AMERICAN OVERSIGHT

	J
1	***Mayo Clinic Laboratories has added several viral/bacterial panel tests that contain 20+ pathogens. Some of the pathogens are not listed as reportable but may be of surveillance/outbreak significance so we report any positive on the entire panel. It is not feasible to individualize all of these pathogens through filters for all states in our current Reportable Disease system. We provide the Mayo LOINC/SNOMED table so any of these results can be parsed out by the LOINC codes on the receiving side if you want to disregard these reports. All tests/results/LOINC are included in this table.**

Medical Pot Deemed 'Essential' Amid COVID-19 Shutdowns

As municipalities are closing or considering closing retail operations to stem the spread of COVID-19, multiple city and state health departments have affirmed that medical marijuana dispensaries are "essential" businesses, like pharmacies or grocery stores, and will remain open.

Good Afternoon,

We need guidance on a patient who needs COVID-19 testing. The patient is a Miami Metro Dade police officer. The patient contacted our medical director, Dr. Pete Gutierrez, and informed him that he was in close contact with a person who was asymptomatic and tested positive for COVID-19. Our medical director told the patient that he should self-quarantine until he receives a test.

I called the Miami-Dade Department of Health Epidemiology department **(305) 470-5660** and was told that the patient is low-risk and quarantine.

Our medical offices are in the process of becoming a testing site, but we have the following barriers:

1. We don't have the necessary personal protective equipment; we are in the process of applying for the Department of Health Office of Emergency Management. We have tried to acquire PPE's from our medical suppliers, but they are out of stock.
2. LabCorp **(954) 218-4665** informed us that they don't have Nasopharyngeal swabs, and they are running low on Oropharyngeal swabs. They also can't provide PPEs.
3. Quest (**305) 323-1500** had no response, and we left several messages.

Epidemiology informed me that the patient doesn't qualify for testing that the best recourse is the tell the patient to self-quarantine or look for another organization to test.

I then called The COVID-19 Call Center | **1 (866) 779-6121**, and after 30 minutes on hold, I was told that I have the most recent procedures and to try to contact the Quest and LabCorp in the morning to open an account. I was informed that they have no further information.

I called the State of Florida Infectious Disease Outbreak Related Questions **(850) 245-4401**; I was instructed to continue to reach out to the COVID-19 State Emergency Operations Center (EOC) Emergency Requisition Request. They are also going to send an email to the local health departments to notify me of any changes.

Please inform me of anything else I can do; the Police department is concerned with the impact this may have on their workforce. I want to reassure them I am doing everything in my power to help. You can call me on my cell phone **(305) 216-3417** or my office at **(305)572-2086** if there are any changes. Thank you.

Best Regards,

Summary

The global impact of COVID-19 has been profound, and the public health threat it represents is the most serious seen in a respiratory virus since the 1918 H1N1 influenza pandemic. Here we present the results of epidemiological modelling which has informed policymaking in the UK and other countries in recent weeks. In the absence of a COVID-19 vaccine, we assess the potential role of a number of public health measures – so-called non-pharmaceutical interventions (NPIs) – aimed at reducing contact rates in the population and thereby reducing transmission of the virus. In the results presented here, we apply a previously published microsimulation model to two countries: the UK (Great Britain specifically) and the US. We conclude that the effectiveness of any one intervention in isolation is likely to be limited, requiring multiple interventions to be combined to have a substantial impact on transmission.

Two fundamental strategies are possible: (a) mitigation, which focuses on slowing but not necessarily stopping epidemic spread – reducing peak healthcare demand while protecting those most at risk of severe disease from infection, and (b) suppression, which aims to reverse epidemic growth, reducing case numbers to low levels and maintaining that situation indefinitely. Each policy has major challenges. We find that that optimal mitigation policies (combining home isolation of suspect cases, home quarantine of those living in the same household as suspect cases, and social distancing of the elderly and others at most risk of severe disease) might reduce peak healthcare demand by 2/3 and deaths by half. However, the resulting mitigated epidemic would still likely result in hundreds of thousands of deaths and health systems (most notably intensive care units) being overwhelmed many times over. For countries able to achieve it, this leaves suppression as the preferred policy option.

We show that in the UK and US context, suppression will minimally require a combination of social distancing of the entire population, home isolation of cases and household quarantine of their family members. This may need to be supplemented by school and university closures, though it should be recognised that such closures may have negative impacts on health systems due to increased

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

absenteeism. The major challenge of suppression is that this type of intensive intervention package – or something equivalently effective at reducing transmission – will need to be maintained until a vaccine becomes available (potentially 18 months or more) – given that we predict that transmission will quickly rebound if interventions are relaxed. We show that intermittent social distancing – triggered by trends in disease surveillance – may allow interventions to be relaxed temporarily in relative short time windows, but measures will need to be reintroduced if or when case numbers rebound. Last, while experience in China and now South Korea show that suppression is possible in the short term, it remains to be seen whether it is possible long-term, and whether the social and economic costs of the interventions adopted thus far can be reduced.

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

Introduction

The COVID-19 pandemic is now a major global health threat. As of 16th March 2020, there have been 164,837 cases and 6,470 deaths confirmed worldwide. Global spread has been rapid, with 146 countries now having reported at least one case.

The last time the world responded to a global emerging disease epidemic of the scale of the current COVID-19 pandemic with no access to vaccines was the 1918-19 H1N1 influenza pandemic. In that pandemic, some communities, notably in the United States (US), responded with a variety of non-pharmaceutical interventions (NPIs) - measures intended to reduce transmission by reducing contact rates in the general population[1]. Examples of the measures adopted during this time included closing schools, churches, bars and other social venues. Cities in which these interventions were implemented early in the epidemic were successful at reducing case numbers while the interventions remained in place and experienced lower mortality overall[1]. However, transmission rebounded once controls were lifted.

Whilst our understanding of infectious diseases and their prevention is now very different compared to in 1918, most of the countries across the world face the same challenge today with COVID-19, a virus with comparable lethality to H1N1 influenza in 1918. Two fundamental strategies are possible[2]:

(a) **Suppression.** Here the aim is to reduce the reproduction number (the average number of secondary cases each case generates), R, to below 1 and hence to reduce case numbers to low levels or (as for SARS or Ebola) eliminate human-to-human transmission. The main challenge of this approach is that NPIs (and drugs, if available) need to be maintained – at least intermittently - for as long as the virus is circulating in the human population, or until a vaccine becomes available. In the case of COVID-19, it will be at least a 12-18 months before a vaccine is available[3]. Furthermore, there is no guarantee that initial vaccines will have high efficacy.

(b) **Mitigation.** Here the aim is to use NPIs (and vaccines or drugs, if available) not to interrupt transmission completely, but to reduce the health impact of an epidemic, akin to the strategy adopted by some US cities in 1918, and by the world more generally in the 1957, 1968 and 2009 influenza pandemics. In the 2009 pandemic, for instance, early supplies of vaccine were targeted at individuals with pre-existing medical conditions which put them at risk of more severe disease[4]. In this scenario, population immunity builds up through the epidemic, leading to an eventual rapid decline in case numbers and transmission dropping to low levels.

The strategies differ in whether they aim to reduce the reproduction number, R, to below 1 (suppression) – and thus cause case numbers to decline – or to merely slow spread by reducing R, but not to below 1.

In this report, we consider the feasibility and implications of both strategies for COVID-19, looking at a range of NPI measures. It is important to note at the outset that given SARS-CoV-2 is a newly emergent virus, much remains to be understood about its transmission. In addition, the impact of many of the NPIs detailed here depends critically on how people respond to their introduction, which is highly likely to vary between countries and even communities. Last, it is highly likely that there would be significant spontaneous changes in population behaviour even in the absence of government-mandated interventions.

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

We do not consider the ethical or economic implications of either strategy here, except to note that there is no easy policy decision to be made. Suppression, while successful to date in China and South Korea, carries with it enormous social and economic costs which may themselves have significant impact on health and well-being in the short and longer-term. Mitigation will never be able to completely protect those at risk from severe disease or death and the resulting mortality may therefore still be high. Instead we focus on feasibility, with a specific focus on what the likely healthcare system impact of the two approaches would be. We present results for Great Britain (GB) and the United States (US), but they are equally applicable to most high-income countries.

Methods

Transmission Model

We modified an individual-based simulation model developed to support pandemic influenza planning[5,6] to explore scenarios for COVID-19 in GB. The basic structure of the model remains as previously published. In brief, individuals reside in areas defined by high-resolution population density data. Contacts with other individuals in the population are made within the household, at school, in the workplace and in the wider community. Census data were used to define the age and household distribution size. Data on average class sizes and staff-student ratios were used to generate a synthetic population of schools distributed proportional to local population density. Data on the distribution of workplace size was used to generate workplaces with commuting distance data used to locate workplaces appropriately across the population. Individuals are assigned to each of these locations at the start of the simulation.

Transmission events occur through contacts made between susceptible and infectious individuals in either the household, workplace, school or randomly in the community, with the latter depending on spatial distance between contacts. Per-capita contacts within schools were assumed to be double those elsewhere in order to reproduce the attack rates in children observed in past influenza pandemics[7]. With the parameterisation above, approximately one third of transmission occurs in the household, one third in schools and workplaces and the remaining third in the community. These contact patterns reproduce those reported in social mixing surveys[8].

We assumed an incubation period of 5.1 days[9,10]. Infectiousness is assumed to occur from 12 hours prior to the onset of symptoms for those that are symptomatic and from 4.6 days after infection in those that are asymptomatic with an infectiousness profile over time that results in a 6.5-day mean generation time. Based on fits to the early growth-rate of the epidemic in Wuhan[10,11], we make a baseline assumption that R_0=2.4 but examine values between 2.0 and 2.6. We assume that symptomatic individuals are 50% more infectious than asymptomatic individuals. Individual infectiousness is assumed to be variable, described by a gamma distribution with mean 1 and shape parameter α=0.25. On recovery from infection, individuals are assumed to be immune to re-infection in the short term. Evidence from the Flu Watch cohort study suggests that re-infection with the same strain of seasonal circulating coronavirus is highly unlikely in the same or following season (Prof Andrew Hayward, personal communication).

Infection was assumed to be seeded in each country at an exponentially growing rate (with a doubling time of 5 days) from early January 2020, with the rate of seeding being calibrated to give local epidemics which reproduced the observed cumulative number of deaths in GB or the US seen by 14th March 2020.

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

Disease Progression and Healthcare Demand

Analyses of data from China as well as data from those returning on repatriation flights suggest that 40-50% of infections were not identified as cases[12]. This may include asymptomatic infections, mild disease and a level of under-ascertainment. We therefore assume that two-thirds of cases are sufficiently symptomatic to self-isolate (if required by policy) within 1 day of symptom onset, and a mean delay from onset of symptoms to hospitalisation of 5 days. The age-stratified proportion of infections that require hospitalisation and the infection fatality ratio (IFR) were obtained from an analysis of a subset of cases from China[12]. These estimates were corrected for non-uniform attack rates by age and when applied to the GB population result in an IFR of 0.9% with 4.4% of infections hospitalised (Table 1). We assume that 30% of those that are hospitalised will require critical care (invasive mechanical ventilation or ECMO) based on early reports from COVID-19 cases in the UK, China and Italy (Professor Nicholas Hart, personal communication). Based on expert clinical opinion, we assume that 50% of those in critical care will die and an age-dependent proportion of those that do not require critical care die (calculated to match the overall IFR). We calculate bed demand numbers assuming a total duration of stay in hospital of 8 days if critical care is not required and 16 days (with 10 days in ICU) if critical care is required. With 30% of hospitalised cases requiring critical care, we obtain an overall mean duration of hospitalisation of 10.4 days, slightly shorter than the duration from hospital admission to discharge observed for COVID-19 cases internationally[13] (who will have remained in hospital longer to ensure negative tests at discharge) but in line with estimates for general pneumonia admissions[14].

Table 1: Current estimates of the severity of cases. The IFR estimates from Verity et al.[12] have been adjusted to account for a non-uniform attack rate giving an overall IFR of 0.9% (95% credible interval 0.4-0.14). Hospitalisation estimates from Verity et al.[12] were also adjusted in this way and scaled to match expected rates in the oldest age-group (80+ years) in a GB/US context. These estimates will be updated as more data accrue.

Age-group (years)	% symptomatic cases requiring hospitalisation	% hospitalised cases requiring critical care	Infection Fatality Ratio
0 to 9	0.1%	5.0%	0.002%
10 to 19	0.3%	5.0%	0.006%
20 to 29	1.2%	5.0%	0.03%
30 to 39	3.2%	5.0%	0.08%
40 to 49	4.9%	6.3%	0.15%
50 to 59	10.2%	12.2%	0.60%
60 to 69	16.6%	27.4%	2.2%
70 to 79	24.3%	43.2%	5.1%
80+	27.3%	70.9%	9.3%

Non-Pharmaceutical Intervention Scenarios

We consider the impact of five different non-pharmaceutical interventions (NPI) implemented individually and in combination (Table 2). In each case, we represent the intervention mechanistically within the simulation, using plausible and largely conservative (i.e. pessimistic) assumptions about the impact of each intervention and compensatory changes in contacts (e.g. in the home) associated with

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

reducing contact rates in specific settings outside the household. The model reproduces the intervention effect sizes seen in epidemiological studies and in empirical surveys of contact patterns. Two of the interventions (case isolation and voluntary home quarantine) are triggered by the onset of symptoms and are implemented the next day. The other four NPIs (social distancing of those over 70 years, social distancing of the entire population, stopping mass gatherings and closure of schools and universities) are decisions made at the government level. For these interventions we therefore consider surveillance triggers based on testing of patients in critical care (intensive care units, ICUs). We focus on such cases as testing is most complete for the most severely ill patients. When examining mitigation strategies, we assume policies are in force for 3 months, other than social distancing of those over the age of 70 which is assumed to remain in place for one month longer. Suppression strategies are assumed to be in place for 5 months or longer.

Table 2: Summary of NPI interventions considered.

Label	Policy	Description
CI	Case isolation in the home	Symptomatic cases stay at home for 7 days, reducing non-household contacts by 75% for this period. Household contacts remain unchanged. Assume 70% of household comply with the policy.
HQ	Voluntary home quarantine	Following identification of a symptomatic case in the household, all household members remain at home for 14 days. Household contact rates double during this quarantine period, contacts in the community reduce by 75%. Assume 50% of household comply with the policy.
SDO	Social distancing of those over 70 years of age	Reduce contacts by 50% in workplaces, increase household contacts by 25% and reduce other contacts by 75%. Assume 75% compliance with policy.
SD	Social distancing of entire population	All households reduce contact outside household, school or workplace by 75%. School contact rates unchanged, workplace contact rates reduced by 25%. Household contact rates assumed to increase by 25%.
PC	Closure of schools and universities	Closure of all schools, 25% of universities remain open. Household contact rates for student families increase by 50% during closure. Contacts in the community increase by 25% during closure.

Results

In the (unlikely) absence of any control measures or spontaneous changes in individual behaviour, we would expect a peak in mortality (daily deaths) to occur after approximately 3 months (Figure 1A). In such scenarios, given an estimated R_0 of 2.4, we predict 81% of the GB and US populations would be infected over the course of the epidemic. Epidemic timings are approximate given the limitations of surveillance data in both countries: The epidemic is predicted to be broader in the US than in GB and to peak slightly later. This is due to the larger geographic scale of the US, resulting in more distinct localised epidemics across states (Figure 1B) than seen across GB. The higher peak in mortality in GB

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

is due to the smaller size of the country and its older population compared with the US. In total, in an unmitigated epidemic, we would predict approximately 510,000 deaths in GB and 2.2 million in the US, not accounting for the potential negative effects of health systems being overwhelmed on mortality.

Figure 1: Unmitigated epidemic scenarios for GB and the US. (A) Projected deaths per day per 100,000 population in GB and US. (B) Case epidemic trajectories across the US by state.

For an uncontrolled epidemic, we predict critical care bed capacity would be exceeded as early as the second week in April, with an eventual peak in ICU or critical care bed demand that is over 30 times greater than the maximum supply in both countries (Figure 2).

The aim of mitigation is to reduce the impact of an epidemic by flattening the curve, reducing peak incidence and overall deaths (Figure 2). Since the aim of mitigation is to minimise mortality, the interventions need to remain in place for as much of the epidemic period as possible. Introducing such interventions too early risks allowing transmission to return once they are lifted (if insufficient herd immunity has developed); it is therefore necessary to balance the timing of introduction with the scale

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

of disruption imposed and the likely period over which the interventions can be maintained. In this scenario, interventions can limit transmission to the extent that little herd immunity is acquired – leading to the possibility that a second wave of infection is seen once interventions are lifted

Figure 2: Mitigation strategy scenarios for GB showing critical care (ICU) bed requirements. The black line shows the unmitigated epidemic. The green line shows a mitigation strategy incorporating closure of schools and universities; orange line shows case isolation; yellow line shows case isolation and household quarantine; and the blue line shows case isolation, home quarantine and social distancing of those aged over 70. The blue shading shows the 3-month period in which these interventions are assumed to remain in place.

Table 3 shows the predicted relative impact on both deaths and ICU capacity of a range of single and combined NPIs interventions applied nationally in GB for a 3-month period based on triggers of between 100 and 3000 critical care cases. Conditional on that duration, the most effective combination of interventions is predicted to be a combination of case isolation, home quarantine and social distancing of those most at risk (the over 70s). Whilst the latter has relatively less impact on transmission than other age groups, reducing morbidity and mortality in the highest risk groups reduces both demand on critical care and overall mortality. In combination, this intervention strategy is predicted to reduce peak critical care demand by two-thirds and halve the number of deaths. However, this "optimal" mitigation scenario would still result in an 8-fold higher peak demand on critical care beds over and above the available surge capacity in both GB and the US.

Stopping mass gatherings is predicted to have relatively little impact (results not shown) because the contact-time at such events is relatively small compared to the time spent at home, in schools or workplaces and in other community locations such as bars and restaurants.

Overall, we find that the relative effectiveness of different policies is insensitive to the choice of local trigger (absolute numbers of cases compared to per-capita incidence), R_0 (in the range 2.0-2.6), and varying IFR in the 0.25%-1.0% range.

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

Table 3. Mitigation options for GB. Relative impact of NPI combinations applied nationally for 3 months in GB on total deaths and peak hospital ICU bed demand for different choices of cumulative ICU case count triggers. The cells show the percentage reduction in peak ICU bed demand for a variety of NPI combinations and for triggers based on the absolute number of ICU cases diagnosed in a county per week. PC=school and university closure, CI=home isolation of cases, HQ=household quarantine, SD=social distancing of the entire population, SDOL70=social distancing of those over 70 years for 4 months (a month more than other interventions). Tables are colour-coded (green=higher effectiveness, red=lower). Absolute numbers are shown in Table A1.

	Trigger (cumulative ICU cases)	PC	CI	CI_HQ	CI_HQ_SD	CI_SD	CI_HQ_SDOL70	PC_CI_HQ_SDOL70

FL-DOH-20-0900-A-009199

Given that mitigation is unlikely to be a viable option without overwhelming healthcare systems, suppression is likely necessary in countries able to implement the intensive controls required. Our projections show that to be able to reduce R to close to 1 or below, a combination of case isolation, social distancing of the entire population and either household quarantine or school and university closure are required (Figure 3, Table 4). Measures are assumed to be in place for a 5-month duration. Not accounting for the potential adverse effect on ICU capacity due to absenteeism, school and university closure is predicted to be more effective in achieving suppression household quarantine. All four interventions combined are predicted to have the largest effect on transmission (Table 4). Such an intensive policy is predicted to result in a reduction in critical care requirements from a peak approximately 3 weeks after the interventions are introduced and a decline thereafter while the intervention policies remain in place. While there are many uncertainties in policy effectiveness, such a combined strategy is the most likely one to ensure that critical care bed requirements would remain within surge capacity.

Figure 3: Suppression strategy scenarios for GB showing ICU bed requirements. The black line shows the unmitigated epidemic. Green shows a suppression strategy incorporating closure of schools and universities, case isolation and population-wide social distancing beginning in late March 2020. The orange line shows a containment strategy incorporating case isolation, household quarantine and population-wide social distancing. The red line is the estimated surge ICU bed capacity in GB. The blue shading shows the 5-month period in which these interventions are assumed to remain in place. (B) shows the same data as in panel (A) but zoomed in on the lower levels of the graph. An equivalent figure for the US is shown in the Appendix.

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

Adding household quarantine to case isolation and social distancing is the next best option, although we predict that there is a risk that surge capacity may be exceeded under this policy option (Figure 3 and Table 4). Combining all four interventions (social distancing of the entire population, case isolation, household quarantine and school and university closure) is predicted to have the largest impact, short of a complete lockdown which additionally prevents people going to work.

Once interventions are relaxed (in the example in Figure 3, from September onwards), infections begin to rise, resulting in a predicted peak epidemic later in the year. The more successful a strategy is at temporary suppression, the larger the later epidemic is predicted to be in the absence of vaccination, due to lesser build-up of herd immunity.

Given suppression policies may need to be maintained for many months, we examined the impact of an adaptive policy in which social distancing (plus school and university closure, if used) is only initiated after weekly confirmed case incidence in ICU patients (a group of patients highly likely to be tested) exceeds a certain "on" threshold, and is relaxed when ICU case incidence falls below a certain "off" threshold (Figure 4). Case-based policies of home isolation of symptomatic cases and household quarantine (if adopted) are continued throughout.

Such policies are robust to uncertainty in both the reproduction number, R_0 (Table 4) and in the severity of the virus (i.e. the proportion of cases requiring ICU admission, not shown). Table 3 illustrates that suppression policies are best triggered early in the epidemic, with a cumulative total of 200 ICU cases per week being the latest point at which policies can be triggered and still keep peak ICU demand below GB surge limits in the case of a relatively high R_0 value of 2.6. Expected total deaths are also reduced for lower triggers, though deaths for all the policies considered are much lower than for an uncontrolled epidemic. The right panel of Table 4 shows that social distancing (plus school and university closure, if used) need to be in force for the majority of the 2 years of the simulation, but that the proportion of time these measures are in force is reduced for more effective interventions and for lower values of R_0. Table 5 shows that total deaths are reduced with lower "off" triggers; however, this also leads to longer periods during which social distancing is in place. Peak ICU demand and the proportion of time social distancing is in place are not affected by the choice of "off" trigger.

AMERICAN OVERSIGHT

Table 4. Suppression strategies for GB. Impact of three different policy option (case isolation + home quarantine + social distancing, school/university closure + case isolation + social distancing, and all four interventions) on the total number of deaths seen in a 2-year period (left panel) and peak demand for ICU beds (centre panel). Social distancing and school/university closure are triggered at a national level when weekly numbers of new COVID-19 cases diagnosed in ICUs exceed the thresholds listed under "On trigger" and are suspended when weekly ICU cases drop to 25% of that trigger value. Other policies are assumed to start in late March and remain in place. The right panel shows the proportion of time after policy start that social distancing is in place. Peak GB ICU surge capacity is approximately 5000 beds. Results are qualitatively similar for the US.

Discussion

As the COVID-19 pandemic progresses, countries are increasingly implementing a broad range of responses. Our results demonstrate that it will be necessary to layer multiple interventions, regardless of whether suppression or mitigation is the overarching policy goal. However, suppression will require the layering of more intensive and socially disruptive measures than mitigation. The choice of interventions ultimately depends on the relative feasibility of their implementation and their likely effectiveness in different social contexts.

Disentangling the relative effectiveness of different interventions from the experience of countries to date is challenging because many have implemented multiple (or all) of these measures with varying degrees of success. Through the hospitalisation of all cases (not just those requiring hospital care), China in effect initiated a form of case isolation, reducing onward transmission from cases in the household and in other settings. At the same time, by implementing population-wide social distancing, the opportunity for onward transmission in all locations was rapidly reduced. Several studies have estimated that these interventions reduced R to below 1[15]. In recent days, these measures have begun to be relaxed. Close monitoring of the situation in China in the coming weeks will therefore help to inform strategies in other countries.

Overall, our results suggest that population-wide social distancing applied to the population as a whole would have the largest impact; and in combination with other interventions – notably home isolation of cases and school and university closure – has the potential to suppress transmission below the threshold of R=1 required to rapidly reduce case incidence. A minimum policy for effective suppression

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT
FL-DOH-20-0900-A-009204

is therefore population-wide social distancing combined with home isolation of cases and school and university closure.

To avoid a rebound in transmission, these policies will need to be maintained until large stocks of vaccine are available to immunise the population – which could be 18 months or more. Adaptive hospital surveillance-based triggers for switching on and off population-wide social distancing and school closure offer greater robustness to uncertainty than fixed duration interventions and can be adapted for regional use (e.g. at the state level in the US). Given local epidemics are not perfectly synchronised, local policies are also more efficient and can achieve comparable levels of suppression to national policies while being in force for a slightly smaller proportion of the time. However, we estimate that for a national GB policy, social distancing would need to be in force for at least 2/3 of the time (for R_0=2.4, see Table 4) until a vaccine was available.

However, there are very large uncertainties around the transmission of this virus, the likely effectiveness of different policies and the extent to which the population spontaneously adopts risk reducing behaviours. This means it is difficult to be definitive about the likely initial duration of measures which will be required, except that it will be several months. Future decisions on when and for how long to relax policies will need to be informed by ongoing surveillance.

The measures used to achieve suppression might also evolve over time. As case numbers fall, it becomes more feasible to adopt intensive testing, contact tracing and quarantine measures akin to the strategies being employed in South Korea today. Technology – such as mobile phone apps that track an individual's interactions with other people in society – might allow such a policy to be more effective and scalable if the associated privacy concerns can be overcome. However, if intensive NPI packages aimed at suppression are not maintained, our analysis suggests that transmission will rapidly rebound, potentially producing an epidemic comparable in scale to what would have been seen had no interventions been adopted.

Long-term suppression may not be a feasible policy option in many countries. Our results show that the alternative relatively short-term (3-month) mitigation policy option might reduce deaths seen in the epidemic by up to half, and peak healthcare demand by two-thirds. The combination of case isolation, household quarantine and social distancing of those at higher risk of severe outcomes (older individuals and those with other underlying health conditions) are the most effective policy combination for epidemic mitigation. Both case isolation and household quarantine are core epidemiological interventions for infectious disease mitigation and act by reducing the potential for onward transmission through reducing the contact rates of those that are known to be infectious (cases) or may be harbouring infection (household contacts). The WHO China Joint Mission Report suggested that 80% of transmission occurred in the household[16], although this was in a context where interpersonal contacts were drastically reduced by the interventions put in place. Social distancing of high-risk groups is predicted to be particularly effective at reducing severe outcomes given the strong evidence of an increased risk with age[12,16] though we predict it would have less effect in reducing population transmission.

We predict that school and university closure will have an impact on the epidemic, under the assumption that children do transmit as much as adults, even if they rarely experience severe disease[12,16]. We find that school and university closure is a more effective strategy to support epidemic suppression than mitigation; when combined with population-wide social distancing, the effect of

DOI: https://doi.org/10.25561/77482

AMERICAN OVERSIGHT

school closure is to further amplify the breaking of social contacts between households, and thus supress transmission. However, school closure is predicted to be insufficient to mitigate (never mind supress) an epidemic in isolation; this contrasts with the situation in seasonal influenza epidemics, where children are the key drivers of transmission due to adults having higher immunity levels[17,18].

The optimal timing of interventions differs between suppression and mitigation strategies, as well as depending on the definition of optimal. However, for mitigation, the majority of the effect of such a strategy can be achieved by targeting interventions in a three-month window around the peak of the epidemic. For suppression, early action is important, and interventions need to be in place well before healthcare capacity is overwhelmed. Given the most systematic surveillance occurs in the hospital context, the typical delay from infection to hospitalisation means there is a 2- to 3-week lag between interventions being introduced and the impact being seen in hospitalised case numbers, depending on whether all hospital admissions are tested or only those entering critical care units. In the GB context, this means acting before COVID-19 admissions to ICUs exceed 200 per week.

Perhaps our most significant conclusion is that mitigation is unlikely to be feasible without emergency surge capacity limits of the UK and US healthcare systems being exceeded many times over. In the most effective mitigation strategy examined, which leads to a single, relatively short epidemic (case isolation, household quarantine and social distancing of the elderly), the surge limits for both general ward and ICU beds would be exceeded by at least 8-fold under the more optimistic scenario for critical care requirements that we examined. In addition, even if all patients were able to be treated, we predict there would still be in the order of 250,000 deaths in GB, and 1.1-1.2 million in the US.

In the UK, this conclusion has only been reached in the last few days, with the refinement of estimates of likely ICU demand due to COVID-19 based on experience in Italy and the UK (previous planning estimates assumed half the demand now estimated) and with the NHS providing increasing certainty around the limits of hospital surge capacity.

We therefore conclude that epidemic suppression is the only viable strategy at the current time. The social and economic effects of the measures which are needed to achieve this policy goal will be profound. Many countries have adopted such measures already, but even those countries at an earlier stage of their epidemic (such as the UK) will need to do so imminently.

Our analysis informs the evaluation of both the nature of the measures required to suppress COVID-19 and the likely duration that these measures will need to be in place. Results in this paper have informed policymaking in the UK and other countries in the last weeks. However, we emphasise that is not at all certain that suppression will succeed long term; no public health intervention with such disruptive effects on society has been previously attempted for such a long duration of time. How populations and societies will respond remains unclear.

Duchin, MD[1]; Public Health – Seattle & King County, EvergreenHealth, and CDC COVID-19 Investigation Team.

On February 28, 2020, a case of coronavirus disease (COVID-19) was identified in a woman resident of a long-term care skilled nursing facility (facility A) in King County, Washington.* Epidemiologic investigation of facility A identified 129 cases of COVID-19 associated with facility A, including 81 of the residents, 34 staff members, and 14 visitors; 23 persons died. Limitations in effective infection control and prevention and staff members working in multiple facilities contributed to intra- and interfacility spread. COVID-19 can spread rapidly in long-term residential care facilities, and persons with chronic underlying medical conditions are at greater risk for COVID-19–associated severe disease and death. Long-term care facilities should take proactive steps to protect the health of residents and preserve the health care workforce by identifying and excluding potentially infected staff members and visitors, ensuring early recognition of potentially infected patients, and implementing appropriate infection control measures.

On February 27, Public Health – Seattle and King County (PHSKC) was notified by a local health care provider of a patient whose symptom history and clinical presentation met the revised testing criteria† for COVID-19, which included testing of persons with severe respiratory illness of unknown etiology (*1*). The patient was a woman aged 73 years with a history of coronary artery disease, insulin-dependent type II diabetes mellitus, obesity, chronic kidney disease, hypertension, and congestive heart failure, who resided in facility A along with approximately 130 residents who were cared for by 170 health care personnel. Beginning in mid-February, the facility had experienced a cluster of febrile respiratory illnesses. Rapid influenza test results were obtained from several residents; all were negative. The patient had cough, fever, and shortness of breath requiring oxygen for 5 days at facility A. She reported no travel or known contact with anyone with COVID-19. On February 24, she was transported to a local hospital because of worsening respiratory symptoms and hypoxemia.

Upon hospital admission, the patient was febrile to 103.3°F (39.6°C), tachycardic, and was found to have hypoxemic respiratory failure. On February 25, she required intubation and mechanical ventilation. Computed tomography scan showed diffuse bilateral infiltrates; however, multiplex viral respiratory panel and bacterial cultures of sputum and bronchoalveolar lavage fluid were negative. Four days after hospital admission, nasopharyngeal and oropharyngeal swabs and sputum specimens were collected to test for SARS-CoV-2; results were reported positive for all specimens on February 28. The patient died on March 2.

Following notification of the index case of COVID-19, PHSKC and CDC immediately began investigating the cluster of respiratory illness in facility A to collect information on symptoms, severity, comorbidities, travel history, and close contacts to known COVID-19 cases by interviewing patients or a proxy for cases in which the patient could not be interviewed. Diagnostic testing by real-time reverse transcription–polymerase chain reaction (RT-PCR) (*2–5*) was performed for patients and staff members meeting clinical case criteria

* The facility provides inpatient and outpatient rehabilitation and short-term and long-term care. Services include physical therapy, occupational therapy, and speech therapy. The facility, which has a medical director, also provides medication management and post-surgical care.

U.S. Department of Health and Human Services
Centers for Disease Control and Prevention

AMERICAN OVERSIGHT

for COVID-19 (*1*). As of March 9, a total of 129 COVID-19 cases were confirmed among facility residents (81 of approximately 130), staff members, including health care personnel (34), and visitors (14). Health care personnel with confirmed COVID-19 included the following occupations: physical therapist, occupational therapist assistant, environmental care worker, nurse, certified nursing assistant, health information officer, physician, and case manager. Overall, 111 (86%) cases occurred among residents of King County (81 facility A residents, 17 staff members, and 13 visitors) and 18 (14%) among residents of Snohomish County (directly north of King County) (17 staff members and one visitor).

