SUBCHAPTER IX

INTERSTATE COMPACT ON PLACEMENT OF CHILDREN

232.158 Interstate compact on placement of children.

The interstate compact on the placement of children is hereby enacted into law and entered into with all other jurisdictions legally joining therein in form substantially as follows:

1. *Article I — Purpose and policy.* It is the purpose and policy of the party states to cooperate with each other in the interstate placement of children to the end that:

a. Each child requiring placement shall receive the maximum opportunity to be placed in a suitable environment and with persons or institutions having appropriate qualifications and facilities to provide a necessary and desirable degree and type of care.

b. The appropriate authorities in a state where a child is to be placed may have full opportunity to ascertain the circumstances of the proposed placement, thereby promoting full compliance with applicable requirements for the protection of the child.

c. The proper authorities of the state from which the placement is made may obtain the most complete information on the basis of which to evaluate a projected placement before it is made.

d. Appropriate jurisdictional arrangements for the care of children will be promoted.

2. *Article II — Definitions.* As used in this compact:

a. *"Child"* means a person who, by reason of minority, is legally subject to parental, guardianship or similar control.

b. *"Sending agency"* means a party state, officer or employee thereof; a subdivision of a party state, or officer or employee thereof; a court of a party state; a person, corporation, association, charitable agency or other entity which sends, brings, or causes to be sent or brought any child to another party state.

c. *"Receiving state"* means the state to which a child is sent, brought, or caused to be sent or brought, whether by public authorities or private persons or agencies, and whether for placement with state or local public authorities or for placement with private agencies or persons.

d. *"Placement"* means the arrangement for the care of a child in a family free or boarding home or in a child-caring agency or institution, but not in an institution caring for the mentally ill, mentally defective, or epileptic, in an institution primarily educational in character, or in a hospital or other medical facility.

3. *Article III — Conditions for placement.*

a. A sending agency shall not send, bring, or cause to be sent or brought into any other party state a child for placement in foster care or as a preliminary to a possible adoption unless the sending agency complies with every requirement set forth in this article and with the applicable laws of the receiving state governing the placement of children in the receiving state.

b. Prior to sending, bringing or causing any child to be sent or brought into a receiving state for placement in foster care or as a preliminary to a possible adoption, the sending

agency shall furnish the appropriate public authorities in the receiving state written notice of the intention to send, bring, or place the child in the receiving state. The notice shall contain:

(1) The name, date and place of birth of the child.

(2) The identity and address or addresses of the parents or legal guardian.

(3) The name and address of the person, agency or institution to or with which the sending agency proposes to send, bring or place the child.

(4) A full statement of the reasons for such proposed action and evidence of the authority pursuant to which the placement is proposed to be made.

c. Any public officer or agency in a receiving state which is in receipt of a notice pursuant to paragraph *"b"* of this article may request of the sending agency, or any other appropriate officer or agency of or in the sending agency's state, and shall be entitled to receive therefrom, such supporting or additional information as it may deem necessary under the circumstances to carry out the purpose and policy of this compact.

d. The child shall not be sent, brought, or caused to be sent or brought into the receiving state until the appropriate public authorities in the receiving state shall notify the sending agency, in writing, to the effect that the proposed placement does not appear to be contrary to the interests of the child.

4. *Article IV — Penalty for illegal placement.* The sending, bringing, or causing to be sent or brought into any receiving state of a child in violation of the terms of this compact shall constitute a violation of the laws respecting the placement of children of both the state in which the sending agency is located or from which it sends or brings the child and of the receiving state. Such violation may be punished or subjected to penalty in either jurisdiction in accordance with its laws. In addition to liability for any such punishment or penalty, any such violation shall constitute full and sufficient grounds for the suspension or revocation of any license, permit, or other legal authorization held by the sending agency which empowers or allows it to place, or care for children.

5. *Article V — Retention of jurisdiction.*

a. The sending agency shall retain jurisdiction over the child sufficient to determine all matters in relation to the custody, supervision, care, treatment and disposition of the child which it would have had if the child had remained in the sending agency's state, until the child is adopted, reaches majority, becomes self-supporting or is discharged with the concurrence of the appropriate authority in the receiving state. Such jurisdiction shall also include the power to effect or cause the return of the child or its transfer to another location and custody pursuant to law. The sending agency shall continue to have financial responsibility for support and maintenance of the child during the period of the placement. Nothing contained herein shall defeat a claim of jurisdiction by a receiving state sufficient to deal with an act of delinquency or crime committed therein.

b. When the sending agency is a public agency, it may enter into an agreement with an authorized public or private agency in the receiving state providing for the performance of one or more services in respect of such case by the latter as agent for the sending agency.

c. Nothing in this compact shall be construed to prevent a private charitable agency authorized to place children in the receiving state from performing services or acting as agent in that state for a private charitable agency of the sending state; nor to prevent the agency in the receiving state from discharging financial responsibility for the support and maintenance of a child who has been placed on behalf of the sending agency without relieving the responsibility set forth in paragraph *"a"* hereof.

6. *Article VI — Institutional care of delinquent children.* A child adjudicated delinquent may be placed in an institution in another party jurisdiction pursuant to this compact but no such placement shall be made unless the child is given a court hearing on notice to the parent or guardian with opportunity to be heard, prior to the child being sent to such other party jurisdiction for institutional care and the court finds that:

a. Equivalent facilities for the child are not available in the sending agency's jurisdiction; and

b. Institutional care in the other jurisdiction is in the best interest of the child and will not produce undue hardship.

7. *Article VII — Compact administrator.* The executive head of each jurisdiction party to

this compact shall designate an officer who shall be general coordinator of activities under this compact in the officer's jurisdiction and who, acting jointly with like officers of other party jurisdictions, shall have power to promulgate rules and regulations to carry out more effectively the terms and provisions of this compact.

8. *Article VIII — Limitations.* This compact shall not apply to:

a. The sending or bringing of a child into a receiving state by the child's parent, stepparent, grandparent, adult brother or sister, adult uncle or aunt, or guardian and leaving the child with any such relative or nonagency guardian in the receiving state.

b. Any placement, sending or bringing of a child into a receiving state pursuant to any other interstate compact to which both the state from which the child is sent or brought and the receiving state are party, or to any other agreement between said states which has the force of law.

9. *Article IX — Enactment and withdrawal.* This compact shall be open to joinder by any state, territory or possession of the United States, the District of Columbia, the commonwealth of Puerto Rico, and, with the consent of Congress, the government of Canada or any province thereof. It shall become effective with respect to any such jurisdiction when such jurisdiction has enacted the same into law. Withdrawal from this compact shall be by the enactment of a statute repealing the same, but shall not take effect until two years after the effective date of such statute and until written notice of the withdrawal has been given by the withdrawing state to the governor of each other party jurisdiction. Withdrawal of a party state shall not affect the rights, duties and obligations under this compact of any sending agency therein with respect to a placement made prior to the effective date of withdrawal.

10. *Article X — Construction and severability.* The provisions of this compact shall be liberally construed to effectuate the purposes thereof. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any party state or of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If this compact shall be held contrary to the constitution of any state party thereto, the compact shall remain in full force and effect as to the remaining states and in full force and effect as to the state affected as to all severable matters.

SUBCHAPTER X

INTERSTATE JUVENILE COMPACTS

232.171 Interstate compact on juveniles.

The state of Iowa through its courts and agencies is hereby authorized to enter into interstate compacts on juveniles in behalf of this state with any other contracting state which legally joins therein in substantially the following form and the contracting states solemnly agree:

1. *Article I — Findings and purposes.* That juveniles who are not under proper supervision and control, or who have absconded, escaped or run away, are likely to endanger their own health, morals and welfare, and the health, morals and welfare of others. The cooperation of the states party to this compact is therefore necessary to provide for the welfare and protection of juveniles and of the public with respect to

a. Cooperative supervision of delinquent juveniles on probation or parole;

b. The return, from one state to another, of delinquent juveniles who have escaped or absconded;

c. The return, from one state to another, of nondelinquent juveniles who have run away from home; and

d. Additional measures for the protection of juveniles and of the public, which any two or more of the party states may find desirable to undertake cooperatively. In carrying out the provisions of this compact the party states shall be guided by the noncriminal,

AMERICAN OVERSIGHT

232 (1).pdf for Printed Item: 19 (Attachment 1 of 2)

reformative and protective policies which guide their laws concerning delinquent, neglected or dependent juveniles generally. It shall be the policy of the states party to this compact to cooperate and observe their respective responsibilities for the prompt return and acceptance of juveniles and delinquent juveniles who become subject to the provisions of this compact. The provisions of this compact shall be reasonably and liberally construed to accomplish the foregoing purposes.

2. *Article II — Existing rights and remedies.* That all remedies and procedures provided by this compact shall be in addition to and not in substitution for other rights, remedies and procedures, and shall not be in derogation of parental rights and responsibilities.

3. *Article III — Definitions.* That, for the purposes of this compact, *"delinquent juvenile"* means any juvenile who has been adjudged delinquent and who, at the time the provisions of this compact are invoked, is still subject to the jurisdiction of the court that has made such adjudication or to the jurisdiction or supervision of an agency or institution pursuant to an order of such court; *"probation or parole"* means any kind of conditional release of juveniles authorized under the laws of the states party hereto; *"court"* means any court having jurisdiction over delinquent, neglected or dependent children; *"state"* means any state, territory or possession of the United States, the District of Columbia, and the Commonwealth of Puerto Rico; and *"residence"* or any variant thereof means a place at which a home or regular place of abode is maintained.

4. *Article IV — Return of runaways.*

a. (1) That the parent, guardian, or person or agency entitled to legal custody of a juvenile who has not been adjudged delinquent but who has run away without the consent of such parent, guardian, or person or agency may petition the appropriate court in the demanding state for the issuance of a requisition for the juvenile's return. The petition shall state the name and age of the juvenile, the name of the petitioner and the basis of entitlement to the juvenile's custody, the circumstances of the juvenile's running away, the juvenile's location if known at the time application is made, and such other facts as may tend to show that the juvenile who has run away is endangering the juvenile's own welfare or the welfare of others and is not an emancipated minor. The petition shall be verified by affidavit, shall be executed in duplicate, and shall be accompanied by two certified copies of the document or documents on which the petitioner's entitlement to the juvenile's custody is based, such as birth certificates, letters of guardianship, or custody decrees. Such further affidavits and other documents as may be deemed proper may be submitted with such petition. The judge of the court to which this application is made may hold a hearing thereon to determine whether for the purposes of this compact the petitioner is entitled to the legal custody of the juvenile, whether or not it appears that the juvenile has in fact run away without consent, whether or not the juvenile is an emancipated minor, and whether or not it is in the best interest of the juvenile to compel the juvenile's return to the state. If the judge determines, either with or without a hearing, that the juvenile should be returned, the judge shall present to the appropriate court or to the executive authority of the state where the juvenile is alleged to be located a written requisition for the return of such juvenile. Such requisition shall set forth the name and age of the juvenile, the determination of the court that the juvenile has run away without the consent of a parent, guardian, or person or agency entitled to the juvenile's legal custody, and that it is in the best interest and for the protection of such juvenile that the juvenile be returned. In the event that a proceeding for the adjudication of the juvenile as a delinquent, neglected or dependent juvenile is pending in the court at the time when such juvenile runs away, the court may issue a requisition for the return of such juvenile upon its own motion, regardless of the consent of the parent, guardian, or person or agency entitled to legal custody, reciting therein the nature and circumstances of the pending proceeding. The requisition shall in every case be executed in duplicate and shall be signed by the judge. One copy of the requisition shall be filed with the compact administrator of the demanding state, there to remain on file subject to the provisions of law governing records of such court. Upon the receipt of a requisition demanding the return of a juvenile who has run away, the court or the executive authority to whom the requisition is addressed shall issue an order to any peace officer or other appropriate person directing the officer or person to take into custody and detain such juvenile. Such detention order must substantially recite the facts necessary to the

AMERICAN OVERSIGHT

validity of its issuance hereunder. No juvenile detained upon such order shall be delivered over to the officer whom the court demanding the juvenile shall have appointed to receive the juvenile, unless the juvenile shall first be taken forthwith before a judge of a court in the state, who shall inform the juvenile of the demand made for the juvenile's return, and who may appoint counsel or guardian ad litem for the juvenile. If the judge of such court shall find that the requisition is in order, the judge shall deliver such juvenile over to the officer whom the court demanding the juvenile shall have appointed to receive the juvenile. The judge, however, may fix a reasonable time to be allowed for the purpose of testing the legality of the proceeding.

(2) Upon reasonable information that a person is a juvenile who has run away from another state party to this compact without the consent of a parent, guardian, or person or agency entitled to the juvenile's legal custody, such juvenile may be taken into custody without a requisition and brought forthwith before a judge of the appropriate court who may appoint counsel or guardian ad litem for such juvenile and who shall determine after a hearing whether sufficient cause exists to hold the person, subject to the order of the court, for the person's own protection and welfare, for such a time not exceeding ninety days as will enable the person's return to another state party to this compact pursuant to a requisition for the person's return from a court of that state. If, at the time when a state seeks the return of a juvenile who has run away, there is pending in the state wherein the juvenile is found any criminal charge, or any proceeding to have the juvenile adjudicated a delinquent juvenile for an act committed in such state, or if the juvenile is suspected of having committed within such state a criminal offense or an act of juvenile delinquency, the juvenile shall not be returned without the consent of such state until discharged from prosecution or other form of proceeding, imprisonment, detention or supervision for such offense or juvenile delinquency. The duly accredited officers of any state party to this compact, upon the establishment of their authority and the identity of the juvenile being returned, shall be permitted to transport such juvenile through any and all states party to this compact, without interference. Upon the juvenile's return to the state from which the juvenile ran away, the juvenile shall be subject to such further proceedings as may be appropriate under the laws of that state.

b. That the state to which a juvenile is returned under this article shall be responsible for payment of the transportation costs of such return.

c. That *"juvenile"* as used in this article means any person who is a minor under the law of the state of residence of the parent, guardian, or person or agency entitled to the legal custody of such minor.

5. *Article V — Return of escapees and absconders.*

a. (1) That the appropriate person or authority from whose probation or parole supervision a delinquent juvenile has absconded or from whose institutional custody the delinquent juvenile has escaped shall present to the appropriate court or to the executive authority of the state where the delinquent juvenile is alleged to be located a written requisition for the return of such delinquent juvenile. Such requisition shall state the name and age of the delinquent juvenile, the particulars of the juvenile's adjudication as a delinquent juvenile, the circumstances of the breach of the terms of the juvenile's probation or parole or of the juvenile's escape from an institution or agency vested with the juvenile's legal custody or supervision, and the location of such delinquent juvenile, if known, at the time the requisition is made. The requisition shall be verified by affidavit, shall be executed in duplicate, and shall be accompanied by two certified copies of the judgment, formal adjudication, or order of commitment which subjects such delinquent juvenile to probation or parole or to the legal custody of the institution or agency concerned. Such further affidavits and other documents as may be deemed proper may be submitted with such requisition. One copy of the requisition shall be filed with the compact administrator of the demanding state, there to remain on file subject to the provisions of law governing records of the appropriate court. Upon the receipt of a requisition demanding the return of a delinquent juvenile who has absconded or escaped, the court or the executive authority to whom the requisition is addressed shall issue an order to any peace officer or other appropriate person directing the officer or person to take into custody and detain such delinquent juvenile. Such detention order must substantially recite the facts necessary to the validity of its issuance hereunder.

No delinquent juvenile detained upon such order shall be delivered over to the officer whom the appropriate person or authority demanding the juvenile shall have appointed to receive the juvenile, unless the juvenile shall first be taken forthwith before a judge of an appropriate court in the state, who shall inform the juvenile of the demand made for the juvenile's return and who may appoint counsel or guardian ad litem for the juvenile. If the judge of such court shall find that the requisition is in order, the judge shall deliver such delinquent juvenile over to the officer whom the appropriate person or authority demanding the juvenile shall have appointed to receive the juvenile. The judge, however, may fix a reasonable time to be allowed for the purpose of testing the legality of the proceeding.

(2) Upon reasonable information that a person is a delinquent juvenile who has absconded while on probation or parole, or escaped from an institution or agency vested with the person's legal custody or supervision in any state party to this compact, such person may be taken into custody in any other state party to this compact without a requisition. But in such event, the person must be taken forthwith before a judge of the appropriate court, who may appoint counsel or guardian ad litem for such person and who shall determine, after a hearing, whether sufficient cause exists to hold the person subject to the order of the court for such a time, not exceeding ninety days, as will enable the person's detention under a detention order issued on a requisition pursuant to this article. If, at the time when a state seeks the return of a delinquent juvenile who has either absconded while on probation or parole or escaped from an institution or agency vested with the juvenile's legal custody or supervision, there is pending in the state wherein the juvenile is detained any criminal charge or any proceeding to have the juvenile adjudicated a delinquent juvenile for an act committed in such state, or if the juvenile is suspected of having committed within such state a criminal offense or an act of juvenile delinquency, the juvenile shall not be returned without the consent of such state until discharged from prosecution or other form of proceeding, imprisonment, detention or supervision for such offense or juvenile delinquency. The duly accredited officers of any state party to this compact, upon the establishment of their authority and the identity of the delinquent juvenile being returned, shall be permitted to transport such delinquent juvenile through any and all states party to this compact, without interference. Upon the juvenile's return to the state from which the juvenile escaped or absconded, the delinquent juvenile shall be subject to such further proceedings as may be appropriate under the laws of that state.

b. That the state to which a delinquent juvenile is returned under this article shall be responsible for payment of the transportation costs of such return.

6. *Article VI — Voluntary return procedure*. That any delinquent juvenile who has absconded while on probation or parole, or escaped from an institution or agency vested with the juvenile's legal custody or supervision in any state party to this compact, and any juvenile who has run away from any state party to this compact, who is taken into custody without a requisition in another state party to this compact under the provisions of article IV, paragraph "*a*", or of article V, paragraph "*a*", may consent to the juvenile's immediate return to the state from which the juvenile absconded, escaped or ran away. Such consent shall be given by the juvenile or delinquent juvenile and the juvenile's counsel or guardian ad litem, if any, by executing or subscribing a writing, in the presence of a judge of the appropriate court, which states that the juvenile or delinquent juvenile and the juvenile's counsel or guardian ad litem, if any, consent to the juvenile's return to the demanding state. Before such consent shall be executed or subscribed, however, the judge, in the presence of counsel or guardian ad litem, if any, shall inform the juvenile or delinquent juvenile of the juvenile's rights under this compact. When the consent has been duly executed, it shall be forwarded to and filed with the compact administrator of the state in which the court is located and the judge shall direct the officer having the juvenile or delinquent juvenile in custody to deliver the juvenile to the duly accredited officer or officers of the state demanding the juvenile's return, and shall cause to be delivered to such officer or officers a copy of the consent. The court may, however, upon the request of the state to which the juvenile or delinquent juvenile is being returned, order the juvenile to return unaccompanied to such state and shall provide the juvenile with a copy of such court order; in such event a copy of the consent shall be

forwarded to the compact administrator of the state to which said juvenile or delinquent juvenile is ordered to return.

7. *Article VII — Cooperative supervision of probationers and parolees.*

a. That the duly constituted judicial and administrative authorities of a state party to this compact, herein called *"sending state"*, may permit any delinquent juvenile within such state, placed on probation or parole, to reside in any other state party to this compact, herein called *"receiving state"*, while on probation or parole, and the receiving state shall accept such delinquent juvenile, if the parent, guardian, or person entitled to the legal custody of such delinquent juvenile is residing or undertakes to reside within the receiving state. Before granting such permission, opportunity shall be given to the receiving state to make such investigations as it deems necessary. The authorities of the sending state shall send to the authorities of the receiving state copies of pertinent court orders, social case studies and all other available information which may be of value to and assist the receiving state in supervising a probationer or parolee under this compact. A receiving state, in its discretion, may agree to accept supervision of a probationer or parolee in cases where the parent, guardian, or person entitled to the legal custody of the delinquent juvenile is not a resident of the receiving state, and if so accepted the sending state may transfer supervision accordingly.

b. That each receiving state will assume the duties of visitation and of supervision over any such delinquent juvenile and in the exercise of those duties will be governed by the same standards of visitation and supervision that prevail for its own delinquent juveniles released on probation or parole.

c. That, after consultation between the appropriate authorities of the sending state and of the receiving state as to the desirability and necessity of returning such a delinquent juvenile, the duly accredited officers of a sending state may enter a receiving state and there apprehend and retake any such delinquent juvenile on probation or parole. For that purpose, no formalities will be required, other than establishing the authority of the officer and the identity of the delinquent juvenile to be retaken and returned. The decision of the sending state to retake a delinquent juvenile on probation or parole shall be conclusive upon and not reviewable within the receiving state, but if, at the time the sending state seeks to retake a delinquent juvenile on probation or parole, there is pending against the juvenile within the receiving state any criminal charge or any proceeding to have the juvenile adjudicated a delinquent juvenile for any act committed in such state, or if the juvenile is suspected of having committed within such state a criminal offense or an act of juvenile delinquency, the juvenile shall not be returned without the consent of the receiving state until discharged from prosecution or other form of proceeding, imprisonment, detention or supervision for such offense or juvenile delinquency. The duly accredited officers of the sending state shall be permitted to transport delinquent juveniles being so returned through any and all states party to this compact, without interference.

d. That the sending state shall be responsible under this article for paying the costs of transporting any delinquent juvenile to the receiving state or of returning any delinquent juvenile to the sending state.

8. *Article VIII — Responsibility for costs.*

a. That the provisions of article IV, paragraph *"b"*, article V, paragraph *"b"*, and article VII, paragraph *"d"* of this compact shall not be construed to alter or affect any internal relationship among the departments, agencies and officers of and in the government of a party state, or between a party state and its subdivisions, as to the payment of costs, or responsibilities therefor.

b. That nothing in this compact shall be construed to prevent any party state or subdivision thereof from asserting any right against any person, agency or other entity in regard to costs for which such party state or subdivision thereof may be responsible pursuant to article IV, paragraph *"b"*, article V, paragraph *"b"*, or article VII, paragraph *"d"* of this compact.

9. *Article IX — Detention practices.* That, to every extent possible, it shall be the policy of states party to this compact that no juvenile or delinquent juvenile shall be placed or detained in any prison, jail or lockup nor be detained or transported in association with criminal, vicious or dissolute persons.

10. *Article X — Supplementary agreements.* That the duly constituted administrative

232 (1).pdf for Printed Item: 19 (Attachment 1 of 2)

authorities of a state party to this compact may enter into supplementary agreements with any other state or states party hereto for the cooperative care, treatment and rehabilitation of delinquent juveniles whenever they shall find that such agreements will improve the facilities or programs available for such care, treatment and rehabilitation. Such care, treatment and rehabilitation may be provided in an institution located within any state entering into such supplementary agreement. Such supplementary agreements shall:

a. Provide the rates to be paid for the care, treatment and custody of such delinquent juveniles, taking into consideration the character of facilities, services and subsistence furnished;

b. Provide that the delinquent juvenile shall be given a court hearing prior to the juvenile being sent to another state for care, treatment and custody;

c. Provide that the state receiving such a delinquent juvenile in one of its institutions shall act solely as agent for the state sending such delinquent juvenile;

d. Provide that the sending state shall at all times retain jurisdiction over delinquent juveniles sent to an institution in another state;

e. Provide for reasonable inspection of such institutions by the sending state;

f. Provide that the consent of the parent, guardian, or person or agency entitled to the legal custody of the delinquent juvenile shall be secured prior to the juvenile being sent to another state; and

g. Make provision for such other matters and details as shall be necessary to protect the rights and equities of such delinquent juveniles and of the cooperating states.

11. *Article XI — Acceptance of federal and other aid.* That any state party to this compact may accept any and all donations, gifts and grants of money, equipment and services from the federal or any local government, or any agency thereof and from any person, firm or corporation, for any of the purposes and functions of this compact, and may receive and utilize the same subject to the terms, conditions and regulations governing such donations, gifts and grants.

12. *Article XII — Compact administrators.* That the governor of each state party to this compact shall designate an officer who, acting jointly with like officers of other party states, shall promulgate rules and regulations to carry out more effectively the terms and provisions of this compact.

13. *Article XIII — Execution of compact.* That this compact shall become operative immediately upon its execution by any state as between it and any other state or states so executing. When executed it shall have the full force and effect of law within such state, the form of execution to be in accordance with the laws of the executing state.

14. *Article XIV — Renunciation.* That this compact shall continue in force and remain binding upon each executing state until renounced by it. Renunciation of this compact shall be by the same authority which executed it, by sending six months' notice in writing of its intention to withdraw from the compact to the other states party hereto. The duties and obligations of a renouncing state under article VII hereof shall continue as to parolees and probationers residing therein at the time of withdrawal until retaken or finally discharged. Supplementary agreements entered into under article X hereof shall be subject to renunciation as provided by such supplementary agreements, and shall not be subject to the six months' renunciation notice of the present article.

15. *Article XV — Rendition amendment.*

a. This article shall provide additional remedies, and shall be binding only as among and between those party states which specifically execute the same.

b. All provisions and procedures of articles V and VI of the Interstate Compact on Juveniles shall be construed to apply to any juvenile charged with being a delinquent by reason of a violation of any criminal law. Any juvenile charged with being a delinquent by reason of violating any criminal law shall be returned to the requesting state upon a requisition to the state where the juvenile may be found. A petition in such case shall be filed in a court of competent jurisdiction in the requesting state where the violation of criminal law is alleged to have been committed. The petition may be filed regardless of whether the juvenile has left the state before or after the filing of the petition. The requisition described

AMERICAN OVERSIGHT

in article V of the compact shall be forwarded by the judge of the court in which the petition has been filed.

16. *Out-of-state confinement amendment.*

a. Whenever the duly constituted judicial or administrative authorities in a sending state shall determine that confinement of a probationer or reconfinement of a parolee is necessary or desirable, said officials may direct that the confinement or reconfinement be in an appropriate institution for delinquent juveniles within the territory of the receiving state, such receiving state to act in that regard solely as agent for the sending state.

b. Escapees and absconders who would otherwise be returned pursuant to article V of the compact may be confined or reconfined in the receiving state pursuant to this amendment. In any such case the information and allegations required to be made and furnished in a requisition pursuant to such article shall be made and furnished, but in place of the demand pursuant to article V, the sending state shall request confinement or reconfinement in the receiving state. Whenever applicable, detention orders as provided in article V may be employed pursuant to this paragraph preliminary to disposition of the escapee or absconder.

c. The confinement or reconfinement of a parolee, probationer, escapee, or absconder pursuant to this amendment shall require the concurrence of the appropriate judicial or administrative authorities of the receiving state.

d. As used in this amendment:

(1) *"Sending state"* means sending state as that term is used in article VII of the compact or the state from which a delinquent juvenile has escaped or absconded within the meaning of article V of the compact.

(2) *"Receiving state"* means any state, other than the sending state, in which a parolee, probationer, escapee, or absconder may be found, provided that said state is a party to this amendment.

e. Every state which adopts this amendment shall designate at least one of its institutions for delinquent juveniles as a "compact institution" and shall confine persons therein as provided in paragraph *"a"* hereof unless the sending and receiving state in question shall make specific contractual arrangements to the contrary. All states party to this amendment shall have access to "compact institutions" at all reasonable hours for the purpose of inspecting the facilities thereof and for the purpose of visiting such of said state's delinquents as may be confined in the institution.

f. Persons confined in "compact institutions" pursuant to the terms of this compact shall at all times be subject to the jurisdiction of the sending state and may at any time be removed from said "compact institution" for transfer to an appropriate institution within the sending state, for return to probation or parole, for discharge or for any purpose permitted by the laws of the sending state.

g. All persons who may be confined in a "compact institution" pursuant to the provisions of this amendment shall be treated in a reasonable and humane manner. The fact of confinement or reconfinement in a receiving state shall not deprive any person so confined or reconfined of any rights which said person would have had if confined or reconfined in an appropriate institution of the sending state; nor shall any agreement to submit to confinement or reconfinement pursuant to the terms of this amendment be construed as a waiver of any rights which the delinquent would have had if the delinquent had been confined or reconfined in any appropriate institution of the sending state except that the hearing or hearings, if any, to which a parolee, probationer, escapee, or absconder may be entitled, prior to confinement or reconfinement, by the laws of the sending state may be had before the appropriate judicial or administrative officers of the receiving state. In this event, said judicial and administrative officers shall act as agents of the sending state after consultation with appropriate officers of the sending state.

h. Any receiving state incurring costs or other expenses under this amendment shall be reimbursed in the amount of such costs or other expenses by the sending state unless the states concerned shall specifically otherwise agree. Any two or more states party to this amendment may enter into supplementary agreements determining a different allocation of costs as among themselves.

i. This amendment shall take initial effect when entered into by any two or more states

232.173 Interstate compact for juveniles.

1. *Article I — Purpose.*

a. The compacting states to this interstate compact recognize that each state is responsible for the proper supervision or return of juveniles, delinquents, and status offenders who are on probation or parole and who have absconded, escaped, or run away from supervision and control and in so doing have endangered their own safety and the safety of others. The compacting states also recognize that each state is responsible for the safe return of juveniles who have run away from home and in doing so have left their state of residence. The compacting states also recognize that Congress, by enacting the Crime Control Act, 4 U.S.C. §112 (1965), has authorized and encouraged compacts for cooperative efforts and mutual assistance in the prevention of crime.

b. It is the purpose of this compact, through means of joint and cooperative action among the compacting states to:

(1) Ensure that the adjudicated juveniles and status offenders subject to this compact are provided adequate supervision and services in the receiving state as ordered by the adjudicating judge or parole authority in the sending state.

