782.041 Retroactive application relating to s. 782.04; resentencing.—A person convicted and sentenced under s. 782.04 as it existed on or before June 30, 2020, may file a petition with the court that sentenced the petitioner to have the petitioner's murder conviction vacated or to be resentenced, as applicable, under the revised provisions of s. 782.04 on or after July 1, 2020.

AMERICAN OVERSIGHT

Section 3. Subsection (2) of section 27.401, Florida Statutes, is amended to read:

27.401 Cross-Circuit Conflict Representation Pilot Program.—

(2) Notwithstanding ss. 27.40 and 27.5305:

(a) If the public defender in the Tenth Judicial Circuit is unable to provide representation to an indigent defendant charged with a crime under s. 782.04(2) or~~,~~ (3)~~, or (4)~~ due to a conflict of interest and the criminal conflict and civil regional counsel of the Second Region is also unable to provide representation for the case due to a conflict of interest, the public defender in the Thirteenth Judicial Circuit shall be appointed. If the public defender in the Thirteenth Judicial Circuit is unable to provide representation for the case due to a conflict of interest, the criminal conflict and civil regional counsel in the Fifth Region shall be appointed. If the criminal conflict and civil regional counsel in the Fifth Region is unable to provide representation due to a conflict of interest, private counsel shall be appointed.

(b) If the public defender in the Thirteenth Judicial Circuit is unable to provide representation to an indigent defendant charged with a crime under s. 782.04(2) or~~,~~ (3)~~, or (4)~~ due to a conflict of interest and the criminal conflict and civil regional counsel of the Second Region is also unable to provide representation for the case due to a conflict of interest, the public defender in the Tenth Judicial Circuit shall be appointed. If the public defender in the Tenth Judicial Circuit is unable to provide representation for the case due to a conflict of interest, the criminal conflict and civil regional

AMERICAN OVERSIGHT

counsel in the Fifth Region shall be appointed. If the criminal conflict and civil regional counsel in the Fifth Region is unable to provide representation due to a conflict of interest, private counsel shall be appointed.

Section 4. Subsection (9) of section 394.912, Florida Statutes, is amended to read:

394.912 Definitions.—As used in this part, the term:

(9) "Sexually violent offense" means:

(a) Murder of a human being while engaged in sexual battery in violation of s. 782.04(3)(b)3. ~~s. 782.04(1)(a)2.~~;

(b) Kidnapping of a child under the age of 13 and, in the course of that offense, committing:

1. Sexual battery; or

2. A lewd, lascivious, or indecent assault or act upon or in the presence of the child;

(c) Committing the offense of false imprisonment upon a child under the age of 13 and, in the course of that offense, committing:

1. Sexual battery; or

2. A lewd, lascivious, or indecent assault or act upon or in the presence of the child;

(d) Sexual battery in violation of s. 794.011;

(e) Lewd, lascivious, or indecent assault or act upon or in presence of the child in violation of s. 800.04 or s. 847.0135(5);

(f) An attempt, criminal solicitation, or conspiracy, in violation of s. 777.04, of a sexually violent offense;

(g) Any conviction for a felony offense in effect at any time before October 1, 1998, which is comparable to a sexually

AMERICAN OVERSIGHT

violent offense under paragraphs (a)-(f) or any federal conviction or conviction in another state for a felony offense that in this state would be a sexually violent offense;

(h) Any criminal act that, either at the time of sentencing for the offense or subsequently during civil commitment proceedings under this part, has been determined beyond a reasonable doubt to have been sexually motivated; or

(i) A criminal offense in which the state attorney refers a person to the department for civil commitment proceedings pursuant to s. 394.9125.

Section 5. Subsections (6) and (7) of section 775.0823, Florida Statutes, are amended to read:

775.0823 Violent offenses committed against law enforcement officers, correctional officers, state attorneys, assistant state attorneys, justices, or judges.—The Legislature does hereby provide for an increase and certainty of penalty for any person convicted of a violent offense against any law enforcement or correctional officer, as defined in s. 943.10(1), (2), (3), (6), (7), (8), or (9); against any state attorney elected pursuant to s. 27.01 or assistant state attorney appointed under s. 27.181; or against any justice or judge of a court described in Art. V of the State Constitution, which offense arises out of or in the scope of the officer's duty as a law enforcement or correctional officer, the state attorney's or assistant state attorney's duty as a prosecutor or investigator, or the justice's or judge's duty as a judicial officer, as follows:

~~(6) For murder in the third degree as described in s. 782.04(4), a sentence pursuant to s. 775.082, s. 775.083, or s.~~

AMERICAN OVERSIGHT

~~775.084.~~

~~(7) For attempted murder in the third degree as described in s. 782.04(4), a sentence pursuant to s. 775.082, s. 775.083, or s. 775.084.~~

Notwithstanding the provisions of s. 948.01, with respect to any person who is found to have violated this section, adjudication of guilt or imposition of sentence shall not be suspended, deferred, or withheld.

Section 6. Section 782.065, Florida Statutes, is amended to read:

782.065 Murder; law enforcement officer, correctional officer, correctional probation officer.—Notwithstanding ss. 775.082, 775.0823, 782.04, 782.051, and chapter 921, a defendant shall be sentenced to life imprisonment without eligibility for release upon findings by the trier of fact that, beyond a reasonable doubt:

(1) The defendant committed murder in the first degree in violation of s. 782.04(1) and a death sentence was not imposed; murder in the second ~~or third~~ degree in violation of s. 782.04(2) or~~,~~ (3)~~, or (4)~~; attempted murder in the first or second degree in violation of s. 782.04(1)(a)1. or (2); or attempted felony murder in violation of s. 782.051; and

(2) The victim of any offense described in subsection (1) was a law enforcement officer, part-time law enforcement officer, auxiliary law enforcement officer, correctional officer, part-time correctional officer, auxiliary correctional officer, correctional probation officer, part-time correctional probation officer, or auxiliary correctional probation officer,

AMERICAN OVERSIGHT

as those terms are defined in s. 943.10, engaged in the lawful performance of a legal duty.

Section 7. Paragraph (h) of subsection (3) of section 921.0022, Florida Statutes, is amended to read:

921.0022 Criminal Punishment Code; offense severity ranking chart.—

(3) OFFENSE SEVERITY RANKING CHART

(h) LEVEL 8

Florida Statute	Felony Degree	Description

Section 8. Paragraph (e) of subsection (4) of section 944.275, Florida Statutes, is amended to read:

944.275 Gain-time.—

(4)

(e) Notwithstanding subparagraph (b)3., for sentences imposed for offenses committed on or after October 1, 2014, the department may not grant incentive gain-time if the offense is a violation of s. 782.04(3)(b)3. ~~s. 782.04(1)(a)2.c.~~; s. 787.01(3)(a)2. or 3.; s. 787.02(3)(a)2. or 3.; s. 794.011, excluding s. 794.011(10); s. 800.04; s. 825.1025; or s. 847.0135(5).

Section 9. Subsection (3) of section 947.146, Florida Statutes, is amended to read:

947.146 Control Release Authority.—

(3) Within 120 days prior to the date the state correctional system is projected pursuant to s. 216.136 to exceed 99 percent of total capacity, the authority shall determine eligibility for and establish a control release date for an appropriate number of parole ineligible inmates committed to the department and incarcerated within the state who have

AMERICAN OVERSIGHT

been determined by the authority to be eligible for discretionary early release pursuant to this section. In establishing control release dates, it is the intent of the Legislature that the authority prioritize consideration of eligible inmates closest to their tentative release date. The authority shall rely upon commitment data on the offender information system maintained by the department to initially identify inmates who are to be reviewed for control release consideration. The authority may use a method of objective risk assessment in determining if an eligible inmate should be released. Such assessment shall be a part of the department's management information system. However, the authority shall have sole responsibility for determining control release eligibility, establishing a control release date, and effectuating the release of a sufficient number of inmates to maintain the inmate population between 99 percent and 100 percent of total capacity. Inmates who are ineligible for control release are inmates who are parole eligible or inmates who:

(a) Are serving a sentence that includes a mandatory minimum provision for a capital offense or drug trafficking offense and have not served the number of days equal to the mandatory minimum term less any jail-time credit awarded by the court;

(b) Are serving the mandatory minimum portion of a sentence enhanced under s. 775.087(2) or (3), or s. 784.07(3);

(c) Are convicted, or have been previously convicted, of committing or attempting to commit sexual battery, incest, or any of the following lewd or indecent assaults or acts: masturbating in public; exposing the sexual organs in a

AMERICAN OVERSIGHT

perverted manner; or nonconsensual handling or fondling of the sexual organs of another person;

(d) Are convicted, or have been previously convicted, of committing or attempting to commit assault, aggravated assault, battery, or aggravated battery, and a sex act was attempted or completed during commission of such offense;

(e) Are convicted, or have been previously convicted, of committing or attempting to commit kidnapping, burglary, or murder, and the offense was committed with the intent to commit sexual battery or a sex act was attempted or completed during commission of the offense;

(f) Are convicted, or have been previously convicted, of committing or attempting to commit false imprisonment upon a child under the age of 13 and, in the course of committing the offense, the inmate committed aggravated child abuse, sexual battery against the child, or a lewd or lascivious offense committed upon or in the presence of a person less than 16 years of age;

(g) Are sentenced, have previously been sentenced, or have been sentenced at any time under s. 775.084, or have been sentenced at any time in another jurisdiction as a habitual offender;

(h) Are convicted, or have been previously convicted, of committing or attempting to commit assault, aggravated assault, battery, aggravated battery, kidnapping, manslaughter, or murder against an officer as defined in s. 943.10(1), (2), (3), (6), (7), (8), or (9); against a state attorney or assistant state attorney; or against a justice or judge of a court described in Art. V of the State Constitution; or against an officer, judge,

AMERICAN OVERSIGHT

or state attorney employed in a comparable position by any other jurisdiction; ~~or~~

(i) Are convicted, or have been previously convicted, of committing or attempting to commit murder in the first or~~,~~ second~~, or third~~ degree under s. 782.04(1), (2), or (3)~~, or (4),~~ or have ever been convicted of any degree of murder or attempted murder in another jurisdiction;

(j) Are convicted, or have been previously convicted, of DUI manslaughter under s. 316.193(3)(c)3., and are sentenced, or have been sentenced at any time, as a habitual offender for such offense, or have been sentenced at any time in another jurisdiction as a habitual offender for such offense;

(k)1. Are serving a sentence for an offense committed on or after January 1, 1994, for a violation of the Law Enforcement Protection Act under s. 775.0823(2), (3), (4), or (5), ~~or (6),~~ and the subtotal of the offender's sentence points is multiplied pursuant to former s. 921.0014 or s. 921.0024;

2. Are serving a sentence for an offense committed on or after October 1, 1995, for a violation of the Law Enforcement Protection Act under s. 775.0823(2), (3), (4), (5), (6), or (7), ~~(8), or (9),~~ and the subtotal of the offender's sentence points is multiplied pursuant to former s. 921.0014 or s. 921.0024;

(l) Are serving a sentence for an offense committed on or after January 1, 1994, for possession of a firearm, semiautomatic firearm, or machine gun in which additional points are added to the subtotal of the offender's sentence points pursuant to former s. 921.0014 or s. 921.0024; or

(m) Are convicted, or have been previously convicted, of committing or attempting to commit manslaughter, kidnapping,

AMERICAN OVERSIGHT

robbery, carjacking, home-invasion robbery, or a burglary under s. 810.02(2).

In making control release eligibility determinations under this subsection, the authority may rely on any document leading to or generated during the course of the criminal proceedings, including, but not limited to, any presentence or postsentence investigation or any information contained in arrest reports relating to circumstances of the offense.

Section 10. Paragraph (a) of subsection (5) of section 948.012, Florida Statutes, is amended to read:

948.012 Split sentence of probation or community control and imprisonment.—

(5)(a) Effective for offenses committed on or after October 1, 2014, if the court imposes a term of years in accordance with s. 775.082 which is less than the maximum sentence for the offense, the court must impose a split sentence pursuant to subsection (1) for any person who is convicted of a violation of:

1. Section 782.04(3)(b)3. ~~782.04(1)(a)2.c.~~;

2. Section 787.01(3)(a)2. or 3.;

3. Section 787.02(3)(a)2. or 3.;

4. Section 794.011, excluding s. 794.011(10);

5. Section 800.04;

6. Section 825.1025; or

7. Section 847.0135(5).

Section 11. Paragraph (b) of subsection (1) of section 921.0024, Florida Statutes, is amended to read:

921.0024 Criminal Punishment Code; worksheet computations;

AMERICAN OVERSIGHT

scoresheets.—

(1)

(b) WORKSHEET KEY:

Legal status points are assessed when any form of legal status existed at the time the offender committed an offense before the court for sentencing. Four (4) sentence points are assessed for an offender’s legal status.

Community sanction violation points are assessed when a community sanction violation is before the court for sentencing. Six (6) sentence points are assessed for each community sanction violation and each successive community sanction violation, unless any of the following apply:

1. If the community sanction violation includes a new felony conviction before the sentencing court, twelve (12) community sanction violation points are assessed for the violation, and for each successive community sanction violation involving a new felony conviction.

2. If the community sanction violation is committed by a violent felony offender of special concern as defined in s. 948.06:

a. Twelve (12) community sanction violation points are assessed for the violation and for each successive violation of felony probation or community control where:

I. The violation does not include a new felony conviction; and

II. The community sanction violation is not based solely on the probationer or offender’s failure to pay costs or fines or

AMERICAN OVERSIGHT

make restitution payments.

b. Twenty-four (24) community sanction violation points are assessed for the violation and for each successive violation of felony probation or community control where the violation includes a new felony conviction.

Multiple counts of community sanction violations before the sentencing court shall not be a basis for multiplying the assessment of community sanction violation points.

Prior serious felony points: If the offender has a primary offense or any additional offense ranked in level 8, level 9, or level 10, and one or more prior serious felonies, a single assessment of thirty (30) points shall be added. For purposes of this section, a prior serious felony is an offense in the offender's prior record that is ranked in level 8, level 9, or level 10 under s. 921.0022 or s. 921.0023 and for which the offender is serving a sentence of confinement, supervision, or other sanction or for which the offender's date of release from confinement, supervision, or other sanction, whichever is later, is within 3 years before the date the primary offense or any additional offense was committed.

Prior capital felony points: If the offender has one or more prior capital felonies in the offender's criminal record, points shall be added to the subtotal sentence points of the offender equal to twice the number of points the offender receives for the primary offense and any additional offense. A prior capital felony in the offender's criminal record is a previous capital

AMERICAN OVERSIGHT

felony offense for which the offender has entered a plea of nolo contendere or guilty or has been found guilty; or a felony in another jurisdiction which is a capital felony in that jurisdiction, or would be a capital felony if the offense were committed in this state.

Possession of a firearm, semiautomatic firearm, or machine gun: If the offender is convicted of committing or attempting to commit any felony other than those enumerated in s. 775.087(2) while having in his or her possession: a firearm as defined in s. 790.001(6), an additional eighteen (18) sentence points are assessed; or if the offender is convicted of committing or attempting to commit any felony other than those enumerated in s. 775.087(3) while having in his or her possession a semiautomatic firearm as defined in s. 775.087(3) or a machine gun as defined in s. 790.001(9), an additional twenty-five (25) sentence points are assessed.

Sentencing multipliers:

Drug trafficking: If the primary offense is drug trafficking under s. 893.135, the subtotal sentence points are multiplied, at the discretion of the court, for a level 7 or level 8 offense, by 1.5. The state attorney may move the sentencing court to reduce or suspend the sentence of a person convicted of a level 7 or level 8 offense, if the offender provides substantial assistance as described in s. 893.135(4).

Law enforcement protection: If the primary offense is a

AMERICAN OVERSIGHT

violation of the Law Enforcement Protection Act under s. 775.0823(2), (3), or (4), the subtotal sentence points are multiplied by 2.5. If the primary offense is a violation of s. 775.0823(5), (6), or (7), ~~(8), or (9),~~ the subtotal sentence points are multiplied by 2.0. If the primary offense is a violation of s. 784.07(3) or s. 775.0875(1), or of the Law Enforcement Protection Act under s. 775.0823(8) or (9) ~~s. 775.0823(10) or (11)~~, the subtotal sentence points are multiplied by 1.5.

Grand theft of a motor vehicle: If the primary offense is grand theft of the third degree involving a motor vehicle and in the offender's prior record, there are three or more grand thefts of the third degree involving a motor vehicle, the subtotal sentence points are multiplied by 1.5.

Offense related to a criminal gang: If the offender is convicted of the primary offense and committed that offense for the purpose of benefiting, promoting, or furthering the interests of a criminal gang as defined in s. 874.03, the subtotal sentence points are multiplied by 1.5. If applying the multiplier results in the lowest permissible sentence exceeding the statutory maximum sentence for the primary offense under chapter 775, the court may not apply the multiplier and must sentence the defendant to the statutory maximum sentence.

Domestic violence in the presence of a child: If the offender is convicted of the primary offense and the primary offense is a crime of domestic violence, as defined in s. 741.28, which was

AMERICAN OVERSIGHT

committed in the presence of a child under 16 years of age who is a family or household member as defined in s. 741.28(3) with the victim or perpetrator, the subtotal sentence points are multiplied by 1.5.

Adult-on-minor sex offense: If the offender was 18 years of age or older and the victim was younger than 18 years of age at the time the offender committed the primary offense, and if the primary offense was an offense committed on or after October 1, 2014, and is a violation of s. 787.01(2) or s. 787.02(2), if the violation involved a victim who was a minor and, in the course of committing that violation, the defendant committed a sexual battery under chapter 794 or a lewd act under s. 800.04 or s. 847.0135(5) against the minor; s. 787.01(3)(a)2. or 3.; s. 787.02(3)(a)2. or 3.; s. 794.011, excluding s. 794.011(10); s. 800.04; or s. 847.0135(5), the subtotal sentence points are multiplied by 2.0. If applying the multiplier results in the lowest permissible sentence exceeding the statutory maximum sentence for the primary offense under chapter 775, the court may not apply the multiplier and must sentence the defendant to the statutory maximum sentence.

Section 12. This act shall take effect July 1, 2020.

Subject: Support for SB1128

Hello Senator Gruters,

I know that you will be hearing Senate Bill 1128 on Feb 11th and respectfully ask for your support for the bill. It provides clear and concise regulations for vacation rentals statewide.

I own and operate a boutique vacation rental property management company in St. Augustine, FL, and my company exclusively manages 30 homes in the area. It is absolutely my passion to care for these homes, the guests who travel from all over to come to them and the owners who trust me with them.

Our city has recently implemented unfair "one-size-fits-all" ordinances on the oldest city in the country, one that was around before cars were invented, before streets were paved and way before the internet! It is deeply affecting the homeowners whom I work for. All of them are local St. Augustinians like me, who love our town and want to see the local economy continue to grow and thrive. The success of our local economy is nearly entirely driven by our only industry - tourism.

By implementing these new ordinances the city is shutting out a huge demographic of tourists who enjoy renting homes for their travels rather than utilizing the hotels. This is damaging the livelihoods of the owners - many of them will be forced to sell their rental homes, or live-in hosts will be unable to subsidize their social security and be forced to move out of the city altogether. It is also damaging the city's reputation overall as a tourist destination. Imagine what people will think of St. Augustine when they hear that vacation rentals here have 7 night and 30 night minimums? Out bread and butter is a 2 night stay. Rarely do we receive a 7 night booking. The stigma over the city will be "don't go there unless you're staying for a week." We can't afford to lose our tourists, and there will never be enough hotel rooms in our small city to support even 50% of the tourists who come here (which statistics say is 8 million per year and climbing).

These ordinances came to fruition because there are a few bad actors in our town who are managing from out of state and do not know what goes on at their properties, nor is there any contact information for them on record so there is no one to contact when a party breaks out or a neighbor is disturbed. It is these same few homes that continue to bring a bad name to the vacation rental industry.

This is why we NEED SB1128 to pass. It would be a framework for the whole state to adhere to and no longer would the few bad actors be able to continue causing the demonization of this industry.

Another reason we so desperately need SB1128 to pass is because within St. John's county alone, there are 3 separate municipalities, each with their own legislation related to short term rentals (County, City of St. Aug & City of St. Aug Beach). This patchwork has caused confusion and is not well known to the public, therefore people continue to buy homes with the intent to short term rent them in areas where they are not allowed, or there are major restrictions that would make the investment not worthwhile. Clients I work with who are able to rent on their street who refer me to manage their neighbor's house 3 streets over are shocked when I can't help because their neighbor happens to live in a completely different municipality.

We need one overall framework to help unify the state so that we can all be regulated as one body from a registration standpoint.
Please support SB1128!

Thank you for your time and consideration,

--

WORKFORCE DEVELOPMENT

Taking Florida's Students From Learners To Earners

At the Florida Chamber Foundation's Future of Florida Forum, a panel led by Tallahassee Community College Provost Madeline Pumariega discussed how Florida can better prepare today's students to be tomorrow's workforce.

By 2030, rapid advancements in technology and automation will replace nearly half of all jobs that currently exist. Our education system must adapt to ensure our future workforce has the skillsets required for the next generation of employment opportunities.

"Talent is universal, but opportunity is not. When we think about our poverty rates, disconnected youth and others that we need to ensure are part of the human capital pipeline; how then do we strengthen those pathways?" said **Madeline Pumariega**. "The Florida Chamber Jobs 2030 Report lays out the industries growing in Florida and what we can expect. The 2030 Report lays out the pillars and the strategies that connect us in all areas in terms of our economic growth and success."

Also serving on the panel were **Dr. Michelle Horton**, Director of Complete Florida, **Representative Rene Plascencia**, Florida House of Representatives, and **Roland Selby, Jr.**, Executive Director of Year Up Baltimore.

Get Involved Today

The Florida Chamber is focused on growing Florida from the 17th largest economy to the 10th by 2030 and we need your help. Take the **Talent Skills Gap survey** and tell us what your workflow and training needs are.

SARASOTA COUNTY DUI COURT PROGRAM

NEVER A WRONG TIME
TO DO THE RIGHT THING

For additional information and to view the program contract please visit our website at www.jud12.flcourts.org

DUI Court Mission Statement

To reduce the number of repeat DUI offenders by providing alternative community-based treatment, thereby increasing both offender productivity and public safety.

The Sarasota DUI Court is dedicated to changing behavior, targeting offenders who are alcohol dependent currently charged with driving under the influence having one or more prior drug and/or alcohol related arrest(s). Specialized DUI Courts are a proven method to effectively address community struggles with habitual DUI offenders. It's modeled after the highly successful Drug Court concept, having a graduated sanction / reward structure and following specific *Guiding Principles*. Furthermore, it adds elements within the Court such as mandatory counseling, case management, drug and alcohol testing, and community supervision.

FL-SEN-20-0201-B, 20-0202-A-002623

The requirements of the DUI Court are as follows:

How do people find their way into DUI Court?

- Referral from First Appearance
- Pretrial screening
- Post arrest- conditional release terms
- Opportunity presented at Arraignment
- Attorney referral

DUI Court Application

Referrals can be made directly to the Judge, Public Defender's office, Probation and Program Director.

◊ *Individual Interviews / assessments*

The clinical screening and assessment are conducted by the Counselor, Case Manager and Probation. Additional screenings may be required at anytime by the court.

Upon acceptance of the offender's plea to the DUI charge the offender is placed on supervised probation for a minimum of one year. During this time, the DUI offender is required to comply with the mandatory requirements of Florida Statutes 316.193 and 322.28 and complete all phases of DUI Court.

Financial Requirements

Participants are required to provide a portion of costs towards their individualized DUI program. An initial $100.00 application/ assessment fee and $200.00 monthly program fees are required. Participants are also required to pay their mandatory minimum fines and supervision costs as ordered. Mandatory contributions from participants has therapeutic benefits, allowing participants to be empowered having a sense of ownership through their steps of sobriety and recovery.

Phase I
Orientation
Duration - up to 45 days

Phase II
Early Recovery
Duration - approximately 90 days

Phase III
Maintenance & Relapse Prevention
Duration - approximately 115 days

Phase IV
Continuance of Care &
Commencement
Duration - approximately 115 days

Alumni Support Group Network

Participants must follow all rules and regulations of treatment. Program length is a minimum of 12 months. There are four distinct phases of the DUI Court program. Each phase must be fully completed in order for participants to reach commencement.

Supervision is a crucial link between participants and the DUI Court. Random home visits are conducted in the community by local law enforcement, Probation and case management services throughout every phase of DUI Court. Participants are also monitored through other ways such as ongoing random drug and alcohol tests, electronic monitoring, comprehensive case management and medication maintenance.

Eligibility Criteria

◊ Defendant currently charged with Driving Under the Influence.

◊ Defendant has 1 or more prior alcohol and/ or drug related arrest(s).

◊ Defendant is alcohol and/or drug dependent and desires to change behavior, participate in a treatment program and participate in recovery.

◊ No serious violent criminal history.

◊ No evidence of drug dealing

◊ 18 years of age or older.

◊ Must reside in Sarasota County.

◊ Willing to...Show Up, Be Honest & Try

Staffing and Participants Progress

Each participant's progress is reported to the entire DUI Court through weekly team staffings held prior to the status conference. A review of their treatment and overall program status is discussed, along with any program violations and recommendations. All rewards and sanctions are finalized by the judge.

HB 941 *Substance Abuse Services* Act Children, Family, Seniors Question

Follow-Up to January 16th Staff Meeting

How often do people ordered to substance abuse treatment receive self-help group mandates?

- 59% of AA members received treatment / counseling prior to entering the program
- 397.334: "Treatment-based drug court programs may include pretrial intervention programs as provided in ss. 948.08, 948.16, and 985.345, treatment-based drug court programs authorized in chapter 39, postadjudicatory programs as provided in ss. 948.01, 948.06, and 948.20, and review of the status of compliance or noncompliance of sentenced offenders through a treatment-based drug court program. While enrolled in a treatment-based drug court program, the participant is subject to a coordinated strategy developed by a drug court team under subsection (4). The coordinated strategy may include a protocol of sanctions that may be imposed upon the participant for noncompliance with program rules. The protocol of sanctions may include, but is not limited to, placement in a substance abuse treatment program offered by a licensed service provider as defined in s. 397.311"

If Marchman Acted (sent to licensed treatment center) is there also a self-help component?

- Submitted by person on behalf of another individual (in county where individual is located)
- Assessment (up to 5 days), stabilization and long-term treatment (up to 60 days)
- Trained medical professionals assess patient and make treatment recommendations (delivered to the court)
- No punishment for non-compliance, however petitioner can open civil case and repercussions can be put in place if patient does not comply with Marchman rules

AMERICAN OVERSIGHT

How successful are groups like AA?

- 2014 Member Survey
  - 27% Sober < 1 Year
  - 24% 1-5 Years
- **https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2746426/**
  - Rates of abstinence are about twice as high among those who attend AA (study)
  - Higher levels of attendance are related to higher rates of abstinence (study)
  - Prior AA attendance is predictive of subsequent abstinence (study)

Are there any mandated self-help assignments in prior statutes?

- **Proof of Attendance at Meetings**
- Some judges require written proof that offenders have attended a certain number of meetings. Often, when the court-ordered newcomer attends an A.A. meeting, the group secretary (or other group officer) is willing to sign their first name, or to initial a slip furnished by the court saying so-and-so was at the meeting on a particular date. Hopefully, all involved recognize that neither the group nor its members are "bound" in any way by the signature, nor does this courtesy signify affiliation of the A.A. group with any other program or guarantee that the attendee was present for the entire meeting; it simply illustrates cooperation. Court professionals should understand too, that attendance at A.A. meetings doesn't guarantee sobriety.
- Placing great emphasis on A.A.'s principle of Anonymity, we understand that some A.A. members are uncomfortable when asked to sign their full name or to supply other personal information indicating that they are A.A. members. This cherished Tradition of Anonymity provides protection to all A.A.s from being publicly identified as alcoholics, a safeguard especially important to the newcomer. Since each group is autonomous, and providing proof of attendance at meetings is *not* a specific part of A.A.'s program, each group and group member has the right to choose whether or not to sign court slips.
- While some groups have elected not to sign court cards, it is our experience that most groups will try to cooperate with our professional friends. In some areas, courts furnish cooperating A.A. groups with sealed, stamped envelopes addressed to the court. In general, the secretary of the group announces that anybody needing an envelope may get it after the meeting. The newcomer takes the envelope, privately writes his or her name and/or return address on it, and mails it. In other areas, each cooperating group has a sheet, furnished by the court, that the secretary announces is available for court ordered newcomers to sign after the meeting. The secretary returns the sheets in envelopes furnished by the referring agency. In this way, it is not the A.A. group, but the prospect's own signature which affirms he or she was at the meeting.
  - https://www.aa.org/pages/en_US/alcoholics-anonymous-as-a-resource-for-drug-and-alcohol-court-professionals

- So doing violates the Establishment Clause, guaranteeing that at a minimum, "government may not coerce anyone to support or participate in religion or its exercise, or otherwise act in a way which establishes a [state] religion or religious faith, or tends to

AMERICAN OVERSIGHT

do so." (Lee v. Weisman, 1992, U.S. Supreme Court on school prayer.) In short, while not deemed an actual religion, AA – with the steps' numerous references to "God" – is considered to contain enough religious components to make coerced attendance unconstitutional, despite the fact that attendees commonly argue that the 12 steps are "spiritual," not religious.

Example of End User License Agreement and Privacy Policy for Florida based business

TBV ME, CO.
TBV ME End-User License Agreement (Android)

AMERICAN OVERSIGHT

THIS IS A LEGAL AGREEMENT BETWEEN YOU AS THE PERSON ACQUIRING THE SOFTWARE AND/OR YOUR COMPANY IF YOU HAVE ACQUIRED THE SOFTWARE FOR YOUR COMPANY (COLLECTIVELY, "CUSTOMER") AND TBV ME, CO. ("LICENSOR") REGARDING YOUR USE OF THE TBV PLATFORM SOFTWARE AND ALL DATA OR CONTENT THAT IS ACCESSED OR UTILIZED BY THE TBV PLATFORM SOFTWARE (COLLECTIVELY THE "SOFTWARE"). BY INSTALLING OR USING THE SOFTWARE, YOU AGREE TO BE BOUND BY TERMS OF THIS END-USER LICENSE AGREEMENT (THE "AGREEMENT"). IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREEMENT, YOU ARE NOT ENTITLED TO USE THE SOFTWARE AND MUST UNINSTALL THE SOFTWARE FROM ANY COMPUTERS OR DEVICES ON WHICH IT IS INSTALLED.

Licensor hereby grants and You accept a non-exclusive, non-transferable license, without the right to sublicense, to use the Software, subject to the following terms and conditions:

AMERICAN OVERSIGHT

1. Proprietary Rights

The Software, including any documentation, is subject to the protection of the copyright laws of the U.S. and foreign jurisdictions, which prohibit unauthorized copying and distribution of copyrighted works. The Software and documentation incorporate Licensor's proprietary and confidential algorithms and techniques that are subject to legal protection as trade secrets. You are granted only those rights expressly conferred by the license grant set forth in Section 2 of this Agreement.

2. License Grant

Licensor grants you a non-transferable, non-exclusive, worldwide license, without the right to sublicense, to install and use the Software on a single device solely for your use in a manner consistent with the terms of this Agreement.

3. Reserved Rights

Licensor reserves any rights not expressly granted in Section 2. Without limiting the foregoing, Licensor reserves the right to license the Software and documentation to others on such terms as Licensor may establish in its sole discretion.

4. Restrictions

You may not:

a. Use the Software except as expressly authorized in this Agreement;
b. License, sublicense, sell, resell, transfer, assign, distribute, hypothecate, lease, loan or otherwise convey, commercially exploit or make available to any third party the Software or documentation in any way;
c. Send to licensor material containing software viruses, worms, Trojan horses or other harmful computer code, files, scripts, agents or programs, or otherwise interfere with or disrupt the integrity or performance of the Software;
d. Modify, translate or adapt the Software or documentation, incorporate the Software or documentation in whole or in part in any other product or create derivative works based on all or part of the Software or documentation;
e. Copy the Software or documentation in any manner or for any purpose.
f. Install or use the Software in a network or similar configuration which permits access by more than one user or device at a time;
g. Disassemble, decrypt, extract, reverse engineer or reverse compile the Software, or otherwise attempt to discover the confidential algorithms and techniques incorporated in the Software, or disclose or use any confidential information of Licensor in any manner other than as expressly authorized in this Agreement; or
h. Share Your login with any other person (including another user or other third party).

You are expected to adhere to certain norms in Your interaction with other users of the Software and Your treatment of the information that the Software provides. Use of the information available in the Software for any commercial or political solicitations is strictly prohibited. Such unauthorized use may result in termination of this license and denial of access to the Software.

This Software is for Your personal use only. Use of this directory or the information available for any other purpose, including, but not limited to, reproducing, and storing in a retrieval system by any means, electronic or mechanical, photocopying or using the addresses (electronic or otherwise) or other information contained in this directory for any commercial or political purpose or mailing is strictly prohibited and is in direct violation of copyright and constitutes misappropriation of corporate property. Such unauthorized use may also violate the rights of privacy and/or publicity of individuals.

AMERICAN OVERSIGHT

5. Term

This Agreement is effective until terminated. The Agreement and Your right to install and use the Software and documentation will automatically terminate without notice in the event of any failure by You to comply with any of the above restrictions or any term of this Agreement. Upon termination, You shall destroy or delete all copies of the Software in Your possession. All provisions of Sections 1, 7 and 8 of this Agreement shall survive termination.

6. Android-Enabled Software Applications:

Licensor offers software applications that are intended to be operated in connection with products made commercially available by third parties that operate using the Android operating system, which is owned by Google Inc. ("Google"). With respect to the Software that is made available for your use in connection with a Google-branded product, in addition to the other terms and conditions set forth in this Agreement, the following terms and conditions apply:

a. Licensor and you acknowledge that this Agreement is concluded between Licensor and you only, and not with Google, and that as between Licensor and Google, Licensor, not Google, is solely responsible for the Software and the content thereof.
b. The Google Play marketplace is owned and operated by Google. Your use of Google Play is governed by a legal agreement between you and Google consisting of the Google Terms of Service (found at http://www.google.com/intl/en/policies/terms/) and the Google Play Terms of Service (found at https://play.google.com/intl/en-US_us/about/play-terms.html, and together with the Google Terms of Service called the "Terms"). In addition, your use of Google Play is subject to the Google Play Business and Program Policies (found at http://play.google.com/about/android-developer-policies.html). The Google Play Market Terms of Service, Google Play Business and Program Policies, and Google Terms of Service shall take precedence in that order in the event of a conflict between them, to the extent of such conflict.
c. Your license to use the Software is limited to a non-transferable license to use the Software on a product that you own or control, as permitted by the terms of this Agreement.
d. Google has no obligation whatsoever to provide any maintenance or support services with respect to the Software.
e. To the maximum extent permitted by applicable law, Google will have no warranty obligation whatsoever with respect to the Software, and will not be liable for any claims, losses, liabilities, damages, costs or expenses attributable to any failure to conform to any warranty.
f. Licensor and you acknowledge that Licensor, not Google, is responsible for addressing any claims of you or any third party relating to the Software or your possession and/or use of the Software, including, but not limited to: (i) product liability claims; (ii) any claim that the Software fails to conform to any applicable legal or regulatory requirement; and (iii) claims arising under consumer protection or similar legislation.
g. In the event of any third party claim that the Software or the end-user's possession and use of the Software infringes that third party's intellectual property rights, as between Licensor and Google, Licensor, not Google, will be solely responsible for the investigation, defense, settlement and discharge of any such intellectual property infringement claim.
h. You represent and warrant that (i) you are not located in a country that is subject to a U.S. Government embargo, or that has been designated by the U.S. Government as a "terrorist supporting" country; and (ii) you are not listed on any U.S. Government list of prohibited or restricted parties.
i. If you have any questions, complaints or claims with respect to the Software, they should be directed to Licensor.

7. Limited Warranty

a. You acknowledge and agree that the Software is provided "AS IS" without warranty of any kind. This is Licensor's entire liability and Your sole and exclusive remedy in connection with any breach of this Agreement, including, but not limited to, any breach of warranty. By accepting this Agreement, You acknowledge and agree that Licensor cannot and does not guarantee or warrant that files available for downloading through the

AMERICAN OVERSIGHT

Internet will be free of infection or viruses, worms, Trojan horses or other code that manifests contaminating or destructive properties. You download all files at Your own risk.

b. LICENSOR DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE OR NONINFRINGEMENT OF THIRD PARTIES' INTELLECTUAL PROPERTY RIGHTS.

8. Limitation of Liability

In no event will Licensor be liable for any damages including any lost profits or other incidental, special, punitive, exemplary, direct, indirect or consequential damages, arising out of or related to the Software, documentation or the use thereof, even if Licensor has been advised, or is otherwise aware, of the possibility of such damages and even if the warranty remedy of Section 7 fails of its essential purpose. You agree that the Limited Warranty of Section 7 and the Limited Liability of Section b are reasonable in light of the licenses fees paid under the License Agreement.

Some states do not allow exclusion of implied warranties or limitation of liability for incidental, special, punitive, or other indirect or consequential damages, so the limitations or exclusions of Sections 7 and 8 of the License Agreement may not apply to You. IN SUCH STATES, THE LIABILITY OF LICENSOR SHALL BE LIMITED TO THE GREATEST EXTENT PERMITTED BY LAW.

9. Miscellaneous

This Agreement, the license granted hereunder, the Software, any modifications thereto and any Services may not be assigned or in any way transferred without the prior written consent of Licensor. This Agreement is entered into solely for the respective benefit of the parties and their successors and assigns, and nothing in this Agreement will be construed as giving any right, remedy or claim under this Agreement to any third parties. Licensor shall not be in default to the extent that failure to perform any obligation under this Agreement is caused solely by supervening conditions beyond its control, including acts of God, fire, natural disaster, war, terrorism, riot or other civil disturbance, outages of electrical, telecommunications or computer server hosting services, acts of government or labor strikes or lockouts ("Force Majeure"). The terms of this Agreement shall be construed in accordance with the substantive laws of the Commonwealth of Massachusetts. The original of this Agreement has been written in English. The parties hereto waive any statute, law, or regulation that might provide an alternative law or forum or to have this Agreement written in any language other than English. Licensor and You exclude the United Nations Convention on Contracts for the International Sale of Goods and the Uniform Computer Information Transactions Act from this Agreement. If any provision of this Agreement is held to be excessively broad as to scope, activity, subject or otherwise so as to be unenforceable at law, such provision shall be constructed by limiting or reducing it so as to be enforceable to the maximum extent compatible with the applicable law as it shall then appear. This Agreement represents the entire understanding between the parties with respect to its subject matter and supersedes all prior written and oral communications. This Agreement may not be modified except by a written agreement signed by authorized representatives of both parties. A waiver by either party of its rights hereunder shall not be binding unless contained in a written agreement signed by an authorized representative of the party waiving its rights. The non-enforcement or waiver of any provision on one occasion shall not constitute a waiver of such provision on any other occasions unless expressly so agreed in writing. The relationship of the parties shall be that of independent contractors. Nothing herein shall be construed to create any agency, partnership, joint venture or similar relationship or to subject the parties to any implied duties or obligations respecting the conduct of their affairs which are not expressly stated herein. Neither party shall have any right or authority to assume or create any obligation or responsibility, either express or implied, on behalf of or in the name of the other party, or to bind the other party in any matter or thing whatsoever.

AMERICAN OVERSIGHT

TBV ME Application Privacy Policy

TBV ME, Co., ("**TBV**", "**We**", "**Us**") has created this privacy policy ("**Privacy Policy**") in order to set out how we collect, use, and disclose personal information through the TBV platform and our related personal contact management services and applications (collectively, together with the TBV platform, the "**Services**"). Any capitalized terms in this Privacy Policy shall have the same meaning as set out in our Terms of Service.

The privacy of our users is of great importance to us. By using the Services in any manner, you acknowledge that you accept the practices and policies outlined in this Privacy Policy and you hereby consent to the collection, use and disclosure of your personal information in accordance with this Privacy Policy.

1 WHAT DOES THIS PRIVACY POLICY COVER?

This Privacy Policy covers our collection, use and disclosure of information about identifiable individuals ("**Personal Information**"), who use the Services ("**Users**").

2 COLLECTION AND USE OF PERSONAL INFORMATION

2.1 User Information

In order to use certain Services, Users must have a valid TBV App account to log into the Services ("**Account**").

When you register for an Account using email registration, TBV collects your name, cell phone number, email address, and location,. This Personal Information is used for the following purposes:

- Verifying the User's identity;
- Allowing Users to create a profile; and
- Contacting Users about relevant information related to the Services.

2.2 Transaction History

When Users use the Services, TBV collects information about the User's activity and transaction history. In particular, TBV keeps track of the device used to log in, the time of day, the time spent on the app, location, actions completed and IP address, and you may also be asked to provide other personal data such as age, location, gender, personal history, etc. ("Personal Information"). This Personal Information is used for the following purposes:

- To allow Users to keep track of their history;
- To store and report activities tracked by the Services;
- To support research and efficacy of the Services;

AMERICAN OVERSIGHT

- For TBV's accounting records;
- To enhance and customize User experience, including showing Users relevant contents; and
- To monitor compliance with our Terms of Service.

2.3 Marketing Communications

TBV will use the contact information provided to notify Users of important information that is relevant to the Services and for marketing communications if the User chooses to opt in. Despite your indicated e-mail preferences, we may send you relevant notices where permitted by law.

2.4 Usage Data

TBV may also collect certain information from Users of the Website and Services, such as Internet addresses, time spent logged into the Services and other usage data ("**Usage Data**"). This Usage Data is logged to help diagnose technical problems, and to administer our Website and Services in order to constantly improve the quality of the Website and Services.

2.5 Cookies

TBV uses tracking technologies, such as cookies, beacons, scripts and tags, are used by us and our third-party partners. These technologies are used in analyzing trends, administering the Services, tracking Users' movements around the Services, gathering demographic information about our User base as a whole and collecting information about your browsing activities over time and across different websites following your use of the Services. We may receive reports based on the use of these technologies by these companies on an individual and aggregated basis. Various browsers may offer their own management tools for removing these types of tracking technologies.

Standing alone, cookies do not identify you personally. They merely recognize your browser. Cookies come in two flavors: session and persistent-based. Session cookies exist only during an online session. They disappear from your computer when you close your browser software or turn off your computer. Persistent cookies remain on your computer after you've closed your browser or turned off your computer.

TBV uses session cookies containing encrypted information to allow the system to uniquely identify you while you are logged in. This information allows TBV to process online transactions and requests. Session cookies help us make sure you are who you say you are after you've logged in and are required in order to use the Service.

TBV uses persistent cookies that only TBV can read and use, to identify the fact that you are a TBV User. We are especially careful about the security and confidentiality of the information stored in persistent cookies. Users who disable their web browser's ability to

AMERICAN OVERSIGHT

accept cookies will be able to browse our Website but may not be able to use all features of our Services.

3 SECURITY AND STORAGE

3.1 Storage Location

TBV stores its data, including Personal Information, on Amazon Web Services servers located in the United States. By submitting any Personal Information or using the Services, you agree to this transfer, storing or processing of your Personal Information in the United States. You acknowledge and agree that your Personal Information may be accessible to law enforcement and governmental agencies in those countries under lawful access regimes or court order.

3.2 Security

The security of your Personal Information is important to us. We use commercially reasonable efforts to store and maintain your Personal Information in a secure environment. We take technical, contractual, administrative, and physical security steps designed to protect Personal Information that you provide to us. We have implemented procedures designed to limit the dissemination of your Personal Information to only such designated staff as are reasonably necessary to carry out the stated purposes we have communicated to you. However, no Internet or email transmission is ever fully secure or error free. In particular, email sent to or from the Services may not be secure. Therefore, you should take special care in deciding what information you send to us via email. Please keep this in mind when disclosing any Personal Information to us via the Internet.

You are also responsible for helping to protect the security of your Personal Information. For instance, never give out your email account information or password for the Services to third parties.

4 DISCLOSURE OF PERSONAL INFORMATION WITH THIRD PARTIES

4.1 Disclosure to our Service Providers

We may from time to time employ or engage other companies and people to perform tasks on our behalf and need to share Personal Information with them to provide the Services. Unless we tell you differently, we only provide such third parties with the Personal Information that they need to perform their specific function. This includes third party companies and individuals employed or engaged by us to facilitate our products and services, including the provision of maintenance services, database management, customer relationship management, web analytics and general improvement of the Services, and businesses who engage our Services (to the extent provided for above). In particular, TBV uses the following service providers: Google Cloud Platform, Amazon AWS, Stripe and Google Analytics.

AMERICAN OVERSIGHT

4.2 Business Transfers

If we (or any of our assets) are acquired, or if we go out of business, enter bankruptcy, or go through some other change of control, Personal Information may be made available or otherwise transferred to the new controlling entity, where permitted under applicable law.

4.3 With Your Consent

If we need to use or disclose any Personal Information in a way not identified in this Privacy Policy, we will notify you and/or obtain your express consent as required under applicable privacy laws.

4.4 Affiliates

We may also share your Personal Information with our subsidiaries or other affiliated companies for purposes consistent with this Privacy Policy.

4.5 As required by law

We may disclose your Personal Information to third parties without your consent if we have reason to believe that disclosing this information is necessary to identify, contact or bring legal action against someone who may be causing injury to or interference with (either intentionally or unintentionally) our rights or property, other Users, or anyone else (including the rights or property of anyone else) that could be harmed by such activities. Further, we may disclose Personal Information when we believe in good faith that such disclosure is required by and in accordance with the law. We also reserve the right to access, read, preserve, and disclose any information as we reasonably believe is necessary to:

- satisfy any applicable law, regulation, legal process or governmental request;
- enforce our contracts or user agreement (Terms of Service), including investigation of potential violations hereof; and
- detect, prevent, or otherwise address fraud, security or technical issues.

5 RETENTION

We will keep your Personal Information for as long as it remains necessary for the identified purpose or as required by law, which may extend beyond the termination of our relationship with you. We may retain certain data as necessary to prevent fraud or future abuse, or for legitimate business purposes, such as analysis of aggregated, non-personally-identifiable data, account recovery, or if required by law. All retained Personal Information will remain subject to the terms of this Privacy Policy.

6 ACCESS, CORRECTION AND ACCURACY

You have the right to access the Personal Information we hold about you in order to verify the Personal Information we have collected in respect to you and to have a general account of

AMERICAN OVERSIGHT

our uses of that information. Upon receipt of your written request, we will provide you with a copy of your Personal Information, although in certain limited circumstances, and as permitted under law, we may not be able to make all relevant information available to you, such as where that information also pertains to another User. In such circumstances we will provide reasons for the denial to you upon request. We will endeavor to deal with all requests for access and modifications in a timely manner.

We will make every reasonable effort to keep your Personal Information accurate and up to date, and we will provide you with mechanisms to update, correct, delete or add to your Personal Information as appropriate. As appropriate, this amended Personal Information will be transmitted to those parties to which we are permitted to disclose your information. Having accurate Personal Information about you enables us to give you the best possible service.

7 CHANGES TO THIS PRIVACY POLICY

We may amend this Privacy Policy from time to time. Use of Personal Information we collect is subject to the Privacy Policy in effect at the time such information is collected, used or disclosed. If we make material changes or changes in the way we use Personal Information, we will notify you by posting an announcement on our Website or sending you an email prior to the change becoming effective. You are bound by any changes to the Privacy Policy when you use the Website or Services after such changes have been first posted.

8 CHILDREN

TBV does not knowingly collect Personal Information from children under the age of 13. If you are under the age of 13, please do not submit any Personal Information through or use the Services. We encourage parents and legal guardians to monitor their children's Internet usage and to help enforce our Privacy Policy by instructing their children never to provide Personal Information through Services without their permission. If you have reason to believe that a child under the age of 13 has provided Personal Information to TBV through the Services, please contact us, and we will endeavor to delete that information from our databases.

9 LINKS TO OTHER WEBSITES AND SERVICES

This Privacy Policy applies only to the Services. The Services may contain links to other web sites or services not operated or controlled by TBV (the "Third Party Services"). The policies and procedures we described here do not apply to the Third Party Services. The links from the Services do not imply that we endorse or have reviewed the Third Party Services. We suggest contacting those third parties directly for information on their privacy policies.

10 EXCLUSIONS

AMERICAN OVERSIGHT

This Privacy Policy does not apply to any Personal Information collected by TBV other than Personal Information collected through the Services. This Privacy Policy shall not apply to any unsolicited information you provide to TBV through the Services or through any other means. This includes, but is not limited to, information posted to any public areas of the Services, such as forums, any ideas for new products or modifications to existing products, and other unsolicited submissions (collectively, "Unsolicited Information"). All Unsolicited Information shall be deemed to be non-confidential and TBV shall be free to reproduce, use, disclose, and distribute such Unsolicited Information to others without limitation or attribution.

11 ADDITIONAL INFORMATION

You can help by keeping us informed of any changes such as a change of address or telephone number. If you would like to access your Personal Information, if you have any questions, comments or suggestions about our Privacy Policy or practice, or if you find any errors in our Personal Information about you, please contact us at: support@tbvme.com

AMERICAN OVERSIGHT

Thank You Chair Ponder,

This bill allows for the option for Drug Courts to use electronic verification methods to ensure attendance at court ordered attendance to pre-trial treatment based programs.

There is an Amendment on the Bill-
The amendment is a product of working closely with staff to clarify the language from the Senate version. It changes the Thank You Mr. Chair and Thank You Staff for working with us on this good bill.

AMERICAN OVERSIGHT

“Shall” to “may” and provides for he focus on drug court programs.

Thank You Mr. Chair and Thank You Staff for working with us on this good bill.

AMERICAN OVERSIGHT

DUI Court

Sarasota **DUI Court** Program

The mission of DUI Court is to reduce the number of repeat DUI offenders by providing alternative community-based treatment, thereby increasing both offender productivity and public safety.

Target Population, Model & Structure

The Sarasota County DUI Court began June of 2008 within the 12th Judicial Circuit. This specialized court is very unique, there being only four other such courts in the state of Florida. The Sarasota DUI Court has received full support from the Sarasota County Board of County Commissioners and the Criminal Justice Commission. The program was started with the support of grant funds petitioned and awarded through the Highway Traffic Safety Administration of the Florida Department of Transportation.

The Sarasota DUI Court is dedicated to changing behavior by targeting offenders who are alcohol/drug dependent and are currently charged with a DUI and have 1 or more prior arrest(s) for alcohol and/or drug related offenses.

It has been noted that Florida is the third highest - ranking state in the country in alcohol related traffic fatalities. This specialty court has been designed to address this problem. Specialized DUI Courts are modeled after the highly successful Drug Court concept, having a graduated sanction/reward structure and following specific guiding principles. Furthermore, it adds elements within the court such as immediate accountability, mandatory counseling, case management, drug and alcohol testing, and community supervision. Statistics from operational DUI Courts show that recidivism decreases substantially after completion.

Upon acceptance of the offender's plea to the pending DUI charge the offender is placed on supervised probation for a period of at least one year. During this time, the DUI offender is required to comply with the mandatory statutory requirements of Florida Statutes 316.193 and 322.28 andcomplete all phases of DUI Court.

Staffing and Participants Progress

Each participant's progress is reported to the DUI Court through weekly team staffings held prior to court with the participants. Detailed status reports are prepared and copied for the Judge and all team members to review as a part of the staffing process. A review of their treatment and overall program status is discussed, along with any program violations and recommendations. The judge makes the final decision on all rewards and sanctioning.

Financial Requirements

Participants are required to provide a portion of costs towards their individualized DUI program. An initial $100.00 administrative fee and $200.00 monthly program fees are required. Mandatory financial contribution from participants has therapeutic benefits, allowing participants to be empowered having a sense of ownership through their steps of sobriety and recovery. Participants are also required to pay their mandatory minimum fines and supervision costs as ordered. In appropriate cases, participants deemed qualified by the judge may work off all or part of their fines and court costs by doing community service work. *Section 938.30, Florida Statutes (2016).*

Eligibility Requirements for **DUI Court**

- ✔ Defendant currently charged with Driving Under the Influence.
- ✔ Defendant has 1 or more prior arrest(s) for alcohol and/or drug related offenses.

AMERICAN OVERSIGHT

- ✓ Defendant is alcohol dependent and desires to change behavior having a willingness to complete a treatment program and participate in recovery.
- ✓ No serious violent criminal history.
- ✓ No evidence of drug dealing.
- ✓ 18 years of age or older.
- ✓ Must reside in the 12th Judicial Circuit.
- ✓ Defendant acknowledges they will be able to attend all required court appearances, treatment sessions and support meetings.
- ✓ Defendant willing to... Show Up, Be Honest & Try

PHASE I: Orientation, Duration - (Approx. 45 days)

- ✓ Mandatory jail time.
- ✓ Weekly court appearances.
- ✓ Clinical assessment
- ✓ Mental Health assessment
- ✓ Attend weekly scheduled case management meetings.
- ✓ Probation orientation and assessment
- ✓ Minimum of one home visit by probation, case manager or law enforcement.
- ✓ Submit to a minimum of three random alcohol/drug screens per week.
- ✓ Attend a minimum of three support/sober network meetings per week.
- ✓ Attend a minimum of three "in house" group meetings per week.
- ✓ Weekly individual counseling sessions.
- ✓ Comply with any additional requirements recommended by the treatment provider

To advance to Phase II:
Completed jail time, completed all assessments, minimum 14 consecutive days clean and sober, pay no less than $100 assessment fee, signed Phase II contract.

PHASE II: Early Recovery, Duration - (Approx. 90 days)

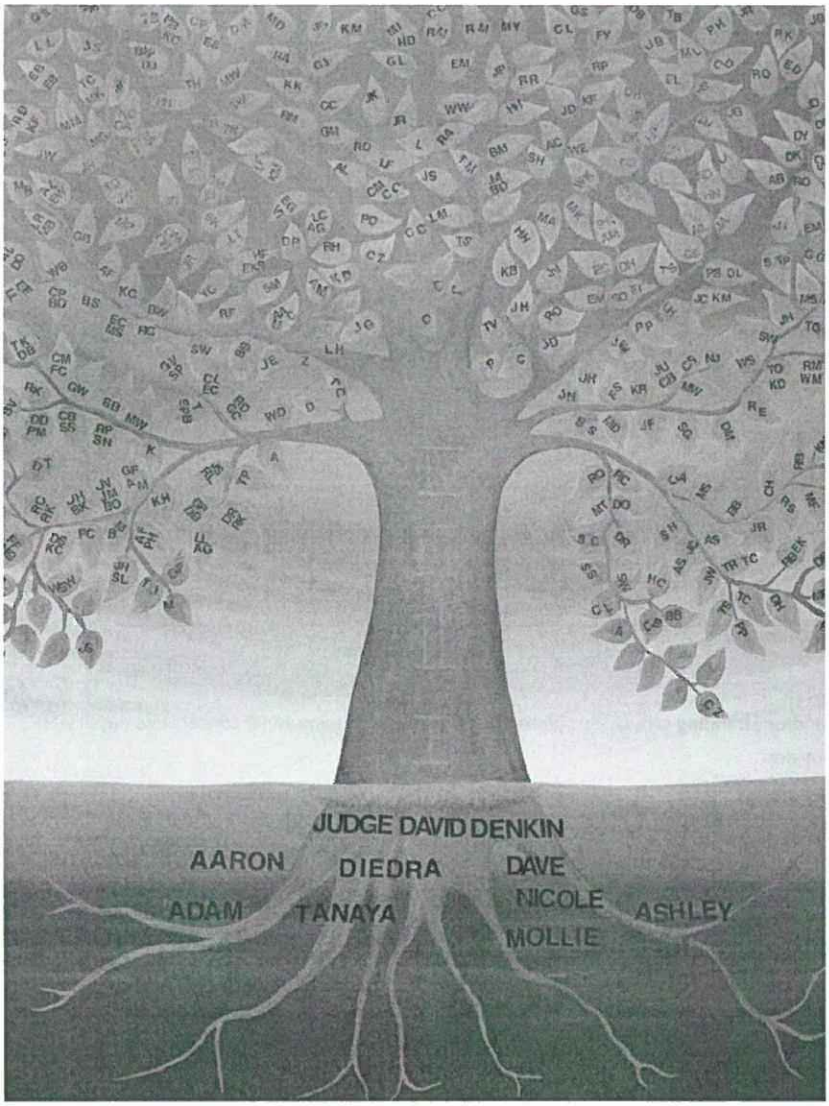
- ✓ Follow all rules and regulations of treatment.
- ✓ Weekly court appearances
- ✓ Attend weekly scheduled case management meetings.
- ✓ Attend scheduled monthly meetings with Probation Officer.
- ✓ Attend a minimum of three support/sober network meetings per week.
- ✓ Attend scheduled meetings with counselor as recommended.
- ✓ Submit to a minimum of three random alcohol/drug screens per week.
- ✓ Attend a minimum of two "in house" group meetings per week
- ✓ Enroll in DUI School and Victim Impact Panel.
- ✓ Maintain employment, vocational training or educational opportunities / Complete community service work as imposed by judge
- ✓ Minimum of one home visit by probation, case manager or law enforcement.
- ✓ Pay DUI Court Program fees.
- ✓ Obtain verified sponsor.

To advance to Phase III:
Completed all phase requirements; current on program fees, enroll in DUI School and Victim Impact Panel, minimum of 30 consecutive days clean and sober, signed Phase III contract.

AMERICAN OVERSIGHT

PHASE III - Maintenance & Relapse Prevention, Duration - (Approx. 115 days)

- ✔ Follow all rules and regulations of treatment.
- ✔ Bi-weekly court appearances
- ✔ Attend scheduled monthly meetings with Probation Officer.
- ✔ Attend scheduled case management meetings as recommended.
- ✔ Minimum of one home visit by probation, case management or law enforcement.
- ✔ Attend scheduled meetings with counselor as recommended.
- ✔ Attend a minimum of three support/sober network meetings per week.
- ✔ Attend a minimum of two "in house" group meetings per week.
- ✔ Submit to a minimum of three random alcohol/drug screens per week.
- ✔ Maintain employment, vocational training or educational opportunities / Complete community service work as imposed by the judge.
- ✔ Pay DUI Court program fees
- ✔ Begin and attend financial counseling as determined by the court.



To advance to Phase IV:
Completed all phase requirements, must be employed and/or attending school, completed DUI School/VIP, minimum 90 consecutive days clean and sober, current on program fees, signed Phase IV contract.

PHASE IV - Continuance of Care & Commencement, Duration - (Approx. 115 days)

- ✔ Follow all rules and regulations of treatment.
- ✔ Monthly court appearances.
- ✔ Attend scheduled monthly meetings with Probation Officer.
- ✔ Attend case management meetings as recommended.
- ✔ Minimum of one home visit by probation, case management or law enforcement.
- ✔ Attend scheduled meetings with counselor as recommended.
- ✔ Submit to a minimum of three random alcohol/drug screens per week.
- ✔ Attend a minimum of three support/sober network meetings per week.
- ✔ Attend a minimum of two "in house" group meetings per week
- ✔ Maintain employment, vocational training or educational opportunities / Complete community service work as imposed by the judge.
- ✔ Pay DUI Court program fees, court costs and fines.
- ✔ Develop Relapse prevention plan
- ✔ Continue to address medical and mental health issues.
- ✔ Complete program exit interview
- ✔ DUI Court Commencement

TBV ME Application Privacy Policy

TBV ME, Co., ("**TBV**", "**We**", "**Us**") has created this privacy policy ("**Privacy Policy**") in order to set out how we collect, use, and disclose personal information through the TBV platform and our related personal contact management services and applications (collectively, together with the TBV platform, the "**Services**"). Any capitalized terms in this Privacy Policy shall have the same meaning as set out in our Terms of Service.

The privacy of our users is of great importance to us. By using the Services in any manner, you acknowledge that you accept the practices and policies outlined in this Privacy Policy and you hereby consent to the collection, use and disclosure of your personal information in accordance with this Privacy Policy.

1 WHAT DOES THIS PRIVACY POLICY COVER?

This Privacy Policy covers our collection, use and disclosure of information about identifiable individuals ("**Personal Information**"), who use the Services ("**Users**").

2 COLLECTION AND USE OF PERSONAL INFORMATION

2.1 User Information

In order to use certain Services, Users must have a valid TBV App account to log into the Services ("**Account**").

When you register for an Account using email registration, TBV collects your name, cell phone number, email address, and location,. This Personal Information is used for the following purposes:

- Verifying the User's identity;
- Allowing Users to create a profile; and
- Contacting Users about relevant information related to the Services.

2.2 Transaction History

When Users use the Services, TBV collects information about the User's activity and transaction history. In particular, TBV keeps track of the device used to log in, the time of day, the time spent on the app, location, actions completed and IP address, and you may also be asked to provide other personal data such as age, location, gender, personal history, etc. ("Personal Information"). This Personal Information is used for the following purposes:

- To allow Users to keep track of their history;
- To store and report activities tracked by the Services;
- To support research and efficacy of the Services;
- For TBV's accounting records;
- To enhance and customize User experience, including showing Users relevant contents; and
- To monitor compliance with our Terms of Service.

AMERICAN OVERSIGHT

2.3 Marketing Communications

TBV will use the contact information provided to notify Users of important information that is relevant to the Services and for marketing communications if the User chooses to opt in. Despite your indicated e-mail preferences, we may send you relevant notices where permitted by law.

2.4 Usage Data

TBV may also collect certain information from Users of the Website and Services, such as Internet addresses, time spent logged into the Services and other usage data ("**Usage Data**"). This Usage Data is logged to help diagnose technical problems, and to administer our Website and Services in order to constantly improve the quality of the Website and Services.

2.5 Cookies

TBV uses tracking technologies, such as cookies, beacons, scripts and tags, are used by us and our third-party partners. These technologies are used in analyzing trends, administering the Services, tracking Users' movements around the Services, gathering demographic information about our User base as a whole and collecting information about your browsing activities over time and across different websites following your use of the Services. We may receive reports based on the use of these technologies by these companies on an individual and aggregated basis. Various browsers may offer their own management tools for removing these types of tracking technologies.

Standing alone, cookies do not identify you personally. They merely recognize your browser. Cookies come in two flavors: session and persistent-based. Session cookies exist only during an online session. They disappear from your computer when you close your browser software or turn off your computer. Persistent cookies remain on your computer after you've closed your browser or turned off your computer.

TBV uses session cookies containing encrypted information to allow the system to uniquely identify you while you are logged in. This information allows TBV to process online transactions and requests. Session cookies help us make sure you are who you say you are after you've logged in and are required in order to use the Service.

TBV uses persistent cookies that only TBV can read and use, to identify the fact that you are a TBV User. We are especially careful about the security and confidentiality of the information stored in persistent cookies. Users who disable their web browser's ability to accept cookies will be able to browse our Website but may not be able to use all features of our Services.

3 SECURITY AND STORAGE

3.1 Storage Location

TBV stores its data, including Personal Information, on Amazon Web Services servers located in the United States. By submitting any Personal Information or using the Services, you agree to this transfer, storing or processing of your Personal Information in the United States. You acknowledge and agree that your Personal Information may be accessible to law enforcement and governmental agencies in those countries under lawful access regimes or court order.

AMERICAN OVERSIGHT

3.2 Security

The security of your Personal Information is important to us. We use commercially reasonable efforts to store and maintain your Personal Information in a secure environment. We take technical, contractual, administrative, and physical security steps designed to protect Personal Information that you provide to us. We have implemented procedures designed to limit the dissemination of your Personal Information to only such designated staff as are reasonably necessary to carry out the stated purposes we have communicated to you. However, no Internet or email transmission is ever fully secure or error free. In particular, email sent to or from the Services may not be secure. Therefore, you should take special care in deciding what information you send to us via email. Please keep this in mind when disclosing any Personal Information to us via the Internet.

You are also responsible for helping to protect the security of your Personal Information. For instance, never give out your email account information or password for the Services to third parties.

4 DISCLOSURE OF PERSONAL INFORMATION WITH THIRD PARTIES

4.1 Disclosure to our Service Providers

We may from time to time employ or engage other companies and people to perform tasks on our behalf and need to share Personal Information with them to provide the Services. Unless we tell you differently, we only provide such third parties with the Personal Information that they need to perform their specific function. This includes third party companies and individuals employed or engaged by us to facilitate our products and services, including the provision of maintenance services, database management, customer relationship management, web analytics and general improvement of the Services, and businesses who engage our Services (to the extent provided for above). In particular, TBV uses the following service providers: Google Cloud Platform, Amazon AWS, Stripe and Google Analytics.

4.2 Business Transfers

If we (or any of our assets) are acquired, or if we go out of business, enter bankruptcy, or go through some other change of control, Personal Information may be made available or otherwise transferred to the new controlling entity, where permitted under applicable law.

4.3 With Your Consent

If we need to use or disclose any Personal Information in a way not identified in this Privacy Policy, we will notify you and/or obtain your express consent as required under applicable privacy laws.

4.4 Affiliates

We may also share your Personal Information with our subsidiaries or other affiliated companies for purposes consistent with this Privacy Policy.

4.5 As required by law

We may disclose your Personal Information to third parties without your consent if we have reason to believe that disclosing this information is necessary to identify, contact or bring legal action against

AMERICAN OVERSIGHT

someone who may be causing injury to or interference with (either intentionally or unintentionally) our rights or property, other Users, or anyone else (including the rights or property of anyone else) that could be harmed by such activities. Further, we may disclose Personal Information when we believe in good faith that such disclosure is required by and in accordance with the law. We also reserve the right to access, read, preserve, and disclose any information as we reasonably believe is necessary to:

- satisfy any applicable law, regulation, legal process or governmental request;
- enforce our contracts or user agreement (Terms of Service), including investigation of potential violations hereof; and
- detect, prevent, or otherwise address fraud, security or technical issues.

5 RETENTION

We will keep your Personal Information for as long as it remains necessary for the identified purpose or as required by law, which may extend beyond the termination of our relationship with you. We may retain certain data as necessary to prevent fraud or future abuse, or for legitimate business purposes, such as analysis of aggregated, non-personally-identifiable data, account recovery, or if required by law. All retained Personal Information will remain subject to the terms of this Privacy Policy.

6 ACCESS, CORRECTION AND ACCURACY

You have the right to access the Personal Information we hold about you in order to verify the Personal Information we have collected in respect to you and to have a general account of our uses of that information. Upon receipt of your written request, we will provide you with a copy of your Personal Information, although in certain limited circumstances, and as permitted under law, we may not be able to make all relevant information available to you, such as where that information also pertains to another User. In such circumstances we will provide reasons for the denial to you upon request. We will endeavor to deal with all requests for access and modifications in a timely manner.

We will make every reasonable effort to keep your Personal Information accurate and up to date, and we will provide you with mechanisms to update, correct, delete or add to your Personal Information as appropriate. As appropriate, this amended Personal Information will be transmitted to those parties to which we are permitted to disclose your information. Having accurate Personal Information about you enables us to give you the best possible service.

7 CHANGES TO THIS PRIVACY POLICY

We may amend this Privacy Policy from time to time. Use of Personal Information we collect is subject to the Privacy Policy in effect at the time such information is collected, used or disclosed. If we make material changes or changes in the way we use Personal Information, we will notify you by posting an announcement on our Website or sending you an email prior to the change becoming effective. You are bound by any changes to the Privacy Policy when you use the Website or Services after such changes have been first posted.

8 CHILDREN

TBV does not knowingly collect Personal Information from children under the age of 13. If you are under the age of 13, please do not submit any Personal Information through or use the Services. We encourage parents and legal guardians to monitor their children's Internet usage and to help enforce

AMERICAN OVERSIGHT

our Privacy Policy by instructing their children never to provide Personal Information through Services without their permission. If you have reason to believe that a child under the age of 13 has provided Personal Information to TBV through the Services, please contact us, and we will endeavor to delete that information from our databases.

9 LINKS TO OTHER WEBSITES AND SERVICES

This Privacy Policy applies only to the Services. The Services may contain links to other web sites or services not operated or controlled by TBV (the "Third Party Services"). The policies and procedures we described here do not apply to the Third Party Services. The links from the Services do not imply that we endorse or have reviewed the Third Party Services. We suggest contacting those third parties directly for information on their privacy policies.

10 EXCLUSIONS

This Privacy Policy does not apply to any Personal Information collected by TBV other than Personal Information collected through the Services. This Privacy Policy shall not apply to any unsolicited information you provide to TBV through the Services or through any other means. This includes, but is not limited to, information posted to any public areas of the Services, such as forums, any ideas for new products or modifications to existing products, and other unsolicited submissions (collectively, "Unsolicited Information"). All Unsolicited Information shall be deemed to be non-confidential and TBV shall be free to reproduce, use, disclose, and distribute such Unsolicited Information to others without limitation or attribution.

11 ADDITIONAL INFORMATION

You can help by keeping us informed of any changes such as a change of address or telephone number. If you would like to access your Personal Information, if you have any questions, comments or suggestions about our Privacy Policy or practice, or if you find any errors in our Personal Information about you, please contact us at: support@tbvme.com

Subject: Uniting Business for Good in 2020 Will Keep Momentum Going

2020 FLORIDA ECONOMIC OUTLOOK

UNITING BUSINESS FOR GOOD IN 2020 WILL KEEP THE MOMENTUM GOING

Florida Expected to Continue Outpacing the Nation in Job Creation

Uniting business for good in 2020 will keep the momentum going, and help ensure Florida continues to outpace the nation in job creation, according to the Florida Chamber Foundation's 2020 Florida Economic Outlook.

Florida's economic outlook is positive, according to Chamber Foundation Chief Economist **Dr. Jerry Parrish**, and with rising consumer sentiment, he expects Florida to create 200,000 jobs this year. Dr. Parrish also projects Florida will see 900 net new people moving to Florida each day throughout 2020 – a number that had dropped to 640 net new residents per day in 2019.

In further good news, Florida's probability for a recession continues to decline – down to 21.2 percent on **TheFloridaScorecard.org**.

"Florida has 284,800 open jobs, and 323,000 people looking for jobs. Those 284,800 open jobs are more than a year's supply. As we work to continue to get Floridians the skills they need, keep in mind that getting those jobs filled would have a monster economic impact on our state," Parrish explained.

But, as Florida Chamber President and CEO **Mark Wilson** explained, there are a few clouds on the horizon that pose threats to Florida's economy, including $15 an hour mandated wages, lawsuit abuse, the Florida-only business rent tax, and legislative signaling to defund tourism marketing efforts.

The Florida Chamber is the only state chamber in the country with a full-time economist, and the research and data produced is well-respected among state leaders.

What Others are Saying

"Understanding the underpinnings of Florida's economy is vital to projecting a state's future success. That's why we look forward to the economic data produced by the Florida Chamber; it's a vital resource in our decision-making process,' said **Rick Harper**, Ph.D., Economic Advisory, **Triumph Gulf Coast**.

"The Florida Chamber is the only state chamber in the country that has a full-time Chief Economist on staff. That's because they put high value on providing members with the best economic resources to help grow Florida's economy. At Bank of America, we're pleased to call the Florida Chamber partners in securing Florida's future," said **Doug Davidson**, Market Executive, Global Commercial Banking, **Bank of America.**

"The Florida Chamber and Chief Economist Dr. Jerry Parrish are hands down among the very best at forecasting how Florida's economy will perform. When the Florida Chamber speaks, people listen," said **Chris Westley**, Ph.D., Interim Dean – Lutgert School of Business, **Florida Gulf Coast University**.

Miss the Presentation?

Don't worry, we've got you covered. Visit **2020 Florida Economic Outlook** to:

- Watch Dr. Parrish's presentation,
- Download his report, and
- Sign up to receive the Florida Chamber's 2020 Business Agenda.

AMERICAN OVERSIGHT

Tips for Effective Testimony

Thursday, Jan. 16, 2020 | 1 p.m. ET/ Noon CT/ 11 a.m. MT/ 10 a.m. PT

Presenting information to legislators is one of the most important tasks legislative staff perform. The information staff present can help shape policy discussions, and influence the decisions of lawmakers. Testifying before a committee, or presenting to a group of legislators can be stressful and challenging for legislative staff. As states prepare for their 2020 legislative sessions, Jonathan Ball shares some guidance and advice for conveying information to legislators.

Speaker | Jonathan Ball is Utah's Legislative Fiscal Analyst, leading a team of non-partisan public finance experts who forecast state revenue, recommend budgets, and estimate the cost of proposed legislation.

Ball has been in public service for over twenty years, serving both the executive and legislative branches of government. Ball has served on NCSL's Executive Committee and been president of the National Association of Legislative Fiscal Offices (NALFO) and the Western States Legislative Fiscal Officers Association (WSLFOA). In 2016, NCSL awarded Ball the Steven D. Gold Award for his committment to improving the legislative institution and state budgeting practices around the country.

2019 Trends in Occupational Licensing

Friday, Jan. 17, 2020 | 1 p.m. ET/ Noon CT/ 11 a.m. MT/ 10 a.m. PT

This webinar will include an overview of 2019 trends in occupational licensing legislation, and a brief overview of NCSL's own research on the topic, as well as a demonstration on how to use our National Occupational Licensing Database.

We will be looking at trends in our four key populations: ex-offenders, immigrants with work authorization, military families, and dislocated workers. We will also be recapping general trends in the supervision of boards and regulations.

Student-Centered Learning: A Review of the Research

Friday, Jan. 24, 2020 | 2 p.m. ET/ 1 p.m. CT/ Noon MT/ 11 a.m. PT

The future of learning and innovative policy options that enable student-centered learning to thrive were at the center of a national dialogue among state legislators participating in the NCSL Student-Centered Learning Commission, a bipartisan group of state legislators and legislative staff that studied personalized and student-centered learning environments and policy options from 2017 to 2019. The commission learned about policy

AMERICAN OVERSIGHT

options including competency-based learning and mastery-based progressions, personalized learning, and expanded learning opportunities, along with new approaches to classroom and school building design and staffing.

During this one-hour webinar, legislators and legislative staff will hear from Eve Goldberg, Director of Research for the Nellie Mae Education Foundation, about the body of research that supports student-centered learning. What are lessons learned, to date, about school environments that enable student-centered learning? How might the research inform state policy going forward?

This webinar is the sixth in a series sponsored by the NCSL Student-Centered Learning Commission, with generous support from the Nellie Mae Education Foundation. Other webinars include An Overview of K-12 Competency-Based Education, ESSA and Personalized Learning, Performance-based Assessments for Teaching and Learning, Support for Teachers and Leaders in Student-Centered Learning Environments, and Student-Centered Learning for All Learners, all available for viewing at any time.

Webinar This Week

Dealing With Difficulty:
Converting Stakeholders and Colleagues into Allies and Partners

Thursday, Dec. 5, 2019 2 p.m. ET/ 1 p.m. CT/ Noon MT/ 11 a.m. PT

Our work inside legislatures invariably brings conflict—whether it be within our own offices, with other legislators or agencies, or with and among external stakeholders.

Even if the conflict itself is inevitable, our approach to mitigating, managing, and resolving it need not consume so much time and energy. **In this fast-paced and interactive webinar,** Larry Schooler will use his background and expertise in mediation and conflict management to guide you through a new approach to conflict resolution, both for your internal team and with competing public interests. You will learn how best to analyze conflict and how to tailor your approach, as well as how to create conditions for less conflict or conflict with less severity.

Larry Schooler is a mediator, facilitator and public engagement consultant for outside clients through Public Participation Partners and as a senior fellow for the National Civic League and the Annette Strauss Institute for Civic Life at the University of Texas. Schooler holds a bachelor's degree in history, a master's degree in conflict analysis and resolution and is pursuing a doctorate in the same field. He is the author of the manual "The 'Public' in Public Policy: Keys to a Successful Community Meeting" and a forthcoming book on the first Truth and Reconciliation Commission in the United States.

Dive into our resources with three new webinars: Paid Family and Medical Leave Policies in the States, Countdown to Real ID: Next Steps for States? and Environmental Concerns in Child Care Settings. Reserve your spot today!

Paid Family and Medical Leave Policies in the States

Thursday, Feb. 6, 2020 | 2 p.m. ET/ 1 p.m. CT/ Noon MT/ 11 a.m. PT

Research has found that caring and nurturing relationships between infants and adults support healthy development long into the future. While polls show overwhelming bipartisan support for paid family and medical leave, the United States is the only developed country without a national paid leave policy. Some states are responding to the need for parents to bond with their babies by implementing their own policies. Register for this 60-minute webinar to learn what actions states are taking to realize the health, educational and financial benefits of paid family and medical leave.

Speakers | Jackson Brainerd, policy specialist, NCSL and Jamie Colvard, director of state policy, Zero to Three
Moderators | Alison May and Jennifer Palmer, policy associates, NCSL

Countdown to Real ID: Next Steps for States?

Thursday, Feb. 13, 2020 | 2 p.m. ET/ 1 p.m. CT/ Noon MT/ 11 a.m. PT

The Department of Homeland Security will begin full enforcement of Real ID at commercial airports in less than 10 months. This will require all members of the public to have their own Real ID to pass through security. Join NCSL and the DHS for an in-depth discussion on what's next for the department and what states should know as they head into the new year and new legislative session.

Speaker | Steve Yonkers, Department of Homeland Security
Moderator | Ben Husch, NCSL

AMERICAN OVERSIGHT

Environmental Concerns in Child Care Settings

Friday, March 20, 2020 | 2 p.m. ET/ 1 p.m. CT/ Noon MT/ 11 a.m. PT

For young children in the United States, almost half (40%) spend their days in licensed child care facilities. States have enacted laws and policies to limit environmental hazards and promote better health and safety in child care settings. In 13 states, facilities are required to perform environmental tests for issues such as lead-based paint, lead in water, asbestos and radon. More than 40 states require fire, health or building code inspections.

Speakers:

- **Jennifer A. Freed**, technical project officer, Agency for Toxic Substances and Disease Registry (ATSDR). ATSDR, based in Atlanta, is a federal public health agency of the U.S. Department of Health and Human Services. ATSDR protects communities from harmful health effects related to exposure to natural and man-made hazardous substances.
- **Tarah Somers**, registered nurse, MSN/MPH, director region 1, Agency for Toxic Substances and Disease Registry (ATSDR)

Moderator: Doug Farquhar, director of environmental health, NCSL

Subject: Update

Hi there - just wanted to reach out and see if there was any thought on conference for the HOPE appropriation we are supporting?! I know it made it through a committee in House but not their main budget which was expected - at least by me :-)

Anyway - if we can provide any information to you - or do anything on this end (wish I was there more but won't be up until week of 24th) just let me know. I am happy to reach out to some folks I have contact with if Sen. Gruters is going to pursue it!

Much appreciated!

Colleen

Subject: Urgent - Florida Senators Should Endorse Racial Equality, Not SPLC Hate Labels!

Floridians for Immigration Enforcement

www.flimen.org

Florida Senators Should Endorse Racial Equality, Not SPLC Hate Labels!

Republican leadership, Senate President Galvano and resolutuion sponsor Senator Simpson, are rushing a dangerous resolution through the Senate. Masses of calls and emails are needed before 4PM, Tuesday, January 28th, 2020.

It won't take but 10 minutes to call President Galvano, Senator Simpson and five Judiciary Committee members.
Just leave messages with your name and a statement
"I oppose the racist White Nationalist resolution CS/SR 214 because (one talking point)."
It is easy to send emails messages as the message is pre-loaded with subject and body, just add your name.

While resolutions do not carry the same importance as legislation, CS/SR 214, a resolution denouncing 'White Nationalists' is naïve, inaccurate, misguided, dangerous, without merit and divisive. FLIMEN requests every concerned citizen take action against this resolution which is substantially based on information from the highly discredited and extremely polarizing Southern Poverty Law Center (SPLC). See SPLC Exposed.

While Floridians for Immigration Enforcement (FLIMEN) *agrees* with substantial parts of the resolution FLIMEN suggests one of the following changes;

1. A total revision focusing on The American Principle of Racial Equality, as proposed in this letter.
2. Striking of the ambiguous, dangerous, liberal, weaponized terms 'white nationalists, white supremacists,' or better yet.
3. Table the divisive resolution and move onto legislation that has real benefits to Floridians.

FLIMEN has virtually no media coverage so it is mainly up to concerned citizens who receive this message to take action. Please make the calls below and FORWARD THIS MESSAGE TO YOUR LISTS, especially groups.

Talking Points;

- Racist – This resolution is flat-out racist. Only the white race was targeted. What about determining wrong doings based upon American Rule of Law and not immutable characteristics?
- Racial Equality The resolution should affirm support for the American Principle of Racial Equality.
- Inaccurate – Rather than some empirical data proving white violence, the biased and incompetent Bill Analysis is basically a rendition of SPLC's infamous hate labels.
- Liberal Narrative Weaponization - The Alinsky-style name-calling used by liberals will cause many innocent citizens to be swept up by *the wide, wide net of 'white nationalists'*

Call to Senate President

- Senate President Bill Galvano (R), Email, (850) 487-5021

Call to Resolution Sponsor

- Senator Wilton Simpson (R), Email, (850) 487-5010

AMERICAN OVERSIGHT

Calls to Judiciary

- Senator David Simmons (R) Chair, Email, (850) 487-5009
- Senator Dennis Baxley (R), Email, (850) 487-5012
- Senator Travis Hutson (R), Email, (850) 487-5007
- Senator Kelli Stargel (R), Email, (850) 487-5022

Optional calls to Infrastruture and Security committee that passed the resolution favorably

- Senator Tom Lee (R) Chair, Email, (850) 487-5020
- Senator Keith Perry (R), Vice Chair, Email, (850) 487-5008
- Senator Aaron Bean (R), Email, (850) 487-5004
- Senator Ed Hooper (R), Email, (850) 487-5016
- Senator Travis Hutson (R), Email, 850) 487-5007

Attend Judiciary Meeting

MEETING DATE: Tuesday, January 28, 2020
TIME: 4:00—6:00 p.m.
PLACE: Toni Jennings Committee Room, 110 Senate Building, Tallahassee, FL
EXPANDED AGENDA
Watch Judiciary Meeting Live

Racist

Can you find any other race targeted in the SPLC-centric Bill Analysis?

Racial Equality

Adopting the American principle of Racial Equality provides an opportunity to redirect the narrative and would provide a more universally acceptable goal.

FLIMEN has provided a draft resolution based on the American Principle of Racial Equality in this letter.

Inaccurate

The Bill Analysis states;

> "Florida has been the site of several mass shootings that include Pulse Nightclub in Orlando, Marjory Stoneman Douglas High School in Parkland, Fort Lauderdale-Hollywood International Airport, Jacksonville Landing, as well as a SunTrust Bank in Sebring.1 Many of these acts of targeted mass violence appear to have been motivated by violent extremism based on a variety of supremacy philosophies."

The very next paragraph is about 'white nationalists.' It is inaccurate and simplistic to equate these atrocities exclusively to 'white nationalists.'

The left never fails to sensationalize tragedies like these, even if there is no connection to 'White Nationalism and White Supremacy' if it benefits their narrative.

Liberal Narrative Weaponization

The major problem with the term 'White Nationalist' is that it is the Democrats' way of redefining terminology to smear Republicans or anyone who opposes their views, often those who support immigration enforcement. FLIMEN has been the target of liberal Democrat smear campaigns for a long time, so we are a bit of an expert in this area.

SPLC is the main driver of much of the ongoing "Hate" and "Racist" rhetoric. SPLC is an antagonistic opponent to most every value for which Republicans stand, especially immigration enforcement. As an example, the SPLC instigated the boycott of Mark Krikorian of Center for Immigration Studies during a committee meeting last year. SPLC, was one of the parties involved in the federal lawsuit against the Anti-Sanctuary bill SB 168. Judge Bloom upheld all but a minor aspect of the bill. Yet Senate Republicans made SPLC central to this resolution!

AMERICAN OVERSIGHT

SPLC calls any organization that supports immigration enforcement a “Hate Group, Racist, White Supremist, or Neo Nazi.” Their definition of ‘White Nationalist’ is wrong and ridiculously broad per their web page.

The wide, wide net caused by the ambiguous definition of ‘white nationalist’ will certainly be used against Republican by Democrats in the next critical 2020 election and thereafter.

Remember, Democrats have already changed the national narrative by overusing the word ‘racist’ as well as using the term 'undocumented immigrant' in place of the actual legal term of “illegal alien!” Democrats are now falsely claiming that anyone using the term “illegal alien” should be accused of hate speech. With the current language in the proposed revision, Democrats will achieve equating people who support the rule of law and immigration enforcement in any form to be 'White Nationalists or White Supremacists'.

We simply must not continue to allow the Democrats to define and control the narrative and the rhetoric!

Unbelievable but the very biased Bill Analysis even references this page below THAT CLEARLY SHOWS LIBERALS EQUATE NEO-NAZIS to ‘white nationalists.’ This is OUTRAGEOUS!

SPLC Defines White Nationalist
https://www.splcenter.org/fighting-hate/extremist-files/ideology/white-nationalist

---

Their definition obviously equates “White Nationalist” to “neo-Nazi”!

So, what is a "White Nationalist?" To many it means a Caucasian who supports the concept of America First. It should be noted that America's Founding Fathers were White, and they were decidedly Nationalists. Much of the deep difference between Democrats and Republicans is a different view of globalism vs. nationalism. President Trump has often expressed the concept of taking care of USA first, along with a skepticism on the ‘New World Order’ which is typically embraced by the Democrats.

“White Supremacy” means racial superiority which we despise.

Neo-Nazi has yet a different meaning, as an advocate of fascism, which we despise.

The common use liberal definition of “White Nationalism” is conveniently shown in an OP-ED by the Palm Beach (Com)Post.
https://www.palmbeachpost.com/opinion/20190331/editorial-florida-lawmakers-must-soundly-denounce-white-nationalism-shut-down-sanctuary-cities-bill

---

There you have it very clearly; Democrats consider Republicans who support immigration law enforcement “white nationalism.”

