about the rural emergency hospital model

A recent Health Affairs podcast provides an update on CMS rules on price transparency and rural emergency hospitals, including conditions of participation these facilities must meet to participate in the Medicare and Medicaid programs. Many stakeholders have **praised the REH model's ability** to preserve the availability of emergency and outpatient care in rural areas, while **NRHA COO Brock Slabach notes** that among many in Washington there's still a "general suspicion about this program being valuable." Join NRHA's Government Affairs team for listening sessions at **11 a.m. CST tomorrow, July 15** and **11 a.m. CST July 20** on CMS' newly proposed rule on REH and CAH conditions of participation, including an overview of the regulations and time for questions. Plan to join NRHA and CAH leaders from across the country in our hometown of Kansas City to further explore the REH model and other regulations at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23**.

NRHA updates Rural Vaccine Confidence Initiative toolkit

You know better than anyone that vaccine hesitancy among rural Americans means COVID-19 will linger in rural communities – unless something more is done to increase vaccination

AMERICAN OVERSIGHT

rates. To help rural leaders communicate vaccine safety and efficacy in their own words at the local level, NRHA has recently added new and updated materials to our Rural Vaccine Confidence Initiative, including website landing page copy, frequently asked questions, and more. These free and easy-to-use communication tools are developed around three specific audiences: hospitals and senior leadership, business and community partners, and whole communities. Additionally, CMS **recently launched a new toolkit** to help pediatricians and physicians talk to parents and patients about pediatric vaccination.

Let's meet in the middle: Reconnect with RHC, CAH colleagues

Whether it's your first time in town or a yearly pre-COVID destination, NRHA would love to welcome you to our hometown of Kansas City, Mo., to connect with friends and colleagues and be inspired by unique attractions. NRHA is excited to welcome clinic and CAH stakeholders back to KC to share knowledge and resources with colleagues from all over the country. Join us for **NRHA's Rural Health Clinic Conference** **Sept. 20-21**, and celebrate 25 years of CAHs at our **Critical Access Hospital Conference** **Sept. 21-23**. Virtual attendees will have the opportunity to watch plenary and concurrent sessions streaming live throughout each day of the event along with bonus recorded content available for later viewing. We'll reconnect in a great location where you can take the free streetcar from Union Station to the River Market and attractions in between, including the Crossroads Arts district and Power and Light for nightlife. We look forward to seeing you soon.

15 health care responses to Roe v. Wade reversal

Hospitals and medical associations have reacted to the Supreme Court's decision to overturn Roe v. Wade by calling attention to the consequences it will have on vulnerable populations and the increased demand providers will see in states where abortion services are still accessible. In the West, many providers serving rural areas were **already struggling to meet demand** in a region where staffing shortages and long travel distances are barriers to reproductive services. "We are already understaffed and under-resourced for deliveries in rural areas," **says NRHA COO Brock Slabach**. "We have maternity deserts in rural areas all over the country." **Recent research by NRHA members** at the University of Minnesota looks at racial inequities in the availability of evidence-based supports for maternal and infant health, finding that rural residents who are Black, Indigenous, and people of color experience poorer pregnancy-related health outcomes.

New bill aims to make pandemic rural hospital aid permanent

A new report highlights **rural challenges moving out of the pandemic**, with NRHA member George Pink noting that federal pandemic relief funds "probably prevented many rural hospitals from closing. **The bipartisan Rural Hospital Support Act** aims to extend critical federal financial aid programs that have helped keep rural hospitals afloat. The new **rural emergency hospital designation** also aims to prevent rural hospital closures. The Center for Optimizing Rural Health invites rural hospitals to apply for the **Vulnerable Rural Hospital Assistance Program**, which helps rural hospitals tackle pressing challenges. The application deadline is **July 31**. The bipartisan **Save America's Rural Hospitals Act** was also recently introduced to the 117th Congress with the goal to raise the rural health safety net. Interested in **advocating on behalf of rural health**? Sign up to participate in NRHA's rural health advocacy campaigns, and review NRHA's updated advocacy 101 guide.

University creates community college pathway to med school

AMERICAN OVERSIGHT

UC Davis recently received a grant to create a pre-med pathway for rural college students in an effort to boost the number of primary care physicians in underserved parts of Northern California. In Wisconsin, a new intensive "boot camp" offers training to help rural family doctors and nurses **identify and treat addiction** in their communities. Additionally, HHS recently **awarded more than $155 million** to expand training for primary care residents in underserved and rural communities. Join NRHA and clinic and CAH leaders from across the country in our hometown of Kansas City to focus on growing, supplementing, and keeping your workforce at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23**. Rural health needs those who go above and beyond. That's why **NRHA's Career Center is your resource** for qualified health care professionals.

Partnership expands mental health outreach in rural Arkansas

The Arkansas Rural Health Partnership, an NRHA member, is trying to fill the state's mental health care gap by teaching people about mental health first aid, which prepares participants to interact with a person experiencing a mental health crisis. With limited options for treatment, many people with mental health issues wind up in jail or prison, where court-ordered programs are **sometimes the only way to get help**. CMS recently issued the new **Physician Fee Schedule proposed rule**, which would expand access to behavioral health services, ACOs, cancer screening, and dental care in rural and underserved areas. Join NRHA and clinic and CAH leaders from across the country in our hometown of Kansas City to focus on the best ways to provide behavioral health care and more at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23**.

Coming soon: ECHO series, children's hospital funding

The University of Kansas Medical Center is **hosting an ECHO series at noon CDT** every Thursday in August on tickborne diseases. HRSA is accepting applications through **Aug. 1** for the **Children's Hospitals Graduate Medical Education Payment Program**, which aims to compensate for the disparity in the level of federal GME funding for freestanding children's teaching hospitals versus other types of teaching hospital. Finally, the American Epilepsy Society and the Dartmouth-Hitchcock Medical Center **are conducting a survey** to better understand the gaps in knowledge and practice among the non-epilepsy specialist medical community who serve people with epilepsy.

Black Americans may have less access to certified stroke care

Structural discrimination may reduce access to certified stroke center care for Black Americans, an observational study suggested. Black, racially segregated communities had the highest likelihood of hospitals with certified stroke in models not accounting for population size, but after adjusting for population and hospital size, patients in these communities were 26 percent less likely to have access to care at a certified stroke center. Additionally, **recent research by NRHA members** at the University of Minnesota Rural Health Research Center looks at racial inequities in the availability of evidence-

NRHA opportunity spotlight

Your chance to be a Rural Health Fellow, speak in San Diego

NRHA's Rural Health Fellows program is a yearlong, intensive training program that develops leaders who can articulate a clear and compelling vision for rural America.

Each year, NRHA selects 10 to 15 highly motivated individuals who have proven their dedication to improving the health of rural Americans through their educational or professional experience.

The submission period for 2023 Rural Health Fellows applications is now open.

Additionally, **NRHA is now accepting session and research presentation proposals** for the nation's largest gathering of rural health pros, our Annual Rural Health Conference and Rural Hospital Innovation Summit, which will be held May 16-19, 2023 in San Diego, Calif.

Any person with an interest in rural health is invited to submit session proposals or original research for presentation during these events.

AMERICAN OVERSIGHT

Impact of affiliation mixed for rural U.S. hospitals

Recent research shows that affiliation may protect some financially distressed rural hospitals from closure but **could raise the risk of closure** for those that are already financially stable. The report details findings from a 13-year cohort study among the rural U.S. hospitals that faced financial distress in 2007. Among 2,237 rural hospitals operating in 2007, 140 had closed by 2019. The number of independent hospitals decreased from 68.9 percent in 2007 to 47 percent in 2019, and the proportion that were affiliated increased from 31.1 percent to 46.7 percent. The bipartisan **Save America's Rural Hospitals Act** was recently introduced to the 117th Congress with the goal to raise the rural health safety net, crucial to the survival of rural communities and the facilities that serve them.

Today: NRHA webinar series on medical device cybersecurity

NRHA partner **Sensato will host a three-part webinar series** starting at **1 p.m. CDT today, July 14** on medical device cybersecurity, including how to comply, detect, and respond. Join this three-part training series to learn how to make sure patients connected to medical devices are the first consideration in your medical device cybersecurity incident response program. Patient safety is achieved by going beyond just deploying software. Learn how to get your IT and biomedical teams to work together to effectively respond to a medical device cybersecurity attack.

NRHA member on rural hospital partnership value proposition

The latest Rural Health Rising podcast from NRHA member Hillsdale Hospital discusses how health care partnerships are critical to rural hospitals, as well as how they benefit the partnering organizations. Eric Shell of Stroudwater Associates looks at the value rural hospitals bring to their partner organizations and how to leverage that value. **As one example of an exceptional collaboration**, Healthy Hillsboro, a partnership between Southern Illinois University Medicine Department of Population Science and Policy and Hillsboro Area Hospital, received **NRHA's 2022 Outstanding Rural Health Program Award**. Join NRHA and CAH leaders from across the country in our hometown of Kansas City to focus on best practices by partnering with the nation's highest rated facilities at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23**.

Journal of Rural Health seeking papers for special section

NRHA's Journal of Rural Health is soliciting articles on the impact of the Flex Program on CAHs and systems of care in rural communities. Topics include the impact of the program on CAHs and rural systems of care in recognition of its 25th anniversary; the impact of the program on quality improvement and financial stability; and more. All manuscripts will be evaluated according to the journal's standard review process and **must be submitted electronically**. Authors should state in their cover letters that they are submitting in response to this call for papers on the 25th anniversary of the Flex Program and CAHs. **Guidelines on required format** may be found on the JRH website. The submission deadline is **Oct. 1**. Don't miss your chance to celebrate CAHs and learn from the best at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23** in our hometown of Kansas City.

AMERICAN OVERSIGHT

New Rural Health Voice podcast discusses veterans' health

We just celebrated Independence Day and Rural America has a proud history of volunteering for military service, so the latest episode of the Rural Health Voice podcast hosted by NRHA President Beth O'Connor of the Virginia Rural Health Association looks at how we can return the favor and take care of our veterans. Paul Crews, executive director of Veterans Administration Mid-Atlantic Health Care Network, joins O'Connor to discuss the resources available to rural veterans.

New research on rural self-rated LGBTQAI+ health, ACEs

New research by NRHA members from the University of Minnesota Rural Health Research Center looks at rural-urban differences in self-rated health among gay, lesbian, and bisexual adults, particularly the intersections of sexual orientation, geographic context, and race/ethnicity and their associations with self-rated health. Additionally, in a recent interview with Rural Health Information Hub, **NRHA member Elizabeth Crouch** of the Rural and Minority Health Research Center discusses insights on rural adverse and positive childhood experiences based on her research.

Book featuring NRHA leadership recognized for global impact

Featuring commentary and insight from NRHA CEO Alan Morgan and NRHA President Beth O'Connor, the new book Masks, Misinformation, and Making Do has been selected to be part of the **Knowledge Unlatched Focus Collection 2023: Global Health**. Earlier this year, KU joined forces with some of the world's most established academic publishers to create a **multi-disciplinary collection of 20 quality scholarly titles** exploring global health from every angle and perspective.

Rural health automation should no longer be an afterthought

Deploying advanced technologies is often an afterthought, especially for rural hospitals struggling to retain talent and navigate the increasingly complex regulatory environment. However, new technologies empower providers to streamline their operations, reduce the time spent on administrative tasks, and conserve increasingly precious resources. Additionally, remote patient monitoring can **provide essential services to expectant mothers** in rural areas, and health leaders say hospitals are changing, with their business models becoming **increasingly built on outpatient, same-day discharges**.

Nursing homes in rural America: A chartbook

A new chartbook on nursing homes in rural America from RUPRI Center for Rural Health Policy Analysis, an NRHA member, documents nursing home availability at the county level and identifies counties without nursing homes. The chartbook also evaluates the supply of nursing home beds per 1,000 population aged 65 and older and identifies county-level nursing home availability for counties with and without hospitals with swing beds. Finally, the authors describe the resident and nursing home characteristics including occupancy levels, payer mix, demographics, and health care needs, as well as summarize data for the noncore, micropolitan, and metropolitan counties.

How health orgs address ongoing pandemic provider burnout

A recent study revealed physician burnout on a national scale is increasing the frequency of premature retirement and attrition rates. The impact of this has been acutely felt in rural Texas, where 40 percent of rural hospitals are vulnerable to closure, according to NRHA. Additionally, Eastern Oklahoma VA Health Care System is **using music therapy to help veterans** heal from PTSD and other types of trauma, and NRHA's Rural Horizons Magazine recently featured a story on how a **statewide music therapy program in Pennsylvania** is helping health care providers cope with pandemic stress. There has been an influx of sessions on rural provider burnout, mental health, and treatment and retention strategies in the agenda for **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference**, so be sure to join us **Sept. 20-23**.

COVID bailout rescued some hospitals while enriching others

AMERICAN OVERSIGHT

The Provider Relief Fund served as a lifeline for many hospitals that might not have withstood the pandemic — but analyses show the funds also exacerbated the gap between the industry's haves and have-nots, disproportionately rewarding wealthy hospitals. A recent report from North Carolina shows **how seven of the state's largest hospital systems** profited from billions of COVID relief funds and Medicare payments. So far this year, **six hospitals have closed** due to a variety of factors, including cash flow challenges and dwindling patient volumes. The bipartisan **Save America's Rural Hospitals Act** was recently introduced to the 117th Congress to raise the rural health safety net, which is crucial to the survival of rural communities and facilities. Interested in **advocating on behalf of rural health**? Sign up to participate in NRHA's rural health advocacy campaigns, and review NRHA's updated advocacy 101 guide.

How climate change, drought worsens rural suicide rates

New research has found suicide increases during drought among men in Australia's rural communities, and the problem may be exacerbated due to climate change. The study calls for urgent plans for adaptation and global action to mitigate climate change and avoid impacts on vulnerable communities that are at risk of worsening natural hazards, such as rural communities in California and the American Southwest that **have experienced extreme droughts** in recent years, along with depression, suicide, and other psychological impacts. Join NRHA and clinic and CAH leaders from across the country in our hometown of Kansas City to focus on the best ways to provide behavioral health care and more at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23**.

As COVID wanes, some changes to rural hospitals remain

Some rural hospitals hope to retain measures implemented in response to the pandemic, but when the public health emergency expires, funding for some innovations may not continue. NRHA COO Brock Slabach says rural hospitals are evaluating procedural changes and looking for Congress to act to allow them to maintain the flexibility that helped them stay above water financially. "Now that the pandemic is easing and maybe one day will be over, I hope that we don't put rural hospitals back on the back burner and underfund them and continue to… not value them as important parts of the health care system in times of disaster or pandemic," Slabach says. Join NRHA and CAH leaders from across the country in our hometown of Kansas City to focus on controlling the post-pandemic fate of rural hospitals and more at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23**.

One nurse's fears for rural women as Roe v. Wade overturned

With the Supreme Court overturning Roe v. Wade, some abortion rights supporters fear the next battle will be over abortion pills. It's a big concern for women in rural parts of the United States including North Carolina, where registered nurse Laura McNeill-Hoel sees what she calls a reproductive rights desert. "We have these pockets of the country where women don't have any access to birth control, morning after pills, abortions; where we end up creating places where, and if you look at the statistics, typically are in of pockets of poverty," she says. **Commentary from NRHA COO Brock Slabach** was featured in NRHA Today last week the day prior to the ruling by the judiciary: "We have maternity deserts in rural areas all over the country. If, as expected, Roe is overturned, we could have real capacity issues with many more live births."

New case studies on LGBTQ+ health in rural areas

New research by NRHA members from the University of Minnesota Rural Health

AMERICAN OVERSIGHT

Research Center look at LGBTQ+ health in rural areas, including how small-town Pride celebrations promote social connectedness and well-being; how rural community organizations are building inclusive environments for LGBTQ+ residents; improving access to LGBTQ+-friendly care in rural areas; and **social and emotional support during the pandemic** by sexual orientation and rurality. An additional West Virginia University study looks at **common barriers to care for rural LGBTQ+ residents**. Learn how to enhance care for the most vulnerable rural populations by joining NRHA and leaders from across the country at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23** in our hometown of Kansas City, Mo.

Your chance to be a Rural Health Fellow, speak in San Diego

NRHA's Rural Health Fellows program is a yearlong, intensive training program that develops leaders who can articulate a clear and compelling vision for rural America. Each year, NRHA selects 10 to 15 highly motivated individuals who have proven their dedication to improving the health of rural Americans through their educational or professional experience. The submission period for 2023 Rural Health Fellows applications is now open. Additionally, **NRHA is now accepting session and research presentation proposals** for the nation's largest gathering of rural health pros, our Annual Rural Health Conference and Rural Hospital Innovation Summit, which will be held May 16-19, 2023 in San Diego, Calif. Any person with an interest in rural health is invited to submit session proposals or original research for presentation during these events.

NRHA supports legislation to boost fight against fentanyl

Four U.S. representatives will introduce the House companion to Sen. Chuck Grassley's (R-Ia.) Stop Pills That Kill Act. NRHA supports this bipartisan, bicameral legislation, which seeks to deter narcotics traffickers and strengthen the nationwide fight against fentanyl by implementing new penalties for counterfeit pill production. NRHA also supports Sen. John Cornyn's (R-Texas) bipartisan **Safer Communities Act**, which contains additional tools and resources for communities to address criminal misuse of firearms and also offers mental health support. Interested in **advocating on behalf of rural health**? Sign up to participate in NRHA's rural health advocacy campaigns and be sure to review NRHA's updated advocacy 101 guide.

Curt Mueller is NRHA's 2022 outstanding researcher

NRHA recently honored the association's **2022 Rural Health Award recipients** at our Annual Rural Health Conference. NRHA's Rural Health Awards are given each year to individuals and organizations in the field of rural health who have dedicated their time and talents to improving the health and well-being of others. Curt Mueller is this year's **NRHA Outstanding Researcher Award winner**. In his role as a senior fellow in public health at the NORC Walsh Center for Health Services Research in Washington, D.C., Mueller has been a dedicated rural health services researcher whose work has had a direct influence on public health

Biden admin announces rare funding for rural homelessness

The Biden Administration through the U.S. Department of Housing and Urban Development recently released a first-of-its-kind package of resources to address unsheltered homelessness and homeless encampments, including funds set aside specifically to address homelessness in rural communities. This Initiative for Unsheltered and Rural Homelessness being made available by HUD strongly promotes partnerships with health care organizations, public housing authorities and mainstream housing providers, and people with lived experience and expertise of homelessness.

Rural Horizons spotlight

NRHA's latest Rural Horizons Magazine now available online

The **latest issue of NRHA's Rural Horizons**, the association's quarterly magazine, is now available online featuring three new articles on timely topics including **talking pandemic challenges and podcasts with NRHA President Beth O'Connor**.

NRHA recently sat down with NRHA President and longtime NRHA member Beth O'Connor to learn more about her rural health priorities, her goals as NRHA president, and why she is excited to get back to in-person events.

"In the future — beyond the pandemic — we need a greater emphasis on the importance of making sure everyone has good access to primary care. I think sometimes we get so caught up in the disparities and access to specialists and telehealth and other pieces of the puzzle that we forget that just basic checkups are services that some people don't have a way to get to," O'Connor says.

Rural Horizons features articles carefully selected to engage and inform everyone working to improve rural health care. You can subscribe in print by **becoming an NRHA member**. **Email the editors to submit an abstract** for potential publication, get information on editorial content, or purchase issues.

AMERICAN OVERSIGHT

Opinion: Why COVID vaccination in rural schools is important

Three members of the National Rural Education Association recently wrote about how protection from the worst of COVID-19 through vaccination supports the learning of students, the health of families, and the spirits of communities. Everyone in the United States is now eligible for the shot except babies under six months of age and those with contraindications to vaccination – but for the last two months, the pace of new rural vaccinations has remained flat. Additionally, former HHS secretary Eric Hargan recently wrote about why we must **end the public health emergency carefully**. NRHA has developed the **Rural Vaccine Confidence Initiative** to help rural health stakeholders communicate COVID-19 vaccine efficacy and safety in their own words at the local level.

Webinar today: What clinicians need to know about monkeypox

HRSA and CDC are hosting an information session on the monkeypox outbreak at **noon CDT June 30**. The presentation will discuss the role of HRSA and HRSA-supported organizations in the public health response. Topics include identifying symptoms, where to refer patients, and much more. This webinar is intended for clinicians, including those serving in HRSA-supported health centers, Ryan White HIV/AIDS Program-funded clinics, and rural health clinics. Additionally, the **CMS Innovation Center is hosting a webinar** at **2 p.m. CDT June 30** providing an overview of the new Enhancing Oncology Model and application process.