(2) Ensure that the public safety interests of the citizens, including the victims of juvenile offenders, in both the sending and receiving states are adequately protected.

(3) Return juveniles who have run away, absconded, or escaped from supervision or control or have been accused of an offense to the state requesting their return.

(4) Make contracts for the cooperative institutionalization in public facilities in member states for delinquent youth needing special services.

(5) Provide for the effective tracking and supervision of juveniles.

(6) Equitably allocate the costs, benefits, and obligations of the compacting states.

(7) Establish procedures to manage the movement between states of juvenile offenders released to the community under the jurisdiction of courts, juvenile departments, or any other criminal or juvenile justice agency which has jurisdiction over juvenile offenders.

(8) Insure immediate notice to jurisdictions where defined offenders are authorized to travel or to relocate across state lines.

(9) Establish procedures to resolve pending charges (detainers) against juvenile offenders prior to transfer or release to the community under the terms of this compact.

(10) Establish a system of uniform data collection on information pertaining to juveniles subject to this compact that allows access by authorized juvenile justice and criminal justice officials, and regular reporting of compact activities to heads of state executive, judicial, and legislative branches and juvenile and criminal justice administrators.

(11) Monitor compliance with rules governing interstate movement of juveniles and initiate interventions to address and correct noncompliance.

(12) Coordinate training and education regarding the regulation of interstate movement of juveniles for officials involved in such activity.

(13) Coordinate the implementation and operation of the compact with the interstate compact for the placement of children, the interstate compact for adult offender supervision, and other compacts affecting juveniles particularly in those cases where concurrent or overlapping supervision issues arise.

c. It is the policy of the compacting states that the activities conducted by the interstate commission created in this compact are the formation of public policies and therefore are public business. Furthermore, the compacting states shall cooperate and observe their individual and collective duties and responsibilities for the prompt return and acceptance of juveniles subject to the provisions of this compact. The provisions of this compact shall be reasonably and liberally construed to accomplish the purposes and policies of the compact.

l. *"State"* means a state of the United States, the District of Columbia or its designee, the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, American Samoa, and the Northern Marianas Islands.

3. *Article III — Interstate commission for juveniles.*

a. The compacting states hereby create the interstate commission for juveniles. The commission shall be a body corporate and joint agency of the compacting states. The commission shall have all the responsibilities, powers, and duties set forth in this compact, and such additional powers as may be conferred upon it by subsequent action of the respective legislatures of the compacting states in accordance with the terms of this compact.

b. The interstate commission shall consist of commissioners appointed by the appropriate appointing authority in each state pursuant to the rules and requirements of each compacting state and in consultation with the state council for interstate juvenile supervision created in this compact. The commissioner shall be the compact administrator, deputy compact administrator, or designee from that state who shall serve on the interstate commission in such capacity under or pursuant to the applicable law of the compacting state.

c. In addition to the commissioners who are the voting representatives of each state, the interstate commission shall include individuals who are not commissioners, but who are members of interested organizations. Such noncommissioner members must include a member of the national organizations of governors, legislators, state chief justices, attorneys general, interstate compact for adult offender supervision, interstate compact for the placement of children, juvenile justice and juvenile corrections officials, and crime victims. All noncommissioner members of the interstate commission shall be ex officio, nonvoting members. The interstate commission may provide in its bylaws for such additional ex officio, nonvoting members, including members of other national organizations, in such numbers as shall be determined by the commission.

f. The interstate commission shall establish an executive committee, which shall include commission officers, members, and others as determined by the bylaws. The executive committee shall have the power to act on behalf of the interstate commission during periods when the interstate commission is not in session, with the exception of rulemaking or amendment to the compact. The executive committee shall oversee the day-to-day activities of the administration of the compact managed by an executive director and interstate commission staff; administer enforcement and compliance with the provisions of the compact, its bylaws, and rules; and perform such other duties as directed by the interstate commission or set forth in the bylaws.

g. Each member of the interstate commission shall have the right and power to cast a vote to which that compacting state is entitled and to participate in the business and affairs of the interstate commission. A member shall vote in person and shall not delegate a vote to another compacting state. However, a commissioner, in consultation with the state council, shall appoint another authorized representative, in the absence of the commissioner from that state, to cast a vote on behalf of the compacting state at a specified meeting. (9) Specifically relate to the interstate commission's issuance of a subpoena, or its participation in a civil action or other legal proceeding.

j. For every meeting closed pursuant to this provision, the interstate commission's legal counsel shall publicly certify that, in the legal counsel's opinion, the meeting may be closed to the public, and shall reference each relevant exemptive provision. The interstate commission shall keep minutes which shall fully and clearly describe all matters discussed in any meeting and shall provide a full and accurate summary of any actions taken, and the reasons therefore, including a description of each of the views expressed on any item and the record of any roll call vote, reflected in the vote of each member on the question. If the court finds that the interstate commission's action is not supported by substantial evidence in the rulemaking record, the court shall hold the rule unlawful and set it aside. For purposes of this lettered paragraph, evidence is substantial if it would be considered substantial evidence under the model state administrative procedures Act.

The aggregate annual assessment amount shall be allocated based upon a formula to be determined by the interstate commission, taking into consideration the population of each compacting state and the volume of interstate movement of juveniles in each compacting state and shall promulgate a rule binding upon all compacting states which governs said assessment.

c. The interstate commission shall not incur any obligations of any kind prior to securing the funds adequate to meet the same; nor shall the interstate commission pledge the credit of any of the compacting states, except by and with the authority of the compacting state.

d. The interstate commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the interstate commission shall be subject to the audit and accounting procedures established under its bylaws. While each state may determine the membership of its own state council, its membership must include at least one representative from the legislative, judicial, and executive branches of government, victims groups, and the compact administrator, deputy compact administrator, or designee. Each compacting state retains the right to determine the qualifications of the compact administrator or deputy compact administrator. Thereafter it shall become effective and binding as to any other compacting state upon enactment of the compact into law by that state. The governors of nonmember states or their designees shall be invited to participate in the activities of the interstate commission on a nonvoting basis prior to adoption of the compact by all states and territories of the United States.

c. The interstate commission may propose amendments to the compact for enactment by the compacting states. No amendment shall become effective and binding upon the interstate commission and the compacting states unless and until it is enacted into law by unanimous consent of the compacting states.

11. *Article XI — Withdrawal, default, termination, and judicial enforcement.*

a. Withdrawal.

(1) Once effective, the compact shall continue in force and remain binding upon each and every compacting state; provided that a compacting state may withdraw from the compact by specifically repealing the statute which enacted the compact into law.

(2) The effective date of withdrawal is the effective date of the repeal.

(3) The withdrawing state shall immediately notify the chairperson of the interstate commission in writing upon the introduction of legislation repealing this compact in the withdrawing state. incurred through the effective date of withdrawal, including any obligations, the performance of which extend beyond the effective date of withdrawal.

(5) Reinstatement following withdrawal of any compacting state shall occur upon the withdrawing state reenacting the compact or upon such later date as determined by the interstate commission.

b. Technical assistance, fines, suspension, termination, and default.

(1) If the interstate commission determines that any compacting state has at any time defaulted in the performance of any of its obligations or responsibilities under this compact, or the bylaws or duly promulgated rules, the interstate commission may impose any or all of the following penalties:

(b) Alternative dispute resolution.

(c) Fines, fees, and costs in such amounts as are deemed to be reasonable as fixed by the interstate commission.

(d) Suspension or termination of membership in the compact, which shall be imposed only after all other reasonable means of securing compliance under the bylaws and rules have been exhausted and the interstate commission has therefore determined that the offending state is in default. Immediate notice of suspension shall be given by the interstate commission to the governor, the chief justice or the chief judicial officer of the state, the majority and minority leaders of the defaulting state's legislature, and the state council.

(2) The grounds for default include, but are not limited to, failure of a compacting state to perform such obligations or responsibilities imposed upon it by this compact, the bylaws or duly promulgated rules, and any other grounds designated in commission bylaws and rules.

(3) The interstate commission shall immediately notify the defaulting state in writing of the penalty imposed by the interstate commission and of the default pending a cure of the default. The commission shall stipulate the conditions and the time period within which the defaulting state must cure its default. If the defaulting state fails to cure the default within the time period specified by the commission, the defaulting state shall be terminated from the compact upon an affirmative vote of a majority of the compacting states and all rights, privileges, and benefits conferred by this compact shall be terminated from the effective date of termination.

(5) The defaulting state is responsible for all assessments, obligations, and liabilities incurred through the effective date of termination including any obligations, the performance of which extends beyond the effective date of termination.

(6) The interstate commission shall not bear any costs relating to the defaulting state unless otherwise mutually agreed upon in writing between the interstate commission and the defaulting state.

(7) Reinstatement following termination of any compacting state requires both a reenactment of the compact by the defaulting state and the approval of the interstate commission pursuant to the rules.

c. Judicial enforcement. The interstate commission may, by majority vote of the members, initiate legal action in the United States district court for the District of Columbia or, at the discretion of the interstate commission, in the federal district where the interstate commission has its offices, to enforce compliance with the provisions of the compact, its duly promulgated rules and bylaws, against any compacting state in default. In the event judicial enforcement is necessary the prevailing party shall be awarded all costs of such litigation including reasonable attorney fees.

d. Dissolution of compact.

(1) The compact dissolves effective upon the date of the withdrawal or default of the compacting state, which reduces membership in the compact to one compacting state.

(2) Upon the dissolution of this compact, the compact becomes null and void and shall be

of no further force or effect, and the business and affairs of the interstate commission shall be concluded and any surplus funds shall be distributed in accordance with the bylaws.

12. *Article XII — Severability and construction.*

a. The provisions of this compact shall be severable, and if any phrase, clause, sentence, or provision is deemed unenforceable, the remaining provisions of the compact shall be enforceable.

b. The provisions of this compact shall be liberally construed to effectuate its purposes.

13. *Article XIII — Binding effect of compact and other laws.*

a. Other laws.

(1) Nothing in this compact prevents the enforcement of any other law of a compacting state that is not inconsistent with this compact.

(2) All compacting states' laws other than state constitutions and other interstate compacts conflicting with this compact are superseded to the extent of the conflict.

b. Binding effect of the compact.

(1) All lawful actions of the interstate commission, including all rules and bylaws promulgated by the interstate commission, are binding upon the compacting states.

(2) All agreements between the interstate commission and the compacting states are binding in accordance with their terms.

(3) Upon the request of a party to a conflict over meaning or interpretation of interstate commission actions, and upon a majority vote of the compacting states, the interstate commission may issue advisory opinions regarding such meaning or interpretation.

(4) In the event any provision of this compact exceeds the constitutional limits imposed on the legislature of any compacting state, the obligations, duties, powers, or jurisdiction sought to be conferred by such provision upon the interstate commission shall be ineffective and such obligations, duties, powers, or jurisdiction shall remain in the compacting state and shall be exercised by the agency thereof to which such obligations, duties, powers, or jurisdiction are delegated by law in effect at the time this compact becomes effective.

JUVENILE JUSTICE — DECATEGORIZATION AND EARLY INTERVENTION

232.188 Decategorization of child welfare and juvenile justice funding initiative.

1. *Definitions.* For the purposes of this section, unless the context otherwise requires:

a. "Decategorization governance board" or *"governance board"* means the group that enters into and implements a decategorization project agreement.

b. "Decategorization project" means the county or counties that have entered into a decategorization agreement to implement the decategorization initiative in the county or multicounty area covered by the agreement.

c. "Decategorization services funding pool" or *"funding pool"* means the funding designated for a decategorization project from all sources.

2. *Purpose.* The decategorization of the child welfare and juvenile justice funding initiative is intended to establish a system of delivering human services based upon client

needs to replace a system based upon a multitude of categorical programs and funding sources, each with different service definitions and eligibility requirements. The purposes of the decategorization initiative include but are not limited to redirecting child welfare and juvenile justice funding to services which are more preventive, family-centered, and community-based in order to reduce use of restrictive approaches which rely upon institutional, out-of-home, and out-of-community services.

3. *Implementation.*

a. Implementation of the initiative shall be through creation of decategorization projects. A project shall consist of either a single county or a group of counties interested in jointly implementing the initiative. Representatives of the department, juvenile court services, and county government shall develop a project agreement to implement the initiative within a project.

b. The initiative shall include community planning activities in the area covered by a project. As part of the community planning activities, the department shall partner with other community stakeholders to develop service alternatives that provide less restrictive levels of care for children and families receiving services from the child welfare and juvenile justice systems within the project area.

c. The decategorization initiative shall not be implemented in a manner that limits the legal rights of children and families to receive services.

4. *Governance board.*

a. In partnership with an interested county or group of counties which has demonstrated the commitment and involvement of the affected county department, or departments, of human services, the juvenile justice system within the project area, and board, or boards, of supervisors in order to form a decategorization project, the department shall develop a process for combining specific state and state-federal funding categories into a decategorization services funding pool for that project. A decategorization project shall be implemented by a decategorization governance board. The decategorization governance board shall develop specific, quantifiable short-term and long-term plans for enhancing the family-centered and community-based services and reducing reliance upon out-of-community care in the project area.

b. The department shall work with the decategorization governance boards to best coordinate planning activities and most effectively target funding resources. The department shall work with the decategorization governance boards to support board planning and service development activities and to promote the most effective alignment of resources.

c. A decategorization governance board shall coordinate the project's planning and budgeting activities with the department's designee for the county or counties comprising the project area and the early childhood Iowa area board or boards for the early childhood Iowa area or areas within which the decategorization project is located.

5. *Funding pool.*

a. The governance board for a decategorization project has authority over the project's decategorization services funding pool and shall manage the pool to provide more flexible, individualized, family-centered, preventive, community-based, comprehensive, and coordinated service systems for children and families served in that project area. A funding pool shall also be used for child welfare and juvenile justice systems enhancements.

b. Notwithstanding section 8.33, moneys designated for a project's decategorization services funding pool that remain unencumbered or unobligated at the close of the fiscal year shall not revert but shall remain available for expenditure as directed by the project's governance board for child welfare and juvenile justice systems enhancements and other purposes of the project for the next three succeeding fiscal years. Such moneys shall be known as "*carryover funding*". Moneys may be made available to a funding pool from one or more of the following sources:

(1) Funds designated for the initiative in a state appropriation.

(2) Child welfare and juvenile justice services funds designated for the initiative by the department.

(3) Juvenile justice program funds designated for the initiative by a chief juvenile court officer.

(4) Carryover funding.

(5) Any other source designating moneys for the funding pool.

c. The services and activities funded from a project's funding pool may vary depending upon the strategies selected by the project's governance board and shall be detailed in an annual child welfare and juvenile justice decategorization services plan developed by the governance board. A decategorization governance board shall involve community representatives and county organizations in the development of the plan for that project's funding pool. In addition, the governance board shall coordinate efforts through communication with the department regarding budget planning and decategorization service decisions.

d. A decategorization governance board is responsible for ensuring that decategorization services expenditures from that project's funding pool do not exceed the amount of funding available. If necessary, the governance board shall reduce expenditures or discontinue specific services as necessary to manage within the funding pool resources available for a fiscal year.

e. The annual child welfare and juvenile justice decategorization services plan developed for use of the funding pool by a decategorization governance board shall be submitted to the department and the early childhood Iowa state board. In addition, the decategorization governance board shall submit an annual progress report to the department and the early childhood Iowa state board which summarizes the progress made toward attaining the objectives contained in the plan. The progress report shall serve as an opportunity for information sharing and feedback.

6. *Departmental role.* The departmental share of the child welfare appropriation that is not allocated by law for the decategorization initiative shall be managed by and is under the authority of the department. The department is responsible for meeting the child welfare service needs with the available funding resources.

Iowa DHHS & DPH Merger PACAP New 8301-2024-1.pdf

Liz –

We have two related, but distinct, issues we are working through with our federal partners. The first is the PACAP (attached here and email below).

An example is describing the Adult, Children and Family Services (ACFS Division) on page 93. For the most part, I think the corrections are technical and should be easily remedied. Our federal partner highlighted the first page where we reported this is a “complete rewrite” so she was struck that there was legacy information included in the report.

The second issue, CB-496, is going to require some effort to synch up federal IV-E policy, IV-E eligibility policy/work completed within FWB+P, fiscal reporting and data out of JARVIS. This one is also sticky because we are a pass through for State Public Defender IV-E claiming through an MOU. It was noticed by our federal partners that the data we report has a massive delta (SPD reports almost 10x more cases than we report having for what should be similarly sized populations). SPD is receiving federal funds based on that data. Either SPD is off and there could be a fiscal claw-back or we are underreporting which could mean additional federal funds.

I have a follow-up meeting with our BA, CPS leadership and federal partner at 9am. Hoping to gain some clarity on what is going on with the CB-496 report.

Hi Joe. My review of the PACAP is primarily from a program perspective. Some of the areas where I have questions/comments include:

1. Training for various groups (Foster Care Review Board, Court Appointed Special Advocates, State Providers)
2. SSA State Court
3. Allocation Methodology Descriptions in Child Protective Services section

AMERICAN OVERSIGHT

4. CAPTA COVID and CBCAP COVID
5. Child welfare/child protective sections include “dependent adults” pg. 97
6. Various summary descriptions that may need additional information or clarification
7. Information included in prior (recent) amendments appears to be missing (examples – participation rate information, Prevention Plan, juvenile court services)

I was not necessarily anticipating that Iowa would be able to address all of the questions during the call next week. We were thinking a call to set context and assure understanding ahead of sending written comments would be most productive. I hope this is helpful to the team in preparation for the call.

Please let me know if you have any questions. Thank you!

Hello everyone. Based on our discussion today, we need to have more discussion about what's happening with the caseload count data being reported for title IV-E Foster Care Candidates (not Prevention Plan candidates) and children in title IV-E FC placements for Iowa's CB-496 reports. As noted, there is a significant discrepancy between what's being reported for caseload counts in both populations across administration claiming (Case Planning and Management Administration vs. Independent Legal Representation) where it should be comparable (see attached spreadsheet). From what David shared, the Case Planning and Management Administration caseload data is pulled from DHHS sources and the Independent Legal Representation data is entered on the form as reported by the State Public Defender's office.

I am also sharing Children's Bureau policy guidance pertaining to Title IV-E candidates for foster care found in the CB Child Welfare Policy Manual online. During the call today, I was referencing Question 2 found in this section but I encourage you to review any/all questions as you see necessary.
https://acf.hhs.gov/cwpm/public_html/programs/cb/laws_policies/laws/cwpm/policy_dsp.jsp?citID=79

Wendy Sheetz and I had a conversation about these candidates last Spring and she shared a reference to Iowa's Employee Manual 18-Appendix. It's on page 119 (see attached).

If I missed sharing anything that you anticipated seeing, please let me know and I will share.

As you know, I will be in Des Moines (at the 525 SW 5th Street Building) next week on Monday and Tuesday but I can drive to another location as well. If you are available, I have time on Monday (3/11) between 11AM-1PM and then again at 3PM. I also have time on Tuesday morning before 10:30AM. If those dates/times won't work, we can revisit dates/times for a Teams call just let me know.

Thank you!

- Summary and Analysis of Safety/Risk Assessments.

  Provide a narrative description of the family safety concerns by addressing the following:

  - Given the child(ren)'s level of vulnerability, what are the concerns and/or threats of danger in everyday life of the family? What everyday family life issues need to be better managed (i.e. new plan for discipline, safe home environment, more rigorous supervision, proper nutrition, etc.) to ensure child safety and well-being.

  Provide a narrative description of individual parent/caretaker concerns by addressing the following:

  - Describe what individual issues parents/caretakers have that need to be better managed or replaced so that the family tasks can go better (i.e. new plans for managing anger/control issues, improving emotional stability, stopping or limiting use of substances, managing sexual behavior, etc.) and what kind of new plan needs to be in place to ensure child safety and well-being.

  Provide a narrative description of family consensus regarding safety concerns by addressing the following:

  - What is the level of consensus with the family regarding the safety concerns and/or threats of danger described above?

- Addendum to Safety Assessment Summary. Use this section to update or edit the Safety Assessment Summary, based off the last Safety Assessment completed. This field appears only in addendum status.
- Addendum to Analysis of Safety/Risk Assessments. Use this section to update or edit the assessment after completion of the original report. This field appears only if in addendum status.
- Final Risk Level. The neglect, abuse, and scored risk levels are pulled in from the *Family Risk Assessment* completed through the Family Risk Assessment tab of the STAR Assessment module in JARVIS. If the *Family Risk Assessment* has not been completed, levels will not appear in these three sections.

  The final risk level is used to determine what the client's service eligibility is in based on findings, age, and risk.

  Review and consider information gathered from child and family interviews, collateral contacts, Department service records, and all prior assessments.

- Recommendation for Service. The finding of the child abuse assessment and the family risk score determine the family's eligibility for information or information and referral, non-agency voluntary services, or Department services.

When the family is being referred to non-agency voluntary services, document the actions developed jointly with the family to address identified needs. The plan of action should relate directly to the presenting problems and your analysis of family functioning:

- Consider if there are current resources, services, and supports available to the family that can meet the family's needs and increase protection for the child.
- Identify services and supports provided to the family that have failed to prevent the child's abuse or reabuse.
- Consider if caretakers refuse needed services or supports despite protective concerns, increasing children's risk.
- Document your recommendation for services.

When the family is eligible for non-agency voluntary services, but is not being referred, indicate the exception reason.

When the family is being referred for Department services, identify the prevention services to meet the foster care prevention strategy and describe what that prevention strategy is.

When the family is eligible for Department services, but is not being referred, indicate the exception reason.

Document any additional service information that is needed.

- Recommendations for Court Involvement. Enter your recommendations for juvenile or criminal court involvement.
  - If you recommend juvenile court involvement, include:
    - A summary of the status of any current juvenile court involvement if the child is already adjudicated or adjudication is pending.
    - Your specific recommendations to the county attorney on the initiation or continuation of juvenile court action.
    - Your rationale to support that recommendation (e.g., family with founded abuse has refused offer of Department services).
  - If you do not recommend juvenile court involvement, include under "Type of Action Requested" your rationale to support that recommendation (i.e., court is not recommended as abuse was not confirmed, or was confirmed or founded but low-risk).
  - If you recommend criminal court involvement, include:
    - Reference to any joint assessment with law enforcement.
    - The status of the criminal investigation when charges have already been filed in a matter.

Dependent Adult Assessment Tool, Form 470-4841

Purpose

Form 470-4841 is a three-part tool used to assess a dependent adult's *degree of dependency*, as well as, to analyze safety and risk. Complete an assessment of safety, dependency, and risk on every alleged victim for whom an evaluation or assessment is conducted.

Source

Complete the assessment tool online in DARES under each tab, respectively labeled "Safety Assessment," "Dependency Assessment," and "Risk Assessment."

This form may also be printed from "My Links" in JARVIS and entered into DARES later.

Completion

The adult protective worker must complete the *Safety Assessment* portion:

- Within 24 hours of the first contact with the adult subject, and
- Before closing the adult protective evaluation or assessment.

The adult protective worker must complete the *Dependency Assessment* portion before the end of the dependent adult protective evaluation or assessment.

The adult protective worker must complete the *Risk Assessment* portions before the end of the dependent adult protective evaluation or assessment.

Distribution

The *Dependent Adult Assessment Tool* is not distributed as part of the *Dependent Adult Protective Services Evaluation or Assessment Summary*. Print the *Dependent Adult Assessment Tool* and keep it in the case file.

Data

Asterisked (*) items are generated by the DARES database if the information has been entered into DARES. The adult subject's name, date of birth, age, form of alleged maltreatment, and caretaker, if applicable, are pulled from household composition.

Safety Assessment (Initial and Final)

If any of 2 through 6 are **No** or 7 through 14 are **Yes**, assist the adult subject, caretaker, service providers, and support system to take steps to alleviate the safety issues. This may be done by:

- Obtaining medical care or placement,
- Engaging additional formal and informal supports,
- Safety planning,
- Use of law enforcement, or
- Seeking legal intervention.

DARES will narrow the results of the safety decision in compliance with the scoring instructions. Only the subsequent safety status score is pulled from

DARES and populates into form 470-0688, *Dependent Adult Protective Services Evaluation or Assessment Summary*.

AMERICAN OVERSIGHT

Initial Safety Decision

Check the box to indicate your determination as to whether the dependent adult is "safe," "conditionally safe," "unsafe," or "unable to remediate safety concerns." When selecting "unable to remediate safety concerns," the adult protective worker must select one of the following reasons why:

- Protective order requested but not granted.
- Dependent adult has the capacity to consent and is refusing services.
- Dependent adult has accepted some, but not all of the recommended services.
- Other. If selecting other, please provide a brief explanation.

Dependency Assessment

Health conditions and diagnoses: Enter medical information. Document the overall condition of the adult, any existing allergies, and behavioral indicators or observations of health.

Medications: Enter all the adult's medications.

Current services: Enter **Yes** or **No** for each question. Use "Other" for services not represented on the list. Explain all other services not on the list.

Cognitive impairments: Enter **Yes** or **No** for each question. Completing IQ is optional. Explain any temporary conditions.

Cognitive screening: Enter the type of mental status screening tool conducted. If the mental status screening tool used by the adult protective worker or other qualified professional is not represented in the list, select "other." List the score and what the score means pertaining to the adult subject's cognition. Screening will allow the adult protective worker to determine if the adult subject needs a more comprehensive assessment on capacity to consent.

Physical impairments: Enter **Yes** or **No** for each question. Explain if necessary.

Katz (Activities of Daily Living) (ADL): The Katz Index ranks adequacy of performance in the six functions of *bathing, dressing, toileting, transferring, continence, and feeding*. Clients are scored for independence in each of the six functions.

Each category has a check box. DARES calculates the score. Completion of all questions is required. A score of six indicates full function; four indicates moderate impairment; and two or less indicates severe functional impairment.

Lawton – Brody Instrumental Activities of Daily Living Scale (IADL): The IADL is an appropriate instrument to assess independent living skills. These skills are considered more complex than the basic activities of daily living as measured by the Katz Index.

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-001344

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

The instrument is most useful for identifying how a person is functioning now and identifying improvement or deterioration over time. There are eight domains of function measured with the Lawton IADL scale.

To obtain a score for each category, check the box for the item description that most closely resembles the client's highest independence level. Each category requires one box to be checked. The total score ranges from zero which indicates low functioning to eight which indicates high functioning.

ConsultGeriRN website: https://zhangnandi.com/about/news-publications/news/2008/january/introducing_consultgerirnorg.html

Summary of dependency status: Determine if the information collected through the dependency portion of your assessment indicates the adult subject (alleged victim) is dependent.

Use the narrative to summarize the evidence gathered through the dependency assessment to support or refute that the adult subject is a dependent adult. A diagnosis or level of care alone is not sufficient to determine a person is a dependent adult. A worker needs to describe the impairments in functioning using the objective measures mentioned above. An adult subject may be impaired in some domains of functioning and not others.

Only the "Summary of dependency status" narrative is pulled from DARES and populates form 470-0688, *Dependent Adult Protective Services Evaluation or Assessment Summary*.

Adult Subject Risk of Abuse or Neglect Assessment

The risk assessment must be completed by the conclusion of the assessment or evaluation.

The scored risk levels are pulled from the risk assessment of the adult subject and the alleged person responsible that are completed through DARES for the incident. If the risk assessments have not been completed, levels will not appear in the printed version.

The final risk level score is pulled from DARES and populates form 470-0688, *Dependent Adult Protective Services Evaluation or Assessment Summary*, under "Final Risk Level." The DARES system uses this score to determine what the client's periodic visit eligibility is based on, age, dependency status, mitigating interventions, and risk level.

Summary and Analysis of Safety Constructs Narrative

- Describe the threats of maltreatment that are present at this time (i.e., aggravating factors that combine to produce a potentially dangerous situation).

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-001345

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

- Describe the adult subject's vulnerability to maltreatment (i.e., the degree that the adult subject cannot on the adult's own avoid, negate, or minimize the impact of present or impending danger).
- Describe the adult subject and caretaker or alleged person responsible protective capacities (i.e., family, household, or support system strengths or resources that reduce, control, or prevent threats of maltreatment from arising and the factors and deficiencies that have a negative impact on the adult subject's safety).

Policy Overrides

After completing the risk scales, determine if any of the policy overrides should be applied. Policy overrides reflect incident seriousness and adult subject vulnerability concerns. They upgrade the risk level to "high" regardless of the scored risk level.

Discretionary override reason: After completing the risk scales, determine if a discretionary override should be applied to increase the risk level. Use a discretionary override when you are aware of unique case circumstances that warrant a higher risk level. You must receive supervisory approval for a discretionary override. The discretionary override may raise the risk level only one level higher. The risk level may not be lowered by a discretionary override.

Supervisor's Review/Approval of Discretionary Override: Enter a signature.

Date: Enter the date.

This form may be completed online, including the narrative, using the DARES system.

Completion

The adult protective worker who completes the evaluation or assessment completes the form. The supervisor approves and signs off on the final report.

Distribution

Automatically provide the summary to the county attorney. Keep a copy in the case record.

For an inter-county referral, also send one copy to the referring or receiving county attorney.

* *Report Information*: The intake date, adult protection worker, county name or county number are pulled from the DARES data entry.

* *Assessment Findings*: Findings are pulled from the "Determination" screen after completion of assessment and data entry.