Using simple logic with these examples;

Republicans supporting immigration enforcement=
White Nationalists =
White Supremacists =
Neo-Nazis

Links clearly showing liberals constantly and viciously branding Republicans with SPLC labels;

Subject: Urgent Response HB1011 & SB1128 Short-Term Rentals
Attachment(s): "Letter to Legislature Signed 1.24.2020.pdf"

To All Honorable State Senators and State Representatives,

I am contacting you today to urge you to **OPPOSE HB 1011 and SB 1128 as currently drafted** . At a minimum, meaningful registration and data reporting by short-term rental operators and platforms should be required, as it is for every other commercial enterprise in the state. Not only does fail to do that but these bills nullify the few sensible rules that are protecting communities from being overrun by illegal hotels.
Please HB 1011 and SB 1128 and protect our state's residential neighborhoods.

Sincerely, a concerned Clearview Oaks Condominium Association's Board of Directors

Respectfully,

Mitch Lucas LCAM

AMERICAN OVERSIGHT

Clearview Oaks Condominiums Association, Inc.
4140 55th St. N. Kenneth City, FL 33709

January 23, 2020

All Florida Senators and Representatives
The Capital
Tallahassee, FL 32399-1300

Dear Senators and Representatives:

The Board of Directors of the Clearview Oaks Condominium Association, Inc. is writing you today with very strong concerns on the upcoming Bills HB 1011 and SB 1128 as they are currently drafted that would cancel existing short-term rental rules in the state and does not provide for any meaningful regulation of vacation rentals in the future. And its negative impact on communities and associations across the state.

As one of the first condominium associations in the United States and the first organized condominium association in the state of Florida we have the unique distinction of also having the oldest Condominium buildings in the state of Florida and with that the oldest infrastructure that requires continuous maintenance. It is with that in mind the Association prohibits all rentals of any kind, long or short term in our community. With the advent of the internet and Air BnB it is a never ending struggle to keep Unit Owner's from renting their units out when they are not in residence.

State regulations only benefit digital platforms and imposing statewide rental standards is unfair to local community associations who struggle on a daily basis to keep short-term rentals out of their communities and feel that at the very least we should have a say in how they are regulated. Polls show that nearly three-quarters of state voters believe that local city and county commissioners should be the ultimate authority on short-term rental regulations. The Florida League of Cities say these bills will preempt the actions of the state's cities and are yet another example of Tallahassee violating the concept of home -rule

It is for these reasons and more that we urge you to vote no on the above referenced Bills and keep the regulation of short-term rentals in the hands of local cities and communities as it should be.

Thanks all of you for your service to our state and please let me know your thoughts

You can contact me at 727-329-8071 or email mlucas@mgmt-assoc.com.

Sincerely,

Mitch Lucas, LCAM
Property Manager, Clearview Oaks Condominiums

Subject: Vote no on SB 1128 Vacation Rentals

Dear State Senators,

Please use your vote wisely on this matter and vote "NO" to this amendment on Tuesday. I am sure you have had a ton of emails and letters asking you the same and stating multiple reasons relating to the nature of short term rentals and the negative affects they have on a community, I will not repeat these here.

Our perspective is relating to the uniqueness of the island and city that we have chosen as our home. Sanibel Island is unique in its character and nature and as you know, when it was incorporated as a City, our goal was to help protect that very special character. In fact so much so that when we moved our family home to the Island, I volunteered and was selected to sit on our Planning Commission. As I explained to the mayor during my interview, I feel so motivated to protect this jewel in the Gulf that I would be happy to commit my working efforts to this cause. It is now this same desire to protect our beautiful and unique island that motivates me to implore you to vote "NO" on Tuesday.

We are full time residents on Sanibel and welcome the thousands of visitors that flock over the causeway during the year, many stay in the inns and hotels and many others rent residences for periods of anything from 1 to 5 months and are a valued and welcome addition to our community. Indeed, many of our best friends are snowbirds and l, just like their feathered namesakes, we look forward to their return each year. What we don't need is more weekly and shorter term rentals, this is a headache for traffic and noise and threatens the security of neighborhoods with the frequent turnover in traffic. Any renter less than a month in a residential property increases the risk and uncertainty for my family and other residents without a proper registration process and restriction on the length of stay. We are all working hard with the council to introduce a short term rental registration process to help us control this growing issue, please vote "NO" to allow us to continue to protect our community.

Thank you for your service!

Yours respectfully
Paul and Catherine Nichols
Sanibel Planning Commission and year round residents

Regards
Paul

Subject: What To Know Before You Go: The 2019 Future of Florida Forum

What To Know Before You Go

Thank you for registering to attend the Florida Chamber Foundation's 2019 Future of Florida Forum, **October 28-29** in Orlando. We look forward to interactive discussions on how Florida's businesses can help pave the way toward a brighter future for all Floridians.

On Oct. 28, join us to kick off our conversation on Florida's long-term future. Discussions will examine where Florida stands today and how we will reach our goals set in the *Florida 2030 Blueprint*. The day will end with our Welcome Reception, followed by the Women's Hall of Fame Induction Dinner. On Oct. 29, we continue the discussion with breakfast and presentations starting at 7:30 a.m.

The complete schedule is as follows:

Monday, October 28	**Location**
8:00 a.m. Future of Florida Forum Registration Opens	Pre-Function Area
11:00 a.m. Future of Florida Forum Opening Session & Luncheon	Grand Cypress DEF
5:30 p.m. Welcome Reception	Pre-Function Area
7:00 p.m. Women's Hall of Fame Induction Dinner _	Grand Cypress DEF
Tuesday, October 29	
7:00 a.m. Future of Florida Forum Registration Opens	Pre-Function Area
7:30 a.m. Breakfast, General Session, Florida Chamber of Commerce Board of Governor's Annual Meeting and Luncheon	Grand Cypress DEF

AMERICAN OVERSIGHT

Below are a few things to know before you go:

VENUE

Hyatt Regency Grand Cypress
One Grand Cypress Blvd
Orlando, FL 32836
407-239-1234

- We are pleased to offer Future of Florida Forum Attendees a discount code provided by our sponsor, Lyft. Use the code **FUTUREOFFL19** to receive 25% off two Lyft rides. Click here for more details.
- The hotel's self-parking lot is currently blocked with construction. Complimentary self-parking is located in Lot 7 with shuttles running 24 hours a day. The hotel recommends dropping off luggage at the front entrance/lobby before parking.
- Or, valet parking is $22 per day.
- For a map and more information, click here.

Subject: You're Invited to the Florida Family Policy Council Prayer Breakfast
Attachment(s): "Pro-Family Days 2020 flier final (1).pdf"

Senators,

We would like to reach out to invite you to the Florida Family Policy Council's Annual Dinner and Legislative Prayer Breakfast this coming Monday night, January 27th, and Tuesday Morning, January 28th.

We would be honored to have you join us for this time of fellowship and prayer as we pray for the legislation you will be working on, and the tough decisions you will be making in the coming weeks. I have attached our flyer which tells you about our event.

If you would like to participate in our events the cost is as follows:

- Dinner will begin at 6:00pm Monday January 28th at the Donald L Tucker Civic Center. The cost is $50.
- The Legislative Prayer Breakfast will begin at 7:30am on Tuesday, January 28th and is $35.

If you would like to attend you may register on line at https://ffpc.regfox.com/prolifeprofamilydays or just reply to this email and I can get you registered.

If you would simply like to attend the prayer breakfast so that you can join us in prayer, but not have a plate provided or participate in the whole event, please let me know and I will make note of that as well.

Thank you so much for all that you do for our great state. Please let me know if you have any questions.

Have a blessed day,

Amanda Palmer

Rob Bradley @Rob_Bradley
So proud that @FLCaseyDeSantis visited our region today to learn about #ProjectSaveLives! Her incredible advocacy for these issues is already making a huge difference and saving lives-future is even brighter! We've invested in this program for 2 years at state level. More to do!

George Gainer @SenatorGainer
Off to a great start with the unanimous passage of our bill SB 936 which will better serve our state's veterans who are members or beneficiaries of the Florida Retirement System. This bill will further our goal of being the most veteran friendly state in the US. #District2

Debbie Mayfield @debbie_mayfield
Tomorrow, January 14th marks the start of the 2020 Legislative Session. The next 60 days will be extremely busy as we prepare the state budget and act on issues impacting all Floridians. Learn more about the upcoming Session in this week's #MayfieldMinute. conta.cc/2Nkp2cw

FL Senate Majority @FLSenateGOP
SB 1088 by @SenMannyDiazJr passed the Senate Education Committee. The Senate Republican Caucus values our teachers and is proud to support this legislation which aims to increase teacher salaries.

The Committee will also meet to consider the following bills: SB 640 by Senator Harrell—Indian River Lagoon State Matching Grant Program, SB 648 by Senator Berman—Sargassum Seaweed Matching Grant Program, SB 724 by Senator Albritton—Local Government Recycling Programs, and SB 638 by Senator Montford—Apalachicola Environmental Stewardship Act.

Chair Baxley and the Ethics and Elections Committee will meet for Senate Confirmation Hearings for the following appointees: Board of Trustees of Florida SouthWestern State College Appointee Ciccarello, David, Board of Trustees of Florida State College at Jacksonville Appointee Brown, Jennifer, Board of Trustees of Miami-Dade College Appointee Leon, Benjamin III and Washington, T. Nicole, Board of Trustees of St. Johns River State College Appointee Conrad, Jan, Governor's Mansion Commission Appointee Stoch, Linda, Board of Medicine Appointee Gupta, Shailesh, and Jacksonville Transportation Authority Appointee Buckland, Deborah H. The Committee will also meet to consider SJR 176 by Senator Rodriguez—Single-subject Limitation for Constitution Revision Commission Proposals and SJR 396 by Senator Rodriguez—Single-subject Limitation for Taxation and Budget Reform Commission.

Chair Lee and the Infrastructure and Security Committee will meet to consider the following bills: SPB 7016—Statewide Office of Resiliency, SB 178 by Senator Rodriguez—Public Financing of Construction Projects, SPB 7018—Electric Vehicle Charging Station Infrastructure, SPB 7020—Emergency Staging Areas, and SPB 7022—OGSR/E-mail Addresses/Department of Highway Safety and Motor Vehicles.

Subject: 2020 Session

Your Honor,
This is a fact-based appeal to your common sense as your new session begins. I give you my opinions, analysis, and some *new* options for you to consider. I have 35+ years in both Florida Law Enforcement and US Dept. of Homeland Security to back this up.

The last time I checked a couple weeks ago, there are 41 gun related measures 'On the table' As the Senate President has stated. 38 of them are a mix of bans, restrictions, controls and a hodgepodge of Draconian, Punitive, and UnConstitutional, Socialist, even Communistic ravings. I ask you;

Is Florida going to be run by the Gestapo?

ONE, and only one, of the proposed bills, is the ONLY bill *GUARANTEED to SAVE LIVES*; **HB 273**. Nothing else proposed does anything except increase RISK and TAKE AWAY from LAW ABIDING CITIZENS.

You Wonder Why We-The-People Are Upset?

Let's take a look at these 'Common Sense' Gun Control Ideas:

-***Gun Bans, Parts Bans Magazine Bans, Ammunition Bans and every kind of Restriction in-between; Any of these gun-bans on the docket this session will effectively ban 99% of all long guns and shotguns, and most pistols. If you doubt me, please read them. If 'they' tell you it's only about AR15s and AK47s, it's a lie. The rest of the 37 gun-control bills are the most Socialistic, even Communistic attempts to make it nearly impossible for a law-abiding citizens to purchase or posses a firearm, and Does NOTHING about saving lives from violence, or preventing bad people from getting guns.***

Once and for all; There is no legal definition of 'Assault Weapon'; the so-called "Weapons of War" they continually jabber about are not the same firearms that they are trying to ban. *Civilians are not allowed to have 'Weapons of War".* The last of those were banned in 1986. **It is just that simple.** Please explain to me how an ordinary rifle, 'dressed up' to look like a 'military style' gun; How is that rifle now more deadly than before the dress was put on it? It isn't.
Are you going to tell the Law-Abiding 13.5 million voters and over 2 million CCW holders, and I don't know how many millions lawful gun-owners, who have acted lawfully and responsibly for their entire lives, what firearms and parts they Cannot Own?

EVEN THOUGH THEY HAVE DONE NOTHING WRONG?

The firearms 'they' want to ban are commonly owned and used in all sorts of hunting, hobbies and sports ***and have comprised not even 1% of any violence in question.***
Their 'studies', 'research', 'results' and 'conclusions' are all documented as politically-funded and designed solely to **take away rights'**.

Their 'facts' are the same stuff you find in a cow pasture.

The goal of these people and groups is loud and clear, even publicly declaring,
they are going to *'take guns away from Law Abiding Citizens'.*

Banning any firearms or firearms, parts, accessories or ammunition *will not* stop anyone from committing violence, murder, or mass murder. Not one single life will be saved by making more restrictions on owning guns, or by taking any firearms away from Law Abiding Citizens. *Any ban on these things however, will leave millions defenseless, and make Felons of millions more.* Read on Please;
-Gun-Free-Zones; These have to go away, This is an invite to a "shoot-the-fish-in-the-barrel" contest for these evil shooters. This not only *DOES NOT* saves lives, it *INCREASES the RISK* of that location becoming a target for the nut-jobs. I still cannot believe that these zones even exist, and that rational intelligent lawmakers still believe in them.

^SAVE LIVES. Get Rid of GUN FREE ZONES.^

-Emergency Risk Protection Orders; the so-called Red Flag Laws. ***Everyone acknowledges that the intentions were honorable*** But, ERPO's contain no due process for the recipient of the order, **at all.** Yes, I know what the Court said. Numerous Constitutional Rights **are** violated. There is no real timely remedy or ***penalty for abuse for filing of false reports.*** Even with best intentions, this Law is being abused and even weaponized as we speak. And now some want to expand the 'who' can get the order, instead of only Law Enforcement; *I ask you, personally; what would you do if, in the middle of the night, your front door is kicked in, a huge number of armed people run in shouting, yelling, pointing guns at **you** and **your family**, in the **same manner a home invasion** takes place. **If you are still alive,** they take you into custody, long enough to deprive you of all your firearms. They tell to you that your neighbor, or estranged distant relative, old girlfriend or ex-wife, or someone you don't even know, felt 'threatened' because of your Trump sign on your front yard, or maybe you posted something on your social media they didn't like, and you don't even know about it.*

Please Don't Laugh, it's already happened. And in Florida no less.

No, this ERPO law needs extensive revision, and to allow anyone **other than** Law Enforcement to investigate and request one will open the door to abuse the likes-of-which you have never seen. Do any of you remember the 1996 re-write of the Florida Domestic Violence Law?. There are still innocent people out there with no recourse.

-***Gun registration;*** is another idea routinely discussed. Gun registration is exactly the same path that the **Nazis** took in WWII.

Is that the direction Florida is going?

This has already happened in in the Peoples Republic of California. That is what is currently happening in Virginia, right now. Additionally, Gun registration was ruled as unconstitutional in one such case by SCOTUS. Lastly on this;

*How exactly does a forcible registry of guns **save** lives?* ***It doesn't.***

No 'Spin-Doctor'-on-Earth can prove a single saved life from registering guns.
But it ***is*** the prelude to confiscation.

-***Background Checks;*** Another 'thing'. There are many who want you to believe that there are no background checks of any kind to buy a firearm in this state or country. *Not true.* If you walk into any gun shop and buy a gun, background check, if you order a gun online, it is shipped to a licensed gun dealer who performs, wait for it, a background check! Every single time! The Anti-Gun narrative is nothing but a lie. The "Gun Show Loophole" is a fabrication. *Every Dealer at a gun show does a background check, on every firearm purchase, every time! This 'Universal Background Check' is nothing but Registration as a prelude to Confiscation,* ***read the bills,*** *it's all there in print. Also; background checks, bans, or limits on ammunition, or forcing law-abiding citizens to go to a dealer and pay money to sell or give a firearm to a family member is* ***purely UnConstitutional, Punitive and Draconian, and does not save lives.***
Here's an Idea; give the Law Enforcement Officer on the street access to instant background check. Routinely, they are confronted with a subject who is in possession of a firearm in a legal 'manner', but the *legality* of said person to possess said firearm is in question. *As far as I know, it is still **not** possible to verify if a suspect either is, or isn't, a felon, or is able to purchase or posses a firearm, in real time.*

You say you want to save lives, ^There-Ya-Go^.

-**Mental Health;** *There it is, I said it This is the NUMBER ONE PROBLEM!* In *every* case, these shooters repeatedly came in contact with someone who performed some form of on-the-spot mental health evaluation. This could be due to some disturbance, domestic, employment, school issue, or family concern, and the like, including the Police (all Police are trained to evaluate the mental stability of subjects being complained on, it's called the Baker Act). In every case, mental stability is the question, even if the subject is not taken in, in-a-nutshell;

'Is the subject an immediate threat to himself or others'?

Maybe, maybe not, but the reason for the contact was to evaluate it. These specific instances ('number-of-contacts') should be logged in a national database. It should be available to Law Enforcement nationwide, *just like a drivers license status*, and also placed in the same state/national *database that instant background checks uses*, *In Real Time*, not the end of the month. The technology is already in place, there are no excuses here.

To be Clear, it's the number-of-contacts, not the content.

This is your 'Radar' for Nut-Jobs.

The need for Public Safety far outweighs the need for privacy. I cite numerous laws, including ERPOs, that provide for some invasion of privacy to protect the public as a whole. Too many times ***Complacency*** sets in, and warning signs go unheeded.

A burning fuse is a dangerous thing.

*Enough instances of this type of contact should warrant a **temporary denial of the purchase of a firearm**, which would be immediately placed into the instant background check system.* This **temporary firearms purchase denial,** until medical clearance is obtained, is not a violation of Constitutional right. The courts have already ruled that the **temporary** seizure or denial of firearms on an ERPO is not a violation of the 2nd Amendment. Should a 'Temporary Denial' result from a background check, **and** the subject ***FAILs*** a mental health evaluation, or simply doesn't go and get one at all;

You have just 'put out' that burning fuse, and *SAVED* lives.

If the subject complies and passes the evaluation, the person can then complete his transaction and pick up his firearm.

AMERICAN OVERSIGHT

Again, You say you want to save lives, ^There-Ya-Go^.

*You will immediately respond "If they cannot get a firearm legally, then they will get one Illegally".*And you would be correct But you will NEVER stop Anyone from obtaining a firearm **Illegally**. No matter what you ban, no matter what you legislate.

The indisputable fact is that an ***Armed Citizenry Saves Lives and Deters Violence,***
And all the rest of this Gun-Control does not!
No matter what spin you put on it.

<u>This</u> **is where HB 273 shines;** HB 273 is a viable, real world solution that ***will*** **save lives** and ***stop*** **gun violence** in its tracks. There is **no** greater deterrent. If the aesthetics of 'open carry' make you cringe, then make it "Constitutional Concealed Carry", the ultimate alternative solution.

Once Again, You say you want to save lives, ^There-ya-go^.

Stop this trend of 'Taking Away' from Law Abiding Floridians. It's time to 'Give Back' our rights. Stop giving in to the MOB, what they are doing is no different than the Jack-Boots and Brownshirts of Nazi Germany, or the Bolsheviks or the old Soviet Union. As a lawmaker for the State, your decisions affect millions, not just your district.

More gun control will not stop any violence, or save even one life.

Never has, Never will. I cite Chicago, California, New York, New Jersey,,, I can go on and on. Watch what happens now in Virginia. Some of you might be on your last term, or retiring, or have alternative political goals in mind, or you simply don't care, or think this doesn't matter because it won't affect you. I promise you, this does matter, and, it will affect you.

In the above letter, I've showed you several proven options that ***will*** **save lives**, out of the thirty+some-odd gun-control bills filed that ***will not save a single life***.

I don't want to live in Cuba, old USSR, new Russia, Venezuela, China, or North Korea.

DO YOU?

Please review each and every one of these gun control bills before you this session, and ask yourself; ***"Will this one save lives?"***

The next 18 months will be the deciding factor as to which direction this state, and this nation will move towards;
Will we remain 'The Land of the Free and Home of the Brave"?,
or,
Sound the death-knell of a state and nation capsizing into Third-world Totalitarian Socialism?

My friends and I should not have to keep writing and calling you over-and over-again trying to get you to protect a God-Given right; that being the right to defend myself and my loved ones, ***and***; our sacred Constitutional Right to Keep (POSSES) and Bear (CARRY) Arms (FIREARMS).*Yet, here we are. Literally begging you to let us keep our Rights.* What is wrong with that picture? There's only one thing left I can say;

Please do not leave millions of Floridians defenseless,
and make Felons of millions more.

Thank you for your time,
Mike Meskimen

Subject: 98 Floridians DEAD!
Attachment(s): "CPCS Florida Passenger Rail System Study 11-1-18.pdf","fencing along Amtrak.mov"

Dear Florida Senators:

Today we are kicking off this internet marketing campaign in the Tallahassee area that will inform Florida legislators about the growing crisis in our state – railroad deaths.

All of Florida demanded action to clean up our waters, but no one is talking about 98 deaths!

What will YOU do?

Since January, 2018, a total of **98 people** have died on all of Florida's railroads across the state...

Brightline/Virgin: 32	Florida East Coast: 25
Tri Rail: 14	CSX: 12
Sun Rail: 7	Amtrak: 8

Over half of those deaths were on the Florida East Coast Rail corridor shared by FEC freight trains and Brightline passenger trains…and that's BEFORE Brightline goes over 100 mph through the Space and Treasure Coasts.

With the addition of increased speeds, the number of deaths and injuries will grow exponentially. Already an accident involving a Brightline train is happening on an average of every 20 days.

75% of the people killed on the coastal corridor are pedestrians. Many can't afford cars and have crossed these tracks on foot for generations to get to school, work and stores. The FEC freight corridor was one of the deadliest in the country *before* Brightline and now Florida has the dubious distinction of having the deadliest passenger trains in the country!

The legislature's own independent study (attached) recommends increased fencing, pedestrian channeling and pedestrian bridges and more auto safety systems to save lives. But Brightline refuses to implement these features. *See the complete fencing along the Amtrak corridor from Baltimore to Washington DC, attached.*

This is a statewide issue—don't think your district is immune! Brightline's going to Tampa and Jacksonville while all of Florida's trains are far too dangerous.
Now, everyone needs to demand that FDOT implement more regulations for higher speed trains and follow the consultants' recommendations.

These are not job killing regulations – they are LIFE SAVING ones!

Support Senator Debbie Mayfield and Representative Tyler Sirois' legislation and help MAKE THEM SAFE!

Don't let the corporations continue to...

Put Profits Over Lives!

Alliance for Safe Trains

Please email us directly for more information on what you can do to stop the deaths and how Fortress Investment Group is profiting from this nightmare.

Executive Summary

The Florida Passenger Rail System Study examined all existing and planned passenger rail systems in Florida that are under the jurisdiction of the Federal Railroad Administration. This includes 4 systems: Amtrak, Brightline, SunRail, and Tri-Rail. The study includes three components:

- → A detailed **inventory and description of the Florida Passenger Rail System** focusing on operating passenger railroad companies and planned passenger rail projects.
- → An **analysis of incident data** involving passenger rail operations and grade crossings.
- → An **overview of jurisdictions** that regulate passenger rail operations on a federal, state, regional and local level, including the establishment and expansion of services; reporting of railroad incidents and rectification of safety issues; and maintenance of tracks, crossing and safety equipment.

Based on the findings of the three parts of the study, this report introduces a set of **recommendations to improve passenger rail operations, safety, and railroad policy in Florida**.

Identified Issues:

The key issues with Florida's passenger rail system are as follows.

- → High rate of severe injuries and fatalities and high levels of trespassing incidents on railroad right of way due to rail services operating in dense urban areas
- → Gaps in regulations that are specific to higher-speed rail operations and a series of rail expansion projects
- → The need to clarify FDOT's mandate on oversight of passenger rail with respect to maintenance, safety, revitalization, and expansion
- → The lack of resources for local governments for planning rail projects

Florida's passenger rail system incurs a **higher rate of severe injuries and fatalities** than the national average. Over the last 10 years, Florida's passenger railroads experienced a total of 1,395 incidents. Forty-nine percent of these incidents involved severe injuries and fatalities – 1,317 severe injuries and 137 fatalities over this time period.[1] Florida's average severe injury rate is 1.5 times higher and its average fatality rate is 3.5 times higher than the overall national rate over the analysis period (2009-2018). This higher rate of severe injuries and fatalities is primarily attributable to a **higher count of trespassing incidents** for both pedestrians and vehicles. Trespassing cases represent 27 percent of Florida incidents resulting in severe injuries and fatalities, compared to 19 percent nationwide.

Two new passenger rail services, SunRail and Brightline, began operating in Florida within the last three years. Each service has experienced a series of incidents during its start-up period. The high rate of incidents for each service may be explained by passengers and drivers getting used to the presence of more trains and trains operating at higher speeds. However, these incidents have not had a significant effect on the state's average fatality and injury rates. Brightline began operations in January 2018 and will be the first privately-owned, higher-speed rail service in the United States, defined by a speed between 81 mph and 125 mph. A number of expansion projects are underway.

[1] Data for passenger railroad severe injuries and fatalities between January 2009 and June 2018. See definition of severe injuries in Appendix D.

While Florida passenger rail incident rates are higher than the rest of the country, rail operations take place in **much more population-dense areas** than the US average. Florida ranks 8th in the country for its grade crossing density index[2] which accounts for both the number of grade crossings and population density in the state. Furthermore, rail operations are concentrated in Central and South Florida where the majority of Florida's population resides.

There is also a **gap in federal and state regulations governing higher-speed rail**. While the Federal Railroad Administration and the Florida Department of Transportation have in place regulations for conventional (up to 80 mph) and high-speed (126 mph to 220 mph) rail, neither agency has developed additional regulations that are specific to higher-speed rail (81 mph to 125 mph).[3] The state of Florida may adopt laws and regulations and issue orders that are compatible with and more stringent than those of the federal government to address local hazards, as long as the laws do not unreasonably burden interstate commerce.

The Florida Department of Transportation (FDOT)'s mandate on passenger rail oversight also needs to be clarified. FDOT is directed by Florida statutes to coordinate with railroads in developing and implementing the statewide rail program to ensure the proper maintenance, safety, revitalization, and expansion of the rail system. FDOT has the right to establish regulations on any issue where there are no federal regulations, as long as they are not incompatible with another law, regulation, or order of the US government, and as long as they do not unreasonably burden interstate commerce. FDOT can also implement non-mandatory federal guidelines and in some cases, state law codifies these guidelines. However, the agency tends to defer to federal minimum standards in practice, in the view of consultations with local governments.

Finally, while some local governments may address road, pedestrian and highway issues frequently**, few counties and municipalities have expertise in railroad engineering and planning**. Local jurisdictions may lack the necessary resources, knowledge, or expertise in addressing railroad engineering issues or in working with railroads. Consultations with local governments revealed that their concerns are not necessarily addressed by railroads.

Recommendations:

Based on study findings, the six key recommendations proposed by this study with accompanying **Legislative** and **Florida Department of Transportation (FDOT)** considerations include the following.

Group	Specific Recommendations
1. Updating FDOT's Mandate	**The Legislature may consider three approaches to creating a better regulatory system.** 1.1 Providing funding for and directing FDOT to administer a committee to liaise with local governments, communities, and railroads on safety issues. 1.2 Updating FDOT's mandate to more clearly define its regulatory role in implementing safety regulation on a state level and supplementing the updated mandate with adequate resources (human and financial) to allow FDOT to implement this mandate. 1.3 Creating an independent regulatory body with an independent funding source. The regulatory body would assume FDOT's existing safety oversight functions, and be responsible for strategic, tactical and operational state-level safety regulation for rail and other modes.
2. Setting New Regulations for Higher-Speed Rail	**FDOT may consider:** 2.1 Creating a review process to certify new passenger rail lines. 2.2 Setting minimum grade crossing design standards. 2.3 Setting requirements for fencing along railroad corridors. 2.4 Creating guidelines for sealed corridor treatment along railroad corridors.

[2] Grade Crossing Density Index is defined as the number of grade crossings × population density / 1 million
[3] For the difference in maximum operating speeds between a higher-speed and high-speed line see Figure 2-1.

Group	Specific Recommendations
3. Implementing State-of-the-Art Practices	**The Legislature may consider:** 3.1 Creating a mandatory requirement that local counties and municipalities with fiber optic networks along local, non-state controlled roads make them available for signal "pre-pre-emption" in order to reduce road congestion and increase grade crossing safety. 3.2 Creating a requirement for navigation applications to include audio and visual alerts of upcoming railroad crossings. 3.3 Setting regulations on quiet zone implementation in urban areas to address railroad system noise. **FDOT may consider:** 3.4 Developing and updating (as needed) a set of guidelines that discuss state-of-the-art railroad crossing and corridor treatments and their applicability to Florida railroads, which would allow local governments to be informed about the latest technologies available. 3.5 Implementing Remote Health Monitoring (RHM) requirements for at-grade crossings with higher road and rail traffic volumes and/or train speeds.
4. Enforcing Railroad Crossing Trespass Violations	**The Legislature may consider:** 4.1 Requiring the establishment of inter-jurisdictional law enforcement working groups in railroad corridors with a high number of crossings and incidents to ensure that law enforcement agencies are coordinating with each other on trespassing enforcement. 4.2 Granting greater authority to each railroad's security officials to address trespassing along railroads. 4.3 Establishing harsher penalties for grade crossing trespassing. 4.4 Establishing a photo/video enforcement program for at-grade crossings.
5. Reviewing Rail Safety Resources	**The Legislature may consider:** 5.1 Assessing current resources of the Department of Children and Families and of the Department of Health to determine whether statewide suicide prevention activities could be leveraged to greater effect. 5.2 Requiring railroads to allow owners of grade crossings the right to use open procurement for contracting maintenance of grade crossing, fencing, etc. **FDOT may consider:** 5.3 Reviewing local planning resources for rail activity and continuing to liaise with local counties and municipalities to identify funding opportunities for rail safety treatments. 5.4 Requesting an evaluation of funding levels for rail safety in its annual legislative budget request to highlight needs at the state and local level.
6. Continuing Research to Promote Public Safety Along Railroads	**FDOT may consider:** 6.1 Developing a methodology for analytically evaluating grade crossing closures. Florida's development patterns resulted in numerous closely-spaced grade crossings. FDOT lacks an analytical methodology for determining which crossings should be consolidated and where strategic investment should be made. The methodology should have a component that would consider impacts on traffic congestion.

1 Introduction

1.1 Authority of the Assignment

This Final Report was prepared pursuant to the contract signed between the Office of Program Policy and Government Accountability (OPPAGA) and CPCS Transcom Inc. (CPCS) on June 28, 2018, for the Project, "Florida Passenger Rail System Study" (RFP No. 917).

1.2 The Assignment

Based on Ch. 2018-9, Laws of Florida, the General Appropriations Act of 2018 (2018 Appropriations Act), the Florida Office of Program Policy Analysis and Government Accountability (OPPAGA) must conduct a study to examine existing and planned passenger rail operations, including high-speed passenger rail in Florida.

"From the funds in Specific Appropriation 2673, the Office of Program Policy Analysis and Government Accountability (OPPAGA) shall contract for ***a study to examine existing and planned passenger rail operations, including high-speed passenger rail, in this state,*** *and submit a report to the Governor, the President of the Senate, and the Speaker of the House of Representatives by November 1, 2018."*

The recommendations from this study will be used to inform the Florida Legislature on future legislation about passenger rail operations, rail safety, and regulation.

1.3 Scope

The scope of this study includes:

- → A detailed **inventory and description of the Florida Passenger Rail System** focusing on operating passenger railroad companies and planned passenger rail projects. Only systems under the jurisdiction of the Federal Railroad Administration are included in the scope. This includes Amtrak, SunRail, Tri-Rail, and Brightline systems.
- → An **analysis of incident data** involving passenger rail operations and grade crossings.
- → An **overview of jurisdictions** that regulate passenger rail operations on a federal, state, regional and local level, including the establishment and expansion of services, reporting of railroad incidents and rectification of safety issues, and maintenance of tracks, crossing and safety equipment.
- → Based on the findings of the three parts of the study, this report introduces a set of **recommendations to improve passenger rail operations, safety, and railroad policy in Florida**. The scope of the study also includes providing testimony, if needed, to the Legislature in order to better inform lawmakers on this subject.

AMERICAN OVERSIGHT CPCS

1.4 Methodology

Findings in this report are based on a desk study of available literature, analysis of FRA safety database, field analysis of rail lines and crossings in the state, and consultations with the following stakeholders:

- Florida Department of Transportation, Office of Freight, Logistics, and Passenger Operations - Freight and Multimodal Operations (Rail and Motor Carrier)
- Florida Department of Transportation, Office of the General Counsel
- Brightline (All Aboard Florida)
- South Florida Regional Transportation Authority (Tri-Rail)
- Central Florida Commuter Rail Commission (SunRail)
- Amtrak
- Operation Lifesaver
- Federal Railroad Administration, Rail Safety Analysis Office
- Federal Motor Carrier Safety Administration
- Florida League of Cities
- Florida Emergency Preparedness Association
- Interested Legislators
- Martin County Director of Public Works and County Attorney's Office
- Indian River County Director of Public Works and County Attorney's Office
- Brevard County Assistant County Manager
- Illinois High-Speed Rail Safety Team
- Citizens Against Rail Expansion (CARE)

We also requested consultations to the following organizations who declined or did not respond as of the date of this report:

- Florida East Coast Railway (deferred questions to Brightline)
- CSX Corporation
- American Association of Railroads
- Surface Transportation Board
- Florida Association of Counties
- Miami-Dade County Public Works
- Broward County Public Works
- Palm Beach County Engineers
- St. Lucie County Public Works and County Engineer
- Orange County Public Works
- County Sheriff/Police Departments
- County Fire Departments
- Metrolink
- Caltrain

1.5 Limitations

Some of the findings in this report are based on the analysis of third-party data. While CPCS makes efforts to validate data and rectify any discrepancies, CPCS cannot warrant the accuracy of third-party data.

2 Florida Passenger Rail System Inventory

2.1 Introduction

This section provides a brief overview of the current passenger rail system in Florida. Additional details on the *Economic Conditions and Outlook in Florida* can be found in Appendix A, a summary of Urban Rail Systems is provided in Appendix B, and a description of Passenger Rail Services is located in Appendix C.

2.2 Florida Rail System History

While Florida's first railroad opened in 1836, most significant rail network development happened in the late 19th and early 20th century. After playing an important role during World War II for moving troops, and throughout the post-war period for moving passengers, by the 1960s, with the advent of the Interstate highway system and auto-centric suburban development patterns, passenger rail was on the decline both in Florida and nationwide.

Based on the analysis presented in Appendix A, Florida has experienced positive population growth trends, concentrated population density, a vibrant economy, and the state is expecting ongoing future growth. These trends may also explain why since the early 1990s, Florida's passenger rail system has seen a revival, with the opening of two new commuter rail lines and the first privately-funded intercity passenger railroad in recent decades.

2.3 Distinction between Conventional, Higher-Speed and High-Speed Rail

The Federal Railroad Administration (FRA) classifies passenger rail operations into three categories.

- → Any line operating at a top speed of less than 80 mph is considered to be **conventional rail**.
- → Any line that operates at a top speed between 81 mph and 125 mph is classified as **Higher** (than conventional)-**speed rail**.
- → **High-speed rail** lines operate at a top speed of 126 mph to 220 mph.[4]

Rail lines are also classified by track class, as described in sections 213.9 and 213.307 under Title 49 of the Code of Federal Regulations. These track classes and line types are listed in Figure 2-1.

[4] FRA and APTA, 2011

AMERICAN OVERSIGHT

Figure 2-1: FRA Speed Classes

FRA Class	Max. Speed for Passenger Service (mph)	Line Type
1	15	Conventional Rail
2	30	
3	60	
4	80	
5	90	Higher (than conventional) Speed
6	110	
7	125	
8	160	High-Speed
9	220	

Source: Code of Federal Regulations, FRA

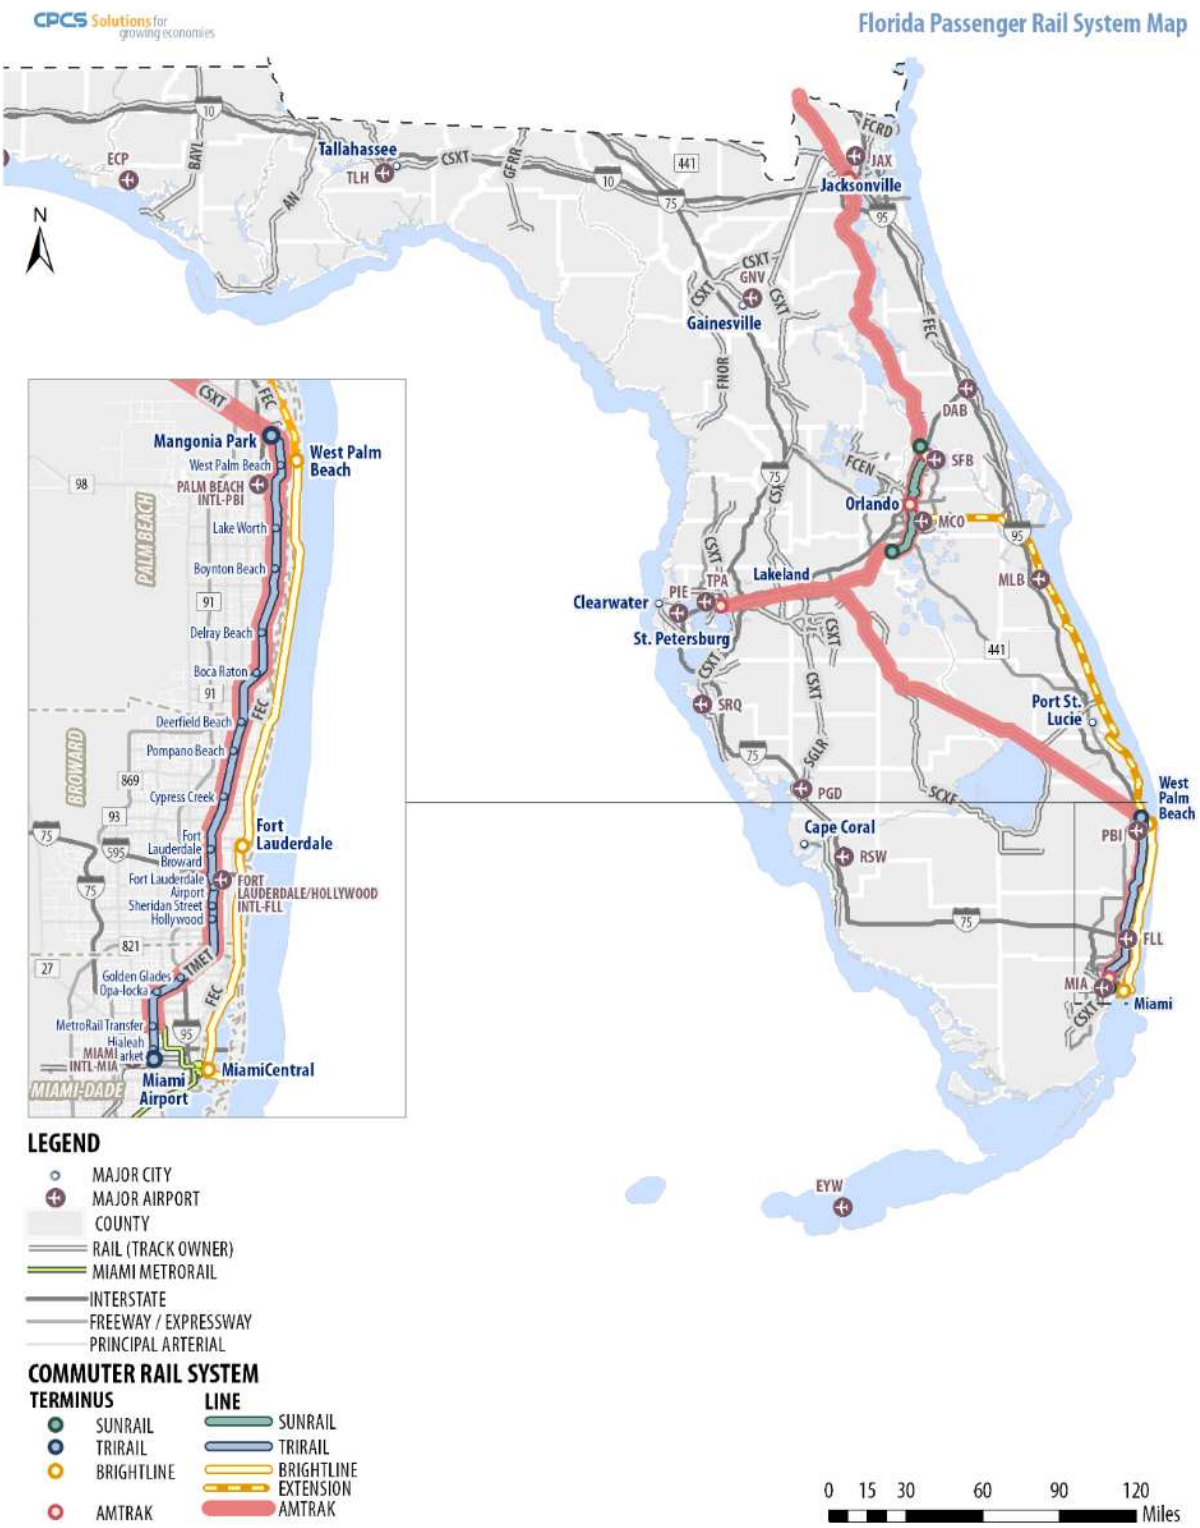
The FRA defines different maintenance and operating standards for each track class. One important distinction includes the presence of grade crossings: high-speed rail generally does not allow for grade crossings, while higher-speed rail may allow for grade crossings.

2.4 Florida Passenger Rail System

2.4.1 Overview

Four passenger rail systems operating in Florida are within the scope of this study: Amtrak, Brightline, SunRail, and Tri-Rail. Collectively, they operate on over 600 route miles of lines in Florida and include two intercity operators (Amtrak and Brightline), both operating on track owned by other railroads, and two commuter rail operators (SunRail and Tri-Rail), both operating on their own tracks.

Along with intercity and commuter rail, Florida also has four major urban rail systems that are not connected to the national rail system and as such, are not under the jurisdiction of the FRA. These urban rail systems are thus excluded from this study. A brief description of these systems is presented in Appendix B.



Intercity Rail: *rail service that operates longer distances between major cities*

Commuter Rail: *rail service that operates shorter distances between a city center and suburban areas*

This report focuses on intercity and commuter passenger rail operations, maintenance, infrastructure, new developments and expansion, safety record, regulation, grade crossings, and recommendations for improvement. Figure 2-2 presents the Florida passenger rail system and Figure 2-3 provides a summary of operating characteristics for each service.

Source: CPCS Analysis of Amtrak, Tri-Rail, SunRail, and Brightline

The characteristics of each system are described below, and more details about their financial performance are provided in Appendix C.

2.4.2 Amtrak

The National Railroad Passenger Corporation (Amtrak) is the national rail operator and a federally chartered corporation, with the federal government as majority shareholder. It has provided intercity passenger service to Florida since the company was founded in 1971. Amtrak operates 3 services in the state, linking Florida cities to destinations in the Northeast. In Florida, Amtrak handled a total of 923,483 boardings and alightings in Fiscal Year 2017, serving 18 stations and generating $64 million in revenue. The railroad supports 2,780 jobs in the state, contributing $31.8 million of Gross Domestic Product (value-added) to the region.

In addition to ticket revenues, Amtrak receives funding for operating train services and maintaining its infrastructure from various federal funds, directly from some states (Florida does not contribute directly to Amtrak) and from other sources. Nationally, in Fiscal Year 2017, Amtrak covered 95 percent of its qualified operating expenses through ticket sales, payments from state partners and agencies, and from other revenue. [5]

2.4.3 SunRail

SunRail is a 48.9-mile, 16-station commuter railroad in the Greater Orlando area and is Florida's second commuter rail operation. The system opened in 2014 and was expanded in July 2018. SunRail operates 20 round trips per weekday (no weekend service) on a line that is mostly double-track. In 2015, the system carried just under 1 million riders. The system is operated using funding from the City of Orlando and Osceola as well as Seminole, Volusia, and Orange Counties. SunRail is currently operated by FDOT but will hand operations and maintenance over

[5] Does not include depreciation and amortization expenses, capital project related expenditures, post-retirement employee benefit cost, and Office of Inspector General expenses

to the Central Florida Commuter Rail Commission (currently acting as the advisory board) by 2022.

2.4.4 Tri-Rail

Tri-Rail is a 72-mile, 18-station commuter rail line that serves Palm Beach, Broward, and Miami-Dade Counties and was the first rail system of its kind in the state. The system links Miami, Fort Lauderdale, and West Palm Beach as well as the region's three major airports. Tri-Rail began operations on January 9, 1989, and currently provides 25 weekday and 15 weekend round-trips between Miami Airport and Mangonia Park. In Fiscal Year 2017, Tri-Rail ridership totaled 4.26 million riders.

2.4.5 Brightline

Brightline is a private higher-speed, intercity rail service developed by All Aboard Florida, using the 66.5-mile Florida East Coast Railway (FECR) corridor.[6] All Aboard Florida is a subsidiary of Florida East Coast Industries LLC (FECI), which is, in turn, owned by the Fortress Investment Group. Grupo México Transportes (GMXT) acquired the Florida East Coast Railway (FECR), which owns the infrastructure and operates freight trains along the corridor, from Fortress in July 2017. FECR (the infrastructure owner and freight operator) and FECI (owner of Brightline) no longer have a common owner, although they have an agreement in place to jointly operate the rail corridor.

Phase 1, which cost $600 million, connects Miami to West Palm Beach at a top speed of 79 mph. Brightline operates 16 round-trips per weekday, 8 round-trips on Saturdays and 7 round-trips on Sundays. The railroad expects a total ridership of 360,000 for 2018. A $3.7 billion Phase 2 expansion will extend the service to the Orlando International Airport. Together with other funding, private-activity bonds (PAB) were used for Phase 1 and have been approved for Phase 2, using infrastructure and real estate as collateral. In mid-2018, Brightline submitted an unsolicited proposal to FDOT to extend service from Tampa to Orlando. FDOT responded by issuing an open RFP for the service.

2.5 Other Proposed Commuter Rail Systems

2.5.1 Orange Blossom Express

Orange Blossom Express is a proposed 36-mile commuter rail system in Central Florida that would connect Eustis, Tavares, Mount Dora, Apopka, and downtown Orlando. In 2012, FDOT proposed conducting a feasibility study, but this was never completed. No further information on funding, operations or projected ridership is available.

[6] When complete, Brightline will be the second fastest rail system in North America after Amtrak's Acela Express service between Washington, DC and Boston, though still below the internationally-accepted top operating speed of 185-220 mph for high-speed trains.

AMERICAN OVERSIGHT

2.5.2 First Coast Commuter Rail

First Coast Commuter Rail is a proposed rail system that would serve the Jacksonville region. A feasibility study was completed in 2009. The study identified three potential corridors in the region, totaling over 91 miles.[7] The predicted ridership for 2015 was approximately 9,800 daily riders and a predicted farebox recovery ratio of 34.1 percent. As of 2018, the system is still in the planning stages and no funding for its implementation has been identified.

2.6 Comparing Financial Operating Performance of Commuter Rail Systems

According to Federal Transit Administration (FTA) data, SunRail and Tri-Rail have low passenger fares compared to their peer group's median (shown in Figure 2-4 below) and a corresponding low farebox recovery ratio (Tri-Rail at 15 percent, SunRail at 6 percent, peer group median at 32 percent), though SunRail is a relatively new service, which may explain the low figures.[8] Commuter rail operating costs have a relatively high fixed part (engineer, conductor, fuel, etc.) that largely does not depend on the number of passengers in the short and medium term. This observation may explain why both railroads have high unit costs (e.g. per passenger or passenger-mile).

Figure 2-4 compares SunRail and Tri-Rail to a selection of US commuter rail lines. Due to Amtrak's nationwide reach and Brightline's recent launch, they are not included in this commuter rail service comparison. While dated, SFRTA's Transit Development Plan for Fiscal Year 2005-2010 uses the following commuter rail services in its peer group: Altamont Corridor Express (ACE), Caltrain, Coaster, Sounder, Trinity Railway Express (TRE), and Virginia Railway Express (VRE).[9] Consultations with SunRail revealed that the rail service benchmarks its performance against RTD (Denver) and TRE (Dallas). The analysis also considers Metro Transit (Minneapolis) and Rio Metro (Albuquerque) due to their service and ridership similarities with SunRail.

As a rule, commuter, urban and suburban rail worldwide requires some level of subsidy to operate.[10] The level of subsidy tends to decrease as ridership increases within the same service offering. However, at a certain point when new capacity is required, the subsidy level may also need to increase.

The metrics shown in Figure 2-5 will be used to compare Florida commuter rail agencies to others from Figure 2-4.

---

** VOMS: Vehicles Operated in Measurable Service as defined by the FTA. The maximum number of cars needed for peak of peak service (excludes locomotives)

Source: FTA 2016 Transit Metrics and Service

Figure 2-5: Operating Metrics Used and Definitions

Metric	Definition
Cost Per Hour	Average cost to operate one passenger car for one hour of passenger service
Cost Per Passenger	Average cost to transport one passenger from the beginning of their trip to the end
Cost Per Passenger-Mile	Average cost to transport one passenger one mile
Farebox Recovery Ratio	Percentage of operating costs funded by passenger fares
Passengers Per Car Per Hour	Average number of passengers that board a passenger car during one hour of service

Source: FTA 2016 Transit Metrics

Using this analysis, the following conclusions can be made about Tri-Rail and SunRail's operations:

→ **Comparatively-Low Passenger Fares:** Tri-Rail and SunRail passenger fares ($3.09 and $2.17 respectively) are lower than their peer group median of $3.75. Among peers, Tri-Rail fares are similar to Metro Transit in Minneapolis and the Sounder in Seattle. SunRail's fares are lower than all peers except for Rio Metro in Albuquerque.

→ **Low Farebox Recovery Ratio:** Tri-Rail and SunRail's farebox recovery (15 percent and 6 percent, respectively) is lower than their peer group's median of 32 percent. Tri-Rail's farebox recovery ratio is similar to that of Metro Transit in Minneapolis and RTD in Denver. SunRail's farebox recovery ratio is in line with Rio Metro in Albuquerque and can be explained by the relative newness of the service.

→ **High Costs per Passenger:** Tri-Rail and SunRail both have high costs per passenger ($21.22 and $34.28, respectively) compared to the peer group median of $13.62. Metro Transit in Minneapolis and Rio Metro in Albuquerque are similar in costs per passenger ($23.45 and $33.78).

→ **Tri-Rail-Specific: Low number of passengers per car per hour.** A low average of 34 passengers per car per hour is second-lowest in its peer group. Rio Metro in Albuquerque has the lowest number of passengers per car per hour of 24.1. Because Tri-Rail runs relatively short trains already, reducing the number of cars will not have a positive impact on this metric. Instead, Tri-Rail should focus on building its ridership.

→ **SunRail-Specific: High Cost per Passenger-Mile.** While Tri-Rail has a cost per passenger-mile ($0.77) that is more in line with the peer group median of $0.51, SunRail has the highest cost per passenger-mile out of the group at $2.38. Because SunRail's fixed costs are amortized over a small number of passengers, this results in a relatively high cost per passenger-mile. As ridership increases, it is expected that this metric will improve.

→ **SunRail-Specific: High Cost per Car per Hour.** SunRail's cost per car-hour of $1,525 is the highest in its peer group. Metro Transit in Minneapolis has the second highest cost per hour at $1,222. This number can be explained by the relatively short trains that SunRail runs, which does not allow it to amortize its short-term fixed operating costs (engineer, conductor(s) and fuel costs) over a larger number of cars.

Figure 2-6 provides an analysis of these metrics for each line. Green cells represent values that are within the top 33.3 percentile of the group for each column, white cells represent values that are in the middle 33.3 percentile of the group for each column, and red cells represent values that are in the bottom 33.4 percentile of the group for each column.

Figure 2-6: Commuter Rail Operating Statistics Comparison (2016)

Name	Fare Revenues Per Unlinked Passenger Trip	Farebox Recovery Ratio	Cost Per Car Per Service Hour	Average Passengers Per Car Per Hour	Cost Per Passenger	Cost Per Passenger Mile

2.7 Conclusions on the Existing Rail System

In the last 30 years, commuter and intercity passenger rail has made a comeback in Florida, with four current operators. This includes two commuter lines (Tri-Rail and SunRail), a long-standing intercity passenger operator (Amtrak) and a new intercity passenger train operator (Brightline), the first private passenger railroad to open in many decades. Both SunRail and Brightline are relatively new rail services, opening in 2015 and 2018 respectively.

The state's rail system continues to evolve: SunRail, Brightline, and Tri-Rail all have active rail expansion projects. Additionally, Orange Blossom Express and First Coast Commuter Rail are two proposed commuter lines, which currently lack funding for implementation.

Both commuter rail operators require subsidies for their operations that are high compared to their peers elsewhere around the country. Subsidy levels are typically determined by passenger fares, ridership levels, and operational costs.

Having assessed financial and operating performance in this chapter, the next chapter evaluates the safety performance record for Florida's commuter and intercity passenger rail system.

AMERICAN OVERSIGHT

3 Florida Rail Safety Record

3.1 Introduction

This chapter assesses Florida's safety record by measuring the number of severe injuries and fatalities passenger railroads experienced, normalized by the number of train miles, between January 2009 and June 2018. This chapter also includes an analysis of the nationwide passenger safety record, an analysis of the passenger safety record for individual railroads in Florida, and an analysis of grade crossing incidents in Florida. A classification table of all types of severe injuries is found in Appendix D, the top 50 Florida crossings by incident count is provided in Appendix E, and overall US rail safety trends are presented in Appendix F.

3.2 Methodology for Evaluating Florida's Rail Safety Record

The analysis of the Florida safety record, as presented in this chapter, focuses on Florida passenger rail services: Amtrak in Florida, Brightline, SunRail, and Tri-Rail. Intercity and commuter systems were analyzed separately due to the different nature of their operations. The comparison for Amtrak in Florida and Brightline included other inter-city systems, including Amtrak service outside Florida and the Alaska Railroad Corporation.

SunRail and Tri-Rail were compared with the commuter systems identified previously in Figure 2-4. While these commuter rail services can be considered peers of Tri-Rail and SunRail, each has unique attributes. While it is difficult to identify comparable commuter rail systems, this safety assessment examines Metrolink and Caltrain, operating in the Los Angeles and San Francisco Bay Areas, respectively. These two systems may be the most comparable due to line profiles, urban density, a high number of grade crossings (on portions of the networks), and similar operating characteristics.

The primary data sources used in this analysis are the Federal Railroad Administration (FRA) *railroad casualty* database (compiled using the FRA form 6180.55a) and the highway-rail incident database (compiled using the FRA form 6180.57). FRA data spanned the period between January 2009 and June 2018 (the most recent month available).

To provide a common basis for comparison between systems and geographic areas, casualty counts were normalized by passenger train miles, calculated from the operational data as reported by individual railroads. Since operational data is reported by the operator and not by state, passenger train miles for Amtrak's Florida portion of the Silver-Star, Silver Meteor, and Auto-train services were calculated manually.[11] It was assumed that Amtrak services have

[11] The length of the lines was calculated in GIS, multiplied by the number of daily round trips (1 per day per service), and per number of non-holiday days per year.

AMERICAN OVERSIGHT

remained constant over the past 10 years, and so current totals were used for each year of the study period.

Next, casualties were classified as either *severe* or *non-severe* based on the event circumstance attribute included in the *railroad casualties* dataset.[12] Casualties were also classified as either within or outside railroad control based on the probable cause.[13] These codes and classifications assigned to them are included in Appendix D. Non-severe casualties are excluded from this analysis.

3.3 Assessing Data Availability and Quality

The Federal Railroad Administration (FRA)'s safety database represents a complete collection of data for every reportable incident. The data is reported on a monthly basis by U.S. railroads to the FRA. There is a two-month processing time before incidents are reported in the database, and this data is updated frequently to reflect new knowledge.

All incidents that result in a death, injury, or financial damage of $25,000 or higher trigger a mandatory report to the FRA. Railroads can provide preemptive reports even if these criteria are not met, which may then be amended or canceled, once the circumstances of the incident become known.

The FRA defines accidents/incidents as:

> *"Collisions, derailments, and other events involving the operation of on-track equipment and causing reportable damage above an established threshold; impacts between railroad on-track equipment and highway users at crossings; and all other incidents or exposures that cause a fatality or injury to any person, or an occupational illness to a railroad employee."*

These incidents are reported as:

- **Train Accidents**: A safety-related event involving on-track rail equipment (both standing and moving), causing monetary damage to the rail equipment and track above $25,000.
- **Highway-rail grade crossing incidents**: Any impact between a rail and highway user (both motor vehicles and other users of the crossing) at a designated crossing site, including walkways, sidewalks, etc., associated with the crossing.
- **Other incidents** that do not fit in the two above-mentioned categories, resulting in any death, injury to any person that requires medical treatment, or occupational illness or injury of a railroad employee.[14] This category includes incidents involving persons trespassing on the railroad right-of-way, but not within a crossing.

[12] FRA "EVENT" variable.
[13] FRA "INJCAUS" variable.
[14] FRA Office of Safety Analysis Definitions

All railroad incidents, injuries, and fatalities are required to be reported by law. FRA incident databases provide substantial detail on reported incidents, allowing for a comprehensive safety analysis of the state's rail system. The Florida Department of Transportation (FDOT) relies only on the FRA database for safety data to provide a common basis for incident reporting and to ensure that all reportable incidents are captured.

FRA's safety database is less detailed for the most recent two years, as each case goes through an investigation before the probable cause is determined. Probable cause is initially self-reported by the railroad, but even after an investigation, it can be difficult to determine the precise cause of an accident. As a result, detailed 2017 and 2018 data are not as comprehensive until after the investigation for each incident is complete and these data are updated. For example, while basic information on the 2018 incidents occurring on the Brightline system is present in the database, incident causes may not have been determined as of this writing.

Rail suicide incidents tend to be reported as trespass incidents rather than as suicides, due to reporting sensitivities.[15] FDOT is working with the FRA and Operation Lifesaver to document incidents and support outreach to railroads, local communities, and the public to encourage more responsible reporting practices between trespassing and suicide incidents.

FRA's database also provides details of grade crossing infrastructure inventory, such as the gate configuration, warning system, and so on. However, many of these fields are not mandatory for reporting purposes. Our analysis includes statistics for the crossing attributes that are reported frequently and excludes those where most Florida incident cases leave the characteristic field blank.

The database used for this analysis is comprehensive and provides a record of all significant incidents. However, the cause of the incident is not always clear, especially for more recent incidents, due to ongoing investigations.

3.4 Overview of Florida's Safety Record Analysis

Between January 2009 and June 2018, Florida passenger railroads experienced a total of 1,395 safety incidents. Among these, 677 safety incidents (49 percent of the total) involved severe injuries and fatalities. There were 1,317 severe injuries (approximately 2 severe injuries per incident) and 137 fatalities over this time period. These numbers include serious injuries and fatalities among passengers, non-passengers, and railroad employees.

Figure 3-1 shows what defines the injury rate, the fatality rate, and the overall casualty rate. This report excludes non-severe injuries.[16]

[15] USDOT Volpe Center Rail Suicide Prevention

[16] Classification of severe injuries is located in Appendix D.

Figure 3-1: Terminology Definitions

Term	Definition
Injury Rate	Severe injuries (passengers, non-passengers and employees) per 10,000 passenger train miles
Fatality Rate	Fatalities (passengers, non-passengers and employees) per 10,000 passenger train miles
Casualty Rate	Severe Injuries and fatalities (passengers, non-passengers and employees) per 10,000 passenger train miles

Source: Federal Railroad Administration (FRA)

This safety analysis compares severe injuries and fatalities in Florida and the United States by using the number of passenger train miles for standardization. Based on this approach, Florida's injury rate is 1.5 times higher and its fatality rate is 3.5 times higher than the overall nationwide rate. Fatalities include suicides, though the classification of deaths as suicides tends to be underreported.[17]

Figure 3-2 shows casualty rates for each Florida passenger rail line. Amtrak in Florida and Brightline are compared with the US intercity average casualty rate (Amtrak and Alaska Railroad Corporation) while Tri-Rail and Sun-Rail are compared with the commuter rail peer group average, as seen in Figure 3-3.

Figure 3-2: Casualty Rates in Florida (January 2009 – June 2018)

Rail Service	Average Annual Casualty Rate	US Intercity Average Annual Casualty Rate	Commuter Peer Group Average Annual Casualty Rate
Amtrak (in Florida)	0.66	0.30	
Brightline	0.57	0.30	
Tri-Rail	0.15		0.12
SunRail	0.24		0.12

Source: CPCS analysis of FRA data

Figure 3-3: Commuter Rail Peer Group (January 2009 – June 2018)

Rail Service	Code	Agency	Average Annual Casualty Rate	Location
Tri-Rail	SFRV	South Florida Regional Transportation Authority	0.15	Pompano Beach, FL
SunRail	CFRC	Central Florida Commuter Rail	0.24	Sanford, FL
ACE	ACEX	Altamont Corridor Express	0.12	Stockton, CA
Caltrain	PCMZ	Peninsula Corridor Joint Powers Board	0.11	San Carlos, CA
Coaster	NCTC	North County Transit District	0.12	Oceanside, CA
Metrolink	SCAX	So. California Regional Rail Authority	0.15	Los Angeles, CA
Metro Transit	MRTV	Metro Transit	N/A*	Minneapolis, MN
Rio Metro	NMRX	Rail Runner Express (Rio Metro Regional Transit District)	0.05	Albuquerque, NM
Sounder	SCR	Sound Transit (Central Puget Sound Regional Transit Authority)	0.04	Seattle, WA
TRE	TRE	Trinity Railway Express (Dallas Area Rapid Transit)	0.07	Dallas, TX
VRE	VREX	Virginia Railway Express	0.08	Alexandria, VA

Source: CPCS analysis of FRA data, *MRTV FRA records are unavailable and are not included in the commuter rail average casualty rate.

[17] Tøllefsen, Ingvild Maria, Erlend Hem, and Øivind Ekeberg. "The reliability of suicide statistics: a systematic review." BMC psychiatry 12.1 (2012): 9.

Based on the comparisons, we find that

- → **Amtrak**'s average annual casualty rate in Florida is 121 percent higher than the rest of the US intercity passenger rail over the last 10 years.
- → **Brightline**'s casualty rate during its first six months of operations is 89 percent higher than the rest of the US intercity passenger rail.
- → **Tri-Rail**'s annual casualty rate has generally been lower than its US commuter rail peer group until 2014. In 2014, 2016, and 2017, Tri-Rail's average annual casualty rate was 21 percent higher than its commuter rail peer group.
- → **SunRail**'s average annual casualty rate is 96 percent higher than its commuter rail peer group. For both Tri-Rail and SunRail, more casualties were found to be within railroad control when compared to the peer group.

Probable causes of railroad casualties indicate that:

- → Florida's casualties arise predominantly from trespassing (27 percent), a rate much higher than the US (19 percent).
- → Florida suffers fewer casualties from environmental causes (6 percent) than the US (11 percent).
- → Equipment issues on Florida's passenger railroads are the probable cause for casualties 9 percent of the time, in line with the rest of the US at 9 percent.

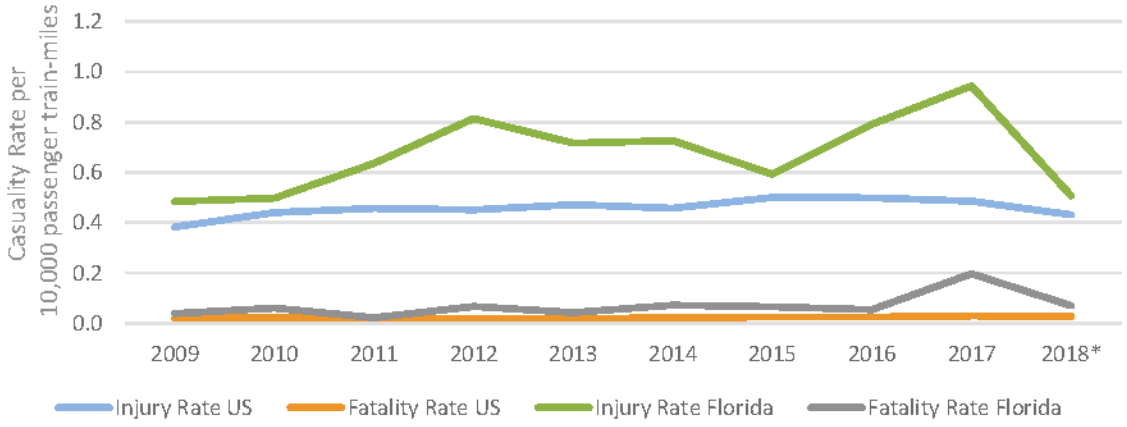
The next sections describe the detailed methodology and an analysis of data availability and quality before providing additional information on Florida's safety record.

3.5 Florida Passenger Rail Accident Inventory

3.5.1 Comparison between Florida and the United States

Casualty rates (combining the number of serious injuries/fatalities) were calculated for both the United States and for Florida per 10,000 passenger train miles to control for track mileage in the state. On average, injury, fatality, and casualty rates for Florida were higher than the nation as a whole. Figure 3-4 provides a comparison of severe injuries/fatalities and passenger train miles.

Figure 3-4: Total Injuries and Fatalities Nationwide and in Florida (January 2009 – June 2018)



Location	Injuries	Fatalities	Total Passenger Train Miles	Injury Rate	Fatality Rate	Casualty Rate
				Per 10,000 passenger train miles		
Florida	1,317	137	19,332,341	0.68	0.07	0.93
Nationwide	41,933	2,072	912,645,372	0.46	0.02	0.48

Source: CPCS Analysis of FRA Safety Data

By tracking the trends in Florida and nationwide, Figure 3-5 shows how the casualty rate per 10,000 passenger train miles has changed between 2009 and June 2018. Overall, Florida's casualty rate is nearly double the national casualty rate.

Over the last 10 years, the collective severe injury rate on Florida's passenger rail system is 1.5 times higher and the fatality rate is 3.5 times higher than national averages.

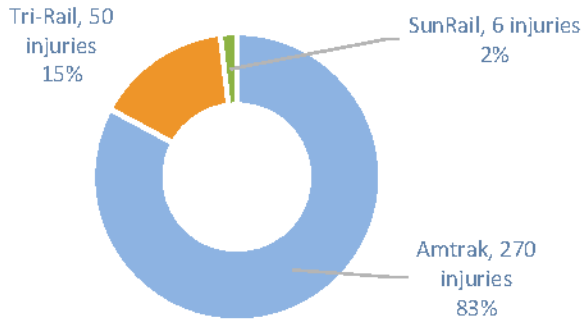
Figure 3-5: Passenger System Casualty Rate in Florida and the United States (January 2009 – June 2018)

Note: 2018 rates are comparable to other years and only consider incidents in the first 6 months of the year
Source: CPCS Analysis of FRA Safety Data

3.6 Casualties Incurred by Train Passengers

This section considers a subset of all casualties that were incurred only by train passengers. Figure 3-6 compares Florida-specific and nationwide casualty rates for passengers, indicating that Florida's train passenger casualty rate exceeds the US casualty rate. The two fatalities incurred by train passengers in Florida occurred in incidents involving Tri-Rail trains.

Figure 3-6: Florida and US Railroad Train Passenger-Only Casualty Rates (January 2009 – June 2018)



Location	Injuries	Fatalities	Casualty Rate per 10,000 Passenger Train Miles
Florida	326	2	0.17
Nationwide	6,743	53	0.07

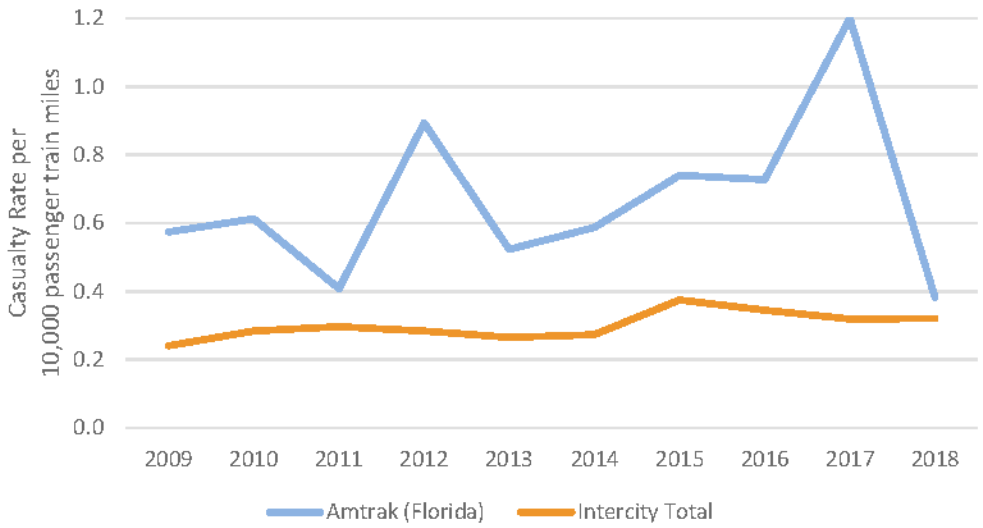
Source: FRA Safety Database

Among severe passenger injuries occurring in Florida, between January 2009 and June 2018, Amtrak had the highest number at 270 injuries. None of Brightline's passengers suffered injuries or deaths during the first six months of operation of the new train service. Figure 3-7 provides

a breakdown of rail services that incurred passenger injuries, up to June 2018, the most recent date with available data.

Figure 3-7: Florida Railroad Passenger Injuries by Passenger Rail Service (January 2009 – June 2018)

Source: FRA Safety Database



3.7 Florida Railroad Casualty Rates by Rail Service

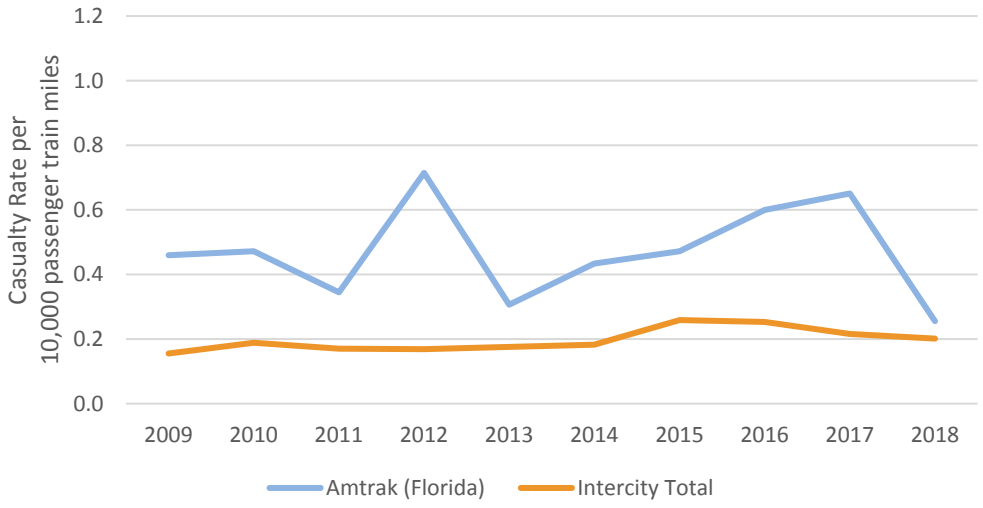
This section compares casualty rates by each of the four passenger rail services in Florida. Brightline and Amtrak are compared to the US intercity average, while SunRail and Tri-Rail are compared with the commuter peer group average.

3.7.1 Intercity Services (Amtrak and Brightline)

Figure 3-8 compares casualty rates for Amtrak in Florida with intercity systems in the U.S. (Amtrak and Alaska Railroad Corporation). During the last decade, the casualty rate per 10,000 passenger train-miles was higher in Florida than nationwide, though year-to-date in 2018, the two rates are comparable.

Figure 3-8: Amtrak Florida Compared with US Intercity Systems Casualty Rate (January 2009 – June 2018)

Note: 2018 rates are comparable to other years and only consider incidents in the first 6 months of the year
Source: CPCS Analysis of FRA Safety Data



Amtrak's average annual casualty rate in Florida is 121 percent higher than the rest of the US intercity passenger rail over the last 10 years. This may be attributable to higher traffic and population density in Florida when compared to other regions of the US, where intercity passenger rail services are available.

Figure 3-9 focuses on the subset of casualties found to be within railroad control, as defined by the FRA. *Within railroad control* means any cause within the railroad's control, including

- → issues with infrastructure condition;
- → issues with signals and communication;
- → mechanical and electrical failures; and
- → train operation issues, including problems caused by human factors.

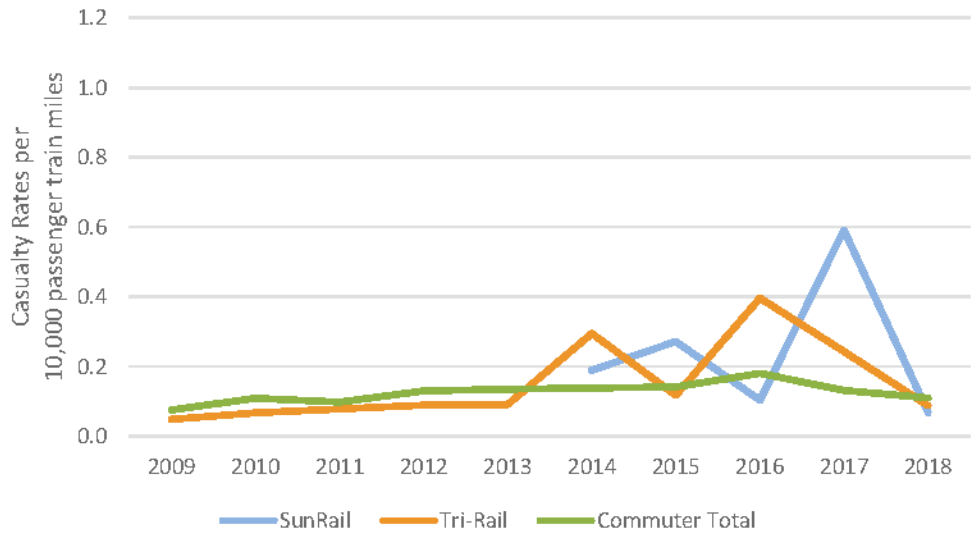
Amtrak has a higher casualty rate in Florida due to a higher proportion of incidents that are within the railroad's control. Over the last 10 years, Amtrak in Florida had a casualty rate that was 139 percent higher than the US intercity passenger rail average.

Figure 3-9: Amtrak Florida Compared with US Intercity Systems: Casualty Rate within Railroad Control (January 2009 – June 2018)

Note: 2018 rates are comparable to other years and only consider incidents in the first 6 months of the year
Source: CPCS Analysis of FRA Safety Data

For the first half of 2018, Brightline's casualty rate per 10,000 passenger train miles was approximately 0.57 with a total of 10 severe casualties. This is higher than the nationwide casualty rate of 0.32 but lower than the rate for Amtrak in Florida of 0.66 casualties per 10,000 passenger train miles.

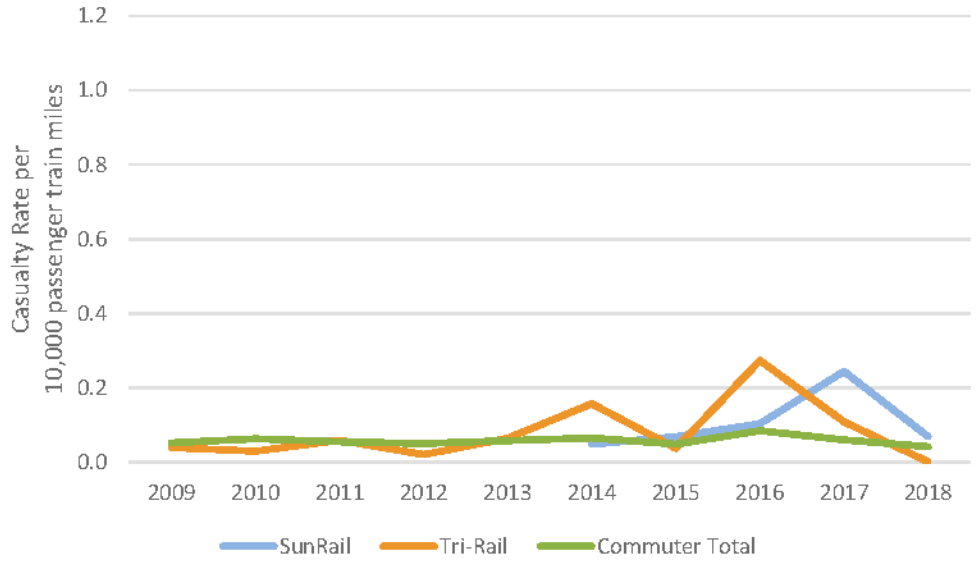
Brightline's casualty rate within the railroad's control is 0.06 casualties per 10,000 passenger train miles, which is much lower than the rate for Amtrak in Florida, which stood at 0.47 casualties per 10,000 passenger train miles. Details of some cases are not yet available.



3.7.2 Commuter Rail (SunRail and Tri-Rail)

Next, the analysis considered commuter rail casualty rate trends for SunRail and Tri-Rail and measured them against their peer group in the US. Figure 3-10 compares SunRail and Tri-Rail in Florida to their peer group in the US. Figure 3-11 focuses on the subset of casualties found to be within railroad control, as defined by the FRA.

Tri-Rail's casualty rates were lower than its peer group up until 2014. Between 2014 and 2017, Tri-Rail's casualty rates increased significantly from less than 0.1 to 0.4 casualties per 10,000 passenger train miles in 2016. Tri-Rail casualties increased primarily due to casualties outside of the railroad's control – the vast majority of the increase in casualties between 2014 and 2017 are due to an uptick in trespassing.



SunRail has generally experienced higher casualty rates compared to the commuter peer group. SunRail had a high of 0.6 casualties per 10,000 passenger train miles in 2017. There is not an obvious explanation for the higher casualty rate. The high rate may be explained by the number of grade crossings and the volume of traffic over these crossings. It may also be explained by the fact that those that are living or working near the line may not be used to the presence of trains. SunRail should continue to monitor the incident trends as they are currently doing, and identify any patterns that may emerge over time.

Figure 3-10: SunRail and Tri-Rail Compared to Commuter Peer Group – Casualty Rate (January 2009 – June 2018)

Note: 2018 rates are comparable to other years and only consider incidents in the first 6 months of the year
Source: CPCS Analysis of FRA Safety Data

Figure 3-11: SunRail and Tri-Rail Compared to Commuter Peer Group – Casualty Rate within Railroad Control (January 2009 – June 2018)

Note: 2018 rates are comparable to other years and only consider incidents in the first 6 months of the year
Source: CPCS Analysis of FRA Safety Data

3.8 Probable Causes of Florida Passenger Rail Incidents

Between January 2009 and June 2018, the cause of 54 percent of incidents in Florida was identified as "undefined." It is thus difficult to fully track the causes of railroad incidents due to incomplete reporting. Of the remaining 46 percent of Florida incidents where a probable cause was determined, 35 percent of incidents were found to be outside the railroad's control and 12 percent were within the railroad's control. During the same period, the cause of 51 percent of incidents nationwide was declared as "undefined." Of those where a probable cause could be determined, 33 percent of incidents were outside the railroad's control, and 16 percent were within the railroad's control.

The most frequent probable causes for incidents in Florida and the entire nation are as follows.

- → Trespassing: Florida 27 percent, nationwide 19 percent (outside of railroad control)
- → Equipment: Florida 9 percent, nationwide 9 percent (within railroad control)
- → Environmental: Florida 6 percent, nationwide 11 percent (outside of railroad control)

Figure 3-12 provides a list of probable causes for incidents in Florida. A full list of probable incident causes can be found in Appendix F. Incidents by passenger rail service (Amtrak, Brightline, SunRail, and Tri-Rail) are also provided for Florida.

Figure 3-12: Probable Cause of Florida Passenger Railroad Incidents (January 2009 – June 2018)

Probable Cause	FL Total	% of Total	Amtrak (Florida)	Brightline	SunRail	Tri-Rail
Outside Railroad Control	**196**	**34.8%**	**107**	**10**	**15**	**64**
Trespassing	154	27.3%	76	10	9	59
Environmental	34	6.0%	31		2	1
Trespassing, unrelated to using RCL*	3	0.5%			1	2

Undetermined	70	12.4%	7	1	13	49

*RCL: Remote-controlled Locomotive. Yellow cells are highlighted to show importance.
Source: CPCS Analysis of FRA Safety Data

The following observations can be made:

→ **Severe injuries arise predominantly from trespassing:** over 27 percent of Florida passenger rail incidents are related to trespassing. This rate is much higher than the US (19 percent), which is partly explained by the higher density urban areas that passenger lines traverse and the higher grade crossing density. Trespassing is the cause of 76.9 percent of incidents on Brightline, while the figure for Tri-Rail is also high at 50.4 percent.

→ 28.6 percent (12 incidents) of the total number of incidents are within the railroad's control on SunRail whereas, on Tri-Rail, the figure is 1.7 percent (2 incidents).

→ No railroad, other than Amtrak, has had an equipment-caused incident. **Most incidents are outside of railroad control.** This may be indicative of the newness of equipment (in some cases) and proper adherence to operating rules.

→ 58.2 percent of Amtrak incidents are classified as an undefined – with human factor involvement, whereas the other railroads range from 15.4 to 43.6 percent.

The most pressing issue in Florida is the high frequency of trespassing that occurs along passenger railroad tracks, especially when compared to lower frequency in the entire country.

3.9 Rail Network Density

Another way to benchmark Florida's safety record is by examining grade crossing density. Due to a number of factors, Florida has a higher-than-average number of grade crossings. Factors include dense urban areas, existing grade crossings as part of the existing street network, less grade separation due in part to the high water table and limestone topography, among others.

Rail density is the measurement of rail track miles per square mile and encompasses both freight and passenger rail lines. Figure 3-13 shows the top five states by rail density and also includes density for Florida and the US.

Figure 3-13: Top 5 States by Rail Density

Rank	State	Rail Density*
1	Illinois	0.12
2	Ohio	0.12
3	Indiana	0.12
4	New Jersey	0.11
5	Pennsylvania	0.11
33	**Florida**	**0.04**
	National Average	0.04
* - rail density is defined as track miles per square mile of land area		

Source: CPCS Analysis of 2010 AAR data

While Florida's rail network density of 0.04 mirrors the national average, its rail corridors tend to operate in densely built-up areas.

States that are most comparable to Florida's rail network density include North Dakota, Oklahoma, New Hampshire, Washington, Nebraska, and Texas. These states have a rail network density between 0.039 and 0.047 track miles per square mile of land area.

Florida's rail network density is similar to the rest of the country and does not have a disproportionate number of at-grade crossings for a state its size. However, the number of grade crossings in Florida is significant when accounting for its high population density, compared to the rest of the country.

