Coronavirus: summary of persons being monitored, persons under investigation, and cases

Mar 16, 2020 at 6:14 PM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	1,759
Total persons of high, medium, or unknown risk	1,290
High/medium/unknown risk still being monitored	535

Persons under investigation (PUI): people who meet laboratory testing criteria based on symptoms and exposure

Total identified	1,824
Tested positive	160
Tested negative	816
Currently awaiting testing	848

Confirmed cases

Confirmed cases in Florida residents	142
Confirmed by BPHL/CDC	99
Positive by commercial/hospital lab	43
Characteristics of Florida resident cases	
Not exposed/infectious in Florida	6
Deaths	5
Cases in non-Florida residents	18
Confirmed by BPHL/CDC	16
Positive by commercial/hospital lab	2
Total cases	160
Traveled	45
Contact with confirmed case	32
Traveled and contact with confirmed case	51
Neither	32
Travel is unknown*	18
Contact is unknown*	7
Contact is pending*	14

*Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

10-week trend by event date

Event date is the earliest date associated with a case

AMERICAN OVERSIGHT

Coronavirus: characteristics of 160 cases

Mar 16, 2020 at 6:14 PM

Data in this report are provisional and subject to change.

Tables below include cases in non-Florida residents and Florida residents diagnosed and isolated outside Florida.

28 counties have confirmed cases:

County	FL resident	Percent	Not diagnosed/ isolated in FL	Non-FL resident	Total
Broward	39	24%	0	8	47
Dade	23	14%	1	1	25
Palm Beach	8	5%	1	0	9

Coronavirus: additional surveillance information

Mar 16, 2020 at 6:14 PM

Data in this report are provisional and subject to change.

Statewide emergency department (ED) chief complaint and admission data

The daily percent of ED visits statewide that result in **cough-associated admissions** remains within expected levels.

The daily percent of ED visits statewide that mention **cough** has been elevated for the past 2 weeks. **Shortness of breath** and **fever** are stable and within expected levels for this time of year.

The daily percent of ED visits statewide that mention cough has been elevated for the past 2 weeks for all age groups, particularly **19-54**

Broward County ED chief complaint and admission data

The daily percent of ED visits that result in **cough-associated admissions** in Broward County remains within expected levels.

The daily percent of ED visits that mention **cough** in Broward County has been elevated for the past 2 weeks. **Shortness of breath** and **fever** are stable and within expected levels for this time of year.

The Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE-FL) includes chief complaint data from 215 of 216 Florida EDs. Data are transmitted electronically to ESSENCE-FL daily or hourly.

Coronavirus: testing by laboratory

Mar 16, 2020 at 6:14 PM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of people tested. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

Coronavirus: summary of persons being monitored, persons under investigation, and cases

Mar 16, 2020 at 5:59 PM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	1,759
Total persons of high, medium, or unknown risk	1,290
High/medium/unknown risk still being monitored	535

Persons under investigation (PUI): people who meet laboratory testing criteria based on symptoms and exposure

Total identified	1,805
Tested positive	160
Tested negative	816
Currently awaiting testing	829

Confirmed cases

Confirmed cases in Florida residents	142
Confirmed by BPHL/CDC	99
Positive by commercial/hospital lab	43
Characteristics of Florida resident cases	
Not exposed/infectious in Florida	6
Deaths	5
Cases in non-Florida residents	18
Confirmed by BPHL/CDC	16
Positive by commercial/hospital lab	2
Total cases	160
Traveled	45
Contact with confirmed case	32
Traveled and contact with confirmed case	51
Neither	32
Travel is unknown*	18
Contact is unknown*	7
Contact is pending*	14

*Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

10-week trend by event date

Event date is the earliest date associated with a case

Coronavirus: additional surveillance information

Mar 16, 2020 at 5:59 PM

Data in this report are provisional and subject to change.

Statewide emergency department (ED) chief complaint and admission data

The daily percent of ED visits statewide that result in **cough-associated admissions** remains within expected levels.

The daily percent of ED visits statewide that mention **cough** has been elevated for the past 2 weeks. **Shortness of breath** and **fever** are stable and within expected levels for this time of year.

The daily percent of ED visits statewide that mention cough has been elevated for the past 2 weeks for all age groups, particularly **19-54**

Broward County ED chief complaint and admission data

The daily percent of ED visits that result in **cough-associated admissions** in Broward County remains within expected levels.

The daily percent of ED visits that mention **cough** in Broward County has been elevated for the past 2 weeks. **Shortness of breath** and **fever** are stable and within expected levels for this time of year.

The Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE-FL) includes chief complaint data from 215 of 216 Florida EDs. Data are transmitted electronically to ESSENCE-FL daily or hourly.

Coronavirus: summary of persons being monitored, persons under investigation, and cases (confidential)

Mar 16, 2020 at 5:36 PM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	1,759
CDC notifications	889
Other notifications*	870
Type of exposure	
Travel exposure	993
Airline/vessel contact	134
Close contact with case	525
Unknown	107

Exposure risk cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html	Travel/airline/ vessel/unknown	Contact with case
High	1	78
Medium	851	235
Unknown (not contacted yet)	112	13
Low/no identified risk**	270	199
Total persons of high, medium, or unknown risk	964	326
Still being monitored	321	214
Contacted in person	13	3
Persons still monitored by top 10 counties		
Broward	57	12
Dade	49	20
Sarasota	27	25
Lee	13	32
Pasco	9	31
Collier	1	24
Orange	19	3
Palm Beach	20	2
Pinellas	21	0
Hillsborough	15	5

* Other notifications: persons who self-report, persons identified during monitoring of another person, etc.

**People with low or no risk identified through case investigations are not routinely being managed in the surveillance system, so are not reflected in this number.

Persons under investigation (PUI): people who meet laboratory testing criteria based on symptoms and exposure

Total identified	1,805
Tested positive	160
Tested negative	816
Currently awaiting testing	829

Confirmed cases

Confirmed cases in Florida residents	142
Confirmed by BPHL/CDC	99
Positive by commercial/hospital lab	43
Charateristics of Florida resident cases	
Not exposed/infectious in Florida	6
Deaths	5
Cases in non-Florida residents	18
Confirmed by BPHL/CDC	16
Positive by commercial/hospital lab	2
Total cases	160
Traveled	45
Contact with confirmed case	32
Traveled and contact with confirmed case	51
Neither	32
Travel is unknown*	18
Contact is unknown*	7
Contact is pending*	14

*Travel can be unknown and contact can be unknown/pending for the same case, these numbers will sum to more than the "neither" total.

10-week trend by event date

Event date is the earliest date associated with a case

Coronavirus: additional surveillance information (confidential)

Mar 16, 2020 at 5:36 PM

Data in this report are provisional and subject to change.

Statewide emergency department (ED) chief complaint and admission data

The daily percent of ED visits statewide that result in **cough-associated admissions** remains within expected levels.

The daily percent of ED visits statewide that mention **cough** has been elevated for the past 2 weeks. **Shortness of breath** and **fever** are stable and within expected levels for this time of year.

The daily percent of ED visits statewide that mention cough has been elevated for the past 2 weeks for all age groups, particularly **19-54**

Broward County ED chief complaint and admission data

The daily percent of ED visits that result in **cough-associated admissions** in Broward County remains within expected levels.

The daily percent of ED visits that mention **cough** in Broward County has been elevated for the past 2 weeks. **Shortness of breath** and **fever** are stable and within expected levels for this time of year.

The Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE-FL) includes chief complaint data from 215 of 216 Florida EDs. Data are transmitted electronically to ESSENCE-FL daily or hourly.

Subject: Daily COVID-19 reports

I have attached the 5 pm COVID-19 report. This includes new tables summarizing the cities and counties of residence for the cases with no known travel or contact with confirmed cases.

Do we want to add the number of hospitalized cases in addition to deaths?

Please let me know if you have any questions!

Please Note: Florida has a very broad public records law. Most written communications to or from state officials regarding state business are public records available to the public and media upon request. Your email communication may therefore be subject to public disclosure.

DOH Mission Statement: To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

AMERICAN OVERSIGHT

Coronavirus: summary of persons being monitored, persons under investigation, and cases

Mar 17, 2020 at 5:11 PM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	2,097
Total persons of high, medium, or unknown risk	1,614
High/medium/unknown risk still being monitored	832

Persons under investigation (PUI): people who meet laboratory testing criteria based on symptoms and exposure

Total identified	2,294
Tested positive	216
Tested negative	1,017
Currently awaiting testing	1,061

Confirmed cases

Confirmed cases in Florida residents	195
Confirmed by BPHL/CDC	129
Positive by commercial/hospital lab	66
Characteristics of Florida resident cases	
Not exposed/infectious in Florida	6
Hospitalized	49
Deaths	7
Cases in non-Florida residents	21
Confirmed by BPHL/CDC	19
Positive by commercial/hospital lab	2
Total cases	216
Traveled	58
Contact with confirmed case	42
Traveled and contact with confirmed case	56
Neither	60
Travel is unknown*	41
Contact is unknown*	11
Contact is pending*	35

*Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

10-week trend by event date

Event date is the earliest date associated with a case

Hi Ann,
Thanks for reaching out. I have updated my station and branch leadership, as well as CDC's Cruise Ship Task Force about the concerns from partner agencies. Our partnerships are extremely important to us, so we take their concerns very seriously. CDC's decision was made based on the

AMERICAN OVERSIGHT

clinical presentation and exposure history of the passenger before demise, and was discussed with the USCG Captain of the Port. If we have any additional guidance or updates, I will give you a call.
Thanks and all the best,
Emily

Emily,

Thank you for taking my call this evening. As discussed I received a call from Dr. Paula Thaqi, the Director for the Broward County Health Department (cc'd above) to let us know that some of our partner agencies have concerns about this ship docking tomorrow morning due to the death described below. The feeling is that these concerns could be addressed by COVID-19 testing prior to allowing the ship into port. I understand that you are initiating further discussion at CDC regarding this situation and look forward to your response.

Best regards,

Hi Patrick and Ann,
Attached is the death investigation report submitted to us by the ship physician. He has also provided the additional summary below. CDC is recommending that the ship release the body to the ME. Please let us know if the ME has any questions that we can assist with.

Information:
37 yr old female guest. Us citizen. No recent travel out of the US.
Known with underlying chronic lung disease.
Presented to medical centre 14-Mrach-2020 in septic shock and respiratory failure due to a Broncho-Pneumonia.
Guest was admitted into the medical centre and treated with planned medical disembarkation in Key West on arrival on 15-March-2020.
Her condition deteriorated in the early hours of the morning 15-March-2020 and despite active resuscitation she subsequently passed away.

Thanks and all the best,
Emily

Dr. Malik, our ME called said there was a 39 year old female, [redacted], had 2 days of fever and cough died on Holland America Nieuw Statendam. The ship is due to dock in Port Everglades tomorrow. The ME needs the Miami Quarantine Station assistance. He said they keep putting back on us at the CHD.

AMERICAN OVERSIGHT

From: Thaqi, Paula M
To: Roberson, Shamarial
Subject: Re: Death on Holland America Nieuw Statendam
Date: Sunday, March 15, 2020 2:39:35 AM

Good evening,

As evidenced by the email chain, the CDC Miami Quarantine station was informed of the death of a passenger aboard the Nieuw Statendam due to respiratory illness. The DGMQ opined that passengers could disembark as scheduled. Due to concerns expressed by Broward County and the Sheriff, they were asked to reconsider and rendered the same opinion. I understand from our conversation that a subsequent conference call was held with CDC and they again declined to stop the disembarkation of passengers from this ship pending the testing for COVID-19 of the deceased passenger. As we discussed, it has been conveyed to me that our County Administration and Sheriff are not clearing passengers to disembark and would like a public statement from CDC regarding their opinion. The ship is scheduled to dock today at 5:30am. Thank you for your assistance with this matter.

Best regards,
Paula

Business and Infrastructure Partners:

You are invited to attend a business and infrastructure partners call concerning the Novel Coronavirus 2019 (COVID-19), hosted by the Department of Homeland Security's Cybersecurity and Infrastructure Security Agency (CISA) and FEMA's Office of Response and Recovery Logistics Management Directorate. The teleconference will include an overview of the current situation, a discussion on supply chain issues, updates from available regions or sectors, and will conclude with an open forum for questions and information sharing.
These calls will occur twice weekly until further notice.

Date: Tuesdays and Thursdays, Starting March 17th - until further notice
Time: 3:00 pm Eastern

Dial-In #: 1-800-593-7177
Passcode/PIN: 7963614

The conference line will open 10 minutes prior to the call.

Business and Infrastructure partners are also invited to access the FEMA NBEOC dashboard via the following link:

https://fema.connectsolutions.com/nbeoc

Please contact the CISA Integrated Operations Coordination Center (CIOCC) watch if you have any questions.

Respectfully,

CISA Integrated Operations Coordination Center (CIOCC)
Cybersecurity and Infrastructure Security Agency (CISA)
Office: 202-282-9201 | Email: CIOCC@CISA.dhs.gov

REGISTER TODAY

The COVID-19 pandemic has negatively affected consumers and businesses across the globe. As the virus is now spreading throughout America, the US food industry is faced with mitigating the risk and minimizing the impact on business while ensuring that employees and consumers are protected.

The event will feature presentations and an interactive panel with:

Shawn Stevens, Food Industry Attorney, Food Industry Counsel, LLC

April Bishop, Senior Director of Food Safety, TreeHouse Foods, Inc.
Jennifer McEntire, Ph.D., VP Food Safety & Technology, United Fresh Produce Association
Who Should Attend:

- Professionals within the following job functions should attend:
  - Human Resources
  - Legal
  - Manufacturing/Processing
  - Quality Assurance
  - Risk Manager

AMERICAN OVERSIGHT

If a state public health veterinarian needs to consult with the CDC COVID-19 One Health Team, you can reach us 24/7 by calling the CDC Emergency Operations Center at 770-488-7100.

- On 28 February, the Hong Kong Agriculture, Fisheries and Conservation Department (AFCD) reported that a pet dog that had contact with a person infected with COVID-19 tested "weak positive to COVID-19 " through nose and mouth samples.
    - AFCD reports that this dog does not have any symptoms of illness and the dog is currently being monitored in quarantine.
    - Repeat testing of this dog will be conducted during quarantine to help determine if the dog has really been infected or not.
    - CDC is working with human and animal health partners to monitor this situation and will continue to provide updates as information becomes available.
    - *AFCD official report available at https://www.info.gov.hk/gia/general/202002/28/P2020022800013.htm*

- To date, CDC has not received any reports of pets or other animals becoming sick with COVID-19. At this time, there is no evidence that pets, including dogs, can spread COVID-19.

- There is no reason to think that any animals, including pets, in the United States might be a source of infection with this new coronavirus. However, it is important to include pets in your family's preparedness planning efforts including having a 2 week supply of pet food and pet medicines available.

    - *For more information on preparing for your pet, please visit https://www.cdc.gov/healthypets/emergencies/pet-disaster-prep-kit.html*

- This is an evolving situation, and we will continue to provide updates as new information becomes available.

- Since other infectious diseases can spread between animals and people, it's always a good idea to wash your hands after being around animals or handling animals, their food, or supplies.

AMERICAN OVERSIGHT

- For more information on the many benefits of pet ownership, as well as staying safe and healthy around animals including pets, livestock, and wildlife, visit CDC's Healthy Pets, Healthy People website (www.cdc.gov/healthypets).

- To see more from CDC on Animal's and COVID-19, please visit https://www.cdc.gov/coronavirus/2019-ncov/faq.html#2019-nCoV-and-animals

AMERICAN OVERSIGHT

COVID-19 Daily Talking Points
March 13, 2020

[Emergency and Executive Orders]

- On March 9, Governor Ron DeSantis issued Executive Order 20-52, declaring a State of Emergency. By declaring a State of Emergency, Governor DeSantis is ensuring that state and local governments have the resources and flexibility they need to prepare and respond.

- On March 11, Governor DeSantis directed the Florida Division of Emergency Management, Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19.

[Testing Kits]

- Governor DeSantis announced that the State has ordered an additional 2,500 test kits to supplement the adequate resources already available to test for COVID-19.

- These additional test kits will enable the Department of Health, working with Florida health care providers, to test up to an additional 625,000 individuals.

[Mass Gatherings]

- Governor DeSantis has also recommended that local authorities strongly consider canceling mass gatherings. CDC defines a mass event or gathering as 1,000 individuals or more. Practically speaking, a mass gathering is a large enough assembly of individuals that will put a strain on local resources.

[Universities and Spring Break]

- Governor DeSantis also directed the Florida Board of Governors to take action to prevent COVID-19 from spreading in Florida's State University System. Campuses remain open and operations will continue, although some adjustments will be made by each university. Actions Governor DeSantis directed State Universities to take include:

    - Instructing all universities to make plans to transition to remote instruction as soon as possible.

    - State universities with students who have returned from spring break should implement a process to transition to remote instruction immediately after students return from spring break, and encourage students to return home for at least 2 weeks;

    - State universities with students who are currently on spring break or about to be on break should direct their students to NOT return to campus for at least 2 weeks following the conclusion of spring break;
    - All universities will continue to provide essential services, such as dining, counseling, health services, library services, etc., potentially on a limited basis or remotely. Each

AMERICAN OVERSIGHT

university with clinical and other non-classroom based programs will communicate directly with those students.

  - While students are encouraged to remain off campus, each university should develop a plan for providing residential accommodations for students who need assistance or must remain in place.

- With educators, students, and families returning from spring break soon, FDOE recommends state colleges and K-12 school districts strictly follow CDC International Travel Advisory Guidelines, per the Florida Department of Health (FDOH), which is advising all individuals who have traveled internationally to follow the new CDC guidelines.

- CDC guidelines, summarized below:

  - **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider.

  - **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your county health department or health care provider if you need medical care.

  - Cruises: CDC recommends travelers, particularly those with underlying health issues, defer all cruise ship travel worldwide.

  - For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

[Travel]

- According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- CDC warns elderly individuals with underlying health conditions to avoid cruise ships and any non-essential air travel.

[Agency Response]

- As a part of the statewide response, Governor DeSantis has ordered the following state agencies to take an active role in combatting this outbreak:

  - **Florida Department of Transportation** - FDOT Secretary Thibault and staff from DOH will be hosting weekly conference calls with all passenger seaports and public use airports to provide updates related to COVID-19.

AMERICAN OVERSIGHT

- **Agency for Health Care Administration** – AHCA is hosting calls with the Florida Health Care Association and Florida Hospital Association to facilitate conversations regarding facility transfers and the screening of facility visitors.

    - Additionally, AHCA is providing ongoing support through constant communication with hospitals and health care facilities to provide information on CDC infection prevention and control guidelines.

- **Florida Department of Education –** Commissioner Corcoran is working with schools, colleges and universities to provide support for alternate learning opportunities in the case that campuses need to be closed due to COVID-19.

[Case Tracking]

- On March 12, the Department of Health received notification of one new case of COVID-19 in Florida. This test was performed through a partnership with AdventHealth Altamonte Springs.

- The patient is a 68-year old male in Seminole County.

- He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case and is associated with a Nile River cruise/tour in Egypt.

    - The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour Egypt in February or March 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

    - The department is working in close consultation with the Centers for Disease Control and Prevention (CDC) on this investigation.

    - CDC recommends that individuals with recent travel history on a cruise to monitor their health for 14 days and, if they develop symptoms, to immediately self-isolate and contact their County Health Department or health care provider.

- The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

    - The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

    - The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.

AMERICAN OVERSIGHT

- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

- The Department is urging residents to stay informed on how to protect themselves and their communities from COVID-19.
- The Department encourages everyone to seek medical attention and diagnosis if they suspect they have contracted COVID-19 or come into contact with someone who has COVID-19.
- The Department's dedicated COVID-19 webpage at www.FloridaHealth.gov/COVID-19 remains the best and most up-to-date resource for information and guidance regarding COVID-19 in Florida.
- Governor DeSantis is working closely with state agencies and the Department to monitor, prepare and prevent the spread of this virus.
- The Department of Health updates Florida's COVID-19 information page daily. Please visit www.flhealth.gov/covid-19 for the latest information.

* The Department of Health will confirm cases reported by commercial labs.

** A known history of exposure to COVID-19 outside of the state.

Below is a complete summary of COVID-19 in Florida:

- 151 tests in state results pending
- 392 negatives
- 35 Florida cases (32 Florida residents)
    - 27 diagnosed in Florida
    - 5 diagnosed and isolated in another state
    - 3 confirmed positive non-Florida resident isolated in Florida.
- 324 currently being monitored
- 963 previously monitored

- Please visit floridahealth.gov/COVID19 to obtain the most recent information including state test results pending, the number of negative test results and positive cases of COVID-19.

- The Florida Department of Health is actively involved in enhanced surveillance for respiratory illness that may be COVID-19. Epidemiologists will follow up on any suspected cases that meet criteria for COVID-19 to arrange for testing when needed and monitor contacts of any confirmed cases, if they occur.

AMERICAN OVERSIGHT

- The Department will communicate regularly with the public and health care providers with updates on COVID-19 and other respiratory illnesses.

- Everyone plays a part in lowering the impact within our communities and workplaces – taking every day preventative actions helps to impede the spread of respiratory diseases such as COVID-19. Preventative actions include:

    - **Washing your hands frequently with soap and water for at least 20 seconds**, especially after going to the bathroom, before eating, and after blowing your nose, coughing or sneezing. If soap and water are not available, use an alcohol-based hand sanitizer with at least 60% alcohol.

    - **Avoiding close contact** with people who are sick.

    - **Staying home when you are sick**. **This message cannot be emphasized enough.**

    - Employees who have symptoms of acute respiratory illness are recommended to stay home and not come to work until they are free of fever (100.4° F or greater using an oral thermometer), signs of a fever, and any other symptoms for at least 24 hours, without the use of fever-reducing or other symptom-altering medicines (e.g. cough suppressants). Employees should notify their supervisor and stay home if they are sick.

    - **Before traveling take certain steps**:

        - Check CDC's Traveler's Health Notices for the latest guidance and recommendations for each country to which you will travel.

        - Employees who become sick while traveling must understand that they should notify their supervisor and should promptly call a healthcare provider for advice if needed.

The Department of Health has set up a dedicated COVID-19 Call Center for questions about this virus. Anyone with questions may **call 1-(866) 779-6121 or email COVID-19@flhealth.gov. The Call Center is available 24 hours a day, seven days a week.**

If Asked:

"What is the Department doing about the cruise ships near Florida that could be carrying individuals infected with COVID-19?"

- On Sunday, March 8th, the U.S. Coast Guard allowed the Regal Princess cruise ship to disembark following negative tests for COVID-19.

-There is another cruise ship, the Caribbean Princess, which is expected to disembark in a timely fashion.

Although this issue falls under federal jurisdiction, since being notified, the department has been working closely with the cruise industry, CDC, Coast Guard and other partners to ensure every effort is made to

AMERICAN OVERSIGHT

keep the Floridians on board safe, while also protecting Florida residents across the state. We will continue to work with these partners to provide support.

"What is the number of patients tested in my county?"

-We appreciate the desire to understand how many Floridians in each community have been tested, received a negative test or are under public health monitoring as a result of suspicion they may have COVID-19 or has been in contact with someone who have COVID-19. Balancing the privacy of the individuals being tested and monitored and the confidentiality of the epidemiological investigations with the responsibility to Floridians to disclose information to protect the public is a vital role of the Florida Department of Health (DOH). The DOH strives to protect the identity of individuals tested or affected by COVID-19, while also ensuring information necessary for the public health is available.

As such, in order to protect personally identifiable health information (PHI) of Floridians, the Florida Department of Health is unable to break down the number of individuals who have received a negative test, have pending test results or are under public health monitoring by community.

Floridians can view the aggregate state level information at www.FLHealth.gov/COVID-19. This information is updated daily.

Additionally, the Florida Department of Health is encouraging all Floridians to be aware. Floridians should practice good hand hygiene and wash their hands with soap and water for a minimum of 20 seconds, use a tissue when they sneeze or cough and immediately dispose of it in the trash and stay home if they are sick."

Subject: Email ONE of TWO: Medical Examiner email for reporting COVID-19 deaths

I am forwarding the first of two emails related to communications among the medical examiners and funeral and cemetery industry for COVID-19 deaths. This email chain is the Medical Examiner Commission staff Steve Lucas with FDLE providing CDC guidance to the medical examiners about autopsies and recording COVID-19 deaths; Dr. Nelson (medical examiner) forwarded it to the funeral industry. The second email is information that the Florida Cemetery, Cremation, and Funeral Association circulated among its members.

Ken and I will keep you posted; let us know if you have any questions.

Thank you.

Begin forwarded message:

Subject: [EXTERNAL]: RE: COVID-19

Good morning,

As a point of clarification, please be aware that medical examiners shall accept jurisdiction and certify death certificates on all cases with suspected COVID-19 deaths. As COVID-19 has been deemed a Public Health Emergency, deaths relating to it fall directly in line with Florida Statute 406.11(1)(a)11. In an effort to prevent possible spreading of the virus in air controlled environments, autopsies are not expected to be performed on decedents with confirmed COVID-19 diagnoses prior to

AMERICAN OVERSIGHT

death, however, that decision may be left to professional judgement. Regardless of if an autopsy or external examination is performed, any suspected COVID-19 deaths will need to be certified by the medical examiner and reported to MEC Staff.

As requested by the Department of Health, MEC Staff are also conductng a brief survey of each office's Personal Protective Equipment (PPE). Please notify us with the answers to the questions listed below by close of business Friday.

1. What kind of PPE does your office have on hand?
2. How long will your on-hand PPE inventory last if you are unable to obtain any new shipments of PPE?
3. What PPE will you need most quickly in the event that you are unable to obtain any new shipments of PPE?

Thank you,

COVID-19 Incident Management Team
Activities Roll-up for Executive Management
As of Thursday, March 12, 2020 at 11:00 p.m.

CASES TO DATE

- 750 persons under investigation
- 478 negatives
- 51 total cases reported
  - 45 in Florida residents
    - 40 diagnosed in Florida
    - 5 diagnosed and isolated in another state
  - 6 confirmed positive (non-Florida resident)
- 2 deaths
- 221 tests in state results pending
- 1413 people monitored to date
- 365 of that 1413 are currently being monitored

Of the 17 new cases identified today (4) were in Broward, (2) Palm Beach, (1) Lee, (1) Miami-Dade, Seminole (1), Alachua (1), Duval (1), Volusia (1), Clay (1), Hillsborough (1) and (3) out-of-state residents.

****** THERE IS A DELAY IN PRIVATE LAB TESTING BEING INCORPORATED INTO OFFICIAL REPORTING SYSTEMS*****

Call Center hotline hours are 24 hours a day, seven days a week

KEY ACTIVITIES

Department of Health

- Established an incident management team to coordinate response operations.
- Defined a high-level phased response strategy for COVID-19 as depicted in the updated Florida's Response to Emerging Infectious Disease infographic.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls.
- Established a public call-center for questions regarding COVID-19. Call center launched Monday, March 2nd.
- Developed and distributed the communications approved COVID-19 Presentation to CHDs for use at community meetings.
- Presumptive positive cases of residents in Manatee and Hillsborough announced via press release.
- Governor DeSantis issued an Executive Order directing the SSG to declare a public health emergency.
- SSG Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Activated Joint Information Center in coordination with the Division of Emergency Management.
- Developed and implemented protocols for investigation, surviellance and monitoring for COVID-19 to rapidly detect and contain cases.

AMERICAN OVERSIGHT

- Established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments.
- Approved updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease 2019 (COVID-19).
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, HCCs and CHDs.
- Implemented testing at all three State Public health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Deaprtment of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- Developing a laboratory surge plan.
- Developing a clinician level briefing for medical audiences.
- Close contacts of presumptive cases have been identified and are being monitored for 14 days. Any close contacts with symptoms will be tested.
- Developing plans for implementation of private lab testing.
- Procured a personal protective equipment cache of 169,200 N95 respirators with fit testing kits.
- Disseminated pandemic planning guidance as follows:
    - Department of Health (DOH) Infographic: Florida's Response to Emerging Infectious Diseases
    - CDC Long-Term Care Facility Pandemic Preparedness Checklist provided to Agency for Health Care Administration, Florida Health Care Association and Health Care Coalitions (HCC).
    - Journal Publication: Community Mitigation Guidelines to Prevent Pandemic Influenza to County Health Departments and Health Care Coalitions.
    - CDC Healthcare Providers Preparedness Checklist & Hospital Preparedness Tool to Florida Hospital Association and Health Care Coalitions
    - Disseminated CDC Guidance: Strategies for Optimizing the Supply of N95 Respirators to CHDs and HCCs.
- Advised to CHDs and HCCs to keep any expired personal protective equipment until further guidance is received regarding potential extended use.
- Conducted two meetings with the Division of Emergency Management (DEM) regarding inter-agency coordination for pandemic planning and established on-going weekly coordination meetings.
- Conducted a pandemic planning meeting with select state agencies to further develop tactical implementation plans. Those agencies include:
    - Agency for Health Care Administration
    - Department of Education
    - Department of Management Services
    - Division of Emergency Management
    - Florida National Guard
- Disseminated a landscape assessment to healthcare system partners to gauge personal protective equipment supply level and gaps among Florida's healthcare providers.
- Continued development of public information documents for the public.

AMERICAN OVERSIGHT

- Developing infographics for first responders (fire, law enforcement and EMS) regarding infection control and personal protection for COVID-19.
- Developing infographics for the general public and community partners regarding non-pharmaceutical interventions and how they are applied during a pandemic.
- Developing protocols for Public Safety Answering Points and Emergency Medical Service providers to prioritize transports and support home health activities.
- Developing guidance for healthcare facilities on decompressing the emergency departments.
- Developing alternate care site support packages with tents and temporary facilities, that could be deployed to hospitals to support the triage and treatment of cases prior to entering the emergency department.
- Developing guidance and allocations strategies for the distribution and dispensing of medical countermeasures to include personal protective equipment and vaccine (for when it becomes available).
- Developing protocols for CHDs in the protection of their staff and clinic activities through the development of safety and health guidance.
- Developing logistical capabilities to support a large quarantine if necessary.
- Requested additional N-95 masks from the federal stockpile.

Agency for Health Care Administration

- Opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.
- Sent e-blast to all AHCA licensed health care providers sharing key guidance including CDC and DOH information regarding the importance of screening visitors, infection control protocol, and hygiene best practices.
- Hosted a statewide call for nursing homes in conjunction with the Florida Health Care Association on Tuesday, March 3, with 1000 participants. Secretary Mayhew and Surgeon General Rivkees addressed critical issues impacting these providers such as restricting and screening visitors.
- Hosted a statewide call for assisted living facilities, intermediate care facilities, Agency for Persons with Disabilities (APD) group homes and adult family care homes on Tuesday, March 3, with nearly 1500 participants. Secretary Mayhew, Surgeon General Rivkees and APD Director Palmer addressed critical issues impacting these providers such as restricting and screening visitors.
- Hosted a statewide call for hospitals in conjunction with the Florida Hospital Association on Wednesday, March 4, with 84 locations participating. Secretary Mayhew and Surgeon General Rivkees addressed critical issues impacting Florida hospitals.
- Hosted a statewide call for nursing homes in conjunction with the Florida Health Care Association on Friday, March 6, with 524 participants. Secretary Mayhew and Surgeon General Rivkees addressed critical issues impacting these providers such as a newly developed visitor screening toolkit and recent memos from the Centers for Medicare and Medicare Services.
- Hosted a statewide call for hospitals in conjunction with LeadingAge Florida and the Florida Life Care Residents Association on Friday, March 6, with 1000 participants. Secretary Mayhew and Surgeon General Rivkees addressed critical issues impacting senior populations and nursing homes.
- Expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7.
- Preparing e-blasts for DOH call meeting notices on Tuesday, March 10; one e-blast for long-term care facilities and one e-blast for hospitals.
- Sent an e-blast on CDC infection prevention and control guidelines to hospitals across the state.

AMERICAN OVERSIGHT

- AHCA Secretary Mayhew is visiting nursing homes and hospital facilities in Jacksonville and Orlando today to discuss COVID-19 preparations and response and respond to any concerns and questions from local partners.
- Verified ESS data dashboards is in production
- Shared contact e-mail with local health department for communication to providers (AHCA asked to be copied on communication)
- Allowed for early refills of prescription drugs in Medicaid
- Provided guidance to Medicaid health plans on coding and billing for COVID-19

- Secretary Mayhew participated in a press conference with Governor DeSantis, Lieutenant Governor Nunez, Miami-Dade leadership and health care leaders to provide COVID-19 updates, including information on the new screening requirements at nursing homes, assisted living facilities and other long-term care facilities per a recent emergency order.
- Sent Policy Transmittal (PT 2020-12) to all SMMC health plans on guidance on how to proceed with provision of Medicaid services in accordance with Governor DeSantis's Executive Order Number 20-52
- Sent e-blast regarding CMS guidance on Emergency Medical Treatment and Labor Act (EMTALA) Requirements and Implications
- Sent e-blast regarding CMS guidance for Home Health Agencies
- Sent e-blast regarding CMS guidance for Hospice Agencies
- Sent e-blast regarding CMS guidance for Dialysis Facilities
- Sent e-blast regarding CMS guidance for use of Certain Industrial Respirators by Health Care Personnel

Agency for Persons with Disabilities

- Distributed DOH and CDC guidance to Florida Association of Rehabilitative Services, Arc of Florida, Family Care Council of Florida and Florida Developmental Disabilities Council.
- Added COVID-19 information to APD website.
- Visitor Screening Criteria has been implemented at APD-owned facilities in Marianna and Gainesville
- Agency is developing visitor questionnaires for Adult Day Training facilities and group homes
- Examining telework capacity/ability
- Meeting with AHCA regarding rule waivers/exemptions for APD clients living in residential facilities
- Working to procure cleaning supplies and/or services for APD buildings.
- Facility in Gainesville has cancelled community events on campus and is cancelling large trips for residents going off-site.
- Started twice-weekly conferences with the Superintendents of APD-owned facilities to discuss coronavirus updates and needs.
- Forensic Facility in Chattahoochee needs guidance on admitting individuals who have been court-ordered to reside at this facility.
- APD has issued an advisory to all group home providers & owners and all Adult Day Training facilities regarding Emergency Order 20-002
- APD is reviewing its own rules, policies and procedures for potential wavers needed
- APD has established daily meetings with its executive management and incident management team
- APD is developing reporting tools for employees and clients who are isolated or quarantined
- APD's forensic Facility in Chattahoochee needs guidance on admitting individuals across the state who have been court-ordered to reside at this facility.