Rural mental health and value of sharing lived experiences

Recognizing the value of sharing deeply personal accounts of mental illness is the message of Jeff Ditzenberger, a farmer who attempted suicide. His own challenges confronting and managing his bipolar II disorder while returning to farming motivated Ditzenberger to found TUGS, a mental health nonprofit with the mission to address the stigma surrounding mental health challenges and suicide. Additionally, a new report shows that **older people in New York are dying** from drug overdose or suicide at much higher rates now compared with a decade ago. Join NRHA and clinic and CAH leaders from across the country in our hometown of Kansas City to focus on the best ways to provide behavioral health care and more at **NRHA's 20th Rural Health Clinic Conference** and **21st Critical Access Hospital Conference** **Sept. 20-23**.

Rising fuel prices pose challenges for EMS providers

High fuel prices are beginning to take their toll on emergency responders. "We were averaging about $5,000 per month so now we're looking at about anywhere between $11,000 and $13,000 added fuel cost," says Robertson County, Texas, EMS Director Steven Von Gonten. According to the Texas Organization of Rural and Community Hospitals, an NRHA member, Texas leads the nation in rural hospital closures, making the situation even more critical for EMS providers in rural areas where the closest hospital may be more than 40 miles away. Additionally, investments are being made to **grow rural transit in Mississippi**, with goals to help residents get to work, the hospital, or grocery stores. Experts say public transit can be a game-changer for many of the state's rural communities.

Journal of Rural Health seeking papers for special section

NRHA's Journal of Rural Health is soliciting articles on the impact of the Flex Program on

AMERICAN OVERSIGHT

CAHs and systems of care in rural communities. Topics include the impact of the program on CAHs and rural systems of care in recognition of its 25th anniversary; the impact of the program on quality improvement and financial stability; and more. All manuscripts will be evaluated according to the journal's standard review process and **must be submitted electronically**. Authors should state in their cover letters that they are submitting in response to this call for papers on the 25th anniversary of the Flex Program and CAHs. **Guidelines on required format** may be found on the JRH website. The submission deadline is **Oct. 1**. Don't miss your chance to celebrate CAHs and learn from the best at **NRHA's 21st Critical Access Hospital Conference** **Sept. 21-23** in our hometown of Kansas City, Mo.

NRHA member to expand rural health care in West Virginia

Boone Memorial Health, an NRHA member, was already well known for pioneering efforts to treat black lung disease and substance abuse disorder. Now it will be setting up more satellite clinics and doing more community outreach for health care treatment, education, and prevention. Additionally, the Arkansas Rural Health Partnership, also an NRHA member, has partnered with University of Arkansas for Medical Sciences to **hire four community health workers**, who will help people in Chicot County navigate the health care system by answering basic health care questions and providing education and resources to the public.

New transparency law may change how patients shop for care

A new Colorado law prohibits hospitals that haven't posted their prices from suing patients over unpaid bills, but the bigger impact of the legislation may be indirect, as customers use those prices to decide where to get care. California hospitals were also recently reminded that they must provide written notice to patients in their native language of the **availability of "charity care" and how to apply**. Californians have the right to request payment assistance even if they have health insurance or are undocumented, and uninsured patients can demand a written estimate of the out-of-pocket cost they will be expected to pay.

Hospital-at-home study focuses on rural health deserts

Appalachian Regional Healthcare, based in Lexington, Ky., will use Biofourmis' virtual care and AI-based predictive analytics technology to support a new rural home hospital program delivering acute hospital-level care inside patients' homes, including a clinical trial studying this care model in rural areas. Appalachian Regional joins Blessing Health System as one of only two U.S. participants selected for the program, which will **equip patients with wearable biosensors**, blood-pressure cuffs, pulse oximeters, and weight scales to collect physiologic data from home.

Survey: Identifying gaps in care for rural epilepsy patients

You are invited to participate in research to better understand the gaps in knowledge and practice among the non-epilepsy specialist medical community who serve people with epilepsy. This survey is being distributed by researchers from the American Epilepsy Society and the Dartmouth-Hitchcock Medical Center in New Hampshire. Assessment results will be used to develop educational content for this community of providers. Survey responses will remain anonymous and confidential. The survey will take approximately 15

... to Illinois for abortions. Since Planned Parenthood opened its clinic in Fairview Heights in 2019, more than 10,000 Missouri residents have received abortion care at the clinic. By early 2021, the lone remaining clinic in Missouri, located in St. Louis, was providing fewer than 20 abortions per month because of restrictions like waiting periods and mandated pelvic examinations, according to the **Missouri Department of Health and Senior Services**. Coleman's effort did not get across the finish line before lawmakers adjourned in mid-May. Abortion rights advocates said the measure would violate the U.S. Constitution because states can't regulate activities outside their borders. Abortion to remain a top issue House Minority Leader Crystal Quade, D-Springfield, predicted Republicans who control the Missouri House and Senate with super- ...

... ," Leslie said. "Typically, during the trials, it was tolerated very well and there were really no reports of any major side effects or issues." The childhood vaccines were made available to the health department first, with plans for pharmacies, like CVS and Walgreens, to receive them eventually, Leslie said. The St. Joseph Health Department received the vaccine Wednesday, a day after the **Missouri Department of Health and Senior Services** adopted the Centers for Disease Control and Prevention's recommendations for its use in young children. As of Thursday, staff had not given any childhood doses yet but officials are anticipating interest. According to **Missouri DHSS**, "the Pfizer-BioNTech vaccine is authorized to be given to children ages 6 months-4 years in three doses, with a three-week interval between the ...

... as I'm sure you know, both Attorney General Eric Schmidt and Governor Mike Parson have issued opinions or signed proclamations making Missouri's trigger law go into effect, which bans pretty much every instance of abortion in the state, with the exception of, quote unquote, medical emergencies. What does this mean for Planned Parenthood facility in St. Louis? We have already sent a letter to the **Missouri Department of Health** notifying them that we are ceasing abortion operations at this health center. This is the end of the line for abortion care for the one point three million people of reproductive age in the state of Missouri. That trigger ban has forced us into stopping services.

... political spectrum. Sen. Jill Schupp, D-St. Louis County, introduced a bill that would expand the coverage. Her legislation was eventually combined into a bipartisan bill, sponsored by Sen. Elaine Gannon, a Republican from southeast Missouri. The bill, which would have used the federal framework, was stalled by gridlock in the deeply divided Senate. According to 2018 data recently released by the **Missouri Department of Health and Senior Services**, Black mothers in Missouri have maternal mortality rates four times those of white parents. In Missouri, according to the report, 63% of pregnancy-related deaths occur between 43 days to a year after childbirth. Most pregnancy-related deaths in Missouri are preventable, the report continues. In 2018, mental health conditions were considered the leading cause of pregnancy-related deaths in ... added. "I just think getting them in the door for 60 days just isn't going to cut it. We need more time." From 2012 to 2014 in Missouri, 6.4% of women were diagnosed with gestational

AMERICAN OVERSIGHT

diabetes, which is a factor in mortality rates. In the same period, 26% of pregnancy-related deaths in the state were due to cardiomyopathy, a heart disease, which is mostly diagnosed in the postpartum period. The **DHSS** report recommends that the state should extend Medicaid coverage to one year after childbirth for all conditions, including medical, mental health and substance use disorder. Although there seems to be a bipartisan consensus that the expansion is necessary for Missouri's mothers, it is no small cost to fund. The Senate bill's fiscal analysis had a $4.4 million estimate in state costs for the 2023 ... to treat the children long-term who were born to these moms that didn't receive the care that you needed early on," Alford said. "You'll just have a better prognosis if intervention is early on." According to the proposed legislation's fiscal analysis, 4,565 women who received Medicaid benefits during pregnancy would likely have qualified for the extended coverage Numbers from 2018 provided by **DHSS** found that 46,455 people who were enrolled in state-provided pregnancy coverage lost coverage after 60 days. Some of those parents moved to other assistance, but nearly 20,000 received no further coverage. What issues in Missouri complicate coverage? Other issues contribute to the disparity in maternal mortality rates, according to Sheldon Weisgrau, vice president of health policy at the Missouri ... Putting aside that Missouri is worse than the national average, both overall and for Black women, access to health care is not the only reason for the disparities between Black mothers and white mothers in maternal mortality," Weisgrau said. "But that said, access to health care is an important factor." Half of Missouri's Black mothers experienced "late entry into prenatal care," according to the **DHSS** report. Another issue for Missouri's mothers is parental leave. Missouri does not require employers to provide paid family leave, often forcing pregnant people to make the choice between a paycheck and postpartum recovery, according to the report. Thirty percent of white mothers received paid maternity leave, while 20% of Black mothers received paid maternity leave. Weisgrau concluded that ...

Black women living in Missouri are four times more likely to die within one year of pregnancy than white women. ST. LOUIS — Black women living in Missouri are four times more likely to die within one year of pregnancy than white women, according to the **Missouri Department of Health and Senior Services**. Last year, it published Missouri Pregnancy-Associated Mortality Review: 2018 Annual Report on behalf of the state's Pregnancy-Associated Mortality Review (PAMR) board. The report, which is a culmination of more than a year's work of the PAMR, is based on the most recent data available. With the landmark decision to overturn Roe v. Wade, many feel this disparity could get even worse. St. Louis ...

... ll see how this all shakes out. But I think that's where they'll be." Missouri collects abortion information Missouri already collects a significant amount of information about every abortion performed by a physician that could provide a starting point for Schmitt or other prosecutors. After each abortion, doctors must sign a Report of Induced Termination of Pregnancy that is sent to the Missouri **Department of Health and Senior**

AMERICAN OVERSIGHT

Services (**DHSS**). A blank report posted to the **DHSS** website doesn't include a space for the patient's name, but calls for a host of other information, including the patient's race, education level, and past pregnancy and abortion history. The form also includes space for the date of the patient's last normal menses and a clinical estimation of the gestational age. If the ... homicide or manslaughter," Peters Baker said. Michael Mansur, a spokesman for Peters Baker, told The Star that a lot remains unknown about how abortion could potentially be prosecuted. "There's so much more for us to figure out," Mansur said, adding that the language in the law raises "big questions" about whether women are actually shielded. During a legal fight with Planned Parenthood in 2019, **DHSS** revealed it was able to find patients with complicated abortions by creating a spreadsheet that included the fetus' gestational age and the last normal date of Planned Parenthood patient's periods. Schmitt spokesman Chris Nuelle didn't answer a specific question about whether the Missouri Attorney General's Office currently has access to Induced Termination of Pregnancy reports and, if so, ... whether the office would review the reports going forward. "We will dedicate the resources necessary to enforce Missouri's abortion laws," Nuelle said in a statement. "We have worked cooperatively with **DHSS** to enforce abortion laws in the past, and expect that cooperation to continue. We will review and consider whatever referrals are made by **DHSS** to our office." **DHSS** spokeswoman **Lisa Cox** didn't respond to questions about under what circumstances information on the forms is shared with law enforcement and prosecutors. On its website, **DHSS** says the information on the form is "confidential and is only used for statistical purposes." The website doesn't address whether the reports could be ...

From: Stephanie Rhodes
Subject: Equitable and Accessible Contraception Access Highlighted in Special Issue of AJPH sponsored by ASTHO
Date: Tuesday, July 12, 2022 11:33:19 AM

Hello all,

Please find ASTHO's latest press release on a special AJPH issue focused on contraceptive access here: https://www.astho.org/communications/newsroom/2022/equitable-accessible-contraception-access-highlighted-special-issue-ajph-sponsored-by-astho/

Best,

Stephanie

##

For Immediate Release

Equitable and Accessible Contraception Access Highlighted in Special Issue of AJPH sponsored by ASTHO

The Association of State and Territorial Health Officials (ASTHO) is pleased to announce the publication of a timely special issue in the American Journal of Public Health (AJPH) on efforts to expand contraceptive access, particularly statewide initiatives. The issue is available here.

This AJPH special issue, sponsored by ASTHO in collaboration with the Coalition to Expand Contraceptive Access, puts into context the unique role statewide contraceptive access initiatives play in addressing barriers to access, and highlights innovations, lessons learned, and future directions. Leaders from several statewide initiatives – including Colorado, Delaware, Illinois, New Mexico, Massachusetts, South Carolina, and Utah – contributed articles to the issue describing the conceptualization, implementation, and evaluation of these contraceptive access projects.

"With the national dialogue on contraception access becoming extremely polarized, this special edition is timely," said Michael Fraser, Ph.D., ASTHO CEO. "ASTHO supports programs and policies that take an evidenced based approach to assuring contraception access at the state level to help individuals and families make informed decisions about family planning and live healthy lives throughout the lifespan."

ASTHO's efforts to engage statewide contraceptive access initiatives began in 2014 when the association convened a learning community to assist state health agencies in implementing

AMERICAN OVERSIGHT

Long Acting Reversible Contraception in the postpartum care delivery setting. ASTHO later broadened the scope of this effort and convened 27 states and territories to participate in the Increasing Access to Contraception Learning Community from 2016-2018, with funding and support from the Centers for Disease Control and Prevention, the Office of Population Affairs, and the Centers for Medicare and Medicaid Services. Several of the statewide initiatives that participated in ASTHO's Learning Community contributed articles to the AJPH special issue.

"Statewide contraceptive access initiatives offer new and innovative efforts to expand access to contraception, advance person-centered care, and improve health outcomes," said Ellen Pliska, ASTHO senior director of family and child health. "This special issue also offers broader intervention highlights, including considerations for wide-ranging policy implications for contraceptive access and how we get people the care they want where and how they want it. Our hope is that this issue will encourage decision-makers to explore strategies for fostering and supporting equitable and accessible contraceptive access policy and initiatives."

Learn more from ASTHO's Reproductive Health Services Policy Statement.

###

ASTHO is the national nonprofit organization representing the public health agencies of the United States, the U.S. territories and Freely Associated States, and Washington, D.C., as well as the more than 100,000 public health professionals these agencies employ. ASTHO members, the chief health officials of these jurisdictions, are dedicated to formulating and influencing sound public health policy and to ensuring excellence in public health practice.

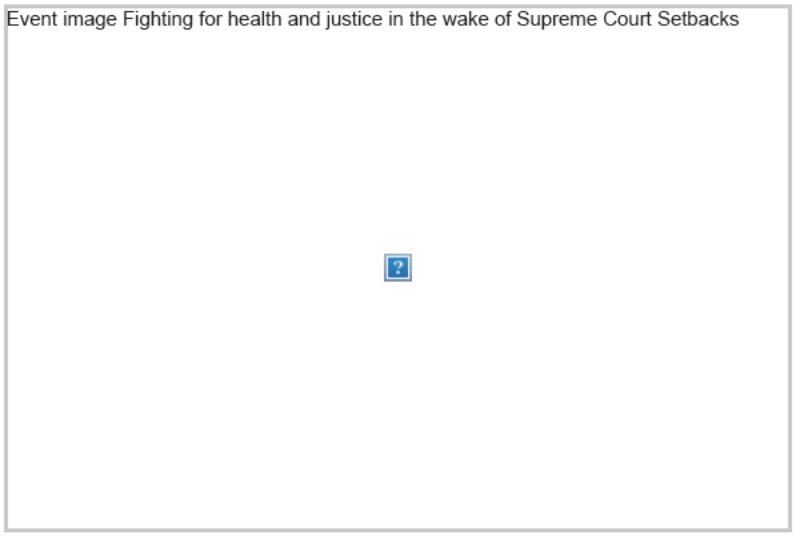
Fighting for health and justice in the wake of Supreme Court setbacks

Friday, September 16, 2022, 1-2pm ET

A Dr. Lawrence H. and Roberta Cohn Forum

Register for free to submit your questions.



Recent and anticipated Supreme Court rulings on abortion access, gun control, voting rights, environmental protection, and affirmative action are reshaping U.S. politics and policies. With midterms approaching, we've assembled leading voices in these fields to talk through the court's impact on public health and social justice. Our panelists will also explore the power of civic action — and lay out practical steps to stand up for health and justice in the face of painful setbacks.

From: Stephanie Rhodes
Subject: Equitable and Accessible Contraception Access Highlighted in Special Issue of AJPH sponsored by ASTHO
Date: Tuesday, July 12, 2022 11:33:19 AM

Hello all,

Please find ASTHO's latest press release on a special AJPH issue focused on contraceptive access here: https://www.astho.org/communications/newsroom/2022/equitable-accessible-contraception-access-highlighted-special-issue-ajph-sponsored-by-astho/

Best,

Stephanie

##

For Immediate Release

Equitable and Accessible Contraception Access Highlighted in Special Issue of AJPH sponsored by ASTHO

The Association of State and Territorial Health Officials (ASTHO) is pleased to announce the publication of a timely special issue in the American Journal of Public Health (AJPH) on efforts to expand contraceptive access, particularly statewide initiatives. The issue is available here.

This AJPH special issue, sponsored by ASTHO in collaboration with the Coalition to Expand Contraceptive Access, puts into context the unique role statewide contraceptive access initiatives play in addressing barriers to access, and highlights innovations, lessons learned, and future directions. Leaders from several statewide initiatives – including Colorado, Delaware, Illinois, New Mexico, Massachusetts, South Carolina, and Utah – contributed articles to the issue describing the conceptualization, implementation, and evaluation of these contraceptive access projects.

"With the national dialogue on contraception access becoming extremely polarized, this special edition is timely," said Michael Fraser, Ph.D., ASTHO CEO. "ASTHO supports programs and policies that take an evidenced based approach to assuring contraception access at the state level to help individuals and families make informed decisions about family planning and live healthy lives throughout the lifespan."

ASTHO's efforts to engage statewide contraceptive access initiatives began in 2014 when the association convened a learning community to assist state health agencies in implementing

AMERICAN OVERSIGHT

Long Acting Reversible Contraception in the postpartum care delivery setting. ASTHO later broadened the scope of this effort and convened 27 states and territories to participate in the Increasing Access to Contraception Learning Community from 2016-2018, with funding and support from the Centers for Disease Control and Prevention, the Office of Population Affairs, and the Centers for Medicare and Medicaid Services. Several of the statewide initiatives that participated in ASTHO's Learning Community contributed articles to the AJPH special issue.

"Statewide contraceptive access initiatives offer new and innovative efforts to expand access to contraception, advance person-centered care, and improve health outcomes," said Ellen Pliska, ASTHO senior director of family and child health. "This special issue also offers broader intervention highlights, including considerations for wide-ranging policy implications for contraceptive access and how we get people the care they want where and how they want it. Our hope is that this issue will encourage decision-makers to explore strategies for fostering and supporting equitable and accessible contraceptive access policy and initiatives."

Learn more from ASTHO's Reproductive Health Services Policy Statement.

###

ASTHO is the national nonprofit organization representing the public health agencies of the United States, the U.S. territories and Freely Associated States, and Washington, D.C., as well as the more than 100,000 public health professionals these agencies employ. ASTHO members, the chief health officials of these jurisdictions, are dedicated to formulating and influencing sound public health policy and to ensuring excellence in public health practice.

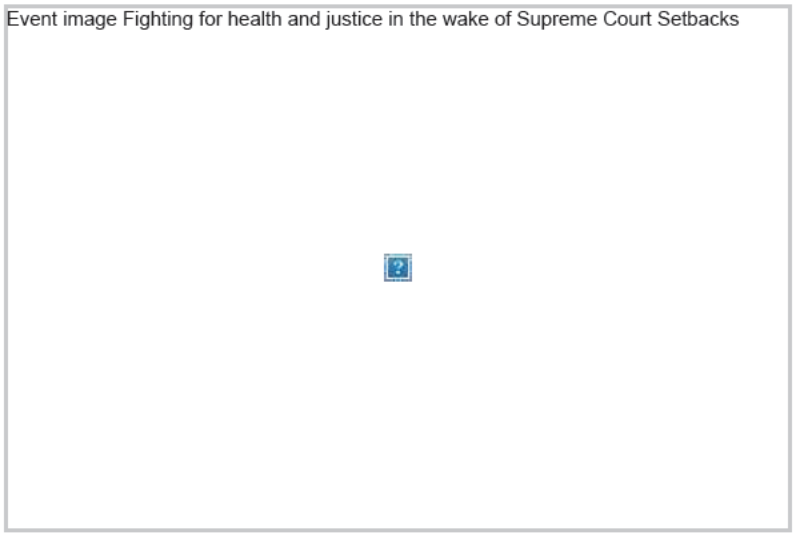
Fighting for health and justice in the wake of Supreme Court setbacks

Friday, September 16, 2022, 1-2pm ET

A Dr. Lawrence H. and Roberta Cohn Forum

Register for free to submit your questions.