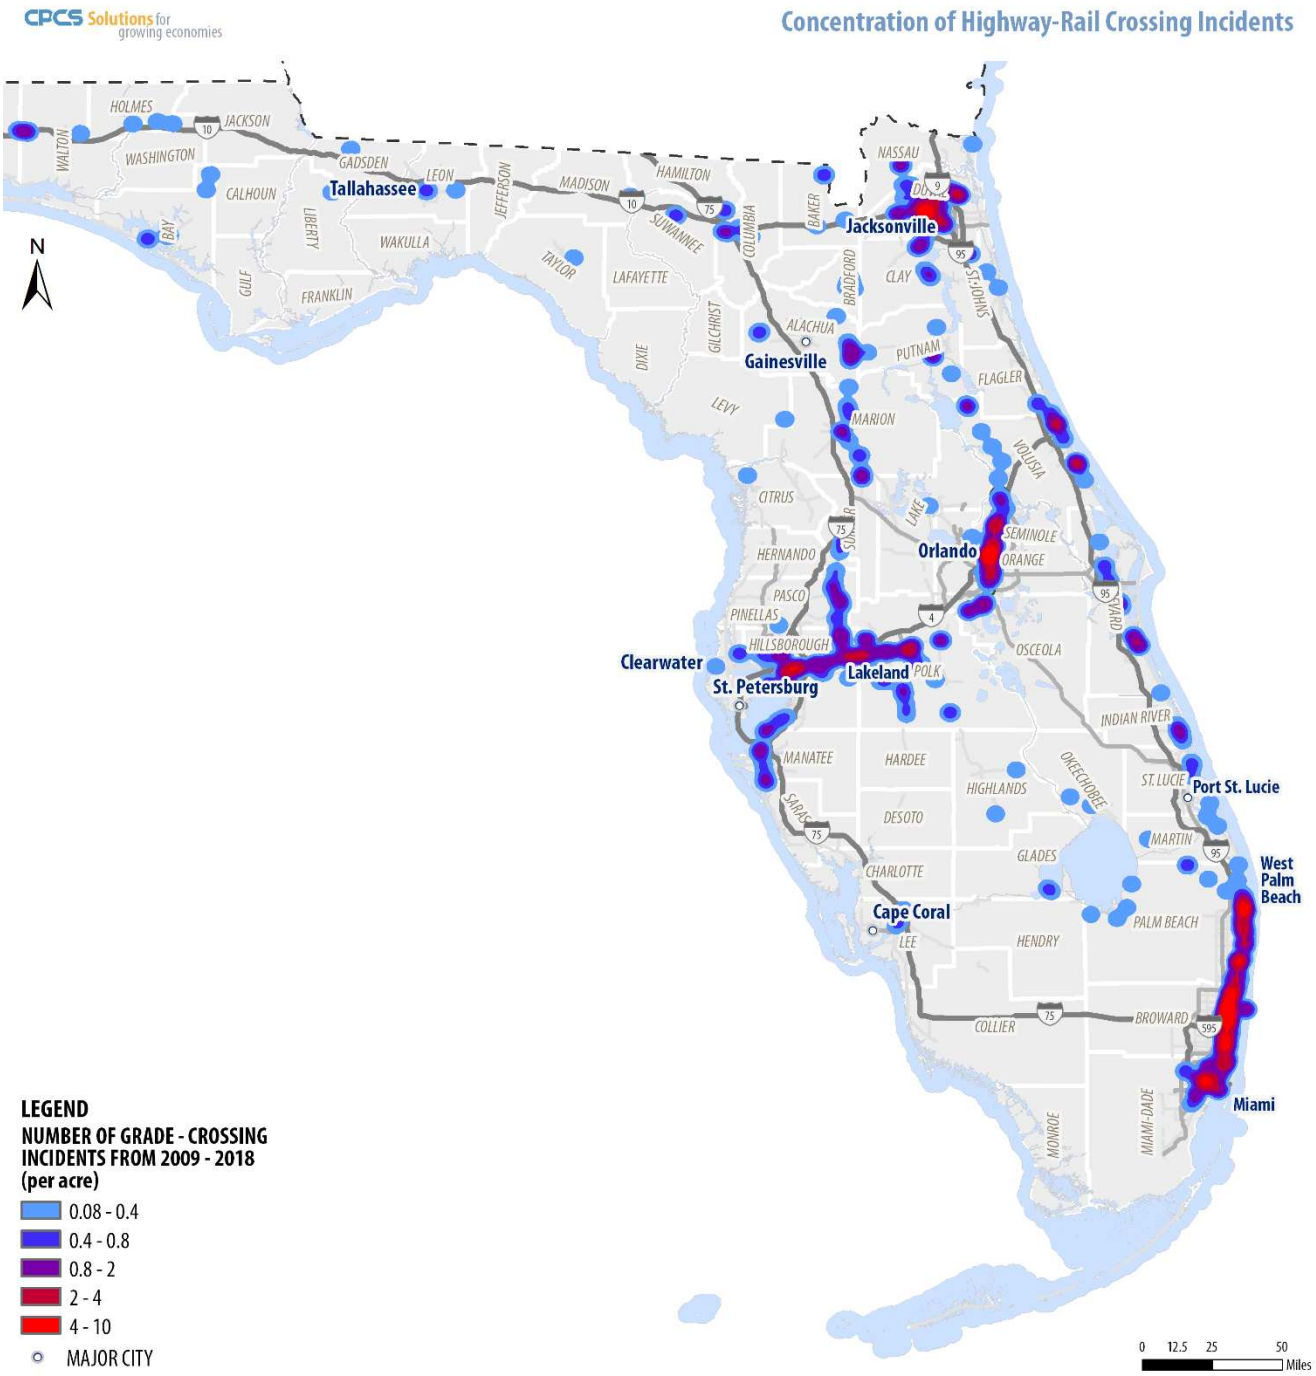
3.10 Florida Grade Crossing Inventory

This section assesses grade crossings in Florida by the number of incidents incurred. Grade crossing analysis includes both passenger and freight rail operations.

Between January 2009 and June 2018, 35 percent of the crossings along the existing Brightline segment (which is shared with FECR freight trains) had at least one incident. During the same period, 30 percent of crossings along Tri-Rail's line (which shares track with CSX) and 27 percent of crossings along SunRail's line (which also shares track with CSX) had at least one incident.[18]

Figure 3-14 lists grade crossings with at least one incident by passenger rail segment.

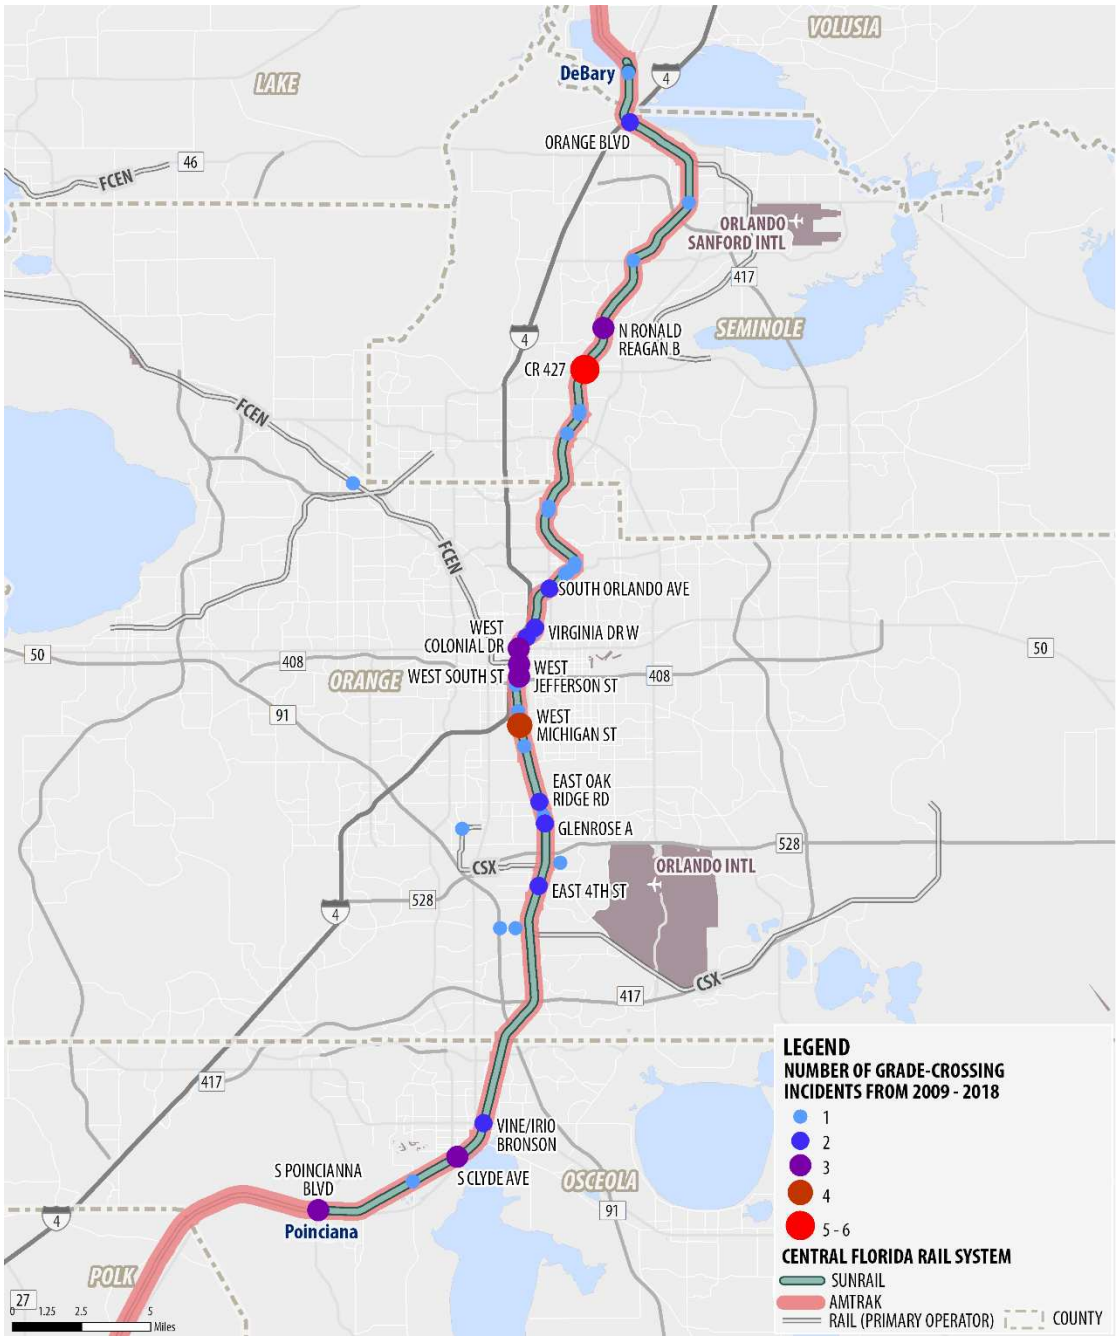
Figure 3-14: Grade Crossings by Passenger Rail Line with At Least One Incident (January 2009 to June 2018)



Passenger Rail Segment	Freight Railroad	Total Grade Crossings	# Crossings with 1+ Incidents	% Crossings with 1+ Incidents
Brightline (existing)	FECR	171	59	35%
Tri-Rail	CSX	150	45	30%
SunRail (existing)	CSX	157	42	27%
Amtrak	CSX	791	155	20%
Brightline Extension (proposed, currently FECR only)	FECR	192	22	11%
SunRail Extension (proposed, currently CSX only)	CSX	20	2	10%

Freight Operator: Freight railroad operating in the segment
Source: CPCS Analysis of FRA Safety Data

The locations of these grade crossing incidents are illustrated in the maps below. Figure 3-15 is a heat map of grade crossing incidents across the state over the last 10 years, where blue represents a lower concentration of incidents and red represents a higher concentration of incidents. Figure 3-16 provides a close-up map for Central Florida, and Figure 3-17 provides a close-up map for South Florida and a grade crossing incident map of the Florida East Coast Railway along the planned Brightline extension. Each dot represents a railroad crossing where at least one incident was reported between January 2009 and June 2018. The number of incidents at that crossing varies by dot color (from light blue – lower to red – higher). The dots that represent a higher number of incidents (red) are larger in size.



[18] Incidents are defined as resulting in at least one severe injury or fatality.

3.11 Importance of Grade Crossings in Densely-Populated Areas

The number of grade crossings by itself provides no meaningful information that could be used to understand the risk exposure. When comparing the number of grade crossings to the population, Florida is not present in the top 10 states. However, this comparison fails to capture the state's area. Instead of looking only at population, we will compare the number of railroad grade crossings and population density (population per area).

All else being equal, if two states have the same number of grade crossings, the state with a higher population (assuming the population density is the same) is more likely have a higher number of incidents due to higher traffic volumes.

In order to capture these two factors, the study utilizes a grade crossing density index. This index multiplied the number of grade crossings in each state by the population density, to determine how population dense each state's grade crossings are. The rationale for multiplying the two numbers is to show the states with both a high number of rail crossings and high population density. The higher the index, the more traffic each grade crossing is likely to experience.

$$Grade\ Crossing\ Density\ Index = \frac{number\ of\ grade\ crossings \times population\ density}{1\,000\,000},$$

where population density is measured as average population per square mile.

When calculating this index for Florida (the 10th densest state by population in the country), it ranks 8th for this index as shown in Figure 3-18. This means that Florida has both high population density and a high number of grade crossings compared to other states, which may increase the probability of having a larger number of grade crossing incidents.

Figure 3-18: Top States in Grade Crossings x Population Density

Rank	State	Grade Crossing count	Population Density (Population per sq. mi.)	Grade Crossing Density Index*
1	Illinois	26,006	225	5.85
2	Ohio	20,281	280	5.67
3	New Jersey	5,007	1036	5.19
4	Pennsylvania	16,858	277	4.68
5	New York	12,728	359	4.57
6	California	18,149	242	4.39
7	Indiana	16,715	185	3.10
8	**Florida**	**9,577**	**311**	**2.98**
9	Texas	27,032	103	2.78
10	North Carolina	12,638	191	2.41
*Grade crossing density index = number of grade crossings × population density / 1 million				

Source: CPCS Analysis of FRA Safety Database (as of Sep 2018)

3.12 Grade Crossing Incident Distribution

All 9,511 grade crossings in Florida were ordered by number of incidents as well as by number of casualties. The distribution of grade-crossings in Florida by number of incidents incurred is shown in Figure 3-19.

Figure 3-19: Distribution of Grade Crossings (January 2009 – June 2018)

Incident Count	Number of Crossings
0	9,005
1	393
2	69
3	24
4	11
5	7
6	2
Total	9,511

Source: CPCS Analysis of FRA Safety Data

Over the last 10 years, about 5 percent of Florida grade crossings incurred incident(s) with a severe injury or fatality.

Along the Tri-Rail line in South Florida, there are seven crossings that ranked in the top 11 for the number of incidents. Five of these are in Broward County, one is in Palm Beach County and another in Miami-Dade County. Along the SunRail line, one crossing in Seminole County ranked within the top 11. Along the Amtrak routes, two crossings ranked within the top 11, one in Hillsborough County and another in Duval County. One additional crossing along Brightline in Broward County had a large number of incidents and was also examined.

A summary table of the crossings analyzed is included below in Figure 3-20.

Figure 3-20: Top-11 Grade Crossings in Florida by Number of Incidents (January 2009 – June 2018)

Crossing ID	Rank	Street	Highway	County	Incidents	Fatalities	Injuries	Main Causes

3.13 Top 11 Crossings with Highest Number of Incidents

This section details Florida's top 11 crossings with the highest number of incidents.

Broward County:

1. Atlantic Boulevard (Rank 1)

The incidents at the Atlantic Boulevard crossing occurred between 2009 and 2017. One incident resulted in two fatalities and another in a severe injury. Based on the narratives included in the FRA database, all incidents involved a highway vehicle collision with a train and were due to improper maneuvers by road users (i.e. failure to stop at a crossing, stopped vehicle fouling mainline). One incident that occurred in 2017 was due to the driver attempting to beat the train to the crossing, resulting in death to both the driver and passenger. Another incident that resulted in a severe injury was caused by a stopped vehicle fouling the mainline.

Figure 3-21: Example of a W10-1 Railroad Crossing Advanced Warning Sign

A W10-1 Sign is a railroad crossing advance warning sign shown as a round yellow sign with a black border and legend. A black "X" covers the sign and two "R's" are shown in the left and right quadrants of the sign.

The type of safety devices at the Atlantic Boulevard crossing include a W10-1 advanced warning sign as shown in Figure 3-21, 4 gates, 2 bells, and an Emergency Notification System (ENS) sign[19]. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has nearby traffic signals but these are not integrated with the crossing protection.

2. Commercial Blvd (Rank 6)

Five incidents occurred at the Commercial Blvd crossing, all of them prior to 2013. One incident resulted in two fatalities and a severe injury and another incident resulted in a non-severe injury. The severe incident involved an improper manoeuver by a driver who crossed the tracks as the crossing arm was lowering. The vehicle was struck by a train, killing both the driver and passenger. The driver of a third affected vehicle also sustained severe injuries. The non-severe injury was sustained by a trespasser who claims they were struck by a train. Other incidents involved a vehicle mistakenly turning onto the railroad tracks and another stopping inside the gates when they were down.

The type of safety devices at the Commercial Blvd crossing include a W10-1 advanced warning system, 4 gates, 2 bells, and an ENS Sign. Pavement markings at this crossing include Stop Lines and Railroad Crossing ("RR Xing") Symbols. The highway has nearby traffic signals but these are not integrated with the crossing protection.

[19] A sign noting a phone number of where problems with crossing can be reported.

3. NW 62nd Street/Cypress C (Rank 3)

Five incidents occurred at the NW 62nd Street crossing, resulting in three fatalities and 8 injuries. All three fatalities resulted from roadway users circumventing the downed gates, two of whom were cyclists while the third was driving a vehicle. Another incident was caused by a vehicle collision with a train, resulting in 5 injuries. The last incident was caused by a driver striking the side of a locomotive. The driver sustained no injuries, although 3 train passengers later reported injuries due to the crash.

The type of safety devices at the Cypress Creek crossing include a W10-1 advanced warning system, 4 gates, 4 bells, and ENS Sign. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has nearby traffic signals but these are not integrated with the crossing protection.

4. New Griffin Road (Rank 7)

Five incidents occurred at New Griffin Rd crossing in the past 10 years. These occurred between 2011 and 2018. The incidents resulted in two fatalities and one injury. Both fatalities resulted from trespassers being struck by trains, one of whom went around a lowered crossing gate. Another injury was sustained by a trespasser crossing the tracks while the train was pulling out of the station. The engineer sounded the horn but the trespasser did not move away in time. The other two incidents involved an abandoned vehicle fouling the tracks and another involved a bicycle tire being struck by a train, neither has any reported injuries.

The type of safety devices at the Cypress Creek crossing include a W10-1 advanced warning system, 7 gates, 3 bells, and an ENS Sign. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has nearby traffic signals but these are not integrated with the crossing protection.

5. Oakland Park Boulevard (Rank 10)

There were four incidents at this crossing within the past 10 years. These resulted in three injuries and one fatality. Two incidents involved railroad employees, one of whom drove through the gates due to inattentiveness and struck an unoccupied vehicle, the other employee was stuck behind the gates and was struck by a train, sustaining injuries. The other two incidents involved train-vehicle collisions, one of which resulted in a fatality.

The type of safety devices at the Oakland Park Boulevard crossing include a W10-1 advanced warning system, 4 gates, 2 bells, and 5 crossbucks. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has nearby traffic signals but these are not integrated with the crossing protection. There are six traffic lanes crossing the railroad.

6. NE 3rd Avenue (Rank 11)

Four incidents occurred at the NE 3rd Avenue crossing, resulting in two injuries and 1 fatality. These occurred between 2013 and 2018. Two incidents resulted from vehicles getting stuck on

the tracks. The other two incidents resulted from a bicycle trespasser and another from a pedestrian trespasser who was lying on the tracks and failed to move as the train approached.

The type of safety devices at the NE 3rd Avenue crossing include a W10-1 advanced warning system, 2 gates, 1 bell, and 2 crossbucks. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has nearby traffic signals but these are not integrated with the crossing protection. There are four traffic lanes crossing the railroad.

Palm Beach County:

7. Linton Boulevard (Rank 4)

Five incidents occurred at Linton Boulevard crossing in the past 10 years, all of them before 2015. These incidents resulted in 3 fatalities and 7 injuries. The three fatalities were caused by highway vehicle operators driving through the crossing gate. The impact of one of these incidents resulted in 7 additional injuries to passengers. The other two incidents were caused by vehicles either stopped on the tracks or fouling the mainline.

The type of safety devices at the Linton Boulevard crossing include a W10-1 advanced warning system, 6 gates, 2 bells, and an ENS Sign. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has nearby traffic signals but these are not integrated with the crossing protection.

Miami-Dade County:

8. NW North River Drive (Rank 8)

Five incidents occurred at this crossing within the past 10 years. These occurred from 2010 to 2016. These incidents resulted in three injuries. Four incidents involved trespassing vehicles, three of which resulted in injuries. The fourth incident involved a truck pulling out of a nearby industrial facility.

The type of safety devices at the NW N River Drive crossing include a W10-1 advanced warning system, 2 gates, 1 bell, 2 crossbucks, and an ENS Sign. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has nearby traffic signals but these are not integrated with the crossing protection.

Seminole County:

9. County Road 427 (Rank 9)

Five incidents occurred at this crossing within the past 10 years, resulting in one injury. The incidents were caused mainly by vehicles fouling the track. The injury was sustained by a trespasser cyclist who was struck by a vehicle.

The type of safety devices at the County Road 427 crossing include a W10-1 advanced warning system, 4 gates, 2 bells, 4 crossbucks, and an ENS Sign. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has nearby traffic

signals but these are not integrated with the crossing protection. There are 4 road lanes intersecting the crossing.

Hillsborough County:

10. Tampa East Boulevard (Rank 5)

There were five incidents at this crossing within the past 10 years, resulting in 4 injuries. These were all due to vehicle trespassers. One incident involved a tanker-truck being towed by a tow truck.

The type of safety devices at the Tampa East Boulevard crossing include a W10-1 advanced warning system, 2 gates, 1 bell, no crossbucks, and an ENS Sign. The road across the railroad track has no median. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has nearby traffic signals but these are not integrated with the crossing protection. There are 2 road lanes intersecting the crossing.

Duval County:

11. Timuquana Road (Rank 2)

There were six incidents at this crossing within the past 10 years, resulting in 1 injury. Four of these were caused by vehicle trespassers, and two others were caused by unoccupied vehicles fouling tracks.

The type of safety devices at the Timuquana Road crossing include a W10-1 and W10-2 advanced warning system, 4 gates, 2 bells, no crossbucks, and an ENS Sign. The road across the railroad track has no median. Pavement markings at this crossing include Stop Lines and Railroad Crossing (RR Xing) Symbols. The highway has traffic signals, which control the crossing. There are 6 road lanes intersecting the crossing. This is at a non-NHS Federal-Aid highway.

More information on the top 50 Florida crossings by incident count is provided in Appendix E.

3.14 Grade Crossing Characteristics

This section analyzes the characteristics of all Florida grade crossings by the number of incidents they have incurred over the last 10 years. Figure 3-22 provides transportation characteristics for this set of grade crossings.

Figure 3-22: Transportation Characteristics by Grade Crossing Incidents (January 2009 – June 2018)

Number of Incidents at crossing	Annual Average Daily Traffic (AADT)	Average Trains		Avg. School Buses Per Day
		Per day	Per night	
0	14,660	2.1	1.7	4.7
1	15,023	6.7	5.3	15.1
2	18,779	11.0	8.1	19.2
3	22,623	13.5	8.3	30.6
4	27,390	17.2	10.8	19.5
5	32,842	23.0	12.1	37.0
6	37,900	20.0	10.0	70.5

Source: CPCS Analysis of FRA Safety Data & FDOT 2017 AADT values

Florida grade crossings with a greater number of incidents tend to also have higher average daily traffic (including school buses) and more train movements.

Figure 3-23 provides definitions for highway types, and Figure 3-24 analyzes grade crossing highway types by the number of incidents incurred over the last 10 years. Grade crossings with a higher number of incidents tend to be on state highway systems funded by the Federal-Aid Highway Program.

Figure 3-23: Highway Type – Definitions

Term	Definition
NHS	National Highway System
Non-NHS	State highway systems funded by the Federal-Aid Highway Program
Non-Federal Aid	Other roadways not funded by the Federal-Aid Highway Program
Other	Does not fit into the above categories
Unknown	Data not available

Source: CPCS Analysis of FRA Safety Data

Figure 3-24: Highway Type by Number of Incidents (January 2009 – June 2018)

# Incidents	# Crossings	Highway Types					
		NHS	Non-NHS	Non-Federal Aid	Other	Unknown	Total
0	9,071	3%	15%	49%	11%	22%	100%
1	393	4.6%	32.8%	45.8%	0%	16.5%	100%
2	69	-	53.6%	33.3%	0%	13.0%	100%
3	24	–	62.5%	29.2%	–	8.3%	100%
4	11	–	54.5%	36.4%	–	9.1%	100%
5	7	–	85.7%	14.3%	–	–	100%
6	2	–	100%	–	–	–	100%

Source: CPCS Analysis of FRA Safety Data

Most grade crossings in Florida do not have conventional stop signs, as indicated in Figure 3-25. Stop signs are only included where advanced warning signs are not present.

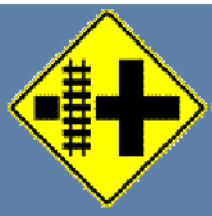

Figure 3-25: Stop Signs for Grade Crossings by Number of Incidents (January 2009 – June 2018)

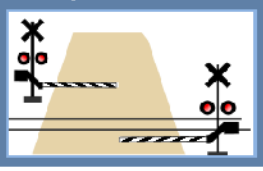
Number of Incidents	Percentage of Crossings with at Least One Stop Sign	Percentage of Crossings with at Least Two Stop Signs
0	8%	5%
1	13%	9%
2	12%	9%
3	12%	8%
4	0%	0%
5	0%	0%
6	0%	0%

Source: CPCS Analysis of FRA Safety Data

Many grade crossings in Florida are marked by other types of advanced warning signs, shown in Figure 3-26. The percentages represent the number of crossings where each sign is present, and 100 percent represents all the crossings that have seen the number of incidents, listed on the left side of the table. These crossings are categorized based on the number of incidents they have incurred between January 2009 and June 2018. Some grade crossings also have more than one advanced warning sign, while others do not report what signs they have.



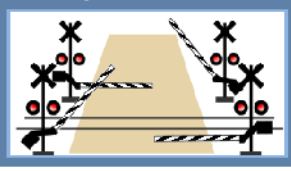


Figure 3-26: Advanced Warning Signs in Florida (in addition to the minimum required) for Grade Crossings by Number of Incidents (January 2009 – June 2018)

Number of Incidents	No Additional Warning Signs	 W10-1	 W10-2	 W10-3
0	8%	37%	0.2%	--
1	9%	62%	1%	--
2	9%	67%	6%	6%
3	4%	71%	4%	--
4	9%	73%	9%	--
5	--	100%	--	--
6	--	100%	50%	--

Source: CPCS Analysis of FRA Safety Data

The vast majority of incident cases in the FRA accident database do not report whether the gate provides full barrier resistance or is a set of median gates. However, some incident cases do provide the type of gate quadrant. Figure 3-27 provides the gate quadrant configuration for Florida grade crossings by the number of incidents over the last 10 years. The data on gate configuration is also not complete. Grade crossings with a 4-quadrant gate configuration do not allow going around railroad gates as easily as at crossings with 2-quadrant gates. Most incidents have occurred at crossings with 2-quadrant gate configuration.

Figure 3-27: Gate Configuration for Controlled Grade Crossings in Florida by Number of Incidents (Jan 2009-Jun 2018)

Item	Unknown Configuration	Uncontrolled	Crossbucks	Stop Sign	Bell Only	Lights Only	 2 Quadrant Gate	 4 Quadrant Gate
Total Incidents	90	10	38	7	1	23	476	48
% of total	13%	1%	5%	1%	0.1%	3%	69%	7%

Source: CPCS Analysis of FRA Safety Data

3.15 Chapter Conclusions

The following two key conclusions can be made from the analysis in this chapter:

- → Florida has a large number of grade crossings in populated areas, which contributes to its higher casualty rate than the national median.
- → Trespassing is a serious issue in Florida and needs to be addressed in a comprehensive manner, including a further detailed study of underlying causes.

AMERICAN OVERSIGHT

4 Safety Initiatives – Florida and Other Jurisdictions

4.1 Introduction

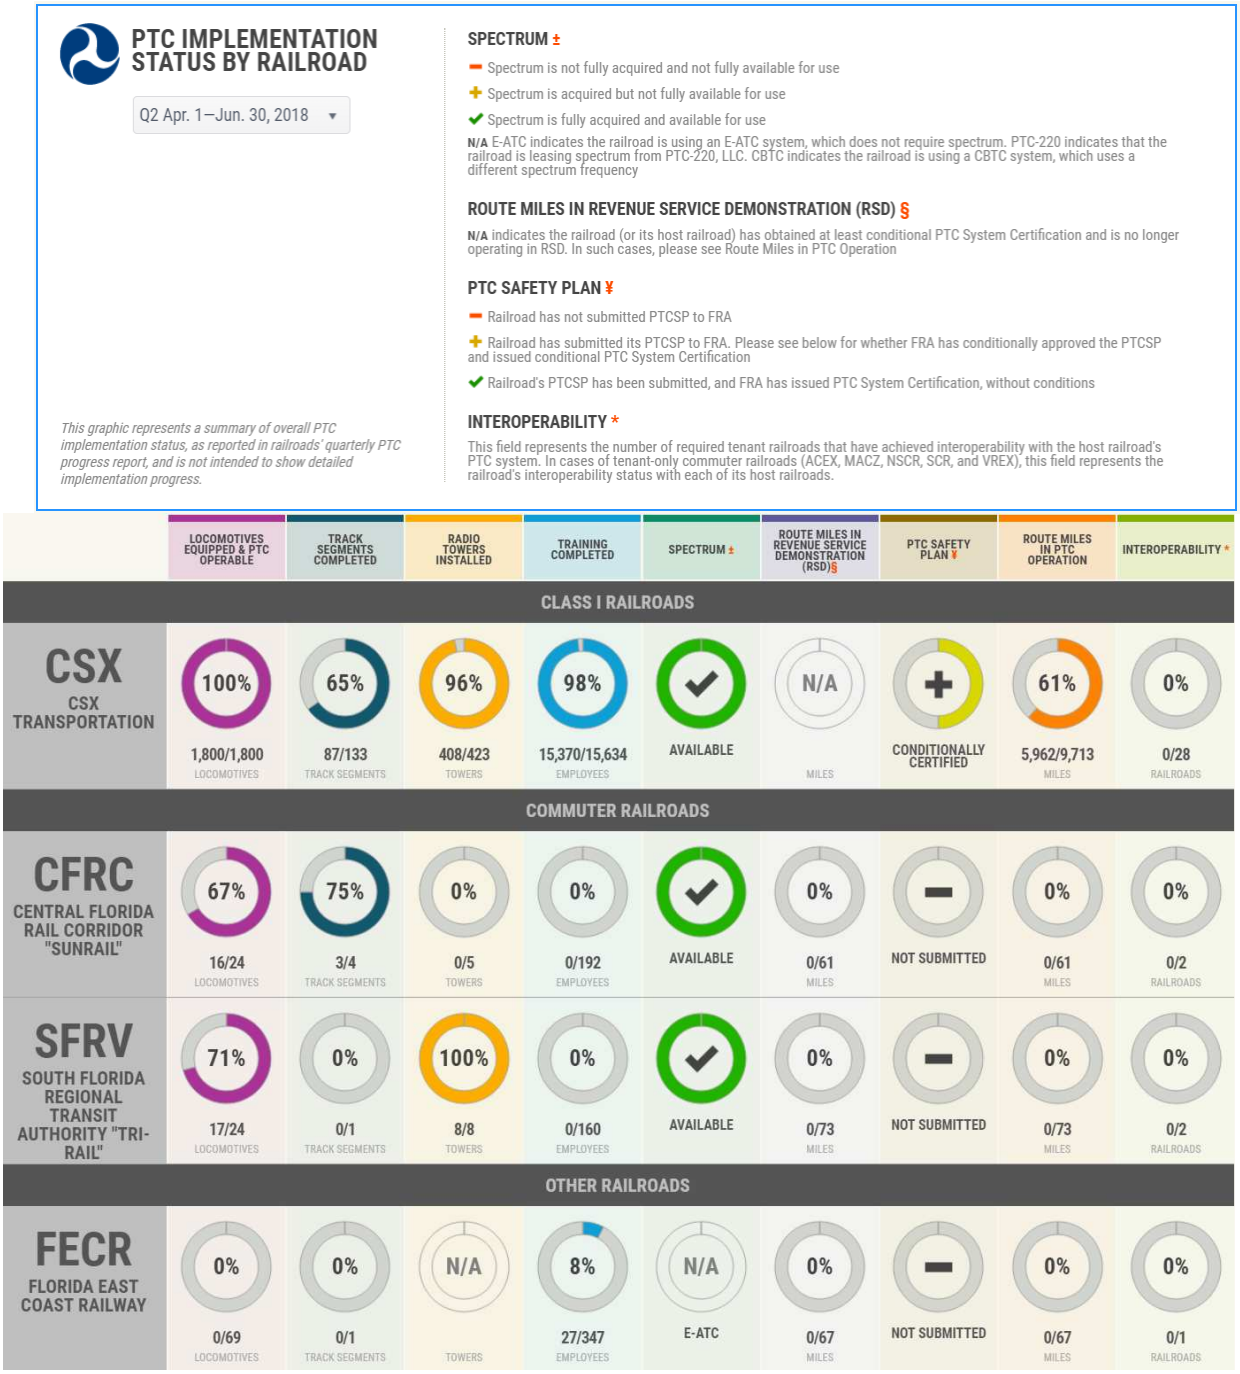
This chapter provides an overview of safety initiatives on the federal and state level pertaining to Florida, grade crossing best practices from our jurisdictions, and a discussion of Florida's railroad safety problem responsibility and mitigation efforts.

4.2 Federal Highway Administration (FHWA) Safety Initiatives

4.2.1 Positive Train Control (PTC) Implementation

Positive Train Control (PTC) is a new performance requirement that includes a set of next-generation signaling and communication systems intended to reduce the risk of train to train collisions, derailments due to excessive speed, incursion into work zones, and movement through a misaligned route. Trains will be tracked using a number of sensors and will only be allowed to move after receiving positive authorization for this movement. FRA has mandated that railroads implement the system by the end of 2018.

As part of the implementation process, railroads must install the necessary equipment on the locomotives and on or near the track, and update their train control center to ensure that it is capable of operating the equipment. Equipment will be installed on locomotives and next to the track. The type of equipment is dependent on the system: some systems use track circuits, while others use GPS and cellular devices to monitor train movement. The latter type of system requires radio antenna towers to be installed and a band of radio wave spectrum to be allocated to the system. All types of PTC systems can be overlaid on top of existing signaling systems. Not all systems are interoperable, and additional certification is required if multiple types of PTC systems are operating on the same stretch of track.



After the installation, the system must undergo a period of testing, which depends on the technology and the equipment manufacturer. In addition to the installation and testing of equipment, a railroad must submit a PTC Safety Plan (PTC-SP) and receive a PTC System Certification, as specified in 49 CFR 236.1015. Railroads also need to train their staff for PTC operation.

Signaling systems with similar requirements have been part of the industry standard for decades in Europe with proven accident-free operation.

AMERICAN OVERSIGHT CRS

The FRA maintains a "dashboard" of PTC implementation on its website, with data current through June 30, 2018. According to this dashboard, as of June 30, 2018, only CSX was close to implementing PTC on its network. Tri-Rail, SunRail and Florida East Coast Railway have only begun the process of PTC implementation in 2018 and are in the process of installing equipment. See Figure 4-1, below.

Figure 4-1: PTC Implementation Status as of June 30, 2018

Source: FRA PTC Dashboard

SunRail and Tri-Rail have signed contracts with Wabtec in February 2018 and May 2018, respectively, to implement PTC and equipment installation is proceeding. It is expected that both these lines will receive an extension to 2020 for full system implementation.

Florida East Coast Railway (where Brightline operates) has begun to implement PTC. Because of its existing advanced signaling system, it received a waiver from the FRA that allows it to postpone the completion of implementation by the end of 2020.

Amtrak's information was not immediately available. However, as Amtrak uses other railroads' track, it is up to the host railroad to ensure that PTC is implemented.

All rail systems in Florida are expected to be fully compliant with PTC requirements by the end of 2020. If a rail system does not implement PTC by the deadline, it may face penalties of up to $25,000 per day of operation.

4.2.2 Highway Safety Improvement Program (HSIP)

The FHWA's Highway Safety Improvement Program is a federal-aid program aimed at reducing traffic fatalities and serious injuries on all public roads, including non-state-owned roads and roads on tribal land. This includes highway-rail grade crossings. Some funding components are continuous and ongoing whereas others are grant-based. The HSIP is legislated under Section 148 of Title 23, was established in 1966 as the first Highway Safety Act and later reauthorized through the SAFETEA-LU (2005), MAP-21 (2012), and Fixing America's Surface Transportation (FAST) Act (2015). HSIP's budget is authorized by Congress from the Highway Trust Fund (HTF) and is subject to Federal-Aid obligation limitation.

The FAST Act authorizes a pre-apportionment set-aside (of $3.5 million per year) for safety-related activities. Then each state receives a lump sum of the fund to divide among different safety improvement programs. The states' apportionments are based on calculated percentages as defined in the Federal-Aid highway program funds under Section 104(c) (1) of Title 23.[20]

4.2.3 Railway-Highway Crossings Program (RHCP)

The Railway-Highway Crossings Program (RHCP) is a component of the HSIP and is also known as Section 130 Grade Crossing Funding. RHCP apportions funds to states (including Florida) by a federal formula, pursuant to the FAST Act for reducing/eliminating safety hazards at railroad-highway crossings. The Section 130 funds are available for all public crossing improvement projects whether the road involved in the crossing is a highway, secondary roadway, bike path, or even a pedestrian trail.

Under Section 130 program requirements, each state is required to conduct a survey of all railroad crossings to identify the need of relocation, grade separation, and improvement of safety devices. Any safety-related deficiencies are required to be corrected. States should also

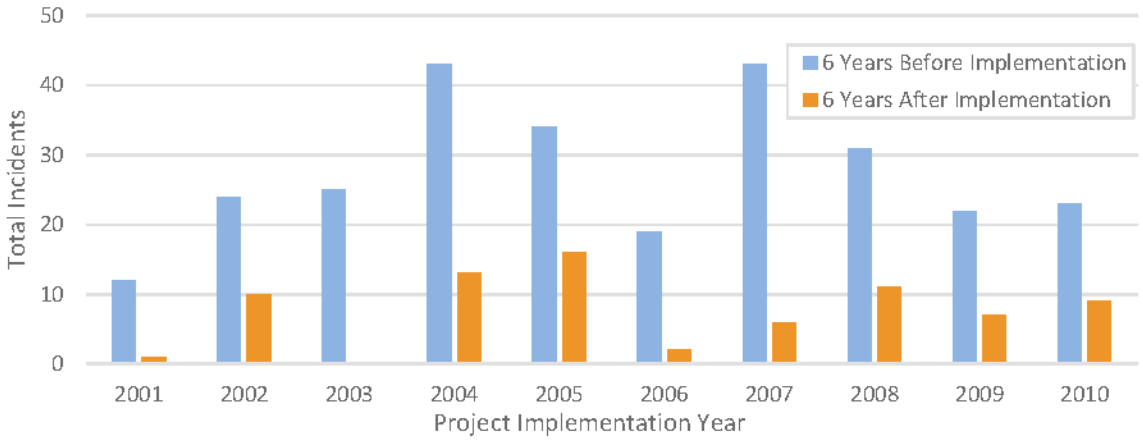
[20] USDOT "About Highway Safety Improvement Program (HSIP)" (August 2018).

report their RHCP implementation process to USDOT. Section 130 allocates 2 percent of the funding for data analysis and development of the supporting documents.[21] The following table shows the annual set-aside allocated for the RHCP nationwide. Florida funding levels are not available, as they vary depending on the percentage of gas tax raised.

Figure 4-2 shows the amount of funding that has been set aside for 2018-2020.

Figure 4-2: Annual US Funding Set-Aside for the RHCP

Fiscal Year	Set-Aside in Millions of Dollars
2018	$235
2019	$240
2020	$245



Source: USDOT "Railway-Highway Crossings (Section 130) Program Overview" (August 2018).

FDOT reports on Statewide Highway-Rail Grade Crossing Safety Improvement program annually to the FHWA. This program uses an algorithm to identify crossings with the highest risk in order to generate a list of possible candidates for crossing improvements. Improvement needs for these high-risk crossings are then verified by field diagnostic reviews conducted through collaboration between federal, state, local, and railroad participants. While safety-critical aspects that are identified as part of these reviews are required to be rectified, field diagnostic reviews operate on a consensus basis between the FRA, FDOT, local governments, and the railroads. The review results may be influenced by the railroad and any identified item that is not deemed to be absolutely safety-critical would be presented as a recommendation. Railroads can, therefore, choose to not implement field diagnostic review recommendations and the onus for funding recommended but not safety-critical improvements often are the responsibility of the county or municipality.

FDOT generates an annual Highway Safety Improvement Program report to the FHWA to demonstrate the effectiveness of improvements made for the timeframe spanning 12 years (6 years prior to the upgrade and 6 years after the upgrade) to evaluate the effectiveness of the program.[22] Part of this report focuses on the Statewide Highway-Rail Grade Crossing Safety Improvement Program. FDOT found that grade crossing incident totals decreased 61 percent after the implementation of numerous safety projects, falling from 23 to 9 from 2004 and 2016. Of those incidents, fatalities declined from 2 to 0. Incidents with serious injuries also decreased from 8 to 0 during the same time period. This data is summarized in Figure 4-3, which shows the implementation years 2001-2010 for the Highway Safety Improvement Program. Incident counts are shown for the 6 years before and after each implementation year.

[21] USDOT "Railway-Highway Crossings (Section 130) Program Overview" (August 2018).
[22] FDOT Highway-Rail Grade Crossing Safety Action Plan, 2011

Source: FDOT, in response to a data request

4.3 State Safety Initiatives

4.3.1 Education – Operation Lifesaver and Beyond

Operation Lifesaver is a national nonprofit education and awareness program that is focused on ending collisions, fatalities, and injuries at highway-rail grade crossings and on railroad rights-of-way. FDOT partners with this program to raise awareness of the dangers of trespassing on railroad rights-of-way. FDOT states that Operation Lifesaver is the most important educational tool nationally and in Florida to inform people of the tragic results that can occur by entering railroad right-of-way illegally.

Each of the passenger rail operators in Florida collaborates with Operation Lifesaver to raise awareness on trespassing dangers. FDOT coordinates with local communities, railroad officials, and volunteers to put together outreach events.

Tri-Rail and Brightline provide additional localized and tailored safety outreach campaigns through collaboration with FDOT to create local safety videos that speak to particular communities, Train Safety Week, social media initiatives, etc.

4.3.2 Engineering

Joint Rail Participation Agreements (JRPA)

JRPA's are funding agreements between FDOT and railroads to improve safety and railroad capacity. FDOT works with railroads within Florida to identify candidate projects that provide safety and capacity benefits to the state. After the project is identified and approved, the railroad and FDOT sign a JRPA. This grants FDOT authority to function adequately in all areas of appropriate jurisdiction, and associated funding is provided by FDOT to the railroad. The project costs, eligible for FDOT participation, are subject to legislative approval of appropriation requests, availability of funds, approval of all plans, specifications, contracts, or other obligating documents and all other terms of the JRPA, and FDOT approval of the project scope and budget.

These agreements generally provide a percentage of a project's funding by the state with the rest of the funding to be provided by other parties (railroads, local municipalities/counties). Railroads under a JRPA are subject to audits and/or monitoring by the department in accordance with Section 215.97 of Florida Statutes.

Optimization Model to Upgrade Rail Crossings

FDOT is currently conducting a study to create an optimization model for improving safety at grade crossings in the state. This new decision-support tool is intended to identify rail crossing candidates for upgrades, determine countermeasures for accident and severity reduction at selected rail crossings, account for operational constraints, and assist FDOT with efficient decision-making while taking into account available budget constraints. This study aims to identify the appropriate countermeasures that should be implemented at rail crossings such as:

- → installation of flashing lights at passive rail crossings with stop signs only
- → installation of gates at passive rail crossings with stop signs only
- → installation of gates at active rail crossings with flashing lights
- → grade separation (construction of bridges, overpasses, underpasses) and
- → implementation of methods aiming to improve traffic pre-emption before the arrival of trains at rail crossings such as advanced train detection systems, better coordination between signals at rail crossings and adjacent intersections, implementation of advanced traffic signal control systems, installation of appropriate warning devices, and so on
- → FDOT currently uses the FRA's crash prediction algorithm to prioritize railroad crossings improvements suggested by field diagnostic teams. FDOT is developing a more comprehensive model that will go beyond the FRA's algorithm by helping to determine countermeasures for safety incidents

4.3.3 Enforcement

State Rail Safety Participation Program – Inspection Performance Data

Florida's State Rail Safety Participation Program provides rail safety inspection performance data. Florida's Program includes at least one rail safety inspector for each of the five FRA inspection disciplines.

- → **Track:** inspections to ensure railroads meet minimum track standards, along with bridge and roadway worker inspections;
- → **Motive Power and Equipment:** inspections on passenger locomotives and cars, freight locomotives, and industries that conduct inspections and repairs of railroad rolling stock;

- → **Signal and Train Control:** inspections on signal and train control, periodic tests on signal equipment, and diagnostic review for signal safety enhancements;
- → **Operating Practices:** unannounced monitoring/surveillance activities to ensure compliance with operational regulations, along with scheduled audits;
- → **Hazardous Materials:** inspections in cooperation with FRA, Homeland Security, Transportation Security Agency, and local authorities; review of industry waiver requests; and conduct statewide hazardous material compliance inspections.

Pilot Study in Broward County: Law Enforcement Strategies to Reduce Trespassing

FDOT is currently conducting a pilot grant program with Broward County on law enforcement strategies to reduce trespassing. FDOT reports that Broward County's railroads have a high prevalence of homeless and intellectually disabled individuals around its tracks which leads to higher foot traffic. This program increases patrols in areas in and around the railway lines, utilizing specially trained law enforcement staff to reduce the number of trespass-related incidents and casualties.

4.4 Grade Crossing Safety: Best Practice and State of the Art

4.4.1 Best Practices in Other Passenger Rail Systems

Florida's rail system is unique due to the state's geology and high water table (which makes grade separation difficult) and the historical development of the urban fabric around railroads. While perfectly comparable systems are difficult to determine, Metrolink and Caltrain in California face similar circumstances as Florida. Due to the large concentration of at-grade crossings and high urban density surrounding these rail lines in California, both of these rail services have developed practices to improve safety over the last decades. Of note, California High-Speed Rail will share track with both Caltrain and Metrolink in the San Francisco Bay Area and in the Los Angeles area, respectively, with the plan in both cases to operate at higher than conventional speeds. The Illinois High-Speed Rail project is also comparable to Florida's higher speed rail plans due to its corridor upgrade project to 110 miles per hour with at-grade crossings.

Metrolink

Metrolink in Southern California is the nation's third-largest commuter rail system, serving the Los Angeles and Inland Empire region with a total of 409 unduplicated route miles. Metrolink operates a total of 2.8 million train miles per year and 400 million passenger miles per year.

After a number of high-profile crashes, in its 2015 fiscal year, Metrolink was the first railroad in the country to implement Positive Train Control (PTC) across its entire 341 route-mile network. PTC is a predictive collision avoidance technology that helps Metrolink avoid collisions and prevent over-speeding by stopping a train before an accident occurs. The main challenges with PTC implementation at Metrolink included the acquisition of 220MHz spectrum after bankruptcy by the holding firm; technology availability including special radios, a new

computer-aided dispatch (CAD) system, and a back office server (BOS) to support system interoperability; and a qualified technical workforce to implement PTC. The system cost an estimated $201.6 million.

Caltrain

Caltrain is a commuter rail system in Northern California, serving the peninsula between San Francisco and San Jose. Part of the original transcontinental railroad that was developed in the 19th century, Caltrain's corridor runs 51 miles with 31 stations and 134 passenger cars, operating in a dense urban area, similar to Florida. Over 18.5 million passengers ride the system's trains each year. Caltrain has historically experienced high levels of trespassing and grade crossing incidents. To reduce this problem, the railroad has been focusing on three aspects: engineering, education, and enforcement.

Caltrain has completed a number of grade separation projects along its line, including a $160 million grade separation above three streets in downtown San Bruno and a $25 million station reconfiguration and pedestrian underpass construction in Santa Clara.[23] It has added fencing in key locations to prevent trespassing. As the segment will share the right of way with the California High-Speed Rail line, it is planned to add vehicle detection and quad gates at grade crossings to further improve safety. The eventual (unfunded) goal is to develop a fully grade-separated railroad corridor.

In its education campaigns, Caltrain actively educates the public by giving rail safety presentations to schools and community organizations, by conducting a safety awareness campaign, and participating in rail safety organizations and mental health and suicide prevention organizations. This is similar to Tri-Rail and SunRail's efforts.

The system's Transit Police have been effective at enforcement. In 2016, the Transit Police removed more than 265 people from Caltrain property. They also prevented 32 possible suicide attempts by taking the person into protective custody and transporting them to an emergency treatment facility. The Transit Police also provide one-on-one education to people found illegally accessing Caltrain property.

Illinois High-Speed Rail

Illinois High-Speed Rail is a 284-mile long higher-speed rail line upgrade project from Chicago to St. Louis with a $1.95 billion overall budget, coordinated by Illinois DOT (IDOT) and regulated by the Illinois Commerce Commission; $194 million of this budget is designated for grade crossing, fencing, and overhead bridge work.[24] Union Pacific is the owner and dispatcher, while Amtrak is the service provider.

[23] Caltrain Fact Sheet Fiscal Year 2017

[24] Unlike FDOT, which is both a planning agency and a safety regulator, IDOT's rail mandate is limited to planning, while the role of the safety regulator is performed by the Illinois Commerce Commission.

As part of program development, IDOT conducted grade crossing and line safety analysis using field diagnostic teams. In addition to IDOT, these teams also included members from municipalities and counties, the Illinois Commerce Commission, the FRA, Union Pacific, and Amtrak. During the analysis, the Illinois Commerce Commission required a number of grade crossing upgrades and installation of fencing along key sections of the corridor.

The Illinois program's budget provided for identifying crossings for closure and approaching local counties and municipalities with incentive funding to voluntarily close grade crossings. A total of 38 grade crossings were closed as a result, and a further 213 grade crossings were upgraded. Pedestrian treatments were added to 80 crossings. Grade crossing upgrades include:

- → 4-quadrant gates: this includes two entrance gates and two exit gates. The exit gates are activated a few seconds after the entrance gates to prevent trapping vehicle on the crossing. This configuration prevents drivers from going around gates, as is more common with 2-quadrant gates;
- → pedestrian gates and escape swing gates where needed;
- → vehicle detection systems through inductive loops and tie-in into the signaling system. Vehicle presence detectors open exit gates if vehicles are detected in the crossing;
- → increased warning time to account for higher-speed trains;
- → improved roadway approaches to improve sightline profiles;
- → traffic signal interconnections with the signaling system; and
- → new signs and pavement markers.

Because it is guided by the FRA, IDOT's process is similar to FDOT's for new and upgraded grade crossings. However, as FDOT's mandate includes rail regulation, Florida does not have a separate rail regulator, unlike Illinois. The benefit of an independent railroad regulator in Illinois' high-speed rail project was direct and proactive involvement to require a series of safety improvements along key sections of the corridor.

As part of the Brightline expansion project, the FRA conducted a field grade crossing and line safety analysis, both for the initial operating segment and for the proposed expansion. The field assessment was performed together with FDOT, Brightline, Florida East Coast Railway, county and municipality representatives (usually county engineers).

In the US, these assessments are not conducted on a regular basis. While the FRA requires states with the highest highway-rail grade crossing collisions to develop a grade crossing action plan under 49 CFR 234.11, there are no requirements to perform such assessments on a regular basis. In Canada, Detailed Field Safety Assessments (DSA) are performed regularly. More information on the DSA process is described in Appendix G.

4.4.2 Innovative Technologies for Grade Crossing Protection

A number of innovative grade crossing protection technologies are being deployed across the United States and around the world. The practices that may be useful and not currently present in Florida include the following: innovative passive grade crossing treatments, vehicle wedge road barriers, vehicle presence detection, enforcement cameras, and possible pedestrian crossing treatments.

Innovative Passive Grade Crossing Treatment

Passive crossings (where no electronic warning devices are present) are statistically more dangerous than active crossings (where gates and/or lights are present). According to an FRA report from May 2017:

→ Crossings protected only by stop signs and/or crossbucks have more than five times the accident rate crossings with active protections; and

→ Crossings with no protection signs have 27 times the accident rate of crossings with gates.

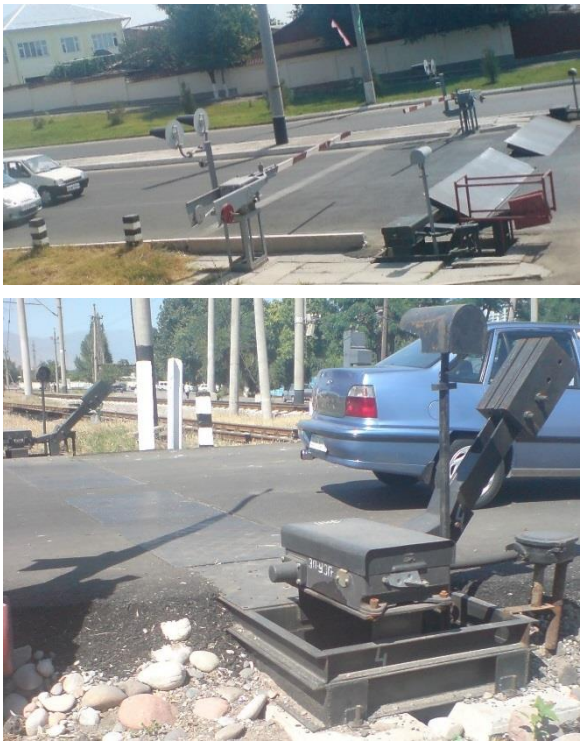
Those rates were determined by a "per car and per train" analysis of the more than 211,000 crossings in the FRA database. Approximately 30 percent of crossings in Florida are passive, though this includes industrial lines and sidings, where few incidents occur. Most mainline passive crossings in Florida are located in rural areas, with little car traffic going across the tracks.[25]

Figure 4-4: Example of a Buckeye Crossbuck

Source: Bureau of Transportation Statistics

Recent developments in passive warning devices (none of which are used in Florida) include the following:

→ "Buckeye Crossbuck" (also known as a Conrail Shield or IdaSheild) – is an aluminum panel coated with highly-reflective chevron stripes (typically red and silver), attached to the main post supporting a stop sign or crossbuck. The left and right sides of the panel are bent backward at a 45-degree angle so as to reflect the headlights of an approaching train toward the line of sight of approaching motorists. An example is shown in Figure 4-4. These have been proven to be effective in reducing incidents at uncontrolled grade crossings in Idaho.[26]



→ Electronically-enhanced stop, yield, and crossbuck signs fitted with flashing, high-intensity LEDs along their edges. Optional solar power makes them relatively easy and inexpensive to install and maintain, especially at remote locations.

[25] FRA Office of Research, Development, and Technology, 2017
[26] RP 223, Idaho Transportation Department, 2014

AMERICAN OVERSIGHT

→ Vibration Detection Technology is being developed by a European Union-funded project. The project developed a prototype of vibration detection sensors that could be installed at grade crossings with passive control to detect approaching trains and provide a cheaper way to signalize uncontrolled and non-signalized crossings.[27] This project is still in the development stage. This technology may be useful for installation at uncontrolled low-traffic railroad crossings in Florida in the future.

Figure 4-5: Vehicle Barriers at a Railroad Crossing

Source: Wikimedia Commons / Damir8888 (License: CC-BY-SA-3.0)

Vehicle Wedge Road Barriers

In some countries, wedge road vehicle barriers are used at railroad crossings to prevent vehicles from going around gates. Two examples of such devices are shown in Figure 4-5. While their installation became common after 2001 to control vehicle entrances to high profile public buildings, they are not routinely used in the US or Florida at railroad grade crossings.

When the crossing is activated by a train, the boom gates are first lowered, and then the hydraulically-operated barriers are raised automatically. If a vehicle becomes trapped, it can slowly drive over the barrier to exit the crossing.

These devices are usually placed at high-risk crossings with high levels of traffic. They are effective at preventing most 4-wheeled vehicles (including trucks and buses) from driving around lowered boom gates.

Wedge barriers are more expensive to install and require more maintenance than a typical boom gate. They can generally replace quad gates and can be integrated with vehicle presence detection sensors (see next section).

Wedge barriers could be considered for grade crossings in Florida with a high number of incidents and/or high traffic volumes.

Vehicle Presence Detection

Vehicle presence detection uses an inductive loop to detect vehicle presence within the crossing area. This sensor is usually installed together with quadrant boom gates (2 entrance gates to

[27] https://cordis.europa.eu/result/rcn/226583_en.html

prevent vehicles from entering, and 2 exit gates to prevent vehicles from going around boom gates). The vehicle presence sensor identifies when it is acceptable to close the two exit gates.

The sensor can also be into the train control system to alert the train engineer of a detected vehicle at an upcoming crossing, and, if the signaling system allows it (as would some PTC systems), slow the train down automatically. FRA suggests using these sensors at grade crossings with higher-speed train operation.

The higher-speed rail project in Illinois between Chicago and St. Louis has installed vehicle presence detection sensors at all grade crossings with planned higher-speed operation. These sensors are tied to the signaling system as described above.

An example of a vehicle presence detection system installation at a grade crossing in Illinois is shown in Figure 4-6. In Florida, Brightline is planning to install vehicle presence detectors along its extension between West Palm Beach and Cocoa.

Figure 4-6: Vehicle Presence Detection Installation Sensors

Source: 2014 Global Level Crossing Safety & Trespass Prevention Symposium, Urbana, IL

Enforcement Cameras

Cameras can be installed to capture vehicle violations at grade crossings. The camera works like a red light camera: when a vehicle crosses a pre-defined threshold (boom gates), the camera records a series of images and/or video. The vehicle owner is then identified and a citation is issued against the vehicle, with photo and/or video proof of the violation.

Enforcement cameras are not substitutes for 4-quadrant gates, or other safety features, but can work in conjunction with other treatments. In the US, the North Carolina Department of Transportation (NCDOT) has tested video citations for violations at-grade crossings, as part of its sealed corridor program.[28] The goal of the program was to minimize the number of potential interactions of road vehicles and pedestrians with trains by minimizing the number of crossings, upgrading other crossings and installing deterrents (e.g. fencing) to prevent trespassing. NCDOT found other measures to be more effective at deterring violations at grade crossings.

[28] https://connect.ncdot.gov/resources/Rail-Division-Resources/Documents/Sealed%20Corridor%20Handout.pdf

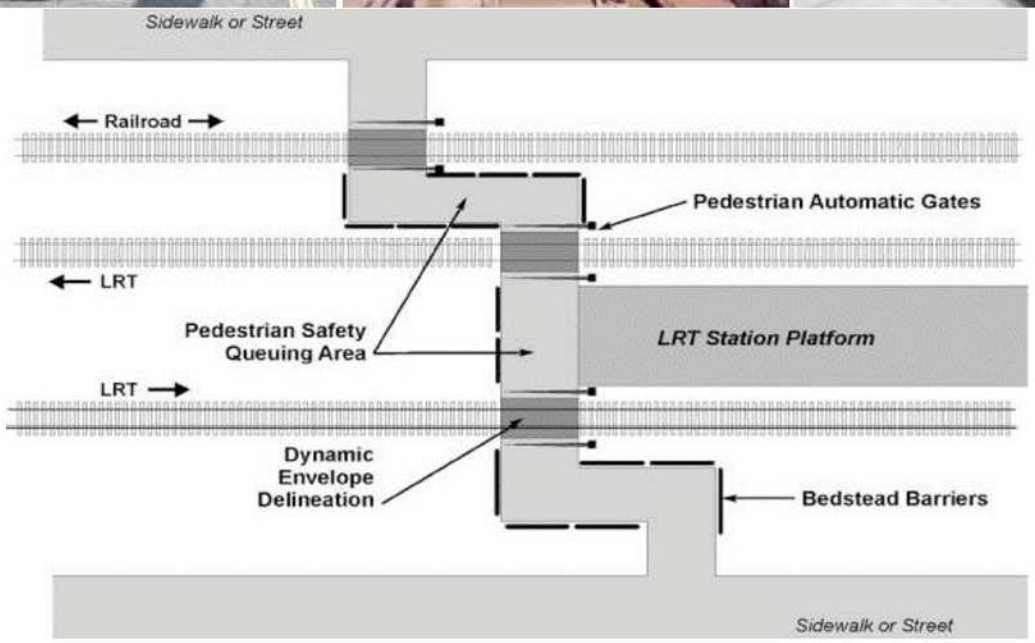
A recent court decision in Florida confirmed the legality of red light cameras.[29] However, enforcement cameras are not used at railroad crossings in Florida.

Possible Pedestrian Crossing Treatments

The 2007 edition of the FHWA Railroad-Highway Grade Crossing Handbook discusses a number of treatments that should be considered for pedestrian crossings. Some suggestions include

- → ensuring that pedestrian crossings are provided at appropriate intervals to discourage pedestrians from taking shortcuts;
- → installing fencing at key locations to prevent pedestrians from crossing in-between crossings;
- → designing grade crossings to channel pedestrians through appropriate gates; and
- → ensuring that the crossings are adequately engineered and that educational campaigns and enforcement efforts are in place.

The handbook discusses some treatments for high-pedestrian areas, such as those around light-rail stations. These treatments may also be applicable to crossing designs for heavy rail systems. Some design treatments include



- → creating an obstacle in approaching the crossing to force pedestrians to look in both directions before crossing;
- → fencing off areas around crossings to prevent pedestrians from walking around gates; and
- → adding exit swing gates to ensure that pedestrians are not trapped when the gates are down.

Florida's railroads currently use pedestrian boom gates when pedestrian sidewalks are present. However, at most crossings, little to no fencing around these pedestrian gates is present, with nothing preventing pedestrians from walking around gates that are down. In Florida, exit swing gates are usually not installed because no fencing is present.Figure 4-7 provides examples of pedestrian treatments at grade crossings, including fencing around a crossing and escape push gates (left), obstacles that deflect a pedestrian's intended path and require them to look in both directions before crossing the tracks (center and bottom) and a Z-shaped crossing, nudging pedestrians to look in the direction of approaching trains.

4.4.3 International Research Projects on Grade Crossing Safety

SAFER-LC

Safety at grade crossings is an issue for railroads worldwide. The European Union is funding a research project, SAFER-LC, which aims to improve safety and minimize risk by developing a set of solutions and tools for level-crossing infrastructure.[31] Its main objectives include the following.

→ Developing a toolbox to help both rail and road managers to improve safety at level crossings.

[30] Korve, Hans W., Jose I. Farran, Douglas M. Mansel, et al. Integration of Light Rail Transit into City Streets. Washington, DC: Transit Cooperative Research Report 17, Transportation Research Board, 1996.
[31] http://safer-lc.eu/

AMERICAN OVERSIGHT

- → Developing and demonstrating how new technological and non-technological solutions can be integrated into level crossings.
- → Delivering a bundle of recommended technical specifications, human processes, and organizational and legal frameworks to improve safety.
- → Developing innovative solutions to enhance the safety of level crossings for road and rail users.

The project is being coordinated by the International Union of Railways (UIC) and is comprised of 17 industry and academic partners from 10 different countries, including Belgium, Finland, France, Germany, Greece, Hungary, Italy, Norway, Spain, and Turkey.

The project work packages include:

- → analyzing best practices worldwide and developing a set of requirements and recommendations to be taken into account for developing and evaluating grade crossing treatments and developing a risk analysis tool that will be applied to further work in the project
- → developing a framework for evaluating human factors and using the framework for producing a set of low-cost high-impact technological and non-technological measures to improve safety
- → developing and piloting a set of high-tech solutions to improve grade crossing safety
- → performing a cost-benefit analysis for suggested solutions
- → disseminating results

The project began in 2017 and is currently half-way through its process. While the project is focused on the European Union, it should provide a number of recommendations that can be implemented in other parts of the world. FDOT and the FRA should follow this project and determine if its recommendations are applicable in Florida.

4.5 Problem Responsibility and Mitigation

Florida is experiencing unprecedented population growth, particularly in southern and central parts of the state. This contributes to traffic congestion along roadways that are largely integrated with rail crossings. This section focuses on related safety issues.

4.5.1 Trespassing Mitigation

It is more difficult to enforce trespassing laws along railroads in Florida due to weaker trespassing statutes than in other states.[32] Additionally, because there is not a dedicated

[32] https://www.fra.dot.gov/StateLaws

railroad police force with enforcement powers, Florida municipal and county law enforcement agencies are responsible for ensuring that trespassers are identified, detained and then prosecuted. This creates a gap in coordination, especially if counties and municipalities do not see this issue as a priority. While a number of Florida passenger rail systems have security guards on their trains, this personnel does not have arrest powers. Furthermore, coordination within a rail system is needed to ensure that information about trespassers is passed on to both train engineers and law enforcement personnel.

Camera installation at Florida crossings was considered in 1995, but the Federal Railroad Administration delayed this process due to liability issues associated with privacy and state law. Red light cameras at Florida intersections were considered unconstitutional until May 2018.[33] Many municipalities are choosing to continue their bans on cameras, and the Florida Department of Transportation has chosen to hold off on camera installation at crossings to ensure that they would be compliant with state law.

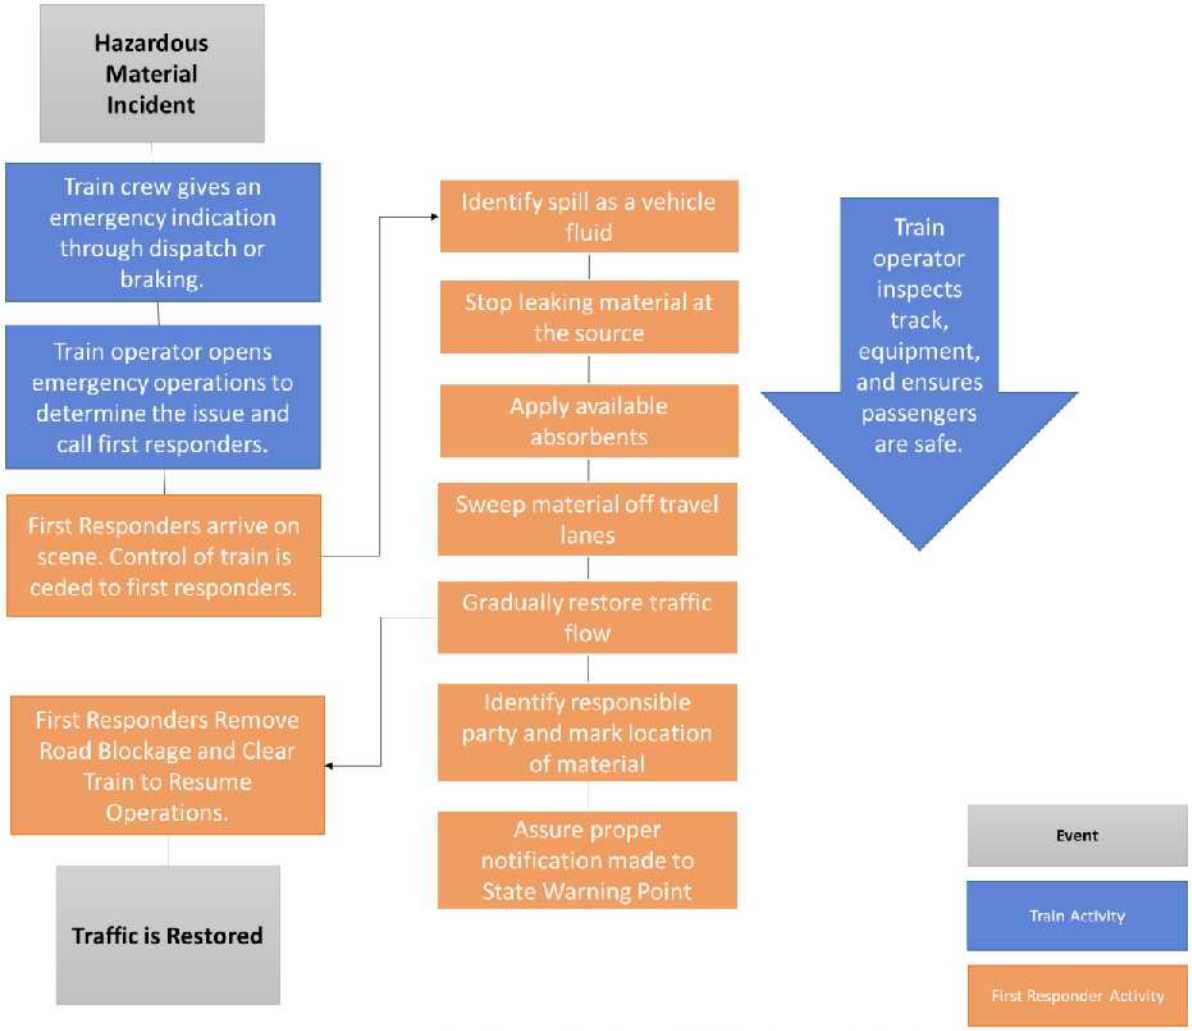
4.5.2 Unplanned Train Stops

Local cities in Florida have raised the issue of unplanned train stops at highway-rail crossings. Such stops make it difficult to plan and coordinate emergency response. They also contribute to traffic congestion in areas urban areas. In response, many local jurisdictions conduct annual tabletop emergency response exercises to find alternate routes when roads are blocked by a train. Florida Statutes, section 351.034 regulates how railroads must address the issue of prolonged stops, including separating the train and allowing the emergency vehicle to proceed through the crossing. There are no time limits on how long a train may occupy a crossing.

4.5.3 Hazardous Materials

Cities along existing passenger lines are also concerned about the release of hazardous materials for both rail-rail and vehicle-rail collisions. The FRA regulates railcar design requirements to mitigate hazardous material releases. The FRA also regulates the transportation of hazardous material that is used for fuel as part of the Locomotive Inspection Act. Additionally, the FRA sets notification requirements from railroads to first responders when hazardous material is released. The requirements are detailed in Chapter I of subtitle B of Title 49 of the Code of Federal Regulations (CFR), and they require carrying a manifest that identifies what types of hazardous materials are carried in the train and the location of the cars within the train consist.

To reduce coordination issues with first responders during an incident, the Florida East Coast Railway offers a secure website, which gives local emergency service staff access to real-time data to identify specific hazardous materials carried by each train. To our knowledge, other railroads do not have similar information systems. There are no requirements to have such a system in place.



[33] Jimenez v. Florida, Florida Supreme Court

AMERICAN OVERSIGHT

Vehicles and railroad cars carrying hazardous materials are required to be labeled with hazardous material placards, ensuring that hazardous materials can be identified and treated in an appropriate and timely manner by local first responders. Train engineers and conductors must also carry manifests that identify which cars in the train carry hazardous materials and what the hazardous material is.

Figure 4-8 provides a high-level flowchart of what must happen when a hazardous materials incident occurs in Florida. For both rail-rail and rail-vehicle incidents involving hazardous materials, rail traffic is stopped on the line until first responders remove any damaged hazardous materials and clear trains to resume operations.

4.6 Chapter Conclusions

4.6.1 Grade Crossing Safety: Best Practice and State of the Art

A number of innovative technologies could be implemented in Florida in certain locations. These include innovative treatments for passive crossings such as the Buckeye Crossbuck or vibration detection sensors, vehicle wedge road barriers that can be supplemented by vehicle presence detectors and/or crossing enforcement cameras.

The FHWA has developed a guidebook that includes innovative pedestrian treatments. FDOT should consider approaches from this guidebook and provide related guidance to local communities regarding how and when to use such treatments.

As the topic of grade crossing safety is important worldwide, the State of Florida should look at international work on this subject. One such project, SAFER-LC, is funded by the European Union. It aims to develop both technological and non-technological innovations in this area by bringing together industry and academia from 10 different countries.

4.6.2 Putting to Use Best Practices in Grade Crossing Design and Management

While there are federal guidelines for railroad grade crossing design, the highway asset owner (Florida DOT, county, or municipality) must ultimately work with railroads to develop appropriate grade crossing treatments. Defining grade crossing treatment standards falls under the jurisdiction of FDOT. As many localities lack the resources and expertise in rail engineering, FDOT should provide guidance and assistance on this issue by:

- → developing state-wide grade crossing design standards and/or guidelines as well as a set of best practices;
- → developing an analytical tool to assist local and county governments in evaluating whether existing grade crossing treatments are adequate and what other treatments are possible (including crossing closure);
- → providing local communities with resources and information on sources of funding for upgrading grade crossing safety (e.g. federal grants); and
- → creating and facilitating an environment for open dialogue between local communities and railroads.

AMERICAN OVERSIGHT

5 Florida Rail Regulations

5.1 Introduction

This chapter summarizes the delineation of federal and state jurisdictional and regulatory powers pertaining to passenger rail safety, regulations for faster rail operations, and regulations for enforcement and incident management. It also summarizes consultations with regulatory agencies that were conducted to understand agency viewpoints and assess overall regulatory capacity.

5.2 Review of Jurisdictional and Regulatory Powers

When federal standards for railroad operation and safety requirements exist, they preempt state standards. States may adopt laws and regulations and issue orders that are compatible with and are more stringent than those of the Federal Government in order to eliminate local hazards, as long as the laws do not unreasonably burden interstate commerce. States may adopt laws and regulations and issue orders for any areas of railroad safety and security where the Federal Government has not provided such laws, regulations, and orders.

The Federal Railroad Administration (FRA) is responsible for regulating railroads at the federal level, while the Florida Department of Transportation (FDOT) is responsible for regulations at the state level. A combination of federal, state and local laws fulfills rail safety requirements and sets out appropriate responsibilities. Most regulations relate to engineering and operational safety.

Generally, if a railroad is engaged in transportation-related activities, federal law will likely pre-empt state and local attempts to regulate railroad operations and safety.

Paragraph 20106 of Title 49 of the US Code deals with preemption of regulation at the federal level. The paragraph requires nationally-uniform railroad laws, regulations, and orders, related to railroad safety and security. This paragraph, however, also allows states to implement more stringent state laws, regulations and orders than those at the federal level in order to "eliminate or reduce an essentially local safety or security hazard" provided that they are "not incompatible with a law, regulation, or order of the United States Government" and the state law or regulation "does not unreasonably burden interstate commerce."

This implies the following for railroad safety laws, regulations, or orders.

AMERICAN OVERSIGHT

- → States may adopt laws and regulations and issue orders for any areas of railroad safety and security where the Federal Government has not provided such laws, regulations, and orders.
- → States may adopt laws and regulations and issue orders that are compatible with and more stringent than those of the Federal Government to eliminate local hazards, provided that these laws do not "unreasonably burden interstate commerce." The level of burden to interstate commerce has in the past been defined by case law.

As an example, a number of states have laws that require fencing along the railroad right of way in rural areas (against cattle) and/or urban areas (against trespassers). Through court cases, these laws have been found not to be burdensome to interstate commerce.[34]

After different states adopt different rules/regulations about a specific issue, railroads may ask the FRA through a rulemaking process to create a uniform rule and/or regulation.

5.2.1 Federal Government Rail Regulation

Generally, relevant up-to-date federal-level legislation is written into the US Code Title 49 for transportation-related issues. Most railroad-related federal legislation is found in Title 49, Subtitle V of that title (§§ 20101 to 28505). Title 49 resulted from an effort to streamline transportation-related laws and regulations (including Title 45 of the USC) by Public Law 103-272 of 1994.

Mandate of the Federal Railroad Administration (FRA)

FRA develops and enforces regulations codified in parts 200-299 of Title 49 of the Code of Federal Regulations that are related to safe operation of railroads. These sections deal with railroad certification, operations, and safety.

The mandate of the FRA is established by 49 USC 103. Its mandate includes ensuring the safe operation of railroads as prescribed by Chapters 203 through 211 of 49 USC. It has the authority to penalize entities when safe operations are not performed. Additionally, the FRA's mandate includes developing, promoting and supporting the development of the rail sector in the US, as prescribed by subsection (j) of 49 USC 103.

FRA assists other agencies with enforcement of some laws for entities that come under its jurisdiction. Examples include noise emissions as regulated by the EPA through the Noise Control Act and accessibility as required by the Department of Justice through the Americans with Disabilities Act (ADA). In both cases, other agencies develop standards and regulations while the FRA develops in-kind regulations to enforce these standards and regulations for railroads under the jurisdiction of the FRA.

[34] New York State Railroad Law 52; Nebraska Revised Statute Ch. 74 Sect. 74-601 and 74-602; Oklahoma 2017 Statute, Title 66. Railroads §66-141.

AMERICAN OVERSIGHT

FRA Jurisdiction

FRA's jurisdiction includes the interstate railroad network and generally does not include railroad systems that are not connected to the national rail network. Urban railroads (e.g. subways) come under the jurisdiction of the Federal Transit Administration (FTA). Jurisdiction over passenger commuter rail lines tends to overlap between the FRA and the FTA, where they are subject to FRA safety and operating requirements and FTA funding requirements. Appendix A to 49 CFR 209 delineates the line between the FTA and the FRA. If a conflict occurs, FRA's safety rules prevail over FTA's safety rules.

FRA Rulemaking Process

FRA can amend the Code of Federal Regulations through its rulemaking process. Once a potential rule is identified, the agency may issue a notice of inquiry (NOI) to gather comments from stakeholders, followed by a Notice of Proposed Rulemaking (NPRM). After a mandatory comment period, an amended NPRM may be issued to gather further comments, before a rule is adopted.[35]

Relevant Federal Legislation

Appendix H provides an overview of some relevant acts that govern railroads at the Federal level that have been codified in Title 49 of the US Code.

5.2.2 Florida State Rail Regulation

Relevant Florida statutes include Title XXVI, which defines how all types of public transportation are regulated, and Title XXVII, Chapter 351, which deals specifically with railroads. A combination of these statutes provides the regulatory rail safety authority for state organizations, including regulatory authority and guidance for grade crossing safety, crossing access for emergency vehicles, track and equipment rules and penalties, safety inspections, and responsibilities of the state versus the federal government.

Florida Statutes direct FDOT to coordinate with railroads in developing and implementing a statewide rail program to ensure the proper maintenance, safety, revitalization and expansion of the rail system.

Section 20.23 of Florida Statutes gives the Florida Department of Transportation (FDOT) powers to regulate and enforce federal and state-level legislation.

[35] https://www.federalregister.gov/uploads/2011/01/fr_101.pdf

Section 341.302 of Florida Statutes prescribes the duties and responsibilities of the Florida Department of Transportation (FDOT) in relation to Florida's transit, commuter and intercity passenger rail program.

FDOT is able to regulate on a state level through its rulemaking process, by adopting regulatory rules in the Florida Administrative Code (F.A.C.).

FDOT has produced a number iterations of the Florida Rail System Plan, the most recent one in 2010, as well as a Rail Handbook that identifies and designates responsibility for rail processes within Florida.[36]

Another important state rule specific to rail safety is Chapter 14-57 of the *Florida Administrative Code*: Railroad Safety and Clearance Standards, and Public Railroad-Highway Grade Crossings.[37] This rule adopts the federal minimum rail safety standards and prescribes reasonable requirements governing clearances above, beside, and between railroad tracks in Florida.

5.2.3 Relevant Regulation on Railroad Operations

New Rail Line Application/Certification Process

Regulations

New rail lines are required to seek Surface Transportation Board (STB) certification in order to comply with the federal regulatory process. This process generally includes an environmental review, as prescribed by the National Environmental Policy Act (NEPA). Decisions regarding new rail service are governed under Title 49 USC 10901 and 10902 as well as 49 CFR 1150. An application is required:

> *"…for a certificate of public convenience and necessity authorizing the construction, acquisition or operation of railroad lines. Noncarriers require Board approval under section 10901 to construct, acquire or operate a rail line in interstate commerce. Existing carriers require approval under section 10901 only to construct a new rail line or operate a line owned by a noncarrier, since acquisition by a carrier of an active rail line owned by a carrier is covered by 49 U.S.C. 11323. We have exempted from these requirements the acquisition by a state entity of a rail line that has been approved for abandonment, as well as operations over these lines."*[38]

Applications filed must include the information set forth in 49 CFR 1150.[39] The applicant must also comply with the Energy and Environmental Regulations described in 49 CFR 1105 and 1106, including consulting with the Board's Office of Environmental Analysis at least 6 months prior to filing an application to begin the scoping process to identify environmental issues and outline

[36] Rail Handbook, FDOT, January 2012
[37] Florida Department of State, Florida Administrative Code & Florida Administrative Register
[38] Subpart A – Applications Under 49 U.S.C. 10901
[39] Includes: Overview, Information about applicant(s), information about the proposal, operational data, financial information, environmental and energy data, summary of proposal for notice, and other procedures.

procedures for analysis of this aspect of the proposal. As part of the procedure, an emergency preparedness plan must be developed and certified.

The procedure involves a final certification prior to commencing commercial service. The final inspections may be done together with FDOT to ensure that the new railroad is compliant with both federal and state laws and regulations.

FDOT was required to get approval from the STB to purchase the SunRail and Tri-Rail right of way. The STB ruled that FDOT could proceed without the Board's involvement, as the requirement to provide freight rail services to customers was to remain with the freight operator CSX. Brightline/All Aboard Florida successfully argued that the STB did not need to provide approval for its services, as the system was not an interstate one. In all three cases, a required NEPA process was completed.

FRA New Start Passenger Rail Program

The FRA runs this program to provide development and support to new passenger railroads. The program

- → assists with the development of regulatory compliance programs;
- → provides support for system safety and hazard analysis;
- → provides support for passenger rail equipment; and
- → provides coordination between FTA, state oversight, railroad management, and other stakeholders.

FRA's goal is to assist the new railroad in ensuring that the new railroad can assume full responsibility for safe operation.

The program typically covers a period of 3 to 5 years, during which an FRA team works with the railroad on a safety checklist, and discusses all relevant legislation and requirements that apply to the new service. There is no formal certification process for operations or rolling stock. However, the FRA works with the new railroad to ensure that the new railroad complies with all regulations and requirements (e.g. track and vehicle maintenance plans). While the FRA may provide input on best practices, it is ultimately up to the railroad to decide how to deal with some issues (e.g. trespassing). Both SunRail and Brightline went through this process during their start-up periods.

The applicable regulations that are present in the checklist are shown in Figure 5-1.

Figure 5-1: FRA New Start Regulations Checklist

CFR	Description
49 CFR 210	Railroad noise emission compliance regulations
49 CFR 213	Track inspection minimum standards and qualification requirements for personnel
49 CFR 214	Minimum requirements for staff and contractors working on the right-of-way and qualification requirements for personnel
49 CFR 217	Railroad operating rules
49 CFR 218	Railroad operating practices
49 CFR 219	Control of alcohol and drug use
49 CFR 220	Railroad communications
49 CFR 221	Minimum requirements governing highly visible marking devices for the trailing end of the rear car of all passenger trains

Common Carrier Status for Railroads

Paragraph 11101 of Title 49 U.S. Code defines the obligations of a common carrier to provide transportation to any party when requested. For freight railroads, this includes transportation of hazardous materials. In return, the railroads are allowed to use the powers of eminent domain and are granted some protection against state regulation.

Transportation of Hazardous Materials

Railroads, designated by the U.S. government as common carriers, are required to move hazardous materials. The U.S. Department of Transportation Pipeline and Hazardous Materials Safety Administration regulates the transport of hazardous materials through Title 49 of the Code of Federal Regulations (49 CFR), Subchapter C, “Hazardous Materials Regulations.” Sections 5125 and 20106 of Title 49 of USC limit the authority of states, political subdivisions of states, and Indian tribes to impose requirements on the transportation of hazardous materials

in commerce. A state, local, or Indian tribe requirement on the transportation of hazardous materials by rail may be pre-empted by federal jurisdiction under either section.

Federal law requires rail customers to properly disclose and label hazmat shipments, to ensure that appropriate railcars are used, and to assist emergency responders in case of an accident. The train crew must have a document that reflects the hazmat contents of specific railcars and the current position of each rail car containing hazardous materials on the train.

Notification of hazardous materials transported by rail must be in accordance with the routing requirements set forth in § 172.820 of the hazardous materials regulations. A rail carrier must identify a point of contact for routing issues that may arise with the movement of covered materials, and provide contact information to the following entities.

- → State and/or regional centers that have been established to coordinate with state, local, and tribal officials on security issues within the area encompassed by the carrier's rail system
- → State, local, and tribal officials in jurisdictions that may be affected by a rail carrier's routing decisions and who have contacted the carrier regarding routing decisions

While railroads do not generally make public the contents of each train for security reasons, Florida East Coast Railway provides this information on a need-to-know basis (e.g. through a secured website) to local law enforcement and emergency responders so that swift and adequate response can be provided in case of an incident.

Passenger trains may operate on the same tracks as freight trains transporting hazardous materials. Many trains carrying hazardous materials are limited to 50 mph. Higher- and high-speed operations generally avoid mixing trains with different operating speeds to maximize line capacity use, which, in turn, reduces the possibility of an incident involving a passenger train and a freight train carrying hazardous materials.

In Florida, all passenger rail systems that are a subject of this study share track with freight trains carrying hazardous materials.

Responsibility for Maintaining Infrastructure on Shared Right-of-Ways

49 CFR 213 regulates the minimum safety requirements for railroad track, responsibility for ensuring compliance, classification of track as well as maximum speed limits, penalties, waivers, and other relevant regulations.

A railroad that owns the track and infrastructure is responsible for maintaining this infrastructure to FRA standards.

FRA segments their tracks into different classes from 1 to 9, with increasing speed limits for each class (49 CFR 213.9 and 213.307). The speed limits within each class may vary between passenger and freight train operation. Generally, the track owner is responsible for ensuring

that railroad track is within the relevant standards for a specific FRA track class, as prescribed in 49 CFR 213. If a track is leased to another party and that party retains the responsibility for track maintenance, the owner must notify the FRA at least 30 days prior to handover of responsibility.

Grade Crossings

Jurisdiction on Regulation

Part 234 of Title 49 of the CFR sets out a number of regulations on inspection, testing, maintenance, and reporting for grade crossings between railroads and roadways. The FRA publishes a Railroad-Highway Grade Crossing Handbook (last updated in 2007) that provides guidelines for assessing the needed signage and signaling systems at each railroad crossing but does not require that these guidelines be implemented.[40]

FHWA's Manual on Uniform Traffic Control Devices (MUTCD) serves as a guide for providing a set of standard signage and lighting at railroad crossings. Section 316.0745 of Florida Statutes codifies the MUTCD. Installation of warning devices at grade crossings incorporates the MUTCD requirements in Rule 14-57.013, Florida Administrative Code, and opening of a new public highway-rail crossing incorporates the design of the proposed crossing and other criteria listed in Rule 14-57.012, Florida Administrative Code. In addition to the MUTCD, the American Railway Engineering and Maintenance of Way Association (AREMA) manual provides other design concepts for analyzing the appropriate design of grade crossings.

Warning Signs and Markings

Section 351.03 of Florida Statutes provides language laying out the responsibilities for railroad-highway grade-crossing warning signs and signals; audible warnings; exercise of reasonable care, and; blocking of highways, roads, and streets during darkness.

Section 316.171 places the responsibility on rail owners for erecting and maintaining cross buck grade-crossing warning signs at all highway-rail grade crossings in accordance with the standards consistent with the Manual on Uniform Traffic Control Devices (MUTCD). It also states that advanced railroad warning signs and pavement markings shall be installed and maintained at public railroad-highway grade crossings in accordance with the uniform system of traffic control devices by the governmental entity having jurisdiction over or maintenance responsibility for the highway or street.