Collateral Information: This field prints only if information is entered in DARES.

Person Determined Responsible for the Abuse: Complete only if abuse is confirmed.

* *Intake Allegation Type*: Information is pulled from the "Allegations" screen.

* *Concerns Reported*: Information is pulled from "Allegations" screen.

Summary of Previously Founded Reports Concerning Alleged Person Responsible: (Information is pulled from DARES, STAR, and CINA for all victims and perpetrators.) If the victim on a previous report is not a subject of the current report, the victim's name displays as "confidential."

Summary of Assessment Process: Information is pulled from DARES screen entries with the exception of "guardian interview." Guardian interview requires entry directly into the field by the adult protective worker.

Summary of Contacts: Include in this section a list of people you contacted in conducting the assessment (subjects, family members, and other collateral sources) and their role or position with regard to the adult subject. Address the actions developed jointly with the adult subject, supports, and family to address identified needs. The plan of action should relate directly to the presenting problems and your analysis of safety, dependency, and risk. Include:

- The date, time, and type of contact and the contact name, location, and phone number.
- The date and time you observed the adult subject or your reasonable efforts to observe the adult timely.

- Documentation of your recommendation for services. Documentation should include any action taken or contemplated.

Summary of Contacts Addendum: When you reasonably believe that additional pertinent information will be available or additional relevant contacts will be made, indicate on the summary that you will complete an addendum. Complete the "Summary of Contacts" related to the addendum. This field appears only if an addendum is in progress.

Summary of Dependency Status: The narrative listed is pulled from the "Dependency Assessment" tab completed in DARES to summarize the evidence to support or refute that the adult subject is a dependent adult. A diagnosis alone is not sufficient to determine a person is a dependent adult. A worker needs to describe the impairments in functioning using the objective measures mentioned above. An adult subject may be impaired in some domains of functioning and not others.

Only the "Summary of Dependency Status" narrative is pulled from DARES and populates form 470-0688, *Dependent Adult Protective Services Evaluation or Assessment Summary*. The remainder of the form is not disseminated.

Findings and Determination of Abuse Allegations: Determine if abuse occurred.

- List the factors that must be proven for each type of abuse and state your conclusions and rationale.
- Enter your finding of unfounded, confirmed, not registered, or founded.

Addendum Findings and Determination of Abuse Allegations: Document the factors that must be proven for the type of abuse and state your conclusions and rationale. This field will appear only if an addendum is in progress.

- The frequency, severity, and type of abuse.
- Factors or situations contributing to the abuse.
- The risks of dependent adult abuse for the adult subject and any other potentially dependent adults in the home.

Addendum Summary and Analysis of Safety/Risk Assessments Identified: Use this section to update or edit the assessment after completion of the original report. This header will print only if an addendum date has been entered in DARES.

Final Risk Level: Information is pulled from the "Risk Assessment" tab completed in DARES.

Recommendations for Service: Select one or more services you recommended or referred the adult subject to during or as a result of your evaluation or assessment.

Family Case Plan, Form 470-3453 or 470-3453(S)

Purpose

The *Family Case Plan*, form 470-3453, is the official record of the Department's involvement with the family. It serves to:

- Help document the child and family conditions and concerns that caused the family to become involved with the child welfare system.
- Help determine and document the most appropriate services and supports needed to assure and promote child safety, permanency, and well-being. The family's plan includes a description of:
  - A plan to keep children safe.
  - Individual family strengths, supports, and needs.
  - How the strengths and family supports can be used to assist the family in self-directed change.
  - How the Department and others will assist the family in overcoming the needs.
- Document compliance with applicable state and federal laws and regulations.

Source

These forms are all accessed and completed in the DHS Case Flow system at: http://dhsintranet/cwis_caseflow/

- Family Case Plan Face Sheet, Part A
- Family Case Plan, Part B
- Child Placement Plan, Part C
- *Family Functioning Domain Criteria*, form 470-4138 (also located on SharePoint under Employee Manual/Forms), which explains what information, child/family issues, and assessment criteria should be considered in each of the five domain areas
- Family Risk Reassessment, form 470-4134

Completion

The DHS social work case manager assigned to the child and family is responsible for preparing the case plan to provide a comprehensive assessment view of the child and family that focuses on the major needs of the child, the parents, and, if applicable, the foster parents related to child safety, permanency, and well-being.

The case plan must be completed within 60 calendar days from the date the Department opens a DHS child welfare service case.

The case plan must be reviewed and updated:

- At a minimum, every six months thereafter while the case remains open, or
- More frequently if there are significant changes or if required by the court.

Information on the child and family entered in the FACS system automatically completes the case plan. Information not entered in FACS will not appear in the case plan. The worker must enter this information when the case plan is prepared.

Distribution

Obtain the necessary signatures on the plan and indicate which persons participated in developing or reviewing the plan:

- Distribute the *Family Case Plan*, including the *Family Case Plan Face Sheet*, when it is first developed to all of the persons listed on the "Signatures and Notifications" page.
- Distribute copies of any altered or revised case plan, including Part A, Part B, and Part C, if applicable, and the completed review section, to all of the persons listed on the "Signatures and Notifications" page.
- Print a copy of all initial and reviewed case plans, including Part A, Part B, and Part C, if applicable, and the completed review section and place the copy in the case file.

Data

A. Family Case Plan Face Sheet

The face sheet includes identification, statistical, historical, service summary, and placement information for the family.

- *Identifying information*: Enter information on the child's name, FACS ID, date of birth, address, and family members is automatically entered from the FACS system.
- *Service History* and *Placement History*: Enter information about services opened for the child and family in the FACS system is automatically entered from the FACS system.
- *Additional Services Provided*: The social work case manager completes this section. (This data is not contained in the FACS system.) Once entered, this information will be saved and become part of the case plan history over the life of the case.
- *Court Involvement*: The social work case manager enters information on any court involvement into FACS on the Court Detail screen. This information then fills the Court Involvement section of the *Family Case Plan Face Sheet*, Part A.

Information shown in green on Part A may be suppressed for safety reasons, such as when the safety of a foster child or foster parent could be jeopardized by printing the address or there are domestic violence issues or a restraining order between the child's parents.

To suppress all the information shown in green, click on the box "Suppress All Sensitive Date." Individual lines may also be highlighted and removed. Suppressed information reappears when the Case Flow form is reopened.

- *Household Composition*: This information is automatically completed based on information entered in FACS about the child's family members living in the home. Information in FACS about the child's parents not living in the home will be filled into this section as well.

Family Functioning Domains

DHS uses the *Family Functioning Domains* to provide a consistent format for collecting, considering, and analyzing information about children and families. This consistency ensures that functioning areas most critically impacting safety, permanency, and well-being are addressed and targeted for service intervention.

Use of the domains creates a common, consistent language as information about children and families flows from child protective workers to ongoing workers and service providers.

The domains provide a "common lens" through which the strengths and needs of the child and family can be assessed, discussed, and used in planning and service provision.

The family functioning domains consist of the following broad areas of functioning (each domain area has related subcategories):

- *Child Well-Being*: Child's mental health behavior, relationship with peers, school performance, motivation and cooperation, relationship with caregivers, and relationship with siblings
- *Parental Capabilities*: Parental supervision of children, mental health, disciplinary practices, physical health, developmental and enrichment activities, and use of drugs or alcohol
- *Family Safety*: Physical abuse, neglect, sexual, or emotional abuse of child; and domestic violence
- *Family interactions*: Bonding with child, expectations of child, relationship between parents or caregivers, mutual support within the family
- *Home environment*: Housing stability, financial management, income and employment, safety in community, personal hygiene, habitability, transportation, food and nutrition, learning environment
- *Other*: Additional issues or concerns about the child or family

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

Become familiar with the family functioning domain categories and criteria. Consider the child and family's strengths, concerns, and needs in the various domain areas as you have discussions with the family and gather and analyze information about them.

- Information gathered in a family team may be helpful in evaluating the domain categories.
- Evaluate each individual's functioning through the common "lens" of the domain areas when:
  - There are multiple children in the family,
  - There is a noncustodial parent or stepparent, or
  - A relative is caring for the child.

Complete the family functioning domain section of the case plan by working through each domain category (the subcategories for each domain category automatically appear as you complete the domain sections) and:

- Fill in the **Narrative** section of each domain with a specific description of any strengths or needs identified within that domain.

  Needs in any domain should be related to and discussed within the context of how the needs affect child safety, permanency, or well-being.

  Remember that families may have strengths in some domain areas that can be used to address needs in other domains.
- Establish a **Goal** for each domain area where a need is identified in the narrative. It is critical that goals be developed in partnership with the family.

  Goal statements should be strength-based and focused on achieving the outcomes essential for safety, permanency, and well-being.
- If no needs are identified for a family within a domain category, but strengths are noted, you may establish a goal for that domain that focuses on using family strengths to help meet needs in other domain areas.
- After reviewing the strengths, needs, and goals for each domain area, identify the strategies, services, and informal supports that may be helpful to achieving the goals.
- In each domain area where goals are identified, list the steps necessary to bring about the changes needed to accomplish the goal for that domain. The steps should clearly identify:
  - Who is responsible for each step and
  - The dates for beginning and completing the necessary actions.

  Update revisions to or completion dates for the steps throughout the life of the case plan.
- Discuss and review the case plan information on domain areas, proposed goals, and action steps with the family before making final entries to the plan.

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-001377

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

- Use the **Comments** section in each domain area to enter updated information on the family's progress and functioning level in that domain.

When the child is residing with the child's parents, the case plan shall state whether the child would be at "imminent risk of removal" from the home if in-home services were not provided.

"Imminent risk" means there is an immediate threat or likelihood that the child will suffer maltreatment.

When assessing "imminent risk," consider the three safety constructs of threats of maltreatment, child's vulnerability to maltreatment, and the caretaker's protective capacities to determine if the child would be unsafe without in-home services in place.

Cases that meet this standard are eligible for federal Title IV-E funding as candidates for foster care.

In the comments section of the most applicable family functioning domain area, document whether DHS would ask the court to consider the removal of the child if the family refused or terminated in-home services and why.

Review Section

Use the *Family Case Plan* review section when reviewing family progress and making further recommendations for actions and services on the case.

- Indicate the date of the plan review and whether this review was conducted through a family team meeting.
- When completing the review, consider the family's current functioning, level of goal achievement, and completion of necessary steps within each domain area.
- Identify family achievements, progress toward safe case closure, remaining concerns, and your current recommendations in the review section.
- At least once every six months, review the status of any child who has been previously determined to be at "imminent risk of removal" if in-home services are not provided. Document if services should continue and why in the *Review Summary and Recommendations* box.

  Reference **Other Comments** if an evaluation determines that the location of the foster home is suppressed and review this determination every six months or less.

Signatures and Notifications

- Document and obtain signatures from those persons that participated in development of the plan and thank all persons who contributed to the planning process for the child and family.

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-001378

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

- Set a date for future meeting with the family to review and revise the plan as needed. The **Other Comments** section of this page can be used for this purpose.

  Every six months or less, evaluate and review the decision to suppress the location of the foster home to determine if suppression continues or the need for suppression no longer is applicable.

- The **Other Comments** section may be used to include information concerning:
  - Case child abuse and criminal record histories;
  - Whether the Indian Child Welfare Act applies to the case;
  - Evidence of a direct or indirect threat to harm the foster child or foster family or credible third-party information of a threat of harm to the foster child or foster family as listed in 18-D(4). This information is needed if there has been a decision to suppress the address and contact information of the foster home.

- Distribute copies of the plan to those that should receive them.

C. Child Placement Plan

In combination with the face sheet and the family plan, the out-of-home placement section is a written document that includes all the federal required elements. The family plan and the out-of-home placement section include:

- A description of the placement and the appropriateness of the placement.
- The permanency goal for the child including any concurrent permanency goals.
- A plan for ensuring that the child and family receive services designed to facilitate the return of the child to a safe home or to another permanent placement.
- The health and educational status of the child.
- When applicable, a description of the programs and services that will facilitate the child's transition from foster care to adulthood.

This form is necessary to provide information mandated by state and federal laws and regulations regarding each child placed in an out-of-home setting in which the Department has custody, or when foster care is being provided under a voluntary placement agreement.

The DHS social work case manager responsible for the child should complete the *Child Placement Plan* when the child is placed in an out-of-home setting and DHS has custody or the child is placed under a voluntary placement agreement.

For these children, this section is in addition to Parts A and B of the case plan. The *Child Placement Plan, Part C*, should be updated every 90 days just like Parts A and B.

  - Whether "contrary to welfare" language is in the appropriate court order (yes or no)
  - Whether "reasonable efforts" language is in the appropriate court order (yes or no)
- *Permanency Goal*: Select and enter the current permanency goal for the child.
- *Concurrent Goal Assessment*: Assess and answer the two questions concerning the child. **NOTE:** If you answer "no" to either question, you must enter a concurrent goal in the next section.
- *Concurrent Goals*: Complete this section if the answer to either question in "Concurrent Goal Assessment" is "no." Describe concurrent goal planning underway for the child.
- *Child Well-Being Domain*: Review information about the child entered in the family domain criteria "child well-being" area and indicate whether each of the domain subcategories is currently a strength (S) or need (N) for the child.

child's educational placement stable and why the change was best for the child.

Transition Plan

"Transition planning" is the process of assisting the child in foster care to prepare to be a self-sufficient adult.

This process includes an assessment of life skills, strength and concerns, services and supports, and outcomes to be accomplished for successful transition.

Planning for transition to adulthood for children in foster care with special needs may need to begin before age 14 to ensure needed funding and services are available.

Service area transition planning specialists (TPS) can provide ongoing consultation and information regarding transition planning for adolescents.

For a child who may be eligible for services as an adult, the assessment and plan of services must be developed with someone who can reasonably be expected to fund those services or be a service provider when the child becomes an adult.

This section is required for a child in foster care of any type who is age 14 years of age or older. The plan shall be updated at required intervals with the *Case Permanency Plan*. In addition, the *Transition Plan* needs to be updated within 90 days of the child turning 18, and if the child remains in care past the age of 18, in the 90 days before discharge.

Organization of a youth-centered planning team is required for every child age 14 and older in foster care. Ask the child to select members of the team. Include specific names of formal and informal supports in the box that asks about membership.

A referral to transition planning specialist (TPS) may be needed for more challenging needs, such as transition planning for a child in long-term foster care or a child needing adult services. If a referral has been made to a TPS, select "yes."

Include the date the Case Life Skills Assessment was completed. It must be done at least once after the child in foster care's 14th birthday. Replace with the new date if it is done again throughout the child's time in foster care.

If the child is interested in pursuing higher education, the plan shall provide for the child's participation in the College Student Aid Commission's program or assistance in applying for federal and state aid.

Indicate whether the child has a driver's license or non-operator ID. If the child does not have at least one or the other, provide steps to obtain one or both.

Review and explain form 470-5337, *Rights of Youth in Out-of-Home Placement*, to a child age 14 and older. Have the child sign and date the form indicating you have reviewed the rights so the child understands and have answered any questions about their rights. After the form has been signed, give the child the original rights document and provide a copy to all legal parties on the child's case. Document the date the form was most recently given to the child in the *Case Permanency Plan*.

Before the child reaches age 17½, present the completed *Transition Plan* to the transition committee for the service area that applies to the child. The local transition committee must review and approve the *Transition Plan*. When a child enters foster care at age 17½ or older, the local transition committee shall be involved in reviewing and approving the child's transition plan within 30 days of completion.

There are six domain areas in the *Transition Plan* and a box for each. Follow the instructions for each section below:

- *Education*: Include information about the child's current education status and plans, including steps that still need to be taken, dates, and who will assist.
- *Employment and Workforce Supports*: Include information about the child's current work status and plans, including steps that still need to be taken, dates, and who will assist. This section needs to show the child has a clean credit report and banking experience, or it should provide plans or activities to achieve.
- *Health and Health Insurance*: Include information about the child and the child's health insurance status and plans.
- *Housing*: Describe the child's housing and housing plans.
- *Supportive Relationships and Services*: Describe relationships and opportunities for social and developmentally appropriate activities. Describe efforts to repair relationships or help child reconnect. Refer child age 17 to aftercare and include the date. If aftercare has not been contacted, leave the box blank.
- *Youth with Special Needs*: Relevant information about any special needs of the child should be included here, as well as referrals to SSI and adult services. The connections to SSI or adult services must be made before the Transition Planning Committee review, which typically occurs when the child is age 17. The date the plan was reviewed should be included in the last box of this section.

Child Signature

Family Functioning Domain Criteria, Form 470-4138

Purpose	Form 470-4138 is used to assist with assessment of the strengths and needs of the child, and of the child's parent(s)/caretaker(s), home, and family. It is an example of statements regarding areas of strengths and needs.
Source	This form is available on the STAR Assessment module in JARVIS. In the event of issues with accessing the form in JARVIS, it is available in this manual or in SharePoint, under Employee Manual/Forms.
Completion	The child protection worker uses this tool during the child protective assessment process to aid in the assessment of strengths and needs. Strengths and needs are identified using the family functioning domains: ▪ Child well-being ▪ Parental capabilities (includes use of drugs or alcohol) ▪ Family safety (includes domestic violence) ▪ Family interactions ▪ Home environment Identify domains as a strength or need. Address in the narrative section strengths and needs under each specific subsection that applies to the child, family, or home. It is not necessary to address every item listed. Address items that are relevant to the given situation. You are not limited to only the items listed. The child protection worker completes this form in JARVIS with approval and sign-off by the supervisor.
Data	Family functioning domains are applicable throughout the life of a case beginning with the safety assessment, strengths and needs identification during a child protective assessment or CINA assessment, and developing a family plan.

Family Interaction Plan General Roles and Responsibilities, Form 470-5148 or 470-5148(S)

Purpose

The *Family Interaction Plan General Roles and Responsibilities*, form 470-5148 and 470-5148(S), is the official family interaction plan developed for children placed out of the home. All children who are placed out of the home need to have a family interaction plan in place to ensure interactions occur in safe and healthy ways. The family interaction plan should be tailored to meet the safety needs of the family.

Source

Complete the English or Spanish version of this form using the template available in SharePoint under Employee Manual/Forms. This form may also be printed from the manual or SharePoint.

Completion

The most effective way of developing or reassessing a family interaction plan is during a warm hand-off or Solution Focused Meeting. The written family interaction plan may be incorporated as part of the Solution Focused Meeting notes or identified separately on the family interaction plan form. However, not all children placed out of the home will have a Solution Focused Meeting but family interaction planning should still occur.

Distribution

Give a copy of the completed family interaction plan to the identified team members. Keep the original form in the child's case file.

Data

Background Information. Enter the following information:

- *Children's names*: If multiple children have different needs or safety concerns, the family's team may want to consider a separate plan for each child.
- *Date of plan*: This is the date the plan was developed.
- *Placed with*: Document where the child is placed and with whom. If multiple children are in different places, indicate the type of placement (i.e., resource family, relative, residential placement, etc.).
- *Placement date for children*: This is the date the child was removed and placed out of the home.
- *Permanency goal*: Document the identified permanency goal.

Safety Concerns/Required level of supervision. Utilizing the Family Interaction Planning Tool (Comm. 649) provide explanations for questions A-F of the Interaction Supervision Decision Tree.

Family Interaction Plan. Family interaction should begin as soon as possible after removal from parental custody. At a minimum, interactions should occur within 24 hours of placement, be regular, and of increasing frequency and duration.

- *Types of Interaction*: Document the type of interaction approved. Creativity in defining interactions should be supported. Every opportunity needs to be

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

considered such as doctor appointments, school activities, meetings, and other functions in which the family would have participated if the children were in the home. This should be documented in the Attendance at Child Centered Appointments/Events section of the plan.

Interactions should be built around meaningful activities including:

- Mealtimes,
- Bathing,
- Grooming,
- Naptimes,
- Homework time,
- Grocery shopping,
- Doctors' appointments,
- School activities (i.e., conferences, plays, band and choir concerts, family nights, carnivals, graduation, etc.),
- Sports activities, and
- Should be geared towards the child's developmental abilities.

Creative planning should not only support face-to-face time but also other methods, such as calls, letters, texting, emails, and other electronic methods of communication. Families should be encouraged to explore other ways to connect and interact with one another.

- *Frequency* and *Length of Interaction*: Document the frequency and length of interaction. In determining how often and how long interactions should be, consider the following:
  - The age of the children.
  - The severity and chronicity of the abuse.
  - The potential for abduction or continued abuse of the children.
  - The progress of the parent in learning new skills or managing inappropriate behaviors, protective capacities displayed by the parent.
- *Locations*: Document the locations where the interactions will occur. Utilize the Planning Tool to aid in decision making around interaction locations.

  Family interaction should occur in the least restrictive, most homelike setting that allows for natural interaction and appropriate to meet the child's needs for safety. Generally, the parental, relative, or resource family home will provide the best environment. When safety is an issue, a more secure setting should be chosen and a safety plan developed for the interactions to continue.

  Consider the type of interaction as you document the location. For example, if an interaction is built around school activities, sport activities,

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

or doctors' appointments, you would document the location of the event (i.e., school, gymnasium, ball field, doctor office, etc.).

- *Types of Supervision*: Document the type of supervision for the identified interaction. Types of supervision include fully supervised, relaxed supervision, semi or partially supervised, or no supervision necessary. Supervision can be provided by a professional or other person identified by the family's team.
- *Supervised By*: If supervision is required, document who is responsible to provide supervision during interaction. This will be determined by the family's team. Consideration should be given based on the safety concerns and the developmental needs of the child.

  Family interactions are most "natural" when interactions are supported by those with a relationship with the child, such as other family members versus professionals. Family supports can be relied on to assist with all aspects of services including attendance at meetings, role modeling, transportation, observing interactions, etc.

Family Routines to Practice During Family Interaction. Document the goals to be accomplished during family interaction. Family interaction should focus on allowing the most natural parent-child interactions, such as:

- Cooking and eating a meal,
- Reading stories,
- Cleaning a room,
- Playing a game,
- Bath time,
- Naptime, or
- Bedtime routines.

The focus is on maintaining ties between the parent and child and assessing the parent's capacity to care for the child. Primary routines should reflect the family's SBC outcomes.

Goals are the family routines to target during the family interaction. These behavioral changes are most likely related back to the safety concerns as identified by the team.

- Family Routines to Target: Document the routines to practice during family interaction.
- Family Members Involved: Document who is expected to be involved in the routines.
- *Date Reviewed or Revised*: Document the date when the goal was reviewed or revised.

Family interaction needs to be reviewed during a Solution Focused Meeting or by those the family's team identifies, at a minimum, when:

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-001389

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

- There are changes in behavioral patterns demonstrated by the parents or children.
- Protective provisions that may be a safety concern change or arise.
- There is a change in family supports.
- There is a change in legal issues or court requirements (change in custody or guardianship) that may impact family interaction planning.
- Agreed upon behavioral changes are accomplished or not.

Transportation. Describe how transportation will be provided once individuals who are available to assist in transportation are identified. Transportation is a key component for interactions to be successful.

Resource family and other relative caregivers should be encouraged to transport children at least one way. Parents and extended family members should be expected to arrange their own transportation, though they may be given temporary support when necessary to ensure there is not a gap in family interaction; however, this will likely be accomplished by public transportation. Children in placement may have to be transported by a provider or HHS staff, one or both ways to interactions.

Other Planning Notes. Considerations when setting expectations could include, but are not limited to, the following:

- Expectations of what parents should bring to the interaction.
- Activities that parents should plan or consider doing during the interaction.
- Behaviors that provide an unsafe situation may terminate the interaction. It is important that there is a follow up with the parents in order to reduce the risk for another unsafe situation.
- The use of physical discipline or threats towards others.
- Negative comments about others, which includes the children, family members, HHS worker, contractor or provider, and other professionals part of the family's team.
- Possession or bringing any drug paraphernalia, illicit substances, or alcohol to the interaction.
- All legal decisions or documents regarding contact, including No Contact Orders, etc. will be abided by all parties.
- Obtain approval before bringing any additional individuals to family interactions. Approvals are determined by the HHS case manager or the family's team.

Family Interaction Calendar. Utilize the calendar to document the initial plan for family interactions. Include any events, appointments or activities which the parent may also attend.

Family Risk Assessment, Form 470-4133

Purpose

Form 470-4133 is used to identify risk factors during an assessment. The *Family Risk Assessment* is composed of two scales that measure the level of risk regarding neglect and abuse.

Source

Complete this form on the Family Risk Assessment tab on the STAR Assessment module in JARVIS.

Completion

The child protection worker completes the *Family Risk Assessment* during the assessment process. This form must be completed before the assessment is approved.

Exception: When abuse occurred or is alleged in an out-of-home setting and child protective concerns do not exist in the child's household, the safety assessment and risk assessment is not required.

Only **one** household can be assessed on the *Family Risk Assessment* form. Assess the child's primary residence. When the alleged perpetrator resides in the household of the noncustodial parent, assess the household of the noncustodial parent. If the child moves to a different household because of the crisis, complete the risk assessment on the household in which the child will remain.

- If the child will remain in the new household, complete the risk assessment on the new household.
- If the plan is to reunify the family, complete the risk assessment on the household **from which the child was removed**.

Upon completion of the form, a Total Neglect Risk Score and Abuse Risk Score are automatically calculated to the highest of either risk score. Use this information in the analysis of the family's strengths, needs, and recommendation for services.

The final risk level is populated on the Child Protective Services Child Abuse Assessment Summary or the Child Protective Services Family Assessment Summary. Reassess the case whenever you determine that an adjustment in the risk score is warranted (either up or down).

Distribution

The form is maintained within JARVIS and is considered assessment data.

Data

Review information obtained from systems checks, Department records including service history, not confirmed assessments, and any previous or current court involvement. Review the risk assessment definitions and complete the *Family Risk Assessment* form by checking the most applicable response.

On items involving caregivers, **select one or two** parents or substitutes based on physical and emotional proximity to the children. Do not rate more than

AMERICAN OVERSIGHT

two caregivers in a home.

Only one primary caregiver can be identified. The "primary caregiver" is the adult living in the household who assumes the most responsibility for child care.

When two adults are present and you are in doubt over which one assumes the most childcare responsibility, select the adult with custody or guardianship or the caregiver responsible for the child involved in the incident as the primary caregiver.

> Ms. X and her partner Mr. Y live together and appear to share caregiver responsibilities for Ms. X's children equally. Because Ms. X has legal custody of the children, select her as the primary caretaker.

If this does not resolve the question, select the legally responsible adult who was a perpetrator or alleged perpetrator.

> Mr. and Mrs. Z live together and appear to share caregiver responsibilities for their children equally. Mrs. Z is the alleged perpetrator of abuse, so she is selected as the primary caretaker.

When both parents are in the household, equally sharing care giving responsibilities, and both have been identified as perpetrators or alleged perpetrators, select the parent demonstrating the more severe behavior.

The "secondary caregiver" is defined as an adult living in the household who has routine responsibility for childcare, but less responsibility than the primary caregiver. A partner may be a secondary caregiver even though the partner has minimal responsibility for care of the children.

If an item relates to all caregivers and the household has more than one caregiver, **rate the caregiver with the more severe behavior**.

The risk assessment form is composed of two scales: the neglect scale and the abuse scale. For detailed guidance, see *Family Risk Assessment Guidance*, RC-0123.

After scoring all items in each scale, total the score for each scale and determine the risk level by checking the appropriate boxes in the risk level section.

Overrides

Policy Overrides: After completing the risk scales, determine if any of the policy overrides should be applied. Policy overrides reflect incident seriousness and child vulnerability concerns. They upgrade the risk level to "high" regardless of the scored risk level.

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-001394

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

Discretionary Override: After completing the risk scales, determine if a discretionary override should be applied to increase the risk level. Use a discretionary override when you are aware of unique case circumstances that warrant a higher risk level. **You must receive supervisory approval** for a discretionary override.

The discretionary override may raise the risk level only one level higher. The risk level may not be lowered by a discretionary override.

Family Risk Reassessment, Form 470-4134

Purpose	Form 470-4134 is used to identify risk factors and assist in assessing the impact of services provided to the family during a particular timeframe and whether certain events in the family have occurred during the period being measured.
Source	Complete this form on the Risk Reassessment tab on the Child Services module in JARVIS.

Enter the desired outcome of the meeting. **Family Functioning Domains**. The family functioning domains provide a consistent format for collecting, considering, and analyzing information about children and families. This consistency ensures that functioning areas most critically impacting safety, permanency, and well-being are addressed and targeted for service intervention. Use of the domains creates a common, consistent language as information about children and families flows from child protective workers to ongoing workers and service providers. The domains provide a "common lens" through which the strengths and needs of the child and family can be assessed, discussed, and used in planning and service provision. The family functioning domains consist of the following broad areas of functioning (each domain area has related subcategories): ▪ Child Well-Being: • Child's physical and mental health,

AMERICAN OVERSIGHT

- Behavior,
- Relationship with peers,
- School performance,
- Motivation and cooperation to stay with family,
- Relationship with siblings, and
- Supports.

▪ Parental Capabilities:

- Supervision of children,
- Mental health,
- Informal supports,
- Disciplinary practices,
- Physical health,
- Developmental and enrichment activities, and
- Use of drugs or alcohol.

▪ Family Safety:

- Physical abuse,
- Neglect of a child,
- Sexual abuse,
- Domestic violence, or
- Emotional abuse.

▪ Family Interactions:

- Bonding with child or children,
- Expectations of children,
- Family interaction planning,
- Relationship between parents or caregivers,
- Mutual support within the family, and
- Concurrent planning.