AMERICAN OVERSIGHT

Board of Governors for the State University System

- Participate in multiple statewide calls for situational awareness.
- The Chancellors Office has advised our 12 state university partners to continue to follow the guidance of the CDC and Florida Dept. of Health
- Posted the DOH Link on the Board webpage
- Posted information on each universities COVD-29 response on our webpage https://www.flbog.edu/2020/03/05/university-information-on-covid-19/

Department of Agriculture and Consumer Services

- Press Conference on Gas Pump Skimmers & Coronavirus with Deputy Commissioner Mary Barzee Flores.
- Communique about Guidance on COVID-19 Food Safety for Consumers, Food Establishments
- Provided food establishments, Florida Retail Federation and Petroleum Marketers Association (convenience stores) with an email blast regarding shopping cart sanitation and sharing, and providing hand sanitizer.
- Uploaded WHO Technical Guidance information to WebEOC
- Coordination call with UF College of Veterinary Medicine, DOH State Public Health Veterinarian, 3/12/20

Department of Business and Professional Regulation

- Incorporating informational comments on all on-site inspection reports issued to public lodging, public food service, and alcohol and tobacco license holders that will promote situational awareness of the current public health emergency and will direct parties to the FDOH COVID-19 webpage for guidance and resources related to prevention best practices.
- Copies of informational flyers from the FDOH COVID-19 toolkit will also be available for inspectors to distribute when interacting with managers of these premises

Department of Children & Families

- Office of Child Welfare sent communication about COVID-19 specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19). This information was also posted prominently on DCF's Child Care webpage.
- Provided update to DCF Leadership and Communications team on International Travel amplifying Department of Health messaging applying guidance to persons who have travelled anywhere internationally or on a cruise.
- DCF is working with AHCA, DOEA, and APD to compile and develop guidance for agency staff and stakeholders who work directly with Florida's elderly population and have a higher risk of being exposed to COVID-19.
- On March 11, Guidance and preventative measures, including screening questions, was sent statewide to Adult Protective Services staff

Department of Citrus

- Memo sent to staff on March 5th, 2020
- Availability to telework for sick individuals

AMERICAN OVERSIGHT

Department of Corrections

- Hosted conference calls with institutional and community corrections regional leadership to discuss COVID-19:
- Reiterated the importance of personal hygiene best practices and enhanced cleaning efforts
- Actively monitoring staff for symptoms as well as proactively send inmates to medical for assessment.
- All wardens and community corrections leaders have been in contact with their local health department to make sure open lines of communications exist in the event of a potential case in their area.
- Private prison partners have aligned their response to COVID-19 to the Department's response
- Medical services contractor, Centurion, was directed to allow inmates initiating a medical visit due to symptoms relating to a potential communicable disease, such as influenza, not be charged a co-payment.
- Institutional medical staff have been instructed to notify DOH if a single inmate presents with symptoms, discontinuing the former procedure of cluster reporting.
- Centurion will stage a minimum of 25 PPE's at each facility; supplies should be delivered Friday, March 13th. Excess supplies will be staged at the regional offices for redistribution as needed. Access to additional supplies is being coordinated through CDC, should this become necessary.
- H/R is drafting an essential staffing message as it relates to CDC/DOH "Stop the Spread" campaign.
- Office of Institutions staff participated in a webinar with the American Correctional Association (ACA) titled "Coronavirus COVID-19: Impact on Corrections."
- Considering canceling visitation and volunteer programs at institutions with highest risk populations.
- Considering relaxing the entry and exit procedure as it relates to alcohol-based hand sanitizer for individual staff.
- Considering suspending recruitment events at public locations.
- Informed visitors and volunteers if you are feeling sick with a fever, persistent cough, or find it difficult to breathe – please do not enter a correctional institution.
- Restrict inmate transfers to mission critical needs
- New commitments will remain at reception centers at least 14-days prior to transfer. quarantine dorm at reception centers for.
- Initiating screening process.
- Staff are temporarily permitted to enter secured perimeters with alcohol-based hand sanitizer.
- Tracking staff who report flu-like symptoms and their work availability.
- Established a trigger matrix for presumptive positive & positive COVID-19 inmates.
- Verify Staff who have VPN Access
- Suspended visitation for 30-days and initiated active screening process at all entrance/exit points.
- Drafting communication to inmate population about visitation cancelation.
- Procurement: Review with vendors J-pay credits and free Securus minutes is visitation if suspended.
- OIT: Coordinate emergency alternative for visitor services call center.
- Considering expanding the institutional restrictions to include volunteer programs, community work squads.
- Communications: Expand inmate tracking graphic to include how many inmates were referred to DOH and how many were tested for COVID-19.

Department of Education

- Distributed guidance from the CDC and the Florida Department of Health concerning care and cleaning of schools, returning students from foreign trips, quarantining in college or university dorms.
- Coordinated with pandemic planning activities.
- Participated in statewide call for educational entities.

AMERICAN OVERSIGHT

- Distributed the Policy for Diagnostic Testing to the Board of Governors.
- 11:00 AM – Superintendents call regarding emergency workflows and concerns (Commissioner and DOE Leadership involved)
- Santa Fe College is requesting hand sanitizer due to vendor indicating their request is on back order. Request has been provided to ESF 6.
- Closures
    - Hillsborough County - Farnell Middle School will be closed Thursday and Friday.
    - Okaloosa County - Rocky Bayou Christian School's campuses in Niceville and Crestview will be closed for March 9 - March 23.
    - College of the Florida Keys is closing for 21 days following spring break

Department of Elder Affairs

- Provided guidance to Area Agencies on Aging on how to protect clients and staff and no resources have been requested at this time.
- Guidance from the Florida Department of Health and CDC Websites have been provided to all DOEA Staff in an email from the Secretary.
- Provide guidance from the Florida Department of Health's website to Area Agencies on Aging and lead agencies on how to protect clients and staff.
- Added a link to the Florida Department of Health Coronavirus site on the Department of Elder Affairs website page.
- Pushed out messaging on social media focused toward caregivers and family, urging them to think about COVID-19 before visiting seniors or elderly loved ones
- Provide guidance from the Florida Department of Health's website to Statewide CARES offices, Area Agencies on Aging and lead agencies on how to protect clients and staff
- Meetings with the Statewide Cares offices, Area Agencies on Aging, Directors, ECO's and Alternate to discuss any needs. We will continue to have this 2-3 times a week or as needed if the event elevates.

Department of Environmental Protection

- Both Florida State Parks and DEP have been sharing DOH and EOG guidance on all social media platforms.
- On March 5, a message from DEP Secretary Noah Valenstein was sent to all employees relaying Department of Health guidance and links and contacts information for DOH resources. Preventative actions and FAQs were included in this communication.
- On March 5, the DOH banner graphic was placed on the DEP website.
- Message was sent to Land and Recreation employees by Deputy Secretary Shawn Hamilton on the appropriate use of disposable gloves and masks as personal protective equipment.
- On March 6, DEP provided verbal response guidance and FAQs to Florida State Park field staff and Public Services to prepare for inquiries from the public.
- On March 7, all Florida State Parks and DEP accounts began posting direct content.
- DEP has reviewed the agency's Continuity of Operations Plan's pandemic protocols to make sure it is up- to-date and reflects most recent DOH and CDC guidance.
- DEP continues to coordinate with the Governor's Office and Department of Health on emerging case-specific issues.
- DEP Leadership continues to communicate hand washing and safety protocols.
- Extra hand sanitizing stations have been placed in the Bob Martinez, Douglas and Carr buildings in Tallahassee.

AMERICAN OVERSIGHT

- On March 5, guidance was sent to all Land and Recreation employees on the appropriate use of disposable gloves and masks as personal protective equipment.
- DEP's Division of Recreation and Parks continues to evaluate and procure necessary personal protective equipment and sanitation supplies to ensure the health and safety of employees, volunteers and visitors at state parks.
- On March 9, Florida State Parks and DEP social accounts posted health and safety tips to social media channels.
- On March 9, all Florida State Parks and DEP social media accounts began sharing Department of Elder Affairs social content and continues to share real-time EOG and DOH guidance on social channels.
- Deputy Secretary Adam Blalock sent an email to Ecosystems Recreation staff regarding the use of disposable gloves and masks as personal protective equipment at aquatic preserves and National Estuarine Research Reserves. The message includes resources for DOH and CDC guidance to be posted at sites for visitors and employees.
- A press release is expected to be distributed informing the public that the Blue-Green Algae Task Force meeting will be postponed. This will be issued upon receipt of the pending DMS guidance.
- DEP is evaluating events and travel within the next 30 days, based on pending DMS guidance to determine if cancellations or rescheduling is required.
- DEP's South District placed DOH precaution sheets in all bathrooms.
- DEP's Southeast District sent an internal message to all staff this morning reminding them: to familiarize themselves with the resources the District has made available to them, the importance of taking preventative measures, and the availability of hand sanitizing stations throughout the District Office.

Department of Financial Services and Office of Financial Regulation

- OFR - prepared draft proclamations for external stakeholders on proper notice to the Office regarding office closures of financial institutions
- Authorized purchase of hand sanitizer and disinfecting wipes for all offices
- Informed employees of proper procedures for workspace cleanliness/mitigation of spread of illnesses
- Monitoring guidance from DMS regarding office closures; annual leave, sick leave, admin. Leave policies
- Pulling back on out-of-state travel and minimizing in-state travel for employees
- Social distancing

Department of Highway Safety & Motor Vehicles

- Providing to all its employees FDOH and CDC guidance, resources and materials on best practices to prevent illness.
- Created an internal SharePoint webpage where all pertinent FDOH and CDC COVID-19 updates, resources and guidance are being stored for department employees to access.
- Increasing sanitation efforts at its facilities with a focus on high-traffic areas and frequently contacted surfaces, such as elevators, door handles, water fountains, etc.
- Working to ensure it has an adequate supply of sanitation products for its facilities as well as its public-facing personnel, such as driver license office staff and members of the Florida Highway Patrol.
- Exploring the feasibility and technical requirements, should it become necessary, of telework and modified staffing at certain locations.
- Updated its Pandemic annex for the department's Continuity of Operation Plan.
- FHP has provided FDLE COVID-19 Florida Law Enforcement Guide and FDOH Public Safety Answering Points guidance to all FHP personnel.

AMERICAN OVERSIGHT

Department of Juvenile Justice

- Juvenile Justice's Office of Health Services is developing a protocol and messaging, including a process matrix, for each of our programs' designated health authorities and medical staff on what to do if a youth is suspected to have contracted COVID-19.
- Staff at our residential commitment programs and detention centers are reaching out to their local health departments to ensure a clear line of communication and what the process will be if a youth is suspected to have contracted COVID-19.
- Evaluating visitation policy and procedures to determine necessary screening measures to ensure both the safety of the youth and staff in our programs and uninterrupted visitation schedules.
- DJJ will begin to review and modify if necessary our continuity of operations planning (COOP) in response to COVID-19.
- Evaluating procedures and any necessary precautions related to youth taken into custody by law enforcement who are brought to our juvenile assessment centers.
- Visitor sign translated in Spanish to post at the entrance in their offices, centers and facilities
- Provided to our law enforcement partners statewide our modified screening protocols and procedures for youth taken into custody at Juvenile Assessment Centers (JAC) and Detention Screening Units (DSU). DJJ Secretary and leadership team held conference calls with the following entities to discuss our COVID-19 protocols: Detention Regional Directors and Superintendents; Residential Regional Directors and Residential Contracted Provider CEOs; and Probation Regional Directors and Probation Contracted Providers including the Florida Network, Children-in Need of Services/Families-in-Need of Services (CINS/FINS) providers
- Distributed four documents via email to the listed groups: Protocols at Juvenile Assessment Centers and Detention Screening Units; Visitor Screening Tools; Notice to Family Members and Guardians of Youth in our programs and a Coronavirus (COVID-19) Precautions STOP signage which is also translated in Spanish. Provided notice to family members and guardians of youth in our programs requesting not to visit youth in our facilities if they have or had within the last 48 hours any symptoms of respiratory illness, or recently spent time with anyone exhibiting these symptoms.
- Provided notice to vendors, guests, volunteers and business partners the same message and requested if there are problems providing critical services for our youth, please contact us to discuss alternatives.
- We have developed a visitor screening tool which is now mandatory to use inside of our juvenile detention centers and residential commitment programs.
- We are sending a notice to parents and guardians of youth in programs regarding the new visitor screening protocol. This information will be included within the admission packet for new youth admitted.
- We have sent a notice to the vendors, guests, volunteers and business partners that come into our juvenile detention centers and residential commitment programs asking that they limit visiting any of these facilities if they are exhibiting flu-like symptoms or have traveled outside of the U.S., including cruise ship travel. The department will work with these entities on alternatives to visiting programs to ensure critical services are not interrupted

Department of Law Enforcement

- FDLE Commissioner has distributed a message to FDLE members about COVID19 prevention and precautions.
- Acquiring safety equipment and some PPE equipment.
- Provided legal reference kit to law enforcement statewide (ESF-16)
- Distributed "Law Enforcement Guidance" flyer to agencies statewide (ESF-16)
- Attended meetings with DEM/DOH/FHP and ESF-16 members

AMERICAN OVERSIGHT

- Continue regular meetings with headquarters and state-wide leadership. "
- Reviewing COOP and expanded modified staffing opportunities, ordered an increase in bandwith and additional VPN licenses creating additional capacity for members to work remotely.
- FDLE has attended National Governor's Association / Homeland Security Administration / Center for Disease Control conference calls
- RDSTF meetings
- State partners providing immediate needs list to ESF-16 in reference to PPE
- Providing situational uppdates to partners about cyber/malware sites for COVID-19

Department of Lottery

- Terminal messages have been sent to all of the Florida Lottery's more than 13,000 retailers detailing how to properly clean and disinfect highly touched areas like Lottery touchscreen terminals and vending machines.
- Lottery sales representatives are reiterating the safety tips provided by the Department of Health to retailers and encouraging retailers who may have additional questions visit the COVID-19 website.

Department of Management Services

- Reached out to multiple vendors for quotes for hand sanitizer and wipes for Supervisor of Elections.
- Searching for buildings that could host affected people in a quarantine type setting. Looking for isolation rooms as well as exploring state parks for camping room settings.
- Ordered and are delivering roughly 300 standing hand sanitizer dispensers and 160 gallons of gel hand sanitizer to facilities.
- Increased daily sanitation efforts of state buildings and distributed guidance to facility managers to increase efforts to sanitize office spaces.
- Contacted several environmental vendors that can be pre-positioned to mobilize in the event of a viricidal cleaning at a state-maintained facility.
- DMS' Division of Retirement Call Center and PeopleFirst Call Center personnel were provided boilerplate messaging to direct callers to DOH COVID-19 webpage or dedicated call center/email for latest updates.
- Human Resource Management provided guidance to HR Directors on leave policies.
- Provided guidance to all SPS employees on preventive actions in the workplace, reporting symptoms, use of leave and utilizing health insurance benefits.
- Prepared employee telework guidance and workforce planning information for HR Directors specific to COVID-19.
- Division of State Technology is researching quotes for additional VPN services as needed to support employees teleworking.
- DMS has placed web banners on People First, MFMP, FRS portal, mybenefits.com, myflorida.com, and Travel system websites directing them to the DOH COVID-19 site for official updates.
- Created best practices/preventative guidance to provide to agencies working with landlords in lease-based facilities. Contains list of recommended agency contracts a resource for additional cleaning services. Memo was sent to agency leasing contacts and communication offices.
- The Division of Human Resource Management is finalizing updates to their section of the DOH Pandemic Plan.
- Division public safety personnel continues to coordinate with the Statewide Law Enforcement Radio System (SLERS) vendors to ensure the continuation of mission critical services if a reduction of staffing resources occurs.

AMERICAN OVERSIGHT

- Public safety communications personnel continue to coordinate with state 911/public safety communications personnel on their plans to ensure emergency communications systems are not impacted by a reduction in staffing resources.
- DMS' Division of Real Estate Development and Management held a call with Facility Managers to provide CDC guidance for cleaning, posters on handwashing to post in common areas, and directions to building occupants and managers on steps to take to prevent workplace contamination. Email was sent follow-up with resources.
- DMS' Division of Real Estate Development and Management held a call with Capitol facility manager, Sergeant of Arms, and Capitol Police to provide CDC guidance for cleaning, posters on handwashing to post in common areas, and directions to building occupants and managers on steps to take to prevent workplace contamination. Division also held a call with Earley's Kitchen on the same. Email was sent follow-up with resources.
- DMS has identified 500 ventilators; awaiting approval
- DMS has activated more personnel to the EOC to research and secure commodities as the needs arise. Lead time for out-of-stock items is also being assessed for possible
- HRM continues to provide guidance as needed to HR Directors on leave policies.
- HRM/DSGI will continue to provide guidance to all SPS employees on preventive actions in the workplace, reporting symptoms, use of leave and utilizing health insurance benefits
- Public safety communications personnel continue to coordinate with state 911/public safety communications personnel on their plans to ensure emergency communications systems are not impacted by a reduction in staffing resources.
- DMS' Division of Real Estate Development and Management continues to update Facility Managers as needed to provide CDC guidance for cleaning, posters on handwashing to post in common areas, and directions to building occupants and managers on steps to take to prevent workplace contamination
- DMS' Division of Real Estate Development and Management will continue to provide updated guidance to the Capitol facility manager, Sergeant of Arms, Capitol Police, and Earley's Kitchen to provide CDC guidance for cleaning, posters on handwashing to post in common areas, and directions to building occupants and managers on steps to take to prevent workplace contamination

Department of Revenue

- Distributed information to employees related to the Department's response to COVID 19 and select material from the Department of Health and the Centers for Disease Control and Prevention on steps people can take to limit the spread of COVID 19. "
- Guidance has been posted in public areas of the Department's CCOC building for visitors and meeting attendees in the building"
- The Department of Revenue's General Tax Administration (GTA) program is working with our tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- Information to employees related to the Department's response to COVID 19 and select material from the Department of Health and the Centers for Disease Control and Prevention on steps people can take to limit the spread of COVID 19.
- The Department of Revenue's General Tax Administration (GTA) program is working with our tax processing vendor to ensure continuity in tax data and payment processing.
- GTA is closely monitoring any future guidance issued by the Internal Revenue Service for potential corporate income tax due date extensions.
- Emailed information and FAQ's to employees related to the Department's response to COVID 19 with links to the Florida Department of Health and the Centers for Disease Control

AMERICAN OVERSIGHT

- Communicated with supervisors' additional details in reference to leave and travel requests.
- The Department has increased messaging on preventative measures through the deployment of DOH/CDC posters, ensured hand sanitizer is available, and increased cleaning of high-traffic areas in our public areas of our service centers.

Department of Transportation

- Hosted call for seaports and airports on COVID-19
- Sent out an all staff and consultant email on Monday, March 2, addressing all talking points provided from DOH from hand washing, hand sanitizers, telework, vigilance on symptoms, workplace safety and employee welfare. A follow-up email was also sent to all employees from FDOT HR on Q&A for telework, leave rules and use, supervisor roles in encountering symptomatic employees.
- Beginning on Tuesday, 10 March 2020, FDOT is hosting two weekly teleconferences, one with passenger seaports and the other with public use airports, to provide a briefing and take questions.
- Secretary Thibault facilitated a conference call on Thursday, 05 March 2020 with Governor DeSantis and State Surgeon General Rivkees to advise seaports and public use airports regarding COVID-19 efforts.

Department of State

- The Florida Department of State has provided guidance and information to all 67 Florida Supervisors of Elections on how to prepare for COVID-19 at their polling locations for the March 17 Presidential Preference Primary.
- The Florida Department of State met with Supervisors of Elections via Conference Call on March 5, 2020, to discuss Governor Ron DeSantis' #2020-51 Executive Order establishing coronavirus response protocols and ways to prepare and protect voters and pollworkers for the March 17 Presidential Preference Primary.
- The Florida Department of State is using its social media platforms to encourage voters who are concerned about COVID-19 to make themselves aware of voting options and ways to protect themselves and their families.
- Social Media Messages-
    - #Florida voters concerned about Coronavirus Disease 2019 (COVID-19) should make themselves aware of ways to protect themselves and their family. Learn more about #COVID19 and ways to prevent the virus using resources from @HealthyFla here: http://www.floridahealth.gov/diseases-and-conditions/COVID-19/need-to-know/Prevention.html
    - The Florida Department of State encourages voters concerned about #COVID19 to take advantage of Vote-By-Mail ballots. The deadline to request a vote-by-mail ballot to be mailed to you is Saturday, March 7. More information: https://dos.myflorida.com/elections/for-voters/voting/vote-by-mail/
    - The Florida Department of State encourages voters concerned about #COVID19 to take advantage of early voting sites. To see when and where early voting is available in your county visit: https://dos.myflorida.com/media/702721/2020-early-voting-locations-and-times-master-20200302.pdf.
    - Voters exhibiting symptoms of #COVID19 can designate someone to pick up their vote-by-mail ballot for them as late as 7:00 pm on Election Day by filling out affidavits for that designee. More information at: https://dos.myflorida.com/elections/for-voters/voting/vote-by-mail/
    - I always encourage #Florida voters to be informed about voting and what we are doing to protect their vote; that won't change.

AMERICAN OVERSIGHT

    - I also want to ensure that voters inform themselves about #COVID19 & learn ways to protect themselves & their family. http://www.floridahealth.gov/diseases-and-conditions/COVID-19/need-to-know/Prevention.html"
- DOS also has an upcoming Supervisor of Elections call scheduled for Thursday, 3/12/20 at 10:00 A.M., in which DEM and DOH have been requested to attend.
- DOS is currently working on our telework policy. We have also increased hand sanitizer and sent an agency-wide communication to our members in order to provide employee guidance related to COVID-19.
- The Secretary of State, Assistant Secretary/Chief of Staff, Director of Elections and ECO held a call with the Director of Emergency Management and Chief of Staff to discuss preparation efforts that may be needed. The Director of Elections has surveyed all SOEs to ask what polling locations they have in assisted living facilities and if those polling locations are open to the public or residents only.
- The Department of State met via conference call today with all 67 county Supervisors of Elections to discuss COVID-19 as it relates to election polling places. On the call were representatives from The Florida Department of Health, Florida Division of Emergency Management and Volunteer Florida. Supervisors were updated about COVID-19 and the precautions to take regarding polling places from DOH and provided options for assistance from Volunteer Florida. Supervisors were also reminded to work with their county Emergency Management offices for available resources to combat the COVID-19 emergency
- The Museum of Florida History has implemented the following, in addition to regular cleaning tasks:
    - Removed guest sign in book; Education Staff to record the visitor information.
    - Added to the list of opening cleaning chores: (Disinfecting wipes are preferred over spray to minimize possible damage to artifacts.)
    - Clean all push buttons for life casts, dioramas, and other touchables in exhibits as identified and approved with disinfecting wipes.
    - Clean wheelchairs after every use with disinfecting wipes.
    - Clean surfaces of benches with disinfecting wipes.
    - Clean surface of survey podium with disinfecting wipes.
    - Placed additional hand sanitizer dispensers at entrance and exit of Museum.
    - Turned off touchscreen survey and rely on paper surveys.
- Staff using disinfecting wipes on phones and keyboards.
- COVID-19 general prevention signs from the Florida Department of Health have been posted in shared staff spaces

Department of Veteran Affairs

- Florida Department of Veterans' Affairs (FDVA) resources are currently focused on our network of state veterans' homes. FDVA operates state veterans' homes in Panama City, Lake City, St. Augustine, Daytona Beach, Pembroke Pines, Port Charlotte and Land O' Lakes.
- Effective March 11, 2020, the Florida Department of Veterans' Affairs (FDVA) is restricting visitor access to its State Veterans' Nursing Homes and Domiciliary until further notice, with the exception of essential visitors, such as family members of those residents undergoing end-of-life care.
- The U.S. Department of Veterans Affairs (VA) has also temporarily restricted access to their nursing and community living center facilities to only essential visitors until further notice.
- All VA Medical Centers in Florida are implementing enhanced screening protocols at their facilities. VA Outpatient Clinics are also implementing enhanced screening protocols. Please plan to arrive at the facility well in advance of your appointment to allow additional time for the screening process.
- Veterans who are concerned they may have symptoms of Coronavirus (COVID-19) are encouraged to contact the VISN 8 Clinical Contact Center at 1-877-741-3400 (toll free). Clinical staff provide 24/7

AMERICAN OVERSIGHT

virtual care and support, including nurse advice and triage. The service is available at no cost to veterans enrolled for care in the VA Sunshine Healthcare Network (VISN 8).

- All FDVA and VA facilities remain fully operational.

Fish and Wildlife Conservation Commission

- Information regarding awareness, precautions, and reporting has been disseminated agency wide.
- Participated in a briefing from the Department of Homeland Security's Senior Medical Officer was shared with ESF-16 partners and FDLE personnel.
- Guidance has been issued for taking appropriate precautions to mitigate risk from COVID-19 agency wide.
- Accounted for all agency issued personal protective equipment.

Office of Attorney General

- Activated the Price Gougin Hotline is response
- Monitoring staff travel and continuing internal staffing calls in preparation of potential staffing/telework situations in the coming weeks

Volunteer Florida

- Volunteer Florida has passed CDC guidance on COVID-19 to employees and our Florida VOAD Partners"
- "Volunteer Florida conducted an initial meeting with the FLVOAD to discuss additional actions including a FLVOAD call to be conducted this week to ensure all member organizations and partners are aware of CDC guidance. "
- VF is coordinating with the Florida Department of Elder Affairs to see how we can assist with spreading information to seniors.
- VF coordinated latest messaging with FLVOAD and discussed scheduling a call for next week with all FLVOAD partners. FLVOAD pushed out messaging via social media and will be scheduling a call for next week.
- VF participated in a statewide call with Supervisors of Elections to discuss Volunteer Connect (Florida's official volunteer opportunity platform) and how it can be used by offices to help recruit volunteers for Tuesday's upcoming election to due to COVID-19 fears at some poling sites.

Water Management Districts

- Reviewing continuity of operations and telework plans.
- Increasing cleaning and sanitation of failities.
- Installed hand sanitizer and distributed sanitary wipes throughout facilities
- Instituted regular sanitary wipe-downs of common areas and meeting rooms
- The District has suspended all official travel and meetings
- Preparing resources for staff to work remotely as needed
- Provided staff education
- Conducted public Governing Board meeting
- Purchasing thermometers, alcohol wipes, gloves
- Finance began tracking costs under separate codes

AMERICAN OVERSIGHT

DRAFT

TIMELINE OF SIGNIFICANT ACTIVITIES

Time Line	Key Activities
January 21, 2020	• DOH Website updated with novel coronavirus as a trending topic. • CDC Health Alert Network Advisories on surveillance, testing, and infection control of novel coronavirus disseminated through the Health Alert Network.
January 29, 2020	• Distributed reporting and preparedness guidance document for health care providers (HCPs) and laboratories to stakeholders through Medical Quality Assurance and County Health Department/Health Officers.
January 30, 2020	• World Health Organization declared the outbreak a public health emergency of international concern.
January 31, 2020	• Public Health Emergency was declared in the U.S. • U.S. government suspended entry of persons posing a risk of transmitting the virus in the U.S. • Distributed update CHD guidance document and health care provider letter with new patient under investigation criteria sent by CDC.
February 5, 2020	• Florida Department of Health began receiving notifications of persons entering Florida from outside the U.S. with potential exposure to monitor during the incubation period. • Conducted update call with Florida Hospital Association partners.
February 6, 2020	• Developed and distributed guidance on CHD implementation of CDCs guidance on risk assessment and monitoring of travelers to county health directors and epidemiologists.
February 12, 2020	• Conducted first Public Health & Healthcare Stakeholders Conference Call.
February 13, 2020	• Expanded activation of Incident Management Team to include Divisions of Disease Control, Bureau of Preparedness and Response, Office of Communications, Office of the Gneral Counsel and Office of County Health Systems.
February 19, 2020	• Conducted briefing with Executive Office of the Governor.
February 20, 2020	• Distributed CDC Healthcare Providers Preparedness Checklist & Hospital Preparedness Tool to Florida Hospital Association and Health Care Coalitions. • Distributed Long-Term Care Guidance to Agency for Health Care Administration, Florida Health Care Association and Health Care Coalitions.
February 26, 2020	• Conducted briefing with Executive Office of the Governor. • Activated emergency duty policy to mobilize Department staff as needed to support the incident response.
February 27, 2020	• Distributed Personal Protective Equipment landscape assessment.

DRAFT

AMERICAN OVERSIGHT

February 28, 2020	• Coducted press conference with Governor, Lieutenant Governor, State Surgeon General (SSG) and Deputy Scretary for Health regardign State Response to COVID-19. • Conducted Agency Emergency Coordination Officer Pandemic Preparedness Plannign Meeting in coordination with the Division of Emergency Management. • Participated in meeting with Vice President Mike Pence, Gov. Ron DeSantis, Florida Lt. Gov. Jeanette Núñez, the U.S. Surgeon General and the Florida Surgeon General • Publically announced persons under investigation and monitoring numbers.
February 29, 2020	• Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, HCCs and CHDs • Implemented testing at the State Public Health Laboraties.
March 1, 2020	• Presumtive positive cases of residents in Manatee and Hillsborough announced via press release. • Governor DeSantis issued an Executive Order directing the SSG to declare a poublic health emergency. • SSG Rivkees declared a public health emergency for the novel coronavirus in Florida. • Distributed updated CDC guidance for schools to CHDs and the Deaprtment of Education. • Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories
March 2, 2020	• DOH public call center for COVID-19 opened. • CDC confirmed two cases of COVID-19. • DOT Secretary Thibault sent out an all staff and consultant email on Monday, March 2, addressing all talking points provided from DOH from hand washing, hand sanitizers, telework, vigilance on symptoms, workplace safety and employee welfare. A follow-up email was also sent to all employees from FDOT HR on Q&A for telework, leave rules and use, supervisor roles in encountering symptomatic employees. • DCF's Office of Child Welfare sent communication about COVID-19 specifically to licensed child care providers, directing them to follow the CDC's Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19). This information was also posted prominently on DCF's Child Care webpage. • DCF General Services staff throughout the state were directed to work with lessors and janitorial contractors to increase sanitizing measures in office buildings, especially restrooms and common areas. They also began taking inventory of sanitizing supplies (disinfecting wipes, Lysol spray, hand-sanitizer, etc.) and ordering more as needed.
March 3, 2020	• Conducted call with Florida Healthcare Association for nursing homes. • Conducted call with Assisted Living Facilities and other residential treatment facilities. • Conducted call with Florida Medical Association • Scheduled twice meeting with county emergency mangement officials in coordination with the Division of Emergency Managemet. • Scheduled State Agency briefing. • Extened call center hours to 8pm EST (7pm CST) • Conducted call with Florida's federal legislative delegation.

AMERICAN OVERSIGHT

	• DCF initiated status update calls with both internal leadership and leadership from external contracted partners. For the time being, these calls will take place twice weekly, every Tuesday and Friday. • DCF Secretary Poppell sent thorough communication to all DCF staff, contracted partners, and licensed facilities (including child care providers) about COVID-19, including precautionary measures (as outlined by the CDC) and temporary policy updates. • DCF established strategies for COVID-19 prevention at all three state mental health treatment facilities, as well as the South Florida mental health facilities run by Wellpath Recovery Solutions, a contracted partner. They will be reporting weekly with updates and to ensure compliance with virus prevention.
March 4, 2020	• Participated in the Florida Association of District School Superintendents call with Governor DeSantis, Lt. Governor Nunez, and Commissioner Corcoran. • Conducted weekly conference call with all public health & healthcare stakeholders hosted by the Florida Department of Health. • Conducted conference Call with Florida Hospitals hosted by the Florida Hospital Association. • Sustained healthcare call center. • Activated Joint Information Center with the Division of Emergency Management. • Extended public information call center hours to midnight. • The University Chancellors as well as university staff have participated in various statewide calls hosted by the SERT, including this past Wednesday's call on 03/4/2020 for all superintendents with the Governor and Surgeon General. • A poster detailing preventative actions was sent to Florida's 175 state parks and GTM Research Reserve, Rookery Bay Aquatic Preserve, and Apalachicola National Estuarine Research Reserve.
March 5, 2020	• Announced new presumptive positive case in a Florida resident from Sarasota County. • Requested 1.5 million N-95 masks from the federal stockpile. • Distributed screening guidance to public safety answering points. • Conducted a teleconference for the seaports and public airports. The call was hosted by the Florida Department of Transportation. • Received notification from CDC that Florida has been awarded $500,000 through the Public Health Emergency Response Cooperative Agreement. • Secretary Thibault from the Department of Transportation facilitated a conference call with the Governor, Florida Surgeon General to advise on seaports and public use airports regarding COVID-19 efforts. • DCF distributed guidance from Centers for Medicare & Medicaid Services for hospitals and nursing homes was distributed for immediate implementation at both the State-operated and private Mental Health Treatment Facilities. The Chief Medical Officer of Florida State Mental Health Treatment Facilities is in the lead to oversee compliance and provide weekly reporting. • Message was sent to Land and Recreation employees by Deputy Secretary Shawn Hamilton on the appropriate use of disposable gloves and masks as personal protective equipment. • A message from DEP Secretary Noah Valenstein was sent to all employees relaying Department of Health guidance and links and contacts information for DOH resources. Preventative actions and FAQs were included in this communication. • DOH banner graphic was placed on the DEP website.