Chapter 6 of the FDOT Plans Preparation Manual (Volume 1) provides a set of requirements that are complemented by FDOT design standards mentioned in the FDOT Design Manual, and design standards 509-070, 509-100, 830-T01, 560 and 11782 in defining what must be installed

[40] https://www.fra.dot.gov/Elib/Document/1464

at a railroad grade crossing.[41,42] Additionally, Florida Administrative Code Rule 14-57.013 provides an overview of what equipment must be installed at a railroad crossing.

FDOT standards for grade crossings do not differentiate railroad grade crossing equipment and design requirements by railroad operating speed.

However, FDOT is working with diagnostic teams to require a sealed corridor in Florida in an area of higher-speed train operations. This includes additional requirements within the rail corridor and design improvements along the road right of way.

Responsibility for Grade Crossing Maintenance

Figure 5-2 provides a summary of the responsibilities of different agencies for grade crossing oversight, enforcement and inspections, funding, and project execution.

Rail infrastructure providers and their contractors are responsible for executing grade crossing building, maintenance, and upgrading. However, oversight, enforcement, inspection, and funding responsibilities come from various parties. The FRA, FHWA, FDOT, and other public agencies generally set oversight standards for all of these activities.

The FRA and FDOT are jointly responsible for inspecting built grade crossings and ensuring that they meet appropriate standards. FDOT also issues permits for grade crossing opening and closure. Various parties are responsible for funding the construction of a grade crossing depending on the agreed-upon funding structure. This can include railroads, federal and state-level grants, local government entity funding, funding from the State Transportation Trust Fund, public and private sources of debt, and private grants.

Grade crossings must be properly maintained. The FRA and FDOT are responsible for ensuring that maintenance is properly performed and may inspect grade crossings from time to time. The crossing owner is responsible for paying for crossing maintenance if the railroad pre-dates the crossing. Funds for maintenance may be obtained from various sources. Ultimately, the responsibility for grade crossing maintenance rests with the owner. In practice, the owner and the railroad usually have a subject crossing agreement in place, where the grade crossing maintenance is performed by the railroad with funding from FDOT and/or the crossing owner (e.g. municipality and county).

Upgrades to grade crossings can be required or voluntary based on specific FRA, FHWA, FDOT, and other public agency standards. To determine which grade crossings need to be upgraded, FDOT uses a crash prediction algorithm to prioritize railroad crossings. FDOT also coordinates field diagnostic teams to compile data, request information, analyze data, and visit each

[41] http://fdot.gov/roadway/PPMManual/2017/Volume1/2017Volume1.pdf
[42] http://fdot.gov/roadway/fdm/current/2018FDM220RR.pdf

crossing. These field diagnostic teams include the FRA, FDOT, Railroad, and local government entities, though safety improvements recommended are not necessarily requirements.

Figure 5-2: Responsibility Matrix Regarding Activities at Public Rail/Highway Grade Crossings

Activity	Oversight (Standards)	Enforcement and Inspections	Funding	Execution
Building	• FRA (minimum signage requirements) • FHWA (signage guidelines) • FDOT (design standards) • Department of Justice (ADA compliance) • Other public agencies for specific issues relating to highways, environment, etc.	• FDOT issues permits for grade crossing opening and closure. • FRA and FDOT inspect built grade crossings to ensure they meet appropriate standards. • Local jurisdictions are responsible for ensuring that roads leading up to the crossings are designed properly.	A combination of: • Grants from various federal and state programs including the State Transportation Trust Fund • Local Government Entity funding • Public and Private Sources of Debt • Private Grants • Railroads	Rail Infrastructure Providers and their Contractors
Maintenance		• FRA and FDOT inspect grade crossings to ensure they are properly maintained. • Local jurisdictions are responsible for maintaining roads leading up to crossings	Crossing owner (who may receive funding from numerous sources), including state and federal grants	
Upgrades		• FDOT identifies top priority crossings using data and stakeholder input • Field Diagnostic Teams (FRA, FDOT, Railroad, and Local city/county) recommend safety improvements for priority crossings by consensus	Depending on the crossing ownership and type of upgrade, a combination of grants from: • FTA • FHWA • Railroad (for line upgrades) • Local Government Entities • State Transportation Trust Fund • Public and Private Sources of Debt • Private Grants	
Operations		• Railroads are responsible for ensuring the crossing protection is operating properly • Law enforcement is responsible for ensuring vehicles and pedestrians do not trespass.	Grade Crossing Operations: Railroads	Railroads

Source: CPCS Analysis

Crossing agreements are entered into with the state, counties, and cities with the rail companies for grade crossings depending on whether the road is a state, county, city, or private road. These agreements specify responsibilities for costs of the road safety improvements on

the railroad property for specific grade crossings. Mandatory upgrades to grade crossings are funded by rail infrastructure providers with accompanying public support, whereas voluntary upgrades to grade crossings are primarily funded by local municipalities and counties. Railroads are responsible for operating grade crossing equipment, while law enforcement personnel is responsible for enforcing vehicle and pedestrian trespass laws at crossings.

Grade Crossing Blockage

The state has regulatory authority to ensure safety at public grade crossings between roads and railroads when a train blocks the crossing by requiring warning signs and devices. If a crossing is blocked to emergency vehicles, any train or equipment that has come to a complete stop and is blocking a railroad-highway grade crossing must be cut, separated, or moved to clear the crossing upon the approach of an emergency vehicle (Florida Statutes, section 351.034). An exception is made for trains or equipment stopped due to mechanical failure where separation or movement is not possible.

Traffic Signal Preemption at Grade Crossings

A traffic signal preemption system detects trains at a longer distance than a classic detection system, predicts the train's arrival time at a crossing and adjusts nearby traffic lights accordingly, to activate signal pre-emption at the proper time. This system's overall aim is to minimize delays and dissipate queues that form as a result of crossing blockage.

The State of Florida defines how traffic signals function in Chapter 316 of Florida Statutes. This chapter, however, does not require local jurisdictions to provide traffic signal preemption at grade crossings. A report by the Center for Urban Transportation Research (CUTR) defined how a coordinated traffic signal preemption program could work.[43] FDOT works with local transportation partners through its Regional Transportation Management Centers to ensure compliance with Signalization Pre-Emption Design Standards on state roads. Currently, FDOT has no authority to require local roads that are not controlled by the state ("off-system roads") to participate in such a program.

Railroad Noise

Noise regulations

Train noise is regulated through the federal Noise Control Act (NCA). It establishes the maximum noise levels for rail cars engaged in interstate commerce. In general, if the noise generated by a train has a transportation purpose and is within the NCA's noise limits, state and local regulation is pre-empted by federal statute. Noise emissions are regulated by the Environmental Protection Agency (EPA). This law limits railroad vehicle noise and precludes states, including Florida, from regulating on this issue in favor of nationwide standards. Unlike railroad noise laws in many European countries, this law only deals with noise emissions from

[43] http://www.fdot.gov/research/Completed_Proj/Summary_TE/FDOT-BDK85-977-44-rpt.pdf

railroad vehicles and does not deal with noise emissions of the railroad system as a whole (wheel-rail contact, pantograph, etc.).

Some states, such as California, have implemented noise control laws, where a state agency is required to implement noise regulations. In California specifically, these noise regulations are also tied to the State's environmental review process.

The State of Florida can enact regulations that deal with other aspects of noise control if noise is found to be a safety hazard, subject to federal pre-emption laws. However, to date, no such regulations have been implemented.

Use of Locomotive Horns

Locomotive horn use is regulated by 49 CFR Part 222. Except as specifically exempted, a train must blow its horn within 1,500 feet of a public railroad-highway grade crossing and that horn should be audible for that distance. Exemptions to establish 'quiet zones' may be granted by the FRA to a local municipality after an administrative process has determined that safety at the crossing will not be compromised.

Fencing

The FRA does not have any regulations on fencing along a railroad right of way. While some states have regulations on fencing along a railroad right of way in rural areas (against cattle) or in urban areas (against trespassers), Florida does not have any such laws.

5.2.4 Shortcomings of Existing Regulations

Grade Crossing Minimum Design Standards

The FHWA defines a minimum set of signage and signals at railroad crossings for operations below 125 mph, and the FRA defines a set of needed incursion detection systems for operations at or above 125 mph.[44] Outside of these requirements, minimum design standards for grade crossing equipment should be defined by the State of Florida.

While standards exist both at a federal and state level, the State of Florida has not codified requirements for grade crossings above and beyond FHWA regulations and guidance, along with the MUTCD (Rule 14-57.012 of the Florida Administrative Code). There is a gap in defining the minimum required equipment at grade crossings for higher-speed operations with a top speed of 81 mph to 125 mph. FRA guidelines for high-speed (above 125 mph) operation could be used as a starting point to develop codified grade-crossing equipment and design standards for this range of higher-speeds.

[44] Grade Crossings, FHWA https://www.fhwa.dot.gov/federalaid/0646bsu1.cfm

Certification of New Passenger Rail Lines

The FRA New Start Rail Program is a non-mandatory program that the FRA offers to ensure that new passenger railroads meet all the safety operating requirements. While a new railroad must meet all operating requirements at the start of service, this FRA program does not provide certification to ensure that these standards have been met. The FTA requires some certification for any passenger services that fall under its jurisdiction. A number of states (e.g. Illinois, California) have implemented a process for intrastate passenger railroads. In Florida, a certification process for new lines could be required at the state level and would be implemented by FDOT.

Railroad Noise and Quiet Zones

Existing railroad noise regulations are set by the EPA and focus on vehicle design. They do not, however, consider noise emissions of the entire rail system, which would include standards considering noise levels felt by a person at a certain distance from the railroad, similar to how airports are required by the Federal Aviation Administration (FAA) to study noise exposure around an airport. Unlike for highways, railroads have no statutory requirements for installation of noise walls and other noise absorption devices.[45] Some states, including California, go beyond the FRA's requirements by mandating that railroad system noise emissions be reviewed as part of any environmental review.

Application for a quiet zone is made by the local jurisdiction. The FRA currently has exclusive jurisdiction of railroad quiet zones and provides a calculator that calculates what is needed to implement a quiet zone. However, because there are no standards for rail system noise emissions, there are also no mandatory requirements for quiet zones.

Fencing

There are no fencing requirements at the State or Federal level. Some states (e.g. Oklahoma, Nebraska, and New York) have enacted fencing laws that have been upheld in court.[46]

5.2.5 Regulations on Railroad-Highway Grade Crossings

Federal Railroad Administration (FRA) CFR 234.1 imposes minimum maintenance, inspection, and testing standards for highway-rail grade crossing warning systems; prescribes standards for the reporting of failures of such systems, and prescribes minimum actions railroads must take when such warning systems malfunction. The same section also provides a minimum set of requirements for signage at crossings and a set of non-prescriptive recommendations for crossing design. FRA regulations do not identify requirements at new or existing crossings but "preempts any State law, rule, regulation, order, or standard covering the same subject matter,

[45] 23 CFR 772

[46] New York State Railroad Law 52; Nebraska Revised Statute Ch. 74 Sect. 74-601 and 74-602; Oklahoma 2017 Statute, Title 66. Railroads §66-141.

AMERICAN OVERSIGHT

except a provision directed at an essentially local safety hazard." FDOT's authority over railroad-highway grade crossings rests in Statute 335.141, which states that the FDOT has regulatory authority over all public railroad-highway grade crossings in the state, including the authority to issue permits which shall be required prior to the opening and closing of such crossings.

The Federal Highway Administration (FHWA) provides a set of railroad crossing design guidelines, while the Manual on Uniform Traffic Control Devices (MUTCD), which is codified in Florida in a state-level manual, defines the signage and signaling that must be adhered to. While FDOT has required some higher-speed guidelines be implemented, currently, there are no codified requirements for railroad level crossing design specifically for higher-speed operation beyond those for conventional rail.

5.3 Regulations for Faster Operation

A high speed rail system is defined in Section 341.8203, Florida Statutes, to mean "any high-speed fixed guideway system for transporting people or goods which is, by definition of the United States Department of Transportation, reasonably expected to reach speeds of at least 110 miles per hour, including but not limited to, a monorail system, dual track rail system, suspended rail system, magnetic levitation system, pneumatic repulsion system, or other system…" The 110 mph threshold differs from the FRA's and international definitions of what is considered to be high-speed rail.

On a federal level, the FRA administers a number of regulations for high-speed operations, as defined in Title 49 of the Code of Federal Regulations (CFR). The FRA does not have separate regulations for higher (than conventional) speed rail (top speed between 80 mph and 110 mph). Internationally, high-speed rail is defined by the International Union of Railways (UIC) to be any railroad line with a top speed of 250 km/h (approximately 155 mph) or above.

Under Florida Statutes, Title XXVI, Ch. 341.822 and 341.8225, FDOT is the sole government entity to acquire, construct, or operate high-speed rail projects. This does not preclude private companies from building their own rail projects. Outside of Florida Statutes Ch. 341, the State of Florida has no additional higher- or high-speed regulations or statutes.

After studying similar regulations worldwide, the FRA has recently added regulations that pertain to operations of high-speed services. These have been codified in the Code of Federal Regulations and are prescriptive in nature.

Overall, the US railroad system has a comprehensive set of federal and state regulations for both conventional and high-speed operations that have been developed and modified over time. These regulations help ensure that the rail system is operated and maintained in a safe manner and that railroads have an interest in following existing regulations.

The FRA has adopted a number of regulations for high-speed operations (above 125 mph). However, there is a gap in regulations for some aspects of safety and operations between 81 mph and 125 mph. While there are guidelines, this gap includes lack of prescriptive regulations on a federal and state level about the design of railroad crossings for higher-speed operation, and the nature of required sealed corridor treatments, such as fencing.

AMERICAN OVERSIGHT

5.3.1 Federal Regulations for Higher and High-Speed Operations

Federal high-speed rail regulations related to safety are provided in select sections of the Federal Railroad Administration (FRA) Code of Federal Regulation Title 49 CFR *Transportation*. The FRA regulations specifically deal with high-speed operations where relevant. The pertinent sections include the following.

- *Part 200 Informal Rules of Practice for Passenger Service* – Prescribes procedures, under which applications will be received and heard and by which rules and orders will be issued
- *Part 210 Railroad Noise Emission Compliance Regulations* – Prescribes minimum compliance regulations for the enforcement of the Railroad Noise Emission Standards established by the Environmental Protection Agency
- *Part 213 Track Safety Standards* – Addresses many of the essential requirements that affect track safety through design, materials, roadbed, rolling stock, assembly, maintenance, monitoring, etc.
- *Part 221 Rear End Marking Device* – Passenger, Commuter and Freight Trains – Prescribes minimum requirements governing highly visible marking devices for the trailing end of the rear car of all passenger, commuter and freight trains
- *Part 223 Safety Glazing Standards* – Locomotives, Passenger Cars and Cabooses – Provides minimum requirements for glazing materials in order to protect railroad employees and railroad passengers from injury as a result of objects striking the windows of locomotives, caboose and passenger cars
- *Part 229 Railroad Locomotive Safety Standards* – Intended to ensure the safety of the train operator
- *Part 231 Railroad Safety Appliance Standards* – Prescribes minimum federal safety standards for all locomotives, brake systems, suspension systems, electrical systems, cabs and cab equipment, crashworthiness, etc.
- *Part 238 Passenger Equipment Safety Standards* – Provided to prevent collisions, derailments, and other occurrences involving railroad passenger equipment that cause injury or death to railroad employees, railroad passengers, or the general public; and to mitigate the consequences of such occurrences to the extent they cannot be prevented
- *Part 239 Passenger Train Emergency Preparedness* – Provided to reduce the magnitude and severity of casualties in railroad operations by ensuring that railroads involved in passenger train operations can effectively and efficiently manage passenger train emergencies

The FRA does not have a comprehensive set of regulations for higher-speed operation (top-speed between 81 mph and 125 mph).

AMERICAN CRCS OVERSIGHT

5.3.2 Comparing European and US Regulations for High-Speed Rail

Comparison of Regulations

Because the US does not have high-speed rail (defined as rail operating at a top speed above 155 mph by the UIC), the Passenger Rail Investment and Improvement Act of 2008 mandated that a review of other jurisdictions worldwide to understand federal standards and regulatory requirements.

The FRA conducted a comparison of US regulations to international high-speed rail standards in May 2013.[47] It was determined that gaps and inconsistencies exist due to US regulations being prescriptive while European standards are performance-based, and may be codified differently in different countries. There are also differences for operating on a dedicated right-of-way vs. shared right-of-way (passenger and freight), and procedural differences related to inspections or maintenance and their documentation. The US standards, which have been implemented on a national level, tend to be more stringent than European Union standards. European standards are performance-based, with prescriptive standards defined within each European country. Figure 5-3 provides a list of areas with the most substantial differences.

Figure 5-3: Differences between US and European High-Speed Rail Standards

Subject	Differences
Vehicle/Track Interaction	→ Operating speed limits: multiple FRA classes vs. 3 classes – conventional, upgraded, purpose-built high-speed → Compliance responsibility: nationally in the US vs. country-specific in the EU → Gradients: FRA regulations do not address gradients → High-speed requirements: differences in certain requirements, though these do not substantially affect performance
Noise	European limits are based on rolling stock class and speed vs. the US, where standards are based on moving vehicles below and above a 45 mph threshold.
Window Safety Glazing	The European standard allows an impact test for window glazing at an angle rather than requiring a right angle impact test, as required in the United States. The U.S. qualification test will impose a much higher glazing strength requirement on trains operated in the United States.
Locomotive Safety	Prescriptive versus performance specifications
Locomotive Crashworthiness	Differences in collision scenarios and US codes are primarily specific to locomotives and not passenger cars
Track Safety Aerodynamic	No U.S. regulations for tunnels, crosswinds, etc.
Emergency Exit Requirements	Differences in required number and locations of exits. For example, European emergency exits need not be window exits

Source: FRA[47]

[47] *Comparison of FRA Regulations to International High-Speed Rail Standards – Final Report*, DOT/FRA/ORD-13/30, US DOT, May 2013

Higher-Speed Operation and Roadway-Railroad Grade Crossings

49 CFR 213.361 requires that Class 8 and 9 (high-speed) track owners submit a barrier plan, termed a 'right-of-way plan,' to the FRA to include provisions in areas of demonstrated need for the prevention of vandalism; the launching of objects from overhead bridges or structures into the path of trains; and intrusion of vehicles from adjacent rights of way at roadway-rail grade crossings. No such regulations exist for higher-speed operation (class 6 or 7 track).

While European regulations prohibit at-grade crossings for high-speed rail (lines with top speeds above 250 km/h or 155 mph), US standards for high-speed rail do not explicitly prohibit at-grade crossings for speeds below 110 mph and require FRA approval for lines with top speeds between 110 mph and 125 mph.

The Federal Highway Administration (FHWA) provides considerations and actions for evaluating grade crossings for passenger rail operations above 100 mph, which generally discourage grade crossings.[48] The FHWA desires that all crossings located on high-speed rail corridors either be closed, grade separated, or equipped with automatic gates with the appropriate detection technology to provide adequate warning time. In addition, the FRA recommends improvements in sight distance, improved crossing geometry to provide the best braking and acceleration distances for vehicles, and a coordinated public education campaign to provide safety information and on-going local coordination.

According to 49 USC 213.347, grade crossings on class 7 track (top speed between 110 mph and 125 mph) require approval from the FRA, while crossings are prohibited for track with a higher top speed (class 8 and 9).

5.3.3 Assessment of Adequacy of Existing State and Federal Regulations for Higher- and High-Speed Operations

Key areas that need to be examined include grade crossing regulations, requirements for a sealed corridor, and signaling system requirements.

Grade Crossing Regulations

While the FRA provides a set of guidelines for designing crossings, including those that will be used on lines with higher-speed operations, these guidelines are not prescriptive in nature. FDOT, which has the jurisdiction to regulate the matter, does not provide any additional minimum design requirements for grade crossings for higher-speed operations beyond the FRA's minimum design requirements. In consultation with local stakeholders, local governments rarely have enough resources and experience to dedicate staff to this issue and are looking to FDOT for guidance.

[48] https://safety.fhwa.dot.gov/hsip/xings/com_roaduser/07010/sec09.cfm#d

Sealed Corridor Requirements

Presently, there are no requirements for sealing a corridor when operating higher-speed trains. This design philosophy is used to minimize the number of trespassers in between grade crossings and eliminate obstacles that may end up on the railroad track. FDOT does not have any requirements for sealing a railroad corridor for higher-speed operations, though they are working to require a sealed corridor with partnership from field diagnostic teams.

Signaling System Requirements

Neither the FRA nor FDOT have additional signaling system requirements for higher-speed operation. However, sufficient requirements have been built into those of Positive Train Control (PTC) to provide safe train operation on any stretch of track where the system is implemented.

5.4 Regulations on Enforcement and Incident Reporting

Rail safety enforcement is performed by state and federal enforcement agencies, FDOT and FRA, respectively. Each has inspectors who enforce their agency's regulations and have authority to issue penalty actions that may include fines and would require corrective actions to be taken. The agencies also have authority to suspend service until needed rectifications have been performed. Incidents that involve injury, death or serious damage to property must be reported and a procedure exists for performing these reports.

As FDOT and FRA inspectors cooperate, FDOT inspectors may also enforce federal laws and regulations. FRA areas of inspections include: Track, Motive Power and Equipment, Signal and Train Control, Operating Practices and Hazardous Materials, further discussed in section 5.4.2. In the case of an incident, a clear line of reporting must be established between the agencies that are involved in the subsequent investigation.

Serious incidents must be reported immediately (or almost immediately) to an FRA National Reporting Center, and the level of investigation and the agency responsible will be determined based on incident severity. Investigative teams include members of one or more agencies: local law enforcement, state Department of Transportation, the Federal Railroad Administration, and the National Transportation Safety Board. The FRA publishes incident details in an online database.

When a serious incident occurs between a train and a person or a vehicle, a specific sequence of events usually includes an investigation. The sequence and the party that is responsible for each step is outlined in Figure 5-4.

Figure 5-4: Steps in Investigating a Railroad Incident

Event	Actions	Responsibility
Incident Occurs	→ Conductor or engineer notifies train dispatchers about the incident → Railroad contacts first responders → Railroad nominates an incident manager who is responsible until the arrival of first responders → Dispatchers stop other rail traffic around the affected area	Railroad
First Responders Arrive at the Scene	→ First responders render assistance (as needed) → Local law enforcement takes control of the scene and maintains control until the investigation is completed → Law enforcement conducts an investigation, no train movements are permitted, except as directed by law enforcement officials; railroad may be allowed to operate on a parallel track around the incident if the track is present and if the conditions allow for safe operation	Local Law Enforcement
Incident Report Filed with the National Reporting Center	Railroad files an incident report with the National Reporting Center, which is then transmitted to the FRA	Railroad
Involvement of NTSB	For serious incidents, an NTSB or FRA field team may visit the scene. In that case, control of the scene is handed over to NTSB.	FRA, NTSB
Completion of Investigation	Law enforcement completes the investigation, the track is handed back over to the Railroad	Law Enforcement and/or NTSB
Inspection of Track and Systems	Railroad conducts an inspection of the track, signals, and other relevant systems to ensure that safe movement may be conducted. Any needed corrections are made prior to the opening of the line to train traffic.	Railroad
Line opened to traffic	The line opened to traffic	Railroad
Report Filed with the FRA	Railroad provides a detailed report to the FRA	Railroad
Further Investigation is Conducted	Investigation Team (consisting of one or more of: the FRA, NTSB, local law enforcement) conducts a further investigation	Investigation Team
Incident Report Released	An incident report is released either by the local law enforcement (for less serious incidents) and by the FRA and/or NTSB (for more serious incidents).	Investigation Team

Source: CPCS Analysis of Stakeholder Consultations with Passenger Railroads, FDOT, and FRA

5.4.1 Incident Reporting Requirements

Part 225 of Title 49 of the Code of Federal Regulations (CFR) titled *Railroad Accidents/Incidents, Reports Classification, and Investigations* requires railroads to report on impacts between

railroad on-track equipment and a highway user at a highway-rail grade crossing. The Federal Railroad Administration (FRA) uses this information to carry out its regulatory responsibilities (such as safety inspection) and comply with safety statutes.

The purpose of the regulations is to provide the FRA with information about the hazards and risks that exist on the nation's railroads. The purpose of collecting this information is to enable the FRA to carry out its regulatory and enforcement responsibilities under the federal railroad safety statutes. FRA also uses this information to determine rail safety trends and to develop programs that focus on preventing railroad injuries and accidents.

Federal Requirements for Reporting Incidents

Railroads are required to provide the FRA with immediate notification for various incident types.[49] There are 4 different and sometimes overlapping reporting requirements, depending on the type of incident. The following lists the reporting requirements as defined in the Code of Federal Regulations (CFR).

- → 49 CFR 225.9 requires immediate (as soon as safely possible) reporting of events involving death or certain injuries, accidents, and incidents
- → 49 CFR 840.3 requires reporting of a passenger, employee or grade crossing fatality within 2 hours, an evacuation of a passenger train, or damage to a tank car that results in the release of hazardous materials or an evacuation. The time limit is raised to 4 hours if the conditions in the previous sentence do not apply, but if there is monetary damage above $150,000 to property or $25,000 to a passenger train
- → 49 CFR 229.17 requires the reporting of incidents that involve locomotives or persons coming into contact with locomotives
- → 49 CFR 171.15 requires reporting of incidents involving hazardous materials

Railroads must report incidents to a National Response Center by phone within the time period provided in each section of the CFR. The National Response Center relays the reported information to the FRA. The phone report must be later followed- up with a written one, directly to the FRA.

Responsibility for Investigating Incidents

Under 49 CFR 225.31, the FRA is responsible for conducting incident investigations, including issuing corrective actions, penalties and/or fines.

Additionally, under 49 USC 1131, the National Transportation Safety Board (NTSB) is responsible for investigating railroad incidents that involve fatalities or substantial property damage. Thus, it is only responsible for a small subset of all reported incidents.

[49] 49 CFR Part 225 and FRA's Guide for Preparing Accident Incident Reports (May 2003)

In practice, the FRA investigates more incidents than the NTSB. If both the FRA and the NTSB are involved in an investigation, the two agencies cooperate and issue a joint report.

A state-level agency (e.g. state police) can also be involved though Florida does not require such involvement. Local police and other first responders are involved in obtaining initial statements and performing an initial assessment of the severity of the incident, before turning the responsibility over to the FRA and/or the NTSB. Local law enforcement remains engaged in the investigation throughout its course by providing support to the lead agencies.

The FRA investigates accidents and incidents as determined by the Accident Analysis Branch or regional management. Generally, the FRA investigates accidents and incidents meeting the following criteria.

- → Collisions, derailment, or passenger train incident resulting in at least one fatality or serious injury
- → Railroad-related accident resulting in death to an on-duty railroad employee or contractor
- → Highway-rail grade crossing accident resulting in death to one or more people in a commercial vehicle or school bus, serious injury to three or more people in a commercial vehicle or school bus, death to three or more people in a private highway vehicle, and/or accidents involving grade crossing signal failure or allegations of grade crossing signal failure
- → A non-casualty train accident resulting in a derailment of a locomotive or 15 or more cars, and extensive property damage
- → A train accident/incident resulting in a fire, explosion, evacuation, or release of regulated hazardous materials
- → An accident/incident involving a train transporting nuclear materials
- → A train incident involving runaway or rollaway equipment
- → A collision involving maintenance equipment
- → An accident caused by the failure of a locomotive or a person coming in contact with an electrically energized infrastructure that resulted in serious injury or death
- → Accidents resulting from signal failure including Positive Train Control-related failures and malfunctions
- → Any other train accident/incident likely to generate considerable public interest, and most Amtrak accidents/incidents

Incident Data Compilation and Reporting

The FRA compiles incident reports into a database to allow data analysis and trend identification.[50] The purpose of the database is to make railroad safety information, including accident and incident inventory, and highway-rail crossing data readily available to the public. The database allows performing queries by railroad, as well as location and type of incident. The primary groups of accidents and incidents to be reported monthly by railroads are:

- highway-rail grade crossing accidents/incidents
- rail equipment accidents/incidents, and
- casualties to persons (i.e., death and non-fatal injuries to all types of persons, and occupational illnesses involving railroad employees)

The FRA also maintains a visualization tool for collisions between 2008 and 2018.[51]

5.4.2 Enforcement of Regulations

Railroad Safety Inspections and Inspectors

The FRA Office of Railroad Safety employs approximately 600 inspectors who are distributed among its 8 regional divisions. FDOT employs eight (8) state rail safety inspectors that supplement FRA's inspectors. The number of FRA inspectors may vary depending, depending on FRA District 3 (Atlanta-based) monitoring priorities.[52] Currently, there is at least one state rail safety inspector for each of the 5 FRA inspection disciplines (track, motive power and equipment, signal and train control, operating practices, and hazardous materials).

All FDOT inspectors participate in FRA's State Rail Safety Participation Program as set out in Title 49 Code of Federal Regulations (CFR) Part 212. As part of this program, state inspectors carry the same authority for issuing notices, defects, and assessing civil and criminal penalties as the FRA inspectors. FRA also provides state inspectors with a system for reporting and tracking reported issues.

The state supplements, but does not replace, the responsibility of the Federal Government in inspecting physical conditions of railroad facilities to determine compliance with federal standards and regulations. The FRA and state inspectors coordinate to cover as much ground as possible during inspections.

Each FRA geographical division decides how to best utilize its limited inspection resources by conducting a risk assessment on different railroads and by using historical inspection data. When performed, inspections may be conducted with or without prior notification of the railroad.

---

[50] FRA Office of Safety Analysis
[51] FRA Highway Crossing Collisions 2008-2018
[52] Florida Statutes, s. 351.36

FDOT is responsible for enforcing any state-level regulations, based on FDOT procedures.

FRA and FDOT Enforcement Powers

If FRA or FDOT inspectors participating in the State Rail Safety Participation Program find non-compliance with FRA regulations, they may:

- issue a *notice of defect* and provide the railroad a set time period to fix the defect (appeal is possible through a procedure in 49 CFR 216.17)
- assess penalties: criminal or civil, depending on the nature of the violation; or
- issue an emergency order, suspending or modifying services (may be reviewed through a procedure given in 49 CFR 216.25)

5.4.3 Railroad Accident Reporting by the International Union of Railways (UIC)

The International Union of Railways (UIC) compiles a safety database on a continuous basis, which collects information on all significant accidents.[53] The initiative is open to all UIC members, and most European railroads and infrastructure managers are members of this initiative. Triggers for reporting an accident with the presence of at least one rail vehicle in motion include:

- at least one serious injury or death;
- damages of over $175,000 to infrastructure, rolling stock or the environment; or
- extensive disruptions to traffic (more than 6 hours).

The Safety Database records the location, type, and cause of the accident, as well as information about the train(s) and infrastructure involved.[54] Accidents are grouped under one of six categories of causes: infrastructure, rolling stock, human factors, railroad users, weather and environment, third parties.[55]

In its latest report for 2017, UIC provides a summary of significant railroad accidents. Most reported accidents that were classified as significant occurred due to trespassing (52 percent of all significant reported accidents) and accidents at level crossings (nearly 24 percent of all significant reported accidents). The overall number of reported accidents has been trending downward (down to approximately 1,600 accidents in 2016 from 2,009 accidents in 2011), with the number of fatalities per million train-km down from 0.27 in 2011 to 0.22 in 2016.[56] Data in this report points to the problematic nature of grade crossing accidents and trespassers on a worldwide scale.

AMERICAN OVERSIGHT

5.5 Possible Shortcomings in Existing Regulations

This chapter presents an overview of the institutional context regulating railroads in Florida. Possible shortcomings in existing regulations pertaining to faster rail operations are as follows.

- **Grade Crossing Minimum Design Standards** – While there are guidelines, there are no state-level railroad crossing design standards or requirements for higher-speed operations (top speed of 81 mph to 125 mph) beyond the minimum requirements that exist for conventional trains. FDOT is the entity that is responsible for issuing such regulations, taking into account the recommendations proposed by the FRA, FHWA, and AASHTO.

- **Certification of New Passenger Rail Lines** – While the FRA has a review process for any new passenger rail line and the FTA has a certification process for transit systems, the FRA process is not a certification process, and the FTA certification process does not cover all types of new passenger rail services. The Surface Transportation Board (STB) has sole jurisdiction over interstate lines. This leaves a gap for intra-state passenger rail lines that are not subject to the FTA's certification process. Currently, the principal role of FDOT in the national railroad safety effort is to provide enhanced investigative and surveillance capability for planned routine compliance inspections.

- **Fencing** – Fencing is regulated on a state level. Florida has no guidelines or requirements for installing fencing along a railroad corridor. The development of such requirements falls under the jurisdiction of FDOT as well as local governments.

- **Sealed Corridor Regulations** – There are FRA guidelines but no regulations on a federal or state level for implementing sealed corridor treatment for higher-speed operation. The jurisdiction for implementing regulations for when sealed corridor treatments should be implemented along a railroad corridor would fall to FDOT. FDOT can look to North Carolina (NCDOT) as a baseline for developing such regulations.

- **Railroad Noise and Quiet Zones** – The EPA regulates *rail vehicle* noise emissions but does not regulate *rail system* noise emissions, like the FAA does with airports. In Florida, there are no state requirements for implementing quiet zones in urban areas. The regulation of railroad system noise could fall under the jurisdiction of FDOT or the Florida Department of Health, while the mandate of implementing quiet zones falls under the regulatory mandate of FDOT.

AMERICAN OVERSIGHT

6 Key Issues and Recommendations

6.1 Overview

Four passenger rail systems operate on over 600 route miles of railroad lines in Florida. These include two intercity operators (Amtrak and Brightline), both operating on track owned by freight railroads, and two commuter rail operators (SunRail and Tri-Rail), both operating on state-owned track.

The key issues with Florida's passenger rail system are as follows.

1. High rate of severe injuries and fatalities and high levels of trespassing incidents on railroad right-of-way due to rail services operating in dense urban areas
2. Gaps in regulations that are specific to higher-speed rail operations
3. The need to clarify FDOT's mandate on oversight of passenger rail with respect to maintenance, safety, revitalization, and expansion
4. The lack of resources for local governments for planning rail projects

This chapter describes these issues in more detail.

6.2 Trespassing, Injuries, and Fatalities

As described in Chapter 3, Florida's passenger rail system incurs a **higher rate of severe injuries and fatalities** than the national average. Over the last 10 years, Florida passenger railroads experienced a total of 1,395 incidents. Forty-nine percent of these incidents involved severe injuries and fatalities – 1,317 severe injuries and 137 fatalities over this time period.

Florida's severe injury rate is 1.5 times higher and its fatality rate is 3.5 times higher than the national average rate for the evaluation period (2009-2018).[57] The state's average rates for injuries and fatalities have not been significantly impacted by new rail services (SunRail and Brightline), though each service has experienced a series of incidents during the service start-up period. Figure 6-1 compares passenger rail severe injury and fatality (collectively "casualties") rates in Florida with nationwide rates, while Figure 6-2 compares each of the four

[57] Data for passenger railroad severe injuries and fatalities between January 2009 and June 2018. See definition of severe injuries in Appendix D.

AMERICAN OVERSIGHT

passenger rail services in Florida against average national intercity rail casualty rate and the average commuter rail peer group casualty rate.

Figure 6-1: Total Injuries and Fatalities Nationwide and in Florida (January 2009 – June 2018)

Location	Injuries	Fatalities	Total Passenger Train Miles	Injury Rate	Fatality Rate	Casualty Rate per 10,000 passenger train miles
Nationwide	41,933	2,072	912,645,372	0.46	0.02	0.48
Florida	1,317	137	19,332,341	0.68	0.07	0.93

Source: CPCS Analysis of FRA Safety Data

Figure 6-2: Comparison of Casualty Rates (January 2009 – June 2018)

Florida Passenger Rail	Average Annual Casualty Rate	US Intercity Average Annual Casualty Rate	Commuter Peer Group Average Annual Casualty Rate
Amtrak (in Florida)	0.66	0.30	
Brightline	0.57	0.30	
Tri-Rail	0.15		0.12
SunRail	0.24		0.12

Source: CPCS Analysis of FRA Safety Data

This higher rate of severe injuries and fatalities is primarily attributable to a **higher count of trespassing** for both pedestrians and vehicles. Trespassing cases represent 27 percent of Florida incidents resulting in severe injuries and fatalities, compared to 19 percent nationwide.

Two new passenger rail services, SunRail and Brightline, began operating in Florida within the last three years. Each service has experienced a series of incidents during its start-up period. The high rate of incidents for each service may be explained by passengers and vehicles who are unaccustomed to the presence of more trains, and trains operating at higher speeds. However, these incidents have not had a significant effect on the state's average fatality and injury rates.

Brightline began operations in January 2018 and will be the first privately-owned, higher-speed rail service in the United States, defined by a speed between 81 mph and 125 mph. It has a number of expansion projects underway.

While Florida passenger rail incident rates are higher than the rest of the country, rail operations take place in **much more population-dense areas** than the US average. As seen in Figure 6-3, Florida ranks 8th in the country for its grade crossing density index (Grade crossing density index = number of grade crossings × population density / 1 million), which accounts for both the number of grade crossings and population density in the state.

Figure 6-3: Top States in Grade Crossing Density

Rank	State	Grade Crossing count	Population Density (Population per sq. mi.)	Grade Crossing Density Index*
1	Illinois	26,006	225	5.85
2	Ohio	20,281	280	5.67
3	New Jersey	5,007	1036	5.19
4	Pennsylvania	16,858	277	4.68
5	New York	12,728	359	4.57
6	California	18,149	242	4.39
7	Indiana	16,715	185	3.10
8	**Florida**	**9,577**	**311**	**2.98**
9	Texas	27,032	103	2.78
10	North Carolina	12,638	191	2.41
*Grade crossing density index = number of grade crossings × population density / 1 million				

Source: CPCS Analysis of FRA Safety Database (as of Sep 2018)

6.3 Gaps in Regulations

6.3.1 Higher-Speed Rail Regulations

Existing state and federal-level regulations for railroads were detailed in Chapter 5. While Brightline will be introducing Florida's first higher-speed rail service with top speeds of 110 mph between West Palm Beach and Cocoa, and 125 mph between Cocoa and Orlando, there is a **gap in federal and state regulations governing higher-speed rail**. While the Federal Railroad Administration and the Florida Department of Transportation have in place regulations for conventional (up to 80 mph) and high-speed (126 mph to 220 mph) rail, neither agency has developed additional regulations that are specific to higher-speed rail (81 mph to 125 mph).[58]

6.3.2 Shortcomings in State-Level Rail Regulation

When federal standards for railroad operation and safety requirements exist, they preempt state standards. The state of Florida may adopt laws and regulations and issue orders that are compatible with and more stringent than those at the federal government to address local hazards, as long as the laws do not unreasonably burden interstate commerce. This study identifies a number of shortcomings in existing regulations between federal and state levels for higher-speed rail operations.

→ **There are no codified, minimum standards** specific to higher-speed operations. While FDOT has implemented some higher-speed guidelines in Florida, there is no law mandating adherence to these guidelines.

→ **There is no formal certification of new passenger rail lines** that are not under the jurisdiction of the Federal Transit Authority (FTA) and the Surface Transportation Board (though the FRA does have a process to ensure that a large number of safety-critical elements are in place).

[58] For the difference in maximum operating speeds between a higher-speed and high-speed line see Figure 2-1.

- → **Florida has no regulations or guidelines for when fencing should be installed** and who should be responsible for its installation and maintenance costs outside of individual crossing agreements between railroads, state, and local government entities.
- → **There are FRA Sealed Corridor Guidelines but no mandatory regulations** on corridor treatment for higher-speed operations. While FDOT has required a sealed corridor for higher-speed service in the past, these requirements are not codified.
- → **There are no state-level regulations on railroad system noise and quiet zones**, which can be regulated at a state level.

Given the existing institutional setup, FDOT is responsible for implementing regulations in each of these areas.

6.4 Institutional Gaps

6.4.1 The Need to Clarify FDOT's Mandate

Consultations with local counties and municipalities revealed that recommendations that are above the minimum requirements are not always implemented by railroads as they are seen as non-mandatory. Instead, the FRA's minimum standards are followed by railroads.

FDOT has the right to establish regulations on any issue where there are no federal regulations, as long as they are not incompatible with another law, regulation, or order of the US government, and as long as they do not unreasonably burden interstate commerce. FDOT can also implement federal guidelines as state-level regulations. In some cases, state law codifies federal guidelines such as the state's grade crossing minimum design standards. However, the agency tends to defer to the FRA minimum standards as has been revealed through consultations with local counties and municipalities. Also, in the current model, railroads present projects to the local counties and municipalities, but local feedback is not necessarily addressed by the railroad.

While FDOT works extensively with the FRA on performing safety inspections at operational and tactical levels, FDOT has not developed additional Florida-specific safety regulations, deferring instead to federal standards and guidelines. FDOT's mandate on this issue needs to be clarified and additional resources would likely need to be allocated to allow FDOT to establish and oversee state-level regulations.

6.4.2 Improving the Planning Process for Local Governments

While some local governments may address road, pedestrian and highway issues frequently, few counties and municipalities have expertise in railroad engineering and planning. It was observed in a number of consultations with local governments that local jurisdictions may lack the necessary resources, knowledge, or expertise in addressing railroad engineering issues or in working with railroads. A number of counties mentioned that they were looking to FDOT to provide the necessary knowledge resources, leadership, and guidance for railroad project development.

AMERICAN CRS OVERSIGHT

While FDOT has a Freight and Multimodal Operations Office which deals with Rail Operations and Safety, the office currently does not appear to have adequate resources (e.g. staffing levels and financial resources) to be the able to provide the level of leadership and knowledge that local governments are looking for.

6.4.3 Potential Conflict in FDOT's Existing Mandate

In addition to providing program administration and planning functions, the mandate of the Florida Department of Transportation as written in Title XXVI, Section 341.302 of the 2018 Florida Statutes includes two clauses that may be potentially conflicting:

> *"(2) Promote and facilitate the implementation of advanced rail systems, including high-speed rail and magnetic levitation systems."*
>
> *"(9) Assess penalties, in accordance with the applicable federal regulations, for the failure to adhere to the state standards."*

While the conflict is not currently observable in practice (and is unlikely to be observed in the near future), the existing set-up could, in theory, prevent FDOT from properly exercising its strategic safety regulatory functions in a situation where the department is acting as a promoter for a rail project.

To avoid such conflicts, some states separate the regulatory function from the planning and program administration function of its department of transportation. Figure 6-4 shows the agencies that are responsible for planning and program administration and regulatory authorities in states with significant railroad presence.

Figure 6-4: Railroad Administration and Regulatory Authority for Selected States

State	Program Administration	Regulatory Authority
California	California DOT (Caltrans)	Public Utilities Commission
Colorado	Colorado DOT	Public Utilities Commission

Ohio	Ohio DOT	Public Utilities Commission of Ohio
Pennsylvania	Pennsylvania DOT	Public Utilities Commission
Texas	Texas DOT	Railroad Commission of Texas
Virginia	Virginia DOT	State Corporation Commission
Washington	Washington DOT	Washington Utilities and Transport. Commission

Source: CPCS Analysis

While there may be an additional cost to manage a separate regulator, which should have an independent funding source for exercising its duties, such a separation would provide a clear delineation of responsibility for implementing and enforcing state-level safety regulations.

Internationally, the approach is also different in establishing and measuring regulations.[59] Some key themes include the need to have adequate levels of regulation, the need to consult stakeholders when establishing regulation, and the need for adequate resources to enforce existing regulation.[60]

6.5 Recommendations

6.5.1 Overview

Based on the gaps presented in the previous section, we propose recommendations grouped into six categories for the Legislature and FDOT's consideration to improve passenger rail safety in Florida.

1. Recommendations on institutional design
2. Recommendations on the regulation of specific issues
3. Recommendations on implementing state-of-the-art practices
4. Recommendations on enforcing railroad crossing trespassing violations
5. Recommendations for rail safety resources
6. Recommendations for further research

6.5.2 Recommendations

Recommendation 1: The Legislature may consider updating FDOT's mandate

The Legislature may consider three approaches to creating a better regulatory system.

1.1 **Providing funding for and directing FDOT to administer a committee** to liaise with local governments, communities, and railroads on safety issues.

1.2 **Updating FDOT's mandate to more clearly define its regulatory role** in implementing safety regulations at the state level and supplementing the updated mandate with adequate resources (human and financial) to allow FDOT to implement this mandate.

1.3 **Creating an independent regulatory body with an independent funding source.** The regulatory body would assume FDOT's existing safety oversight functions, and be responsible for strategic, tactical and operational state-level safety regulation for rail and other modes.

[59] International approaches to transport regulation, Webb Henderson, Legal and Regulatory Advisors, 2015
[60] Measuring Regulatory Performance. Evaluating the Impact of Regulation and Regulatory Policy, OECD, 2012

Recommendation 2: FDOT may consider setting new state-level regulations for higher-speed rail

As higher-speed rail services begin operations in Florida, specific higher-speed rail regulations are needed to ensure safety. The FRA currently does not have set standards for higher-speed rail. FDOT should consider the following recommendations.

2.1 Creating a review process to certify new passenger rail lines

FDOT may consider creating a process for evaluating new passenger rail lines to ensure that they are safe to operate. This process would build on other safety review processes performed by other organizations (e.g. FTA, FRA, and STB) and could provide additional requirements on top of these processes, as needed, tailored to the needs of Florida's unique passenger rail system attributes.

2.2 Setting minimum grade crossing design standards

FDOT should build upon its existing minimum grade crossing design standards and existing grade crossing design guidelines to create a more comprehensive set of grade crossing design standards for different types of grade crossings and operating speeds, including higher-speed operations.

2.3 Setting requirements for fencing along railroad corridors

FDOT may consider creating a set of standards for fencing along rail corridors, defining the location of where fencing would be required, and who would be responsible for installing and maintaining the fencing. These standards may depend on the top operating speed of a line.

2.4 Creating guidelines for sealed corridor treatment along railroad corridors

FDOT may consider creating a set of operating standards for higher-speed rail operation, including what treatments must be used along the corridor to ensure a safe train operation. FDOT can look to FRA for design guidelines, as well as North Carolina and Illinois for implementation examples.

Recommendation 3: Implementing State-of-the-Art Practices

The Florida legislature can take a number of concrete steps to put some of the proven state-of-the-art ideas into practice. At the same time, FDOT and Florida passenger railroads should consider continuously improving rail safety by monitoring and implementing the most applicable state-of-the-art safety practices.

3.1 The Legislature may consider creating a mandatory requirement that local counties and municipalities with fiber optic networks along local, non-state-controlled roads make them available for railroad signal "pre-pre-emption" in order to reduce road congestion and increase grade crossing safety

Currently, train detection sensors use existing rails to send frequencies to the nearest grade crossing to activate grade crossing arms. While this system works, it can be improved by sending these signals longer distances using municipal fiber-optic networks, which often run parallel to the railroad. In addition to enhancing safety at grade crossings, this could also lead to a reduction of road congestion in the surrounding areas.

Traffic signals along state roads are required to comply with Signalization Pre-Emption Design Standards. Currently, some municipalities along local roads are participating in this on a voluntary basis, but they are not required to participate or provide access to their fiber-optic network. FDOT raised this gap as a concern during consultations.

3.2 The Legislature may consider creating a requirement for navigation applications to include audio and visual alerts of upcoming railroad crossings

Given the high number of crossings in the state, the legislature may consider requiring navigation/mapping applications to include auditory and visual warnings of upcoming railroad crossings. This requirement would be included in the state's vehicle code.

3.3 The Legislature may consider setting regulations on quiet zone implementation in urban areas to address railroad system noise

A mandate for implementing quiet zones in urban areas would reduce noise and disturbance for surrounding communities. Quiet zones should be required at the beginning of a new service in order to improve the quality of life of surrounding communities and to avoid having to re-educate surrounding communities about changes in expected train behavior (e.g. no horns) after the implementation of quiet zones. While the FRA is responsible for regulating the standards for how quiet zones are to be implemented, the Legislature could mandate a set of grade crossing improvements that would make a crossing to be quiet-zone eligible. The Legislature could also mandate when and how local communities must apply for quiet zone recognition.

3.4 FDOT may consider developing and updating on a regular basis a set of guidelines that discuss state-of-the-art railroad crossing and corridor treatments and their applicability to Florida railroads. This would allow local governments to be informed about the latest technologies available

We recommend that FDOT continuously monitor state-of-the-art grade crossing treatments and develop guidance on which practices they recommend for Florida railroads and local governments. Some areas for consideration include various pedestrian crossing treatments (e.g. AASHTO guidelines), innovative passive crossing treatments, vehicle wedge road barriers at grade crossings, vehicle presence detection at grade crossings, etc. This would allow local governments to be informed about the latest technologies available. FDOT should also consider liaising with other state DOTs and international organizations (e.g. UIC) for working on grade crossing safety.

3.5 FDOT may consider implementing Remote Health Monitoring (RHM) requirements for at-grade crossings with higher road and rail traffic volumes and/or train speeds

Remote Health Monitoring (RHM) detects crossing signal malfunctions to directly notify the dispatcher and maintenance staff of grade crossing equipment malfunctions. This ensures that equipment issues are identified in real-time and fixed in a timely manner. Florida does not currently mandate Remote Health Monitoring at its grade crossings.

Recommendation 4: Enforcing Railroad Crossing Trespassing Violations

Florida has a higher rate of trespassing incidents that incur severe injuries and fatalities compared to the nation. The state also has weaker enforcement statutes for highway-rail grade crossing trespassing when compared to states such as Ohio, which has automatic arrest powers. We recommend the Legislature consider the following recommendations to strengthen trespassing violation enforcement.

4.1 The Legislature may consider requiring the establishment of inter-jurisdictional law enforcement working groups in railroad corridors with a high number of crossings and incidents to ensure that law enforcement agencies are coordinating with each other on trespassing enforcement

Trespassing enforcement is currently the responsibility of local law enforcement. However, railroads have unique security issues and require law enforcement training. In the past decade, the ranking officers at some local law enforcement agencies have been changing frequently, making the enforcement system complex and difficult for railroads. We recommend that the Legislature consider encouraging inter-jurisdictional law enforcement working groups along railroad corridors with a higher number of crossings and incidents to facilitate trespassing enforcement coordination.

4.2 The Legislature may consider granting greater authority to each railroad's security officials to address trespassing along railroads

We also recommend that the Legislature consider granting greater authority to railroad security officials to address trespassing along the railroads. While railroad security officials are not local law enforcement members and lack the same arrest powers, these officials are certified and carry firearms in the state. Providing railroad security officials with greater authority to detain trespassers, for example, may deter trespassing along railroads.

4.3 The Legislature may consider establishing harsher penalties for grade crossing trespassing

Trespassing can only be enforced if there are penalties associated with trespass violations. Florida suffers from habitual trespassing along grade crossings in traffic congested areas. To address this issue, the Legislature could consider a provision to fund enforcement cameras at-grade crossings to capture trespass violations. These enforcement cameras can identify vehicle owners and issue citations against the vehicle. Funds generated from trespass violations can go towards Operation Lifesaver and other local outreach programs to educate the public on rail safety.

4.4 The Legislature may consider establishing a photo/video enforcement program for at-grade crossings

Efforts began in 1995 to install cameras at highway-rail grade crossings. However, due to liability issues, this effort was stalled. The state also experienced a stringent ban on red light intersection cameras which was withdrawn earlier this year. Cameras can be installed to capture vehicle violations at grade crossings. When a vehicle crosses a pre-defined threshold (boom gates), the camera records a series of images and/or video. This camera identifies the vehicle owner, subsequently issuing a citation against the vehicle. Enforcement cameras are not substitutes for quadrant gates or other safety features but can work in conjunction with other grade crossing safety features to prevent trespassing.

Recommendation 5: Reviewing Rail Safety Resources

Railroad safety can only be assured with sufficient funding to build, maintain, and upgrade railroad safety features. The Legislature may consider evaluating funding adequacy for suicide prevention activities and requiring railroads to grant owners of grade crossings the right to use open procurement for grade crossing maintenance. We also recommend that FDOT continue to actively assist local communities in identifying funding opportunities.

5.1 The Legislature may consider assessing the current resources of the Department of Children and Families and of the Department of Health to determine whether statewide suicide prevention activities could be leveraged to greater effect

While Operation Lifesaver provides a good baseline, Florida should go a step further and consider establishing a comprehensive suicide prevention program. The program should include

i. more accurate and comprehensive collection of data on suicides on railroad track;

ii. a requirement for suicide prevention/intervention training for railroad employees working in suicide “cluster” areas (e.g. signal maintainers and track maintenance workers);

iii. suicide prevention signage along key rail corridors at key locations, and linking these to suicide prevention hotlines; and

iv. use of innovative technologies, such as drones or other detection systems to monitor stretches of track for individuals potentially contemplating suicide in railroad suicide “cluster” areas and urban areas.

5.2 The Legislature may consider requiring railroads to allow owners of grade crossings the right to use open procurement for contracting maintenance of grade crossings, fencing, etc.

While private railroads may not use public grants, they require grade crossing and adjacent property owners to fund the construction and maintenance of grade crossing treatments, fencing, and pedestrian crossings.

A number of funding discrepancies were observed between local counties and railroads on these issues due to what has been perceived to be unreasonable costs for maintenance of grade crossings.

We recommend the Legislature consider requiring railroads to allow for open procurement of grade crossing and fencing maintenance providers to promote transparency and competition between maintenance providers and lower the use of public funds.

5.3 FDOT may consider reviewing local planning resources for rail activity and continuing to liaise with local governments to identify funding opportunities for rail safety treatments

FDOT may consider reviewing the types of local planning resources for rail activity and continuing to work with local governments in identifying potential funding sources for improving rail safety treatments, including grade crossing safety. Review of planning capacity and funding availability may prove helpful for local governments that do not have rail expertise on staff or readily available otherwise with knowledge of specific funding mechanisms to promote rail safety in their jurisdictions.

5.4 FDOT may consider requesting an evaluation of funding levels for rail safety in its annual legislative budget request to highlight needs at the state and local level

Continued funds should be available to support not only technical treatments but also critical evaluation efforts such as FDOT's Operation Lifesaver and other local outreach programs.

Recommendation 6: Continuing Research to Promote Public Safety Along Railroads

This study recommends further research on the following topic.

6.1 FDOT may consider developing a methodology for analytically evaluating grade crossing closures.

Florida's development patterns resulted in numerous closely-spaced grade crossings. FDOT lacks an analytical methodology to determine which crossings should be consolidated and where strategic investment should be made. The methodology should have a component that would consider impacts on traffic congestion. This study can follow the ongoing FDOT Optimization Model Study, which prioritizes grade crossings for upgrade treatments based on risk factors.

Appendix A. Economic Conditions and Outlook in Florida

This section examines the current economic conditions and trends in Florida. Florida is the third most populous state in the country. As of 2017, the state had a population of roughly 21 million people with an annual growth rate of 1.5 percent.[61] Approximately 20 percent of Florida's residents are 65 years and over, and this percentage is expected to continue to rise.

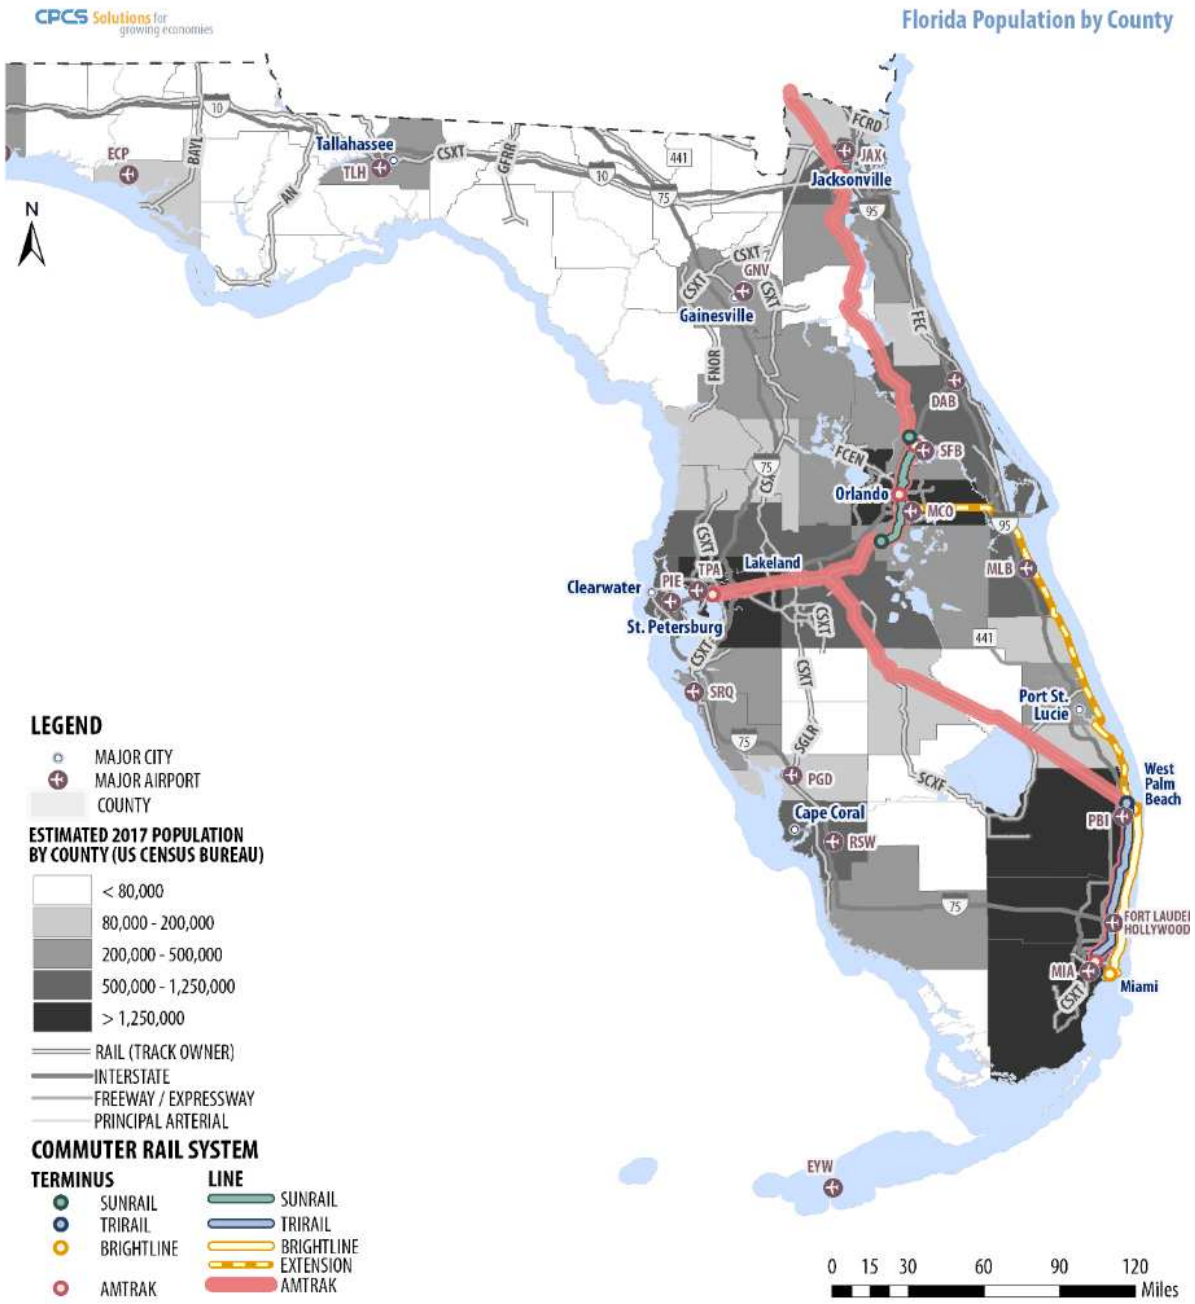
Figure A-1 lists the top Florida counties by population growth for 2010 to 2017.

Figure A-1: Top Florida Counties by Population Growth (2010-2017)

County	2010 Population	2017 Population	Annualized Growth Rate
Sumter County	93,420	125,165	4.27%
Osceola County	268,685	352,180	3.94%
St. Johns County	190,039	243,812	3.62%
Walton County	55,043	68,376	3.15%
Lee County	618,754	730.224	2.57%
Manatee County	322,833	385,571	2.57%
Orange County	1,145,956	1,348,975	2.36%

Source: US Census American FactFinder Data[62]

Between 2010 and 2017, the state's total population grew by 11.6 percent, primarily attributable to net migration flows into the state. Anecdotally, U-Haul data suggest that Florida had the second highest migration growth in 2017, after Texas.[63]



The state's overall economic condition and outlook remain robust. Employment of 9,845,859 as of June 2018 is the highest in state history, with growth particularly notable in professional and business services, tourism, and healthcare sectors. The unemployment rate is at an 18-year low of 3.8 percent as of June 2018. Florida's Real Gross State Product is projected to expand at an average annual rate of 3.3 percent from 2018 to 2021.

Figure A-2 illustrates the state's population density by county, in relation to the passenger rail network. Florida's population is most concentrated in the tri-county South Florida region along

[61] US Census Bureau QuickFacts – Florida
[62] US Census American FactFinder Data
[63] U-Haul Migration Trends: Florida No. 2 Growth State for 2017

with the Central Florida region. Of note, the tri-county region (Miami-Dade, Broward, and Palm Beach), Hillsborough County where Tampa is located, and Orange County where Orlando is, are of the most populated counties in the state. The three county area of Miami-Dade, Broward, and Palm Beach counties represents approximately a third of all Florida population and household income.[64]

Figure A-2: Florida Population by County

[64] Board of Directors Meeting, Florida Development Finance Corporation, October 27, 2017

Figure A-3 provides an overview of annual population growth in Florida between 2010 and 2017. The highest growth occurred around Orlando, south of Jacksonville and around Fort Myers.

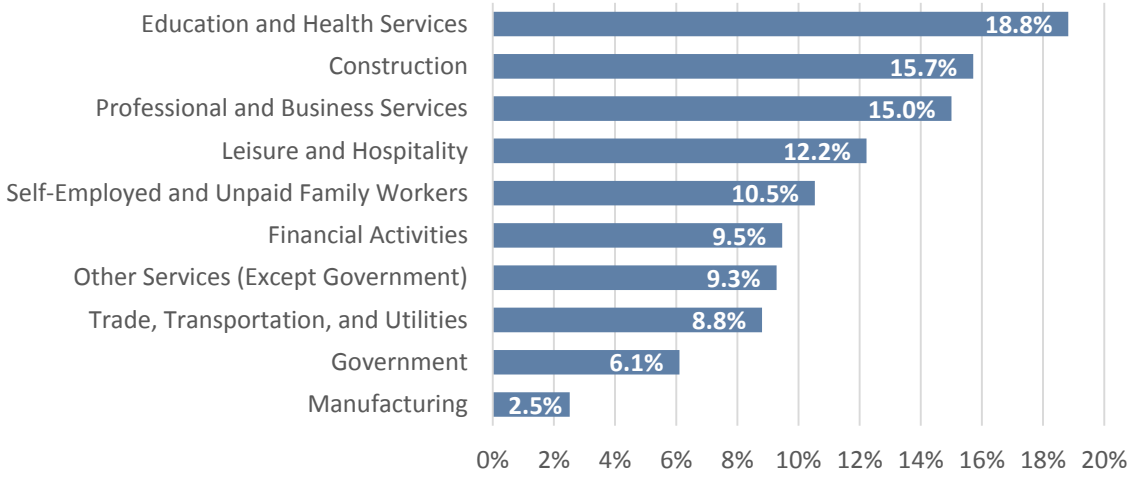

Figure A-3: Annual Population Growth in Florida (2010-2017)

Source: CPCS Analysis

Payroll job growth will continue to outpace national job growth. The total number of jobs in the state is expected to grow 11.3 percent from 2017-2025 due to consistently strong payroll job creation. Figure A-4 indicates the sectors projected for the strongest average job growth from 2017 to 2025.

Figure A-4: Sectors Projected for the Strongest Job Growth for the period 2017-2025

Source: US Bureau of Labor Statistics via Florida Department of Economic Opportunity

Visitors to Florida increased by 3.6 percent in 2017 compared to the year before. This is reflected by a 4.5 percent increase in domestic visitors to the state, partially offset by a decline in the number of overseas visitors as seen in Figure A-5.

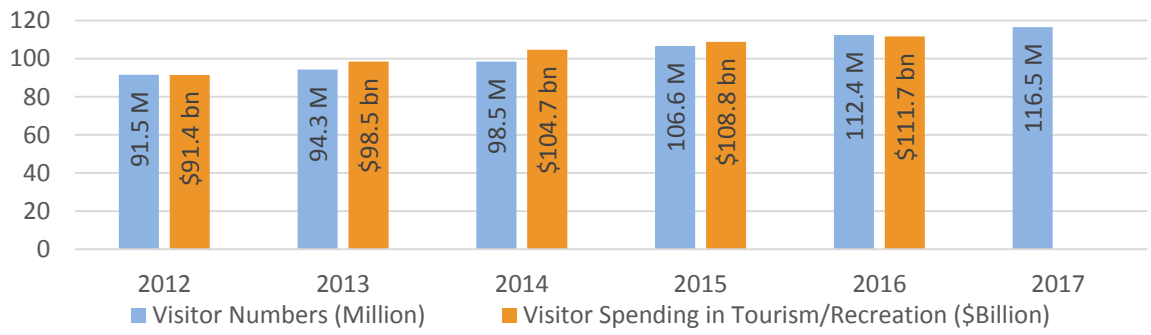

Figure A-5: 2017 Estimates of Visitors to Florida (millions)

Visitor Origin	Million Trips	Year Over Year Change
Domestic	102.35	+4.5%
Canadian	3.48	+4.0%
Overseas	10.68	-4.3%
Total	**116.49**	**+3.6%**

Source: VISIT Florida

Below, Figure A-6 provides an illustration of Florida visitor contributions to the state economy in tourism/recreation between 2012 and 2017.

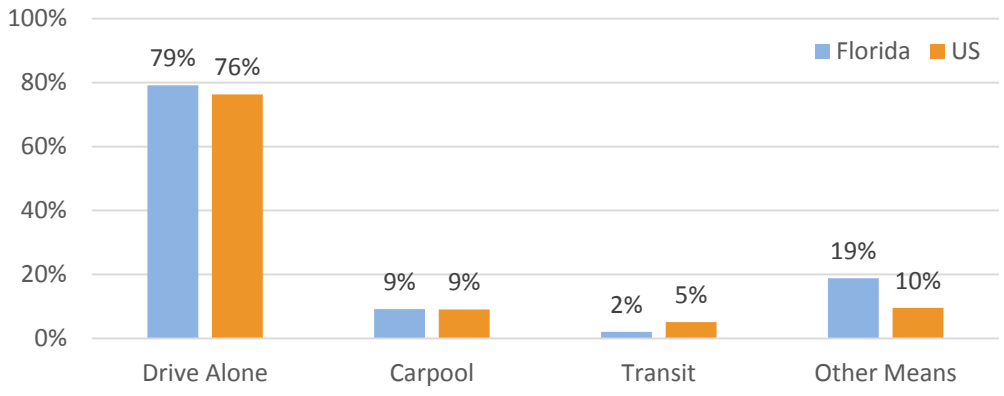

Figure A-6: Florida Visitor Contribution to the Economy, 2012-2017

Source: CPCS Analysis of "The Economic Impact of Out-of-State Visitors in Florida", VISIT Florida, 2016

Despite the high density of settlement, Florida has a lower percentage of people using transit for work commutes, compared to the rest of the country. While the rates for solo driving and carpooling is similar to the rest of the US, twice as many Floridians travel to work by other means. This includes walking, bicycling, working from home, ride-hailing, and other means. Figure A-7 compares mode of travel for work commute between Florida and the entire US.

Figure A-7: Mode of Travel for Work Commute, 2016

Appendix B. Florida Passenger Rail Systems outside the Scope of the Study

This section summarizes urban rail systems that are present in Florida. As these systems fall outside the scope of this study, they will be presented here for informational purposes only. Figure B-1 lists urban rail systems in Florida.

Figure B-1: Urban Rail Systems

Name	Ownership	Operating Agency	Length (mi)	Type of Service	Location	Annual Ridership
Miami Metrorail	Miami-Date County	Miami-Dade Transit	25	Heavy Rail Rapid Transit	Miami-Dade County	20 million
Miami Metromover	Miami-Date County	Miami-Dade Transit	4.4	Automated Peoplemover	Miami-Dade County	360 thousand
JTA Skyway	Jacksonville Transportation Authority	Jacksonville Transportation Authority	2.5	Automated Peoplemover (Monorail)	Jacksonville	481 thousand[65]
TECO Line Streetcar	City of Tampa	Hillsborough Area Reg. Transit	2.7	Heritage Streetcar	Tampa	278 thousand

Source: CPCS Analysis of Metrorail, Metromover, TECO Streetcar, and Skyway Websites

Other passenger rail systems in Florida (not presented here) include:

1. **Amusement Park Rail** – Walt Disney World Monorail, Walt Disney World Railroad, Okavango Railroad (Jacksonville Zoo), and Serengeti Railway (Busch Gardens).

2. **Tourist or Excursion Rail** – Florida Gulf Coast Railroad Museum, Inland Lakes Railway, Florida Railroad Museum, Gold Coast Railroad Museum, Railroad Museum of South Florida, Seminole Gulf Railway, Orlando and North Western Railway, and Star Clipper Dinner Train.

[65] Advanced Transit Presentation, Oct 2015

Miami Metrorail

Miami Metrorail is a 25-mile two-line heavy rail rapid transit system connecting the urban center of Miami with its northern and southern suburbs.

The system is part of Miami-Dade Transit (MDT) and is integrated with Metromover, a peoplemover in Downtown Miami and with bus services run by MDT.

The Green and Orange Metrorail lines have 23 stations and carry approximately 20 million passengers annually.

The Strategic Miami Area Rapid Transit Plan (SMART), developed by Miami-Dade County and the Planning Organization (TPO) in 2016, includes six new rail transit corridors and a series of Bus Rapid Transit (BRT) lines.

Type:	Heavy Rail Rapid Transit
Track Length:	25 miles
Lines:	2
Stations:	23
Power System:	Third Rail
Service Hours:	5AM to Midnight
Train Frequency:	Peak: 5-10 min Off-Peak: 7-15 min
Annual Ridership:	20 million

Source: Miami Miami-Dade Transit

AMERICAN OVERSIGHT

Miami Metromover

Metromover is a 3-line 21-station automated peoplemover (APM) system that provides free service in Downtown Miami. Annual ridership is 360 thousand passengers each year. Metromover connects with Metrorail at Government Center and Brickell stations. Metromover began operating 1986 and was expanded in 1994. In 2002 Miami-Date Transit made Metromover free to ride. There are plans to expand service to South Beach and the Midtown area, as part of the SMART plan.

Type:	Automated Peoplemover (APM)
Track Length:	4.4 miles
Lines:	3
Stations:	21
Power System:	Third Rail
Service Hours:	5AM to Midnight
Train Frequency:	1.5 to 6 min
Annual Ridership:	360 thousand

Source: Miami Miami-Dade Transit

Jacksonville Skyway

The Skyway is an elevated and automated people mover monorail serving Downtown Jacksonville that began operating in 1989 and was subsequently extended in 1996, 1998, and 2000. Currently, the 2-line monorail has eight stations on both sides of the St. John River, providing free service to nearly 5,000 passengers on a daily basis. Jacksonville Transit Authority (JTA) operates and maintains the Skyway. After considering closure, in 2017, the JTA announced that the Skyway would keep operating for at least another five years.

Type:	Automated Monorail
Track Length:	2.5 miles
Lines:	2
Stations:	8
Power System:	Side Rail
Service Hours:	M-F 6AM-9PM S/Su Special Events Only
Train Frequency:	Peak: 4 min Off-peak: 8 min
Annual Ridership:	481 thousand

AMERICAN OVERSIGHT

TECO Line Streetcar System

The Hillsborough Area Regional Transportation Authority operates the historic TECO Line Streetcar System in Tampa and owned by the City of Tampa.

The current system opened 2002 and was extended in 2010 to a total of 2.7 miles.

In 2016, the streetcar carried 278 thousand passengers with an average daily ridership of 780 passengers. Additional extensions north are planned.

Type:	Heritage Streetcar
Track Length:	2.7 miles
Lines:	1
Power System:	Overhead Wire
Service Hours:	Mon-Thu 12P-10:30P
	Fri-Sat 11A-2A
	Sun 12P-9P
Frequency:	20-30 min
Annual Ridership:	278 thousand

Source: Hillsborough Area Regional Transportation Authority

Appendix C. Detailed Analysis of Florida Passenger Rail System Financial Figures

AMERICAN OVERSIGHT

C1. Amtrak

1. Background, Ownership and History

Originally created in 1970 as a for-profit government corporation with trackage rights over all freight railroads, Amtrak was converted to a private entity in 1997 in an effort to make the railroad more self-sufficient. Since 1997, Amtrak has continued to receive public funds through annual appropriations to continue operating, although the funding has been far below requested levels.

At its inception, Amtrak began a series of rail services linking Florida with other U.S. destinations. These included the *Silver Star* (New York-Miami – St. Petersburg), *Silver Meteor* (New York-Miami), *Champion* (New York – St. Petersburg), and *Floridian* (Chicago – St. Petersburg/Miami). Among these, the Silver Star and the Silver Meteor are still in service, along with the addition of the *Auto Train* (Lorton, Virginia – Sanford, Florida). While the first *Silver Meteor* and the *Silver Star* are conventional passenger intercity rail services, the *Auto Train* is an overnight service that provides car drivers with a way to transport themselves and their cars without having to drive, acting as a car shuttle between the Northeast and Florida.

Overall, Amtrak covered 95 percent of its qualified operating expenses in Fiscal Year 2017 through ticket sales, payments from state partners and agencies, and other revenue.

Figure C-1: Amtrak in the 1970s: Florida-Bound *Silver Meteor* Train (Left) and Jacksonville Station (Right)

Source: (Florida-Bound Train with Palmettos, Jacksonville, Fla., Amtrak Station) Amtrak Archives

2. Infrastructure

Amtrak trains operate over track that is owned by other railroads for 72 percent of its line miles nationally. Most of the Amtrak-owned line mileage is located between Washington, DC and Boston (Northeast Corridor) and between Philadelphia, PA and Harrisburg, PA (Keystone Corridor).

Amtrak does not own any track in Florida, but operates a maintenance facility in Hialeah. Amtrak's Southern Division, which is responsible for Amtrak's operations in the Southeastern

United States, is headquartered in Jacksonville. The railroad also has train and engine crews based in Miami, Sanford, and Jacksonville, an onboard service crew based in Hialeah, as well as contractor-operated commissaries in Hialeah and Sanford.

3. Operations

Nationally, Amtrak operates over 300 daily trains each day, serving over 500 destinations on over 21,400 miles of routes. In Fiscal Year 2017 (October 2016 to September 2017), Amtrak transported over 31.7 million passengers over its entire route network.

In Florida, Amtrak handled a total of 923,483 boardings and alightings in Fiscal Year 2017. Amtrak serves 18 stations in Florida. In Fiscal Year 2016, Amtrak transported 468,214 intra-state riders, traveling a total of 273,181,646 rail passenger-miles and generating $64 million in revenue for Amtrak. The railroad supports 2,780 jobs in the state, contributing $31.8 million GDP (value-add) to the region (Amtrak Contribution to Florida, 2016).

In Florida, Amtrak operations provided $16.3 million in public safety cost savings from the lower risk of traveling by train compared to traveling by car. Half of Amtrak riders were tourists in 2016, generating $860,000 in tourist spending. Nearly 67 percent of Florida's population lives within 30 miles of an Amtrak station.

4. Florida Services

Amtrak operates three services within Florida. A service map of existing and discontinued service is shown in Figure C-2.

Existing Services

Amtrak operates three services in Florida: the Silver Meteor, Silver Star, and Auto Train.

1. *Silver Meteor* runs daily from New York to Miami, a total of 527.1 miles. The train makes Florida stops in Jacksonville, DeLand, Orlando, Winter Haven, Sebring, Okeechobee, West Palm Beach, Delray Beach, Deerfield Beach, Fort Lauderdale, and Hollywood, before terminating in Miami.

2. *Silver Star* runs daily from New York to Miami, a total of 664.8 miles. The Silver Star makes Florida stops in Palatka, Winter Park, Kissimmee, Lakeland, and Tampa, before circling back onto the same route as Silver Meteor between Winter Haven and Miami.

3. *Auto Train* is an 855-mile rail service that runs daily between Lorton, Virginia (near Washington, DC) and Sanford, Florida on a 16.5-hour overnight trip. The train consists of Superliner coaches and sleepers for passengers and auto carrier cars for their vehicles. In Fiscal Year 2017, this train carried 228,943 passengers and 123,772 vehicles.[66] In Florida, this train uses track owned by SunRail and CSX.

[66] Amtrak State Fact Sheet: Florida 2017

Figure C-2: Amtrak Service Map in Florida

Source: CPCS Analysis

Expansion Plans: Discontinued Sunset Limited Service

Amtrak's Sunset Limited line is the Country's second longest passenger train. In 2005, due to track damage from Hurricane Katrina, Amtrak's Sunset Limited Service east of New Orleans was suspended. The service is yet to be reinstated, despite repairs to the line in 2006 by CSX. Currently, BNSF and UP each own parts of the line from Los Angeles, CA to New Orleans, LA. CSX owns the line from New Orleans, LA to Jacksonville, FL.

In 2015, Amtrak, the Federal Railroad Administration (FRA) and the Southern Rail Commission analyzed the feasibility of restoring passenger service to parts of the line between New Orleans and Jacksonville. Later in 2016, Amtrak ran a test train on the restored tracks as a result of those studies. Due to projected low ridership levels and new safety and reliability requirements, the service has not been restored.

The final report to Congress submitted by the FRA in July 2017 estimated that $117 million in capital costs were required to restore service and additional budget was required for planning and development of the project. According to the Southern Rail Commission, the time frame for restoring passenger service between New Orleans and Jacksonville is 2020 or later.

5. Ticket Revenue

On a national level, Amtrak achieved record system-wide ridership and ticket revenues in Fiscal Year 2017. This was due to improved market demand, better revenue management, and higher state/agency capital amortization.[67]

Amtrak fares vary by expected demand, distance, and ticket type. Amtrak offers the following ticket types from lowest to highest cost: Saver, Value, Flexible, Business, and Premium. Within the Premium class, different rooms are offered at different price points: Viewliner Roomette and Viewliner Bedroom (Silver Line); and Superliner Roomette, Family Bedroom, and Superliner Bedroom (Auto Train).

The full length of the journey costs anywhere between $124-$340 for Saver, Value, and Flexible tickets on both Silver Star and Silver Meteor trains. Business and Premium tickets for the full length of the journey will vary between $342 and $1043. Silver Star Premium tickets are priced slightly less expensive than the Silver Meteor Premium tickets, because Silver Meteor has a full-service dining car with all meals included in fares paid by sleeping car passengers.

Auto Train passenger tickets for a full-length journey range from $112 to $272 for the Saver, Value, and Flexible tickets. Premium tickets can go as high as $1084 for the Superliner Bedroom.

6. Revenue from the Government for Operating Train Services

Amtrak is dependent on funding from the Federal Government to operate the national passenger rail system and to maintain the infrastructure that it owns (Amtrak owns no rail line infrastructure in the State of Florida and has trackage rights on other railroads' tracks for operating its trains). This federal funding usually flows through annual appropriations and is then provided to Amtrak by the FRA, pursuant to annual grant agreements.

The Passenger Rail Reform and Investment Act (PRRIA) in 2015 authorized $8.1 billion in annual grants to Amtrak for Fiscal Year 2016 – 2020. $2.6 billion supports Amtrak's Northeast Corridor and $5.5 billion supports Amtrak's National Network. An additional $2.2 billion is authorized for other rail grant programs that Amtrak may participate in. These appropriations began in Fiscal Year 2017 due to deferred implementation based on when the FAST Act was enacted.

Several states provide direct funding to support operations, totaling $224.0 million in Fiscal Year 2017. States providing funding include: California, Connecticut, Illinois, Indiana, Maine, Massachusetts, Michigan, Missouri, New York, North Carolina, Oklahoma, Oregon, Pennsylvania, Texas, Vermont, Virginia, Washington, and Wisconsin. The State of Florida does

[67] Amtrak Fiscal Year 2017 Financial Statements

not provide direct revenues to Amtrak and Amtrak does not provide intra-state trains, except for those mentioned previously.

7. Revenue for Infrastructure Maintenance and Improvements

The National Surface Transportation and Innovative Finance Bureau of the Federal Government (Build America Bureau) also provides financing to Amtrak through the Railroad Rehabilitation and Infrastructure Financing (RRIF) Program.

Authorized competitive and partnership grant programs where Amtrak may apply for Fiscal Year 2016 – Fiscal Year 2020 include a total of $1.1 billion authorized for rail infrastructure and safety improvements, $1.0 billion for federal-state partnership grants for state-of-good-repair projects, and $100 million for rail restoration and enhancement grants. No funds were received through these programs in Fiscal Year 2016 or Fiscal Year 2017. Most of these funds are appropriated for infrastructure projects, and Amtrak owns little infrastructure in Florida.

The Continuing Appropriations Act, 2018, and Supplemental Appropriations for Disaster Relief Requirements Act, 2017, provide funding for Amtrak for Fiscal Year 2018. No federal funds have been appropriated subsequent to February 8, 2018.

8. Other Revenues

Amtrak also receives funds for engineering and capital improvement projects, revenue for providing access to Amtrak-owned tracks for other railroads, commercial development revenue from retail, parking, advertising, real property leases/easements/sales and access fees, contractual agreements to operate commuter rail services, amortization of state funds to acquire depreciable assets, and freight access fee revenue from freight railroad companies (Amtrak Fiscal Year 2017 Financial Statements).[68]

9. Capital and Operating Costs

Funds from state and local entities and federal appropriations are used for capital spending programs. Figure C-3 provides Amtrak's capital expenditures broken down by department for its entire network for Fiscal Year 2017. Amtrak financial statements do not break out expenditure by state.

Figure C-3: Amtrak Capital Expenditures (in millions) – Fiscal Year 2017 and Fiscal Year 2016 Comparison

Expenditure	Fiscal Year 2017 ($M)	Fiscal Year 2016 ($M)
Engineering	$1,010.0	$863.5
Mechanical	$265.7	$322.1
Information Technology (IT)	$124.3	$43.2
Other	$515.9	$367.2
Total	**$1,915.9**	**$1,596.0**

Source: Amtrak Fiscal Year 2017 Financial Statements

[68] Amtrak Fiscal Year 2017 Financial Statements

Capital expenditures increased by $320 million in Fiscal Year 2017 due to various major expenditures needed to continue to provide safe, efficient, and reliable service. This includes various right-of-way (track, signals, substations) replacement and upgrade projects, station and facility as well as other upgrades.

Mechanical expenditures include overhauls and conversions of AmFleet (single-level intercity passenger cars built in the 1970s and 1980s), Superliners (bi-level passenger cars built in the 1970s and 1990s), locomotives, and other passenger cars.

Information Technology (IT) programs to improve operations and customer experience, and other major capital expenditures through Next-Generation High-Speed trainsets, also contributed to this higher level of capital expenditures in Fiscal Year 2017.

Figure C-4 provides a summary of total operating expense in millions for both Fiscal Year 2017 and Fiscal Year 2016. Operating costs decreased by 1.2 percent in Fiscal Year 2017, primarily due to lower depreciation and amortization as well as lower casualty and other claims, partially offset by higher costs for fuel, power, utilities, and materials.

Figure C-4: Total Operating Expenses (in Millions) – Fiscal Year 2017 and Fiscal Year 2016 Comparison

Expense	2017 ($M)	2016 ($M)	$M Change	% Change
Salaries, Wages, and Benefits	$2,084.6	$2,087.6	(3.0)	(0.1)%
Train Operations	287.6	300.2	(12.6)	(4.2)
Fuel, Power, and Utilities	239.7	230.4	9.3	4.0
Materials	165.3	157.9	7.4	4.7
Facility, Communication, and Office-Related	179.9	174.9	5.0	2.9
Advertising and Sales	106.9	104.4	2.5	2.4
Casualty and Other Claims	70.7	72.9	(2.2)	(3.0)
Depreciation and Amortization	767.0	813.4	(46.4)	(5.7)
Other	454.5	468.7	(14.2)	(3.0)
Indirect Cost Capitalized to Property and Equipment	(145.8)	(149.1)	3.3	(2.2)
Total Operating Expenses	**4,210.4**	**4,261.3**	**(50.9)**	**(1.2)**

Source: Amtrak Fiscal Year 2017 Financial Statements

Overall, Amtrak covered 95 percent of its qualified *operating* expenses in Fiscal Year 2017 through ticket sales, payments from state partners and agencies, and other revenue.

This does not include depreciation and amortization expenses, capital project related expenditures, post-retirement employee benefit cost, and Office of Inspector General (OIG) expenses.

Figure C-5 provides Amtrak's Fiscal Year 17 Consolidated Results of Operations, indicating that Amtrak continues to operate at a net loss. The service ended Fiscal Year 2017 with a net loss of $968.7 million, which was a 10.3 percent decrease from the prior fiscal year net loss of $1.08

billion. These losses are compensated from various sources mentioned previously in this chapter.

Figure C-5: Amtrak Consolidated Results of Operations (In Millions)

Item	Fiscal Year 2017 ($M)	Fiscal Year 2016 ($M)	$M change	% change
Total Revenues	**$3,305.7**	**$3,240.6**	**$61.5**	**2.0%**
Total Operating Expenses	$4,210.4	$4,261.3	(50.9)	(1.2)
Net Other Expense	$61.9	$58.0	3.9	6.7
Loss Before Income Taxes	$966.6	$1,078.7	(112.1)	(10.4)
Income Tax Expense	$2.1	$1.8	0.3	16.7
Net Loss	**$968.7**	**$1,080.5**	**(111.8)**	**(10.3)**
Ridership	31.7 million	31.3 million	0.4	1.3%

C2. Tri-Rail

1. Background, Ownership and History

Tri-Rail originally began operations on January 9, 1989, as a temporary commuter rail service to alleviate highway congestion during Interstate 95 and turnpike construction work. Higher than expected ridership made Tri-Rail a permanent service. Tri-Rail is managed by the South Florida Regional Transportation Authority (SFRTA), and the line is wholly owned by the Florida Department of Transportation (FDOT). The existing map is shown in Figure C-6.