NOTE: A written *Family Interaction Plan*, tailored to meet the safety needs of the family is developed and/or reassessed during a family team meeting involving a child placed out of the home to assure family interaction begins as soon as possible after removal from parental custody.

▪ Home Environment

- Housing stability,
- Food and nutrition,
- Transportation,
- Safety in community,
- Financial management,
- Learning environment,
- Habitability of housing,
- Personal hygiene, and
- Income and employment.

- **Other**. Additional issues or concerns about the child or family.

  NOTE: Discuss concurrent planning and permanency goals, any interstate compact issues, child and family cultural factors, language barriers, or if the Indian Child Welfare Act applies.

Complete the family functioning domain section of the FTDM family plan by working through each domain category. Consider the child and family's strengths and needs in the various domain areas as you have discussions during the family team meeting. Fill in the narrative "strengths" and "needs" section of each applicable domain. Needs in any domain should be related to and discussed within the context of how the needs affect child safety, permanency, or well-being.

Establish a goal for each applicable domain area where a need is identified. It is critical that goals be developed in partnership with the family. Goal statements should be strength-based and focused on achieving the outcomes essential for safety, permanency, and well-being.

After reviewing the strengths, needs, and goals for each domain area, identify the strategies, services, and informal supports that may be helpful to achieving the goals.

- In each domain area where goals are identified, list the steps necessary to bring about the changes needed to accomplish the goal for that domain. The steps should clearly identify:
  - Who is responsible,
  - What do they agree to do, and
  - By when.
- Document the date for when the goal was completed or modified.

Crisis Plan. Identify and discuss what will be done if some part of the plan breaks down and a crisis happens.

Identify the risks and necessary steps needed to address the risk. The steps should clearly identify when and dated when completed or if ongoing.

Signatures and Notifications. Enter the name of invited team members, including their role, contact information, and check whether or not they attended the family team meeting.

Foster Care and/or Subsidized Adoption Information Exchange, Report S472N111-01

Purpose

Report S472N111-01, *Foster Care and/or Subsidized Adoption Information Exchange*, provides IV-E workers information that is needed to determine IV-E and Medicaid eligibility for children in foster care and adoption assistance programs.

Source

The FACS system generates this report nightly.

Completion

The FACS system automatically generates this form on foster care and adoption subsidy cases when:

- There is a start date recorded on FACS (labeled as "new placement" on the report).
- There is an end date recorded on FACS (labeled as "exit placement" on the report). (A move from one placement to another generates two reports.)
- The FACS case is transferred to a new service worker.

The IV-E worker examines the report to determine whether the change affects IV-E or Medicaid eligibility (or if additional information is needed).

Distribution

If there is an open Medicaid case with an FBU of 19, the report is issued to the IV-E worker responsible for that case. If there is no open case with a 19 FBU, the report is issued to worker number CM00 in the office where the service worker is located.

Exception: For PMIC placements, the form is generated to the IM unit in the county where the facility is.

File the report in the IV-E case record.

Data

Data reported includes:

- Identification of the workers and the reason for the report.
- Information about the child.
- Information about the child's parents.
- Information about the child's placement.

NOTE: Do not use the PLACEMENT IV-E field or the SERVICE IV-E field to evaluate IV-E eligibility.

Foster Child Behavioral Assessment, Form 470-4401 or 470-4401(S)

Purpose

The *Foster Child Behavioral Assessment* checklist serves two purposes.

- It may be used in the development of the case plan as a tool to identify the needs of the child. Every behavioral need of a foster child identified in this tool should be outlined when completing the case plan, along with the corresponding actions and responsibilities of the resource family.
- Since this tool identifies need and responsibilities, it is also the tool used to determine level of care and corresponding foster care payment.

Source

Complete the English version of this form using the template available in SharePoint under Employee Manual/Forms.

Print the Spanish version of this form from the manual or SharePoint.

Completion

Complete the *Foster Child Behavioral Assessment*:

- Within the first 30 days of a child's initial entry into foster care.
- Whenever the child's behavior changes significantly.
- When the child's placement changes.
- After termination of parental rights, in preparation for negotiating an adoption subsidy or presubsidy.
- Before a court hearing on guardianship subsidy. **Note**: The highest guardianship subsidy is limited to Level 2, basic rate plus level 2.

If a child comes out of group care or PMIC, the child's payment in the foster family home is the basic foster care maintenance rate. It is anticipated that the family team meeting, with the new foster parents participating, will be part of the discharge planning. Complete the *Foster Child Behavioral Assessment* within the first 30 days of placement.

If a child leaves foster family care and goes to shelter care and then returns to the same foster family home, the payment rate remains the same as the rate received by the foster family before the child goes to shelter care. Complete an assessment within 30 days of placement with a new foster family.

To authorize payment to the resource family at a higher level than the basic rate, this form shall be signed by the worker and the worker's supervisor.

After supervisory approval, the difficulty of care payments shall begin the first day of the month **following** the month in which the form was completed. Do not enter the new assessment rate into FACS until the supervisor has signed off and approved the assessment and rate.

Distribution

Keep the original form in the child's case file. Give a copy to the resource family upon the family's request.

Data

When completing the checklist, use all available information about the child for a thorough assessment of the child. This may include evaluations, school and provider reports, and home studies, as well as input from parents and the resource family.

Check only behavior that is severe enough to be outside the norm for a child of the same age. Do not check behavior that is typical for a child that age (e.g., "temper tantrums" for a 2-year-old).

In order to have a valid assessment, check each item that applies in **every** category ("minimal" and "moderate" and "intensive").

The template calculates the basic rate once the child's birth date is entered, and automatically calculates the level of care and the total daily rate. The form is designed so that checking all the applicable boxes will result in the proper calculation for the behaviors.

See 18-D(2), *Maintenance Payment*.

ICPC Report on Child's Placement Status (ICPC 100B), Form 470-0788

Purpose

Form 470-0788 (ICPC 100B) is used to communicate between the placer, the supervising agency, and the respective compact administrators regarding the status of a placement requested under the Interstate Compact on the Placement of Children. It is a national form, known as the ICPC 100B.

Source

Form 470-0788 (ICPC 100B) is available as a template in SharePoint under Employee Manual/Forms. Supplies of the form may also be printed from the manual or SharePoint.

Completion

Complete one form per child or per sibling if the action applies to siblings at the same time.

The person supervising the placement or causing the child to be placed completes this form each time:

- A placement is made.
- A placement is changed.
- An approved placement is canceled.
- A placement is terminated.
- A case is closed.
- There is a change of address or status of the placement (e.g., from foster care to adoption).

The Department worker is responsible for preparing the form for all children in the Department's custody or guardianship who are placed out of state and for all children placed into Iowa for whom the Department has assumed supervision under the compact.

When courts, probation officers, or private agencies have placed a child in another state or accepted supervision of a child from another state, their staff are responsible for preparing the form.

When there is a change of purpose in an existing placement, e.g., from foster care to adoption, form 470-0781 (ICPC 100A) may be required at the request of the receiving state.

Distribution

Email form 470-0788 (ICPC 100B) to the ICPC service area liaison. The liaison sends to the ICPC office who forwards to the receiving state.

Data

Section I – Identifying Information

Enter the full legal name and birthdate of the child for whom this placement information is being reported.

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-001455

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

Enter the names of the legal parents as on form 470-0781 (ICPC 100A). Enter the name of the resource, the address, and type of care. Enter the same type of care that was chosen on form 470-0781 (ICPC 100A) (e.g., adoptive home, foster family home, group home care). Enter the relationship for relative placements.

Section II – Placement Status

To confirm the initial placement, check the box that applies. Enter the exact date the child was placed in the receiving state.

If some aspect of the placement changes while the child remains in the receiving state, complete another ICPC 100B. Check the "Placement Change" box and indicate the exact effective date of the change.

If the child moves from one placement resource to another, enter the updated placement information. For example, if a child leaves the parents' home and is placed in a residential treatment center, complete the facility's name and address and indicate the new "Type of Care."

Subsequent ICPC 100B forms will list the new placement resource under "Identifying Information." Any additional moves to place the child within the receiving state will be reflected in this same manner.

If only the name (e.g., mother remarries) or address (original placement resource moves) changes, check and complete only those items that apply.

Section III – Compact Placement Termination

Check the boxes that apply:

- *Adoption Finalized*: If an ICPC adoptive placement has been finalized (consummated), check that box and the appropriate box for the state in which finalization occurred, "In Sending State" or "In Receiving State." Attach the final adoption decree.
- *Child Reached Majority/Legally Emancipated*: Check this box if the child has reached majority age and has simultaneously ceased to be the responsibility of the sending agency or if the child has become emancipated through legal action such as marriage or court decision.
- *Legal Custody Returned to Parent(s)*: Check this box when the child's legal custody or guardianship is returned to the parent with the concurrence of the receiving state. Attach the court order transferring custody to the parents to form 470-0788 (ICPC 100B).
- *Legal Custody Given to Relative*: Check this box when the child's legal custody or guardianship is awarded to relatives (other than parents) with the concurrence of the receiving state. Attach the court order transferring custody to the relative to form 470-0788 (ICPC 100B).

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-001456

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

- *Legal Custody Given to Other*: Check this box when the child's legal custody or guardianship is other (other than parents or relatives) with the concurrence of the receiving state. Enter the name and relationship to the child. Attach the court order transferring custody to the other to form 470-0788 (ICPC 100B).
- *Treatment Completed*: Check this item when the placement resource has been providing a specific treatment-oriented service; that service has been completed; and the child is, therefore, being discharged from the facility (e.g., residential treatment center). This box may also be checked if the child was placed through Article VI of the Compact.
- *Sending State's Jurisdiction Terminated with the Concurrence of the Receiving State*: Check this box when the jurisdiction of the sending state has ended for some reason other than the transfer of custody to parents or relatives with the concurrence of the receiving state's supervising agency or court.

  For example, if formal legal custody or guardianship is not going to be addressed but both states agree that supervision is no longer required or if both states agree to transfer jurisdiction to the receiving state.

  If the sending state's jurisdiction is terminated without the concurrence of the receiving state (including custody or guardianship transfer), the decision was made unilaterally and that box should be checked.
- *Unilateral Termination*: Check this box when the interstate agreement has been terminated unilaterally, whether by the sending or receiving state. A unilateral termination is one in which one state ends the interstate placement agreement without the concurrence of the receiving state.
- *Child Returned to Sending State*: Check this box when the child returns to the state the child was placed from. This may be due to a disruption in placement.
- *Child Moved to Another State*: Check this box when the child moves to a state other than the sending state.
- *Proposed Placement Request Withdrawn*: If you have submitted form ICPC 100A to request placement approval and have decided not to explore that resource further, check this box, list the "Name of the Proposed Placement Resource," and date of your decision to terminate the compact.

  Check this box only when no action has yet been taken on form 470-0781 (ICPC 100A). If you are withdrawing more than one request, submit a separate form on each and list each respective "Placement Resource."
- *Approved Resource Will Not Be Used for Placement*: Check this box when you have received an approved form 470-0781 (ICPC 100A) but have decided not to place the child with that resource. List the name of the "Approved Placement" and date of your decision to terminate the compact.

- *Other*: Check and specify if the reason for compact placement termination is not listed above. For example, the entire family moved to another state (new address should be entered under "Placement Change"), the death of a child, the child ran away and whereabouts are unknown.

Date of Termination: Enter the exact date of the activity that ended the Compact Placement Agreement.

Section IV – Signatures

If a private person or local agency is completing the form, have a designated person sign, under "Person/Agency/Supplying Information," identify the agency, and date the signature.

The compact administrator, deputy, or alternate should sign and date the second block.

ICPC Request (ICPC 100A), Form 470-0781

Purpose

Form 470-0781 (ICPC 100A) is the sending agency's formal written notice to the receiving state of its intention to make an interstate placement. It requests a finding as to whether the placement would be contrary to the interests of the child. With most placements, it is also a formal request for a home study.

Following review by the receiving state, it is the official notice of the receiving state's decision. A favorable finding means that the placement can be made in conformity with the compact. An unfavorable finding means that the placement would be unlawful.

Form 470-0781 (ICPC 100A) must accompany all requests for placement to which the compact is applicable. It must be favorably acted upon by the receiving state before any compact placement is made.

Source

Form 470-0781 (ICPC 100A) is available as a template in SharePoint under Employee Manual/Forms.

Completion

Complete one form per child or per sibling if the action applies to siblings at the same time.

The service worker, private agency, court, or any person placing the child may complete this form. It is prepared when a request is being made to place a child in another state.

Distribution

Distribute as follows:

- The sending agency/Iowa ICPC service area liaison uploads the completed 100A into the National Electronic Interstate Compact Enterprise (NEICE) and electronically sends to the sending state deputy compact administrator.
- The deputy compact administrator reviews, signs, and sends to the receiving state's identified administrator.
- The receiving agency administrator completes Section IV of the form and returns to the sending state ICPC office.
- The sending state administrator sends via NEICE to the sending agency.

Data

In the first two blocks, enter the name and address of the ICPC administrator (or deputy) to whom the request is being forwarded (TO) and the name and address of the ICPC administrator (or deputy) whose state is submitting the request (FROM). If information for the receiving state is unknown, enter only the name of the state.

Section I – Identifying Data

Enter the full legal name, social security number, Indian Child Welfare Act (ICWA) eligibility, IV-E eligibility, sex, gender, date of birth, and ethnic group of the child for whom this placement is proposed. If the child is known by a nickname, place it in parenthesis beside the legal name.

NOTE: An "Indian child" means any unmarried person who is under age 18 and is either:

- A member of an Indian tribe or
- Eligible for membership in an Indian tribe and is the biological child of a member of an Indian tribe.

Enter the names of the legal parents, usually the birth parents. When an adoption is finalized, the adoptive parents are the legal parents. If the parent is deceased, enter "deceased" after the parent's name.

If parental rights are voluntarily relinquished or terminated by the court, indicate in parenthesis beside the name. If you prefer to withhold the name, simply enter the status of the parent's rights.

Enter the complete name, address, and telephone number of the agency or person who is responsible for planning for the child and who is financially responsible for the child. In most cases, these two items will be the same (the sending agency). Email addresses are optional.

Section II – Placement Information

Types of Care Requested. Check the boxes designating the following:

- *Public Placement*: Public placement means a placement processed by a public child welfare agency where the state or local agency, or the court has authority to make the placement.
- *Private Placement*: Private placement means a placement made by a parent or a private or independent agency or representative not acting as an agent of the state (e.g., private adoption) or, in the case of a private residential treatment placement, where a parent or guardian is making the placement (e.g., private Residential Treatment Facility (RTF)/Residential Treatment Center (RTC) placement, etc.).
- *Subsidy*: Check the box for public foster care or adoption to denote IV-E federal, non-IV-E state or local, or none for no financial support. Select pending if not yet determined.
- *Adoptive Home*: Adoptive home refers to both agency and private or independent adoptive placement before finalization of an adoption. This may refer to an initial placement with a family where adoption is the intention or it may refer to the movement of an adoptive family from state A to state B following placement.

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 454 (Attachment 2 of 5)

If this is a request for private or independent adoption, you are required to also complete the fields for the names, address, social security numbers, and telephone number for the prospective adoptive resource. Indicate if it is a federally-funded adoption subsidy (IV-E) or a state- or local-funded subsidy (non IV-E), pending (if not yet determined), or none.

- *Finalizing in*: Check one box to indicate the state in which the adoption will be finalized if known, otherwise mark pending.
- *Foster Family Home*: A foster family home is a facility providing care and guidance for a child or children not related to the caretaker for regular 24-hour care, or a certified kinship care home. A family foster home may not operate without a license or a certificate as required by the laws of the receiving state.
- *Group Home Care*: A resource which is licensed or approved as a group home and which provides substitute care for a fee; usually a modified family-type setting which serves more children than a foster home but fewer than an institution.
- *Child-Caring Institution*: A group care facility that is licensed or approved to provide custodial care to a larger number of children than a foster home or group home.
- *Residential Treatment Center*: A group care facility that provides a specific treatment program outside the realm of a medical hospital, psychiatric hospital, or institution for children with an intellectual disability (e.g., a residential program for the treatment of alcohol or drug abuse. The receiving state is not obligated to supervise this type of placement made by the sending state.
- *Parent*: A biological or adoptive parent or legal guardian as determined by applicable state law and who is responsible for the care, custody, and control of a child or upon whom there is legal duty for such care.
- *Institutional Care – Article VI Adjudicated Delinquent*: A group care facility for adjudicated delinquents whose proposed placement is according to Article VI of the ICPC. These facilities may include group homes and residential treatment centers and may serve non-delinquents as well.
- *Relative (Not Parent) Relationship*: Specify relationship, such as maternal aunt, paternal grandparents, brother, etc.
- *Other*: Specify a type of care not already listed, such as:
  - Nonrelative free home (an unrelated family that does not require foster home licensure in the receiving state and does not need or want foster care payments)
  - Independent living arrangement (an older teenager who is still under the jurisdiction of an agency or court but is capable of independent living without the supervision of a foster home or group home)

- Maternity home
- Extended foster care (youth aged 18–21 years old)

Current Legal Status of Child. Check the appropriate box.

- *Sending Agency Custody/Guardianship*: The child is in the full legal custody or guardianship (depending on the state's terminology) of a public agency. For example, a public agency may be social services, youth corrections, probation, parole, or a tribe. If allowed by state law, the sending agency may also be a licensed private child placement agency, an adoption agency, or a birth mother.
- *Parent/Relative Custody/Guardianship*: The child is not under the jurisdiction of either an agency or the court but is the full legal responsibility of a parent or relative. This choice is most likely to be marked when a parent, relative or guardian wishes to place a child in one of the types of care listed.
- *Court Jurisdiction Only*: The court has an open abuse, neglect, or dependency case that establishes court jurisdiction with the authority to supervise or remove and place the child for whom the court has not taken guardianship or legal custody.
- *Protective Supervision*: A legal status created by court order under which the child is permitted to remain in the child's home or is placed with a relative or other suitable person and the court, the Department, or another agency designated by the court provides supervision and assistance.
- *Parental Rights Terminated – Right to Place for Adoption*: The sending agency has accepted a voluntary relinquishment of parental rights or has completed court action terminating parental rights and now holds complete jurisdiction over the child with the right to place for adoption.
- *Unaccompanied Refugee Minor*: This form is not used to report the initial placement into the United States but to request placement and services in a second state after a U.S. agency or court has been granted full legal responsibility (custody or guardianship). Check this box only if that is the case.

  Also mark the "Sending Agency Custody/Guardianship" box. If this is an unaccompanied refugee minor whose status warrants the ICPC 100A specific to those children (not the legal responsibility of an U.S. agency or court), do not use this form.
- *Other*: Legal status is not otherwise listed (e.g., legal action, such as a petition for custody or guardianship or to terminate parental rights, is pending).

  For example, the child is the responsibility of the sending agency under a voluntary agreement with the parent or legally responsible relative and no court action has been taken or is pending to alter the family member's legal rights over the child.

Name of Person(s) or Facility Child is to be Placed with. Enter the name, address, and telephone number of the agency, facility, or individuals where the child will be placed. These entries are required.

Name(s) of Prospective Adoptive or Foster Resource. If placement is with an agency (e.g., adoption, foster care, etc.) other than a residential treatment facility (RTF), provide the foster or adoptive resource where the child will reside.

Enter the name, address, social security number, and telephone number of the individual with whom the child will be residing if it differs from the information in the section "Name of Person(s) or Facility Child is to be Placed with."

Section III – Services Requested

Initial Report Requested. If the proposed placement is not for a group care placement and a current home study has not yet been received, check the box for the appropriate type of home study needed based on the type of care indicated in Section II.

Supervisory Services Requested. Check one of the following boxes to indicate how supervisory services are to be conducted:

- *Request Receiving State to Arrange Supervision*: Check this box if the sending agency cannot supervise and does not have a contractual or other agreement with a pre-determined agency to provide these services. Usually the public social service agency will be asked to provide supervision following an approved home study and subsequent placement.
- *Another Agency Agreed to Supervise*: Check this box if the sending agency already has received the formal agreement of a pre-determined supervisory agency. This choice is most likely to be checked in agency adoptive placements where an agency in the receiving state already has provided an adoptive home study and will be providing ongoing services to the adoptive family.

  Do not check this item because you know which county office of the public agency will receive this referral and may have discussed the case over the telephone. That does not constitute an agreement to supervise.
- *Sending Agency to Supervise*: Check this box if it is logistically feasible, it is the best-case plan, and the receiving state has granted the sending agency permission (which may or may not include licensure) to provide services in its state.
- *Other*: Check this box if requesting supervision for extended foster care youth (defined as youth aged 18–21 years).

Supervisory Reports Requested. Complete even though placement may not be a certainty at this time. Indicate how frequently you wish to receive progress reports. Standard timeframes are semi-annually, quarterly, monthly, or other. Check "other" when you wish to receive reports in a timeframe not listed.

Name and Address of Supervising Agency in Receiving State. If you know the name and address of the supervising agency, enter that information onto the line indicated. If not known by the sending agency, that information should be completed by the receiving state's compact office following receipt of a recommendation indicating that placement may be made.

Enclosed. Check which of the following items are enclosed:

- *Child's Social History*: Should accompany the majority of referrals; includes the pre-placement summary on adoption referrals and can be written with non-identifying information, if appropriate and preferred.
- *Home Study of Placement Resource*: Attach a current home study if one is not being requested; most likely to be checked if you already have an approved home study or the child is relocating with a placement resource and the home study is enclosed.
- *Court Order*: All applicable court documents should be enclosed (e.g., custody or guardianship orders, surrenders, orders terminating parental rights, and orders requesting a home study for the court).
- *ICWA Enclosure*: Obtain a letter from the child's tribe showing that the child is a member or is eligible for membership.
- *Financial/Medical Plan*: Attach the plan of how the proposed placement will be funded and how the children's medical needs will be covered.
- *IV-E Eligibility Documentation*: Attach a copy of the determination of IV-E eligibility.
- *Other Enclosures*: Indicates other pertinent materials, such as psychological evaluations, permanency plan, medical reports, school reports, birth certificates, and social security cards. It is not necessary to list them on the form.

Signature of Sending Agency or Person. The form should be signed and dated by anyone outside of the compact office who is completing the form as the sending agency. This includes a person with authority in the county social services agency, private agency, or court and any private individual or family member who is legally responsible for the child (as indicated in Section I and Section II, Legal Status).

Signature of Sending State Compact Administrator, Deputy or Alternate. Pursuant to Article III(d) of ICPC.

If the regulations of the sending state provide for transmittal of the form through the sending state's compact office, the compact administrator, deputy, or alternative in the sending state must sign and date the form. This is almost always the case.

Next Steps, Form 470-5592

Purpose

Form 470-5592 is an optional resource for working with families to document agreements or activities that fall outside of the scope of a *Safety Plan*. The *Next Steps* can be used whether or not a *Safety Plan* is required.

Families are often eager to get started on resolving issues identified during a protective assessment or service case. For example, parents may voice a commitment to making a mental health appointment for themselves or their child, seeking child care, cleaning their house, etc. The *Next Steps* should be simple – who will do what by when. Unlike the *Safety Plan*, the *Next Steps* can be a promissory note – a tool for creating a reminder of commitments that have been made for the good of the children and the family.

Never use the *Next Steps* to make temporary or voluntary changes in child custody. The *Next Steps* does not replace the *Safety Plan*, which must be completed if a child is determined to be safe with a plan. The *Next Steps* is not binding, but a way to engage families regarding commitments they or others (including the Department) make to help preserve and strengthen family connections.

Source

Print this form from the manual or SharePoint under Employee Manual/Forms.

This form is also printed as a three-part carbonless set. Order supplies from Iowa Prison Industries in Anamosa.

Completion

When deemed useful, the child protection worker or social work case manager completes the *Next Steps* with the family, documenting who has agreed to an action step, what that action step is, and when it will be completed.

Use the *Next Steps* during the course of an assessment or anytime throughout the Life of the Case. Only those who are agreeing to an action step need to be present and sign the *Next Steps*. The *Next Steps* can be created in the family's home, at a meeting involving the family, or in other circumstances where action steps are identified.

Distribution

If a printed form is used in place of the three-part carbonless form, a picture of the *Next Steps* must be taken with a state-issued phone or camera.

Leave a copy or the original of the completed form with the family. Keep a copy for the Department's records by uploading the copy or photo of the completed form into File Manager (located within the JARVIS-STAR assessment module) or in the service case file.

Data

Family name: Document the last name of the family. The child protection worker may want to include the name of the child victim. The social work case manager may want to include the name of the youngest child.

Request for a One Year Foster Family License, Form 470-5124

Purpose	Form 470-5124 is used to document the request for approval or denial of one-year licensure for foster families.
Source	Complete this form using the template in SharePoint under Employee Manual/Forms.
Completion	The Department licensing worker completes this form upon receipt of the licensing renewal packet for foster families who have completed their first two years of licensure. Use this form only for foster families whose performance in the previous licensing year indicates the need for a one-year license. Mark the reasons for the request as indicated on the form. *Other reasons* can be for: ▪ Continuing lack of compliance with adherence to foster care licensing rules, foster care placement contract, or foster family handbook; ▪ Behavior that could have negative impact on foster children, such as alcohol or substance abuse; ▪ Health or mental health concern. The occurrence of one or more of the reasons does not require a recommendation of a one-year license. Take into consideration the circumstances, foster family's history, willingness to take responsibility and made adjustments, and other relevant factors when deciding whether to make the request. Also document voluntary requests by the foster family in this section. If you need more space to write the information under *Other reasons*, use another sheet of paper and attach it to this form.
Distribution	Attach the home study, corrective action plan, letter to the foster parents, and other supporting documents or reports to this form. Send the completed form with attachments to the Foster Family Program Manager in Central Office. The Adult, Children and Family Services Division Administrator reviews the request and indicates on the form approval or denial and an effective date. The division administrator signs the form. The foster family program manager returns a copy to the Department licensing worker. The Department licensing worker then sends the foster family the *Notice of Action* and enters the foster home renewal date in FACS. If the division administrator approves the request for a one-year license, the Department licensing worker notifies the foster family program manager who completes the override in FACS.

S	Single
M	Married
Sep	Separated
D	Divorced

- *Relationship to child identified above*: Specify paternal or maternal to identify which side of the family is involved.

  NOTE: Consider "half" relationships the same as whole relationships (e.g., a "half-sister" is the same as a sister). Consider "step" relationships the same as if related by blood (e.g., a "stepbrother" is the same as a brother).

  A relationship "by marriage" terminates when death or divorce occurs, but if a child was born of the married parents, the relationship between the parents continues even after the marriage is dissolved.

  Termination of parental rights of a birth parent by a court severs all relationships between the child, the parent's parents, and all other relatives (either by blood or marriage).

Youth Transition Decision-Making (YTDM) Youth's Dream Path, Form 470-5176

Purpose

The *Youth Transition Decision-Making (YTDM) Youth's Dream Path*, form 470-5176, is the official model to use during the YTDM meeting.

Source

Complete this form using the template available in SharePoint under Employee Manual/Forms.

Supplies of this form may also be printed from the manual or SharePoint as needed.

Completion

The YTDM meeting facilitator develops the youth's dream path, in collaboration with the youth, after a youth transition decision-making meeting is held.

Distribution

The facilitator gives a copy of the completed form to the identified team members. Keep the original form in the youth's case file.

Data

Case Information. Enter the following information:

- Youth name
- Parent/caregiver name
- Parent/caregiver/noncustodial names
- Date of the YTDM meeting
- Date of the next YTDM meeting
- Facilitator name and approval number
- Next court hearing date and time
- Type of hearing

Desired Outcome of this Meeting. Use the Dream Path as a tool for the stabilization and action planning parts of the YTDM meeting.

The Dream Path includes the stabilization phase, which identifies the five Fostering Connection areas that need to be addressed and stabilized in the first column.

The five Fostering Connections areas are:

- Education
- Employment
- Health
- Housing
- Supportive Relationships

Complete the stabilization section of the YTDM youth plan by working through each of the five fostering connections categories from left to right. The far left column is available to write the current or 'Now" situation for the youth. Under the column, "What will happen," establish a goal for each applicable area where a need is identified. It is critical that goals be developed in partnership with the youth. Goal statements should be strength-based and focused on achieving the outcomes essential for the youth.

After reviewing the strengths, needs, and goals for each area, identify the "Who will help me" (services or supports that may be helpful) to achieving the goals.

In each category list the action steps needed to achieve the goal. The steps should clearly identify:

- If youth is in agreement;
- Who is responsible;
- What do they agree to do; and
- By when, which is documented under either the 0 to 3 months column or the 4 to 9 months column.

Crisis Plan (Plan B). Identify and discuss what will be done if some part of the plan breaks down and a crisis happens.

Identify the risks and necessary steps needed to address the risk. The steps should clearly identify when and dated when completed or if ongoing.

To move into the Dream Path phase. Each YTDM meeting begins with a review of the five Fostering Connections areas to determine if changes or adaptations need to be made. Once the youth has achieved stability, the longer range planning can begin. Review the 'Dream' written in the 'cloud' on the far right of the document and determine the steps to head in that direction. Develop action plans with a six to nine months' time frame.

Each additional meeting of the team can look ahead further. The youth will be fully listened to and have input every step of the way. If there is disagreement, take the time to discuss the issue and resolve it before moving forward.

Each meeting covers strengths of the youth and a review of the previous assignments. Establish a new Crisis Plan (Plan B) at each meeting as well. Completion of the YTDM meeting process is determined by the youth and the team. It can continue informally after the youth ages out of the system, if desired.