AMERICAN OVERSIGHT

	• Message was sent to Land and Recreation employees by Deputy Secretary Shawn Hamilton on the appropriate use of disposable gloves and masks as personal protective equipment. • The Florida Department of State met with Supervisors of Elections via Conference Call on March 5, 2020, to discuss Governor Ron DeSantis' #2020-51 Executive Order establishing coronavirus response protocols and ways to prepare and protect voters and pollworkers for the March 17 Presidential Preference Primary.
March 6, 2020	• Extended call center hours to Monday – Friday for 24 hours a day. • Identified vendor for shipping container and assessed the supply chain quantities available for future needs. • Continues compiling Alternate Care Site supplies and tactics. • Continue to assess N95 supply chain. • Coordinated with the Florida Poison Control Information Network for transition of COVID-19 information line for long term sustainment. • Continue to pilot strategies including texting and video conferencing for monitoring persons under investigation. • Provided situational update on the Florida Health Care Association conference call. There were 524 call participants. • Participated in a conference call with the members of the Florida Association of Health Plans. • Participated in a conference call with Leading Age. There were 228 participants. • Provided a situational update on the Florida Hospital Association hosted conference call for hospitals. • Conducted a briefing for State Agency Emergency Coordination Officers on COVID-19 response actions and activities other agencies can take to assist with the coordinated statewide response.
March 7, 2020	• Governor did press conference in Fort Lauderdale with Vice President Pence • Activated State Emergency Operations Center and is currently at a level two • Conducted notification calls to travelers recently traveled on tours to Egypt, Israel, and Jordan between Feb 4-18 may have been exposed to coronavirus disease 2019 (COVID-19). • Coordinated with AHCA to provide hospital guidance on masks through email blast. • Coordinated group notification to ACTRIMS conference attendees. • Identified resource plan for Alternate Care Site for hospital augmentation • Coordinated with DEM to gain knowledge of PPE resources through other state agencies.
March 8, 2020	• Conducted contingency planning for large scale quarantine for cruise ships. • Continuation of notification calls to travelers recently traveled on tours to Egypt, Israel, and Jordan between Feb 4-18 may have been exposed to coronavirus disease 2019 (COVID-19). • Opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.

AMERICAN OVERSIGHT

	• Sent e-blast to all AHCA licensed health care providers sharing key guidance including CDC and DOH information regarding the importance of screening visitors, infection control protocol, and hygiene best practices. • Expanded the event on the Emergency Status System to collect isolation beds for hospitals effective Saturday, March 7. • Preparing e-blasts for DOH call meeting notices on Tuesday, March 10; one e-blast for long-term care facilities and one e-blast for hospitals.
March 9, 2020	• Governor conducted press conference with agency heads to provide an update to the public on the state's response • Attended Community Health Center call • Conducted county call with all case counties • Updated the testing algorithm • Provided guidance to county health departments on public safety answering points • Conducted call for the Congressional Delegation • Conducted call the Florida State Legislature • Provided coordination for seaports call
March 10, 2020	• Disseminated Enhance Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) and Clinician Screening Tool • Coordinated with County Health Departments on how to prepare for planning a response one their county has a case of COVID-19. • Continue to coordinate efforts on call center to transfer to Poison Control contract. • Coordinated with the Division of Emergency Management to order resources.
March 11, 2020	• MCM Coordinator discussed Point of Collection contingency plan strategies with her workgroup • Supporting 3 missions • Coordinated contingency planning for nursing home PUI • ASPR notified ESF8 there will be a portion of requested cache delivered • Coordinated with Dr. Schepke on validation of resource request
March 12, 2020	• Participated in calls with Corrections and LEO • Conducted call with Senior hospital leadership and clinical lab directors regarding testing for COVID • Contracted with Poison Control to take over COVID-19 call center on 3/13/20 at noon • Received six trucks of requested SNS order • Purchased 10,000 test kits • Continue to fill resources request as supplies allow •

Sent: Thursday, March 12, 2020 12:02 PM
To: Pritchard, Scott <Scott.Pritchard@flhealth.gov>
Subject: End of isolation for confirmed cases

Scott – Attached is a compilation of related information.
Key points:

- I found 2 states that have guidance independent of testing
  - WA 7 days or 72 hrs after symptom resolution
  - TN 14 days or 72 hrs after symptom resolution
- Attached NEJM paper is the only thing I could find for new virus and shows most upper respiratory specimens are PCR negative by 15 days.
- Papers on SARS and MERS show longer shedding period in stool and resp specimens, up to median 27 days and range up to 50-100 days.
- CDC guidance has not been updated as far as I can tell, but does seem to permit some flexibility to account for variety of factors, including serial test negative.

So if you want a test independent criteria, based on preliminary assessment, I would suggest we align with the more conservative TN criteria, which is stated below:

TN (source: email from CEFO in TN, couldn't find anything on web)
14 days or 72 hours after symptom resolution, whichever is longer. No serial testing.

AMERICAN OVERSIGHT

HH contacts must stay home for at least 14 days, or 7 days after case's symptom resolution, whichever is longer and presuming the HH contact remains asymptomatic.

This seems like a more reasonable time period based on the limited findings in the NEJM paper.

Tim

Hi Amie.

Thank you for your email. We completely understand how COVID-19 response efforts are affecting CHD workloads and that it is the priority. To that end, absolutely do not worry about the March 31st deadline. Our Health Improvement Planning team is willing to assist at any time and once things get to a better pace.

Thank you, and let us know if we can do anything to help you.

AMERICAN OVERSIGHT

Hi Jennifer,

Can we request an extension for the six pack documents due date (3/31)? My preparedness planners in each county and nursing directors are the leads for reaccreditation and the six pack documents, we are spending the majority of our days answering COVID questions, meetings, FIT testing, etc. and I don't foresee that slowing down. Your staff have been great assisting, but we do not have extra staff in my three small counties to hand off these roles.

Thanks,
Amie

Denied Entry (469 KB).msg

The attached email from AHCA indicates that there may be communication between the agencies at the Executive leadership level. Also, AHCA is prioritizing their surveys and focusing on infection control in the ALFs.
The DOH inspections are for safety and sanitation and also incorporate some infection control measures. We currently conduct a group care inspection of the ALF one time per year looking at the entire facility. For the larger facilities with a food permit, we inspect those quarterly.

Perhaps we need to wait a day or two to see what comes down the pipeline to us.

Subject: RE: Facilities Inquiries

I would think most inspectors don't fit the criteria used (international travel within 14 days, contact with COVID patient, ill etc). so should be able to access. I wonder if a letter from the health officer might help ensuring that these persons don't meet the exclusion criteria?

Subject: RE: Facilities Inquiries

ESF8Planning answered this same question from Samir by sending him a copy of the Executive Order which does not have the answer. The only language I could find in the EO that refers to this issue is:

AMERICAN OVERSIGHT

B. Each State agency may suspend the provisions of any regulatory statute prescribing the procedures for conduct of state business or the orders or rules of that agency, if strict compliance with the provisions of any such statute, order, or rule would in any way prevent, hinder, or delay necessary action in coping with the emergency. This includes, but is not limited to, the authority to suspend any and all statutes, rules, ordinances, or orders which affect leasing, printing, purchasing, travel, and the condition of employment and the compensation of employees. For the purposes of this Executive Order, "necessary action in coping with the emergency" means any emergency mitigation, response, or recovery action: (1) prescribed in the State Comprehensive Emergency Management Plan ("CEMP"); or (2) ordered by the State Coordinating Officer. The requirements of sections 252.46 and 120.54, Florida Statutes, shall not apply to any such suspension issued by a State agency; however, no such suspension shall remain in effect beyond the expiration of this Executive Order, to include any extensions.

There has been no guidance yet. Michael is asking again.

To: Brown, VaKesha <VaKesha.Brown@flhealth.gov>
Subject: RE: Denied Entry

Hi Vakesha,
I will forward your email directly to Kim Smoak (Kimberly.Smoak@ahca.myflorida.com) to make her aware of the situation.
I understand Governor DeSantis issued a state emergency, in which there are visitation restrictions in our state residential facilities to protect these residents from getting infected with COVID 10 - https://contentsharing.net/actions/email_web_version.cfm?ep=p2HTLzFPkjRTG5wt8zKhyJsdfw1zyIL0j92y9Xhbav4q9AhzmmUVTA6vcf8MEFyGN2zThPSVCByYZeteOkUmAN42Yni_zDKpOmcGSiVl4sBumy34z2CcSfxKeSKqdVTm
We also have directives for the Centers for Medicare and Medicaid Services (CMS) for limiting visitors in the facility – see the attached.
These residential facilities are restricting visitors and required to screen any visitor that wants to enter the facility, which includes our surveyors.
We have also been instructed by CMS to prioritize our federal facility surveys (inspections) to those that are statutorily required and those that are essential to protect the health and safety of patients and residents, such as infection control and abuse and neglect.
We are targeting those facilities with a history of infection control concerns to ensure they are ready to handle COVID 19. We are also modifying our workload to focus on infection control in Assisted Living Facilities and Adult Family Care Homes.

I'll forward this to Kim, and there should be further information from may Agency Leadership on this. The communication might occur between AHCA and FDOH HQ leadership.
Thank you for letting us know about this and please don't hesitate to let me or Kim Smoak know of any issues you have in the future as we progress through this outbreak.

Center for Clinical Standards and Quality/Quality, Safety & Oversight Group

Ref: QSO-20-12-All

DATE: **March 4, 2020**

TO: State Survey Agency Directors

FROM: Director
Quality, Safety & Oversight Group

SUBJECT: Suspension of Survey Activities

Memorandum Summary

- ***CMS is committed*** to taking critical steps to ensure America's health care facilities are prepared to respond to the threat of the 2019 Novel Coronavirus (COVID-19).
- The Centers for Medicare & Medicaid Services (CMS) CMS is committed to taking critical steps to ensure America's health care facilities are prepared to respond to the threat of the COVID-19 and other respiratory illnesses.

Background

CMS is committed to taking critical steps to ensure America's health care facilities and clinical laboratories are prepared to respond to the threat of the COVID-19 and other respiratory illness. Specifically, CMS is suspending non-emergency inspections across the country, allowing inspectors to turn their focus on the most serious health and safety threats like infectious diseases and abuse. This shift in approach will also allow inspectors to focus on addressing the spread of the coronavirus disease 2019 (COVID-19). CMS is issuing this memorandum to State Survey Agencies to provide important guidelines for the inspection process in situations in which a COVID-19 is suspected.

Discussion

Effective immediately, survey activity is limited to the following (in Priority Order):

- All immediate jeopardy complaints (cases that represents a situation in which entity noncompliance has placed the health and safety of recipients in its care at risk for serious injury, serious harm, serious impairment or death or harm) and allegations of abuse and neglect;
- Complaints alleging infection control concerns, including facilities with potential COVID-19 or other respiratory illnesses;

AMERICAN OVERSIGHT

- Statutorily required recertification surveys (Nursing Home, Home Health, Hospice, and ICF/IID facilities);
- Any re-visits necessary to resolve current enforcement actions;
- Initial certifications;
- Surveys of facilities/hospitals that have a history of infection control deficiencies at the immediate jeopardy level in the last three years;
- Surveys of facilities/hospitals/dialysis centers that have a history of infection control deficiencies at lower levels than immediate jeopardy.

Due to the dynamic nature of this situation, we will be posting updated FAQs in real-time at the following website: https://www.cms.gov/medicare/quality-safety-oversight-general-information/coronavirus

For survey of facilities with Complaints alleging infection control concerns, including facilities with potential COVID-19 or other respiratory illness, please refer to the attached (Attachment A- Survey Planning in Facilities with Active or Suspected Cases of COVID-19 Cases; Attachment B- Infection Prevention, Control & Immunizations).

Contact: Questions about this document should be addressed to QSOG_EmergencyPrep@cms.hhs.gov.

Effective Date: Immediately. This policy should be communicated with all survey and certification staff, their managers and the State/Regional Office training coordinators within 30 days of this memorandum.

Attachment A- Survey Planning in Facilities with Active or Suspected Cases of COVID-19 Cases

I. Protocols for Coordination and Investigation of Facilities with Actual or Suspected COVID-19 Cases

When a COVID-19 confirmed case or presumptive positive case (e.g., positive local test but pending confirmatory test), is identified in a Medicare/Medicaid certified provider or supplier, State Survey Agencies and Accrediting Organizations (AO) are requested to do the following:

- Notify the appropriate CMS Regional Office (if they are not already aware) of the facility and date of patient/resident COVID-19 or presumptive respiratory illness or confirmed status;
- Coordinate on initiating any Federal complaint or recertification survey of the impacted facility until CDC (and any other relevant Federal/State/Local response agencies) have cleared the facility for survey. The CMS Regional Office will then authorize a survey, if necessary;
- Ensure surveyors have all necessary Personal Protective Equipment (PPE) appropriate to allow a survey of the facility; Refer to CDC Infection Control resources for the most up to date guidance.
- Suspend any Federal enforcement action for any deficiencies identified until reviewed and approved by the CMS Regional Office to ensure consistent and appropriate action.

These protocols will be updated as circumstances warrant. We are asking Accrediting Organizations to copy their CMS AO liaison on any communications with the CMS Regional Office.

II. Focused Surveying – Prioritizing Threats

In all cases, concerns of **Immediate Jeopardy** (IJ) (cases that represents a situation in which entity noncompliance has placed the health and safety of recipients in its care at risk for serious injury, serious harm, serious impairment or death or harm) and cases of abuse and neglect allegations from complaints will continue to receive high priority for survey. Non-emergency surveys will be suspended.

III. Survey Planning in Facilities with Active or Suspected Cases of COVID-19 Infection

Introduction: Under What Circumstances Will CMS Authorize an On-site Survey/Investigation of a Facility With Persons who are Known or Suspected of Being COVID-19 Positive

When a COVID-19 confirmed case or presumptive positive case (e.g., positive local test but pending confirmatory test), is identified in a Medicare/Medicaid certified provider or supplier,

AMERICAN OVERSIGHT

State Survey Agencies and Accrediting Organizations must notify the appropriate CMS Regional location (if they are not already aware) of the facility and date of patient/resident COVID-19 presumptive or confirmed status.

Before initiating any Federal complaint or recertification survey of the impacted facility, CMS will coordinate with the CDC (and any other relevant Federal/State/Local response agencies) to approve the facility for survey.

The CMS Regional locations will authorize an on-site survey if reported conditions at the facility are triaged at immediate jeopardy. Immediate jeopardy means there are conditions at the facility that are causing or are likely to cause on or more recipients of care to suffer serious injury, harm, impairment or death. CMS Regional locations will also authorize on-site surveys where the complaint or facility reported incident involves infection control concerns in the facility.

If conditions at such facilities do not rise to the immediate jeopardy level, then desk audits will be performed, and on-site investigations may be authorized once all active or suspected cases of COVID-19 have been cleared from the facility.

I. Before Survey Entry

Determine survey team composition for minimal but optimal number of surveyors required to efficiently and effectively conduct the onsite observations required. Generally, one to two surveyors for an abbreviated complaint survey focusing on the COVID-19 infection control and/or quality of care issues would be sufficient. Do not include any surveyors who are currently ill or have underlying health conditions that may make them particularly vulnerable to COVID-19.

A. Personal Protective Equipment Considerations

Ensure survey team members have needed personal protective equipment (PPE) that may be required onsite to observe resident care in close quarters. If the facility has gowns, gloves, face shields or other eye protection that may be used by surveyors, such PPE may be used onsite by surveyors. However, if observation of care provided to symptomatic patients/residents who are confirmed or presumed to be COVID-19 positive is anticipated, then survey agencies and accrediting organizations should refer to the CDC Interim Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019 (COVID-19) or Persons Under Investigation for COVID-19 in Healthcare Settings: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html.

This guidance indicates, "Respirator use must be in the context of a complete respiratory protection program in accordance with Occupational Safety and Health Administration (OSHA) Respiratory Protection standard 29 CFR 1910.134). Staff should be medically cleared and fit-tested if using respirators with tight-fitting face-pieces (e.g., a NIOSH-certified disposable N95) and trained in the proper use of respirators, safe removal and disposal, and medical contraindications to respirator use…" More information on the use of respirators may be found here: https://www.osha.gov/SLTC/etools/respiratory/respirator_basics.html

AMERICAN OVERSIGHT

B. Offsite Planning Considerations
Conduct offsite planning based on available information from: (1) facility-reported information; (2) CDC information and guidance from its onsite visit before the SA/CMS investigation; (3) available hospital information regarding patients transferred to the hospital; and/or (4) complaint allegations. Determine and prioritize key observations that should be conducted. Compile a preliminary list of the likely interviews with various facility staff and the types of records, policies or other documents that may be needed. This may be revised after onsite observations and interviews, which may lead to additional areas of investigation.

II. Onsite Survey Activities

Upon entry, notify the facility administrator of the limited nature of the planned survey. Coordinate with the facility staff a plan and timeline for conducting the needed observations. Plan to conduct as many observations on the entry day. If by the end of the first day, the surveyors were not able to completed necessary observations, coordinate with the facility when the observations may be completed by the next day. Unless there are extenuating circumstances, plan to complete all onsite observations and corresponding interviews within two days. When possible during observations, if symptomatic patients/residents are able to tolerate wearing face masks, this will reduce the need for surveyors to wear respirator masks.

Coordinate with the facility on how to gather medical record information, with the goal to conduct as much record review offsite as possible. If the facility has an electronic health record (EHR) system that may be accessed remotely, request remote access to the EHR to review needed records for a limited period of time. If this is not an option, discuss with the facility the best options to get needed medical record information, such as fax, secure website, encrypted email, etc.

Adhere to Standard, Contact and Airborne Precautions and refer to the CDC Interim Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019 (COVID-19) or Persons Under Investigation for COVID-19 in Healthcare Settings.

During onsite observation and investigation, focus on concerns with:

- Improper transmission precautions procedures
- Lack of staff knowledge of transmission precautions
- Improper staff use of PPE and/or inadequate hand hygiene
- High-risk, significant environmental cleaning issues
- Ineffective and/or improper laundering of linens
- Possible IC surveillance program issues - also consider how influenza & pneumococcal programs are managed

Conduct concurrent interviews of staff with observations during or directly after observations as appropriate. Conduct needed interviews with patients/residents onsite, as these may be difficult to obtain offsite. Patients may be discharged. Residents may have a difficult time responding to questions by telephone. While onsite, if there are periods of time when no observations can be made, attempt to conduct other needed interviews and review medical records.

AMERICAN OVERSIGHT

For nursing home investigations, use the LTC investigative protocols for infection control (IC) and the environment:

III. Complete Survey Offsite

Except for interviews that should be conducted concurrently with observations, conduct other interviews offsite with staff by telephone. If any patient/resident interviews could not be conducted while onsite, then attempt to conduct those by telephone.

After coordinating with the facility and determining what medical record review may be conducted offsite, complete as much of the record review offsite as possible. Request facility policies and procedures for review offsite.

In addition, consider investigating Governing Body and Quality Assurance Performance Improvement requirements that may relate to infection control or care issues offsite through telephone interviews and additional record review.

After completing all investigative procedures, determine compliance status and conduct any survey exit discussion with the facility by telephone. Draft the CMS-2567 offsite.

III: Enforcement Activities

Surveys resulting in deficiencies will have the imposition of some type of enforcement action ranging from request for corrective action plans to termination depending on the circumstances surrounding deficiencies.

Quality, Safety & Oversight Group

SUBJECT: Guidance for Infection Control and Prevention Concerning Coronavirus Disease (COVID-19): FAQs and Considerations for Patient Triage, Placement and Hospital Discharge

Memorandum Summary

- ***CMS is committed*** to taking critical steps to ensure America's health care facilities and clinical laboratories are prepared to respond to the threat of the COVID-19.
- ***Coordination with the Centers for Disease Control (CDC) and local public health departments*** - We encourage all hospitals to monitor the CDC website for information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).
- ***Hospital Guidance and Actions -*** CMS regulations and guidance support hospitals taking appropriate action to address potential and confirmed COVID cases and mitigate transmission including screening, discharge and transfers from the hospital, and visitation.

Background

The Centers for Medicare & Medicaid Services (CMS) is committed to the protection of patients and residents of healthcare facilities from the spread of infectious disease. This memorandum responds to questions we have received and provides important guidance for hospitals and critical access hospitals (CAH's) in addressing the COVID-19 outbreak and minimizing transmission to other individuals. Specifically, we address FAQs related to optimizing patient placement, with the goal of addressing the needs of the individual patient while protecting other patients and healthcare workers.

Guidance

Hospitals should monitor the CDC website (https://www.cdc.gov/coronavirus/2019-ncov/index.html) for up to date information and resources. They should contact their local health department if they have questions or suspect a patient or healthcare provider has COVID-19. Hospitals should have plans for monitoring healthcare personnel with exposure to patients with known or suspected COVID-19. Additional information about monitoring healthcare personnel

AMERICAN OVERSIGHT

is available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html

Guidance for Addressing Patient Triage and Placement of Patients with known or suspected COVID-19

Which patients are at risk for severe disease for COVID-19?
Based upon CDC data, older adults and those with underlying chronic medical conditions or immunocompromised state may be most at risk for severe outcomes. This should be considered in the decision to monitor the patient as an outpatient or inpatient.

How should facilities screen visitors and patients for COVID-19?

Hospitals should identify visitors and patients at risk for having COVID-19 infection before or immediately upon arrival to the healthcare facility. They should ask patients about the following:

1. Fever or symptoms of a respiratory infection, such as a cough and sore throat.
2. International travel within the last 14 days to restricted countries. For updated information on restricted countries visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html
3. Contact with someone with known or suspected COVID-19.

For patients, implement respiratory hygiene and cough etiquette (i.e., placing a facemask over the patient's nose and mouth if that has not already been done) and isolate the patient in an examination room with the door closed. If the patient cannot be immediately moved to an examination room, ensure they are not allowed to wait among other patients seeking care. Identify a separate, well-ventilated space that allows waiting patients to be separated by 6 or more feet, with easy access to respiratory hygiene supplies. In some settings, medically-stable patients might opt to wait in a personal vehicle or outside the healthcare facility where they can be contacted by mobile phone when it is their turn to be evaluated.

Inform infection prevention and control services, local and state public health authorities, and other healthcare facility staff as appropriate about the presence of a person under investigation for COVID-19. Additional guidance for evaluating patients in U.S. for COVID-19 infection can be found on the CDC COVID-19 website.

Provide supplies for respiratory hygiene and cough etiquette, including 60%-95% alcohol-based hand sanitizer (ABHS), tissues, no touch receptacles for disposal, facemasks, and tissues at healthcare facility entrances, waiting rooms, patient check-ins, etc.

How should facilities monitor or restrict health care facility staff?
The same screening performed for visitors should be performed for hospital staff.

- Health care providers (HCP) who have signs and symptoms of a respiratory infection should not report to work.
- Any staff that develop signs and symptoms of a respiratory infection while on-the-job, should:

AMERICAN OVERSIGHT

    - Immediately stop work, put on a facemask, and self-isolate at home;
    - Inform the hospital's infection preventionist, and include information on individuals, equipment, and locations the person came in contact with; and
    - Contact and follow the local health department recommendations for next steps (e.g., testing, locations for treatment).
- Refer to the CDC guidance for exposures that might warrant restricting asymptomatic healthcare personnel from reporting to work (https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html).

Hospitals should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).

What are recommended infection prevention and control practices, including considerations for patient placement, when evaluating and care for a patients with known or suspected COVID-19?

Recommendations for patient placement and other detailed infection prevention and control recommendations regarding hand hygiene, Transmission-Based Precautions, environmental cleaning and disinfection, managing visitors, and monitoring and managing healthcare personnel are available in the CDC Interim Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019 (COVID-19) or Persons under Investigation for COVID-19 in Healthcare Settings.

Do all patients with known or suspected COVID-19 infection require hospitalization?
Patients may not require hospitalization and can be managed at home if they are able to comply with monitoring requests. More information is available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-home-care.html

Are there specific considerations for patients requiring diagnostic or therapeutic interventions?
Patients with known or suspected COVID-19 should continue to receive the intervention appropriate for the severity of their illness and overall clinical condition. Because some procedures create high risks for transmission (e.g., intubation) additional precautions include: 1) HCP should wear all recommended PPE, 2) the number of HCP present should be limited to essential personnel, and 3) the room should be cleaned and disinfected in accordance with environmental infection control guidelines.

Additional information about performing aerosol-generating procedures is available here: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html

When is it safe to discontinue Transmission-based Precautions for hospitalized patients with COVID-19?
The decision to discontinue Transmission-Based Precautions for hospitalized patients with COVID-19 should be made on a case-by-case basis in consultation with clinicians, infection prevention and control specialists, and public health officials. This decision should consider disease severity, illness signs and symptoms, and results of laboratory testing for COVID-19 in respiratory specimens

AMERICAN OVERSIGHT

More detailed information about criteria to discontinue Transmission-Based Precautions are available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/disposition-hospitalized-patients.html

Can hospitals restrict visitation of patients?
Medicare regulations require a hospital to have written policies and procedures regarding the visitation rights of patients, including those setting forth any clinically necessary or reasonable restriction or limitation that the hospital may need to place on such rights and the reasons for the clinical restriction or limitation. CMS sub-regulatory guidance identifies infection control concern as an example of when clinical restrictions may be warranted. Patients must be informed of his/her visitation rights and the clinical restrictions or limitations on visitation.

The development of such policies and procedures require hospitals to focus efforts on preventing and controlling infections, not just between patients and personnel, but also between individuals across the entire hospital setting (for example, among patients, staff, and visitors) as well as between the hospital and other healthcare institutions and settings and between patients and the healthcare environment. Hospitals should work with their local, State, and Federal public health agencies to develop appropriate preparedness and response strategies for communicable disease threats.

What are the considerations for discharge to a subsequent care location for patients with COVID-19?
The decision to discharge a patient from the hospital should be made based on the clinical condition of the patient. If Transmission-Based Precautions must be continued in the subsequent setting, the receiving facility must be able to implement all recommended infection prevention and control recommendations.

Although COVID-19 patients with mild symptoms may be managed at home, the decision to discharge to home should consider the patient's ability to adhere to isolation recommendations, as well as the potential risk of secondary transmission to household members with immunocompromising conditions. More information is available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-home-care.html

What are the implications of the Medicare Hospital Discharge Planning Regulations for Patients with COVID-19?
Medicare's Discharge Planning Regulations (which were updated in November 2019) requires that hospital assess the patient's needs for post-hospital services, and the availability of such services. When a patient is discharged, all necessary medical information (including communicable diseases) must be provided to any post-acute service provider. For COVID-19 patients, this must be communicated to the receiving service provider prior to the discharge/transfer and to the healthcare transport personnel.

Can hospitals restrict visitation of patients?
Medicare regulations require a hospital to have written policies and procedures regarding the visitation rights of patients, including those setting forth any clinically necessary or reasonable restriction or limitation that the hospital may need to place on such rights and the reasons for the clinical restriction or limitation. CMS sub-regulatory guidance identifies infection control

AMERICAN OVERSIGHT

concern as an example of when clinical restrictions may be warranted. Patients must be informed of his/her visitation rights and the clinical restrictions or limitations on visitation.

The development of such policies and procedures require hospitals to focus efforts on preventing and controlling infections, not just between patients and personnel, but also between individuals across the entire hospital setting (for example, among patients, staff, and visitors) as well as between the hospital and other healthcare institutions and settings and between patients and the healthcare environment. Hospitals should work with their local, State, and Federal public health agencies to develop appropriate preparedness and response strategies for communicable disease threats.

Important CDC Resources:

- CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html
- CDC Updates: https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html
- CDC FAQ for COVID-19**:** https://www.cdc.gov/coronavirus/2019-ncov/infection-control/infection-prevention-control-faq.html
- CDC Interim Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019 (COVID19) or Persons Under Investigation for COVID-19 in Healthcare Settings.: **https://www.cdc.gov/coronavirus/2019-ncov/infection-control/controrecommendations.html?CDC_AA_refVal=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fhcp%2Finfection-control.html**

CDC Updates:
https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html

CMS Resources
CMS has additional guidance which may be beneficial to hospitals related to EMTALA requirements and other topics surrounding the health and safety standards during emergencies. The document Provider Survey and Certification Frequently Asked Questions (FAQs), Declared Public Health Emergency All-Hazards are located at https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertEmergPrep/Downloads/All-Hazards-FAQs.pdf. These FAQs are not limited to situations involving 1135 Waivers, but are all encompassing FAQs related to public health emergencies and survey activities and functions.

Contact: Questions about this memorandum should be addressed to QSOG_EmergencyPrep@cms.hhs.gov. Questions about COVID-19 guidance/screening criteria should be addressed to the State Epidemiologist or other responsible state or local public health officials in your state.

Effective Date: Immediately. This policy should be communicated with all survey and certification staff, their managers and the State/Regional Office training coordinators immediately.

FROM: Director
Quality, Safety & Oversight Group

SUBJECT: Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in nursing homes ***(REVISED)***

Memorandum Summary

- ***CMS is committed*** to taking critical steps to ensure America's health care facilities and clinical laboratories are prepared to respond to the threat of the COVID-19.
- **Guidance for Infection Control and Prevention of COVID-19 -** CMS is providing additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19*, including revised guidance for visitation*.
- **Coordination with the Centers for Disease Control (CDC) and local public health departments -** We encourage all nursing homes to monitor the CDC website for information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).
- *Following the Food and Drug Administration's (FDA) emergency use authorization (EUA) expanding the use of certain industrial respirators to health care personnel, CMS is clarifying that such use is appropriate in Medicare/Medicaid certified providers and suppliers.*

Background

CMS is responsible for ensuring the health and safety of nursing home residents by enforcing the standards required to help each resident attain or maintain their highest level of well-being. In light of the recent spread of COVID-19, we are providing additional guidance to nursing homes to help control and prevent the spread of the virus.

Guidance

Facility staff should regularly monitor the CDC website for information and resources (links below). They should contact their local health department if they have questions or suspect a resident of a nursing home has COVID-19. Per CDC, prompt detection, triage and isolation of

AMERICAN OVERSIGHT

potentially infectious residents are essential to prevent unnecessary exposures among residents, healthcare personnel, and visitors at the facility. Therefore, facilities should continue to be vigilant in identifying any possible infected individuals. Facilities should consider frequent monitoring for potential symptoms of respiratory infection as needed throughout the day. Furthermore, we encourage facilities to take advantage of resources that have been made available by CDC and CMS to train and prepare staff to improve infection control and prevention practices. Lastly, facilities should maintain a person-centered approach to care. This includes communicating effectively with residents, resident representatives and/or their family, and understanding their individual needs and goals of care.

Facilities experiencing an increased number of respiratory illnesses (regardless of suspected etiology) among patients/residents or healthcare personnel should immediately contact their local or state health department for further guidance.

In addition to the overarching regulations and guidance, we're providing the following information (Frequently Asked Questions) about some specific areas related to COVID-19:

Guidance for Limiting the Transmission of COVID-19 for Nursing Homes

How should facilities monitor or *restrict* visitors?
If visitors meet the criteria below, facilities may restrict their entry to the facility. Regulations and guidance related to restricting a resident's right to visitors can be found at 42 CFR §483.10(f)(4), and at F-tag 563 of Appendix PP of the State Operations Manual. Specifically, a facility may need to restrict or limit visitation rights for reasonable clinical and safety reasons. This includes, "restrictions placed to prevent community-associated infection or communicable disease transmission to the resident. A resident's risk factors for infection (e.g., chronic medical conditions) or current health state (e.g., end-of-life care) should be considered when restricting visitors. In general, visitors with signs and symptoms of a transmissible infection (e.g., a visitor is febrile and exhibiting signs and symptoms of an influenza-like illness) should defer visitation until he or she is no longer potentially infectious."

Facilities should *actively* screen *and restrict* visitation *by those who meet the following criteria*:

1. Signs or symptoms of a respiratory infection, such as fever, cough, shortness of breath, or sore throat.
2. *In the last 14 days*, has had contact with someone *with a confirmed diagnosis of COVID-19*, or under investigation for COVID-19, *or are ill with respiratory illness.*
3. International travel within the last 14 days to countries *with sustained community transmission*. For updated information on *affected* countries visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html
4. *Residing in a community where community-based spread of COVID-19 is occurring.*

For those individuals that do not meet the above criteria, facilities can allow entry but may require visitors to use Personal Protective Equipment (PPE) such as facemasks (see expanded guidance below).

Limiting visitors and individuals: Expanded recommendations:
CMS is providing the following expanded guidance to prevent the spread of COVID-19 (in addition to the information above about restricting visitors).

AMERICAN OVERSIGHT

- ***Restricting*** *means the individual should not be allowed in the facility at all, until they no longer meet the criteria above.*
- ***Limiting*** *means the individual should not be allowed to come into the facility, except for certain situations, such as end-of-life situations or when a visitor is essential for the resident's emotional well-being and care.*
- ***Discouraging*** *means that the facility allows normal visitation practices (except for those individuals meeting the restricted criteria), however the facility advises individuals to defer visitation until further notice (through signage, calls, etc.).*

1. *Limiting or Discouraging visitation:*
   a) ***Limiting:*** *For facilities that are in counties, or counties adjacent to other counties where a COVID-19 case has occurred, we recommend* ***limiting*** *visitation (except in certain situations as indicated above). For example, a daughter who visits her mother every Monday, would cease these visits, and limit her visits to only those situations when her mom has a significant issue. Also, during the visit, the daughter would limit her contact with her mother and only meet with her in her room or a place the facility has specifically dedicated for visits.*
   b) ***Discouraging:*** *For all other facilities (nationwide) not in those counties referenced above, we recommend* ***discouraging*** *visitation (except in certain situations). See below for methods to discourage visitation. Also see CDC guidance to "stay at home" https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/high-risk-complications.html#stay-home.*
2. *Facilities should increase visible signage at entrances/exist, offer temperature checks, increase availability to hand sanitizer, offer PPE for individuals entering the facility (if supply allows). Also, provide instruction, before visitors enter the facility and residents' rooms, on hand hygiene, limiting surfaces touched, and use of PPE according to current facility policy while in the resident's room. Individuals with fevers, other symptoms of COVID-19, or unable to demonstrate proper use of infection control techniques should be restricted from entry. Signage should also include language to discourage visits, such as recommending visitors defer their visit for another time or for a certain situation as mentioned above.*
3. *In addition to the screening visitors for the criteria for restricting access (above), facilities should ask visitors if they took any recent trips (within the last 14 days) on cruise ships or participated in other settings where crowds are confined to a common location. If so, facilities should suggest deferring their visit to a later date. If the visitor's entry is necessary, they should use PPE while onsite. If the facility does not have PPE, the facility should restrict the individual's visit, and ask them to come back at a later date (e.g., after a 14 days with no symptoms of COVID-19).*
4. *In cases when visitation is allowable, facilities should instruct visitors to limit their movement within the facility to the resident's room (e.g., reduce walking the halls, avoid going to dining room, etc.)*
5. *Facilities should review and revise how they interact with volunteers, vendors and receiving supplies, agency staff, EMS personnel and equipment, transportation providers (e.g., when taking residents to offsite appointments, etc.), other practitioners (e.g., hospice workers, specialists, physical therapy, etc.), and take necessary actions to prevent any potential transmission. For example, do not have supply vendors transport supplies inside the facility.*

AMERICAN OVERSIGHT

Have them dropped off at a dedicated location (e.g., loading dock). Facilities can allow entry of these visitors as long as they are following the appropriate CDC guidelines for Transmission-Based Precautions. For example, hospice workers can enter a facility when using PPE properly.