Reported symptom onset dates for facility residents and staff members ranged from February 16 to March 5. The median patient age was 81 years (range = 54–100 years) among facility residents, 42.5 years (range = 22–79 years) among staff members, and 62.5 years (range = 52–88 years) among visitors; 84 (65.1%) patients were women (Table). Overall, 56.8% of facility A residents, 35.7% of visitors, and 5.9% of staff members with COVID-19 were hospitalized. Preliminary case fatality rates among residents and visitors as of March 9 were 27.2% and 7.1%, respectively; no deaths occurred among staff members. The most common chronic underlying conditions among facility residents were hypertension (69.1%), cardiac disease (56.8%), renal disease (43.2%), diabetes (37.0%), obesity (33.3%), and pulmonary disease (32.1%). Six residents and one visitor had hypertension as their only chronic underlying condition.

As part of the response effort, approximately 100 long-term care facilities in King County were contacted through an emailed survey using REDCap (*6*), and information was requested about residents or staff members known to have COVID-19 or clusters of respiratory illness among residents and staff members. In addition, countywide databases of emergency medical service transfers from long-term care facilities to acute care facilities were reviewed daily for evidence of cases or clusters of serious respiratory illness. Routine active surveillance reports to PHSKC for influenza-like illness clusters from long-term care facilities were employed to identify clusters of illness consistent with COVID-19. All long-term care facilities with evidence of a cluster of respiratory illness were contacted by telephone for additional information, including infection control strategies in place and availability of personal protective equipment (PPE). Based on this information, the long-term care facilities were prioritized by risk for COVID-19 introduction and spread, and highest priority facilities were visited by response personnel for provision of emergency on-site testing and infection control assessment, support, and training. As of March 9, at least eight other King County skilled nursing and assisted living facilities had reported one or more confirmed COVID-19 cases.

Information received from the survey and on-site visits identified factors that likely contributed to the vulnerability of these facilities, including 1) staff members who worked while symptomatic; 2) staff members who worked in more than one facility; 3) inadequate familiarity and adherence to standard, droplet, and contact precautions and eye protection recommendations; 4) challenges to implementing infection control practices including inadequate supplies of PPE and other items (e.g., alcohol-based hand sanitizer)[§]; 5) delayed recognition of cases because of low index of suspicion, limited testing availability, and difficulty identifying persons with COVID-19 based on signs and symptoms alone.

Discussion

These findings demonstrate that outbreaks of COVID-19 in long-term care facilities can have a critical impact on vulnerable older adults. In Washington, local and state authorities implemented comprehensive prevention measures for long-term care facilities (*7–9*) that included 1) implementation of symptom screening and restriction policies for visitors and nonessential personnel; 2) active screening of health care personnel, including measurement and documentation of body temperature and ascertainment of respiratory symptoms to identify and exclude symptomatic workers; 3) symptom monitoring of residents; 4) social distancing, including restricting resident movement and group activities; 5) staff training on infection control and PPE use; and 6) establishment of plans to address local PPE shortages, including county and state coordination of supply chains and stockpile releases to meet needs. These strategies require coordination and support from public health authorities, partnering health care systems, regulatory agencies, and their respective governing bodies (*8–10*).

The findings in this report suggest that once COVID-19 has been introduced into a long-term care facility, it has the potential to result in high attack rates among residents, staff members, and visitors. In the context of rapidly escalating COVID-19 outbreaks in much of the United States, it is critical that long-term care facilities implement active measures to prevent introduction of COVID-19. Measures to consider include identifying and excluding symptomatic staff members, restricting visitation except in compassionate care situations, and strengthening infection prevention and control guidance and adherence (*7,9,10*).[¶] Substantial morbidity and mortality

[§] Some examples of specific PPE challenges included initial lack of access to eye protection, frequent changing of PPE types as supply chains were disrupted and PPE was provided via various donations or supplies, and a need for ongoing auditing of PPE use to ensure consistent and safe use of PPE by staff members (e.g., not touching or adjusting face protection, primarily facemasks, during extended use).

* Percentages represent the number with information on the comorbidity, irrespective of missing data.
† Data on chronic underlying conditions were missing for four health care personnel and two visitors with COVID-19.
§ Hypertension was the only reported chronic underlying condition for 6 residents and 1 visitor with COVID-19.

Summary

What is already known about this topic?

Coronavirus disease (COVID-19) can cause severe illness and death, particularly among older adults with chronic health conditions.

What is added by this report?

Introduction of COVID-19 into a long-term residential care facility in Washington resulted in cases among 81 residents, 34 staff members, and 14 visitors; 23 persons died. Limitations in effective infection control and prevention and staff members working in multiple facilities contributed to intra- and interfacility spread.

What are the implications for public health practice?

Long-term care facilities should take proactive steps to protect the health of residents and preserve the health care workforce by identifying and excluding potentially infected staff members, restricting visitation except in compassionate care situations, ensuring early recognition of potentially infected patients, and implementing appropriate infection control measures.

might be averted if all long-term care facilities take steps now to prevent exposure of their residents to COVID-19. The underlying health conditions and advanced age of many long-term care facility residents and the shared location of patients in one facility places these persons at risk for severe morbidity and death. Rapid and sustained public health interventions focusing on surveillance, infection control, and mitigation efforts are resource-intensive but are critical to curtailing COVID-19 transmission and decreasing the impact on vulnerable populations, such as residents of long-term care facilities, and the community at large. As this pandemic expands, continued implementation of public health measures targeting vulnerable populations such as residents of long-term care facilities (*8*) and health care personnel will be critical. As public health measures are continually implemented, public information needs will only grow. To provide information for patients and families as well as communicate more broadly to all stakeholders, public officials and other community leaders need to work together to encourage everyone to understand and adhere to recommended guidelines to manage this outbreak.

March 18, 2020

Severe Outcomes Among Patients with Coronavirus Disease 2019 (COVID-19) — United States, February 12–March 16, 2020

CDC COVID-19 Response Team

Globally, approximately 170,000 confirmed cases of coronavirus disease 2019 (COVID-19) caused by the 2019 novel coronavirus (SARS-CoV-2) have been reported, including an estimated 7,000 deaths in approximately 150 countries (*1*). On March 11, 2020, the World Health Organization declared the COVID-19 outbreak a pandemic (*2*). Data from China have indicated that older adults, particularly those with serious underlying health conditions, are at higher risk for severe COVID-19–associated illness and death than are younger persons (*3*). Although the majority of reported COVID-19 cases in China were mild (81%), approximately 80% of deaths occurred among adults aged ≥60 years; only one (0.1%) death occurred in a person aged ≤19 years (*3*). In this report, COVID-19 cases in the United States that occurred during February 12–March 16, 2020 and severity of disease (hospitalization, admission to intensive care unit [ICU], and death) were analyzed by age group. As of March 16, a total of 4,226 COVID-19 cases in the United States had been reported to CDC, with multiple cases reported among older adults living in long-term care facilities (*4*). Overall, 31% of cases, 45% of hospitalizations, 53% of ICU admissions, and 80% of deaths associated with COVID-19 were among adults aged ≥65 years with the highest percentage of severe outcomes among persons aged ≥85 years. In contrast, no ICU admissions or deaths were reported among persons aged ≤19 years. Similar to reports from other countries, this finding suggests that the risk for serious disease and death from COVID-19 is higher in older age groups.

Data from cases reported from 49 states, the District of Columbia, and three U.S. territories (*5*) to CDC during February 12–March 16 were analyzed. Cases among persons repatriated to the United States from Wuhan, China and from Japan (including patients repatriated from cruise ships) were excluded. States and jurisdictions voluntarily reported data on laboratory-confirmed cases of COVID-19 using previously developed data collection forms (*6*). The cases described in this report include both COVID-19 cases confirmed by state or local public health laboratories as well as those with a positive test at the state or local public health laboratories and confirmation at CDC. No data on serious underlying health conditions were available. Data on these cases are preliminary and are missing for some key characteristics of interest, including hospitalization status (1,514), ICU admission (2,253), death (2,001), and age (386). Because of these missing data, the percentages of hospitalizations, ICU admissions, and deaths (case-fatality percentages) were estimated as a range. The lower bound of these percentages was estimated by using all cases within each age group as denominators. The corresponding upper bound of these percentages was estimated by using only cases with known information on each outcome as denominators.

As of March 16, a total of 4,226 COVID-19 cases had been reported in the United States, with reports increasing to 500 or more cases per day beginning March 14 (Figure 1). Among 2,449 patients with known age, 6% were aged ≥85, 25% were aged 65–84 years, 18% each were aged 55–64 years and 45–54 years, and 29% were aged 20–44 years (Figure 2). Only 5% of cases occurred in persons aged 0–19 years.

Among 508 (12%) patients known to have been hospitalized, 9% were aged ≥85 years, 36% were aged 65–84 years, 17% were aged 55–64 years, 18% were 45–54 years, and 20% were aged 20–44 years. Less than 1% of hospitalizations were among persons aged ≤19 years (Figure 2). The percentage of persons hospitalized increased with age, from 2%–3% among persons aged ≤9 years, to ≥31% among adults aged ≥85 years. (Table).

Among 121 patients known to have been admitted to an ICU, 7% of cases were reported among adults ≥85 years, 46% among adults aged 65–84 years, 36% among adults aged 45–64 years, and 12% among adults aged 20–44 years (Figure 2). No ICU admissions were reported among persons

Centers for Disease Control and Prevention

AMERICAN OVERSIGHT

FIGURE 1. Number of new coronavirus disease 2019 (COVID-19) cases reported daily*,† (N = 4,226) — United States, February 12–March 16, 2020

* Includes both COVID-19 cases confirmed by state or local public health laboratories, as well as those testing positive at the state or local public health laboratories and confirmed at CDC.
† Cases identified before February 28 were aggregated and reported during March 1–3.

aged ≤19 years. Percentages of ICU admissions were lowest among adults aged 20–44 years (2%–4%) and highest among adults aged 75–84 years (11%–31%) (Table).

Among 44 cases with known outcome, 15 (34%) deaths were reported among adults aged ≥85 years, 20 (46%) among adults aged 65–84 years, and nine (20%) among adults aged 20–64 years. Case-fatality percentages increased with increasing age, from no deaths reported among persons aged ≤19 years to highest percentages (10%–27%) among adults aged ≥85 years (Table) (Figure 2).

Discussion

Since February 12, 4,226 COVID-19 cases were reported in the United States; 31% of cases, 45% of hospitalizations, 53% of ICU admissions, and 80% of deaths occurred among adults aged ≥65 years with the highest percentage of severe outcomes among persons aged ≥85 years. These findings are similar to data from China, which indicated >80% of deaths occurred among persons aged ≥60 years (*3*). These preliminary data also demonstrate that severe illness leading to hospitalization, including ICU admission and death, can occur in adults of any age with COVID-19. In contrast, persons aged ≤19 years appear to have milder COVID-19 illness, with almost no hospitalizations or deaths reported to date in the United States in this age group. Given the spread of COVID-19 in many U.S. communities, CDC continues to update current recommendations and develop new resources and guidance, including for adults aged ≥65 years as well as those involved in their care (*7*,*8*).

Approximately 49 million U.S. persons are aged ≥65 years (*9*), and many of these adults, who are at risk for severe COVID-19–associated illness, might depend on services and support to maintain their health and independence. To prepare for potential COVID-19 illness among persons at high risk, family members and caregivers of older adults should know what medications they are taking and ensure that food and required medical supplies are available. Long-term care facilities should be particularly vigilant to prevent the introduction and spread of COVID-19 (*10*). In addition, clinicians who care for adults should be aware that COVID-19 can result in severe disease among persons of all ages. Persons with suspected or confirmed COVID-19 should monitor their symptoms and call their provider for guidance if symptoms worsen or seek emergency care for persistent severe symptoms. Additional guidance is available

§ Illness outcome or death missing or unknown for 2,001 cases.

for health care providers on CDC's website (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).

This report describes the current epidemiology of COVID-19 in the United States, using preliminary data. The findings in this report are subject to at least five limitations. First, data were missing for key variables of interest. Data on age and outcomes, including hospitalization, ICU admission, and death, were missing for 9%–53% of cases, which likely resulted in an underestimation of these outcomes. Second, further time for follow-up is needed to ascertain outcomes among active cases. Third, the initial approach to testing was to identify patients among those with travel histories or persons with more severe disease, and these data might overestimate the prevalence of severe disease. Fourth, data on other risk factors, including serious underlying health conditions that could increase risk for complications and severe illness, were unavailable at the time of this analysis. Finally, limited testing to date underscores the importance of ongoing surveillance of COVID-19 cases. Additional investigation will increase the understanding about persons who are at risk for severe illness and death from COVID-19 and inform clinical guidance and community-based mitigation measures.*

75–84 (210)	30.5–58.7	10.5–31.0	4.3–10.5
≥85 (144)	31.3–70.3	6.3–29.0	10.4–27.3
Total (2,449)	**20.7–31.4**	**4.9–11.5**	**1.8–3.4**

* Lower bound of range = number of persons hospitalized, admitted to ICU, or who died among total in age group; upper bound of range = number of persons hospitalized, admitted to ICU, or who died among total in age group with known hospitalization status, ICU admission status, or death.

The risk for serious disease and death in COVID-19 cases among persons in the United States increases with age. Social distancing is recommended for all ages to slow the spread of the virus, protect the health care system, and help protect vulnerable older adults. Further, older adults should maintain adequate supplies of nonperishable foods and at least a 30-day supply of necessary medications, take precautions to keep space between themselves and others, stay away from those who are sick, avoid crowds as much as possible, avoid cruise travel and

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-009219

Summary

What is already known about this topic?

Early data from China suggest that a majority of coronavirus disease 2019 (COVID-19) deaths have occurred among adults aged ≥60 years and among persons with serious underlying health conditions.

What is added by this report?

This first preliminary description of outcomes among patients with COVID-19 in the United States indicates that fatality was highest in persons aged ≥85, ranging from 10% to 27%, followed by 3% to 11% among persons aged 65–84 years, 1% to 3% among persons aged 55-64 years, <1% among persons aged 20–54 years, and no fatalities among persons aged ≤19 years.

What are the implications for public health practice?

COVID-19 can result in severe disease, including hospitalization, admission to an intensive care unit, and death, especially among older adults. Everyone can take actions, such as social distancing, to help slow the spread of COVID-19 and protect older adults from severe illness.

nonessential air travel, and stay home as much as possible to further reduce the risk of being exposed (*7*). Persons of all ages and communities can take actions to help slow the spread of COVID-19 and protect older adults.[†]

Coronavirus Disease 2019 (COVID-19)

Implementation of Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential COVID-2019 Exposure in Travel-associated or Community Settings for Asymptomatic Persons

Version ~~2.23~~ | ~~February~~ March ~~XX~~11, 2020

Florida HEALTH

Summary

- The Department of Health (DOH) will implement risk assessment and public health management of all persons potentially at risk for COVID-19 according to guidelines from The Centers for Disease Control and Prevention (CDC).
- DOH will only be implementing these guidelines prospectively for persons arriving in the United States, or otherwise identified as at-risk, on or after February 3, 2020.
- It is anticipated that in the coming weeks to months most persons needing to undergo active monitoring, or self-monitoring with public health supervision, will be in the medium-risk category.
- Contact investigations in response to confirmed cases and any person who potentially meet the high risk criteria should be discussed on a case-by-case basis with the Bureau of Epidemiology.
- County health officers and epidemiology staff should work with Central Office to plan for seeking public health orders for isolation or quarantine, in the event that these orders are needed to prevent the spread of disease.
- CDC and DOH guidance is interim and expected to change. Documents on this topic dated after the version date supersede this one.

Implementation in Florida

This document describes how DOH will implement the CDC guidelines described here: Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential 2019 Novel Coronavirus (2019-nCoV) Exposure in Travel-associated or Community Settings

Notification: The Bureau of Epidemiology will notify county health department primary epidemiology contacts of persons meeting criteria for monitoring within 24 hours of receiving the information about persons at-risk for COVID-19 from CDC.

Expectations: County health departments (CHDs) will initiate monitoring within 24 hours of receiving information about persons at-risk for COVID-19. Staff will conduct risk assessment and monitoring, as defined in the CDC and DOH guidance, for any at-risk persons that traveled from China or Iran, or part of a conveyance contact investigations identified by the department, whether sent from CDC or other reliable sources (i.e. CHD staff, hospitals/health care, etc.).

All persons traveling from countries with a level 3 travel advisory should self-isolate and practice social distancing for 14 days. Persons traveling from countries with a level 2 travel advisory or from cruises should self-monitor for symptoms. Unless specified above, CHDs are not asked to track/monitor these persons.

Formatted: Highlight

Summary Recommendations for Asymptomatic Persons with Potential COVID-19 Risk

Risk Category	Movement Restriction and Public Activities	Type of Monitoring Permissible	Travel Restrictions
High Risk	Quarantined (voluntary or under public health orders)	Direct active monitoring, once daily in-person, or remote equivalent, temperature and symptom check	Controlled travel

AMERICAN OVERSIGHT

Medium Risk	Remain at home or in a comparable setting to the extent possible. Avoid congregate settings, limit public activities, and practice social distancing. Persons are excluded from public places, schools, public conveyances, and work* for duration of the potential incubation period.	Category 1–Close contact of case or airline contact risk: Active monitoring, ~~initial in-person~~ with ~~contact followed by~~ daily phone call. Category 2–Including travelers from ~~China (not Hubei province) travel risk~~countries with Level 3 CDC travel advisory or identified as part of a cruise ship contact investigation: Self-monitoring with public health supervision. Phone ~~Initial in-person contact followed by phone~~ calls every 3rd day, including weekends. All persons should record their temperature twice daily.	Postpone additional travel after reaching their destination.
Low Risk	No restriction	Self-observation: Initial phone contact with county health department with guidance to immediately notify the CHD if fever or respiratory symptoms develop. Including travelers form countries with level 2 travel advisory and cruise passengers not included in a conveyance contact investigation	None

*In limited circumstances, as determined on a case-by-case basis through consultation with the Bureau of Epidemiology, persons may be allowed to work in a setting that provides clear distancing from others. If available, working remotely is requested.

For all persons:

AMERICAN OVERSIGHT

- Upon initial phone contact, re-evaluate the risk status of travelers using the CDC criteria. Note: Changing planes, without leaving the airport, in ~~China~~ affected regions ~~are~~ is not considered to be a risk for COVID-19.
- For persons who are determined not to be in Florida, notify Bureau of Epidemiology monitoring unit to transfer them to another jurisdiction.
- For invalid phone numbers and addresses, use Lexis-Nexis to attempt to find better information.
- For person who are unable to be contacted after multiple phone calls and emails, and a home visit attempt. Document them as "contact attempted, no response" in Merlin.

For high risk persons:

- Contact the Bureau of Epidemiology for quarantine guidance.

For medium risk persons:

- Following initial phone contact, ~~conduct an in-person meeting scheduled on the next business day to~~ provide written material on symptom monitoring, phone call schedule, when and who to call with questions or to report illness, and a thermometer (if needed).
- If symptoms develop: Immediate isolation at home or a health care facility is necessary.
- If persons miss more than one monitoring day, or are otherwise not cooperative, please contact the Bureau of Epidemiology.

Persons in all risk levels should contact the established CHD point of contact if they experience fever (subjective or measured), cough, or shortness of breath.

The CHD should determine if the person is going to seek health care, and if so, coordinate prior notification of the facilities or emergency medical services staff to ensure immediate implementation of infection control precautions. Please refer to COVID-19 - Interim Enhanced Surveillance Guidance for County Health Departments for guidance on symptomatic persons under investigation (PUI).

The CHD should prepare to provide essential services (i.e. shelter, food, water, and other necessities) to persons in quarantine and in limited circumstances where no social support system exists, to persons under active monitoring or self-monitoring with public health supervision.

For persons who need to communicate in other languages, CHD staff should utilize the Language Line services by calling 866-874-3972. Staff should be prepared to provide the CHD client ID number, which can be provided by the CHD's budget office.

Tracking Monitoring of Persons At-Risk for COVID-19 in Merlin

See COVID-19 merlin data management guidance. ~~Persons meeting high or medium risk criteria for monitoring should be entered into Merlin **within 24 hours of CHD notification**.~~

AMERICAN OVERSIGHT

- In Outbreak Module, find the number of your county-specific COVID-19 monitoring outbreak and navigate to the roster tab. You may also navigate to the roster by typing "OR" followed by the county-specific COVID-19 monitoring outbreak IDnumber.
    - If you are not sure what your county-specific COVID-19 monitoring outbreak ID is, please email hsd00epimonitoring@flhealth.govMerlin.Helpdesk@flhealth.gov. In the search bar, type "OR" followed by the county specific monitoring outbreak number (provided separately) to navigate to the roster. Do not navigate to the roster directly from the outbreak, you must use the search bar.
- In the roster, enter the person's name and date of birth, then select "Monitoring" as the survey type.

Case classification criteria

	Case #	Last Name	First Name	Birth Date	Survey type
1	1433899	JONES	ED	09/07/1977	Monitoring

- Continue to enter information about the person, including phone numbers and notification date.
- Select "Monitoring a person possibly exposed to COVID-19" as the initial investigation type.

Formatted: Complex Script Font: Arial, Bold

Formatted: Normal, Space After: 6 pt

Formatted:

AMERICAN OVERSIGHT

Date FDOH notified	Initial investigation type
02/04/2020	Monitoring a person possible e

- Continue to enter requested information about the person. Once the last date potentially exposed field is completed, press save to auto-populate the subsequent date fields.
- Record the outcome each day you monitor the person, even if you do not attempt to contact the individual on one or more days.. At the end of the monitoring period, record the final outcome of the monitoring.
  - If, during the investigation, the person is found to have no identifiable risk factors and monitoring is not needed, select "No identifiable risk" for the exposure risk category and "No monitoring needed" for the final outcome.
- When monitoring is complete, verify that "outcome of follow-up" and "follow-up type" has been recorded for each day the person was monitored and report the case.

Formatted: Font: (Default) Arial, Complex Script Font: Arial, Bold

Example: Script for Calling Persons Undergoing Public Health Monitoring

Initial Contact:

If no one answers, leave the following message:
"Hello, my name is _____ and I'm calling from the Florida Department of Health in _____ County regarding an urgent health issue. Please call me at _____ as soon as possible"

If the contact answers:
Hello, my name is _____ and I'm calling from the Florida Department of Health in _____ County. May I speak to (the parent of) / Is this _____ ? We have been notified by the CDC that you have recently traveled to China. We're contacting persons who may have been exposed to the novel coronavirus, COVID-19, which is a new virus spreading from person-to-person in China and to a lesser extent, other countries, including the United States. Health experts are concerned because little is known about this new virus and it has the potential to cause severe illness and pneumonia in some people. The virus is spread through respiratory droplets of a contagious person. Symptoms develop anywhere from 2 to 14 days after exposure to the virus and include fever, cough and difficulty breathing. Do you have difficulty breathing, cold or flu like symptoms at this time?
If no:
We are asking that you remain at home and avoid public settings for the 14 days after your last exposure. This would mean through _____ [insert date 14 days from last exposure to case or date left China]. You'll also need to monitor for symptoms including checking your temperature twice a day. Please check once in the morning and then once in the evening. A staff member will be reaching out to you every third day to confirm your health status. Should you develop a fever or other symptoms such as cough or shortness of breath, please immediately contact us at _____ [county health department 24/7 number]. We will help to coordinate medical care if needed. Do you have any questions for me at this time?
To confirm, we will be monitoring your health status through_____ [insert date 14 days from exposure date]. Please don't hesitate to reach out to a staff member with any questions or concerns. Thank you for taking the time to speak with me.

AMERICAN OVERSIGHT

If yes, follow protocol for PUI surveillance guidance.

Follow-up Contact:

If no one answers, leave the following message:
"Hello, my name is _____ and I'm calling from the Florida Department of Health in _____ County to check in as previously discussed. Please call me at _____ as soon as possible"

If the contact answers:
Hello, this is _____ from the Florida Department of Health in _____ County. I'm calling to check in on your health status as we planned. How have you been feeling? What have your temperatures been like? I, or another staff member, will be checking in again in three days. Please call us if anything changes prior to then. Thank you for taking the time to speak with me.

Instructions for Person Under Public Health Monitoring

You've been identified as having traveled from mainland China outside Hubei Province or having been exposed to a person with symptomatic laboratory-confirmed COVID-19 infection. We are asking that you practice the following:

- Self-monitor for symptoms which include fever, cough and difficulty breathing
- Take your temperature twice a day
- Self-isolate at home and remain out of public places, workplaces and schools

Date Last Exposed: _____ **Monitor Health through Date: _____**

Take your temperature with an oral thermometer 2 times each day

- Carefully place the tip of the thermometer under the tongue
- Leave the thermometer in place with mouth closed for about a minute or until you hear the "beep"
- Remove the thermometer and read the temperature.
- Use the chart below to track the readings
- For infants, take their temperature as routinely directed by your pediatrician.
- **If you develop a fever (100.4°F/38°C or higher), cough or have difficulty breathing call the county health department immediately at _____**

Technical Appendix A: Investigation and Reporting for Asymptomatic Travelers and Individuals at Risk for Developing COVID-19~~Post-Arrival Monitoring of Asymptomatic Travelers Returning from Mainland China~~

- COVID-19 cases are being auto-created in Merlin for asymptomatic travelers arriving in Florida from mainland China. These cases are generated using the information DOH receives via Epi-X notifications. **CHDs will receive an automated email each time one of these cases is created.**
  - ~~DOH is receiving Epi-X notifications of travelers arriving in Florida from mainland China.~~ These individuals are classified as medium-risk unless and until the investigating CHD has contacted the individual and determined otherwise.
- ~~DOH has an automatic process in place to create COVID-19 cases in Merlin for individuals that require monitoring. CHDs will receive an automated email each time one of these cases is created.~~
  - The automated email will contain the Merlin case ID, the individual's first and last name, address, phone number, and email (as available).
  - The information included in Merlin for these individuals reflects all the information that DOH received from CDC via Epi-X. DOH will not be able to provide any additional or clarifying information on these individuals.
  - These cases will automatically have **DX status set to "not a case" and survey set to "monitoring."**

  - Initial investigation type will be set to **"monitoring a person possibly exposed to 2019-nCoV."** Type of contact for travelers returning from mainland China or other impacted areas will be **"travel exposure."**

AMERICAN OVERSIGHT

- CHDs should create COVID-19 cases for all other high, medium, or low-risk individuals the CHD is notified of that require monitoring.
  - CHDs should select **"travel exposure"** for individuals whose risk is primarily dependent on exposure while he or she was in mainland China. These are individuals who are not known to have had contact with confirmed cases, which is why "airline/vessel contact" or "close contact of a case" should not be used in these circumstances.
-
- CHDs should select **"airline/vessel contact"** for individuals who had contact with a COVID-19 case on an airline, cruise ship, or other vessel.
- CHDs should select **"close contact of a case"** for individuals who had close contact with a COVID-19 case that did not occur on an airline, cruise ship, or other vessel.
  - CHDs should record ~~"Airline/vessel contact" should only be selected for individuals who had contact with a COVID-19 case on an airline or vessel. Travelers returning from mainland China are classified as medium risk category 2 due to their risk of exposure while in China. These are individuals who are not known to have had contact with confirmed cases on an airplane or vessel, which is why "airline/vessel contact" should not be used in these circumstances.~~
- **DGMQ ID** (if available), **last date potentially exposed,** ~~**and**~~ **arrival date**, and **exposure risk category.**
  - These fields will should already be complete for auto-created cases, but can be updated if needed. Auto-created cases for travelers from mainland China will have ~~also be automatically completed~~ and exposure risk category ~~will be~~ set to **"medium risk category 2."**
    -

  - The exposure risk category should not change for these auto-created cases until the CHD has made contact with the individual and gathered enough information to determine that he or she should be assigned a different risk category.
    -
- If, after making contact with the individual, you are unsure of what exposure risk category they should be assigned, contact your Regional Epidemiologist and Laboratory Liaison. **Do not select "unknown."**
  - The section, **"contact monitoring"** will be populated~~automatically set-up~~ with one row (or column, if you are viewing from outbreak roster) for each of the 14 days since the last potentially exposed date. This table should be updated each day during the 14-day period, even if you do not attempt contact.

AMERICAN OVERSIGHT

If the CHD~~you~~ w~~asere~~ not notified of the individual on day 1 of his or her monitoring, please select, **"contact not attempted"** for the day (or days) where ~~you~~ the individual was not being monitored by the CHD~~were not aware of the individual~~. Leave "contact method" blank for days where contact was not attempted. **This is the only circumstance where it is acceptable to leave "contact method" blank.**

Days since last exposure	Outcome of follow-up	Contact method
Day 1: Feb 05, 2020	Contact not attempted	

If you attempt to contact the individual but are not able to reach him or her, select **"contact attempted: no response"** and a **contact method** (either "phone" or "in person").

Days since last exposure	Outcome of follow-up	Contact method
Day 1: Feb 05, 2020	Contact not attempted	
Day 2: Feb 06, 2020	Contact attempted: no response	Phone

When you do successfully contact the individual, you should determine if the individual is:

- **Asymptomatic or has unrelated symptoms** (select, "contacted: healthy/unrelated symptoms"). Make sure you also select a contact method ("in person" or "phone"). **If you successfully contacted the individual both on the phone and in person that day, select "in person" for the contact method.**

Days since last exposure	Outcome of follow-up	Contact method
Day 1: Feb 05, 2020	Contact not attempted	
Day 2: Feb 06, 2020	Contact attempted: no response	Phone
Day 3: Feb 07, 2020	Contacted: healthy/unrelated symptoms	In person

- **Symptomatic, but does not meet the criteria of a PUI** because he or she has not been hospitalized (select, "contacted: symptomatic – not a PUI"). Make sure you also select a contact method ("in person" or "phone").

Days since last exposure	Outcome of follow-up	Contact method
Day 1: Feb 05, 2020	Contact not attempted	
Day 2: Feb 06, 2020	Contact attempted: no response	Phone
Day 3: Feb 07, 2020	Contacted: healthy/unrelated symptoms	In person
Day 4: Feb 08, 2020	Contacted: symptomatic - not a PUI	Phone

AMERICAN OVERSIGHT

- If you contact the individual and you believe they meet PUI criteria, or the individual is symptomatic and you aren't sure if they meet PUI criteria, contact your Regional Epidemiologist and Laboratory Liaison before recording, **"contacted: symptomatic – PUI"** and a contact method. When you make this selection and save, the **survey will automatically switch from "monitoring" to "case." See "Interim Enhanced Surveillance Guidance for County Health Departments" for further instructions.** You won't be able to see the "contact monitoring" section, but that information is still stored in Merlin. To access or edit that information, simply switch the survey from "case" back to "monitoring" and click save.

- **When you've reached the end of the 14-day monitoring period, you should have an outcome selected for each of the 14 days.** You will also need to select a "final outcome" for the individual. **What you select as the "final outcome" should be reflective of the outcome of your follow-up on day 14.**
  - If you select "contacted: health/unrelated symptoms" for the outcome of follow-up on day 14, you should select **"monitoring completed: healthy/unrelated symptoms"** for your final outcome.

  - If you select, "contacted: symptomatic – not a PUI" for the outcome of follow-up on day 14, you should select, **"monitoring completed: symptomatic – not a PUI"** for your final outcome.

- ~~**Completing "contact monitoring" for individuals who are reclassified as "no identifiable risk"**~~
- If, after speaking with the individual, you've identified that he or she **did not have travel to mainland China or another affected area or contact with a confirmed COVID-19 case on an airline or vessel**, update the exposure risk category to **"no identifiable risk."**
  - Record "contacted: healthy/unrelated symptoms" and the appropriate contact method for the day you made contact with the individual. For the final outcome, select **"no monitoring needed."** You may leave the rest of the table blank.

Days since last exposure	Outcome of follow-up	Contact method
Day 1:	Contacted: healthy/unrelated symptoms	Phone
Day 2:		
Day 3:		
Day 4:		
Day 5:		
Day 6:		
Day 7:		
Day 8:		
Day 9:		
Day 10:		
Day 11:		
Day 12:		
Day 13:		
Day 14:		
Final outcome:	No monitoring needed	

~~Completing "contact monitoring" for individuals who move outside of your jurisdiction~~

If during the 14-day monitoring period, the individual needs to be **transferred to another state~~l moves outside of Florida to another state~~**, an interstate notification will need to be sent. Email HSD00EpiMonitoring@flhealth.gov and include the individual's ~~with the individual's information~~Merlin case ID in your email. There is no need to copy your regional epidemiologist. In Merlin, select a final outcome of **"out of jurisdiction."**

- If during the 14-day monitoring period the individual needs to be **transferred to another county~~ moves to another county~~ within Florida,** transfer the case to the appropriate county and notify the county's primary epidemiologists by email.
- When the 14-day monitoring period has ended and you have determined the individual does not meet the criteria for a PUI, or the individual has moved outside of Florida's jurisdiction, review for common errors:
  - **Common Error 1: Final outcome doesn't match exposure risk category.**
    - A final outcome of "no monitoring needed" is only appropriate for the exposure risk category of "no identifiable risk." If, after speaking with the individual, you've identified that he or she did not have travel to China, make sure to update the exposure risk category to "no identifiable risk" before selecting the final outcome "no monitoring needed." Individuals who have low, medium, or high-risk exposure must have a more specific final outcome to explain why they do not required additional monitoring such as:
      - Monitoring completed: healthy/unrelated symptoms
      - Monitoring completed: symptomatic – not a PUI

AMERICAN OVERSIGHT

- Lost to follow-up
- Out of jurisdiction

- **Common Error 2: Unknown is selected for the individual's exposure risk category.**
  - For auto-created cases for asymptomatic travelers returning from mainland China, the exposure risk category is assumed to be "medium risk category 2." The exposure risk category should not change until the CHD has made contact with the individual and gathered enough information to determine that he or she should be assigned a different risk category. If you are unable to make contact with the individual, leave the exposure risk category as "medium risk category 2," do not select "unknown."
  - If you have made contact with the individual but are not what risk category to assign, contact your Regional Epidemiologist and Laboratory Liaison.
- **Common Error 3: Selecting a final outcome before the monitoring period has ended.** For individuals requiring monitoring, the final outcome should not be completed until the end of the 14-day monitoring period, **unless an individual was transferred to another jurisdiction.**

- Once you've reviewed for common errors, report the case to remove it from your task list.