Recent and anticipated Supreme Court rulings on abortion access, gun control, voting rights, environmental protection, and affirmative action are reshaping U.S. politics and policies. With midterms approaching, we've assembled leading voices in these fields to talk through the court's impact on public health and social justice. Our panelists will also explore the power of civic action — and lay out practical steps to stand up for health and justice in the face of painful setbacks.

AMERICAN OVERSIGHT

WOMEN'S HEALTH COUNCIL POLICY PRIORITIES--2022

The health of women and girls equals the health of the state as a whole.

The Missouri Women's Health Council (Council) is an advisory board comprised of thought leaders with expertise in women's health and the broad range of factors that affect health outcomes and wellbeing. Council members are appointed by the Director of the Department of Health and Senior Services (DHSS) and reflect the geographic diversity of our state. The recommendations of this Council are also shared with the Department of Social Services (DSS).

The Council is charged with informing and advising DHSS regarding women's health risks, needs and concerns, and recommending potential strategies, programs, and regulatory or legislative changes to improve the health and well-being of all women in Missouri. Women serve as leaders throughout our state in their families, communities, educational institutions, places of worship, businesses, and the public sector. The Council consists of women from a variety of professions, including health care providers, researchers, healthcare administrators, social workers and multiple CEOs and Executive Directors of critical social services foundations serving women throughout Missouri. As we celebrate the Council's five year mark we said goodbye to some original appointees as they concluded their service to the Council. Three new appointees joined the Council in February 2022. We thank our outgoing colleagues for sharing their time and wisdom with us and welcome our new members.

During this Council's past year, members provided information and input to the Departments on the following:

- Informed the Departments on the effects and hopes for women and girls related to Medicaid Expansion. When this Constitutional amendment was approved by the electorate in August 2020 and upheld by the courts in 2021, the Council offered advice, support, and strategic questions to the Department of Social Services and the Department of Health.

AMERICAN OVERSIGHT

- Informed the Department on issues related to COVID's impact specifically for low-income pregnant women, women of color, women in corrections, and women working in and residing in long-term care facilities.

The Council commends the Departments and the Legislature for the following:

- Enactment of a statewide Prescription Drug Monitoring Program as one tool to address opioid related challenges and as a mechanism for statewide data analysis on trends in prescribing stimulants and opioid containing medications.

- The Department of Mental Health was awarded more than $25 million for the State Opioid Response Grant to address opioid use disorder prevention, treatment, and recovery services. The grant built on best practices by increasing medication first approaches, telehealth services, stimulant use disorder and peer specialists.

- DSS's approach to the on-line Medicaid application with a client centered design strategy and improving client communications for better readability and clear direction about clients' next steps and responsibilities.

- Support of robust ECHO educational programs for providers caring for patients with chronic pain syndromes, opioid use disorders, high-risk childbirth, eating disorders, and neonatal abstinence syndrome.

- Private payors and Medicaid are providing payment for mental and behavioral telehealth visits the same as in person visits. With the eventual end of the Public Health Emergency (PHE) order, some of the telehealth rules will revert. Access has been increased with the PHE to allow home as the originating site of mental health care relationships.

- DSS has auto-enrolled some of the women from the Extended Women's Health Services Program into expanded Medicaid.

- Requirement of participating Managed Care companies to disaggregate adult and child data by gender, age group, race, ethnicity, and region (rural/urban).

- DSS has allowed for more than mother and child passengers during Non-Emergency Medical Transport (NEMT) to provider appointments. This change means that fathers and other children can attend, reducing barriers to appointment attendance.

- The Council again thanks DHSS for the PAMR report (Pregnancy Associated Mortality Report) which remains an excellent source of the state statistics.

Policy Priorities

The following policy priorities reflect the shared vision of the Council. The Council urges all Missourians to come together to find common ground to improve women's health which in turn strengthens prosperity across our state as a whole. The Council recommends that DHSS identify its role in helping to prioritize these identified issues. Whether DHSS is working with partner organizations and across cabinet departments to implement priorities, to building internal capacity, DHSS has a role in each priority.

Improve access to healthcare for women in rural, suburban, and urban Missouri

Implementation of expanded Medicaid eligibility

Expanding Medicaid coverage to cover more Missouri women will be the single most important policy change to improve women's health. After the August 2020 passage of a constitutional amendment to address Medicaid expansion, the state now faces the prospect of full implementation and outreach.

The Council strongly supports the ongoing improvement work at MO HealthNet, especially as it relates to customer service, client support, and usability for people living on low incomes in the state. The initial enrollment numbers have been disappointing with less than 20% of potentially eligible applicants approved as of December 2021. For several years, in-person and call center support has been very challenging and frustrating for clients. This makes in-person assistance and community outreach even more critical as new applicants enter the system. States like

AMERICAN OVERSIGHT

Oklahoma and Louisiana provide lessons in using existing systems (TANF, SNAP, housing subsidies etc.) to target/auto-enroll newly eligible citizens.

- **DHSS should partner with DSS to expand outreach and aide in implementation.**

Maternal Mortality

Maternal mortality remains a pressing concern. The Council applauds ongoing efforts through the Missouri Department of Health Pregnancy Associated Mortality Review (PAMR) Board, and the Missouri Hospital Association (MHA) led Missouri Maternal Child Learning Action Network MC LAN) to examine and attempt to mitigate leading causes of maternal deaths. The MC LAN provides a vehicle to implement PAMR recommendations, Missouri's AIM initiative and other quality improvement and patient safety practices to address the leading contributors to maternal deaths and severe maternal morbidity in the state. The WHC supports the important work of the MC LAN and recognizes the importance of ongoing funding to sustain and grow the LAN's efforts to become a full Perinatal Quality Collaborative.

The 2021 PAMR report indicates that a majority (63%) of maternal deaths in the state occur after 43 days postpartum. The rate of pregnancy-associated deaths for women on Medicaid was more than **4 times greater** than the rate for those with private insurance. Traditional Medicaid coverage ends for a woman 60 days after the birth of a child leaving many women without coverage during the time the majority of preventable maternal deaths occur. Although expansion covers women below living 138% of FPL. Women with incomes from 138% to 185% FPL continue to have pregnancy and postpartum needs. The efforts in the legislature to address the first year of post-partum care through a Medicaid waiver for roughly 7,000 women who would not otherwise have coverage during this vulnerable first year after giving birth are especially encouraging. The aggregate impact of expanded postpartum coverage would maximize the positive effects on the overall health of Missouri families and communities.

On December 7, 2021, HHS announced efforts to help expand nationwide access and coverage for high-quality maternal health services and encouraged states to take advantage of the American Rescue Plan's (ARP's) option to provide 12 months postpartum coverage to people with Medicaid and CHIP. A report released by HHS's Office of the Assistant Secretary for Planning and Evaluation (ASPE) showed if every state extended Medicaid postpartum

coverage to 12 months the number of Americans getting coverage for a full year postpartum would roughly double, extending coverage for an estimated 720,000 in a given year.

Expanding MO HealthNet Services for Pregnant and Postpartum Women would also support statewide efforts to significantly decrease maternal mortality and severe morbidity and mitigate the potential associated impacts on children, families, households, communities, and society. Maternal mortality rates in Missouri are double the national average, with Missouri ranking 44th nationwide, and Black maternal mortality rates are near four times those of white maternal mortality rates.

- **DHSS should support efforts to expand Medicaid coverage for women to one year postpartum to reduce maternal mortality and improve health outcomes.**

Health Care workers

Women make up more than 70% of the health care workforce. In turn, the healthcare workforce has a multiplier effect in keeping the rest of the workforce healthy and productive. The pandemic has taken an extraordinary toll on health care workers at all levels. The state offers critical signals about the value of that work through its support for the salary and working conditions especially in the lowest paid levels of care such as nursing home care.

- **DHSS should continue to strengthen and support the health care workforce and help make it a high priority for the state, as we anticipate a positive and sustained return on investment.**

Professional licensing forms ask questions about current impairment due to mental health issues and requires the disclosure of the dates, names, addresses of facilities of treatment as well as a letter describing diagnosis and prognosis. The literature reflects that licensure questions prevent health care professionals from seeking mental health services.

- **DHSS should partner with the Board of Healing Arts and all professional licensing boards to evaluate the language and intent of the application questions.**

Support the Shared Health of Women and Families

COVID

The availability of vaccines to prevent COVID was a welcome development, but the state now must prepare to transition to an endemic approach. Increasing the rate of vaccination in Missouri has been challenging, with only 56% of the population having 2 doses of vaccine. State COVID infection data has not been easy to understand as it relates to race, gender, and geography.

A 2022 JAMA paper (*JAMA*. 2022;327(8):748-759.) showed that pregnant patients with at least moderate coronavirus symptoms were at elevated risk of delivering preterm, requiring a Cesarean section, experiencing postpartum hemorrhage and suffering a miscarriage. These findings further highlight the necessity of vaccination for pregnant individuals and women looking to become pregnant. In addition, there is good evidence that the antibodies transmit to the infant providing protection for the child.

- **We encourage DHSS to provide clear ongoing outreach to women about the safety of COVID vaccines before and during pregnancy.**

Education disruptions, child care disruptions, and family illness have come as a great burden for women. Women are powerful economic engines within the state, and it is imperative that we support women to participate in the workforce in ways that work best for them.

- **In order to ensure a successful long term COVID management campaign, DHSS should implement strategies to reach underserved populations specifically Black communities and other communities of color, upgrade data tracking and analysis, and work with public health professionals to reach those at the greatest risk of disability and death.**

Public Health Investment

AMERICAN OVERSIGHT

There can be no greater spotlight on public health than we have seen in the last 2 years. State financial support for state and local public health agencies has decreased over the past 20 years. Funding changes have impacted the local public health department's' ability to provide testing, surveillance, report data, administer vaccines, and educate local populations about infectious disease. This will not be the last challenge to the health of the public.

We encourage state leadership to strengthen collaboration with local public health leadership especially for new and evolving models of public health. The Women's Health Council deeply appreciates those who serve in public health especially those who have been on the front lines of leadership during COVID. Attention to local/state organizational structures, stable funding, shared resources, recruitment of talented public health officials and support of their public health efforts will be crucial. While it is likely that municipalities and local jurisdictions will examine their own effectiveness during the COVID crisis, it is imperative that the state does not curtail the critical jurisdictional powers to keep localities safe during future communicable disease outbreaks.

- **DHSS should convene with local public health agencies to review and reflect on how communication, direction setting, and support affected their efforts during COVID. Doing so will lead to stronger partnerships for future public health events.**

At serious risk is the progress made in the last 100 years through universal childhood immunizations. Missouri is in the *lowest quartile for childhood immunizations* with only 58.7% of children on Medicaid up to date on immunizations (State Health Report Card https://www.medicaid.gov/state-overviews/stateprofile.html?state=missouri). Relaxing requirements for school aged childhood vaccines will even worsen these numbers. As we think ahead to the future of our state and its economic prosperity, healthy children become healthy and productive adults.

- **DHSS should expand promotion, access to, and education regarding childhood vaccinations to increase the number of children up to date on immunizations.**

Support outreach and treatment options for opioid misuse and addiction

Opioid misuse and addiction are having compounding effects on women, families, and communities. State data shows that 1 of every 56 deaths in the state were due to opioid

overdose in 2018. While Missouri saw a small decrease in deaths in 2019, 2020 showed a 30% increase. The one year grant mentioned above related to opioid use prevention and treatment is a good first step but encourages the Department of Mental Health to follow through with a long term funding strategy. Council Members remain concerned with the sheer number of infants born with neonatal abstinence syndrome.

The Council supports and encourages DHSS to partner with appropriate organizations to implement the following interventions:

- **Long term funding plan for substance use disorder prevention and treatment**
- **Encourage providers to become MAT waivered to be able to prescribe treatment**
- **Implementation of a Medication Assisted Therapy payment bundle**
- **Promotion of shared learning across the state among centers such as the WISH (Women and Infant Substance Help) program in St. Louis to enhance best outcomes for women and infants.**
- **Educational awareness campaign for women of childbearing age regarding neonatal abstinence syndrome with opioids, heroin, methadone, buprenorphine (Suboxone and Subutex).**

Invest in State IT and Collect Data by Race

Several state agencies collect data related to women's health. (For instance, MO HealthNet data is overseen by DSS and state vital records are collected by DHSS). There are multiple opportunities to increase data analysis and sharing among state agencies. With appropriate privacy protections, cross agency collaboration could help us better understand how to improve services and health of Missouri women. The next great challenge is to spend the resources to analyze data and apply lessons learned.

Improve continuity of care and address remaining gaps

While Medicaid expansion addresses the needs of more than 100,000 Missouri women and girls, the Council remains attentive to health needs that will not be addressed including the health needs of low-income women between 138-185% FPL who are not eligible for benefits through Medicaid expansion and cannot access coverage through the Exchange.

AMERICAN OVERSIGHT

Post-Partum opioid treatment

In 2019, the State asked CMS to allow Medicaid coverage for women (up to 185% FPL) in treatment for substance use disorders for up to one year after a birth. It has still not been approved for implementation. This policy will provide women the opportunity to continue their recovery while caring for their newborn and family. Missouri is still awaiting full roll out of this program.

- **The Council encourages Department of Social Services (DSS) to follow up with a robust evaluation of this policy once implemented.**

Reduce the rate of unnecessary churning of Medicaid enrollees

Medicaid churning involves a pattern of short-term enrollment, dis-enrollment, and re-enrollment that often occurs year after year. This process is confusing, time-consuming, and expensive for the state and the health care system, and creates instability for Missourians who rely on Medicaid. During the pandemic, Missouri was allowed to provide qualified beneficiaries with 12 months of continuous coverage through Medicaid and the Children's Health Insurance Program (CHIP), even if the family experiences fluctuating income during the year.

- **The Council strongly encourages the state to formalize continuous eligibility as on-going policy.**

Maintain Access to Contraceptive Services

There are a myriad of health benefits to having planned pregnancies. Access to reliable, affordable, and available contraception is key. Barriers to services, such as not maintain long acting reversible contraceptive in stock, reduce the number of women who can benefit from desired pregnancy prevention, healthy interbirth spacing, and wellness services to support interpregnancy health. Some of these services are covered through Managed Care Organizations (MCOs) and some through the state Extended Women's Health Program. Pressure on current providers will impact the ease of access to available services.

- **The Council encourages DHSS and DSS to examine policies and training related to precertification for and access to Long Acting Reversible Contraceptive and removal with the goal of same day services.**

There is a substantial population of women who are covered by both Medicare and Medicaid (dual eligible). Women of reproductive age who are disabled may be at especially high risk for complications due to unplanned pregnancies. The interplay between the payment sources can cause complexity in determining which agency provides the payment. This has led to delays and outright failure in providing services to high-risk women.

We appreciate current efforts by Benefit Program Staff to work through individual cases as they arise and are referred. However, this "one off" solution does not create a systematic approach for identifying and approving certain preventive vaccines (such as Tdap) and postpartum contraception for dual eligible pregnant and postpartum clients. From both a quality and workload point of view, we encourage DSS to streamline and systematize these processes.

- **The Council requests examination of payment policies by DSS to provide clarity to providers and their patients and the policies related to participating providers that can enhance access to reproductive health services.**

The Extended Women's Health Services Program provides well woman care and family planning services to low-income Missouri women ages 18-56 in households up to 201% FPL. This helps fulfill the objectives of prevention of unintended pregnancy, providing access to some women's preventive health services, and allowing for adequate interbirth spacing for the well-being of the mother and the child. Because this program is entirely state funded and administered outside of the Medicaid program, the state has considerable flexibility in its operation.

- **DHSS should partner with DSS to ensure that if ineligible for full Medicaid, post-partum women should be auto-enrolled into Women's Health Services Program when their pregnancy-related Medicaid coverage expires, with both patients and providers appropriately notified. Additionally, all MO HealthNet applicants who do not qualify for other programs should be automatically screened and enrolled in WHSP when eligible, regardless if the applicant checks the box for family planning services in the application. The state should also remove the restriction on sterilized women, which would eliminate the need for applicants to check a box for family planning services in the application. Therefore, *all* women between**

the ages of 18-55 who have a family income at or below 201% FPL, and who are not otherwise eligible for other MO Health Net programs, should be screened for eligibility.

- **Finally, we recommend simplifying the notification letter to clarify an applicant's eligibility and coverage of services, which will save the applicant time and confusion, and alleviate administrative burdens for the state.**

State funding of contraceptive providers has restricted the number of eligible providers of contraceptive services, which also curtails access to key preventive health services, such as cervical cancer screening. Rural communities are especially affected by loss of accessible providers. According to the State Report Card, Missouri is in the lowest quartile for Chlamydia screening of 16-24 year olds and the lowest quartile for breast and cervical cancer screening. The loss of service providers is likely part of this decline.

- **DHSS should share the recommendation with appropriate cabinet leadership that the Council encourages the state to reconsider its restrictions on provider choice for easily accessible contraceptive and women's preventive health services. The Council encourages the state to consider incentives for providing services in rural areas.**

Include rehabilitative therapy in Medicaid coverage

Since 2005, physical therapy coverage has been limited for Medicaid recipients, and these restrictions increase the risk of developing chronic pain syndromes. Under MO HealthNet, physical therapy is available only to adults who are blind, pregnant, or in nursing homes. Musculoskeletal disorders are common causes of disability in women, especially as women age.

Rehabilitative services are critical to maximizing function, limiting pain, preventing opioid use and misuse, delaying or avoiding surgery, ensuring full recovery after injury or surgery and maintaining the capacity for people remain independent and return to work. The CDC has made formal recommendation for use of physical therapy to avoid the need for long-term opioid prescriptions. CDC Guideline for Prescribing Opioids for Chronic Pain — United States, 2016. https://www.cdc.gov/mmwr/volumes/65/rr/rr6501e1.htm

- **DHSS should encourage reinstating rehabilitative services as a cost effective and sensible components of comprehensive care and maintaining patient function.**

Ensure safety for Missouri women and their families

Domestic violence

The State Supreme Court will soon hear a case on the constitutionality of the Second Amendment Preservation Act passed in Missouri in 2021. Federal law has had domestic violence gun laws in place since the mid-1990s. This includes those convicted of domestic violence assaults and those with court issued protection orders for domestic violence, child abuse, stalking, and/or sexual assault. Missouri does not have state laws on domestic violence and firearm restriction; therefore, only federal officials can respond to restrict gun possession by those who continue to use violence against their family members. Currently, the Second Amendment Preservation Act prohibits local and state law enforce from working with or implementing federal firearm laws within the state, creating an enabling environment for abusers with guns and putting women at risk for injury and death.

This situation is urgent because Missouri now ranks 13th in the nation for the number of women killed by men—with the majority of those homicides committed with firearms. Passing Missouri firearms laws to protect domestic violence victims is homicide prevention.

- **DHSS should work with the Missouri Highway Patrol to gather data on how policies, including Missouri's Stand Your Ground policies and Second Amendment Preservation Act, have impacted domestic violence homicide.**

Support efforts to promote healthy living

Avoid work requirements in the Supplemental Nutrition Assistance Program (SNAP)

The Missouri General Assembly has considered several bills to add work requirements to the SNAP program. The Women's Health Council strongly believes that reducing the amount of food going into low-income homes could have very serious consequences for the health and welfare of women and children in Missouri. In addition, the current economic crisis has

AMERICAN OVERSIGHT

exacerbated food insecurity and has also had a differential impact on women's employment that will potentially be long-lasting. These circumstances underscore the importance of support focused strategies that help woman obtain employment including increasing access to affordable childcare and improved functionality and scope of job training programs.