6. *In lieu of visits (either through limiting or discouraging), facilities can consider:*
    a) *Offering alternative means of communication for people who would otherwise visit, such as virtual communications (phone, video-communication, etc.).*
    b) *Creating/increasing listserv communication to update families, such as advising to not visit.*
    c) *Assigning staff as primary contact to families for inbound calls, and conduct regular outbound calls to keep families up to date.*
    d) *Offering a phone line with a voice recording updated at set times (e.g., daily) with the facility's general operating status, such as when it is safe to resume visits.*
7. *When visitation is necessary or allowable, facilities should make efforts to allow for safe visitation for residents and loved ones. For example:*
    a) *Suggest limiting physical contact with residents and others while in the facility. For example, practice social distances with no hand-shaking or hugging, and remaining six feet apart.*
    b) *If possible (e.g., pending design of building), creating dedicated visiting areas (e.g., "clean rooms") near the entrance to the facility where residents can meet with visitors in a sanitized environment. Facilities should disinfect rooms after each resident-visitor meeting.*
    c) *Residents still have the right to access the Ombudsman program. If in-person access is allowable, use the guidance mentioned above. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format) with the Ombudsman program or any other entity listed in 42 CFR § 483.10(f)(4)(i).*
8. *Visitor reporting:*
    a) *Advise exposed visitors (e.g., contact with COVID-19 resident prior to admission) to monitor for signs and symptoms of respiratory infection for at least 14 days after last known exposure and if ill to self-isolate at home and contact their healthcare provider.*
    b) *Advise visitors to report to the facility any signs and symptoms of COVID-19 or acute illness within 14 days after visiting the facility.*

How should facilities monitor or restrict health care facility staff?

The same screening performed for visitors should be performed for facility staff.

- Health care providers (HCP) who have signs and symptoms of a respiratory infection should not report to work.
- Any staff that develop signs and symptoms of a respiratory infection while on-the-job, should:
    - Immediately stop work, put on a facemask, and self-isolate at home;
    - Inform the facility's infection preventionist, and include information on individuals, equipment, and locations the person came in contact with; and
    - Contact and follow the local health department recommendations for next steps (e.g., testing).

AMERICAN OVERSIGHT

- Refer to the CDC guidance for exposures that might warrant restricting asymptomatic healthcare personnel from reporting to work (https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html).

Facilities should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).

When should nursing homes consider transferring a resident with suspected or confirmed infection with COVID-19 to a hospital?
Nursing homes with residents suspected of having COVID-19 infection should contact their local health department. Residents infected with COVID-19 may vary in severity from lack of symptoms to mild or severe symptoms or fatality. Initially, symptoms may be mild and not require transfer to a hospital as long as the facility can follow the infection prevention and control practices recommended by CDC. Facilities without an airborne infection isolation room (AIIR) are not required to transfer the resident assuming: 1) the resident does not require a higher level of care and 2) the facility can adhere to the rest of the infection prevention and control practices recommended for caring for a resident with COVID-19.

Please check the following link regularly for critical updates, such as updates to guidance for using PPE: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html.

The resident may develop more severe symptoms and require transfer to a hospital for a higher level of care. Prior to transfer, emergency medical services and the receiving facility should be alerted to the resident's diagnosis, and precautions to be taken including placing a facemask on the resident during transfer. If the resident does not require hospitalization they can be discharged to home (in consultation with state or local public health authorities) if deemed medically and socially appropriate. Pending transfer or discharge, place a facemask on the resident and isolate him/her in a room with the door closed.

When should a nursing home accept a resident who was diagnosed with COVID-19 from a hospital?
A nursing home can accept a resident diagnosed with COVID-19 and still under Transmission-Based Precautions for COVID-19 as long as the facility can follow CDC guidance for Transmission-Based Precautions. If a nursing home cannot, it must wait until these precautions are discontinued. CDC has released Interim Guidance for Discontinuing Transmission-Based Precautions or In-Home Isolation for Persons with Laboratory-confirmed COVID-19. Information on the duration of infectivity is limited, and the interim guidance has been developed with available information from similar coronaviruses. CDC states that decisions to discontinue Transmission-based Precautions in hospitals will be made on a case-by-case basis in consultation with clinicians, infection prevention and control specialists, and public health officials. Discontinuation will be based on multiple factors (see current CDC guidance for further details).

Note: Nursing homes should admit any individuals that they would normally admit to their facility, including individuals from hospitals where a case of COVID-19 was/is present. ***Also, if possible, dedicate a unit/wing exclusively for any residents coming or returning from the hospital. This can serve as a step-down unit where they remain for 14 days with no***

AMERICAN OVERSIGHT

symptoms (instead of integrating as usual on short-term rehab floor, or returning to long-stay original room).

Other considerations for facilities:

- Review CDC guidance for Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
- Increase the availability and accessibility of alcohol-based hand rubs (ABHRs), *reinforce strong hand-hygiene practices,* tissues, no touch receptacles for disposal, and facemasks at healthcare facility entrances, waiting rooms, resident check-ins, etc.
    - Ensure ABHR is accessible in all resident-care areas including inside and outside resident rooms.
- Increase signage for vigilant infection prevention, such as hand hygiene and cough etiquette.
- Properly clean, disinfect and limit sharing of medical equipment between residents and areas of the facility.
- Provide additional work supplies to avoid sharing (e.g., pens, pads) and disinfect workplace areas (nurse's stations, phones, internal radios, etc.).

Will nursing homes be cited for not having the appropriate supplies?

CMS is aware of that there is a scarcity of some supplies in certain areas of the country. State and Federal surveyors should not cite facilities for not having certain supplies (e.g., PPE such as gowns, N95 respirators, surgical masks and ABHR) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect facilities to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible. For example, if there is a shortage of ABHR, we expect staff to practice effective hand washing with soap and water. Similarly, if there is a shortage of PPE (e.g., due to supplier(s) shortage which may be a regional or national issue), the facility should contact the local and state public health agency to notify them of the shortage, follow national guidelines for optimizing their current supply, or identify the next best option to care for residents. If a surveyor believes a facility should be cited for not having or providing the necessary supplies, the state agency should contact the CMS Branch Office.

What other resources are available for facilities to help improve infection control and prevention?

CMS urges providers to take advantage of several resources that are available:

CDC Resources:

- Infection preventionist training: https://www.cdc.gov/longtermcare/index.html
- CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html
- CDC Updates: https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html
- CDC FAQ for COVID-19**:** https://www.cdc.gov/coronavirus/2019-ncov/infection-control/infection-prevention-control-faq.html
- *Information on affected US locations: https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html*

AMERICAN OVERSIGHT

B. Each State agency may suspend the provisions of any regulatory statute prescribing the procedures for conduct of state business or the orders or rules of that agency, if strict compliance with the provisions of any such statute, order, or rule would in any way prevent, hinder, or delay necessary action in coping with the emergency. This includes, but is not limited to, the authority to suspend any and all statutes, rules, ordinances, or orders which affect leasing, printing, purchasing, travel, and the condition of employment and the compensation of employees. For the purposes of this Executive Order, "necessary action in coping with the emergency" means any emergency mitigation, response, or recovery action: (1) prescribed in the State Comprehensive Emergency Management Plan ("CEMP"); or (2) ordered by the State Coordinating Officer. The requirements of sections 252.46 and 120.54, Florida Statutes, shall not apply to any such suspension issued by a State agency; however, no such suspension shall remain in effect beyond the expiration of this Executive Order, to include any extensions.

Subject: RE: FL request for CDC assistance
Date: Thursday, March 12, 2020 4:12:06 PM

Carina,
In response to your question about assessing risk level of contacts, below is the approach that we have been using. Please let me know if you have additional questions. When you have time, I'd be interested in following up on the questions about port workers.
Stephanie

How contacts are assessed: There is not a precise time-defined criteria for determining what is "prolonged" contact. Low risk is generally considered to be very brief interactions such as a brief greeting conversation, handshake, generally of less than 10 minutes. Medium risk exposures typically include those that include an interaction of 30 minutes or longer within 6 feet such as eating a meal together. Types of exposures that fall between are assessed on a case by case basis and take into consideration careful assessment of all aspects of the interaction including whether the case was symptomatic and how close the contact was to the case.

https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html

Close contact in the guidance above is defined as 1) being within approximately 6 feet of a COVID-19 case for a prolonged period of time; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case or 2) having direct contact with infectious secretions of a COVId-19 case (e.g. being coughed on).
Medium risk exposures include "Being on an aircraft, being seated within 6 feet of a traveler with symptomatic lab-confirmed COVID-19 infection…".
Low risk exposures include "Being in the same indoor environment as a person with symptomatic lab-confirmed COVID-19 for a prolonged period of time but not meeting the definition of close contact

Coronavirus: summary of persons being monitored, persons under investigation, and cases

Mar 18, 2020 at 5:08 PM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	2,327
Total persons of high, medium, or unknown risk	1,815
High/medium/unknown risk still being monitored	967

Persons under investigation (PUI): people who meet laboratory testing criteria based on symptoms and exposure

Total identified	2,800
Tested positive	328
Tested negative	1,332
Currently awaiting testing	1,140

Confirmed cases

Confirmed cases in Florida residents	299
Confirmed by BPHL/CDC	177
Positive by commercial/hospital lab	122
Characteristics of Florida resident cases	
Not exposed/infectious in Florida	6
Hospitalized	79
Deaths	8
Cases in non-Florida residents	29
Confirmed by BPHL/CDC	23
Positive by commercial/hospital lab	6
Total cases	328
Traveled	92
Contact with confirmed case	56
Traveled and contact with confirmed case	71
Neither	109
Travel is unknown*	67
Contact is unknown*	21
Contact is pending*	60

*Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

Coronavirus: additional surveillance information

Mar 18, 2020 at 5:08 PM

Data in this report are provisional and subject to change.

Statewide emergency department (ED) chief complaint and admission data

The daily percent of ED visits statewide that result in **cough-associated admissions** has increased over the past 2 weeks.

The daily percent of ED visits statewide that mention **cough** or **fever** (or both) has increased steadily over the past 2 weeks. **Shortness of breath** is stable and within expected levels for this time of year.

The daily percent of ED visits statewide that mention cough has been elevated for the past 2 weeks for all age groups, particularly **19-54 year olds.**

Broward County ED chief complaint and admission data

The daily percent of ED visits that result in **cough-associated admissions** in Broward County has increased over the past 2 weeks.

The daily percent of ED visits that mention **cough** or **fever** (or both) in Broward County has increased sharply the past 2 weeks. **Shortness of breath** is stable and within expected levels for this time of year.

The Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE-FL) includes chief complaint data from 215 of 216 Florida EDs. Data are transmitted electronically to ESSENCE-FL daily or hourly.

Date:	Wednesday, March 18, 2020 6:41:18 AM

I saw an email from Eleni this morning - the charter departed 0300 local fr Chile and ETA Miami is between 1200-1300 EDT. I asked whether coordinations had been completed with state of FL and DHS, but have not heard back yet.

Subject: RE: Florida Cruise Ship Summary 3.17.20 4 pm

Hi Mr. McGough,
I wanted to update you about the situation with Royal Caribbean and the flights from Chile and Brazil

1. There has been no movement on any flights from Brazil
2. AT 6:30 PM EST, Ms. Kalisch from Royal Caribbean emailed us to tell us that the Government of Chile had put a hold on their flights
3. At around 6:44 PM, I received a call from Dr. Rivkees, the Florida Surgeon General who told me that the Governor was not going to allow any flights to land and disembark passengers in Miami until there was a solid plan articulated by the Cruise company.
4. Right after that call we notified the State Department and copied DHS. We also notified Eleni Kalisch and told her to contact the State of Florida to coordinate a plan(we gave her the relevant phone numbers)
5. At approximately 7:30 Eleni Kalisch emailed that the flight from Chile was going to proceed, but she never responded about contacting Florida state or local authorities despite multiple emails from CDC telling her to do so
6. At 10:07 she told us that the flight would be departing Chile at 12:10 AM local time and arriving in Miami at 9:10 AM EST

Attached is the last email chain starting at 10:20 when Eleni told us there is a slight change of plans which states that CDC will be screening her passengers. We have told her multiple times that CDC will not be screening passengers. We asked her to contact us by phone right away (11PM), but she has not done so. We believe that the flight may have already departed and we are concerned that

AMERICAN OVERSIGHT

no one has signed off on this from Florida and that a clear and reasonable plan has not been sent any of us.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

Dear Eleni,
Please clarify your request and the plan – which passengers are you referring to? The air ambulance passengers or the ones who are not ill and are coming in the larger charter?

As I wrote earlier, CDC will not be conducting any health screening. For the passengers who are not arriving by air ambulance, CBP/CWMD would screen the passengers based on their own protocol. CDC Quarantine Station staff will be available to respond to any illness events, as requested by CBP.

For the air ambulance, they need assessment – I understood that you have made arrangements with Dr. Barth Green/University of Miami, who is not affiliated with CDC. He/his team would make an assessment of those 6 individuals.

Michelle –

Slight change of plans. Upon arrival at MIA, Royal Caribbean will now be arranging individual charter flights for the passengers who are cleared by CDC to return to their home cities/states.

Our team has asked that CDC provide something in writing tomorrow that we can provide to the charter companies indicating that the passenger(s) boarding the charter flights have been cleared to fly commercially. We do not want the charters to deny boarding to these passengers simply because they have arrived in MIA from a cruise ship.

Thanks,

Eleni

Sorry - now with Eleni from RC. Again, due-outs are:

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

All -

Thank you for joining the call today. Leah - I don't believe I have everyone from CDC who was on the call, including Rachel - please add if that's the case.

I've listed the do-outs that I'm tracking below, and this chain can serve as the new, smaller group of folks working on the Brazil/Chile RC ships.

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 25 new positive cases of coronavirus disease (COVID-19) in Florida and the death of a Florida resident in California. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 68-year old female Orange County resident tested positive for COVID-19. This test was performed in California following travel to Asia. This person is deceased.
- A 41-year old male in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 54-year old male in Osceola County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 51-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 67-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 62-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is not a travel related case.
- A 29-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with close contact with a traveler.
- A 69-year old male, non-Florida resident visiting from Europe tested positive for COVID-19 in Alachua County.
- A 59-year old female in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 65-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with domestic travel.
- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 77-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated

AMERICAN OVERSIGHT

until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 59-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 39-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 83-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 41-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 22-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 19-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Europe.
- A 58-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 43-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department or health care provider.
- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

COVID-19 Cases

AMERICAN OVERSIGHT

Chart

AMERICAN OVERSIGHT

Chart part 2

**Definition of travel-related: A known history of exposure to COVID-19 outside of the state.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

AMERICAN OVERSIGHT

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

Subject: RE: Follow-up -

Carina – sorry about the delay in getting back to you – been a fairly hectic day. A couple of things –

On asymptomatic infection – there is an increasing literature on the potential role of asymptomatic infection in transmission of the virus. I'm attaching three papers that address this topic – not necessarily the best, but I had them handy. Bottom line – asymptomatic infection occurs, and clearly can play a role in the transmission cycle (and in contact tracing).

With regard to surveillance – am attaching a "one pager" from Ira Longini's modeling group here at UF. Point three deals with surveillance – and I think this is the way to go. We're doing that here – we're starting to enroll everyone who comes to the Shands ED with reports/concerns about exposure in our IRB-approved research study, and are then screening them for COVID-19. If we could set up similar studies/ongoing sample collection in ED's in key cities in Florida, we could get at least a feel for the extent of infection in various communities. Would probably need your help in setting things up, but we could work with you to make the contacts with ED directors at key centers. Key would be getting IRB approval on a rapid basis for a state-wide study – which is really where we would really need your help. However, should be possible to expedite it as a "minimal risk" study. And then there is the cost – we can get things going, but at some point would need help in covering costs of running the study. Let me know what you think –

Regards!

Subject: RE: Follow-up -

[External Email]
OK. We discussed this internally today and there are a few things we would love to have your help assessing:

1. Understand the role of asymptomatic infection-what article were you referring to the other day. I have not found it. Nor do I see asymptomatic transmission as something highly relevant from someone else.
2. Clarify transmission dynamics (environmental/droplet/ aerosol etc)
3. Detailed clinical abstraction/risk factor analysis of cases
4. Sentinel surveillance of outpatient providers
5. School based surveillance

One concern I have is the timing. We need strategic sentinel surveillance stood up very soon. I am not sure we have time to wait for modeling data, nor am I sure it will be very helpful. Our population is so mobile so my preference would be to pursue the type of structured, focused, and systematic surveillance effort you are proposing across the state.

Subject: Follow-up -

Just to provide a follow-up to our discussion from yesterday – I met today with Ira Longini and our modeling team. They should have a strategy for screening/surveillance by the end of the day tomorrow. They are in the process of applying several different models to the Florida situation, and should have something together that can be used for predicting severity and duration within the next week or two. Will keep you posted as things progress.

Regards!

Good morning Dr. Roberson,

In our meeting earlier this week, you indicated that the state lab in Jacksonville could handle any COVID-19 testing needs we might have from our University Health Center. I have copied our Health Center Director, Dr. Amy Magnuson. Please let us know the appropriate protocol to get future specimens to Jacksonville for testing.

Thank you in advance,
Renisha Gibbs

Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease 2019 (COVID-19)

Version 4 | March 10, 2020

The Florida Department of Health (Department) is prioritizing testing of symptomatic individuals who had close contact[1,2] with a laboratory-confirmed[3] COVID-19 case, are part of an outbreak, or have unexplained respiratory illness. The Department recommends other individuals be tested at a commercial laboratory (e.g., LabCorp and Quest). For all persons under investigation for COVID-19, take the following precautions:

- Ask the patient to wear a surgical mask.
- Evaluate the patient in a private room with the door closed, ideally an airborne isolation room, if available.
- Initiate contact and airborne precautions, including use of eye protection (e.g., goggles or a face shield) for all health care professionals and other staff entering the room.

A. Person had **close contact**[1,2] with a laboratory-confirmed[3] COVID-19 case and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

B. Person is part of a non-household outbreak of suspected COVID-19.

C. Person hospitalized with **unexplained respiratory illness or person who died from unexplained respiratory illness.**

→ **This patient meets the criteria for testing at the Florida Department of Health Bureau of Public Health Laboratories.** The Florida Department of Health asks that you **immediately** notify both infection control personnel at your health care facility and your county health department (**FloridaHealth.gov/CHDEpiContact**).

D. Person traveled to or from an affected geographic area[5] with wide-spread community transmission and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

E. Person had community contact (e.g., attended the same gathering or stayed on the same cruise ship) with a laboratory-confirmed[3] COVID-19 case and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

F. Person is age ≥65 years, has chronic medical conditions, or is in an immunocompromised state and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

→ This patient does not meet the criteria for testing at the Florida Department of Health. **Consider testing at a commercial laboratory.**

[1]Close contact is defined as a) being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case– or –b) having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on) If such contact occurs while not wearing recommended personal protective equipment (PPE) (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection), criteria for PUI consideration are met. Data to inform the definition of close contact are limited. Considerations when assessing close contact include the duration of exposure (e.g., longer exposure time likely increases exposure risk) and the clinical symptoms of the person with COVID-19 (e.g., coughing likely increases exposure risk as does exposure to a severely ill patient). Special consideration should be given to healthcare personnel exposed in healthcare settings.

[2]For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation. Because of their often extensive and close contact with vulnerable patients in healthcare settings, even mild signs and symptoms (e.g., sore throat) of COVID-19 should be evaluated among potentially exposed healthcare personnel.

[3]Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for patients in other countries.

[4]Fever may be subjective or confirmed.

[5]Affected areas are defined as geographic regions where sustained community transmission has been identified. For a list of relevant affected areas, see Coronavirus Disease 2019 Information for Travel (https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html)

Good evening Scott,

Please see the questions below from Pediatric Associates, a very large group of pediatric practices in South Florida, about the Provider Algorithm that we have shared with all of our licensed healthcare providers along with the guidance we have been providing on an ongoing basis. They have asked for clarification of the algorithm and answers to their other questions before a media interview tomorrow. With regard to his need for swabs and PPE, that can be requested through the resource request process through the Health Care Coalition that was released today. I spoke to Carina and she said you would be the best person to call their CEO C. Rocky Slonaker, MD, CPCO, FAAP Chief Medical Officer / Corporate Compliance Officer and address his concerns. His contact information is below. Thank you so much.

Meredith, Please pass these questions along to Renee:

Algorithm Sent on 3/10:

It is suggest that patients meeting criteria A-D be referred to the Health Dept. When we refer those patients, only a portion is being tested (most are not in our limited experience). I called the nurses myself and they stated they are only testing patients:
1. With Symptoms and Close Contact COVID-19
or
2. With Symptoms and Travel to affected geographic area

She said they are not testing same gathering (not close contact); not testing on a cruise ship with a positive case, not testing anyone who is NOT symptomatic. MUST HAVE SYMPTOMS ALWAYS

The algorithm suggests community contact with COVID-19 and symptoms, or > 65, chronic medical condition, or

AMERICAN OVERSIGHT

immunocompromised AND symptoms: Come to office and consider testing at commercial lab.

Patients and media have picked up on this. Those last two categories are problematic depending on how you define "Confirmed" COVID-19 and how you define Chronic Medical Condition.

Questions:
1. What is the definition of "PART OF AN OUTBREAK OF SUSPECTED COVID-19" as you define it to test it?
a. Is a princess cruise contact part of an outbreak?
b. Is returned from Westchester, NY prior to quarantine part of a suspected outbreak?
i. We need to understand so we don't send someone to the CHD only to have them referred back to us.
2. Fever: Is it truly allowed to be subjective?
a. This is very common in PEDS
3. Confirmed Case: Is this based on the parent/patients description or would the CHD validate for us?

4. Quest has 5 swabs per office / LabCorp has 3 swabs per office and cannot tell us how often they will replenish.

a. Any advice on who we test since the CHRONIC MEDICAL CONDITION and/or allowing a non-validated report of CONFIRMED CASE ? is about 15-20% of our sick visits right now. I would literally use all 5 swabs within 2-3 hours of one morning.
b. Any better definition of CHRONIC MEDICAL CONDITION
i. We have seen the CDC use SEVERE UNDERLYING HEALTH CONDITION but don't want to create a sub-algorithm.
5. Assuming we get more SWABS at some point, but we are running out of PPE and already do not have enough N-95:
a. You agree we cannot perform the high risk procedure of testing if we have no one fit tested for N-95?

The local hospitals are testing, but they are saying only inpatient or severely compromised coming through the ER. We do not have enough supplies to possibly test everyone who meets the algorithm criteria.
Will you be providing a more detailed algorithm given the allocation challenges with SWABS and PPE ? or do you expect clinicians to create their own algorithm when supplies are limited?

Thank you ? Sincerely ? for taking the time to answer as I have 200+ clinicians who are very frustrated that so many patients identify as qualifying, there isn't enough tests, there isn't enough N-95, and the algorithm is so non-specific as it relates to Pediatrics. We are struggling with guiding them on who to triage further and who to choose to test.

Sent: Thursday, March 12, 2020 8:51 PM
To: Satter, Jonathan <Jonathan.Satter@dms.myflorida.com>
Subject: IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

AMERICAN OVERSIGHT

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have

Subject: IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available

AMERICAN OVERSIGHT

sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Subject: Info on COVID-19

Good Morning Mayor

Hope this email finds you well. As promised, please find below the CDC recommendations for preventing the spread of Coronavirus Disease 2019 in Homes. I also included the link for your information.

https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-prevent-spread.html#precautions

As discussed, please follow these recommendations. I would add to stay stress free, get plenty of rest, eat well and exercise as tolerated. As you know 80% of people who are infected with the virus have mild symptoms, it is important that you take good care of yourself. You also need to stay in isolation separate yourself from other people and animals in your home. One of our senior staff will contact you daily through phone to check on your health status until the end of the 14 days. It is important as well that you monitor your health, if you develop any symptoms such as fever, cough, or shortness of breath, please contact your health care provider as soon as you can and let him know about your symptoms.

AMERICAN OVERSIGHT

The Department will continue to monitor your health. We want to ensure you stay healthy until the end of the 14 day period.

If you have any questions, please do not hesitate to contact us.

Best of Luck, Mr. Mayor.

Kindest regards,

Coronavirus Disease 2019 (COVID-19)

Preventing the Spread of Coronavirus Disease 2019 in Homes and Residential Communities

Interim Guidance

Update: February 14, 2020

(This guidance provides clarification regarding evaluation for home isolation and a new section with information regarding preventative steps for household members, intimate partners, and caregivers in a nonhealthcare setting of a person with symptomatic, laboratory-confirmed COVID-19.)

This interim guidance is based on what is currently known about the epidemiology of COVID-19 and the transmission of other viral respiratory diseases. CDC will update this interim guidance as needed and as additional information becomes available.

Coronaviruses are a large family of viruses, some causing illness in people and others that circulate among animals, including camels, cats, and bats. Rarely, animal coronaviruses can infect people exposed to infected animals, and then spread among people, as has been seen with MERS-CoV and SARS-CoV, and likely now with SARS-CoV-2, the virus that causes COVID-19. This interim guidance may help prevent this virus from spreading among people in their homes and in other residential communities.

This interim guidance is intended for:

- People with confirmed or suspected COVID-19, including persons under investigation, who do not need to be hospitalized and who can receive care at home

AMERICAN OVERSIGHT

(see Interim Guidance for Implementing Home Care of People Not Requiring Hospitalization for Coronavirus Disease 2019 (COVID-19));

- People with confirmed COVID-19, who were hospitalized and then determined to be medically stable to go home (see Interim Guidance for Implementing Home Care of People Not Requiring Hospitalization for Coronavirus Disease 2019 (COVID-19));
- Household members, intimate partners, and caregivers in a nonhealthcare setting of a person with symptomatic, laboratory-confirmed COVID-19.

Prevention steps for

People with confirmed or suspected COVID-19 (including persons under investigation) who do not need to be hospitalized

and

People with confirmed COVID-19 who were hospitalized and determined to be medically stable to go home

Your healthcare provider and public health staff will evaluate whether you can be cared for at home. If it is determined that you do not need to be hospitalized and can be isolated at home, you will be monitored by staff from your local or state health department. You should follow the prevention steps below until a healthcare provider or local or state health department says you can return to your normal activities.

Stay home except to get medical care

People who are mildly ill with COVID-19 are able to isolate at home during their illness. You should restrict activities outside your home, except for getting medical care. Do not go to work, school, or public areas. Avoid using public transportation, ride-sharing, or taxis.

Separate yourself from other people and animals in your home

People: As much as possible, you should stay in a specific room and away from other people in your home. Also, you should use a separate bathroom, if available.

Animals: You should restrict contact with pets and other animals while you are sick with COVID-19, just like you would around other people. Although there have not been reports of pets or other animals becoming sick with COVID-19, it is still recommended that people sick with COVID-19 limit contact with animals until more information is known about the virus. When possible, have another member of your household care for

AMERICAN OVERSIGHT

your animals while you are sick. If you are sick with COVID-19, avoid contact with your pet, including petting, snuggling, being kissed or licked, and sharing food. If you must care for your pet or be around animals while you are sick, wash your hands before and after you interact with pets and wear a facemask. See COVID-19 and Animals for more information.

Call ahead before visiting your doctor

If you have a medical appointment, call the healthcare provider and tell them that you have or may have COVID-19. This will help the healthcare provider's office take steps to keep other people from getting infected or exposed.

Wear a facemask

You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) or pets and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then people who live with you should not stay in the same room with you, or they should wear a facemask if they enter your room.

Cover your coughs and sneezes

Cover your mouth and nose with a tissue when you cough or sneeze. Throw used tissues in a lined trash can. Immediately wash your hands with soap and water for at least 20 seconds or, if soap and water are not available, clean your hands with an alcohol-based hand sanitizer that contains at least 60% alcohol.

Clean your hands often

Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing, or sneezing; going to the bathroom; and before eating or preparing food. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry.

Soap and water are the best option if hands are visibly dirty. Avoid touching your eyes, nose, and mouth with unwashed hands.

Avoid sharing personal household items

You should not share dishes, drinking glasses, cups, eating utensils, towels, or bedding with other people or pets in your home. After using these items, they should be washed thoroughly with soap and water.

AMERICAN OVERSIGHT

Clean all “high-touch” surfaces everyday

High touch surfaces include counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables. Also, clean any surfaces that may have blood, stool, or body fluids on them. Use a household cleaning spray or wipe, according to the label instructions. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.

Monitor your symptoms

Seek prompt medical attention if your illness is worsening (e.g., difficulty breathing). **Before** seeking care, call your healthcare provider and tell them that you have, or are being evaluated for, COVID-19. Put on a facemask before you enter the facility. These steps will help the healthcare provider’s office to keep other people in the office or waiting room from getting infected or exposed. Ask your healthcare provider to call the local or state health department. Persons who are placed under active monitoring or facilitated self-monitoring should follow instructions provided by their local health department or occupational health professionals, as appropriate. When working with your local health department check their available hours.

If you have a medical emergency and need to call 911, notify the dispatch personnel that you have, or are being evaluated for COVID-19. If possible, put on a facemask before emergency medical services arrive.

Discontinuing home isolation

Patients with confirmed COVID-19 should remain under home isolation precautions until the risk of secondary transmission to others is thought to be low. The decision to discontinue home isolation precautions should be made on a case-by-case basis, in consultation with healthcare providers and state and local health departments.

Recommended precautions for household members, intimate partners, and caregivers in a nonhealthcare setting[1] of

A patient with symptomatic laboratory-confirmed COVID-19

or

AMERICAN OVERSIGHT

A patient under investigation

Household members, intimate partners, and caregivers in a nonhealthcare setting may have close contact[2] with a person with symptomatic, laboratory-confirmed COVID-19 or a person under investigation. Close contacts should monitor their health; they should call their healthcare provider right away if they develop symptoms suggestive of COVID-19 (e.g., fever, cough, shortness of breath) (see Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential Coronavirus Disease 2019 (COVID-19) Exposure in Travel-associated or Community Settings.)

Close contacts should also follow these recommendations:

- Make sure that you understand and can help the patient follow their healthcare provider's instructions for medication(s) and care. You should help the patient with basic needs in the home and provide support for getting groceries, prescriptions, and other personal needs.
- Monitor the patient's symptoms. If the patient is getting sicker, call his or her healthcare provider and tell them that the patient has laboratory-confirmed COVID-19. This will help the healthcare provider's office take steps to keep other people in the office or waiting room from getting infected. Ask the healthcare provider to call the local or state health department for additional guidance. If the patient has a medical emergency and you need to call 911, notify the dispatch personnel that the patient has, or is being evaluated for COVID-19.
- Household members should stay in another room or be separated from the patient as much as possible. Household members should use a separate bedroom and bathroom, if available.
- Prohibit visitors who do not have an essential need to be in the home.
- Household members should care for any pets in the home. Do not handle pets or other animals while sick. For more information, see COVID-19 and Animals.
- Make sure that shared spaces in the home have good air flow, such as by an air conditioner or an opened window, weather permitting.
- Perform hand hygiene frequently. Wash your hands often with soap and water for at least 20 seconds or use an alcohol-based hand sanitizer that contains 60 to 95% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry. Soap and water should be used preferentially if hands are visibly dirty.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- The patient should wear a facemask when you are around other people. If the patient is not able to wear a facemask (for example, because it causes trouble breathing), you, as the caregiver, should wear a mask when you are in the same room as the patient.
- Wear a disposable facemask and gloves when you touch or have contact with the patient's blood, stool, or body fluids, such as saliva, sputum, nasal mucus, vomit,

AMERICAN OVERSIGHT

urine.

  - Throw out disposable facemasks and gloves after using them. Do not reuse.
  - When removing personal protective equipment, first remove and dispose of gloves. Then, immediately clean your hands with soap and water or alcohol-based hand sanitizer. Next, remove and dispose of facemask, and immediately clean your hands again with soap and water or alcohol-based hand sanitizer.

- Avoid sharing household items with the patient. You should not share dishes, drinking glasses, cups, eating utensils, towels, bedding, or other items. After the patient uses these items, you should wash them thoroughly (see below "Wash laundry thoroughly").
- Clean all "high-touch" surfaces, such as counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables, every day. Also, clean any surfaces that may have blood, stool, or body fluids on them.
  - Use a household cleaning spray or wipe, according to the label instructions. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.
- Wash laundry thoroughly.
  - Immediately remove and wash clothes or bedding that have blood, stool, or body fluids on them.
  - Wear disposable gloves while handling soiled items and keep soiled items away from your body. Clean your hands (with soap and water or an alcohol-based hand sanitizer) immediately after removing your gloves.
  - Read and follow directions on labels of laundry or clothing items and detergent. In general, using a normal laundry detergent according to washing machine instructions and dry thoroughly using the warmest temperatures recommended on the clothing label.
- Place all used disposable gloves, facemasks, and other contaminated items in a lined container before disposing of them with other household waste. Clean your hands (with soap and water or an alcohol-based hand sanitizer) immediately after handling these items. Soap and water should be used preferentially if hands are visibly dirty.
- Discuss any additional questions with your state or local health department or healthcare provider. Check available hours when contacting your local health department.

Press Advisory – President Donald J. Trump Directs FEMA Support Under Emergency Declaration for COVID-19 (PRESIDENTIAL PROCLAMATION HERE)
The federal government continues to take aggressive and proactive steps to address the COVID-19 threat as the health and safety of the American people remain a top priority. Today, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207 (the "Stafford Act"). This increases federal support to the Department of Health and Human Services (HHS) in its role as the lead federal agency for the ongoing COVID-19 pandemic response. As a result of the President's decisive, unprecedented action, FEMA is directed to assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public. Today's declaration does not make direct financial assistance available to individuals.