~~Once you've reached the end of the 14-day monitoring period and selected a final outcome, you've determined that no monitoring is needed, or an individual has moved outside of Florida's jurisdiction, report the case to remove it from your task list.~~
~~Review your entries to avoid these common errors:~~
~~Final outcome doesn't match exposure risk category. A final outcome of "no monitoring needed" is only appropriate for the exposure risk category of "no identifiable risk." If, after speaking with the individual, you've identified that he or she did not have travel to China, make sure to update the exposure risk category to "no identifiable risk" before selecting the final outcome "no monitoring needed."~~
~~Unknown exposure risk category. For asymptomatic travelers returning from mainland China, the exposure risk category should be "medium risk category 2." The exposure risk category should not change until the CHD has made contact with the individual and gathered enough information to determine that he or she should be assigned a different risk category. If you are unable to make contact with the individual, leave the exposure risk category as "medium risk category 2," do not select "unknown."~~
~~Selecting a final outcome before the monitoring period has ended. For individuals requiring monitoring, the final outcome should not be completed until the end of the 14-day monitoring period, unless an individual was transferred to another jurisdiction.~~

AMERICAN OVERSIGHT

From: Atrubin, David L.
To: DL DCBE Disease Report On Call; Riggen, Amy; Blackmore, Carina; Gumke, Megan R; Troelstrup, Thomas; Matthias, Laura P
Subject: multiple calls about
Date: Saturday, March 14, 2020 5:51:49 PM

I have received multiple calls from Candy Luciano-Green (Escambia chd). There is concern from passengers who were on the Carnival Valor cruise 2/29 – 3/5 (left out of New Orleans).
Here's a youtube on it for anyone who is interested in the Columbus, OH confirmed case who was on the ship.

https://www.youtube.com/watch?v=W8Quj6GIZA8

Here is the text from Candy's emails.

Received a call from a Santa Rosa resident she stated she was on the Carnival Ship Valor out of New Orleans, to Cozumel Mexico, and Progresso in the Yucatan. February 29/- March 5th. Her name is Liz McNeil at 636-352-9569, she states that their were eight members from her family who went who all live in other states they are all ill. She stated her husband was not on the cruise. She stated the day she got off the ship , she had a sore throat, since then maybe one night she had chills and did not take her temp. She says she typically walks the beach but has been too weak and tired. Her husband presented with similar symptoms two days ago which would be around 3/12/2020. She reports that she has not gone for medical care. She has not been notified by the cruise ship , nor the cdc. But there is some videos, and media, stating that a man from Columbus Ohio tested positive from that cruise since his return. Also, she heard two crew members are ill and being tested. I asked her to continue to self monitor, and of course if she needs to go seek medical care go. I told her give them a call to let them know she is coming. Currently, she is home wondering if there is truth to this rumor and if she needs to be tested. David Atrubin epi on call is checking on this information for guidance. Her name is Liz McNeil, Santa Rosa resident. Date of birth 7-4-1959 and again contact 636-352-9569.

This resident just showed up at Perdido Bay Er, asymptomatic she too went out of New Orleans on the Carnival ship Valor , Feb 29th – March 5th. The ER stated she was in isolation, and she said she had been notified by the cruise line. Her name is Robin Ayers Dob 08/30/1970 she has no symptoms, so they were discharging her. I told the ER I would contact her, that I was currently awaiting information about this cruise, that she needs to self isolate, monitor her health, if she becomes symptomatic to call and let them know she is coming in, Her name is Robin Ayers dob 08/30/1970 her phone number is 850-530-6013. Her address is 6507 Mint Julep trail 32507.

Q4 Have you taken a different version of this survey already this year? (This survey comes in leadership and all-staff versions).

No

Page 5: Foundational Element 1: Staff Empowerment

Q5 Sub-Element 1.1 Enabling Performance - Enabling the success of all staff by creating a supportive work setting, clarifying performance expectations, and providing resources.

1.1a QI related expectations of staff are clearly defined (e.g., performance goals and standards, QI Project participation).	**Fully integrated into the agency culture (6)**
1.1b Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	**Formally in all areas of the agency (5)**
1.1c Staff are recognized for successes and contributions.	**Fully integrated into the agency culture (6)**
1.1d Staff have appropriate opportunities to improve work processes (e.g., QI projects, authority to implement improvements).	**Fully integrated into the agency culture (6)**

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-009238

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2a The agency has defined QI related knowledge, skills and abilities (KSAs) for various levels of staff.	**Fully integrated into the agency culture (6)**
1.2b Staff have the appropriate KSAs to meet QI related expectations, based on their role (e.g., PMQI Council members, frontline staff).	**Formally in all areas of the agency (5)**
1.2c Strategies for increasing staff KSAs for QI are incorporated into agency level plans (e.g., workforce development, QI plan).	**Fully integrated into the agency culture (6)**
1.2d Staff at all levels have access to learning opportunities (e.g., trainings conferences) to develop QI related KSAs.	**Fully integrated into the agency culture (6)**
1.2e New staff are oriented to QI concepts and agency vision for QI.	**Fully integrated into the agency culture (6)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Fully integrated into the agency culture (6)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Formally in all areas of the agency (5)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Fully integrated into the agency culture (6)**

Q8 Sub-Element 2.2 QI Team Performance - The ability of the organization to create high performing QI project teams.

2.2a QI project team members are selected based on needed KSAs in a process to accomplish the team's objectives.	**Formally in all areas of the agency (5)**
2.2b QI project teams' performance is tracked for progress and accomplishments.	**Fully integrated into the agency culture (6)**
2.2c QI project team dynamics (e.g. conflict resolution, mutual respect) support effective collaboration to achieve team objectives.	**Fully integrated into the agency culture (6)**

Page 7: Foundational Element 3: Leadership

AMERICAN OVERSIGHT

Q9 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Formally in all areas of the agency (5)**
3.1b Senior leadership routinely communicates the organization's QI vision and goals to key stakeholders (e.g., funders, community, local governing entity)	**Fully integrated into the agency culture (6)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Formally in all areas of the agency (5)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Formally in all areas of the agency (5)**
3.1e Senior leaders, managers, and supervisors make data-driven decisions.	**Fully integrated into the agency culture (6)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Formally in all areas of the agency (5)**

Q10 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Fully integrated into the agency culture (6)**
3.2b A QI committee representing all areas of the agency is empowered to support QI initiatives.	**Formally in all areas of the agency (5)**
3.2c A formally adopted agency QI policy and/or plan is implemented.	**Fully integrated into the agency culture (6)**

Page 8: Foundational Element 4: Customer Focus

Q11 Sub-Element 4.1 Understanding the Customer - The organization’s relationship with the customer to understand needs and expectations.

4.1a The agency collects data on external customer needs.	**Fully integrated into the agency culture (6)**
4.1b The agency collects data on internal customer (i.e., staff) needs.	**Fully integrated into the agency culture (6)**
4.1c Specific efforts (e.g. community engagement) are made to understand the needs of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Fully integrated into the agency culture (6)**
4.1d Customer needs and expectations inform customer satisfaction measures.	**Fully integrated into the agency culture (6)**
4.1e The agency uses customer needs data in planning efforts (e.g., community health improvement plan, strategic plan, program planning).	**Fully integrated into the agency culture (6)**

AMERICAN OVERSIGHT

Q12 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a The agency collects customer satisfaction data.	**Fully integrated into the agency culture (6)**
4.2b The agency uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Fully integrated into the agency culture (6)**

Page 9: Foundational Element 5: QI Infrastructure

Q13 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1a The agency tracks goals and objectives for each strategic priority defined in an agency strategic plan.	**Fully integrated into the agency culture (6)**
5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Fully integrated into the agency culture (6)**
5.1c The strategic plan guides resource allocation to achieve strategic priorities.	**Fully integrated into the agency culture (6)**

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-009241

Q14 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Fully integrated into the agency culture (6)**
5.2b Work unit performance measures are aligned with the agency strategic plan.	**Fully integrated into the agency culture (6)**
5.2c Work units track a mix of process and outcome measures to assess performance.	**Fully integrated into the agency culture (6)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Formally in all areas of the agency (5)**
5.2e The agency tracks shared performance measures for collaborative efforts with community partners (e.g., community health improvement plan objectives).	**Formally in all areas of the agency (5)**
5.2f The agency sets benchmarks or targets for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Not Applicable**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Fully integrated into the agency culture (6)**
5.2h Staff follow defined protocols for reporting on performance to stakeholders (e.g., reporting frequency, format).	**Fully integrated into the agency culture (6)**
5.2i An effective information system (e.g. spreadsheets, database, performance software) is used to analyze performance data over time.	**Fully integrated into the agency culture (6)**

Q15 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Fully integrated into the agency culture (6)**
5.3b Unmet strategic plan goals and objectives are prioritized for QI projects.	**Fully integrated into the agency culture (6)**
5.3c QI goals, objectives, and metrics defined in a QI plan are tracked for progress.	**Fully integrated into the agency culture (6)**
5.3d An agency QI plan is evaluated and updated in a defined planning cycle.	**Fully integrated into the agency culture (6)**

Page 10: Foundational Element 6: Continuous Quality Improvement

AMERICAN OVERSIGHT

Q16 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Fully integrated into the agency culture (6)**
6.1b Documented standardized work processes are reviewed and updated to reflect evidence-based, best, or promising practices.	**Fully integrated into the agency culture (6)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Fully integrated into the agency culture (6)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Formally in all areas of the agency (5)**

Q17 Sub-Element 6.2 Planning for Quality Improvement Projects - Utilizing effective and efficient QI methods to reliably define performance gaps, diagnose problems, and develop measurable improvements.

6.2a QI project goals (i.e., Aim statements) clearly define the desired future state with time-specific measures and targets.	**Formally in all areas of the agency (5)**
6.2b Current standardized processes are analyzed (e.g., use of flowcharts) to identify inefficiencies and waste.	**Fully integrated into the agency culture (6)**
6.2c Root cause analysis is conducted to understand the source(s) of performance gaps prior to identifying solutions.	**Fully integrated into the agency culture (6)**
6.2d Evidence-based, best, or promising practices (internal and external) are considered when selecting interventions for improving quality.	**Fully integrated into the agency culture (6)**

Q18 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3a QI project interventions are successively tested on a small scale prior to formally adopting a change.	**Formally in all areas of the agency (5)**
6.3b Baseline data are accessible for all QI projects.	**Formally in all areas of the agency (5)**
6.3c QI project teams compare data collected from QI project interventions against baseline data to determine whether an improvement was made.	**Fully integrated into the agency culture (6)**
6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Fully integrated into the agency culture (6)**

4.2b The agency uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Informally in some areas and formally in other areas (4)**

Page 9: Foundational Element 5: QI Infrastructure

Q13 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1a The agency tracks goals and objectives for each strategic priority defined in an agency strategic plan.	**Fully integrated into the agency culture (6)**
5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Informally in some areas and formally in other areas (4)**
5.1c The strategic plan guides resource allocation to achieve strategic priorities.	**Informally in some areas and formally in other areas (4)**

AMERICAN OVERSIGHT

Q14 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Informally in some areas and formally in other areas (4)**
5.2b Work unit performance measures are aligned with the agency strategic plan.	**Informally in some areas and formally in other areas (4)**
5.2c Work units track a mix of process and outcome measures to assess performance.	**Informally in some areas and formally in other areas (4)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Informally in some areas and formally in other areas (4)**
5.2e The agency tracks shared performance measures for collaborative efforts with community partners (e.g., community health improvement plan objectives).	**Informally in some areas and formally in other areas (4)**
5.2f The agency sets benchmarks or targets for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Formally in all areas of the agency (5)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Informally in some areas and formally in other areas (4)**
5.2h Staff follow defined protocols for reporting on performance to stakeholders (e.g., reporting frequency, format).	**Informally in some areas and formally in other areas (4)**
5.2i An effective information system (e.g. spreadsheets, database, performance software) is used to analyze performance data over time.	**Informally in some areas and formally in other areas (4)**

Q15 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Informally in some areas and formally in other areas (4)**
5.3b Unmet strategic plan goals and objectives are prioritized for QI projects.	**Informally in some areas and formally in other areas (4)**
5.3c QI goals, objectives, and metrics defined in a QI plan are tracked for progress.	**Informally in some areas and formally in other areas (4)**
5.3d An agency QI plan is evaluated and updated in a defined planning cycle.	**Formally in all areas of the agency (5)**

Page 10: Foundational Element 6: Continuous Quality Improvement

AMERICAN OVERSIGHT

Q16 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Formally in all areas of the agency (5)**
6.1b Documented standardized work processes are reviewed and updated to reflect evidence-based, best, or promising practices.	**Informally in some areas and formally in other areas (4)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Informally in some areas of the agency (3)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Informally in some areas of the agency (3)**

Q17 Sub-Element 6.2 Planning for Quality Improvement Projects - Utilizing effective and efficient QI methods to reliably define performance gaps, diagnose problems, and develop measurable improvements.

6.2a QI project goals (i.e., Aim statements) clearly define the desired future state with time-specific measures and targets.	**Informally in some areas of the agency (3)**
6.2b Current standardized processes are analyzed (e.g., use of flowcharts) to identify inefficiencies and waste.	**Informally in some areas of the agency (3)**
6.2c Root cause analysis is conducted to understand the source(s) of performance gaps prior to identifying solutions.	**Informally in some areas of the agency (3)**
6.2d Evidence-based, best, or promising practices (internal and external) are considered when selecting interventions for improving quality.	**Informally in some areas and formally in other areas (4)**

Q18 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3a QI project interventions are successively tested on a small scale prior to formally adopting a change.	**Informally in some areas of the agency (3)**
6.3b Baseline data are accessible for all QI projects.	**Informally in some areas and formally in other areas (4)**
6.3c QI project teams compare data collected from QI project interventions against baseline data to determine whether an improvement was made.	**Informally in some areas and formally in other areas (4)**
6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Informally in some areas of the agency (3)**

Q1 To begin the survey, please select one of the options below:	**I do not work in a County Healthy Department.**

Page 2: Select Division or Office

Q2 Please select your Division or Office:	**Division of Public Health Statistics and Performance Management**

Page 3: Select County Health Department

Q3 Please select your County Health Department:	**Respondent skipped this question**

Page 4

Q4 Have you taken a different version of this survey already this year? (This survey comes in leadership and all-staff versions).	**No**

Page 5: Foundational Element 1: Staff Empowerment

Q5 Sub-Element 1.1 Enabling Performance - Enabling the success of all staff by creating a supportive work setting, clarifying performance expectations, and providing resources.

1.1a QI related expectations of staff are clearly defined (e.g., performance goals and standards, QI Project participation).	**Formally in all areas of the agency (5)**
1.1b Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	**Formally in all areas of the agency (5)**
1.1c Staff are recognized for successes and contributions.	**Formally in all areas of the agency (5)**
1.1d Staff have appropriate opportunities to improve work processes (e.g., QI projects, authority to implement improvements).	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2a The agency has defined QI related knowledge, skills and abilities (KSAs) for various levels of staff.	**Formally in all areas of the agency (5)**
1.2b Staff have the appropriate KSAs to meet QI related expectations, based on their role (e.g., PMQI Council members, frontline staff).	**Formally in all areas of the agency (5)**
1.2c Strategies for increasing staff KSAs for QI are incorporated into agency level plans (e.g., workforce development, QI plan).	**Formally in all areas of the agency (5)**
1.2d Staff at all levels have access to learning opportunities (e.g., trainings conferences) to develop QI related KSAs.	**Formally in all areas of the agency (5)**
1.2e New staff are oriented to QI concepts and agency vision for QI.	**Informally in some areas and formally in other areas (4)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Formally in all areas of the agency (5)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Formally in all areas of the agency (5)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Formally in all areas of the agency (5)**

Q8 Sub-Element 2.2 QI Team Performance - The ability of the organization to create high performing QI project teams.

2.2a QI project team members are selected based on needed KSAs in a process to accomplish the team's objectives.	**Formally in all areas of the agency (5)**
2.2b QI project teams' performance is tracked for progress and accomplishments.	**Formally in all areas of the agency (5)**
2.2c QI project team dynamics (e.g. conflict resolution, mutual respect) support effective collaboration to achieve team objectives.	**Formally in all areas of the agency (5)**

Page 7: Foundational Element 3: Leadership

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-009251

Q9 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Formally in all areas of the agency (5)**
3.1b Senior leadership routinely communicates the organization's QI vision and goals to key stakeholders (e.g., funders, community, local governing entity)	**Formally in all areas of the agency (5)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Formally in all areas of the agency (5)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Formally in all areas of the agency (5)**
3.1e Senior leaders, managers, and supervisors make data-driven decisions.	**Formally in all areas of the agency (5)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Formally in all areas of the agency (5)**

Q10 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Formally in all areas of the agency (5)**
3.2b A QI committee representing all areas of the agency is empowered to support QI initiatives.	**Formally in all areas of the agency (5)**
3.2c A formally adopted agency QI policy and/or plan is implemented.	**Formally in all areas of the agency (5)**

Page 8: Foundational Element 4: Customer Focus

Q11 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1a The agency collects data on external customer needs.	**Formally in all areas of the agency (5)**
4.1b The agency collects data on internal customer (i.e., staff) needs.	**Informally in some areas and formally in other areas (4)**
4.1c Specific efforts (e.g. community engagement) are made to understand the needs of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Formally in all areas of the agency (5)**
4.1d Customer needs and expectations inform customer satisfaction measures.	**Formally in all areas of the agency (5)**
4.1e The agency uses customer needs data in planning efforts (e.g., community health improvement plan, strategic plan, program planning).	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Q12 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a The agency collects customer satisfaction data.	**Formally in all areas of the agency (5)**
4.2b The agency uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Formally in all areas of the agency (5)**

Page 9: Foundational Element 5: QI Infrastructure

Q13 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1a The agency tracks goals and objectives for each strategic priority defined in an agency strategic plan.	**Formally in all areas of the agency (5)**
5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Formally in all areas of the agency (5)**
5.1c The strategic plan guides resource allocation to achieve strategic priorities.	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-009253

Q14 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Formally in all areas of the agency (5)**
5.2b Work unit performance measures are aligned with the agency strategic plan.	**Formally in all areas of the agency (5)**
5.2c Work units track a mix of process and outcome measures to assess performance.	**Formally in all areas of the agency (5)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Formally in all areas of the agency (5)**
5.2e The agency tracks shared performance measures for collaborative efforts with community partners (e.g., community health improvement plan objectives).	**Informally in some areas and formally in other areas (4)**
5.2f The agency sets benchmarks or targets for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Formally in all areas of the agency (5)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Formally in all areas of the agency (5)**
5.2h Staff follow defined protocols for reporting on performance to stakeholders (e.g., reporting frequency, format).	**Formally in all areas of the agency (5)**
5.2i An effective information system (e.g. spreadsheets, database, performance software) is used to analyze performance data over time.	**Formally in all areas of the agency (5)**

Q15 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Formally in all areas of the agency (5)**
5.3b Unmet strategic plan goals and objectives are prioritized for QI projects.	**Formally in all areas of the agency (5)**
5.3c QI goals, objectives, and metrics defined in a QI plan are tracked for progress.	**Formally in all areas of the agency (5)**
5.3d An agency QI plan is evaluated and updated in a defined planning cycle.	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2a The agency has defined QI related knowledge, skills and abilities (KSAs) for various levels of staff.	**Informally in some areas and formally in other areas (4)**
1.2b Staff have the appropriate KSAs to meet QI related expectations, based on their role (e.g., PMQI Council members, frontline staff).	**Informally in some areas and formally in other areas (4)**
1.2c Strategies for increasing staff KSAs for QI are incorporated into agency level plans (e.g., workforce development, QI plan).	**Formally in all areas of the agency (5)**
1.2d Staff at all levels have access to learning opportunities (e.g., trainings conferences) to develop QI related KSAs.	**Formally in all areas of the agency (5)**
1.2e New staff are oriented to QI concepts and agency vision for QI.	**Informally in some areas and formally in other areas (4)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Informally in some areas and formally in other areas (4)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Informally in some areas and formally in other areas (4)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Formally in all areas of the agency (5)**

Q8 Sub-Element 2.2 QI Team Performance - The ability of the organization to create high performing QI project teams.

2.2a QI project team members are selected based on needed KSAs in a process to accomplish the team's objectives.	**Informally in some areas and formally in other areas (4)**
2.2b QI project teams' performance is tracked for progress and accomplishments.	**Informally in some areas and formally in other areas (4)**
2.2c QI project team dynamics (e.g. conflict resolution, mutual respect) support effective collaboration to achieve team objectives.	**Formally in all areas of the agency (5)**

Page 7: Foundational Element 3: Leadership

AMERICAN OVERSIGHT

Q9 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Informally in some areas and formally in other areas (4)**
3.1b Senior leadership routinely communicates the organization's QI vision and goals to key stakeholders (e.g., funders, community, local governing entity)	**Informally in some areas and formally in other areas (4)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Formally in all areas of the agency (5)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Informally in some areas and formally in other areas (4)**
3.1e Senior leaders, managers, and supervisors make data-driven decisions.	**Formally in all areas of the agency (5)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Formally in all areas of the agency (5)**

Q10 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Informally in some areas and formally in other areas (4)**
3.2b A QI committee representing all areas of the agency is empowered to support QI initiatives.	**Fully integrated into the agency culture (6)**
3.2c A formally adopted agency QI policy and/or plan is implemented.	**Formally in all areas of the agency (5)**

Page 8: Foundational Element 4: Customer Focus

Q11 Sub-Element 4.1 Understanding the Customer - The organization’s relationship with the customer to understand needs and expectations.

4.1a The agency collects data on external customer needs.	**Informally in some areas and formally in other areas (4)**
4.1b The agency collects data on internal customer (i.e., staff) needs.	**Informally in some areas and formally in other areas (4)**
4.1c Specific efforts (e.g. community engagement) are made to understand the needs of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Fully integrated into the agency culture (6)**
4.1d Customer needs and expectations inform customer satisfaction measures.	**Informally in some areas and formally in other areas (4)**

AMERICAN OVERSIGHT

Q12 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a The agency collects customer satisfaction data.	**Informally in some areas and formally in other areas (4)**

Page 9: Foundational Element 5: QI Infrastructure

Q13 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1a The agency tracks goals and objectives for each strategic priority defined in an agency strategic plan.	**Fully integrated into the agency culture (6)**
5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Fully integrated into the agency culture (6)**
5.1c The strategic plan guides resource allocation to achieve strategic priorities.	**Fully integrated into the agency culture (6)**

Q14 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Formally in all areas of the agency (5)**
5.2f The agency sets benchmarks or targets for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Formally in all areas of the agency (5)**
5.2h Staff follow defined protocols for reporting on performance to stakeholders (e.g., reporting frequency, format).	**Fully integrated into the agency culture (6)**

Q15 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Informally in some areas and formally in other areas (4)**
5.3c QI goals, objectives, and metrics defined in a QI plan are tracked for progress.	**Informally in some areas and formally in other areas (4)**
5.3d An agency QI plan is evaluated and updated in a defined planning cycle.	**Formally in all areas of the agency (5)**

Page 10: Foundational Element 6: Continuous Quality Improvement

AMERICAN OVERSIGHT

Q16 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Formally in all areas of the agency (5)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Informally in some areas and formally in other areas (4)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Informally in some areas and formally in other areas (4)**

Q17 Sub-Element 6.2 Planning for Quality Improvement Projects - Utilizing effective and efficient QI methods to reliably define performance gaps, diagnose problems, and develop measurable improvements.

6.2a QI project goals (i.e., Aim statements) clearly define the desired future state with time-specific measures and targets.	**Informally in some areas and formally in other areas (4)**
6.2b Current standardized processes are analyzed (e.g., use of flowcharts) to identify inefficiencies and waste.	**Informally in some areas and formally in other areas (4)**
6.2c Root cause analysis is conducted to understand the source(s) of performance gaps prior to identifying solutions.	**Informally in some areas and formally in other areas (4)**
6.2d Evidence-based, best, or promising practices (internal and external) are considered when selecting interventions for improving quality.	**Informally in some areas and formally in other areas (4)**

Q18 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3a QI project interventions are successively tested on a small scale prior to formally adopting a change.	**Informally in some areas and formally in other areas (4)**
6.3b Baseline data are accessible for all QI projects.	**Informally in some areas and formally in other areas (4)**
6.3c QI project teams compare data collected from QI project interventions against baseline data to determine whether an improvement was made.	**Informally in some areas and formally in other areas (4)**
6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Informally in some areas and formally in other areas (4)**

AMERICAN OVERSIGHT

	A
1	Instructions- Organizational Culture of Quality Self Assessment Tool (QI SAT) scoring sheet
2	Use in conjunction with NACCHO's QI SAT Version 2.0 diagnostic statements
3	Leadership scoring
4	1. Input leadership scores into the corresponding cell in Column "J". The sheet will calculate a score for each sub-element.
5	2. The sub-element score will automatically populate column "C" of the Scoring Summary tab. Scores will range from 1-6.
6	
7	Staff scoring
8	1. If using the staff assessment, each staff member should respond to the assessment items in the Staff version using an online or paper survey.
9	2. Enter staff average scores into each corresponding cell in Column "J". The sheet will calculate a score for each sub-element.
10	3. The sub-element score will automatically populate column "D" of the scoring summary tab. Scores will range from 1-6.
11	
12	Completing scoring summary
13	1. Turn to the **Scoring Summary** tab, where the leadership and staff scores should have already populated.
14	2. Calculate a score for each subelement by determining a process in advance for integrating the leadership and staff sub-element scores. For example, your agency may decide to average staff and leadership scores or discuss further any subelements with disagreement between staff and leadership. Manually enter the sub-element score into column "E". If not using the staff assessment, simply copy column "C" into Column "E."
15	3. The foundational element scores will be automatically calculated by a formula in column "F". The foundational element scores will be averaged for an overall culture of quality score at the top of the scoring summary tab. This score represents the organization's current phase on the NACCHO Roadmap to a Culture of Quality.
16	4. Input general notes or evidence around why the organization was given its scores for each sub-element in Column "I". These notes will serve as a reminder when reviewing scores at a later date.
17	5. Following the transition strategy selection and prioritization process identified in the instructions of the Facilitator Guide, input the transition strategies to be implemented this year into the appropriate cells in Column "G."
18	6. Input the priority level of each transition strategy that resulted from the prioritization process used into Column "H."
19	7. Add any highlights from group discussion or evidence substantiating your scoring and justifying transition strategy selections in Column "I."

1		QI SAT Scoring Sheet- Leadership					
2		Please reference the diagnostic statements found in the QI SAT 2.0 guide to score each element. This self-assessment tool is designed for senior level organizational leaders and qualit organization's culture of quality across all teams or work units.					
3		Rate the degree to which you believe the following statements are true of the organization.	Not Applicable (N/A)	1 Not at all	2 Rarely	3 Informally in some areas of the agency	4 Informally in some areas and formally in other areas
4		Enter your score for each statement in column "J". Embedded formulas will calculate each sub-element score.					
5		Sub-Element 1.1: Enabling Performance					
6	1.1a	QI related expectations of staff are clearly defined (e.g. performance goals and standards, QI project participation).	N/A	..	..	..	..
7	1.1b	Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	N/A	..	..	..	..
8	1.1c	Staff are recognized for successes and contributions.	N/A	..	..	..	..
9	1.1d	Staff have appropriate opportunities to improve work processes (e.g., QI projects, authority to implement improvements).	N/A	..	..	..	..
10		Sub-Element 1.2: Knowledge, Skills, and Abilities (KSAs)					
11	1.2a	The agency has defined QI related knowledge, skills, and abilities (KSAs) for various levels of staff.	N/A	..	..	..	..
12	1.2b	Staff have the appropriate KSAs to meet QI related expectations, based on their role (e.g. QI Council members, frontline staff).	N/A	..	..	..	..
13	1.2c	Strategies for increasing staff KSAs for QI are incorporated into agency level plans (e.g. workforce development, QI plan).	N/A	..	..	..	..
14	1.2d	Staff at all levels have access to learning opportunities (e.g. trainings, conferences) to develop *QI related KSAs*.	N/A	..	..	..	..
15	1.2e	New staff are oriented to QI related concepts and agency vision for QI.	N/A	..	..	..	..
16	1.2f	Staff have access to learning opportunities to improve *job-related KSAs*.	N/A	..	..	..	..
17		Sub-Element 2.1: Collaborative Sharing and Improvement					
18	2.1a	Staff share information (e.g. lessons learned, best or promising practices) across teams and work units.	N/A	..	..	..	..
19	2.1b	Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	N/A	..	..	..	..
20		Sub-Element 2.2: QI Team Performance					
21	2.2a	QI project team members are selected based on needed KSAs in a process to accomplish the team's objectives	N/A	..	..	..	..
22	2.2b	QI project teams' performance is tracked for progress and accomplishments.	N/A	..	..	..	..
23	2.2c	QI project team dynamics (e.g. conflict resolution, mutual respect) support effective collaboration to achieve team objectives.	N/A	..	..	..	..
24		Sub-Element 3.1: Culture					
25	3.1a	Senior leadership routinely communicates the organization's QI vision and goals to staff.	N/A	..	..	..	..
26	3.1b	Senior leadership routinely communicates the organization's QI vision and goals to key stakeholders (e.g. funders, community, local governing entity)	N/A	..	..	..	..
27	3.1c	Managers and supervisors actively use data in a non-punitive way to review performance with staff.	N/A	..	..	..	..
28	3.1d	Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	N/A	..	..	..	..
29	3.1e	Senior leaders, managers, and supervisors make data-driven decisions.	N/A	..	..	..	..
30	3.1f	Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g. extra work, fear of job loss).	N/A	..	..	..	..
31		Sub-Element 3.2: Resourcing and Structure					
32	3.2a	Senior leaders dedicate enough resources (e.g. staff time, training) to support and sustain QI initiatives.	N/A	..	..	..	..
33	3.2b	A QI committee representing all areas of the agency is empowered to support QI initiatives.	N/A	..	..	..	..
34	3.2c	A formally adopted agency QI policy and/or plan is implemented.	N/A	..	..	..	..
35		Sub-Element 4.1: Understanding the Customer

Page 1: History and Purpose

Q1 To begin the survey, please select one of the options below:	**I do not work in a County Health Department.**

Page 2: Select Division or Office

Q2 Please select your Division or Office:	**Division of Public Health Statistics and Performance Management**

Page 3: Select County Health Department

Q3 Please select your County Health Department:	**Respondent skipped this question**

Page 4

Q4 Have you taken a different version of this survey already this year? (This survey comes in leadership and all-staff versions).	**No**

Page 5: Foundational Element 1: Staff Empowerment

Q5 Sub-Element 1.1 Enabling Performance - Enabling the success of all staff by creating a supportive work setting, clarifying performance expectations, and providing resources.

1.1a QI related expectations of staff are clearly defined (e.g., performance goals and standards, QI Project participation).	**Informally in some areas and formally in other areas (4)**
1.1b Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	**Informally in some areas and formally in other areas (4)**
1.1c Staff are recognized for contributions and successes.	**Informally in some areas and formally in other areas (4)**
1.1d Staff have appropriate opportunities to improve work processes (e.g., participate in QI projects, authority to implement improvements).	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2b Staff have the appropriate KSAs to meet QI related expectations of them.	**Informally in some areas and formally in other areas (4)**
1.2d Staff have access to learning opportunities (e.g., trainings, conferences) to develop QI related KSAs.	**Informally in some areas and formally in other areas (4)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Formally in all areas of the agency (5)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Formally in all areas of the agency (5)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Formally in all areas of the agency (5)**

Page 7: Foundational Element 3: Leadership

Q8 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Formally in all areas of the agency (5)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Informally in some areas and formally in other areas (4)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Informally in some areas and formally in other areas (4)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Informally in some areas and formally in other areas (4)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Informally in some areas and formally in other areas (4)**

Page 8: Foundational Element 4: Customer Focus

AMERICAN OVERSIGHT

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1c Specific efforts are made to understand the needs and values of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Formally in all areas of the agency (5)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Formally in all areas of the agency (5)**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Fully integrated into the agency culture (6)**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Formally in all areas of the agency (5)**

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Informally in some areas and formally in other areas (4)**
5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Fully integrated into the agency culture (6)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Informally in some areas and formally in other areas (4)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Fully integrated into the agency culture (6)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Informally in some areas and formally in other areas (4)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Page 10: Foundational Element 6: Continuous Quality Improvement

Q15 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Informally in some areas and formally in other areas (4)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Informally in some areas and formally in other areas (4)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Formally in all areas of the agency (5)**

Q16 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Informally in some areas and formally in other areas (4)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Informally in some areas of the agency (3)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Informally in some areas of the agency (3)**

Page 7: Foundational Element 3: Leadership

Q8 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Not At All (1)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Not At All (1)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Rarely (2)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Not At All (1)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Not At All (1)**

Page 8: Foundational Element 4: Customer Focus

AMERICAN OVERSIGHT

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1c Specific efforts are made to understand the needs and values of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Rarely (2)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Informally in some areas of the agency (3)**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Not At All (1)**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Formally in all areas of the agency (5)**

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Not At All (1)**
5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Informally in some areas and formally in other areas (4)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Informally in some areas and formally in other areas (4)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Informally in some areas and formally in other areas (4)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Informally in some areas and formally in other areas (4)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Not At All (1)**

AMERICAN OVERSIGHT

Page 10: Foundational Element 6: Continuous Quality Improvement

Q15 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Informally in some areas of the agency (3)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Rarely (2)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Rarely (2)**

Q16 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Not At All (1)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

Respondent skipped this question

Page 8: Foundational Element 4: Customer Focus

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

Respondent skipped this question

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

Respondent skipped this question

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

Respondent skipped this question

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

Respondent skipped this question

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

Respondent skipped this question

Q1 To begin the survey, please select one of the options below:

I do not work in a County Health Department.