Support efforts to address obesity

The Council appreciates the efforts of the DSS to expand Medicaid codes for treatment of adult and childhood obesity. The state should continue to encourage an integrated effort that takes into account the social and structural determinates of health. In addition, the Council encourages support of appropriate breast feeding policies and nutritional counseling when appropriate. Food Insecurity has a substantial impact on the development of both obesity and eating disorders. The Council encourages the state to maintain robust access to WIC and SNAP programs for families. Mothers have indicated that EBT (Electronic Benefits Transfer) cards have been very helpful and the Council looks forward to reports of progress for the WIC program.

Financial stability for families

Inflation carries an especially heavy burden for women headed households. Their net-worth, emergency funds and day to day budgets are often tenuous. The Governor's proposed budget includes increased pay for state employees with women representing more than half of the state workforce. Rising inflation may also have a negative impact on retirement savings and Missouri's 529 plan for those who will need to access these funds in the nearer term. We encourage the state to be forward thinking about strategies to keep salaries and these savings vehicles whole.

Conclusion

It has been a difficult two years since the start of the pandemic. State employees have stepped up to address unimagined challenges. We commend them for their dedication and service and look forward to great things in the coming year.

The St. Louis County Library has been named Missouri Library of

AMERICAN OVERSIGHT

the Year for the ways it **served the community during the pandemic** through coronavirus testing, COVID-19 vaccines and providing older adults with tablets to connect with relatives and friends.

What ways have you used the library since the pandemic? Let us know by **replying to this email**.

Quoted

"It's just good teaching. We did an economics lesson in class about choices and how we make decisions, and it was about trying all sorts of different pretzels."

— **Mathew Parker, a seventh grade social studies teacher | Fed program attempts to diversify economics field by going into classrooms**

The Gateway Newsletter is sponsored by:

2022 St. Louis Renaissance Festival, Weekends Sept. 17 through October 23

Make plans for 50 Fest this Saturday!

Enjoy live music, foods trucks, meet & greets with staff and on-air personalities, craft beer and festival fun to celebrate STLPR!

... I want to make sure we provide the services for the state of Missouri, for the people of this state." The $183 million project -- funded through state appropriations of federal American Rescue Plan Act dollars -- includes the construction of the new multi-story lab, expansion of the existing State Health Lab and a parking lot to serve both facilities. "To say we are excited is an understatement," **DHSS** Deputy Director Laura Naught said. "This started as a dream a little over a year ago at the height of the COVID-19 pandemic right in this very building when we were working across agencies to figure out how to meet Missouri's current and future laboratory needs." Naught said the investment is transformative to the state's laboratory infrastructure. Cooperation among agencies will deliver ... comprehensive and rapid lab services, Naught said. Specifically for **DHSS**, she said the development will enhance training for hospital lab workers, expand life-saving newborn testing, improve public health environmental testing and add next generation molecular testing. "This innovative effort will be the first of its kind to address today's evolving world and prepare us for the emerging diseases and contaminant threats," Naught said. MDC Deputy Director Aaron Jeffries ... deliver livestock samples here to be tested," Chinn said. "Those same accredited veterinarians can also pick up supplies and forms necessary to continue their operations." Agricultural researchers conduct diagnostic, surveillance and pre-movement testing for several species out of the existing State Health Lab. Once the new facility is complete, the Animal Health Lab will be moved there, giving **DHSS** expanded space in the State Health Lab. Parson said the lab investment is long overdue and it will improve Missouri's services to residents and make the campus a better place to work for employees. "I've said all along I want to invest in the future of this state," Parson said. "It's not about a one year and be done. It's about what are we going to do to make it better." Sandy Karsten, director ...

... monkeypox blisters on the face, hands, chest, genitals, anus or inside the mouth. The virus is transmitted through close, often skin-to-skin contact with an infected person. When the Springfield-Greene County Health Department has a suspected case, administrator of Community Health and Epidemiology Kendra Findlay said public health officials interview the patient and then contact the **Missouri Department of Health and Senior Services** to start testing. "We take samples and send those off to (the) Missouri State Public Health Lab to look for orthopox—the virus that causes monkeypox," said Findlay. "At the state public health lab, they'll run that monkeypox test. If it's positive, they'll send it off to the CDC (Centers for Disease Control and Prevention) for confirmatory monkeypox testing." She said the Greene County case is a ... . Because the only circulating orthopox right now is monkeypox, said Findlay, "we have to assume that what our case has is monkeypox." The health department asks those with symptoms or anyone with close contact with someone who's tested positive to schedule a virtual meeting with their doctor to avoid further exposures. This monkeypox case is the third confirmed in Missouri, according to the **Missouri Department of Health and Senior Services**.

A Greene County resident has tested positive for monkeypox, according to the Springfield-Greene County Health Department, and epidemiologists have contacted those who have been exposed. The **Missouri Department of Health and Senior Services** has reported three cases in Missouri. Monkeypox, which is not related to chickenpox, is a virus in the same family as smallpox and cowpox. Monkeypox most commonly spreads through prolonged, close skin-to-skin contact. The risk of infection to the general public is low, according to the health department. Symptoms include a blistering rash on the face, hands, chest, genitals, anus or inside the ...

SPRINGFIELD, Mo. (KY3) - Springfield-Greene County Health reports a Greene County resident has tested positive for monkeypox. This is the first probable case of monkeypox in Greene County. Epidemiologists have contacted those who may have been exposed to the virus. The **Missouri Department of Health and Senior Services** has reported three cases of the virus across the state. Monkeypox most commonly spreads through prolonged and close, often skin-to-skin, contact. But while the risk of infection to the general public is low, people should still monitor for symptoms to avoid spreading the virus to others. Symptoms of monkeypox include: - A blistering rash on the face, hands, chest, genitals, anus or inside the ...

... whether the state planned to issue further clarification on the law's definition of "medical emergency" pregnancies, Gov. Mike Parson said, "I'm sure the health department will come out with some clarifications or guides on that." He reiterated that emergency contraception, or Plan B, is still legal under the law and that there was "a lot of misinformation out there." A spokesperson for the **Missouri Department of Health and Senior Services** did not immediately respond to an inquiry on whether it was developing clarifications or guidelines on the definition. Doctors and health care workers have already expressed concern to Sen. Lauren Arthur, a Democrat, especially in considering how to handle ectopic pregnancies. In ectopic pregnancies, a fertilized egg implants in a place other than the uterus. These pregnancies are not able to be ...

... monkeypox blisters on the face, hands, chest, genitals, anus or inside the mouth. The virus is transmitted through close, often skin-to-skin contact with an infected person. When the Springfield-Greene County Health Department has a suspected case, administrator of Community Health and Epidemiology Kendra Findlay said public health officials interview the patient and then contact the **Missouri Department of Health and Senior Services** to start testing. "We take samples and send those off to (the) Missouri State Public Health Lab to look for orthopox—the virus that causes monkeypox," said Findlay. "At the state public health lab, they'll run that monkeypox test. If it's positive, they'll send it off to the CDC (Centers for Disease Control and Prevention) for confirmatory monkeypox testing." She said the Greene County case is a ... . Because the only circulating orthopox right now is monkeypox, said Findlay, "we have to assume that what our case has is monkeypox." The health department asks those with symptoms or anyone with close contact with someone who's tested positive to schedule a virtual meeting with their doctor to avoid further exposures. This monkeypox case is the third confirmed in Missouri, according to the **Missouri Department of Health and Senior Services**.

A Greene County resident has tested positive for monkeypox, according to the Springfield-Greene County Health Department, and epidemiologists have contacted those who have been exposed. The **Missouri Department of Health and Senior Services** has reported three cases in Missouri. Monkeypox, which is not related to chickenpox, is a virus in the same family as smallpox and cowpox. Monkeypox most commonly spreads through prolonged, close skin-to-skin contact. The risk of infection to the general public is low, according to the health department. Symptoms include a blistering rash on the face, hands, chest, genitals, anus or inside the ...

Since 1962, only 154 known cases of Naegleria fowleri have been identified in the United States.(**DHSS**) MISSOURI (KFVS) - The **Missouri Department of Health and Senior Services** (**DHSS**) has reported a confirmed case of a rare brain disease that hasn't been identified among a Missouri resident in 35 years. According to a release, **DHSS** was notified of a Missouri resident with a laboratory-confirmed infection of Naegleria fowleri. **DHSS** says Naegleria fowleri is a microscopic single-celled free-living ameba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis (PAM). The patient is currently being treated for PAM in an intensive care unit of a hospital. Health experts ... say this ameba is commonly found in warm freshwater such as lakes, rivers and ponds; however, PAM is extremely rare. According to **DHSS**, only 154 known cases have been identified in the United States since 1962. The only other case identified among a Missouri resident occurred in 1987, and there currently aren't any additional suspected cases of it being investigated in the state. The source of the patient's exposure is currently being investigated by public health officials. Local and out-of-state activity are being considered. ... Although a rare occurrence, **DHSS** says infection from Naegleria fowleri comes when water containing the ameba enters the body through the nose from freshwater sources. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the ...

JEFFERSON CITY - A confirmed infection of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The source of the patient's exposure is currently being investigated by public health officials. The patient is currently being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not ... able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

click to enlarge VIA GREENLIGHT DISPENSARY Missouri's "Green Rush" continues apace. For the fourth month in a row, Missouri's medical marijuana industry has raked in more than $30 million dollars in cannabis sales, according to June numbers released by the Department of Health and Senior Services. Missouri cannabis dispensaries did $30.94 million in sales last month, **DHSS** reports, bringing the total amount of money brought in by the industry to $393.09 million to date. That's a serious chunk of change, to be sure. But there are signs that growth is beginning to level off. Since October 2020, when the first dispensaries in the state opened their doors, growth in retail sales of weed has been fairly steady, besting the previous month's numbers with nearly every new ... report. But with three months of similar sales numbers, it appears to have hit a plateau. At the same time, June saw the number of new patient applications fall for the third consecutive month, adding only 2,611 new patients. But while new applications are trending downward, renewals are up significantly and have been climbing steadily. **DHSS** issued 7,338 renewals in June, compared to only 4,779 in February. As of the end of June, Missouri had 187,018 active, card-carrying patients. Soon, though, those numbers could become much less significant in the grand scheme of things, with the potential legalization of recreational weed in the state serving as a major wild card. Legal Missouri 2022, the group that is leading the charge to get ...

Since 1962, only 154 known cases of Naegleria fowleri have been identified in the United States.(**DHSS**) MISSOURI (KFVS) - The **Missouri Department of Health and Senior Services** (**DHSS**) has reported a confirmed case of a rare brain disease that hasn't been identified among a Missouri resident in 35 years. According to a release, **DHSS** was notified of a Missouri resident with a laboratory-confirmed infection of Naegleria fowleri. **DHSS** says Naegleria fowleri is a microscopic single-celled free-living ameba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis (PAM). The patient is currently being treated for PAM in an intensive care unit of a hospital. Health experts ... say this ameba is commonly found in warm freshwater such as lakes, rivers and ponds; however, PAM is extremely rare. According to **DHSS**, only 154 known cases have been identified in the United States since 1962. The only other case identified among a Missouri resident occurred in 1987, and there currently aren't any additional suspected cases of it being investigated in the state. The source of the patient's exposure is currently being investigated by public health officials. Local and out-of-state activity are being considered. ... Although a rare occurrence, **DHSS** says infection from Naegleria fowleri comes when water containing the ameba enters the body through the nose from freshwater sources. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the ...

JEFFERSON CITY - A confirmed infection of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The source of the patient's exposure is currently being investigated by public health officials. The patient is currently being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not ... able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

KANSAS CITY, Mo. -- The **Missouri Department of Health and Senior Services** has been notified of a Missouri resident with a laboratory-confirmed infection of Naegleria fowleri. Naegleria fowleri is a microscopic single-celled free-living ameba that can cause a rare life-threatening infection of the brain called primary amebic meningoencephalitis (PAM). The Missouri patient is currently being treated for PAM in an intensive care unit of a hospital. Young girl ...

click to enlarge VIA GREENLIGHT DISPENSARY Missouri's "Green Rush" continues apace. For the fourth month in a row, Missouri's medical marijuana industry has raked in more than $30 million dollars in cannabis sales, according to June numbers released by the Department of Health and Senior Services. Missouri cannabis dispensaries did $30.94 million in sales last month, **DHSS** reports, bringing the total amount of money brought in by the industry to $393.09 million to date. That's a serious chunk of change, to be sure. But there are signs that growth is beginning to level off. Since October 2020, when the first dispensaries in the state opened their doors, growth in retail sales of weed has been fairly steady, besting the previous month's numbers with nearly every new ... report. But with three months of similar sales numbers, it appears to have hit a plateau. At the same time, June saw the number of new patient applications fall for the third consecutive month, adding only 2,611 new patients. But while new applications are trending downward, renewals are up significantly and have been climbing steadily. **DHSS** issued 7,338 renewals in June, compared to only 4,779 in February. As of the end of June, Missouri had 187,018 active, card-carrying patients. Soon, though, those numbers could become much less significant in the grand scheme of things, with the potential legalization of recreational weed in the state serving as a major wild card. Legal Missouri 2022, the group that is leading the charge to get ...

KANSAS CITY, Mo. — For the first time in 35 years, a rare brain infection was found inside a Missouri resident. According to the **Missouri Department of Health and Senior Services**, a case of Naegleria fowleri was confirmed through a laboratory. The patient is currently being treated in an intensive care unit of a hospital. Naegleria fowleri is microscopic single-celled, free-living ameba that can cause a rare life-threatening infection of the brain. The infection is called primary amebic meningoencephalitis. The disease is commonly found in warm freshwater such as lakes, ...

KANSAS CITY, Mo. (KCTV) --- The **Missouri Department of Health and Senior Services** has confirmed a case of Naegleria fowleri, a rare brain infection. It's the first case in state in 35 years. "Naegleria fowleri is a microscopic single-celled free-living ameba that can cause a rare life-threatening infection of the brain called primary amebic meningoencephalitis (PAM)," the **Missouri Department of Health and Senior Services** said in a statement. "The Missouri patient is currently being treated for PAM in an intensive care unit of a hospital." The **Missouri Department of Health and Senior Services** says individuals become infected by the ameba when water containing it enters the body through the nose from freshwater sources. Symptoms include severe headache, nausea, fever, vomiting, stiff neck, ...

click to enlarge VIA GREENLIGHT DISPENSARY Missouri's "Green Rush" continues apace. For the fourth month in a row, Missouri's medical marijuana industry has raked in more than $30 million dollars in cannabis sales, according to June numbers released by the Department of Health and Senior Services. Missouri cannabis dispensaries did $30.94 million in sales last month, **DHSS** reports, bringing the total amount of money brought in by the industry to $393.09 million to date. That's a serious chunk of change, to be sure. But there are signs that growth is beginning to level off. Since October 2020, when the first dispensaries in the state opened their doors, growth in retail sales of weed has been fairly steady, besting the previous month's numbers with nearly every new ... report. But with three months of similar sales numbers, it appears to have hit a plateau. At the same time, June saw the number of new patient applications fall for the third consecutive month, adding only 2,611 new patients. But while new applications are trending downward, renewals are up significantly and have been climbing steadily. **DHSS** issued 7,338 renewals in June, compared to only 4,779 in February. As of the end of June, Missouri had 187,018 active, card-carrying patients. Soon, though, those numbers could become much less significant in the grand scheme of things, with the potential legalization of recreational weed in the state serving as a major wild card. Legal Missouri 2022, the group that is leading the charge to get ...

JEFFERSON CITY - A confirmed case of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The exposure is linked to a beach at Lake of Three Fires, a state park in Taylor County, Iowa, according to a press release by the Iowa Department of Public Health. As of Thursday, the patient was being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary ... amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

KANSAS CITY, Mo. — The Iowa Department of Public Health revealed Friday that the beach at Lake of Three Fires will temporarily close due to potential exposure from a Missouri resident with a rare brain infection. Testing to confirm the presence of Naegleria fowleri in Lake of Three Fires is being conducted with the CDC and could take several days to complete, according to a press release. The **Missouri Department of Health and Senior Services** states they are also working closely with the Iowa Department of Public Health on this case. Naegleria fowleri is a microscopic single-celled free-living amoeba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis. Naegleria fowleri can be present in any body of warm freshwater (lakes, rivers, ponds) across the United States, but infections are rare. ...

... from freshwater sources. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist. People can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions could include: Hold your nose shut, use nose clips, or keep your head above water when taking part in water-related activities in bodies of warm freshwater. Avoid putting your head under the water in hot springs and other untreated thermal ...

... an intensive care unit of a hospital, but it's presently unknown where they live or are being treated. This is Missouri's first case since 1987. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist, stated in a news release Thursday. Health officials say the Missouri resident recently swam at the beach and later became sick with Naegleria fowleri . Water samples are being taken at the lake on Friday to test for the amoeba. IDPH reports that the amoeba is commonly found in freshwater, but reiterated that infections from it are rare. Only 154 cases ...

JEFFERSON CITY - A confirmed case of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The exposure is linked to a beach at Lake of Three Fires, a state park in Taylor County, Iowa, according to a press release by the Iowa Department of Public Health. As of Thursday, the patient was being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary ... amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

KANSAS CITY, Mo. — The Iowa Department of Public Health revealed Friday that the beach at Lake of Three Fires will temporarily close due to potential exposure from a Missouri resident with a rare brain infection. Testing to confirm the presence of Naegleria fowleri in Lake of Three Fires is being conducted with the CDC and could take several days to complete, according to a press release. The **Missouri Department of Health and Senior Services** states they are also working closely with the Iowa Department of Public Health on this case. Naegleria fowleri is a microscopic single-celled free-living amoeba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis. Naegleria fowleri can be present in any body of warm freshwater (lakes, rivers, ponds) across the United States, but infections are rare. ...

据7月8日报道密苏里州的一名居民被诊断出患有一种罕见的 危及生命的大脑感染 卫生和老年服务部周四宣布，这是35年来该州的第一个确诊病例 公共卫生官员没有透露这名居民的具体身份，只称该居民正在重症监护室里与一种叫做原发性变形虫脑膜炎（primary amebic meningoencephalitis，简称PAM）的感染作斗争 是由名为Naegleria fowleri的食脑变形虫引起的 这种变形虫生活在温暖的淡水中，如湖泊 河流和池塘 卫生官员没有说这名居民是在哪里接触到变形虫的，因为他们仍在调查种 自1962年以来，在美国只发现了154个已知的病例 根据卫生局的资料，唯一一个在密苏里州居民身上发现的病例还是在1987年 虽然很罕见，但当含有变形虫的水通过鼻子进入身体时，人们就会被这种鸡冠状的病毒感染 然后变形虫会进入人的大脑，在那里破坏脑组织 这种感染不能在人与人之间传播，也不能通过吞食受污染的水而感染 密苏里州流行病学家George Turabelidze博士在一份声明中说："这些情况在美国，特别是在密苏里州极为罕见，但重要的是人们要知道可能会感染这种变形虫，这样就可以在出现相关症状时及时寻求医疗护理 "感染该变形虫的症状可能包括严重头痛 发烧 恶心 呕吐 脖子僵硬 癫痫发作 精神状态改变和幻觉 任何在温暖的水中游泳后出现这些症状的人，应立即与他们的医疗机构联系

...) in an intensive care unit of a hospital, but it's presently unknown where they live or are being treated. This is Missouri's first case since 1987. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist, stated in a news release Thursday. Health officials say the Missouri resident recently swam at the beach and later became sick with Naegleria fowleri . Water samples are being taken at the lake on Friday to test for the amoeba. IDPH reports that the amoeba is commonly found in freshwater, but reiterated that infections from it are rare. Only 154 cases have been ...