The emergency declaration does not change measures authorized under other federal statutes and HHS remains the lead federal agency directing the federal response to COVID-19. FEMA actions will be in support of HHS and in coordination with state, tribal and territorial governments. Eligible emergency protective measures taken at the direction or guidance of public health officials in response to this emergency, and not supported by the authorities of another federal agency, will be reimbursed strictly under the FEMA Public Assistance program. FEMA assistance will be provided at a 75 percent Federal cost share. Reimbursable activities typically include emergency protective measures such as the activation of State Emergency Operations Centers, National Guard costs, law enforcement and other measures necessary to protect public health and safety.

Presidential Message to the Congress on Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak (March 13, 2020) (PRESIDENTIAL MESSAGE HERE)
"Pursuant to section 201 of the National Emergencies Act (50 U.S.C. 1621), I hereby report that I have exercised my authority to declare that the outbreak of coronavirus disease (COVID-19) in the United States constitutes a national emergency. This declaration invokes section 1135 of the Social Security Act, 42 U.S.C. 1320b–5, to allow the Secretary of Health and Human Services to exercise the authority under that section to temporarily waive or modify certain requirements of the Medicare, Medicaid, and State Children's Health Insurance programs and of the Health Insurance Portability and Accountability Act Privacy Rule throughout the duration of the public health emergency declared in response to the COVID-19 outbreak."

Memorandum on Expanding State-Approved Diagnostic Tests (FULL MEMORANDUM HERE)
"By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows: It is the policy of the United States to take proactive measures to prepare for and respond to public health threats, including the public health emergency involving Coronavirus Disease 2019 (COVID-19), which was declared by the Secretary of Health and Human Services (the "Secretary") on January 31, 2020, pursuant to section 319 of the Public Health Service Act (42 U.S.C. 247d). Our response must include heightened coordination among Federal, State, local, and tribal agencies, and we must offer States the flexibility they need to care for their citizens. In accordance with this principle, the Food and Drug Administration, in coordination with the State of New

AMERICAN OVERSIGHT

York, allowed the State flexibility in expediting State-approved COVID-19 testing. Should additional States request flexibility to authorize laboratories within the State to develop and perform tests used to detect COVID-19, the Secretary shall take appropriate action, consistent with law, to facilitate the request."

Below, please find additional information. The White House Office of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office directly if we can be of assistance.

Sincerely,
Nic

COVID-19: Background & Additional Information

Background

Under the leadership of President Trump and Vice President Pence, the full weight of the U.S. Government is working to protect the health and safety of the American people. Since the beginning of the outbreak, President Trump has taken unprecedented steps – including prudent travel restrictions and an early containment strategy – to protect the health of Americans in response to the coronavirus. In January, the President formed a Coronavirus Task Force, led by Vice President Mike Pence and comprised of subject-matter experts, to organize a whole-of-government response (**President Donald J. Trump Has Taken Unprecedented Steps to Respond To the Coronavirus and Protect the Health and Safety of Americans**). The Coronavirus Task Force and broader Administration have and will continue to work with State-Local-Tribal officials and private sector and non-profit partners in preparing for and responding to the Coronavirus. ***It is important to note that at this time, the risk to the average American remains low. All agencies are working aggressively to monitor this continuously evolving situation and to keep our partners and the public informed***.

Good Day Paul and Kara,

Thank you kindly for reaching out today.

As per telephonic guidance received the evening of 12 March 2020 from Alberto Moscoso and team at Florida Department of Health, as well as Cindy Friedman and Paul Weidle from US CDC, it was recommended that an email notification to be sent to individuals with travel history aboard Sky Princess voyage A [22-29 February 2020] and voyage B [29 February – 7 March]. Attached are the email notifications sent on 13 March 2020.

Thanks,

I would add the HCW screening criteria.

1. Temperature checks and other risk factor assessment (questionnaire) of employees prior to shift beginning
2. COVID-19 sample collection of all symptomatic employees and residents.

We would like to share these criteria with all LTCFs in FL via multiple channels as soon as possible.

Case definition of events for immediate reporting to county health departments by long term care facilities (skilled nursing facilities, assisted living facilities, independent living facilities)

Please report any instances of the following:

1. A laboratory confirmed case of COVID-19 among a staff member or resident of the facility; *(note: DOH will likely already be aware of this via ELR)*
2. A facility resident or staff member determined to be a close contact of a laboratory confirmed case of COVID-19. *Note: close contact is household member or someone in close proximity (<6 feet) for more than 10 minutes.*
3. Any clusters of 3 or more residents/staff identified within a 72 hour period, with influenza like illness (ILI), pneumonia, or severe respiratory illness requiring further evaluation.
4. Any deaths among residents/staff due to respiratory illness.

Epi data for Miami Dade report

- I would include the basic epi data in the screenshot below. for age we can do 5 year age ranges or whatever y'all think is best. If there is other epi data you would like to show, go for it (rate per 100,000, symptoms, hospitalizations, deaths, etc).
- Include syndromic data however you would like to show it (table, chart, etc.)

We can build on this report if it needs to be produced daily. They will also let us know if we need to add more.

I know the direction is not great, but I appreciate the work on this. These requests come in one on top of the other without warning. We are working to get extra staffing to help ease the burden.

Subject: RE: Map
Date: Saturday, March 14, 2020 1:26:22 PM

Okay we fixed our technical problem and are now caught up on cases. I had taken out repatriated cases to match the line list that's posted on our website, but I am fine adding them back in. So including those, we are up to 77 FL cases in the file at the moment. So I think we should go ahead and update the map for today.

The sit report is not using Merlin data, and some of their data don't match ours. I have focused on just making sure we have the right counts in Merlin, but when I tried to reconcile the line list data in Merlin with what's posted online, we had quite a few discrepancies. We should be moving towards using Merlin data rather than using emails to count cases and manage case updates, especially if we want to update a map every few hours.

I would definitely prefer to just update directly from Merlin on a set schedule. But that's definitely a question for Carina!

Thanks for your patience and for trying to help us get organized!

Subject: RE: Map

Leah,

Thanks for looking into this.

Just an FYI, I've noticed this problem across several states so it's not just us, but the JHU map seems to be refreshing at a much more frequent interval, and likely from a direct CDC/WHO source. It currently says Florida has 74 cases. Our Map Data file says we have 68. I don't know if those are the repatriated cases or not, but we should probably include even those in our county counts so we don't look like we're under-reporting. I know the Sit Report for today said Broward has 20 cases, and the Map Data still says Broward has 18, so it may still just be the issue you're working on.

Why don't we set up a four-hour refresh interval? 8 am (post press conference so I'll begin uploading it then), 12 pm, 4 pm, 8 pm? If we're weary about a live feed, that ought to allow us to be transparent with the information while ensuring no inaccurate or flagged data is being uploaded.

Databases can be a real pain in the butt, I know. I don't mean to pester or seem impatient, just want to make sure I'm

AMERICAN OVERSIGHT

doing the best I can do with the information we have.

Thanks!

Subject: RE: Map

Hey all –

I'm checking in to make sure the Map Data file is being updated on a daily schedule. Our sit report for today shows a lot more cases than what's in the map file. I know sometimes we schedule updates through Merlin and it defaults to Monday-Friday, so I wanted to check to see if it's running on weekends.

I also think, for the sake of transparency, we should schedule the update more regularly throughout the day. It might look bad if our map is saying there's only 55 cases, but we're distributing documentation to our response team that says 80 or more. I know there's currently an approval process in place, but as this continues to grow rapidly, it may not be feasible to wait for individual review of each case at 7 am. Plus, it's an inconvenient time to be making the updates for our users right at the start of the day when everyone is using the map feed while I'm working on it.

I trust you guys that the data's accurate. I can hold off on publication in the morning from the previous night's numbers, but I'm getting questions about why our map says 55 but the sit report says 80+ and want to make sure we're all on the same page.

Is it possible for us to go with the code Leah and Lin worked out? I wrote a script to get the data into proper format, concat, collapse, etc, push to server, append to web layers, so we can keep the exact same format that's being outputted now and I won't have to change my code, ha.

All,

After talking to Craig about the process Dr. Blackmore described, the best we can do for a public map is the data that's posted on the webpage, which is officially the last publicly-released count.

We can do a live count, but that would need be an internal map with additional security measures. I have just about finished up the static numbers map, but if we are told to get the live county, I can easily switch it over to our internal servers.

Subject: RE: Map

It's probably at least partially when we got confirmatory lab results and the person becomes a confirmed case (though they confirm several at a time, so we can't really replicate the exact order they are using). Whatever the order is, it doesn't seem to be a system date so that we could reproduce the order consistently. I included an updated query below that uses the date/time a case was confirmed, but it still doesn't exactly match the order on the website currently.

I talked to Dr. Blackmore and she said the order doesn't matter, so I don't think we need to worry too much about it. However, she did say that we need to stay in sync with the data we are reporting to leadership, which happens once a day

AMERICAN OVERSIGHT

around 7:30 am. However, it's possible that as we are reconciling data while producing the report, the numbers/data will change during that timeframe, so it's not as easy as set a job to run at a certain time. What do you think is the best approach here so that we stay in sync? Could I just provide a daily file or something that has the correct data? Or is there a better way?

Thanks so much for the quick assistance!
Leah

Subject: RE: Map

Thomas,

In order for this data to updated/maintained on a schedule (not static), even though it is all public information, we need the official OK from either Dr. Blackmore or Scott Pritchard to proceed. A simple email reply saying "OK" will be fine. I have the map ready to go for whenever we receive the OK.

Our database manager was told not to do anything unless she receives a mission request, but the ESF8 incident commander leader has refused to submit mission requests for GIS work, and response work in general. I have filed a complaint about this with her supervising officer, but I would not expect it to change any time soon.

For now, I'll build the map with static data. Keep in mind, this data won't be changed as new cases come in unless we receive authorization for our database admin to allow it.

Sorry for the bureaucratic hiccup. It's been a strange week.

Dear NPHIC Members:

Media Statement

For Immediate Release
Wednesday, February 26, 2020

Contact: CDC Media Relations
(404) 639-3286

CDC Confirms Possible Instance of Community Spread of COVID-19 in U.S.

The Centers for Disease Control and Prevention (CDC) has confirmed an infection with the virus that causes COVID-19 in California in a person who reportedly did not have relevant travel history or exposure to another known patient with COVID-19.

At this time, the patient's exposure is unknown. It's possible this could be an instance of community spread of COVID-19, which would be the first time this has happened in the United States. Community spread means spread of an illness for which the source of infection is unknown. It's also possible, however, that the patient may have been exposed to a returned traveler who was infected.

AMERICAN OVERSIGHT

This case was detected through the U.S. public health system — picked up by astute clinicians. This brings the total number of COVID-19 cases in the United States to 15.

The federal government has been working closely with state, local, tribal, and territorial partners, as well as public health partners, to respond to this public health threat. Unprecedented, aggressive efforts have been taken to contain the spread and mitigate the impact of this virus.

This is a rapidly evolving situation. CDC will continue to update the public as circumstances warrant. For more information about COVID-19 visit www.cdc.gov/covid19.

I have received multiple calls from Candy Luciano-Green (Escambia chd). There is concern from passengers who were on the Carnival Valor cruise 2/29 – 3/5 (left out of New Orleans).
Here's a youtube on it for anyone who is interested in the Columbus, OH confirmed case who was on the ship.

https://www.youtube.com/watch?v=W8Quj6GIZA8

Here is the text from Candy's emails.

Received a call from a Santa Rosa resident she stated she was on the Carnival Ship Valor out of New Orleans, to Cozumel Mexico, and Progresso in the Yucatan. February 29/- March 5th. Her name is Liz McNeil at 636-352-9569, she states that their were eight members from her family who went who all live in other states they are all ill. She stated her husband was not on the cruise. She stated the day she got off the ship , she had a sore throat, since then maybe one night she had chills and did not take her temp. She says she typically walks the beach but has been too weak and tired. Her husband presented with similar symptoms two days ago which would be around 3/12/2020. She reports that she has not gone for medical care. She has not been notified by the cruise ship , nor the cdc. But there is some videos, and media, stating that a man from Columbus Ohio tested positive from that cruise since his return. Also, she heard two crew members are ill and being tested. I asked her to continue to self monitor, and of course if she needs to go seek medical care go. I told her give them a call to let them know she is coming. Currently, she is home wondering if there is truth to this rumor and if she needs to be tested. David Atrubin epi on call is checking on this information for guidance. Her name is Liz McNeil, Santa Rosa resident. Date of birth 7-4-1959 and again contact

636-352-9569.

This resident just showed up at Perdido Bay Er, asymptomatic she too went out of New Orleans on the Carnival ship Valor , Feb 29th – March 5th. The ER stated she was in isolation, and she said she had been notified by the cruise line. Her name is Robin Ayers Dob 08/30/1970 she has no symptoms, so they were discharging her. I told the ER I would contact her, that I was currently awaiting information about this cruise, that she needs to self isolate, monitor her health, if she becomes symptomatic to call and let them know she is coming in, Her name is Robin Ayers dob 08/30/1970 her phone number is 850-530-6013. Her address is 6507 Mint Julep trail 32507.

Animal models for SARS and MERS coronaviruses.pdf

Gary, early on I did research into potential animal models. In looking at the literature there are very few models for SARS, and MERS-COV. The difficulty is modeling the entire response, there are some genetically engineer mice you can infect but again they did generate the entire clinical picture
Article 1

An Animal Model of MERS Produced by Infection of Rhesus Macaques With MERS Coronavirus

Sciences and Comparative Medicine Center, Peking Union Medical College, Beijing, and [2]State Key Laboratory for Emerging Infectious Diseases,
Department of Microbiology and the Research Centre of Infection and Immunology, University of Hong Kong, Pokfulam, China
(See the brief report by Aburizaiza et al on pages 243–6, and the editorial commentary by Hui and Zumla on pages 173–6.)
In 2012, a novel coronavirus (CoV) associated with severe respiratory disease, Middle East respiratory syndrome (MERS-CoV; previously known as human coronavirus–Erasmus Medical Center or hCoV-EMC), emerged in the Arabian Peninsula. To date, 114 human cases of MERS-CoV have been reported, with 54 fatalities. Animal models for MERS-CoV infection of humans are needed to elucidate MERS pathogenesis and to develop vaccines and antivirals. In this study, we developed rhesus macaques as a model for MERS-CoV using intratracheal inoculation.
The infected monkeys showed clinical signs of disease, virus replication, histological lesions, and neutralizing antibody production, indicating that this monkey model is suitable for studies of MERS-CoV infection.
Keywords. animal model; coronavirus; MERS; pathology; rhesus monkey.

Respectfully submitted

CAUTION: This email originated from outside of DHS. DO NOT click links or open attachments unless you recognize and/or trust the sender. Contact your component SOC with questions or concerns.

Connie,
I have two comments:
One: There is an awful lot of federal money being poured into primate research facilities to identify models for disease. One bi product of that research is that we may know more soon about which animals can be infected, especially primates. Nevertheless, like everything else, this will be a waiting game. I know the Tulane primate center in our area received the virus for such studies at least two weeks ago.
Two: Our animal diagnostic lab in Baton Rouge is or will be very soon offering COVID19 PCR testing in animals. I assume other animal diagnostic labs will soon be offering similar tests. I am no expert on this testing, but if primate owners have questions, the could call the Louisiana Animal Disease Diagnostic Laboratory (LADDL) at (225) 578-9777. I would ask to speak to Dr. Udeni Balasuriya, the lab director.

Animal models for SARS and MERS coronaviruses

Lisa M Gretebeck, VMD and **Kanta Subbarao, MBBS, MPH**
Laboratory of Infectious Diseases, NIAID, National Institutes of Health Bethesda, MD 20892

Abstract

The emergence of Severe Acute Respiratory Syndrome coronavirus (SARS-CoV) and Middle East Respiratory Syndrome coronavirus (MERS-CoV), two strains of animal coronaviruses that crossed the species barrier to infect and cause severe respiratory infections in humans within the last 12 years, have taught us that coronaviruses represent a global threat that does not recognize international borders. We can expect to see other novel coronaviruses emerge in the future. An ideal animal model should reflect the clinical signs, viral replication and pathology seen in humans. In this review, we present factors to consider in establishing an animal model for the study of novel coronaviruses and compare the different animal models that have been employed to study SARS-CoV and MERS-CoV.

Introduction

Members of the *Coronaviridae* family infect a wide range of animal species in nature and most are limited in their host range [1]. Human coronaviruses including OC43, 229E, NL63 and HKU1 are generally associated with self-limiting respiratory tract infections (Table 1) [1,2]. However, in the past 12 years, two outbreaks of severe respiratory tract infection, SARS and MERS, have been caused by animal coronaviruses that have crossed the species barrier. Despite the severe disease and high case fatality rate associated with SARS and MERS, coronavirus vaccines and antiviral drugs are not yet available. Animal models are needed for pathogenesis studies as well as for evaluation of vaccines and antiviral drugs. We will focus on animal models for these two coronaviruses in this review.

Coronaviruses contain a 30 KB long positive-sense RNA genome. Receptor binding domains of the viral spike protein on SARS-CoV and MERS-CoV attach to angiotensin-converting enzyme 2 (ACE2) [3,4] and dipeptidyl-peptidase 4 (DPP4) proteins [5,6], respectively. SARS was first reported in Hong Kong in 2003, and went on to cause over 8000 infections with an approximately 10% case-fatality rate [7,8]. The newly emerged MERS-CoV, identified in 2012, has caused over 800 infections associated with a case fatality rate of approximately 40% [9–11]. In 2014, the Centers for Disease Control and Prevention confirmed the first MERS case imported into the United States. The development

Author Manuscript Author Manuscript Author Manuscript Author Manuscript

and evaluation of antiviral drugs and vaccines for SARS and MERS has been challenging, in part because of difficulties in developing animal models that provide consistent and reproducible results.

The ideal animal model is one that mimics human disease in sharing the route of infection, increased severity of disease in the corresponding demographic groups and comparable levels of mortality/morbidity. The presence and distribution of viral receptors should be similar to that in humans. The virus should replicate in the selected animal species and a correlation should exist between virus titer and disease severity. Finally, animal models should be carefully assessed and selected to meet experimental goals (Figure 1). For example, if the primary focus is to elucidate pathogenesis, the animal model should fully replicate key aspects of the disease and immunological reagents must be available. In contrast, the primary outcome in a vaccine efficacy study is a meaningful difference between vaccinated and the unvaccinated control groups; the ability of a vaccine to prevent clinical disease and/or pathology associated with viral replication following challenge provides compelling evidence of vaccine efficacy [12] though at a minimum, differences in challenge virus replication can be assessed as a measure of vaccine efficacy.

Coronavirus Disease in Humans

People infected with SARS-CoV and MERS-CoV present with initial symptoms that include fever, myalgia and respiratory signs including a nonproductive cough and dyspnea [9,11,13–18]. Chest radiograph abnormalities are evident in almost all cases. Etiologic diagnosis is made by virus isolation in culture, polymerase chain reaction assays or serological testing for antibodies to the virus. SARS associated lung pathology was described from examination of post-mortem tissue samples [7,19–21]; however, pathologic changes associated with MERS have not been reported, perhaps because autopsies are rarely performed. The findings in SARS were consistent with prolonged inflammation with destruction and desquamation of alveolar pneumocytes. Hyalinemembrane formation, interstitial inflammatory infiltration and intraalveolar hemorrhage were observed [7] and multinucleated giant cells were also seen. The presence of viral antigen was demonstrated by immunohistochemistry (IHC) in the lungs.

The median age of patients infected with SARS-CoV and MERS-CoV is different. MERS-CoV tends to affect middle-aged males, while SARS-CoV had a predilection for older people. The overall case-fatality rate for MERS (40%) is greater than was seen with SARS (10%). Finally, preexisting chronic illnesses such as diabetes, renal disease and heart disease were less common in SARS-CoV patients [18].

Animal Models for SARS and MERS

Non-human primates

SARS-CoV was shown to infect rhesus macaques [22,23] cynomolgus macaques [22–26] and African green monkeys (AGMs) [22]. Clinical signs, viral replication and pathology depended upon the species. There is at least one report of pneumonitis in each species but the findings in non-human primates (NHPs) were variable, likely because of genetic

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-013566

Author Manuscript Author Manuscript Author Manuscript Author Manuscript

variability in subspecies and differences in experimental methods including inoculum dose and route [22,23,25]. Greenough et al. reported multi-organ involvement with fever, diarrhea and hepatitis in common marmosets [27].

Infection of rhesus macaques and common marmosets with MERS-CoV has resulted in different outcomes. Rhesus macaques showed a transient pulmonary infection [28,29]. Radiographs of the chest revealed localized infiltration and interstitial markings. Clinical illness was associated with viral replication in the pneumocytes around the terminal bronchioles [28,29]. These findings were consistent with viral load detected by reverse transcription polymerase chain reaction (RT-PCR) and viral antigen in alveolar pneumocytes detected by IHC. In contrast, the clinical symptoms in the marmoset model were much more severe [30]. In addition to bronchointerstitial pneumonia and viral antigen detected in the lungs, the marmosets supported viral titers a thousand-fold higher than rhesus macaques [30].

The anatomical, physiological and immunological similarities of NHPs to humans make them ideal models to recapitulate the pathogenesis of coronavirus infection in humans. However, costs, limited availability and individual variation among NHPs make it difficult to conduct studies in large enough sample sizes for statistical evaluation and to draw robust conclusions. Despite these limitations, it is desirable to evaluate coronavirus vaccine candidates in NHPs prior to proceeding to clinical trials because we have no clinical experience with human coronavirus vaccines. Special consideration should be given to the demographic background (age, sex and source) and the presence of copathogens and studies should be carried out in large sample sizes in order to draw statistically significant conclusions.

Mice

SARS-CoV replication was observed in several inbred strains of mice (BALB/c, C57BL6 and 129S) following intranasal infection, and 129S mice were more susceptible than BALB/c mice [31–33]. Young inbred mice supported viral replication but failed to show clinical signs of disease [31,33]. As in humans infected with SARS-CoV, age seemed to play an important role in disease susceptibility in mice. Twelve-month-old BALB/c mice developed more severe disease than young mice [34,35]. On intranasal infection, the older mice developed weight loss, ruffled fur and dehydration [34]. Histopathology showed interstitial pneumonitis along with diffuse alveolar damage and viral antigens were detected by IHC in the lungs. The older BALB/c mouse provided an opportunity to study the age-dependent susceptibility of humans to SARS-CoV [35,36]. Several knockout mice (Rag1−/−, CD1−/−, Beige) were also infected with SARS-CoV in order to determine the role of immune effectors in the disease [31]. STAT 1−/− mice in the 129S background supported prolonged viral replication and histopathology similar to humans [32,37]. However, mice with targeted immune defects are of limited value in vaccine studies.

Because infection in young mice was cleared rapidly without clinical disease, in addition to infecting older mice, two approaches were employed to enhance clinical signs of disease in young mice: the development of transgenic mice expressing the human ACE2 (hACE2) receptor and the adaptation of SARS-CoV to mice by serial passage. McCray et al.

demonstrated that expression of hACE2 under the control of an epithelial cell-specific promoter K18 resulted in lethal SARS-CoV infection [38]. However, SARS-CoV infection in K18-hACE2 mice was associated with central nervous system disease, which was not a feature of SARS in humans. Tseng et al. developed two lineages of transgenic mice expressing hACE2 under the CAG promoter, a strong composite promoter consisting of the cytomegalovirus immediate early enhancer, the chicken β-actin promoter, rabbit globulin splicing and polyadenylation sites to drive high levels of gene expression in mammalian expression vectors [39]. The transgene-positive mice (AC70 and AC63) showed robust viral growth, generalized illness and tissue pathology after infection with SARS-CoV [39]. The lethal lineage of mice (AC70) showed a wider spectrum of clinical manifestations, including death, than the nonlethal lineage mice (AC63). Transgenic mice were used for pathogenesis studies and evaluation of vaccines and other therapeutics [40,41].

Three mouse-adapted (MA) strains of SARS-CoV were developed independently by serial passage of SARS-CoV (Urbani strain) in the respiratory tract of mice [40,42,43]. The MA15, MA20 and v163 mouse-adapted SARS-CoV strains replicated to high titer in the lungs of mice, associated with pathological changes, dissemination of the virus to extrapulmonary sites and mortality. The disease in mice resembled the disease seen in severe human cases of SARS [40,42,43]. These three MA viruses shared mutations in specific viral proteins such as the replicase nonstructural protein nsp9 and the spike glycoprotein, which attests to the importance of these proteins in viral pathogenesis [40,43]. Infection of older mice with the MA15 virus produces clinical disease particularly reminiscent of acute respiratory distress syndrome (ARDS) in humans [43].

In contrast to SARS-CoV, mice are not naturally susceptible to infection by MERS-CoV because the mouse DPP4 receptor differs from human DPP4 (hDPP4) in critical areas of interaction with the MERS-CoV spike protein [44]. BALB/c and B6 mice were transduced with an adenoviral vector expressing hDPP4 (Ad5-hDPP4); these mice supported replication of MERS-CoV associated with interstitial pneumonia and viral antigen in the lungs [45]. Older Ad5-hDPP4 transduced mice lost weight but mortality was not observed. Agrawal et al. recently developed a transgenic mouse model globally expressing hDPP4 under the control of the CAG promoter used to generate the SARS transgenic mice [46]. The hDPP4 mice were fully permissive to MERS-CoV infection, supporting a robust infection with severe respiratory and generalized illness that led to death within days after infection. High viral titers were recovered from multiple organs and pathological changes were consistent with extensive inflammation.

When mouse models are available, they are useful in evaluating the pathogenesis of viruses and testing vaccines and antiviral drugs. Mice are advantageous due to their low cost, small size and availability. They can also be manipulated at the genetic level and immunological reagents are available to study viral pathogenesis.

Hamsters

The golden Syrian hamster was an excellent model for SARS-CoV because the virus replicates to high titers in the lung with associated pathology. Following intranasal inoculation of SARS-CoV, viral replication was observed in the upper and lower respiratory

AMERICAN OVERSIGHT FL-DOH-20-0900-A-013568

Author Manuscript Author Manuscript Author Manuscript Author Manuscript

tract with peak replication three days after infection. The virus was cleared seven to ten days after infection [47]. Viral replication was accompanied by pronounced histopathological changes in the lungs including interstitial inflammation, pneumonitis and consolidation. Since hamsters showed no outward signs of clinical illness, exercise wheels (Nalgene activity wheel) were employed to measure their activity (revolutions/night); these activity wheels showed that SARS-CoV infected hamsters were less active from days two to seven post-infection [47,48]. Primary infection elicited a neutralizing antibody response that provided protection from subsequent infections [47]. Hamsters were suitable for immunoprophylaxis and treatment studies because objective clinical signs were accompanied by high viral titers and pulmonary histopathology [49].

Attempts to experimentally infect hamsters with MERS-CoV were not successful [50].

Ferrets

Ferrets are frequently used as a model for the study of respiratory viruses that infect humans. However, conflicting data were reported when ferrets were infected with SARS-CoV [51,52]; one group observed clinical illness [51], but another group did not [52]. The ferret model was further characterized to resolve these inconsistent results; fever and sneezing were associated with high viral titers in the upper respiratory tract and histologic changes in the lungs characterized by lymphohistiocytic bronchointerstitial pneumonia [53].

Ferrets do not support replication of MERS-CoV [54].

The Application of Animal Models for Vaccine Development

SARS-CoV and MERS-CoV research have demonstrated that a single animal species will not serve as a model for all coronaviruses (Table 2). The ability to elicit clinical disease, viral replication and pathology depends on the expression of the viral receptor, the species and the demographic characteristics of the animal. Infection of young mice with SARS-CoV was not ideal because there was limited histopathology and no clinical disease. However the combination of two approaches, using mouse-adapted SARS-CoV in older mice, resulted in a model of ARDS that represents a more stringent challenge for the evaluation of vaccine efficacy than either alone. Unfortunately, immune defects associated with aging are complex and can influence results of vaccine evaluations [55,56].

Several animal models were developed for SARS – largely because the critical domains of the ACE2 receptor that binds the SARS-CoV spike protein are conserved across several species. This has not been the case for MERS-CoV. There are several point mutations in the DPP4 protein of different animal species that limit the ability of the MERS-CoV spike protein to attach to the host receptor. Therefore, without modification of either the receptor or the viral spike protein, animal models for MERS are limited to non-human primates and camels. Recent studies have shown that there is sequence homology between rabbit and human DPP4, raising the possibility that is currently under investigation, that the rabbit may be a promising model for MERS-CoV infection (Subbarao et al., Unpublished data).

Several SARS vaccine candidates elicited neutralizing antibodies and were effective in protecting young mice or hamsters from challenge [48,57–63]. However, reports of

AMERICAN OVERSIGHT

Author Manuscript Author Manuscript Author Manuscript Author Manuscript

immunopathologic reactions in older mice and in non-human primates vaccinated with SARS-CoV vaccines that were subsequently challenged with SARS-CoV [57,59,62,64] have revealed two concerns about proceeding to clinical trials with SARS-CoV vaccines. First, there is a precedent for coronavirus-vaccine associated disease enhancement; kittens immunized with a vaccinia virus vectored feline infectious peritonitis virus vaccines developed severe disease when they were subsequently infected with FIPV [65]. In these kittens, non-neutralizing or sub-neutralizing antibodies facilitated viral entry into macrophages. The concern that is extrapolated from the FIPV vaccine experience to human SARS-CoV vaccines is whether vaccine recipients will develop more severe disease if they are exposed to or infected with SARS-CoV after neutralizing antibody titers decline. The second concern is whether recipients of a SARSCoV vaccine would be at risk of developing pulmonary immunopathology following infection with an unrelated human coronavirus e.g. 229E, OC43, HKU1 or NL63 that usually causes mild, self limited disease. Although findings from preclinical evaluation have revealed these concerns, studies in animal models may not be able to provide data to confirm or allay these concerns.

Highlights

- Animal coronaviruses can cause severe respiratory illness and death in humans
- Coronavirus vaccines and antiviral drugs are not yet available
- Animal models are needed to study pathogenesis and evaluate vaccines and antivirals
- No single animal model can be used to study both SARS and MERS coronaviruses
- The most appropriate animal model should be selected to meet experimental goals

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-013576

Author Manuscript Author Manuscript Author Manuscript Author Manuscript

Figure 1.

Factors to consider when selecting an animal model. Animal models should be tailored to the goals of the study. If the primary goal is to elucidate pathogenesis, the model should replicate key aspects of the disease and immunological reagents should be available. The demographic background (e.g. age for SARS) of the animal should be taken into consideration. In contrast, animal models used in vaccine/antiviral efficacy studies must demonstrate meaningful differences between vaccinated and unvaccinated control groups. Special consideration should be given to how animals from different demographic backgrounds respond to the vaccine/antiviral under investigation. To determine the correlate of protection, it is necessary to study the immune response to the vaccine as well as the immune response elicited after challenge with the homologous coronavirus. It may be of interest to evaluate the response to challenge with other coronaviruses that the vaccinated host may encounter.

Table 2

Clinical signs, viral replication and pathology of SARS-CoV and MERS-CoV in humans and various animal models.

Species	Virus	
	SARS-CoV	**MERS-CoV**
Humans	• Clinical signs include fever and respiratory illness. • Lung pathology is consistent with pneumonia and acute lung injury.	• Clinical signs include fever and respiratory illness. Some patients develop renal failure. • Lung pathology samples are not available for investigation.
NHP	• **Rhesus macaques, cynomolgus macaques, African green monkeys and common marmosets** are susceptible to infection. Clinical signs, viral replication and pathology depend on the species.	• **Rhesus macaques** develop a transient infection with moderate viral replication and pathology in the lung. • **Common marmosets** have a more severe response to the virus with higher viral titers and severe pathology in the lungs. Lethality is also observed in this model.
Mice	• **Young inbred mice** (BALB/c, C57BL6, 129S) support viral replication but fail to show clinical signs of disease. • **Older inbred mice** (BALB/c), **knockout mice** (STAT 1−/−, Rag 1 −/−, CD1 −/−, Beige) **and transgenic mice** (K18-hACE2, A70-hACE2) develop generalized illness, robust viral growth and pronounced lung pathology consistent with pneumonia and acute lung injury. The K18-hACE2 transgenic mice develop central nervous system disease, which is not a feature in humans.	• **Inbred mice** are not naturally susceptible to infection. • **Transduced mice** (Ad5-hDPP4) develop clinical signs and support replication of virus with interstitial pneumonia and viral antigen found in the lungs. • **Transgenic mice** (hCD26/DPP4) develop robust respiratory and generalized illness with high viral titers and extensive inflammation in the lungs. Lethality was also observed in this model.
Hamsters	• Clinical illness (measured by a decrease in activity on the exercise wheel) is accompanied by viral replication and pronounced histopathological changes such as inflammation, pneumonitis and consolidation in the lungs.	• Hamsters do not support replication.
Ferrets	• Clinical illness (fever and sneezing), is accompanied by viral replication and histologic changes in the lungs.	• Ferrets do not support replication.
Rabbits	• The rabbit model has not been investigated.	• The rabbit model is currently under investigation.

Dear Dr. Lanza,

We are writing a proposal to the National Science Foundation on reducing the risk of COVID-19 transmission in crowded locations. I have attached a 1-page summary. I was wondering if you can provide a letter of collaboration for it. The text of the letter, in the NSF template would be along the following lines, addressed to "National Science Foundation":

"If the proposal submitted by Dr. Ashok Srinivasan entitled "Collaborative:RAPID:Leveraging New Data Sources to Analyze the Risk of COVID-19 in Crowded Locations" is selected for funding by NSF, it is my intent to collaborate and/or commit resources as detailed in the Project Description or the Facilities, Equipment or Other Resources section of the proposal."

In the facilities document, I would write:

"Dr. John Lanza is Director of the Escambia County Health Department. He will provide input and feedback on the practicality of ideas that we analyze for decreasing epidemic risk."

Please feel free to edit the text above. Thanks.

AMERICAN OVERSIGHT

In the biosketch, can you replace #d ii - iv with anything that will highlight your accomplishments related to infectious diseases or public health. For example, you could mention that you are a practicing physician (mentioning any specialty, board certification, or hospital affiliation). You could also mention anything related you did in the military, such as preparation for an epidemic or being in some committee related to public health. If you have mentored students, you could mention that too. Thanks.