Page 2: Select Division or Office

Q2 Please select your Division or Office:

Division of Public Health Statistics and Performance Management

Page 3: Select County Health Department

Q3 Please select your County Health Department:

Respondent skipped this question

Page 4

Q4 Have you taken a different version of this survey already this year? (This survey comes in leadership and all-staff versions).

No

Page 5: Foundational Element 1: Staff Empowerment

Q5 Sub-Element 1.1 Enabling Performance - Enabling the success of all staff by creating a supportive work setting, clarifying performance expectations, and providing resources.

1.1a QI related expectations of staff are clearly defined (e.g., performance goals and standards, QI Project participation).	**Formally in all areas of the agency (5)**
1.1b Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	**Formally in all areas of the agency (5)**
1.1c Staff are recognized for contributions and successes.	**Informally in some areas of the agency (3)**
1.1d Staff have appropriate opportunities to improve work processes (e.g., participate in QI projects, authority to implement improvements).	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2b Staff have the appropriate KSAs to meet QI related expectations of them.	**Informally in some areas of the agency (3)**
1.2d Staff have access to learning opportunities (e.g., trainings, conferences) to develop QI related KSAs.	**Rarely (2)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Informally in some areas and formally in other areas (4)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Informally in some areas of the agency (3)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Formally in all areas of the agency (5)**

Page 7: Foundational Element 3: Leadership

Q8 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Fully integrated into the agency culture (6)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Informally in some areas and formally in other areas (4)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Formally in all areas of the agency (5)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Informally in some areas and formally in other areas (4)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Informally in some areas and formally in other areas (4)**

Page 8: Foundational Element 4: Customer Focus

AMERICAN OVERSIGHT

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1c Specific efforts are made to understand the needs and values of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Formally in all areas of the agency (5)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Rarely (2)**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Informally in some areas and formally in other areas (4)**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Fully integrated into the agency culture (6)**

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Formally in all areas of the agency (5)**
5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Informally in some areas of the agency (3)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Informally in some areas and formally in other areas (4)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Fully integrated into the agency culture (6)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Fully integrated into the agency culture (6)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Page 10: Foundational Element 6: Continuous Quality Improvement

Q15 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Informally in some areas of the agency (3)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Informally in some areas of the agency (3)**

Q16 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Informally in some areas of the agency (3)**

1.2b Staff have the appropriate KSAs to meet QI related expectations of them.	**Informally in some areas and formally in other areas (4)**
1.2d Staff have access to learning opportunities (e.g., trainings, conferences) to develop QI related KSAs.	**Informally in some areas and formally in other areas (4)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Informally in some areas and formally in other areas (4)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Informally in some areas and formally in other areas (4)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Informally in some areas and formally in other areas (4)**

Page 7: Foundational Element 3: Leadership

Q8 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Informally in some areas and formally in other areas (4)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Informally in some areas of the agency (3)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Informally in some areas and formally in other areas (4)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Informally in some areas of the agency (3)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Informally in some areas of the agency (3)**

Page 8: Foundational Element 4: Customer Focus

AMERICAN OVERSIGHT

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1c Specific efforts are made to understand the needs and values of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Informally in some areas and formally in other areas (4)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Formally in all areas of the agency (5)**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Informally in some areas and formally in other areas (4)**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Informally in some areas and formally in other areas (4)**

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Informally in some areas and formally in other areas (4)**
5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Formally in all areas of the agency (5)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Formally in all areas of the agency (5)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Informally in some areas and formally in other areas (4)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Informally in some areas and formally in other areas (4)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Informally in some areas and formally in other areas (4)**

AMERICAN OVERSIGHT

Page 10: Foundational Element 6: Continuous Quality Improvement

Q15 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Informally in some areas of the agency (3)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Informally in some areas and formally in other areas (4)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Informally in some areas of the agency (3)**

Q16 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Informally in some areas of the agency (3)**

5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Informally in some areas and formally in other areas (4)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Informally in some areas and formally in other areas (4)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Formally in all areas of the agency (5)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Formally in all areas of the agency (5)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Informally in some areas and formally in other areas (4)**

AMERICAN OVERSIGHT

Page 10: Foundational Element 6: Continuous Quality Improvement

Q15 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Informally in some areas and formally in other areas (4)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Formally in all areas of the agency (5)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Formally in all areas of the agency (5)**

Q16 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Informally in some areas and formally in other areas (4)**

Q1 To begin the survey, please select one of the options below:	**I do not work in a County Health Department.**

Page 2: Select Division or Office

Q2 Please select your Division or Office:	**Division of Public Health Statistics and Performance Management**

Page 3: Select County Health Department

Q3 Please select your County Health Department:	**Respondent skipped this question**

Page 4

Q4 Have you taken a different version of this survey already this year? (This survey comes in leadership and all-staff versions).	**No**

Page 5: Foundational Element 1: Staff Empowerment

Q5 Sub-Element 1.1 Enabling Performance - Enabling the success of all staff by creating a supportive work setting, clarifying performance expectations, and providing resources.

1.1a QI related expectations of staff are clearly defined (e.g., performance goals and standards, QI Project participation).	**Informally in some areas and formally in other areas (4)**
1.1b Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	**Informally in some areas and formally in other areas (4)**
1.1c Staff are recognized for contributions and successes.	**Informally in some areas and formally in other areas (4)**
1.1d Staff have appropriate opportunities to improve work processes (e.g., participate in QI projects, authority to implement improvements).	**Informally in some areas of the agency (3)**

AMERICAN OVERSIGHT

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2b Staff have the appropriate KSAs to meet QI related expectations of them.	**Informally in some areas and formally in other areas (4)**
1.2d Staff have access to learning opportunities (e.g., trainings, conferences) to develop QI related KSAs.	**Informally in some areas of the agency (3)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Informally in some areas of the agency (3)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Informally in some areas of the agency (3)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Informally in some areas of the agency (3)**

Page 7: Foundational Element 3: Leadership

Q8 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Informally in some areas of the agency (3)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Informally in some areas of the agency (3)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Informally in some areas of the agency (3)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Informally in some areas of the agency (3)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Informally in some areas of the agency (3)**

Page 8: Foundational Element 4: Customer Focus

AMERICAN OVERSIGHT

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1c Specific efforts are made to understand the needs and values of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Informally in some areas and formally in other areas (4)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Not Applicable**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Not Applicable**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Informally in some areas and formally in other areas (4)**

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Informally in some areas and formally in other areas (4)**
5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Informally in some areas and formally in other areas (4)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Informally in some areas and formally in other areas (4)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Not At All (1)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Not At All (1)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Not At All (1)**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Formally in all areas of the agency (5)**

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Informally in some areas of the agency (3)**
5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Informally in some areas and formally in other areas (4)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Informally in some areas and formally in other areas (4)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Informally in some areas and formally in other areas (4)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Formally in all areas of the agency (5)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Informally in some areas and formally in other areas (4)**

AMERICAN OVERSIGHT

Page 10: Foundational Element 6: Continuous Quality Improvement

Q15 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Formally in all areas of the agency (5)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Informally in some areas and formally in other areas (4)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Formally in all areas of the agency (5)**

Q16 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Informally in some areas and formally in other areas (4)**

Q1 To begin the survey, please select one of the options below:

I do not work in a County Health Department.

Page 2: Select Division or Office

Q2 Please select your Division or Office:

Division of Public Health Statistics and Performance Management

Page 3: Select County Health Department

Q3 Please select your County Health Department:

Respondent skipped this question

Page 4

Q4 Have you taken a different version of this survey already this year? (This survey comes in leadership and all-staff versions).

No

Page 5: Foundational Element 1: Staff Empowerment

Q5 Sub-Element 1.1 Enabling Performance - Enabling the success of all staff by creating a supportive work setting, clarifying performance expectations, and providing resources.

1.1a QI related expectations of staff are clearly defined (e.g., performance goals and standards, QI Project participation).	**Informally in some areas and formally in other areas (4)**
1.1b Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	**Rarely (2)**
1.1c Staff are recognized for contributions and successes.	**Informally in some areas of the agency (3)**
1.1d Staff have appropriate opportunities to improve work processes (e.g., participate in QI projects, authority to implement improvements).	**Not At All (1)**

AMERICAN OVERSIGHT

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2b Staff have the appropriate KSAs to meet QI related expectations of them.	**Not At All (1)**
1.2d Staff have access to learning opportunities (e.g., trainings, conferences) to develop QI related KSAs.	**Not At All (1)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Rarely (2)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Informally in some areas of the agency (3)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Not At All (1)**

Page 7: Foundational Element 3: Leadership

Q8 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Not At All (1)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Not At All (1)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Not At All (1)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Not At All (1)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Not At All (1)**

Page 8: Foundational Element 4: Customer Focus

AMERICAN OVERSIGHT

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1c Specific efforts are made to understand the needs and values of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Fully integrated into the agency culture (6)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Informally in some areas and formally in other areas (4)**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Rarely (2)**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Not At All (1)**

Page 4

Q4 Have you taken a different version of this survey already this year? (This survey comes in leadership and all-staff versions).	**No**

Page 5: Foundational Element 1: Staff Empowerment

Q5 Sub-Element 1.1 Enabling Performance - Enabling the success of all staff by creating a supportive work setting, clarifying performance expectations, and providing resources.

1.1a QI related expectations of staff are clearly defined (e.g., performance goals and standards, QI Project participation).	**Fully integrated into the agency culture (6)**
1.1b Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	**Fully integrated into the agency culture (6)**
1.1c Staff are recognized for contributions and successes.	**Informally in some areas of the agency (3)**
1.1d Staff have appropriate opportunities to improve work processes (e.g., participate in QI projects, authority to implement improvements).	**Informally in some areas and formally in other areas (4)**

AMERICAN OVERSIGHT

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2b Staff have the appropriate KSAs to meet QI related expectations of them.	**Informally in some areas and formally in other areas (4)**
1.2d Staff have access to learning opportunities (e.g., trainings, conferences) to develop QI related KSAs.	**Informally in some areas and formally in other areas (4)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Fully integrated into the agency culture (6)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Fully integrated into the agency culture (6)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Fully integrated into the agency culture (6)**

Page 7: Foundational Element 3: Leadership

Q8 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Fully integrated into the agency culture (6)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Fully integrated into the agency culture (6)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Informally in some areas and formally in other areas (4)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Informally in some areas and formally in other areas (4)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Fully integrated into the agency culture (6)**

Page 8: Foundational Element 4: Customer Focus

AMERICAN OVERSIGHT

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1c Specific efforts are made to understand the needs and values of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Fully integrated into the agency culture (6)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Fully integrated into the agency culture (6)**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Fully integrated into the agency culture (6)**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Fully integrated into the agency culture (6)**

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Fully integrated into the agency culture (6)**
5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Fully integrated into the agency culture (6)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Fully integrated into the agency culture (6)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Fully integrated into the agency culture (6)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Fully integrated into the agency culture (6)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Fully integrated into the agency culture (6)**

AMERICAN OVERSIGHT

Page 10: Foundational Element 6: Continuous Quality Improvement

Q15 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Fully integrated into the agency culture (6)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Fully integrated into the agency culture (6)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Formally in all areas of the agency (5)**

Q16 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Fully integrated into the agency culture (6)**

Page 4

Q4 Have you taken a different version of this survey already this year? (This survey comes in leadership and all-staff versions).

No

Page 5: Foundational Element 1: Staff Empowerment

Q5 Sub-Element 1.1 Enabling Performance - Enabling the success of all staff by creating a supportive work setting, clarifying performance expectations, and providing resources.

1.1a QI related expectations of staff are clearly defined (e.g., performance goals and standards, QI Project participation).	**Formally in all areas of the agency (5)**
1.1b Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	**Formally in all areas of the agency (5)**
1.1c Staff are recognized for contributions and successes.	**Informally in some areas and formally in other areas (4)**
1.1d Staff have appropriate opportunities to improve work processes (e.g., participate in QI projects, authority to implement improvements).	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2b Staff have the appropriate KSAs to meet QI related expectations of them.	**Formally in all areas of the agency (5)**
1.2d Staff have access to learning opportunities (e.g., trainings, conferences) to develop QI related KSAs.	**Fully integrated into the agency culture (6)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Fully integrated into the agency culture (6)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Informally in some areas and formally in other areas (4)**

Page 7: Foundational Element 3: Leadership

Q8 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Informally in some areas and formally in other areas (4)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Informally in some areas and formally in other areas (4)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Formally in all areas of the agency (5)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Fully integrated into the agency culture (6)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Formally in all areas of the agency (5)**

Page 8: Foundational Element 4: Customer Focus

AMERICAN OVERSIGHT

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1c Specific efforts are made to understand the needs and values of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Fully integrated into the agency culture (6)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Informally in some areas and formally in other areas (4)**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Informally in some areas and formally in other areas (4)**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Formally in all areas of the agency (5)**

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Informally in some areas and formally in other areas (4)**
5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Informally in some areas of the agency (3)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Informally in some areas of the agency (3)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Informally in some areas of the agency (3)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Formally in all areas of the agency (5)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Informally in some areas and formally in other areas (4)**

AMERICAN OVERSIGHT

Page 10: Foundational Element 6: Continuous Quality Improvement

Q15 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Formally in all areas of the agency (5)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Informally in some areas and formally in other areas (4)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Formally in all areas of the agency (5)**

Q16 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Informally in some areas and formally in other areas (4)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Formally in all areas of the agency (5)**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Formally in all areas of the agency (5)**

Page 9: Foundational Element 5: QI Infrastructure

Q12 Sub-Element 5.1 Strategic Planning - The development and use of a resourced and actionable strategic plan that sets the direction for the organization through a common understanding of the mission, vision, and strategic priorities and goals.

5.1b Strategies for achieving agency strategic plan goals are incorporated into operational plans at the work unit level.	**Formally in all areas of the agency (5)**

Q13 Sub-Element 5.2 Performance Management - The alignment and use of performance data to achieve strategy and continually improve.

5.2a Staff contribute to the development of performance measures related to their work.	**Fully integrated into the agency culture (6)**
5.2c My work unit/team tracks a mix of process and outcome measures to assess performance.	**Formally in all areas of the agency (5)**
5.2d Performance measures assess key aspects of performance (e.g., customer satisfaction, financial, internal processes, workforce, health outcomes).	**Formally in all areas of the agency (5)**
5.2f My work unit/team sets benchmarks or targets for performance measures for performance measures using past performance data and/or standards (e.g., Healthy People, State Health Improvement Plan).	**Fully integrated into the agency culture (6)**
5.2g Defined protocols for collecting performance data (e.g., use of data collection instruments) are documented and followed.	**Fully integrated into the agency culture (6)**

Q14 Sub-Element 5.3 Quality Improvement Planning - The development and use of a resourced and actionable quality improvement plan.

5.3a Staff use performance data to identify QI projects.	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Page 10: Foundational Element 6: Continuous Quality Improvement

Q15 Sub-Element 6.1 Standardizing Work - Documenting and deploying standard work processes to minimize variation.

6.1a Staff have access to documented standardized work processes (e.g., policies, procedures) that define critical steps.	**Fully integrated into the agency culture (6)**
6.1c Documented standardized work processes reflect the way work is actually done.	**Fully integrated into the agency culture (6)**
6.1d Formal QI methods (e.g., PDSA, Lean) are followed to continuously improve standardized work through QI projects.	**Formally in all areas of the agency (5)**

Q16 Sub-Element 6.3 Studying and Acting on Potential Solutions – Systematically testing and validating proposed solutions prior to implementation, to build knowledge and increase the likelihood of success.

6.3d Lessons learned from QI projects are documented and adopted into standardized work processes, as appropriate.	**Formally in all areas of the agency (5)**

Q4 Have you taken a different version of this survey already this year? (This survey comes in leadership and all-staff versions).	**No**

Page 5: Foundational Element 1: Staff Empowerment

Q5 Sub-Element 1.1 Enabling Performance - Enabling the success of all staff by creating a supportive work setting, clarifying performance expectations, and providing resources.

1.1a QI related expectations of staff are clearly defined (e.g., performance goals and standards, QI Project participation).	**Not At All (1)**
1.1b Formal or informal processes are followed to provide staff feedback on job performance (e.g., performance evaluations, ongoing feedback sessions).	**Formally in all areas of the agency (5)**
1.1c Staff are recognized for contributions and successes.	**Informally in some areas and formally in other areas (4)**
1.1d Staff have appropriate opportunities to improve work processes (e.g., participate in QI projects, authority to implement improvements).	**Formally in all areas of the agency (5)**

AMERICAN OVERSIGHT

Q6 Sub-Element 1.2 Knowledge, Skills and Abilities (KSAs) - Developing the knowledge, skills, and abilities needed for continuous improvement.

1.2b Staff have the appropriate KSAs to meet QI related expectations of them.	**Not At All (1)**
1.2d Staff have access to learning opportunities (e.g., trainings, conferences) to develop QI related KSAs.	**Rarely (2)**
1.2f Staff have access to learning opportunities to improve job-related KSAs.	**Rarely (2)**

Page 6: Foundational Element 2: Teamwork and Collaboration

Q7 Sub-Element 2.1 Collaborative Sharing and Improvement - Sharing of knowledge between individuals, teams, and work units to improve quality and performance.

2.1a Staff share information (e.g., lessons learned; best or promising practices) across teams and work units.	**Informally in some areas of the agency (3)**
2.1b Staff collaborate on projects or ideas to improve performance through formal QI projects or other improvement methods.	**Rarely (2)**

Page 7: Foundational Element 3: Leadership

Q8 Sub-Element 3.1 Culture – Leaders actively establish the environment, personally model the behaviors, and lead the transformation to a culture of quality.

3.1a Senior leadership routinely communicates the organization's QI vision and goals to staff.	**Not At All (1)**
3.1c Managers and supervisors use data in a non-punitive way to review performance with staff.	**Informally in some areas and formally in other areas (4)**
3.1d Managers and supervisors encourage their staff to engage in QI opportunities to improve work.	**Informally in some areas of the agency (3)**
3.1f Senior leaders, managers, and supervisors address staff concerns about engaging in QI (e.g., extra work, fear of job loss).	**Informally in some areas of the agency (3)**

Q9 Sub-Element 3.2 Resourcing and Structure – Leaders provide the resources and structure to drive quality throughout the organization.

3.2a Senior leaders dedicate enough resources (e.g., staff time, training) to support and sustain QI initiatives.	**Not At All (1)**

Page 8: Foundational Element 4: Customer Focus

AMERICAN OVERSIGHT

Q10 Sub-Element 4.1 Understanding the Customer - The organization's relationship with the customer to understand needs and expectations.

4.1c Specific efforts are made to understand the needs and values of different customer groups (e.g., populations with health inequities, new vs. tenured staff).	**Not At All (1)**

Q11 Sub-Element 4.2 Meeting and Exceeding Customer Expectations - Use of customer data to drive decision-making and continuous improvement.

4.2a My work unit/team regularly collects customer satisfaction data.	**Rarely (2)**
4.2b My work unit/team uses customer satisfaction data to implement improvements (e.g., QI projects, making informal improvements).	**Not At All (1)**

2020 Preparedness Summit Postponed

Due to the intensifying public health emergency caused by the coronavirus disease (COVID-19), NACCHO has made the difficult but necessary decision to postpone the 2020 Preparedness Summit and reschedule it to August 23–26, 2020 at the Anatole Hotel in Dallas, Texas. This decision has been made in the interest of public safety and recognizing that many of you are directly and deeply engaged in response activities in your communities.

We appreciate your patience as we finalize the details related to this rescheduling. Additional information will be sent to registrants next week regarding registration, hotel reservations, and other logistics. Thank you for your continued support and we look forward to seeing you in August.

Coronavirus (COVID-19) Updates

All About Coronavirus

This week, the World Health Organization has declared COVID-19 a global pandemic, meaning that it has spread to multiple countries around the world at the same time. More regions identified community-spread of the virus, multiple legislative responses were floated to address the economic impacts, and hearings galore focused on the response.

Quick Reminder: The input from local health department staff about what you are experiencing on the ground has been *invaluable* to our advocacy efforts. If you have not already provided feedback about your COVID-19 response, or **if you have information to update, please fill out the form** here.

CDC to Award $560 Million to State and Local Health Departments

The Department of Health and Human Services (HHS) has announced upcoming action by the CDC to provide more than $560 million for state and local jurisdictions in support of the nation's response to novel coronavirus (COVID-19). The funding is part of the $8.3 billion emergency supplemental that was passed last week and signed by President Trump. Funding will go to the 62 states, localities, and territories that are funded for public health emergency preparedness grants as well as the cities of Philadelphia and Houston and the Cherokee Nation.

President Announces New Travel Restrictions, Floats tax relief

On Wednesday, President Trump addressed the nation from the Oval Office to announce a 30-day travel ban on foreign visitors from most of Europe in an effort to curb the spread of the virus. The President also announced he would ask Congress to increase funding for the Small Business Administration by $50 billion to help provide economic loans to impacted regions, seek a temporary payroll tax cut for worker, and suspend federal tax payments for businesses.

Congress Plots Next Moves on COVID Relief

On Thursday, the U.S. Capitol Complex announced closures of the House and Senate Office Buildings, as well as the Capital, to most visitors. Some members of Congress announced they were self-quarantining due to exposure to individuals diagnosed with the disease, and a staff member in Senator

AMERICAN OVERSIGHT

Cantwell's office tested positive for virus.

House Democrats introduced their own multi-billion dollar (H.R. 6201) economic stimulus package, proposing spending increases for social safety net programs, paid sick leave for certain workers, wide-spread free COVID testing, funding for children's school lunches, and expanding unemployment insurance.

On the other side of the Hill, Senate Majority Leader Mitch McConnell (R-KY) announced that the Senate will delay its recess scheduled for next week to work on an economic relief package to deal with the COVID-19 outbreak. The House is still scheduled to go on its scheduled break next week and Members of Congress will travel to their home districts.

COVID-19 Hearings

A number of congressional hearings were held this week on COVID-19. A brief synopsis of each is below.

- The House Appropriations Labor, HHS, Education Appropriations Subcommittee held the hearing "Centers for Disease Control (CDC) and Prevention Budget Request for FY2021" that featured CDC Director Dr. Robert Redfield and other CDC officials. In his testimony, Dr. Redfield highlighted several areas within the COVID-19 outbreak response that need funding within the FY 2021 CDC budget. These include strengthening global health security, improving public health data infrastructure, and strengthening local public health workforce. Redfield received many questions about testing failures. Subcommittee Chair Rosa DeLauro (D-CT) and Ranking Member Tom Cole (R-OK) as well as several other members of the subcommittee pledged that they will not cut CDC's budget as the President requested and cited the importance of solid funding for the agency to respond to emergencies like COVID-19.
- The House Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Subcommittee held the hearing "Department of Agriculture Budget Request for FY2021." U.S. Department of Agriculture (USDA) Secretary Sonny Perdue testified before the committee, where he told lawmakers to consider reauthorization for a pandemic food stamp program as part of an economic stimulus package. Perdue was asked by Rep. DeLauro (D-CT) if children can receive free and reduced meals if their schools close. Perdue testified that USDA would waive requirements that students must eat in group settings and allow meals to be served at off-site campus sites like libraries and churches for low-income children who receive free and reduced meals.
- The House Homeland Security Emergency Preparedness, Response, and Recovery Subcommittee held the hearing "Community Perspectives on Coronavirus Preparedness and Response" that featured testimony from four witnesses, including two state health officers. Former White House Ebola response coordinator Ron Klain lauded Congress for passing emergency supplemental funding and added the Administration must ensure funding gets out to state and local health departments as quickly as possible. Assistant Commissioner for the Division of Public Health Infrastructure, Laboratories and Emergency Preparedness for New Jersey Department of Health Christopher Neuwirth testified how New Jersey prepared for COVID-19 coordinating response activities across the state health department. Executive Vice President and Chief Operating Officer for Trust for America's Health Dr. J. Nadine Garcia gave recommendations to Congress and the Administration how they can better respond to infectious disease outbreaks by prioritizing more investment in core public health programs. Dr. Garcia added that there has been complacency about disinvestment in public health preparedness activities and infrastructure such as the workforce.
- The House Small Business Committee held the hearing "The Impact of Coronavirus on America's Small Businesses" to look at how the virus will impact small businesses across the country. Chairwoman Nydia Vel►zquez (D-NY) said that small businesses will go through hardships and disruption in the coming months, especially in the tourism industry due to uncertainty and disruptions caused by the virus. Vel►zquez saidshe hoped emergency funding will allow for small businesses to access federal loans if they suffer losses related to the outbreak. Rep. Rob Bishop (R-UT) asked if paid leave would undermine small businesses that need workers at the business location rather than telecommuting. Andrew Chau CEO of Boba Guys responded that workers constantly worrying about their next paycheck will not allow them to be at their best, so some security would be beneficial to workers. The House Oversight and Reform Committee held the hearing "Coronavirus Preparedness and Response" featuring National Institutes of Health (NIH) Institute of Allergy and Infectious Diseases Director Anthony Fauci and CDC Director Redfield. Dr. Fauci highlighted the development of a vaccine for coronavirus. COVID-19 vaccine research is expected to enter the Phase 1 clinical trial in about four weeks. Dr. Fauci also testified that there will be more cases and things will get worse than they are now, adding that COVID-19 is ten times more lethal than the flu. Rep. Ro Khanna (D-CA) pointed out that funding for the CDC is only 1.5% of the defense budget. In response to questions, Dr. Redfield testified that cuts in public health funding mean that we are not able to "overprepare" for infectious disease outbreaks and meet the five core competencies of the CDC. These competencies include data modernization, predicative analysis, public health workforce, and global health security. Redfield particularly highlighted how the CDC budget affects local health departments, as about 70% of the CDC budget goes to local, state, and tribal health departments and community based organizations who are the forefront of public health protection.
- The House Committee on Homeland Security held the hearing "Confronting the Coronavirus: The Federal Response" that featured Acting Deputy Secretary for Homeland Security (DHS) Ken Cuccinelli and CDC Deputy Director for Public Health Service and Implementation Science Dr. Stephen Redd. Cuccinelli testified that DHS' top priority is the safety and security of the American people and slowing the spread of the virus. Further, DHS is screening passengers coming in from China, Iran, and Italy at 11 designated airports of entry, but added those coming through most of Europe are not being tested because we do not have the resources to screen 100,000 people entering the country. Dr. Redd testified that the response of CDC is built on decades of experience fighting infectious diseases, the network of public health workers in the field, and the use of public health precautions such as handwashing, staying home when sick, and avoiding large crowds. Dr. Redd said he understood the frustrations of the Congress and American public that more tests are not widely available but reiterated that private screeners can test one million people.
- The House Committee on Appropriations Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies held the hearing "Food and Drug Administration Budget Request for FY2021," featuring testimony from FDA commissioner Dr. Stephen Hahn. COVID-19 remained the main topic, with many of the Members of Congress questioning Dr. Hahn about the effect of COVID-19 on the U.S. drug and medicine supply chain Chairman Sanford Bishop (D-GA) questioned Dr. Hahn about non-CDC labs conducting COVID-19 tests. Dr. Hahn testified that the FDA requires that these labs provide the results within 15 days so that the FDA can conduct an independent scientific review to ensure the accuracy of the tests.

Senators Ask for Clarification about Protecting Private Prisons

Senators Elizabeth Warren (D-MA) and Ed Markey (D-MA) along with 14 other Democratic Senators sent a letter requesting information about the plans the Federal Bureau of Prisons and the private companies the agency contracts with have in place to protect inmates, staff, and their families from COVID-19. There are currently over 175,000 inmates in federal prisons and jails.

NURSING HOME VISITS LIMITED AMID CORONAVIRUS FEARS

By Christine Sexton

TALLAHASSEE --- Gov. Ron DeSantis' administration is ordering long-term care facilities to temporarily block people from visiting residents if they have recently traveled internationally, been on cruise ships or been in contact with someone who has the novel coronavirus, known as COVID-19.

"These are important efforts to mitigate the risk to our most vulnerable population to COVID-19, which is our elderly population, particularly those with underlying medical conditions," DeSantis said Wednesday as he announced the directive.…

Interim COVID-19 Guidance for Homeless Shelters

Introduction

A homeless shelter is an environment where a number of people reside, meet, or gather in close proximity for either a limited or extended period of time.

The newly recognized respiratory disease – coronavirus disease 2019 (COVID-19) – is spreading globally and there have been instances of COVID-19 community spread in the United States. The general strategies recommended to prevent the spread of COVID-19 are the same strategies used every day to detect and prevent the spread of other respiratory viruses like influenza. The guidance provided in this document can assist congregate setting facilities in Florida communities with devising strategies to prevent the introduction of COVID-19 and other respiratory diseases, manage known or potential exposures to COVID-19, and preventing widespread transmission of COVID-19 in the facility. The events of the COVID-19 outbreak are still developing worldwide, the United States and in Florida. The impact of COVID-19 in Florida is still to be determined. Therefore, facilities should be prepared for the event of widespread community transmission. Facilities concerned that a resident, visitor, or employee may have COVID-19 should contact the Florida Department of Health immediately for consultation and guidance.

Homeless shelters pose many challenges due to their unique environment. Particular challenges include vulnerable populations, restrictions on client or resident movement and limited skilled staff or alternative work schedules for staff. Special considerations should be taken to prevent disease transmission when considering the movement of clients or residents, visitors and staff into and within the facilities. Facilities are advised to contact and collaborate with other local, state, and federal partners to develop specific protocols and procedures that would be employed to control impacts from COVID-19.

Goal of this document is to help homeless shelter operators;

- o **Develop plans based on of the identification of LIMITED transmission of COVID-19:** o Prevent the introduction of COVID-19 and other respiratory pathogens INTO your facility
- o Rapidly identify persons with respiratory illness
- o Prevent the spread of COVID-19 and other respiratory pathogens WITHIN and BETWEEN your facility(ies)
- o Manage and isolate persons with suspected or confirmed COVID-19
- o Be familiar with infection control guidance

to Consider planning and needs to accommodate persons with possible COVID-19 exposure

- o **Consider facility readiness and response plans in the event of WIDESPREAD transmission in of COVID-19**
- o **Implement detailed guidance;** o Appendix 1: Social distancing to limit further spread of COVID-19 disease
- o Appendix 2: ROOM ISOLATION - What should someone do if they have a flu like illness or have been diagnosed with COVID-19
- o Appendix 3: CAREGIVER GUIDANCE -How to provide care for a person who is sick with a flu like illness or has been diagnosed with COVID-19
-

AMERICAN OVERSIGHT

NOTE: *Please be aware that this guidance is based on the best information currently available and will be updated as more is learned about the COVID-19 outbreak. The Florida Department of Health may change its recommendations as the situation evolves. The Florida Department of Health will announce additional measures are needed. Visit Florida Department of Health* and *Centers for Disease Control and Prevention (CDC) website for more information.*

AMERICAN OVERSIGHT

COVID-19 Background Information

Human coronaviruses are a group of viruses that commonly cause either mild-to-moderate illness – such as a cold with runny nose, headache, cough, sore throat, or fever or sometimes pneumonia. These include coronaviruses 229E, NL63, OC43, and HKU1.

COVID-19 is caused by the SARS-CoV-2 virus. The recently discovered SARS-CoV-2 is a "novel coronavirus", which means it is a new strain of coronavirus that has not been previously identified in humans. The newly identified SARS-CoV-2 virus is thought to have originated in animals and is related to the coronaviruses SARS-CoV and MERS-CoV, which also originated from animals. Our current understanding of SARS-CoV-2 suggests it is like other respiratory viruses with regard to transmission. In general, these viruses are spread when a sick person coughs or sneezes. It is also possible to become sick by touching surfaces contaminated with a virus, and then touching one's own eyes, nose, or mouth. Covering coughs and sneezes with a tissue or an upper sleeve and washing hands with soap and water or with an alcohol-based hand rub are essential in stopping the spread of respiratory viruses. During the influenza season, individuals should consider getting a flu vaccine.