Des Moines, Iowa 50319

Dear Mr. Karim:

The Iowa Department of Health and Human Services (HHS) is submitting a public assistance cost allocation plan to reflect the merger of the Iowa Department of Human Services (DHS) with the Iowa Department of Public Health (IDPH), Department on Aging, Department of Human Rights, Volunteer Iowa, Iowa Child Advocacy Board, and Early Childhood Iowa effective July 1, 2023. Under separate copy, we submitted an indirect cost rate proposal (ICRP) with revised indirect cost rates.

As this plan represents a complete rewrite, it does not include track changes. There are minor changes in the intro to the Random Moment Sampling (RMS) section that are in red and strike through to address organizational references. There are also changes to the Social Services RMS to remove Adult Protective workers from the RMS.

If you have any questions, please contact me or Mark Riewer, our cost allocation specialist at mriewer@dhs.state.ia.us.

Thank you for your attention.

Sincerely,

Jess Benson

III. OVERVIEW OF AGENCY

Introduction

The Iowa Department of Health and Human Services (the Department or HHS) is comprised of the former Department of Human Services, Department of Public Health, Department of Human Rights, and the Department of Aging. Throughout the State Fiscal Year 2023, the agency has worked on a transition of these legacy departments into the umbrella agency of HHS, with an effective date of July 1, 2023. The purpose of this Cost Allocation Plan is to fully allocate the administrative costs of the Department to all benefitting programs in a consistent, reasonable, and thorough manner.

HHS administers both state and federal public assistance programs tied to activities associated with institutional programs for juvenile offenders, and institutional and community service programs for the mentally ill, mentally retarded, and developmentally disabled. Programs are administered by employees in the central administrative offices and are described within Section V. Table of Organization (TO) of this plan.

All HHS administrative costs are covered under this single Public Assistance Cost Allocation Plan (PACAP). Accordingly, all costs of the Department are allocated on a current basis each quarter. The standard administrative FFP percent is 50% unless an APD or another FFP percent is indicated in the narrative.

PACAP Organization

1) Ledger System

   The Department's expenditures are recorded in the Integrated Information for Iowa (I3) system, the State of Iowa accounting system.

2) Costs of services provided to the Department by other state agencies.

   a) Costs of the state central services are documented through a Statewide Cost Allocation Plan (SWCAP) which is prepared by the Iowa Department of Administrative Services (DAS).
   b) HHS maintains cooperative agreements with other state agencies, such as the Department of Inspections and Appeals, for the provision of services which are not considered state central services. These services are also direct billed to the Department and are also subject to approval of billing methodology by the cognizant federal negotiation agency.
   c) Wherever costs are claimed for services provided by a governmental agency outside the State agency, they are supported by a written agreement that includes, at a minimum (i) the specific service(s) being purchased, (ii) the basis upon which the billing will be made by the provider agency (e.g. time reports, number of homes inspected, etc.) and (iii) a stipulation that the billing will be based on the actual cost incurred, as required by 45 CFR Part 95.507 (b)(6).
   d) HHS acts as the Single State Agency for multiple programs including for the State of Iowa for Title IV-E administrative expenses. State agencies including the Juvenile Court System and the

AMERICAN OVERSIGHT

State Public Defender claim administrative expenses for federal reimbursement for allowable activities outside the purview of HHS.

3) Costs of services provided to the Department by county governments.

   a) Iowa counties are required by state law to provide resources such as office space, utilities, equipment, and supplies for use by the local offices of the Department. This category includes direct costs as well as indirect costs which are documented annually through the preparation of county-wide cost allocation plans.

AMERICAN OVERSIGHT

IV. COST IDENTIFICATION

The Department's expenditures are recorded in the Integrated Information for Iowa (I3) system, the State of Iowa accounting system. Refer to Appendix G for a detailed definition of the expense categories within I3.

The Department has separate state appropriations and maintains separate accountability Divisions which are also referred to as Verticals. In addition, separate accountability is maintained for costs of Local Administrative Expenses and Miscellaneous Administrative Program Expenses.

Within each Division/Vertical are various Bureaus, which are comprised of multiple Cost Centers. All costs are allocated as indicated in the PACAP narrative for the Cost Center. Each Cost Center includes object classes which are universal across Cost Centers. Individual object classes may be unallowable. A list of object classes and their general allowability is identified in Appendix F.

Cost Allocation System

Cost allocation processes and procedures implemented by HHS staff follow cost accounting policies and procedures consistent with State laws and 45 CFR 95, Subpart E and 2 CFR 200.

The Cost Allocation Plan is implemented through a combination of a proprietary computer software program for the allocation of actual administrative costs of the Department at the close of each quarter of the state's fiscal year and the use of the I3 ledger to record administrative expense.

Head Count Statistics

The Cost Allocation Plan utilizes many head count statistics to allocate costs. The number of employees for any given Cost Center is determined by taking a count of the number of staff paid for that Cost Center during a randomly chosen single biweekly pay period during each quarter. Contracted staff are included in head count allocations unless noted by assigning their head to the units billed each quarter.

AMERICAN OVERSIGHT

Indirect Cost Rates

All indirect costs are allocated initially in the PACAP to the Divisions and Bureaus (also referred to as verticals) in HHS. Certain Divisions and Bureaus prepare indirect cost rates that are submitted to the U.S. Department of Health and Human Services (USDHHS) because of the types of grants that they receive. The rates are either prepared for the entire Division/ Bureau or an area of the Division/ Bureau. The entire process is initiated within the PACAP to ensure that there is no duplication of costs. The table below lists the indirect cost rates that are prepared for HHS.

Division/ Bureau	Area
07 Behavioral Health and Disability Services	Addictive Disorders
08 Public Health	Entire Division
09 Community Access	Preventive Health
10 Family Well-Being and Protection	Maternal and Child Health
11 Aging and Disability	Entire Division
Human Rights	Human Rights (and Energy and Family Development and Self-Sufficiency (FaDSS) programs overseen by Human Rights)
Performance/Behavioral Risk Factor Surveillance System (BRFSS)	Entire Bureau
Volunteer Iowa	Entire Bureau

Statewide Central Service Costs

Costs of services provided to HHS by other state agencies. Costs of the state central services are documented through a Statewide Cost Allocation Plan which is prepared by the Iowa Department of Administrative Services (DAS). The Statewide Plan is approved annually by the cognizant federal negotiation agency, the U.S. Department of Health and Human Services (USDHHS) and encompasses both Section I and Section II costs. Section I costs are those which are allocated through the Statewide Plan. Section II costs are those which are direct billed by other state agencies.

In addition, HHS maintains cooperative agreements with other state agencies, such as the Department of Inspections and Appeals, for the provision of services which are not considered state central services. These services are also direct billed to the Department and are also subject to approval of billing methodology by the cognizant federal negotiation agency.

Wherever costs are claimed for services provided by a governmental agency outside the State agency, they are supported by a written agreement that includes, at a minimum (i) the specific service(s) being

AMERICAN OVERSIGHT

purchased, (ii) the basis upon which the billing will be made by the provider agency (e.g. time reports, number of homes inspected, etc.) and (iii) a stipulation that the billing will be based on the actual cost incurred, as required by 45 CFR Part 95.507 (b)(6).

The following statewide central services have been grouped into several categories and are allocated by Head Count across HHS (excluding contractors).

DAS State Accounting Enterprise	Costs included consist of centralized payroll, preaudit, accounting, and I3 (the State of Iowa accounting system) support.
Finance	Costs included in the statewide cost allocation plan related to finance consist of the State Treasurer and the Department of Management centralized budget costs
Building Space Costs	Costs included in the statewide cost allocation plan relate only to the space used by the Department in the capital complex. Costs included are utilities, security, and building use cost/depreciation.

Treatment of Terminal Leave Costs

State employees who leave state service in good standing are eligible for benefits based upon accumulated balances of unpaid leave. All such employees are eligible to receive payment for their accumulated vacation leave balance. Sick Leave Incentive Match (SLIP) pays for medical insurance premiums for staff retiring from state government who have accumulated more than $2,000 of sick leave pay. The state will continue to pay the employee share of medical insurance for staff until the accrued sick leave dollars are zero or the staff reach the age of 65.

Terminal leave costs are allocated by Head Count across HHS in the PACAP.

This procedure recognizes that the accumulated leave may have been earned when working in other positions and funded from sources other than the program in which the employee is paid at the time of termination.

Department of Inspections and Appeals (DIA) Costs

Under a cooperative agreement with the Department of Health and Human Services, periodic billings are received from the Department of Inspections and Appeals for services including:

SA05	**Audits of Care Facilities**	Allocated to Medical Assistance-Other Staff Title XIX (PP003) 50% FFP.

Nutrition Outreach

Billings received from Iowa State University Extension Services and local community non-profit entities for Nutrition Outreach are allocated directly to the Family Outreach Program, (PP036).

Depreciation

Purchases of five thousand dollars or more will be deemed as unallowable in the period purchased and will be claimed for federal reimbursement in equal installments over the depreciable life of the asset based on the Department of the Treasury, Internal Revenue Service asset depreciation guidelines with no residual value. Capital gains and losses will be claimed for federal reimbursement upon disposal of the asset. The Agency will, from time to time, seek an exception from the depreciation requirement from the cognizant Federal Agency for program-specific purchases. Upon approval of the exception, the agency will claim federal participation for the asset in the period acquired.

09.00.00 – Community Access

The Community Access Division serves as an entry point for Iowans to the many services, programs, and benefits offered by the Department. With many basic financial, work, and health supports now provided in one Division, our goal is to seamlessly connect Iowans to the right supports at the right time, collaborating across programs to provide warm handoffs. Division staff are in the central office and in statewide field offices, and help Iowans understand what programs and services they are eligible for, assist them with enrollment, and directly provide health services to families.

This Division houses Child Support Services which helps ensure families receive the child support they need in order to be able to meet the financial and health needs of their children.

The Economic Assistance Programs team combines policy, operations, and field services to help Iowans access and maintain services such as Medicaid, SNAP, WIC, and Rent Reimbursement.

The Wellness and Preventive Health team offers services to support the health and well-being of Iowa families and communities, including reproductive health, child and adolescent health, oral health, and nutrition and physical activity. This Division includes Preventive Health which prepares an indirect cost rate.

10.00.00 – Family Well-Being and Protection

As its name implies, the Family Well-Being & Protection Division is dedicated to serving and protecting Iowa families; in particular, children.

The Division consists of three functional areas: Child Care, Child Protective Services, and Early Intervention & Supports.

The Child Care team sets direction and policy for Child Care Assistance in Iowa, including ways to expand eligibility, support accessibility to quality child care, and targeted strategies to address child care "deserts."

Child Protective Services combines policy development with operations to help ensure safety, permanency and well-being for children and families of Iowa. This area oversees a variety of services, supports, and programs, including family preservation, foster and adoptive services, and residential programs.

Early Intervention & Support includes a network of primary prevention programs and services that are accessible throughout Iowa communities. This organizational design increases Iowa's capacity to address and support the well-being of young children, families, and caregivers, diverting families away from the child welfare system and toward community supports and evidence-based programs. Maternal and Child Health programs, formerly part of the Department of Public Health, utilize an indirect cost rate.

Head Count across HHS: Head Count across HHS includes all staff and directly supervised contractors. For cost allocation purposes, a weighting of five percent has been assigned to mental health institutions, state hospital schools, juvenile institutions, and the Civil Commitment Unit for Sexual Offenders (CCUSO). This weighting is made to avoid a significant distortion in the allocation base. These institutions are not fully supported by HHS staff.

E. Indirect

Aging and Disability Indirect Cost Rate: These costs are sent directly to the numerator of the indirect cost rate for Aging & Disability.

Preventive Health Indirect Cost Rate: These costs are sent directly to the numerator of the indirect cost rate for Preventive Health. These costs sit within Community Access but only support Preventive Health programs.

H. Project Online

Is a project management system in which information technology staff record time on specific projects and efforts.

I. Random Moment Sample (RMS)

Head Count Split, IM and SS RMS: Costs are initially distributed between Income Maintenance Support Areas and Social Services Support Areas based on the head count of employees in each area. The resultant allocations are then further allocated as follows:

Income Maintenance Support Service Areas costs are allocated based on the results of the Income Maintenance Random Moment Sample time study.

Social Services Support Service Areas costs are allocated based on the results of the Social Services Random Moment Sample time study.

Income Maintenance (IM) and Social Service (SS) Random Moment Sample Methodologies:

Overview

Random Moment Sampling (RMS) software is utilized by the state agency to identify ~~Field Operations Division (Field OPS)~~ employee effort related to specific field programs and activities within 1) social services and 2) income

AMERICAN OVERSIGHT

maintenance programs to determine the ultimate federal and state funding sources attributable to those programs and activities. These staff are located in the Family Well-Being and Protection and the Community Access Verticals respectively.

Identification of the Universes

Two separate sampling universes are defined for the purposes of the RMS. Two distinct universes (one for social services and one for income maintenance) identify the efforts of direct worker field staff involved in the day-to-day administration of the Department's social service and income maintenance programs.

Using the 1981 Office of Procurement Assistance, and Logistics (OPAL) guidelines as the basis for this determination, the following definition was used to establish which workers were to be included in the sampling universe.

The population covered by the individual RMS should consist of the following:

1. Employees who are directly involved with the provision of social services and/or case maintenance with the following job classes:
    a. Social Services Worker II
    b. Social Services Worker III
2. Employees directly involved in eligibility determinations, predeterminations, and/or case maintenance with the following job classes:
    a. Income Maintenance Worker I
    b. Income Maintenance Worker II

All positions listed above within fund code 0001 and agency code 402 are eligible for sampling and represent the universe of sampled employees except for direct charge staff whose efforts are 100% attributable to one ultimate funding source.

Universe Member Creation

As previously indicated, the RMS software contains two sample groups: 1) social service employees and 2) income maintenance employees.

Prior to the start of each new sampling quarter the following occurs:

1. Each distinct sample group (SW and IM) is copied forward from the previous quarter and becomes the base sample of employees for the upcoming quarter.
2. The last available listing of social workers and income maintenance workers is downloaded from the state payroll system and compared to the base sample listing from the previous quarter.
    a. Employees listed in the base sample but not listed in the payroll download are removed from the base sample for the coming quarter.
    b. Employees not listed in the base sample but listed in the payroll download are added to the base sample for the coming quarter.
    c. Known new hires (those hired but not in the payroll sample) are added to the current quarter sample if the following is available at the time of the sample generation:
        i. A valid email address exists in the state system at the time of sample group creation.
        ii. An office assignment is known at the time of sample membership creation.
    d. Work schedule is assigned as 8:00 to 4:30 M-F when information is not available at the time of sample group creation.

AMERICAN OVERSIGHT

3. Current quarter sample groups are compared against vacant position responses from the previous quarter to remove any late terminations not reflected in 2.a.
4. Pursuant to 2 CFR 200.430(5)(i)(B), current quarter sample groups for each universe are compared against "Outside of normal work hours" responses (non-strikes) from the previous quarter and schedules are adjusted for the upcoming quarter.

Sample Creation

Once the sample group membership creation process for each universe is complete, the actual sample for the coming quarter can be created.

Prior to the start of each new sampling quarter the following occurs for each member universe:

1. Current sample beginning and end dates are entered to encompass entire upcoming quarter
2. State holidays for the current sampling quarter are entered
3. Sample size is selected to be 2,700 (2.400 requested + 300 oversamples) per universe
4. Sample validation is selected to be 10% of all samples per universe for the quarter
5. Entire random sample is system generated for each universe for the upcoming quarter
    a. Random samples can be selected at any time based on the following criteria:
        i. Non-weekend and non-state holiday dates
        ii. Available work hours of sampled staff
            1. Each staff member can have unique work hours
            2. Sampled staff do not receive samples outside scheduled work hours
6. Respective universe members have equal chance of selection for samples that fall within their assigned work hours and can receive multiple RMS requests for a given day
7. System automatically emails samples to the employees as they become active throughout the upcoming quarter.
    a. 40-50 samples a day emailed to employees in each universe
    b. 4-5 sample validations emailed to sample validators (see next section) in each universe

It should be noted that the entire sample is drawn and determined prior to the beginning of the quarter. Yet, while all sample dates and times are known within the system, only RMS administrative staff (see RMS administration section) have access to the schedule (as a function of system access) for the upcoming quarter. No sampled employee, field staff supervisor, or management outside of the RMS system administration framework has access to the sample dates and times housed in the RMS system.

The following chart illustrates sample creation and usage throughout the year:

Payroll Processing for Period Ending	Survey Period	Applicable Federal Claim Period
Last available processed payroll of Jun	Jul Aug Sep	Jul Aug Sep
Last available processed payroll of Sep	Oct Nov Dec	Oct Nov Dec
Last available processed payroll of Dec	Jan Feb Mar	Jan Feb Mar
Last available processed payroll of Mar	Apr May Jun	Apr May Jun

AMERICAN OVERSIGHT

The last available processed payroll of the month can vary due to the time restraints of updating the sample membership for each universe. Generally, if the final payroll of the month is processed in the last week, the previous payroll file (the first payroll file) of the last month of the quarter must be used to update the respective sample memberships for each universe.

Sample Size

The sample size required to produce mandatory levels of precision and confidence is determined initially through the application of the following equation:

$$n = \frac{p(1-p)}{\left(\frac{se}{t}\right)^2}$$

Where: n = sample size

p = maximum anticipated rate of occurrence of the activities being observed

se = desired sample precision (standard error)

t = 1.96 for a 95 percent confidence level

The calculation of minimum sample size is based on the highest expected rate of occurrence of any one activity. Historically, the maximum occurrence rate for any one activity from the RMS results does not exceed 30%. As long as this occurrence rate does not exceed fifty percent, this will avoid the need to subsequently increase sample size in order to maintain the mandated precision and confidence levels. Utilizing the above formula, if the highest incidence of occurrence of any activity is thirty percent, and the desired standard error is 2% and t=1.96 for at 95% confidence level, the required sample size would be 2017 samples.

The above equation assumes a population from which the sample is drawn to be larger than one hundred workers.

Federal partners have requested that the sample size be minimally 2,400 samples for each universe regardless of the above calculation. Additionally, the agency adds an additional 300 samples to each universe quarterly to compensate for vacant positions that arise over the course of the quarter.

Confidence Level and Precision

The RMS software was designed to permit a level of precision at +/- two percent with a ninety-five percent confidence level. For activities with expected rates of occurrence less than five percent, precision is reduced to +/- five percent. However, the confidence level will remain at ninety-five percent regardless of the expected rate of occurrence.

Random Sample Distribution

Once the sample for the upcoming quarter has been drawn and the new quarter sample commences, the RMS software emails the 2,700 samples from each universe sequentially based on the time the RMS samples become active.

AMERICAN OVERSIGHT

The employee receives no prior notice of the issuance of a random sample moment. For example, on the first day of the new quarter sample #1 was drawn for a social services worker for their activity at 7:48 AM. At 7:48 AM the sample becomes active and is queued by the software system for distribution. At 7:50 AM the system batch process sends out the following form email (system view shown below) to the sampled employee asking them to report their activity at 7:48 AM:

Sampled employee email from RMS system

If sample #1 had been randomly chosen by the system for validation, the system batch process sends out the following email to the person charged with validating the employee's response to sample #1:

AMERICAN OVERSIGHT

Validator for sampled employee email from RMS system

The employee (and the validator) now have two work days from the time of the sample moment to respond and enter their response based on drop down menus in a form sent to them in the email. (Valid choices are listed in Appendix I.3 and I.7.

RMS Administration

The RMS software and sampling is administered by the following:

RMS System Administrator (1 primary, 1 back-up)

The RMS system administrator is responsible for:

- Creating quarterly samples in a timely manner
- Responding to RMS Sample Administrator questions
- Identifying and investigating anomalous quarterly results
- Adding and deleting administrative users
- Coordinating with the Division of Information Technology (DoIT) to resolve system issues and install updates

This employee is granted full administrative access to the RMS system software.

RMS Sample Administrator (2 primary, 6 back-ups)

The RMS sample administrator in the Field Division is responsible for:

- Responding to questions from sample recipients and sample validators (IM)
- Ensuring all samples are answered within two business days
- Investigating and resolving validation and invalid combination errors
- Serving as data validator for sample recipients (SW)

AMERICAN OVERSIGHT

These employees are granted limited administrative access to the RMS system software based on universe responsibility.

The quality control function is the primary responsibility of the validators for the sampled employee:

IM RMS Sample Validator (1 primary, 1 back-up per service area)

Each service area has least two RMS validators. The primary responsibilities of the RMS validator include the following:

- Acting as the contact for questions from sample recipients
- Personally interviewing employees in their respective services area for 10 percent of the moments randomly chosen by the RMS system software for observation to ensure sampling accuracy, electronic form completion, and quality control

These employees do not have administrative access to the RMS system software. The validation function is accomplished by email in a similar manner to sampled employees.

The RMS Sample Administrators monitor the status of each observation using the RMS system sample dashboard. Two business days are allowed for completion of the observation. Appropriate follow-up emails and calls to the sampled employee and validator are made for observations not completed within one business day and for any worker reported invalid combinations or questions about the response.

Responses can be accepted after two business days, if the sampled employee was on vacation, other approved leave, attending a training session or can provide documentation of their work effort for the observation. The RMS System Administrator and RMS Sample Administrators are the only employees who can complete an observation on behalf of a sampled employee after the second business day. Any such changes require documentation that is retained for audit purposes by sample number.

RMS Sample Validators have the responsibility of personally witnessing the pre-selected sub-sample of ten percent of the sampled observations and completing an Email/Intranet form. The sampled worker also completes the observation. The responses are matched and non-matches are investigated and resolved immediately. In the event of invalid responses, further training is provided to the sampled employee if deemed necessary.

All records pertaining to the RMS sample are retained at the central office for seven years following the sample quarter. Likewise, each quarter's data files, including sample data, allocation matrices and validation emails noting a change in an employee's response are retained for the same period. Information on case-related activity is entered in the RMS system to facilitate audits back to the case file by state or federal auditors.

SW RMS Sample Validator (1 primary, 2 back-ups)

The social worker validation utilizes a centralized validation approach. The primary responsibilities of the RMS validator include the following:

- Acting as the contact for questions from sample recipients
- Personally reviewing employee response for 10 percent of the moments randomly chosen by the RMS system software for validation to ensure sampling accuracy, electronic form completion, and quality control
- Remedial training for employees in the event of invalid combinations in a response

AMERICAN OVERSIGHT

RMS Quality Assurance

Service Area RMS Coordinators coordinate or provide training to local office sample validators and sampled employees on changes to the RMS process. The training is scheduled to occur prior to the change in the RMS sample process or the service/program area choices and activity choices. The RMS instructions describing each service/program area and activity choice are available from the Email/Intranet forms through a link. The instructions for completing the observation and the process are kept current on the web page.

Each quarter a side-by-side comparison of RMS results by program for the last two quarters is prepared. Any program that has a 2% difference would alert the RMS System Administrator to investigate the reasons for the change.

Additionally, periodically throughout the quarter, the RMS System Administrator conducts a review of the responses in either quarter focusing on the non-strikes and administrative hits. Any anomalous responses will be referred to the RMS sample administrators for further research and resolution.

Application of RMS Results

Once the sample period has ended, the application of the system results for both the social services and income maintenance programs is executed through a three-step procedure.

1. Application of the service/program area and activity combination matrix
2. Application of various case-related statistics in the allocation bases
3. Final production of the summary by funding source report

Activity Combination Matrix

The system recognizes that certain service or program activity combinations should be reported separately as unallowable activities or as exclusively assignable activities to a given cost objective. This matrix includes all possible response combinations and divides them into the following categories:

1. Processed hits
    a. Valid and timely program-specific responses received from RMS participants
    b. Allocated to final objective based on system rules and statistics
2. Administrative hits
    a. Valid timely administrative responses received from RMS participants
        i. Paid vacation
        ii. Paid breaks
        iii. Paid sick leave
    b. Allocated to final cost objective based on processed hits distribution
3. Non-strikes
    a. Discarded from sample
        i. Unfilled positions as a result of resignation or termination
        ii. Unpaid leave
        iii. Samples outside of work hours
4. Invalid combinations
    a. Discarded from sample
        i. Programs and activity choices by the RMS recipient that are not allowed
        ii. Unresolved validation errors between sample participant and sample validator

AMERICAN OVERSIGHT

1. Normally resolved by RMS sample administrator within the 48 hours sample window
2. Remedial training provided to alleviate future errors

5. No responses
    a. Discarded from sample
        i. RMS samples not completed within 48 work hours of issuance

Allocation Bases

While the activity combination matrix does capture and categorize all potential responses, not all responses can be directly assigned to a cost objective. Case-related statistics regarding particular case events occurring for the quarter subject to the RMS results are collected for the middle month of each quarter. The statistics are entered into the RMS system after the close of the quarter. These allocation bases then further refine certain program activity combinations to determine the ultimate funding sources for the RMS responses. The entry of statistics into the system does not change the responses received through the RMS process. Rather, it only impacts the distribution of the responses to the ultimate funding source.

Summary by Funding Source Report

Once the quarter has closed and the Allocation Bases information is entered into the system, the processed RMS responses are tallied by the RMS software and distributed to the ultimate funding sources.

Valid processed hits are distributed by the system based on the Activity Combination Matrix in conjunction with applicable Allocation Bases to the ultimate funding sources. Then, the valid Admin hits are distributed in proportion to the valid responses to the ultimate funding sources. Non-strikes, invalid combinations, and non-responses are discarded from the results.

Copies of the Service/Activity Allocation Base Assignments, Detailed Allocation Bases, and the Program List are included in the Appendices.

Sanctions

Generally, the percentage of non-strikes for each universe per quarter has historically remained under seven per cent. These non-strikes consist mostly of samples drawn for employees who terminate after the sample generation process or employees who change scheduled hours during the sample period. The 300 additional samples are meant to compensate for these non-strikes.

In the event that the number of valid responses (Processed hits and administrative hits) received by universe does not exceed 85% (2,040 samples), the Iowa Department of Health and Human services will be required to impose sanctions on the deficient sample to reduce the amount of federal funding that can be claimed by the Department for the deficient sample quarter.

In the event that the agency, in a normal operating environment, is unable to achieve an 85% response rate of 2,040 valid responses for a sample population, the agency will then add back the number of non-strikes (invalid) responses to the deficient sample as state only funded responses (sanction responses) in order to achieve the 85% response rate. The agency will then redistribute administrative strikes in proportion to all programs (including the sanction responses) to determine the ultimate funding of the sample. Essentially, the difference between the

AMERICAN OVERSIGHT

required response rate of 85% and the achieved rate will be funded 100% by the state without the assistance of any federal program.

The state agency proactively promotes responses to its RMS during its employee training. It is emphasized during training that failing to respond promptly and correctly to random sample moments the employee receives is unacceptable. Additionally, the state has dedicated two staff solely to the daily administration of the RMS sample. These administrators ensure that all samples are answered within the required 48 hours. In the event of a failure to achieve the required 85% response rate under normal operating circumstances, the state agency will immediately implement remedial training for all staff within the deficient sample universe concerning the importance of timely and accurate responses to the random moment sample requests.

a) Methodology for Project Online.

The Project Online system is a project management system identifying 100% of specified worker time spent on individual projects, with the flexibility to also identify worker time related to specific programs within the purview of the Department of Health and Human Services. The Department uses the Project Online system for the purpose of allocating certain direct personnel and non-personnel costs, as well as indirect costs.

Information is entered into Project Online through on-line entry by the worker as they record their time. This includes complete descriptive information, project and task date information, and all employee assignments. Projects and tasks are defined by management staff. Each worker has a specific list of projects within the Project Online system assigned to them by their supervisor to which time may be reported. A list of general categories for time reporting such as sick leave, break, vacation, etc. is also assigned to all workers. Entered time information is accessible at any time for on-line review and project status reporting. A worker's Project Online system time reports are reviewed weekly by their supervisor.

The projects to which workers report time are matched to the appropriate Cost Center. A list identifying how projects are allocated to program Cost Centers is continually updated and reviewed as new projects are started and old projects are completed. This review is performed jointly by cost allocation staff and the Iowa Department of Health and Human Services Project Management Office (PMO). Project time allocated to a designated Cost Centers is compiled quarterly for use as a cost allocation base.

In order to comply with GASB Statement 51, Accounting and Financial Reporting for Intangible Assets, the percentage of salary and benefit costs allocated on Project Online to computer software projects at or above $500,000 will be transferred to the Cost Centers indicated below. As approved by the Iowa Department of Administrative Services, all intangible assets at or above $ 500,000 must be reported separately, including computer software that is purchased, licensed, or internally generated.

- The percentage of salary and benefits costs allocated by Project Online to the Eligibility System Procurement Project will be transferred in the I3 ledger to Cost Center 0001-413-N01-0166-XX, Schedule 375.1

b) Time Studies

The Cost Allocation Plan identifies, by schedule, the method of allocating costs for each organization or Cost Center. If the Plan identifies a 100%-time study as the methodology for allocating Unit expenses, the employees residing within the identified schedules will complete and submit their time study results every two weeks for

AMERICAN OVERSIGHT

supervisor approval as part of the salary payment process of the State of Iowa through the payroll system in Workday.

c) Quarterly Position Reviews

The Iowa Department of Health and Human Services, through meetings with each Division, completes a quarterly review of position activities included within the cost allocation plan to ensure that salary allocation methodologies continue to reflect the appropriate ultimate funding sources for the effort exerted.