Let us say we get snapshots of the videos at high risk locations. Can we get an undergraduate student to manually note these characteristics? Would this work? I guess we would also need to apply for IRB for that. Purdue has done an IRB at their end. We could do something similar.

AMERICAN OVERSIGHT

Ashok.
Thanks for allowing me to review the proposal.
Some areas of interest in airline passenger travel-
1. The TSA screening area. Passengers waiting to be screened stand and walk slowly in long lines weaving back and forth in alternate directions. They face adjacent lines of passengers going in opposite directions.
2. The boarding process at the gate. Passengers cluster in large unorganized groups waiting for their boarding group to be called for most airlines except for Southwest Airlines which directs passengers to line up in adjacent lines.
3. The boarding process in the jetway and aircraft. Single file lines in the jetway slowly moving. Early versus late seating and the amount of exposure from people passing by seated passengers.
Sincerely,
Wes Farr

> In the biosketch, can you replace #d ii - iv with anything that will highlight your accomplishments related to infectious diseases or public health. For example, you could mention that you are a practicing physician (mentioning any specialty, board certification, or hospital affiliation). You could also mention anything related you did in the military, such as preparation for an epidemic or being in some committee related to public health. If you have mentored students, you could mention that too. Thanks.

AMERICAN OVERSIGHT

We had currently not planned on that, except for possibly detecting masks. (More strictly, we were looking to identify partly covered faces.) One possibility is to do it manually. Let us say we get snapshots of the videos at high risk locations. Can we get an undergraduate student to manually note these characteristics? Would this work? I guess we would also need to apply for IRB for that. Purdue has done an IRB at their end. We could do something similar.

I spoke with Orange Epi. The case was at the political event a Mar-A-Lago on Sunday. He was notified this week of a possible exposure and went to the doctor to be checked after he was notified. He does not know who the case was to whom he was exposed.

He has been very cooperative and has provided a thorough list of contacts including 12 people who took a private plane to the event. Orange Epi has divided the list and is in the process of following up.

They will also get Merlin updated ASAP.

Dr Jean,

We were just informed of this change as non of us received it yesterday or today via DOH blast

We agree that anyone with moderate or severe symptoms needs Airborne isolation and N95 on employees in addition to PPE for COVId

The question is on low disease, asymptomatic or non admitted is it ok to proceed w droplet and contact and not AII as we don't have enough ED rooms to screen patients same for outpatient clinics

AMERICAN OVERSIGHT

The latest guidelines you provided are contradictory with the WHO and CDC.

We need your recommendations on implementation as most clinics or any clinician suspecting COvId will not be able to place patients in AII

Kind Regards,

Removed one bullet, made other highlighted changes. Shamarial is okay with it.

Tell us about the DOH response or 'what's going on at the church?'

- A known case attended XXX church before she tested positive for COVID-19.
- Following CDC guidance, our epidemiology staff worked with the case to determine people who may have been in close contact.
- Working with the pastor, DOH-Volusia was able to define those who were in attendance at the church activities and the risk level of the exposure of those individuals.
- We worked with the pastor to provide information to that defined audience.
- As is standard in contact tracing, anyone who was determined to be at increased risk of exposure has been contacted by our epidemiology staff is asked to self-isolate for 14 days or monitor their health.

Subject: Per our conversation: Suggested messaging

Hello again, Alberto,
Per our conversation, in the event DOH-Volusia is contacted by media for information (written or on-camera) regarding the church exposure, DOH-Volusia is requesting the ability to fulfill both types of requests using the information. Responses to anticipated follow-up questions also are provided for approval below. Additional guidance/message points are welcome:

Reminder: The information on this potential exposure already is being distributed grass-roots style by the pastor and case.

Tell us about the DOH response or 'what's going on at the church?'

- A known case attended XXX church before she tested positive for COVID-19.
- Following CDC guidance, our epidemiology staff worked with the case to determine people who may have in close contact.
- Through the investigation, DOH-Volusia determined those who attended church activities were at low risk for exposure.
- Working with the pastor, DOH-Volusia was able to define those who were in attendance at the church activities.
- We worked with the pastor to provide information to that defined audience.
- As is standard in contact tracing, anyone who was determined to be at increased risk of exposure has been contacted by our epidemiology staff and asked to self-isolate for 14 days and monitor for symptoms.

Is it safe for people to go to church or other similar gatherings?

Currently we have no evidence of community spread in Volusia County. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular

AMERICAN OVERSIGHT

household cleaning spray or wipe.

- The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

What should seniors or high-risk people do? (Need specific message for seniors/high-risk groups since CDC has been saying they should practice social distancing measures.) Suggestion:

If you are at higher risk of getting very sick from COVID-19, you should:

- Stock up on supplies.
- Take everyday precautions to keep space between yourself and others.
- When you go out in public, keep away from others who are sick, limit close contact and wash your hands often.
- Avoid crowds as much as possible.
- Avoid cruise travel and non-essential air travel.
- During a COVID-19 outbreak in your community, stay home as much as possible to further reduce your risk of being exposed.

What should churches do?

- CDC has prevention guidance for the faith-based community. Cdc.gov/coronavirus

Suggested response to follow up questions:

- That information is part of an epi investigation. I do not have access to that information. Those at increased risk have been contacted and provided info.

Thank you, Alberto.

Hello again, Alberto,

Per our conversation, in the event DOH-Volusia is contacted by media for information (written or on-camera) regarding the church exposure, DOH-Volusia is requesting the ability to fulfill both types of requests using the information. Responses to anticipated

AMERICAN OVERSIGHT

follow-up questions also are provided for approval below. Additional guidance/message points are welcome:

Reminder: The information on this potential exposure already is being distributed grass-roots style by the pastor and case.

Tell us about the DOH response or 'what's going on at the church?'

- A known case attended XXX church before she tested positive for COVID-19.
- Following CDC guidance, our epidemiology staff worked with the case to determine people who may have in close contact.
- Through the investigation, DOH-Volusia determined those who attended church activities were at low risk for exposure.
- Working with the pastor, DOH-Volusia was able to define those who were in attendance at the church activities.
- We worked with the pastor to provide information to that defined audience.
- As is standard in contact tracing, anyone who was determined to be at increased risk of exposure has been contacted by our epidemiology staff and asked to self-isolate for 14 days and monitor for symptoms.

Is it safe for people to go to church or other similar gatherings?

Currently we have no evidence of community spread in Volusia County. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;

- Staying home when you are sick and avoiding contact with persons in poor health;

- Avoiding touching your eyes, nose and mouth with unwashed hands;

- Covering your cough or sneeze with a tissue, then disposing of the tissue;

- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;

- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and

- Cleaning and disinfecting frequently touched objects and surfaces using a regular

AMERICAN OVERSIGHT

household cleaning spray or wipe.

- The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

What should seniors or high-risk people do? (Need specific message for seniors/high-risk groups since CDC has been saying they should practice social distancing measures.) Suggestion:

If you are at higher risk of getting very sick from COVID-19, you should:

- Stock up on supplies.
- Take everyday precautions to keep space between yourself and others.
- When you go out in public, keep away from others who are sick, limit close contact and wash your hands often.
- Avoid crowds as much as possible.
- Avoid cruise travel and non-essential air travel.
- During a COVID-19 outbreak in your community, stay home as much as possible to further reduce your risk of being exposed.

What should churches do?

- CDC has prevention guidance for the faith-based community. Cdc.gov/coronavirus

Suggested response to follow up questions:

- That information is part of an epi investigation. I do not have access to that information. Those at increased risk have been contacted and provided info.

Thank you, Alberto.

Hello again, Alberto,
Per our conversation, in the event DOH-Volusia is contacted by media for information (written or on-camera) regarding the church exposure, DOH-Volusia is requesting the ability to fulfill both types of requests using the information. Responses to anticipated follow-up questions also are provided for approval below. Additional

AMERICAN OVERSIGHT

guidance/message points are welcome:

Reminder: The information on this potential exposure already is being distributed grass-roots style by the pastor and case.

Tell us about the DOH response or 'what's going on at the church?'

- A known case attended XXX church before she tested positive for COVID-19.
- Following CDC guidance, our epidemiology staff worked with the case to determine people who may have in close contact.
- Through the investigation, DOH-Volusia determined those who attended church activities were at low risk for exposure.
- Working with the pastor, DOH-Volusia was able to define those who were in attendance at the church activities.
- We worked with the pastor to provide information to that defined audience.
- As is standard in contact tracing, anyone who was determined to be at increased risk of exposure has been contacted by our epidemiology staff and asked to self-isolate for 14 days and monitor for symptoms.

Is it safe for people to go to church or other similar gatherings?

Currently we have no evidence of community spread in Volusia County. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

- The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

What should seniors or high-risk people do? (Need specific message for

AMERICAN OVERSIGHT

seniors/high-risk groups since CDC has been saying they should practice social distancing measures.) Suggestion:

If you are at higher risk of getting very sick from COVID-19, you should:

- Stock up on supplies.
- Take everyday precautions to keep space between yourself and others.
- When you go out in public, keep away from others who are sick, limit close contact and wash your hands often.
- Avoid crowds as much as possible.
- Avoid cruise travel and non-essential air travel.
- During a COVID-19 outbreak in your community, stay home as much as possible to further reduce your risk of being exposed.

What should churches do?

- CDC has prevention guidance for the faith-based community. Cdc.gov/coronavirus

Suggested response to follow up questions:

- That information is part of an epi investigation. I do not have access to that information. Those at increased risk have been contacted and provided info.

Thank you, Alberto.

Importance: High

Do you have a few minutes to answer questions about clinical steps for COVID-19 testing? Dr. Rivkees wants an updated checklist for clinicians and MQA is the lead. They want step by step instructions on who needs to get testing at CHD and send to BPHL and who can get a private provider to write an order for testing and go to a commercial lab.

Also – they want step by step about collection through delivery of specimens for testing and how results are reported.

THANKS!!!

AMERICAN OVERSIGHT

Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease 2019 (COVID-19)

Version 4.1 | March 10, 2020

The Florida Department of Health (Department) is prioritizing testing of symptomatic individuals who had close contact[1,2] with a laboratory-confirmed[3] COVID-19 case, are part of an outbreak, or have unexplained respiratory illness. Please see the Centers for Disease Control and Prevention (CDC) Health Alert Network 429 https://emergency.cdc.gov/han/2020/han00429.asp for additional guidance on prioritization of testing. The Department recommends other individuals be tested at a commercial laboratory (e.g., LabCorp and Quest). For all persons under investigation for COVID-19, take the following precautions:

- Ask the patient to wear a surgical mask.
- Evaluate the patient in a private room with the door closed, ideally an airborne isolation room, if available.
- Initiate contact and airborne precautions, including use of eye protection (e.g., goggles or a face shield) for all health care professionals and other staff entering the room.
- Visit **www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html** for additional recommendations on infection control recommendations for patients under investigation for COVID-19 in health care settings.

A. Person had **close contact**[1,2] with a laboratory-confirmed[3] COVID-19 case and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

B. Person is part of an outbreak of suspected COVID-19.

C. Person hospitalized with **unexplained respiratory illness or person who died from unexplained respiratory illness.**

D. Person traveled to or from an **affected geographic area**[5] with widespread community transmission and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

→ **This patient meets the criteria for testing at the Florida Department of Health Bureau of Public Health Laboratories.** The Florida Department of Health asks that you **immediately** notify both infection control personnel at your health care facility and your county health department (CHD) (**FloridaHealth.gov/CHDEpiContact**).

E. Person had community contact (e.g., attended the same gathering or stayed on the same cruise ship) with a laboratory-confirmed[3] COVID-19 case and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

F. Person is age ≥65 years, has chronic medical conditions, or is in an immunocompromised state and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

→ **Consider testing at a commercial laboratory.** If commercial testing is not available, contact your CHD for patients that meet CDC priority criteria.

[1]Close contact is defined as a) being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case– or –b) having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on) If such contact occurs while not wearing recommended personal protective equipment (PPE) (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection), criteria for PUI consideration are met. Data to inform the definition of close contact are limited. Considerations when assessing close contact include the duration of exposure (e.g., longer exposure time likely increases exposure risk) and the clinical symptoms of the person with COVID-19 (e.g., coughing likely increases exposure risk as does exposure to a severely ill patient). Special consideration should be given to healthcare personnel exposed in healthcare settings.

[2]For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation. Because of their often extensive and close contact with vulnerable patients in healthcare settings, even mild signs and symptoms (e.g., sore throat) of COVID-19 should be evaluated among potentially exposed healthcare personnel.

[3]Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for patients in other countries.

[4]Fever may be subjective or confirmed.

[5]Affected areas are defined as geographic regions where sustained community transmission has been identified. For a list of relevant affected areas, see Coronavirus Disease 2019 Information for Travel (https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html)

Hi Dr. Blackmore,

I am working to set up a follow up TA call to assist with your questions related to the cruise ship port. Can you let me know some times that work for you today?

Thanks,

Chris

3/16/20

Good Morning,

Sorry, for the delay, I was out Friday, 3/13/20.
Below is the official response received.

From: Statewide Travel Management System
Sent: Friday, March 13, 2020 7:14 AM
To: zzzz feedback, DEPCS_STMS <DEPCS_STMS@flhealth.gov>; Statewide Travel Management System <StatewideTravelManagementSystem@flhealth.gov>
Subject: RE: HELP- Travel moratorium?

We haven't received any notification of this. If and when we do, it will go out to everyone, just like during a hurricane.

Additionally, this was shared Friday, 3/13/20, which I trust you received.

From: DOH COMMUNICATIONS OFFICE
Sent: Friday, March 13, 2020 9:20 AM
Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat

AMERICAN OVERSIGHT

Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Happy Day

CDC HEALTH UPDATE

Distributed via the CDC Health Alert Network
March 15, 2020, 5:45 PM ET
Updated: March 17, 2020, 12:10 PM ET
CDCHAN-00430

Information and Guidance about Global Travel on Cruise Ships, Including River Cruises, due to Coronavirus Disease 2019 (COVID-19)

Summary
The Centers for Disease Control and Prevention (CDC) recommends all persons defer any travel on cruise ships, including river cruises, worldwide because of the increased risk of SARS-CoV-2 transmission onboard ships. Deferring travel is especially important for older adults and all people with serious chronic medical conditions (such as heart disease, diabetes or lung disease), because of their increased risk for severe disease. This health update provides information to clinicians and state and local health departments about the current coronavirus disease 2019 (COVID-19) situation and the risks associated with travel on cruise ships, including river cruises.

Background
Cruise ship passengers, including those who take river cruises, are at increased risk of exposure to SARS-CoV-2, the virus that causes COVID-19. In the past month, there have been reports of outbreaks of COVID-19 among passengers and crew on cruises. Recent examples include 696 cases and 8 deaths on the *Diamond Princess* cruise ship in Japan, 28 cases on the *Grand Princess* cruise ship in the United States, and at least 60 cases in 15 states associated with multiple Nile River voyages in Egypt as of March 14, 2020. Illness onset occurred both onboard ships and after passengers returned to the United States. The proximity of passengers and crew on small ships and boats traveling on rivers may result in an even higher number of COVID-19 infections.

Recommendations for Clinicians
Ask all patients about their planned or recent cruise ship travel, including river cruises.

1. Pre-travel advice
   a. Advise patients to defer all cruise ship travel, including river cruises, worldwide.
   b. Explain that their return travel to the United States may be impacted, and formal quarantine procedures may be implemented if confirmed cases are identified on board.
   c. Explain that appropriate medical care or medical evacuation may not be available internationally.
   d. Explain that some countries may refuse docking or disembarkation if there are known or suspected cases on board.
   e. For patients who still intend to cruise, advise them to
      i. Stay in their cabin and notify the onboard medical center immediately if they get sick with fever, new or worsening cough, or trouble breathing during their cruise.
      ii. Stay home for 14 days after returning from travel, practice social distancing, and monitor their health both during travel and after they return. Social distancing means staying out of crowded places, avoiding group gatherings, and maintaining distance (approximately 6 feet or 2 meters) from others, when possible.
2. Post-travel management
   a. Tell patients to follow CDC's guidance on steps to prevent the spread of COVID-19 (https://www.cdc.gov/coronavirus/2019-ncov/about/steps-when-sick.html) if they develop acute febrile or respiratory illness after travel.

AMERICAN OVERSIGHT

b. Implement recommended infection prevention and control practices (https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html) if you suspect a patient has COVID-19.
c. Immediately notify the local health department (https://www.naccho.org/membership/lhd-directory) if a patient meets clinical and epidemiologic criteria for a person under investigation (PUI) (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html) for COVID-19 and test as appropriate.

Recommendations for State and Local Health Departments
Check *The Epidemic Information Exchange* (*Epi-X*) notification system for information on COVID-19 cases on cruise ships and river cruises. In accordance with the Level 3 travel warning (https://wwwnc.cdc.gov/travel/notices/warning/coronavirus-cruise-ship) for cruise ships, cruise travelers should stay home for 14 days after returning from travel, monitor their health, and practice social distancing.

For More Information
State and local health departments can contact CDC's Emergency Operations Center (EOC) at 770-488-7100 for assistance with obtaining, storing, and shipping appropriate specimens to CDC for testing, including after hours, weekends, or holidays.

The Centers for Disease Control and Prevention (CDC) protects people's health and safety by preventing and controlling diseases and injuries; enhances health decisions by providing credible information on critical health issues; and promotes healthy living through strong partnerships with local, national, and international organizations.

3/16/20

Good Morning,

Sorry, for the delay, I was out Friday, 3/13/20.
Below is the official response received.

From: Statewide Travel Management System
Sent: Friday, March 13, 2020 7:14 AM
To: zzzz feedback, DEPCS_STMS <DEPCS_STMS@flhealth.gov>; Statewide Travel Management System <StatewideTravelManagementSystem@flhealth.gov>
Subject: RE: HELP- Travel moratorium?

We haven't received any notification of this. If and when we do, it will go out to everyone, just like during a hurricane.

Additionally, this was shared Friday, 3/13/20, which I trust you received.

From: DOH COMMUNICATIONS OFFICE
Sent: Friday, March 13, 2020 9:20 AM
Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.
Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:
Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.

AMERICAN OVERSIGHT

- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Happy Day

AMERICAN OVERSIGHT

Clinical Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease 2019 (COVID-19) per Centers for Disease Control and Prevention (CDC)

Take steps to ensure rapid safe triage and isolation of patients with symptoms of suspected COVID-19 or other respiratory infection (e.g., fever, cough). If an examination room is not readily available ensure the patient is not allowed to wait among other patients seeking care. Health care personnel (HCP) should adhere to Standard and Transmission-Based Precautions Guideline for Isolation Precautions: Preventing Transmission of Infectious Agents in Healthcare Settings.

Version 4.2 | March 15, 2020

SCREENING CRITERIA

If your patient is exhibiting **symptoms** of acute lower respiratory illness (e.g., fever, cough, and shortness of breath) **and** meets one or more of the following criteria:

1. Persons who have had a close contact with a laboratory-confirmed COVID-19 case
2. Persons hospitalized with acute lower respiratory illness of unknown origin
3. History of travel to or from an affected geographic area with widespread community transmission
4. History of international travel or a cruise
5. ≥65 with chronic health conditions
6. Immunocompromised persons

TESTING

If individual meets criteria for testing, collection of diagnostic respiratory specimens (e.g., nasopharyngeal swab) should be performed in a normal examination room with the door closed.

1. The health care provider is responsible for specimen collection, handling and shipping. Please follow CDC guidance.
2. Collected specimens should be processed within your health care facility, if available; a commercial laboratory (e.g., LabCorp and Quest); or a Florida Bureau of Public Health Laboratory (BPHL)
3. Before sending specimens to BPHL, notify your local county health department CHD Epidemiology Contacts.
4. Health care providers may consult local county health departments for additional guidance as needed.

EXPANDED CRITERIA

If your patient does not meet the above criteria, testing may occur based on clinician's judgement.

1. The health care provider is responsible for specimen collection, handling and shipping. Please follow CDC guidance and use proper PPE.
2. Collected specimens should be processed within your health care facility or a commercial laboratory (e.g., LabCorp and Quest).
3. Follow CDC guidance for specimen collection, handling and shipping.

FOR ADDITIONAL GUIDANCE

Providers are encouraged to frequently monitor Florida Department of Health and CDC websites for updated guidance on COVID-19.

Valencia College is going mostly online due to some of their students being near an instructor at a conference, who has the virus. The students are fine, no symptoms.

From: Sandy Shugart <sshugart@valenciacollege.edu>
Sent: Thursday, March 12, 2020 5:05 PM
To: Hebda, Kathy <Kathy.Hebda@fldoe.org>
Subject: SIGNIFICANT UPDATE VALENCIA'S RESPONSE TO COVID - 19

Dear Kathy:

This is certainly a fast moving set of issues. Our response has changed in the past couple of hours.

We've had a few exposures come to light in the past 24 hours. No symptomatic or confirmed infections. This has led us to adjust our plans. A message will go out this evening.

Valencia is closing to students for the coming week. Faculty and staff will report. We will use the week to move the vast majority of instruction to online through the end of the term, with classes resuming Monday March 23. The third of the classes that are already online will continue as planned. Classes that cannot be taught online (welding, ballet, etc.) will resume Monday, as well, in the face to face format. Since next week is spring break for OCPS and SDOC are next week, this should have no immediate effect on dual enrollment students. Many will move to online sections

AMERICAN OVERSIGHT

the following week.

We will also use the week without students to sort out a variety of other matters – leave for employees who are asked to self-quarantine, coordination with clinical partners in nursing and allied health, policies for working from home, procedures for summer registration, etc.). The school districts will be on spring break for the week we are closed, so we will not be creating any complications for their dual enrollment students.

Meanwhile, we are canceling study abroad for the remainder of the term. Summer trips are under close review. Most travel for staff and faculty has been cancelled. Those who travelled overseas are self-isolating. We did have a couple of faculty and students attend a conference in Ft. Lauderdale last week and we learned another participant was subsequently tested positively for the virus. We are communicating with them to contain any risk associated with them. We have no other known risks at this time. We will make the call on Commencement by April 1.

In common cause,

Sandy

AMERICAN OVERSIGHT

Cc: Crowe, Susanne R.
Subject: RE: staff
Date: Monday, March 16, 2020 11:00:42 AM

While disease is still believed to be rare in a given community, like currently in Duval, we should still be encouraging exclusion of medium and high risk HCP.

https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html

If patient was wearing a mask, she is medium risk and should be excluded for 14 days and monitored.
If patient was not wearing a mask, she is high risk and should be excluded for 14 days and monitored. Certainly the highest priority for stricter approach.

HCP in the high- or medium-risk category should undergo active monitoring, including restriction from work in any healthcare setting until 14 days after their last exposure. If they develop any fever (measured temperature >100.0oF or subjective fever) OR respiratory symptoms consistent with COVID-19 (e.g., cough, shortness of breath, sore throat)* they should immediately self-isolate (separate themselves from others) and notify their local or state public health authority and healthcare facility promptly so that they can coordinate consultation and referral to a healthcare provider for further evaluation.

Additional Considerations and Recommendations:

While contact tracing and risk assessment, with appropriate implementation of HCP work restrictions, of potentially exposed HCP remains the recommended strategy for identifying and reducing the risk of transmission of COVID-19 to HCP, patients, and others, it is not practical or achievable in all situations. Community transmission of COVID-19 in the United States has been reported in multiple areas. This development means some recommended actions (e.g., contact tracing and risk assessment of all potentially exposed HCP) are impractical for implementation by healthcare facilities. In the setting of community transmission, all HCP are at some risk for exposure to COVID-19, whether in the workplace or in the community. Devoting resources to contact tracing and retrospective risk assessment could divert resources from other important infection prevention and control activities. Facilities should shift emphasis to more routine practices, which include asking HCP to report recognized exposures, regularly monitor themselves for fever and symptoms of respiratory infection and not report to work when ill. Facilities should develop a plan for how they will screen for symptoms and evaluate ill HCP. This could include having HCP report absence of fever and symptoms prior to starting work each day.

Facilities could consider allowing asymptomatic HCP who have had an exposure to a COVID-19 patient to continue to work after options to improve staffing have been exhausted and in consultation with their occupational health program. These HCP should still report temperature and absence of symptoms each day prior to starting work. Facilities could have exposed HCP wear a facemask while at work for the 14 days after the exposure event if there is a sufficient supply of facemasks. If HCP develop even mild symptoms consistent with COVID-19, they must cease patient care activities, don a facemask (if not already wearing),

and notify their supervisor or occupational health services prior to leaving work.

Subject: RE: [EXTERNAL] Re: Royal Caribbean Ships off Brazil/Chile

Dear Eleni,
Please clarify your request and the plan – which passengers are you referring to? The air ambulance passengers or the ones who are not ill and are coming in the larger charter?

As I wrote earlier, CDC will not be conducting any health screening. For the passengers who are not arriving by air ambulance, CBP/CWMD would screen the passengers based on their own protocol. CDC Quarantine Station staff will be available to respond to any illness events, as requested by CBP.

For the air ambulance, they need assessment – I understood that you have made arrangements with Dr. Barth Green/University of Miami, who is not affiliated with CDC. He/his team would make an assessment of those 6 individuals.

Michelle –

Slight change of plans. Upon arrival at MIA, Royal Caribbean will now be arranging individual charter flights for the passengers who are cleared by CDC to return to their home cities/states.

AMERICAN OVERSIGHT

Our team has asked that CDC provide something in writing tomorrow that we can provide to the charter companies indicating that the passenger(s) boarding the charter flights have been cleared to fly commercially. We do not want the charters to deny boarding to these passengers simply because they have arrived in MIA from a cruise ship.

Thanks,

Eleni

Sorry - now with Eleni from RC. Again, due-outs are:

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

AMERICAN OVERSIGHT

Thank you for joining the call today. Leah - I don't believe I have everyone from CDC who was on the call, including Rachel - please add if that's the case.

I've listed the do-outs that I'm tracking below, and this chain can serve as the new, smaller group of folks working on the Brazil/Chile RC ships.

- State - send CDC global ship tracking list; create small-group email distro;
- CDC - send Royal Caribbean and Amy Dubois/HHS protocols for screening; Make determination on screening protocols for passengers from a "healthy" ship
- Royal Caribbean - send #s of Canadians to CDC; update on infection status; send manifests for four ships

Coronavirus Disease 2019 (COVID-19)

Interim Enhanced Surveillance Guidance for County Health Departments (CHDs)

Version ~~3.14~~ | ~~February 28~~March 11, 2020

Florida HEALTH

Summary

- **Surveillance:** CHDs should apply the definitions of a COVID-19 case or ~~of~~ person under investigation (PUI) ~~for COVID-19~~ to determine if public health laboratory testing and public health investigation is needed.
- **Investigations:** Investigations should occur for individuals with a reported positive commercial PCR, or meeting the definition of PUI for COVID-19, within the same day of CHD notification, including weekends and holidays.
  - ~~County epidemiology staff should alert their regional epidemiologist and laboratory liaison, or BOE on-call epidemiologist if after-hours, of all PUIs for COVID-19.~~
- **Reporting PUIs and Cases:** PUIs or persons meeting the confirmed or probable case definition for COVID-19 should be entered into Merlin the same day of report (including weekends and holidays).
- **CHD Laboratory Results Notification Process for COVID-19:** ~~Emailed from~~
  - Commercial laboratory results for COVID-19 will either be reported through electronic laboratory reporting (ELR), faxing, or phone calls from laboratories. Results received at the Bureau of Epidemiology will be sent to counties via Merlin.
  - Bureau of Public Health Laboratories ~~until~~ test results are reported to CHDs ~~available~~ through ~~Labware and~~ Merlin and they are mailed to the ordering providers.
    - CHD staff are asked to share urgent BPHL lab results with ordering providers.
- **Documents on this topic dated after the version date, supersede this one.**

Background

On January 11, 2020, Chinese health authorities preliminarily identified more than 40 human infections with a novel coronavirus during an outbreak of pneumonia under investigation in Wuhan City, Hubei Province, China. Chinese health authorities subsequently posted the full genome of the COVID-19 in GenBank ®, the National Institutes of Health genetic sequence database.

The Centers for Disease Control and Prevention (CDC) continues to monitor this outbreak, which includes over ~~80,000~~110,000 confirmed human cases and over 42,~~700~~ 000 deaths worldwide. COVID-19 cases have been reported in >~~45~~ 110 countries. Many cases have been associated with travel to or from China, Italy, Iran, and South Korea; however, community spread is being detected in growing number of locations across the globe, including many European countries.

Coronaviruses are a large family of viruses, some causing illness in people and others that circulate among animals, including camels, cats, and bats. Rarely, animal coronaviruses can evolve and infect people and then spread between people, as seen with Middle East Respiratory Syndrome and Severe Acute Respiratory Syndrome.

There is ~~an~~ are many ongoing investigations to determine more about this outbreak. This is a rapidly evolving situation. This document may become outdated as situations change.

For the latest situation updates, visit www.cdc.gov/coronavirus/novel-coronavirus-2019.html.

DRAFT

AMERICAN OVERSIGHT

Surveillance for COVID-19

Beginning on March 5, 2020 commercial laboratories began testing clinical specimens for COVID-19. The availability of commercial testing changes the scope and purpose of public health testing.

- Health care providers are **not** asked to report all persons being tested for COVID-19 to the Department.
- Providers may choose to submit specimens for any patient to a commercial laboratory.
- When health care providers are unable to access commercial laboratory testing, CHDs may facilitate testing at BPHL for persons that meet CDC priority criteria.
- When illnesses are reported to the CHD, only persons meeting the PUI criteria below, or being tested at BPHL, are requested be entered in Merlin.
- Commercial laboratory reports will be received by ELR, fax, and phone.
- Bureau of Epidemiology will send positive COVID-19 laboratory results to CHDs Merlin task list.
- Persons with a positive COVID-19 result from a commercial laboratory should be investigated as a confirmed case of COVID-19.
- CHDs are **not** asked to routinely collect specimens from patients for submission to commercial laboratories.
- CHDs are **not** asked to request submission of positive specimens from commercial laboratories to BPHL for confirmation. The confirmation process will be coordinated as needed by BOE or BPHL.

Public health investigations are warranted for persons that meet the criteria below or have a positive COVID-19 result from a commercial laboratory.

A PUI for public health laboratory testing is a person with the following characteristics, (others are requested to be sent to commercial laboratories):

Clinical Features		Risk Criteria
Fever[1] **or** signs/symptoms of lower respiratory illness (e.g. cough or shortness of breath)	**AND**	Any person, including health care workers[2], who has had close contact[3] with a laboratory-confirmed[4] COVID-19 patient within 14 days of symptom onset
Fever[1] ~~**and**~~ **or** signs/symptoms of a lower respiratory illness (e.g., cough or shortness of breath)	**AND**	~~A history of travel from an affected geographic area with sustained community transmission[5] within 14 days of symptom onset~~Suspected to be part of an outbreak of respiratory illness.
Fever[1] with severe acute lower respiratory illness (e.g., pneumonia, ARDS) requiring hospitalization, or causing death, and without alternative explanatory diagnosis ~~(e.g., influenza)~~[6]	**AND**	No source of exposure has been identified

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-013744

Fever[1] **or** signs/symptoms of lower respiratory illness (e.g. cough or shortness of breath)		A history of travel to or from an affected geographic area with widespread community transmission.[5]

Patients with lower respiratory illness should also be evaluated for common causes of community-acquired pneumonia, guided by clinical presentation and epidemiologic and surveillance information. For these patients, testing for COVID-19 and other respiratory pathogens should be done simultaneously. Positive results for another respiratory pathogen (e.g., influenza) should not preclude testing for COVID-19 because co-infection may occur.

[1]Fever may be subjective or confirmed.

[2]For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation

[3]Close contact is defined as:

A. being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period of time; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case

   OR

B. having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on)

If such contact occurs while not wearing recommended personal protective equipment or PPE (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection), criteria for PUI consideration are met.

See CDC's updated Interim Infection Prevention and Control Recommendations for Patients with Confirmed COVID-19 or Persons Under Investigation for COVID-19 in Healthcare Settings.

Data to inform the definition of close contact are limited. Considerations when assessing close contact include the duration of exposure (e.g., longer exposure time likely increases exposure risk) and the clinical symptoms of the person with COVID-19 (e.g., coughing likely increases exposure risk as does exposure to a severely ill patient). Special consideration should be given to healthcare personnel exposed in healthcare settings as described in CDC's Interim U.S. Guidance for Risk Assessment and Public Health Management of Healthcare Personnel with Potential Exposure in a Healthcare Setting to Patients with COVID-19.

[4]Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for patients in other countries.

[5]~~Affected regions will change over time so review the most up-to-date information at such sources as:~~

DRAFT

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-013745

~~www.healthmap.org/en/~~ Countries with a CDC level 3 travel advisory. www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

[6]Category includes single or clusters of patients with severe acute lower respiratory illness (e.g., pneumonia, ARDS) of unknown etiology in which COVID-19 is being considered.

COVID-19 Case Definition:

Confirmed: A confirmed case is a person with laboratory confirmation of COVID-19 infection.

Probable: A probable case is a PUI with absent or inconclusive laboratory results for COVID-19 who is a close contact[2] of a laboratory-confirmed COVID-19 case.

Suspect: A suspect case is a PUI with COVID-19 laboratory tests pending.

Formatted: Space After: 6 pt

DRAFT

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-013746

Investigations of PUI for COVID-19

- County epidemiology staff should investigate each report of possible COVID-19 to determine if the COVID-19 case or PUI ~~for COVID-19~~ criteria are met.
- County epidemiology staff should apply PUI criteria to make determinations for if public health laboratory testing is warranted. ~~should contact their~~CHD staff may contact the Regional Epidemiologist and Laboratory Liaison, or Bureau of Epidemiology (BOE) on-call epidemiologist (if after hours), ~~if a county is investigating a potential PUI or~~ if they have any questions.
- Conduct patient/proxy or health care provider interviews and record reviews to obtain essential information, which includes history of present illness, medical history, travel dates, flight information, risk factors, differential diagnoses, and microbiology test results.
- Enter the PUI into Merlin (see 'Reporting COVID-19 PUI and Cases in Merlin') and complete extended data within 24 hours of receipt of information.