The majority of persons with COVID-19 develop a mild illness which may include fever, cough, or shortness of breath. Persons who develop more severe disease requiring hospitalization have often been the elderly or persons with underlying medical conditions.

Anticipatory Planning for COVID-19 in Florida

On February 25, 2020, the Centers for Disease Control and Prevention (CDC) announced that it was likely for COVID-19 to spread and cause outbreaks in the US. There have been reports of outbreaks in congregate settings including health care facilities and prisons.

Facilities are advised to engage with their local, state, and federal partners to rapidly develop appropriate plans that can be implemented when needed. Given the multiple potential points of access of COVID-19-infected people into congregate settings, it is advisable for facilities to plan for the eventuality of identifying COVID-19 in a person, which will likely present as an acute respiratory infection, in their facility.

At this time, there is limited recognized transmission of COVID-19 in NYC. Florida Department of Health recommends facilities consider developing plans to address the recognition and management of individual COVID-19 cases while there is limited evidence of community COVID-19 transmission, as well as preparing for the possibility of widespread community transmission by doing the following:

Be prepared - Form a pandemic planning committee that includes representatives of all internal partners and that is authorized by facility leadership to finalize a COVID-19 response plan promptly and in coordination with city, state, and federal partners. • Refer to the CDC site for **pandemic preparedness resources**

• Identify and implement mechanisms for access to public health and other critical information needed for situational awareness, including CDC and Florida Department of Health webpages.

• Participate in local interagency COVID-19 planning activities.

Communicate with staff and residents - Keep residents and employees informed.

• Describe what actions the facility is taking to protect them, including answering their questions and explaining what they can do to protect themselves and their fellow residents.

AMERICAN OVERSIGHT

• Educational materials and information should be provided to residents and visitors in a way that can be understood by non-English speakers. When evaluating and treating persons who may have COVID-19,
provide an interpreter if possible. Visit the Florida Department of Health website for materials and resources.

Protect your workforce and your residents
• Ensure staff are aware of sick leave policies and are encouraged to stay home if they are ill with respiratory symptoms.
• Advise employees to check for any signs of illness before reporting to work each day and notify their supervisor if they become ill.
• Do not require a healthcare provider's note for employees who are sick with respiratory symptoms before returning to work.

1. Planning for While There is Limited Transmission of COVID-19 in Florida

While there is evidence of limited transmission of COVID-19 disease in Florida, facilities should focus on rapidly identifying potential case. Upon recognition of widespread transmission, facilities should focus toward their pandemic plans (see section 4. Facility Readiness and Response to Widespread Community Transmission of COVID-19).
• **A. Prevent the Introduction of Respiratory Pathogens INTO the Facility**
• o Facility signage
• ▪Post signs at the entrance instructing visitors not to visit if they have symptoms of respiratory infection. Signs in multiple languages can be found on the Florida Department of Health website.
• ▪Ensure staff and residents are familiar with the symptoms of general acute respiratory infection, as well as criteria for COVID-19 which includes fever, cough or shortness of breath.
•
• o Screen visitors in advance and upon arrival for fever or signs of an acute respiratory illness ▪Inform potential visitors that symptomatic persons will not be allowed to enter the facility. When possible, facilities should use their usual communication channels to inform potential visitors of these rules before they travel to the facility.
• ▪Ask persons upon arrival at the facility for symptoms or possible exposures to COVID-19. Exclude visitors who appear to be ill or report fever, cough, shortness of breath and either travel from an affected geographic area within the past 14 days OR close contact with a person with confirmed COVID-19 within the past 14 days.
• o Employees and volunteers
• ▪Ensure sick leave policies allow employees to stay home if they have symptoms of respiratory infection.
• ▪Inform staff to stay home if they feel ill and remain at home until their symptoms resolve.
•
• o Residents and clients
• ▪Assess residents' symptoms of respiratory infection upon admission to the facility and implement appropriate infection prevention practices for incoming symptomatic residents.
• **B. Rapid Detection of Cases Persons with Acute Respiratory Illness**

AMERICAN OVERSIGHT

- *o Instruct residents and staff to report recent symptoms of fever, cough or shortness of breath to the appropriate personnel at the first signs of illness.*
- *o Screen new persons being admitted or re-admitted for recent respiratory illness.*
- *o Consider daily temperature and symptom checks of residents and monitor for new fever and/or respiratory illness.*
- *o Until there is evidence of community transmission of COVID-19 in Florida, suspected cases of COVID-19 will be identified using the CDC person under investigation (PUI). Any persons with respiratory illness and who meet potential COVID-19 using persons under investigation (PUI) criteria from the CDC should;*

▪Be isolated in a negative pressure room (airborne infection isolation room (AIIR)) if one is available or a private room with the door closed until they can be properly managed. IF THE FACILITY DOES NOT HAVE AN AIIR OR PRIVATE ROOM, have a pre-identified location where patients can be situated to minimize exposure to staff and other patients.

▪Be IMMEDIATELY reported to the local health department and Florida Department of Health to discuss the person and determine if COVID-19 testing is indicated and appropriate management of the person including transportation to another facility if indicted.

o If available and indicated, use existing plans to arrange to have patients transported to an appropriate facility. Contact the transporter and receiving facility in advance and inform them of potential concern for COVID-19 to ensure awareness and permit adherence to appropriate infection control for COVID-19.

o Review and monitor the CDC and Florida Department of Health websites to be aware of COVID-19 activity in Florida and metro area to help inform your evaluation of individuals with unknown respiratory illness. If there is transmission of COVID-19 in the community, in addition to implementing the precautions described below, facilities should also consult with the local health department for additional guidance.

- ***C. Prevent the Spread of Respiratory Pathogens WITHIN and BETWEEN the Facility(ies)***

- *o For residents who have been evaluated and do not meet COVID-19 testing criteria but who have fever or respiratory symptoms;*
- *▪Restrict residents with fever or acute respiratory symptoms to their room or an area where they can be isolated from others in the facility by at least 6 feet.*
- *▪In some circumstances, it is better to keep families or other close groups together. If there are accompanying family members (or other personal contacts) of the ill person, consider housing them together, even if they are not ill, if there previously was an extended opportunity for exposure because they may already be infected.*
- *▪If the sick person must leave the room for medically necessary procedures, have them wear a facemask (if tolerated).*
- *o In a healthcare setting, manage persons with an undiagnosed respiratory infection using Standard, Contact, and Droplet Precautions with eye protection unless suspected diagnosis requires Airborne Precautions (e.g., COVID-19, tuberculosis). For detailed guidance visit the CDC website.*
- *o In non-healthcare settings, contact a medical provider or facility to determine if the person requires medical care. Inform them the resident has a respiratory illness.*

AMERICAN OVERSIGHT

- o Support hand and respiratory hygiene, as well as cough etiquette by residents, visitors, and employees. ▪Ensure employees clean their hands according to CDC guidelines, including before and after contact with residents, after contact with contaminated surfaces or equipment, and after removing personal protective equipment (PPE).
- ▪Put alcohol-based hand rub in every resident room (ideally both inside and outside of the room).
- ▪Make sure tissues are available and any sink is well-stocked with soap and paper towels for hand washing.
- o Notify other facilities prior to transferring a resident with an acute respiratory illness, including suspected or confirmed COVID-19, to another facility or higher level of care.
-

- **D. Management and Isolation of Suspected or Confirmed Cases**

- o If COVID-19 infection is suspected or has been confirmed in a resident of your facility, consider temporarily suspending new admissions, visitors, and transportation to other institutions.
- o Restrict the movement of persons within the facility, from leaving the facility, and from being transferred to another facility until COVID-19 has been ruled out (with the exception of necessary medical care).
- o Limit transport of suspected COVID-19 patients to essential purposes only. Place facemasks on suspected COVID-19 patients during transport.

o Facilities housing persons with confirmed to have COVID-19 should house the patient in a private, single-occupancy room.

- ▪If multiple persons become ill, establish a designated area(s) of the facility specifically for sick persons. Designate staff to care for these individuals only. Limit the movement of designated staff between parts of the facility to decrease the risk of staff spreading COVID-19 to other parts of the facility.
- o Doors to any room or area housing suspected and confirmed COVID-19 patients should be kept closed except for entry or egress.
- o In facilities that provide healthcare, refer below to section Infection Control in Facilities that Provide Healthcare.
- o In facilities without healthcare:
- ▪Ensure staff know where and how to report persons with respiratory illness and manage them until further action can occur (e.g., place in separate room with door closed).
- ▪Ensure access to hand washing stations and or alcohol-based sanitizers and facemasks for ill persons to wear to prevent further spread.
- o Treatment recommendations for COVID-19 are still evolving. More information will be available on the Florida Department of Health website below.

http://www.floridahealth.gov/diseases-and-conditions/COVID-19/index.html

-
- **E. Infection Control in Facilities that Provide Healthcare**

AMERICAN OVERSIGHT

- o While new evidence about the 2019 novel coronavirus is still emerging, it currently is recommended to use airborne precautions in addition to standard and droplet precautions when managing suspected and confirmed cases of COVID-19.
- o All personnel who enter the room should adhere to the personal protective equipment (PPE) recommended in the CDC's interim infection control guidance, including:
- ▪ Standard precautions (gloves),
- ▪ Contact precautions (gown),
- ▪ Eye precautions (goggles or face shield), and
- ▪ Airborne precautions (fit-tested N95 respirator or positive air pressure respirator).
- o Detailed information on environmental infection control in healthcare settings can be found in CDC's Guidelines for Environmental Infection Control in Health-Care Facilities and Guideline for Isolation Precautions: Preventing Transmission of Infectious Agents in Healthcare Settings [section IV.F. Care of the environment].
- o Refer to CDC's guidance on implementing recommended infection prevention practices available in CDC's free online course — The Nursing Home Infection Preventionist Training — which includes resources checklists for facilities and employees to use.
-
- **2. Facility Readiness and Response to Widespread Community Transmission of COVID-19**

In the event community transmission of COVID-19 is detected in Florida, facilities should consider adopting measures to reduce transmission. If a crisis management plan or system exists for the facility, follow that protocol. If the facility or organization has an existing emergency management response plan, leverage that system and structure at this point. Use the system to address the following components for facility readiness and response.
If no such structure already exists, designate a team of staff members to assist in developing and implementing a site-specific plan to prevent widespread transmission of COVID-19 and to avoid major disruptions in services. The COVID-19 team should be made up of staff who are familiar with measures taken to limit exposure to and spread of influenza and other winter respiratory viruses. Ensure appropriate operational, healthcare and administrative representatives are

AMERICAN OVERSIGHT

involved to manage the incident. Assign staff members to address the following activities along with any others that may be required by oversight agencies:

- a) Assessing Risk to Employees and Measures to Maintain Their Health
- b) Education and Training for Employees
- c) Facility Readiness: Signage, Supplies, and Staffing
- d) Housekeeping **a) Assessing Risk to Employees and Measures to Maintain Their Health b) Education and Training c) Facility Readiness: Signage, Supplies, and Staffing**
- Plan for each of these activities by assessing needs, deciding how the facility will implement the activities and what resources are needed for handling an inmate, employee, or visitor who presents with symptoms suspicious for COVID-19. General guidance is available in CDC's Community Mitigation Guidelines to Prevent Pandemic Influenza — United States, 2017, *Recommendations and Reports* / April 21, 2017 / 66(1);1–34.

• Assess the potential exposure risks to COVID-19 for all facility employees. Consider those who provide healthcare, sanitation or services that require prolonged close contact.
• Provide employees with information about preventing the spread of respiratory illnesses.
• Review the facility's sick-leave policy and encourage staff to stay home while ill.
• Consider offering influenza vaccinations at the worksite to prevent the flu.

• Educate staff and residents about how respiratory illness spreads to inform and improve adoption of best practices to prevent the spread of respiratory illness.
• Hold educational sessions for staff and residents to review information on facility policies for respiratory illnesses.
• Educational sessions should include information on COVID-19 symptoms, how respiratory illnesses spread, basic cough and sneeze etiquette, hand washing, personal protective equipment, and housekeeping procedures.
• All staff, including administrators, health care personnel, custodians and food handlers should attend training sessions.
• Information can also be provided through signs, written materials and video presentations.
• As more is learned about the current COVID-19 outbreak, regular announcements should be made to keep all informed, especially regarding changes in prevention measures and medical treatment protocols.

• Prominently display posters, such as "Cover Your Cough" signs, at all entrances, bathrooms, and common areas. Multi-lingual versions are available on the Florida Department of Health website. Handwashing posters are available from the CDC website. • Display signs instructing residents, visitors and staff to notify the medical staff if they have fever and cough or shortness of breath. • Consider showing a streaming video in common areas that have a television that demonstrates proper methods for hand-washing and respiratory etiquette. • Make the means for appropriate hand cleansing readily available within the facility, including intake areas, visitor entries and exits, visitation rooms, common areas, and staff-restricted areas, in addition to lavatories and food preparation and dining areas. The means for hand cleansing are ideally running water, soap, and hand drying machines or paper towels and waste baskets; alternatively, except in lavatories and food preparation areas, alcohol-based hand sanitizers may be used. • Maintain sufficient supplies of hand soap and paper towels, hand sanitizers, tissues, general cleaners, disinfectants and personal protective equipment. • Use of a face mask is sometimes medically indicated for persons with a respiratory illness as it can prevent a sick person from

AMERICAN OVERSIGHT

spreading their illness to others. The Florida Department of Health and the CDC do not currently recommend the use of face masks among the general population.

d) Housekeeping • Clean facilities routinely and effectively. • Clean frequently touched surfaces, such as doorknobs, door handles, handrails and telephones, as well as non-porous surfaces in bathrooms, sleeping areas, cafeterias and offices (e.g., floors), using an EPA-registered hospital disinfectant that is active against viral pathogens. • Place waste baskets in visible locations and empty regularly. • Ensure that waiting areas, TV rooms and reading rooms have adequate ventilation (e.g., open windows if practical). • Linens, eating utensils and dishes belonging to those who are sick do not need to be cleaned separately, but should not be shared without thorough washing. Instruct cleaning staff to avoid "hugging" laundry before washing it to avoid self-contamination. Instruct cleaning staff to wash their hands with soap and water or an alcohol-based hand sanitizer immediately after handling infected laundry.

3. Review Health and Mental Health Response: Some facilities provide health care and/or mental health services ranging from full service on-site health care to evaluation with referral to off-site providers. Have plans in place plans for patients who regularly receive health services. If a patient is required to be isolated, consider alternative arrangements such as tele-communications for the patient to receive their regular services. Identify what health care and mental health resources are available and review and update where appropriate provider contracts, emergency medical protocols including transporting persons to a healthcare facility, notification of receiving facilities, and contact information for providers and pharmacies. Staff providing health care services should be familiar with; ○ Management of Patients Suspected to have Novel Coronavirus (2019-nCoV) Infection — Interim Guidance ○ Management of Patients Suspected to have Novel Coronavirus (2019-nCoV) Infection — Provider Checklist ■ CDC provider guidance materials ○ Infection control guidance for health care facilities developed by the Centers for Disease Control and Prevention (CDC) ○ Steps healthcare facilities can take to prepare: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/steps-to-prepare.html ○ Interim guidance for LTC: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/prevent-spread-in-long-term-care-facilities.html ○ Interim guidance for healthcare facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/guidance-hcf.html

4. Continuity of Operations • Anticipate and plan for staffing challenges ▪ Expect that many employees will be ill and furloughed until no longer a risk to others. ▪ Telecommuting may be an option for some.• Anticipate and plan for shortages as supply chains are affected;

AMERICAN OVERSIGHT

pre-order essentials to maintain adequate reserves. • Partners during routine operations – law enforcement, the courts, state facilities – will be affected similarly. Facility operations should be capable of adjusting to challenges felt in other related systems.

AMERICAN OVERSIGHT

APPENDIX 1

Social Distancing to Limit further Spread of COVID-19 Disease

Limiting the number of people who congregate and interact with one another within a facility and allowing more physical space between people can help to curb spread of this infection. Depending on specific facility needs and severity of exposure to persons with COVID-19, social distancing can range from decreasing the number of people who can congregate at a time for different activities to suspending all non-essential activities. Explain to clients and staff why people are isolated from others to avoid stigmatizing those who are affected.

The following are examples of social distancing that can be considered in congregate settings to limit the spread of an infectious respiratory illness: Sleeping Arrangements	• Increase spacing so beds are at least 3-6 feet apart • If space allows, put less residents within a dorm/unit • Arrange beds so that individuals lay head-to-toe (or toe-to-toe), or use neutral barriers (foot lockers, curtains) to create barriers between beds • Move residents with symptoms into separate rooms with closed doors, and provide separate bathroom if possible • If only shared rooms are available, consider housing the ill person in a room with the fewest possible number of other residents • Avoid housing people with underlying conditions in same room as people with symptoms
Mealtimes	• Stagger mealtimes to reduce crowding in shared eating facilities • Stagger the schedule for use of common/shared kitchens
Bathrooms & Bathing	• Create a staggered bathing schedule to reduce the amount of people using the facilities at the same time
Recreation/Common Areas	• Create a schedule for using common spaces • Reduce activities that congregate many residents at once such as “house meetings” and opt for smaller group activities
Transport	• Opt for transporting less people per trip and ensure that passengers have more space between one another
Communication	• Reduce the amount of face-to-face interactions with residents for simple informational purposes

AMERICAN OVERSIGHT

	• Consider using the following methods of communication: Bulletin boards, signs, posters, brochures, emails, phone, sliding information under someone's door or mailbox
Staff Activities	• Reduce unnecessary assembly of staff (e.g., large meetings where information can be communicated otherwise) • Where appropriate, opt for conference calls instead of in-person meetings

Subject: Outstanding Congressional Questions for DOH
Date: Tuesday, March 17, 2020 10:41:38 AM

Courtney/Drew, below are outstanding questions from the congressional delegation. Please provide answers when you have a chance. We're working to lock in details for today's call with the Surgeon General and the delegation - if you can provide answers prior to then, the call will go smoother. Thanks in advance.

(Rep Daniel Webster)

Is there a contact at the FL DOH for local providers who are looking for tests kits? We have a clinic in the Villages trying to get test kits that has asked us for assistance. Sumter County Health Dept told them they didn't have any and that they were letting the private sector take the lead on testing, but couldn't provide them any information on where to get some. I know South Fla is the priority for new tests, but given the most of the Villagers are in the "older adult" would they be sort of 'next in line"?

(Rep Ted Deutch)

We have received several inquiries from constituents who report symptoms of COVID-19 but when they call county health department they are advised to call doctors and then bounced around from docs, to hospitals, to urgent care, and back to fdoh. Is there a way we can get calls diverted to a very clear screening questionnaire that helps people understand either why they don't fit testing criteria or if they do fit, where to go to get tested?
In the meantime, where is the best place to direct constituents who have been bounced around and need a clear answer about testing eligibility and acesss?

(Rep Stephanie Murphy)

1. We have several health care providers in our district who are concerned about access to N95 masks and personal protective equipment. When will we have more and how do they get them?
2. Additionally, they are asking when the State will have a sufficient number of tests to meet the CDC official guidance on who gets tested. I know the guidelines in Florida right now are strict because of lack of supply and capacity. We are hopeful to get to a point that anyone who meets CDC guidelines for a test can get tested.
3. Finally, has the State confirmed that we are indeed in the community spread phase of the virus? If not, why is that the conclusion? If so, what changes are happening as a result?

Please note that under Florida law correspondence sent to the Governor's Office, which is not confidential or exempt pursuant to chapter 119 of the Florida Statutes, is a public record made available upon request.

NOVEL CORONAVIRUS DISEASE 2019 (COVID-19)

DRAFT

AMERICAN OVERSIGHT

Presentation Overview

- COVID-19 outbreak
- Transmission and symptoms
- Persons Under Investigation (PUI) and reporting to public health
- Treatment and testing
- Infection prevention and control
- Travel advisories
- Public health monitoring

DRAFT

AMERICAN OVERSIGHT

COVID-19 OUTBREAK

AMERICAN OVERSIGHT

An outbreak of a new coronavirus was detected in late 2019.

- Respiratory illness outbreak first detected in Wuhan City, Hubei Province, China
- First cases linked to a seafood and live animal market
- Person-to-person spread
- Spread to other countries, including the United States
- As of 3/11/2020:
  - 938 U.S. cases
  - 28 Florida cases

Florida HEALTH

4

Update the numbers in red as needed

The first cases were linked to a seafood and live animal market which suggests that it may have first spread for an animal to a person. We know other similar viruses have been spread from camels, cats, and bats. Now we know that it is spreading from person to person in China and has spread to people in other countries, Including the US. As of XXX date, there are XXX cases in the world in XX countries, XX cases in the US in XX states and XX cases in Florida.

AMERICAN OVERSIGHT

COVID-19 is caused by the virus severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2)

- Spikes on the surface of coronaviruses give this virus family its name – corona, which is Latin for "crown"
- Similar to some other betacoronaviruses
  - MERS-CoV (Middle East respiratory syndrome coronavirus, which emerged in 2012)
  - SARS-CoV (severe acute respiratory syndrome coronavirus, which emerged in 2002)

Transmission electron microscope image shows SARS-CoV-2
Credit: NIAID-RML

DRAFT

This transmission electron microscope image shows SARS-CoV-2, the virus that causes COVID-19—isolated from a patient in the U.S. Virus particles are shown emerging from the surface of cells cultured in the lab. The spikes on the outer edge of the virus particles give coronaviruses their name, crown-like.
https://www.niaid.nih.gov/news-events/novel-coronavirus-sarscov2-images

AMERICAN OVERSIGHT

Most likely spread from a single, recent emergence from an animal reservoir[1]

- Many different coronaviruses are common in animal species, including:
  - Camels
  - Cattle
  - Cats
  - Bats
- Rarely spread to humans
- Sequences of the virus from U.S. patients are similar to the one that China initially posted[1]
- Suggests spread from single, recent emergence of the virus from an animal reservoir[1]

Scanning electron microscope image shows the virus that causes COVID-19
Credit: NIAID-RML

DRAFT

Coronaviruses are a large family of viruses that are common in many different species of animals, including camels, cattle, cats, and bats. Rarely, animal coronaviruses can infect people and then spread between people such as with MERS, SARS, and now with this new virus that causes COVID-19.

The virus that causes COVID-19 is a betacoronavirus, like MERS and SARs, both of which have their origins in bats. The sequences from U.S. patients are similar to the one that China initially posted, suggesting a likely single, recent emergence of this virus from an animal reservoir.

Early on, many of the patients in the COVID-19 outbreak in Wuhan, China had some link to a large seafood and live animal market, suggesting animal-to-person spread. Later, a growing number of patients reportedly did not have exposure to animal markets, indicating person-to-person spread.

https://www.cdc.gov/coronavirus/2019-nCoV/summary.html

AMERICAN OVERSIGHT

Florida governor issued an Executive Order regarding COVID-19.

- On March 1, 2020, Governor Ron DeSantis issued Executive Order 20-51, directing a Public Health Emergency and establishing Florida's Response Protocol for COVID-19.
- First two presumptive positive cases in Florida announced on March 1, 2020. One in Hillsborough County and one in Manatee County.

DRAFT

AMERICAN OVERSIGHT

Florida State Surgeon General declares a public health emergency in response to COVID-19

- Declaration made March 1, 2020.
- Request assistance from CDC.
- People who are symptomatic and may have come in contact with the disease should:
  - Contact their health care provider prior to traveling to health care facility so that proper protective measures can be put in place.
  - Self-isolate until cleared by Florida Department of Health (DOH).
- All health care providers, hospitals, and labs should immediately report suspected cases of COVID-19 to DOH.
- DOH has an Incident Management Team to coordinate the response.
- DOH may take actions such as quarantine, isolation, and other interventions pursuant with Florida Statutes to protect the health of the public.

AMERICAN OVERSIGHT

TRANSMISSION AND SYMPTOMS

DRAFT

AMERICAN OVERSIGHT

COVID-19 most often spreads from person to person.

- Spread through respiratory droplets from an infected person who coughs or sneezes.
- Most often among close contacts.
- Transmission may occur before symptoms develop[3] and from a person who remains asymptomatic.

DRAFT

There is much to learn about the newly emerged COVID-19, including how and how easily it spreads. Based on what is currently known about COVID-19 and what is known about other coronaviruses, spread is thought to occur mostly from person-to-person via respiratory droplets among close contacts.

Close contact can occur while caring for a patient, including:

- being within approximately 6 feet (2 meters) of a patient with 2019-n-CoV for a prolonged period of time.
- having direct contact with infectious secretions from a patient with COVID-19. Infectious secretions may include sputum, serum, blood, and respiratory droplets.

If close contact occurs while not wearing all recommended PPE, health care personnel may be at risk of infection.

With most respiratory viruses, people are expected to be most contagious while they have symptoms.
However, transmission from a person in their incubation period was documented in Germany and asymptomatic transmission was recently documented in Taiwan.
https://www.cdc.gov/coronavirus/2019-ncov/hcp/caring-for-patients.html
https://www.cdc.gov/coronavirus/2019-ncov/hcp/faq.html

AMERICAN OVERSIGHT

It is still unknown what specimens will contain viable virus that causes COVID-19.

Viable coronavirus found in various specimens

- SARS-CoV (2002)
  - Respiratory
  - Blood
  - Urine
  - Stool
- MERS-CoV (2012)
  - Respiratory only
- Virus that causes COVID-19 (2019)
  - Respiratory
  - Research ongoing on other specimens…

DRAFT

While viable, infectious SARS-CoV has been isolated from respiratory, blood, urine, and stool specimens, in contrast – viable, infectious MERS-CoV has only been isolated from respiratory tract specimens. It is not yet known whether other non-respiratory body fluids from an infected person including vomit, urine, breast milk, or semen can contain viable, infectious COVID-19.

AMERICAN OVERSIGHT

Fever, Cough, and Shortness of Breath are predominant symptoms and are part of the persons under investigation criteria.

Reported illnesses have ranged from people with mild symptoms to people being severely ill and dying. Frequently reported signs and symptoms include fever (83–98%), cough (46%–82%), myalgia or fatigue (11–44%), and shortness of breath (31%) at illness onset.

Sore throat has also been reported in some patients early in the clinical course. Less commonly reported symptoms include sputum production, headache, hemoptysis, and diarrhea. Some patients have experienced gastrointestinal symptoms such as diarrhea and nausea prior to developing fever and lower respiratory tract signs and symptoms. The fever course among patients with COVID-19 infection is not fully understood; it may be prolonged and intermittent. Asymptomatic infection has been described in one child with confirmed COVID-19 infection and chest computed tomography (CT) abnormalities.

https://www.cdc.gov/coronavirus/2019-ncov/hcp/clinical-guidance-management-patients.html

AMERICAN OVERSIGHT

There can be additional symptoms and asymptomatic infections.

- Sore throat
- Sputum production
- Headache
- Hemoptysis
- Diarrhea
- Asymptomatic[4,6]

DRAFT

Florida HEALTH

13

Sore throat has also been reported in some patients early in the clinical course. Less commonly reported symptoms include sputum production, headache, hemoptysis, and diarrhea. Some patients have experienced gastrointestinal symptoms such as diarrhea and nausea prior to developing fever and lower respiratory tract signs and symptoms. The fever course among patients with COVID-19 infection is not fully understood; it may be prolonged and intermittent.

Asymptomatic infection has been described in one 10 year old child with confirmed COVID-19 infection and chest computed tomography (CT) abnormalities (ground-glass lung opacities). The role of asymptomatic transmission is not yet known.

https://www.cdc.gov/coronavirus/2019-ncov/hcp/clinical-guidance-management-patients.html

AMERICAN OVERSIGHT

Severe symptoms may appear 7 days or more after onset.

One study[5] found that severe symptoms including dyspnea and acute respiratory distress syndrome (ARDS) may develop later in the course of illness.

DRAFT

This suggests that a person with mild or moderate symptoms that does not require hospitalization may need to need follow-up during the second week of illness

AMERICAN OVERSIGHT

Older adults and those with comorbidities may be at higher risk of severe illness.

- Risk factors for severe illness are not yet clear.
- Older patients[6] and those with chronic medical conditions may be at higher risk for severe illness.
- In one study,[5] compared to patients not admitted to an intensive care unit, critically ill patients were:
  - Older (median age 66 years versus 51 years)
  - More likely to have underlying co-morbid conditions (72% versus 37%)

DRAFT

Florida HEALTH

Case-fatality rate[6]
2.3% (1023 of 44672 confirmed cases)
14.8% in patients aged ≥80 years (208 of 1408)
8.0% in patients aged 70-79 years (312 of 3918)
49.0% in critical cases (1023 of 2087)

AMERICAN OVERSIGHT

Chinese CDC summary report shows spectrum of disease.[6]

- Spectrum of disease (N=44,415)
  - Mild: 81% (36,160 cases)
  - Severe: 14% (6,168 cases)
  - Critical: 5% (2,087 cases)
- Case fatality rate
  - 2.3% (1,023 of 44,672 confirmed cases)
  - 14.8% in patients aged ≥80 years (208 of 1,408)
  - 8.0% in patients aged 70–79 years (312 of 3,918)
  - 49.0% in critical cases (1,023 of 2,087)

DRAFT

Florida HEALTH

16

The report included 72314 Cases (as of February 11, 2020)

- Confirmed cases: 44672 (62%)
- Suspected cases: 16186 (22%)
- Diagnosed cases: 10567 (15%)
- Asymptomatic cases: 889 (1%)

Of the over 44,000 confirmed cases, 5% were considered critical.
Most cases were classified as mild (81%; ie, nonpneumonia and mild pneumonia). However, 14% were severe (ie, dyspnea, respiratory frequency ≥30/min, blood oxygen saturation ≤93%, partial pressure of arterial oxygen to fraction of inspired oxygen ratio <300, and/or lung infiltrates >50% within 24 to 48 hours), and **5% were critical (ie, respiratory failure, septic shock, and/or multiple organ dysfunction or failure)**

AMERICAN OVERSIGHT

Chinese CDC report[6] finds most cases age 30–79.

Age distribution (N=44,672)

- ≥80 years: 3% (1,408 cases)
- 30–79 years: 87% (38,680 cases)
- 20–29 years: 8% (3,619 cases)
- 10–19 years: 1% (549 cases)
- <10 years: 1% (416 cases)

DRAFT

AMERICAN OVERSIGHT

Incubation period can range from 2–14 days.

Early study for COVID-19 estimated the incubation period at ~5 days (95% confidence interval, 4 to 7 days).[2]

DRAFT

Florida HEALTH

CDC believes at this time that symptoms of COVID-19 may appear in as few as 2 days or as long as 14 after exposure. This is based on what has been seen previously as the incubation period of SARS-CoV and MERS-CoV viruses.

AMERICAN OVERSIGHT

Rapidly triage and isolate suspected COVID-19 patients.

- Evaluate the patient in a single-person room with the door closed.
- Airborne Infection Isolation Rooms (AIIRs) should be reserved for patients undergoing aerosol-generating procedures.
- Ask the patient to wear a mask.
- Ask about:
  - Respiratory symptoms
  - Travel history
  - Contact with confirmed or suspect COVID-19 cases

DRAFT

Florida HEALTH

AMERICAN OVERSIGHT

PERSONS UNDER INVESTIGATION (PUI) AND REPORTING TO PUBLIC HEALTH

DRAFT

AMERICAN OVERSIGHT

Flowchart to Identify and Assess

- Use flow chart for the evaluation of patients who may be ill with or who may have been exposed to COVID-19.
- FloridaHealth.gov/diseases-and-conditions/COVID-19/
  - Select the drop down for Guidance for Health Care Providers
  - Select Clinician Screening Tool

DRAFT

AMERICAN OVERSIGHT

COVID laboratory testing

- Private and public health partners are working together to make sure testing is available to those who need it.
- Capacity is increasing quickly.
- Commercial laboratories such as LabCorp and Quest perform the testing.
- Many of our large hospital systems in Florida have testing available, or plan to in the near future.
- Florida Public Health Laboratories focus on testing patients who meet CDC criteria.

DRAFT

Florida HEALTH

22

Please update as necessary

Based on the FDOH Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) - March 10, 2020

Footnotes

1Close contact is defined as a) being within approximately 6 feet (2 meters) of a COVID -19 case for a prolonged period; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case– or –b) having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on) If such contact occurs while not wearing recommended personal protective equipment (PPE) (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection), criteria for PUI consideration are met. Data to inform the definition of close contact are limited. Considerations when assessing close contact include the duration of exposure (e.g., longer exposure time likely increases exposure risk) and the clinical symptoms of the person with COVID-19 (e.g., coughing likely increases exposure risk as does exposure to a severely ill patient). Special consideration should be given to healthcare personnel exposed in healthcare settings. 2For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation. Because of their often extensive and close contact with vulnerable patients in healthcare settings, even mild signs and symptoms (e.g., sore throat) of COVID-19 should be evaluated among potentially exposed healthcare personnel. 3Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for patients in other countries. 4Fever may be subjective or confirmed. 5Affected areas are defined as

AMERICAN OVERSIGHT

geographic regions where sustained community transmission has been identified. For a list of relevant affected areas, see Coronavirus Disease 2019 Information for Travel (https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html)

AMERICAN OVERSIGHT

Criteria for PUI testing at the DOH laboratory

A. Any person, including health care workers[1], who has had close contact[2] with a laboratory-confirmed[3] COVID-19 case within 14 days of symptom onset and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).
B. Person is part of a non-household outbreak of suspected COVID-19.
C. Person hospitalized with unexplained respiratory illness or person who died from unexplained respiratory illness.
D. Person traveled to or from an affected geographic area[5] with widespread community transmission and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

23

Please update as necessary

geographic regions where sustained community transmission has been identified. For a list of relevant affected areas, see Coronavirus Disease 2019 Information for Travel (https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html)

AMERICAN OVERSIGHT

PUI to consider testing at DOH laboratory

E. Person had community contact (e.g., attended the same gathering or stayed on the same cruise ship) with a laboratory-confirmed COVID-19 case and fever or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

F. Person is age ≥ 65 years, has chronic medical conditions, or is in an immunocompromised state and has fever or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

DRAFT

Consider testing at a commercial laboratory. If commercial testing is not available, contact your CHD for patients that meet CDC priority criteria.