据KTLA 7月8日报道 密苏里州的一名居民被诊断出患有一种罕见的 危及生命的大脑感染 卫生和老年服务部周四宣布，这是35年来该州的第一个确诊病例 公共卫生官员没有透露这名居民的具体身份，只称该居民正在重症监护室里与一种叫做原发性变形虫脑膜炎（primary amebic meningoencephalitis，简称PAM）的感染作斗争 这种病是由名为Naegleria fowleri的食脑变形虫引起的 这种变形虫生活在温暖的淡水中，如湖泊 河流和池塘 卫生官员没有说这名居民是在哪里接触到变形虫的，因为他们仍在调查中 自1962年以来，在美国只发现了154个已知的病例 根据卫生局的资料，唯一一个在密苏里州居民身上发现的病例还是在1987年 虽然很罕见，但当含有变形虫的水通过鼻子进入身体时，人们就会被这种鸡冠状的病毒感染 然后变形虫会进入人的大脑，在那里破坏脑组织 这种感染不能在人与人之间传播，也不能通过吞食受污染的水而感染 密苏里州流行病学家George Turabelidze博士在一份声明中说："这些情况在美国，特别是在密苏里州极为罕见，但重要的是人们要知道可能会感染这种变形虫，这样就可以在出现相关症状时及时寻求医疗护理 " 感染该变形虫的症状可能包括严重头痛 发烧 恶心 呕吐 脖子僵硬 癫痫发作 精神状态改变和幻觉 任何在温暖的水中游泳后出现这些症状的人，应立即与他们的医疗机构联系 欲了解更多信息，请前往

... health department said Thursday. Health officials are still investigating the source of the patient's infection, and said Friday that they are working closely with the Iowa Department of Public Health on the case. The Iowa health department temporarily closed the Lake of Three Fires in Taylor County for swimming because of potential exposure. The lake is about 120 miles north of Kansas City. Dr. **George Turabelidze**, Missouri's state epidemiologist, said these situations are extremely rare. "But it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," Turabelidze said. People are also reading… State health officials did not provide further details about the patient, but they said no additional suspected cases of PAM ... tissue. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water, officials said. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist, in a statement. Health officials cautioned that people can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions include: • Hold your nose shut, use nose clips or keep your head above water when taking part in water-related activities in warm freshwater bodies. • Avoid putting your head under the water in ...

JEFFERSON CITY - A confirmed case of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The exposure is linked to a beach at Lake of Three Fires, a state park in Taylor County, Iowa, according to a press release by the Iowa Department of Public Health. As of Thursday, the patient was being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary ... amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

KANSAS CITY, Mo. — The Iowa Department of Public Health revealed Friday that the beach at Lake of Three Fires will temporarily close due to potential exposure from a Missouri resident with a rare brain infection. Testing to confirm the presence of Naegleria fowleri in Lake of Three Fires is being conducted with the CDC and could take several days to complete, according to a press release. The **Missouri Department of Health and Senior Services** states they are also working closely with the Iowa Department of Public Health on this case. Naegleria fowleri is a microscopic single-celled free-living amoeba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis. Naegleria fowleri can be present in any body of warm freshwater (lakes, rivers, ponds) across the United States, but infections are rare. ...

"Estas situaciones son extremadamente raras en los Estados Unidos y en Missouri específicamente, pero es importante que las personas sepan que la infección es una posibilidad para que puedan buscar atención médica de manera oportuna si se presentan síntomas relacionados", dijo el Dr. **George Turabelidze**, epidemiólogo estatal de Missouri, dijo en un comunicado. Los síntomas pueden incluir fuertes dolores de cabeza, fiebre, náuseas, vómitos, rigidez en el cuello, convulsiones, alteración del estado mental y alucinaciones. Cualquier persona que experimente estos síntomas después de nadar en un cuerpo de agua tibia debe comunicarse con su proveedor de atención médica de inmediato. Para obtener más ...

... tissue. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water, officials said. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist, in a statement. Health officials cautioned that people can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions include: —Hold your nose shut, use nose clips or keep your head above water when taking part in water-related activities in warm freshwater bodies. —Avoid putting your head under the water in hot ...

... the individual may have contracted the potentially deadly organism, the department does state that "local and out-of-state activity are being considered." "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," Dr. **George Turabelidze**, Missouri's state epidemiologist, said to DHSS. How Do You Keep From Getting Naegleria Fowleri? The department reports the amoeba will enter the body through the nose and then make its way up to the brain, where it will begin attacking tissue. DHSS points out that to avoid contracting Naegleria fowleri, restrict the amount of water that enters the nose when swimming. It suggests using nose clips ...

据KTLA 7月8日报道密苏里州的一名居民被诊断出患有一种罕见的 危及生命的大脑感染 卫生和老年服务部周四宣布，这是35年来该州的第一个确诊病例 公共卫生官员没有透露这名居民的具体身份，只称该居民正在重症监护室里与一种叫做原发性变形虫脑膜炎（primary amebic meningoencephalitis，简称PAM）的感染作斗争 是由名为Naegleria fowleri的食脑变形虫引起的 这种变形虫生活在温暖的淡水中，如湖泊 河流和池塘 卫生官员没有说这名居民是在哪里接触到变形虫的，因为他们仍在调查种 自1962年以来，在美国只发现了154个已知的病例 根据卫生局的资料，唯一一个在密苏里州居民身上发现的病例还是在1987年 虽然很罕见，但当含有变形虫的水通过鼻子进入身体时，人们就会被这种鸡冠状的病毒感染 然后变形虫会进入人的大脑，在那里破坏脑组织 这种感染不能在人与人之间传播，也不能通过吞食受污染的水而感染 密苏里州流行病学家George Turabelidze博士在一份声明中说："这些情况在美国，特别是在密苏里州极为罕见，但重要的是人们要知道可能会感染这种变形虫，这样就可以在出现相关症状时及时寻求医疗护理 "感染该变形虫的症状可能包括严重头痛 发烧 恶心 呕吐 脖子僵硬 癫痫发作 精神状态改变和幻觉 任何在温暖的水中游泳后出现这些症状的人，应立即与他们的医疗机构联系 欲了解更多信息，请前往美国疾病和预防控制中心（CDC）网站：https://www.cdc.gov/parasites/naegleria/index.html （编译：Jing） 独家编译稿件，转载请注明来源"大华府华人资讯网"，切勿侵权

... health department said Thursday. Health officials are still investigating the source of the patient's infection, and said Friday that they are working closely with the Iowa Department of Public Health on the case. The Iowa health department temporarily closed the Lake of Three Fires in Taylor County for swimming because of potential exposure. The lake is about 120 miles north of Kansas City. Dr. **George Turabelidze**, Missouri's state epidemiologist, said these situations are extremely rare. "But it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," Turabelidze said. People are also reading… State health officials did not provide further details about the patient, but they said no additional suspected cases of PAM ... tissue. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water, officials said. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist, in a statement. Health officials cautioned that people can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions include: • Hold your nose shut, use nose clips or keep your head above water when taking part in water-related activities in warm freshwater bodies. • Avoid putting your head under the water in ...

... and Black mothers. Doulas are women who assist other women during pregnancy, labor and postpartum. The St. Louis Doula Project has long been working toward eliminating health disparities in

AMERICAN OVERSIGHT

Black and brown communities. The collective provides resources for historically oppressed pregnant people in St. Louis. LaKisha Redditt, chair of the board, points towards a report published in 2021 by the **Missouri Department of Health and Senior Services** that found Black women had a pregnancy mortality rate more than four times greater than white women in 2018. She says that the overturn of Roe, which outlaws abortion in Missouri except in the case of medical emergency, will only increase this disparity. Redditt says: "These are forced births. These are people who are probably going to be in poverty a little bit longer than they would otherwise ...

... is on pace to see more than 1,000 fatalities on the highways in 2021, the most in 15 years. Have a plan to arrive to your holiday gatherings and home safely. If you plan to drink, don't drive. Choose a designated driver, call a sober friend, order a rideshare or spend the night. But never drive impaired. If you feel different, you drive different. Beware of text scam from 1-704-525-9772 The **Missouri Department of Health** & Senior Services (**DHSS**) is warning citizens of a new text message scam targeting citizens and their personal information. According to website registration information, it was established on Dec. 2, 2021, and was registered using a provider from the European Union. The text message requests that citizens visit a website to enter their social security number, name and date of ... birth, and upload photos of their driver license to "validate" their "one-time COVID-19 vaccine verification." In an attempt to legitimize the site, logos of **DHSS** and the Missouri Department of Revenue's myDMV portal appear along the top. **DHSS** has worked with the Office of Administration's Information Technology Services Division (OA-ITSD) to take all actions at the state's disposal to report the site to the proper authorities, although the site is hosted and maintained externally. **DHSS** will never ask for a citizen's SSN over email or text message and only provides vaccination verification and records upon request. ... Although citizens have reported text messages originating from 1-704-525-9772, **DHSS** encourages citizens to protect their personal information online no matter the source.

... law does not prohibit the use or provision of Plan B, or contraception. Quade told KOMU 8 that a simple statement from Schmitt's office is not enough. "We want an official legal opinion from the Attorney General's Office," Quade said. "This is a very common thing that is asked for of his office, because they are the top prosecutorial office in our state. And we want their official opinion." The **Missouri Department of Health and Senior Services** is responsible for regulating licensed abortion facilities/providers, and for monitoring all abortions performed. Rizzo and Quade said the state health department has "confirmed the need for clarity" by its recent public statements, along with statements from Parson and Schmitt's offices. "Public statements and social media posts from your office and the attorney general's office have also ...

... of the trigger law. Less than 24 hours later, Saint Luke's reversed the decision after the KSHB 41 News I-Team shared a statement with the health system from Missouri Attorney General Eric Schmitt's press secretary, clarifying that "Missouri law does not prohibit the use or provision of Plan B, or contraception." The letter addressed to Parson said that statements and social media posts from the **Missouri Department of Health and Senior Services** and from Parson and Schmitt's offices have highlighted the ambiguity surrounding the law, and should receive a response from the state government. "Any public statements or social media posts from your office or others do not carry the force of law," the Democratic leaders said.

... law does not prohibit the use or provision of Plan B, or contraception. Quade told KOMU 8 that a simple statement from Schmitt's office is not enough. "We want an official legal opinion from the Attorney General's Office," Quade said. "This is a very common thing that is asked for of his office, because they are the top prosecutorial office in our state. And we want their official opinion." The **Missouri Department of Health and Senior Services** is responsible for regulating licensed abortion facilities/providers, and for monitoring all abortions performed. Rizzo and Quade said the state health department has "confirmed the need for clarity" by its recent public statements, along with statements from Parson and Schmitt's offices. "Public statements and social media posts from your office and the attorney general's office have also ...

... of the trigger law. Less than 24 hours later, Saint Luke's reversed the decision after the KSHB 41 News I-Team shared a statement with the health system from Missouri Attorney General Eric Schmitt's press secretary, clarifying that "Missouri law does not prohibit the use or provision of Plan B, or contraception." The letter addressed to Parson said that statements and social media posts from the **Missouri Department of Health and Senior Services** and from Parson and Schmitt's offices have highlighted the ambiguity surrounding the law, and should receive a response from the state government. "Any public statements or social media posts from your office or others do not carry the force of law," the Democratic leaders said.

... of infection come and go. This transition does not minimize the continued importance of public health surveillance, investigation, and response activities, as is necessary to mitigate any disease. "As we enter this phase of our state's recovery, we continue to encourage Missourians to safeguard their own health and the health of loved ones through tried and true public health measures," said **Department of Health and Senior Services** Acting Director **Paula Nickelson**. "Missourians should feel confident that we will remain vigilant when monitoring COVID-19 levels throughout the state." Over the past two years, the state was able to achieve some incredible milestones in responding to COVID-19: · Testing capacity - More than 14 million tests performed by public health partners. · Treatment options - More than ... allow Missouri to adapt to changing needs regarding COVID-19 in the future. Missouri's approach moving forward will allow state and local health officials to closely monitor community level of COVID-19, determine which variants of SARS-CoV-2 are circulating through the genomic surveillance, and assess disease severity and impact of COVID-19-associated illnesses. Beginning Friday, the **Department of Health and Senior Services** will provide weekly dashboard updates that will include seven-day case rate data, activity by region and county, statewide data on COVID-19 hospitalizations, and circulating virus variants. This is a flexible approach allowing accommodation for future surges, should they occur, and require more frequent updates and additional datasets. More information about vaccines, testing resources, and ...

... of infection come and go. This transition does not minimize the continued importance of public health surveillance, investigation, and response activities, as is necessary to mitigate any disease. "As we enter this phase of our state's recovery, we continue to encourage Missourians to safeguard their own health and the health of loved ones through tried and true public health measures," said **Department of Health and Senior Services** Acting Director **Paula Nickelson**. "Missourians should feel confident that we will remain vigilant when monitoring COVID-19 levels throughout the state." Over the past two years, the state was able to achieve some incredible milestones in responding to COVID-19: · Testing capacity - More than 14 million tests performed by public health partners. · Treatment options - More than ... allow Missouri to adapt to changing needs regarding COVID-19 in the future. Missouri's approach moving forward will allow state and local health officials to closely monitor community level of COVID-19, determine which variants of SARS-CoV-2 are circulating through the genomic surveillance, and assess disease severity and impact of COVID-19-associated illnesses. Beginning Friday, the **Department of Health and Senior Services** will provide weekly dashboard updates that will include seven-day case rate data, activity by region and county, statewide data on COVID-19 hospitalizations, and circulating virus variants. This is a flexible approach allowing accommodation for future surges, should they occur, and require more frequent updates and additional datasets. More information about vaccines, testing resources, and ...

... month all forms of contraceptives are still legal in Missouri. "There are no changes," Parson said on July 1. "Everything that was legal before that decision is legal today. There have been absolutely no changes whatsoever on contraceptives." He also said the state's health department will issue more clarifications and guidelines. In a release, the Department of Health and Senior Services (**DHSS**) said it's responsible for regulating licensed abortion facilities and providers. "Before and following the Supreme Court of the United States' ruling in Dobbs that overturns Roe v. Wade, Missouri law does not ban the use of contraception methods. RSMo 188.017 criminalizes performing an abortion absent a medical emergency, but this does not include pregnancy preventive measures. ... **DHSS** is currently reviewing regulations related to abortion facilities to ensure their accordance with state law." Parson announced earlier this month he is calling

... month all forms of contraceptives are still legal in Missouri. "There are no changes," Parson said on July 1. "Everything that was legal before that decision is legal today. There have been absolutely no changes whatsoever on contraceptives." He also said the state's health department will issue more clarifications and guidelines. In a release, the Department of Health and Senior Services (**DHSS**) said it's responsible for regulating licensed abortion facilities and providers. "Before and following the Supreme Court of the United States' ruling in Dobbs that overturns Roe v. Wade, Missouri law does not ban the use of contraception methods. RSMo 188.017 criminalizes performing an abortion absent a medical emergency, but this does not include pregnancy preventive measures. ... **DHSS** is currently reviewing regulations related to abortion facilities to ensure their accordance with state law." Parson announced earlier this month he is calling

ST. LOUIS — Missouri health officials on Wednesday released answers to questions about Missouri's abortion ban, but some say they do little to address confusion about exceptions for medical emergencies and how the law will be enforced. The one-page document created by the **Missouri Department of Health and Senior Services** listed answers to four "frequently asked questions" about the regulations. The answers stressed that **DHSS** does not determine whether an abortion is conducted legally, and that only law enforcement, local prosecutors and the Missouri Attorney General's Office can investigate and decide if a crime has been committed. In trying to answer what constitutes a "medical emergency," the ... her pregnancy to avert the death of the pregnant woman or for which a delay will create a serious risk of substantial and irreversible physical impairment of a major bodily function of the pregnant woman." Under the law, providers who violate the abortion ban can be charged with a Class B felony, punishable by five to 15 years in prison, and lose their medical license. Lisa Cox, spokeswoman for **DHSS**, told the Post-Dispatch that **DHSS** will not share abortion reports (which providers submit each time an abortion is performed) with law enforcement, and would only provide reports under a court order. The abortion report form that's currently in use, which requires providers to explain the medical threat to the pregnant woman only in late-term abortions when the fetus could be ... viable outside the womb, also is out of date. Cox said **DHSS** regulation and licensure staff are currently reviewing the forms and discussing if any changes need to be made. The Post-Dispatch submitted questions to Missouri Attorney General Eric Schmitt, asking how the abortion ban will be enforced — whether his office plans to rely on whistleblowers, subpoena abortion report forms from **DHSS** or use other measures. Chris Nuelle, spokesman ... for Schmitt's office, responded with the following statement: "The Missouri Attorney General's Office will work to uphold Missouri law and protect the sanctity of life." Richard Muniz, general counsel for Planned Parenthood of the St. Louis Region and Southwest Missouri, said, the fact sheet from **DHSS** is "cold comfort" to Missouri hospital and providers. "If history is any indication, we know the state of Missouri will weaponize its health oversight authority to second-guess the abortion care that is provided in the state …," Muniz said, referring a legal fight in 2019 where **DHSS** refused to grant a license to the state's only abortion facility. Dr. Jeannie Kelley, a ...

... destroys the brain tissue. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist. People can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions could include: • Hold your nose shut, use nose clips, or keep your head above water when taking part in water-related activities in bodies of warm freshwater. •

"No," the factsheet states. "**DHSS** is not authorized to provide legal advice to third parties." Prosecutors had been relying on the health department to issue guidance. Darrell Moore, the head of the Missouri Association of Prosecuting Attorneys, said the factsheet helpfully points to definitions of medical emergencies, abortions and what constitutes reasonable medical judgment in Missouri law. "The truth is that the decision on ... the law — in real time and on the frontlines of care — where clinical judgement matters." "The uncertainty of whether that judgement will be second-guessed is the challenge for physicians," Dillon said. "It is impossible to know in advance whether a prosecutor or member of law enforcement will agree about a clinician determination of risk to the life of the mother." Health department spokeswoman **Lisa Cox** said there's nothing more the agency can do. "The department is unable to formulate advisory responses to various situations with distinct fact patterns," Cox said. "The complexity of each situation is why Missouri law gives that analysis to physicians to utilize 'reasonable medical judgement.'"

JEFFERSON CITY, MO – The **Missouri Department of Health and Senior Services** (**DHSS**) has been notified of a Missouri resident with a laboratory-confirmed infection of Naegleria fowleri. Naegleria fowleri is a microscopic single-celled free-living ameba that can cause a rare life-threatening infection of the brain called primary amebic meningoencephalitis (PAM). The Missouri patient is currently being treated for PAM in an intensive care unit of a hospital. The ameba is commonly ... to show effectiveness.) Those who experience the following symptoms after swimming in any warm body of water should contact their health care provider immediately as the disease progresses rapidly: • Severe headache. • Fever. • Nausea. • Vomiting. • Stiff neck. • Seizures. • Altered mental status. • Hallucinations. For more information about Naegleria fowleri, visit the CDC's webpage. About the **Missouri Department of Health and Senior Services**: The department seeks to be the leader in protecting health and keeping people safe. ST. LOUIS — Missouri health officials on Wednesday released answers to questions about Missouri's abortion ban, but some say they do little to address confusion about exceptions for medical emergencies and how the law will be enforced. The one-page document created by the **Missouri Department of Health and Senior Services** listed answers to four "frequently asked questions" about the regulations. The answers stressed that **DHSS** does not determine whether an abortion is conducted legally, and that only law enforcement, local prosecutors and the Missouri Attorney General's Office can investigate and decide if a crime has been committed. In trying to answer what constitutes a "medical emergency," the ... her pregnancy to avert the death of the pregnant woman or for which a delay will create a serious risk of substantial and irreversible physical impairment of a major bodily function of the pregnant woman." Under the law, providers who violate the abortion ban can be charged with a Class B felony, punishable by five to 15 years in prison, and lose their medical license. Lisa Cox, spokeswoman for **DHSS**, told the Post-Dispatch that **DHSS** will not share abortion reports (which providers submit each time an abortion is performed) with law enforcement, and would only provide reports under a court order. The abortion report form that's currently in use, which requires providers to explain the medical threat to the pregnant woman only in late-term abortions when the fetus could be ... viable outside the womb, also is out of date. Cox said **DHSS** regulation and licensure staff are currently reviewing the forms and discussing if any changes need to be made. The Post-Dispatch submitted questions to Missouri Attorney General Eric Schmitt, asking how the abortion ban will be enforced — whether his office plans to rely on whistleblowers, subpoena abortion report forms from **DHSS** or use other measures. Chris Nuelle, spokesman ... for Schmitt's office, responded with the following statement: "The Missouri Attorney General's Office will work to uphold Missouri law and protect the sanctity of life." Richard Muniz, general counsel for Planned Parenthood of the St. Louis Region and Southwest Missouri, said, the fact sheet from **DHSS** is "cold comfort" to Missouri hospital and providers. "If history is any indication, we know the state of Missouri will weaponize its health oversight authority to second-guess the abortion care that is provided in the state …," Muniz said, referring a legal fight in 2019 where **DHSS** refused to grant a license to the state's only abortion facility. Dr. Jeannie Kelley, a ...