All time study participants now enter their daily time into Workday's HR module and attach Worktags to their hours. The work tags reference schedules within the Department of Health and Human Services Public Agency Cost Allocation Plan to accurately reflect the appropriate funding of the effort of the employee. Foster Care and Adoption Program Definitions

Candidates for Foster Care:

{01/01/21, 02/10/23} When the child is residing with the child's parents, kin, or fictive kin, the case plan shall state whether the child would be at "imminent risk of removal" from the home if preventative services were not provided. HHS uses two separate definitions for traditional and prevention candidates for foster care. The requirements for a child to be considered a traditional candidate for foster care is one who has a defined case plan (Form 470-3453) that identifies in-home services to prevent removal; services received include HHS case management and FCS services. The requirements for a child to be considered a prevention candidate is one who can remain safely at home or in a kinship or fictive kin placement while receiving an approved service on the IV-E Evidenced-Based Clearinghouse; service for a preventative candidate is SafeCare®.

A redetermination of whether the child remains at "imminent risk of removal" from the home shall be conducted at minimum once every six months. If it is determined that the child remains at "imminent risk of removal" if in-home service were not provided, workers document this and why in the case plan.

"**Imminent risk**" means there is an immediate threat or likelihood that the child will suffer maltreatment. When assessing "imminent risk" workers consider the three safety constructs of threats of maltreatment, child's vulnerability to maltreatment, and the caretaker's protective capacities and determine if the child would be unsafe without in-home services in place.

Title IV-E Participation Rate

Foster Care

Title IV-E Foster Care Participation Rate percentages are recalculated each quarter from the Title IV-E client eligibility counts documented in the Family and Children Services (FACS) system Key Performance Indicator (KPI) N302 Report for the first month of the quarter (rerun 30 days after the end of the first month). Costs are allocated to Foster Care IV-E (PP17) based on the percent of cases which are Title IV-E eligible pursuant to the definition in 45 CFR 1355.20.

{10/01/20, 02/10/23} Candidates for Foster Care are defined in section F.1 as those children who currently reside in-home, with parents, kin, or fictive kin, but are at "imminent risk of removal" and placement into the foster care system. HHS uses two separate definitions for traditional and prevention candidates for foster care. The requirements for a child to be considered a traditional candidate for foster care is one who has a defined case plan (Form 470-3453) that identifies in-home services to prevent removal; services received include HHS case management and FCS services. The requirements for a child to be considered a prevention candidate is one who can remain safely at home or in a kinship or fictive kin placement while receiving an approved service on the IV-E Evidenced-Based Clearinghouse; service for a preventative candidate is SafeCare®.

Iowa Department of Health and Human Services cost allocation utilizes the following population model when determining its IV-E participation rate.

AMERICAN OVERSIGHT

Three populations exist in the foster care universe of the Iowa Department of Health and Human Services FACS System:

- Human Services Foster Care Population
- Sac and Fox of the Mississippi **{10/01/21, 02/10/23** Children (Meskwaki)
- Juvenile Court System Children

The following is a brief description of the different populations within the FACS system.

Human Services Foster Care Cases – this part of the FACS Foster Care population is entered and managed by staff of the State of Iowa Department of Health and Human Services (HHS) and includes all children within the HHS system. Children within this population are deemed IV-E eligible for claiming purposes if they received a Title IV-E benefit payment or were deemed as eligible for IV-E administrative claiming during the first month of the quarter.

Sac and Fox of the Mississippi {10/01/20, 02/10/23} Children- this part of the FACS Foster Care population is entered by HHS staff The Sac and Fox of the Mississippi **{10/01/21, 02/10/23** handles its own foster care case management and at this time and does not claim administrative expenses through the single state agency. For claiming purposes, children within this population are deemed Title IV-E eligible if they received a Title IV –E benefit payment in the first month of a quarter. Children not receiving a Title IV-E benefit payment are included in the global population.

Juvenile Court System Children – this part of the FACS Foster Care population is case managed by staff outside of HHS and is for the sole purpose of securing certain payments for Title IV-E eligible children within the juvenile court system. HHS workers do not exert any effort relating to these children. For claiming purposes, children within this population are deemed Title IV-E eligible if they received a Title IV-E benefit payment in the first month of a quarter. Children not receiving a benefit payment are included in the global population.

The foster care reporting in the FACS system is broken into four component subpopulations as follows:

- Foster Family
- Qualified Residential Treatment Program (QRTP)
- Independent Living
- Shelter Care

Within each of these populations the information from the FACS system foster care population report from the first month of the quarter (rerun the second month to capture any updates applicable to the first month's activity) is used to determine the respective IV-E eligible population percentages for claiming purposes based on the benefits paid during the quarter.

Foster Family – The system generated report breaks out the total Foster Family population by the categories of eligibility determined by the FACS system. These categories include IV-E, State, Refugee, Title XIX, SSBG and "IV-A". While IV-A no longer exists, it is now attributed to Protective TANF. The number of IV-E eligible children in the population is then divided by the total Foster Family population to determine the Foster Family IV-E participation rate.

{04/01/20 02/10/23} Qualified Residential Treatment Program (QRTP) - A specific category of a non-foster family home setting, for which title IV-E agencies must meet detailed assessment, case planning, documentation, judicial

AMERICAN OVERSIGHT

determinations and ongoing review and permanency hearing requirements for a child to be placed in and continue to receive title IV-E FCMPs for the placement. The facility must also meet the definition of a CCI at sections 472(c)(2)(A) and (C) of the Act, including that it must be licensed, and that criminal record and child abuse and neglect registry checks must be completed in accordance with section 471(a)(20)(D) of the Act. Further, it must be accredited by one of the independent, not-for-profit organizations specified in the statute or one approved by the Secretary.

The system generated report breaks out the total Group Care population by the categories of eligibility determined by the FACS system. These categories include IV-E, State, Refugee, Title XIX, SSBG and "IV-A". While IV-A no longer exists, it is now attributed to protective TANF. The number of IV-E eligible children in the population is then divided by the total Group Care population to determine the Group Care IV-E participation rate.

Independent Living – The Independent living subpopulation is not eligible for IV-E funding therefore the IV-E participation rate will always be 0%.

Sheltered Care/Highly Structured – The system generated report breaks out the total Sheltered Care/Highly Structured population by the categories of eligibility determined by the FACS system. These categories include IV-E, State, Refugee, Title XIX, SSBG and "IV-A". While IV-A no longer exists, it is now attributed to protective TANF. The number of IV-E eligible children in the population is then divided by the total Sheltered Care/Highly Structured population to determine the Sheltered Care/Highly Structured IV-E population rate.

The overall IV-E participation rate is determined as a combination of the four subpopulations.

Cost allocation then utilizes the appropriate IV-E eligible subpopulation or the aggregate IV-E eligible population throughout the cost allocation process.

Once the IV-E participation rate has been determined it is then applied to all IV-E related foster care expenses for the purposes of administrative claiming with the exception of approved expenses relating to the election to build a CCWIS compliant child information system.

Penetration Rate Usage {01/01/21}

The Iowa Department of Health and Human Services will determine and apply penetration rates based on the underlying foster care population served.

Three penetration rates are derived from the FACS Foster Care population:

1. ~~**Global**~~ **Combined {10/01/21, 02/10/23}** Foster Care Child Population
   This rate includes all children served by the State of Iowa Foster Care System
2. ~~Combined~~ {**10/01/21, 02/10/23}** Human Services Foster Care Population and the ~~**Fox and Sioux Tribe**~~ **Sac and Fox of the Mississippi {10/01/21, 02/10/23** Children (Meskwaki)
   This rate includes children served by the State of Iowa Department of Health and Human Services
3. Juvenile Court System Child Population
   This rate includes children served by the State of Iowa Juvenile Court System

AMERICAN OVERSIGHT

The FACS system reporting allows the agency to determine IV-E eligibility by respective population.

Adoption

Title IV-E Adoption Participation Rate percentages are recalculated each quarter from the Title IV-E client eligibility counts documented in the FACS system N402 Adoption Financial Summary Report. Costs are allocated to Adoption IV-E (PP24) based on the percentage of cases which are Title IV-E eligible pursuant to the definition of in 45 CFR 1355.20.

The adoption population universe of the Iowa Department of Health and Human Services FACS System consists of all children who have been adopted and have not yet reached the age of majority (age 21 for children with diagnosed disabilities) and those who are in the preadoption phase. All cases are handled by employees of the Iowa Department of Health and Human services.

The adoption IV-E participation rate is determined by combining those who received an adoption or preadoption IV-E subsidy payment in the first month of the quarter and dividing that number by all active children within the adoption system.

Once the adoption IV-E participation rate has been determined it is then applied to all IV-E related adoption expenses for the purposes of administrative claiming with the exception of approved expenses relating to the election to build a CCWIS compliant child information system.

KPI work papers and copies of monthly FACS reports are retained in accordance with retention requirements for records 2 CFR Chapter I, Chapter II, Part 200, et al. Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.

Guardianship Assistance Program (GAP)

The title IV-E Guardianship Assistance Program (GAP) is a formula grant that helps States, Indian Tribes, Tribal Organizations and Tribal Consortia (hereafter "Tribes") who opt to provide guardianship assistance payments for the care of children by relatives who have assumed legal guardianship of eligible children for whom they previously cared as foster parents. Unlike title IV-E Foster Care and Adoption Assistance, the title IV-E Guardianship Assistance Program is an optional program for title IV-E agencies. The program is authorized by title IV-E of the Social Security Act, and funding is contingent upon an approved title IV-E plan to administer or supervise the administration of the program.

For those States and Tribes that opt to participate in the program, federal assistance may be used only to support the care of children discharged from foster care to legal guardianship who meet the eligibility requirements specified in the statute. Funds may also be used to support siblings of eligible children in certain situations as specified in the statute.

AMERICAN OVERSIGHT

Language was amended to provide for the extension of guardianship subsidies to the youth age 20 under certain limited circumstances. The age of eligibility has been changed to 14 to 10. There is no longer an age distinction for younger siblings to be eligible for subsidized guardianship residing in the same home as a child who meets eligibility.

Title IV-E Guardianship Assistance Program participation rate percentages are recalculated each quarter from the Title IV-E client eligibility counts documented in the Family and Children Services (FACS) system Key Performance Indicator (KPI) N302 Report for the first month of the quarter (rerun 30 days after the end of the first month).

Children must be in a licensed family foster home for six months before they are eligible for subsidized guardianship. References for further information include Iowa Administrative Code 441.204 (Subsidized Guardianship Program) and the Employee's Manual Chapter regarding Subsidized Guardianship, Title 18, Chapter F(2)

Costs are allocated to Guardianship Assistance Program (GAP) IV-E (PP21) based on the percent of cases that are Title IV-E eligible pursuant to the definition of in 45 CFR 1355.20.

Iowa Department of Health and Human Services cost allocation utilizes the following population model when determining its IV-E participation rate.

Title IV-E Guardianship Assistance Program participation rate percentages are recalculated each quarter from the Title IV-E client eligibility counts documented in the Family and Children Services (FACS) system Key Performance Indicator (KPI) N302 Report for the first month of the quarter (rerun 30 days after the end of the first month). We have seen steady increase in participation in the sub guard program since its inception and we HHS) continue to participate in efforts to educate HHS direct staff and external stakeholders to the benefits of the program. With these efforts, we hope to continue to see more children exit Iowa's Foster Care system in this permanency option.

Contracted Services

The IV-E Participation Rate for Contracted Services (Contract Costs Not Processed through Administrative Cost Allocation). Effective July 1, 2011 as agreed final response Administrative Cost Review Pilot Fall 2009:

Procedure to allocate contract costs not processed through cost allocation among benefitting programs.

Costs are allocated to Title IV-E based on client counts from FACS KPI N302-G (Foster Care Monthly Report) and FACS KPI 402-F (Adoption Financial Summary Report) rerun 30 days after the end of the month. The numerator is the average daily IV-E population for the month. The denominator is the total average daily population for the month.

The IV-E participation rate used for a contract or contract component is dependent on the activity. Training expenditures are allocated based on course content. The following IV-E participation rates are used to allocate contract costs:

- Family foster care

AMERICAN OVERSIGHT

- All foster care
- Subsidized adoption
- Foster family and subsidized adoption
- All child welfare

For the state fiscal year (July 1 through June 30), IV-E participation rates will be calculated based on statistics for the months of July through March of the previous state fiscal year. The federal share of costs will initially be claimed based on these estimated rates. At the close of the state fiscal year, the actual average IV-E participation rate for each quarter will be applied to costs for the corresponding quarter and an adjustment made for the difference between the actual federal share and the estimated federal share previously reported. A prior quarter increasing/decreasing adjustment for each quarter will be reported on the IV-E federal report.

If an activity benefits both IV-E foster care and IV-E adoption assistance, the federal share of expenditures will be allocated equally to each federal program.

Family First Act Administrative Claiming

Child specific administrative claiming:

Generally, children and families receive family-centered services in a voluntary case managed by a contracted provider or an HHS case managed by an HHS social work case manager in the child welfare system for the state of Iowa.

With the advent of the Family First Act (FFA), certain criteria must be met in order to claim child-specific administrative expenses:

1. The child must be a candidate for foster care
2. The child must have received one of the following assessments and finding outcomes at the risk levels indicated:
    a. Child Abuse
        i. Confirmed – High Risk
        ii. Founded - Moderate or High Risk
    b. Child in Need of Assistance (CINA) –
        i. CINA criteria met
        ii. High Risk
3. The child must have a prevention plan in place prior to the receipt of services
4. The child must be receiving an approved prevention service limited to a 12-month period

Candidates for Foster Care

Candidates for foster care are defined in section F.1 as those children who currently reside in-home, with relatives, or with fictive kin, but are at “imminent risk” of removal and placement into the foster care system.

Assessments

AMERICAN OVERSIGHT

As part of the assessment process, the HHS social worker conducts a Risk Assessment to determine whether the child is at "imminent risk" of removal. The worker utilizes the Risk Assessment rating in both Child Abuse assessments and CINA assessments. In the case of the Child Abuse assessment, a finding of confirmed with a rating of high risk or a finding of founded with a moderate or high risk rating is required to create the prevention plan. The CINA assessment of CINA criteria met and high risk also is required to create the prevention plan.

Prevention Plan

At the end of a Child Abuse Assessment or a CINA where the required finding and risk level are met, as indicated above, the social worker develops with the family an initial prevention plan, which is part of the Child Abuse Assessment and CINA assessment summaries. When the social worker hands off the case to an HHS social work case manager, the prevention plan continues with that social worker.

Prevention Service

The prevention plan lists the services that will be provided to the child and family to keep the family Unit intact. Prevention services are rated in the federal Title IV-E Prevention Services Clearinghouse (Clearinghouse) as promising, supported, or well-supported with respect to the effectiveness of each service. In order to claim child-specific administrative expenses under the Family First Act, the prevention services documented in the child's prevention plan must be rated at least "promising" by the Clearinghouse.

Once the child's prevention plan is in place, the following HHS Family Centered Services are offered to the family:

1. Solution Based Casework® (SBC)
2. SafeCare®
3. Family Team Decision-Making (FTDM) Meeting and Youth Transition Decision-Making (YTDM) Meeting Facilitation
4. Child Safety Conference (CSC) Facilitation
5. Family Preservation Services

In addition to these services, children and families may receive services included in the child's prevention plan that are rated as either promising, supported, or well-supported by the Clearinghouse but funded through a non-Title IV-E funding source, (e.g., Medicaid, etc.). In these situations, Iowa may claim child administrative costs.

Of the five services offered, only the SafeCare® program is approved in the Clearinghouse and currently maintains a "Supported" rating. Therefore, the child-specific administration claiming will be determined by the population that meets all the criteria previously listed and is receiving the SafeCare® service.

The entire universe consists of all child abuse and child in need of assistance referrals. Then, of those referrals the prevention plan population consists of the following children:

1. At imminent risk of removal, and
2. Still within family Unit setting, and
3. Received a finding of confirmed with a rating of High Risk or a finding of founded with a rating of Moderate or High risk for the Child Protective Assessment, or
4. Received a finding of meets CINA criteria with a rating of High risk for the CINA Assessment, and
5. Has a prevention plan in place that includes prevention services limited to a 12-month period

AMERICAN OVERSIGHT

Once this risk level has been determined and the prevention plan has been put in place, the child specific administration claiming will be limited to only the SafeCare® program.

FFA administrative claiming through the RMS system

Overview

The RMS system captures effort of field staff throughout each quarter. The results of the random moment samples are then translated into the ultimate funding stream determination for the majority of the roughly 1,000 field staff and supervisors

Case Assessment – Current Methodology

For initial child protective assessment activities, case workers can currently choose between the following programs when answering an RMS sample request:

1. 10 – CPA No Intact Family Services
2. 11 – CPA Intact Family Services
3. 15 – CINA Assessments

Within each of those programs there are multiple activities relating to the initial intake of the child from which social worker can choose:

Activity - Description

230 Judicial Hearings/Reviews 80

260 Child - Ongoing Assessment of Family Functioning 80

265 Child - Case Documentation 80

266 Child - Case Collaboration 80

270 Child - Family Team Meeting 80

275 Child - Case Permanency Planning 80

280 Child - Case Supervision 80

285 Child - Case Consultation 80

295 Child - Client Transportation 80

330 ALJ Hearings and Appeals 80

AMERICAN OVERSIGHT

405 Participate in Service Specific Meetings/Staff Training 80

415 Professional Reading/Review Manual. 80

The initial assessment activities include the following populations of children during the quarter:

1. Children entering foster care
2. Children deemed at risk of entering foster care
3. Children deemed not at risk of entering foster care

The social worker chooses the activity when polled by the RMS system based on whether the child protective assessment has resulted in placement in the foster care system (10) or has indicated that the child is at risk of entering the foster care system (11). Additionally, the social worker also can indicate whether they are working a CINA assessment at the time (15).

Case Assessment – Current Funding

The population represents all children evaluated for the quarter, therefore the agency had to apply a statistic to the RMS results to determine the appropriate funding. This was achieved by evaluating the intakes in the first month of the quarter and determining the percentage of children who were removed from the home setting and placed in foster care. Since these children were placed in foster care, the initial assessment was eligible to receive IV-E funding based on the IV-E eligible population. The children who are at risk of removal were not IV-E eligible and were funded by the social services block grant and state funds.

Case Assessment – FFA Methodology

For the initial case assessment, the agency will add the following new activity to the RMS to capture effort exerted to develop a prevention plan for the child. This will be the only activity that will claim FFA funding:

262 Child – Prevention Plan Development 81

This will be a valid choice for all three RMS assessment programs (10, 11, and 15) as social workers perform the initial case assessment functions.

Case Assessment – FFA Funding

AMERICAN OVERSIGHT

The funding change focuses on the portion of the child population that is at risk of removal from their family, meeting the assessment risk thresholds, have a prevention plan in place and are receiving an approved service. To do this the agency will determine the following components of the population:

1. Number of children meeting CAA and CINA assessments criteria for eligibility
2. FFA eligible children
    a. Meets CAA or CINA assessment criteria
    b. Prevention Plan developed
    c. Receiving approved service for less than 12 months

The agency will then divide the number of "FFA eligible children" by the "Number of children meeting CAA and CINA assessments criteria for eligibility" to determine the IV-E population participation rate. This will then be applied against the number of responses of activity 262 Child – Prevention Plan Development.

Intact Family Services Case Management – Methodology

For case management activities, case workers can currently choose the following program when answering an RMS sample request:

1. 60 – Intact Family Services – Family Centered

Within each of those programs there are multiple activities relating to the case management of the child from which social worker can choose:

Activity - Description

230 Judicial Hearings/Reviews 73

245 Child - Identify Services and Complete Referrals 73

260 Child - Ongoing Assessment of Family Functioning 73

265 Child - Case Documentation 73

266 Child - Case Collaboration 73

270 Child - Family Team Meeting 73

275 Child - Case Permanency Planning 73

280 Child - Case Supervision 73

285 Child - Case Consultation 73

295 Child - Client Transportation 73

330 ALJ Hearings and Appeals 75

405 Participate in Service Specific Meetings/Staff Training 75

Case management for intact families includes the following population:

1. Children at risk of removal

The social worker chooses the activity when polled by the RMS system when working on a case in which the child remains with the family but is still at risk of removal.

Intact Family Services Case Management – Current Funding

The population represents those children who are at risk of entering the foster care system. Currently, the agency receives IV-E funding for the percentage of the children who are candidates for foster care and supplements that funding with block grant funds based on system reports.

Intact Family Services Case Management – FFA Funding

The funding change focuses on the portion of the population that is at risk of removal from the family and is receiving an approved prevention service. This impacts effort relating to Activity 60 in the RMS system. The new funding requires the agency to isolate the population of children who are not receiving IV-E candidacy funding but are receiving an approved service from the clearinghouse. To do this the agency will determine the following components of the population:

1. Number of children meeting CAA and CINA assessments criteria for eligibility
2. FFA eligible children
    a. Meets CAA or CINA assessment criteria
    b. Prevention Plan developed
    c. Receiving approved service for less than 12 months

The agency will then:

1. Divide the number of "FFA eligible children" by the "Number of children meeting CAA and CINA assessments criteria for eligibility" to determine the FFA IV-E population participation rate.
2. Apply the IV-E population participation rate in 1 proportionally to the portion of the population who do not currently meet the IV-E candidacy or the IV-A eligibility criteria.

Overall claiming

The change will impact the funding of field social workers, supervisors, and support staff for their efforts with children who are at risk of removal from the family setting. The portion of their effort devoted to prevention plan

AMERICAN OVERSIGHT

services meeting Clearinghouse criteria will now be claimed. Staff in general administration supporting these field staff will also receive the new funding.

Hello everyone. Based on our discussion today, we need to have more discussion about what's happening with the caseload count data being reported for title IV-E Foster Care Candidates (not Prevention Plan candidates) and children in title IV-E FC placements for Iowa's CB-496 reports. As noted, there is a significant discrepancy between what's being reported for caseload counts in both populations across administration claiming (Case Planning and Management Administration vs. Independent Legal Representation) where it should be comparable (see attached spreadsheet). From what David shared, the Case Planning and Management Administration caseload data is pulled from DHHS sources and the Independent Legal Representation data is entered on the form as reported by the State Public Defender's office.

I am also sharing Children's Bureau policy guidance pertaining to Title IV-E candidates for foster care found in the CB Child Welfare Policy Manual online. During the call today, I was referencing Question 2 found in this section but I encourage you to review any/all questions as you see necessary.
https://acf.hhs.gov/cwpm/public_html/programs/cb/laws_policies/laws/cwpm/policy_dsp.jsp?citID=79

Wendy Sheetz and I had a conversation about these candidates last Spring and she shared a reference to Iowa's Employee Manual 18-Appendix. It's on page 119 (see attached).

If I missed sharing anything that you anticipated seeing, please let me know and I will share.

As you know, I will be in Des Moines (at the 525 SW 5th Street Building) next week on Monday and Tuesday but I can drive to another location as well. If you are available, I have time on Monday (3/11) between 11AM-1PM and then again at 3PM. I also have time on Tuesday morning before 10:30AM. If those dates/times won't work, we can revisit dates/times for a Teams call just let me know.

Thank you!

  Provide a narrative description of the family safety concerns by addressing the following:

  - Given the child(ren)'s level of vulnerability, what are the concerns and/or threats of danger in everyday life of the family?   Provide a narrative description of individual parent/caretaker concerns by addressing the following:

  - Describe what individual issues parents/caretakers have that need to be better managed or replaced so that the family tasks can go better (i.e. new plans for managing anger/control issues, improving emotional stability, stopping or limiting use of substances, managing sexual behavior, etc.) and what kind of new plan needs to be in place to ensure child safety and well-being.

  Provide a narrative description of family consensus regarding safety concerns by addressing the following:

  - What is the level of consensus with the family regarding the safety concerns and/or threats of danger described above?

- Addendum to Safety Assessment Summary. Use this section to update or edit the Safety Assessment Summary, based off the last Safety Assessment completed. This field appears only in addendum status.

If the *Family Risk Assessment* has not been completed, levels will not appear in these three sections.

  The final risk level is used to determine what the client's service eligibility is in based on findings, age, and risk.

  Review and consider information gathered from child and family interviews, collateral contacts, Department service records, and all prior assessments.

When the family is being referred to non-agency voluntary services, document the actions developed jointly with the family to address identified needs. The plan of action should relate directly to the presenting problems and your analysis of family functioning:

- Consider if there are current resources, services, and supports available to the family that can meet the family's needs and increase protection for the child.
- Identify services and supports provided to the family that have failed to prevent the child's abuse or reabuse.
- Consider if caretakers refuse needed services or supports despite protective concerns, increasing children's risk.
- Document your recommendation for services.

When the family is eligible for non-agency voluntary services, but is not being referred, indicate the exception reason.

When the family is being referred for Department services, identify the prevention services to meet the foster care prevention strategy and describe what that prevention strategy is.

When the family is eligible for Department services, but is not being referred, indicate the exception reason.

Document any additional service information that is needed.

- Recommendations for Court Involvement. Enter your recommendations for juvenile or criminal court involvement.
  - If you recommend juvenile court involvement, include:
    - A summary of the status of any current juvenile court involvement if the child is already adjudicated or adjudication is pending.
    - Your specific recommendations to the county attorney on the initiation or continuation of juvenile court action.
    - Your rationale to support that recommendation (e.g., family with founded abuse has refused offer of Department services).
  - If you do not recommend juvenile court involvement, include under "Type of Action Requested" your rationale to support that recommendation (i.e., court is not recommended as abuse was not confirmed, or was confirmed or founded but low-risk).
  - If you recommend criminal court involvement, include:
    - Reference to any joint assessment with law enforcement.

Dependency Assessment

Health conditions and diagnoses: Enter medical information. Document the overall condition of the adult, any existing allergies, and behavioral indicators or observations of health.

Medications: Enter all the adult's medications.

Current services: Enter **Yes** or **No** for each question. Use "Other" for services not represented on the list. Explain all other services not on the list.

Cognitive impairments: Enter **Yes** or **No** for each question. Completing IQ is optional. Explain any temporary conditions.

Cognitive screening: Enter the type of mental status screening tool conducted. If the mental status screening tool used by the adult protective worker or other qualified professional is not represented in the list, select "other." List the score and what the score means pertaining to the adult subject's cognition. Screening will allow the adult protective worker to determine if the adult subject needs a more comprehensive assessment on capacity to consent.

Physical impairments: Enter **Yes** or **No** for each question. Explain if necessary.

Katz (Activities of Daily Living) (ADL): The Katz Index ranks adequacy of performance in the six functions of *bathing, dressing, toileting, transferring, continence, and feeding*. Clients are scored for independence in each of the six functions.

Each category has a check box. DARES calculates the score. Completion of all questions is required. A score of six indicates full function; four indicates moderate impairment; and two or less indicates severe functional impairment.

Lawton – Brody Instrumental Activities of Daily Living Scale (IADL): The IADL is an appropriate instrument to assess independent living skills. These skills are considered more complex than the basic activities of daily living as measured by the Katz Index.

The instrument is most useful for identifying how a person is functioning now and identifying improvement or deterioration over time. There are eight domains of function measured with the Lawton IADL scale.

To obtain a score for each category, check the box for the item description that most closely resembles the client's highest independence level. Each category requires one box to be checked. The total score ranges from zero which indicates low functioning to eight which indicates high functioning.

Summary of dependency status: Determine if the information collected through the dependency portion of your assessment indicates the adult subject (alleged victim) is dependent.

Use the narrative to summarize the evidence gathered through the dependency assessment to support or refute that the adult subject is a dependent adult. A diagnosis or level of care alone is not sufficient to determine a person is a dependent adult. A worker needs to describe the impairments in functioning using the objective measures mentioned above. An adult subject may be impaired in some domains of functioning and not others.

Only the "Summary of dependency status" narrative is pulled from DARES and populates form 470-0688, *Dependent Adult Protective Services Evaluation or Assessment Summary*.

Adult Subject Risk of Abuse or Neglect Assessment

The risk assessment must be completed by the conclusion of the assessment or evaluation.

The scored risk levels are pulled from the risk assessment of the adult subject and the alleged person responsible that are completed through DARES for the incident. If the risk assessments have not been completed, levels will not appear in the printed version.

The final risk level score is pulled from DARES and populates form 470-0688, *Dependent Adult Protective Services Evaluation or Assessment Summary*, under "Final Risk Level." The DARES system uses this score to determine what the client's periodic visit eligibility is based on, age, dependency status, mitigating interventions, and risk level.

Summary and Analysis of Safety Constructs Narrative

- Describe the threats of maltreatment that are present at this time (i.e., aggravating factors that combine to produce a potentially dangerous situation).

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-002019

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

- Describe the adult subject's vulnerability to maltreatment (i.e., the degree that the adult subject cannot on the adult's own avoid, negate, or minimize the impact of present or impending danger).
- Describe the adult subject and caretaker or alleged person responsible protective capacities (i.e., family, household, or support system strengths or resources that reduce, control, or prevent threats of maltreatment from arising and the factors and deficiencies that have a negative impact on the adult subject's safety).

Policy Overrides

After completing the risk scales, determine if any of the policy overrides should be applied. Policy overrides reflect incident seriousness and adult subject vulnerability concerns. They upgrade the risk level to "high" regardless of the scored risk level.