Infection Control Considerations

- PUIs should be asked to wear a surgical mask as soon as they are identified and be evaluated in a private room with the door closed, ideally an airborne infection isolation room, if available.
- While a PUI for COVID-19 is receiving health care, it is important that standard, contact, and airborne precautions are used.

Managing Pets of Cases

- Symptomatic persons with COVID-19 should avoid direct contact with pets as they would other household members. https://www.cdc.gov/coronavirus/2019-ncov/php/interim-guidance-managing-people-in-home-care-and-isolation-who-have-pets.html

Management of Cases and PUIs

- A PUI may be discharged before COVID-19 is ruled out. The decision to discharge a PUI for COVID-19 is up to the treating physician.
  - PUIs should be provided surgical masks and asked to isolate themselves at home until fever and symptom-free for 24 hours without antipyretic medication (acetaminophen, ibuprofen).
  - Close contacts of confirmed or probable cases who develop compatible symptoms should also be managed as COVID-19 PUIs. Specimens should be collected, and PUIS should be isolated at home or while seeking health care until COVID-19 testing is completed.
- For **confirmed** COVID-19 cases, the decision to discharge is based on public health and medical assessment with the BOE, including presence of symptoms and multiple negative specimens.

Laboratory Testing and Specimen Collection

- If ~~PUI criteria are met, or if~~ you have questions about laboratory testing or specimen collection for a patient, contact your Regional Epidemiologist and Laboratory Liaison (http://www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/_documents/investigation-unit-map.pdf) or the after-hours BOE on-call epidemiologist (850-245-4401). ~~to arrange for specimens to be submitted to the Bureau of Public Health Laboratories (BPHL).~~
- Specimens should be collected as soon as possible once a PUI is identified regardless of symptom onset.
- To increase the likelihood of detecting COVID-19, CDC recommends collecting both lower and upper respiratory specimens:
  - Upper respiratory: nasopharyngeal and oropharyngeal swabs in viral transport media, ~~each~~ in ~~a separate~~ one viral transport media specimen container; nasopharyngeal wash/aspirate or nasal aspirate may be used as well.
  - Lower respiratory: sputum, bronchial alveolar lavage/tracheal aspirate, in a sterile container
- If additional specimen types such as stool, urine, or whole blood are collected, they can be stored for potential future use.
- Ship specimens overnight for arrival to BPHL in Jacksonville, Miami, or Tampa following notification to the appropriate BPHL location.
- Include a completed DH-1847 form with the specimens.
  - **Merlin case number must be on the form for specimens to be tested** (Please note that if it's missing, testing could be delayed.)
  - All specimens can be listed on a single form
- **Shipments arriving on the weekend must be pre-authorized by BPHL ~~and BOE~~.**
- Ship specimens using category B shipping containers.
- **Notification Process of Laboratory Results:** Emailed from Bureau of Public Health Laboratories until test results are available through Labware and Merlin.

Reporting COVID-19 PUIs and Cases in Merlin

- ~~See Individuals meeting the confirmed, probable, or PUI (suspect) case definition for COVID-19 should be entered into Merlin **immediately**~~
  - ~~Use the disease code **"Coronavirus, Novel 2019 (COVID-19) – 00342"** when entering PUIs in Merlin.~~

Disease

Coronavirus, Novel 2019 (2019-nCoV) - 00342 ×

- ~~PUI will be listed as **suspect** DX status until laboratory results have been returned.~~

DRAFT

AMERICAN OVERSIGHT

FL-DOH-20-0900-A-013748

- ~~Attach all available medical records, laboratory results, and paper PUI form to the Merlin case.~~
- COVID-19 merlin data management guidance ~~Ensure laboratory results are attached to the case and submit.~~

Surveillance for COVID-19

Beginning on March 5, 2020 commercial laboratories began testing clinical specimens for COVID-19. Some Florida hospitals also have the capability to test for the virus. The availability of commercial and hospital testing changes the scope and purpose of public health testing.

- Health care providers are **not** asked to report all persons being tested for COVID-19 to the Department.
- Providers may choose to submit specimens for any patient to a commercial laboratory.
- When health care providers are unable to access commercial laboratory testing, CHDs may facilitate testing at BPHL for persons that meet CDC priority criteria.
- When illnesses are reported to the CHD, only persons meeting the PUI criteria below, or being tested at BPHL, are requested be entered in Merlin.
- Commercial laboratory reports will be received by ELR, fax, and phone.
- Bureau of Epidemiology will send positive COVID-19 laboratory results to CHDs Merlin task list.
- Persons with a positive COVID-19 result from a commercial laboratory should be investigated as a confirmed case of COVID-19.
- CHDs are **not** asked to routinely collect specimens from patients for submission to commercial laboratories.
- CHDs are **not** asked to request submission of positive specimens from commercial laboratories to BPHL for confirmation. The confirmation process will be coordinated as needed by BOE or BPHL.

Public health investigations are warranted for persons that meet the criteria below or have a positive COVID-19 result from a commercial laboratory.

A PUI for public health laboratory testing is a person with the following characteristics, (others are requested to be sent to commercial laboratories):

Clinical Features		Risk Criteria
Fever[1] **or** signs/symptoms of lower respiratory illness (e.g. cough or shortness of breath)	**AND**	Any person, including health care workers[2], who has had close contact[3] with a laboratory-confirmed[4] COVID-19 patient within 14 days of symptom onset
Fever[1] **or** signs/symptoms of a lower respiratory illness (e.g., cough or shortness of breath)	**AND**	Suspected to be part of an outbreak of respiratory illness.
Fever[1] with severe acute lower respiratory illness (e.g., pneumonia, ARDS) requiring hospitalization, or causing death, and without alternative explanatory diagnosis[6]	**AND**	No source of exposure has been identified
Fever[1] **or** signs/symptoms of lower respiratory illness (e.g. cough or shortness of breath)		A history of travel to or from an affected geographic area with widespread community transmission.[5]

AMERICAN OVERSIGHT

Patients with lower respiratory illness should also be evaluated for common causes of community-acquired pneumonia, guided by clinical presentation and epidemiologic and surveillance information. For these patients, testing for COVID-19 and other respiratory pathogens should be done simultaneously. Positive results for another respiratory pathogen (e.g., influenza) should not preclude testing for COVID-19 because co-infection may occur.

[1]Fever may be subjective or confirmed.

[2]For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation.

[3]Close contact is defined as:

A. being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period of time; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case

   OR

B. having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on).

If such contact occurs while not wearing recommended personal protective equipment or PPE (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection), criteria for PUI consideration are met.

See CDC's updated Interim Infection Prevention and Control Recommendations for Patients with Confirmed COVID-19 or Persons Under Investigation for COVID-19 in Healthcare Settings.

Data to inform the definition of close contact are limited. Considerations when assessing close contact include the duration of exposure (e.g., longer exposure time likely increases exposure risk) and the clinical symptoms of the person with COVID-19 (e.g., coughing likely increases exposure risk as does exposure to a severely ill patient). Special consideration should be given to healthcare personnel exposed in healthcare settings as described in CDC's Interim U.S. Guidance for Risk Assessment and Public Health Management of Healthcare Personnel with Potential Exposure in a Healthcare Setting to Patients with COVID-19.

[4]Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for patients in other countries.

[5]Countries with a CDC level 3 travel advisory. www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

[6]Category includes single or clusters of patients with severe acute lower respiratory illness (e.g., pneumonia, ARDS) of unknown etiology in which COVID-19 is being considered.

COVID-19 Case Definition:

Confirmed: A confirmed case is a person with laboratory confirmation of COVID-19 infection.

Probable: A probable case is a PUI with absent or inconclusive laboratory results for COVID-19 who is a close contact[2] of a laboratory-confirmed COVID-19 case.

Suspect: A suspect case is a PUI with COVID-19 laboratory tests pending.

AMERICAN OVERSIGHT

DRAFT

Investigations of PUI for COVID-19

- County epidemiology staff should investigate each report of possible COVID-19 to determine if the COVID-19 case or PUI criteria are met.
- County epidemiology staff should apply PUI criteria to make determinations for if public health laboratory testing is warranted. CHD staff may contact the Regional Epidemiologist and Laboratory Liaison, or Bureau of Epidemiology (BOE) on-call epidemiologist (if after hours), if they have any questions.
- Conduct patient/proxy or health care provider interviews and record reviews to obtain essential information, which includes history of present illness, medical history, travel dates, flight information, risk factors, differential diagnoses, and microbiology test results.
- Enter the PUI into Merlin (see 'Reporting COVID-19 PUI and Cases in Merlin') and complete extended data within 24 hours of receipt of information.

Infection Control Considerations

- PUIs should be asked to wear a surgical mask as soon as they are identified and be evaluated in a private room with the door closed, ideally an airborne infection isolation room, if available.
- While a PUI for COVID-19 is receiving health care, it is important that standard, contact, and airborne precautions are used.

Managing Pets of Cases

- Symptomatic persons with COVID-19 should avoid direct contact with pets as they would other household members. https://www.cdc.gov/coronavirus/2019-ncov/php/interim-guidance-managing-people-in-home-care-and-isolation-who-have-pets.html

Management of Cases and PUIs

- A PUI may be discharged before COVID-19 is ruled out. The decision to discharge a PUI for COVID-19 is up to the treating physician.
  - PUIs should be provided surgical masks and asked to isolate themselves at home until fever and symptom-free for 24 hours without antipyretic medication (acetaminophen, ibuprofen).
  - Close contacts of confirmed or probable cases who develop compatible symptoms should also be managed as COVID-19 PUIs. Specimens should be collected, and PUIS should be isolated at home or while seeking health care until COVID-19 testing is completed.
- For **confirmed** COVID-19 cases, the decision to discharge is based on public health and medical assessment with the BOE, including presence of symptoms and multiple negative specimens.

DRAFT

AMERICAN OVERSIGHT

Laboratory Testing and Specimen Collection

- If you have questions about laboratory testing or specimen collection for a patient, contact your Regional Epidemiologist and Laboratory Liaison (http://www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/_documents/investigation-unit-map.pdf) or the after-hours BOE on-call epidemiologist (850-245-4401).
- Specimens should be collected as soon as possible once a PUI is identified regardless of symptom onset.
- To increase the likelihood of detecting COVID-19, CDC recommends collecting both lower and upper respiratory specimens:
  - Upper respiratory: nasopharyngeal and oropharyngeal swabs in viral transport media, in one viral transport media specimen container; nasopharyngeal wash/aspirate or nasal aspirate may be used as well.
  - Lower respiratory: sputum, bronchial alveolar lavage/tracheal aspirate, in a sterile container
- If additional specimen types such as stool, urine, or whole blood are collected, they can be stored for potential future use.
- Ship specimens overnight for arrival to BPHL in Jacksonville, Miami, or Tampa following notification to the appropriate BPHL location.
- Include a completed DH-1847 form with the specimens.
  - **Merlin case number must be on the form for specimens to be tested** (Please note that if it's missing, testing could be delayed.)
  - All specimens can be listed on a single form
- **Shipments arriving on the weekend must be pre-authorized by BPHL.**
- Ship specimens using category B shipping containers.
- **Notification Process of Laboratory Results:** Emailed from Bureau of Public Health Laboratories until test results are available through Labware and Merlin.

Reporting COVID-19 PUIs and Cases in Merlin

No. I think it is a 38 F. Deceased Sounds like they are running slightly behind. When the specimens arrive can we get an estimated TAT? Thanks SO much for representing us so well.

If say 5-6 hours, probably sooner. If it gets to the lab soon. We have an extraction run that it can go on that we're holding up for it. If it gets delayed for several hours, they're going to start working on the mountain that we received overnight and will have to stop things to put it on.

Subject: RE: Testing of Asymptomatic Persons
Date: Wednesday, March 11, 2020 2:56:48 PM

This is what Lea found:

Symptomatic only

Per the FDA letter of authorization:
authorization under Section 564(c) of the
Act are met, I am authorizing the emergency use of the CDC 2019-nCoV Real-Time RT-PCR Diagnostic Panel (as described in the scope Section of this letter (Section II)) in individuals who
meet CDC criteria for 2019-nCoV testing for the presumptive detection of 2019-nCoV

CDC criteria is:

As availability of diagnostic testing for COVID-19 increases, clinicians will be able to access laboratory tests for diagnosing COVID-19 through clinical laboratories performing tests authorized by FDA under an Emergency Use Authorization (EUA). Clinicians will also be able to access laboratory testing through public health laboratories in their jurisdictions.

This expands testing to a wider group of symptomatic patients. Clinicians should use their judgment to determine if a patient has signs and symptoms compatible with COVID-19 and whether the patient should be tested. Decisions on which patients receive testing should be based on the local epidemiology of COVID-19, as well as the clinical course of illness. Most patients with confirmed COVID-19 have developed fever[1] and/or symptoms of acute respiratory illness (e.g., cough, difficulty breathing). Clinicians are strongly encouraged to test for other causes of respiratory illness, including infections such as influenza.

Epidemiologic factors that may help guide decisions on whether to test include: any persons, including healthcare workers[2], who have had close contact[3] with a laboratory-confirmed[4] COVID-19 patient within 14 days of symptom onset, or a history of travel from affected geographic areas[5] (see below) within 14 days of symptom onset.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 63-year old male New York resident who is currently in St. Johns County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case where this individual traveled from New York to attend Daytona Bike Week in Daytona, Florida. The New York Department of Health is leading the epidemiological investigation for this individual.
- A 56-year old male in Miami-Dade County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case.
- A 70-year old male in Broward County tested as positive. He is isolated and will continue to remain isolated until cleared by public health officials. This individual attended an Emergency Medical Services (EMS) Conference in Tampa, Florida. The epidemiological investigation is underway.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

COVID-19 Cases

AMERICAN OVERSIGHT

COVID Cases

*A known history of exposure to COVID-19 outside of the state.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified three positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov.**

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation,

AMERICAN OVERSIGHT

response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-

AMERICAN OVERSIGHT

risk or who have dependents or care for those with underlying conditions or vulnerabilities.

- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Awareness that depending on how the CHDs view this as essential travel or not, traveling to the certified training was scheduled for the end of this month into April. As we don't currently have a remote learning option, don't have testing options remotely and need hands on training for the soils piece of things, we are struggling to provide another option but postponing until later in April. Your thoughts would be appreciated. This could elevate to you and county health systems as soon as we make any announcement.

Good morning,

I need some guidance regarding the Regional Coordinator's ability to travel during this restriction. Part of their job requires them to travel to different clinics within their regions. However, under the current situation, I would feel better if they cancelled all travel until this restriction has been lifted.

Good morning,

AMERICAN OVERSIGHT

I need some guidance regarding the Regional Coordinator's ability to travel during this restriction. Part of their job requires them to travel to different clinics within their regions. However, under the current situation, I would feel better if they cancelled all travel until this restriction has been lifted.

Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.

AMERICAN OVERSIGHT

State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced 25 new positive cases of coronavirus disease (COVID-19) in Florida and the death of a Florida resident in California. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 68-year old female Orange County resident tested positive for COVID-19. This test was performed in California following travel to South Korea. This person is deceased.
- A 41-year old male in Orange County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 54-year old male in Osceola County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 51-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 67-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Kentucky.
- A 62-year old female in Manatee County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is not a travel related case.
- A 29-year old male in Volusia County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public

AMERICAN OVERSIGHT

health officials. This is a travel related case and is associated with close contact with a traveler from New York.

- A 69-year old male, non-Florida resident visiting from Europe tested positive for COVID-19 in Alachua County.
- A 59-year old female in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to New York.
- A 65-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to New York.
- A 42-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 77-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 59-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Spain.
- A 39-year old female in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 20-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Ireland.
- A 83-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 41-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

health officials. This is a travel related case and is associated with travel to Ireland.

- A 19-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Ireland.
- A 22-year old female in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 19-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. This is a travel related case and is associated with travel to Ireland.
- A 58-year old male in Broward County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 43-year old male in Miami-Dade County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.
- A 37-year old male in Palm Beach County has tested positive for COVID-19. This individual is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

International Travel

U.S. Department of State – Global Level 3 Health Advisory

The U.S. Department of State advises U.S. citizens to reconsider travel abroad due to the global impact of COVID-19. Many areas throughout the world are now experiencing COVID-19 outbreaks and taking action that may limit traveler mobility, including quarantines and border restrictions. Even countries, jurisdictions, or areas where cases have not been reported may restrict travel without notice.

CDC Guidelines

The Florida Department of Health is advising all individuals who have traveled internationally to follow **CDC guidelines**, summarized below:

- **Level 3 Travel Advisory:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic,

AMERICAN OVERSIGHT

immediately self-isolate and contact your County Health Department or health care provider.

- **Level 2 Travel Advisory and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and they should call ahead to a health care professional or their county health department before seeking treatment.
    - According to CDC, a cruise ship is defined as a passenger vessel involving the movement of large numbers of people in closed and semi-closed settings.

- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider or local County Health Department (CHD) and mention their recent travel or close contact, unless they are experiencing an emergency.

If a person has had close contact with someone showing these symptoms who has recently traveled from areas or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the County Health Department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled to Egypt for a cruise or tour on the Nile River in February or March 2020 to self-isolate for 14 days following their date of return to the United States, and if ill, immediately contact their CHD or health care provider. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with COVID-19, including 11 positive cases in Florida.

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.

- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

AMERICAN OVERSIGHT

Actions the State of Florida has taken on COVID-19:

- Governor Ron DeSantis issued Executive Order 20-52declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for COVID-19 in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.
- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.
- In an effort to be proactive, and only as a precautionary measure if COVID-19 evolves in Florida, Florida Virtual School (FLVS) has partnered with the Florida Department of Education to offer all school districts student support and teacher professional development tailored to the online learning environment. The Florida Department of Education in partnership with FLVS is training an additional 10,000 teachers statewide on the Virtual Teacher Training for COVID-19. Superintendents who are interested in offering their teachers the Virtual Teacher

AMERICAN OVERSIGHT

Training for COVID-19 should work with their County Virtual Principals to provide a list of teachers to FLVS through: https://www.flvs.net/FLVSTeacherTraining.
- Governor DeSantis directed the Florida Division of Emergency Management and the Agency for Health Care Administration to take action to restrict access to vulnerable populations for those who may have been exposed to COVID-19. The Governor also directed the Florida Department of Corrections to suspend visitation at state prisons for 30 days.

What You Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

AMERICAN OVERSIGHT

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

AMERICAN OVERSIGHT

From: NASPHV Group on behalf of Murphy, Julia
To: WPCG30@LISTSERV.CDC.GOV
Subject: Re: Update on Hong Kong Dog
Date: Friday, March 13, 2020 7:07:03 AM

Casey,
Thanks for this update. It seems as if this dog is still being housed at the animal keeping facility. Do we know the plan and conditions for this dog's release? Is there a particular concern that is informing his quarantine at this point? I continue to emphasize here, as we receive an increasing number of questions about this aspect of COVID-19 response, that there is no evidence that pets either become ill with COVID-19 or are any significant source for human illness and the best way pet owners can protect their pets is to protect themselves from becoming ill with COVID-19. For veterinarians, I have been encouraging review of the CDC guidance for workplace preparedness and offering thoughts about best practices associated with clients who present for appointments who are ill with symptoms compatible with COVID-19. Are there any other messages that we should be sharing with animal healthcare providers, shelters and/or pet owners at this time?
Thank you for your work.
Julie

On Fri, Mar 13, 2020, 1:46 AM Barton Behravesh, Casey (CDC/DDID/NCEZID/OD) <dlx9@cdc.gov wrote:

AMERICAN OVERSIGHT

takes 14 days or more for measurable levels of antibodies to be detected.

Another blood sample will be taken later for further testing.

Additionally, the department, together with the University of Hong Kong's School of Public Health, has conducted gene sequencing of the COVID-19 virus from the dog and its close human contacts who were confirmed to be infected.

They discovered that the viral sequences are very similar, indicating that the virus likely spread from the infected people to the dog.

The animal has not shown any signs of the disease and it is currently under quarantine at the animal keeping facility at the Hong Kong Port of Hong Kong-Zhuhai-Macao Bridge.

The department will continue to monitor the dog closely.

As COVID-19 is a new disease, it will work together with the Department of Health in handling relevant cases.

There currently is no evidence that pet animals can be a source of infection of COVID-19, the department added.

Pet owners should not be overly concerned and under no circumstances should they abandon their pets.

AMERICAN OVERSIGHT

Summary

- The Department of Health (DOH) will implement risk assessment and public health management of all persons potentially at risk for COVID-19 according to guidelines from The Centers for Disease Control and Prevention (CDC).
- DOH will only be implementing these guidelines prospectively for persons arriving in the United States, or otherwise identified as at-risk, on or after February 3, 2020.
- It is anticipated that in the coming weeks to months most persons needing to undergo active monitoring, or self-monitoring with public health supervision, will be in the medium-risk category.
- Contact investigations in response to confirmed cases and any person who potentially meet the high risk criteria should be discussed on a case-by-case basis with the Bureau of Epidemiology.
- County health officers and epidemiology staff should work with Central Office to plan for seeking public health orders for isolation or quarantine, in the event that these orders are needed to prevent the spread of disease.
- CDC and DOH guidance is interim and expected to change. Documents on this topic dated after the version date supersede this one.

Implementation in Florida

This document describes how DOH will implement the CDC guidelines described here: Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential 2019 Novel Coronavirus (2019-nCoV) Exposure in Travel-associated or Community Settings

Notification: The Bureau of Epidemiology will notify county health department primary epidemiology contacts of persons meeting criteria for monitoring within 24 hours of receiving the information about persons at-risk for COVID-19 from CDC.

Expectations: County health departments (CHDs) will initiate monitoring within 24 hours of receiving information about persons at-risk for COVID-19. Staff will conduct risk assessment and monitoring, as defined in the CDC and DOH guidance, for any at-risk persons that traveled from China or Iran, or part of a conveyance contact investigations identified by the department, whether sent from CDC or other reliable sources (i.e. CHD staff, hospitals/health care, etc.).

All persons traveling from countries with a level 3 travel advisory should self-isolate and practice social distancing for 14 days. Persons traveling from countries with a level 2 travel advisory or from cruises should self-monitor for symptoms. Unless specified above, CHDs are not asked to track/monitor these persons.

Summary Recommendations for Asymptomatic Persons with Potential COVID-19 Risk

Risk Category	Movement Restriction and Public Activities	Type of Monitoring Permissible	Travel Restrictions
High Risk	Quarantined (voluntary or under public health orders)	Direct active monitoring, once daily in-person, or remote equivalent (e.g. VDOT)	Controlled travel

AMERICAN OVERSIGHT

		temperature and symptom check	
Medium Risk	Remain at home or in a comparable setting to the extent possible. Avoid congregate settings, limit public activities, and practice social distancing. Persons are excluded from public places, schools, public conveyances, and work* for duration of the potential incubation period.	Category 1–Close contact of case or airline contact risk: Active monitoring, with daily phone call or text. Category 2–Including travelers from countries with Level 3 CDC travel advisory or identified as part of a cruise ship contact investigation: Self-monitoring with public health supervision. Phone calls or texts every 3rd day, including weekends. All persons should record their temperature twice daily.	Postpone additional travel after reaching their destination.
Low Risk	No restriction	Self-observation: Initial phone contact with county health department with guidance to immediately notify the CHD if fever or respiratory symptoms develop. Including travelers form countries with level 2 travel advisory and cruise passengers not included in a conveyance contact investigation	None

*In limited circumstances, as determined on a case-by-case basis through consultation with the Bureau of Epidemiology, persons may be allowed to work in a setting that provides clear distancing from others. If available, working remotely is requested.

AMERICAN OVERSIGHT

For all persons:

- Upon initial phone contact, re-evaluate the risk status of travelers using the CDC criteria. Note: Changing planes, without leaving the airport, in affected regions is not considered to be a risk for COVID-19.
- For persons who are determined not to be in Florida, notify Bureau of Epidemiology monitoring unit to transfer them to another jurisdiction.
- For invalid phone numbers and addresses, use Lexis-Nexis to attempt to find better information.
- For person who are unable to be contacted after multiple phone calls and emails. Document them as "contact attempted, no response" in Merlin.

For high risk persons:

- Contact the Bureau of Epidemiology for quarantine guidance.

For medium risk persons:

- Following initial phone contact, provide written material on symptom monitoring, phone call schedule, when and who to call with questions or to report illness, and a thermometer (if needed).
- If symptoms develop: Immediate isolation at home or a health care facility is necessary.
- If persons miss more than one monitoring day, or are otherwise not cooperative, please contact the Bureau of Epidemiology.

Persons in all risk levels should contact the established CHD point of contact if they experience fever (subjective or measured), cough, or shortness of breath.

The CHD should determine if the person is going to seek health care, and if so, coordinate prior notification of the facilities or emergency medical services staff to ensure immediate implementation of infection control precautions. Please refer to COVID-19 - Interim Enhanced Surveillance Guidance for County Health Departments for guidance on symptomatic persons under investigation (PUI).

The CHD should prepare to provide essential services (i.e. shelter, food, water, and other necessities) to persons in quarantine and in limited circumstances where no social support system exists, to persons under active monitoring or self-monitoring with public health supervision.

For persons who need to communicate in other languages, CHD staff should utilize the Language Line services by calling 866-874-3972. Staff should be prepared to provide the CHD client ID number, which can be provided by the CHD's budget office.

Tracking Monitoring of Persons At-Risk for COVID-19 in Merlin

See COVID-19 Merlin data management guidance.

AMERICAN OVERSIGHT

Example: Script for Calling Persons Undergoing Public Health Monitoring

Initial Contact:

If no one answers, leave the following message:
"Hello, my name is _____ and I'm calling from the Florida Department of Health in _____ County regarding an urgent health issue. Please call me at _____ as soon as possible"

If the contact answers:
Hello, my name is _____ and I'm calling from the Florida Department of Health in _____ County. May I speak to (the parent of) / Is this _____ ? We have been notified by the CDC that you have recently traveled to China. We're contacting persons who may have been exposed to the novel coronavirus, COVID-19, which is a new virus spreading from person-to-person in China and to a lesser extent, other countries, including the United States. Health experts are concerned because little is known about this new virus and it has the potential to cause severe illness and pneumonia in some people. The virus is spread through respiratory droplets of a contagious person. Symptoms develop anywhere from 2 to 14 days after exposure to the virus and include fever, cough and difficulty breathing. Do you have difficulty breathing, cold or flu like symptoms at this time?
If no:
We are asking that you remain at home and avoid public settings for the 14 days after your last exposure. This would mean through _____ [insert date 14 days from last exposure to case or date left China]. You'll also need to monitor for symptoms including checking your temperature twice a day. Please check once in the morning and then once in the evening. A staff member will be reaching out to you every third day to confirm your health status. Should you develop a fever or other symptoms such as cough or shortness of breath, please immediately contact us at _____ [county health department 24/7 number]. We will help to coordinate medical care if needed. Do you have any questions for me at this time?
To confirm, we will be monitoring your health status through_____ [insert date 14 days from exposure date]. Please don't hesitate to reach out to a staff member with any questions or concerns. Thank you for taking the time to speak with me.
If yes, follow protocol for PUI surveillance guidance.

Follow-up Contact:

If no one answers, leave the following message:
"Hello, my name is _____ and I'm calling from the Florida Department of Health in _____ County to check in as previously discussed. Please call me at _____ as soon as possible"

If the contact answers:
Hello, this is _____ from the Florida Department of Health in _____ County. I'm calling to check in on your health status as we planned. How have you been feeling? What have your temperatures been like? I, or another staff member, will be checking in again in three days. Please call us if anything changes prior to then. Thank you for taking the time to speak with me.

AMERICAN OVERSIGHT

Instructions for Person Under Public Health Monitoring

You've been identified as having traveled from mainland China outside Hubei Province or having been exposed to a person with symptomatic laboratory-confirmed COVID-19 infection. We are asking that you practice the following:

- Self-monitor for symptoms which include fever, cough and difficulty breathing
- Take your temperature twice a day
- Self-isolate at home and remain out of public places, workplaces and schools

Date Last Exposed: _____ **Monitor Health through Date: _____**

Take your temperature with an oral thermometer 2 times each day

- Carefully place the tip of the thermometer under the tongue
- Leave the thermometer in place with mouth closed for about a minute or until you hear the "beep"
- Remove the thermometer and read the temperature.
- Use the chart below to track the readings
- For infants, take their temperature as routinely directed by your pediatrician.
- **If you develop a fever (100.4°F/38°C or higher), cough or have difficulty breathing call the county health department immediately at _____**

Date	AM Temp	PM Temp

AMERICAN OVERSIGHT

与新型冠状病毒公共卫生有关的自我隔离须知

由于您从中国湖北省以外的地区返回美国或曾与有症状并确诊为新型冠状病毒的患者有过接触史，请您按照以下的要求监测自己：

- 请密切监测您的健康情况，包括发烧，咳嗽以及呼吸困难
- 每天用体温计测量两次体温
- 请您在家自我隔离，避免前往公共场所，工作场所以及学校

离开中国或与新冠患者接触的日期: _____ **自我隔离结束的日期:** _____

请您每天用口腔体温计测量两次体温

- 小心的将体温计前端放置于舌头下方
- 将体温计置于舌下后合拢嘴巴大约一分钟或者当你听到“哔”声
- 将体温计取出并且读取体温计上的数字
- 使用下面的图表帮助你追踪你的体温变化
- 对于婴幼儿，请遵循儿科医生的指示测量他们的体温。
- **如果您有发热(38°C/100.4°F或者更高), 咳嗽或呼吸困难的症状，请立刻致电当地的卫生部门** _____

Florida Department of Health Announces New Positive COVID-19 Cases in Florida

TALLAHASSEE — The Florida Department of Health has announced three new positive cases of coronavirus disease (COVID-19) in Florida. To keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available.

New Positive Cases

- A 57~~63~~-year old ~~male New York resident who is currently in St. Johns County has tested positive. He is isolated and will continue to remain isolated until cleared by public health officials. This is a travel-related case where this individual traveled from New York to attend Daytona Bike Week in Daytona, Florida. The New York Department of Health is leading the epidemiological investigation for this individual.~~
- male in Lee County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.

- A ~~56~~65-year old male in ~~Miami-Dade~~Broward County has tested positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. It is currently unclear whether this was a travel-related case; the epidemiological investigation is ongoing.~~This is a travel-related case.~~
-

- A ~~70~~61-year old male in Broward County tested ~~as~~ positive for COVID-19. He is isolated and will continue to remain isolated until cleared by public health officials. ~~This individual attended an Emergency Medical Services (EMS) Conference in Tampa, Florida. The epidemiological investigation is underway.~~ This is a travel related case and is associated with Port Everglades.

AMERICAN OVERSIGHT

Port Everglades Advisory

The Department, through an extensive epidemiological investigation, has identified four positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.

- The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.
- The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.
- The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.
- The Department is working in close consultation with the CDC on this investigation.
- CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.

EMS Conference and Daytona Bike Week Advisories

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with Daytona Bike Week 2020, which is currently underway and scheduled from March 6-15, 2020, in Daytona, Florida.

The Department, through an extensive, ongoing epidemiological investigation, has identified a positive COVID-19 case that may have been associated with an EMS Conference held from March 4-6, 2020, in Tampa, Florida.

The Department recommends all individuals experiencing symptoms who attended either of these events immediately contact their County Health Department or health care provider and self-isolate for 14 Days.

International Travel Advisory

The Department is advising all individuals who have traveled internationally to follow the **new Centers for Disease Control and Prevention (CDC) guidelines**, summarized below:

- **Level 3:** CDC recommends 14-day self-isolation and social distancing upon return to the United States. Social distancing includes avoiding going out in public and close personal interactions. If you become symptomatic, immediately self-isolate and contact your County Health Department (CHD) or health care provider.
- **Level 2 and Cruises:** Travelers should monitor their health and limit interactions with others for 14 days after returning to the United States. If you become symptomatic, immediately self-isolate and contact your CHD or health care provider.
- For more information regarding current CDC travel advisories related to COVID-19, visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html

~~**Port Everglades Advisory**~~

~~The Department, through an extensive epidemiological investigation, has identified three positive COVID-19 cases associated with Port Everglades in Broward County, Florida. All three cases are connected to or employed by Metro Cruise Services – a company that operates at Port Everglades.~~

- ~~The Department recommends all individuals experiencing symptoms who have recently traveled through Port Everglades to immediately contact their CHD or health care provider and self-isolate for 14 Days.~~
- ~~The Department also recommends employees of Metro Cruise Services at Port Everglades with any association to these cases self-isolate at home.~~
- ~~The Department is working to connect with all employees at Metro Cruise Services who may have come into contact with the three individuals who have tested positive for COVID-19 to provide the employees with the appropriate guidance and monitoring.~~
- ~~The Department is working in close consultation with the CDC on this investigation.~~
- ~~CDC recommends that individuals with recent travel history on a cruise monitor their health for 14 days and, if they develop symptoms, immediately self-isolate and contact their CHD or health care provider.~~

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States

AMERICAN OVERSIGHT

recently developed symptoms and have been confirmed to be infected with COVID-19, including two positive cases in Florida.

COVID-19 Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

- Governor Ron DeSantis issued Executive Order 20-52 declaring a State of Emergency for COVID-19.
- Governor Ron DeSantis directed the Florida Division of Emergency Management to activate to Level II to coordinate the state's response to COVID-19.
- Governor Ron DeSantis issued Executive Order 20-51 directing the State Surgeon General to declare a Public Health Emergency.
- State Surgeon General Dr. Scott Rivkees declared a Public Health Emergency for the novel coronavirus in Florida.
- Established an Incident Management Team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and health care stakeholder conference calls to provide statewide updates on the current outbreak situation, response actions and guidance for pandemic planning. Over five hundred participants joined these calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities and hospitals.
- Established a public call center for questions regarding COVID-19.
- Developed and distributed an updated COVID-19 presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for ongoing monitoring and coordination with the CDC regarding epidemiological activities.