... states dealing with their own abortion questions. "If you're wondering what will happen if Kansas loses access to abortion care, you can look at Missouri where contraception questions, emergency situations, ectopic pregnancies are all up for discussion, and providers are scrambling to figure out what's legal and what's not," said Emily Wales with Planned Parenthood Great Plains. This week, the **Missouri Department of Health and Senior Services** responded with a one-page, four-question document entitled Regulation of Missouri Abortion Facilities — Frequently Asked Questions in response to questions from doctors and hospitals seeking clarification on the state's interpretation of the new law. In the document, the **DHSS** says while the department regulates abortion facilities to ensure patient safety, the enforcement of the ... criminal provision are up to prosecutors and Missouri Attorney General's office. It goes on to say that the **DHSS** cannot provide legal advice to providers or facilities. It also provides links the the legal definition of a "medical emergency" and "reasonable medical judgement." Jeffrey S. Howell, the executive vice president of the Missouri State Medical Association, said he's not surprised by the department's action. "It's not **DHSS**' job to interpret that law," said Howell. "That's a job ...

Public health officials are reporting an alarming increase in syphilis in Missouri, especially among its Black and brown populations. PQ Two thirds of newborn babies with congenital syphilis are Black or Hispanic. According to an update from the **Missouri Department of Health and Senior Services**, the number of syphilis cases in Missouri increased by 259% from 2015 to 2021. In 2021, there were 63 congenital syphilis cases reported in Missouri, the highest since 1994. It doesn't stop there. Nearly two-thirds, or 65%, of all babies born with congenital syphilis were Black or Hispanic, highlighting the stark disparities in testing and treatment, according to the National Coalition of STD ...

MISSOURI— Cumulative sales at Missouri medical marijuana dispensaries are likely to break $400 million by the end of this month, according to data released by the **Missouri Department of Health and Senior Services** (MDHSS). Medical marijuana dispensary sales first began back in October 2020. MDHSS reported cumulative sales at the end of June 2022 had reached $393.09 million, over $320 million more than the total sales at the end of June 2021. That figure comes after dispensary sales during the past month reached $30.94 million, nearly double the $16.37 million figure seen in June 2021. Barring a ...

... fowleri, a rare brain infection. "Unfortunately, the patient died due to Primary Amebic Meningoencephalitis (PAM)," the state's health department said in a statement. "While the occurrence of Naegleria fowleri infection is extremely rare, once infected it is usually fatal. Of the 154 known cases of PAM in the United States over the past 60 years, sadly only four have survived." ORIGINAL STORY The **Missouri Department of Health and Senior Services** has confirmed a case of Naegleria fowleri, a rare brain infection. It's the first case in state in 35 years. "Naegleria fowleri is a microscopic single-celled free-living ameba that can cause a rare life-threatening infection of the brain called primary amebic meningoencephalitis (PAM)," the **Missouri Department of Health and Senior Services** said in a statement. "The Missouri ... patient is currently being treated for PAM in an intensive care unit of a hospital." The **Missouri Department of Health and Senior Services** says individuals become infected by the ameba when water containing it enters the body through the nose from freshwater sources. Symptoms

KANSAS CITY, Mo. — A Missouri man infected with Naegleria fowleri, which typically infects people when water containing the ameba enters the body through the nose according to the Centers for Disease Control, has died. The **Missouri Department of Health and Senior Services** confirmed to CNN Friday night the man died after swimming off an Iowa beach. The victim's name will not be released. Information from the CDC states Naegleria fowleri infects people when water containing the ameba enters the body through the nose. This typically occurs when people go swimming or diving in warm freshwater places, like lakes and rivers. The Naegleria fowleri ameba then travels up ...

KANSAS CITY, Mo. — Missouri state health officials confirmed Friday that a resident who had been undergoing treatment for the brain-eating amoeba known as Naegleria fowleri has died. The **Missouri Department of Health and Senior Services** said the patient died due to primary amebic meningoencephalitis. Health officials said they believe the amoeba was contracted at Lake of Three Fires near Bedford, Iowa, about two hours north of Kansas City. Naegleria fowleri is a microscopic single-celled free-living amoeba that can cause a rare life-threatening infection of the brain. The amoeba is commonly found in warm freshwaters such as ...

KANSAS CITY, Mo. — A Missouri man infected with Naegleria fowleri, which typically infects people when water containing the ameba enters the body through the nose according to the Centers for Disease Control, has died. The **Missouri Department of Health and Senior Services** confirmed to CNN Friday night the man died after swimming off an Iowa beach. The victim's name will not be released. Information from the CDC states Naegleria fowleri infects people when water containing the ameba enters the body through the nose. This typically occurs when people go swimming or diving in warm freshwater places, like lakes and rivers. The Naegleria fowleri ameba then travels up ...

(CNN) — A Missouri resident diagnosed this month with an infection from a brain-eating amoeba after visiting a beach in Iowa has died, according to the Missouri **Department of Health and Senior Services** (**DHSS**). The beach at Lake of Three Fires State Park in Taylor County was closed temporarily to swimmers after the visitor was infected with a rare life-threatening infection of the brain, the Iowa Department of Public Health said Friday. The victim infected with Naegleria fowleri had visited the beach shortly before the diagnosis. "Unfortunately, the patient died due to Primary Amebic ... Meningoencephalitis," Missouri **DHSS** spokesperson **Lisa Cox** told CNN Friday night. "While the occurrence of Naegleria fowleri infection is extremely rare, once infected it is usually fatal." Cox said the department would not release further information about the patient in order to protect the privacy of the victim's family. "The closure is a precautionary response to a confirmed infection of Naegleria fowleri in a Missouri resident with recent potential ...

KANSAS CITY, Mo. -- A Missouri resident with a laboratory-confirmed infection of Naegleria fowleri has died, according to officials with the **Missouri Department of Health and Senior Services** Friday. Naegleria fowleri, commonly known as "brain-eating amoeba," is a microscopic single-celled free-living ameba that can cause a rare life-threatening infection of the brain called primary amebic meningoencephalitis (PAM). VIDEO: Small plane lands on I-70 in Jackson County, pilot arrested Health officials say while the occurrence of Naegleria fowleri infection is extremely rare ...

... are aware that if one looks hard enough, one can find an "expert opinion" to support almost anything. As a result, the physician defendant's burden to prove the "affirmative defense" will cause a factual determination for a jury in each case in which an abortion is performed in Missouri. Proper documentation will be of prime importance. All abortions performed in hospitals must be reported to the **Missouri Department of Health and Senior Services** within 30 days, along with other requirements. This is a report that could start an investigation leading to potential criminal charges as well as licensure issues. No provider wants to become the test case for a criminal prosecution. However, no provider can predetermine which patient will come through an emergency room's doors. Unfortunately, health care providers may find themselves without ...

(CNN) — A Missouri resident diagnosed this month with an infection from a brain-eating amoeba after visiting a beach in Iowa has died, according to the Missouri **Department of Health and Senior Services** (**DHSS**). The beach at Lake of Three Fires State Park in Taylor County was closed temporarily to swimmers after the visitor was infected with a rare life-threatening infection of the brain, the Iowa Department of Public Health said Friday. The victim infected with Naegleria fowleri had visited the beach shortly before the diagnosis. "Unfortunately, the patient died due to Primary Amebic ... Meningoencephalitis," Missouri **DHSS** spokesperson **Lisa Cox** told CNN Friday night. "While the occurrence of Naegleria fowleri infection is extremely rare, once infected it is usually fatal." Cox said the department would not release further information about the patient in order to protect the privacy of the victim's family. "The closure is a precautionary response to a confirmed infection of Naegleria fowleri in a Missouri resident with recent potential ...

The patient passed away on July 7. Lake samples have been tested for presence of the amoeba; results to come The person infected with amoeba after swimming in a southwestern Iowa lake has died, according to the Missouri **Department of Health and Senior Services**. The department released a news release on July 7 confirming that a Missouri resident had been infected with Naegleria fowleri, an amoeba that can cause a rare and often fatal brain infection called primary amebic meningoencephalitis. The patient had recently swam at Lake of Three Fires near Bedford, Iowa. As of the news release, the patient was being treated for the infection in an intensive ... care unit. The patient has since died from the brain infection, said Missouri Health Department spokesperson **Lisa Cox**. The patient died on July 7, although the Missouri Health Department was not notified immediately, she said. Officials believe the person swam at Lake of Three Fires sometime in the last two weeks of June, The Gazette previously reported. The Missouri Health Department did not have anymore details about the patient's potential exposure in the lake as of Friday. "Because these cases are so ...

... when the water containing the amoeba enters the nose, rises to the brain and destroys that tissue. It is not contagious and it is not contracted by swallowing water", say the authorities. Symptoms are headaches, fever, nausea and vomiting. By Kalhan Rosenblatt — NBC News A Missouri patient has died after becoming infected with a brain-eating amoeba after a visit to an Iowa lake, the Missouri **Department of Health and Senior Services** confirmed Friday. The patient died of primary amoebic meningoencephalitis, a usually fatal infection caused by the Naegleria fowleri amoeba , The Associated Press news agency reported. [Iowa Beach Closed After Tourist Contracts Brain-Eating Amoeba] NBC News has contacted the

AMERICAN OVERSIGHT

Missouri **Department of Health and Senior Services** for more information. The Missouri resident's death was ... health authorities have not identified the patient, who was in the intensive care unit before his death, the Register reported. [A Rare Brain-Eating Amoeba Kills a 7-Year-Old in California] "Because these cases are incredibly rare and out of respect for the family, we do not intend to release additional information about the patient that could lead to the identification of the individual," said **Lisa Cox**, director of communications for the Department of Health and Missouri Senior Services, to the Register in an email. The Missouri **Department of Health and Senior Services** learned of the infection on July 6. Officials believe the patient swam in an Iowa lake suspected of carrying the amoeba in late June. Lake of Three Fires in Taylor County, Iowa, where the Missouri resident is ... believed to have contracted the amoeba, was closed earlier this month as a "precautionary measure." The Missouri **Department of Health and Senior Services** warned on Twitter that the amoeba is "not contagious" but can be deadly if a person becomes infected. "Although rare, infection can occur when water containing Naegleria fowleri enters the nose from warm freshwater. The amoeba travels up the nose to the brain, where it destroys brain tissue. This infection is not contagious and cannot be contracted by swallowing water," the department noted. The ... death is being investigated, and while the patient is believed to have contracted the amoeba in Lake of the Three Fires, other bodies of water are being tested. "Public health experts strongly believe that the lake is a likely source, but we are not limiting the investigation to that source because it has not been confirmed. Other public water sources in Missouri are being tested," the Missouri **Department of Health and Senior Services** said on Twitter.

July 11, 202200:18 The death of the Missouri resident was first reported by The Des Moines Register. ... Missouri health officials have not identified the patient, who was in the intensive care unit prior to their death, the Register reported. "Because these cases are so incredibly rare and out of respect for the family, we do not intend to release additional information about the patient which could lead to the person's identification," **Lisa Cox**, communications director from the Missouri **Department of Health and Senior Services**, told the Register in an email. The Missouri **Department of Health and Senior Services** learned of the infection on July 6, the Register reported. Officials believed the patient swam in an Iowa lake suspected of carrying the amoeba in late June. The Lake of Three Fires in Taylor ... County, Iowa, where the Missouri resident is believed to have contracted the amoeba, was closed earlier this month as a "precautionary response." The Missouri **Department of Health and Senior Services** warned in a tweet that the amoeba "isn't contagious" but can be lethal if a person is infected. "Although rare, infection can occur when water containing Naegleria fowleri enters through the nose from warm freshwater. The amoeba travels up the nose to the brain where it destroys brain tissue. This infection isn't contagious and can't be contracted by swallowing water," the department tweeted. The ... is being investigated and while it is believed the patient contracted the amoeba in the Lake of Three Fires, other bodies of water are being tested. "It's strongly believed by public health experts that the lake is a likely source, but we are not limiting the investigation to that source because it hasn't been confirmed. Additional public water sources in Missouri are being tested," the Missouri **Department of Health and Senior Services** tweeted. Kalhan Rosenblatt is a reporter covering youth and internet culture for NBC News, based in New York. The Associated Press, Marlene Lenthang and TJ Swigart contributed.

By Bradd Anderson, Sr. Director, ParentLink, College of Education and Human Development, University of Missouri Parents and caregivers in Missouri now have a new resource for help with connecting to family supports. ParentLink's navigators help families overcome barriers affecting maternal and child health (MCH) and are now available statewide through funding from the **Missouri Department of Health and Senior Services**. "Parents and caregivers face many different struggles while raising children," said MCH navigator Stacey Harlow of ParentLink, a program of the University of Missouri's College of Education and Human Development. "Barriers that I see the most include transportation, housing, health insurance and limited income." Harlow is a credentialed community health worker, along with colleagues Yvette ...

... during the trial. Prosecutors repeatedly objected to certain lines of questioning from Watkins, and at points Wimes would grow openly frustrated, raising his voice during sidebar conversations with both parties. Outside consequences for Derges continued up until the trial began. In January, she for three years, and admitted to buying and prescribing drugs illegally in a settlement with the **Missouri Department of Health and Senior Services**. A separate lawsuit against her was , who alleges that Derges misled him about medical treatments to relieve his back pain. She's also been politically exiled: stripped of her committee assignments, barred from Republican caucus meetings and banished to a closet-sized office in the state capitol. She was blocked by the state GOP for running under the party banner for re-election this fall. Prior ...

... ll see how this all shakes out. But I think that's where they'll be." Missouri collects abortion information Missouri already collects a significant amount of information about every abortion performed by a physician that could provide a starting point for Schmitt or other prosecutors. After each abortion, doctors must sign a Report of Induced Termination of Pregnancy that is sent to the Missouri **Department of Health and Senior**

AMERICAN OVERSIGHT

Services (**DHSS**). A blank report posted to the **DHSS** website doesn't include a space for the patient's name, but calls for a host of other information, including the patient's race, education level, and past pregnancy and abortion history. The form also includes space for the date of the patient's last normal menses and a clinical estimation of the gestational age. If the ... homicide or manslaughter," Peters Baker said. Michael Mansur, a spokesman for Peters Baker, told The Star that a lot remains unknown about how abortion could potentially be prosecuted. "There's so much more for us to figure out," Mansur said, adding that the language in the law raises "big questions" about whether women are actually shielded. During a legal fight with Planned Parenthood in 2019, **DHSS** revealed it was able to find patients with complicated abortions by creating a spreadsheet that included the fetus' gestational age and the last normal date of Planned Parenthood patient's periods. Schmitt spokesman Chris Nuelle didn't answer a specific question about whether the Missouri Attorney General's Office currently has access to Induced Termination of Pregnancy reports and, if so, ... whether the office would review the reports going forward. "We will dedicate the resources necessary to enforce Missouri's abortion laws," Nuelle said in a statement. "We have worked cooperatively with **DHSS** to enforce abortion laws in the past, and expect that cooperation to continue. We will review and consider whatever referrals are made by **DHSS** to our office." **DHSS** spokeswoman **Lisa Cox** didn't respond to questions about under what circumstances information on the forms is shared with law enforcement and prosecutors. On its website, **DHSS** says the information on the form is "confidential and is only used for statistical purposes." The website doesn't address whether the reports could be ...

... I want to make sure we provide the services for the state of Missouri, for the people of this state." The $183 million project -- funded through state appropriations of federal American Rescue Plan Act dollars -- includes the construction of the new multi-story lab, expansion of the existing State Health Lab and a parking lot to serve both facilities. "To say we are excited is an understatement," **DHSS** Deputy Director Laura Naught said. "This started as a dream a little over a year ago at the height of the COVID-19 pandemic right in this very building when we were working across agencies to figure out how to meet Missouri's current and future laboratory needs." Naught said the investment is transformative to the state's laboratory infrastructure. Cooperation among agencies will deliver ... comprehensive and rapid lab services, Naught said. Specifically for **DHSS**, she said the development will enhance training for hospital lab workers, expand life-saving newborn testing, improve public health environmental testing and add next generation molecular testing. "This innovative effort will be the first of its kind to address today's evolving world and prepare us for the emerging diseases and contaminant threats," Naught said. MDC Deputy Director Aaron Jeffries ... deliver livestock samples here to be tested," Chinn said. "Those same accredited veterinarians can also pick up supplies and forms necessary to continue their operations." Agricultural researchers conduct diagnostic, surveillance and pre-movement testing for several species out of the existing State Health Lab. Once the new facility is complete, the Animal Health Lab will be moved there, giving **DHSS** expanded space in the State Health Lab. Parson said the lab investment is long overdue and it will improve Missouri's services to residents and make the campus a better place to work for employees. "I've said all along I want to invest in the future of this state," Parson said. "It's not about a one year and be done. It's about what are we going to do to make it better." Sandy Karsten, director ...

... monkeypox blisters on the face, hands, chest, genitals, anus or inside the mouth. The virus is transmitted through close, often skin-to-skin contact with an infected person. When the Springfield-Greene County Health Department has a suspected case, administrator of Community Health and Epidemiology Kendra Findlay said public health officials interview the patient and then contact the **Missouri Department of Health and Senior Services** to start testing. "We take samples and send those off to (the) Missouri State Public Health Lab to look for orthopox—the virus that causes monkeypox," said Findlay. "At the state public health lab, they'll run that monkeypox test. If it's positive, they'll send it off to the CDC (Centers for Disease Control and Prevention) for confirmatory monkeypox testing." She said the Greene County case is a ... . Because the only circulating orthopox right now is monkeypox, said Findlay, "we have to assume that what our case has is monkeypox." The health department asks those with symptoms or anyone with close contact with someone who's tested positive to schedule a virtual meeting with their doctor to avoid further exposures. This monkeypox case is the third confirmed in Missouri, according to the **Missouri Department of Health and Senior Services**.

A Greene County resident has tested positive for monkeypox, according to the Springfield-Greene County Health Department, and epidemiologists have contacted those who have been exposed. The **Missouri Department of Health and Senior Services** has reported three cases in Missouri. Monkeypox, which is not related to chickenpox, is a virus in the same family as smallpox and cowpox. Monkeypox most commonly spreads through prolonged, close skin-to-skin contact. The risk of infection to the general public is low, according to the health department. Symptoms include a blistering rash on the face, hands, chest, genitals, anus or inside the ...

... whether the state planned to issue further clarification on the law's definition of "medical emergency" pregnancies, Gov. Mike Parson said, "I'm sure the health department will come out with some clarifications or guides on that." He reiterated that emergency contraception, or Plan B, is still legal under the law and that there was "a lot of misinformation out there." A spokesperson for the **Missouri Department of Health and Senior Services** did not immediately respond to an inquiry on whether it was developing clarifications or guidelines on the definition. Doctors and health care workers have already expressed concern to Sen. Lauren Arthur, a Democrat, especially in considering how to handle ectopic pregnancies. In ectopic pregnancies, a fertilized egg implants in a place other than the uterus. These pregnancies are not able to be ...

COLUMBIA, Mo. (KMIZ) There has been an uptick in Boone County's COVID-19 numbers according to the Columbia/Boone County Department of Public Health and Human Services. Officials reported that there have been 50 total new coronavirus cases on Wednesday. Boone County reported 40 new cases on Monday. The **Missouri Department of Health and Senior Services** (**DHSS**) and the CDC are reporting high community transmission levels for COVID-19 in Boone County. The CDC recommends: Wearing a mask in public indoor spaces Stay up to date with COVID-19 vaccines Get tested if you have symptoms Additional precautions may be needed for people at high risk for severe illness. While the CDC is recommending mask usage, local governments have not implemented another ...

... up to four weeks, that person can spread the virus to others. Monkeypox vaccines in Missouri This week, the health department reported one probable case of monkeypox in Greene County, and those who may have been exposed to the virus have been contacted, officials say. Findlay said vaccines are available for those who are considered a high-risk exposure, but they have to be requested through the **Missouri Department of Health and Senior Services**—which requests them through the CDC. That's the same process for getting antivirals, which Findlay said might reduce the number of days a person is ill. She said local officials have talked with healthcare providers so they know what to watch for when a patient contacts them with symptoms. "I feel like we are prepared to identify [it] and make sure that our cases are isolated so it doesn't spread ...