Please update as necessary

Based on the FDOH Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) - March 10, 2020

AMERICAN OVERSIGHT

If the PUI criteria are met, take these steps:

- Notify infection control immediately.
- Notify the county health department immediately (FloridaHealth.gov/CHDEpiContact).
- Ask the patient to wear a facemask.
- Initiate contact and airborne precautions, including use of eye protection (e.g., goggles or a face shield) for all health care personnel entering the room.

DRAFT

AMERICAN OVERSIGHT

Reporting Requirements

Potential cases of COVID-19 should be reported immediately, 24 hours/7 days per week, by phone to your county health department. The county health department will ask for:

- Travel history and relevant exposures
- Where the infected person lives and works
- Copies of laboratory results
- Copies of medical records
- Filled out interim person screening form: FloridaHealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/_documents/2019-ncov-pui-form.pdf

DRAFT

AMERICAN OVERSIGHT

TREATMENT AND TESTING

DRAFT

AMERICAN OVERSIGHT

There is no specific treatment for COVID-19 at this time.

- Not all patients with COVID-19 infection will require medical supportive care.
- Supportive care of complications, including advanced organ support for respiratory failure, septic shock, and multi-organ failure.
- Empiric testing and treatment for other viral or bacterial etiologies may be warranted.
- Corticosteroids are not routinely recommended for viral pneumonia or ARDS and should be avoided unless they are indicated for another reason.
- There are currently no antiviral drugs licensed by the U.S. Food and Drug Administration (FDA) to treat COVID-19.
- Clinical trials for investigational therapeutics
- www.cdc.gov/coronavirus/2019-ncov/hcp/clinical-guidance-management-patients.html

DRAFT

Florida HEALTH

28

Not all patients with COVID-19 infection will require medical supportive care. Clinical management for hospitalized patients with COVID-19 infection is focused on supportive care of complications, including advanced organ support for respiratory failure, septic shock, and multi-organ failure. Empiric testing and treatment for other viral or bacterial etiologies may be warranted.
Corticosteroids are not routinely recommended for viral pneumonia or ARDS and should be avoided unless they are indicated for another reason (e.g., COPD exacerbation, refractory septic shock following Surviving Sepsis Campaign Guidelines).
There are currently no antiviral drugs licensed by the U.S. Food and Drug Administration (FDA) to treat COVID-19 infection.

AMERICAN OVERSIGHT

Testing is currently only available through the CDC.

- The CDC developed real-time reverse transcriptase polymerase chain reaction (RT-PCR) diagnostic panel for COVID-19.
- The Florida Bureau of Public Health Laboratories are testing. CDC will confirm the results of those tests.
- Commercial lab testing may be available.
- Coordinate with your county health department for public health laboratory testing.

Credit: CDC

Florida HEALTH

AMERICAN OVERSIGHT

INFECTION PREVENTION AND CONTROL

DRAFT

AMERICAN OVERSIGHT

Health care facilities should minimize exposures to potential PUIs.

- Triage potential PUIs before arrival, if possible.
- Encourage all persons with possible respiratory infection to adhere to:
  - Respiratory hygiene and cough etiquette
  - Hand hygiene
  - Triage procedures
- Health care facilities should:
  - Post signs in appropriate areas
  - Make tissues available
  - Provide facemasks to people with respiratory illness
  - Provide waste receptacles
- Separate potential PUIs from other people and make sure that they are in a well-ventilated area or wait in their personal vehicle.

DRAFT

AMERICAN OVERSIGHT

Transmission of the virus that causes COVID-19 in health care settings has occurred.

A study that included 44,672 confirmed cases in China conducted through February 11, 2020 found health care personnel infected[6]

- 3.8% (1,716 of 44,672) including 5 deaths
- 63% in Wuhan (1,080 of 1,716)
- 14.8% cases classified as severe or critical (247 of 1,668)

A study of 138 patients in Zhongnan Hospital in Wuhan, China was conducted in January[5]

- Presumed hospital-related transmission of the virus that causes COVID-19 was suspected in 41% of the cases
- Health care personnel (HCP) were 40 (29%) of the total cases

Florida HEALTH

DRAFT

AMERICAN OVERSIGHT

Ensure proper use of PPE

- Training on correct use, proper putting on and taking off, and disposal of PPE

  - www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html

Florida HEALTH

AMERICAN OVERSIGHT

Respirator and facemasks for HCP

- If there are respirator supply chain issues, put on a respirator or facemask (if a respirator is not available) before entry into the patient room or care area.
- N95 respirators or respirators that offer a higher level of protection should be used instead of a facemask when performing or present for an aerosol-generating procedure
- If reusable respirators (e.g., powered air purifying respirators [PAPRs]) are used, they must be cleaned and disinfected according to manufacturer's reprocessing instructions prior to re-use.
- When the supply chain is restored, facilities with a respiratory protection program should return to use of respirators for patients with known or suspected COVID-19.

DRAFT

AMERICAN OVERSIGHT

Infection control for collecting diagnostic respiratory specimens from possible COVID-19 patient

- HCP in the room should wear an N-95 or higher-level respirator (or facemask if a respirator is not available), eye protection, gloves, and a gown.
- The number of HCP present during the procedure should be limited to only those essential for patient care and procedure support. Visitors should not be present for specimen collection.
- Specimen collection should be performed in a normal examination room with the door closed.
- Clean and disinfect procedure room surfaces promptly as described in the section on environmental infection control below.

DRAFT

AMERICAN OVERSIGHT

Discuss HCP with exposures to COVID-19 cases with the health department.

- Assessment of risk, monitoring, and work restriction decisions for HCP with potential exposure to COVID-19 should be discussed with the county health department.
- CDC guidance www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html

DRAFT

AMERICAN OVERSIGHT

Follow routine cleaning and disinfection procedures.

- Ensure that environmental cleaning and disinfection procedures are followed consistently and correctly.
- Routine cleaning and disinfection procedures are appropriate for COVID-19 in health care settings, including those patient care areas in which aerosol-generating procedures are performed.
- Products with EPA-approved emerging viral pathogens claims are recommended for use against COVID-19.
- If there are no available EPA-registered products that have an approved emerging viral pathogen claim for COVID-19, products with label claims against human coronaviruses should be used according to label instructions.
- Management of laundry, food service utensils, and medical waste should also be performed in accordance with routine procedures.

Florida HEALTH

37

Ensure that environmental cleaning and disinfection procedures are followed consistently and correctly.
Routine cleaning and disinfection procedures (e.g., using cleaners and water to pre-clean surfaces prior to applying an EPA-registered, hospital-grade disinfectant to frequently touched surfaces or objects for appropriate contact times as indicated on the product's label) are appropriate for COVID-19 in health care settings, including those patient-care areas in which aerosol-generating procedures are performed.
Products with EPA-approved emerging viral pathogens claims are recommended for use against COVID-19.

AMERICAN OVERSIGHT

Use dedicated equipment for COVID-19 patients when possible.

- Dedicated medical equipment should be used for patient care.
- All non-dedicated, non-disposable medical equipment used for patient care should be cleaned and disinfected according to manufacturer's instructions and facility policies.

DRAFT

AMERICAN OVERSIGHT

Adhere to Standard and Transmission-Based Precautions

For more specific information:

https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html

https://www.cdc.gov/infectioncontrol/guidelines/isolation/

DRAFT

AMERICAN OVERSIGHT

Additional guidance on these topics is available.

- Manage visitor access and movement within the facility.
- Implement engineering controls.
- Monitor and manage ill and exposed health care personnel.
- Train and educate health care personnel.
- Implement environmental infection control.
- Establish reporting within health care facilities and to public health authorities.
- www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html

DRAFT

AMERICAN OVERSIGHT

Discontinuation of transmission-based precautions.

- Decisions to discontinue transmission-based precautions or in-home isolation can be made on a case-by-case basis
- Consultation between clinicians, infection prevention and control specialists, and public health
- Based upon multiple factors, including disease severity, illness signs and symptoms, and results of laboratory testing for the virus that causes COVID-19 in respiratory specimens
- CDC Discontinuation of Transmission-Based Precautions www.cdc.gov/coronavirus/2019-ncov/hcp/disposition-hospitalized-patients.html

DRAFT

Florida HEALTH

41

Negative rRT-PCR results from 2 sets of nasopharyngeal and throat swabs collected at least 24 hours apart from a patient with COVID-19 are needed before discontinuing Transmission-Based Precautions is considered. A total of four negative specimens are needed to meet this requirement.

AMERICAN OVERSIGHT

Confirmed cases of COVID-19 can be discharged from the hospital after consultation with public health

- For **confirmed** COVID-19 cases, the decision to discharge is based on public health and medical assessment in consultation with the DOH.
- Isolation should be maintained at home if the patient returns home before the time period recommended for discontinuation of hospital transmission-based precautions.
- Home care guidance for COVID-19 cases that are not in the hospital is available at: www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-home-care.html

DRAFT

Florida HEALTH

42

- Patients can be discharged from the healthcare facility whenever clinically indicated in consultation with public health.
- Isolation should be maintained at home if the patient returns home before the decision is made to discontinue Transmission-Based Precautions. The decision to send the patient home should be made in consultation with the patient's clinical care team and local or state public health departments and should include considerations of the home's suitability for and patient's ability to adhere to home isolation recommendations, and potential risk of secondary transmission to household members with immunocompromising conditions. See CDC Interim Guidance for Home Care of patients with confirmed COVID-19 and persons under investigation for COVID-19, Interim Guidance for Preventing 2019-nCoV from Spreading to Others in Homes and Communities and Interim Guidance for Discontinuation of In-Home Isolation for Patients with COVID-19.

- Checklist for transport and arrival: www.cdc.gov/coronavirus/2019-ncov/hcp/hcp-personnel-checklist.html

DRAFT

AMERICAN OVERSIGHT

Optimize supplies of N95 respirators.

Work to minimize exposure using engineering and administrative controls as well as proper use of personal protective equipment (PPE)

- Engineering controls
  - Placing a barrier between the HCP and the hazard, such as in reception areas
  - Closed suctioning systems for airway suctioning of intubated patients
- Administrative controls
  - Exclude HCP not directly involved in patient care from rooms with COVID-19 cases
  - Exclude visitors to patients with known or suspected COVID-19
  - Limit face-to-face HCP encounters with patients
  - Provide training on the use on N95 respirators

More strategies can be found at:

www.cdc.gov/coronavirus/2019-ncov/hcp/respirator-supply-strategies.html

AMERICAN OVERSIGHT

COVID-19 and Cruise Ship Travel

- CDC recommends travelers, particularly those with underlying health issues, defer all cruise ship travel worldwide.
- Sustained community spread of respiratory illness caused by COVID-19 has been reported in many countries.
- Cruise ship passengers are at increased risk of person-to-person spread of infectious diseases, including COVID-19.
- Older adults and travelers with underlying health issues should avoid situations that put them at increased risk for more severe disease. This entails avoiding crowded places, avoiding non-essential travel such as long plane trips, and especially avoiding embarking on cruise ships.

AMERICAN OVERSIGHT

The U.S. Government has limited entry from China.

On February 2, 2020:

- The U.S. suspended entry of foreign nationals who have been in China within the past 14 days.
- U.S. citizens, residents and their immediate family members who traveled to Hubei Province and other parts of mainland China in the last 14 days:
  - Are allowed to enter the United States.
  - Are subject to health monitoring and possible quarantine for up to 14 days.

www.dhs.gov/news/2020/02/02/dhs-issues-supplemental-instructions-inbound-flights-individuals-who-have-been-china

DRAFT

AMERICAN OVERSIGHT

CDC provides a health alert for travelers from China.

Florida HEALTH

50

https://www.cdc.gov/coronavirus/2019-ncov/travelers/from-china.html

CDC and US Customs and Border Protection (CBP) are implementing enhanced health screenings to detect travelers with fever, cough, or difficulty breathing when entering the United States.

The screening procedures include:

Travelers fill out a short questionnaire about their travel, any symptoms, and contact information.

CDC staff take the temperature of each traveler with a hand-held non-contact thermometer (thermometers that do not touch the skin) and observe the traveler for cough or difficulty breathing. If sick travelers are identified, CDC evaluates them further to determine whether they should be taken to a hospital for medical evaluation and to get care as needed.

If the traveler does not have symptoms, CDC staff will provide health information cards to take with them. The cards tell travelers what symptoms to look out for, and what to do if they develop symptoms within 14 days after leaving China.

This health assessment and request for persons to monitor their health is part of a layered approach to limiting the spread of disease. When used with other public health measures, enhanced entry screening can strengthen our efforts to protect the United States from COVID-19 and other diseases.

AMERICAN OVERSIGHT

PUBLIC HEALTH MONITORING

DRAFT

AMERICAN OVERSIGHT

The Florida Department of Health is monitoring those possibly exposed.

- Personnel at the agency's 67 county health departments and the State Health Office in Tallahassee work together to protect Floridians from emerging diseases.
- DOH receives information from CDC on U.S. citizens/residents/family returning from impacted areas.
- CHDs work with travelers to restrict their movement, monitor for illness, isolate persons with symptoms, and ensure health care providers use proper infection control techniques.

DRAFT

Florida HEALTH

AMERICAN OVERSIGHT

The Florida Department of Health Monitoring Process

For people who may have been exposed, but have no symptoms:

- Monitor for symptoms for 14 days.
- Self isolate for 14 days.
  - Stay home as much as possible.
  - Avoid travel on publicly used vehicles, gathering with groups of people, and going out in public.
  - Excluded from work, school, and other public places.
- Follow provided education on prevention of spread.

Florida HEALTH

DRAFT

AMERICAN OVERSIGHT

Those with suspected or confirmed COVID-19 are asked to take precautions.

- Isolate at home or health care facility.
- Avoid public activities.
- Travel by ambulance or private car and avoid public transportation.
- Wear a mask when around other people.

www.cdc.gov/coronavirus/index.html

DRAFT

AMERICAN OVERSIGHT

The immediate risk to Americans remains low.

- For the general American public, who are unlikely to be exposed to this virus at this time, the immediate health risk from COVID-19 is considered low.
- More cases are likely to be identified in the coming days, including more cases in the U.S. and Florida.
- Person-to-person spread will continue to occur, including in the U.S.
- Everyone can do their part to prevent the spread of COVID-19 and other respiratory viruses.

DRAFT

Florida HEALTH

AMERICAN OVERSIGHT

Health care facilities should prepare now for community transmission of COVID-19.

In each health care facility, the primary goals include:

- Provision of the appropriate level of medical care
- Protecting health care personnel and non-COVID-19 patients accessing health care from infection
- Preparing for a potential surge in patients with respiratory infection
- Preparing for potential personal protective equipment supply and staff shortages

For more specific steps to take:

www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/guidance-hcf.html

DRAFT

Currently there are no medications to treat or vaccines to prevent COVID-19. Therefore, community approaches to slowing transmission including appropriate hand hygiene, cough etiquette, social distancing, and reducing face-to-face contact with potential COVID-19 cases are needed to slow disease transmission and reduce the number of people who get sick.

COVID-19

The World Health Organization made an announcement Feb. 11 that the official name for the illness caused by the new coronavirus (previously known as 2019 Novel Coronavirus or 2019-nCoV) is now COVID-19.

The Florida Department of Health (Department) is working closely with the Centers for Disease Control and Prevention (CDC) to closely monitor the current outbreak of 2019 novel coronavirus and is actively working to ensure that the most up-to-date CDC guidance is quickly and accurately disseminated to local partners. Though no cases have been reported in Florida to date, the Department is coordinating closely with our local partners to investigate, confirm, contain and report any suspected cases, should they occur.

For the best available information regarding 2019 novel coronavirus, please visit: *https://www.cdc.gov/coronavirus/index.html*.

DRAFT

AMERICAN OVERSIGHT

From: Pasley, Cassandra
To: Cooksey, Samantha
Cc: Coppola, Courtney; Roberson, Shamarial
Subject: PPE Sharing
Date: Tuesday, March 17, 2020 3:32:17 PM

Hi Samantha,

Ohio had its practitioners reduce their services and share PPE. See the link below regarding sharing of the PPE.

Ohio State Dental Board COVID-19 Advisory 2020-01, March 16, 2020 (For optimal viewing, please use a desk top screen)

The State Dental Board has been closely monitoring the spread of the coronavirus. As Dentists, Hygienists & staff we are a part of the healthcare community and have a responsibility in the prevention and mitigation efforts of the administration during this outbreak. Dentists are also in of the highest risk categories for both transmission and contraction of the Coronavirus as a majority of the procedures we perform creates significant aerosols in the operatories. As a part of the healthcare community and the community at large, we have to protect the safety of our patients and staff. The OSDB is closely monitoring the situation and decided to have these recommendations to the practicing dentists. This is a very difficult decision, but it comes at a critical time and it is our responsibility to take leadership in this situation and have protocols in place to reduce the spread and impact of Coronavirus amongst the communities we practice and live. The plan & recommendations will change as the situation demands and evolves.

These recommendations to the dental profession are intended to reduce the risk of patients' exposure to COVID-19 and to preserve PPE and supplies, while still allowing access to necessary and emergency dental services that will maintain the oral health of the citizens of Ohio and keep them out of the hospital ER.

Governor Mike DeWine contacted the Board and the Ohio Dental Association and asked for our help in addressing the spread of COVID-19. As integral parts of the medical community, we are being called to review our inventories and appointment books, and make the adjustments to provide mutual aid and relief to our partners in the medical and surgical communities.

Governor DeWine has requested the following:

A review of inventories and identification of any surplus personal protective equipment and supplies. Once identified, contact your local Emergency Management Agency about sharing these goods with local hospitals and medical clinics for COVID-19 patients and clinicians. EMA contact list can be found here: https://webeoctraining.dps.ohio.gov/ohiocountyEMADirectorList/countyemalist_web.aspx

Please reschedule elective procedures including but not limited to:

- Any cosmetic or aesthetic procedures, such as veneers, teeth bleaching, or cosmetic bonding
- All routine hygiene appointments
- Any orthodontic procedures not including those that relieve pain and infection or restore oral function or are trauma-related
- Initiation of any crowns, bridges, or dentures that do not address or prevent pain or restore normal oral

AMERICAN OVERSIGHT

functioning

- Any periodontal plastic surgery
- Extraction of asymptomatic non-carious teeth
- Recall visits for periodontally healthy patients
- Delay all appointments for high risk patients, including ASA 2 and 3 patients, unless it is an emergency

By sharing supplies we are directly supporting our fellow clinicians as they undertake the greatest viral threat in modern history. By rescheduling elective procedures we are doing our part to prevent community spread.

We urge you to undertake the two above strategies and consider the following additional measures:

o Use cell phone triage - use the cell phone to take a picture of the area and text to the dentist
o Have a detailed questionnaire/conversation before scheduling appointments and prior to any procedure about flu like symptoms, travel abroad for self and family/friends/co-workers etc. to permit a thorough evaluation of the patient
o Consider taking the temperature of the patient at the outset
o Reconsider scheduling high risk patients unless they need emergency treatment
o Careful evaluation of the need for scheduling of ASA 2 & 3 patients
o Use of 1% hydrogen peroxide rinse prior to examination of the oral cavity by the patient to reduce microbial load
o Use of rubber dam isolation & high volume suction to limit aerosol in treatment procedures
o Proper disinfection protocol between patients with a possible repeat of the protocol for a 2nd time.

<u>To prevent over-crowding of waiting areas or the possible spread of infection</u>

§ Consider having patients wait in their cars instead of the waiting areas to prevent inadvertent spread of the virus (call patient when surgical area is ready for treatment)
§ Consider staggering appointment times to reduce waiting room exposure
§ Consider rescheduling elective procedures on ASA 2 & 3 patients (https://www.asahq.org/standards-and-guidelines/asa-physical-status-classification-system)
§ Have front desk staff take measures to prevent exposure
§ Have sterilization staff, lab technicians and auxiliary staff take adequate measures to prevent exposure
§ Limit access to waiting room use to only patients. Accompanying individuals have to wait in their respective transportation.
§ Remove all magazines/toys etc from waiting area to prevent contamination.

Thank you for your understanding and cooperation as we manage through these very difficult and unprecedented times.

Clinical Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease 2019 (COVID-19)

March 15, 2020

The Department of Health (Department) has updated the clinical screening tool health care providers use in the identification of persons under investigation or suspected for coronavirus disease 2019 (COVID-19). The clinical screening tool is intended to assist health care practitioners in understanding their role in identifying individuals, specimen collection, shipping of specimens, and notification of local county health departments as appropriate.

The State Surgeon General, Dr. Scott Rivkees, hosts a weekly health care provider telephone conference call designed to provide updates from the Department, briefing from the Florida Agency for Health Care Administration, updates from other state agencies and address questions from partners. The updated clinical screening tool will be discussed in this week's telephone conference call. If you are interested in joining this weekly call, please see the call-in information below:

Date: Every Wednesday
Time: 2:00 pm - 2:30 pm
Call-In Number: 888-585-9008
Conference Room ID: 872-128-152

Additional Resources

The Centers for Disease Control and Prevention (CDC) issued their CDC Health Alert Network (HAN) Update which highlights guidance and recommendations for evaluating and identifying patients who should be tested for COVID-19 that were shared on March 4, 2020, on the CDC COVID-19 website at https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html. It supersedes the guidance and recommendations provided in CDC's HAN 428 distributed on February 28, 2020.

Health care practitioners should immediately implement recommended infection prevention and control practices (https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html) if a patient is suspected of having COVID-19.

The American Medical Association has published a Physician's Guide to COVID-19 that includes how to prepare your practice, protect yourself from infection and diagnosing patients with suspected or confirmed COVID- 19 (https://www.ama-assn.org/delivering-care/public-health/physicians-guide-covid-19).

AMERICAN OVERSIGHT

Clinical Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease 2019 (COVID-19) per Centers for Disease Control and Prevention (CDC)

Symptomatic individuals should be asked to wear a surgical mask upon arrival. Initiate contact and airborne precautions, using appropriate personal protective equipment (PPE).

Version 4.2 | March 15, 2020

SCREENING CRITERIA

If your patient is exhibiting **symptoms** of acute lower respiratory illness (e.g., fever, cough, and shortness of breath) **and** meets one or more of the following criteria:

1. Persons who have had a close contact with a laboratory-confirmed COVID-19 case
2. Persons hospitalized with acute lower respiratory illness of unknown origin
3. History of travel to or from an affected geographic area
4. History of international travel or a cruise
5. ≥65 with chronic health conditions
6. Immunocompromised persons

EXPANDED CRITERIA

If your patient does not meet the above criteria, testing may occur based on clinician's judgement.

1. The health care provider is responsible for specimen collection, handling and shipping. Please follow CDC guidance and use proper PPE.
2. Collected specimens should be processed within your health care facility or a commercial laboratory (e.g., LabCorp and Quest).
3. Follow CDC guidance for specimen collection, handling and shipping.

TESTING

If individual meets criteria for testing, wear appropriate PPE and initiate contact and airborne precautions.

1. The health care provider is responsible for specimen collection, handling and shipping. Please follow CDC guidance.
2. Collected specimens should be processed within your health care facility, if available; a commercial laboratory (e.g., LabCorp and Quest); or a Florida Department of Health State Laboratory.
3. Immediately notify your local county health department CHD Epidemiology Contacts.
4. Health care providers may consult local county health departments for additional guidance as needed.

FOR ADDITIONAL GUIDANCE

Providers are encouraged to frequently monitor Florida Department of Health and CDC websites for updated guidance on COVID-19.

AMERICAN OVERSIGHT

From: Dunn, Nathan P
To: Johnson, Jennifer S
Subject: RE: 2020 03 12 COVID-19 Call Center Script working DRAFT
Date: Friday, March 13, 2020 11:44:47 AM

It still stated this:

Q28 What do I do if I have symptoms?/Should I be tested for COVID-19?

A: If you develop a fever and symptoms of respiratory illness, such as cough or shortness of breath, within 14 days after travel from a country with transmission of COVID-19, you should call a healthcare professional and mention your recent travel.
If you have had close contact with someone showing these symptoms who has recently traveled from an impacted area, you should call a healthcare professional and mention your close contact and their recent travel.
Your healthcare professional will either perform test in office or coordinate testing with your county health department.

Q32 **How does a healthcare provider/facility obtain testing?**
A: If a healthcare provider has a symptomatic patient, they should contact their local county health department's epidemiology program (provide county's epi contact information) to coordinate care and testing if needed.

Joint Information Center on COVID-19 for the State of Florida

FOR IMMEDIATE RELEASE
March 12, 2020

Contact: Joint Information Center on COVID-19 for the State of Florida
(850) 815-4940, ESF14@em.myflorida.com

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 15 new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

These 15 new positive cases were tested in Florida Department of Health labs. The Department of Health is now including results from private laboratories in these daily reports. Results from private labs will initially include fewer details, such as travel, because the state epidemiological team does not learn about the private lab cases until the results are added into the state system. As soon as the Department of Health learns of a positive case from a private lab, the epidemiological investigation begins. The Department of Health will provide additional information about private lab cases as soon as details become available.

New Positive Cases

- A 73-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.

- A 74-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.

- A 50-year old male New York resident who is currently in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

AMERICAN OVERSIGHT

- A 70-year old male Massachusetts resident in Sarasota County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

- A 24-year old female in Alachua County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.

- A 70-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with a Nile River Cruise/Tour in Egypt.

- A 83-year old male in Duval County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

- A 57-year old male in Clay County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

- A 28-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

- A 25-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case.

- A 20-year old female Texas resident in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.

- A 68-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This case is associated with Port Everglades.

AMERICAN OVERSIGHT

- A 36-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

- A 49-year old female Hillsborough County resident has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with travel to Europe.

- A 77-year old male in Lee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.

- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.

    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

AMERICAN OVERSIGHT

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional

AMERICAN OVERSIGHT

10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.

- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

AMERICAN OVERSIGHT

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Contact: Joint Information Center on COVID-19 for the State of Florida
(850) 815-4940, ESF14@em.myflorida.com

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will be issuing this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

AMERICAN OVERSIGHT

- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

AMERICAN OVERSIGHT

Port Everglades Advisory

Last night, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Further, all three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their County Health Department or health care provider and self-isolate for 14 days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise to monitor their health for 14 days and, if they develop symptoms, to immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to

AMERICAN OVERSIGHT

their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with coronavirus disease 2019 (COVID-19), including two positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;

AMERICAN OVERSIGHT

- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Established an incident management team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities, and hospitals.
- Established a public call-center for questions regarding COVID-19.
- Developed and distributed the communications approved COVID-19 Presentation to CHDs for use at community meetings.

AMERICAN OVERSIGHT

- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.

AMERICAN OVERSIGHT

- AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Jacksonville and Orlando today to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES (APD)

- APD's Director, and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General and providing the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing another visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- DOEA Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a Monday press conference to address Florida's recent actions and issue a State of Emergency for COVID-19.

- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.

- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.

- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of our Area Agencies on Aging (AAA) were on this call and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

AMERICAN OVERSIGHT

- DCF's Office of Child Welfare sent communication about COVID-19, specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly with updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida agency is coordinating with the Florida Department of Elder Affairs to see how we can assist with spreading information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.

- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.

- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers, and stakeholders.

- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida department and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC has stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas, and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities, and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, FDOT Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida

AMERICAN OVERSIGHT

ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.

- FDOT Secretary Thibault and staff from the department will be hosting weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.

- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation, and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.

- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2. This domestic campaign has a heavy emphasis on attracting visitors from east of the Mississippi, the Northeast, Midwest and "drive markets," such as Atlanta, Dallas, Houston, and Birmingham. This will encourage all visitors who are seeking a vacation to come to Florida, including those who may be less inclined to fly.

AMERICAN OVERSIGHT

- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and eliminating other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- OIR Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
    - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
    - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
    - Work with public health officials to do everything possible to prepare and respond; and
    - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations, and other health entities to

AMERICAN OVERSIGHT

allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information. FDLE is reviewing its COOP and determining which members can work from home if necessary.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Joint Information Center on COVID-19 for the State of Florida

FOR IMMEDIATE RELEASE
March 11, 2020

Contact: Joint Information Center on COVID-19 for the State of Florida
(850) 815-4940, ESF14@em.myflorida.com

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will be issuing this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

AMERICAN OVERSIGHT

- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

*A known history of exposure to COVID-19 outside of the state.

AMERICAN OVERSIGHT

Port Everglades Advisory

Last night, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Further, all three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their County Health Department or health care provider and self-isolate for 14 days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise to monitor their health for 14 days and, if they develop symptoms, to immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to

AMERICAN OVERSIGHT

their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with coronavirus disease 2019 (COVID-19), including two positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;

AMERICAN OVERSIGHT

- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Established an incident management team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities, and hospitals.
- Established a public call-center for questions regarding COVID-19.
- Developed and distributed the communications approved COVID-19 Presentation to CHDs for use at community meetings.

AMERICAN OVERSIGHT

- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.

AMERICAN OVERSIGHT

- AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Jacksonville and Orlando today to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES (APD)

- APD's Director, and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General and providing the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing another visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- DOEA Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a Monday press conference to address Florida's recent actions and issue a State of Emergency for COVID-19.

- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.

- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.

- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of our Area Agencies on Aging (AAA) were on this call and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

AMERICAN OVERSIGHT

- DCF's Office of Child Welfare sent communication about COVID-19, specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly with updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida agency is coordinating with the Florida Department of Elder Affairs to see how we can assist with spreading information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.

- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.

- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers, and stakeholders.

- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida department and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC has stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas, and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities, and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, FDOT Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida

AMERICAN OVERSIGHT

ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.

- FDOT Secretary Thibault and staff from the department will be hosting weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.

- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation, and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.

- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2. This domestic campaign has a heavy emphasis on attracting visitors from east of the Mississippi, the Northeast, Midwest and "drive markets," such as Atlanta, Dallas, Houston, and Birmingham. This will encourage all visitors who are seeking a vacation to come to Florida, including those who may be less inclined to fly.

AMERICAN OVERSIGHT

- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and eliminating other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- OIR Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
    - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
    - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
    - Work with public health officials to do everything possible to prepare and respond; and
    - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations, and other health entities to

AMERICAN OVERSIGHT

allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information. FDLE is reviewing its COOP and determining which members can work from home if necessary.

About the Florida Department of Health

Florida Department of Health Announces New Positive COVID-19 Cases in Florida, Test Performed by Advent Health

TALLAHASSEE — The Florida Department of Health has announced one new positive cases of coronavirus disease (COVID-19) in Florida. This test was performed through a partnership with Advent Health. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 68-year old male in Seminole County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

AMERICAN OVERSIGHT

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

AMERICAN OVERSIGHT

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.

AMERICAN OVERSIGHT

- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Jared:

Harbor Pilots are going aboard the cruise ships that have Corona virus outbreaks in Port Everglades. Is there anyway we could get some N95 masks for pilots going aboard those cruise ships?

The Port is a $34 billion economic driver for Florida and there are 17 pilots in Port Everglades. If the pilots were to get the virus it could have a very bad affect on the economy.

Anything that could be done to get N95 masks would greatly be appreciated.

Good afternoon Vicky,

Thank you for reaching out to us regarding your concern with the homeless population and COVID-19. The department has a process in place to respond to the needs of these clients should a case arise. If the individual does not need an acute care clinical setting, we will find temporary shelter for the individual to recover during the 14-day self-isolation period. This is a similar process that is implemented when we are encountered with homeless clients who have Tuberculosis.

Thank you,

Yesenia D. Villalta, APRN, DNP, MSN
Florida Department of Health in Miami-Dade County
Administrator/Health Officer

Dr. Villalta and Team…

We share many of the concerns outlined in the below article.

Homeless at 'double risk' of getting, spreading coronavirus

AMERICAN OVERSIGHT

https://wsvn.com/news/us-world/homeless-at-double-risk-of-getting-spreading-coronavirus/

We understand that "yes" to 1) travel and fever OR 2) travel and respiratory symptoms are key to commence testing.

If a transient person tests positive at a hospital site, what are the protocols…

1. If individual was recently in shelter
2. If individual was unsheltered

Who would notify us?