Discretionary override reason: After completing the risk scales, determine if a discretionary override should be applied to increase the risk level. Use a discretionary override when you are aware of unique case circumstances that warrant a higher risk level. You must receive supervisory approval for a discretionary override. The discretionary override may raise the risk level only one level higher. The risk level may not be lowered by a discretionary override.

Supervisor's Review/Approval of Discretionary Override: Enter a signature.

Date: Enter the date.

Determination Not Eligible for Five-Year Removal: Notice of Addendum, Form 470-5443

Purpose

Form 470-5443, *Determination Not Eligible for Five-Year Removal: Notice of Addendum*, was created as a temporary form to address a backlog of incidents impacted by a law change on January 1, 2014. The law requires the Department to determine whether the person responsible for the abuse on a founded child abuse assessment should be placed on the Central Abuse Registry for ten years or become eligible to have their name removed after five years.

The form provides notice to individuals who had founded assessments of denial of critical care, physical abuse, or presence of illegal drugs on or after January 1, 2014. The form explains that their name does not qualify for removal from the Central Abuse Registry after five years. Addendum and right to appeal information is also provided.

Source

The form is not available to field staff.

Completion

Identified staff complete the form following a review of the incident and a determination that the person named responsible does not qualify for removal after five years.

Distribution

A copy of the completed form is sent to the person named responsible. A copy of the completed form is maintained in the File Manager specific to the incident number.

Data

If information has been entered into STAR, the following items are generated by the STAR Assessment module in JARVIS:

- The date the form is sent.
- The name and address of the person to whom the form is sent.
- The incident number referenced in the form.
- The name of the person responsible for the abuse.
- *Report Information*: Intake date, child protection worker, household address, completion date, incident #, addendum date, and county.

Determination of Eligibility for Five-Year Removal, Form 470-5444

Purpose	Form 470-5444, *Determination of Eligibility for Five-Year Removal*, was created as a temporary form to address a backlog of incidents impacted by a law change on January 1, 2014. The law requires the Department to determine whether the person responsible for the abuse on a founded child abuse assessment should be placed on the Central Abuse Registry for ten years or become eligible to have their name removed after five years. The form provides notice to individuals who had founded assessments of denial of critical care, physical abuse, or presence of illegal drugs on or after January 1, 2014. The form explains that their name will be removed from the Central Abuse Registry after five years unless they have additional founded child abuse against them.
Source	The form is not available to field staff.
Completion	Identified staff complete the form following a review of the incident and a determination that the person named responsible does qualify for removal after five years.
Distribution	Send a copy of the completed form to the person named responsible. Keep a copy of the completed form in the File Manager specific to the incident number.
Data	If information has been entered into STAR, the following items are generated by the STAR Assessment module in JARVIS: ▪ The date the form is sent. ▪ The name and address of the person to whom the form is sent. ▪ The incident number referenced in the form. ▪ The incident number reviewed. ▪ The original assessment date.

Discovering Connections, Form 470-5648 or 470-5648(S)

Purpose	Forms 470-5648 and 470-5648(S), *Discovering Connections* are used to assist children and youth with identifying potential family and other positive adult connections.
Source	Print supplies of this form from the manual or SharePoint under Employee Manual/Forms as needed.
Completion	Any professional may complete the Discovering Connections tool with a child or youth throughout the life of the case.
Distribution	The child protection worker or social work case manager should utilize the information obtained from the completed tool to assist in Diligent Search activities and to engage informal supports. Ensure that you have signed releases from the child's parents before releasing information to identified supports.
Data	Using the tool: ▪ Pick a setting that promotes conversation and openness and matches the youth's interests. For example, take a walk outside, do an art project, etc. ▪ Be honest about the purpose of the questions and with whom the information will be shared. ▪ Not all questions need to be asked, or asked exactly as written. Strive to make this a conversation. ▪ Record as much information as possible about people the youth identifies and ensure that the youth is okay with these people being contacted. ▪ Give specific details about the next steps in the process. Do not over-promise but be sure the next steps are reached. ▪ Be sure to thank the youth for their willingness to share. ▪ If youth are unable to name anyone, have a conversation about opportunities to build new relationships and connections while acknowledging the youth's resilience in the absence of these connections.

  - A plan to keep children safe.
  - Individual family strengths, supports, and needs.
  - How the strengths and family supports can be used to assist the family in self-directed change.
  - How the Department and others will assist the family in overcoming the needs.
- Document compliance with applicable state and federal laws and regulations.

Source

These forms are all accessed and completed in the DHS Case Flow system at: http://dhsintranet/cwis_caseflow/

- Family Case Plan Face Sheet, Part A
- Family Case Plan, Part B
- Child Placement Plan, Part C
- *Family Functioning Domain Criteria*, form 470-4138 (also located on SharePoint under Employee Manual/Forms), which explains what information, child/family issues, and assessment criteria should be considered in each of the five domain areas
- Family Risk Reassessment, form 470-4134

Completion

The DHS social work case manager assigned to the child and family is responsible for preparing the case plan to provide a comprehensive assessment view of the child and family that focuses on the major needs of the child, the parents, and, if applicable, the foster parents related to child safety, permanency, and well-being.

The case plan must be completed within 60 calendar days from the date the Department opens a DHS child welfare service case.

The case plan must be reviewed and updated:

- At a minimum, every six months thereafter while the case remains open, or
- More frequently if there are significant changes or if required by the court.

Information on the child and family entered in the FACS system automatically completes the case plan. Information not entered in FACS will not appear in the case plan. The worker must enter this information when the case plan is prepared.

Distribution

Obtain the necessary signatures on the plan and indicate which persons participated in developing or reviewing the plan:

- Distribute the *Family Case Plan*, including the *Family Case Plan Face Sheet*, when it is first developed to all of the persons listed on the "Signatures and Notifications" page.
- Distribute copies of any altered or revised case plan, including Part A, Part B, and Part C, if applicable, and the completed review section, to all of the persons listed on the "Signatures and Notifications" page.
- Print a copy of all initial and reviewed case plans, including Part A, Part B, and Part C, if applicable, and the completed review section and place the copy in the case file.

Data

A. Family Case Plan Face Sheet

The face sheet includes identification, statistical, historical, service summary, and placement information for the family.

- *Identifying information*: Enter information on the child's name, FACS ID, date of birth, address, and family members is automatically entered from the FACS system.
- *Service History* and *Placement History*: Enter information about services opened for the child and family in the FACS system is automatically entered from the FACS system.
- *Additional Services Provided*: The social work case manager completes this section. (This data is not contained in the FACS system.) Once entered, this information will be saved and become part of the case plan history over the life of the case.
- *Court Involvement*: The social work case manager enters information on any court involvement into FACS on the Court Detail screen. This information then fills the Court Involvement section of the *Family Case Plan Face Sheet*, Part A.

Information shown in green on Part A may be suppressed for safety reasons, such as when the safety of a foster child or foster parent could be jeopardized by printing the address or there are domestic violence issues or a restraining order between the child's parents.

To suppress all the information shown in green, click on the box "Suppress All Sensitive Date." Individual lines may also be highlighted and removed. Suppressed information reappears when the Case Flow form is reopened.

Family Functioning Domains

DHS uses the *Family Functioning Domains* to provide a consistent format for collecting, considering, and analyzing information about children and families. This consistency ensures that functioning areas most critically impacting safety, permanency, and well-being are addressed and targeted for service intervention.

Use of the domains creates a common, consistent language as information about children and families flows from child protective workers to ongoing workers and service providers.

The domains provide a "common lens" through which the strengths and needs of the child and family can be assessed, discussed, and used in planning and service provision.

The family functioning domains consist of the following broad areas of functioning (each domain area has related subcategories):

- *Child Well-Being*: Child's mental health behavior, relationship with peers, school performance, motivation and cooperation, relationship with caregivers, and relationship with siblings
- *Parental Capabilities*: Parental supervision of children, mental health, disciplinary practices, physical health, developmental and enrichment activities, and use of drugs or alcohol
- *Family Safety*: Physical abuse, neglect, sexual, or emotional abuse of child; and domestic violence
- *Family interactions*: Bonding with child, expectations of child, relationship between parents or caregivers, mutual support within the family
- *Home environment*: Housing stability, financial management, income and employment, safety in community, personal hygiene, habitability, transportation, food and nutrition, learning environment
- *Other*: Additional issues or concerns about the child or family

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

Become familiar with the family functioning domain categories and criteria. Consider the child and family's strengths, concerns, and needs in the various domain areas as you have discussions with the family and gather and analyze information about them.

- Information gathered in a family team may be helpful in evaluating the domain categories.
- Evaluate each individual's functioning through the common "lens" of the domain areas when:
  - There are multiple children in the family,
  - There is a noncustodial parent or stepparent, or
  - A relative is caring for the child.

Complete the family functioning domain section of the case plan by working through each domain category (the subcategories for each domain category automatically appear as you complete the domain sections) and:

- Fill in the **Narrative** section of each domain with a specific description of any strengths or needs identified within that domain.

  Needs in any domain should be related to and discussed within the context of how the needs affect child safety, permanency, or well-being.

  Remember that families may have strengths in some domain areas that can be used to address needs in other domains.
- Establish a **Goal** for each domain area where a need is identified in the narrative. It is critical that goals be developed in partnership with the family.

  Goal statements should be strength-based and focused on achieving the outcomes essential for safety, permanency, and well-being.
- If no needs are identified for a family within a domain category, but strengths are noted, you may establish a goal for that domain that focuses on using family strengths to help meet needs in other domain areas.
- After reviewing the strengths, needs, and goals for each domain area, identify the strategies, services, and informal supports that may be helpful to achieving the goals.
- In each domain area where goals are identified, list the steps necessary to bring about the changes needed to accomplish the goal for that domain. The steps should clearly identify:
  - Who is responsible for each step and
  - The dates for beginning and completing the necessary actions.

  Update revisions to or completion dates for the steps throughout the life of the case plan.
- Discuss and review the case plan information on domain areas, proposed goals, and action steps with the family before making final entries to the plan.

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-002051

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

- Use the **Comments** section in each domain area to enter updated information on the family's progress and functioning level in that domain.

When the child is residing with the child's parents, the case plan shall state whether the child would be at "imminent risk of removal" from the home if in-home services were not provided.

"Imminent risk" means there is an immediate threat or likelihood that the child will suffer maltreatment.

When assessing "imminent risk," consider the three safety constructs of threats of maltreatment, child's vulnerability to maltreatment, and the caretaker's protective capacities to determine if the child would be unsafe without in-home services in place.

Cases that meet this standard are eligible for federal Title IV-E funding as candidates for foster care.

In the comments section of the most applicable family functioning domain area, document whether DHS would ask the court to consider the removal of the child if the family refused or terminated in-home services and why.

Review Section

Use the *Family Case Plan* review section when reviewing family progress and making further recommendations for actions and services on the case.

- Indicate the date of the plan review and whether this review was conducted through a family team meeting.
- When completing the review, consider the family's current functioning, level of goal achievement, and completion of necessary steps within each domain area.
- Identify family achievements, progress toward safe case closure, remaining concerns, and your current recommendations in the review section.
- At least once every six months, review the status of any child who has been previously determined to be at "imminent risk of removal" if in-home services are not provided. Document if services should continue and why in the *Review Summary and Recommendations* box.

  Reference **Other Comments** if an evaluation determines that the location of the foster home is suppressed and review this determination every six months or less.

Signatures and Notifications

- Document and obtain signatures from those persons that participated in development of the plan and thank all persons who contributed to the planning process for the child and family.

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

- Set a date for future meeting with the family to review and revise the plan as needed. The **Other Comments** section of this page can be used for this purpose.

  Every six months or less, evaluate and review the decision to suppress the location of the foster home to determine if suppression continues or the need for suppression no longer is applicable.

- The **Other Comments** section may be used to include information concerning:
  - Case child abuse and criminal record histories;
  - Whether the Indian Child Welfare Act applies to the case;
  - Evidence of a direct or indirect threat to harm the foster child or foster family or credible third-party information of a threat of harm to the foster child or foster family as listed in 18-D(4). This information is needed if there has been a decision to suppress the address and contact information of the foster home.

- Distribute copies of the plan to those that should receive them.

C. Child Placement Plan

In combination with the face sheet and the family plan, the out-of-home placement section is a written document that includes all the federal required elements. The family plan and the out-of-home placement section include:

- A description of the placement and the appropriateness of the placement.
- The permanency goal for the child including any concurrent permanency goals.
- A plan for ensuring that the child and family receive services designed to facilitate the return of the child to a safe home or to another permanent placement.
- The health and educational status of the child.
- When applicable, a description of the programs and services that will facilitate the child's transition from foster care to adulthood.

This form is necessary to provide information mandated by state and federal laws and regulations regarding each child placed in an out-of-home setting in which the Department has custody, or when foster care is being provided under a voluntary placement agreement.

The DHS social work case manager responsible for the child should complete the *Child Placement Plan* when the child is placed in an out-of-home setting and DHS has custody or the child is placed under a voluntary placement agreement.

For these children, this section is in addition to Parts A and B of the case plan. The *Child Placement Plan, Part C*, should be updated every 90 days just like Parts A and B.

  Indicate the provider, dates of service, and date the information on these services was given to the child's current caregiver and current service provider.

  NOTE: Do not record HIV status or risk of HIV infection anywhere in the case plan. File any such information in the medical record section of the case file and mark it "Confidential."
- *Mental Health/Psychological/Psychiatric Records*: Describe any known mental health, psychological, or psychiatric evaluations or treatment the child has received.

  Indicate the provider, dates of services, and date the information on these services was given to the child's current caregiver and current service provider.
- *Education Records*: Complete this section to provide information on the child's current educational stats. Contact educational partners at the local school district or Area Education Agency (AEA) if needed to obtain this information.

child's educational placement stable and why the change was best for the child.

Transition Plan

"Transition planning" is the process of assisting the child in foster care to prepare to be a self-sufficient adult.

This process includes an assessment of life skills, strength and concerns, services and supports, and outcomes to be accomplished for successful transition.

Planning for transition to adulthood for children in foster care with special needs may need to begin before age 14 to ensure needed funding and services are available.

Service area transition planning specialists (TPS) can provide ongoing consultation and information regarding transition planning for adolescents.

For a child who may be eligible for services as an adult, the assessment and plan of services must be developed with someone who can reasonably be expected to fund those services or be a service provider when the child becomes an adult.

This section is required for a child in foster care of any type who is age 14 years of age or older. The plan shall be updated at required intervals with the *Case Permanency Plan*. In addition, the *Transition Plan* needs to be updated within 90 days of the child turning 18, and if the child remains in care past the age of 18, in the 90 days before discharge.

Organization of a youth-centered planning team is required for every child age 14 and older in foster care. Ask the child to select members of the team. Include specific names of formal and informal supports in the box that asks about membership.

A referral to transition planning specialist (TPS) may be needed for more challenging needs, such as transition planning for a child in long-term foster care or a child needing adult services. If a referral has been made to a TPS, select "yes."

Include the date the Case Life Skills Assessment was completed. It must be done at least once after the child in foster care's 14th birthday. Replace with the new date if it is done again throughout the child's time in foster care.

If the child is interested in pursuing higher education, the plan shall provide for the child's participation in the College Student Aid Commission's program or assistance in applying for federal and state aid.

Indicate whether the child has a driver's license or non-operator ID. If the child does not have at least one or the other, provide steps to obtain one or both.

Review and explain form 470-5337, *Rights of Youth in Out-of-Home Placement*, to a child age 14 and older. Have the child sign and date the form indicating you have reviewed the rights so the child understands and have answered any questions about their rights. After the form has been signed, give the child the original rights document and provide a copy to all legal parties on the child's case. Document the date the form was most recently given to the child in the *Case Permanency Plan*.

Before the child reaches age 17½, present the completed *Transition Plan* to the transition committee for the service area that applies to the child. The local transition committee must review and approve the *Transition Plan*. When a child enters foster care at age 17½ or older, the local transition committee shall be involved in reviewing and approving the child's transition plan within 30 days of completion.

There are six domain areas in the *Transition Plan* and a box for each. Follow the instructions for each section below:

- *Education*: Include information about the child's current education status and plans, including steps that still need to be taken, dates, and who will assist.
- *Employment and Workforce Supports*: Include information about the child's current work status and plans, including steps that still need to be taken, dates, and who will assist. This section needs to show the child has a clean credit report and banking experience, or it should provide plans or activities to achieve.
- *Health and Health Insurance*: Include information about the child and the child's health insurance status and plans.
- *Housing*: Describe the child's housing and housing plans.
- *Supportive Relationships and Services*: Describe relationships and opportunities for social and developmentally appropriate activities. Describe efforts to repair relationships or help child reconnect. Refer child age 17 to aftercare and include the date. If aftercare has not been contacted, leave the box blank.
- *Youth with Special Needs*: Relevant information about any special needs of the child should be included here, as well as referrals to SSI and adult services. The connections to SSI or adult services must be made before the Transition Planning Committee review, which typically occurs when the child is age 17. The date the plan was reviewed should be included in the last box of this section.

Child Signature

Obtain the child's and guardian's signatures as appropriate.

Family Functioning Domain Criteria, Form 470-4138

Purpose	Form 470-4138 is used to assist with assessment of the strengths and needs of the child, and of the child's parent(s)/caretaker(s), home, and family. It is an example of statements regarding areas of strengths and needs.
Source	This form is available on the STAR Assessment module in JARVIS. In the event of issues with accessing the form in JARVIS, it is available in this manual or in SharePoint, under Employee Manual/Forms.
Completion	The child protection worker uses this tool during the child protective assessment process to aid in the assessment of strengths and needs. Strengths and needs are identified using the family functioning domains: ▪ Child well-being ▪ Parental capabilities (includes use of drugs or alcohol) ▪ Family safety (includes domestic violence) ▪ Family interactions ▪ Home environment Identify domains as a strength or need. Address in the narrative section strengths and needs under each specific subsection that applies to the child, family, or home. It is not necessary to address every item listed. Address items that are relevant to the given situation. You are not limited to only the items listed. The child protection worker completes this form in JARVIS with approval and sign-off by the supervisor.
Data	Family functioning domains are applicable throughout the life of a case beginning with the safety assessment, strengths and needs identification during a child protective assessment or CINA assessment, and developing a family plan.

Family Interaction Plan General Roles and Responsibilities, Form 470-5148 or 470-5148(S)

Purpose

The *Family Interaction Plan General Roles and Responsibilities*, form 470-5148 and 470-5148(S), is the official family interaction plan developed for children placed out of the home. All children who are placed out of the home need to have a family interaction plan in place to ensure interactions occur in safe and healthy ways. The family interaction plan should be tailored to meet the safety needs of the family.

Source

Complete the English or Spanish version of this form using the template available in SharePoint under Employee Manual/Forms. This form may also be printed from the manual or SharePoint.

Completion

The most effective way of developing or reassessing a family interaction plan is during a warm hand-off or Solution Focused Meeting. The written family interaction plan may be incorporated as part of the Solution Focused Meeting notes or identified separately on the family interaction plan form. However, not all children placed out of the home will have a Solution Focused Meeting but family interaction planning should still occur.

Distribution

Give a copy of the completed family interaction plan to the identified team members. Keep the original form in the child's case file.

Data

Background Information. Enter the following information:

- *Children's names*: If multiple children have different needs or safety concerns, the family's team may want to consider a separate plan for each child.
- *Date of plan*: This is the date the plan was developed.
- *Placed with*: Document where the child is placed and with whom. If multiple children are in different places, indicate the type of placement (i.e., resource family, relative, residential placement, etc.).
- *Placement date for children*: This is the date the child was removed and placed out of the home.
- *Permanency goal*: Document the identified permanency goal.

Safety Concerns/Required level of supervision. Utilizing the Family Interaction Planning Tool (Comm. 649) provide explanations for questions A-F of the Interaction Supervision Decision Tree.

Family Interaction Plan. Family interaction should begin as soon as possible after removal from parental custody. At a minimum, interactions should occur within 24 hours of placement, be regular, and of increasing frequency and duration.

- *Types of Interaction*: Document the type of interaction approved. Creativity in defining interactions should be supported. Every opportunity needs to be

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

considered such as doctor appointments, school activities, meetings, and other functions in which the family would have participated if the children were in the home. This should be documented in the Attendance at Child Centered Appointments/Events section of the plan.

Interactions should be built around meaningful activities including:

- Mealtimes,
- Bathing,
- Grooming,
- Naptimes,
- Homework time,
- Grocery shopping,
- Doctors' appointments,
- School activities (i.e., conferences, plays, band and choir concerts, family nights, carnivals, graduation, etc.),
- Sports activities, and
- Should be geared towards the child's developmental abilities.

Creative planning should not only support face-to-face time but also other methods, such as calls, letters, texting, emails, and other electronic methods of communication. Families should be encouraged to explore other ways to connect and interact with one another.

- *Frequency* and *Length of Interaction*: Document the frequency and length of interaction. In determining how often and how long interactions should be, consider the following:
  - The age of the children.
  - The severity and chronicity of the abuse.
  - The potential for abduction or continued abuse of the children.
  - The progress of the parent in learning new skills or managing inappropriate behaviors, protective capacities displayed by the parent.
- *Locations*: Document the locations where the interactions will occur. Utilize the Planning Tool to aid in decision making around interaction locations.

  Family interaction should occur in the least restrictive, most homelike setting that allows for natural interaction and appropriate to meet the child's needs for safety. Generally, the parental, relative, or resource family home will provide the best environment. When safety is an issue, a more secure setting should be chosen and a safety plan developed for the interactions to continue.

  Consider the type of interaction as you document the location. For example, if an interaction is built around school activities, sport activities,

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

or doctors' appointments, you would document the location of the event (i.e., school, gymnasium, ball field, doctor office, etc.).

- *Types of Supervision*: Document the type of supervision for the identified interaction. Types of supervision include fully supervised, relaxed supervision, semi or partially supervised, or no supervision necessary. Supervision can be provided by a professional or other person identified by the family's team.
- *Supervised By*: If supervision is required, document who is responsible to provide supervision during interaction. This will be determined by the family's team. Consideration should be given based on the safety concerns and the developmental needs of the child.

  Family interactions are most "natural" when interactions are supported by those with a relationship with the child, such as other family members versus professionals. Family supports can be relied on to assist with all aspects of services including attendance at meetings, role modeling, transportation, observing interactions, etc.

Family Routines to Practice During Family Interaction. Document the goals to be accomplished during family interaction. Family interaction should focus on allowing the most natural parent-child interactions, such as:

- Cooking and eating a meal,
- Reading stories,
- Cleaning a room,
- Playing a game,
- Bath time,
- Naptime, or
- Bedtime routines.

The focus is on maintaining ties between the parent and child and assessing the parent's capacity to care for the child. Primary routines should reflect the family's SBC outcomes.

Goals are the family routines to target during the family interaction. These behavioral changes are most likely related back to the safety concerns as identified by the team.

- Family Routines to Target: Document the routines to practice during family interaction.
- Family Members Involved: Document who is expected to be involved in the routines.
- *Date Reviewed or Revised*: Document the date when the goal was reviewed or revised.

Family interaction needs to be reviewed during a Solution Focused Meeting or by those the family's team identifies, at a minimum, when:

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-002063

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

- There are changes in behavioral patterns demonstrated by the parents or children.
- Protective provisions that may be a safety concern change or arise.
- There is a change in family supports.
- There is a change in legal issues or court requirements (change in custody or guardianship) that may impact family interaction planning.
- Agreed upon behavioral changes are accomplished or not.

Transportation. Describe how transportation will be provided once individuals who are available to assist in transportation are identified. Transportation is a key component for interactions to be successful.

Resource family and other relative caregivers should be encouraged to transport children at least one way. Parents and extended family members should be expected to arrange their own transportation, though they may be given temporary support when necessary to ensure there is not a gap in family interaction; however, this will likely be accomplished by public transportation. Children in placement may have to be transported by a provider or HHS staff, one or both ways to interactions.

Other Planning Notes. Considerations when setting expectations could include, but are not limited to, the following:

- Expectations of what parents should bring to the interaction.
- Activities that parents should plan or consider doing during the interaction.
- Behaviors that provide an unsafe situation may terminate the interaction. It is important that there is a follow up with the parents in order to reduce the risk for another unsafe situation.
- The use of physical discipline or threats towards others.
- Negative comments about others, which includes the children, family members, HHS worker, contractor or provider, and other professionals part of the family's team.
- Possession or bringing any drug paraphernalia, illicit substances, or alcohol to the interaction.
- All legal decisions or documents regarding contact, including No Contact Orders, etc. will be abided by all parties.
- Obtain approval before bringing any additional individuals to family interactions. Approvals are determined by the HHS case manager or the family's team.

Family Interaction Calendar. Utilize the calendar to document the initial plan for family interactions. Include any events, appointments or activities which the parent may also attend.

Family Risk Assessment, Form 470-4133

Purpose	Form 470-4133 is used to identify risk factors during an assessment. The *Family Risk Assessment* is composed of two scales that measure the level of risk regarding neglect and abuse.
Source	Complete this form on the Family Risk Assessment tab on the STAR Assessment module in JARVIS.
Completion	The child protection worker completes the *Family Risk Assessment* during the assessment process. This form must be completed before the assessment is approved. **Exception**: When abuse occurred or is alleged in an out-of-home setting and child protective concerns do not exist in the child's household, the safety assessment and risk assessment is not required. Only **one** household can be assessed on the *Family Risk Assessment* form. Assess the child's primary residence. When the alleged perpetrator resides in the household of the noncustodial parent, assess the household of the noncustodial parent. If the child moves to a different household because of the crisis, complete the risk assessment on the household in which the child will remain. ▪ If the child will remain in the new household, complete the risk assessment on the new household. ▪ If the plan is to reunify the family, complete the risk assessment on the household **from which the child was removed**. Upon completion of the form, a Total Neglect Risk Score and Abuse Risk Score are automatically calculated to the highest of either risk score. Use this information in the analysis of the family's strengths, needs, and recommendation for services. The final risk level is populated on the Child Protective Services Child Abuse Assessment Summary or the Child Protective Services Family Assessment Summary. Reassess the case whenever you determine that an adjustment in the risk score is warranted (either up or down).
Distribution	The form is maintained within JARVIS and is considered assessment data.
Data	Review information obtained from systems checks, Department records including service history, not confirmed assessments, and any previous or current court involvement. Review the risk assessment definitions and complete the *Family Risk Assessment* form by checking the most applicable response. On items involving caregivers, **select one or two** parents or substitutes based on physical and emotional proximity to the children. Do not rate more than

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

two caregivers in a home.

Only one primary caregiver can be identified. The "primary caregiver" is the adult living in the household who assumes the most responsibility for child care.

When two adults are present and you are in doubt over which one assumes the most childcare responsibility, select the adult with custody or guardianship or the caregiver responsible for the child involved in the incident as the primary caregiver.

> Ms. X and her partner Mr. Y live together and appear to share caregiver responsibilities for Ms. X's children equally. Because Ms. X has legal custody of the children, select her as the primary caretaker.

If this does not resolve the question, select the legally responsible adult who was a perpetrator or alleged perpetrator.

> Mr. and Mrs. Z live together and appear to share caregiver responsibilities for their children equally. Mrs. Z is the alleged perpetrator of abuse, so she is selected as the primary caretaker.

When both parents are in the household, equally sharing care giving responsibilities, and both have been identified as perpetrators or alleged perpetrators, select the parent demonstrating the more severe behavior.

The "secondary caregiver" is defined as an adult living in the household who has routine responsibility for childcare, but less responsibility than the primary caregiver. A partner may be a secondary caregiver even though the partner has minimal responsibility for care of the children.

If an item relates to all caregivers and the household has more than one caregiver, **rate the caregiver with the more severe behavior**.

The risk assessment form is composed of two scales: the neglect scale and the abuse scale. For detailed guidance, see *Family Risk Assessment Guidance*, RC-0123.

After scoring all items in each scale, total the score for each scale and determine the risk level by checking the appropriate boxes in the risk level section.

Overrides

Policy Overrides: After completing the risk scales, determine if any of the policy overrides should be applied. Policy overrides reflect incident seriousness and child vulnerability concerns. They upgrade the risk level to "high" regardless of the scored risk level.

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-002068

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

Discretionary Override: After completing the risk scales, determine if a discretionary override should be applied to increase the risk level. Use a discretionary override when you are aware of unique case circumstances that warrant a higher risk level. **You must receive supervisory approval** for a discretionary override.

The discretionary override may raise the risk level only one level higher. The risk level may not be lowered by a discretionary override.

Family Risk Reassessment, Form 470-4134

Purpose	Form 470-4134 is used to identify risk factors and assist in assessing the impact of services provided to the family during a particular timeframe and whether certain events in the family have occurred during the period being measured.
Source	Complete this form on the Risk Reassessment tab on the Child Services module in JARVIS.
Completion	The social work case manager completes the *Family Risk Reassessment*: ▪ During case permanency planning reviews and ▪ Before case closure. The social work case manager will receive an alert to complete the *Family Risk Reassessment* a minimum of 180 days from the initial risk assessment or risk reassessment. The rating on the formal risk reassessment reflects changes in family functioning and provides a framework to identify critical factors that indicate changes in a child's risk maltreatment.
Distribution	The risk reassessment completed and contained within JARVIS is part of the case management service file. When the case permanency plan is updated: ▪ Document information from the *Family Risk Reassessment* in the comment section of the most applicable domain, and ▪ Incorporate the results into the case planning process.

Family Functioning Domains. The family functioning domains provide a consistent format for collecting, considering, and analyzing information about children and families. This consistency ensures that functioning areas most critically impacting safety, permanency, and well-being are addressed and targeted for service intervention. Use of the domains creates a common, consistent language as information about children and families flows from child protective workers to ongoing workers and service providers.