Since 1962, only 154 known cases of Naegleria fowleri have been identified in the United States.(**DHSS**) MISSOURI (KFVS) - The **Missouri Department of Health and Senior Services** (**DHSS**) has reported a confirmed case of a rare brain disease that hasn't been identified among a Missouri resident in 35 years. According to a release, **DHSS** was notified of a Missouri resident with a laboratory-confirmed infection of Naegleria fowleri. **DHSS** says Naegleria fowleri is a microscopic single-celled free-living ameba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis (PAM). The patient is currently being treated for PAM in an intensive care unit of a hospital. Health experts ... say this ameba is commonly found in warm freshwater such as lakes, rivers and ponds; however, PAM is extremely rare. According to **DHSS**, only 154 known cases have been identified in the United States since 1962. The only other case identified among a Missouri resident occurred in 1987, and there currently aren't any additional suspected cases of it being investigated in the state. The source of the patient's exposure is currently being investigated by public health officials. Local and out-of-state activity are being considered. ... Although a rare occurrence, **DHSS** says infection from Naegleria fowleri comes when water containing the ameba enters the body through the nose from freshwater sources. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the ...

JEFFERSON CITY, Mo. (KY3) - **Missouri Department of Health** & Senior Services has confirmed a rare brain infection. According to a news release, Naegleria fowleri is a microscopic single-celled free-living amoeba. It can cause rare life threatening infection of the brain called primary amebic meningoencephalitis (PAM). The release said a patient is in an intensive care unit in a Missouri hospital, but does not give a location. The ameba is found in warm ... freshwater lakes, rivers, and ponds. It is extremely rare. According to the news release, only 154 cases have been identified in the United States since 1962. There has only been one other case in Missouri, and that was in 1987. The **Missouri Department of Health** & Senior services says there are no additional suspected cases of PAM being investigated in the state. The release says the ameba travels through the nose up to the brain. While the infection is rare, the Department of Health & Senior Services gave tips on how you can avoid the infection. · Hold your nose shut, use nose clips, or keep your head above water when taking part in water-related ...

JEFFERSON CITY - A confirmed infection of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The source of the patient's exposure is currently being investigated by public health officials. The patient is currently being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not ... able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

KANSAS CITY, Mo. — Missouri state health officials said they have been notified that a Missouri resident is undergoing treatment for a so-called brain-eating amoeba known as Naegleria fowleri. The **Missouri Department of Health and Senior Services** said the infection was laboratory-confirmed. The **DHSS** said the Missouri patient is currently being treated in a hospital intensive care unit. Naegleria fowleri is a microscopic single-celled free-living amoeba that can cause a rare life-threatening infection of the brain called primary amebic meningoencephalitis. The amoeba is commonly found in warm freshwaters such as lakes, rivers, and ponds; however, health officials said primary amebic ... is rare. People can become infected by Naegleria fowleri when water containing the amoeba enters the body through the nose from freshwater sources. The Naegleria fowleri amoeba then travels up the nose to the brain where it destroys the brain tissue. Health officials said the infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. The **DHSS** said in a news release that the source of the patient's exposure is currently being investigated by public health officials. Local and out-of-state activities are being considered. Recreational water users should assume that Naegleria fowleri is present in warm freshwater across the United States; however, infection remains rare. Health officials said people can take action to reduce the risk of ...

click to enlarge VIA GREENLIGHT DISPENSARY Missouri's "Green Rush" continues apace. For the fourth month in a row, Missouri's medical marijuana industry has raked in more than $30 million dollars in cannabis sales, according to June numbers released by the Department of Health and Senior Services. Missouri cannabis dispensaries did $30.94 million in sales last month, **DHSS** reports, bringing the total amount of money brought in by the industry to $393.09 million to date. That's a serious chunk of change, to be sure. But there are signs that growth is beginning to level off. Since October 2020, when the first dispensaries in the state opened their doors, growth in retail sales of weed has been fairly steady, besting the previous month's numbers with nearly every new ... report. But with three months of similar sales numbers, it appears to have hit a plateau. At the same time, June saw the number of new patient applications fall for the third consecutive month, adding only 2,611 new patients. But while new applications are trending downward, renewals are up significantly and have been climbing steadily. **DHSS** issued 7,338 renewals in June, compared to only 4,779 in February. As of the end of June, Missouri had 187,018 active, card-carrying patients. Soon, though, those numbers could become much less significant in the grand scheme of things, with the potential legalization of recreational weed in the state serving as a major wild card. Legal Missouri 2022, the group that is leading the charge to get ...

Since 1962, only 154 known cases of Naegleria fowleri have been identified in the United States.(**DHSS**) MISSOURI (KFVS) - The **Missouri Department of Health and Senior Services** (**DHSS**) has reported a confirmed case of a rare brain disease that hasn't been identified among a Missouri resident in 35 years. According to a release, **DHSS** was notified of a Missouri resident with a laboratory-confirmed infection of Naegleria fowleri. **DHSS** says Naegleria fowleri is a microscopic single-celled free-living ameba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis (PAM). The patient is currently being treated for PAM in an intensive care unit of a hospital. Health experts ... say this ameba is commonly found in warm freshwater such as lakes, rivers and ponds; however, PAM is extremely rare. According to **DHSS**, only 154 known cases have been identified in the United States since 1962. The only other case identified among a Missouri resident occurred in 1987, and there currently aren't any additional suspected cases of it being investigated in the state. The source of the patient's exposure is currently being investigated by public health officials. Local and out-of-state activity are being considered. ... Although a rare occurrence, **DHSS** says infection from Naegleria fowleri comes when water containing the ameba enters the body through the nose from freshwater sources. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the ...

JEFFERSON CITY, Mo. (KY3) - **Missouri Department of Health** & Senior Services has confirmed a rare brain infection. According to a news release, Naegleria fowleri is a microscopic single-celled free-living amoeba. It can cause rare life threatening infection of the brain called primary amebic meningoencephalitis (PAM). The release said a patient is in an intensive care unit in a Missouri hospital, but does not give a location. The ameba is found in warm ... freshwater lakes, rivers, and ponds. It is extremely rare. According to the news release, only 154 cases have been identified in the United States since 1962. There has only been one other case in Missouri, and that was in 1987. The **Missouri Department of Health** & Senior services says there are no additional suspected cases of PAM being investigated in the state. The release says the ameba travels through the nose up to the brain. While the infection is rare, the Department of Health & Senior Services gave tips on how you can avoid the infection. · Hold your nose shut, use nose clips, or keep your head above water when taking part in water-related ...

JEFFERSON CITY - A confirmed infection of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The source of the patient's exposure is currently being investigated by public health officials. The patient is currently being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not ... able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

KANSAS CITY, Mo. — Missouri state health officials said they have been notified that a Missouri resident is undergoing treatment for a so-called brain-eating amoeba known as Naegleria fowleri. The **Missouri Department of Health and Senior Services** said the infection was laboratory-confirmed. The **DHSS** said the Missouri patient is currently being treated in a hospital intensive care unit. Naegleria fowleri is a microscopic single-celled free-living amoeba that can cause a rare life-threatening infection of the brain called primary amebic meningoencephalitis. The amoeba is commonly found in warm freshwaters such as lakes, rivers, and ponds; however, health officials said primary amebic ... is rare. People can become infected by Naegleria fowleri when water containing the amoeba enters the body through the nose from freshwater sources. The Naegleria fowleri amoeba then travels up the nose to the brain where it destroys the brain tissue. Health officials said the infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. The **DHSS** said in a news release that the source of the patient's exposure is currently being investigated by public health officials. Local and out-of-state activities are being considered. Recreational water users should assume that Naegleria fowleri is present in warm freshwater across the United States; however, infection remains rare. Health officials said people can take action to reduce the risk of ...

click to enlarge VIA GREENLIGHT DISPENSARY Missouri's "Green Rush" continues apace. For the fourth month in a row, Missouri's medical marijuana industry has raked in more than $30 million dollars in cannabis sales, according to June numbers released by the Department of Health and Senior Services. Missouri cannabis dispensaries did $30.94 million in sales last month, **DHSS** reports, bringing the total amount of money brought in by the industry to $393.09 million to date. That's a serious chunk of change, to be sure. But there are signs that growth is beginning to level off. Since October 2020, when the first dispensaries in the state opened their doors, growth in retail sales of weed has been fairly steady, besting the previous month's numbers with nearly every new ... report. But with three months of similar sales numbers, it appears to have hit a plateau. At the same time, June saw the number of new patient applications fall for the third consecutive month, adding only 2,611 new patients. But while new applications are trending downward, renewals are up significantly and have been climbing steadily. **DHSS** issued 7,338 renewals in June, compared to only 4,779 in February. As of the end of June, Missouri had 187,018 active, card-carrying patients. Soon, though, those numbers could become much less significant in the grand scheme of things, with the potential legalization of recreational weed in the state serving as a major wild card. Legal Missouri 2022, the group that is leading the charge to get ...

Since 1962, only 154 known cases of Naegleria fowleri have been identified in the United States.(**DHSS**) MISSOURI (KFVS) - The **Missouri Department of Health and Senior Services** (**DHSS**) has reported a confirmed case of a rare brain disease that hasn't been identified among a Missouri resident in 35 years. According to a release, **DHSS** was notified of a Missouri resident with a laboratory-confirmed infection of Naegleria fowleri. **DHSS** says Naegleria fowleri is a microscopic single-celled free-living ameba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis (PAM). The patient is currently being treated for PAM in an intensive care unit of a hospital. Health experts ... say this ameba is commonly found in warm freshwater such as lakes, rivers and ponds; however, PAM is extremely rare. According to **DHSS**, only 154 known cases have been identified in the United States since 1962. The only other case identified among a Missouri resident occurred in 1987, and there currently aren't any additional suspected cases of it being investigated in the state. The source of the patient's exposure is currently being investigated by public health officials. Local and out-of-state activity are being considered. ... Although a rare occurrence, **DHSS** says infection from Naegleria fowleri comes when water containing the ameba enters the body through the nose from freshwater sources. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the ...

JEFFERSON CITY, Mo. (KY3) - **Missouri Department of Health** & Senior Services has confirmed a rare brain infection. According to a news release, Naegleria fowleri is a microscopic single-celled free-living amoeba. It can cause rare life threatening infection of the brain called primary amebic meningoencephalitis (PAM). The release said a patient is in an intensive care unit in a Missouri hospital, but does not give a location. The ameba is found in warm ... freshwater lakes, rivers, and ponds. It is extremely rare. According to the news release, only 154 cases have been identified in the United States since 1962. There has only been one other case in Missouri, and that was in 1987. The **Missouri Department of Health** & Senior services says there are no additional suspected cases of PAM being investigated in the state. The release says the ameba travels through the nose up to the brain. While the infection is rare, the Department of Health & Senior Services gave tips on how you can avoid the infection. · Hold your nose shut, use nose clips, or keep your head above water when taking part in water-related ...

JEFFERSON CITY - A confirmed infection of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The source of the patient's exposure is currently being investigated by public health officials. The patient is currently being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not ... able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

click to enlarge VIA GREENLIGHT DISPENSARY Missouri's "Green Rush" continues apace. For the fourth month in a row, Missouri's medical marijuana industry has raked in more than $30 million dollars in cannabis sales, according to June numbers released by the Department of Health and Senior Services. Missouri cannabis dispensaries did $30.94 million in sales last month, **DHSS** reports, bringing the total amount of money brought in by the industry to $393.09 million to date. That's a serious chunk of change, to be sure. But there are signs that growth is beginning to level off. Since October 2020, when the first dispensaries in the state opened their doors, growth in retail sales of weed has been fairly steady, besting the previous month's numbers with nearly every new ... report. But with three months of similar sales numbers, it appears to have hit a plateau. At the same time, June saw the number of new patient applications fall for the third consecutive month, adding only 2,611 new patients. But while new applications are trending downward, renewals are up significantly and have been climbing steadily. **DHSS** issued 7,338 renewals in June, compared to only 4,779 in February. As of the end of June, Missouri had 187,018 active, card-carrying patients. Soon, though, those numbers could become much less significant in the grand scheme of things, with the potential legalization of recreational weed in the state serving as a major wild card. Legal Missouri 2022, the group that is leading the charge to get ...

"These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist. People can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions could include: • Hold your nose shut, use nose clips, or keep your head above water when taking part in water-related activities in bodies of warm freshwater. • Avoid putting your head under the water in hot springs and other untreated thermal ...

JEFFERSON CITY - A confirmed case of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The exposure is linked to a beach at Lake of Three Fires, a state park in Taylor County, Iowa, according to a press release by the Iowa Department of Public Health. As of Thursday, the patient was being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary ... amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

KANSAS CITY, Mo. — The Iowa Department of Public Health revealed Friday that the beach at Lake of Three Fires will temporarily close due to potential exposure from a Missouri resident with a rare brain infection. Testing to confirm the presence of Naegleria fowleri in Lake of Three Fires is being conducted with the CDC and could take several days to complete, according to a press release. The **Missouri Department of Health and Senior Services** states they are also working closely with the Iowa Department of Public Health on this case. Naegleria fowleri is a microscopic single-celled free-living amoeba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis. Naegleria fowleri can be present in any body of warm freshwater (lakes, rivers, ponds) across the United States, but infections are rare. ...

...) in an intensive care unit of a hospital, but it's presently unknown where they live or are being treated. This is Missouri's first case since 1987. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist, stated in a news release Thursday. Health officials say the Missouri resident recently swam at the beach and later became sick with Naegleria fowleri . Water samples are being taken at the lake on Friday to test for the amoeba. IDPH reports that the amoeba is commonly found in freshwater, but reiterated that infections from it are rare. Only 154 cases have been ...

据KTLA 7月8日报道密苏里州的一名居民被诊断出患有一种罕见的 危及生命的大脑感染 卫生和老年服务部周四宣布，这是35年来该州的第一个确诊病例 公共卫生官员没有透露这名居民的具体身份，只称该居民正在重症监护室里与一种叫做原发性变形虫脑膜炎（primary amebic meningoencephalitis，简称PAM）的感染作斗争 是由名为Naegleria fowleri的食脑变形虫引起的 这种变形虫生活在温暖的淡水中，如湖泊 河流和池塘 卫生官员没有说这名居民是在哪里接触到变形虫的，因为他们仍在调查种 自1962年以来，在美国只发现了154个已知的病例 根据卫生局的资料，唯一一个在密苏里州居民身上发现的病例还是在1987年 虽然很罕见，但当含有变形虫的水通过鼻子进入身体时，人们就会被这种鸡冠状的病毒感染 然后变形虫会进入人的大脑，在那里破坏脑组织 这种感染不能在人与人之间传播，也不能通过吞食受污染的水而感染 密苏里州流行病学家George Turabelidze博士在一份声明中说："这些情况在美国，特别是在密苏里州极为罕见，但重要的是人们要知道可能会感染这种变形虫，这样就可以在出现相关症状时及时寻求医疗护理 "感染该变形虫的症状可能包括严重头痛 发烧 恶心 呕吐 脖子僵硬 癫痫发作 精神状态改变和幻觉 任何在温暖的水中游泳后出现这些症状的人，应立即与他们的医疗机构联系 欲了解更多信息，请前往美国疾病和预防控制中心（CDC）网站： https://www.cdc.gov/parasites/naegleria/index.html （编译：Jing） 独家编译稿件，转载请注明来源"旧金山湾区华人资讯网"，切勿侵权

... health department said Thursday. Health officials are still investigating the source of the patient's infection, and said Friday that they are working closely with the Iowa Department of Public Health on the case. The Iowa health department temporarily closed the Lake of Three Fires in Taylor County for swimming because of potential exposure. The lake is about 120 miles north of Kansas City. Dr. **George Turabelidze**, Missouri's state epidemiologist, said these situations are extremely rare. "But it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," Turabelidze said. People are also reading… State health officials did not provide further details about the patient, but they said no additional suspected cases of PAM ... tissue. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water, officials said. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist, in a statement. Health officials cautioned that people can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions include: • Hold your nose shut, use nose clips or keep your head above water when taking part in water-related activities in warm freshwater bodies. • Avoid putting your head under the water in ...

JEFFERSON CITY - A confirmed case of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The exposure is linked to a beach at Lake of Three Fires, a state park in Taylor County, Iowa, according to a press release by the Iowa Department of Public Health. As of Thursday, the patient was being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary ... amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

KANSAS CITY, Mo. — The Iowa Department of Public Health revealed Friday that the beach at Lake of Three Fires will temporarily close due to potential exposure from a Missouri resident with a rare brain infection. Testing to confirm the presence of Naegleria fowleri in Lake of Three Fires is being conducted with the CDC and could take several days to complete, according to a press release. The **Missouri Department of Health and Senior Services** states they are also working closely with the Iowa Department of Public Health on this case. Naegleria fowleri is a microscopic single-celled free-living amoeba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis. Naegleria fowleri can be present in any body of warm freshwater (lakes, rivers, ponds) across the United States, but infections are rare. ...

... fluid, Rice said. He believes some deaths attributed to other diseases causing meningitis may actually be caused by this parasite. "Naegleria fowleri can kill you within three days, so the longer it takes for diagnoses it can be time ticking away," he said. There are some drugs available to treat the infection, but they haven't proved very effective in the lab, Rice said. Lake 'likely source' **Lisa Cox**, spokeswoman for the Missouri **Department of Health and Senior Services**, said Friday the infected person is in intensive care at a Missouri hospital. Officials have not disclosed the person's age or gender. Naegleria fowleri most often infects children or young adults who are swimming and jumping into lakes and ponds, Rice said. Other cases, many in Pakistan, involved middle-age ...

... to public health officials. The lake near Bedford — about 10 miles north of the Missouri border — is closed for swimming pending tests of the water for Naegleria fowleri, an amoeba that normally feeds on bacteria in lake sediment. "It's strongly believed by public health experts that the lake is a likely source, but we are not limiting the investigation to that source, and it's not confirmed," **Lisa Cox**, a spokesperson for the Missouri **Department of Health and Senior Services** said Friday. "Additional public water sources in Missouri are being tested as well." The infection was verified by tests on Wednesday, she said. Iowa health officials announced the beach closure late Thursday. The U.S. Centers for Disease Control and Prevention is testing the lake water for the presence of ...

... health department said Thursday. Health officials are still investigating the source of the patient's infection, and said Friday that they are working closely with the Iowa Department of Public Health on the case. The Iowa health department temporarily closed the Lake of Three Fires in Taylor County for swimming because of potential exposure. The lake is about 120 miles north of Kansas City. Dr. **George Turabelidze**, Missouri's state epidemiologist, said these situations are extremely rare. "But it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," Turabelidze said. People are also reading… State health officials did not provide further details about the patient, but they said no additional suspected cases of PAM ... tissue. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water, officials said. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist, in a statement. Health officials cautioned that people can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions include: • Hold your nose shut, use nose clips or keep your head above water when taking part in water-related activities in warm freshwater bodies. • Avoid putting your head under the water in ...

JEFFERSON CITY - A confirmed case of a rare brain infection, Naegleria fowleri, has been found in a Missouri resident, the **Missouri Department of Health and Senior Services** said Thursday. The exposure is linked to a beach at Lake of Three Fires, a state park in Taylor County, Iowa, according to a press release by the Iowa Department of Public Health. As of Thursday, the patient was being treated in an intensive care unit. Naegleria fowleri is a microscopic singe-celled free-living ameba that can cause rare life-threatening infection of the brain called primary ... amebic meningoencephalitis. The ameba can destroy the brain tissue. It is not able to be spread from one person to another or by swallowing contaminated water. The ameba is commonly found in warm freshwater such as lakes, rivers and ponds. The infection is described as "extremely rare." Since 1962, only 154 known cases have been identified in the U.S. According to **DHSS**, Missouri's only other known case occurred in 1987. People become infected when water containing the ameba enters the body through the nose from the previously mentioned freshwater sources. For more information on potential symptoms and ways to reduce the risk of infection, visit the CDC's website.

KANSAS CITY, Mo. — The Iowa Department of Public Health revealed Friday that the beach at Lake of Three Fires will temporarily close due to potential exposure from a Missouri resident with a rare brain infection. Testing to confirm the presence of Naegleria fowleri in Lake of Three Fires is being conducted with the CDC and could take several days to complete, according to a press release. The **Missouri Department of Health and Senior Services** states they are also working closely with the Iowa Department of Public Health on this case. Naegleria fowleri is a microscopic single-celled free-living amoeba that can cause a rare, life-threatening brain infection called primary amebic meningoencephalitis. Naegleria fowleri can be present in any body of warm freshwater (lakes, rivers, ponds) across the United States, but infections are rare. ...