I'm concerned our facilities do not have the footprint to provide isolation/quarantine. Also, what measures would we then take at facilities where exposure occurred? Many of our folks have underlying health conditions.

We are being as proactive as we can with available resources with sheltered and unsheltered populations using the guidance previously provided.

Sincerely, Vicki

Frank…

On the heels of the COVID-19 conversation yesterday, I feel strongly that we need to take some additional measures particularly for our unsheltered population. Through OEM, the Homeless Trust would like to request the following from the Director of Florida's Division of Emergency Management, Jared Moskowitz, for distribution to unsheltered homeless persons. Our unsheltered population is between 1,000 and 1,100, but as you know we experience constant inflow as this is a very transient population.

- 3,000 units of 4 oz. hand sanitizer

We will pass this out to unsheltered persons, along with the educational information providing on stopping the spread of germs.

AMERICAN OVERSIGHT

We'd also like to further equip our **50 outreach workers** (City of Miami, City of Miami Beach, plus specialized outreach teams with Camillus) who regularly engage, transport, and assist homeless the following:

- Wipes
- Gloves
- Surgical Mask
- Plastic bags for contaminated food, garbage, belongings.

It's my understanding that there is a scarcity of many of these items in South Florida, and supply chains are stretched thin.
While our shelters have ramped up efforts, they too, could soon be faced with shortages. We continue to monitor the situation.

Sincerely,

Vicki

EMAIL RECEIVED FROM EXTERNAL SOURCE.

Good afternoon Vicky,

Thank you for reaching out to us regarding your concern with the homeless population and COVID-19. The department has a process in place to respond to the needs of these clients should a case arise. If the individual does not need an acute care clinical setting, we will find temporary shelter for the individual to recover during the 14-day self-isolation period. This is a similar process that is implemented when we are encountered with homeless clients who have Tuberculosis.

Thank you,

Yesenia D. Villalta, APRN, DNP, MSN
Florida Department of Health in Miami-Dade County
Administrator/Health Officer

Dr. Villalta and Team…

We share many of the concerns outlined in the below article.

Homeless at 'double risk' of getting, spreading coronavirus
https://wsvn.com/news/us-world/homeless-at-double-risk-of-getting-spreading-coronavirus/

We understand that "yes" to 1) travel and fever OR 2) travel and respiratory symptoms are key to commence testing.

If a transient person tests positive at a hospital site, what are the protocols…

1. If individual was recently in shelter
2. If individual was unsheltered

Who would notify us?

I'm concerned our facilities do not have the footprint to provide isolation/quarantine.
Also, what measures would we then take at facilities where exposure occurred? Many of our folks have underlying health conditions.

We are being as proactive as we can with available resources with sheltered and unsheltered populations using the guidance previously provided.

Sincerely, Vicki

AMERICAN OVERSIGHT

On the heels of the COVID-19 conversation yesterday, I feel strongly that we need to take some additional measures particularly for our unsheltered population. Through OEM, the Homeless Trust would like to request the following from the Director of Florida's Division of Emergency Management, Jared Moskowitz, for distribution to unsheltered homeless persons. Our unsheltered population is between 1,000 and 1,100, but as you know we experience constant inflow as this is a very transient population.

- 3,000 units of 4 oz. hand sanitizer

We will pass this out to unsheltered persons, along with the educational information providing on stopping the spread of germs.

We'd also like to further equip our **50 outreach workers** (City of Miami, City of Miami Beach, plus specialized outreach teams with Camillus) who regularly engage, transport, and assist homeless the following:

- Wipes
- Gloves

Florida Department of Health Announces New Positive COVID-19 Cases in Florida, Test Performed by Advent Health

TALLAHASSEE — The Florida Department of Health has announced one new positive cases of coronavirus disease (COVID-19) in Florida. This test was performed through a partnership with Advent Health. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

COVID-19 Public Website and Call Center

AMERICAN OVERSIGHT

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for ~~the novel coronavirus~~COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted ~~three~~ public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. ~~Calls are scheduled for each Wednesday at 2:00 EST.~~
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- I~~Developed and i~~mplemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.

AMERICAN OVERSIGHT

- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the

AMERICAN OVERSIGHT

disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

Joint Information Center on COVID-19 for the State of Florida

FOR IMMEDIATE RELEASE
March 11, 2020

Contact: Joint Information Center on COVID-19 for the State of Florida
(850) 815-4940, ESF14@em.myflorida.com

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 63-year old male New York resident who is currently in St. Johns County has ~~been identified as~~tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case where this individual traveled from New York to attend Daytona Bike Week in Daytona, Florida. The New York Department of Health is leading the epidemiological investigation for this individual.

- A 56-year old male in Miami-Dade County has ~~been identified as~~tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case~~ where the individual was infected with COVID-19 while traveling to Iran.~~.

- A 70-year old male in Broward County ~~has been identified~~tested as positive. He is isolated and will continue to remain isolated until cleared by public health officials. This individual attended an Emergency Medical Services (EMS) Conference in Tampa, Florida. The epidemiological investigation is underway.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

AMERICAN OVERSIGHT

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified three positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.

AMERICAN OVERSIGHT

- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.

AMERICAN OVERSIGHT

- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;

AMERICAN OVERSIGHT

- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 63-year old male New York resident who is currently in St. Johns County has been identified as positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case where this individual traveled from New York to attend Daytona Bike Week in Daytona, Florida. The New York Department of Health is leading the epidemiological investigation for this individual.

- A 56-year old male in Miami-Dade County has been identified as positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case where the individual was infected with COVID-19 while traveling to Iran.

- A 70-year old male in Broward County has been identified as positive. He is isolated and will continue to remain isolated until cleared by public health officials. This individual attend an Emergency Medical Services (EMS) Conference in Tampa, Florida. The epidemiological investigation is underway.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

AMERICAN OVERSIGHT

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified three positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.

AMERICAN OVERSIGHT

- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 63-year old male New York resident who is currently in St. Johns County has ~~been identified as~~tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case. ~~where~~ This ~~this~~ individual traveled from New York to attend Daytona Bike Week in Daytona, Florida. The New York Department of Health is leading the epidemiological investigation for this individual.

- A 56-year old male in Miami-Dade County has ~~been identified as~~tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case ~~where the individual was infected with COVID-19 while traveling to Iran.~~.

- A 70-year old male in Broward County has ~~has been identified~~tested ~~as~~ positive COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this is a travel-related case; the epidemiological investigation is ongoing. This individual attended an Emergency Medical Services (EMS) Conference in Tampa, Florida. ~~The epidemiological investigation is underway.~~

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case ~~that may have been~~ associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

AMERICAN OVERSIGHT

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case ~~that may have been~~ associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified three positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have

AMERICAN OVERSIGHT

tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.

- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.

AMERICAN OVERSIGHT

- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;

AMERICAN OVERSIGHT

- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Katherine Anne,

Thank you for bringing this back up. I'm happy to help. Can you send me the additions in a spreadsheet? The emails that came through did not have an attachment.

Thank you,

Jason

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Many thanks, Jason. I'm still not getting any press releases directly to my inbox and congressional staff aren't receiving updates either – can you help me get to the bottom of this?

I've attached emails for FL delegation Chiefs, Legislative Directors, and Health Legislative Assistants. If you're able to add email addresses, we need to add all of them so offices have access to the latest information from DEM, DOH, and the Joint Information Center without us having to provide individually.

If you can't add those emails, please let me know so I can set up a system to push out information from my end.

Thanks again,
Katherine Anne

The State of Florida Issues Updates on COVID-19

The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis announced that the State has ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. Governor DeSantis has also recommended that local authorities strongly consider canceling mass gatherings. Centers for Disease Control and Prevention (CDC) defines a mass event or gathering as 1,000 individuals or more. Practically speaking, a mass gathering is a large enough assembly of individuals that will put a strain on local resources. The Governor also suspended non-essential instate and

AMERICAN OVERSIGHT

all out-of-state travel for state employees for 30 days.

Yesterday, March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

New Positive Cases

Earlier today, the Florida Department of Health announced one new case of COVID-19 in Seminole County.

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

COVID-19 Cases

COVID Chart

* The Department of Health will confirm cases reported by commercial labs.
** A known history of exposure to COVID-19 outside of the state.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel and Cruises Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the

AMERICAN OVERSIGHT

United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

AMERICAN OVERSIGHT

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will now be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.
- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.
- The APD Senior Leadership Team began hosting twice weekly COVID-19 conference calls with the Superintendents of the agency's facilities in Marianna, Gainesville, Chattahoochee and the Developmental Disabilities Defendant Program.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during press conferences on Monday, March 9th and Wednesday, March 11th to address Florida's recent actions regarding COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up information.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff are following up with them on an individual basis for questions and answers for COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we are providing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, staff has provided specific technical assistance to all AAAs regarding completing assessments, safe delivery of home-delivered meals, and procurement of cleaning supplies.
- Arranged a conference call with a representative from the Area Agencies on Aging as well as the Florida Association of Aging Services Providers and GA Foods. Discussed the current messaging from ACL and the CDC as it relates to the Aging Network.
- Conducted a Florida Association of the Area Agencies on Aging (F4A) conference call with all contract managers and AAA Executive Directors March 11 at 2:00 p.m. to provide a daily update regarding COVID-19.
- The Department of Elder Affairs has distributed DOH website information as a resource for PACE providers to use and distribute to seniors. and provided the Executive Orders. DOEA has circulated additional information and long-term care provider conference call invitations with presentations by DOH and AHCA to the PACE providers.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, the Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also

AMERICAN OVERSIGHT

implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.
- Volunteer Florida is preparing information to be shared with Supervisors of Elections about Volunteer Connect, Florida's official volunteer opportunities platform. Through the platform, offices can post/promote volunteer opportunities, including poll work.
- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- Out of an abundance of caution, two temporary school closures have been reported in Okaloosa and Hillsborough County for cleaning. At this time, no Florida student has contracted COVID-19. To stay up to date on school information, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department of Health. Inmates will continue to have access to mail, phone calls and video visitation. Legal visits will not be impacted.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
    - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
    - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
    - Have had contact with someone who has been or is under investigation for COVID-19
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.

AMERICAN OVERSIGHT

- DOS has provided guidance to all 67 county Supervisors of Elections regarding assisted living facilities and poll worker staff matters. The message included guidance to screen poll workers and clerks beforehand to determine their recent travel status or if they are showing active symptoms of COVID-19 and reminding supervisors of the option to designate alternate polling locations for nursing homes, centers for independent living continuing care retirement living communities and assisted living facilities.
- DOS has identified stakeholders including libraries, museums, cultural facilities and are developing plans to communicate information and resources about COVID-19 to those stakeholders.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV is encouraging Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA employees at Florida's three highway welcome centers continue to be provided with the latest COVID-19 information and resources to help keep the traveling public informed.
- Preventive health resources and options have been communicated to all VISIT FLORIDA staff, with new updates and information relayed accordingly.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.
- VISIT FLORIDA continues to follow all direction from the Executive Office of the Governor and Florida Department of Health in the dissemination of alerts and safety information through social media and VISIT FLORIDA's network of Destination Marketing Organization and business partners.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.

AMERICAN OVERSIGHT

- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE has reviewed its COOP and identified members who can work from home. FDLE has ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.

AMERICAN OVERSIGHT

- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close

AMERICAN OVERSIGHT

Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

Jason, many thanks for the quick follow up.

If congressional staff would like to be added, should they still reach out to the following address: DOHCommunicationsOffice@FLHealth.gov?

Katherine Anne,

I understand you did not receive the most recent update. Please find it below. I have also attached it as a PDF for your convenience. We will make sure you are on the distribution list for all releases coming from DEM as well as DOH.

Best,

Jason

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

AMERICAN OVERSIGHT

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health

AMERICAN OVERSIGHT

Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

AMERICAN OVERSIGHT

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.

AMERICAN OVERSIGHT

- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Many thanks, Jason. I'm still not getting any press releases directly to my inbox and congressional staff aren't receiving updates either – can you help me get to the bottom of this?

I've attached emails for FL delegation Chiefs, Legislative Directors, and Health Legislative Assistants. If you're able to add email addresses, we need to add all of them so offices have access to the latest information from DEM, DOH, and the Joint Information Center without us having to provide individually.

If you can't add those emails, please let me know so I can set up a system to push out information from my end.

Thanks again,
Katherine Anne

The State of Florida Issues Updates on COVID-19

The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis announced that the State has ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. Governor DeSantis has also recommended that local authorities strongly consider canceling mass gatherings. Centers for Disease Control and Prevention (CDC) defines a mass event or gathering as 1,000 individuals or more. Practically speaking, a mass gathering is a large enough assembly of individuals that will put a strain on local resources. The Governor also suspended non-essential instate and all out-of-state travel for state employees for 30 days.

Yesterday, March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

New Positive Cases

Earlier today, the Florida Department of Health announced one new case of COVID-19 in Seminole County.

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

COVID-19 Cases

COVID Chart

* The Department of Health will confirm cases reported by commercial labs.
** A known history of exposure to COVID-19 outside of the state.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at

AMERICAN OVERSIGHT

home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel and Cruises Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.

AMERICAN OVERSIGHT

Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will now be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.
- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.
- The APD Senior Leadership Team began hosting twice weekly COVID-19 conference calls with the Superintendents of the agency's facilities in Marianna, Gainesville, Chattahoochee and the Developmental Disabilities Defendant Program.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during press conferences on Monday, March 9th and Wednesday, March 11th to address Florida's recent actions regarding COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up information.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff are following up with them on an individual basis for questions and answers for COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we are providing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, staff has provided specific technical assistance to all AAAs regarding completing assessments, safe delivery of home-delivered meals, and procurement of cleaning supplies.
- Arranged a conference call with a representative from the Area Agencies on Aging as well as the Florida Association of Aging Services Providers and GA Foods. Discussed the current messaging from ACL and the CDC as it relates to the Aging Network.
- Conducted a Florida Association of the Area Agencies on Aging (F4A) conference call with all contract managers and AAA Executive Directors March 11 at 2:00 p.m. to provide a daily update regarding COVID-19.
- The Department of Elder Affairs has distributed DOH website information as a resource for PACE providers to use and distribute to seniors. and provided the Executive Orders. DOEA has circulated additional information and long-term care provider conference call invitations with presentations by DOH and AHCA to the PACE providers.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with

AMERICAN OVERSIGHT

Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, the Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.
- Volunteer Florida is preparing information to be shared with Supervisors of Elections about Volunteer Connect, Florida's official volunteer opportunities platform. Through the platform, offices can post/promote volunteer opportunities, including poll work.
- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- Out of an abundance of caution, two temporary school closures have been reported in Okaloosa and Hillsborough County for cleaning. At this time, no Florida student has contracted COVID-19. To stay up to date on school information, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department of Health. Inmates will continue to have access to mail, phone calls and video visitation. Legal visits will not be impacted.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
    - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
    - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
    - Have had contact with someone who has been or is under investigation for COVID-19
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.

AMERICAN OVERSIGHT

- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS has provided guidance to all 67 county Supervisors of Elections regarding assisted living facilities and poll worker staff matters. The message included guidance to screen poll workers and clerks beforehand to determine their recent travel status or if they are showing active symptoms of COVID-19 and reminding supervisors of the option to designate alternate polling locations for nursing homes, centers for independent living continuing care retirement living communities and assisted living facilities.
- DOS has identified stakeholders including libraries, museums, cultural facilities and are developing plans to communicate information and resources about COVID-19 to those stakeholders.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV is encouraging Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA employees at Florida's three highway welcome centers continue to be provided with the latest COVID-19 information and resources to help keep the traveling public informed.
- Preventive health resources and options have been communicated to all VISIT FLORIDA staff, with new updates and information relayed accordingly.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.
- VISIT FLORIDA continues to follow all direction from the Executive Office of the Governor and Florida Department of Health in the dissemination of alerts and safety information through social media and VISIT FLORIDA's network of Destination Marketing Organization and business partners.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

AMERICAN OVERSIGHT

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE has reviewed its COOP and identified members who can work from home. FDLE has ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Subject: CDC Requirement

Hello Dr. Villalta –

One of the requirements just presented by CDC is as follows:

1. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

Is this something you could help arrange? The air ambulance company is not doing so.

Thanks,

Eleni

Subject: RE: [EXTERNAL] RE: CDC Requirement
Date: Tuesday, March 17, 2020 6:18:37 PM

Dear Eleni,

Here are the steps, and all persons are copied for coordination purposes:

- Holly Love is preparing a detailed list of the 47 persons to be evacuated including:
  - Name
  - Partner/Spouse
  - Citizenship
  - Age
  - Any comorbid Medical conditions which may affect triage decisions
  - Symptomatic vs. Non-symptomatic
- Dr. Barth Green will direct his Medical staff to triage the arrival of these patients to either Jackson Memorial Hospital or Hotel St. Michel in Coral Gables, depending on their physical condition. In order to do so, **Dr. Green needs to know the location and arrival time of the aircraft.**
- Dotan will arrange for Dr. Green to receive 60 Novel Coronavirus (2019-nCoV)/COVID-19 Quest test kits from my office later tonight… to his home if necessary.
- Stephanie Buchler will assist the courier of the samples if need be, from JMH to Quest Labs

Hope this helps,

Dr. Ben Shore

Dear Eleni,

Dr. Barth Green, who reads in copy, is the Global Coordinator for CDC. He will accept all 47 US nationals from the Silver Explorer, providing that Bec Ware, R.N. can provide him details about these people. Minutes ago, I spoke with Bec, and she will provide Dr. Green with the information that he needs, including their marital status, their physical condition, where they are landing and what time they are to arrive at Miami International Airport. He will have a Medical team waiting to greet these folks, to screen them, and to triage them accordingly.

Until then, I will arrange for Dr. Green to receive 60 Quest Novel Coronavirus (2019-nCoV)/COVID-19 test kits from my office, so that he can make final determinations on those who are ill.

Dear Barth,

Attached you will find Quest collection instructions. Ms. Stephanie Buchler, who reads in copy, can provide information about courier specimen pickup if necessary.

Hope this helps,

Dr. Ben Shore

Subject: communications test

Emerald Coast Healthcare Coalition is conducting our quarterly communications test which seems very timely with everything going on due to coronavirus - this test ensures that we maintain communication with our partners
Please respond to me only - do not copy all
Please send email answering YES that you received my communication for this test
Thank you

--

Subject: communications test

Emerald Coast Healthcare Coalition is conducting our quarterly communications test which seems very timely with everything going on due to coronavirus - this test ensures that we maintain communication with our partners
Please respond to me only - do not copy all
Please send email answering YES that you received my communication for this test
Thank you

--

Ann Hill, Executive Director
Emerald Coast Healthcare Coalition
850-585-1679

Subject: communications test

Emerald Coast Healthcare Coalition is conducting our quarterly communications test which seems very timely with everything going on due to coronavirus - this test ensures that we maintain communication with our partners
Please respond to me only - do not copy all
Please send email answering YES that you received my communication for this test
Thank you

--

Douglas
Subject: communications test

Emerald Coast Healthcare Coalition is conducting our quarterly communications test which seems very timely with everything going on due to coronavirus - this test ensures that we maintain communication with our partners
Please respond to me only - do not copy all
Please send email answering YES that you received my communication for this test
Thank you

--

Ann Hill, Executive Director
Emerald Coast Healthcare Coalition
850-585-1679

Michelle –

Slight change of plans. Upon arrival at MIA, Royal Caribbean will now be arranging individual charter flights for the passengers who are cleared by CDC to return to their home cities/states.

Our team has asked that CDC provide something in writing tomorrow that we can provide to the charter companies indicating that the passenger(s) boarding the charter flights have been cleared to fly commercially. We do not want the charters to deny boarding to these passengers simply because they have arrived in MIA from a cruise ship.

Thanks,

Eleni

At long last, we have confirmation of the first charter flight to Miami:

AMERICAN OVERSIGHT

The American guests from Silver Explorer will be departing Puerto Montt to Miami confirmed to depart at 12AM local time arriving in MIA at 910AM. Tail is CCBGD.

More details to follow!

Sorry - now with Eleni from RC. Again, due-outs are:

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

All -

Thank you for joining the call today. Leah - I don't believe I have everyone from CDC who was on the call, including Rachel - please add if that's the case.

I've listed the do-outs that I'm tracking below, and this chain can serve as the new, smaller group of folks working on the Brazil/Chile RC ships.

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

Dear Eleni,
Could you kindly clarify Dr. Green at CDC? Is that CDC as in Centers for Disease Control and Prevention or is that a typo? If yes, we do not know him – could you kindly share his contact information?

Most importantly, you need to work with and have the approval of the Florida State and Local Health Departments – Dr. Rivkees, the Florida Surgeon General and Dr. Roberson, the Deputy Surgeon General are on this email.

Best,
Michelle

Hi Michelle –

Below please see an update on care for guests upon arrival at MIA.

Dr. Barth Green, the Global Coordinator for CDC, will accept all 45 US nationals from the Silver Explorer, providing that Bec Ware, R.N. can provide him details about these people. Minutes ago, I spoke with Bec, and she will provide Dr. Green with the information that he needs, including their marital status, their physical condition, where they are landing and what time they are to arrive at Miami International Airport. He will have a Medical team waiting to greet these folks, to screen them, and to triage them accordingly.

Until then, I will arrange for Dr. Green to receive 60 Quest Novel Coronavirus (2019-nCoV)/COVID-19 test kits from my office, so that he can make final determinations on those who are ill. Ms. Stephanie Buchler will follow Quest collection instructions and will ensure courier specimen pickup, if necessary.

Dr. Green will direct his Medical staff to triage the arrival of these patients to either Jackson Memorial Hospital or Hotel St. Michel in Coral Gables, depending on their physical condition.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

AMERICAN OVERSIGHT

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
    a. Send ship and flight manifests to CDC.
    b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
    c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
    d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
    a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
    b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
    a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
    b. CDC Quarantine Station staff are available for illness response, as per protocol.
    c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
    d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
    a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
    b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
    a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.
        i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.

AMERICAN OVERSIGHT

ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf

b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Dear Eleni,
Could you kindly clarify Dr. Green at CDC? Is that CDC as in Centers for Disease Control and Prevention or is that a typo? If yes, we do not know him – could you kindly share his contact information?

Most importantly, you need to work with and have the approval of the Florida State and Local Health Departments – Dr. Rivkees, the Florida Surgeon General and Dr. Roberson, the Deputy Surgeon General are on this email.

Best,
Michelle

Hi Michelle –

Below please see an update on care for guests upon arrival at MIA.

Dr. Barth Green, the Global Coordinator for CDC, will accept all 45 US nationals from the Silver Explorer, providing that Bec Ware, R.N. can provide him details about these people. Minutes ago, I spoke with Bec, and she will provide Dr. Green with the information that he needs, including their marital status, their physical condition, where they are landing and what time they are to arrive at Miami International Airport. He will have a Medical team waiting to greet these folks, to screen them, and to triage them accordingly.

Until then, I will arrange for Dr. Green to receive 60 Quest Novel Coronavirus (2019-nCoV)/COVID-19 test kits from my office, so that he can make final determinations on those who are ill. Ms. Stephanie Buchler will follow Quest collection instructions and will ensure courier specimen pickup, if necessary.

AMERICAN OVERSIGHT

Dr. Green will direct his Medical staff to triage the arrival of these patients to either Jackson Memorial Hospital or Hotel St. Michel in Coral Gables, depending on their physical condition.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
   a. Send ship and flight manifests to CDC.
   b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
   c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
   d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
   a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
   b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate

AMERICAN OVERSIGHT

any passengers who become ill during travel and to assist at arrival in US

5. Upon arrival at airport in US
    a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
    b. CDC Quarantine Station staff are available for illness response, as per protocol.
    c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
    d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
    a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
    b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
    a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.
        i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.
        ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf
    b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
    a. Send ship and flight manifests to CDC.
    b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
    c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
    d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire

AMERICAN OVERSIGHT

completed

   a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking

   b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.

3. Passengers without any symptoms can board charter flights.

4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US

5. Upon arrival at airport in US

   a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.

   b. CDC Quarantine Station staff are available for illness response, as per protocol.

   c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.

   d. Passengers who are not ill will be allowed to continue their travel on commercial flights.

6. After arrival

   a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.

   b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.

7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

   a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.

      i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.

      ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf

   b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
   a. Send ship and flight manifests to CDC.
   b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
   c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
   d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
   a. General screening questionnaire provided by CDC, or other questionnaire as per

AMERICAN OVERSIGHT

local/national authorities at port administered to passengers/crew disembarking

   b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.

3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
   a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
   b. CDC Quarantine Station staff are available for illness response, as per protocol.
   c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
   d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
   a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
   b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
   a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.
      i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.
      ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf
   b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Hi Michelle –

Thank you for the guidance … very helpful! I think we are prepared to be in full compliance with perhaps a few items remaining to be addressed. I will forward to our operations team to make sure we are good to go.

Thanks for your help!

AMERICAN OVERSIGHT

4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
    a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
    b. CDC Quarantine Station staff are available for illness response, as per protocol.
    c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
    d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
    a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
    b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
    a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.
        i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.
        ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf
    b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Attachments: SOP for disembarking international cruise ships with passengers arriving in charter flights (ver 3_17_2020).docx

---

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
   a. Send ship and flight manifests to CDC.
   b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
   c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
   d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
   a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
   b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
   a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
   b. CDC Quarantine Station staff are available for illness response, as per protocol.
   c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
   d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
   a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
   b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

AMERICAN OVERSIGHT

a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.

    i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.

    ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf

b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

AMERICAN OVERSIGHT

Proposed SOP for Disembarking International Cruise Ships With Passengers Arriving In US On Charter Flights (Working Draft As Of 3/16/20)

1) Pre-departure
    a. Send ship and flight manifests to CDC.
    b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
    c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
    d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2) At disembarkation from boat and before boarding charter flight, screening questionnaire completed
    a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
    b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3) Passengers without any symptoms can board charter flights.
4) During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5) Upon arrival at airport in US
    a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
    b. CDC Quarantine Station staff are available for illness response, as per protocol.
    c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
    d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6) After arrival
    a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
    b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7) If there is an air ambulance flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.
    a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.
        i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.
        ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf
    b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Thanks Michelle.

Can I share this with ANVISA, for their awareness?

Is there anything else you need from ANVISA at this point? Is RC in contact with them for the ground logistics?

Just making sure all the loops are closed.

Amy

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

EXTERNAL EMAIL CAUTION: Use caution opening attachments or clicking links.

Here is interim guidance from CDC for these two ships/flights (also attached)

1. Pre-departure
    a. Send ship and flight manifests to CDC.
    b. Send information about possible COVID illness among any passengers (not just American Citizens and including reports of # of persons with confirmed or suspected COVID) to CDC
    c. Distribute general CDC COVID info-graphic and instructions for cruise ship passengers.
    d. In advance, cruise line should make arrangements for land-based management, including for persons with symptoms/illness (as described below) and communicate and clear those plans to appropriate local/state health authorities.
2. At disembarkation from boat and before boarding charter flight, screening questionnaire completed
    a. General screening questionnaire provided by CDC, or other questionnaire as per local/national authorities at port administered to passengers/crew disembarking
    b. Persons who are ill must be evaluated at local health facility – not allowed to board charter unless cleared by local clinician and deemed fit-to-fly.
3. Passengers without any symptoms can board charter flights.
4. During flight, have clinicians (physician and nurse) on board charter to assist/evaluate any passengers who become ill during travel and to assist at arrival in US
5. Upon arrival at airport in US
    a. CBP/CWMD will perform screening as if passengers were arriving from level 3 countries, as per their protocols.
    b. CDC Quarantine Station staff are available for illness response, as per protocol.
    c. Any ill persons are evaluated and referred for evaluation locally as per Quarantine Station protocol.
    d. Passengers who are not ill will be allowed to continue their travel on commercial flights.
6. After arrival
    a. CDC will provide EpiX notification to receiving states, if meet criteria from our protocol.
    b. Passengers should understand that all must self-quarantine and practice social distancing for 14 days.
7. For an air ambulance/medical evacuation flight, passengers should go to pre-determined clinical facility as arranged by cruise line/air ambulance company. This plan must be in place and cleared with local and state health authorities before departure of the charter flight.

AMERICAN OVERSIGHT

a. Persons who do not require hospitalization but are not fit-to-travel to home destination, should remain in hotel (as cleared with local/state health authorities) until fit-to travel.

    i. Alternative transportation arranges such as private vehicle or charter flights to home destination made be possible based on individual assessment.

    ii. Additional guidance is available at https://www.cdc.gov/coronavirus/2019-ncov/downloads/sick-with-2019-nCoV-fact-sheet.pdf

b. These persons must follow all CDC guidance for persons who have been on cruise ships in the last 14 days. They must stay home for 14 days from the time they disembark, practice social distancing, and monitor their health. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others when possible.

Dear Eleni,
Please clarify your request and the plan – which passengers are you referring to? The air ambulance passengers or the ones who are not ill and are coming in the larger charter?

As I wrote earlier, CDC will not be conducting any health screening. For the passengers who are not arriving by air ambulance, CBP/CWMD would screen the passengers based on their own protocol. CDC Quarantine Station staff will be available to respond to any illness events, as requested by CBP.

For the air ambulance, they need assessment – I understood that you have made arrangements with Dr. Barth Green/University of Miami, who is not affiliated with CDC. He/his team would make an assessment of those 6 individuals.

Michelle –

Slight change of plans. Upon arrival at MIA, Royal Caribbean will now be arranging individual charter flights for the passengers who are cleared by CDC to return to their home cities/states.

Our team has asked that CDC provide something in writing tomorrow that we can provide to the charter companies indicating that the passenger(s) boarding the charter flights have been cleared to

AMERICAN OVERSIGHT

fly commercially. We do not want the charters to deny boarding to these passengers simply because they have arrived in MIA from a cruise ship.

Thanks,

Eleni

To: WPCG30@LISTSERV.CDC.GOV
Subject: Re: [External] Re: Update on Hong Kong Dog
Date: Friday, March 13, 2020 7:29:41 AM

I have gotten multiple questions from planners about how best to handle pets from a covid19!household if they can't take care of pet. Hospitalized for instance. Can they be fomites for the virus. Type of ppe if a vet has to take care of a pet that has been in a household with a confirmed case. What if we had a pet with symptoms in a household with a case how could specimens be taken

Thanks for any thoughts

Sent from my iPhone

>
> Casey,
> Thanks for this update. It seems as if this dog is still being housed at the animal keeping facility. Do we know the plan and conditions for this dog's release? Is there a particular concern that is informing his quarantine at this point? I continue to emphasize here, as we receive an increasing number of questions about this aspect of COVID-19 response, that there is no evidence that pets either become ill with COVID-19 or are any significant source for human illness and the best way pet owners can protect their pets is to protect themselves from becoming ill with COVID-19. For veterinarians, I have been encouraging review of the CDC guidance for workplace preparedness and offering thoughts about best practices associated with clients who present for appointments who are ill with symptoms compatible with COVID-19. Are there any other messages that we should be sharing with animal healthcare providers, shelters and/or pet owners at this time?

> >
> > March 12, 2020
> > A blood test of a pet dog, which had earlier repeatedly tested weak positive for COVID-19, has shown a negative result, the Agriculture, Fisheries & Conservation Department announced today.

AMERICAN OVERSIGHT

The department collected samples from the dog five times for tests since late February and detected low levels of the virus in its nasal and oral cavity samples.

A blood sample was taken from it on March 3 for a serological test, which resulted in a negative result, indicating that there is not a strong immune response and that there are currently not measurable amounts of antibodies in the blood.

The negative serological test result does not suggest that the dog is not infected with the virus.

It is known in some asymptomatic or mild cases of human infections with other types of coronavirus that antibodies may not always develop. It is also not uncommon to have a negative result in the earlier stages of infection as it often takes 14 days or more for measurable levels of antibodies to be detected.

Another blood sample will be taken later for further testing.

Additionally, the department, together with the University of Hong Kong's School of Public Health, has conducted gene sequencing of the COVID-19 virus from the dog and its close human contacts who were confirmed to be infected.

They discovered that the viral sequences are very similar, indicating that the virus likely spread from the infected people to the dog.

The animal has not shown any signs of the disease and it is currently under quarantine at the animal keeping facility at the Hong Kong Port of Hong Kong-Zhuhai-Macao Bridge.

The department will continue to monitor the dog closely.

As COVID-19 is a new disease, it will work together with the Department of Health in handling relevant cases.

There currently is no evidence that pet animals can be a source of infection of COVID-19, the department added.

Pet owners should not be overly concerned and under no circumstances should they abandon their pets.

All,
I agree with Juia. My curmudgeonly take from a lot of time in public health. We know a little bit about corona viruses in general, about droplet transmission of viruses, and how to work a public health problem before we have a lot of data. Bathing the dog with a normal shampoo and regular PPE (gloves and apron) on entry if you are worried. No extraordinary PPE should be needed. Think about it. Even if the pet were covered in virus (and pets are hardly hard, impervious surfaces), bathing it with a shampoo will get rid of the virus and it is not likely that someone bathing a dog will touch their face with soaped up gloved hands. And if they do, we all know that soap does bad things to the virus. Wetting the animal will not aerosolize the virus and we know it is droplet transmitted--few if any indications from human literature about re-aerosolization from medical procedures.