Figure C-6: Tri-Rail Service Map

Source: CPCS Analysis

Tri-Rail operates on a right-of-way that was used in the early 1920s by the Seaboard-All Florida Railway for intercity passenger rail service from New York City. Later, this right-of-way became

the Miami subdivision of CSX, which was purchased by the Florida Department of Transportation in 1988.[69]

CSX handled dispatch services, track maintenance, and had exclusive freight trackage rights (which was used for approximately 10 daily freight trains) until March 29, 2015. Dispatch and maintenance are now managed by the South Florida Regional Transportation Authority (SFRTA). In Fiscal Year 2017, Tri-Rail transported 4.26 million passengers and required a subsidy per passenger of $18.12, which is $0.65 per passenger-mile.

2. Infrastructure and Rolling Stock

The system is 72 miles long with 18 stations, running parallel the Southeast Florida Coast. The system connects directly to Amtrak at six stations and to Miami Metrorail at two stations. Tri-Rail also provides connections to the region's three major airports: Miami International Airport (MIA) via a peoplemover system, Fort Lauderdale – Hollywood International Airport (FLL) via a bus shuttle, and Palm Beach International Airport (PBI) via a bus shuttle. In addition to Tri-Rail trains, the rail line is shared with Amtrak's *Silver Meteor* and *Silver Star*. CSX Transportation continues to run freight trains on this line.

As shown in Figure C-7, Tri-Rail's total active fleet consists of 10 trainsets. Each trainset is made up of a single locomotive, two trailer cars, and a cab car. Tri-Rail has 24 active locomotives, 21 active cab cars, and 29 active trailer cars. Tri-Rail also operates 28 commuter buses that connect to its stations.[70]

Figure C-7: Tri-Rail Fleet

Manufacturer	Type	Qty.
Locomotives		
Morrison-Knudsen	MK F40PHL-2	3
MPI	MK F40PH-2C	3
EMD*	EMD F40PH (Originally Amtrak F40PHs, rebuilt by MPI)	2
EMD	EMD GP49PH-3	6

Bombardier	Bi-Level Trailer	15
Hyundai/Rotem	Control Trailer Coach BTC-5 (Cab)	10
Hyundai/Rotem	Blind Trailer Coach BTC-5 (Trailer)	14
Total Cars		**50**

Source: Tri-Rail Coastal Link Study[71] and SFRTA Forward Plan Fiscal Year 2018 - 2027[72]

[69] South Florida East Coast Corridor Transit Analysis Study: Environmental Impact Assessment, FTA, USDOT and FDOT, 2006
[70] Tri-Rail Fact Sheet, September 2017
[71] Preliminary Project Development Report, Tri-Rail Coastal Link Study, 2014
[72] Transit Development Plan. SFRTA Forward Plan. Fiscal Year 2018-2027.

3. Operations

Tri-Rail currently operates 25 round-trips between Miami Airport and Mangonia Park on weekdays and 15 round-trips on weekends over a 72-mile line. In Fiscal Year 2017, Tri-Rail ridership totaled 4.26 million riders. Assuming the average train consists of three, 162-seat cars, Tri-Rail has a 27.1 percent average load factor, assuming that on average passengers travel for half the line distance.

4. Maintenance

In 2017, a 10-year contract for Operating Services, which includes Maintenance of Equipment, Train Operations, Station Maintenance, and Dispatching was awarded to Herzog Transit Services.

Maintenance of Way for track and signals is contracted to VMTI, wholly owned by Transdev, under a 7-year contract, which began in 2015. VMTI has subcontracted the signaling part of the contract to Xorail.

5. Expansion Plans

In a 2015 document, SFRTA identified a number of capacity-improvement projects, including connecting Tri-Rail to Miami Central Station by Q3 2019 and a capacity improvement project for a single-track bridge, north of Miami International Airport (SFRTA Miami-Dade County Rail Opportunities, 2015). SFRTA has also identified a number of corridors which should be studied in the medium- to long-term. A summary of these projects is provided in Figure C-8 and a map of these projects and corridors is provided below in Figure C-9. More information on two of these projects is provided below.

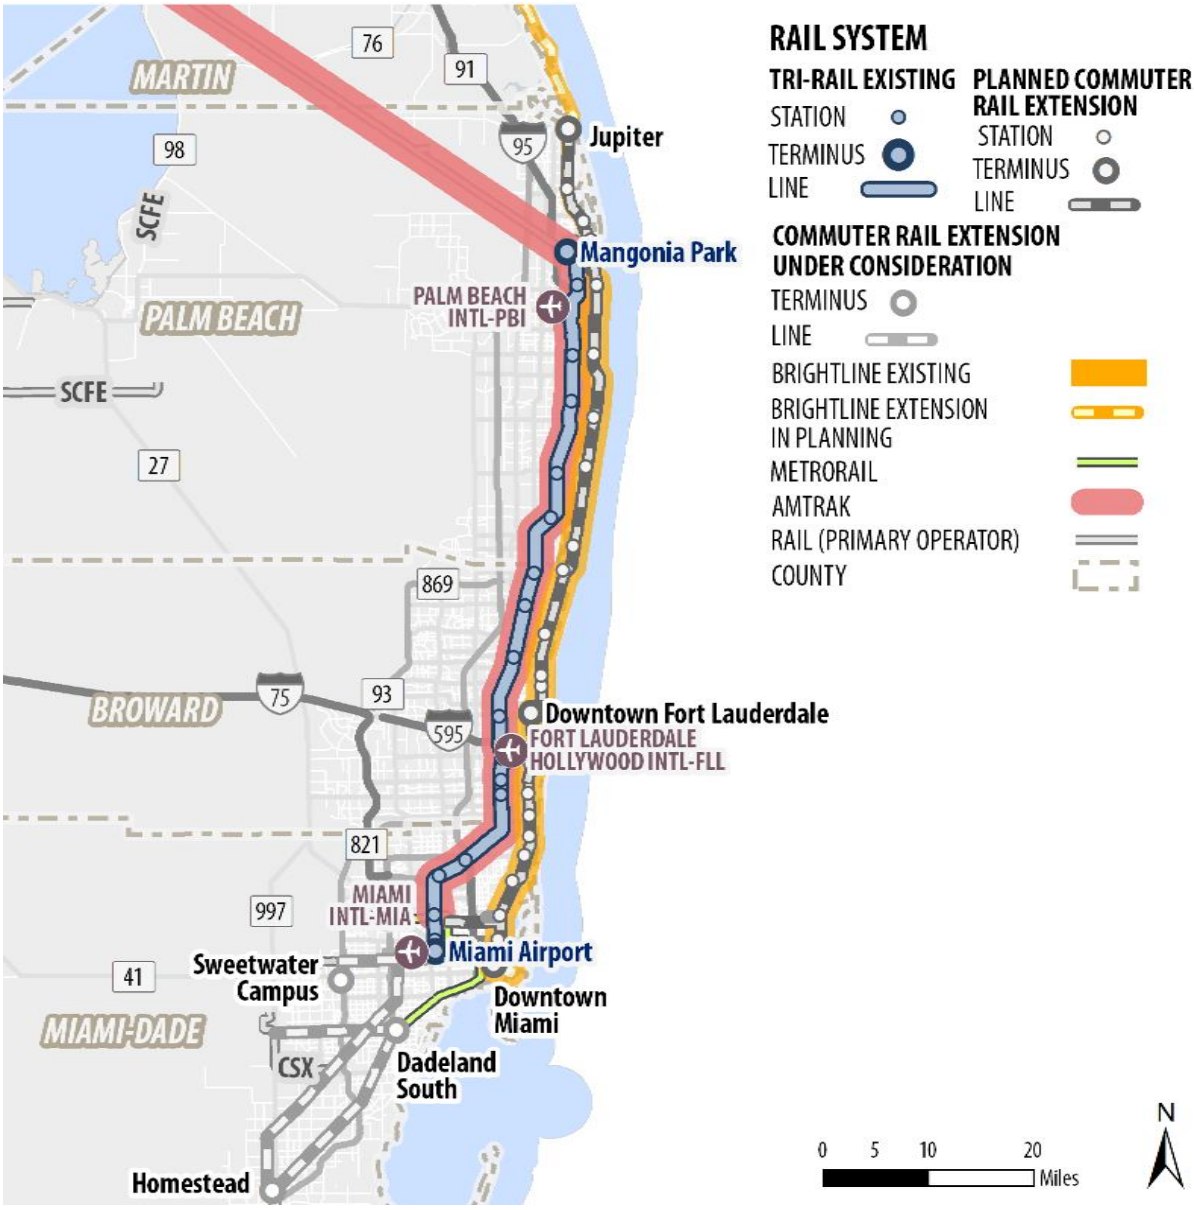

Figure C-8: Proposed Expansion Projects by SFRTA

Expansion Project / Corridor	Length (mi)	Ownership	New Stations	Grade Crossings	Timeline	Estimated Cost	Status
Downtown Miami Station	8	All Aboard Florida	1	19	Q3 2019	$68.9M	Under Construction
Rail Bridge expansion north of Miami Intermodal Center	<1	State of Florida	–	–	2019-2020	$27M to $50M	In Planning. EIR completed as of 02/2018.
Coastal Link Extension	85	TBD	25	TBD	<6 years	TBD	Negotiations between SFRTA and Brightline
Dolphin/East-West Extension	11	State of FL and CSX	6	12	3-6 years	$150M to $190M	Proposed

Figure C-9: South Florida Passenger Rail Expansion Projects

Source: CPCS Analysis

Downtown Miami Link

This 9-mile section of the Coastal Link Expansion project is known as the Tri-Rail Downtown Miami Link (TRDML). The TRDML line will provide a connection from the existing Tri-Rail line to the new Miami Central Station in Downtown Miami. Once the link is complete, the transit hub will serve both Tri-Rail and Brightline trains as well as other local public transit. Tri-Rail's connection to the station is expected to be complete sometime in 2019.

Coastal Link Expansion

South Florida Regional Transportation Authority (SFRTA) announced plans for a second commuter rail line along the along the Florida East Coast Railway corridor in 2010. This project was also envisioned in the 2025 and 2030 Long Range Transportation Plans (LRTP).

In a collaboration with FDOT and local Metropolitan Planning Organizations, SFRTA published a preliminary study of alternatives for a commuter rail service from Miami to Jupiter that would operate on existing tracks of Florida East Coast (FEC) Railway, the same corridor that Brightline uses to run its trains. The purpose of this expansion is to provide additional capacity to Tri-Rail's existing commuter rail services, which currently operate in a parallel corridor, west of the I-95 corridor.

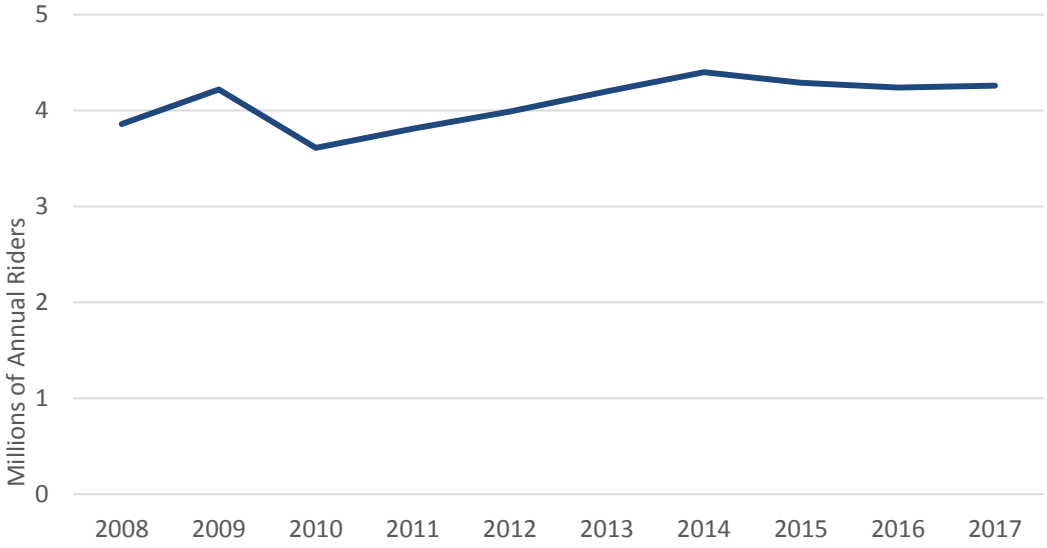
The Coastal Link project is planned to be implemented in multiple phases and the service would operate daily between 4 AM and midnight, with 30-minute peak and 60-minute off-peak headways.[74]

FDOT estimated a $600-$800 million capital cost for the entire Coastal Link system (2014 projections) with an additional $40 million annual budget for operation and maintenance. Tri-Rail expected to be able to cover 50 percent of the capital costs through federal funding programs and the other 50 percent through State and local funding. The Coastal Link Expansion project received a federal Transportation Investment Generating Economic Recovery (TIGER) grant for the construction of Norwood and IRIS connection tracks.[75] The initial environmental work on this project has been completed.

In 2017, negotiations stalled between SFRTA and Brightline as Brightline was looking to explore the possibility of running commuter service independent of SFRTA along its tracks. Currently, this project is on hold until FDOT finds a viable funding source for operating and maintaining the expanded commuter rail system and negotiates a way forward with Brightline.

6. Farebox Revenue

As shown in Figure C-10, in Fiscal Year 2017, 4.26 million passengers rode Tri-Rail, a 0.5 percent increase from the previous year. Riders increased most significantly on Saturdays (2.48 percent) and Sundays (2.69 percent). Holiday ridership fell by 17.15 percent year-over-year, but this amounted to just a decline of 4,693 passengers.



Tri-Rail fares are dependent on the number of zones traveled and whether purchasing a one-way or round-trip ticket. Twelve-ride and monthly tickets are also available. Figure C-11 provides Tri-Rail's fare chart.

Discounts on full fare products are provided for purchasing a round-trip fare (12-17 percent discount compared to 2 one-way tickets), or 12-trip tickets (approximately a 30 percent

[74] Tri-Rail Coastal Study, FDOT, July 2018
[75] Moving Our Region Forward, SFRTA, Fiscal Year 2018-2027

discount over 12 one-way fares). Discounts of 25 percent are available to participating employers who are members of the Employer Discount Program (EDP).

Figure C-10: Tri-Rail Ridership (in Millions) Fiscal Year 2008 – Fiscal Year 2017

Source: SFRTA Fiscal Year 2017 Comprehensive Annual Financial Report

Discounts are also available for riders who are 65 years old or above, persons with disabilities and children up to 18 years of age. Riding is free for those below 5 years of age.

Groups of 25 or more are also eligible to receive a 15 percent discount if Tri-Rail is notified two weeks prior to the trip.

Figure C-11: Tri-Rail Fare Chart

Number of Zones Traveled	One Way	Discount One Way	Round Trip	Discount Round Trip	12-Trip
Single Fares					
1	$2.50	$1.25	$4.40	$2.50	$21.25
2	$3.75	$1.90	$6.25	$3.75	$31.25
3	$5.00	$2.50	$8.45	$5.00	$41.90
4	$5.65	$2.80	$9.70	$5.65	$47.50
5	$6.25	$3.15	$10.65	$6.25	$52.50
6	$6.90	$3.45	$11.55	$6.90	$57.50
Type				**Full Fare**	**Discount**
Passes					
Weekend and Holiday Day Pass (regardless of the number of zones)				$5.00	$2.50
Tri-Rail Monthly Pass (regardless of the number of zones)				$100	$50
Regional Monthly Pass – Unlimited rides on Tri-Rail, Miami-Dade Transit				$145	$72.50

Source: Tri-Rail Website

Tri-Rail and Miami Dade Transit use an interoperable smart card that can be used as an e-wallet (charged with money that can be deducted based on use) or can be loaded with tickets and passes.

7. Other Revenue

In addition to farebox revenue, Tri-Rail also receives subsidies from the three counties, non-capital grants from the state and federal governments and other funding sources.

Each of the three counties contributes $1.6 million annually in operating funds and $2.67 million annually for future capital projects to SFRTA, following state legislation in June 2004. The three counties have made a cumulative total of $112.1 million in contributions.

Additionally, SFRTA also receives funding from the state, which helps fill the gap between the county statutory funding requirement and Tri-Rail's annual operating costs as shown in Figure C-12.

Figure C-12: SFRTA Funding from the State

Dates	Authorization	Description	Amount
Fiscal Years 2011 – 2015	FL Statutes-Title XXVI Public Transportation Section 343.51 (2009)	Dedicated funding source for Tri-Rail from the State Transportation Trust Fund	**$30.6 million total** ($13.3 million annual transfer for operations, maintenance, and dispatch + $17.3 million in additional funding for operating assistance)
Fiscal Year 2016 – present	FL Statutes-Title XXVI Public Transportation Section 343.58(4)(a)2. (2015)	Amended State Transportation Trust Fund annual funding requirements to Tri-Rail. Excess costs to be shared with FDOT based on operating agreement percentages between FDOT and SFRTA.	**$42.1 million total** ($15 million for operations, maintenance, and dispatch + $27.1 million additional funding for operating assistance)

Source: SFRTA Fiscal Year 2017 Comprehensive Annual Financial Report

Tri-Rail also receives various federal grants from the FTA (Preventive Maintenance and Planning) grants program and the FHWA grants. Other funding from private companies and other local funding sources constitute $100,000 and $85,000 respectively. A summary of Tri-Rail's total revenue is shown in Figure C-13.

Figure C-13: Tri-Rail Total Revenue Summary Fiscal Years 2017, 2016, and 2015 (in $ Millions)

Revenue Source	2017 ($M)	2016 ($M)	2015 ($M)
Operating Revenue	$14.1	$13.6	$13.2
Interest Income	$0.4	$0.3	$0.1
FTA	$24.6	$24.2	$26.0
FHWA	$4.0	$4.0	$4.0
State Grants (FDOT)	$55.2	$55.3	$43.1
County Contribution	$4.7	$4.7	$4.7
Other	$0.2	$0.2	$0.2
Total Revenues	$103.3	$102.2	$91.2

Source: SFRTA Fiscal Year 2017 Comprehensive Annual Financial Report

8. Capital Costs

SFRTA's commitments for construction projects as of June 30, 2017, include the following listed in Figure C-14.

Figure C-14: SFRTA Construction Commitments as of June 30, 2017 (in millions)

Contractor Name	Project	Contract Amount ($M)	Completed to Date ($M)	Balance ($M)
HDR Engineering	The Wave	$19.97	$15.61	$4.4
Xorail	Positive Train Control	$39.72	$1.19	$38.5
All Aboard Florida	Track Improvements at Miami Central Station	$16.19	$1.45	$14.74
Transdev (VTMI)	Northwood Crossover	$4.81	$0.73	$4.08
All Aboard Florida	Downtown Miami Central Station	$48.90	$32.45	$16.46
Total		**$129.59**	**$51.43**	**$78.16**

Source: SFRTA Fiscal Year 2017 Comprehensive Annual Financial Report

All construction in progress as of the end of Fiscal Year 2017 total approximately $131.2 million. This includes station improvement projects of $30.3 million, $39.4 million for the All Aboard Downtown Miami Station, other projects making up $44.6 million, and rolling stock of $16.8 million.

SFRTA has a State Infrastructure Bank Loan Agreement in the amount of $19.3 million for the New SFRTA Operations Center. The loan term is 5 years with an interest rate of 1.55 percent per annum compounded annually, and a $14.0 million draw was made in July 2017.

SFRTA also has a Loan and Security Agreement worth $48.63 million with FECI EC Holding Company, LLC in order to fund the total cost of Tri-Rail station improvements. This line of credit is payable one year after the completion of the project at an annual rate of 9.65 percent. A $9.1 million balance exists as of June 30, 2017, representing the total amount funded by SFRTA.

Lastly, SFRTA also has a Note and Security Amount worth $22 million with Bank United, N.A. to fund the Tri-Rail Downtown Miami Service, specifically the 8.5-mile trackage improvements, access/easement fees, and PTC equipment on the rolling track. The term on the note is 5 years with an interest rate of 2.25 percent per annual, compounded annually. There is no outstanding balance as of June 30, 2017.

9. Operating Costs

Operating Ratio is a profitability measurement calculated by taking operating expenses and dividing it by operating revenues. Figure C-15 provides the operating ratios for Tri-Rail from Fiscal Year 2010 to Fiscal Year 2017. In 2015, Tri-Rail saw a jump in operating costs, compared to the previous year as Tri-Rail took over dispatch and maintenance from CSX. In these figures, operating revenues include revenues from ticket sales and other revenues (e.g. advertising, concessions, and vending machines).

Figure C-15: Tri-Rail Operating Revenues and Expenses 2010-2017

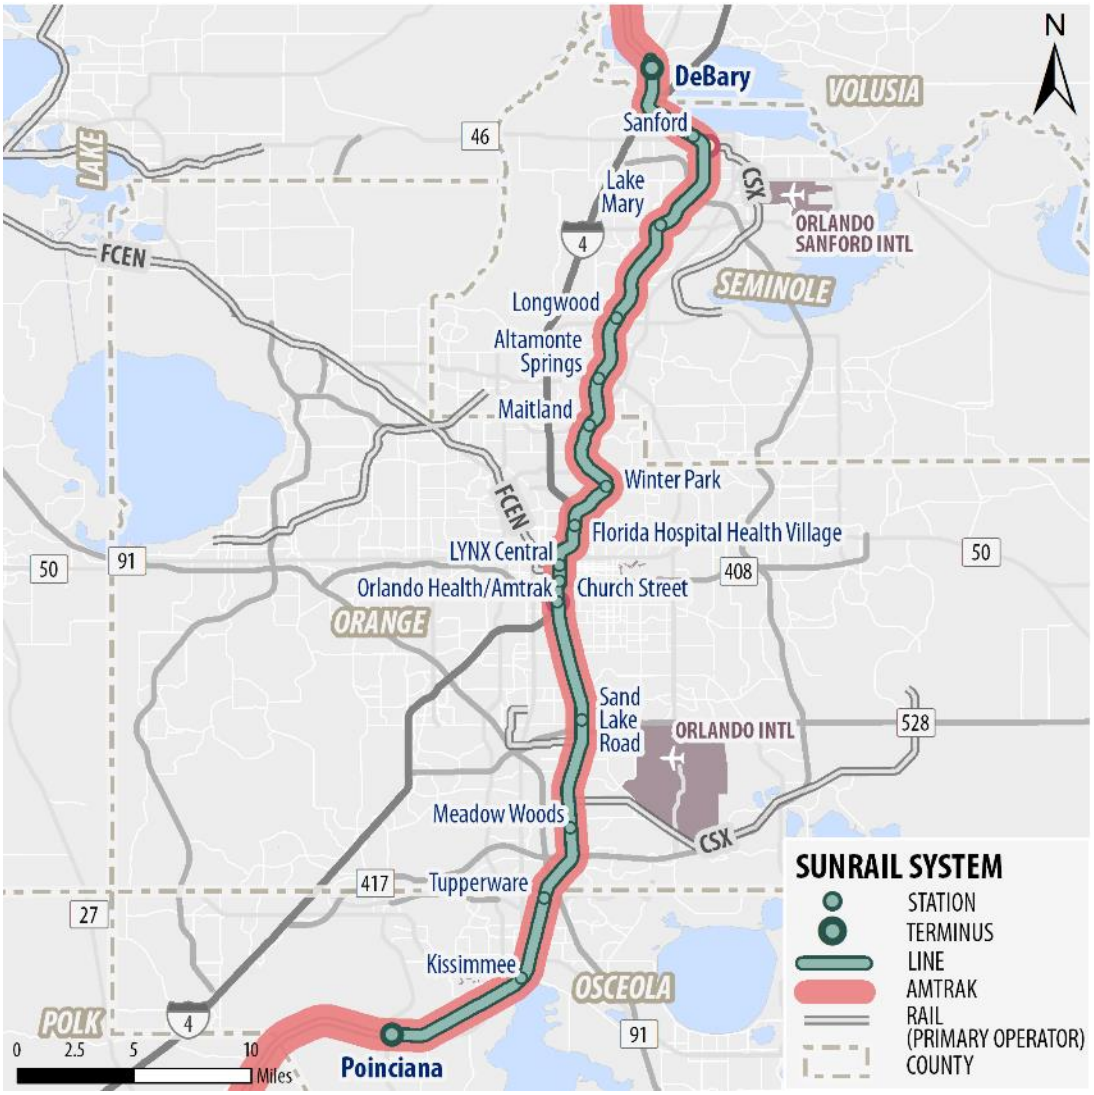
Year	Operating Revenues ($M)	Year over Year Change	Operating Expenses ($M)	Year over Year Change	Operating Ratio (Operating Expenses / Operating Revenues) ($M)
2017	$14.1	+3.9%	$143.8	+6.91%	10.2
2016	$13.1	+2.6%	$134.5	+11.43%	10.3
2015	$12.8	-0.1%	$120.7	+13.33%	9.4
2014	$12.8	+6.3%	$106.5	+6.29%	8.3
2013	$12.0	+0.9%	$100.2	+4.38%	8.4
2012	$11.9	+9.5%	$96.0	+2.78%	8.1
2011	$10.9	+5.9%	$93.4	+7.48%	8.6
2010	$10.3	+5.6%	$86.9	+20.69%	8.4

Source: SFRTA Fiscal Year 2017 Comprehensive Annual Financial Report

An operating subsidy is financial support extended from the government to fund rail operations. Using this general definition of subsidies, Tri-Rail received approximately $88.73 million in operating subsidies in Fiscal Year 2017:

- → $4.7 million from the counties annually
- → $184,795 in other local funding
- → $55.22 million from the state in Fiscal Year 2017
- → $24.63 million from the FTA (Preventive Maintenance Grant and Planning Grant)
- → $4 million from the Federal Highway Administration (FHWA)

In Fiscal Year 2017, Tri-Rail required a subsidy per passenger of $18.12 and subsidy per passenger mile of $0.65.



This level of farebox recovery is lower and the level of subsidy is higher than comparable systems around the country.

C3. SunRail

1. Background, Ownership, and History

SunRail is owned by the Florida Department of Transportation and overseen by the Central Florida Commuter Rail Commission, an advisory board of elected leaders from five local funding partners – the City of Orlando and Osceola, as well as Seminole, Volusia and Orange counties. The current system map is shown in Figure C-16.

Figure C-16: SunRail System Map

Source: CPCS Analysis

In 2009, the state of Florida purchased a 61-mile segment between DeLand and Poinciana from CSX in order to construct the SunRail commuter rail line. Phase 1 officially opened in May 2014 and Phase 2 South (the "Southern Expansion") opened in July 2018.

The opening of Phase 2 South (delivered as a design-build contract) increased the rail system to a total of 48.9 miles. Funding for an additional 12-mile Phase 2 North extension from DeBary to DeLand is being sought on with no set timetable for opening the line.

While the Florida Department of Transportation (FDOT) currently owns this rail service, it will be transferring ownership of SunRail to the counties by 2021. The Central Florida Commuter Rail Commission retained H.W. Lochner beginning in July 2018, to help plan the ownership transition of SunRail from FDOT to the counties.

2. Infrastructure

SunRail operates on a mostly double-track line between DeBary and Poinciana via Orlando, with small segments of single track. Centralized Traffic Control (CTC) signaling system, together with an Automatic Block Signal (ABS) system provides safe train separation. Train dispatching and control is performed by Bombardier Operations & Maintenance (a contractor who is also responsible for maintenance-of-way and equipment servicing – see *Maintenance* below) from the Operations Control Center in Sanford.

Trains consist of double-decker Bombardier BiLevel cars, operating in a push-pull system with MP32PH-Q re-built diesel-electric locomotives. There are a total of 11 locomotives and a total of 20 double-decker cars (13 cab cars and 7 trailers). Trains normally operate in a locomotive + 2-car configuration (locomotive + trailer car + cab car).

3. Operations

SunRail currently operates 20 daily round-trips on weekdays only. On-time performance between January and April 2018 stood at 96 percent, surpassing SunRail's goal of 95 percent or better. In 2015, SunRail carried a total of 957,800 passengers. More recent numbers show that over the 10-month period between July 2017 and April 2018 there were a total of 684,397 riders. Extrapolating to July 2018, the annual ridership in the latest year is likely to be between 820,000 and 830,000 riders, depending on the monthly variation. Phase 1 ridership of 3,400-3,500 boardings per day was below the initial ridership forecast of 4,300 daily boardings.[76]

First 3 weeks of operating the Phase 2 South expansion added 2,000 boardings per day to this figure. Ridership on the new extension is expected to grow, as usually happens with new lines in the initial months of operation, during what is known as the ramp-up period.

Assuming ridership figures from 2017-2018, that each train can hold 278 passengers, and that riders on average travel half the distance of the entire line, SunRail's load factor can be estimated at 14.3 percent.

SunRail maximum speeds vary between 30 and 80 miles per hour with an average (commercial) speed of 33 miles per hour.

[76] Consultation with SunRail, August 13, 2018

In addition to SunRail trains, three daily round-trip Amtrak trains (*Silver Meteor*, *Silver Star*, and the *Auto Train*) use SunRail's line. Between 10 and 20 CSX freight trains operate nightly, between midnight and 5 AM.

4. Maintenance

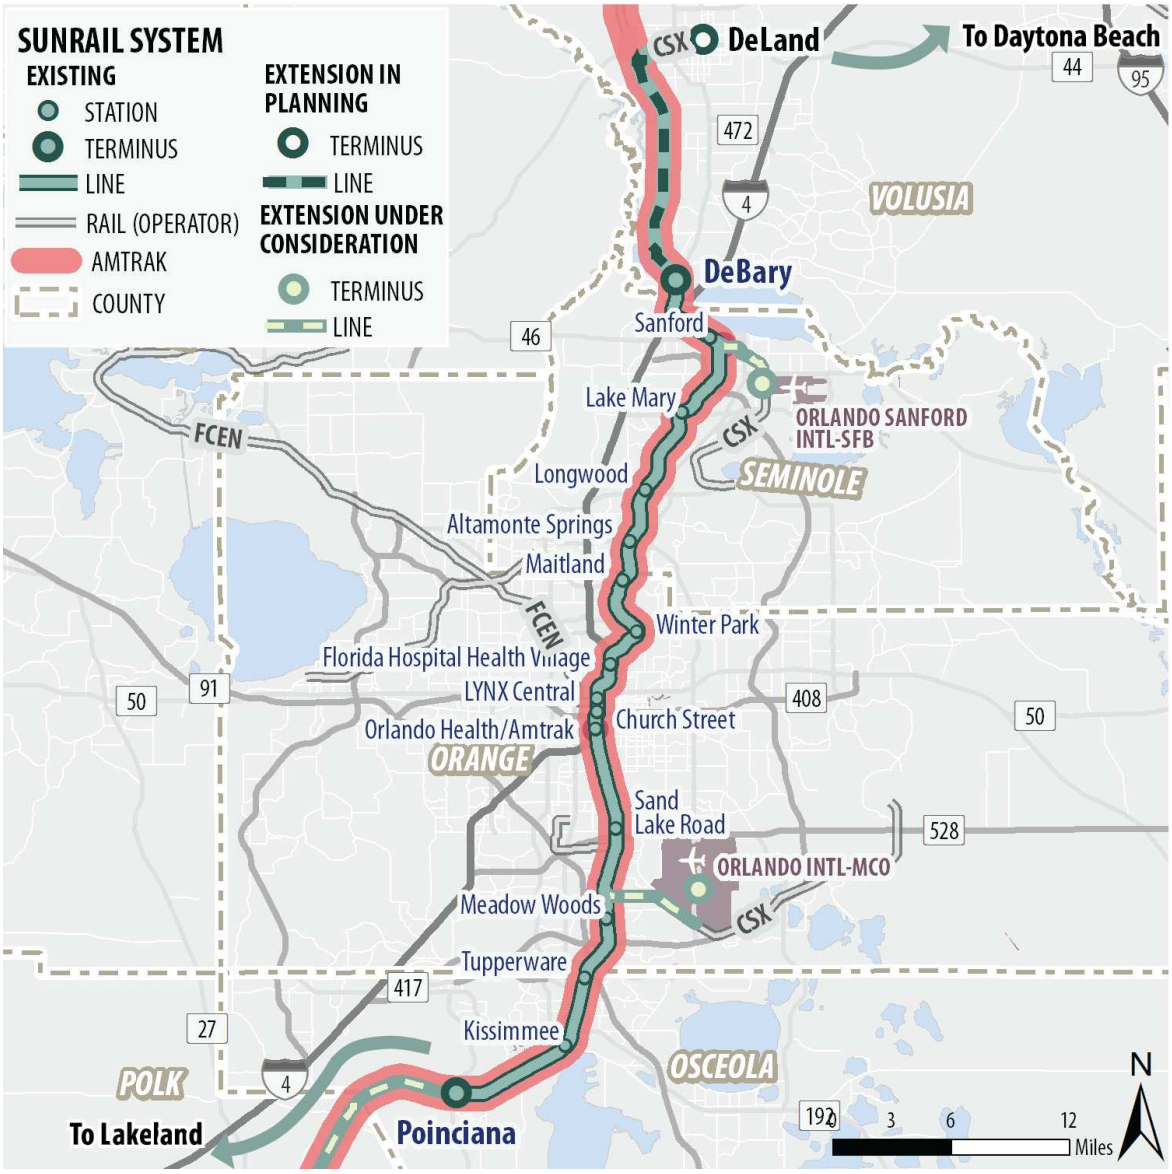
The following provides a list of maintenance contractors that are used by SunRail:

- → Amtrak is under contract with the Florida DOT to conduct periodic, and heavy maintenance and repair of SunRail equipment at their Sanford maintenance facility (7-year contract).
- → Bombardier is a SunRail contractor, providing operations and maintenance services (7-year contract with a 3-year extension).
- → Conduent (a spin-off of Xerox) provides back-office hosting and fare equipment maintenance and operations. During the start-up period in 2014, SunRail users experienced problems with Conduent's ticketing systems.
- → Herzog provides signal maintenance of way services (7-year contract).

5. Expansion Plans

Additional extension plans include Phase 2 North, a 12.2-mile, one station extension north to DeLand, and Phase 3, a 5.5-mile extension to Orlando International Airport, along an existing spur line.

Three more extensions are under consideration: north to Daytona Beach (approximately 22 mi), east to Sanford Airport via an existing spur (approximately 7.5 mi), and a third to Haines City, Auburndale, and Lakeland (an approximate total of 35 miles).



SunRail has undertaken some level of a preliminary study for each extension, but funding has not been identified and a timetable has not been set for any of these extensions.

Phase 2 North

In 2014, FDOT proposed the Phase 2 North project to extend SunRail service 12.2 miles north of DeBary station, on tracks owned by FDOT. These tracks are also used by CSX for freight and Amtrak for passenger service. Figure C-17 shows a map of proposed expansion projects. When built, one station (DeLand) will be added. The proposed project had an estimated capital cost of about $69 million with an estimated annual operating cost increase of $6.4 million. The estimated costs included finance costs, capital costs for building a new station adjacent to Amtrak's stop in Volusia County and costs for purchasing three rail cars.[77]

[77] SunRail Phase 2 North, FTA, July 2018

Figure C-17: Map of Proposed SunRail Expansion Projects

Source: CPCS Analysis

Like the rest of the line, the new station would operate on weekdays only, with 30-minute peak headways and 150-minute off-peak headways, similar to the current timetable elsewhere in the system. The 2011 estimations of ridership forecasted 200 daily boardings at the new station, with potential to increase this number to 600 daily boardings by 2030.

In October 2015, low ridership projections made the project ineligible for a $35 million federal grant, causing the station construction to stop. Currently, FDOT is looking for other options for increasing ridership in order to qualify for federal funding programs. One option includes adding another station in Orange City.

Phase 3 Orlando International Airport

SunRail officials proposed this 5.5-mile extension to Orlando International Airport (MCO) in 2010. Initial plans suggested using an existing 3.5-mile spur, owned by Orlando Utilities Commission (OUC), and building an additional 2 miles of new track or a transfer station with a 2-mile light rail system to the airport. From the airport station, passengers would have the option to ride an airport peoplemover to the north terminal or transfer to the Brightline service between Miami and Orlando (expected to begin service by 2021). Currently, SunRail passengers can reach Orlando International Airport via a bus shuttle from Sand Lake Road Station.

In a 2017 study, FDOT estimated a $256 million budget for this project.[78] The estimated budget included the cost of building 3 miles of new double track, upgrading the OUC corridor, and building the boarding/transfer platforms. The study also provided an analysis of the no-build option, in line with NEPA requirements.

FDOT's preliminary projections estimated 2,250 daily passengers during the first year of operation and 1,000 more daily passengers by the end of 2030. Due to higher-than-expected capital cost projections by the Project Development and Environmental Study, Phase 3 has been postponed indefinitely. Metroplan Orlando, the region's Metropolitan Planning Organization (MPO), will be establishing an executive committee to review rail transit priorities in the Orlando area, including SunRail's Phase 3 expansion to Orlando International Airport (MCO).

6. Farebox Revenue

SunRail calculates fares based on the number of zones traveled. Each zone roughly represents a county. One-way tickets range from $2 (1 zone) to $5 (4 zones). Round-trip tickets as well as weekly, monthly and annual passes are available at a discount. Figure C-18 below provides SunRail's current fare chart.

Figure C-18: SunRail Fares

Number of Counties Traveled	One-Way	Round-Trip	Weekly Pass*	Monthly Pass*	Annual Pass*
1	$2	$3.75	$17	$56	$560
2	$3	$5.50	$25	$84	$840
3	$4	$7.50	$34	$112	$1,120
4	$5	$9.50	$42.50	$140	$1,400

Source: SunRail Website

Additionally, children age 6 and under ride for free with a paying adult (limit of 3). 50 percent discounts are also available for riders 65 and over, youth between the ages of 7-18, and those

[78] SunRail Extension to Orlando International Airport (Phase 3) PD&E Study Preliminary Engineering Report, FDOT District 5, 2018

with disabilities. Additionally, those using a pre-paid multi-use smart card receive a 10 percent bonus on any amount charged over $10.

7. Other Revenue

SunRail derives most of its revenue through Urbanized Area Grant Funds from the Federal Transit Administration. Additionally, SunRail obtains operating revenue from the farebox, from CSX, Amtrak, and FCEN usage fees, from right-of-way lease revenue, ancillary revenues, and smart card revenues. Funding percentages are shown in Figure C-19.

Figure C-19: SunRail Phase 1 Funding – Capital Costs

Funding Percentage	Source
50%	Federal Transit "New Starts" Grant
25%	Florida State
25%	Central Florida Counties

Source: SunRail

Figure C-20 provides SunRail's planned annual operating revenue and expenses from January 1 to June 30, 2018. SunRail's Fiscal Year 2018 operating revenue is budgeted at $16.3 million, of which $15.9 million has been received as of June 30, 2018. The rail service's operating costs for Fiscal Year 2018 are budgeted at $47.0 million and include operations, capital maintenance and consultant support. As of April 30, 2018, $33.5 million has been spent.

Figure C-20: SunRail January – June 30, 2018 Operating Revenue

Revenue Source	Budget	Actual
Farebox Revenue	$2.0 million	$1.8 million
CSX Usage Fees	$3.2 million	$3.0 million
Amtrak Usage Fees	$1.1 million	$0.9 million
FCEN Usage Fees	$21,671	$22,703
Right-of-Way Lease Revenue	$225,000	$107,221
Ancillary Revenue	$167,830	$348,773
Subtotal – System Revenue	**$6.7 million**	**$6.2 million**
FTA 5307 – Urbanized Area Grant Funds	$9.6 million	$9.6 million
Total Operating Revenue	**$16.3 million**	**$15.9 million**

Source: SunRail, TAC Meeting Materials, August 8, 2018; Note – unaudited values above

8. Capital Costs

Phase 1 costs include right-of-way acquisition ($432 million) and construction costs ($615 million).

Half of Phase 2 South (now known as "Southern Expansion") costs were sourced from federal grants, while half from the state, for a total of $187 million for the 17.2-mile extension. The

federal funds were secured through a Full Funding Grant Agreement with FTA.[79] The project's federal, state, and local funding programs are presented in Figure C-21 below.

Figure C-21: Phase 2 South Extension Funding Sources

Program	Legislative Authority	Amount ($M)
Section 5309 New Starts	Federal	$93.43
Florida Transportation Trust Fund	State	$50.03
Orange County General Funds	Local	$16.30
Osceola County State Infrastructure Bank Loan	Local	$27.10

Source: FTA's proposed plan for Phase 2 South extension, July 2018

The nearly $187 million project budget included the construction costs for 4 new stations, a storage/maintenance facility, park and ride lots, signaling and other grade crossing equipment, a communication system and acquisition costs for 2 new locomotives, 4 passenger cars.[80]

The extension opened for revenue service in July 2018 with the same service levels as the rest of the line (operating hours from 5 AM to 10:30 PM on weekdays, with 30-minute peak headways and 2-2.5 hour off-peak headways). FDOT forecasts a minimum of 2,000 passenger boardings at the new stations during the opening year.

9. Operating Costs

SunRail's operating expenses are predominantly in operations and maintenance contracted out to Bombardier, with an annual budget of $20.35 million this year. Capital maintenance and consultant costs constitute another $14.6 million.

[79] Full-Funding Grant Agreements Guidance, FTA, July 2018
[80] Proposed Plan for Phase 2 South Extension, FTA, July 2018

Figure C-22 provides the breakdown of these actual and budgeted expenses for Fiscal Year 2018, with the year ended on June 30, 2018.

SunRail came in under budget by approximately $13.3 million in Fiscal Year 2018. For Fiscal Year 2019, SunRail has budgeted $57.9 million in total operating costs, capital maintenance, and consultant support, an increase of approximately 23 percent due to the new Southern Expansion line.

Figure C-22: SunRail Fiscal Year 2019 and Fiscal Year 2018 Operating and Capital Maintenance Costs, Consultant Support

Item	Fiscal Year 2019 Budget	Year ending June 30, 2018 Budget	Year ending June 30, 2018 Actual
Bombardier – Operations	$10.3 million	$6.85 million	$6.8 million
Bombardier – Maintenance	$15.9 million	$13.5 million	$13.5 million
Bombardier – Incentive/Disincentive	$1.3 million	$1.0 million	$1.0 million
Conduent – Back-of-the-House Hosting	$0.9 million	$0.9 million	$0.9 million
Conduent – Fare Equipment Maintenance	$2.2 million	$1.7 million	$1.8 million
Herzog – Signal Maintenance of Way	$3.1 million	$2.6 million	$2.9 million
Green's Energy – Fuel	$2.2 million	$1.0 million	$1.1 million
Gallagher Insurance	$2.1 million	$2.0 million	$1.6 million
Amtrak – Heavy Vehicle Maintenance	$1.7 million	$1.2 million	$0.9 million
Wells Fargo – Banking Services	$6,880	$5,160	$4,636
Bank of America – Merchant Services (Banking)	$90,000	$60,000	$49,324
MidFlorida – Armored Car Service	$52,480	$42,480	$35,565
AT&T/Verizon – Wi-Fi Service	$34,400	$33,600	$22,761
Fare Media Smart Card	$ -	$134,800	$ -
Limited Use Smart Card	$269,600	$30,000	$215,680
Incomm – Card Distribution and Packaging	$ -	$ -	$ -
Subtotal – System Operating Costs	**$40.0 million**	**$31.0 million**	**$30.9 million**
Feeder Bus Expenses	$1.8 million	$1.5 million	$1.3 million
Capital Maintenance	$7.2 million	$7.1 million	$2.2 million
Consultant Support	$8.8 million	$7.5 million	$5.4 million
Total Oper. and Capital Maint. Costs, Consultant Support	**$57.9 million**	**$47.1 million**	**$33.8 million**

C4. Brightline

1. Background, Ownership, and History

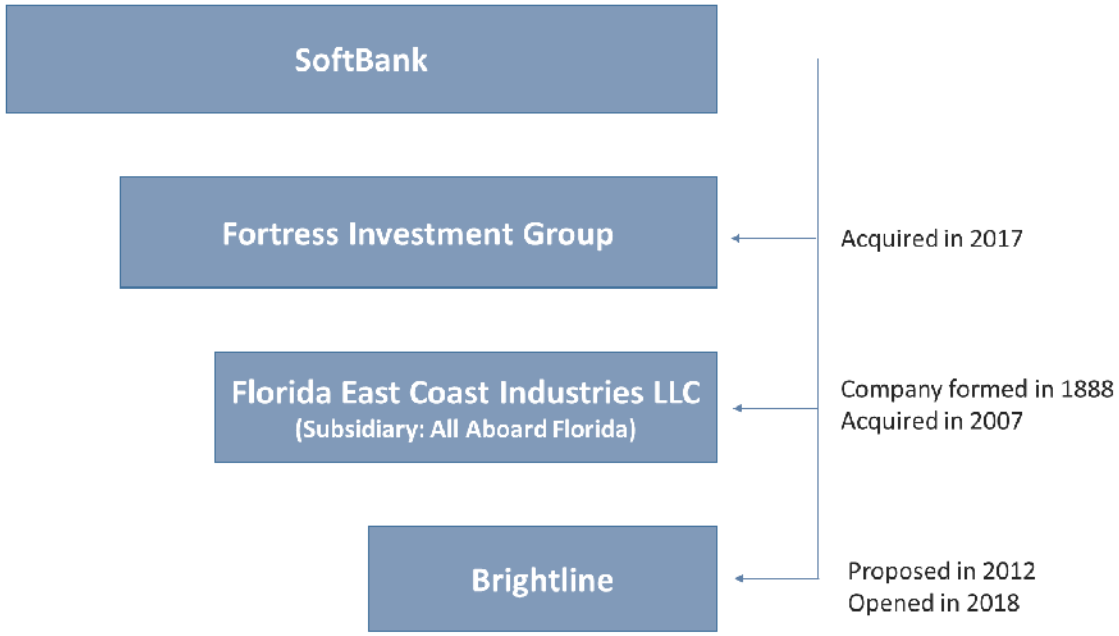
Background

Brightline is a private passenger rail company that is owned by All Aboard Florida, a subsidiary of Florida East Coast Industries (FECI). Figure C-23 shows the existing system map.

Figure C-23: South Florida Rail System Map

Source: CPCS Analysis

Phase 1 between Fort Lauderdale and West Palm Beach opened on January 13, 2018, and was extended south to Miami on May 19, 2018.



Phase 2 between West Palm Beach and Orlando is planned to open by 2021.

Ownership History

Florida East Coast Industries (FECI) was renamed from "Foxx Holdings" in 2006 and was acquired in 2007 by Fortress Investment Group, a private equity firm with over $46 billion assets under management (AUM) based in New York City. Fortress Investment Group was subsequently acquired in 2017 by SoftBank, a Japanese telecommunications firm.

Figure C-24 shows Brightline's corporate ownership relationships.

Figure C-24: Brightline Corporate Ownership Diagram

Source: CPCS Analysis

Grupo México Transportes (GMXT) acquired Florida East Coast Railway, which owns the infrastructure and operates freight trains along the corridor, from Fortress in July 2017. This is the second acquisition of a US railroad by GMXT, which also owns Texas Pacifico Transportation Ltd. in West Texas. Florida East Coast Railway (the freight operator) and Florida East Coast Industries (owner of Brightline) no longer have a common owner, although they have an agreement in place to jointly operate the rail corridor.

2. Infrastructure and Rolling Stock

Infrastructure

Brightline uses the existing 66.5-mile rail corridor owned by Florida East Coast Railway (FECR), between Miami and West Palm Beach. FECR and Brightline have a joint ownership agreement in place that distributes rights and responsibilities to each party.

Currently, trains operate at a top speed of 80 mph between Miami and West Palm Beach, making this line a conventional rail line. Trains are expected to reach 110 mph between West Palm Beach and Cocoa and 125 mph between Cocoa and Orlando when these two extensions open.

Once built out, the system will not be considered a high-speed rail system, but rather a "higher-speed" rail system.

Yet, when complete, Brightline will be the second fastest rail system in North America after Amtrak's Acela Express service between Washington, DC and Boston, though still below the internationally-accepted top operating speed of 185-220 mph, common among high-speed rail lines.

The initial operating segment between Miami and West Palm Beach, currently classified as FRA Class 4 track, required major renovations. This included renovating 7 bridges, all 170 level railroad-roadway crossings, adding a second track, replacing wooden ties with more durable concrete ties, and replacing the signaling system with a state-of-the-art Alstom cab signaling system.

Rolling Stock

Brightline owns 5 diesel-electric Siemens Mobility train sets, built in 2017. These trainsets are made up of two SCB-40 locomotives (one on each end) and four passenger cars, for a total train capacity of 240 passengers per trainset with 2 classes of service: Smart (2nd class) and Select (1st class). The trains are fully ADA compliant and the locomotives meet all current noise and emissions standards.

Brightline plans to purchase 5 more trains by the time the extension to Orlando opens. The existing trains will be expanded to 7 cars each.

3. Operations

After expanding service in August 2018, Brightline now operates 16 round-trips per weekday, 8 round-trips on Saturday and 7 on Sunday over 66.5 miles of mainline track. The rail service estimates that it will carry a total of 360,000 passengers in 2018.

FECR has the exclusive right to operate freight trains in the corridor, while Brightline (through its parent company Florida East Coast Industries – FECI) has the exclusive right to operate passenger trains in the corridor. The two companies have created a joint venture for train dispatching. Freight trains operate mostly at night (11 PM to 5:30 AM) while passenger trains operate during the day. Some freight trains may operate during the day and passenger trains use passing tracks to overtake freight trains.

4. Expansion Plans – West Palm Beach to Orlando

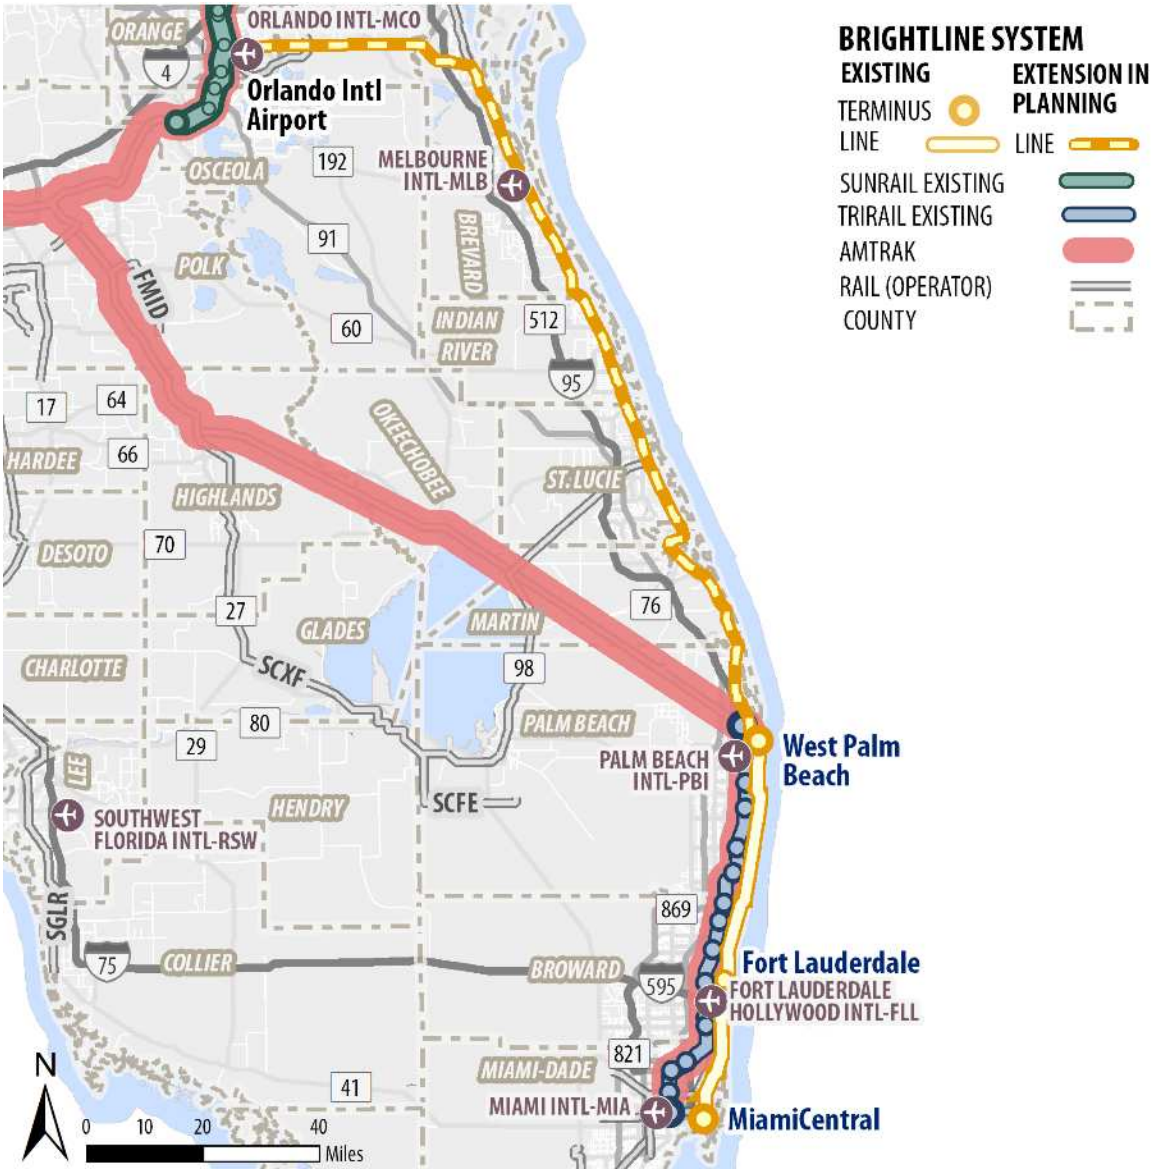
Brightline is currently working to expand its route from West Palm Beach to Orlando International Airport. The route between West Palm Beach and Cocoa will use the Florida East Coast Railway (FECR) corridor and Brightline is building a new 40 mile stretch along the State

Route 528 corridor between Cocoa and Orlando International Airport, with a target opening date of 2021.

West Palm Beach-Orlando Expansion

After the Brightline service extension to Downtown Miami in early 2018, All Abroad Florida proceeded with the new 3-station expansion from West Palm Beach to Orlando after receiving FRA's approval on December 2017. This extension is shown in Figure C-25. The Brightline station at the Orlando International Airport is currently under construction and will eventually connect to a future expansion of the SunRail.

All Abroad Florida has estimated a $3.5 billion budget for the expansion project, including the capital costs of purchasing the land and the trains, the costs of planning and engineering services, upgrading the line between West Palm Beach and Cocoa to 110 mph (FRA class 6) operation, and laying new track from Cocoa to Orlando International Airport. The segment on FECR includes adding a second track, renovating the existing track, renovating all railroad crossings, among other items. The 40-mile (15 miles of single track line and 25 miles of double track line) segment west of Cocoa will be completely new construction without grade crossings, to FRA Class 7 track standards (operations up to 125 mph).



In a 2015 study of the potential ridership and revenue of the Brightline service expansion from Downtown Miami to Orlando, All Abroad Florida estimated nearly 2.8 million short-distance and 2.5 million long-distance annual riders by the time the entire system is operating. The estimated total annual revenue from collecting fares for both short and long distance trips is $293.6 million.[81]

Other Expansion Plans

Brightline is also considering to expand its service from Orlando International Airport station to Tampa, along I-4. Brightline submitted an unsolicited bid to the State of Florida, which is now conducting a Request for Proposals to identify any other bidders who may be interested in participating in the process.

[81] 2015 Ridership and Revenue Study, All Aboard Florida

Figure C-25: Brightline Expansion Plans

Source: CPCS Analysis

5. Farebox Revenue

Brightline's ridership is still in the process of "ramping up" due to the recent launch of the service. In the first 2.5 months of operations, Brightline carried 74,780 riders and collected $663,700 in ticket revenue.[82]

Figure C-26 provides Brightline's income statement for the quarter ended March 31, 2018. This includes the first 2.5 months of operations after Phase 1's launch on January 13, 2018. As of the close of the quarter, Brightline ended with a net operating loss of $28.184 million.

[82] Quarterly Unaudited Financial Statements For the Quarter Ended 3/31/2018, Brightline

Brightline trains have two classes of service: Smart (2nd class) and Select (1st class). The latter provides wider seats, complimentary beverages and snacks, and free parking at stations. Figure C-27 provides a summary of the Phase 1 fares. A 10 percent pricing discount is offered to seniors, active military and veterans, and 50 percent discount is offered to kids 12 years and under.

Currently, pricing varies little by time of day and day of the week. This will change as Brightline introduces demand-based pricing, similar to what is used by airlines.

Figure C-26: Brightline Trains LLC Income Statement (In Thousands) January – March 31, 2018

Operating Revenue (in thousands of dollars)	
Ticket Revenue	664
Other Revenue	104

Route	Smart (2nd Class)	Select (1st Class)
West Palm Beach – Fort Lauderdale	$10-$15	$20
West Palm – Miami	$20	$30

Source: Brightline website

In the first 2.5 months of operations, 18 percent of Brightline passengers opted for the lower-fare Smart Ticket compared to the Select Ticket.

Prior to Brightline's launch, Louis Berger US conducted a Ridership Study for the South Segment project in October 2017. The firm forecasted that after ramp-up time, ridership market share would be 0.74 percent of total annual trips taken by all modes of transportation, approximately 365 million trips per year. This ridership forecast breakdown by route is shown in Figure C-28 and ridership information by month and type of ticket is shown in Figure C-29 and Figure C-30, respectively.

Figure C-30: Brightline January 19-March 31, 2018 Ridership and Revenue by Ticket Type

Type of Ticket	Ridership	Revenue
Smart	40,600	$275,000
Select	34,200	$388,600

Source: Brightline

In February and March 2018, Brightline operated 10 round-trips on weekdays and 9 on weekends, making the capacity for both months a total of 271,200 available seats, making the resulting load factor 21 percent (based on passengers traveling the entire length of the line) for a train that is operating in its ramp-up period. For comparison purposes, for true high-speed train lines in Europe, average system load factors for mature services are generally in the 55 to 75 percent range.[83]

6. Other Revenue

Brightline leveraged a $600 million, 30-year private-activity bond (PAB) offering to complete Phase 1 of the project and is currently seeking another $1.15 billion PAB offering to complete Phase 2. These private activity bonds are federal tax-exempt bonds issued by state or local governments to private investors. Collateral used for the $600 million PAB include new track infrastructure, station buildings (Miami, Fort Lauderdale, and West Palm Beach), land for

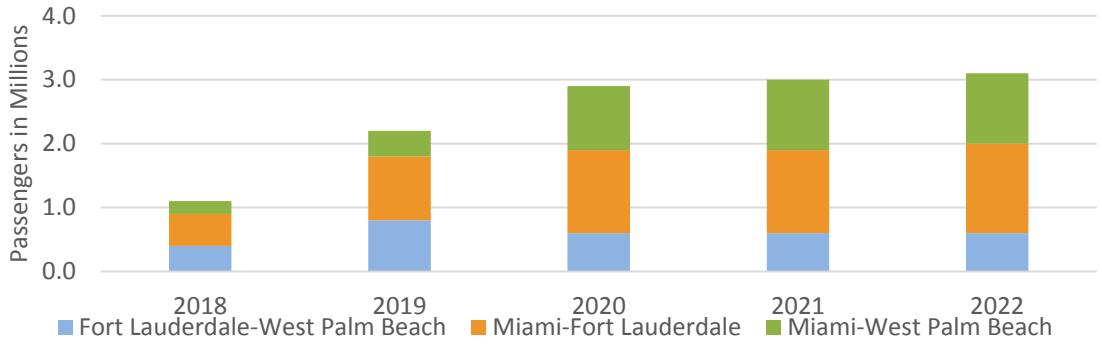
[83] Campos J., de Rus G. "Some stylized facts about high-speed rail: A review of HSR experiences around the world." Transport Policy. Volume 16, Issue 1, January 2009, Pages 19-28.

stations and corridor from Miami-to-Cocoa, and rolling stock. The target investors are "select institutional investors and other sophisticated counterparties" and interest payments are made semi-annually.[84]

The Florida Department of Transportation provided the Orlando International Airport (MCO) with a total of $159 million in grants and $52 million in loans to build a new station to serve Brightline trains. All Aboard Florida also provided $10 million for the station and will pay $2.8 million per year in rent as well as per-passenger fees to the Orlando International Airport (MCO) in return.[85]

Brightline's projected ridership and revenue are provided in Figure C-31 and Figure C-32 (Based on a ridership study by Louis Berger).

Figure C-31: Brightline Forecasted Ridership by Route



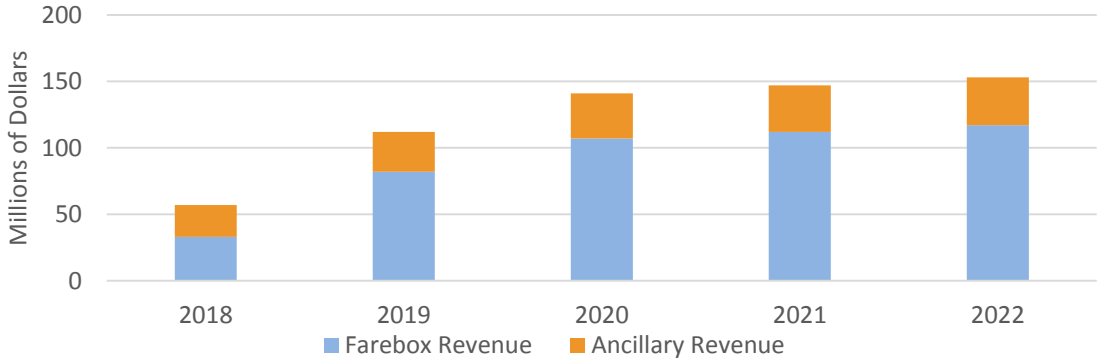


Figure C-32: Brightline Forecasted Revenue by Route

Note, ramp-up period assumes 40% of expected revenue in 2018, 80% in 2019, and 100% subsequently.
A Ramp-Up Reserve Fund funded from Brightline funds covers shortfalls in ramp-up periods.
Sources: Florida Development Finance Corporation Board Meeting Notes, Originally Louis Berger Ridership Study.

Based on this study, Brightline's Phase 1 projections are at $79 million in annual Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) with a 33 percent loan-to-value ratio. By 2020, the railroad anticipates 2.9 million passengers and 1 percent of market share, with an average fare of $37.

[84] Board of Directors Meeting, Florida Development Finance Corporation, October 27, 2018
[85] Vock, D. "All Aboard? The Uncertain Future of America's First Privately Built Railroad in Decades", February 2018.

7. Capital Costs

In 2015, Brightline estimated Miami-to-Orlando capital costs at $3.1 billion. In 2017, Brightline provided a second estimate of $1.8 billion, but only covering the Miami-West Palm Beach phase.[86]

On June 1, 2018, All Abroad Florida estimated a $3.7 billion project cost for the West Palm Beach to Orlando expansion project including the capital costs of purchasing the land and the trains, the costs of planning and engineering services, upgrading tracks between West Palm Beach and Cocoa, and laying out new tracks to Orlando International Airport.[87] Initially, Brightline intended to apply for a $1.6 billion loan from Build America under the Railroad Rehabilitation and Improvement Financing (RRIF) program, but eventually, All Abroad Florida decided to pursue other funding options due to the complexity of rules and review processes.[88] The company's current plan is to cover the costs through equity and debt financing.

Recently (June 2018) USDOT provided a seven-month extension period to allow Brightline to sell $1.75 billion of its tax-exempt private activity bonds offered by the Florida Development Finance Corporation. About $600 million of the revenue from selling these bunds will fund the loan repayments for the Miami to West Palm Beach portion of the Brightline expansion while the rest will support the West Palm Beach to Orlando expansion. However, due to uncertainties around successfully selling these bonds, All Abroad Florida is considering a new RRIF loan application in the amount of $3.7 billion.[89]

8. Operating Costs

As previously discussed, Brightline is currently going through a ramp-up period with a high level of investment required during this time period relative to ridership and fare revenue. In the first 2.5 months of service, Brightline's operating expenses amounted to $28.8 million as shown in Figure C-33, resulting in a net loss of $28.184 million dollars. It is expected that ridership will grow over time.

Appendix D. FRA Incident Classification Categories

This section provides a listing of the classification of incident types that are used by the FRA. Figure D-1 lists incident types that are considered as severe and are included in casualty rate calculations, while Figure D-2 provides a listing of incidents considered to be within railroad control.

Figure D-1: Severe Events Included in Casualty Rate Calculations

Event Code	Description	Event Code	Description
73	Burned	28	Exposure to poisonous plants
81	Caught Between Equipment	31	Exposure to welding light
79	Caught Between Machinery	32	Highway-rail collision/impact
82	Caught Between Material	36	Needle puncture/prick/stick
8	Caught in or compressed by hand tools	69	On track equipment, other incidents
9	Caught in or compressed by other machinery	37	Other impacts - on-track equipment
12	Caught in or compressed by powered hand tools	49	Shot
10	Caught in or crushed by materials	50	Slack action, draft, compressive buff/coupling
11	Caught in or crushed in excavation, landslide, cave-in, etc.	80	Slack adjustment during switching operation
68	Caught, crushed, pinched, other.	52	Slipped, fell, stumbled, etc. due to climatic condition (rain, snow, ice, etc.)
13	Cave in, slide, etc.	51	Slipped, fell, stumbled, etc. due to irregular face, e.g., depression, slope, etc.
16	Climatic condition, exposure to environmental cold	54	Slipped, fell, stumbled, etc. due to object, e.g., ballast, spike, material, etc.
15	Climatic condition, exposure to environmental heat	53	Slipped, fell, stumbled, etc. on oil, grease, other slippery substance
14	Climatic conditions, other (e.g., high winds)	55	Stabbing, knifing, etc.
17	Collision - between on-track equipment	61	Struck against object
18	Collision/impact - auto, truck, bus, van, etc.	77	Struck by other remote control locomotive controlled equipment
19	Committing vandalism/theft	76	Struck by own remote control locomotive controlled equipment
20	Defective/malfunctioning equipment	60	Struck by falling object
21	Derailment	58	Struck by object
23	Electrical shock due to contact with 3rd rail, catenary, pantograph	59	Struck by on-track equipment
25	Electrical shock from hand tool	57	Struck by thrown or propelled object
22	Electrical shock while operating welding equipment	62	Sudden release of air
24	Electrical shock, other	75	Sudden/Unexpected Movement of tools
27	Exposure to chemicals - external	63	Sudden/unexpected movement of material
26	Exposure to fumes - inhalation	64	Sudden/unexpected movement of on-track equipment
30	Exposure to noise - single incident	65	Sudden/unexpected movement of vehicle
29	Exposure to noise over time	71	Sudden, unexpected movement, other

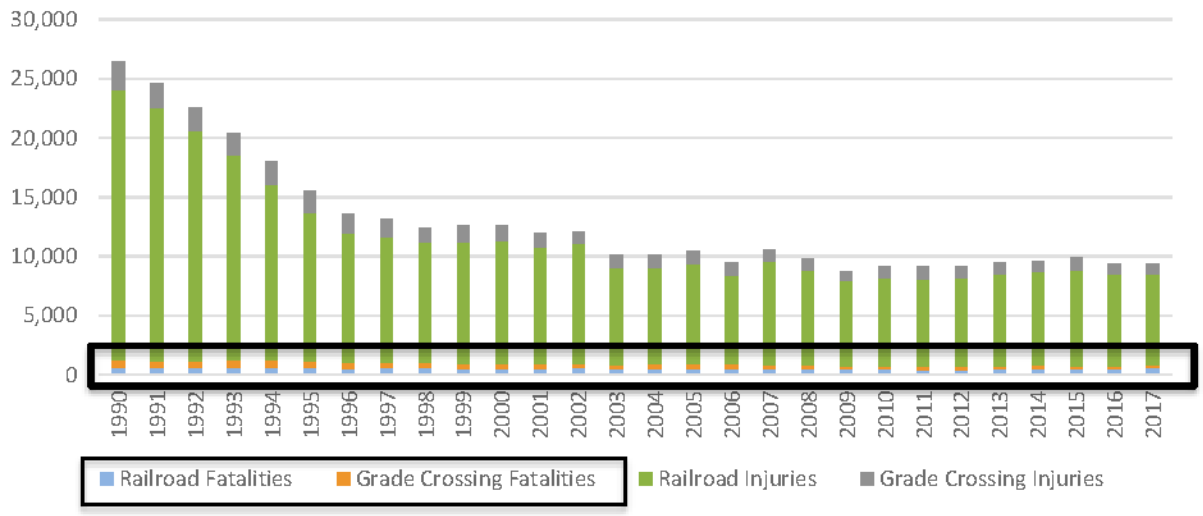
Appendix F. US Rail Safety Trends

1. Analysis of National Railroad Safety Trends

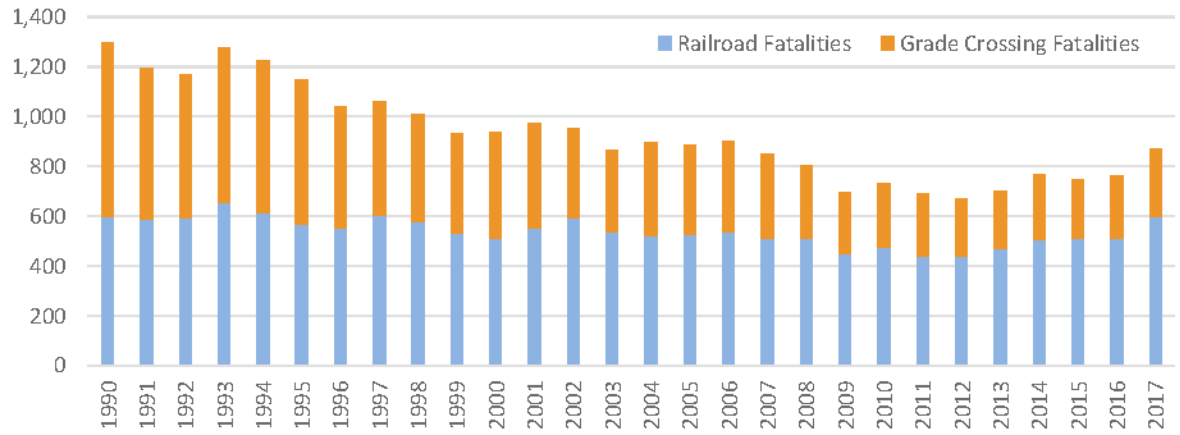
In analyzing the Federal Railroad Administration's national safety database and Bureau of Transportation Statistics data, we found that:



- → Over the last three decades (1990-2017), US railroads have seen a 33 percent decrease in fatalities and 66 percent decrease in injuries nationally.
- → There has been a 61 percent decline in grade-crossing fatalities between 1990 and 2017, while railroad-only fatalities have seen virtually no change (599 fatalities in 1990 and 598 fatalities in 2017). However, when population and track mileage is taken into account, the result is a downward trend in the figures.
- → Over the last 9 years (2009-2017), however, fatalities and injuries have been on the rise for both grade-crossing incidents as well as for other incidents.
- → In 2017, most fatalities on railroad property were due to trespassers (83 percent of all fatalities) and 49 percent of all injuries could be attributed to employees on duty, the largest victim group compared to trespassers, non-trespassers, passengers on trains, and other employees.

In 1990, the US railroad system experienced 1,297 fatalities and 25,143 injuries nationally. Between 1990 and 2009, this number trended downward to a record low number in 2009 with 696 fatalities and 8,017 injuries, a decline of 46 percent in fatalities and 68 percent in injuries from 1990. From 2009 to 2017, fatalities and injuries were on the rise again with a 25 percent increase in fatalities and 6 percent increase in injuries within that time period.

Figure F-1 provides US trends for railroad and grade-crossing fatalities (1990-2017) in the black frame of the previous figure.

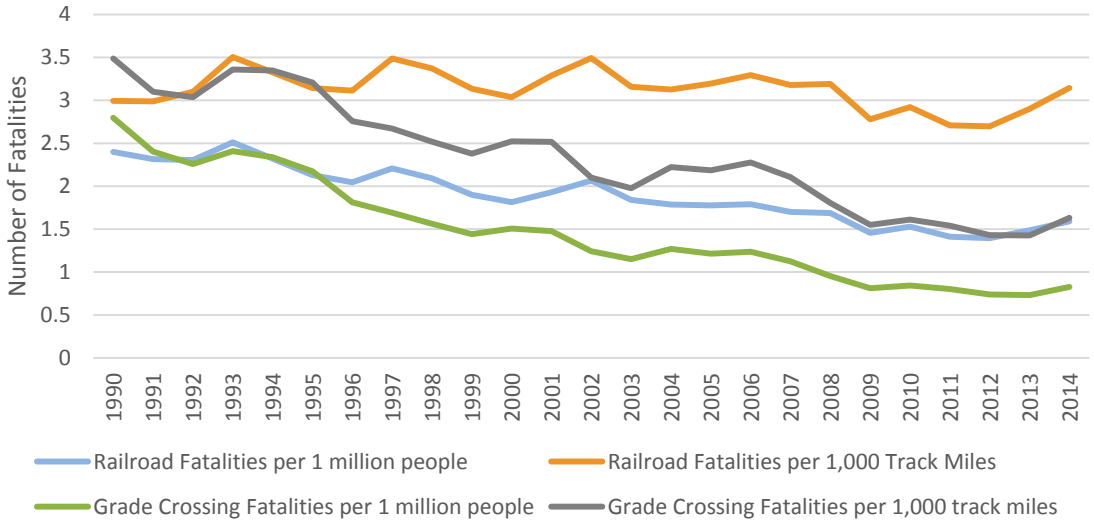


While grade-crossing fatalities have declined 60 percent from 698 in 1990 to 273 in 2017 nationally, railroad-only fatality counts have not seen improvement. Railroad-only fatalities declined 27 percent from 599 in 1990 to 438 in 2012, but increased 37 percent between 2012 and 2017 back to 598 fatalities as shown in Figure F-2.

Figure F-1: US Railroad and Grade-Crossing Fatalities and Injuries (1990-2017)

Source: CPCS Analysis of BTS Railroad Safety Data.[90] "Railroad-only" includes fatalities from train and non-train accidents and incidents, and excludes highway-rail grade crossings. This table includes information for both freight and passenger railroad operations.

Figure F-2: US Railroad and Grade-Crossing Fatalities (1990-2017)



Source: CPCS Analysis of BTS Railroad Safety Data.[90] "Railroad-only" includes fatalities from train and non-train accidents and incidents and excludes highway-rail grade crossings. This table includes information for both freight and passenger railroad operations.

US population and railroad track miles are not stagnant over time – population has increased while railroad track miles have fallen between 1990 and 2017. The number of fatalities per 1 million inhabitants has declined from 5.20 fatalities in 1990 down to 2.42 fatalities in 2014 (the latest available year for track miles). Fatalities per 1,000 track miles have also decreased from 6.48 fatalities in 1990 down to 4.78 fatalities in 2014. Fatalities based on grade crossing incidents have declined faster than railroad fatalities, as indicated in Figure F-3.

[90] Railroad and Grade-Crossing Fatalities by Victim Class, Bureau of Transportation Statistics (up to 2017)

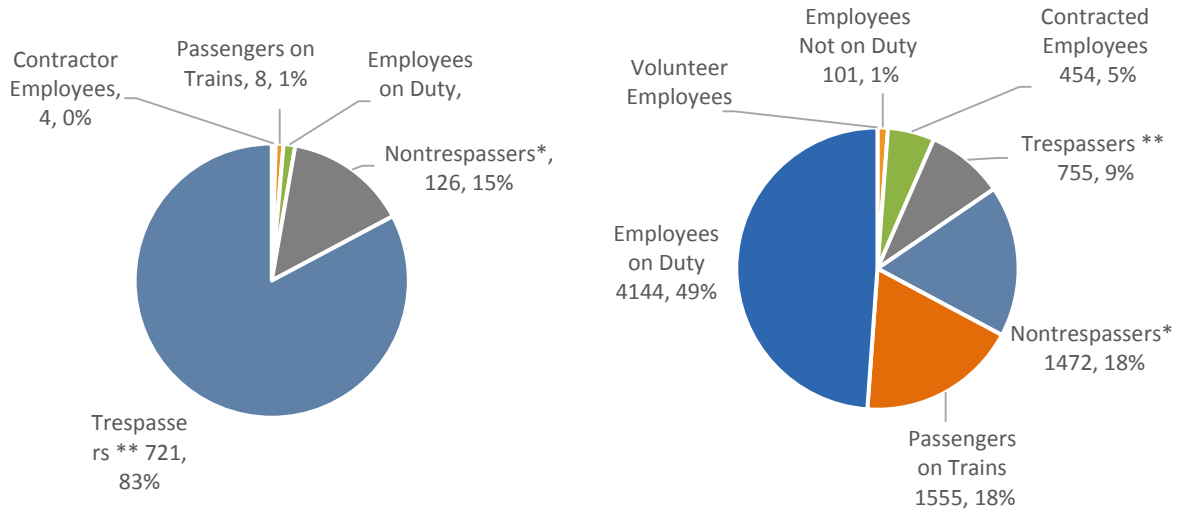


Figure F-3: US Railroad and Grade-Crossing Fatalities per 1 Million People and Per 1,000 Track Miles

Source: CPCS Analysis of BTS Railroad Safety Data, US Census Bureau, and Association of American Railroads Data. "Railroad-only" includes fatalities from train and non-train accidents and incidents, and excludes highway-rail grade crossings. This table includes information for both freight and passenger railroad operations.

In 2017, the nation experienced 871 fatalities and 8,482 injuries at highway-railroad at-grade crossings. Trespassers were the largest category, nearly 83 percent of all fatalities. When looking at non-fatal injuries, the largest category is attributable to employees on duty, with 49 percent of all injuries. Figure F-4 provides 2017 fatalities (left) and injuries (right) by affected party.

Figure F-4: US Railroad and Grade-Crossing Fatalities (Left) and Injuries (Right) (2017)

* *Nontrespassers* – persons lawfully present on railroad property that is used in railroad operation that do not fit into other categories (e.g. a maintenance contractor);

** *Trespasser* – any person on a part of railroad property used in railroad operations whose presence is prohibited, forbidden, or unlawful. Employees who are trespassing on railroad property are reported as Trespassers.

Source: CPCS Analysis of BTS Railroad Safety Data

The probable cause of incidents nationwide from January 2009 to June 2018 is provided in Figure F-5 below. Trespassing (19 percent) and environmental (11 percent) causes of incidents represent the largest percentage of incidents nationwide outside of railroad control. Across the country, incidents that are within railroad control are most commonly due to equipment issues (9 percent).

Figure F-5: Probable Cause of Passenger Railroad Incidents Nationwide (January 2009 – June 2018)

Probable Cause	US Total	% of total
Outside of Railroad Control	**17,746**	**33.3%**

Appendix G. Detailed Field Safety Assessment (DSA) of Grade Crossing Safety in Canada

Regulation of railroad crossings in Canada has both safety and economic dimensions. The safety-related regulations are the Grade Crossings Regulations (GCR) made pursuant to the Railway Safety Act (RSA). The responsible regulatory authority here is Transport Canada. The economic dimension is covered under the Canada Transportation Act (CTA). The responsible regulatory authority here is the Canadian Transportation Agency.

Grade crossing safety in Canada is a complex, multi-jurisdictional matter. In August 2010, the Transportation Safety Board indicated on its watch list that the "risk of passenger trains colliding with vehicles remains too high in busy rail corridors." It recommended that the federal government develop a comprehensive solution for mitigating risk at grade crossings that include new grade crossing safety regulations.[91]

One of these solutions is a Detailed Field Safety Assessment (DSA) – a systematic process performed at regular intervals, used to evaluate the safety of a road/rail line grade crossing. While not a regulatory requirement, a crossing safety program that incorporates a DSA program is recommended as a best engineering practice. Class I railroads have this assessment included as part of their Safety Management System (SMS).

The DSA consists of a review of the site characteristics, traffic control system and the roadway and railroad operational characteristics. An assessment of existing or potential hazards is based on this review. If safety deficiencies are identified, countermeasures can be recommended.

Recommended frequency for DSAs are:

(a) Within seven years of the GCR coming into force (e.g., by November 28, 2021), and at least every five years thereafter, railroads and road authorities should jointly conduct a DSA of their public grade crossings.

[91] Transport Canada, Grade Crossings – Handbook

(b) Within seven years of the GCR coming into force, and at least every five years thereafter, it is considered good practice for a railroad to conduct a DSA of private crossings on its network.

Authorities for a given crossing are responsible for jointly establishing the schedule for DSAs. Notwithstanding (a) above, the authorities may agree at the time of a DSA to extend the deadline for the next DSA to more than five years, but not more than 10 years, if they have reason to believe that the safety conditions at or in the vicinity of the crossing will remain stable.

If a responsible authority identifies a developing situation that could affect safety at or in the vicinity of the crossing, it must notify the other authorities and request the next DSA be conducted sooner. Likewise, a DSA may need to be conducted sooner if conditions change that could impact crossing safety such as changes in volumes and types of vehicle and pedestrian traffic, road traffic patterns, physical surroundings, volumes and types of railroad traffic, railroad operations, crossing accident history, etc.

If the DSA reveals conditions that could eventually affect safety at the crossing, the next DSA should be scheduled sooner than what is stipulated in (a) and (b) above.

In the US, the FRA and state DOTs conduct similar assessments using field diagnostic teams only when line upgrades are performed or new lines are built. No routine assessments are performed.

Appendix H. Review of Relevant Federal Legislation

Laws (named and/or numbered acts), as passed by the US Congress are usually amendments to the US Code. Key regulations include the following:

- The Federal Railroad Safety Act of 1970;
- The Noise Control Act of 1972;
- The Interstate Commerce Commission Termination Act of 1995;
- The Rail Safety Improvement Act of 2008; and
- Passenger Rail Investment and Improvement Act of 2008.

1. The Federal Railroad Safety Act (FRSA) of 1970

The purpose of the FRSA is to "promote safety in every area of railroad operations and reduce railroad-related accidents and incidents.[92]" The law addresses issues regarding state and local regulation of train speed and the duration that railroad crossings can be blocked.

This law ensured that state and local governments would generally be precluded from regulating on any matter unless it is not yet regulated by the US Secretary of Transportation. The law itself regulates train speeds and pre-empts state and local laws and regulations that pertain to the blocking of roadway crossings. These issues are to be regulated by the US Department of Transportation. Just like for other states, this law limits Florida's ability to regulate its railroads in favor of nationwide standards.

2. The Interstate Commerce Commission Termination Act (ICCTA) of 1995

The ICCTA abolished the Interstate Commerce Commission and gave the Surface Transportation Board (STB) oversight of:

- Rail carriers and their rates, classifications, rules (including car service, interchange, and other operating rules), practices, routes, services, and facilities of such carriers; and

[92] 49 U.S.C. §20101

→ Construction, acquisition, operation, abandonment, or discontinuance of spur, industrial, team, switching or side tracks, or facilities.[93]

The ICCTA provides that the STB has direct oversight of state statutes regulating railroad operations and contracts between rail carriers, condemnation of railroad tracks or nearby land, and state negligence and nuisance claims. There are state and local activities that are not pre-empted by the ICCTA such as:

→ Voluntary agreements entered into by the railroad and the local jurisdictions (optional);

→ Traditional police powers over the development of railroad property to the extent that the regulations protect the public health and safety (e.g. local police have jurisdiction over railroad property);

→ Zoning regulations applied to railroad-owned land used for non-railroad purposes by a third party (e.g. a parcel of land may be developed subject to local zoning regulations);

→ Other laws with no pertinence to transportation.

This law lets STB regulate certain aspects of interstate commerce, mentioned above, which the State of Florida has no jurisdiction over.

3. The Rail Safety Improvement Act (RSIA) of 2008

After multiple fatal rail incidents around the US (none of which were in Florida), including two incidents that involved commuter trains in California, the US Congress passed the RSIA to address the underlying causes of these incidents.[94] The issues addressed include:

→ Hours of service requirements for railroad workers;

→ Implementation of a next-generation train control system called Positive Train Control;

→ Changes in the way locomotive conductors are certified; and

→ Issues in roadway-railroad grade crossing safety.

The law includes seven major sections:

Title I – Railroad Safety Improvements: Includes directions to the FRA to develop a series of strategies specific to increasing railroad safety. This part of the legislation also includes a risk-reduction program and the requirement of railroads with passenger rail service to implement *Positive Train Control (PTC)* to be administered and overseen by the FRA.[95] (PTC is a rule-based train control system that ensures safe train operation by preventing train-with-train collisions,

[93] Kamptner, Greg; The Albemarle County Land Use Law Handbook, Albemarle County Attorney's Office, Feb. 2018.
[94] Public Law 110-432, October 16, 2008
[95] Public Law 110-432, October 16, 2008, § 20157. Implementation of positive train control systems.

derailments due to train overspeed, incursions into work zones and movements through a misaligned track switch).

Title II – Highway-Rail Grade Crossing and Pedestrian Safety and Trespasser Prevention: Includes Pedestrian crossing safety, state grade crossing action plans, sight distances at-grade crossings, grade crossing inventory, identification/notification of grade crossing issues, funding for Operation Lifesaver, and funding for states to improve safety.

Title III – Federal Railroad Administration: Includes FRA staffing increases specifically for safety administration and inspection and updates to the FRA website to include additional rail safety information.