... from freshwater sources. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist. People can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions could include: Hold your nose shut, use nose clips, or keep your head above water when taking part in water-related activities in bodies of warm freshwater. Avoid putting your head under the water in hot springs and other untreated thermal ...

... an intensive care unit of a hospital, but it's presently unknown where they live or are being treated. This is Missouri's first case since 1987. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist, stated in a news release Thursday. Health officials say the Missouri resident recently swam at the beach and later became sick with Naegleria fowleri . Water samples are being taken at the lake on Friday to test for the amoeba. IDPH reports that the amoeba is commonly found in freshwater, but reiterated that infections from it are rare. Only 154 cases ...

... and Black mothers. Doulas are women who assist other women during pregnancy, labor and postpartum. The St. Louis Doula Project has long been working toward eliminating health disparities in

AMERICAN OVERSIGHT

Black and brown communities. The collective provides resources for historically oppressed pregnant people in St. Louis. LaKisha Redditt, chair of the board, points towards a report published in 2021 by the **Missouri Department of Health and Senior Services** that found Black women had a pregnancy mortality rate more than four times greater than white women in 2018. She says that the overturn of Roe, which outlaws abortion in Missouri except in the case of medical emergency, will only increase this disparity. Redditt says: "These are forced births. These are people who are probably going to be in poverty a little bit longer than they would otherwise ...

... of the trigger law. Less than 24 hours later, Saint Luke's reversed the decision after the KSHB 41 News I-Team shared a statement with the health system from Missouri Attorney General Eric Schmitt's press secretary, clarifying that "Missouri law does not prohibit the use or provision of Plan B, or contraception." The letter addressed to Parson said that statements and social media posts from the **Missouri Department of Health and Senior Services** and from Parson and Schmitt's offices have highlighted the ambiguity surrounding the law, and should receive a response from the state government. "Any public statements or social media posts from your office or others do not carry the force of law," the Democratic leaders said.

... of infection come and go. This transition does not minimize the continued importance of public health surveillance, investigation, and response activities, as is necessary to mitigate any disease. "As we enter this phase of our state's recovery, we continue to encourage Missourians to safeguard their own health and the health of loved ones through tried and true public health measures," said **Department of Health and Senior Services** Acting Director **Paula Nickelson**. "Missourians should feel confident that we will remain vigilant when monitoring COVID-19 levels throughout the state." Over the past two years, the state was able to achieve some incredible milestones in responding to COVID-19: · Testing capacity - More than 14 million tests performed by public health partners. · Treatment options - More than ... allow Missouri to adapt to changing needs regarding COVID-19 in the future. Missouri's approach moving forward will allow state and local health officials to closely monitor community level of COVID-19, determine which variants of SARS-CoV-2 are circulating through the genomic surveillance, and assess disease severity and impact of COVID-19-associated illnesses. Beginning Friday, the **Department of Health and Senior Services** will provide weekly dashboard updates that will include seven-day case rate data, activity by region and county, statewide data on COVID-19 hospitalizations, and circulating virus variants. This is a flexible approach allowing accommodation for future surges, should they occur, and require more frequent updates and additional datasets. More information about vaccines, testing resources, and ...

... and Black mothers. Doulas are women who assist other women during pregnancy, labor and postpartum. The St. Louis Doula Project has long been working toward eliminating health disparities in

AMERICAN OVERSIGHT

Black and brown communities. The collective provides resources for historically oppressed pregnant people in St. Louis. LaKisha Redditt, chair of the board, points towards a report published in 2021 by the **Missouri Department of Health and Senior Services** that found Black women had a pregnancy mortality rate more than four times greater than white women in 2018. She says that the overturn of Roe, which outlaws abortion in Missouri except in the case of medical emergency, will only increase this disparity. Redditt says: "These are forced births. These are people who are probably going to be in poverty a little bit longer than they would otherwise ...

... is on pace to see more than 1,000 fatalities on the highways in 2021, the most in 15 years. Have a plan to arrive to your holiday gatherings and home safely. If you plan to drink, don't drive. Choose a designated driver, call a sober friend, order a rideshare or spend the night. But never drive impaired. If you feel different, you drive different. Beware of text scam from 1-704-525-9772 The **Missouri Department of Health** & Senior Services (**DHSS**) is warning citizens of a new text message scam targeting citizens and their personal information. According to website registration information, it was established on Dec. 2, 2021, and was registered using a provider from the European Union. The text message requests that citizens visit a website to enter their social security number, name and date of ... birth, and upload photos of their driver license to "validate" their "one-time COVID-19 vaccine verification." In an attempt to legitimize the site, logos of **DHSS** and the Missouri Department of Revenue's myDMV portal appear along the top. **DHSS** has worked with the Office of Administration's Information Technology Services Division (OA-ITSD) to take all actions at the state's disposal to report the site to the proper authorities, although the site is hosted and maintained externally. **DHSS** will never ask for a citizen's SSN over email or text message and only provides vaccination verification and records upon request. ... Although citizens have reported text messages originating from 1-704-525-9772, **DHSS** encourages citizens to protect their personal information online no matter the source.

... of the trigger law. Less than 24 hours later, Saint Luke's reversed the decision after the KSHB 41 News I-Team shared a statement with the health system from Missouri Attorney General Eric Schmitt's press secretary, clarifying that "Missouri law does not prohibit the use or provision of Plan B, or contraception." The letter addressed to Parson said that statements and social media posts from the **Missouri Department of Health and Senior Services** and from Parson and Schmitt's offices have highlighted the ambiguity surrounding the law, and should receive a response from the state government. "Any public statements or social media posts from your office or others do not carry the force of law," the Democratic leaders said.

... of infection come and go. This transition does not minimize the continued importance of public health surveillance, investigation, and response activities, as is necessary to mitigate any disease. "As we enter this phase of our state's recovery, we continue to encourage Missourians to safeguard their own health and the health of loved ones through tried and true public health measures," said **Department of Health and Senior Services** Acting Director **Paula Nickelson**. "Missourians should feel confident that we will remain vigilant when monitoring COVID-19 levels throughout the state." Over the past two years, the state was able to achieve some incredible milestones in responding to COVID-19: · Testing capacity - More than 14 million tests performed by public health partners. · Treatment options - More than ... allow Missouri to adapt to changing needs regarding COVID-19 in the future. Missouri's approach moving forward will allow state and local health officials to closely monitor community level of COVID-19, determine which variants of SARS-CoV-2 are circulating through the genomic surveillance, and assess disease severity and impact of COVID-19-associated illnesses. Beginning Friday, the **Department of Health and Senior Services** will provide weekly dashboard updates that will include seven-day case rate data, activity by region and county, statewide data on COVID-19 hospitalizations, and circulating virus variants. This is a flexible approach allowing accommodation for future surges, should they occur, and require more frequent updates and additional datasets. More information about vaccines, testing resources, and ...

... and Black mothers. Doulas are women who assist other women during pregnancy, labor and postpartum. The St. Louis Doula Project has long been working toward eliminating health disparities in

AMERICAN OVERSIGHT

Black and brown communities. The collective provides resources for historically oppressed pregnant people in St. Louis. LaKisha Redditt, chair of the board, points towards a report published in 2021 by the **Missouri Department of Health and Senior Services** that found Black women had a pregnancy mortality rate more than four times greater than white women in 2018. She says that the overturn of Roe, which outlaws abortion in Missouri except in the case of medical emergency, will only increase this disparity. Redditt says: "These are forced births. These are people who are probably going to be in poverty a little bit longer than they would otherwise ...

... is on pace to see more than 1,000 fatalities on the highways in 2021, the most in 15 years. Have a plan to arrive to your holiday gatherings and home safely. If you plan to drink, don't drive. Choose a designated driver, call a sober friend, order a rideshare or spend the night. But never drive impaired. If you feel different, you drive different. Beware of text scam from 1-704-525-9772 The **Missouri Department of Health** & Senior Services (**DHSS**) is warning citizens of a new text message scam targeting citizens and their personal information. According to website registration information, it was established on Dec. 2, 2021, and was registered using a provider from the European Union. The text message requests that citizens visit a website to enter their social security number, name and date of ... birth, and upload photos of their driver license to "validate" their "one-time COVID-19 vaccine verification." In an attempt to legitimize the site, logos of **DHSS** and the Missouri Department of Revenue's myDMV portal appear along the top. **DHSS** has worked with the Office of Administration's Information Technology Services Division (OA-ITSD) to take all actions at the state's disposal to report the site to the proper authorities, although the site is hosted and maintained externally. **DHSS** will never ask for a citizen's SSN over email or text message and only provides vaccination verification and records upon request. ... Although citizens have reported text messages originating from 1-704-525-9772, **DHSS** encourages citizens to protect their personal information online no matter the source.

... law does not prohibit the use or provision of Plan B, or contraception. Quade told KOMU 8 that a simple statement from Schmitt's office is not enough. "We want an official legal opinion from the Attorney General's Office," Quade said. "This is a very common thing that is asked for of his office, because they are the top prosecutorial office in our state. And we want their official opinion." The **Missouri Department of Health and Senior Services** is responsible for regulating licensed abortion facilities/providers, and for monitoring all abortions performed. Rizzo and Quade said the state health department has "confirmed the need for clarity" by its recent public statements, along with statements from Parson and Schmitt's offices. "Public statements and social media posts from your office and the attorney general's office have also ...

... of the trigger law. Less than 24 hours later, Saint Luke's reversed the decision after the KSHB 41 News I-Team shared a statement with the health system from Missouri Attorney General Eric Schmitt's press secretary, clarifying that "Missouri law does not prohibit the use or provision of Plan B, or contraception." The letter addressed to Parson said that statements and social media posts from the **Missouri Department of Health and Senior Services** and from Parson and Schmitt's offices have highlighted the ambiguity surrounding the law, and should receive a response from the state government. "Any public statements or social media posts from your office or others do not carry the force of law," the Democratic leaders said.

... of infection come and go. This transition does not minimize the continued importance of public health surveillance, investigation, and response activities, as is necessary to mitigate any disease. "As we enter this phase of our state's recovery, we continue to encourage Missourians to safeguard their own health and the health of loved ones through tried and true public health measures," said **Department of Health and Senior Services** Acting Director **Paula Nickelson**. "Missourians should feel confident that we will remain vigilant when monitoring COVID-19 levels throughout the state." Over the past two years, the state was able to achieve some incredible milestones in responding to COVID-19: · Testing capacity - More than 14 million tests performed by public health partners. · Treatment options - More than ... allow Missouri to adapt to changing needs regarding COVID-19 in the future. Missouri's approach moving forward will allow state and local health officials to closely monitor community level of COVID-19, determine which variants of SARS-CoV-2 are circulating through the genomic surveillance, and assess disease severity and impact of COVID-19-associated illnesses. Beginning Friday, the **Department of Health and Senior Services** will provide weekly dashboard updates that will include seven-day case rate data, activity by region and county, statewide data on COVID-19 hospitalizations, and circulating virus variants. This is a flexible approach allowing accommodation for future surges, should they occur, and require more frequent updates and additional datasets. More information about vaccines, testing resources, and ...

... month all forms of contraceptives are still legal in Missouri. "There are no changes," Parson said on July 1. "Everything that was legal before that decision is legal today. There have been absolutely no changes whatsoever on contraceptives." He also said the state's health department will issue more clarifications and guidelines. In a release, the Department of Health and Senior Services (**DHSS**) said it's responsible for regulating licensed abortion facilities and providers. "Before and following the Supreme Court of the United States' ruling in Dobbs that overturns Roe v. Wade, Missouri law does not ban the use of contraception methods. RSMo 188.017 criminalizes performing an abortion absent a medical emergency, but this does not include pregnancy preventive measures. ... **DHSS** is currently reviewing regulations related to abortion facilities to ensure their accordance with state law." Parson announced earlier this month he is calling

... month all forms of contraceptives are still legal in Missouri. "There are no changes," Parson said on July 1. "Everything that was legal before that decision is legal today. There have been absolutely no changes whatsoever on contraceptives." He also said the state's health department will issue more clarifications and guidelines. In a release, the Department of Health and Senior Services (**DHSS**) said it's responsible for regulating licensed abortion facilities and providers. "Before and following the Supreme Court of the United States' ruling in Dobbs that overturns Roe v. Wade, Missouri law does not ban the use of contraception methods. RSMo 188.017 criminalizes performing an abortion absent a medical emergency, but this does not include pregnancy preventive measures. ... **DHSS** is currently reviewing regulations related to abortion facilities to ensure their accordance with state law." Parson announced earlier this month he is calling

ST. LOUIS — Missouri health officials on Wednesday released answers to questions about Missouri's abortion ban, but some say they do little to address confusion about exceptions for medical emergencies and how the law will be enforced. The one-page document created by the **Missouri Department of Health and Senior Services** listed answers to four "frequently asked questions" about the regulations. The answers stressed that **DHSS** does not determine whether an abortion is conducted legally, and that only law enforcement, local prosecutors and the Missouri Attorney General's Office can investigate and decide if a crime has been committed. In trying to answer what constitutes a "medical emergency," the ... her pregnancy to avert the death of the pregnant woman or for which a delay will create a serious risk of substantial and irreversible physical impairment of a major bodily function of the pregnant woman." Under the law, providers who violate the abortion ban can be charged with a Class B felony, punishable by five to 15 years in prison, and lose their medical license. Lisa Cox, spokeswoman for **DHSS**, told the Post-Dispatch that **DHSS** will not share abortion reports (which providers submit each time an abortion is performed) with law enforcement, and would only provide reports under a court order. The abortion report form that's currently in use, which requires providers to explain the medical threat to the pregnant woman only in late-term abortions when the fetus could be ... viable outside the womb, also is out of date. Cox said **DHSS** regulation and licensure staff are currently reviewing the forms and discussing if any changes need to be made. The Post-Dispatch submitted questions to Missouri Attorney General Eric Schmitt, asking how the abortion ban will be enforced — whether his office plans to rely on whistleblowers, subpoena abortion report forms from **DHSS** or use other measures. Chris Nuelle, spokesman ... for Schmitt's office, responded with the following statement: "The Missouri Attorney General's Office will work to uphold Missouri law and protect the sanctity of life." Richard Muniz, general counsel for Planned Parenthood of the St. Louis Region and Southwest Missouri, said, the fact sheet from **DHSS** is "cold comfort" to Missouri hospital and providers. "If history is any indication, we know the state of Missouri will weaponize its health oversight authority to second-guess the abortion care that is provided in the state …," Muniz said, referring a legal fight in 2019 where **DHSS** refused to grant a license to the state's only abortion facility. Dr. Jeannie Kelley, a ...

... law provisions of state law is left to local law enforcement agencies, local law enforcement attorneys and the Missouri Attorney General's Office of Enforcement," the document said. A frequently asked question posed in the Ministry of Health document is whether the agency can "provide legal advice so that doctors and patients can know what is and is not legal." "No," it says in the factsheet. "**DHSS** is not authorized to provide legal advice to third parties." Prosecutors had trusted the Ministry of Health to issue guidance. Darrell Moore, head of the Missouri Association of Prosecuting Attorneys, said the fact sheet helpfully points to definitions of medical emergencies, abortions, and what constitutes reasonable medical assessment in Missouri law. "The truth is that the decision on what ... of the law – in real time and on the front lines of care – where clinical judgment means something." "The uncertainty of whether that verdict will be guessed is the challenge for doctors," Dillon said. "It is impossible to know in advance whether a prosecutor or a member of law enforcement will agree that a clinician should determine the risk to the mother's life." Health Ministry spokeswoman **Lisa Cox** said there is nothing more the agency can do. "The department is unable to formulate advisory responses to different situations with different fact patterns," Cox said. "The complexity of each situation is why Missouri law provides this analysis to physicians to use 'reasonable medical judgment.'"

A frequently asked question listed on the health department document is whether the agency can "provide legal advice so that medical professionals and patients can know what is and is not legal." "No," the factsheet states. "**DHSS** is not authorized to provide legal advice to third parties." Prosecutors had been relying on the health department to issue guidance. Darrell Moore, the head of the Missouri Association of Prosecuting Attorneys, said the factsheet helpfully points to definitions of medical emergencies, abortions and what constitutes reasonable medical judgment in Missouri law. "The truth is that the decision on ... the law — in real time and on the frontlines of care — where clinical judgement matters." "The uncertainty of whether that judgement will be second-guessed is the challenge for physicians," Dillon said. "It is impossible to know in advance whether a prosecutor or member of law enforcement will agree about a clinician determination of risk to the life of the mother." Health department spokeswoman **Lisa Cox** said there's nothing more the agency can do. "The department is unable to formulate advisory responses to various situations with distinct fact patterns," Cox said. "The complexity of each situation is why Missouri law gives that analysis to physicians to utilize 'reasonable medical judgement.'"

... destroys the brain tissue. This infection cannot be spread from one person to another, and it cannot be contracted by swallowing contaminated water. "These situations are extremely rare in the United States and in Missouri specifically, but it's important for people to know that the infection is a possibility so they can seek medical care in a timely manner if related symptoms present," said Dr. **George Turabelidze**, Missouri's state epidemiologist. People can take actions to reduce the risk of infection by limiting the amount of water going up the nose. These actions could include: • Hold your nose shut, use nose clips, or keep your head above water when taking part in water-related activities in bodies of warm freshwater. •

ST. LOUIS — Missouri health officials on Wednesday released answers to questions about Missouri's abortion ban, but some say they do little to address confusion about exceptions for medical emergencies and how the law will be enforced. The one-page document created by the **Missouri Department of Health and Senior Services** listed answers to four "frequently asked questions" about the regulations. The answers stressed that **DHSS** does not determine whether an abortion is conducted legally, and that only law enforcement, local prosecutors and the Missouri Attorney General's Office can investigate and decide if a crime has been committed. In trying to answer what constitutes a "medical emergency," the ... her pregnancy to avert the death of the pregnant woman or for which a delay will create a serious risk of substantial and irreversible physical impairment of a major bodily function of the pregnant woman." Under the law, providers who violate the abortion ban can be charged with a Class B felony, punishable by five to 15 years in prison, and lose their medical license. Lisa Cox, spokeswoman for **DHSS**, told the Post-Dispatch that **DHSS** will not share abortion reports (which providers submit each time an abortion is performed) with law enforcement, and would only provide reports under a court order. The abortion report form that's currently in use, which requires providers to explain the medical threat to the pregnant woman only in late-term abortions when the fetus could be ... viable outside the womb, also is out of date. Cox said **DHSS** regulation and licensure staff are currently reviewing the forms and discussing if any changes need to be made. The Post-Dispatch submitted questions to Missouri Attorney General Eric Schmitt, asking how the abortion ban will be enforced — whether his office plans to rely on whistleblowers, subpoena abortion report forms from **DHSS** or use other measures. Chris Nuelle, spokesman ... for Schmitt's office, responded with the following statement: "The Missouri Attorney General's Office will work to uphold Missouri law and protect the sanctity of life." Richard Muniz, general counsel for Planned Parenthood of the St. Louis Region and Southwest Missouri, said, the fact sheet from **DHSS** is "cold comfort" to Missouri hospital and providers. "If history is any indication, we know the state of Missouri will weaponize its health oversight authority to second-guess the abortion care that is provided in the state …," Muniz said, referring a legal fight in 2019 where **DHSS** refused to grant a license to the state's only abortion facility. Dr. Jeannie Kelley, a ...

... effect, St. Luke's Health System in Kansas City released a statement that its Missouri hospitals would not provide emergency contraception. It quickly reinstated the service after the Missouri Attorney General's office released information that the "law does not prohibit the use or provision of Plan B, or contraception." Since the Supreme Court ruling, doctors and hospitals have been asking the **Missouri Department of Health and Senior Services** (**DHSS**) for clarification regarding the interpretation of the new abortion law in Missouri. Today, the department responded with a one-page, four-question document: Regulation of Missouri Abortion Facilities — Frequently Asked Questions. In the document, the **DHSS** says while the department regulates abortion facilities to ensure patient safety, the enforcement of ... the criminal provision are up to prosecutors and Missouri Attorney General's office. It goes on to say that the **DHSS** cannot provide legal advice to providers or facilities. It also provides links the the legal definition of a "medical emergency" and "reasonable medical judgement." Earlier this week, Missouri Democratic lawmakers sent an open letter to Governor Mike Parson asking for a special session to clarify the law. "Missouri needs to clarify its laws to save lives, to protect access to birth control, and ...