If you had a pet with symptoms, it would be the first in the world and you can best bet that USDA and OIE (and a host of other acronym agencies) will get involved in a second and the pet will be tested every which way known.

And as in all public health outbreaks, if we get information that would change those recommendations, we will and will communicate that to our colleagues. Wish you all could have a quiet weekend (but I also wish I were empress of the universe).

Regards,
Gail

AMERICAN OVERSIGHT

Casey,
Thanks for this update. It seems as if this dog is still being housed at the animal keeping facility. Do we know the plan and conditions for this dog's release? Is there a particular concern that is informing his quarantine at this point? I continue to emphasize here, as we receive an increasing number of questions about this aspect of COVID-19 response, that there is no evidence that pets either become ill with COVID-19 or are any significant source for human illness and the best way pet owners can protect their pets is to protect themselves from becoming ill with COVID-19. For veterinarians, I have been encouraging review of the CDC guidance for workplace preparedness and offering thoughts about best practices associated with clients who present for appointments who are ill with symptoms compatible with COVID-19. Are there any other messages that we should be sharing with animal healthcare providers, shelters and/or pet owners at this time?
Thank you for your work.
Julie

Pet dog blood test result released

March 12, 2020

A blood test of a pet dog, which had earlier repeatedly tested weak positive for COVID-19, has shown a negative result, the Agriculture, Fisheries & Conservation Department announced today.

The department collected samples from the dog five times for tests since late February and detected low levels of the virus in its nasal and oral cavity samples.

A blood sample was taken from it on March 3 for a serological test, which resulted in a negative result, indicating that there is not a strong immune response and that there are currently not measurable amounts of antibodies in the blood.

The negative serological test result does not suggest that the dog is not infected with the virus.

It is known in some asymptomatic or mild cases of human infections with other types of coronavirus that antibodies may not always develop. It is also not uncommon to have a negative result in the earlier stages of infection as it often takes 14 days or more for measurable levels of antibodies to be detected.

AMERICAN OVERSIGHT

Another blood sample will be taken later for further testing.

Additionally, the department, together with the University of Hong Kong's School of Public Health, has conducted gene sequencing of the COVID-19 virus from the dog and its close human contacts who were confirmed to be infected.

They discovered that the viral sequences are very similar, indicating that the virus likely spread from the infected people to the dog.

The animal has not shown any signs of the disease and it is currently under quarantine at the animal keeping facility at the Hong Kong Port of Hong Kong-Zhuhai-Macao Bridge.

The department will continue to monitor the dog closely.

As COVID-19 is a new disease, it will work together with the Department of Health in handling relevant cases.

There currently is no evidence that pet animals can be a source of infection of COVID-19, the department added.

Pet owners should not be overly concerned and under no circumstances should they abandon their pets.

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 UPDATE

Last night, the Department of Health announced eight new cases of COVID-19 in Florida, seven of which are Florida residents:

New Positive Cases

- A 68-year old male in Nassau County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female Georgia resident who is currently in Alachua County, Florida, has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. The Georgia Department of Public Health is leading the epidemiological investigation for this individual.
- A 73-year old male in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 68-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared

AMERICAN OVERSIGHT

by public health officials. This is a travel-related case.
- A 64-year old female in Collier County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 67-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 64-year old male in Pinellas County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 46-year old male in Pasco County has been identified as positive. This person is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

On March 10, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the third positive case of COVID-19 associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and

AMERICAN OVERSIGHT

have been confirmed to be infected with COVID-19, including 10 positive cases in Florida.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **(866) 779-6121. The Call Center is available 24 hours per day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

Actions the State has Taken to Prepare for and Respond to COVID-19

DEPARTMENT OF HEALTH

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a public health emergency.
- The Florida Department of Health (DOH) established an incident management team to coordinate response operations.
- DOH activated a dedicated incident command post for on-site response activities.
- DOH conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 ET.
- DOH participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- DOH established a public call-center for questions regarding COVID-19.
- DOH developed and distributed the communications-approved COVID-19 Presentation to CHDs for use at community meetings.
- DOH developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- DOH established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

AMERICAN OVERSIGHT

- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD is developing a visitor questionnaire for Adult Day Training facilities and group homes across the state.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during a press conference on Monday, March 9th, to address Florida's recent actions and issue a State of Emergency for COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up emails.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff followed up with them on an individual basis for questions and answers for COVID-19.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting weekly updates and to ensure compliance with virus prevention.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- Florida Virtual School (FLVS) is offering virtual teacher training to up to 10,000 teachers to accommodate Florida school districts that wish to train their teachers in the FLVS online platform in the event teachers need to temporarily move to an online environment.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS is assessing departmental stakeholder lists, including museums, cultural facilities and libraries to evaluate if any stakeholders provide services to at-risk populations and determining the most suitable ways the department can provide information about COVID-19 to those populations.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.

AMERICAN OVERSIGHT

- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- On January 24, VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.

OFFICE OF INSURANCE REGULATION

- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Many thanks, Jason. I'm still not getting any press releases directly to my inbox and congressional staff aren't receiving updates either – can you help me get to the bottom of this?

I've attached emails for FL delegation Chiefs, Legislative Directors, and Health Legislative Assistants. If you're able to add email addresses, we need to add all of them so offices have access to the latest information from DEM, DOH, and the Joint Information Center without us having to provide individually.

If you can't add those emails, please let me know so I can set up a system to push out information from my end.

Thanks again,

The State of Florida Issues Updates on COVID-19

The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis announced that the State has ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. Governor DeSantis has also recommended that local authorities strongly consider canceling mass gatherings. Centers for Disease Control and Prevention (CDC) defines a mass event or gathering as 1,000 individuals or more. Practically speaking, a mass gathering is a large enough assembly of individuals that will put a strain on local resources. The Governor also suspended non-essential instate and all out-of-state travel for state employees for 30 days.

Yesterday, March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

New Positive Cases

Earlier today, the Florida Department of Health announced one new case of COVID-19 in Seminole County.

- A 68-year old male in Seminole County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Chart

* The Department of Health will confirm cases reported by commercial labs.
** A known history of exposure to COVID-19 outside of the state.

As an update to the ongoing epidemiological investigation in St. Johns County, it was determined that the individual who traveled to Florida from New York to attend Bike Week was isolated prior to attending the event. We are continuing to encourage Floridians to stay vigilant and advising Florida municipalities to consider limiting large gatherings.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

International Travel and Cruises Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

AMERICAN OVERSIGHT

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners and residential facilitates caring for aging and vulnerable populations.

AMERICAN OVERSIGHT

- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will now be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.
- The Director of the Agency for Persons with Disabilities (APD), and members of the Senior Leadership Team participated in the conference call related to vulnerable populations hosted by the Surgeon General. The call provided the most up-to-date information to APD partners who are caring for vulnerable populations.
- APD implemented a visitor questionnaire at its two state centers in Gainesville and Marianna.
- APD continues to provide additional best practices, preventative tips and CDC guidance to APD providers, Waiver Support coordinators and APD employees.
- The APD Senior Leadership Team began hosting twice weekly COVID-19 conference calls with the Superintendents of the agency's facilities in Marianna, Gainesville, Chattahoochee and the Developmental Disabilities Defendant Program.

DEPARTMENT OF ELDER AFFAIRS

- The Department of Elder Affairs (DOEA) Secretary Richard Prudom stood with Governor Ron DeSantis and other agency heads during press conferences on Monday, March 9th and Wednesday, March 11th to address Florida's recent actions regarding COVID-19.
- DOEA Secretary Richard Prudom and executive staff participated in a conference call with the Administration for Community Living (ACL) and ACL administrator Lance Robertson and the Centers for Disease Control and Prevention (CDC). Other state units on aging also participated to discuss issues on the implementation of prevention protocols for prevention of spread of COVID-19.
- DOEA Program directors provided guidance to Area Agencies on Aging and statewide Comprehensive Assessment and Review for Long-term Care Services (CARES) offices on how to protect clients and staff during a conference call and provided follow-up information.
- DOEA participated in the Aging and Vulnerable Populations Call hosted by the Florida Department of Health (DOH). All of the state's Area Agencies on Aging (AAA) were on this call, and DOEA staff are following up with them on an individual basis for questions and answers for COVID-19.
- Through Departmental Leadership and the Area Agency on Aging contract managers, we are providing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, staff has provided specific technical assistance to all AAAs regarding completing assessments, safe delivery of home-delivered meals, and procurement of cleaning supplies.
- Arranged a conference call with a representative from the Area Agencies on Aging as well as the Florida Association of Aging Services Providers and GA Foods. Discussed the current messaging from ACL and the CDC as it relates to the Aging Network.
- Conducted a Florida Association of the Area Agencies on Aging (F4A) conference call with all contract managers and AAA Executive Directors March 11 at 2:00 p.m. to provide a daily update regarding COVID-19.
- The Department of Elder Affairs has distributed DOH website information as a resource for PACE providers to use and distribute to seniors. and provided the Executive Orders. DOEA has circulated additional information and long-term care provider conference call invitations with presentations by DOH and AHCA to the PACE providers.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, the Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.
- Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.
- Volunteer Florida is preparing information to be shared with Supervisors of Elections about Volunteer Connect, Florida's official volunteer opportunities platform. Through the platform, offices can post/promote volunteer opportunities, including poll work.
- Volunteer Florida is coordinating with the Florida Department of Elder Affairs to see how the agency can assist with distributing information to seniors.

AMERICAN OVERSIGHT

Volunteer Florida's Emergency Management Department is having initial conversations with partners to determine what could be needed and what safety precautions need to be considered if volunteers are utilized.

FLORIDA DEPARTMENT OF EDUCATION

- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- Out of an abundance of caution, two temporary school closures have been reported in Okaloosa and Hillsborough County for cleaning. At this time, no Florida student has contracted COVID-19. To stay up to date on school information, visit: fldoe.org/em-response.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department of Health. Inmates will continue to have access to mail, phone calls and video visitation. Legal visits will not be impacted.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
    - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
    - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
    - Have had contact with someone who has been or is under investigation for COVID-19
- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC's Office of Health Services coordinates with the department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from Florida Department of Health and the CDC.
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC stood up its Incident Command System in response to COVID-19.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness and are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- The Florida Department of State (DOS) has been in contact with the Supervisors of Elections for Hillsborough, Lake, Leon, Manatee, Palm Beach and Sarasota Counties to determine their needs specifically as it relates to supplies. The supervisors have been encouraged to connect with their county emergency management department for meeting these resource needs.
- DOS is in constant communication with Supervisors of Elections regarding readiness for elections and any anticipated needs related to COVID-19.
- DOS is sharing information with the public regarding voting options for the upcoming election, including vote-by-mail and early voting options.
- DOS is actively wiping down public spaces including all DOS maintained properties, reception areas and restrooms with bleach or disinfectant wipes to mitigate the spread of germs.
- DOS has provided guidance to all 67 county Supervisors of Elections regarding assisted living facilities and poll worker staff matters. The message included guidance to screen poll workers and clerks beforehand to determine their recent travel status or if they are showing active symptoms of COVID-19 and reminding supervisors of the option to designate alternate polling locations for nursing homes, centers for independent living continuing care retirement living communities and assisted living facilities.
- DOS has identified stakeholders including libraries, museums, cultural facilities and are developing plans to communicate information and resources about COVID-19 to those stakeholders.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.

AMERICAN OVERSIGHT

- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV is encouraging Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- The Florida Department of Economic Opportunity (DEO) continues to encourage businesses to follow the "Interim Guidance for Businesses and Employers" issued by the Center for Disease Control and Prevention (CDC). This information is being provided to statewide business partners, local Chambers of Commerce and Economic Development Councils throughout the sate.
- The Florida Restaurant and Lodging Association (FRLA) and Florida Retail Federation and the Florida Chamber of Commerce, in coordination with DEO, are working to provide health safety information and coordination with partners, including how to address potential local supply issues.
- DEO is coordinating with CareerSource Florida, local workforce boards, and other public-private partners. DEO is also working closely with our local, state and federal partners to explore potential resources for employers, businesses and impacted workforce.

VISIT FLORIDA

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns.
- VISIT FLORIDA employees at Florida's three highway welcome centers continue to be provided with the latest COVID-19 information and resources to help keep the traveling public informed.
- Preventive health resources and options have been communicated to all VISIT FLORIDA staff, with new updates and information relayed accordingly.
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.
- VISIT FLORIDA continues to follow all direction from the Executive Office of the Governor and Florida Department of Health in the dissemination of alerts and safety information through social media and VISIT FLORIDA's network of Destination Marketing Organization and business partners.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- The Florida Department of Law Enforcement (FDLE) is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE has reviewed its COOP and identified members who can work from home. FDLE has ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

AMERICAN OVERSIGHT

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

FOR IMMEDIATE RELEASE
March 12, 2020

Contact: Joint Information Center on COVID-19 for the State of Florida
(850) 815-4940, ESF14@em.myflorida.com

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 57-year old male in Lee County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 65-year old male in Broward County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 61-year old male in Broward County tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with Port Everglades.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological for the fourth person connected to Port Everglades is ongoing.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department

AMERICAN OVERSIGHT

or health care provider and self-isolate for 14 Days.

COVID-19 Cases

COVID Chart

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.

AMERICAN OVERSIGHT

- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

AMERICAN OVERSIGHT

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

The State of Florida Issues Updates on COVID-19

AMERICAN OVERSIGHT

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.

Governor DeSantis has recommended that local authorities strongly consider canceling mass gatherings and follow Centers for Disease Control and Prevention (CDC) guidance. CDC has issued recommendations for implementation of mitigation strategies in Florida, including recommendations to cancel large gatherings of more than 250 people and smaller gatherings that may bring persons together from multiple parts of the country.

Yesterday, March 12th, Governor DeSantis announced that the State ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19. These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals. The Governor also suspended non-essential in state and all out-of-state travel for state employees for 30 days.

On March 11, Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

On March 9, Governor DeSantis issued Executive Order 20-52, declaring a State of Emergency for COVID-19. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

COVID-19 Cases

Table

table

AMERICAN OVERSIGHT

chart

tbl

* The Department of Health will confirm cases reported by commercial labs.

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise on the Nile River or tour in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

On March 12, the Department announced a new positive case of COVID-19 in Broward County. The Department, through an extensive epidemiological investigation, identified this new case as the fourth positive case of COVID-19 associated with Port Everglades in Broward County, Florida. Three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades. The epidemiological investigation for the fourth person connected to Port Everglades is ongoing.

- The Florida Department of Health recommends that all individuals experiencing symptoms who have recently traveled through Port Everglades immediately contact their County Health Department or health care provider and self-isolate for 14 days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their County Health Department or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to COVID-19@flhealth.gov**.**

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).
A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Actions the State has Taken to Prepare for and Respond to COVID-19

Department of Health

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

AGENCY FOR HEALTHCARE ADMINISTRATION

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- The Agency for Healthcare Administration (AHCA) opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- AHCA expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- AHCA shared key guidance including CDC and the Department information regarding the importance of screening visitors, infection control protocol and hygiene best practices with all licensed healthcare facilities regulated by the Agency. The Agency is continuing to provide updates on recommendations and best practices from the CDC and Centers for Medicare and Medicaid Services regarding COVID-19.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department of Health, is hosting statewide calls for nursing homes, assisted living facilities, intermediate care facilities, and Agency for Persons with Disabilities group homes, and adult family care homes in conjunction with the Florida Health Care Association. Secretary Mayhew and Surgeon General Rivkees are continuing to address critical issues impacting these providers such as restricting and screening visitors and providing updates.
- AHCA, in coordination with the Florida Division of Emergency Management and the Department, is hosting statewide calls for hospitals in conjunction with the Florida Hospital Association. Secretary Mayhew and Surgeon General Rivkees to provide the most up-to-date information to hospital partners

AMERICAN OVERSIGHT

and residential facilitates caring for aging and vulnerable populations.
- This week, AHCA Secretary Mary Mayhew visited nursing homes and hospital facilities in Tampa, Jacksonville and Orlando to discuss COVID-19 preparations and response and address to any concerns and questions from local partners.

AGENCY FOR PERSONS WITH DISABILITIES

- Members of the APD Senior Leadership Team are holding daily meetings on actions, policies, procedures, and updates related to COVID-19
- The agency's three state-run centers in Marianna, Gainesville, and Chattahoochee are working very closely with their local health departments to enhance infection control measures.
- APD sent an updated visitor questionnaire for Adult Day Training facilities and Group Homes across the state to screen visitors prior to entering a facility. This visitor questionnaire will also be used for visitors to APD Regional Offices.
- APD continues to provide an up-to-date status on COVID-19, best practices, preventative tips, and CDC guidance to APD providers, Waiver Support Coordinators, Stakeholders, and APD employees.

DEPARTMENT OF ELDER AFFAIRS

- Through Departmental Leadership and the Area Agency on Aging contract managers, we provided ongoing technical assistance to the entire Aging Network regarding allowable flexibilities within programs to ensure continuity of services and the safety of elders. For example, we provided guidance on congregate meal sites and the provision of take-home meals, "drive-thru" meals and, if needed, the transfer of funding from congregate meal title into home-delivered meal title should any meal site close.
- DOEA disseminated the most current information on local emergency manager contacts from Florida Division of Emergency Management to Area Agency on Aging (AAA) Executive Directors, AAA Emergency Coordinators, and the Program of All-Inclusive Care for the Elderly (PACE) providers.
- DOEA provided The Comprehensive Assessment and Review for Long-term Care Services (CARES) supervisors with a DOH flyer on preventing respiratory illness. Staff will leave a flyer with each client after conducting a face-to-face visit.
- DOEA continues to disseminate Situation Reports to Area Agency on Aging (AAA) Executive Directors and emergency coordinators.
- Staff continued to provide technical assistance to the Aging Network for frequently asked questions throughout the state regarding: potential congregate meal site closures, completing assessments when elders self-isolate, the screening of participants at meal sites, and screening of participants and visitors at Adult Day Cares.

DEPARTMENT OF CHILDREN AND FAMILIES

- The Department of Children and Families (DCF) Office of Child Welfare sent communication about COVID-19, to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare and Respond to Coronavirus Disease 2019.
- DCF Secretary Chad Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They are reporting daily updates to ensure compliance with virus prevention and monitor potential outbreaks.
- DCF has established a visitation protocol for all state-owned and contracted mental health treatment facilities, as well as vendors and patient families, requiring all outside parties to complete a Visitors Viral Symptoms Screening prior to entering a facility.

FLORIDA DEPARTMENT OF VETERANS' AFFAIRS

- Effective March 11, 2020, FDVA is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7 virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).
- Currently, all U.S. Department of Veterans Affairs National Cemeteries are open for burial and visitation by the public. Florida has nine National Cemeteries. To schedule a burial, please call 800-535-1117, option 1. In light of concerns regarding COVID-19, some families may prefer to proceed with direct interment of their loved ones and postpone the formal committal services to a later date. Cemetery administrators will work to accommodate these preferences.
- All FDVA and VA facilities remain fully operational.

VOLUNTEER FLORIDA

- This morning, Volunteer Florida had preliminary conversations with Mass Care on the anticipated needs of volunteers. Today, we will work together to plan for volunteers and develop volunteer safety guidelines to ensure that we are protecting our service providers (volunteers and clients).
- Volunteer Florida has asked all Voluntary Organizations Active in Disaster (VOAD) partners to review their continuity of operations so that there is no service delivery disruption.
- Volunteer Florida participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunities) and how it can be used by offices to help recruit volunteers for Tuesday's primary election.

FLORIDA DEPARTMENT OF EDUCATION

- Today, Commissioner of the Florida Department of Education Richard Corcoran provided strong recommendations for extending spring break following Centers for Disease Control and Prevention (CDC) issuing guidance specific to COVID-19 in Florida. As all Florida school districts and public charter schools have different schedules, please click here to see the recommended spring break changes for each district. In addition, the department also announced that the start of state testing will be delayed by a minimum of two weeks.
- To stay up to date on school closure information, visit: fldoe.org/em-response.
- FDOE sent updated guidance to school districts and superintendents ahead of spring break. To view that memo, visit: fldoe.org/em-response.
- At this time, no Florida student has contracted COVID-19.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Education Commissioner Corcoran is in constant communication with Florida Superintendents and districts to provide guidance on COVID-19 preparedness and response and will be holding weekly calls to update districts on preparation efforts.
- FDOE has sent weekly memos providing updates to school districts, superintendents, Florida Colleges, parents, teachers and stakeholders.
- FDOE launched a survey to school districts and public charter schools about their preparations, policies, their capacity to serve their students virtually to

AMERICAN OVERSIGHT

help meet and determine any preparedness needs.

STATE UNIVERSITY SYSTEM

- Effective immediately, all universities will make plans to transition to remote instruction as soon as possible.
- State universities with students who have returned from spring break, which includes Florida Gulf Coast University, Florida International University, Florida Polytechnic University, and the University of Florida, should implement a process to transition to remote instruction immediately and encourage students to return home for at least 2 weeks. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break. This includes students at Florida Agricultural and Mechanical University, Florida Atlantic University, Florida State University, New College of Florida, the University of North Florida, the University of Central Florida, the University of South Florida, and the University of West Florida. Each university will provide detailed information to their students, faculty, and staff at the earliest possible time regarding this transition.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each university with clinical and other non-classroom based programs will communicate directly with those students.
- RESIDENTIAL HOUSING While students are encouraged to remain off-campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.
- For more information visit: https://www.flbog.edu/2020/03/11/state-university-system-statement-on-covid-19/

FLORIDA DEPARTMENT OF CORRECTIONS

- Florida Department of Corrections (FDC) has no known or suspected cases of COVID-19 within its correctional institutions at this time.
- FDC Community Corrections officers are working with offenders on supervision to adjust reporting schedules to minimize congregating at probation offices and prevent the spread of COVID-19.
- FDC's Office of Health Services coordinates with the Department for guidance on any type of outbreak and is closely monitoring new information as it is disseminated from the Department and the CDC.
- FDC has suspended visitation at all correctional institutions statewide through April 5, 2020. The decision to reinstate the normal visitation schedule will be evaluated in consultation with the Department.
  - Inmates will continue to have access to mail, email, phone calls and video visitation.
  - Legal visits will not be impacted.
  - FDC has partnered with vendors to provide some complimentary phone and video visitation services.
- Anyone entering a correctional institution will be screened, and entrance will be restricted if they:
  - Have traveled and returned from China, Iran, Italy or South Korea within the last 14 days
  - Have signs or symptoms of a respiratory infection such as fever, cough or shortness of breath
  - Have had contact with someone who has been or is under investigation for COVID-19
- FDC has a plan in place and dedicated staff members trained in the prevention and containment of infectious diseases.
- FDC initiated its Incident Command System in response to this potential threat.
- Education has been provided to staff, inmates and visitors to prevent the spread of any infectious disease, including COVID-19.
- Precautions are in place at facilities to protect inmates and staff from exposure to flu, COVID-19 or any other respiratory illness; preventative measures are being followed per CDC recommendations.

FLORIDA DEPARTMENT OF STATE

- To minimize guests' contact with surfaces, Florida Department of State's Mission San Luis (MSL) is propping open interior doors such as the doors to the Visitor Center public restrooms, gallery, theater, gift shop, and Mission Room. Mission San Luis is also frequently disinfecting and sanitizing items and surfaces that people touch at the Visitor Center, Messer House, gift shop and gallery. This includes countertops, elevator buttons, door handles, stair rails, water fountains, sinks, refrigerator doors, gift shop counters, gallery handles and buttons, and all flat surfaces, in general. Hand sanitizer is currently available in the Visitor Center for all staff and guests. Staff frequently clean the historic site public restroom's high touch surfaces and historic site water fountains. With the COVID-19 General Prevention sign, we are now encouraging staff to avoid contact with people who are sick and to avoid touching their own eyes, nose, or mouth with unwashed hands or after touching surfaces, in general. We are also encouraging staff to stay home when they are sick. COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces, and the Florida DOH instructional sign regarding hand washing has been posted in public restrooms.

FLORIDA DEPARTMENT OF TRANSPORTATION

- At the direction of Governor DeSantis, Florida Department of Transportation (FDOT) Secretary Kevin J. Thibault, along with Surgeon General Dr. Scott Rivkees, hosted a conference call with all Florida ports and their governing bodies as well as all public use airports to discuss Florida's ongoing response to the COVID-19 virus.
- FDOT Secretary Thibault and staff from the department will host weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.
- FDOT is monitoring temporary lane closures near hospitals and Department of Health facilities. If congestion near these facilities and lane closures occur, FDOT will remove lane restrictions to help ensure mobility within the area.
- COVID-19 educational materials are being posted in FDOT facilities, which include welcome centers, service plazas and rest areas across the state.
- COVID-19 materials are being posted at all FDOT work sites across the state to help educate contractors, vendors, and stakeholders.
- FDOT toll collectors have been given additional training and are required to wear gloves as well as continue with enhanced cleansing.
- SunRail has posted COVID-19 educational materials inside all trains and on all platforms, focusing on areas near entrances and bathrooms.
- SunRail trains are being cleaned and sanitized daily and SunRail staff have been provided sanitizing towelettes and encouraged to wash their hands frequently throughout the day.
- FDOT is providing hand sanitizer and posting COVID-19 educational materials at its public meetings across the state.

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

- FLHSMV continues to encourage Floridians through social media and other channels to use convenient online options, rather than visiting an office location, to renew or replace a driver license, ID card, motor vehicle or vessel registration, and more.
- FLHSMV has been in regular communication with the Florida Tax Collectors Association to provide the latest COVID-19 information and guidance from the Florida Department of Health and other state partners.

DEPARTMENT OF ECONOMIC OPPORTUNITY

- Governor DeSantis announced the activation of the Business Damage Assessment survey to assess the impact of COVID-19 on Florida's local business operations. The survey, managed by the Florida Department of Economic Opportunity (DEO), will evaluate businesses affected by COVID-19 and the impacts the virus has had on the local economy so actions to implement appropriate relief programs can begin. The survey can be taken online at https://floridadisaster.biz/ .

VISIT FLORIDA

- VISIT FLORIDA is assessing and reevaluating all tourism promotion messaging, both international and domestic, and is developing long-term strategies to keep Florida top-of-mind for potential vacationers.
- VISIT FLORIDA is planning for future marketing campaigns to ensure that Florida's tourism industry has a strong, unified voice following COVID-19.

AMERICAN OVERSIGHT

- VISIT FLORIDA ceased all Florida tourism marketing in China. VISIT FLORIDA redirected the savings from China and invested this funding into a domestic campaign that launched on March 2.
- VISIT FLORIDA has provided the state's three highway welcome centers with the latest information and resources on COVID-19 to help keep the traveling public informed.
- VISIT FLORIDA is tracking traveler sentiment across online platforms and social media to monitor how COVID-19 may impact travel and travel booking to Florida.
- VISIT FLORIDA is temporarily pausing all marketing efforts in Germany in accordance with federal travel restrictions. This is the only European country besides the United Kingdom where VISIT FLORIDA has active campaigns
- VISIT FLORIDA remains in close contact with industry partners and travel organizations and is communicating all new information as it becomes available.

DEPARTMENT OF REVENUE

- The Department of Revenue's Child Support Program is working to reduce when customers are required to visit a local child support office and is providing new connect/customer service options.
- Efforts include rescheduling genetic testing sample collection appointments and postponing other types of appointments. The Program will soon be implementing the ability for parents to enter into written agreements over the phone, and the Program will be providing new fax, email and form drop-off processes.
- The Department of Revenue's General Tax Administration (GTA) program is working with its tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

OFFICE OF INSURANCE REGULATION

- OIR has published a resource page on its website emphasizing its direction to insurers and will continuously update the page with important insurance resources.
- The Office of Insurance Regulation (OIR) Insurance Commissioner David Altmaier is actively engaged with insurers and key partners at the state and national level regarding COVID-19. Commissioner Altmaier is collaborating with other state insurance commissioners and the National Association of Insurance Commissioners to share information and resources.
- OIR has issued Informational Memorandum OIR-20-01M to all health insurers and health maintenance organizations, directing them to:
  - Use every channel available to them to communicate with their policyholders and share official CDC and Department of Health information;
  - Devote resources to inform consumers of available benefits, quickly respond to inquiries, and avoid and dispel misinformation;
  - Work with public health officials to do everything possible to prepare and respond; and
  - Consider all practicable options to reduce the barriers of cost-sharing for testing and treatment of COVID-19.
- OIR is reaching out to insurers regarding their response to COVID-19 and working with insurers to make sure they are properly communicating to consumers.
- OIR has activated its incident management team and has met to review disaster response procedures.
- OIR has issued Informational Memorandum OIR-20-02M as a reminder to all health insurers, health maintenance organizations and other health entities to allow for early prescription refills following the Governor's Executive Order 20-52 declaring a state of emergency in Florida.
- OIR has spoken with multiple insurers who are voluntarily waiving cost-sharing for consumers in an effort to remove barriers to testing for COVID-19.

FLORIDA DEPARTMENT OF LAW ENFORCEMENT

- At the direction of Governor DeSantis, FDLE is identifying conferences, meetings and other travel to be cancelled or postponed and working to receive reimbursements.
- FDLE is coordinating ESF-16 providing updates and securing staffing while FDLE Regional Operations Centers are working with Regional Domestic Security Task Forces to prepare for any responses needed.
- FDLE's Office of Mutual Aid prepared and distributed a law enforcement guide on COVID-19 for law enforcement partners and state agencies and FDLE's General Counsel prepared a law enforcement guide for protocols in a quarantine.
- FDLE has reviewed its COOP and identified members who can work from home. We ordered an increase in bandwidth and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE Commissioner Rick Swearingen sent an email to all members outlining simple ways to prevent the spread of COVID-19 as well as links to the Florida Department of Health and CDC websites. Signs have been posted in all FDLE Regions and at Headquarters with prevention information.

FLORIDA DEPARTMENT OF JUVENILE JUSTICE

- The Florida Department of Juvenile Justice's Office of Health Services developed COVID-19 guidance for all facilities serving DJJ youth. This guidance included Center for Disease Control criteria on how to assess and care for youth who are exhibiting fever and respiratory symptoms and environmental cleaning and disinfection recommendations.
- The Florida Department of Juvenile Justice has modified our screening protocols and procedures for youth taken into custody by law enforcement who are brought to our juvenile assessment centers and detention screening units to now include precautionary coronavirus screening questions and protocols. This modified screening protocol was shared with our law enforcement partners statewide.
- The Florida Department of Juvenile Justice has developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs to ensure both the safety of the youth and staff in these programs. The Florida Department of Juvenile Justice is in the process of sending a notice to parents and guardians of youth in programs regarding the new visitor screening requirements.
- The Florida Department of Juvenile Justice has sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted.

###

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

No. Don't believe so since they test for bacteria. However in heard someone yesterday (since we are in a desperate state) talk about one of the lab companies exploring using vaginal swabs. So it may be coming. The issue is we don't know if the virus survives in transport on the GC kits. Flu kits yes.

Did not have a chance to read the string so may have misunderstood but call me at any time if you need help translate to your community. It is very confusing. The word kit should be avoided I think :). It sounds like you are clear on the situation. The laboratory reagents are still limited but are becoming more available by the hour it seems. The accuracy of course is an outstanding concern for geeks like you and me :). The specimen collection supplies is a real issue. Seems like there is a delay of weeks. We are down to very small numbers available in the Department and people are scrambling to find alternatives.

Subject: RE: [EXTERNAL]FW: The State of Florida Issues Updates on COVID-19

We are talking about two different things. Specimen collection supplies are two swabs like Q tips to obtain throat and nasal specimens and then they are placed in viral transport medium and sent to the state labs or now Labcorp and Quest to provide actual specimen testing. The "test kits" are what is made available to the state labs and now private labs that have the reagents (chemicals) that perform the actual analysis. My understanding is that in each "test kit" there is the capability to run many, perhaps hundreds of specimen test per kit. The health departments are asking for further clarification of this as it is causing confusion in the counties. The hope is that every hospital gets the test kits so that locally the specimens can be collected and then the analysis performed locally. Another hope is that there would be available test kits like strep or flu testing available in doctors clinics that would give results almost immediately. I hope that this explains the situation. It is an great question.

Doctor Lanza,
You told us "there is no test kit" and we followed your lead. Now we are talking about test kits. Is there an explanation for this? Credibility is hard to earn, harder after we lose it.

Commissioner Doug Underhill

The State of Florida Issues Updates on COVID-19

TALLAHASSEE — The State of Florida is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware regarding the status of the virus, the Florida Department of Health will issue this update every day, seven days per week.

Today, Governor DeSantis held briefings related to COVID-19 with State Surgeon General Dr. Rivkees, Florida Division of Emergency Management Director Jared Moskowitz and the National Guard Adjutant General James Eifert. During a press conference, the Governor provided several updates on Florida's efforts to respond to COVID-19:

- Governor DeSantis announced 1,000 additional COVID-19 test kits have arrived in Florida for distribution to labs across the state.
- As a result of the increase in Broward County to 11 positive COVID-19 cases, the Governor directed Director Moskowitz to expand his emergency order and prohibit all visitation to nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes in Broward County for 30 days.
- Governor DeSantis will be activating a limited number of members of the Florida National Guard that will stage in Camp Blanding to prepare to deploy to any area of the state on a moment's notice.