Title IV – Railroad Safety Enhancements: Includes minimum safety training standards for rail employees; certification of conductors; conduct of studies to improve the safety of rail track, locomotive cab environments, and station platforms; bridge safety program, and; rail infrastructure improvement grants.

Title V – Rail Passenger Disaster Family Assistance: Includes actions and information for rail accident victims and their families.

Title VI – Clarification of Federal Jurisdiction over Solid Waste Facilities – Includes language that compels compliance of operators of solid waste rail transfer facilities to comply with all applicable federal and state requirements.

Title VII – Technical Corrections – Includes various corrections and amendments to a few sections.

This law requires states (including Florida) to file state-specific action plans to improve grade crossing safety and implement laws on sight obstructions at passively signed highway-rail grade crossings. To meet this requirement, FDOT has developed a Highway-Rail Grade Crossing Safety Action Plan in 2011.

The law also provides grants for technology and safety improvements to railroads as well as state and local governments.

4. Passenger Rail Investment and Improvement Act (PRIIA) of 2008

While this act deals mostly with Amtrak performance, appropriations for rail-related projects, and a number of research grants and studies, it requires states to develop state rail plans. Prior to PRIIA, states had no statutory role in planning and implementation for intercity passenger rail outside of occasional FRA grants. Through the passage of this act, states are given an explicit role to oversee rail planning and implementation.[96]

Dear Senator,

AARP strongly believes voters should be informed on issues affecting older Floridians. With this in mind, and in response to requests from our members and from Florida legislators sitting on both sides of the aisle, AARP will identify bills of particular interest to AARP's members and tell them how legislators vote on those bills during each legislative step. AARP will provide legislators notice of the bills selected for this reporting. AARP plans to publish a final voting record report at the conclusion of the 2020 Legislative Session.

Included is a link to the voting record report which was published at the conclusion of the 2019 Session:
www.aarp.org/flvotingrecord2019

In order to increase understanding of the legislation and lawmakers' views on bills, AARP will encourage its readers to contact state legislators directly to learn more.

Please direct questions or requests for additional information concerning AARP's voting records initiative to Zayne Smith (850) 228-4243, Dorene Barker (850) 228-6387 or Ivonne Fernandez (954) 850-7262. AARP's members and state advocacy staff look forward to engaging legislators and legislative staff through completion of the 2020 Regular Session.

Respectfully,

Jack L. McRay

Sen. Brandes,

I hope this note finds you well. Please find attached our letter to the Senate Ethics and Elections Committee in advance of today's hearing on SB 1354 related to the Statewide Voter Registration Application. Overall, as I've mentioned, we support this bill as written and have just one observations about the language and possible rule-making it might require. Beyond that, I wonder if you anticipate any amendments to the bill to be offered?

Thank you again for your attention to these matters. Please do not hesitate to call on us if we can provide any assistance.

Kind regards,
Kirk

RE: Written Testimony – SB 1354

Dear Chairman Baxley and members of the committee:

On behalf of more than 130,000 members and supporters state-wide, the American Civil Liberties Union (ACLU) of Florida provides this written testimony on SB 1354, re: Statewide Voter Registration Application. We respectfully request that this testimony be included in the record of the meeting and made available to the public in the committee packet/record meeting notes.

Further, we support SB 1354 in substance, with the following observations.

In order to achieve a fair and uniform electoral process, the uniform statewide voter registration application needs to be concise, readily understandable and easy to complete. An excess of questions lends to confusion and difficulties designing a voter registration form that is readily understandable and easy to use by individual Floridians who wish to participate in our electoral process. Prior to SB 7066, question #2 of the pre-2019 form asked individuals to "*affirm that I am not a convicted felon, or if I am, my right to vote has been restored.*" The present legislation (SB 1354) eliminates additional questions required by SB 7066 and nearly conforms the wording of the form to its pre-2019 version. We note that the proposed wording in SB 1354 is not an exact match to the pre-2019 form, stating "*I affirm I have never been convicted of a felony or, if I have been, my rights relating to voting have been restored.*" (line 23-25).

While there seems to be no substantive difference between the pre-2019 prior form and the proposed new language, the statutory wording varies slightly. While this may just be a drafting oversight, we are concerned that, because of the difference, someone might assert that a new form needs to be promulgated instead of reverting back to the pre-2019 form. This would delay implementation and add further confusion for voters. In order to ensure that upon the effective date of the legislation the pre-2019 form can continue to be used without interruption we respectfully request that the statutory language conform to the pre-2019 form that is presently in use.

Thank you for your consideration of the above and please do not hesitate to contact me at kbailey@aclufl.org (786) 363-2713, if you have any questions or would like any additional information.

Sincerely,

Kirk Bailey
Political Director

Subject: Affordable Housing Insurance
Attachment(s): "FL Statute 624.46226 draft 2.docx"

Hey Zach,

Here is the language we're proposing on the **affordable housing** insurance issue.

A few notes,

- This does not alter any guidelines regulating self-insurance funds
- It does not place any requirements on any entity exploring insurance options (doesn't pick winners and losers)
- Provides potential savings only for certain developers of**Affordable Housing**
- Has no fiscal impact

Look forward to seeing you tomorrow afternoon (Wednesday)

Thank you – Mike

AMERICAN OVERSIGHT

The 2018 Florida Statutes

624.46226 Public housing authorities self-insurance funds; exemption for taxation and assessments.—

(1) Notwithstanding any other provision of law, any two or more public housing authorities in the state as defined in chapter 421 may form a self-insurance fund for the purpose of pooling and spreading liabilities of its members as to any one or combination of casualty risk or real or personal property risk of every kind and every interest in such property against loss or damage from any hazard or cause and against any loss consequential to such loss or damage, provided the self-insurance fund that is created:

(a) Has annual normal premiums in excess of $5 million.

(b) Uses a qualified actuary to determine rates using accepted actuarial principles and annually submits to the office a certification by the actuary that the rates are actuarially sound and are not inadequate, as defined in s. 627.062.

(c) Uses a qualified actuary to establish reserves for loss and loss adjustment expenses and annually submits to the office a certification by the actuary that the loss and loss adjustment expense reserves are adequate. If the actuary determines that reserves are not adequate, the fund shall file with the office a remedial plan for increasing the reserves or otherwise addressing the financial condition of the fund, subject to a determination by the office that the fund will operate on an actuarially sound basis and the fund does not pose a significant risk of insolvency.

(d) Maintains a continuing program of excess insurance coverage and reserve evaluation to protect the financial stability of the fund in an amount and manner determined by a qualified and independent actuary. At a minimum, this program must:

1. Purchase excess insurance from authorized insurance carriers or eligible surplus lines insurers.

2. Retain a per-loss occurrence that does not exceed $350,000.

(e) Submits to the office annually an audited fiscal year-end financial statement by an independent certified public accountant within 6 months after the end of the fiscal year.

(f) Has a governing body which is comprised entirely of commissioners of public housing authorities that are members of the public housing authority self-insurance fund or persons appointed by the commissioners of public housing authorities that are members of the public housing authority self-insurance fund.

(g) Uses knowledgeable persons or business entities to administer or service the fund in the areas of claims administration, claims adjusting, underwriting, risk management, loss control, policy administration, financial audit, and legal areas. Such persons must meet all applicable requirements of law for state licensure and must have at least 5 years' experience with commercial self-insurance funds formed under s. 624.462, self-insurance funds formed under s. 624.4622, or domestic insurers.

(h) Submits to the office copies of contracts used for its members that clearly establish the liability of each member for the obligations of the fund.

(i) Annually submits to the office a certification by the governing body of the fund that, to the best of its knowledge, the requirements of this section are met.

A for-profit or not-for-profit corporation, limited liability company, or other similar business entity in which a public housing authority holds an ownership interest or participates in its governance under s. 421.08(8) or receives Local, State or Federal funds for the purpose of providing affordable housing may join a self-insurance fund formed under this section in

AMERICAN OVERSIGHT

which such public housing authority participates. Such for-profit or not-for-profit corporation, limited liability company, or other similar business entity may join the self-insurance fund solely to insure risks related to public housing.

(2) As used in this section, the term "qualified actuary" means an actuary that is a member of the Casualty Actuarial Society or the American Academy of Actuaries.
(3) A public housing authority's self-insurance fund that meets the requirements of this section is not:
(a) An insurer for purposes of participation in or coverage by any insurance guaranty association established by chapter 631; or
(b) Subject to s. 624.4621 and is not required to file any report with the department under s. 440.38(2)(b) that is uniquely required of group self-insurer funds qualified under s. 624.4621.
(4) Premiums, contributions, and assessments received by a public housing authority's self-insurance fund are subject to ss. 624.509(1) and (2) and 624.5092, except that the tax rate shall be 1.6 percent of the gross amount of such premiums, contributions, and assessments.
(5) If any of the requirements of subsection (1) are not met, a public housing authority's self-insurance fund is subject to the requirements of s. 624.4621 if the fund provides only workers' compensation coverage or is subject to the requirements of ss. 624.460-624.488 if the fund provides coverage for other property, casualty, or surety risks.
(6) Any public housing authority in the state as defined in chapter 421 that is a member of a self-insurance fund pursuant to this section shall be exempt from the assessments imposed under ss. 215.555, 627.351 and 631.57.
(7) Reinsurance companies complying with s. 624.610 may issue coverage directly to a public housing authority or an entity organized by a public housing authority under s. 421.08(8) if such public housing authority or entity self-insures its liabilities under this section. A public housing authority purchasing reinsurance or an entity that is organized by a public housing authority under s. 421.08(8) and that is purchasing reinsurance shall be considered an insurer for the sole purpose of entering into such reinsurance contracts. Contracts of reinsurance issued to public housing authorities self-insuring under this section or issued to entities that are organized by public housing authorities under s. 421.08(8) and that are self-insuring under this section shall receive the same tax treatment as reinsurance contracts issued to insurance companies. However, the purchase of reinsurance coverage by a public housing authority self-insuring under this section or by an entity that is organized by a public housing authority under s. 421.08(8) and that is self-insuring under this section shall not be construed as authorization to otherwise act as an insurer.

Subject: Alive Bills Document for Call
Attachment(s): "Bills Still Alive .docx"

Good Evening,

I have attached the complete list of our bills that are still alive with a summary of the bill. Let me know if there is anything else that you need me to do.

Thank you,
Adam Ogonoski

AMERICAN OVERSIGHT

Bills Still Alive

SJR 142 Abolishing the Constitution Revision Commission

This bill abolishes the Constitution Revision Commission. This bill proposes amendments to the State Constitution to abolish the Constitution Revision Commission.

SJR 146: Homestead Property Tax Assessments/Increased Portability Period

This bill proposes an amendment to Section 4 of Article VII and the creation of a new section in 4 Article XII of the State Constitution to increase the period of time during which the accrued benefit from specified limitations on homestead property tax assessments may be transferred from a prior homestead to a new homestead.

CS/SB 148: Limitations on Homestead Assessments

This bill revises the timeframe during which the accrued benefit from specified limitations on homestead property tax assessments may be transferred from a prior homestead to a new homestead. This bill also revises the timeframe during which an owner of homestead property significantly damaged or destroyed by a named tropical storm or hurricane must establish a new homestead to make a certain election.

SB 150: Sanitary Sewer Laterals

This bill encourages counties and municipalities to establish a sanitary sewer lateral inspection program. This bill also requires a seller of real property to disclose any known defects in the property's sanitary sewer lateral.

SB 152: Dental Therapy

This bill authorizes Medicaid to reimburse for dental services provided in a mobile dental unit that is owned by, operated by, or contracted with a health access setting or another similar setting or program. This bill also requires the chair of the Board of Dentistry to appoint a Council on Dental Therapy effective after a specified timeframe; requiring the board to adopt certain rules relating to dental therapists. Furthermore, the bill provides application requirements and examination and licensure qualifications for dental therapists.

SB 468: Mandatory Sentences

This bill authorizes a court to impose a sentence other than a mandatory minimum term of imprisonment and mandatory fine for a person convicted of trafficking if the court makes certain findings on the record. The court must find on the record that the offender did not engage in a continuing criminal enterprise, did not use or threaten violence or use a weapon during the commission of the offense, and did not cause death or serious bodily injury.

AMERICAN OVERSIGHT

CS/SB 470: Searches of Cellular Phones and Other Electronic Devices

This bill expands the grounds for issuance of a search warrant to include content held within a cellular phone, portable electronic communication device, or microphone-enabled household device when such content constitutes evidence relevant to proving that a felony has been committed. This bill adopts the constitutional protection against unreasonable interception of private communications by any means for purposes of obtaining a search warrant. This bill also prohibits the use of certain communication content in any trial, hearing or other proceeding which was obtained without a specified warrant.

SB 482: Beverage Law

This bill repeals provisions relating to limitations on the size of individual wine containers and individual cider containers. This bill revises provisions that authorize a restaurant to allow patrons to remove partially consumed bottles of wine from the restaurant for off-premises consumption. This bill also revises the requirements for the sale of branded products by a licensed craft distillery to consumers. In addition, the bill authorizes a craft distillery to transfer specified quantities of specified distilled spirits from certain locations to its souvenir gift shop.

SB 550 Sentencing

This bill revises the criteria under which certain offenders sentenced after a specified date may be sentenced to a nonstate prison sanction under a prison diversion program. The bill amends some of the criteria for prison diversion eligibility, which will be applicable to offenders sentenced on or after October 1, 2020.

CS/SB 552 Sentencing

This bill revises the threshold of total sentence points below which a court must sentence nonviolent felony offenders who commit certain offenses and are sentenced on or after a specified date to a nonstate prison sanction. This bill increase total sentence points applicable to prison diversion under this subsection from 22 points or fewer to 44 points or fewer.

CS/SB 554 Sentencing

The bill revises the mitigating circumstances under which a departure from the lowest permissible sentence is reasonably justified. The bill also removes language that restricts mitigation based upon substance abuse or addiction, including intoxication at the time of the offense. The bill also removes language that restricts mitigation based upon substance abuse or addiction, including intoxication at the time of the offense.

CS/SB 556: Inmate Conditional Medical Release

This bill establishes the conditional medical release program within the Department of Corrections. This bill requires any inmate who meets certain criteria to be considered for

AMERICAN OVERSIGHT

conditional medical release; providing for victim notification in certain circumstances. This bill provides that an inmate who is approved for conditional medical release must be released from the department in a reasonable amount of time. This bill provides that a medical release remains in the care, custody, supervision, and control of the department and is eligible to earn or lose gain-time.

SB 560: Sentencing

This bill renames the Criminal Punishment Code as the Public Safety Code. The bill also revises the primary purpose of sentencing under the Public Safety Code from punishing an offender to public safety.

CS/SB 574: Conditional Aging Inmate Release

The bill establishes the conditional aging inmate release program within the Department of Corrections. The bill requires that an inmate who meets certain criteria be considered for conditional aging inmate release. The bill provides victim notification requirements under certain circumstances. The bill also provides that an inmate who is approved for conditional aging inmate release must be released from the department's custody within a reasonable amount of time. The bill prohibits an aging release or his or her community-based housing from being counted in the prison system population and the prison capacity figures, respectively.

SB 760: Independent Special Fire Control Districts

This bill requires an independent special fire control district to have, and authorizing the board of such district to exercise, specified powers and duties.

SB 790: Clerks of the Circuit Court

This bill specifies that certain revenues from service charges collected by the clerk for remittance to the Department of Revenue include only revenues for court-related functions. This bill provides for revenues for county operations to be retained by the clerk. This bill revises the distribution of revenue from filing fees from the institution of certain appellate proceedings. This bill revises retroactive application regarding the collection of revenue for court-related functions for remittance to the department.

CS/SB 914: Contingency Risk Multipliers

Providing that, for certain attorney fees awarded for claims arising under property insurance policies, a strong presumption is created that a lodestar fee is sufficient and reasonable; providing that such presumption may be rebutted only under certain circumstances.

SB 918: Civic Education

This bill requires the Commissioner of Education to develop minimum criteria for a nonpartisan civic literacy practicum for high school students, beginning with a specified school year. This bill authorizes students to apply the hours they devote to practicum

AMERICAN OVERSIGHT

activities to certain community service requirements. This bill requires the State Board of Education to designate certain high schools as Freedom Schools, based on criteria the board establishes relating to students' civic learning and civic engagement.

SB 924: Civil Actions Against Insurers

This bill provides that, in third-party bad faith actions against insurers, insureds and claimants have the burden to prove that an insurer acted in reckless disregard for insured rights which resulted in damage to the insured or the claimant. This bill provides that insured or claimant actions or inactions are relevant in bad faith actions; providing that an insurer is not liable if certain conditions are met; providing that an insurer is not liable beyond available policy limits as to certain competing third-party claims if it files an interpleader action within a certain timeframe.

SB 1116: Trust Funds/State-Operated Institutions Inmate Welfare Trust Fund/Department of Corrections

This bill creates the State-Operated Institutions Inmate Welfare Trust Fund within the Department of Corrections. This bill provides the purpose of the trust fund and provides for future review and termination or re-creation of the trust fund.

CS/SB 1118: Inmate Welfare Trust Funds

This requires that specified proceeds and funds be deposited into the State-Operated Institutions Inmate Welfare Trust Fund. This bill provides that the trust fund is a trust held by the Department of Corrections for the benefit and welfare of certain inmates. This bill requires that funds of the trust fund be used exclusively for specified purposes at correctional facilities operated by the department

SB 1144: Department of Juvenile Justice

This bill revises the list of programs within the department. This bill repeals a provision relating to shared county and state responsibility for juvenile detention. This bill deletes a provision requiring each county that is not a fiscally constrained county to pay its annual percentage share of the total shared detention costs. This bill requires the Department of Juvenile Justice to calculate and provide to each county that is not a fiscally constrained county and that does not provide its own detention care for juveniles its annual percentage share.

CS/SB 1146: Special Risk Class of the Florida Retirement System

This bill adds juvenile justice detention officers I and II and juvenile justice detention officer supervisors employed by the Department of Juvenile Justice who meet certain criteria to the class.

SB 1148: Electric Bicycles

This bill revises definitions relating to the Florida Uniform Traffic Control Law. The bill also requires the driver of a vehicle overtaking an electric bicycle to pass the electric

AMERICAN OVERSIGHT

bicycle at a certain distance. The bill also expands exceptions to a prohibition on persons driving certain vehicles on sidewalks and bicycle paths. Furthermore, the bill provides electric bicycle regulations. This bill requires electric bicycles to comply with specified provisions of law. This bill authorizes operators to ride electric bicycles where bicycles are allowed.

SB 1230: Electric Vehicles

This bill authorizes the Department of Transportation to adopt rules. This bill requires that certain funds be used for specified purposes relating to the Electric Vehicle Infrastructure Grant Program, beginning in specified years. This bill requires the department to establish the Electric Vehicle Infrastructure Grant Program. The bill also provides for the distribution of grants to certain entities to install electric vehicle charging infrastructure and provides grant requirements.

SB 1304: Sentencing

This bill creates conditional sentences for substance use and mental health offenders. This bill provides minimum sentencing requirements and specifies duties of the Department of Corrections. The bill also requires the department to provide written notice to specified parties upon the offender's admission into an in-prison treatment program. This bill also requires that an offender be transitioned to probation upon the completion of an in-prison program.

SB 1308: Criminal Justice

This bill authorizes the resentencing and release of certain persons who are eligible for sentence review under specified provisions. This bill precludes eligibility for a sentence review for young adult offenders who previously committed, or conspired to commit, specified offenses. This bill requires the Department of Corrections to notify young adult offenders in writing of their eligibility for sentence review within certain timeframes. This bill requires the department to provide inmates with certain information upon their release.

SB 1346: Fees/Electric Vehicles

This bill creates an additional fee for electric vehicles. The bill creates a license tax and an additional fee for plug-in hybrid electric vehicles. The bill also requires, on specified dates, the Department of Highway Safety and Motor Vehicles to increase the additional fees, subject to certain requirements. The bill provides that certain vehicles are exempt from specified fees.

SB 1352: Transportation Companies

This bill defines the term "transportation network company digital advertising device". This bill deletes for-hire vehicles from the list of vehicles that are not considered transportation network company (TNC) carriers or are not exempt from certain registration. This bill authorizes TNC drivers or their designees to contract with a

AMERICAN OVERSIGHT

company for the installment of TNC digital advertising devices. The bill also requires companies operating such devices to allocate a specified percentage of advertisement inventory to certain organizations.

SB 1354: Statewide Voter Registration Application

This bill revises requirements for the uniform statewide voter registration application and the acceptance of such applications. This bill deletes an exemption from public records requirements for information related to a voter registration applicant's or voter's prior felony conviction and his or her restoration of voting rights to conform to changes made by the act.

SB 1372: Elections

This bill deletes a provision that prohibits the use of an address appearing on identification presented by an elector at the polls as a basis to confirm or otherwise challenge an elector's legal residence. This bill revises the timeframes for conducting public pre-election testing of automatic tabulating equipment. The bill removes the requirement that duplicate ballots be made of vote-by-mail ballots containing overvoted races. The bill also revises the timeframe in which the supervisor of elections must mail ballots in elections conducted under the Mail Ballot Election Act.

SB 1504: Sentencing

This bill requires certain persons convicted of driving while license suspended, revoked, canceled, or disqualified committed before a specified date to be sentenced in a specified manner in accordance with the amendments in chapter 2019-167, Laws of Florida. This bill requires resentencing for persons who committed such violations before a specified date and are serving terms of imprisonment. This bill provides that persons who meet specified criteria are eligible to petition a court to expunge a criminal history record for convictions of driving while license suspended, revoked, canceled, or disqualified.

SB 1506: Public Records/Expunction of Specified Convictions

This bill provides a public records exemption to include the expunction of specified convictions of certain persons convicted of driving while license suspended, revoked, canceled, or disqualified. The bill provides for legislative review and repeal of the exemption. This bill provides a statement of public necessity.

CS/SB 1510: Jurisdiction of Courts

This bill limits the appellate jurisdiction of the circuit courts to appeals from final administrative orders of local code enforcement boards and other reviews and appeals expressly provided by law. This bill authorizes a county court to certify a question to a district court of appeal in a final judgment that is appealable to a circuit court. The bill authorizes a district court of appeal to review certain questions certified by a county court.

AMERICAN OVERSIGHT

SB 1708: Inmate Reports

This bill revises the information the Department of Corrections is required to publish on its website and update quarterly to include information from each facility regarding health services and conditions, the use of force, reports of abuse, disciplinary reports, the death of inmates, and statistics related to specified officer classes.

SB 1716: Sentencing

This bill revises the required sentencing structure for prison release reoffenders upon proof from a state attorney which establishes that a defendant is a prison release reoffender. This bill applies the revised sentencing structure to certain persons under certain circumstances. The bill provides resentencing requirements. The bill also deletes a provision that requires a state attorney to explain a sentencing deviation in writing under certain circumstances.

CS/SB 1718: Public Meetings and Records/Conditional Aging Inmate Release Program

This bill exempts from public meetings requirements the protected health information of specified inmates being considered for the conditional aging inmate release programs. This bill exempts from public records requirements certain records used by the reviewing panel to make a determination of the appropriateness of conditional aging inmate release and the recordings of closed panel review hearings. The bill provides for legislative review and repeal of the exemption; providing a statement of public necessity.

CS/SB 1728: Public Meetings and Records/Conditional Medical Release Program

This bill exempts from public meetings requirements the protected health information of specified inmates being considered for the conditional medical release program. The bill also exempts from public records requirements certain records used by the reviewing panel to make a determination of the appropriateness of conditional medical release and the recordings of closed panel review hearings. The bill provides for legislative review and repeal of the exemptions. The bill provides a statement of public necessity.

SB 1738: Motor Vehicle Dealers

This bill revises the definition of the term “rental company” to include motor vehicle dealers without limitation and their leasing and rental affiliates for the purpose of minimum insurance coverage requirements. This bill provides that motor vehicle dealers and their affiliates are immune to causes of action and not vicariously liable for harm to persons or property under certain circumstances.

SB 1826: Land Surveyors and Mappers

This bill deletes certain education requirements for an applicant to take the licensure examination to practice as a surveyor or mapper or to be qualified as a surveyor or mapper intern. This bill revises licensure by endorsement requirements. This bill revises the required continuing education hours for licensed surveyors or mappers.

AMERICAN OVERSIGHT

SB 1860: Availability of Marijuana for Adult Use

This bill revises the sales tax exemption for the sale of marijuana and marijuana delivery devices to only include sales to qualified patients or caregivers. This bill revises provisions related to the licensure and functions of medical marijuana treatment centers (MMTCs). The bill also specifies application requirements for MMTCs to obtain cultivation licenses and processing licenses. The bill authorizes MMTCs licensed to cultivate or process marijuana to use contractors to assist with the cultivation and processing of marijuana under certain conditions.

SB 1862: Public Records/Criminal History Records and Related Information

This bill specifies requirements for certain agencies in the disposition of expunged criminal history records; providing an exemption from public records requirements for certain expunged criminal history records and related information of persons who possessed 4 ounces or less of cannabis, with exceptions. The bill provides for future review and repeal of the exemption. The bill provides a statement of public necessity.

SB 1886: Grandparent Visitation Rights

This bill authorizes a grandparent of a minor child whose parent was the victim of a murder to petition the court for court-ordered visitation with the child under certain circumstances. This bill removes the requirement that a grandparent petitioning the court for court-ordered visitation with a minor child make a prima facie showing of parental unfitness or significant harm to the child in a preliminary hearing on such petition and instead requiring the grandparent to make a prima facie showing of other specified conditions.

Subject: Amendment language Florida Protected Reserve Funds for SB 1154 Baxley
Attachment(s): "20200206 - Florida Protected Reserve Funds.docx","ACTUAL 102 UNITS.pdf"

Senator:

Following up on our conversation in your office on December 12th. (with Senator Pizzo and his dog). We discussed the evolution of this proposed legislation over the past almost 3 years. It has been refined, reviewed by multiple homeowner attorneys, CPAs, and securities lawyers along with several senators and representatives. We ran this past Florida Office of Financial Regulation, and as it does not affect them they were fine with the language.

Changes have been incorporated to address all concerns. An analysis, attached, running real numbers from 2007 thru 2019 using an actual association's data shows how much money has been lost to inflation and how much money could have been earned under this proposal. To many people this is an intuitive calculation.

And then there is the small group of naysayers in Tallahassee and they are the tail wagging the dog and blocking. So finally, when we last met I asked you straight-up to help get this into legislation.
You offered to present this as an amendment.

Attached is the language for the amendment relating to investments to be proffered at the Committee level.

SB 1154 by Baxley will be heard in the Rules Committee, I believe.

A few points for discussion:

This is all about protecting owners and associations. Presently association reserves also need inflation protection. Long term reserve funds are largely investing in short term, liquid investments with very low rates of return. Many of them also keep balances that exceed the insured limits. The amendment clarifies that. Again it is about protection.

> single associations and multi condominium associations may invest any funds, in one or any combination of a bank, savings and loan, or credit union deposit account(s) where association balances do not exceed the insured limits of each such institution

Under current statute and DBPR expressed rules, associations can invest any way they want to without any guardrails, without any oversight. I have been told by CPAs that funds often go astray. This amendment gives appropriate guardrails without over regulating to protect against this existing risk.

> The funds are managed by a Registered Investment Adviser so registered under s. 517.12, and acting as a "prudent investor" defined in s. 518.11 (4) and acting as a fiduciary to the association pursuant to the Investment Advisers Act of 1940 and shall comply with the fiduciary standards set forth in the Employee Retirement Income Security Act of 1974 at 29 U.S.C. s.1104(a)(1)(A)(B)(C). In case of conflict with other provisions of law authorizing investments, the investment and fiduciary standards set forth in this subsection shall prevail.
>
> Each association's CPA shall provide to the association a statement that validates the reserve funds transactions at least annually, a report of cash receipts and disbursements of the invested funds pursuant to s. 718.111(13)2 and reconciled to planned reserve fund required liquidity and portfolio investments.

This has language to protect board members from liability by requiring specific majority owner votes and the development of an investment policy statement approved by the owners.

> 718.112 Bylaws
> 2.f.
> 3. Reserve funds and any ~~interest~~earnings accruing thereon shall remain in the reserve account or accounts and may be used only for authorized reserve expenditures unless their use for other purposes including investing funds pursuant to s. 718.111 (14) is approved in advance by a majority vote at a duly called meeting of the association. Before turnover of control of an association by a developer to unit owners other than the developer pursuant to s. 718.301, the developer-controlled association may not vote to use reserves for purposes other than those for which they were intended,including investing funds pursuant to s. 718.111 (14) without the approval of a majority of all non-developer voting interests, voting in person or by limited proxy at a duly called meeting of the association.
>
> The Board shall adopt at least annually an Investment Policy Statement to be retained in the permanent records of the Association(s);

This language incorporates the defined term "Prudent Investor. In short this is the best practice definition that is already central to all retirement plan regulation. This also means that a prudent investor matches the timings of cash flow to liabilities. Associations have current, short-term and long-term liabilities. This language focuses the investment strategy to make certain cash is available well in advance of it being needed. Long-term obligations are invested in a long-term strategy in a glide path structure to feed the short-term soft landing pad of liquidity.

AMERICAN OVERSIGHT

(b) Each association shall provide to the investment adviser at least annually the association's approved investment policy statement, current financial statements, reserve fund study report and assumptions as described more fully in s. 718.111 (13). The investment adviser shall review all information provided by the association and provide to the association a portfolio allocation model suitably structured to match projected reserve fund and liabilities liquidity requirements.

Finally, this language required associations to follow the PFIA guidelines the State itself imposes on its pension system. As we have discussed, if the State is going to put forth legislation it should be as strict as the State and not support terrorism or BDS attacks on Israel.

(d) Investments shall comply with s. 215.472, s. 215.473(4) and s. 215.4725(4)and may be held in custodial accounts pursuant to s. 215.47 (1) (h), so long as total balances in any such institution do not exceed the maximum insured SIPC coverage at each financial institution.
(e) Each independent registered investment adviser shall submit to the association annually a certification of compliance with this section.

If there are any changes you feel should be done here, I am open to your guidance. Just let me know.

Thank you. Working this for almost 3 years has been a rewarding experience. Your help in getting this into law is awesome. As you can imagine, no one wants change, especially change they did not come up with on their own.

Regards

Louis Orloff

AMERICAN OVERSIGHT

718.111 The association.—

14) COMMINGLING AND INVESTING.—

(a) All funds collected by an association shall be maintained separately in the association's name. For investment purposes only, reserve funds may be commingled with operating funds of the association. Commingled operating and reserve funds shall be accounted for separately, and a commingled account shall not, at any time, be less than the amount identified as reserve funds. Should a deficit in reserve funds occur the association has thirty (30) days to convene a meeting of unit owners to determine a cure for said deficit. This subsection does not prohibit a multi condominium association from commingling the operating funds of separate condominiums or the reserve funds of separate condominiums. Furthermore ~~, for investment purposes only,~~ single associations and multi condominium associations may invest any funds, in one or any combination of a bank, savings and loan, or credit union deposit account(s) where association balances do not exceed the insured limits of each such institution and an investment account managed pursuant to Investment Requirements(b)all subject to a consenting vote of the unit owners obtained in accordance with s. 718.112(2)(f) and if the Declaration Documents do not prohibit the investments described in this section.

(b)Investment Requirements:

(1) The Board shall adopt at least annually an Investment Policy Statement to be retained in the permanent records of the Association(s);

(2) "Investment Purposes" in this section shall mean:

(a) The funds are managed by a Registered Investment Adviser so registered under s. 517.12, and acting as a

AMERICAN OVERSIGHT

"prudent investor" defined in s. 518.11 (4) and acting as a fiduciary to the association pursuant to the Investment Advisers Act of 1940 and shall comply with the fiduciary standards set forth in the Employee Retirement Income Security Act of 1974 at 29 U.S.C. s.1104(a)(1)(A)(B)(C). In case of conflict with other provisions of law authorizing investments, the investment and fiduciary standards set forth in this subsection shall prevail.

(b) Each association shall provide to the investment adviser at least annually the association's approved investment policy statement, current financial statements, reserve fund study report and assumptions as described more fully in s. 718.111 (13). The investment adviser shall review all information provided by the association and provide to the association a portfolio allocation model suitably structured to match projected reserve fund and liabilities liquidity requirements.

(d) Investments shall comply with s. 215.472, s. 215.473(4) and s. 215.4725(4)and may be held in custodial accounts pursuant to s. 215.47 (1) (h), so long as total balances in any such institution do not exceed the maximum insured SIPC coverage at each financial institution.

(e) Each independent registered investment adviser shall submit to the association annually a certification of compliance with this section.

(f) Each association's CPA shall provide to the association a statement that validates the reserve funds transactions at least annually, a report of cash receipts and disbursements of the invested funds pursuant to s. 718.111(13)2 and reconciled to planned reserve fund required liquidity and portfolio investments.

(g) Each association's funds and investment results that

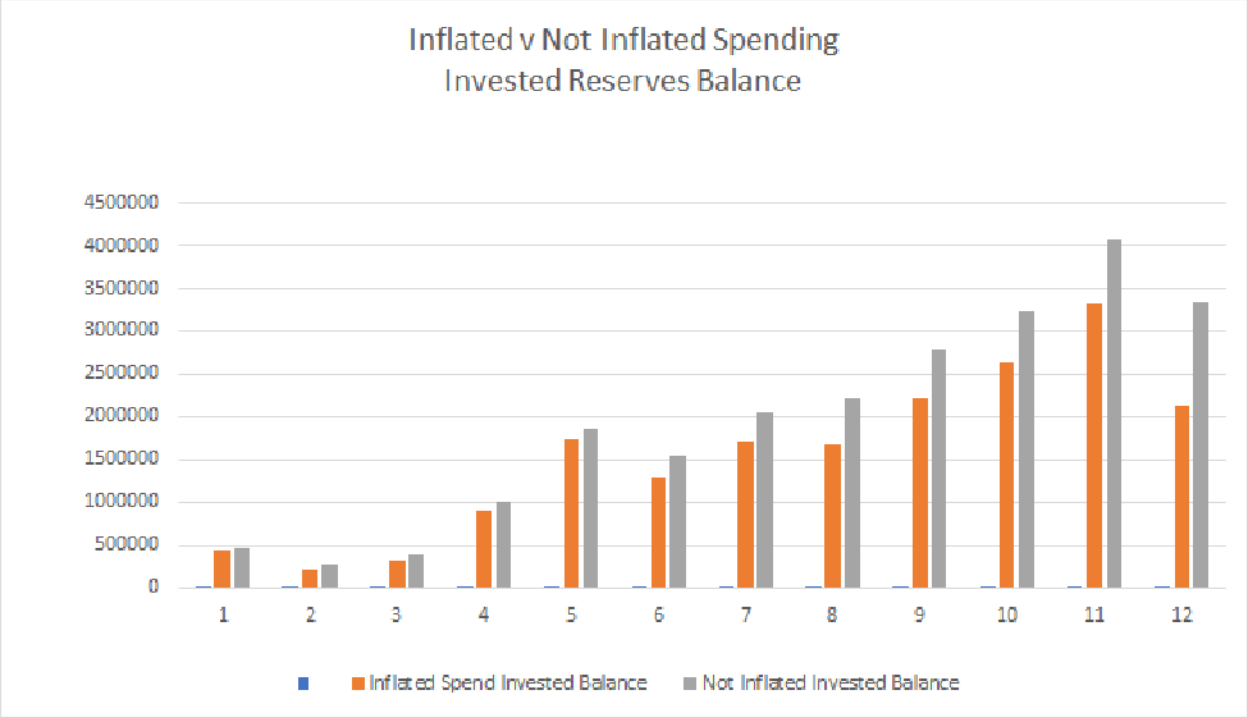
AMERICAN OVERSIGHT

are invested under this subsection are accessible to each association within 10 business days after a notice is sent by registered mail or by electronic notice has been given to the independent investment adviser.

(c) A manager or business entity required to be licensed or registered under s. 468.432, or an agent, employee, officer, or director of an association, shall not commingle any association funds with his or her funds or with the funds of any other condominium association or the funds of a community association as defined in s. 468.431.

718.112 Bylaws

2.f.

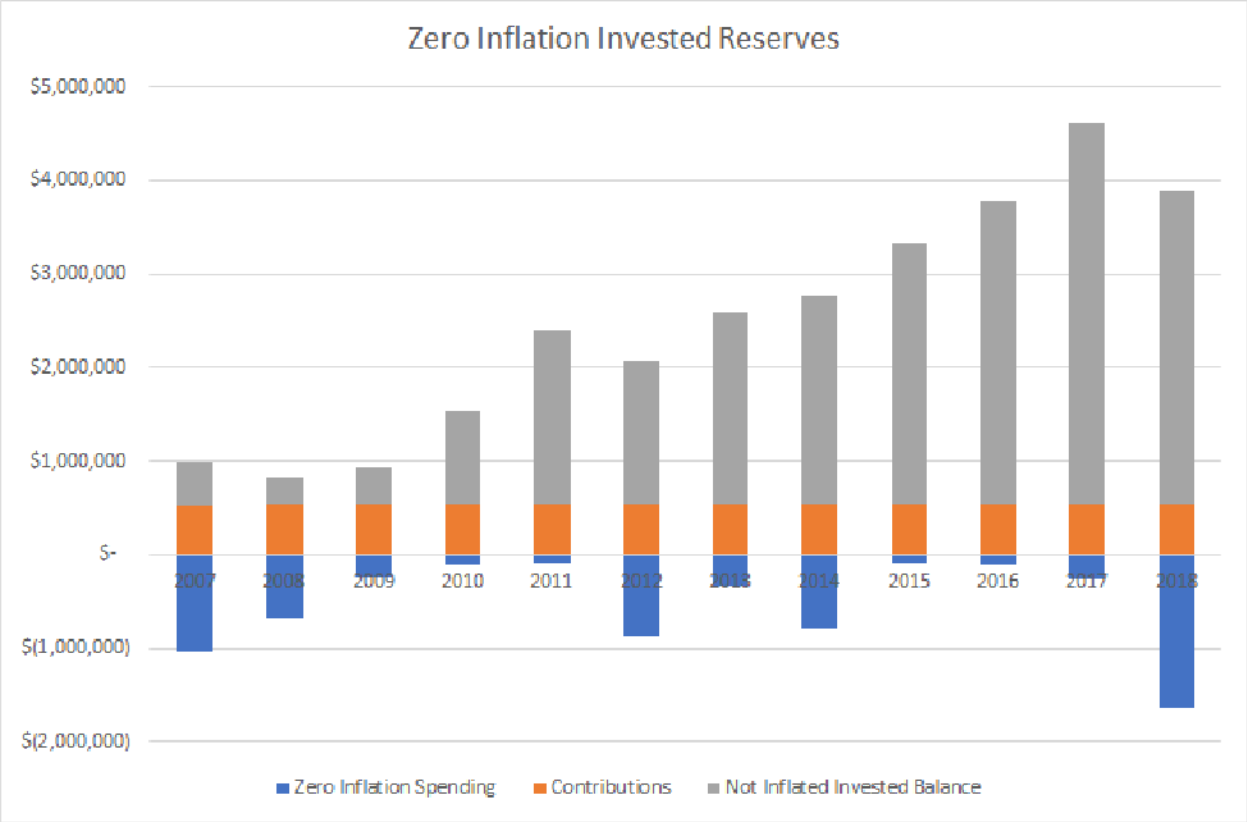


3. Reserve funds and any ~~interest~~ earnings accruing thereon shall remain in the reserve account or accounts and may be used only for authorized reserve expenditures unless their use for other purposes including investing funds pursuant to s. 718.111 (14) is approved in advance by a majority vote at a duly called meeting of the association. Before turnover of control of an association by a developer to unit owners other than the developer pursuant to s. 718.301, the developer-controlled association may not vote to use reserves for purposes other than those for which they were intended, including investing funds pursuant to s. 718.111 (14) without the approval of a majority of all non-developer voting interests, voting in person or by limited proxy at a duly called meeting of the association.

AMERICAN OVERSIGHT

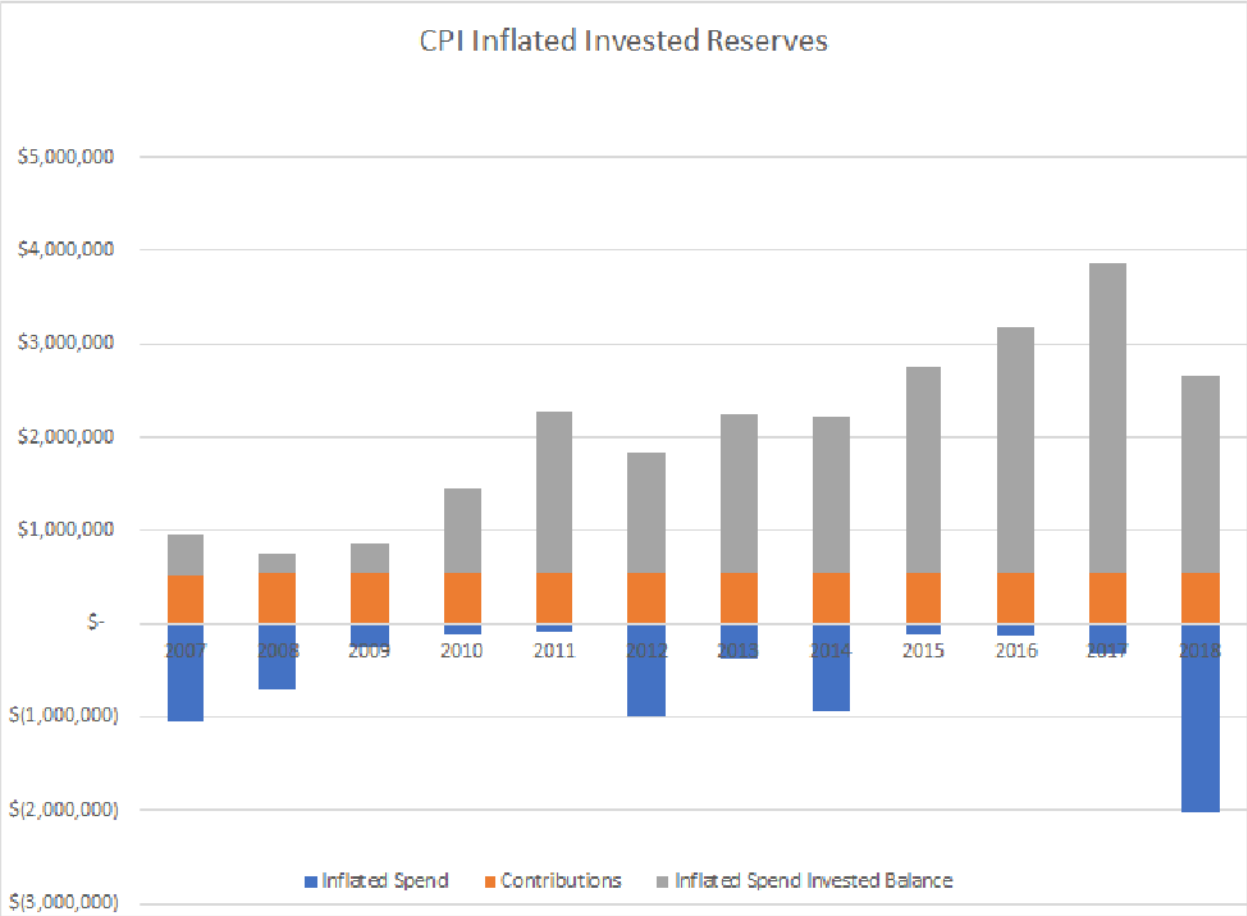
FLORIDA PROTECTED CONDOMINIUM RESERVES
REAL LIVE ASSOCIATION RESERVE PLAN APPLIED

This is the analysis we did for a real association. This association has 102 residences and has completed a professional reserve study, so we have a precise year by year schedule of future obligations. The obligations are estimated and scheduled for repair or replacement in the future based on condition and useful life.



We have also taken the schedule of future actual expenses directly from the study and used the annual CPI to show how inflation erodes the purchasing power of reserves. This is clearly illustrated in the following high-level chart showing the difference between the same invested reserve account less expenses growing at CPI vs expenses at zero inflation.

The following two stacked bar charts show expenses below zero against contributions plus returns and net balances above zero.



AMERICAN OVERSIGHT

This first chart shows all future obligations in today's dollars without the effect of inflation.

AMERICAN OVERSIGHT

This second chart begins with the same contributions and expense assumptions only we have inflated the expenses by CPI over each year.

We have not done any backtesting of investment strategy instead using the standard hypothetical model whereby we take actual historic numbers and apply them to the period going forward. In this case we have stress tested our thesis by starting with 2007 so that we capture all of 2008 and 2009 in the early stages of an investment program. In this case we have used the FL State retirement plans. This also makes sense for prudent investor long term account objective.

The Legislative Auditing Committee is established by Joint Rules of the Florida Legislature and its membership consists of members appointed from each house. The Committee may direct the Auditor General to conduct an audit, review, or examination of any entity or record as specified in Section 11.45(3), Florida Statutes. This includes State agencies, counties, municipalities, special districts, school districts, charter schools, and numerous other government organizations, as well as nongovernmental agencies, corporations, and persons who have received any appropriation made by the Legislature.

The Honorable Bill Galvano
President of the Senate
409 The Capitol
Tallahassee, Florida 32399-1100

The Honorable Jose Oliva
Speaker of the House of Representatives
420 The Capitol
Tallahassee, Florida 32399-1300

Dear President Galvano and Speaker Oliva:

It is my privilege to provide the Auditor General's Annual Report for the period November 1, 2018, through October 31, 2019. In accordance with Section 11.45(7)(h), Florida Statutes, this Annual Report includes a list of statutory and fiscal changes recommended by the Auditor General for legislative consideration as well as our Projected 2-Year Work Plan identifying the audit and other accountability activities expected to be undertaken during the 2020-21 and 2021-22 fiscal years. Our Projected 2-Year Work Plan is a risk-based plan developed considering both the audit frequency requirements in State law and information obtained from the Legislature and other sources concerning areas of audit interest and operational risk.

This Annual Report also provides a brief description of our Office and highlights the audit and other accountability activities we performed during the 12-month period November 1, 2018, through October 31, 2019. These audits and activities include assignments made to our Office both in law and by legislative directive. During this period, our dedicated team of audit professionals and support staff issued over 220 reports, including reports related to operational, financial, and Federal awards audits, and attestation examination engagements of State and local governmental entities.

Pursuant to *Government Auditing Standards*, every 3 years our Office undergoes an independent external peer review of our Office's system of quality control. Last month, a team from the National State Auditors Association (NSAA) conducted such a review covering our reports issued during the period September 1, 2018, through August 31, 2019. I am pleased to inform you that our Office received a rating of "pass," which is the highest rating an audit organization can receive from an NSAA peer review team. A copy of the peer review team's report is included in this Annual Report and is also available for viewing on our Web site, FLAuditor.gov.

This year we commemorated our 50th year of auditing excellence for the benefit of Floridians and we will continue to work diligently to provide unbiased, timely, and relevant information the Legislature, Florida's citizens, public entity management, and other stakeholders can use to promote government accountability and stewardship and improve government operations. I am proud of what our staff have accomplished this past year and we greatly appreciate the Legislature's continued interest in our audit work and reports. Please let me know if you have any questions regarding this Annual Report or if we can be of any additional service to you in your service to the citizens of Florida.

Respectfully,

Sherrill F. Norman

AMERICAN OVERSIGHT

OUR OFFICE

The Auditor General is:

- ***A Constitutional Officer***
- ***A Legislative Officer***
- ***A Certified Public Accountant***
- ***The State's Independent External Auditor***

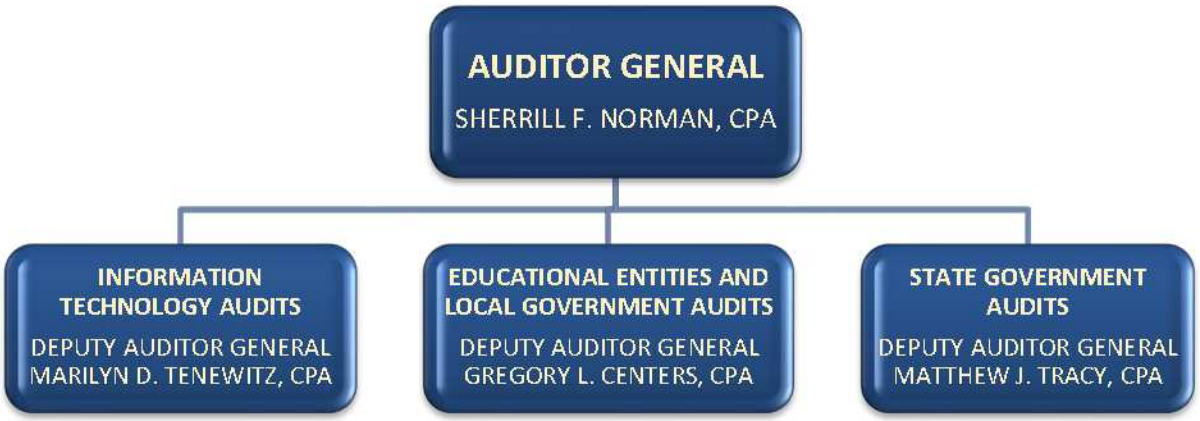
Our Vision

Excellence in auditing for the benefit of Floridians.

Our Core Values

- ***Integrity*** – Commitment to ethical conduct and truthfulness in all relationships.
- ***Independence and Objectivity*** – Being mindful of the reliance that is placed on our work and, therefore, taking a fact-based, nonpartisan, unbiased, fair, and balanced approach to all activities.
- ***Accountability*** – Holding ourselves accountable and being responsible for our actions, taking pride in our professionalism, striving for efficiency in our performance, and committing to the highest performance standards.

Our Mission



As the State's independent external auditor, the Auditor General provides unbiased, timely, and relevant information that the Legislature, Florida's citizens, public entity management, and other stakeholders can use to promote government accountability and stewardship and improve government operations. Specifically, the Auditor General:

- Audits financial statements to provide the Legislature and other users of financial statements independent assurance regarding the reliability of the financial statement information provided by government managers.
- Identifies and audits those operating units, programs, activities, functions, and transactions considered most vulnerable should a significant breakdown in internal control occur.
- Communicates, by an on-site presence and through examination, the Legislature's expectation that public entity management and employees are accountable for the proper administration of public funds and the achievement of entity objectives.
- Reports on whether expenditures of Federal, State, and local funds serve a public purpose and are made in compliance with applicable laws, rules, regulations, contracts, grant agreements, best practices, and other guidelines and whether government programs, activities, and functions are administered in an economic, efficient, and effective manner.
- Reports on whether governmental entities have established proper internal controls that reasonably ensure that financial reports and records are reliable; assets are safeguarded; and fraud, waste, abuse, and noncompliance are prevented or promptly detected and resolved.

AMERICAN OVERSIGHT

Our Organization

The organizational structure of the Auditor General's Office consists of three divisions: the State Government Audits Division, the Educational Entities and Local Government Audits Division, and the Information Technology Audits Division. Each Division is led by a Deputy Auditor General.

Management and staff of our organizational units work in coordination to meet the Auditor General's goals and objectives. Contact information for the Auditor General, each Deputy Auditor General, and other Auditor General management with reporting responsibilities is included in ***EXHIBIT E*** of this report.

While our Office headquarters is in Tallahassee, approximately half our professional audit staff are assigned to various other locations throughout the State. These locations facilitate our audits of the school districts, State colleges, State universities, and State agencies headquartered outside Tallahassee, as well as our audits of local governmental entities.

Our People

Delivering high-quality audit work products efficiently and effectively requires a competent, dedicated, and enthusiastic workforce. Many of our 360 full-time equivalent positions are held by audit professionals with various professional accounting and audit-related certifications. For example, as of October 31, 2019, our audit professionals included:

- 159 Certified Public Accountants.
- 18 Certified Information Systems Auditors.
- 16 Certified Fraud Examiners.

What We Do

Sections 11.42 and 11.45, Florida Statutes, set forth the general authority and duties of the Auditor General. Independently, and in accordance with applicable professional standards, the Auditor General:

- Conducts financial audits of the accounts and records of State government, State universities, State colleges, and school districts.
- Conducts operational and performance audits of public programs, activities, functions, and information technology systems and performs related duties as prescribed by law, concurrent resolution of the Legislature, or as directed by the Legislative Auditing Committee.
- Adopts rules, in consultation with the Florida Board of Accountancy, for audits performed by independent certified public accountants of local governmental entities, charter schools, charter technical career centers, school districts, and certain nonprofit and for-profit organizations.
- Conducts reviews of audit reports of local governmental entities, charter schools, charter technical career centers, school districts, and certain nonprofit and for-profit organizations.
- Conducts examinations of school districts' and other entities' records, as appropriate, to evaluate compliance with State requirements governing the determination and reporting of full-time equivalent (FTE) student enrollment reported to the Department of Education and used to determine Florida Education Finance Program funding allocations.
- Conducts quality assessment reviews of the internal audits performed by State agency offices of inspectors general.

The Auditor General performs audits and other engagements in accordance with generally accepted government auditing standards as set forth by the Comptroller General of the United States in *Government Auditing Standards*. *Government Auditing Standards* are applicable to financial and performance audits and attestation engagements and incorporate applicable auditing standards promulgated by the American Institute of Certified Public Accountants (AICPA). *Government Auditing Standards* require that, in all matters relating to audit work, the Auditor General and each individual auditor must maintain independence and avoid situations that could lead reasonable and informed persons to conclude that the auditor's independence is impaired. Our independence and other core values, along with the collective knowledge and skills of our staff, provide the basis for our credibility.

AMERICAN OVERSIGHT

Our Quality Control

Government Auditing Standards require us to undergo an independent review of our system of quality control at least once every 3 years. In October 2019, a team from the National State Auditors Association (NSAA) conducted such a review that covered engagements with reports issued during the period September 1, 2018, through August 31, 2019. Our Office received a rating of "pass," which is the highest rating an audit organization can receive from an NSAA peer review team. This rating means that the Auditor General's system of quality control provided reasonable assurance that our Office's work conformed to *Government Auditing Standards* and is evidence of the quality and professionalism of our staff. The peer review team's report is included as ***EXHIBIT D*** of this Annual Report and is also available on our Web site. Our next external peer review will be conducted in the fall of 2022.

Our Strategic Goals and Objectives

In recognition of our statutory duties and mission, within the framework of our core values, our work is planned and managed to address strategic objectives established to assist us in accomplishing our two primary strategic goals:

- Our ***Professional Services Goal*** is to provide timely, quality information to the Legislature and Florida's citizens relative to the financial accountability and stewardship of public officials. This goal encompasses multiple services directed toward financial reporting, legal compliance, and government operations.
- Our ***Professional Development Goal*** is to maximize the value of the Auditor General's work by continuing to promote quality, professionalism, and productivity. The Auditor General encourages all staff to pursue professional certifications and requires all management staff with responsibilities for audit or attestation engagements to hold applicable certifications, such as certified public accountant (CPA) or, when appropriate, certified information systems auditor (CISA). To enhance their technical proficiency, our professional audit staff receive a minimum of 80 hours of continuing professional education (CPE) in every 2-year period. Some of the CPE sessions are led by specialist guest speakers or external subject-matter experts, but we also recognize the importance of fostering the speaking and presentation skills of our own staff. Accordingly, we give our staff the opportunity to present on topics within their areas of expertise.

Our strategic objectives are:

Objective 1	Improve the operations and accountability of public entities.
Objective 2	Identify and audit essential government topics of specific interest to the Legislature.
Objective 3	Conduct audits and other engagements in accordance with applicable professional auditing standards.
Objective 4	Timely conduct all engagements in a cost-efficient manner.
Objective 5	Recruit and retain highly qualified, highly skilled staff.
Objective 6	Provide staff with an organizational environment and professional opportunities that promote job satisfaction.
Objective 7	Provide staff with the training, opportunities, technology, and encouragement needed to enhance professional competencies and effectively and efficiently complete audits and other assignments.
Objective 8	Continue to build on the Auditor General's reputation as a leader in the auditing and government financial reporting communities.

AMERICAN OVERSIGHT

Our Reports

Our audits and other accountability activities focus on executive branch (State) agencies, judicial branch entities, educational entities, local governmental entities, and certain other entities. A listing of all reports issued during the period November 1, 2018, through October 31, 2019, is included in this report as ***EXHIBIT B***. An overview of our audits and other accountability activities completed during that period begins on page 13 of this Annual Report. Copies of audit and other reports are available on our Web site, www.FLAuditor.gov, and are distributed as appropriate and upon request to:

- Legislative members and staff.
- Governing boards, officials, and management of governmental entities.
- Federal Government officials.
- Bond rating agencies.
- Florida's citizens.
- The media.
- Other interested parties.

AMERICAN OVERSIGHT

RECOMMENDED STATUTORY AND FISCAL CHANGES

Various provisions of State law require the Auditor General to conduct audits, examinations, or reviews of government programs, activities, and functions and report the results thereof to the President of the Senate, the Speaker of the House of Representatives, the Legislative Auditing Committee, senior management of the audited entity, and, as applicable, Federal grantor agencies. These reports have been provided as required by law, and many include findings and recommendations focusing on the need for management actions to improve the audited entities' level of legal compliance and internal controls relevant to legal compliance, economy and efficiency, financial reporting and records, and the safeguarding of assets. In addition, Section 11.45(7)(h), Florida Statutes, provides in part that the Auditor General shall annually compile and transmit to the President of the Senate, the Speaker of the House of Representatives, and the Legislative Auditing Committee by December 1 of each year a list of statutory and fiscal changes recommended by the Auditor General.

The following recommended statutory and fiscal changes are provided to the President of the Senate, the Speaker of the House of Representatives, and the Legislative Auditing Committee for consideration. These recommendations were either included in our audit reports during the past few audit cycles or arose during the course of performing the duties assigned to the Auditor General. The recommendations are presented by policy area to facilitate their use by the various legislative committees. Auditor General staff are available to discuss these recommendations with legislative members and staff. Contact information for the management staff referenced below is provided in ***EXHIBIT E*** of this report.

Policy Areas: Senate Education
House Education

- **Charter Schools** – The Legislature should consider amending Section 1002.33, Florida Statutes, to require school districts to monitor the eligibility of charter school classroom teachers for the Florida Best and Brightest Teacher Scholarship Program. The Legislature should also consider amending Section 1013.62, Florida Statutes, to require school districts to monitor charter school use of capital outlay funding.

  Audit Manager: Micah E. Rodgers, CPA

- **Charter Schools** – Section 1002.33(9)(o)2., Florida Statutes, requires that an independent audit be completed for charter schools within 30 days after notice of nonrenewal, closure, or termination to account for all funds and assets. Because of the varying complexity of audits, that time frame may not be a reasonable period to complete such audits. Accordingly, the Legislature should consider revising Section 1002.33(9)(o)2., Florida Statutes, to provide that an independent audit shall be "engaged" within 30 days after notice of nonrenewal, closure, or termination to account for all funds and assets.

  Audit Manager: Micah E. Rodgers, CPA

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003008

- **The Florida Best and Brightest Teacher Scholarship Program** – The Legislature should consider charging administration of the Florida Best and Brightest Teacher Scholarship program to the Department of Education. Doing so would establish the Department as the entity responsible for providing guidance sufficient to enable the school districts and charter schools to consistently apply Section 1012.731, Florida Statutes.

  Audit Manager: Micah E. Rodgers, CPA

- **Transparency Requirements** – The Legislature should consider amending applicable statutory requirements to define the "transparency requirements" for charter schools, charter technical career centers, Florida College System institutions, and State universities or delete from Section 11.45(7)(i), Florida Statutes, the requirement for the Auditor General to list the charter schools, charter technical career centers, Florida College System institutions, and State universities that have failed to comply with the transparency requirements.

  Audit Manager: Micah E. Rodgers, CPA
  Jaime N. Hoelscher, CPA

- **Scholarship Funding Organizations** – The Legislature should consider amending Sections 11.45(2)(l), 1002.385(14)(a), and 1002.40(12), Florida Statutes, to require the Auditor General to conduct operational audits at least once every 3 years of the accounts and records of eligible nonprofit scholarship-funding organizations.

  Audit Manager: Michael J. Gomez, CPA

Policy Areas: Senate Community Affairs
House State Affairs

- **Special Districts** – Notwithstanding that Community Redevelopment Agencies (CRAs) are special districts that are covered by Section 218.39, Florida Statutes, because of their unique nature and specific audit requirements of Section 163.387(8)(a), Florida Statutes, the Legislature should consider amending:
  - Section 218.39(1), Florida Statutes, to expressly include a CRA meeting the criteria in Section 163.387(8)(a), Florida Statutes, as an entity required to have an annual financial audit.
  - Section 218.39(1)(c), Florida Statutes, to provide for any special district other than CRAs meeting the criteria in Section 163.387(8)(a), Florida Statutes.
  - Section 218.39(3)(a) and (b), Florida Statutes, to provide for any special district excluding CRAs meeting the criteria in Section 163.387(8)(a), Florida Statutes.

  Audit Manager: Michael J. Gomez, CPA

- **Local Governments** – The Legislature should consider:
  - Enacting a law that requires local governments to adopt a minimum general fund unrestricted fund balance policy or to maintain a certain level of general fund unrestricted fund balance.
  - Amending Section 218.391, Florida Statutes, to require local governments to perform auditor selection procedures at specified intervals. Also, amend Section 218.391, Florida Statutes, to require the local government audit committee to be advised by at least one person who has an understanding of generally accepted accounting principles and government auditing.

AMERICAN OVERSIGHT

Amendments to Section 281.391 should also be considered to require local governmental entities to establish ordinances, resolutions, or policies and procedures to define audit committee responsibilities.

- Revising the definition of "governmental unit" in Chapter 274, Florida Statutes, regarding tangible personal property owned by local governments, to include all "local governmental entities" as that term is defined in Section 218.31, Florida Statutes.
- Amending Section 403.7125, Florida Statutes, to require that audits of local government escrow accounts, maintained to accumulate financial resources for the proper closing and long-term care of landfills, are properly and consistently conducted in accordance with legislative intent.
- Amending Section 29.0085, Florida Statutes, to require that statutorily required annual statements of county compliance for court-related functions are properly and consistently prepared in accordance with legislative intent.
- Amending Section 218.31, Florida Statutes, to include a definition of the term "financial statements" as used in Section 218.32(1)(h)4., Florida Statutes.

Audit Report Numbers: 2015-037 and 2019-028
Audit Manager: Michael J. Gomez, CPA

- **Transparency Requirements** – The Legislature should consider amending Section 218.39, Florida Statutes, to define "transparency requirements" for local governmental entities or delete from Section 11.45(7)(i), Florida Statutes, the requirement for the Auditor General to list the local governmental entities that have failed to comply with transparency requirements.

Audit Manager: Michael J. Gomez, CPA

Policy Areas: Senate Judiciary
House Judiciary

- **Judicial Agencies** – The Legislature should consider requiring the Justice Administrative Commission and the agencies it administratively supports to employ, or otherwise provide for, an internal auditor with the qualifications and duties prescribed in Section 20.055, Florida Statutes, for State agency directors of auditing.

Audit Report Numbers: 2015-061 and 2020-008
Audit Manager: Michael J. Gomez, CPA

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003010

Policy Areas: Senate Governmental Oversight and Accountability
House State Affairs

- **Audit Efficiency and Effectiveness** – Sections 11.47(3) and (4), Florida Statutes, are critical to ensuring the capability of the Auditor General to successfully complete audits. Section 11.47(3), Florida Statutes, was recently revised to provide that any person that willfully fails or refuses to provide the Auditor General access to an employee, officer, or agent of an entity subject to an audit commits a misdemeanor. Section 11.47(4), Florida Statutes, provides that any officer who willfully fails or refuses to furnish or produce any book, record, paper, document, data, or sufficient information necessary to a proper audit or examination which the Auditor General or the Office of Program Policy Analysis and Government Accountability is by law authorized to perform, shall be subject to removal from office. The Legislature should consider amending Section 11.47(4), Florida Statutes, to:

  - Provide that any person who willfully fails or refuses to provide the Auditor General access to an employee, officer, or agent of an entity subject to an audit shall be subject to removal from office.
  - Designate the specific party, or parties, responsible for removing an officer or person from office for the reasons stated therein.

Deputy Auditor Generals: **Gregory L. Centers, CPA**
Matthew J. Tracy, CPA
Marilyn D. Tenewitz, CPA

AMERICAN OVERSIGHT

WORK PLAN

Types of Engagements

Various statutory provisions provide the framework for the development of our work plan. Pursuant to law, we perform four major types of engagements – financial audits, operational audits, performance audits, and attestation examinations. Descriptions of these major types of engagements are presented below.

Financial Audits Government managers are responsible for the stewardship of financial resources and for preparing financial statements that conform to accounting principles promulgated by the Governmental Accounting Standards Board (GASB). Our audits of various entities' financial statements provide the Legislature, Florida's citizens, investors, bond rating agencies, and other users of the financial statements, independent assurance of the reliability of the financial information provided by government managers. Such independent assurance is given in the form of an opinion on the financial statements and is preceded by the performance of a rigorous examination of the entity's financial records and related representations made by government officials. Professional standards issued by the AICPA and the Comptroller General of the United States in *Government Auditing Standards* govern the nature, timing, and extent of the audit work performed. Under those standards, consideration of information technology internal controls is often an essential and significant part of the financial audit process because public entity operations and business processes are usually dependent on information technology.

Financial audits also may include audit procedures to evaluate an entity's compliance with requirements that could have a direct and material effect on each major Federal awards program administered by the entity and the effectiveness of internal controls established by management to consistently ensure compliance therewith. That is because, as a condition of receiving Federal funds, the United States Office of Management and Budget (OMB) requires a Single Audit of the recipient's financial statements and major Federal awards programs. The audit is referred to as a Single Audit because it is an organizationwide audit that includes, within its scope, work designed to meet the oversight needs of many Federal and pass-through grantors and State accountability officials. The Single Audit is performed in accordance with audit requirements located in Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance), as well as audit requirements prescribed by applicable professional standards issued by the AICPA and the Comptroller General of the United States in *Government Auditing Standards*.

Operational Audits Operational audits evaluate management's performance in establishing and maintaining internal controls, including internal controls designed to prevent and detect fraud, waste, abuse, and noncompliance, and in administering assigned responsibilities in accordance with applicable laws, rules, contracts, grant agreements, and other guidelines. Operational audits examine internal controls, including information technology internal controls, that are designed and placed in operation to promote and encourage the achievement of management's control objectives in the categories of compliance, economic and efficient operations, reliability of financial records and reports, and safeguarding of assets, and identify weaknesses in those internal controls. Operational audits may also

AMERICAN OVERSIGHT FL-SEN-20-0201-B, 20-0202-A-003012

include comparisons of the performance of a program, activity, or function of a governmental entity to specific criteria. Our operational audits include a broad array of areas and are conducted in accordance with applicable *Government Auditing Standards*. The areas included within the scope of operational audits are determined through risk assessment processes that include, among other procedures, inquiries of legislative staff concerning items of concern and interest to the Legislature.

Performance Audits Performance audits examine a program, activity, or function of a governmental entity with respect to issues such as economy, efficiency, and effectiveness of a program; the adequacy of a program to meet the needs identified by the Legislature or governing body; alternative methods of providing program services or products; the accuracy or adequacy of public documents, reports, or requests prepared under a program by the public entity; and compliance of a program with appropriate policies, rules, or laws. Performance audits are conducted in accordance with applicable *Government Auditing Standards*.

Attestation Examinations Attestation examinations consist of obtaining sufficient, appropriate evidence to express an opinion on whether the subject matter of the examination is based on (or in conformity with) specified criteria in all material respects or an assertion is presented (or fairly stated), in all material respects, based on the specified criteria. Examination engagements are conducted in accordance with the *Statements on Standards for Attestation Engagements* issued by the AICPA and applicable *Government Auditing Standards*. For example, our examinations of school district and other entity compliance with State requirements relating to the classification, assignment, and verification of the full-time equivalent student enrollment and student transportation reported under the Florida Education Finance Program are attestation examination engagements.

Work Plan Development Process

In the development of our work plan, we first consider legal requirements establishing the frequency of the audits and other accountability activities we perform. Pursuant to law, we are to conduct annual financial audits of the State of Florida, the State Board of Administration Local Government Surplus Funds Trust Fund (Florida PRIME), the Florida School for the Deaf and the Blind, State universities, State colleges, and school districts in counties with populations of less than 150,000. We are to conduct financial audits of school districts in counties with populations of 150,000 or more every 3 years. In addition, at the direction of the Legislative Auditing Committee, we conduct a financial audit of the Department of the Lottery. We also conduct the annual financial audit of the Florida Retirement System.

For various other audits and accountability activities, a minimum frequency is also established in law. For example, operational audits of each State agency, State university, State college, school district, water management district, the Florida Clerks of Court Operations Corporation, and the Florida School for the Deaf and the Blind are required to be conducted at least every 3 years. In planning for these audits, we obtain information from legislative staff and other sources concerning areas of interest and operational risks. Operational risks are characteristics of government operations that may make a government program more susceptible to instances of fraud, waste, abuse, material reporting errors, or noncompliance with governing requirements. This information is used to develop a risk-based work plan that provides audit coverage of each entity during a 3-year cycle.

AMERICAN OVERSIGHT

2019-20 Work Plan

Our 2019-20 Work Plan encompassed a wide variety of programs, activities, and functions administered by many entities. Some of the unique projects on our 2019-20 Work Plan include operational audits of selected operations of the City of Gainesville, the Commission on Offender Review's caseload management, and county value adjustment boards and Department of Revenue oversight thereof.

An overview of our audits and other accountability activities completed during the period November 1, 2018, through October 31, 2019, begins on page 13 of this Annual Report. A listing of all reports issued during the period November 1, 2018, through October 31, 2019, is included in this report as ***EXHIBIT B***. Additionally, a listing of reports issued or scheduled to be issued subsequent to October 31, 2019, and by March 31, 2020, is included in this report as ***EXHIBIT C***.

Projected 2-Year Work Plan

Section 11.45(7)(h), Florida Statutes, provides, in part, that the Auditor General shall transmit to the President of the Senate, the Speaker of the House of Representatives, and the Legislative Auditing Committee by December 1 of each year a projected 2-year work plan identifying the audits and other accountability activities to be undertaken by the Auditor General. Our ***PROJECTED WORK PLAN*** encompassing the work planned for the 2020-21 and 2021-22 fiscal years is included in this report as ***EXHIBIT A***. As appropriate, modifications to the work plan may be made in response to law changes, legislative requests, and other considerations.

Financial Statements Pursuant to Section 11.45(2)(b), Florida Statutes, and the Federal Single Audit Act, the Auditor General is responsible for the audit of the State of Florida's financial statements, including consideration of compliance with laws of potential material impact on the financial statements. We found that the State of Florida's financial statements for the fiscal year ended June 30, 2018, were presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America. Our independent auditor's report on the financial statements is addressed to the President of the Senate, the Speaker of the House of Representatives, and the Legislative Auditing Committee and was published by the Chief Financial Officer in the State of Florida's *Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 2018*.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003015

Our report on the audit of the State's financial statements included two findings involving internal control over financial reporting that constituted significant deficiencies[1] at two State agencies. One significant deficiency related to improperly recording withdrawals from the State Treasury Investment Pool. The other significant deficiency related to not recording a prior-period adjustment for the correction of an error in previously issued financial statements and not recording a liability. We also noted an additional matter that we reported to management at one State agency pertaining to understating net receivables and unavailable revenue due to an error in the preparation of year-end accrual entries. Our report on internal controls over financial reporting is included in our report, *State of Florida – Compliance and Internal Controls Over Financial Reporting and Federal Awards* (report No. 2019-186).

Separate from our audit of the State of Florida's financial statements, we conducted audits of the financial statements of the Florida Retirement System Pension Plan and Other State-Administered Systems, the State Board of Administration Local Government Surplus Funds Trust Fund (Florida PRIME), the Department of the Lottery (Lottery), and the Florida School for the Deaf and the Blind. In all four audits, we found that the respective financial statements were presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America.

For the Lottery, as required by Section 24.123, Florida Statutes, we also examined internal control over financial reporting as of June 30, 2018, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). We found that the Lottery maintained, in all material respects, effective internal control over financial reporting as of June 30, 2018, based on the established criteria. However, we also noted in our report (report No. 2019-090) two findings involving the need for enhancements to certain Lottery information technology (IT) internal control practices and the need for the Lottery to continue efforts to comply with statutory requirements governing minority retailer participation.

In addition to the audit of the Florida Retirement System Pension Plan and Other State-Administered Systems financial statements, we conducted an audit of the schedules of employer allocations of the Florida Retirement System Pension Plan defined benefit plan and the Retiree Health Insurance Subsidy Program defined benefit plan (System Pension Plans) as of and for the fiscal year ended June 30, 2018, and the related notes. Our audit found that the schedules presented fairly, in all material respects, the employer allocations and the net pension liability, total deferred outflows of resources, total deferred inflows of resources, and total pension expense/(income) for the total of all participating entities for the System Pension Plans as of and for the fiscal year ended June 30, 2018, in accordance with accounting principles generally accepted in the United States of America (report No. 2019-102).

We also conducted an attestation examination of the System Pension Plans schedules of deferred outflows for contributions subsequent to the June 30, 2018, measurement date by employer, as of and for the fiscal year ended June 30, 2019. This examination found that the schedules presented, in all material respects, the deferred outflows for contributions subsequent to the June 30, 2018, measurement date by employer in accordance with applicable GASB statements and applicable provisions of State law (report No. 2020-019).

[1] A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003016

Federal Awards The Single Audit of the State of Florida includes State agencies, State universities, State colleges, judicial branch entities, and various other government entities for which the State is financially accountable. State agencies, State universities, and State colleges administered approximately 532 Federal awards programs or program clusters during the 2017-18 fiscal year. The Federal Single Audit Act directs the auditor to evaluate compliance with requirements applicable to each major program as well as the effectiveness of internal controls established by management to consistently ensure compliance. The results of our Single Audit of the State of Florida for the fiscal year ended June 30, 2018, are described in our report No. 2019-186.

We audited the State's compliance with requirements governing the 21 Federal awards programs or program clusters that we identified as major Federal awards programs for the fiscal year ended June 30, 2018. Expenditures for these major programs comprised approximately 67 percent of the $37.2 billion in total Federal awards expenditures reported by the State for the fiscal year ended June 30, 2018. Our Federal awards audit findings are tabulated by audit area in Table 1 and briefly summarized in the following paragraphs.

Table 1
Tabulation of State of Florida
Federal Awards Audit Findings by Audit Area

Audit Area	Number of Findings	Number of State Entities
Cash Management	1	1
Child Support Enforcement Administration	1	1
Eligibility and Claims Payments	1	1
Expenditures and Supporting Documentation	1	1
Information Technology Internal Controls	9	8
Medicaid Program Administration	4	2
Noncompliance with Statutory Requirements	4	3
Subawards and Monitoring	5	3
Unemployment Benefits and Tax Administration	5	2

We found that the State agencies materially complied with requirements governing major Federal awards programs, except with respect to compliance with certain requirements for 11 programs administered by 5 State agencies, as subsequently described:

- For National Guard Military Operations and Maintenance Projects, the Department of Military Affairs could not demonstrate compliance with certain Federal procurement and suspension and debarment requirements. These instances of noncompliance resulted in an opinion qualification.
- For Unemployment Insurance, the Department of Economic Opportunity did not always maintain adequate benefit eligibility and case investigation records. These instances of noncompliance resulted in opinion qualifications. Additionally, for Unemployment Insurance, we were unable to express, and did not express, an opinion on the Department of Economic Opportunity's compliance with reporting and benefits overpayments requirements because the Department could not provide accurate data or demonstrate that reported overpayment amounts on Federal Financial Reports were accurate.

AMERICAN OVERSIGHT

- For the Federal Family Education Loans Program, we were unable to express, and did not express, an opinion on the Department of Education's compliance with certain requirements because the Department did not provide documentation demonstrating compliance with requirements for the assignment of defaulted loans and the correct handling of loans that were sold.
- Department of Children and Families expenditures charged to the following Federal programs were not always incurred during the authorized period of performance, which resulted in an opinion qualification.
    - State Administrative Matching Grants for the Supplemental Nutrition Assistance Program
    - Temporary Assistance for Needy Families
    - Refugee and Entrant Assistance/Replacement Designee Administered Programs
    - Social Services Block Grant
    - Medical Assistance Program
    - Block Grants for Community Mental Health Services
    - Block Grants for Prevention and Treatment of Substance Abuse
- For the Temporary Assistance for Needy Families Cluster, the Department of Children and Families did not always review and process Income Eligibility and Verification System data exchange responses, which resulted in an opinion qualification.
- For Disaster Grants – Public Assistance (Presidentially Declared Disasters), the Division of Emergency Management did not always maintain documentation to support costs charged to the Disaster Grants program, did not verify that all applicable subrecipients were audited, did not evaluate subrecipient risk of noncompliance or develop an appropriate monitoring plan, and did not obtain required reports from some subrecipients. These instances of noncompliance resulted in opinion qualifications.

We also reported material weaknesses in internal control over compliance[2] for each of these 11 programs as well as an additional material weakness for National Guard Military Operations and Maintenance Projects, as Department of Military Affairs records did not evidence that access to the Integrated Emergency Operations Management System was granted only to authorized users or that the access privileges granted were appropriate.

Other instances of noncompliance, deficiencies in internal control over compliance,[3] or questioned costs were found at 11 State agencies and 1 State university. Questioned costs include costs of goods or services charged to one or more Federal awards programs that are not allowed under the applicable grant terms, not clearly supportive of the program's purposes, not documented in the manner prescribed by applicable Federal cost principles or State policies, or not incurred during the grant period. Such costs are subject to adjustment or disallowance by Federal grantor officials.

[2] A material weakness in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a Federal program will not be prevented, or detected and corrected, on a timely basis.

[3] A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a Federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

FL-SEN-20-0201-B, 20-0202-A-003018

Operational Audits During the period November 1, 2018, through October 31, 2019, we issued 23 operational audit reports and 1 performance audit report on State governmental entities. Our reports addressed a broad array of programs, activities, and functions including:

- Internal management, financial, and operational controls and processes.
- Administration of private investigator, security officer, recovery agent, and concealed weapon licenses by the Department of Agriculture and Consumer Services.
- The Department of Legal Affairs Medicaid Fraud Control Unit and selected administrative activities.
- Oversight and administration of foster care programs and related services by the Department of Children and Families and selected Community-Based Care Lead Agencies and the oversight and administration of substance abuse and mental health services by the Department and selected Behavioral Health Managing Entities.
- Administration of Triumph Gulf Coast, Inc. project and program awards and selected administrative activities.
- Community supervision by and selected administrative activities of the Department of Corrections.
- Advertising and sponsorship by the Department of the Lottery and selected administrative activities.
- Administration of iBudget Florida by the Agency for Persons with Disabilities.
- Public Assistance Program management by the Division of Emergency Management.
- The Right-of-Way Relocation Assistance Program administered by the Department of Transportation.

Many of our operational audit findings pertained to weaknesses in internal controls. Internal controls are those processes put in place by entity management to prevent and detect fraud, waste, abuse, and noncompliance and to provide reasonable assurance that financial reports are reliable, operations are economical and efficient, applicable laws are followed, and assets are safeguarded against loss. In short, effective internal controls prevent adverse events from happening and detect them when they do. Our operational audit findings are tabulated by audit area in Table 2.

AMERICAN OVERSIGHT

The results of several of our operational audits issued during the period November 1, 2018, through October 31, 2019, are summarized below.

- **Department of Agriculture and Consumer Services – Administration of Private Investigator, Security Officer, Recovery Agent, and Concealed Weapon Licenses and Prior Audit Follow-Up (Report No. 2019-064).** Our operational audit of the Department of Agriculture and Consumer Services (DACS) focused on the administration of private investigator, security officer, recovery agent, and concealed weapon licenses. Our audit disclosed that DACS controls for processing concealed weapon license applications and overseeing the licensing process were not always adequate or effectively implemented. Additionally, data publicly reported by the DACS was not always complete or accurate and applicants for various licenses were not always timely notified of application errors and omissions. Also, the DACS had not established time frames for completing investigations of complaints related to individuals advertising as providing private security and investigative services or recovery activities. Similarly, the DACS had not established time frames for reviewing disqualifying information for persons currently holding licenses. Our audit also found that DACS controls for quality assurance reviews, timely deposit of license fees and reimbursement of overpayments, and employee background screenings needed improvement. We also noted that various DACS information technology controls, timber sale proceed transfer controls, and selected inspection program controls needed enhancement.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003020

- **Department of Legal Affairs – Medicaid Fraud Control Unit, Selected Administrative Activities, and Prior Audit Follow-Up (Report No. 2019-097).** The Department of Legal Affairs (DLA) is responsible for operating the State's Medicaid Fraud Control Unit (MFCU), as well as administering programs to assist victims of crime. Our audit found that the DLA did not always properly conduct or document annual MFCU evidence room inventories in accordance with established policies and procedures. We also found that DLA change management controls needed enhancement to ensure that the responsibilities for Case Management Database modifications are appropriately separated and that DLA records evidence the entire change management process. In addition, we found that the information necessary to process crime victims' applications for compensation was not always complete or did not agree with the applicable supporting documentation and the DLA did not always ensure that annual victim assistance grant program monitoring reports and supporting documentation were timely reviewed and approved. Similar findings were noted in prior audit reports. Our audit also disclosed that the DLA did not always timely deactivate user access privileges to the Florida Accounting Information Resource Subsystem upon an employee's separation from DLA employment or timely or accurately record tangible personal property acquisitions in DLA property records.

- **Department of Children and Families – Oversight and Administration of Community-Based Care Lead Agencies and Behavioral Health Managing Entities and Selected Department Administrative Activities (Report No. 2019-111).** Our audit focused on the oversight and administration of foster care programs and related services administered by the Department of Children and Families (DCF) and selected Community-Based Care Lead Agencies (CBCs) and the oversight and administration of substance abuse and mental health services by the DCF and selected Behavioral Health Managing Entities (MEs). Our audit found that DCF monitoring of the CBCs and MEs continued to need improvement. We also found that DCF protocols for administering the CBC risk pool needed enhancement to ensure that unexpended funds are returned to the DCF at fiscal year-end. We noted that various Florida Safe Families Network (FSFN) and Substance Abuse and Mental Health Information System (SAMHIS) controls and processes need enhancement to ensure that data is timely and accurately entered and to ensure access privileges are appropriate and timely deactivated.

  Our audit further found that CBC and ME subaward and monitoring controls needed improvement, some CBC contract payments were not supported by adequate documentation or made in accordance with contract terms, certain other payments, including the payment of bonuses by one CBC, and uses of leave by some CBCs and MEs, were not always properly supported or justified. Additionally, some CBC and ME property management controls and records were not always adequate to ensure proper accountability over property purchased with DCF-provided funds. For one CBC, we noted that the CBC's records did not evidence the reasonableness of the $1.175 million purchase price for certain acquired property, the value of property subsequently returned to the seller, or that the CBC refunded to the State the appropriate share of the State's investment in the property. We also noted issues regarding certain DCF administrative activities, including purchasing cards, designation of work headquarters, data sanitization, collection and use of social security numbers, telework by employees, protection of child welfare data, and access to program data.

- **Department of the Lottery – Advertising and Sponsorship and Selected Administrative Activities (Report No. 2020-11).** Our audit of the Department of the Lottery (DOL) focused on DOL advertising and sponsorship and selected administrative activities. Our audit disclosed that DOL records did not always evidence adequate monitoring of advertising agency contracts. Our audit also found that DOL procedures for reconciling advertising agency subcontractor payments to vendor payment history records and DOL invoice payment controls need enhancement to, among to other things, ensure that sponsorship agreement payments are made in accordance with contract terms and conditions. We also found that the DOL did not always timely cancel purchasing cards upon a cardholder's separation from DOL employment.

AMERICAN OVERSIGHT

- **Department of Corrections – Community Supervision, Selected Administrative Activities, and Prior Audit Follow-Up (Report No. 2020-006).** The Department of Corrections (DOC) is responsible for supervising offenders released on probation or community control (community supervision). Our audit disclosed that DOC controls for administering drug and alcohol tests at probation offices needed enhancement. Our audit also disclosed that DOC records did not always evidence that State and Federal background checks were completed for correctional probation officers or their firearms, DOC controls needed enhancement to ensure that all probation officer field safety equipment is accounted for, and that the DOC did not always ensure that records were maintained for offenders released on community supervision or that the records maintained included the information specified by State law. We further noted that DOC controls over the intake, orientation, and case review of offenders released on community supervision, controls for offender supervision, and for the electronic monitoring of offenders, needed improvement. In addition, we found that the DOC utilized an internal budgetary redistribution process that sometimes bypassed the statutory approval process for budget transfers, the DOC did not always obtain and adequately document prior authorization and justification for overtime worked by correctional officers, and DOC records did not always accurately reflect motor vehicle usage and fuel cost information.

A listing of all State Government audit and attestation reports issued during the period November 1, 2018, through October 31, 2019, is included in EXHIBIT B of this Annual Report.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003022

EDUCATIONAL ENTITIES

Pursuant to law, the Auditor General has extensive audit responsibilities involving educational entities, including school districts, State universities, and State colleges. These responsibilities include audits of:

- Financial statements.
- Compliance with requirements of Federal awards.
- Selected operations.

We also perform examinations of school district and other entity compliance with State requirements relating to the classification, assignment, and verification of the full-time equivalent (FTE) student enrollment and student transportation reported under the Florida Education Finance Program. An overview of our audit activities is included on the following pages.