AMERICAN OVERSIGHT

- Distributed CDC Interim Guidance for public health personnel evaluating Persons Under Investigation (PUIs) and asymptomatic close contacts of confirmed cases at their home or non-home residential settings to CHDs.
- Distributed the updated Clinician Screening Tool for identifying PUIs for COVID-19 and a health care provider letter regarding Enhanced Surveillance and Preparedness for COVID-19 to associations, licensed providers, Health Care Coalitions and CHDs.
- Implemented testing at all three State Public Health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

AMERICAN OVERSIGHT

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local CHD and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the CHD. The health care provider will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Good morning Scott. I know you are drowning. Do you have an anticipated timeline for updating surveillance guidance to include use of Text Illness Monitoring (TIM CDC system) and VDOT? I think with updated guidance I will be able to update the consent form to meet the needs/wants of legal.

Coronavirus Disease 2019 (COVID-19)

Implementation of Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential COVID-2019 Exposure in Travel-associated or Community Settings for Asymptomatic Persons

Version 3 | March 13, 2020

Florida HEALTH

Summary

- The Department of Health (DOH) will implement risk assessment and public health management of all persons potentially at risk for COVID-19 according to guidelines from The Centers for Disease Control and Prevention (CDC).
- DOH will only be implementing these guidelines prospectively for persons arriving in the United States, or otherwise identified as at-risk, on or after February 3, 2020.
- It is anticipated that in the coming weeks to months most persons needing to undergo active monitoring, or self-monitoring with public health supervision, will be in the medium-risk category.
- Contact investigations in response to confirmed cases and any person who potentially meet the high risk criteria should be discussed on a case-by-case basis with the Bureau of Epidemiology.
- County health officers and epidemiology staff should work with Central Office to plan for seeking public health orders for isolation or quarantine, in the event that these orders are needed to prevent the spread of disease.
- CDC and DOH guidance is interim and expected to change. Documents on this topic dated after the version date supersede this one.

Implementation in Florida

This document describes how DOH will implement the CDC guidelines described here: Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential 2019 Novel Coronavirus (2019-nCoV) Exposure in Travel-associated or Community Settings

Notification: The Bureau of Epidemiology will notify county health department primary epidemiology contacts of persons meeting criteria for monitoring within 24 hours of receiving the information about persons at-risk for COVID-19 from CDC.

Expectations: County health departments (CHDs) will initiate monitoring within 24 hours of receiving information about persons at-risk for COVID-19. Staff will conduct risk assessment and monitoring, as defined in the CDC and DOH guidance, for any at-risk persons that traveled from China or Iran, or part of a conveyance contact investigations identified by the department, whether sent from CDC or other reliable sources (i.e. CHD staff, hospitals/health care, etc.).

All persons traveling from countries with a level 3 travel advisory should self-isolate and practice social distancing for 14 days. Persons traveling from countries with a level 2 travel advisory or from cruises should self-monitor for symptoms. Unless specified above, CHDs are not asked to track/monitor these persons.

Summary Recommendations for Asymptomatic Persons with Potential COVID-19 Risk

Risk Category	Movement Restriction and Public Activities	Type of Monitoring Permissible	Travel Restrictions
High Risk	Quarantined (voluntary or under public health orders)	Direct active monitoring, once daily in-person, or remote equivalent (e.g. VDOT)	Controlled travel

AMERICAN OVERSIGHT

		temperature and symptom check	
Medium Risk	Remain at home or in a comparable setting to the extent possible. Avoid congregate settings, limit public activities, and practice social distancing. Persons are excluded from public places, schools, public conveyances, and work* for duration of the potential incubation period.	Category 1–Close contact of case or airline contact risk: Active monitoring, with daily phone call or text. Category 2–Including travelers from countries with Level 3 CDC travel advisory or identified as part of a cruise ship contact investigation: Self-monitoring with public health supervision. Phone calls or texts every 3rd day, including weekends. All persons should record their temperature twice daily.	Postpone additional travel after reaching their destination.
Low Risk	No restriction	Self-observation: Initial phone contact with county health department with guidance to immediately notify the CHD if fever or respiratory symptoms develop. Including travelers form countries with level 2 travel advisory and cruise passengers not included in a conveyance contact investigation	None

*In limited circumstances, as determined on a case-by-case basis through consultation with the Bureau of Epidemiology, persons may be allowed to work in a setting that provides clear distancing from others. If available, working remotely is requested.

AMERICAN OVERSIGHT

For all persons:

- Upon initial phone contact, re-evaluate the risk status of travelers using the CDC criteria. Note: Changing planes, without leaving the airport, in affected regions is not considered to be a risk for COVID-19.
- For persons who are determined not to be in Florida, notify Bureau of Epidemiology monitoring unit to transfer them to another jurisdiction.
- For invalid phone numbers and addresses, use Lexis-Nexis to attempt to find better information.
- For person who are unable to be contacted after multiple phone calls and emails. Document them as "contact attempted, no response" in Merlin.

For high risk persons:

- Contact the Bureau of Epidemiology for quarantine guidance.

For medium risk persons:

- Following initial phone contact, provide written material on symptom monitoring, phone call schedule, when and who to call with questions or to report illness, and a thermometer (if needed).
- If symptoms develop: Immediate isolation at home or a health care facility is necessary.
- If persons miss more than one monitoring day, or are otherwise not cooperative, please contact the Bureau of Epidemiology.

Persons in all risk levels should contact the established CHD point of contact if they experience fever (subjective or measured), cough, or shortness of breath.

The CHD should determine if the person is going to seek health care, and if so, coordinate prior notification of the facilities or emergency medical services staff to ensure immediate implementation of infection control precautions. Please refer to COVID-19 - Interim Enhanced Surveillance Guidance for County Health Departments for guidance on symptomatic persons under investigation (PUI).

The CHD should prepare to provide essential services (i.e. shelter, food, water, and other necessities) to persons in quarantine and in limited circumstances where no social support system exists, to persons under active monitoring or self-monitoring with public health supervision.

For persons who need to communicate in other languages, CHD staff should utilize the Language Line services by calling 866-874-3972. Staff should be prepared to provide the CHD client ID number, which can be provided by the CHD's budget office.

Tracking Monitoring of Persons At-Risk for COVID-19 in Merlin

See COVID-19 merlin data management guidance.

AMERICAN OVERSIGHT

Example: Script for Calling Persons Undergoing Public Health Monitoring

Initial Contact:

If no one answers, leave the following message:
"Hello, my name is _____ and I'm calling from the Florida Department of Health in _____ County regarding an urgent health issue. Please call me at _____ as soon as possible"

If the contact answers:
Hello, my name is _____ and I'm calling from the Florida Department of Health in _____ County. May I speak to (the parent of) / Is this _____ ? We have been notified by the CDC that you have recently traveled to China. We're contacting persons who may have been exposed to the novel coronavirus, COVID-19, which is a new virus spreading from person-to-person in China and to a lesser extent, other countries, including the United States. Health experts are concerned because little is known about this new virus and it has the potential to cause severe illness and pneumonia in some people. The virus is spread through respiratory droplets of a contagious person. Symptoms develop anywhere from 2 to 14 days after exposure to the virus and include fever, cough and difficulty breathing. Do you have difficulty breathing, cold or flu like symptoms at this time?
If no:
We are asking that you remain at home and avoid public settings for the 14 days after your last exposure. This would mean through _____ [insert date 14 days from last exposure to case or date left China]. You'll also need to monitor for symptoms including checking your temperature twice a day. Please check once in the morning and then once in the evening. A staff member will be reaching out to you every third day to confirm your health status. Should you develop a fever or other symptoms such as cough or shortness of breath, please immediately contact us at _____ [county health department 24/7 number]. We will help to coordinate medical care if needed. Do you have any questions for me at this time?
To confirm, we will be monitoring your health status through_____ [insert date 14 days from exposure date]. Please don't hesitate to reach out to a staff member with any questions or concerns. Thank you for taking the time to speak with me.
If yes, follow protocol for PUI surveillance guidance.

Follow-up Contact:

If no one answers, leave the following message:
"Hello, my name is _____ and I'm calling from the Florida Department of Health in _____ County to check in as previously discussed. Please call me at _____ as soon as possible"

If the contact answers:
Hello, this is _____ from the Florida Department of Health in _____ County. I'm calling to check in on your health status as we planned. How have you been feeling? What have your temperatures been like? I, or another staff member, will be checking in again in three days. Please call us if anything changes prior to then. Thank you for taking the time to speak with me.

AMERICAN OVERSIGHT

Instructions for Person Under Public Health Monitoring

You've been identified as having traveled from mainland China outside Hubei Province or having been exposed to a person with symptomatic laboratory-confirmed COVID-19 infection. We are asking that you practice the following:

- Self-monitor for symptoms which include fever, cough and difficulty breathing
- Take your temperature twice a day
- Self-isolate at home and remain out of public places, workplaces and schools

Date Last Exposed: _____ **Monitor Health through Date:** _____

Take your temperature with an oral thermometer 2 times each day

- Carefully place the tip of the thermometer under the tongue
- Leave the thermometer in place with mouth closed for about a minute or until you hear the "beep"
- Remove the thermometer and read the temperature.
- Use the chart below to track the readings
- For infants, take their temperature as routinely directed by your pediatrician.
- **If you develop a fever (100.4°F/38°C or higher), cough or have difficulty breathing call the county health department immediately at** _____

Date	AM Temp	PM Temp

AMERICAN OVERSIGHT

与新型冠状病毒公共卫生有关的自我隔离须知

由于您从中国湖北省以外的地区返回美国或曾与有症状并确诊为新型冠状病毒的患者有过接触史，请您按照以下的要求监测自己：

- 请密切监测您的健康情况，包括发烧，咳嗽以及呼吸困难
- 每天用体温计测量两次体温
- 请您在家自我隔离，避免前往公共场所，工作场所以及学校

离开中国或与新冠患者接触的日期: _____ **自我隔离结束的日期:** _____

请您每天用口腔体温计测量两次体温

- 小心的将体温计前端放置于舌头下方
- 将体温计置于舌下后合拢嘴巴大约一分钟或者当你听到“哔”声
- 将体温计取出并且读取体温计上的数字
- 使用下面的图表帮助你追踪你的体温变化
- 对于婴幼儿，请遵循儿科医生的指示测量他们的体温。
- **如果您有发热(38°C/100.4°F或者更高)，咳嗽或呼吸困难的症状，请立刻致电当地的卫生部门** _____

AMERICAN OVERSIGHT

Technical Appendix A: Investigation and Reporting for Asymptomatic Travelers and Individuals at Risk for Developing COVID-19

- COVID-19 cases are being auto-created in Merlin for asymptomatic travelers arriving in Florida from mainland China. These cases are generated using the information DOH receives via Epi-X notifications. **CHDs will receive an automated email each time one of these cases is created.**
  - These individuals are classified as medium-risk unless and until the investigating CHD has contacted the individual and determined otherwise.
  - The automated email will contain the Merlin case ID, the individual's first and last name, address, phone number, and email (as available).
  - The information included in Merlin for these individuals reflects all the information that DOH received from CDC via Epi-X. DOH will not be able to provide any additional or clarifying information on these individuals.
  - These cases will automatically have **DX status set to "not a case" and survey set to "monitoring."**

  - Initial investigation type will be set to **"monitoring a person possibly exposed to 2019-nCoV."** Type of contact for travelers returning from mainland China or other impacted areas will be **"travel exposure."**
- CHDs should create COVID-19 cases for all other high, medium, or low-risk individuals the CHD is notified of that require monitoring.
- CHDs should select **"travel exposure"** for individuals whose risk is primarily dependent on exposure while he or she was in mainland China. These are individuals who are not known to have had contact with confirmed cases, which is why "airline/vessel contact" or "close contact of a case" should not be used in these circumstances.
- CHDs should select **"airline/vessel contact"** for individuals who had contact with a COVID-19 case on an airline, cruise ship, or other vessel.
- CHDs should select **"close contact of a case"** for individuals who had close contact with a COVID-19 case that did not occur on an airline, cruise ship, or other vessel.
- CHDs should record **DGMQ ID** (if available), **last date potentially exposed, arrival date,** and **exposure risk category.**
  - These fields will should already be complete for auto-created cases, but can be updated if needed. Auto-created cases for travelers from mainland China will have and exposure risk category set to **"medium risk category 2."**

AMERICAN OVERSIGHT

Investigation Type

This survey is for contact monitoring. If you are investigating a symptomatic person as a

Initial investigation type:	Monitoring a person possibly exposed to 2019-nCoV		
Type of contact:	Travel exposure	DGMQ ID:	12345
Exposure risk category:	Medium risk category 2		
Last date potentially exposed:	02/04/2020		
Arrival date:	02/04/2020		

- The exposure risk category should not change for these auto-created cases until the CHD has made contact with the individual and gathered enough information to determine that he or she should be assigned a different risk category.

- If, after making contact with the individual, you are unsure of what exposure risk category they should be assigned, contact your Regional Epidemiologist and Laboratory Liaison. **Do not select "unknown."**
- The section, **"contact monitoring"** will be populated with one row (or column, if you are viewing from outbreak roster) for each of the 14 days since the last potentially exposed date. This table should be updated each day during the 14-day period, even if you do not attempt contact.
- If the CHD was not notified of the individual on day 1 of his or her monitoring, please select, **"contact not attempted"** for the day (or days) where the individual was not being monitored by the CHD. Leave "contact method" blank for days where contact was not attempted. **This is the only circumstance where it is acceptable to leave "contact method" blank.**

Days since last exposure		Outcome of follow up	Contact method
Day 1:	Feb 05, 2020	Contact not attempted	

- If you attempt to contact the individual but are not able to reach him or her, select **"contact attempted: no response"** and a **contact method** (either "phone" or "in person").

Days since last exposure		Outcome of follow up	Contact method
Day 1:	Feb 05, 2020	Contact not attempted	
Day 2:	Feb 06, 2020	Contact attempted: no response	Phone

- When you do successfully contact the individual, you should determine if the individual is:
  - **Asymptomatic or has unrelated symptoms** (select, "contacted: healthy/unrelated symptoms"). Make sure you also select a contact method ("in person" or "phone"). **If you successfully contacted the individual both on the phone and in person that day, select "in person" for the contact method.**

AMERICAN OVERSIGHT

Days since last exposure		Outcome of follow-up	Contact method
Day 1:	Feb 05, 2020	Contact not attempted	
Day 2:	Feb 06, 2020	Contact attempted: no response	Phone
Day 3:	Feb 07, 2020	Contacted: healthy/unrelated symptoms	In person

- **Symptomatic, but does not meet the criteria of a PUI** because he or she has not been hospitalized (select, "contacted: symptomatic – not a PUI"). Make sure you also select a contact method ("in person" or "phone").

Days since last exposure		Outcome of follow up	Contact method
Day 1:	Feb 05, 2020	Contact not attempted	
Day 2:	Feb 06, 2020	Contact attempted: no response	Phone
Day 3:	Feb 07, 2020	Contacted: healthy/unrelated symptoms	In person
Day 4:	Feb 08, 2020	Contacted: symptomatic - not a PUI	Phone

- If you contact the individual and you believe they meet PUI criteria, or the individual is symptomatic and you aren't sure if they meet PUI criteria, contact your Regional Epidemiologist and Laboratory Liaison before recording, **"contacted: symptomatic – PUI"** and a contact method. When you make this selection and save, **the survey will automatically switch from "monitoring" to "case." See "Interim Enhanced Surveillance Guidance for County Health Departments" for further instructions.** You won't be able to see the "contact monitoring" section, but that information is still stored in Merlin. To access or edit that information, simply switch the survey from "case" back to "monitoring" and click save.

Case Information

FL Disease Code: Coronavirus, Novel 2019 (2019-nCoV) - 00342

DX Status: Not a Case | Not a Case

Primary Reviewer(s): **KATIE KENDRICK**

Survey: Monitoring

- **When you've reached the end of the 14-day monitoring period, you should have an outcome selected for each of the 14 days.** You will also need to select a "final outcome" for the individual. **What you select as the "final outcome" should be reflective of the outcome of your follow-up on day 14.**
  - If you select "contacted: health/unrelated symptoms" for the outcome of follow-up on day 14, you should select **"monitoring completed: healthy/unrelated symptoms"** for your final outcome.

Day 14: Feb 18, 2020	Contacted: healthy/unrelated symptoms	Phone
Final outcome:	Monitoring completed: healthy/unrelated symptoms	

  - If you select, "contacted: symptomatic – not a PUI" for the outcome of follow-up on day 14, you should select, **"monitoring completed: symptomatic – not a PUI"** for your final outcome.

Commented [MJ1]: Do we have written guidance for this circumstance? I would think these individuals would need additional follow-up.

AMERICAN OVERSIGHT

Day 14: Feb 18, 2020	Contacted: symptomatic - not a PUI	Phone
Final outcome:	Monitoring completed: symptomatic - not a PUI	

- If, after speaking with the individual, you've identified that he or she **did not have travel to mainland China or another affected area or contact with a confirmed COVID-19 case on an airline or vessel**, update the exposure risk category to **"no identifiable risk."**
  - Record "contacted: healthy/unrelated symptoms" and the appropriate contact method for the day you made contact with the individual. For the final outcome, select **"no monitoring needed."** You may leave the rest of the table blank.

Days since last exposure	Outcome of follow-up	Contact method
Day 1:	Contacted: healthy/unrelated symptoms	Phone
Day 2:		
Day 3:		
Day 4:		
Day 5:		
Day 6:		
Day 7:		
Day 8:		
Day 9:		
Day 10:		
Day 11:		
Day 12:		
Day 13:		
Day 14:		
Final outcome:	No monitoring needed	

- If, during the 14-day monitoring period, the individual needs to be **transferred to another state**, an interstate notification will need to be sent. Email HSD00EpiMonitoring@flhealth.gov and include the individual's Merlin case ID in your email. There is no need to copy your regional epidemiologist. In Merlin, select a final outcome of **"out of jurisdiction."**
- If during the 14-day monitoring period the individual needs to be **transferred to another county within Florida**, transfer the case to the appropriate county and notify the county's primary epidemiologists by email.
- When the 14-day monitoring period has ended and you have determined the individual does not meet the criteria for a PUI, or the individual has moved outside of Florida's jurisdiction, review for common errors:
  - **Common Error 1: Final outcome doesn't match exposure risk category.**
    - A final outcome of "no monitoring needed" is only appropriate for the exposure risk category of "no identifiable risk." If, after speaking with the individual, you've identified that he or she did not have travel to China, make sure to update the exposure risk category to "no identifiable risk" before selecting the final outcome "no monitoring needed." Individuals

AMERICAN OVERSIGHT

who have low, medium, or high-risk exposure must have a more specific final outcome to explain why they do not required additional monitoring such as:

- Monitoring completed: healthy/unrelated symptoms
- Monitoring completed: symptomatic – not a PUI
- Lost to follow-up
- Out of jurisdiction

- **Common Error 2: Unknown is selected for the individual's exposure risk category.**
  - For auto-created cases for asymptomatic travelers returning from mainland China, the exposure risk category is assumed to be "medium risk category 2." The exposure risk category should not change until the CHD has made contact with the individual and gathered enough information to determine that he or she should be assigned a different risk category. If you are unable to make contact with the individual, leave the exposure risk category as "medium risk category 2," do not select "unknown."
  - If you have made contact with the individual but are not what risk category to assign, contact your Regional Epidemiologist and Laboratory Liaison.
- **Common Error 3: Selecting a final outcome before the monitoring period has ended.** For individuals requiring monitoring, the final outcome should not be completed until the end of the 14-day monitoring period, **unless an individual was transferred to another jurisdiction.**

- Once you've reviewed for common errors, report the case to remove it from your task list.

Thank you for the update Dr. Thomas.

- Was he symptomatic on the yesterday's flight?
- Can you provide the flight information for March 9? Did he fly while symptomatic?
- After symptoms have resolved, or he is feeling better and afebrile for at least 24 hours with only a lingering cough, he can get tested for clearance purposes. NP and OP swabs should be collected every other day until there are two consecutive negative results.

Subject: Visit went well- covid

Good afternoon,
We are heading back from client home. All phone numbers that we had were incorrect.
The client indicated that his onset of illness was March 9th- fever 101 F and slight dry cough, no shortness of breath or difficulty breathing. He has been in Palm From Feb 23rd until March 9th. He left Palm Beach for Ny on March 9th and felt unwell and decided to get evaluated at Ny hospital. Chest X-ray negative, flu negative and doc decided to just test for Covid. Covid was incidental finding. He says he has not been coughing and did not have fever again without use of antipyretics.

AMERICAN OVERSIGHT

He went to hospital since he had history of pneumonia 2 yrs ago and was concerned that he might be having one again, so went to get checked out, he really didn't feel sick per say.
He attended synagogue in Palm Beach on March 6 and 7th. Hosted a dinner with friends at his house on Feb 27th. These are only group settings in Palm Beach. While in New York they didn't do much between March 9-11th.
They provided good phone numbers and email and are equipped with FaceTime feature. They are compliant with home quarantine. And have plenty of food at home. Will fill in with additional info as needed. They were provided with thermometers and face masks.
He asked if he needed to be retested to be clear when 14 days quarantine is up? If so how and where? They don't have a provider in Palm Beach county.
Also we are provided with information on closest hospitals to them in the event they needed to go to the hospital as well as our 24/7 phone contact.

Hi Alex,
We have not been in any communications with Mara- lago from the EPI side. I have cc'd Dr

AMERICAN OVERSIGHT

Blackmore and Dr Schmitz here with the below question. I am going to circle back with you.
We were only told to contact 1 person, and only spoke with him concerning his family.

AMERICAN OVERSIGHT

Hi Alex -- sorry I missed your call. Thank you for calling me back.

My question is whether the county or state have ordered any public or quasi-public places to disinfect or take extra precautions because of the coronavirus.

In particular, have any actions been directed at Mar-a-Lago, or the Breakers or the Everglades Club on Palm Beach?

thank you,

Lori Rozsa

Hi Maria,

The woman presented to a healthcare facility (hospital) that has the capability to test. For whatever reason, they chose not collect samples and to run the test. I don't see anywhere in our guidance where we are to collect samples from these folks.

I have copied Carina Blackmore and Scott Pritchard to provide assurance.

Our current priority is as follows.

1. Nursing homes and ALFs which we have several with respiratory illness (likely flu) but we will be testing for COVID – don't want to miss these folks
2. Other outbreak facilities – we investigated Devareaux today
3. Contacts to known cases of COVID – have and will swab as resources allow
4. Travel to level three countries; China, Europe and Iran – have and will swab as resources allow
5. Travel anywhere else. See the map below. The rest of the world is orange which would include the states of NY, Washington and California.

Subject: Woman From NY

Good afternoon,

I heard about the woman from NY who presented to Viera with fever, cough, and nausea and who wasn't tested.

Given the guidelines and the fact that NY has community spread, don't we need to test her?

I think we need to clarify that 3rd bullet on the new guidelines – travel from affected geographic with widespread community transmission. The CDC shows NY, WA, and CA as having community transmission.

COVID-19 Brochure.pdf

Dear Colleague,

Join us at the CoVID-19 Summit scheduled for June 17-19 in Washington, DC.

The 3-day event will bring together Public health Officials, Emergency Preparedness Leaders, Academia, Education, Business,
Public and Private sector Partners.
Delegates will have access to CoVID-19 experts from around the world to address the issues of continued planning for the
possibility of a more severe outbreak of human CoVID-19 later this year.

CoVID-19 Summit present a clear, easy-to-remember overview of prevention, preparedness, response and recovery. The event includes an all-day hands-on workshop.

To view the agenda, please visit www.cov-s.com.

To register, call me at (703) 466-0011, or download a registration form: www.cov-s.com

I look forward to speaking with you.

Thank You.

CORONAVIRUS PREPAREDNESS

SUMMIT & WORKSHOP

WASHINGTON, DC JUNE 17-19, 2020

CONFERENCE
JUNE 17-18

WORKSHOP
JUNE 19

COVID-19

Show you care. Meet your planning deadlines. Engage staff & suppliers and learn how to work with community, state & federal agencies to survive & recover from a pandemic.

Know How To Respond
Recognize problems earlier. Make the right decision faster.

Plan To Continue
Maintain cash flow and work flow. Keep the learning process alive.

How to Plan
Make everyone a stakeholder. Spell out roles and responsibilities

Protect Your Community
Know your resources. Test them against your toughest scenarios.

Top leaders and key decision-makers of major companies representing a broad range of industries will meet with distinguished scientists, public health officials, law enforcers, first responders, and other experts to discuss pandemic prevention, preparedness, response and recovery at the 1st Coronavirus Preparedness Summit and Workshop.

At the summit, attendees will be able to draw on first-hand best practices to create the solid business continuity plans that their companies and organizations need in order to prepare for, respond to, and survive a pandemic.

Well-known emergency responders, heads of hospitals from around the world, and vaccine manufacturers will speak at this summit.

Topics Include

- Mass Fatality Management Planning
- Country Report & Situations Update
- Surveillance and Data Management
- Preparing Communities Strategies; Local Partnership and Participation
- Delivery of Vaccine and Antiviral Medication
- Benefit-Risk Assessment: Public Health, Industry and Regulatory Perspectives
- Prevention Education Efforts and Risk Communication
- Command, Control and Management
- Emergency Response Management
- Business-Based Planning
- School-Based Planning
- Community-Based Planning

Concurrent Breakout Session #1

Mass Fatality Management Planning

- Develop and maintain plans, procedures, programs, and systems
- Develop and implement training and exercise programs
- Direct fatality management tactical operations
- Activate fatality management operations
- Conduct morgue operations
- Manage ante-mortem data
- Conduct final disposition

Concurrent Breakout Session #2

Psychological Issues

- Public's distress of exposure and safety
- Breakdown of public services, utilities
- Medical supplies shortage
- Unwillingness to follow government orders

Concurrent Breakout Session #3

Business Continuity Planning

- Allocate resources to protect your employees & customers during a pandemic
- Find out which business risks are insured
- Ensure safe travel during a pandemic
- Identify when to reduce or even close operations

Concurrent Breakout Session #4

Continuity of Operations (COOP) and Continuity of Government Planning

- When 50% or more of employees are out sick or taking care of their sick ones
- When Coronavirus pandemic unfold in two or three successive waves in a calendar year
- Disruptions to public, private and critical infrastructure under-mining your essentials functions

Concurrent Breakout Session #5

Emergency Management Services

- Prioritize antivirals & personal protective equipment for essential workforce
- Overcome reduced response capacity caused by mechanical failure & a possible 30-40 percent drop in staff, to maintain continuous operations
- Protect the emergency management response operations center
- Manage interruptions in food, fuel & essentials supply chains & establish stockpiles
- Manage panic caused by sudden disruption of services & interruptions in essential goods & services

CORONAVIRUS PREPAREDNESS SUMMIT & WORKSHOP

WASHINGTON, DC JUNE 17-19, 2020

COVID-19

CONFERENCE
JUNE 17-18

WORKSHOP
JUNE 19

Concurrent Breakout Sessions to choose from...

Breakout 1: **Mass Fatality Management Planning**
Breakout 2: **Psychological Issues**
Breakout 3: **Business Continuity Planning**
Breakout 4: **Continuity of Operations (COOP) and Continuity of Government Planning**
Breakout 5: **Emergency Management Services**
Breakout 6: **Law Enforcement Agencies**
Breakout 7: **First Responders: Fire Department**
Breakout 8: **First Responders: Public Works**
Breakout 9: **911 Call Center Services**
Breakout 10: **Hospital and Emergency Medical Services**
Breakout 11: **Workplace Planning**
Breakout 12: **School/University Pandemic Planning**
Breakout 13: **Airlines, Travel, Airport, Quarantine and Border Health Services**
Breakout 14: **Infectious Medical Waste**
Breakout 15: **Coronavirus: Agriculture Perspective & Interventions**
and many more....

For more info please visit
CoV-S.com

Concurrent Breakout Session #6

Law Enforcement Agencies

- Protect police forces from falling ill & from being hurt in civil disturbances
- Protect the delivery of vaccines & essential goods & services.
- Manage a surge in crime & meet routine requests at the same time
- Control & diffuse social unrest & public disorder
- Isolate prisons & other facilities

Concurrent Breakout Session #7

First Responders: Fire Department

- Protect fire department first responders from falling ill & from being hurt in civil disturbances
- Continue to respond to routine fire outbreaks while responding to pandemic-related calls
- Effectively transition into All-Hazards Incident Management Responders
- Effectively undertake mass vaccinations
- Enforce quarantines

Concurrent Breakout Session #8

First Responders: Public Works

- Protect public works first responders from falling ill or being hurt in civil disturbances
- Control traffic, evacuation & mass transportation
- Ensure the minimal delivery of clean water & sanitation services
- Ensure the stability of vital communications networks
- Overcome an overwhelmed telecommunications network caused by a surge in telework employees, homebound calls, and the increased search for public services

Concurrent Breakout Session #9

911 Call Center Services

- Effectively manage the 911 call center during the crisis
- Develop call center surge capacity
- Secure call center operations
- Anticipate technical problems
- Ensure that frequent, honest & reliable information is released to the public

Concurrent Breakout Session #10

Hospital and Emergency Medical Services

- Prioritize the use of antivirals for the essential workforce
- Anticipate interruptions in food, fuel and essentials supply chains & establish stockpiles
- Plan for reduced response capacity due to mechanical failure & lack of personnel
- Maintain continuous operations during a pandemic
- Plan for 30-40 percent drop in labor force
- Protect the emergency operations center

Concurrent Breakout Session #11

Workplace Planning

- Effectively work with 30-40 percent less employees. Account for your employees.
- Establish remote offices & flexible work plans; identify the business functions that can be outsourced.
- Secure your workplaces.
- Train your workers to screen for symptoms & know what to do when workers fall ill.

CORONAVIRUS PREPAREDNESS
SUMMIT & WORKSHOP

WASHINGTON, DC JUNE 17-19, 2020

CONFERENCE
JUNE 17-18

WORKSHOP
JUNE 19

COVID-19

Team Discount > Register three people from your ogranization, and the 4th person attends for FREE!

FACT This is the place where you can ask the tough questions to doctors who have treated some of the fatal human cases of COVID-19.

Top Five Reasons to Attend the Summit

- Gain a broad bird's eye view of the global CoV situation.
- Get the freshest updates from hard-to-reach country experts.
- Learn how your company/agency can prepare for a pandemic.
- Establish contacts with key local, federal and international agencies involved in the fight against the deadly Coronavirus.
- Draw on first hand best practices from top companies to create solid business continuity plans.

COVID-19 Focuses on latest prevention, preparedness, response and recovery measures being developed to address the deadly human-to-human transmission of deadly Coronavirus. The speakers and exhibitors are selected to represent the widest possible range of perspectives, including not only human factors, bust also physical, environmental and socio-cultural factors.

SUMMIT & WORKSHOP
WASHINGTON, DC JUNE 17-19, 2020

COVID-19

CONFERENCE
JUNE 17-18

WORKSHOP
JUNE 19

Concurrent Breakout Session #12
School / University Pandemic Planning

- Train teachers to screen for symptoms & know what to do when students / teachers fall ill
- Transport ill students
- Identify when to reduce or close down your school
- Effectively transform school facilities into shelters
- Continue learning through alternative routes like the web telephone, mail, radio and TV
- Communicate effectively with staff, parents and students

Four-Stage Incident Management Process is Provided and Discussed.

Learn How To Plan
Make everyone a stakeholder.
Spell out roles and responsibilities.

Protect Your Community
Know your resources.
Test them against your toughest scenarios.

Know How To Respond
Recognize problem earlier. Make the right decisions faster.

Plan To Continue
Keep the business process alive.

Concurrent Breakout Session #13
Airlines, Travel, Airport, Quarantine and Border Health Services

- International & Federal guidelines
- Measures to prevent the spread of communicable diseases
- Apprehension, examination and release
- Aviation & Transportation Security Act
- Are tools available to ensure patient does not pose risk to fellow travelers?

Concurrent Breakout Session #14
Infectious Medical Waste

- Infectious waste management
- Packaging disposable infectious waste
- Engineering controls
- Pathological waste management
- Exposure control plan

2 Workshops to choose from...

Workshop 1: **Learn How To Plan**
Make everyone a stakeholder. Spell out roles and responsibilities.

Protect Your Community
Know your resources. Test them againts your toughest scenarios.

Workshop 2: **Know How To Respond**
Recognize problem earlier. Make the right decisions faster.

Plan To Continue
Maintain cash flow and work flow. Keep the work process alive.

Concurrent Breakout Session #15
Swine Flu: Agriculture Perspective & Interventions

- nCoV sources and transmission
- How do animal pathogens evolve?
- How to protect the public from exposure to zoonotic pathogens
- Analytical methods to detect, quantify, identify, monitor and control processes
- Sources & human exposure control management

AMERICAN OVERSIGHT

From: Schmitz, Ann
To: Blackmore, Carina
Subject: repatriated passengers from cruise ships in Chile and Brazil
Date: Wednesday, March 18, 2020 8:49:26 AM

Good morning Dr. Blackmore,

Acting-OIC Michelle Decenteceo from the Miami Quarantine Station notified me that there are two cruise ships in Chile and Brazil that have had confirmed COVID-19 cases on board. Her understanding was there were meetings between Florida and the CDC Cruise Ship Task Force about repatriating passengers from this ship (some Florida residents and some non-Florida residents) today. Current information is there three planes inbound to MIA with these passengers.

1. Well passengers from the cruise ship in Chile
2. Well passengers from the cruise ship in Brazil
3. Ill passengers from these ships; none with respiratory symptoms
    a. One ill passenger is a contact of a COVID-19 case

She had questions about the disposition of these three groups of travelers once they land in MIA. Will you reach out those involved at FDOH and CDC so these concerns can be addressed?

Best regards,

Ann Schmitz, DVM, AM

3/16/20

Good Morning,

Sorry, for the delay, I was out Friday, 3/13/20.
Below is the official response received.

From: Statewide Travel Management System
Sent: Friday, March 13, 2020 7:14 AM
To: zzzz feedback, DEPCS_STMS <DEPCS_STMS@flhealth.gov>; Statewide Travel Management System <StatewideTravelManagementSystem@flhealth.gov>
Subject: RE: HELP- Travel moratorium?

We haven't received any notification of this. If and when we do, it will go out to everyone, just like during a hurricane.

Additionally, this was shared Friday, 3/13/20, which I trust you received.

From: DOH COMMUNICATIONS OFFICE
Sent: Friday, March 13, 2020 9:20 AM
Subject: Travel Restrictions for Employees of the State Personnel System (COVID-19)

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for

AMERICAN OVERSIGHT

prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.

- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