The domains provide a "common lens" through which the strengths and needs of the child and family can be assessed, discussed, and used in planning and service provision.

The family functioning domains consist of the following broad areas of functioning (each domain area has related subcategories):

- Child Well-Being:
  - Child's physical and mental health,

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

- Behavior,
- Relationship with peers,
- School performance,
- Motivation and cooperation to stay with family,
- Relationship with siblings, and
- Supports.

▪ Parental Capabilities:

- Supervision of children,
- Mental health,
- Informal supports,
- Disciplinary practices,
- Physical health,
- Developmental and enrichment activities, and
- Use of drugs or alcohol.

▪ Family Safety:

- Physical abuse,
- Neglect of a child,
- Sexual abuse,
- Domestic violence, or
- Emotional abuse.

▪ Family Interactions:

- Bonding with child or children,
- Expectations of children,
- Family interaction planning,
- Relationship between parents or caregivers,
- Mutual support within the family, and
- Concurrent planning.

NOTE: A written *Family Interaction Plan*, tailored to meet the safety needs of the family is developed and/or reassessed during a family team meeting involving a child placed out of the home to assure family interaction begins as soon as possible after removal from parental custody.

▪ Home Environment

- Housing stability,
- Food and nutrition,
- Transportation,
- Safety in community,
- Financial management,
- Learning environment,
- Habitability of housing,
- Personal hygiene, and
- Income and employment.

- **Other**. Additional issues or concerns about the child or family.

  NOTE: Discuss concurrent planning and permanency goals, any interstate compact issues, child and family cultural factors, language barriers, or if the Indian Child Welfare Act applies.

Complete the family functioning domain section of the FTDM family plan by working through each domain category. Consider the child and family's strengths and needs in the various domain areas as you have discussions during the family team meeting. Fill in the narrative "strengths" and "needs" section of each applicable domain. Needs in any domain should be related to and discussed within the context of how the needs affect child safety, permanency, or well-being.

Establish a goal for each applicable domain area where a need is identified. It is critical that goals be developed in partnership with the family. Goal statements should be strength-based and focused on achieving the outcomes essential for safety, permanency, and well-being.

After reviewing the strengths, needs, and goals for each domain area, identify the strategies, services, and informal supports that may be helpful to achieving the goals.

- In each domain area where goals are identified, list the steps necessary to bring about the changes needed to accomplish the goal for that domain. The steps should clearly identify:
  - Who is responsible,
  - What do they agree to do, and
  - By when.
- Document the date for when the goal was completed or modified.

Crisis Plan. Identify and discuss what will be done if some part of the plan breaks down and a crisis happens.

Identify the risks and necessary steps needed to address the risk. The steps should clearly identify when and dated when completed or if ongoing.

Signatures and Notifications. Enter the name of invited team members, including their role, contact information, and check whether or not they attended the family team meeting.

Foster Care and/or Subsidized Adoption Information Exchange, Report S472N111-01

Purpose

Report S472N111-01, *Foster Care and/or Subsidized Adoption Information Exchange*, provides IV-E workers information that is needed to determine IV-E and Medicaid eligibility for children in foster care and adoption assistance programs.

Source

The FACS system generates this report nightly.

Completion

The FACS system automatically generates this form on foster care and adoption subsidy cases when:

- There is a start date recorded on FACS (labeled as "new placement" on the report).
- There is an end date recorded on FACS (labeled as "exit placement" on the report). (A move from one placement to another generates two reports.)
- The FACS case is transferred to a new service worker.

The IV-E worker examines the report to determine whether the change affects IV-E or Medicaid eligibility (or if additional information is needed).

Distribution

If there is an open Medicaid case with an FBU of 19, the report is issued to the IV-E worker responsible for that case. If there is no open case with a 19 FBU, the report is issued to worker number CM00 in the office where the service worker is located.

Exception: For PMIC placements, the form is generated to the IM unit in the county where the facility is.

File the report in the IV-E case record.

Data

Data reported includes:

- Identification of the workers and the reason for the report.
- Information about the child.
- Information about the child's parents.
- Information about the child's placement.

NOTE: Do not use the PLACEMENT IV-E field or the SERVICE IV-E field to evaluate IV-E eligibility.

Foster Child Behavioral Assessment, Form 470-4401 or 470-4401(S)

Purpose

The *Foster Child Behavioral Assessment* checklist serves two purposes.

- It may be used in the development of the case plan as a tool to identify the needs of the child. Every behavioral need of a foster child identified in this tool should be outlined when completing the case plan, along with the corresponding actions and responsibilities of the resource family.
- Since this tool identifies need and responsibilities, it is also the tool used to determine level of care and corresponding foster care payment.

Source

Complete the English version of this form using the template available in SharePoint under Employee Manual/Forms.

Print the Spanish version of this form from the manual or SharePoint.

Completion

Complete the *Foster Child Behavioral Assessment*:

- Within the first 30 days of a child's initial entry into foster care.
- Whenever the child's behavior changes significantly.
- When the child's placement changes.
- After termination of parental rights, in preparation for negotiating an adoption subsidy or presubsidy.
- Before a court hearing on guardianship subsidy. **Note**: The highest guardianship subsidy is limited to Level 2, basic rate plus level 2.

If a child comes out of group care or PMIC, the child's payment in the foster family home is the basic foster care maintenance rate. It is anticipated that the family team meeting, with the new foster parents participating, will be part of the discharge planning. Complete the *Foster Child Behavioral Assessment* within the first 30 days of placement.

If a child leaves foster family care and goes to shelter care and then returns to the same foster family home, the payment rate remains the same as the rate received by the foster family before the child goes to shelter care. Complete an assessment within 30 days of placement with a new foster family.

To authorize payment to the resource family at a higher level than the basic rate, this form shall be signed by the worker and the worker's supervisor.

After supervisory approval, the difficulty of care payments shall begin the first day of the month **following** the month in which the form was completed. Do not enter the new assessment rate into FACS until the supervisor has signed off and approved the assessment and rate.

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

Distribution

Keep the original form in the child's case file. Give a copy to the resource family upon the family's request.

Data

When completing the checklist, use all available information about the child for a thorough assessment of the child. This may include evaluations, school and provider reports, and home studies, as well as input from parents and the resource family.

Check only behavior that is severe enough to be outside the norm for a child of the same age. Do not check behavior that is typical for a child that age (e.g., "temper tantrums" for a 2-year-old).

In order to have a valid assessment, check each item that applies in **every** category ("minimal" and "moderate" and "intensive").

The template calculates the basic rate once the child's birth date is entered, and automatically calculates the level of care and the total daily rate. The form is designed so that checking all the applicable boxes will result in the proper calculation for the behaviors.

See 18-D(2), *Maintenance Payment*.

ICPC Report on Child's Placement Status (ICPC 100B), Form 470-0788

Purpose

Form 470-0788 (ICPC 100B) is used to communicate between the placer, the supervising agency, and the respective compact administrators regarding the status of a placement requested under the Interstate Compact on the Placement of Children. It is a national form, known as the ICPC 100B.

Source

Form 470-0788 (ICPC 100B) is available as a template in SharePoint under Employee Manual/Forms. Supplies of the form may also be printed from the manual or SharePoint.

Completion

Complete one form per child or per sibling if the action applies to siblings at the same time.

The person supervising the placement or causing the child to be placed completes this form each time:

- A placement is made.
- A placement is changed.
- An approved placement is canceled.
- A placement is terminated.
- A case is closed.
- There is a change of address or status of the placement (e.g., from foster care to adoption).

The Department worker is responsible for preparing the form for all children in the Department's custody or guardianship who are placed out of state and for all children placed into Iowa for whom the Department has assumed supervision under the compact.

When courts, probation officers, or private agencies have placed a child in another state or accepted supervision of a child from another state, their staff are responsible for preparing the form.

When there is a change of purpose in an existing placement, e.g., from foster care to adoption, form 470-0781 (ICPC 100A) may be required at the request of the receiving state.

Distribution

Email form 470-0788 (ICPC 100B) to the ICPC service area liaison. The liaison sends to the ICPC office who forwards to the receiving state.

Data

Section I – Identifying Information

Enter the full legal name and birthdate of the child for whom this placement information is being reported.

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-002129

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

Enter the names of the legal parents as on form 470-0781 (ICPC 100A). Enter the name of the resource, the address, and type of care. Enter the same type of care that was chosen on form 470-0781 (ICPC 100A) (e.g., adoptive home, foster family home, group home care). Enter the relationship for relative placements.

Section II – Placement Status

To confirm the initial placement, check the box that applies. Enter the exact date the child was placed in the receiving state.

If some aspect of the placement changes while the child remains in the receiving state, complete another ICPC 100B. Check the "Placement Change" box and indicate the exact effective date of the change.

If the child moves from one placement resource to another, enter the updated placement information. For example, if a child leaves the parents' home and is placed in a residential treatment center, complete the facility's name and address and indicate the new "Type of Care."

Subsequent ICPC 100B forms will list the new placement resource under "Identifying Information." Any additional moves to place the child within the receiving state will be reflected in this same manner.

If only the name (e.g., mother remarries) or address (original placement resource moves) changes, check and complete only those items that apply.

Section III – Compact Placement Termination

Check the boxes that apply:

- *Adoption Finalized*: If an ICPC adoptive placement has been finalized (consummated), check that box and the appropriate box for the state in which finalization occurred, "In Sending State" or "In Receiving State." Attach the final adoption decree.
- *Child Reached Majority/Legally Emancipated*: Check this box if the child has reached majority age and has simultaneously ceased to be the responsibility of the sending agency or if the child has become emancipated through legal action such as marriage or court decision.
- *Legal Custody Returned to Parent(s)*: Check this box when the child's legal custody or guardianship is returned to the parent with the concurrence of the receiving state. Attach the court order transferring custody to the parents to form 470-0788 (ICPC 100B).
- *Legal Custody Given to Relative*: Check this box when the child's legal custody or guardianship is awarded to relatives (other than parents) with the concurrence of the receiving state. Attach the court order transferring custody to the relative to form 470-0788 (ICPC 100B).

AMERICAN OVERSIGHT

IA-DHHS-24-0418-A-002130

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

- *Legal Custody Given to Other*: Check this box when the child's legal custody or guardianship is other (other than parents or relatives) with the concurrence of the receiving state. Enter the name and relationship to the child. Attach the court order transferring custody to the other to form 470-0788 (ICPC 100B).
- *Treatment Completed*: Check this item when the placement resource has been providing a specific treatment-oriented service; that service has been completed; and the child is, therefore, being discharged from the facility (e.g., residential treatment center). This box may also be checked if the child was placed through Article VI of the Compact.
- *Sending State's Jurisdiction Terminated with the Concurrence of the Receiving State*: Check this box when the jurisdiction of the sending state has ended for some reason other than the transfer of custody to parents or relatives with the concurrence of the receiving state's supervising agency or court.

  For example, if formal legal custody or guardianship is not going to be addressed but both states agree that supervision is no longer required or if both states agree to transfer jurisdiction to the receiving state.

  If the sending state's jurisdiction is terminated without the concurrence of the receiving state (including custody or guardianship transfer), the decision was made unilaterally and that box should be checked.
- *Unilateral Termination*: Check this box when the interstate agreement has been terminated unilaterally, whether by the sending or receiving state. A unilateral termination is one in which one state ends the interstate placement agreement without the concurrence of the receiving state.
- *Child Returned to Sending State*: Check this box when the child returns to the state the child was placed from. This may be due to a disruption in placement.
- *Child Moved to Another State*: Check this box when the child moves to a state other than the sending state.
- *Proposed Placement Request Withdrawn*: If you have submitted form ICPC 100A to request placement approval and have decided not to explore that resource further, check this box, list the "Name of the Proposed Placement Resource," and date of your decision to terminate the compact.

  Check this box only when no action has yet been taken on form 470-0781 (ICPC 100A). If you are withdrawing more than one request, submit a separate form on each and list each respective "Placement Resource."
- *Approved Resource Will Not Be Used for Placement*: Check this box when you have received an approved form 470-0781 (ICPC 100A) but have decided not to place the child with that resource. List the name of the "Approved Placement" and date of your decision to terminate the compact.

- *Other*: Check and specify if the reason for compact placement termination is not listed above. For example, the entire family moved to another state (new address should be entered under "Placement Change"), the death of a child, the child ran away and whereabouts are unknown.

Date of Termination: Enter the exact date of the activity that ended the Compact Placement Agreement.

Section IV – Signatures

If a private person or local agency is completing the form, have a designated person sign, under "Person/Agency/Supplying Information," identify the agency, and date the signature.

The compact administrator, deputy, or alternate should sign and date the second block.

ICPC Request (ICPC 100A), Form 470-0781

Purpose

Form 470-0781 (ICPC 100A) is the sending agency's formal written notice to the receiving state of its intention to make an interstate placement. It requests a finding as to whether the placement would be contrary to the interests of the child. With most placements, it is also a formal request for a home study.

Following review by the receiving state, it is the official notice of the receiving state's decision. A favorable finding means that the placement can be made in conformity with the compact. An unfavorable finding means that the placement would be unlawful.

Form 470-0781 (ICPC 100A) must accompany all requests for placement to which the compact is applicable. It must be favorably acted upon by the receiving state before any compact placement is made.

Source

Form 470-0781 (ICPC 100A) is available as a template in SharePoint under Employee Manual/Forms.

Completion

Complete one form per child or per sibling if the action applies to siblings at the same time.

The service worker, private agency, court, or any person placing the child may complete this form. It is prepared when a request is being made to place a child in another state.

Distribution

Distribute as follows:

- The sending agency/Iowa ICPC service area liaison uploads the completed 100A into the National Electronic Interstate Compact Enterprise (NEICE) and electronically sends to the sending state deputy compact administrator.
- The deputy compact administrator reviews, signs, and sends to the receiving state's identified administrator.
- The receiving agency administrator completes Section IV of the form and returns to the sending state ICPC office.
- The sending state administrator sends via NEICE to the sending agency.

Data

In the first two blocks, enter the name and address of the ICPC administrator (or deputy) to whom the request is being forwarded (TO) and the name and address of the ICPC administrator (or deputy) whose state is submitting the request (FROM). If information for the receiving state is unknown, enter only the name of the state.

Section I – Identifying Data

Enter the full legal name, social security number, Indian Child Welfare Act (ICWA) eligibility, IV-E eligibility, sex, gender, date of birth, and ethnic group of the child for whom this placement is proposed. If the child is known by a nickname, place it in parenthesis beside the legal name.

NOTE: An "Indian child" means any unmarried person who is under age 18 and is either:

- A member of an Indian tribe or
- Eligible for membership in an Indian tribe and is the biological child of a member of an Indian tribe.

Enter the names of the legal parents, usually the birth parents. When an adoption is finalized, the adoptive parents are the legal parents. If the parent is deceased, enter "deceased" after the parent's name.

If parental rights are voluntarily relinquished or terminated by the court, indicate in parenthesis beside the name. If you prefer to withhold the name, simply enter the status of the parent's rights.

Enter the complete name, address, and telephone number of the agency or person who is responsible for planning for the child and who is financially responsible for the child. In most cases, these two items will be the same (the sending agency). Email addresses are optional.

Section II – Placement Information

Types of Care Requested. Check the boxes designating the following:

- *Public Placement*: Public placement means a placement processed by a public child welfare agency where the state or local agency, or the court has authority to make the placement.
- *Private Placement*: Private placement means a placement made by a parent or a private or independent agency or representative not acting as an agent of the state (e.g., private adoption) or, in the case of a private residential treatment placement, where a parent or guardian is making the placement (e.g., private Residential Treatment Facility (RTF)/Residential Treatment Center (RTC) placement, etc.).
- *Subsidy*: Check the box for public foster care or adoption to denote IV-E federal, non-IV-E state or local, or none for no financial support. Select pending if not yet determined.
- *Adoptive Home*: Adoptive home refers to both agency and private or independent adoptive placement before finalization of an adoption. This may refer to an initial placement with a family where adoption is the intention or it may refer to the movement of an adoptive family from state A to state B following placement.

AMERICAN OVERSIGHT

Employee Manual 18-Appendix.pdf <extracted> for Printed Item: 460 (Attachment 2 of 3)

If this is a request for private or independent adoption, you are required to also complete the fields for the names, address, social security numbers, and telephone number for the prospective adoptive resource. Indicate if it is a federally-funded adoption subsidy (IV-E) or a state- or local-funded subsidy (non IV-E), pending (if not yet determined), or none.

- *Finalizing in*: Check one box to indicate the state in which the adoption will be finalized if known, otherwise mark pending.
- *Foster Family Home*: A foster family home is a facility providing care and guidance for a child or children not related to the caretaker for regular 24-hour care, or a certified kinship care home. A family foster home may not operate without a license or a certificate as required by the laws of the receiving state.
- *Group Home Care*: A resource which is licensed or approved as a group home and which provides substitute care for a fee; usually a modified family-type setting which serves more children than a foster home but fewer than an institution.
- *Child-Caring Institution*: A group care facility that is licensed or approved to provide custodial care to a larger number of children than a foster home or group home.
- *Residential Treatment Center*: A group care facility that provides a specific treatment program outside the realm of a medical hospital, psychiatric hospital, or institution for children with an intellectual disability (e.g., a residential program for the treatment of alcohol or drug abuse. The receiving state is not obligated to supervise this type of placement made by the sending state.
- *Parent*: A biological or adoptive parent or legal guardian as determined by applicable state law and who is responsible for the care, custody, and control of a child or upon whom there is legal duty for such care.
- *Institutional Care – Article VI Adjudicated Delinquent*: A group care facility for adjudicated delinquents whose proposed placement is according to Article VI of the ICPC. These facilities may include group homes and residential treatment centers and may serve non-delinquents as well.
- *Relative (Not Parent) Relationship*: Specify relationship, such as maternal aunt, paternal grandparents, brother, etc.
- *Other*: Specify a type of care not already listed, such as:
  - Nonrelative free home (an unrelated family that does not require foster home licensure in the receiving state and does not need or want foster care payments)
  - Independent living arrangement (an older teenager who is still under the jurisdiction of an agency or court but is capable of independent living without the supervision of a foster home or group home)

- Maternity home
- Extended foster care (youth aged 18–21 years old)

Current Legal Status of Child. Check the appropriate box.

- *Sending Agency Custody/Guardianship*: The child is in the full legal custody or guardianship (depending on the state's terminology) of a public agency. For example, a public agency may be social services, youth corrections, probation, parole, or a tribe. If allowed by state law, the sending agency may also be a licensed private child placement agency, an adoption agency, or a birth mother.
- *Parent/Relative Custody/Guardianship*: The child is not under the jurisdiction of either an agency or the court but is the full legal responsibility of a parent or relative. This choice is most likely to be marked when a parent, relative or guardian wishes to place a child in one of the types of care listed.
- *Court Jurisdiction Only*: The court has an open abuse, neglect, or dependency case that establishes court jurisdiction with the authority to supervise or remove and place the child for whom the court has not taken guardianship or legal custody.
- *Protective Supervision*: A legal status created by court order under which the child is permitted to remain in the child's home or is placed with a relative or other suitable person and the court, the Department, or another agency designated by the court provides supervision and assistance.
- *Parental Rights Terminated – Right to Place for Adoption*: The sending agency has accepted a voluntary relinquishment of parental rights or has completed court action terminating parental rights and now holds complete jurisdiction over the child with the right to place for adoption.
- *Unaccompanied Refugee Minor*: This form is not used to report the initial placement into the United States but to request placement and services in a second state after a U.S. agency or court has been granted full legal responsibility (custody or guardianship). Check this box only if that is the case.

  Also mark the "Sending Agency Custody/Guardianship" box. If this is an unaccompanied refugee minor whose status warrants the ICPC 100A specific to those children (not the legal responsibility of an U.S. agency or court), do not use this form.
- *Other*: Legal status is not otherwise listed (e.g., legal action, such as a petition for custody or guardianship or to terminate parental rights, is pending).

  For example, the child is the responsibility of the sending agency under a voluntary agreement with the parent or legally responsible relative and no court action has been taken or is pending to alter the family member's legal rights over the child.

Name of Person(s) or Facility Child is to be Placed with. Enter the name, address, and telephone number of the agency, facility, or individuals where the child will be placed. These entries are required.

Name(s) of Prospective Adoptive or Foster Resource. If placement is with an agency (e.g., adoption, foster care, etc.) other than a residential treatment facility (RTF), provide the foster or adoptive resource where the child will reside.

Enter the name, address, social security number, and telephone number of the individual with whom the child will be residing if it differs from the information in the section "Name of Person(s) or Facility Child is to be Placed with."

Section III – Services Requested

Initial Report Requested. If the proposed placement is not for a group care placement and a current home study has not yet been received, check the box for the appropriate type of home study needed based on the type of care indicated in Section II.

Supervisory Services Requested. Check one of the following boxes to indicate how supervisory services are to be conducted:

- *Request Receiving State to Arrange Supervision*: Check this box if the sending agency cannot supervise and does not have a contractual or other agreement with a pre-determined agency to provide these services. Usually the public social service agency will be asked to provide supervision following an approved home study and subsequent placement.
- *Another Agency Agreed to Supervise*: Check this box if the sending agency already has received the formal agreement of a pre-determined supervisory agency. This choice is most likely to be checked in agency adoptive placements where an agency in the receiving state already has provided an adoptive home study and will be providing ongoing services to the adoptive family.

  Do not check this item because you know which county office of the public agency will receive this referral and may have discussed the case over the telephone. That does not constitute an agreement to supervise.
- *Sending Agency to Supervise*: Check this box if it is logistically feasible, it is the best-case plan, and the receiving state has granted the sending agency permission (which may or may not include licensure) to provide services in its state.
- *Other*: Check this box if requesting supervision for extended foster care youth (defined as youth aged 18–21 years).

Supervisory Reports Requested. Complete even though placement may not be a certainty at this time. Indicate how frequently you wish to receive progress reports. Standard timeframes are semi-annually, quarterly, monthly, or other. Check "other" when you wish to receive reports in a timeframe not listed.

Name and Address of Supervising Agency in Receiving State. If you know the name and address of the supervising agency, enter that information onto the line indicated. If not known by the sending agency, that information should be completed by the receiving state's compact office following receipt of a recommendation indicating that placement may be made.

Enclosed. Check which of the following items are enclosed:

- *Child's Social History*: Should accompany the majority of referrals; includes the pre-placement summary on adoption referrals and can be written with non-identifying information, if appropriate and preferred.
- *Home Study of Placement Resource*: Attach a current home study if one is not being requested; most likely to be checked if you already have an approved home study or the child is relocating with a placement resource and the home study is enclosed.
- *Court Order*: All applicable court documents should be enclosed (e.g., custody or guardianship orders, surrenders, orders terminating parental rights, and orders requesting a home study for the court).
- *ICWA Enclosure*: Obtain a letter from the child's tribe showing that the child is a member or is eligible for membership.
- *Financial/Medical Plan*: Attach the plan of how the proposed placement will be funded and how the children's medical needs will be covered.
- *IV-E Eligibility Documentation*: Attach a copy of the determination of IV-E eligibility.
- *Other Enclosures*: Indicates other pertinent materials, such as psychological evaluations, permanency plan, medical reports, school reports, birth certificates, and social security cards. It is not necessary to list them on the form.

Signature of Sending Agency or Person. The form should be signed and dated by anyone outside of the compact office who is completing the form as the sending agency. This includes a person with authority in the county social services agency, private agency, or court and any private individual or family member who is legally responsible for the child (as indicated in Section I and Section II, Legal Status).

Signature of Sending State Compact Administrator, Deputy or Alternate. Pursuant to Article III(d) of ICPC.

If the regulations of the sending state provide for transmittal of the form through the sending state's compact office, the compact administrator, deputy, or alternative in the sending state must sign and date the form. This is almost always the case.

Next Steps, Form 470-5592

Purpose

Form 470-5592 is an optional resource for working with families to document agreements or activities that fall outside of the scope of a *Safety Plan*. The *Next Steps* can be used whether or not a *Safety Plan* is required.

Families are often eager to get started on resolving issues identified during a protective assessment or service case. For example, parents may voice a commitment to making a mental health appointment for themselves or their child, seeking child care, cleaning their house, etc. The *Next Steps* should be simple – who will do what by when. Unlike the *Safety Plan*, the *Next Steps* can be a promissory note – a tool for creating a reminder of commitments that have been made for the good of the children and the family.

Never use the *Next Steps* to make temporary or voluntary changes in child custody. The *Next Steps* does not replace the *Safety Plan*, which must be completed if a child is determined to be safe with a plan. The *Next Steps* is not binding, but a way to engage families regarding commitments they or others (including the Department) make to help preserve and strengthen family connections.

Source

Print this form from the manual or SharePoint under Employee Manual/Forms.

This form is also printed as a three-part carbonless set. Order supplies from Iowa Prison Industries in Anamosa.

Completion

When deemed useful, the child protection worker or social work case manager completes the *Next Steps* with the family, documenting who has agreed to an action step, what that action step is, and when it will be completed.

Use the *Next Steps* during the course of an assessment or anytime throughout the Life of the Case. Only those who are agreeing to an action step need to be present and sign the *Next Steps*. The *Next Steps* can be created in the family's home, at a meeting involving the family, or in other circumstances where action steps are identified.

Distribution

If a printed form is used in place of the three-part carbonless form, a picture of the *Next Steps* must be taken with a state-issued phone or camera.

Leave a copy or the original of the completed form with the family. Keep a copy for the Department's records by uploading the copy or photo of the completed form into File Manager (located within the JARVIS-STAR assessment module) or in the service case file.

Data

Family name: Document the last name of the family. The child protection worker may want to include the name of the child victim. The social work case manager may want to include the name of the youngest child.

Source	Complete this form using the template in SharePoint under Employee Manual/Forms.
Completion	The Department licensing worker completes this form upon receipt of the licensing renewal packet for foster families who have completed their first two years of licensure. Use this form only for foster families whose performance in the previous licensing year indicates the need for a one-year license. The occurrence of one or more of the reasons does not require a recommendation of a one-year license. Take into consideration the circumstances, foster family's history, willingness to take responsibility and made adjustments, and other relevant factors when deciding whether to make the request. Also document voluntary requests by the foster family in this section. If you need more space to write the information under *Other reasons*, use another sheet of paper and attach it to this form.
Distribution	Attach the home study, corrective action plan, letter to the foster parents, and other supporting documents or reports to this form. Send the completed form with attachments to the Foster Family Program Manager in Central Office. The Adult, Children and Family Services Division Administrator reviews the request and indicates on the form approval or denial and an effective date. The division administrator signs the form. The foster family program manager returns a copy to the Department licensing worker. The Department licensing worker then sends the foster family the *Notice of Action* and enters the foster home renewal date in FACS. If the division administrator approves the request for a one-year license, the Department licensing worker notifies the foster family program manager who completes the override in FACS.

Source

Complete this form using the template available in SharePoint under Employee Manual/Forms.

Supplies of this form may also be printed from the manual or SharePoint as needed.

Completion

The YTDM meeting facilitator develops the youth's dream path, in collaboration with the youth, after a youth transition decision-making meeting is held.

Distribution

The facilitator gives a copy of the completed form to the identified team members. Keep the original form in the youth's case file.

Data

Case Information. Enter the following information:

- Youth name
- Parent/caregiver name
- Parent/caregiver/noncustodial names
- Date of the YTDM meeting
- Date of the next YTDM meeting
- Facilitator name and approval number
- Next court hearing date and time
- Type of hearing

Desired Outcome of this Meeting. Use the Dream Path as a tool for the stabilization and action planning parts of the YTDM meeting.

The Dream Path includes the stabilization phase, which identifies the five Fostering Connection areas that need to be addressed and stabilized in the first column.

The five Fostering Connections areas are:

- Education
- Employment
- Health
- Housing
- Supportive Relationships

Complete the stabilization section of the YTDM youth plan by working through each of the five fostering connections categories from left to right. The far left column is available to write the current or 'Now" situation for the youth. Under the column, "What will happen," establish a goal for each applicable area where a need is identified. It is critical that goals be developed in partnership with the youth. Goal statements should be strength-based and focused on achieving the outcomes essential for the youth.

After reviewing the strengths, needs, and goals for each area, identify the "Who will help me" (services or supports that may be helpful) to achieving the goals.

In each category list the action steps needed to achieve the goal. The steps should clearly identify:

- If youth is in agreement;
- Who is responsible;
- What do they agree to do; and
- By when, which is documented under either the 0 to 3 months column or the 4 to 9 months column.

Crisis Plan (Plan B). Identify and discuss what will be done if some part of the plan breaks down and a crisis happens.

Identify the risks and necessary steps needed to address the risk. The steps should clearly identify when and dated when completed or if ongoing.

To move into the Dream Path phase. Each YTDM meeting begins with a review of the five Fostering Connections areas to determine if changes or adaptations need to be made. Once the youth has achieved stability, the longer range planning can begin. Review the 'Dream' written in the 'cloud' on the far right of the document and determine the steps to head in that direction. Develop action plans with a six to nine months' time frame.

Each additional meeting of the team can look ahead further. The youth will be fully listened to and have input every step of the way. If there is disagreement, take the time to discuss the issue and resolve it before moving forward.

Each meeting covers strengths of the youth and a review of the previous assignments. Establish a new Crisis Plan (Plan B) at each meeting as well. Completion of the YTDM meeting process is determined by the youth and the team. It can continue informally after the youth ages out of the system, if desired.