SCHOOL DISTRICTS 22

Total revenues upon which financial statement opinions were rendered	$10.5 billion
Total Federal awards expenditures for major programs audited	$399.8 million
Number of audit reports issued	
Financial and Federal Awards	46
Financial	1
Operational	30
Total number of audit reports issued	77
Number of audit findings	231
Number of findings identifying potential opportunities for cost recovery, savings, or loss avoidance	86
Total amount identified for cost recovery, savings, or loss avoidance	$19.8 million

Financial Statements We audited the financial statements of 47 school districts for the fiscal year ended June 30, 2018. We found that the school districts' financial statements were presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America. We reported conditions involving internal control, including significant deficiencies[4] at 20 school districts. The significant deficiencies related to financial reporting procedures, inappropriate or unnecessary information technology access privileges, and inadequate separation of duties.

Federal Awards In conjunction with our financial audits of the school districts, for 46 of the school districts,[5] we examined compliance with Federal laws, regulations, and the terms and conditions for school district major Federal awards programs. Pursuant to the Federal Single Audit Act, the auditor is to express an opinion on compliance for each school district major Federal awards program and test and report on internal controls over compliance in accordance with Uniform Guidance. The number of

[4] A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

[5] The Jefferson County K-12, A Somerset School, is a combination of the three charter schools that operate all Jefferson County School District schools and administer the District Federal programs. Consequently, Jefferson County School District was not required to obtain, and did not obtain, a Federal awards audit.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003024

major Federal awards programs ranged from one to four at the 46 school districts we audited. In summary, our Federal Single Audits at the school districts disclosed that:

- 1 school district did not comply with indirect cost rate requirements considered material to the Child Nutrition Cluster, a major Federal awards program, resulting in a finding of noncompliance and material weakness[6] in internal control over the program, a qualified opinion on the program, and questioned costs[7] totaling $274,284.
- 2 school districts did not comply with Federal awards requirements for the Title I Program, a nonmajor Federal awards program, which resulted in $276,604 in questioned costs.

Operational Audits During the period November 1, 2018, through October 31, 2019, we issued operational audit reports for 30 school districts and considered the school districts' performance with respect to a variety of areas including internal control systems and compliance with specific laws and General Appropriations Act provisos. For example, our operational audits evaluated processes relating to procurement and construction practices, monitoring charter schools, personnel compensation and payroll administration, information technology, adult general education enrollment reporting to the Department of Education, school safety, and the use of ad valorem tax levy proceeds and other capital outlay funds.

[6] A material weakness in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a Federal program will not be prevented, or detected and corrected, on a timely basis.

[7] Questioned costs include costs of goods or services charged to one or more Federal awards programs that are not allowed under the applicable grant terms, not clearly supportive of the program's purposes, not documented in the manner prescribed by applicable Federal cost principles or State or school district policies, or not incurred during the grant period. If the applicable grantor disallows questioned costs, a school district may have to repay the costs from non Federal sources.

AMERICAN OVERSIGHT

Our operational audit findings are tabulated in Table 3 by audit area along with the financial and Federal awards audit findings. For several audit areas, similar findings were noted at multiple school districts.

Table 3
Tabulation of School District Audit Findings by Audit Area

Audit Area	Number of Findings	Number of Districts
Ad Valorem Tax Program and Capital Outlay	5	5
Adult General Education Enrollment Reporting	8	8
Capital Assets, Equipment, and Inventory	2	2
Cash and Cash Collections	3	3
Charter Schools	7	5
Construction and Related Activities	20	6
Control Environment – Separation of Incompatible Duties	1	1
Direct-Support Organization	3	3
Expenditures and Disbursements	1	1
Facilities	1	1
Federal Awards	3	3
Financial Management and Budgetary Internal Controls	13	11
Financial Reporting	5	5
Food Service Operations	1	1
Information Technology Internal Controls	61	34
Insurance	13	12
Personnel and Payroll	59	27
Purchasing Practices and Contractual Services	21	16
School Safety	2	2
Sexual Predator and Sexual Offender Registry Notification	1	1
Transportation Administration	1	1

The findings we noted for some of the audit areas are briefly described below.

- **Information Technology Internal Controls** – For 34 school districts, we reported that enhancements were needed regarding information technology (IT) internal controls for financial and related systems. For example, enhancements were needed for restricting IT access privileges to only what is needed by the user to perform assigned job duties, reviewing certain IT access privileges to promote the timely detection of inappropriate or unnecessary privileges, and timely deactivating the IT access privileges of former employees. Some of the inappropriate or unnecessary privileges noted increased the risk that unauthorized disclosure of sensitive personal student or employee information, including student and employee social security numbers, may occur. We also noted that school districts could enhance internal controls over IT by improving user authentication internal controls, as well as logging and monitoring significant system and network activity. Other needed enhancements involved developing effective internal controls to address management's security-related responsibilities, including security awareness training, risk assessment, data loss prevention, and disaster recovery.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003026

- **Personnel and Payroll** – Our audits disclosed that 27 school districts needed to enhance internal controls over the administration of personnel and payroll. For example, we noted Florida Best and Brightest Teacher Scholarship Program (Program) awards to ineligible recipients, inadequate records to support recipient eligibility, and the payment of employer payroll taxes for the Program from non-Program resources without Board approval. We also noted that employee, contractor worker, and volunteer background screenings and salary schedules did not always comply with State law; payments to employees did not always reconcile to Board-approved salary schedules; certain employment agreements included severance pay provisions that did not appear to be consistent with State law; and procedural enhancements were needed to prevent salary overpayments. In addition, performance assessments were not always performed in accordance with State law. Amounts identified for cost recovery, savings, or loss avoidance related to the personnel and payroll audit findings ranged from $800 to $881,000.

- **Purchasing Practices and Contractual Services** – Our audits disclosed that 16 school districts needed to enhance internal controls over purchasing practices and contractual services. For example, we noted enhancements were needed in internal controls over purchasing card programs and the procurement and administration of contractual service agreements and related payments. At 1 school district, we noted that the Board did not make a documented determination that the best option for upgrading the school district phone system was to use District personnel working overtime, rather than competitively selecting or directly negotiating with a service provider. At another school district, we noted that procedures for procuring an enterprise planning system were not effective to ensure the timely and successful implementation of the system.

- **Insurance** – At 12 school districts, we reported that internal controls over insurance activities could be improved. Examples of internal control deficiencies included the lack of a competitive selection process when procuring insurance and the lack of procedures to ensure that the dependents of employees and retirees were eligible to participate in the school district health insurance plan.

- **Financial Management and Budgetary Internal Controls** – For 11 school districts, we noted that enhancements were needed in internal controls over financial management and budgetary internal controls. For example, we reported financial management issues, including the lack of timely, monthly financial reports being provided to the Board; budgetary control and transparency issues, such as expenditures exceeding budgetary amounts at some school districts; and a lack of school district accountability over school internal funds.

A listing of all school district audit reports issued during the period November 1, 2018, through October 31, 2019, is included in EXHIBIT B of this Annual Report.

AMERICAN OVERSIGHT

FLORIDA EDUCATION FINANCE PROGRAM

Florida Education Finance Program
Full-Time Equivalent Student Enrollment
and Student Transportation
Examination Impact Measures

Total FTE Student Enrollment reported upon which compliance opinions were rendered	1,002,891
Total FTE Student Enrollment funding for entities examined	$3.1 billion
Total Student Transportation funding for entities examined	$164 million
Number of compliance examination reports issued for School Districts	22
Number of reports disclosing material noncompliance	22

Florida Education Finance Program (FEFP) funding, including Student Transportation funding (net of local school district funding) for the 2016-17 and 2017-18 fiscal years totaled approximately $8.1 billion and $8.4 billion, respectively. During the period November 1, 2018, through October 31, 2019, we completed examinations of the records of 11 school districts for the fiscal year ended June 30, 2017, and 11 school districts for the fiscal year ended June 30, 2018. These examinations were conducted to evaluate compliance with State requirements relating to the classification, assignment, and verification of the full-time equivalent (FTE) student enrollment, including teacher certification, and student transportation as reported under the FEFP.

Our examinations disclosed that, except for the material noncompliance noted in certain FEFP programs, the 22 school districts complied with State requirements. Generally, we considered noncompliance to be material when error rates equaled or exceeded 10 percent of the test population for one or more funded programs. Table 4 summarizes the areas of material noncompliance noted in our reports.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003028

Table 4
Tabulation of Entities with FEFP FTE Student Enrollment and Student Transportation Findings by Material Noncompliance Area

Material Noncompliance Area	Number of Districts
Preparation and Maintenance of Student Records	21
Teacher Qualifications	10
Ridership Classification and Funding Eligibility of Transported Students	15

As shown in Table 4, the most common area of material noncompliance pertained to the preparation and maintenance of student records. For example, our examinations disclosed reporting errors or student records that were not properly or accurately prepared or were not available at the time of our examination and could not be subsequently located. We also noted instances in which teachers did not meet State certification requirements, teachers' out-of-field assignments were not approved by the school board, parents were not notified regarding teachers' out-of-field status, teachers did not earn college credits toward certification in out-of-field areas, and teachers did not earn the required in-service training points in English for Speakers of Other Languages strategies. The material noncompliance we noted related to student transportation involved students' reported ridership classification or eligibility for State transportation funding.

The Department of Education is responsible for resolving the adjustments proposed in our examination reports and computing the financial impact of such proposed adjustments for application against the school districts' current or future funding. School districts are permitted to request informal conferences with the Department of Education to appeal the examinations' proposed adjustments. The resulting informal conference panels' recommendations are presented to the Commissioner of Education for acceptance.

A listing of all FEFP FTE Student Enrollment and Student Transportation attestation examination reports issued during the period November 1, 2018, through October 31, 2019, is included in EXHIBIT B of this Annual Report.

AMERICAN OVERSIGHT

STATE UNIVERSITIES AND STATE COLLEGES

State Universities and State Colleges
Audit Impact Measures

Total asset values upon which financial statement opinions were rendered	$34.4 billion
Total revenues upon which financial statement opinions were rendered	$18.7 billion
Number of audit reports issued	
Financial	40
Operational	22
Total number of audit reports issued	62
Number of audit findings	98
Number of findings identifying potential opportunities for cost recovery, savings, or loss avoidance	51
Total amount identified for cost recovery, savings, or loss avoidance	$29.1 million

Financial Statements During the period November 1, 2018, through October 31, 2019, we completed audits of the financial statements of 12 State universities and 28 State colleges for the fiscal year ended June 30, 2018. We found that the State universities and State colleges presented fairly, in all material respects, the financial statements for the applicable fiscal years in accordance with accounting principles generally accepted in the United States of America. However, we reported a material weakness[8] and material noncompliance[9] at one State university, the University of Central Florida (UCF). We also noted significant deficiencies at 2 State colleges (Northwest Florida State College and Lake-Sumter State College). The material weakness and material noncompliance at UCF related to controls that were ineffective to prevent, or timely detect and correct, the unallowable use of $29.1 million in Education and General appropriation carryforward funds for construction activities, contrary to Legislative directives. UCF also misreported the funding source for this construction in the capital outlay budget for the 2015-16 through 2018-19 fiscal years. The significant deficiencies at the State colleges pertained to inadequate financial reporting procedures and a lack of timely and complete bank reconciliations.

[8] A material weakness is a deficiency, or a combination of deficiencies, in internal controls such that there is a reasonable possibility that a material misstatement of the financial statements will not be prevented, or detected and corrected, on a timely basis.

[9] Material noncompliance is noncompliance with provisions of laws, regulations, contracts, or grant agreements that has a material effect on the financial statements.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003030

Federal Awards We audited the Federal awards program expenditures of the State universities and State colleges as part of our Single Audit of the State of Florida. A description of our Single Audit of the State of Florida begins on page 15.

Operational Audits During the period November 1, 2018, through October 31, 2019, we issued operational audit reports for 6 State universities and 16 State colleges. Our operational audits focused on several areas involving board oversight, such as policies regarding the use of State university or State college property, facilities, and services by direct-support organizations, as well as employment agreements and compensation. Our audits also evaluated internal controls over numerous operational areas and compliance with applicable Florida statutes and other requirements. For example, we tested selected information technology internal controls, the assessment and use of tuition fees, internal controls over the administration of construction contracts, procurement practices, textbook affordability, and internal controls over the administration of payroll and personnel.

Our operational audit findings and the financial audit findings are tabulated in Table 5 by audit area.

Table 5
Tabulation of State University and State College Audit Findings by Audit Area

Audit Area	Number of Findings	Number of Institutions
Adult General Education Enrollment Reporting	4	4
Auxiliary Enterprises	1	1
Board Policies and Actions	1	1
Cash and Cash Collections	5	5
Construction and Related Activities	13	5
Direct-Support Organizations	18	17
Distance Learning	2	2
Expenditures and Disbursements	1	1
Financial Management	8	7
Information Technology Internal Controls	18	12
Investments	2	1
Personnel and Payroll	10	10
Purchasing Practices and Contractual Services	5	4
Reporting to State Oversight Officials	1	1
Sexual Predator and Sexual Offender Registry Notification	1	1
Textbook Affordability	8	8

Some findings we noted at several State universities or State colleges are summarized below.

- **Direct-Support Organizations** – For 17 institutions, we reported that policies and records supporting institution property, facilities, and personal services used by direct-support

AMERICAN OVERSIGHT

organizations could be improved. We also noted that 1 of these institutions leased land and facilities from its direct-support organization, without documenting an apparent public purpose as the facilities remained unoccupied for the period that lease payments were made.

- **Information Technology Internal Controls** – For 12 institutions, we reported that information technology (IT) internal controls enhancements were needed for financial and related systems. Needed enhancements involved restricting IT access privileges to only those needed to perform assigned job duties and developing procedures to timely evaluate access privileges. We noted an increased risk of unauthorized disclosure of prospective, former, and current students' social security numbers due to these inadequate access controls. We also noted instances in which institutions did not timely deactivate access privileges for former employees. Examples of other internal control deficiencies noted include the lack of a security awareness program, the lack of an IT risk assessment, and a need for security controls related to user authentication.

- **Personnel and Payroll** – Ten institutions needed to improve the administration of personnel and payroll functions. For example, we noted instances in which institutions made severance and terminal leave payments that exceeded the limits established in State law. We also noted that several institutions needed to implement procedures to ensure that certain employees reported time worked and supervisory approval of the time worked was documented. Two institutions did not document the reasonableness of President Emeritus compensation. Amounts identified for cost recovery, savings, or loss avoidance related to the personnel and payroll audit findings totaled $15,698.

- **Textbook Affordability** – Eight institutions needed to improve textbook affordability policies and procedures. For example, we noted that certain institutions did not timely post textbook information to the institutions' Web sites and to the institutions' course registration system and did not maintain records to document the dates the required textbook information was posted. We also noted instances in which institutions needed to implement or enhance procedures to help ensure that textbooks are available to students at the best prices available.

- **Financial Management** – Other than the material weakness and material noncompliance finding discussed in the **Financial Statements** section on page 28, six institutions needed to enhance internal controls over financial management. Several institutions needed to enhance procedures related to student receivables. We also noted that the intercollegiate athletic programs at two institutions were not self-supporting and continued to experience cash deficits.

A listing of all State university and State college audit reports issued during the period November 1, 2018, through October 31, 2019, is included in EXHIBIT B of this Annual Report.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003032

INFORMATION TECHNOLOGY

INFORMATION TECHNOLOGY AUDITS

Public entities rely on information technology (IT) to record, process, maintain, and report essential financial and program information necessary to achieve their missions and business objectives. The widespread use of IT, without proper safeguards, can lead to vulnerabilities that allow the introduction of errors by employees in their daily work processes and actions by persons with malicious intentions. As such, IT internal controls are a critical component of public entity internal control systems and public entity management has an important stewardship responsibility for establishing effective IT internal controls. Such controls should reasonably assure the achievement of management's control objectives, including, in particular, assuring the confidentiality, integrity, and availability of data and IT resources. The absence of effective IT internal controls can result in significant risks to public entity operations and assets, such as the risk of unauthorized or erroneous disclosure, modification, or destruction of financial or sensitive information and IT resources.

The Auditor General evaluates the effectiveness of internal controls over IT in financial audits and operational audits. Consideration of IT internal controls is an essential and significant part of the audit process in these audits because public entity business processes that are relevant to the audit objectives are usually dependent on IT. The Auditor General also conducts IT operational audits of significant IT systems, processes, and controls.

State Agencies and Related Entities We issued six IT operational audit reports for State agencies and related entities during the period November 1, 2018, through October 31, 2019. These audits evaluated critical or complex systems, processes, or controls at six State agencies. These systems, processes, and controls included:

- The Florida Public Assistance System (FloridaPA.org) – a Web-based portal used by the Division of Emergency Management to manage the Disaster – Grants Florida Public Assistance programs relating to disaster relief and recovery.
- The Florida Accounting Information Resource Subsystem (FLAIR) – the State of Florida's accounting system that maintains State agency accounting and State budget control records and processes the State's payroll.
- The System for Unified Taxation (SUNTAX) – the tax administration and accounting system used by the Department of Revenue.
- The Reemployment Assistance Claims and Benefits Information System – a Web-based claims management system used by the Department of Economic Opportunity for all Reemployment Assistance Program functions.
- Selected IT general and application controls applicable to the Integrated Retirement Information System (IRIS) used by the Division of Retirement within the Department of Management Services to support the functions required to provide retirement services.
- Selected IT general controls at the Agency for Persons with Disabilities.

Educational and Related Entities During the period November 1, 2018, through October 31, 2019, we issued five IT operational audit reports for educational entities, including two State universities, one State college, and two school districts. These audits evaluated:

AMERICAN OVERSIGHT

- Selected IT internal controls at the Florida Polytechnic University applicable to Workday® Enterprise Cloud Applications, including the contractual relationship with Workday, Inc. as the provider for the University's Workday® Software as a Service subscription.
- Selected IT internal controls at the University of Florida applicable to the Oracle PeopleSoft Applications.
- Selected IT internal controls at the Charlotte County District School Board applicable to the Focus Student Information System (Focus) and the infrastructure supporting Focus.
- Selected IT internal controls at the Broward College applicable to Workday® Enterprise Cloud Applications, including the contractual relationship with Workday, Inc. as the provider for the College's Workday® Software as a Service subscription.
- Selected IT internal controls at the Seminole County District School Board applicable to the Oracle PeopleSoft Applications (PeopleSoft) and the Skyward Student Information System (Skyward) and the infrastructure supporting PeopleSoft and Skyward.

Our IT operational audit report findings primarily pertained to internal controls underlying the overarching principles for data integrity, data confidentiality, and data or IT resource availability and are tabulated by control area in Table 6. We noted findings related to general controls as well as business process application controls.

Table 6
Tabulation of Information Technology
Operational Audit Findings by Control Area

Control Area	Number of Findings	Number of Entities
Business Process Application Controls:		
Application-Level General	24	8
Configuration Management	6	2
Security Management	3	2
Business Process	3	1
Data Management System	1	1
General Controls:		
Security Management	14	8
Access	6	5
Configuration Management	1	1

Some of the common findings related to:

- Excessive or unnecessary user access privileges.
- Untimely removal of user access privileges.
- Lack of appropriate access authorization documentation for system users.
- Insufficient review of the appropriateness of user access privileges.
- Lack of retention of access control records related to the deactivation of access privileges.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003034

- Lack of timely security awareness training for employees.
- Lack of a comprehensive policy for the performance of background screenings for employees and contracted consultants.
- Inadequate mobile device management security controls.
- Inadequate data quality controls.
- Inadequate controls over change management.

To avoid the possibility of compromising entity data and IT resources, we did not disclose in the public reports the specific details of certain sensitive matters we noted for 10 of the 11 entities discussed in this section. Specific details of these matters, included in a total of 38 findings, were separately communicated to applicable entity management. These matters involved security control deficiencies relating to various topics such as logical access, user authentication, logging and monitoring, physical security of data, configuration management, account management, and vulnerability management.

ANALYTICAL AND AUTOMATED PROCEDURES AND AUDIT APPLICATIONS

In addition to IT operational audits, extensive IT support is provided to the Auditor General's financial and operational audit and attestation examination engagements through computer assisted audit techniques (CAATs) services. Such services are focused, allow for extensive data analysis in an efficient manner, and are accomplished by obtaining detailed information that can be used to prepare reconciliations, summaries, samples of detailed transactions, and range reports for our professional audit staff. CAATs services also include a variety of data queries and other data analyses that can identify unexpected or unexplained patterns that may be indicative of fraud. With the volume of data continuously growing, the use of CAATs allows increased audit coverage, more thorough and consistent analysis of data, and reduced audit risk.

In addition, custom computer application systems are maintained by IT support staff to support numerous audit activities. Examples include applications for our electronic audit working papers that document the audit work performed, for analyzing and compiling financial statement adjustments, and for support of our reviews of local government, school district, and charter school audit reports prepared by other independent certified public accountants.

A listing of all IT operational audit reports issued during the period November 1, 2018, through October 31, 2019, is included in EXHIBIT B of this Annual Report.

AMERICAN OVERSIGHT

OTHER AUDITS AND ACCOUNTABILITY ACTIVITIES

LOCAL GOVERNMENT AUDITS

Pursuant to Section 11.45(2)(j), Florida Statutes, we audit local governmental entities when determined to be necessary by the Auditor General, when directed by the Legislative Auditing Committee or the Legislature, or when otherwise required by law. During the period November 1, 2018, through October 31, 2019, we issued reports on two operational audits directed by the Legislative Auditing Committee and Legislature; reports on two operational audits of water management districts, pursuant to Section 11.45(2)(f), Florida Statutes; and reports on follow-up procedures we performed pursuant to Section 11.45(2)(j), Florida Statutes, for two operational audits of local governmental entities.

City of Opa-Locka and Opa-Locka Community Redevelopment Agency (CRA) Our operational audit report No. 2019-221 disclosed a pervasive lack of adequate controls necessary to promote and encourage compliance with applicable State laws, City ordinances and regulations, contracts, grant agreements, and other applicable guidelines; economic and efficient operations; reliability of records and reports; and the safeguarding of assets. Our audit also disclosed numerous instances of potential fraud, waste, and abuse. For some of our findings, the amount of resources lost due to noncompliance or inadequate accountability was not quantifiable; however, we identified questioned costs or potential avoidable losses totaling nearly $5 million, collectively, for the City and the CRA. Findings addressed:

- Deteriorating financial conditions.
- Inadequate administration and management of City operations, including the need for enhancements to controls for reporting known or suspected fraud and over the budgetary process.
- Lack of accountability for resources.
- Lack of adequate controls over cash, capital assets, motor vehicles, long-term debt, revenues and travel.
- Numerous control deficiencies related to payroll and personnel administration.
- Significant issues regarding procurement and contracting for goods and services, including instances where competitive selection processes were not used.
- Inadequate controls over the maintenance of public records.
- Significant issues and deficiencies relative to the creation, administration, funding, and oversight of the Opa-Locka CRA.

East Flagler Mosquito Control District The findings in our operational report No. 2019-112 of the District included:

- Lack of adequate policies and procedures regarding construction projects, including competitive selection of architectural services, evaluating suitability of proposed construction sites, retaining critical documents, assessing damages for construction delays, and monitoring project change orders.
- Lack of records evidencing that an architectural firm maintained the contractually required professional liability insurance coverage.

AMERICAN OVERSIGHT FL-SEN-20-0201-B, 20-0202-A-003036

- Lack of formal financial policies addressing the budget development and management process, which contributed to a significant overstatement of initial available balances, failure to post budget amendments to the District's Web site as required by law, and a lack of clarity in budget reports.
- Lack of policies and procedures establishing minimum unrestricted fund balances for the District's General Fund and lack of anti-fraud policies or procedures.

St. Johns River Water Management District The findings in our operational audit report No. 2019-079 disclosed that:

- Records did not always demonstrate the District inspector general complied with applicable statutory requirements.
- The most appropriate and statutorily-required competitive procurement practices were not always used in the District's acquisition of design-build services and for construction projects.
- There was no documentation showing Board approval to waive a closing contingency provision that became applicable during an acquisition of land for conservation purposes.

Northwest Florida Water Management District The findings in our operational audit report No. 2019-050 disclosed that:

- District policies and procedures for the disposal of tangible personal property could be improved.
- District motor vehicle logs did not always document supervisory review and approval to confirm the propriety of vehicle use.
- District vehicle maintenance and repair expenditures were not always recorded in the vehicle management system, which is used to monitor expenditures for each vehicle.

Follow-Up Procedures Section 11.45(2)(j), Florida Statutes, requires the Auditor General to, no later than 18 months after the release of a report on the audit of a local governmental entity, perform such appropriate follow-up procedures as deemed necessary to determine the audited entity's progress in addressing the findings contained within our previous report. We performed audits to determine the extent to which the following entities had corrected, or were in the process of correcting, findings disclosed in our previous reports.

- **City of Archer** - Our follow-up audit report No. 2019-088 disclosed that, of the 14 findings and recommendations contained in our report No. 2016-197, the City's actions corrected 5 findings, partially corrected 7 findings, and did not correct 2 findings.
- **City of Palatka and Palatka Downtown Redevelopment Agency** - Our follow-up audit report No. 2019-214 disclosed that, of the 5 findings and recommendations contained in our report No. 2017-107, the City and Downtown Redevelopment Agency's actions corrected 3 findings and partially corrected 2 findings.

AMERICAN OVERSIGHT

SCHOLARSHIP FUNDING ORGANIZATIONS

Pursuant to Sections 11.45(2)(l), 1002.385(14)(a), and 1002.40(12), Florida Statutes, we conduct annual operational audits of the accounts and records of eligible nonprofit scholarship-funding organizations participating in a State-sponsored scholarship program authorized by Chapter 1002, Florida Statutes.

AAA Scholarship Foundation – FL, LLC In our operational audit report Nos. 2019-179 and 2020-025, we noted that the Foundation generally complied with the applicable provisions governing the Florida Tax Credit Scholarship and Gardiner Scholarship Programs.

Step Up For Students, Inc. The findings in our operational audit report No. 2020-020 disclosed that:

- Household income of Florida Tax Credit Program scholarship applicants was not always properly evaluated to ensure that scholarships were awarded only to eligible students. Additionally, the Florida Department of Education was not consulted to ensure prior scholarship award eligibility errors were satisfactorily resolved.
- Procedures did not require and ensure that exempt employees maintained records of time worked or require supervisory approval of such records.
- Contrary to State law, employees and students were not notified of the purpose for which their social security numbers were collected. In addition, some unnecessary information technology user access privileges existed that increased the risk of unauthorized disclosure of sensitive personal student information.
- Application processing errors caused a delay in funding for certain students eligible through the Gardiner Scholarship Program.
- Procedures did not always identify those private schools required to contract with an independent certified public accountant for an agreed upon procedures engagement pursuant to State law; as a result, reports were not received from several private schools required to contract for such an engagement.
- Florida Tax Credit Scholarship Program investment earnings of $280,000 were spent for non-Program purposes.

RULES OF THE AUDITOR GENERAL AND OTHER GUIDANCE

To promote audit quality, the Auditor General promulgates rules in consultation with the Florida Board of Accountancy and provides technical assistance to local educational entities, nonprofit and for-profit organizations, and independent certified public accountants (CPAs). These rules (Chapters 10.550, 10.650, 10.700, 10.800, and 10.850) are updated annually and are readily accessible on the Auditor General Web site, www.FLAuditor.gov. Additionally, the Auditor General provides guidelines for reviewing audit reports of charter schools, charter technical career centers, school districts, the Florida Virtual School, virtual instruction program providers, and local governmental entities.

The Auditor General publishes a compliance supplement to assist CPAs in conducting local governmental entity audits pursuant to Section 218.39, Florida Statutes. The Auditor General also publishes another compliance supplement to assist auditors in identifying significant compliance issues that affect the operations of school districts and to provide a resource for the efficient and cost-effective research of significant laws and rules applicable to school district operations.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003038

REVIEWS OF AUDIT REPORTS

Section 11.45(7)(b), Florida Statutes, requires the Auditor General to review all audit reports submitted pursuant to Section 218.39, Florida Statutes. Section 218.39, Florida Statutes, requires that, for each year that the Auditor General does not conduct a financial audit of a charter school, charter technical career center, school district, county, and certain municipalities and special districts, the entity shall provide for an annual financial audit conducted by a CPA and submit a copy of the audit report to the Auditor General. We review the audit reports to determine whether:

- The auditor's reports comply with applicable *Government Auditing Standards* and Rules of the Auditor General.
- The accompanying financial statements conform to accounting principles generally accepted in the United States of America.
- The audit reports were prepared by independent CPAs properly licensed by the Florida Board of Accountancy.

Additionally, Section 215.97(12)(f), Florida Statutes, requires the Auditor General to perform ongoing reviews of financial reporting packages submitted pursuant to the Florida Single Audit Act to determine compliance with the reporting requirements of the Act and applicable Department of Financial Services rules and Rules of the Auditor General. We report the results of our reviews to the Legislature.

Significant Findings and Financial Trends In conjunction with our review of audit reports, we compile and transmit to the Legislature summaries of significant findings and financial trends identified in audit reports of charter schools, charter technical career centers, school districts, and local governmental entities.

OTHER ACTIVITIES

Required Notifications We are required by law to notify the Legislative Auditing Committee of any charter school, charter technical career center, school district, or local governmental entity, as applicable, that:

- Failed to comply with the Section 218.39, Florida Statutes, audit requirements.[10]
- Failed to take full corrective action in response to a recommendation included in a financial audit report that was also included in the two preceding financial audit reports.[11]
- Failed to provide significant items omitted from audit reports submitted to us.
- Failed to provide evidence of corrective action taken for noncompliance with Section 218.415, Florida Statutes, as noted by other CPAs.
- Met one or more of the conditions specified in Section 218.503(1), Florida Statutes.[12]

[10] For special districts, we are also required to notify the Department of Economic Opportunity.

[11] This requirement also applies to operational audits of school districts, State universities, and State colleges conducted pursuant to Section 11.45, Florida Statutes.

[12] For charter schools, charter technical career centers, and school districts, we are also required to notify the Commissioner of Education. For local governmental entities, we are also required to notify the Governor.

AMERICAN OVERSIGHT

We are also required to notify the President of the Senate, the Speaker of the House of Representatives, and the Department of Financial Services of all charter schools, charter technical career centers, school districts, State universities, State colleges, and local governmental entities that failed to comply with statutory transparency requirements as identified in audit reports reviewed pursuant to Section 11.45(7)(b), Florida Statutes, or by audits conducted by the Auditor General pursuant to Section 11.45(2), Florida Statutes.

Effective July 1, 2019, pursuant to Section 11.45(2)(k), Florida Statutes, we are required to contact each school district with findings and recommendations contained within the previous operational audit report and request evidence of the initiation of corrective action within 45 days and evidence of completion of corrective action within 180 days. If the school district fails to timely comply with our request or is unable to take corrective action within the required time frame, we are to notify the Legislative Auditing Committee.

Quality Assessment Reviews Pursuant to Section 11.45(2)(i), Florida Statutes, the Auditor General conducts quality assessment reviews of State agencies' Offices of Inspectors General (OIGs) internal audit activities. We issued six quality assessment review reports during the period November 1, 2018, through October 31, 2019. Four of the reports addressed review periods of July 2018 through June 2019, and two of the reports addressed review periods of July 2017 through June 2018.

For each of the six reviews, we reported that the quality assurance and improvement program related to the OIGs' internal audit activity was adequately designed and complied with during the review period to provide reasonable assurance of conformance with applicable professional auditing standards and the Code of Ethics issued by the Institute of Internal Auditors. We also found that the OIGs generally complied with those provisions of Section 20.055, Florida Statutes, governing the operation of State agencies' OIG internal audit activities.

Professional Activities To help accomplish our Professional Services Goal, we communicate and work with professional associations to improve governmental accounting, auditing, and financial reporting and to promote the efficient use of government resources. Additionally, our professional audit staff participated in National and State standards-setting processes and served as members of various National, State, and local professional organization boards, committees, and work groups.

A listing of audit reports and reports on other accountability activities issued during the period November 1, 2018, through October 31, 2019, is included in EXHIBIT B of this Annual Report.

ANNUAL REPORT EXHIBITS

EXHIBIT A is our projected work plan for the 2020-21 and 2021-22 fiscal years and, as additional information, we have included three other exhibits in this Annual Report.

EXHIBIT A ***Projected Work Plan 2020-2021 and 2021-2022***	***EXHIBIT A*** represents our Projected 2-Year Work Plan for the 2020-21 and 2021-22 fiscal years based on our analyses as of November 25, 2019. Modifications to the Work Plan may be made in response to law changes, legislative requests, or other considerations. For information on our methodology for establishing our Work Plan, see pages 10 through 12.	**Pages 40 - 43**
EXHIBIT B ***Reports Issued During the Period November 1, 2018, Through October 31, 2019***	***EXHIBIT B*** lists each report we issued during the period November 1, 2018, through October 31, 2019. The report information is generally provided by entity type; however, some report information is listed under other audits and accountability activities.	**Pages 44 - 51**
EXHIBIT C ***Reports Issued or Scheduled to Be Issued Subsequent to October 31, 2019, and by March 31, 2020***	***EXHIBIT C*** provides information on our audit activities completed or in progress subsequent to the October 31, 2019, cutoff date for this Annual Report. We post reports to our Web site www.FLAuditor.gov as the reports are issued.	**Pages 52 - 54**
EXHIBIT D ***NSAA Peer Review Report***	***EXHIBIT D*** presents the NSAA Peer Review Report, dated October 18, 2019, on our system of quality control.	**Page 55**
EXHIBIT E ***Auditor General Contact Information***	***EXHIBIT E*** includes the names and telephone numbers of Auditor General management and each individual's areas of reporting responsibility. Contact information is also located in each audit report.	**Page 56**

PEER REVIEW REPORT

October 18, 2019

The Honorable Sherrill Norman, CPA
State of Florida, Office of the Auditor General
Suite G72-E, 111 West Madison Street
Tallahassee, Florida 32399-1450

We have reviewed the system of quality control of the Florida Office of the Auditor General in effect for the period September 1, 2018 through August 31, 2019. A system of quality control encompasses the office's organizational structure and the policies adopted and procedures established to provide it with reasonable assurance of performing and reporting in conformity with applicable professional standards in all material respects. The design of the system and compliance with it are the responsibility of the office. Our responsibility is to express an opinion on the design of the system and the office's compliance with the system based on our review.

We conducted our review in accordance with the policies and procedures for external peer reviews established by the National State Auditors Association (NSAA). In performing our review, we obtained an understanding of the office's system of quality control for engagements conducted in accordance with professional standards. In addition, we tested compliance with the office's quality control policies and procedures to the extent we considered appropriate. These tests covered the application of the office's policies and procedures on selected engagements. The engagements selected represented a reasonable cross-section of the office's engagements conducted in accordance with professional standards. We believe that the procedures we performed provide a reasonable basis for our opinion.

Our review was based on selective tests; therefore it would not necessarily disclose all design matters in the system of quality control or all compliance matters with the system. Also, there are inherent limitations in the effectiveness of any system of quality control; therefore, noncompliance with the system of quality control may occur and not be detected. Projection of any evaluation of a system of quality control to future periods is subject to the risk that the system of quality control may become inadequate because of changes in conditions, or because the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the system of quality control of the Florida Office of the Auditor General in effect for the period September 1, 2018 through August 31, 2019 has been suitably designed and was complied with during the period to provide the audit organization with reasonable assurance of performing and reporting in conformity with *Government Auditing Standards* in all material respects. Audit organizations can receive a rating of *pass*, *pass with deficiency(ies)*, or *fail*. **The Florida Auditor General has received a peer review rating of *pass*.**

Subject: Ballot Harvesting

John,

So great of you to call today. I really appreciate your reviewing this cause and lending as much support as you can. To be clear, my only interest in this issue is civic duty. I have no financial or other personal interest.

Ballot harvesting is a terrible idea with a clearly sordid past which is self-evident in why 26 states and Miami-Dade outlawed it. The Florida loophole allows ballot harvesting by "volunteers." It doesn't require a creative genius to find 10 ways a well funded unscrupulous actor could circumvent that.

Imagine a Soros funded group activating college students from surrounding states. Cover travel, room and board and a stipend for a week in Florida. They "volunteer" during the day and do social media or some meaningless activity at night.

What prosecutor will push extradition for anyone caught for a misdemeanor violation?

Our House sponsor is Rep. Mike Hill.

We need a Senator.

Joe Gruters has a draft in the cue but does not seem to appreciate the problem and we don't expect him to file it officially. He took our draft which was borrowed from AZ and lowered the penalty from felony to misdemeanor.

It needs to be a felony to posses a ballot other than one's own with exceptions allowing for things like close relatives or by certain elections officers under proper circumstances.

The Hill language is attached. We will want to make the penalty a felony. Once an election is stolen, potentially deciding the leader of the free world and hundreds of perpetrators have returned to their home states, misdemeanor charges will be difficult to enforce.

Please feel free to call me with any questions, suggestions or sponsor ideas, especially.

Very best regards,

John Loudon

AMERICAN OVERSIGHT

Change of Contractor Procedures

489.1195 Responsibilities.—
(1) A qualifying agent is a primary qualifying agent unless he or she is a secondary qualifying agent under this section.
(a) All primary qualifying agents for a business organization are jointly and equally responsible for supervision of all operations of the business organization; for all field work at all sites; and for financial matters, both for the organization in general and for each specific job.
(b) Upon approval by the board, a business entity may designate a financially responsible officer for purposes of certification or registration. A financially responsible officer shall be responsible for all financial aspects of the business organization and may not be designated as the primary qualifying agent. The designated financially responsible officer shall furnish evidence of the financial responsibility, credit, and business reputation of either himself or herself, or the business organization he or she desires to qualify, as determined appropriate by the board.
(c) Where a business organization has a certified or registered financially responsible officer, the primary qualifying agent shall be responsible for all construction activities of the business organization, both in general and for each specific job.
(d) The board shall adopt rules prescribing the qualifications for financially responsible officers, including net worth, cash, and bonding requirements. These qualifications must be at least as extensive as the requirements for the financial responsibility of qualifying agents.
(2)(a) One of the qualifying agents for a business organization that has more than one qualifying agent may be designated as the sole primary qualifying agent for the business organization by a joint agreement that is executed, on a form provided by the board, by all qualifying agents for the business organization.
(b) The joint agreement must be submitted to the board for approval. If the board determines that the joint agreement is in good order, it shall approve the designation and immediately notify the qualifying agents of such approval. The designation made by the joint agreement is effective upon receipt of the notice by the qualifying agents.
(c) The qualifying agent designated for a business organization by a joint agreement is the sole primary qualifying agent for the business organization, and all other qualifying agents for the business organization are secondary qualifying agents.
(d) A designated sole primary qualifying agent has all the responsibilities and duties of a primary qualifying agent, notwithstanding that there are secondary qualifying agents for specified jobs. The designated sole primary qualifying agent is jointly and equally responsible with secondary qualifying agents for field work supervision.
(e) A secondary qualifying agent is responsible only for:
1. The supervision of field work at sites where his or her license was used to obtain the building permit; and
2. Any other work for which he or she accepts responsibility.

A secondary qualifying agent is not responsible for supervision of financial matters.

(3)(a) A qualifying agent who has been designated by a joint agreement as the sole primary qualifying agent for a business organization may terminate this status as such by giving actual notice to the business organization, to the board, and to all secondary qualifying agents of his or her intention to terminate this status. The notice to the board must include proof satisfactory to the board that he or she has given the notice required in this paragraph.
(b) The status of the qualifying agent shall cease upon the designation of a new primary qualifying agent or 60 days after satisfactory notice of termination has been provided to the board, whichever first occurs.

AMERICAN OVERSIGHT

(c) If no new primary qualifying agent has been designated within 60 days, all secondary qualifying agents for the business organization shall become primary qualifying agents unless the joint agreement specifies that one or more of them shall become sole qualifying agents under such circumstances, in which case only they shall become sole qualifying agents.
(d) Any change in the status of a qualifying agent is prospective only. A qualifying agent is not responsible for his or her predecessor's actions but is responsible, even after a change in status, for matters for which he or she was responsible while in a particular status.

(e) A newly designated qualifier shall make application for change of contractor within 60 days in each jurisdiction an active permit is held by the previous qualifier.

(f) Qualifiers shall not allow active permits to expire without properly closing them. The Building Official may limite the number of new permits obtained by a qualifier with open/expired permits.

(g) When requested, a qualifier may sign a change of contractor form provided by the jurisdiction. If qualifier declines, is unavailable or is deceased the owner of the project shall serve notice to the qualifier's corporate address. The project owner shall then submit a change of contractor form along with a written statement and issue a hold harmless affidavit to the jurisdiction. The jurisdiction, upon receipt of such statement and hold harmless affidavit, shall process a change of contractor to a new qualifier without any further notification.

(h) When a permit expires and remains open, the project owner may submit a change of contractor and hold harmless affidavit without any further notification to the previous qualifier.

(i) A new qualifier, as a result of a change of contractor under subsections (e), (g) and (h) herein, shall not be held liable for any work of his or her predecessor but is responsible for any corrective and new work performed.

468.609 is amended to read:

(2) A person may take the examination for certification as a building code inspector or plans examiner pursuant to this part if the person:
(a) Is at least 18 years of age.
(b) Is of good moral character.
(c) Meets eligibility requirements according to one of the following criteria:
1. Demonstrates 5 years' combined experience in the field of construction or a related field, building code inspection, or plans review corresponding to the certification category sought;
2. Demonstrates a combination of postsecondary education in the field of construction or a related field and experience which totals 4 years, with at least 1 year of such total being experience in construction, building code inspection, or plans review;
3. Demonstrates a combination of technical education in the field of construction or a related field and experience which totals 4 years, with at least 1 year of such total being experience in construction, building code inspection, or plans review;

AMERICAN OVERSIGHT

4. Currently holds a standard certificate issued by the board or a firesafety inspector license issued pursuant to chapter 633, has a minimum of 3 years' verifiable full-time experience in inspection or plan review, and has satisfactorily completed a building code inspector or plans examiner training program that provides at least 100 hours but not more than 200 hours of cross-training in the certification category sought. The board shall establish by rule criteria for the development and implementation of the training programs. The board shall accept all classroom training offered by an approved provider if the content substantially meets the intent of the classroom component of the training program;
5. Demonstrates a combination of the completion of an approved training program in the field of building code inspection or plan review and a minimum of 2 years' experience in the field of building code inspection, plan review, fire code inspections and fire plans review of new buildings as a firesafety inspector certified under s. 633.216, or construction. The approved training portion of this requirement shall include proof of satisfactory completion of a training program that provides at least 200 hours but not more than 300 hours of cross-training that is approved by the board in the chosen category of building code inspection or plan review in the certification category sought with at least 20 hours but not more than 30 hours of instruction in state laws, rules, and ethics relating to professional standards of practice, duties, and responsibilities of a certificateholder. The board shall coordinate with the Building Officials Association of Florida, Inc., to establish by rule the development and implementation of the training program. However, the board shall accept all classroom training offered by an approved provider if the content substantially meets the intent of the classroom component of the training program;
6. Currently holds a standard certificate issued by the board or a firesafety inspector license issued pursuant to chapter 633 and:
a. Has at least 5 years' verifiable full-time experience as an inspector or plans examiner in a standard certification category currently held or has a minimum of 5 years' verifiable full-time experience as a firesafety inspector licensed pursuant to chapter 633.
b. Has satisfactorily completed a building code inspector or plans examiner classroom training course or program that provides at least 200 but not more than 300 hours in the certification category sought, except for one-family and two-family dwelling training programs, which must provide at least 500 but not more than 800 hours of training as prescribed by the board. The board shall establish by rule criteria for the development and implementation of classroom training courses and programs in each certification category; or

7.a. Has completed a 4-year internship certification program as a building code inspector or plans examiner while employed full-time by a municipality, county, or other governmental jurisdiction, under the direct supervision of a certified building official. Proof of graduation with a related vocational degree or college degree or of verifiable work experience may be exchanged for the internship experience requirement year-for-year, but may reduce the requirement to no less than 1 year.
b. Has passed an examination administered by the International Code Council in the certification category sought. Such examination must be passed before beginning the internship certification program.
c. Has passed the principles and practice examination before completing the internship certification program.
d. Has passed a board-approved 40-hour code training course in the certification category sought before completing the internship certification program.
e. Has obtained a favorable recommendation from the supervising building official after completion of the internship certification program.

…

AMERICAN OVERSIGHT

(7)(a) The board shall provide for the issuance of provisional certificates valid for ~~1~~ 2 years, as specified by board rule, to any building code inspector or plans examiner who meets the eligibility requirements described in subsection (2) and any newly employed or promoted building code administrator who meets the eligibility requirements described in subsection (3). The provisional license may be renewed by the board for just cause; however, a provisional license is not valid for longer than 3 years.

…

(10)(a) The board may by rule create categories of certification in addition to those defined in s. 468.603(5) and (8). Such certification categories shall not be mandatory and shall not act to diminish the scope of any certificate created by statute.
(b) The board shall by rule establish:
1. Reciprocity of certification with any other state that requires an examination administered by the International Code Council.
2. That an applicant for certification as a building code inspector or plans examiner may apply for a provisional certificate valid for the duration of the internship period.
3. That partial completion of an internship program may be transferred between jurisdictions on a form prescribed by the board.
4. That an applicant may apply for a standard certificate on a form prescribed by the board upon successful completion of an internship certification program.
5. That an applicant may apply for a standard certificate at least 30 days and no more than 60 days before completing the internship certification program.
6. That a building code inspector or plans examiner who has standard certification may nonconcurrent 1-year internship program in the certification category sought and passing an examination administered by the International Code Council and a board-approved 40-hour code training course.
7. A **one and two-family dwelling inspector** internship program with the following criteria.
   i. Hold an ICC Certification as a residential or commercial inspector in each of the following categories: building, electrical, plumbing and mechanical prior to entering the program; and
   ii. Complete a four-year internship program with one-year on-the-job training in each of building, electrical, plumbing and mechanical categories under the supervision of standard certified inspector. The four-year internship program may be reduced to no less than two years using verifiable experience and/or education with no less than six months on-the-job training under the supervision of a standard certified inspector in each building, electrical, plumbing and mechanical residential inspector categories; or
   iii. Hold a standard certification as an inspector in any of the categories listed in Section 468.603(5), F.S., plus an internship program of not less than six months on-the-job training in each of the following categories in which the applicant does not hold standard certification: building, plumbing, electrical, and mechanical under the supervision of a standard certified inspector.
   iv. Complete a 40-hour one and two-family dwelling inspector code training course.
8. A **one and two-family plans examiner** internship program with the following criteria:
   i. Hold an ICC Certification as a one and two-family dwelling plans examiner[1] prior to entering the internship program[2].

[1] Instead of requiring a one and two-family dwelling inspector certification as a pre-requisite, take the ICC One and Two-Family Dwelling Plans Examiner exam to qualify.
[2] Propose removing the Coastal and Floodplain Construction Inspector test requirement from the one and two-family dwelling plans examiner.

AMERICAN OVERSIGHT

ii. Complete a four-year internship program under the supervision of a standard certified plans examiner.
iii. The four-year internship program may be reduced to no less than two year using verifiable experience and/or education according to rule 61G19-6.017.
iv. Complete a 40-hour one and two-family plans examiner code training course.

9. A **Roofing Inspector** internship program with the following criteria:
i. Hold an ICC Certification as a Florida Roofing Inspector prior to entering the internship program; and
ii. Complete a one-year internship program with on-the-job training as a roofing inspector under the supervision of a standard certified commercial building inspector or roofing inspector; or
iii. Hold a standard certificate as a residential building inspector and complete an internship program with no less than 200-hours under the supervision of a standard certified commercial building inspector or roofing inspector.
iv. Complete a 40-hour roofing inspector training course.

10. Amend Rule 61G19-6.017 One and Two Family Dwelling Inspector Certification paragraph (2) to include the following eligibility criteria:
(i) Completing a one and two-family inspector internship program.
(j) Completing a one and two-family plans examiner internship program.

11. The categories of residential plan examiner listed in 468.603(8) and amend the necessary forms and offer the appropriate examinations in each category.

468.8312 is amended to read

(1) The department may establish fees to be paid for applications, examination, reexamination, licensing and renewal, inactive status application and reactivation of inactive licenses, recordkeeping, and applications for providers of continuing education. The department may also establish a delinquency fee. Fees shall be based on department estimates of the revenue required to implement the provisions of this part. All fees shall be remitted with the appropriate application, examination, or license.
(2) The initial application and examination fee shall not exceed $125 plus the actual per applicant cost to the department to purchase an examination, if the department chooses to purchase the examination. The examination fee shall be in an amount that covers the cost of obtaining and administering the examination, but may not exceed $200, and shall be refunded if the applicant is found ineligible to sit for the examination. The application fee shall be nonrefundable.
(3) The initial license fee shall not exceed $200.
(4) The biennial renewal fee shall not exceed $200.
(5) The fee for licensure by endorsement shall not exceed $200.
(6) The fee for application for inactive status or for reactivation of an inactive license shall not exceed $200.
(7) The fee for applications from providers of continuing education may not exceed $500.

468.8313 is amended to read

(4) The department may review and approve examinations that the department has certified as meeting generally accepted testing standards and the requirements of a national examination as provided in s. 455.217 (1) (d) ~~by a nationally recognized entity that offers programs or sets standards that ensure competence as a home inspector.~~

AMERICAN OVERSIGHT

103.091

(4) Any political party other than a minor political party may by rule provide for the membership of its state or county executive committee to be elected for 4-year terms at the primary election in each year a presidential election is held. The terms shall commence on the first day of the month following each presidential general election; but the names of candidates for political party offices shall not be placed on the ballot at any other election. The results of such election shall be determined by a plurality of the votes cast. In such event, electors seeking to qualify for such office shall do so with the Department of State or supervisor of elections not ~~earlier than noon of the 71st day, or~~ later than noon of the 67th day, preceding the primary election. The outgoing chair of each county executive committee shall, within 30 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers. The chair of each state executive committee shall, within 60 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers.

101.5614

(4)(a) If any vote-by-mail ballot is physically damaged so that it cannot properly be counted by the automatic tabulating equipment, a true duplicate copy shall be made of the damaged ballot in the presence of witnesses and substituted for the damaged ballot. Likewise~~, a duplicate ballot shall be made of a vote-by-mail ballot containing an overvoted race or~~ a marked vote-by-mail ballot in which every race is undervoted which shall include all valid votes as determined by the canvassing board based on rules adopted by the division pursuant to s. 102.166(4). Upon request, a physically present candidate, a political party official, a political committee official, or an authorized designee thereof, must be allowed to observe the duplication of ballots. All duplicate ballots shall be clearly labeled "duplicate," bear a serial number which shall be recorded on the defective ballot, and be counted in lieu of the defective ballot. After a ballot has been duplicated, the defective ballot shall be placed in an envelope provided for that purpose, and the duplicate ballot shall be tallied with the other ballots for that precinct.

101.5612 - Testing of tabulating equipment.

(1) All electronic or electromechanical voting systems shall be thoroughly tested at the conclusion of maintenance and programming. Tests shall be sufficient to determine that the voting system is properly programmed, the election is correctly defined on the voting system, and all of the voting system input, output, and communication devices are working properly.
(2) On any day not more than ~~10~~ 25 days prior to the commencement of early voting as provided in s. 101.657, the supervisor of elections shall have the automatic tabulating equipment publicly tested to ascertain that the equipment will correctly count the votes cast for all offices and on all measures. If the ballots to be used at the polling place on election day are not available at the time of the testing, the supervisor may conduct an additional test not more than 10 days before election day. Public notice of the time and place of the test shall be given at least 48 hours prior

AMERICAN OVERSIGHT

thereto by publication on the supervisor of elections' website and once in one or more newspapers of general circulation in the county or, if there is no newspaper of general circulation in the county, by posting the notice in at least four conspicuous places in the county. The supervisor or the municipal elections official may, at the time of qualifying, give written notice of the time and location of the public preelection test to each candidate qualifying with that office and obtain a signed receipt that the notice has been given. The Department of State shall give written notice to each statewide candidate at the time of qualifying, or immediately at the end of qualifying, that the voting equipment will be tested and advise each candidate to contact the county supervisor of elections as to the time and location of the public preelection test. The supervisor or the municipal elections official shall, at least 15 days prior to the commencement of early voting as provided in s. 101.657, send written notice by certified mail to the county party chair of each political party and to all candidates for other than statewide office whose names appear on the ballot in the county and who did not receive written notification from the supervisor or municipal elections official at the time of qualifying, stating the time and location of the public preelection test of the automatic tabulating equipment. The canvassing board shall convene, and each member of the canvassing board shall certify to the accuracy of the test. For the test, the canvassing board may designate one member to represent it. The test shall be open to representatives of the political parties, the press, and the public. Each political party may designate one person with expertise in the computer field who shall be allowed in the central counting room when all tests are being conducted and when the official votes are being counted. The designee shall not interfere with the normal operation of the canvassing board.

101.043 - Identification required at polls.

(1)(a) The precinct register, as prescribed in s. 98.461, shall be used at the polls for the purpose of identifying the elector at the polls before allowing him or her to vote. The clerk or inspector shall require each elector, upon entering the polling place, to present one of the following current and valid picture identifications:
1. Florida driver license.
2. Florida identification card issued by the Department of Highway Safety and Motor Vehicles.
3. United States passport.
4. Debit or credit card.
5. Military identification.
6. Student identification.
7. Retirement center identification.
8. Neighborhood association identification.
9. Public assistance identification.
10. Veteran health identification card issued by the United States Department of Veterans Affairs.
11. A license to carry a concealed weapon or firearm issued pursuant to s. 790.06.
12. Employee identification card issued by any branch, department, agency, or entity of the Federal Government, the state, a county, or a municipality.
(b) If the picture identification does not contain the signature of the elector, an additional identification that provides the elector's signature shall be required. ~~The address appearing on the identification presented by the elector may not be used as the basis to confirm an elector's legal~~

AMERICAN OVERSIGHT

~~residence or otherwise challenge an elector's legal residence.~~ The elector shall sign his or her name in the space provided on the precinct register or on an electronic device provided for recording the elector's signature. The clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided on the precinct register or on an electronic device provided for that purpose and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.
(c) When an elector presents his or her picture identification to the clerk or inspector and the elector's address on the picture identification matches the elector's address in the supervisor's records, the elector may not be asked to provide additional information or to recite his or her home address.
(2) If the elector fails to furnish the required identification, the elector shall be allowed to vote a provisional ballot. The canvassing board shall determine the validity of the ballot pursuant to s. 101.048(2).

101.6103 - Mail ballot election procedure.

(1) Except as otherwise provided in subsection (7), the supervisor of elections shall mail all official ballots with a secrecy envelope, a return mailing envelope, and instructions sufficient to describe the voting process to each elector entitled to vote in the election ~~not sooner than the 20th~~ between the 40th and 33Rd day before the election and not later than the 10th day before the date of the election. All such ballots shall be mailed by first-class mail. Ballots shall be addressed to each elector at the address appearing in the registration records and placed in an envelope which is prominently marked "Do Not Forward."
(2) Upon receipt of the ballot the elector shall mark the ballot, place it in the secrecy envelope, sign the return mailing envelope supplied with the ballot, and comply with the instructions provided with the ballot. The elector shall mail, deliver, or have delivered the marked ballot so that it reaches the supervisor of elections no later than 7 p.m. on the day of the election. The ballot must be returned in the return mailing envelope.
(3) The return mailing envelope shall contain a statement in substantially the following form:

VOTER'S CERTIFICATE

I, (Print Name) , do solemnly swear (or affirm) that I am a qualified voter in this election and that I have not and will not vote more than one ballot in this election.

I understand that failure to sign this certificate and give my residence address will invalidate my ballot.

(Signature)

(Residence Address)

(4) If the ballot is destroyed, spoiled, lost, or not received by the elector, the elector may obtain a replacement ballot from the supervisor of elections as provided in this subsection. An elector seeking a replacement ballot shall sign a sworn statement that the ballot was destroyed, spoiled,

AMERICAN OVERSIGHT

lost, or not received and present such statement to the supervisor of elections prior to 7 p.m. on the day of the election. The supervisor of elections shall keep a record of each replacement ballot provided under this subsection.
(5) A ballot shall be counted only if:
(a) It is returned in the return mailing envelope;
(b) The elector's signature has been verified as provided in this subsection; and
(c) It is received by the supervisor of elections not later than 7 p.m. on the day of the election.

The supervisor of elections shall verify the signature of each elector on the return mailing envelope with the signature on the elector's registration records. Such verification may commence at any time prior to the canvass of votes. The supervisor of elections shall safely keep the ballot unopened in his or her office until the county canvassing board canvasses the vote. If the supervisor of elections determines that an elector to whom a replacement ballot has been issued under subsection (4) has voted more than once, the canvassing board shall determine which ballot, if any, is to be counted.

(6) The canvassing board may begin the canvassing of mail ballots at 7 a.m. on the ~~sixth~~ 22nd day before the election, including processing the ballots through the tabulating equipment. However, results may not be released until after 7 p.m. on election day. Any canvassing board member or election employee who releases any result before 7 p.m. on election day commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.
(7) With respect to absent electors overseas entitled to vote in the election, the supervisor of elections shall mail an official ballot with a secrecy envelope, a return mailing envelope, and instructions sufficient to describe the voting process to each such elector on a date sufficient to allow such elector time to vote in the election and to have his or her marked ballot reach the supervisor by 7 p.m. on the day of the election.
(8) A ballot that otherwise satisfies the requirements of subsection (5) shall be counted even if the elector dies after mailing the ballot but before election day, as long as, prior to the death of the voter, the ballot was:
(a) Postmarked by the United States Postal Service;
(b) Date-stamped with a verifiable tracking number by common carrier; or
(c) Already in the possession of the supervisor of elections.

Subject: Bonuses suit response delayed, report clears administrator, big districts and more

View this at redefinED

Good Morning,

redefinED's daily roundup is Florida's most comprehensive source for quick links to the latest education news.

Bonuses suit response delayed, report clears administrator, big districts and more

Teacher bonuses lawsuit: Lawyers for the state are asking a Leon County judge for an extension of a month to reply to an updated lawsuit filed by Florida teachers against the Best and Brightest bonus program for educators. Almost 40 school districts have been added as defendants to the lawsuit, which initially targeted just the Florida Department of Education. The suit alleges the state illegally taxed the bonuses, thereby shortchanging teachers, and that districts have siphoned money teachers should have gotten. "Because of the new parties and issues, as well as other work commitments, the undersigned council is unable to file the response prior to the expiration of deadline for filing," Florida Attorney General Ashley Moody's office wrote. Lawyers for the teachers did not object to an extension. *Politico Florida*.

Administrator cleared: An assistant principal who was disciplined after the 2018 shootings at Marjory Stoneman Douglas High School has been cleared by a district investigation. Winfred Porter Jr. and two other assistant principals were reassigned to the district office a year ago by Superintendent Robert Runcie for mishandling school safety issues. But the district's Professional Standards Committee found "an insufficient factual or legal basis exists to establish just cause for a recommendation of disciplinary action," and Porter can now return to Stoneman Douglas or remain at Boyd Anderson High School in Fort Lauderdale. Investigations of the other two assistants continue. *Sun Sentinel*.

Largest U.S. districts: Five of the 10 largest school districts in the United States are in Florida, according to the latest rankings from the 2017-2018 school year by the magazine*American School & University*. The Miami-Dade County School District is 4th, Broward 6th, Hillsborough 7th, Orange 9th and Palm Beach 10th. New York City's school district is the nation's largest. *Gradebook*.

Contract negotiations: The Polk County School District and its teachers reach a tentative agreement to freeze teacher salaries and health insurance premiums for a year. Union president Stephanie Yocum said a small pay raise would have been offset by "crippling insurance premiums and deductible increases." The deal must be approved by teachers before it goes to the school board in January. *Lakeland Ledger*.

Bible bill companion: A House bill that would require Florida public high schools to offer Bible classes now has a companion bill in the Senate. S.B. 746, filed by state Sen. Dennis Baxley, R-Ocala, doesn't require students to take the classes; just that they be available. The "objective study of religion" required could include classes on the Hebrew Scriptures, Old Testament and New Testament, or any one of the three. The House version was introduced Oct. 11 by state Rep. Kimberly Daniels, D-Jacksonville. *News Service of Florida*. *Florida Politics*.

School funding sources: Nearly half the funding for Florida's public schools came from local taxes during the 2017-2018 school year, according to a study by the National Education Association. That's the 19th-highest level among the 50 states. Local funding made up 49.4 percent of the money for schools, while the state contributed 39.2 percent and the federal government 11.4 percent. *Florida Business Daily*.

Sexual harassment case timeline: The timeline of when Sarasota County School District officials learned about sexual harassment charges against its chief operating officer will be a key point in today's school board discussion about an investigative report into the charges. COO Jeff Maultsby has resigned, but Superintendent Todd Bowden was faulted in the report for his handling of the complaint. *Sarasota Herald-Tribune*.

New school approved: A private soccer prep school has been approved by the Westlake City Council in Palm Beach County. The International Sports Training Facility will be a pre-K through 12th grade day and boarding school for elite soccer players and others, and is expected to open in the fall of 2021. "I think it will do for the city what polo did for Wellington," said City Manager Ken Cassel. "It will put us on the map for international soccer groups." *Palm Beach Post*.

Kids with disabilities rejected: Some northeast Florida parents of children with disabilities say those children are being rejected for enrollment at charter schools. Florida Department of Education spokeswoman Cheryl Etters says charters may

AMERICAN OVERSIGHT

suggest a different school could better serve students with disabilities. “Just like traditional public schools, each charter school has different resources and may not have the ability to meet the demands of a student with specific disabilities,” she said. *WJAX*.

Educators honored: Thirty-three nominees for the Santa Rosa County School District teacher of the year award have been chosen by the Santa Rosa Education Foundation. The winner will be announced Jan. 29. *Pensacola News Journal*.

School elections: Former Clay County school superintendent Charlie Van Sant has announced he will challenge current Superintendent Addison Davis in the 2020 election. Davis beat Van Sant in the Republican primary in 2016, then went on to overwhelmingly win in the general election. *WJXT*. Five candidates are running for two Marion County School Board seats in 2020. David Hutto, a 4th-grade science and social studies teacher at Harbour View Elementary School, has joined Shelia Arnett and Allison Campbell in the race for the District 1 seat being vacated by Nancy Stacy. In District 2, incumbent Beth McCall has drawn a challenge from Todd Yocum, who teaches in Alachua County. *Ocala Star-Banner*.

School enrollment: About 300 fewer students are enrolled in the Alachua County School District’s 41 traditional schools and centers this year than last, according to the October count reported to the state. The count, which took place Oct. 7-11, showed 31,442 students in the district. *Gainesville Sun*.

Rezoning complaint: Wesley Chapel parents whose children may be zoned out of Wiregrass High School say it’s not fair that they, as residents in the school’s current zone, have to move to Cypress Creek Middle-High School while choice students get to stay. Pasco school district officials say there aren’t enough choice students at Wiregrass to make much of a difference in its overcrowding. *Gradebook*.

Pay hike for substitutes: The Leon County School District is bumping the pay for substitute teachers from $12 an hour to $14. “We were really facing a substitute shortage,” said Superintendent Rocky Hanna. The increase will cost the school district about $250,000 a year. *Tallahassee Democrat*. *WFSU*.

Referendum spending: The Charlotte County School District has spent more than $1.7 million of the $18.8 million the district expects to collect from a voter-approved property tax increase, according to an update from Superintendent Steve Dionisio. Most of the money, $1.4 million, has gone toward improving salaries and benefits. Almost $44,000 has been spent on art and music materials and equipment, $41,500 on security, $46,400 on paraprofessionals, $65,000 on special education liaisons and behavior specialists, and $55,500 on social workers and psychologists. *Charlotte Sun*.

School now part of tour: Southside Elementary School in Sarasota will become a stop in the Newtown Alive trolley tour. The school was chosen because a plaque honoring Dorothye Smith, the first black principal at Southside and a civil rights pioneer, will be located there as part of the tour marking African-American history in the community. *Sarasota Herald-Tribune*.

Students and the law: A 13-year-old Lake County student is arrested after threatening to bring a gun to Eustis Middle School and begin shooting. He faces a juvenile charge of making a false report concerning a firearm in a deadly manner. *Orlando Sentinel*.

Opinions on schools: When you see local and statewide SAT scores, it becomes clear why the state and districts aren’t eager to share them: the results are indeed, a boo-worthy horror show. Anyone with the smallest interest in education would gasp to see how poorly Florida students perform. *Lauren Ritchie, Orlando Sentinel*. The Escambia County School Board has a responsibility to do a nationwide search for the very best candidate to be the district’s first appointed superintendent. It should be someone who has a winning track record as a successful superintendent. We don’t have time for on-the-job training of someone who wants to learn to be a superintendent. *Terry Horne, Pensacola News Journal*. Florida’s long-term trend of high rankings when adjusting for demographics is holding despite the recent score stagnation reported by the National Assessment of Educational Progress. *Patrick R. Gibbons, redefinED*.

Student enrichment: Bay County schools get several pallets full of writing paper, folders, glue, pencils and other materials needed in classrooms from Publix and United Way of Northwest Florida. *Panama City News Herald*. Tampa 3rd-grader Parker Williams tried to give $15 of his birthday money to his teacher at Gorrie Elementary in Tampa as a raise. The teacher, Mary Hall Chambers, said she couldn’t accept it, but appreciated the gesture and wrote: “Students like you are the reason I teach.” *WFLA*.

Representative Diamond Files Legislation to Improve Civics Education in Florida High Schools

Initiative focused on promoting high-quality civics instruction and increasing civic engagement

TALLAHASSEE—Representative Ben Diamond (D-St. Petersburg) filed legislation today to improve civics education in Florida high schools with the goal of increasing citizen engagement with government. Representative Vance Aloupis (R-Miami) will be the prime cosponsor of the bill in the Florida House, and Senator Jeff Brandes (R-St. Petersburg) is introducing companion legislation in the Senate.

House Bill XXX will provide Florida high school students with an opportunity to supplement their U.S. Government coursework with community service and real-world problem solving. School districts will have the option to include a nonpartisan civic literacy project as part of their U.S. Government curriculum, where students will identify an issue or problem in their community, research the issue from multiple perspectives, and then develop strategies to address it.

"Students have traditionally learned civics through textbooks and class discussions," said Representative Diamond. "Our bill is designed to supplement that work with real-world problem solving. By applying what has been taught in the classroom to issues that exist in the real world, students gain a greater understanding of how to solve problems in their community."

According to U.S. Census Bureau data, Florida is among the least civically active states in the country. Florida ranks near the bottom of the nation when it comes to voter turnout in local elections, attendance at public meetings, and membership in service and civic groups. The bill seeks address these concerns through building a more educated and engaged citizenry.

Under HB XXX, students who complete the project will be eligible to receive community service hours that can apply toward Bright Futures Scholarship Program requirements. Schools that demonstrate a commitment to high-quality civics instruction will be recognized as "Freedom Schools."

"Civic participation is fundamental to our American way of life, and our education system plays a central role in preparing young people to become informed and engaged citizens," said Representative Diamond. "I want to thank Representative Aloupis and Senator Brandes for their leadership in this effort. This bill will help our students develop the skills they need to be active participants in the future of our communities."

Diamond represents House District 68 in the Florida Legislature, covering portions of Pinellas County.

Subject: Clarification - status of audit of PSTA
Attachment(s): "2019-0610 FTA letter.pdf"

Vanessa,

Just some clarification on my inquiry about an audit of PSTA:

1/ In a meeting a few months ago with about 8-10 citizens in his conference room on 4th street, Senator Brandes had mentioned audits called by the Joint Legislative Auditing Committee. This is of course a committee that the senator is the alternating chair for.

Senator Brandes had said he would ask for an audit if a citizen asked for it. That request for an audit has been made, hence my inquiry. Of course the senator has the right to change his mind and not call for an audit, but this is the background to my inquiry.

2/ In the event you don't have a copy, attached is a letter w/o attachments that several organizations and individuals sent to the FTA in June pointing out misrepresentations by PSTA. Allow me to point of out just one thing from that letter: last April, the PSTA board voted to start spending CAPITAL reserves to fund OPERATIONS.

3/ At PSTA's last board meeting in late October, it came to light that there was a half million dollar cost overrun that went undetected for three years. Staff failed to detect the cost overrun, multiple CAFR's failed to detect it and the taxpayers are left holding the bag.

4/ In the same month (August), PSTA gave financial information to the FTA that is totally different that it put in its Transit Development Plan.

5/ There is much yet to be revealed.

Allow me to take this opportunity to wish you and the Senator a Merry Christmas and a Happy New Year.

Tom Rask

At 09:31 AM 12/10/2019, you wrote:

Tom,

We have had numerous conversations about whether an audit of PSTA is the right course of action given their current status. It is something we are still discussing amongst other things with PSTA, but at this current time there is no audit taking place. That being said, we reserve the right to call for an audit moving forward if we choose to do so. The Senator is weighing all options, and we will take the most appropriate course of action.

Kind Regards,

Ms. Thompson,

Earlier this year, I was in a meeting with Senator Brandes in which he said that if citizens asked for a state audit of PSTA, he would try to get the state to do it. Said request was put in by a citizen a few months ago. I am writing to ask what the status of that audit request is. Has Senator Brandes requested an audit of PSTA? If so, please provide the record (letter, e-mail or similar) in which he makes that request.

My mobile number is 727.710.2800 should you need it.

T i a.

US Representative Charlie Crist, Florida's 13th Congressional District

Date: Monday, June 10th, 2019

Re: Request that the FTA withdraw PSTA's Small Starts program entry for cause

Dear Ms. Williams,

The Pinellas Suncoast Transit Authority ("PSTA") has a project that is currently in the Project Development ("PD") phase of the Small Starts program with the FTA. That project is called the Central Avenue BRT ("CABRT") project. As the FTA knows, the Small Starts program is authorized by 49 US Code §5309, a.k.a the "5309 Capital Investment Grant ("CIG") program."

We want to make sure that the FTA is aware of the following five facts:

1. PSTA's misuse in 2014 of 80% of FEMA federal grant funds it received.
2. The local funding commitments are being misrepresented by PSTA to the FTA.
3. There is considerable local organized opposition to this project.
4. PSTA has failed to meet a key financial requirement that the FTA imposes.
5. PSTA is in poor financial condition, contrary to what it has told the FTA.

We have copied those we believe are relevant parties on this letter. Rep. Charlie Crist was copied because the CABRT project falls entirely within his district. Information in support of the above five assertions are laid out in detail below.

1. PSTA's misuse in 2014 of 80% of FEMA federal grant funds it received

In FY2011, PSTA received a $439,254 award under FEMA's Transit Security Grant Program. Dr. David McKalip, a local neurosurgeon, alleged to FEMA that PSTA had unlawfully used the grant funds to promote one side of a referendum tax issue.

FEMA investigated Dr. McKalip's allegation and found material misrepresentations by PSTA to FEMA, violation of federal law and also violation of grant agreement guidance. In a letter dated 08/14/2014 [attachment #1], FEMA notified PSTA of its findings.

AMERICAN OVERSIGHT

Quoting from said letter:

Through a review of the advertisements purchased and publicly disseminated, FEMA has determined that the advertisements purchased were not used in the manner in which PSTA expressly described in its application. [underlining added]

When a public agency uses federal grant funds in a fashion different from what it "expressly described in its [grant] application," other granting federal agencies should take note.

FEMA further determined that *"PSTA has violated the requirements of the 9/11 Act and the FY11 Guidance that governs its grant agreement."* As a result of its finding, FEMA disallowed $354,091 (in excess of 80% of the total grant) in expenditures and asked that those grant funds be reimbursed to FEMA, or that allowed expenses be submitted. PSTA chose to return the funds, or in the language of FEMA, to "reimburse" FEMA.

This relatively recent history is relevant because there is strong evidence that PSTA is, once again, misleading federal officials, specifically the FTA, this time in PSTA's capacity as a project sponsor admitted in to the PD phase of the FTA's Small Starts program. Please note that PSTA has the same CEO it had when the FEMA funds were misused, and largely the same upper management.

Based on this past history and same management, we are concerned that FTA will enter into a construction agreement with PSTA, later find that PSTA misused those funds, and thereby leave local taxpayers on the hook when PSTA has to repay these funds to the FTA. We are also concerned about such a scenario because it's simply not good government.

2. The local funding commitments are being misrepresented by PSTA to the FTA

On 9/7/2017, PSTA included a City of St. Petersburg, FL city council resolution in its "Streamlined Financial Plan" submittal to the FTA [attachment #2]. PSTA wrote to the FTA that *"the City has pledged a local funding contribution of approximately $4 million."*

However, in fact no money was actually "pledged", committed, appropriated or in any way assured by said resolution. After the text that says "NOW THEREFORE BE IT RESOLVED," there is no pledge or commitment of a specific dollar amount.

In relevant part, the resolution specifically also states the following:

> *BE IT FURTHER RESOLVED that City Council requests Administration to identify sources and levels of funding to match state and federal grants and negotiate a funding agreement with PSTA for the City Council's consideration.*

No such funding agreement exists today. The city is apparently also laboring under the misapprehension that it will "match" state and federal funds. In fact, the way it works is exactly opposite: the state matches the city's funds, and then the FTA matches state and local funds at a level which varies from project to project.

AMERICAN OVERSIGHT

In the paragraph preceding the text quoted immediately above, the resolution states the following:

BE IT FURTHER RESOLVED that City Council supports the City contributing to the Central Avenue BRT project through the long-term maintenance of City-owned roadways upon which the BRT will travel and through a yet to be determined capital contribution to the local share of the project.....[underlining added]

The claim that the city is "contributing" to the CABRT project by simply maintaining its own roadways is specious and deserves close scrutiny by the FTA.

PSTA has also previously represented to the FTA that $1.5 million would be forthcoming as local capital funding from the City of St. Pete Beach, or hotels in that city. That is simply not true, as a newspaper article from Florida's largest newspaper explains [attachment #3].

There have been many other articles and media reports since September 2016 documenting the fact that the city never intended to provide capital or to fund operation of the CABRT project.

In fact, the City of St. Pete Beach commission became so annoyed that it asked city staff to draw up a resolution opposing the project's operation in all but the northernmost part of the city [attachment #4].

One of the "whereas" clauses in that resolution stated that *"WHERAS the City has repeatedly requested PSTA to cease and desist misrepresenting on grant and other application and documents that the City is contributing financial resources that the City has not agreed to do."*

The resolution then specifically directed the city manager to *"request PSTA to stop representing financial contributions that the City has not agreed to."*

Although the resolution was tabled due to overwhelming pressure from county government, its language is an example of how numerous local elected officials have determined that PSTA is not trustworthy. The undersigned parties agree with that determination.

In response to the furor, PSTA says it has now stated to FTA that no funds will be forthcoming from the City of St. Pete Beach, but this came 2.5 years after the city had already made it clear that such funding was out of the question.

3. There is considerable local organized opposition to this project

Above, we already covered opposition in the City of St. Pete Beach, both among residents and local officials. The project also passes through the neighboring City of South Pasadena, which unanimously passed a resolution on 04/23/19 opposing the CABRT project [attachment #5]

In the 5th and 6th "whereas" clauses of that resolution, city officials determined that neither they nor their residents are being listened to by PSTA and are not being *"afforded a meaningful opportunity to comment on and influence the BRT project."*

AMERICAN OVERSIGHT

There is also growing and organized opposition to the project in the third city through which the project passes, that city being St. Petersburg. If any FTA employee is available to do so, they can drive the bulk of the project route in St. Petersburg (1st Avenues North and South) and they will find a sea of yard signs opposing this project. People are opposed to the lane loss, opposed to the loss of parking, and opposed simply because of a lack of any compelling reason for this BRT project.

PSTA's chairperson Janet Long herself recently stated in a public meeting (on video) that there is a *"very organized group against this project,"* i.e. the CABRT project. In fact, multiple grassroots organizations have sprung up all along the route of this project. In our view, that opposition stems from PSTA's failure over many years to gain public trust for anything it does.

On 5/28/2019, the City of St. Pete Beach held a workshop to discuss (but not vote on) a PSTA-proposed interlocal agreement with PSTA. An overflow crowd of over 150 people attended, and *all* city residents who spoke voiced opposition to the project.

It doesn't look like the City of St. Pete Beach will enter in to an interlocal agreement in the foreseeable future, nor is it necessary to do so in order for PSTA to obtain a construction agreement from the FTA. However, the FTA should not award such a construction agreement because the CABRT is also simply not a very good investment of scarce transit dollars project, as shown towards the end of this letter.

At that same workshop on 5/28/2019, City Commissioner Melinda Pletcher stated that "98%" of the people she has heard from are opposed to the project. She also indicated that in actuality, it was 100% opposed from those she had heard from, and that she was just saying 98% in order to allow for the possibility that a small percentage of her constituents may support it.

Commissioner Doug Izzo, who has worked for the local chamber of commerce for 7 years, stated at a different city meeting that he has not heard from one resident or business owner in the city who is in favor of the project.

Many grassroots groups and citizens, some of which have signed this letter, are now actively engaged with door hangers, yard signs, pickets and continuing presentations and protestations at public meetings of city commissions and councils. There is organized opposition in all three cities that this 11 mile project runs through.

We ask the FTA to also note the following: if the project were to instead terminate at 75th Avenue in St. Pete Beach, an option which is now actively being discussed by PSTA and the City of St. Pete Beach, the project would be shortened by approximately 2.5 miles. The project length would then be only approximately 8.5 miles.

Our fears of misrepresentation by PSTA to the FTA are valid, given recent misrepresentations to local stakeholders, past misrepresentations to FEMA, which determined that PSTA had in fact misrepresented how it would use federal grant funds provided by FEMA/DHS.

AMERICAN OVERSIGHT

4. PSTA has failed to meet a key financial requirement that the FTA imposes

The CABRT project is subject to the document "Final Interim Policy Guidance" for the CIG program which the FTA published in June of 2016. Page 50 of that document, under "Small Starts Final Interim Policy Guidance," states the following:

> *FTA requires that project sponsors obtain commitments of at least 50 percent of all non-CIG funds within three years of a Small Starts project's advancement into PD.*

PSTA has not met this requirement ("the 3-year requirement"). We say so for the following reasons:

(ii) According to their current capital budget, PSTA itself has committed funds to the CABRT project [attachment #6]. PSTA has thus, at most, committed $5,199,640 in eligible funds. The State of Florida Department of Transportation ("FDOT") has promised to match dollar for dollar whatever funding commitments PSTA can secure, excluding FTA grants.

PSTA thus has a total commitment of, at most, $10,399,280 in what the FTA calls "local funds." This is simply the above figure of $5,199,640 multiplied by two. This upper limit of non-CIG funds committed to date is based on the assumption that the FTA will determine that the City of St. Petersburg did not commit any eligible funds in meeting the 3-year requirement in its 9/7/2017 resolution, as laid out previously in this letter.

Referencing again the attached excerpt of PSTA's own current capital budget, the non-CIG portion of the project cost will be $42,166,663 minus FTA's contribution of $20,360,000, which is an amount equal to $21,806,663.

The $10,399,280 in "funding commitments" is thus only 47.69% of the needed non-CIG funds of $21,806,663. This is far below the 3-year requirement of 50%.

FTA's own policy guidance says that if a sponsor does not meet the 3-year requirement, the *"FTA would withdraw the project from the Small Starts program."* We therefore respectfully request that the FTA withdraw the CABRT project from the Small Starts program, pursuant to your own policy guidance.

Next year, PSTA's budget will likely show an additional $1.5 million appropriated for the CABRT project because the City of St. Pete Beach will not commit funds to the project (as discussed above). PSTA CFO Deborah Leous showed that additional $1.5 million cost in a very recent presentation.

However, there has been no official PSTA board action to actually commit those funds. Had the board done so by April 15th, the 3-year requirement would have been met. But the board did not do so, and thus FTA's own 3-year requirement has not been met.

AMERICAN OVERSIGHT

For its city council meeting on 6/13/2019, the City of St. Petersburg has on its agenda the approval of an interlocal agreement with PSTA. The resolution purportedly provides $4 million in funding for the CABRT project. Should the resolution pass (we expect it will), please examine the resolution very closely for how much is actually committed, for what purpose, and with what geographic restrictions.

For example, the Intown Community Redevelopment Agency ("CRA") mentioned in the resolution is authorized to spend money only within its geographic boundaries. Note that the proposed route that runs within the City of St. Petersburg runs mostly *outside* of the CRA.

PSTA may argue that CRA funds will only be spent within the CRA and other funds will be spent outside of CRA. However, funds should properly be committed to the project itself, not to specific geographic portions of the project where those portions are specified by the funds committor. The FTA does not commit funds to specific geographic portions of the project or specific cost centers, and neither should other participants.

We do not believe that the City of St. Petersburg's proposed "geographic allocations of funds" is allowed under Small Starts program because it would make a complex mess of any Small Starts project. If it were allowed, one can easily imagine a scenario where a project is almost complete, funds are available to complete the project, but the project *won't* be completed because the funds available may not legally be used in the geographic area where the project is not yet completed.

We therefore ask that the FTA closely scrutinize this major portion of purported local funding.

5. PSTA is in poor financial condition, contrary to what it has told the FTA

In April of this year, the PSTA board voted to start spending capital reserves to fund operations. In a 5/29/19 presentation [attachment #7] to the PSTA board, PSTA's CFO Deborah Leous referenced that decision in her first bullet point on the slide numbered 1, and made it clear in the title of the slide numbered 3 that *capital* reserves are being spent to fund operations. We have included the relevant slides from Leous' presentation, namely slides 1, 2, 3, 6 and 11.

In its "Streamlined Financial Plan" as part of its Small Starts Application dated 9/7/2017, PSTA represented to the FTA that PSTA *"is in good financial condition."* They did so in a bullet point in the introduction on the page that is numbered 1. However, we are not aware that PSTA has updated the FTA about its rapidly deteriorating financial situation since the time it submitted that document. For example, the ending balance of the capital reserve at the end of FY2022 has worsened from -$8.6 million to -$12.1 million (see the slide numbered 3 in the presentation).

On the slide numbered 6, PSTA acknowledges that spending reserves on current operations will leave PSTA at below $1 million in reserves by the end of FY2021. We think they will run out of reserves before the end of FY2021 because new and unplanned expenses keep emerging. As just one example, just this month PSTA reached an agreement with the bus drivers union for driver enclosures on all their buses after a driver was stabbed to death in a neighboring county. This expense alone will cost $840,000 - $1,050,000, according to PSTA.

AMERICAN OVERSIGHT

Slide 11 of Leous' presentation lists capital expenses that are not funded, a list that begins with "Maintaining State of Good Repair." PSTA thus wants to incur additional operating expenses of several million dollars per year by embarking on this CABRT project while it is spending reserves to fund operations and has not even funded critical items.

Simply put, PSTA is on track for insolvency. The CABRT project would cost PSTA $4 million more per year, as they hope for new funding sources. However, as others have noted, "hope" is not a strategy. PSTA is already at its statutorily allowed maximum millage cap. The signatories of this letter are all of widely different political views, yet all recognize that under a newly elected Republican governor and a Republican legislature, it is especially unlikely that the state will bail a transit agency out of its own self-created financial crisis.

Perhaps the county will provide additional capital funds and/or operating funds for PSTA, but it has not done so to date. If PSTA does not secure new operating funding, it will have to cut service, leading to fewer riders in the network and possibly fewer riders on the proposed CABRT. These are all important considerations for the FTA to be aware of.

We would be remiss if we did not point out to the FTA that the Central Avenue BRT project is also simply not a very good investment of scarce transit dollars. The core of the proposal is faster travel speeds through four main tools: eleven directional route miles of dedicated bus lanes, off-vehicle fare collection, longer distances between stations/stops, and limited traffic signal preference.

However, as the experience with “BRT-Lite,” such as the Los Angeles County Metropolitan Transportation Authority’s “Metro Rapid” has shown, 75% or more of the speed advantage of "BRT-Heavy" dedicated lanes can be captured through the limited stops and traffic signal preference alone.

A recent PSTA project document (St. Pete Beach Interlocal Agreement Workshop, Tuesday, May 28, 2019) claims “over 1,500 new riders” per day, which is not a very high return for a $41.35 million expenditure, particularly since the never-considered BRT-Lite option, which would cost only a small portion of the BRT-Heavy option, would likely produce most of that gain. That gain can be achieved without having to explain to the 700+ auto drivers/lane/hour who lose an arterial street lane why there is a dedicated lane for four BRT buses/hour, which will lead to traffic congestion, unauthorized vehicles in the dedicated lanes, confused tourists, and improper and dangerous turning movements.

We ask the FTA take cognizance of the fact that this project sponsor is not very honest, has not met the program requirements, and should not be allowed to proceed. Allowing the CABRT project to proceed would send the wrong signal to other transit agencies, and wastes everybody's time and resources (including PSTA's) by unnecessarily prolonging the local battle that has arisen over this deeply unpopular project.

AMERICAN OVERSIGHT

We summarize by repeating the list that began this letter and ask the FTA to take note of:

1. PSTA's misuse in 2014 of 80% of FEMA federal grant funds it received
2. The local funding commitments are being misrepresented by PSTA to the FTA.
3. There is considerable local organized opposition to this project.
4. PSTA has failed to meet a key financial requirement that the FTA imposes.
5. PSTA is in poor financial condition, contrary to what it has told the FTA.

Thank you in advance for your anticipated action. Should you have any questions or need any more information, you may reach us by sending e-mail to ftamail@rask.com.

AMERICAN OVERSIGHT
~~~~~~~~~~~~~~~~

Our Framework recommendations are highlighted in blue

Framework Principle 1 - **Agency Choice, Administrative Structure and Regulations: Maximum Flexibility.** While there is no universal panacea, the best practice is to select the option with the most regulatory flexibility. To adapt quickly to unknown future circumstances, regulatory mandates and requirements should be flexible wherever possible.

Even while approval and regulation of the adult-use MMTCs [*sic*] is kept in the Department of Health, the authorization for adult-use is authorized by the Department of Business and Professional Regulation. This curious agency intervention raises questions of the extent and scope of the approval for each, and whether DBPR should not (or would not) require additional authority in order to make a meaningful determination.

While we typically recommend authority be vested in one agency where possible, we also emphasize the importance of evaluating the constraints of each available option. Here, Department of Health is tasked with regulatory functions that make it well-suited to issue rules on testing and product safety requirements, they likely are not the best choice to enable a fledgling industry to establish new and innovative products in this emerging marketplace.

DBPR, by contrast, has the advantage of applicable institutional experience for adult-use cannabis by virtue of its regulation of alcohol and tobacco.

We recommend the adult-use section be properly developed and comprehensively established in the proper code sections relating to Business and Professions expertise, with meaningful substantive direction to develop a cannabis business authorization - independent of Department of Health's medical-specific regulatory scope.

Given the need to reform the medical system in light of the Amendment 2 litigation, it may be possible to design both systems in the same bill - but far more work is required.

Framework Principle 2 Demand: Maximum Access to Safe, Quality Products

Despite repealing the vertical integration mandates and quantitive caps, ostensibly opening the market, there are numerous remaining mandates that, in aggregate, pose a serious risk to a functional legal market.

Paragraph f(III) on page 27 requires the date sold or dispensed to be included on the packaging label. By moving to a multi-tier system, this is almost impossible. Cultivators and processors are responsible for packaging and labeling; dispensaries are prohibited from repackaging. There is no way for the wholesaler to know when the retailer will dispense a unit
of inventory and include that date on the packaging.

AMERICAN OVERSIGHT

Paragraph 12 on page 28 requires each edible to be individually sealed. This is unusual, since edibles normally come in sealed 10-packs. Also, why are edibles still excluded from qualifying as medical marijuana under Section 2? If anything, edibles are among the healthiest forms of consumption for a medical product.

Onsite consumption is expressly prohibited in paragraph 6 on page 30. Michigan just created the first state-level license for tasting rooms and several cities (e.g. Denver, San Francisco) have created municipal-level licenses. With penalties also assessed against consumption in public areas, the unavailability of public consumption spaces can become a significant barrier in states, like Florida, that have a large volume of tourism. Tourists, convention-goers, and others will have nowhere to legally consume. Also, the penalties for public consumption (page 48) should be reduced from a misdemeanor to a civil fine.

Framework Principle 3 -: Minimum Qualification Criteria for State Licensing.

A way of avoiding complications is to not limit the number of licenses available, but to award them to all applicants who meet certain minimum criteria, such as the lack of a criminal history.

Instead, the bill requires applicants prove the 'capacity to engage' in the very activities that will be regulated - a duplicative and arbitrary barrier that risks unnecessary rejection. Several required items simply cannot be proven definitively before the fact. For instance, what constitutes "proof" that the MMTC has the capability to comply with seed-to-sale tracking requirements? Does acquisition of a software license constitute "proof?" How can a cultivation applicant prove they can establish the necessary infrastructure, and how would the department even be able to evaluate what infrastructure is needed? What constitutes "proof of the applicant's financial ability to maintain operations for the duration of the registration?" Does a financial projection that includes prospective revenues count as "proof?" If not, then this requirement would essentially amount to an insanely high capitalization requirement that shouldn't exist to begin with.

The registration requirements for MMTCs starting on page 17 includes "The physical address of each location where it will apply for a facility permit to cultivate, process, dispense, or store marijuana." A prospective licensee will likely not know these addresses prior to applying and will have difficulty raising the capital necessary to acquire property or property leases without having first acquired a license. Therefore, we recommend that a provisional license be made available, and upon receipt of a provisional license, the licensee can have a period of time (6 or 12 months) to name a specific address and make the license permanent. Nevada and Michigan have followed similar procedures.

The requirement for all principals, employees and contractors to receive state-issued marijuana agent cards before they can begin work has been problematic in other states. Regulatory agencies in Colorado and Nevada did not have the capacity to process the large volume of initial applications once the markets went live. This tied up the labor market for nearly a year in Nevada, where licensees were unable to hire workers because of the backlog of applications with the state. The best approach is the one pursued in California, where it is the licensee's

AMERICAN OVERSIGHT

responsibility to conduct background checks and issue identification cards for every employee/contractor/principal and to retain all the relevant documentation showing these individuals met minimum state requirements. The state can audit and penalize licensees that don't follow these requirements correctly. But, this approach removes a significant burden from the regulatory agency and allows the market to remain dynamic.

Framework Principle 4 - **Local Government Control.** Conflicting desires create the need for a delicate balance between allowing local communities the autonomy to self-govern, while also ensuring those with minority views do not become marginalized. Local governments' level of autonomy for marijuana licensing must be balanced against the needs of patients and recreational consumers.

The draft ostensibly preempts local authority but then allows bans and additional nonsensical restrictions.

The original statute only allowed local governments to prohibit dispensaries within their borders. This new draft also allows them to limit the number of dispensaries (para. 7 on page 38). Capping the number of licenses is a recipe for public corruption, as seen recently in Nevada. The market is the best determinant of how many dispensaries should exist. The same paragraph also allows a local government to levy their own taxes on a dispensary, but does not restrict the rate. There should be a maximum rate spelled out in statute.

Framework Principle 5 - **Product Testing.** Generally, we recommend that states require testing procedures for marijuana products, but also allow licensees the latitude to adapt those procedures to fit within their unique production methods so long as they satisfy certain objective safety standards.

In some ways, the current draft achieves this end, but in other more important aspects, it risks implementation errors. While MMTCs can be exempted from using licensed testing labs before they are available, they must perform the acts themselves.

Moreover, Pages 26-27 state: "An MMTC may use a laboratory that has not been certified by the department under s. 381.988 until such time as at least one laboratory holds the required certification." What if the only licensed lab in in Pensacola and the inventory is in Miami?

With the Department of Health's statutory authority to ensure "safe products", the result may be no market at all.

Framework Principle 6 Medical-specific policies: Physician-Patient Empowerment.

The adult-use system is clearly an afterthought in the current bill. From foundational issues of agency choice and license supply to practical market and business concerns, the current tacking on of adult-use authorization to the still-suboptimal medical policy. Why are they still called MMTCs if they are authorized

AMERICAN OVERSIGHT

for adult use at all, and why subject them to any of the medical-specific rules, justified or otherwise?

AMERICAN OVERSIGHT

Details

Highlights:

1. Removes requirement for MMTCs to carry low-THC cannabis products. So long as high-THC products remain available, the low-THC requirement is likely to be a costly mandate for producing and carrying goods at a financial loss. Low-THC cannabis products are better regulated within the state's structure for industrial hemp and its derivatives.
2. Prudent controls on local governments: They may not ban deliveries even if they have banned retail dispensaries. This ensures people will still have access to safe, legal products. They also can't govern the locations of cultivators or processors (para. 5 on page 38).
3. Removes the requirement for vertical integration. It appears MMTCs will be able to apply for licenses to fill whichever stages of the supply chain they are best at.

Areas of Concern:

1. The distinction between medical and adult-use licensing is artful, but clunky. The bill draft calls little attention to the fact it authorizes adult-use, but it's also unclear how adult-use licenses will be issued by the Department of Business and Professional Regulation. It's productive to consolidate the rules between the two regimes to whatever extent possible to avoid confusion, and to exempt medical marijuana from excise taxation. However, there should likely be more detail on adult-use, especially including the tax rate.
2. Why are edibles still excluded from qualifying as medical marijuana under Section 2? If anything, edibles are among the healthiest forms of consumption for a medical product.
3. The requirement for all principals, employees and contractors to receive state-issued marijuana agent cards before they can begin work has been problematic in other states. Regulatory agencies in Colorado and Nevada did not have the capacity to process the large volume of initial applications once the markets went live. This tied up the labor market for nearly a year in Nevada, where licensees were unable to hire workers because of the backlog of applications with the state. The best approach is the one pursued in California, where it is the licensee's responsibility to conduct background checks and issue identification cards for every employee/contractor/principal and to retain all the relevant documentation showing these individuals met minimum state requirements. The state can audit and penalize licensees that don't follow these requirements correctly. But, this approach removes a significant burden from the regulatory agency and allows the market to remain dynamic.
4. Paragraph 2 on page 16 says "Each MMTC may use its own seed-to-sale system until the department establishes a seed-to-sale tracking system." Does "may" mean this is an optional requirement until the state's system is live? Also, the entire point of seed-to-sale software is that the transfers of inventory are reconciled across the universe of licensees by a central database. Not much is accomplished by requiring each licensee to retain their own tracking database.

AMERICAN OVERSIGHT

5. The registration requirements for MMTCs starting on page 17 includes “The physical address of each location where it will apply for a facility permit to cultivate, process, dispense, or store marijuana.” A prospective licensee will likely not know these addresses prior to applying and will have difficulty raising the capital necessary to acquire property or property leases without having first acquired a license. Therefore, we recommend that a provisional license be made available, and upon receipt of a provisional license, the licensee can have a period of time (6 or 12 months) to name a specific address and make the license permanent. Nevada and Michigan have followed similar procedures.
6. Several required items for registration of an MMTC on pages 18 and 19 require “proof” of items that cannot be proven definitively before the fact. For instance, what constitutes “proof” that the MMTC has the capability to comply with seed-to-sale tracking requirements? Does acquisition of a software license constitute “proof?” How can a cultivation applicant prove they can establish the necessary infrastructure, and how would the department even be able to evaluate what infrastructure is needed? What constitutes “proof of the applicant’s financial ability to maintain operations for the duration of the registration?” Does a financial projection that includes prospective revenues count as “proof?” If not, then this requirement would essentially amount to an insanely high capitalization requirement that shouldn’t exist to begin with.
7. Paragraph 8(b) on page 23 stipulates that marijuana be cultivated in an enclosed facility. Does a greenhouse with a vented roof count as enclosed?
8. Pages 26-27 state: “An MMTC may use a laboratory that has not been certified by the department under s. 381.988 until such time as at least one laboratory holds the required certification.” What if the only licensed lab in in Pensacola and the inventory is in Miami?
9. Paragraph f(III) on page 27 requires the date sold or dispensed to be included on the packaging label. By moving to a multi-tier system, this is almost impossible. Cultivators and processors are responsible for packaging and labeling; dispensaries are prohibited from repackaging. There is no way for the wholesaler to know when the retailer will dispense a unit of inventory and include that date on the packaging.
10. Paragraph 12 on page 28 requires each edible to be individually sealed. This is unusual, since edibles normally come in sealed 10-packs.
11. Onsite consumption is expressly prohibited in paragraph 6 on page 30. Michigan just created the first state-level license for tasting rooms and several cities (e.g. Denver, San Francisco) have created municipal-level licenses. With penalties also assessed against consumption in public areas, the unavailability of public consumption spaces can become a significant barrier in states, like Florida, that have a large volume of tourism. Tourists, convention-goers, and others will have nowhere to legally consume. Also, the penalties for public consumption (page 48) should be reduced from a misdemeanor to a civil fine.
12. The delivery rules in pages 34-36 include no restrictions on signage of a transport vehicle. Since this is an industry that transports large volumes of cash, there can be a legitimate public safety concern if transport vehicles are wrapped or marked with cannabis labeling.

AMERICAN OVERSIGHT

13. Paragraph 4(b) on page 37 restricts a cultivation or processing facility from being within 1,000 feet of a school, child care facility, etc. This restriction may make sense for a dispensary because it is open to the public. But cultivation and processing centers are enclosed, restricted-access locations, so the spatial restriction doesn't make as much sense.
14. The original statute only allowed local governments to prohibit dispensaries within their borders. This new draft also allows them to limit the number of dispensaries (para. 7 on page 38). Capping the number of licenses is a recipe for public corruption, as seen recently in Nevada. The market is the best determinant of how many dispensaries should exist. The same paragraph also allows a local government to levy their own taxes on a dispensary, but does not restrict the rate. There should be a maximum rate spelled out in statute.

Subject: Constitutional Amendment - FIEC Notice
Attachment(s): "FIEC Notice of Workshops and Conference on Voter Approval of Constitutional Amendments.docx"

Below is the schedule of upcoming meetings of the Financial Impact Estimating Conference. The schedule is also available on the Senate website under Additional Meetings.

Financial Impact Estimating Conference Public Notice:

Voter Approval of Constitutional Amendments

Requires all proposed amendments or revisions to the state constitution to be approved by the voters in two elections, instead of one, in order to take effect. The proposal applies the current thresholds for passage to each of the two elections.

- Public Workshop – Thursday, November 21st at 8:30 a.m. until completion; 117 Knott
- Principals' Workshop – Friday, December 6th at 1:30 p.m. until completion; 117 Knott
- Formal Conference – Friday, December 13th at 1:30 p.m. until completion; 117 Knott

In 2004, a constitutional amendment passed that requires initiative petitions be filed with the Secretary of State by February 1st of each general election year in order to be eligible for ballot consideration. This has been interpreted to mean that all signatures have been certified by the local supervisors of election and that the other requirements for geographic distribution have been met. For 2020, the required number of valid signatures is 766,200.

Section 15.21, Florida Statutes, further requires the Secretary of State to "immediately submit an initiative petition to the Attorney General and to the Financial Impact Estimating Conference" once the certified forms "equal...10 percent of the number of electors statewide and in at least one-fourth of the congressional districts required by s. 3, Art. XI of the State Constitution." For 2020, this means that there are at least 76,632 valid and qualifying signatures.

Because the Legislature passed CS/CS/HB 5 during the 2019 Session and it is has now been signed into law (see CHAPTER 2019-64), this Financial Impact Estimating Conference (FIEC) has 75 days to complete the required analyses and a financial impact statement to be placed on the ballot.

As part of FIEC's review process, three public meetings have been scheduled—a public workshop, a principals' workshop, and a formal conference. More meetings will be scheduled as necessary.

The attached document provides the dates and locations of the public meetings, as well as some explanation regarding the process.

AMERICAN OVERSIGHT

NOTICE OF WORKSHOPS AND CONFERENCE
FINANCIAL IMPACT ESTIMATING CONFERENCE

The Financial Impact Estimating Conference (FIEC) will be holding workshops and a conference on the petition initiative entitled "***Voter Approval of Constitutional Amendments (19-08)***". Unless otherwise indicated on the schedule below, all meetings will held in Room 117, Knott Building, 415 W. St. Augustine Street, Tallahassee, Florida. Once begun, they will continue until completion of the agenda.

The FIEC is required by s. 100.371, Florida Statutes, to review, analyze, and estimate the financial impact of amendments to or revisions of the State Constitution proposed by initiative. In this regard, the FIEC is now in the process of preparing a financial impact statement to be placed on the ballot that shows the estimated increase or decrease in any revenues or costs to state and local governments resulting from the proposed initiative. Because the Legislature passed CS/CS/HB 5 during the 2019 Session and it is has now been signed into law (see CHAPTER 2019-64), the FIEC will also be considering the estimated economic impact on the economy and the overall impact to the state budget.

The purpose of the Public Workshop is to provide an opportunity for sponsors, interested parties, proponents and opponents of the initiative to make formal presentations to the FIEC regarding the probable financial and economic impact of the initiative. In addition to the workshop, information may be submitted at any time to the FIEC by contacting the Legislative Office of Economic and Demographic Research (contact information below).

Voter Approval of Constitutional Amendments (19-08)

- Public Workshop – Thursday, November 21st at 8:30 a.m.
- Principals' Workshop – Friday, December 6th at 1:30 p.m.
- Formal Conference – Friday, December 13th at 1:30 p.m.

For additional information regarding the meetings, please contact the Florida Legislature's Office of Economic and Demographic Research at

Subject: criminal justice reform
Attachment(s): "Dear Legislator.docx"

Dear Senator Brandes,

My name is Lisa Antonini. I hope you remember me. I came to St Pete to meet with you at your office. My son has spent the last 13 years in a Florida prison for a crime he did not commit. I educated myself on the Felony Murder Rule, the law that forced him to take a plea deal for a murder he did not commit. I earned a Master's degree in Criminal Justice and have become an advocate for reform. My son was locked up at 18 and is now 31. He was in the wrong place at the wrong time when a friend was killed but he is NOT a murderer. I've spent 13 years educating myself and now others on topics such as wrongful conviction, harsh sentencing, overzealous prosecutors and prison overcrowding, just to name a few. We need a change. I am standing up for all that is wrong in our system and will not stop until drastic changes have taken effect. I've spent 13 years visiting prisons here in Florida and I can tell you first hand, we need major change. You can also find me on Concrete Pillow on Facebook where I consistently advocate for change.

Thank you

L.A.

Women are like teabags. You don't know how strong they are until you put them in hot water.

~Eleanor Roosevelt~

AMERICAN OVERSIGHT

Dear Senator Brandes,

As a registered voter in the State of Florida, I have concerns which I wish to see addressed and changes made. As an elected member of the Florida Legislature, I implore you to actively represent your constituents and their concerns regarding our criminal justice system, as listed below:

- Why is our criminal justice system releasing prisoners without providing the tools needed to live a productive life? In fact, our current system tends to make them more violent and less able to cope after release. (source: Ocala Star Banner 8.2.19)
- Why are prisoners being deprived of even the chance of rehabilitation? Instead, state prisons are warehouses of anger, violence and desperation. (source: Ocala Star Banner 8.2.19)
- Why do we keep pumping money into a broken system? Other "tough on crime" states have found ways to keep the crime rate low, while at the same time reducing the prison population and closing prisons (i.e. Georgia and Texas).
- Wardens allege that salaries are too low; shifts are too long, working conditions are poor and prison violence is increasing. Perhaps a hard look at our criminal justice system and some common sense might bring about fewer prisons, so the money spent could be reallocated on salaries, programs and education. (source: Gate House Media)
- Why are there more and more incidents of prison guards, sworn to uphold the criminal justice system, violently beating inmates, causing severe, permanent and even life threatening injuries? When an investigation ensues, the same guards are "re-assigned" instead of criminally charged?
- Would you consider spending your days and nights in a concrete building with no air conditioning and limited ventilation? If we treated an animal like that we would be subject to arrest for animal cruelty. Why is it acceptable to treat inmates like that?
- When you see prisoners, do you see them as fellow human beings with a chance at redemption or as lost causes?
- Why is there little or no money allocated toward GED, vocational education, substance abuse or mental health programs? Creating a light at the end of the proverbial tunnel for the inmates. Don't you think this might reduce some of the violence?

I would ask that you appoint a committee to oversee our criminal justice system and find ways to make our system more productive for all, a top down approach. From the courts, harsh sentencing laws, antiquated and unfair laws (i.e. Felony Murder Rule), overzealous prosecutors, prison conditions, prison staff and disciplinary actions, substandard food, inmate education and air conditioning to name a few categories. Focus on rehabilitation in lieu of warehousing inmates. Florida needs to get with the program. Our system is too fractured to do any good. It's time for a change.

AMERICAN OVERSIGHT

Elections are just around the corner and we, the voting public want answers and change. The second look approach is taking too long, I'm sorry to say. Too many inmates are dying or being beaten.

Have you ever visited Florida's prisons and seen the terrible conditions? We are all starting to see bootleg videos filmed by inmates, aired by media outlets and word is spreading.

Good afternoon,

I am not sure I copied everyone who asked for data, so please feel free to share this email as needed.

The Department of Corrections' (DOC) contract with Centurion can be viewed here: https://facts.fldfs.com/Search/ContractDetail.aspx?AgencyId=700000&ContractId=C2869&Tab=1 . Navigation of the site is pretty straightforward, but if you have questions please let me know.

Prison population is tracked and projections are determined by the Criminal Justice Estimating Conference (CJEC). We conferenced most recently on December 17, 2019. You can see the CJEC work papers here: http://edr.state.fl.us/Content/conferences/criminaljustice/workpapers.pdf . The work papers include historical information on prison population as well as projections through FY 2024-25.

The location of prison facilities are here: http://www.dc.state.fl.us/ci/index.html .

I know you have seen the Health Care Study conducted by CGL, dated November 13, 2019, but I am attaching it to this message for ease of reference.

Finally, there was a Study by Northhighlands related to Health Services, dated October 19, 2017. I am attaching that as well.

Please let me know what else you need and I will get it to you as soon as possible.

I. Executive Summary

The Florida Department of Corrections (FDC), also referred to in this report as the "Department", engaged North Highland to analyze and provide a recommendation for the most effective delivery model for insourced inmate health services. Specifically, the Department identified two options for a health services delivery model. Both options include an insourced model for "inside-the-gate" medical services and staff.

Option 1 provides "outside-the-gate" services to be provided through individual FDC-managed contracts with specialists and hospitals (similar to the model utilized prior to outsourcing in 2013). Option 2 provides " outside-the-gate" services through a provider network (e.g. PPO/HMO/TPA model). The scope of this study was limited to comparing these two options and to recommend the optimal model.

The findings of this study incorporated research and analysis of Department data; a market scan research of corrections health services in Ohio, New York, North Carolina and Pennsylvania; Department executive leadership interviews; site visits to three Department-selected correctional institutions that have specific health services focus; in-depth research to compare services and cost for insourcing and outsourcing models; and a competitive market wage analysis of selected health care workforce positions in Florida.

The study includes the following:

- Analysis of inmate population
- Timeline of correctional health services privatization in Florida
- Summaries of executive leadership interviews and site visits
- State market scan findings
- Cost analysis of both options
- Cost analysis of staffing
- Summary of other opportunities for cost efficiencies
- High-level overview of key transition activities

In Section VI of this study, both delivery model options are described in detail including the advantages and disadvantages of each. Section VII provides a thorough cost analysis of each option, identifying key differentials in cost build-up between the two models.

The key finding of this study is that Option 2 (PPO/HMO/TPA model) is the most effective model for insourced inmate health services. The finding is primarily due to the following:

- Option 2 would provide better contractual rates for specialty and hospital services
- Option 2 is a more cost-effective way to access state-of-the art technology and expertise
- Option 2 has greater potential for long-term cost containment
- The cost analysis showed projected cost savings associated with Option 2

An additional finding of this study is that the health services staffing levels are inadequate with significant deficiencies found in performance and accountability reporting, most notably in the mental health discipline.

AMERICAN OVERSIGHT

II. Purpose

The purpose of this Health Services Study is to analyze potential health services delivery models that the Department could pursue to provide the most cost-effective adequate health services to Florida's inmate population.

Currently, the Department is engaged in a competitive solicitation process to re-procure its contracts for privatized comprehensive health services. The goal of this re-procurement effort is to create cost efficiencies and enhance elements of the health care services provided to inmates, which include:

- The ability to ensure that appropriate staffing is provided by contractors that enables:
  - A proper mix of administrative and institutional-level direct care
  - The presence of medical staff who possess the proper skills and qualifications to provide adequate health care to the inmate population
  - Clinical oversight and supervision
- The ability to define expectations and best practices for utilization management and specialized care delivery
- Access to specialized resources and expertise to provide services to inmates in inpatient mental health units and special housing
- Implementation of electronic health records to support decision making, create cost efficiencies and improve the provision of comprehensive medical, hospital, dental and mental health services while ensuring a continuity of care
- Improved coordination of medical and mental health re-entry planning
- The ability to define performance expectations and consequences for non-performance

The Department's current health services delivery model is entirely outsourced (contracted with a single private vendor). This Health Services Study analyzes options for future delivery models through a public-private partnership that involve a combination of Department health services staff providing primary and infirmary-level care inside the gate, and a contract or contracts with private sector organization(s) for the provision of specialty care, hospital care, and related utilization management and claims processing functions. In this study, the following two health services delivery models are examined:

1. An insourced model for all primary and infirmary-level care provided inside the gate, with all specialty and hospital care provided through individual contracts with specialists and hospitals (the model primarily employed by the Department before the statewide outsourcing initiative was implemented in 2013). The analysis includes a recommendation on whether utilization management and claims processing/bill pay functions are best handled by Department staff, or through a third party contract
2. An insourced model for all primary and infirmary-level care provided inside the gate, with all specialty and hospital care, and related utilization management and claims processing functions provided through a PPO/HMO/TPA model

The outcome of this study will be 1) analysis and estimation of the costs to provide comprehensive inmate health services under each delivery model and 2) a recommendation of the optimal model.

Project Scope

Through the release of the Request for Quote (RFQ), the Department sought a qualified consulting firm to complete a Health Services Study by developing a report to include the analysis of health services delivery models. The Health Services Study adheres to the requirements set forth in the Statement of Work.

Items within scope include:

- Review of Department resources and market scan research
- Interviews with Department stakeholders, agency leadership, and Division Directors
- Site visits to selected institutions
- Research and analysis
- Examining insource models
- Staff and market wage analysis

AMERICAN OVERSIGHT

III. Background

A. Inmate Health Services

The Florida Department of Corrections is the third largest prison system in the United States, responsible for the housing and health of over 90,000 inmates. The Department is constitutionally required to provide adequate health services to inmates housed in its prisons and in other facilities throughout the state. This requirement is the result of two landmark lawsuits: *Estelle v. Gamble* and *Costello v. the State of Florida*. In the U.S. Supreme Court case *Estelle v. Gamble* (1976), the court determined that deliberate indifference by prison personnel to an inmate's serious illness or injury constitutes cruel and unusual punishment contravening the Eighth Amendment. As a result of this case, Federal laws were developed to mandate adequate medical care for those who are punished by incarceration.[1] Additionally, a federal court ruled in *Costello v. the State of Florida* (1977) that inmate health services are a constitutional right.[2] Consequently, when offenders are admitted to the Department's prisons, the State becomes responsible for providing their health care.

As of June 30, 2017, there were a total of 97,794 inmates across more than 150 facilities statewide, including 61 major institutions and annexes, 7 private facilities, and dozens of work camps, road prisons, forestry camps, and a basic training unit. Of this, 87,656 inmates were housed in Department-run facilities.[3]

The Department divides the state into four regions, designated as: Region 1 (Northwest Florida), Region 2 (Northeast-Central Florida), Region 3 (Central Florida), and Region 4 (South Florida), as illustrated in the Exhibit below.

1 Estelle v. Gamble, 420 U.S. 97, S. Ct. 285, 50 L.Ed.2d 251 (1976)
2 Costello v. Wainwright 430 U.S. 325, 51 L.Ed. 2nd 372, 97SCt. 1191 (1977)
3 Florida Department of Corrections Bureau of Research and Data Analysis data, Inmate Population and Facility profile as of June 30, 2017. The inmate population in FDC-run facilities excludes the inmate population at the state's seven (7) privately-run prisons which are managed by the Florida Department of Management Services (DMS): Bay, Blackwater, Gadsden, Graceville, Lake City, Moorehaven, and South Bay correctional facilities. http://www.dms.myflorida.com/business_operations/private_prison_monitoring

AMERICAN OVERSIGHT

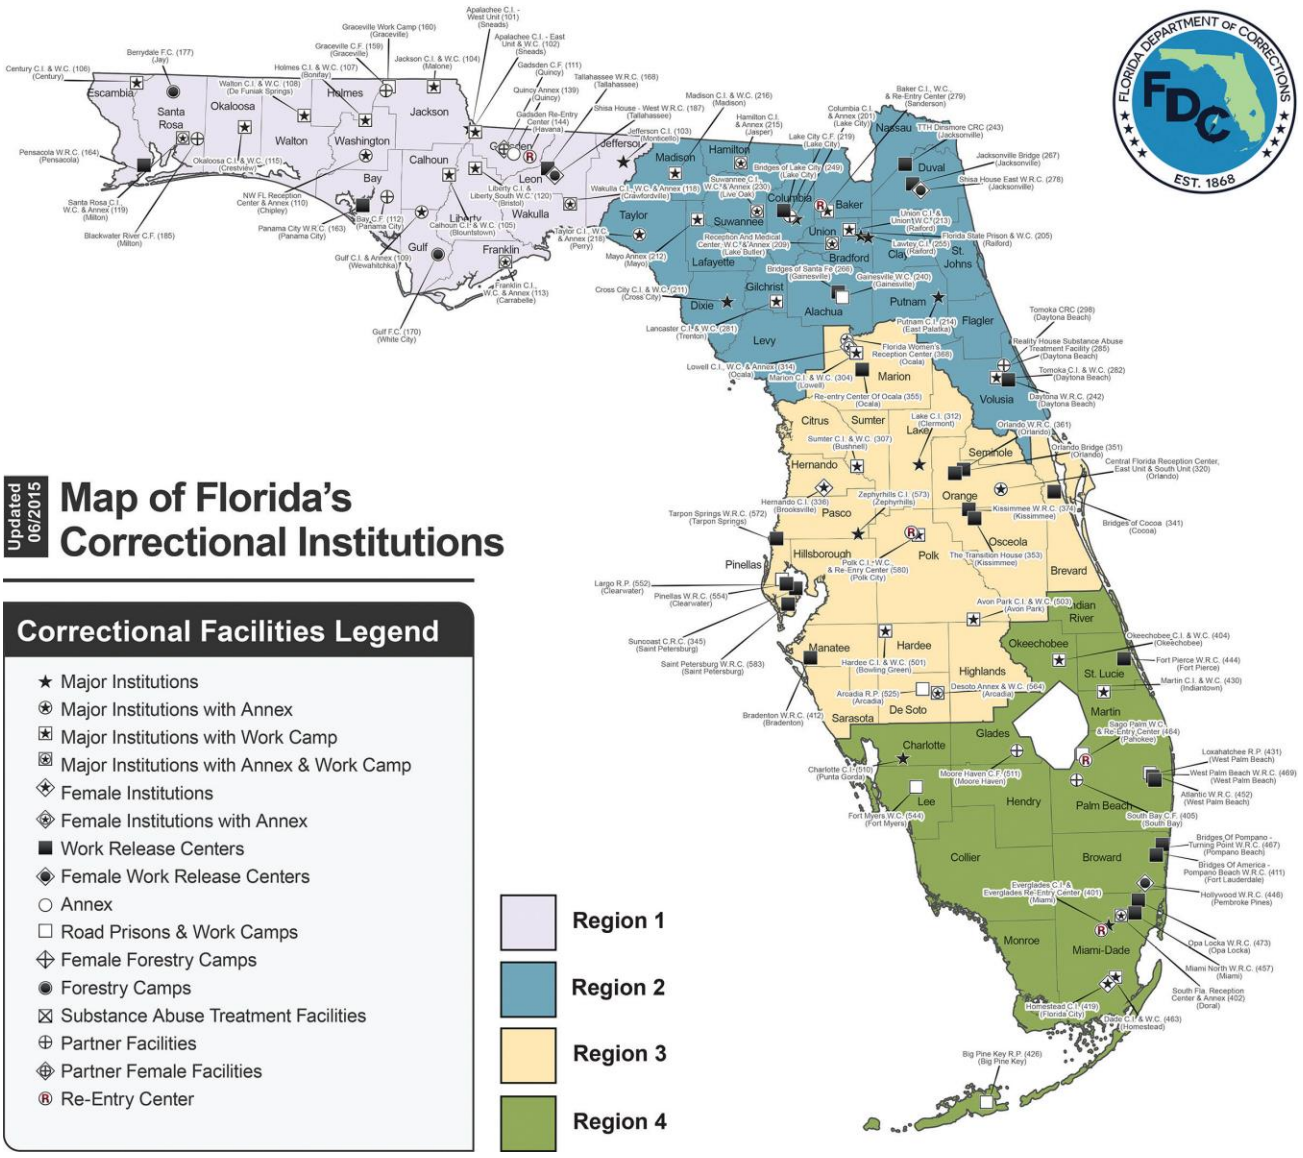

Exhibit 1.1 Map of Florida's Correctional Institutions

Each of the Department's major institutions provide primary care and infirmary services. For more acute medical conditions and procedures that cannot be provided inside-the-gate, the Department operates a 153-bed hospital at the Reception and Medical Center (RMC) in Lake Butler. The RMC facility houses a dialysis center, a mobile surgery unit, a cancer center, and other specialty services. The Department also makes use of secure hospital units with two community hospitals throughout the state: Larkin Community Hospital in Miami-Dade County and Memorial Jacksonville Hospital in Duval County. These hospitals provide dedicated bed space in a secured environment (e.g. guard stations, etc.) where inmates can be treated in an inpatient setting with lower security costs. When the use of any of these facilities is not feasible, inmates are treated in local community hospitals, accompanied by at least two correctional officers around the clock.

In addition, all inmates have access to necessary dental and mental health services. The Department provides dental services and inpatient and outpatient mental health services to inmates in its institutions. There are 63 Dental Clinics in Department-run institutions (with 7 Dental Clinics in private facilities) and 10 mental health inpatient units statewide.

Currently, inmate health services in Florida are privatized and outsourced to private vendors.

AMERICAN OVERSIGHT

Department Organization

The Department employs nearly 22,000 employees. Of this, the Office of Health Services (OHS) staff, managerial and support, represent less than one percent of Department employees. These positions include pharmacy staff and contract monitors. Health care professionals (doctors and nurses) are currently outsourced. The Department's OHS is responsible for the inmate health services program, and it reports directly to the Secretary of the Department of Corrections. The OHS organizational structure is illustrated in the Exhibit below.

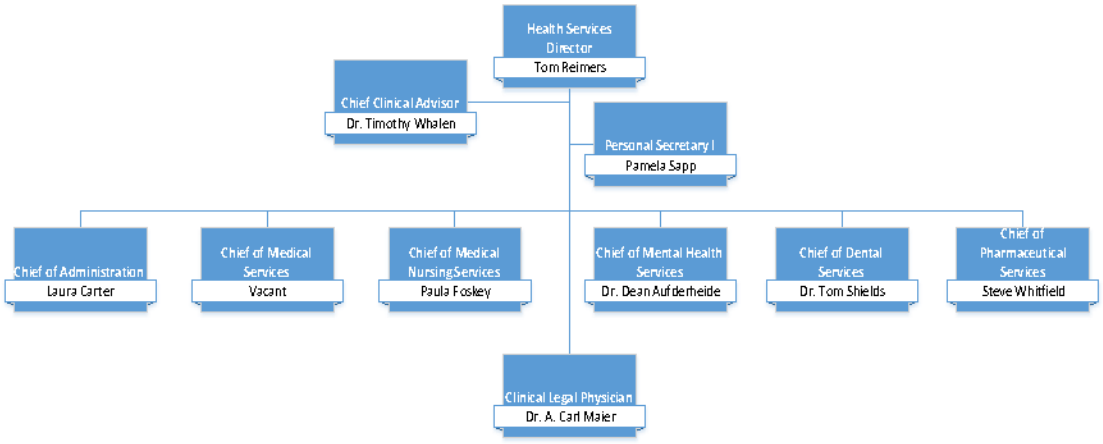

Exhibit 1.2 Office of Health Services (OHS) Organizational Structure

B. Inmate Population

The following Exhibit shows the total inmate population in Florida over the past five years. During this period, the total inmate population has changed little. The majority of inmates are male (93%) with females accounting for seven (7) percent of the population. This ratio has remained stable over time.

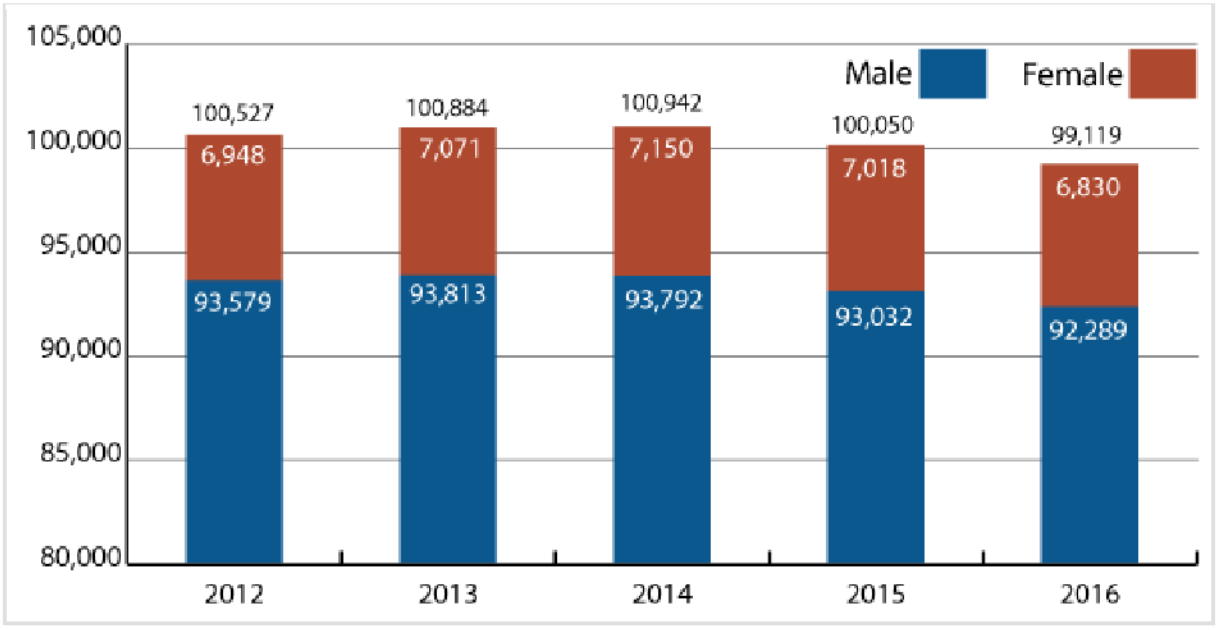

Exhibit 1.3 Inmate Population Over Five Fiscal Years
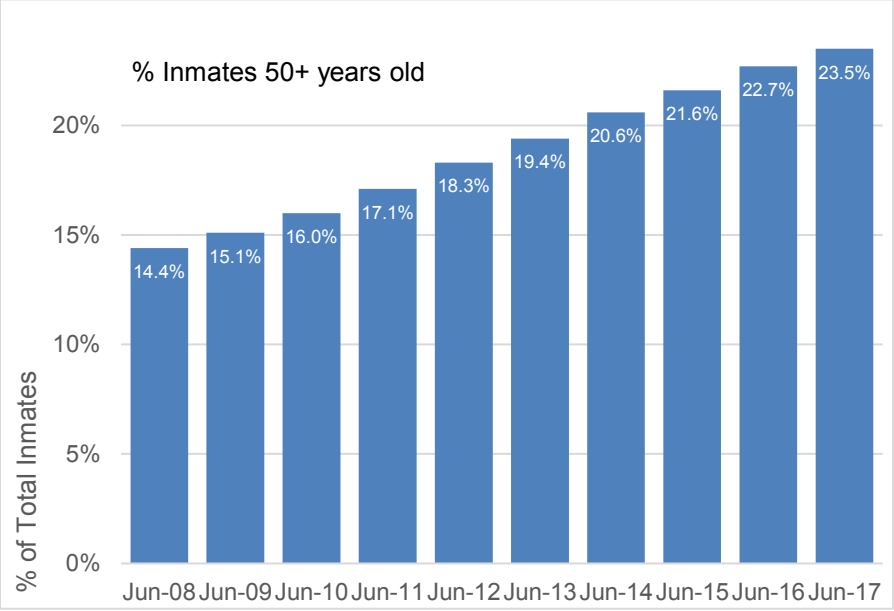
Source: http://www.dc.state.fl.us/oth/Quickfacts.html

AMERICAN OVERSIGHT

	Total Population	Males	Females	HIV Positive Inmates	Inmates 50 Years of Age or Older
Jan 2012	100,418	93.0%	7.0%	2.8%	17.8%
Jan 2013	99,831	93.1%	6.9%	2.9%	19.2%
Jan 2014	100,523	93.0%	7.0%	2.8%	20.2%
Jan 2015	100,265	92.9%	7.1%	2.8%	21.2%
Jan 2016	98,937	93.2%	6.8%	2.9%	22.4%
Jan 2017	97,475	93.2%	6.8%	2.9%	23.3%
June 2017	97,794	93.1%	6.9%	2.9%	23.5%

Exhibit 1.4 Inmate Population Composition

The inmate population in Florida has diverse and complex medical and health needs. Inmates often arrive at Florida's correctional facilities with an array of medical problems, including chronic or infectious diseases, mental health conditions, and substance abuse or alcohol disorders. Across the United States, providing health care services to the prison populations poses increasing challenges because of the growing portion of the population that is aging. Generally, an inmate above the age of 50 is classified as elderly in the correctional setting based on the types and amount of medical services needed. The elderly inmate population in Florida is nearly 23,000 and is expected to grow. According to the Pew Charitable Trusts report, *Elderly Inmates Burden State Prisons* (2016), providing health care for aging inmates costs far more than for younger inmates. Elderly inmates need more clinical visits, hospital admissions, and medications than the general inmate population. These factors disproportionally increase health services expenditures since elder health services costs range between four to eight times greater than the cost for younger inmates. Inmates in Florida prisons range from 14 to 95 years old. Most of the inmates housed by the Department are males between the ages of 18-40; however, the number of inmates over the age 50 is growing rapidly. As shown in the Exhibit below, the share of elderly inmates (50+ years old) as a percent of the total inmate population has risen dramatically over the past ten years, from 14 percent of total inmates in 2008 to nearly 24 percent in 2017. Elderly inmates will continue to increase as a portion of the total prison population.



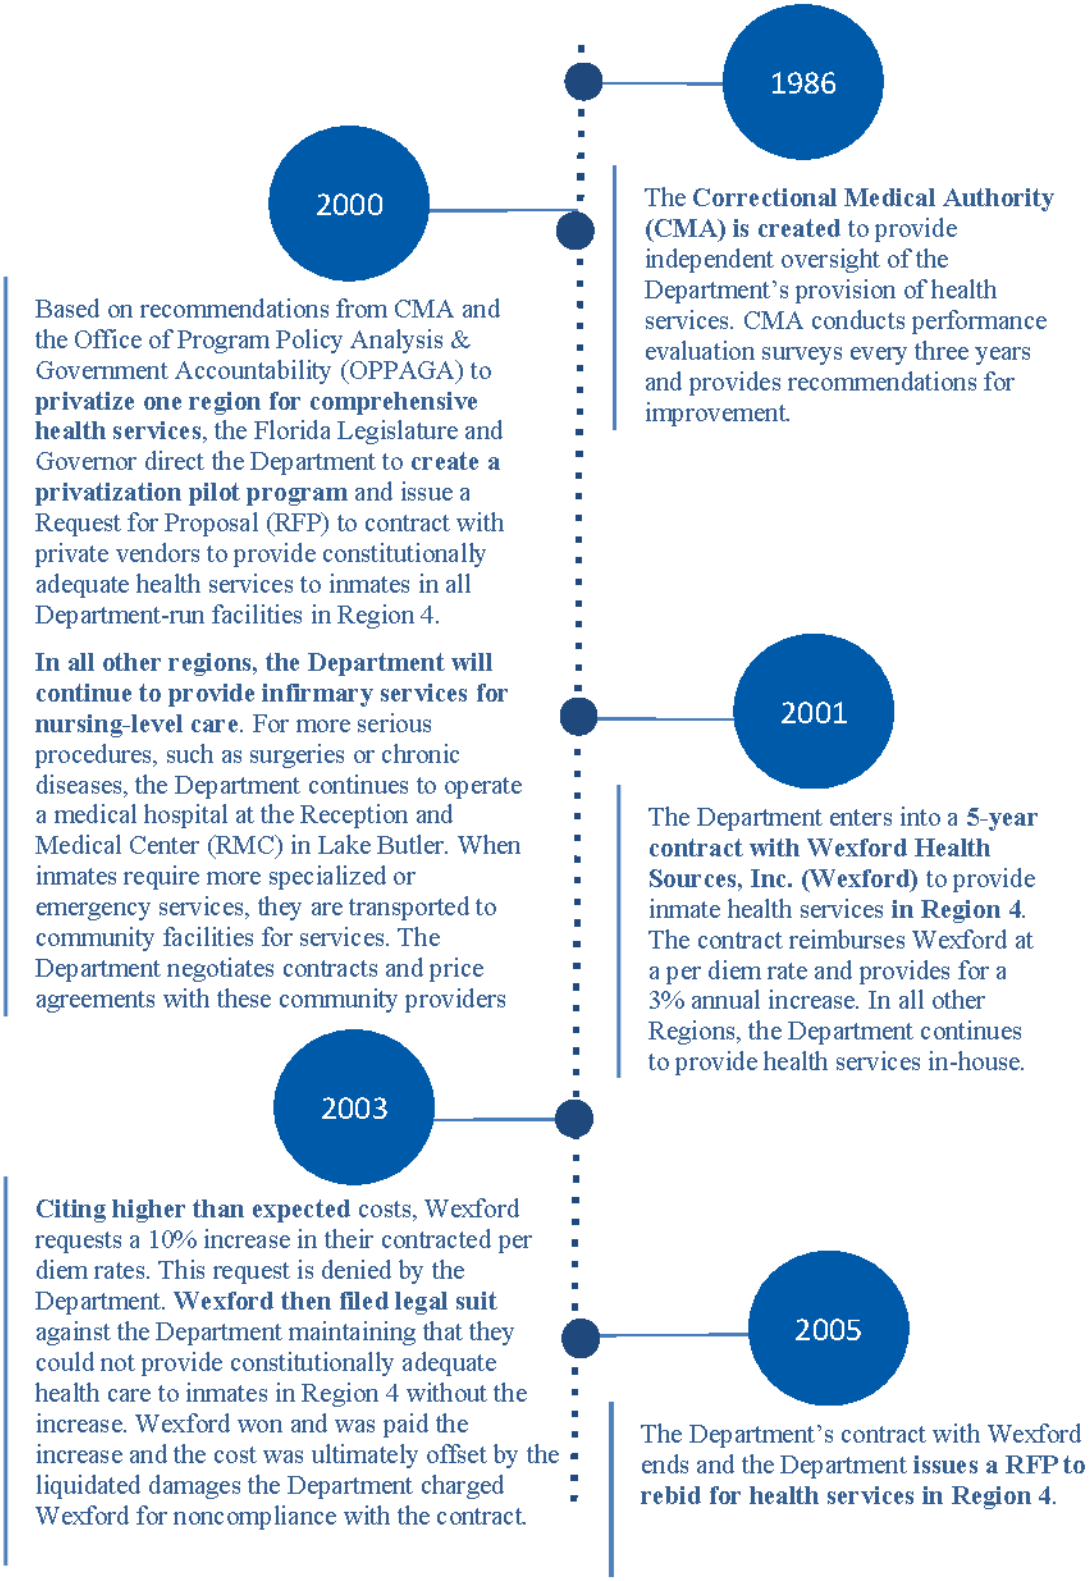


Exhibit 1.5 Florida's Elderly Inmate Population

C. Timeline of Correctional Health Services Privatization in Florida

Correctional health care in Florida has undergone major changes. The following Exhibit outlines the Department's evolution and experience with privatization.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

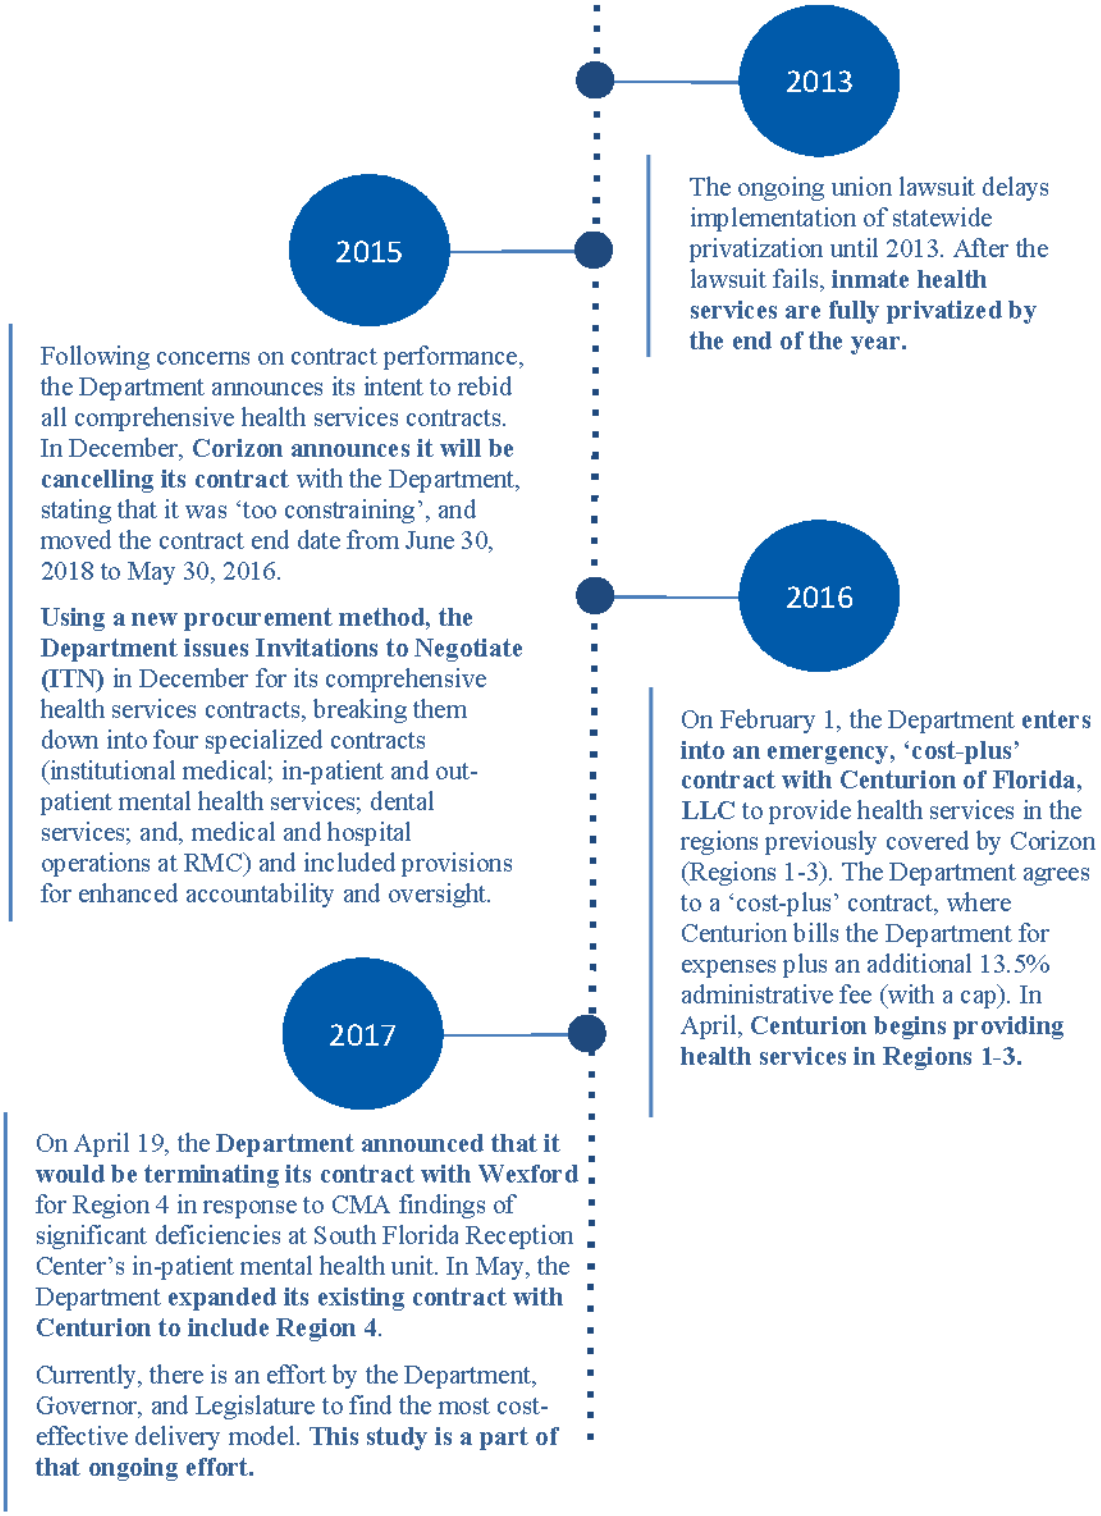

Exhibit 1.6 Timeline of Health Services Privatization in Florida

AMERICAN OVERSIGHT

IV. Research Approach

North Highland met with the Department's executive leadership to identify pertinent health services data and documentation to conduct the Health Services Study. In consultation with the Department, North Highland conducted interviews and working sessions with Department stakeholders and subject matter experts in various functional components within the Department and Correctional Institutions around the state. North Highland also conducted site visits to three major correctional institutions to observe their health services operations. (See Appendix 1 for a complete list of interviews and site visits.)

In addition, North Highland conducted a survey and analysis of four other states to identify what other delivery model options and solutions are currently being used in correctional health care. North Highland also reviewed leading industry practices and research to complete this assessment.

A. Executive Leadership Interviews

North Highland conducted interviews with the Department's Health Services executive leadership team on June 19, 2017. Information, insight, and observations were gathered on the following disciplines: Medical, Dental, Mental Health, and Pharmacy services. A summary of the interviews is outlined in the Exhibit below. (See Appendix 1 for a complete list of interviewees.)

Medical	Dental	Mental Health	Pharmacy
• Many complexities make delivering health services challenging in Florida prisons, including the growth of the elderly population, remote location of correctional facilities, and the increasing clinical challenges of inmates. • New standards of care have increased the cost of health services significantly. • The cost of Hepatitis-C prevention, identification, and treatment is rapidly increasing. • Managing the demand for inside-the-gate services is an ongoing challenge. • Potential loss of secured units due to bed under-utilization and other factors. • Gaps in access to specialty services and providers cause delays in treatment, resulting in increased costs and liabilities to the Department.	• Prevalence of aggressive oral cancer is rising. • Periodontal disease is increasing causing more complex and costly dental services. • The relationship between security and dental staff, drives and influences outcomes. • There is a shortage of dental hygienists and difficulty in attracting and retaining employees. • Costs are increasing to maintain, repair, and replace aging dental equipment.	• The number and severity of mentally ill inmates is rapidly increasing. • There is a significant shortage of psychiatrists and difficulty in attracting and retaining qualified mental health employees. • Increased use of behavioral strategies, rather than psychotropic drugs could be an opportunity for cost containment.	• There are significant increases in drug costs and usages, especially for non-formulary drugs, biologicals, new HIV drugs, and Hepatitis C treatments. • The cost of many pharmaceutical has risen dramatically and is expected to continue to rise.

Exhibit 2.1 Summary of Executive Interviews

AMERICAN OVERSIGHT

B. Site Visits

As part of the information gathering methodology for this study, North Highland conducted site visits at three institutions: two major Correctional Institutions and the Reception and Medical Center (RMC). Site visits were conducted to gain insight related to health services delivery to inmates. Exhibit 2.2 shows a table of the correctional institutions visited. These institutions were selected due to the diversity and complexity of their inmate populations.

Institution and Date	Persons Interviewed
Suwannee Correctional Institution and Annex **(Region 2)** • **Close management male facility with inpatient mental health unit** June 20, 2017	• Warden • Assistant Warden of Operations • Assistant Warden of Programs • Annex and Workcamp Staff Supervisor • Health Services Administrator
Lowell Correctional Institution **(Region 3)** • **All female facility** June 21, 2017	• Warden • Assistant Warden of Programs • Health Services Administrator
Regional Medical Center **(Region 2)** • **Functions as advanced medical center and hospital for inmates statewide** June 22, 2017	• Warden • Assistant Warden of Security • Utilization Management personnel • Physician

Exhibit 2.2 Site Visits

North Highland identified the following strengths, challenges and common themes during the site visits.

a) System Strengths

- The Wardens and leadership at each facility fully understood the Department's mission, complex inmate population, health services, and need for cost containment.
- Staff in each of the institutions were dedicated and appeared well-trained to provide services to inmates.
- The medical service treatment areas were notably clean, well lit, and adequately equipped, while the facilities' operations appeared to be well organized and orderly.
- The presence of a Mental Health Ombudsmen at the Suwannee Correctional Institution added additional oversight and enhanced inmate access to mental health services.
- The RMC Hospital appeared orderly and well utilized. Notably, the dialysis center, cancer unit and outpatient surgery suites provide advanced treatment and access to these essential services. Advanced treatment at RMC is also more secure than treatment in offsite facilities.

AMERICAN OVERSIGHT

b) System Challenges

- There are a growing number of elderly inmates within the state's prison system. Elder health care costs can range between four and eight times greater than the cost for younger inmates, presenting a huge challenge for the State of Florida when containing inmate health care costs.
- Another challenge for providing health services is bed availability. Inmates with chronic conditions are occupying the limited bed space in the infirmaries. Inmates are increasingly requiring more Americans with Disabilities Act (ADA) compliant beds, reducing the number of ADA bed availability.

c) Common Themes

While visiting the various correctional institutions, North Highland identified the following common themes across facilities and interviewees:

- Health care staffing is a major concern for many of the correctional institutions. Aside from Lowell C.I., each of the institutions' Wardens reported high vacancy rates among medical and correctional officer staff. Mental health staff were quoted by the Wardens as having the highest vacancies and the most difficult to retain resulting from high burnout rate. These vacancies were also attributed to a difficulty to recruit in some areas. The Warden at Lowell C.I. mentioned location as a major recruiting advantage for their institution. More remote facilities have greater staffing challenges.
- Staff vacancies can affect access to health services, especially if officers are not available to escort inmates to medical appointments either inside or outside the gates. The Wardens at all three institutions opined that the current vacancies and coordination between correctional officer and medical staff make it difficult to arrange successful medical transportation.
- Limited access to specialty medical services is creating delayed medical treatments and poorer health outcomes. The wait list for some specialty consults and in-prison dental services exceeds six months. Missed appointments due to lack of officers available for medical transport further impacts providers and hospitals who may then become reluctant to accept inmates as patients. This further reduces access to services and contributes to more costly advanced medical services.
- High volumes of physical paperwork and limited data resources as well as data being under-utilized was observed in each institution. Each institution utilizes the Offender Based Information System (OBIS) to capture encounter data. The OBIS system is not designed to provide the Department with any integrated data or data analytics features. The limited staff to compile and analyze data further complicates the Department's ability to capture data and properly monitor and enhance cost saving measures and overall efficiencies.
- Pharmacies run by the Department were out of the scope of this report; however, observations and inquiries confirm limited space and difficulty sending and receiving prescriptions and medications at RMC. The numerous processes and steps involved in prescribing, filling and distributing medication can cause inefficiencies for the pharmacy and delays in distribution of inmate medications.

AMERICAN OVERSIGHT

C. State Market Scan

North Highland conducted a market scan and survey of four states' health services delivery models: New York, North Carolina, Pennsylvania, and Ohio. These four states were selected based on specific criteria, such as similar inmate populations, variety of delivery models, and organizational structure. Unlike Florida, none of these states have a fully outsourced delivery model.

Approach

North Highland's approach included telephone interviews as well as the development and distribution of a 14-item questionnaire (see Appendix 2). An overview of this approach is shown in the Exhibit below.

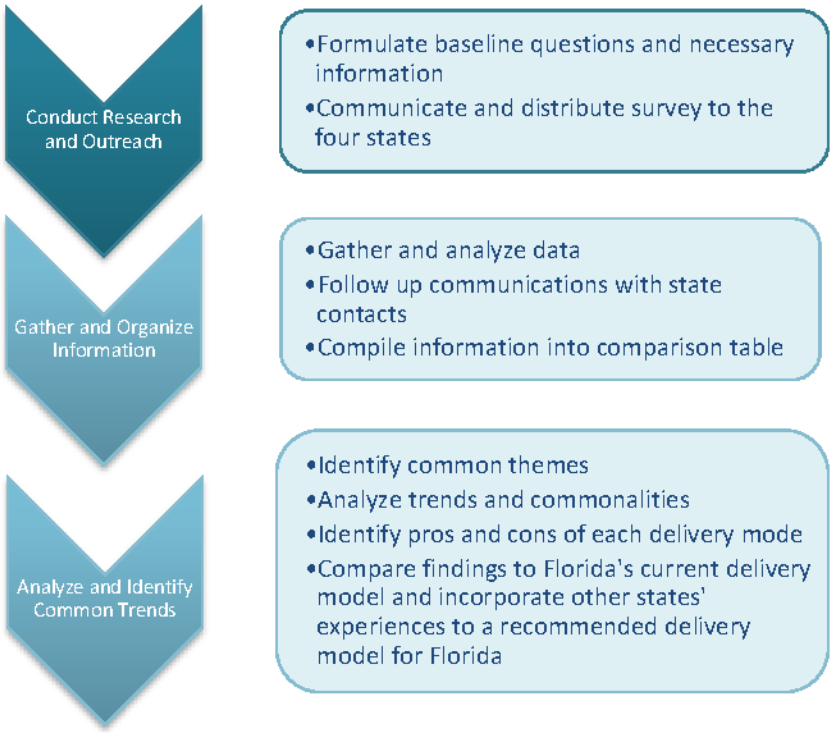

Exhibit 2.3 State Market Scan Approach and Methodology

Findings

The state comparisons will be considered in North Highland's analysis and recommendation of options for future delivery models through a public-private partnership that involves a combination of Department health care staff providing primary and infirmary-level care inside the gate, and a contract or contracts with private sector organization(s) for the provision of specialty care, hospital care, and related utilization management and claims processing functions.

AMERICAN OVERSIGHT

Exhibit 2.4 State Market Scan Findings Overview

	Florida	New York	Pennsylvania	North Carolina	Ohio
Delivery Model Type	Privatized	In-house[4]	Hybrid[5]	In-house	Hybrid[6]
Claims Processing	In-house	In-house[7]	Third Party Vendor	Third Party Vendor	Third Party Vendor[8]
Utilization Management (UM) Processing and Software	Internal UM processes and staff. No UM software	Third Party Vendor[9]	Third Party Vendor [10]	In-house	Internal UM processes and staff utilizing their EHR system
Specialty Care	Subcontracts through privatized vendor	Individual contracts with specialists[11]	Third Party Vendor	State University health care system partnership[12]	State University health care system partnership[13]
Emergency and Hospital Services	Third Party Vendor	Regional Medical Units and subcontracts with hospitals[14]	Hospital contracts not required because of state legislation	Statewide 336 bed health care facility[15] and individual hospital contracts for emergency services	Hospital contracts not required because of state legislation
Electronic Health Record (EHR)	No	No	Yes[16]	Yes	Yes, fully implemented by end of 2017

4 NYS provides medical services at all institutions, except Coxsakie Regional Medical Unit (provided by Corizon)
5 Medical- Correct Care Solutions; Psychiatry- Mental Health Management; Psychology- Dept; Dental- Dept
6 Medical- Department; Dental- Mid-America Health; Mental Health- Department; Specialty Services- Ohio State University Medical Center
7 Division of Budget and Finance
8 WellComp for hospital bill repricing services
9 Kepro utilizing InterQual
10 CCS utilizing InterQual
11 Contracts managed by NYS DOCCS Coordinated Specialty Care Unit
12 NC DPS contracts with UNC health care system to come on site for clinics. The specialist come from UNC to assist with clinical services for surgery and 16 other specialties.
13 Specialty consults are provided through a contract with the Ohio State University Medical Center and managed by ODRC central medical and the contract division of the business office.
14 Contracts managed by NYS DOCCS Coordinated Specialty Care Unit
15 Facility features a complete surgical suite, radiology suite and clinic space.
16 Sapphire software provided by Diamond Pharmacy

AMERICAN OVERSIGHT

Other Findings

Laboratory Services

Of the states surveyed, only North Carolina provides some of its laboratory services (e.g., blood testing, x-rays, etc.) on-site for inmates in their inpatient facility while a vendor handles all other inmates. The other three states subcontract laboratory services to subcontractors or their health services vendors.

Dedicated Medical Security Staff

Pennsylvania has dedicated medical security transport staff at almost every institution. The purpose of dedicated security staff is to reduce the cost of staff overtime and reduce the frequency of missing scheduled appointments due to transport difficulties.

Telehealth

New York utilizes telehealth in their emergency department at triage and for specialty care clinics. If an inmate needs a referral for specialty care or is in the facility emergency department, telehealth solutions are utilized to further understand the inmate's condition minimizing the need to transport out of the institution.

Conclusion

None of the states surveyed have a fully outsourced delivery model like Florida. Of the four states, two utilized a hybrid delivery model for health services and two have an in-sourced health services model. The states that have utilized a hybrid model, Pennsylvania and Ohio, have customized their models to achieve the highest level of efficiencies. Ohio utilizes a private vendor to provide dental services, and Pennsylvania provides their dental services in-house. New York and North Carolina are fully in-sourced: New York manages individual contracts with hospitals and specialty care providers while North Carolina uses a public partnership with the state university systems to provide specialty care.

V. Desired Goals for Health Services

Under the current delivery system, FDC contracts with a health services vendor to provide comprehensive health services using a managed care model for each major health discipline (medical, nursing, pharmacy, mental health, and dental). Regardless of the administrator of health services delivery, three goals remain relevant for providing correctional health services: timely access to medical services, clinically adequate services, and cost containment strategies. These three goals align with the Triple Aim strategy for community health care.

Access to Medical Services

Access to medical services in correctional facilities is dependent on several factors. These factors include: a qualified workforce, appropriate staffing levels to meet the inmate demand for health services, a comprehensive panel of specialty providers, effective appointment scheduling, and safe, supervised transportation of inmates to and from medical services. As a cost-containment strategy, inmates should receive timely access to medical services to meet their routine and serious medical, dental, and mental health needs.

Adequate Medical Services

Under the current delivery system, the contracted vendor maintains Utilization Management (UM) functions to determine specialty referral and clinical appropriateness. Re-establishing an internal UM function would provide FDC with improved control of inmate management and health services utilization to better manage adequate medical services for inmates.

Cost Containment Strategies

FDC is tasked with the ongoing effort to balance health fund appropriations and health services delivery. The inability to balance cost and adequate medical services has financial consequences. Poor health outcomes often require more costly medical services. It is critical to manage inmate health needs before their health acuity progresses to higher level of service at a higher cost.

AMERICAN OVERSIGHT

VI. Options

The purpose of this Health Services Study is to analyze two potential insource health services delivery models that the Department could pursue to provide adequate health services to Florida's inmate population:

- **OPTION 1:** An insourced model for all primary and infirmary-level care provided inside the gate, with all specialty and hospital care provided through individual contracts with specialists and hospitals (the model primarily employed by the Department before the statewide outsourcing initiative was implemented in 2013). The analysis of this Option includes a recommendation on whether claims processing/bill pay functions are best handled by Department staff, or through a third party contract.

- **OPTION 2:** An insourced model for all primary and infirmary-level care provided inside the gate, with all specialty and hospital care and related utilization management and claims processing functions provided through a PPO/HMO/TPA.

Both delivery model options are public-private partnerships that would provide health care services through a combination of provider contracts and state employees. Key differentiators between the two options are:

1. *How* offsite care and the provider network is managed
2. *Who* performs claims processing and utilization management functions

It is important to note that Health Services Staff involved in the delivery of primary and infirmary-level care inside the gate (onsite care) would become Department employees under both options; therefore, estimates for Health Services Staffing remain the same under either option.[17]

Cost Components considered in each option include:

- Primary and Infirmary Care (Health Services Staff for Onsite Care)
- Hospital and Specialty Care (Provider Network for Offsite Care)
- Ancillary Services
- Prescription Drugs
- Utilization Management and Claims Processing
- Oversight and Recruitment

Option 1

The health services delivery model referred to as "Option 1" is like the delivery model employed by the Department before it transitioned to statewide outsourcing of inmate health services in 2013.[18] Prior to this transition, the Department provided inmate health care services directly, through a combination of Department employees and private contractors, as follows:

- **Primary and Infirmary Care (Health Services Staff for Onsite Care**) - All primary and infirmary-level care provided inside-the-gate to inmates was provided by Department-employed health services staff. Within each major correctional institution, the Department provided primary and infirmary-level care using a core staff of employed clinicians, nurses, mental health and dental professionals, and administrators

- **Hospital and Specialty Care (Provider Network for Offsite Care)** - All hospital and specialty care was provided through individual contracts with providers and hospitals. The Department negotiated and entered into agreements directly with hospitals and providers, either by contract, purchase orders and/or interagency agreements, to provide specialty healthcare services. Such services include inpatient/outpatient

17 Staffing estimates and projections apply to Health Services staff only, and do not include any costs related to Accounting, Payroll, Procurement, IT Support, or Human Resources staff.
18 The Department transitioned the delivery of comprehensive medical, mental health and dental services to private contractors in March 2013 (South Florida) and September-October 2013 (North and Central Florida). Pharmacy dispensing and purchasing functions were retained by the Department.

AMERICAN OVERSIGHT

hospital services, physician services in hospitals, offsite visits to physicians' offices, and same-day surgery centers

- **Ancillary Services** – The Department contracted directly for ancillary services, such as radiology and independent laboratory referral services, as well as for medical supplies and medical equipment, among others

- **Prescription Drugs** – The Department directly managed the purchase of prescription drugs and was responsible for the cost of all prescription drugs (formulary and non-formulary).[19] Pharmacy dispensing and medication purchases were handled through three regional pharmacies and a hospital pharmacy at Reception and Medical Center. In addition, the Department was responsible for the cost associated with monthly consulting pharmacy inspection reports for each State of Florida licensed facility.

- **Utilization Management and Claims Processing** – The Department performed these functions in-house prior to 2013 and would continue to do so under this delivery model option. The Department still plays an integral role in Utilization Management (UM), but would need to supplement its existing Utilization Management unit with additional resources and UM software under this delivery model option. The Department would also need to establish a new Claims Processing unit.[20] However, it is recommended that if the Department contracts directly with providers, it should engage the services of a claims payment vendor, such as a Third Party Administrators (TPA), that can process, review and verify payments, assess for billing errors, and provide robust claims data and reporting services.

- **Oversight and Recruitment** – The Department was responsible for the oversight, recruitment, compliance and miscellaneous support services needed to support inmate health services. This also included staff for contract management and monitoring and recruitment.

Advantages

- In-house Health Services Staff:
  - Enhanced level of managing for anticipated change and unpredictable events
  - In touch with "on the ground" status
  - Ability to innovate, try pilots and demonstrations
  - Better relationships with custody; better problem-solving mechanisms
- Provider Network Management:
  - May support stronger clinical and administrative relationships with providers

Disadvantages

- Increased personnel risk and management
- Risks of contracting with providers individually:
  - Limitations in negotiating favorable contracts conditions
  - Gaps in access to care
  - Claims adjudication, payment, and appeals risk
  - Need to stay current on industry norms and best practices (administrative expertise, clinical expertise and oversight, policies and procedures, etc.)
- Inefficiencies of contracting with providers individually:
  - Increased contract management and oversight requirements

---

19 The Department is responsible for the large majority of drug costs today, but some drugs costs are the responsibility of the current vendor, such as non-formulary drugs prescribed to inmates and emergency prescriptions ordered from local pharmacies. Most drugs and therapeutics are purchased through the Minnesota Multi-State Contracting Alliance for Pharmacy (MMCAP). In addition, the Department participates in the Federal 340b Prescription Drug Discount Program (HIV and STI medications) through a partnership with the Department of Health (DOH) and local county health departments. The repackaging program is through DOH.

20 Most of the claims processing and accounting positions that were dedicated to health services billing were eliminated after the Department transitioned to statewide outsourced Health Services.

AMERICAN OVERSIGHT

- Managing numerous contracts in numerous locations
- Increased Utilization Management requirements
- Loss of economies of scale

Option 2

The health services delivery model referred to as "Option 2" is a delivery model that uses large insurance carriers, such as Preferred Provider Organizations (PPO) or Third Party Administrators (TPA), to manage the Department's hospital and specialty provider network, claims processing and utilization management services, as opposed to performing those function in-house. Health Service Staff providing primary and infirmary-level care inside-the-gate would become Department employees.

All U.S. Departments of Corrections' must provide health care services to inmates, including services that cannot be addressed behind the walls of their prisons, workcamps, and other facilities. Contracting with an insurance carrier is one model-type that other states have implemented to access specialty medical and hospital services that cannot be provided onsite.[21]

Large insurance carriers, such as Preferred Provider Organizations (PPO) and Health Management Organizations (HMO), offer Administrative Services contracts to self-funded employers and other self-funded organizations. Under an Administrative Services contract, the carrier provides access to its own network and typically adjudicates and pays claims.[22]

The Department could also contract with a Third Party Administrator (TPA), which is a licensed entity that typically offers health care provider networks and administrative services to self-funded employers and managed care entities. TPAs offer a combination of single or multiple local, statewide, and national provider networks. TPA services typically include eligibility verification, utilization management, claims adjudication and processing, reporting, and data analytics. TPAs may also offer specialty services management (such as special programs to reduce the use of imaging), disease management, predictive modeling analytics, and myriad other services. TPA customers purchase the services they desire and have access to the TPA's provider network and rates.

Under both types of arrangements, the purchaser bears all the risk for the cost of services. Both PPOs and TPAs would take responsibility for establishing a network of credentialed and qualified medical providers, which includes annual verification of licensure, certification, and accreditation.

Under Option 2, inmate health care services would be provided through a combination of Department employees and private contractors, as follows:

- **Primary and Infirmary Care (Health Services Staff for Onsite Care**) - All primary and infirmary-level care provided inside-the-gate (medical, mental health and dental) would be provided by Department-employed health services staff. [Same as under Option 1]

- **Hospital and Specialty Care (Provider Network for Offsite Care)** - All contracts for offsite hospital and specialty care would be handled by and managed through a PPO/TPA. The PPO/TPA would guarantee access to an adequate provider network and give the Department access to the its negotiated discounts and reimbursement rates. The Department would be encouraged to contract for these services using a flat, fixed "per inmate per month (PIPM)" fee structure to reduce misaligned financial incentives for over- or under-utilization of services.

- **Ancillary Services** – The Department would contract directly for ancillary services, such as radiology and laboratory and pathology services, as well as for medical supplies and medical equipment. Department staff would manage these contracts individually. [Same as under Option 1]

---

21 Other state Departments of Corrections that have implemented this type of delivery model for offsite services include: California, Michigan, Nevada, and Virginia.
22 Virginia Department of Corrections (VADOC) has used a similarly structured delivery model and contracted with Anthem Blue Cross Blue Shield for such services. VADOC, "Medical Care Provided in State Prisons – Study of the Costs", Joint Commission on Health Care October 5, 2016 Meeting presentation. Available at: http://jchc.virginia.gov/4.%20Medical%20Care%20Provided%20in%20State%20Prisons%20CLR.pdf.

AMERICAN OVERSIGHT

- **Prescription Drugs** – The Department would be directly responsible for the purchase and cost of all prescription drugs for inmates. [Same as under Option 1]

- **Utilization Management and Claims Processing** – A PPO/TPA would be responsible for administering, reviewing, verifying and processing all health care claims for services. By employing a PPO/TPA for claims processing services, the Department can also avoid the cost of hiring staff and purchasing software to process claims and pay bills. The PPO/TPA could also provide utilization management and care coordination services with Department oversight.[23] For these services, the Department would be encouraged to use a flat, fixed "PIPM" fee structure to mitigate financial incentives for over- or under-utilization of services

- **Oversight and Recruitment** – The Department would be responsible for providing oversight, compliance and recruitment services needed to support inmate health services. [Same as under Option 1]

Advantages

- In-house Health Services Staff:
  - Enhanced level of control
  - In touch with "on the ground" status
  - Ability to innovate, try pilots and demonstrations
  - Better relationships with custody; better problem-solving mechanisms
- Provider Network Management:
  - Access to larger and more consistent provider discounts and preferred rates for specialty and hospital services
  - Guaranteed access to an adequate network of hospitals and specialty care providers
  - Centralized network management
  - Streamlined contract management, monitoring and oversight functions
- Leverages private sector health care organizations' resources to improve contracting with qualified medical providers, use of technology and reporting, and coordination and provision of outside care/specialty care
- Greater access to corporate administrative expertise, industry knowledge, policies, procedures and accreditation experience, and enhanced reporting and analytics
- Enhanced dispute resolution and claims adjudication and payment processes

Disadvantages

- Increased personnel risk and management
- Providers are not a part of the "team"
- Potential for misaligned financial incentives

23 Under Option 2, the Department would maintain a small Utilization Management team to liaise with the contractor and ensure appropriate care is provided to inmate patients.

AMERICAN OVERSIGHT

VII. Cost Analysis

A. Methodology

To develop the cost analysis, the team followed the standard IV-B Cost Analysis tools and methods. The following assumptions and approaches were used in the build-up of costs:

- **Baseline Costs:** Baseline cost estimates for Health Services staff and expenses were constructed based on historical Department data for inmate health services from FY11-12 as well as more recent vendor data from the current health services provider for Regions 1-3 in FY16-17[24]
- **Inmate Population (87,100):** The inmate population in Department-run institutions was 87,100 on June 30, 2017. The inmate population has not significantly increased or decreased over the past five years and projections for the next three years do not reflect a statistically significant differential between the current population; therefore, no cost adjustments were made based on this factor[25]
- **Number of Major Institutions (61):** As of June 30, 20—2017, there were 59 correctional institutions and annexes with more than 500 inmates as well as two major RMC units (RMC – Main Unit and RMC – West Unit)[26]
- **Adjustment for Inflation:** All estimates are presented in current dollars. All inflation adjustments are based on the Consumer Price Index as published by the Florida Office of Economic and Demographic Research (EDR) National Economic Estimating Conference (NEEC)[27]
- **Adjustment for Region 4 data limitations:** Data and information on health services staffing and expenses in Region 4 was not available at the time of the publication of this report. Therefore, in order to provide a more complete picture of the costs associated with both delivery model options, a percentage share of the known health services costs for Regions 1-3 was assumed for, and applied to represent Region 4 in the cost estimates. This estimated Region 4 factor (16.86% of total costs) was estimated based on a comparison of historical per diem costs in FY14-15 and FY15-16, using the Region's share of total health services contract costs as its estimated representation of total health services costs, expenses and staffing, statewide.

Inputs Excluded from Analysis

The following items and inputs are excluded from this Cost Analysis:

- Transition Costs: Cost Analysis does not account for any of the costs or potential risks associated with transitioning to a new delivery model.
- Formulary Drug Costs
- Pharmacy Operations
- Electronic Health Records (EHR)
- Accounting, Payroll, Procurement, and IT Support positions
- Human Resources (HR) positions and costs related to HR services and state employee support (e.g., hiring, labor relations, etc.)
- Payroll and Benefits Processing Costs
- Utilities and Building Maintenance Costs

24 Primary data sources include: Florida Department of Corrections Management Report for FY11-12; Centurion Operating Cost Report and Operating Indicators Report for FY16-17; Florida Paid Lag Detail (Utilization Management) data for FY16-17.
25 Florida Office of Economic and Demographic Research's (EDR) Criminal Justice Estimating Conference (CJEC). Inmates housed in Department-run facilities represent roughly 90% of all inmates in prison statewide.
26 Florida Department of Corrections, Bureau of Research and Data Analysis. Excludes 7 privately-run prisons.
27 Consumer Price Index from the Office of Economic and Demographic Research's (EDR) National Economic Estimating Conference. Adjustments were made based on the CPI Index reading from July of each year.

AMERICAN OVERSIGHT

- Costs related to office supplies, office equipment and leases, IT and telecom, postage and shipping, subscriptions, travel, or meals
- Custody, Transportation & Security Costs
- Medical Copayments & Trip Fees
- OBIS reimbursement fees

B. Categories

The categories below represent new costs that would become the responsibility of the Department under either delivery model option.[28] These costs do not represent a full accounting of the Department's Health Services budget and should not be interpreted as such.

This analysis separates costs by Health Services Disciplines and Category as outlined in the Department's recent Invitations to Negotiate (ITN) for Comprehensive Health Services.[29] For more information, see Appendices 3 and 4.

Category	**Description**
Staffing	Defined as the recurring annual cost for the Health Services staff employed by the Department. The total compensation cost includes adjusted base salaries and the employer's share of employee benefits. Benefits include retirement, health insurance, life insurance, and Medicare contributions. Costs of workers compensation insurance and any other risk insurance are not included. (See Staffing section for additional details)
Expenses	Defined as the recurring annual expenses *not associated with Staffing* (i.e.,. all other expenses not associated with the direct costs of Department-employed health services staff). Direct health care expenses are separated into two categories, "inside-the-gate" and "outside-the-gate", defined by the physical location of where care is provided to inmates: Health services provided to inmates within prison facilities are considered "inside-the-gate" (onsite care). Health services provided to inmates outside of prison facilities in the community are considered "outside-the-gate" (offsite care). (See Expenses section for additional details)
Institutional Medical (Discipline)	The "Institutional Medical" discipline is defined as medical health services provided to inmates at all FDC institutions and facilities, with the exception of Reception and Medical Center (RMC) in Lake Butler, FL.
RMC Medical (Discipline)	The "RMC Medical" discipline is defined as the medical health services provided to inmates at Reception and Medical Center (RMC) in Lake Butler, FL only. All other medical health services fall under the "Institutional Medical" category.
Mental Health (Discipline)	The "Mental Health" discipline is defined as all mental health services provided to inmates statewide.
Dental (Discipline)	The "Dental" discipline is defined as all dental health services provided to inmates statewide.
Medical Equipment & Supplies	Includes the purchase, lease and maintenance of Medical Equipment as well as the purchase of Medical Supplies.
Utilization Management (UM)	Expenses and staff associated with the review, authorization, triage and oversight of specialty and hospital care referrals, requests and consults. Includes utilization management information systems and utilization management nursing staff.

28 These expenses are currently the responsibility of the comprehensive health services vendor.
29 "Comprehensive Healthcare Services Procurement", Florida Department of Corrections webpage, available at: http://www.dc.state.fl.us/business/HealthSvcs/index.html.

AMERICAN OVERSIGHT

Claims Processing	Includes the costs associated with the review, processing and payment of medical claims. Under both Option 1 and Option 2, this category refers to the cost of contracting with a PPO/TPA to provide claims processing functions and services for the Department.
Non-Formulary Drugs	The Department maintains an extensive drug formulary system and the cost of all "formulary drugs" prescribed to inmates are currently the responsibility of the Department. These costs represent the majority of drug costs and are paid for out of the Department's existing Health Services budget. Drugs prescribed to inmates that are not included on the Department's formulary list ("non-formulary drugs") and emergency drugs ordered from local pharmacies are the responsibility of the comprehensive health services vendor.
Oversight & Recruitment	Oversight and Recruitment costs are categorized as expenses and FTEs associated with, but not directly involved in the delivery of health services to inmates.
Oversight	Includes existing Contract Monitor FTE positions, which are needed for the oversight of each of the health services disciplines. (These positions are currently paid for by the vendor.)
Recruitment	Includes employment advertising and marketing expenses. Expenses do not include any type of bonus or incentive recruitment programs. Includes recruitment/recruiter FTE positions.
Training & Licensing	Includes expenses related to training and seminars, physician credentialing, and licensing and filing fees.
Temporary Staffing	Includes expenses related to temporary help and staffing contract services.

Exhibit 3.1 Category Definitions and Descriptions

C. Health Services Staff

Estimates for an insourced Health Services staff were constructed using vendor data with adjustments made for market wage rates, the state's benefits package, and deficiencies in mental health staffing levels. These estimates serve as a baseline for both the level and types of positions that would need to be brought in-house to the Department under either insourced Option.

Methodology

Current vendor data for Health Services staffing in Regions 1-3 were used as the foundation to determine the level and composition of the existing Health Services staff. Due to unavailability of Region 4 data, Health Services staff in this region was estimated by applying the previously mentioned "Region 4 Adjustment Factor" (16.86%). Salaries were based on the salaries currently paid to existing Health Services staff. Salary adjustments were then made to select position types where the current salary was determined to be below the market wage rate in Florida. (These adjustments were determined by a market wage analysis conducted for key Health Services position types in various regions across the State. See Attachment 6 for full results of market wage analysis.) The results of this market wage analysis are incorporated and reflected in the staff estimates presented in this section.[30] Additionally, the base salaries for all Health Services positions were reduced by five (5) percent to account for the relatively richer benefits package provided to state government employees in comparison to the private sector. The adjusted base salary estimates were then used to calculate the employer's share of the costs for the State of Florida employee benefits package, accounting for Career Service (CS) and Select Exempt Service (SES) designations. Total compensation was calculated by applying the appropriate State of Florida benefit load to the adjusted wage rate and adding it to the

30 Centurion payroll data for Regions 1-3 as of June 10, 2017, adjusted for Region 4. "June 2017 Operating Indicators" report. Available at: Current Salaries by position by site.

AMERICAN OVERSIGHT

annual base salary rate.

Finally, due to the significant deficiencies found in the mental health discipline, the staffing estimates presented in this section also include adjustments to the level of mental health staffing. Mental Health staffing level increases were based on minimum recommended staffing ratios for psychiatric and psychological services in correctional settings. It is important to note that the estimated increase in the mental health staffing does not consider, or account for, shift relief factors or shift lapses.

Market Wage Analysis

North Highland conducted a market wage analysis of select Health Services positions that are integral in the delivery of direct health services and have been traditionally difficult to recruit and retain.[31] To do this, data from the Economic Research Institute (ERI) were analyzed for 22 positions matching these parameters, comparing the current vendor salary rates to the ERI statewide average salary rate in Florida for these positions.[32] (See Appendix 6 for additional detail.)

Among the 22 positions, ERI data suggested that the competitiveness of half, or eleven (11) of these positions could be enhanced by increasing the current vendor's salary rate to match the ERI statewide salary rate.[33] As illustrated in the Exhibit below, these 11 positions span across all four disciplines and have wage gaps (the difference between current vendor salary rates and the ERI salary rates) that range from $1.20 per hour to $8.37 per hour. If the Department matched the ERI salary rates for these positions, it would increase total salary wage costs (before benefits or any other adjustments) by $4 million annually (see "ERI Rate Cost Impact" column in Exhibit below). To make the compensation for these positions more competitive and thus easier to recruit and retain, the current vendor salary rates were replaced with the enhanced ERI salary rates for these positions in the cost estimates presented in this section.

FDC Position Title	Discipline	ERI Position Title	ERI Hourly Wage	Vendor Hourly Wage	Difference	# of Positions Affected	ERI Rate Cost Impact (before benefits)
PhysAsst,AdvRNPrac,CNSpe (ARNP)	Institutional Medical	Advanced Professional Nurse Practitioner	$ 51.79	$ 47.39	$ 4.40	22.52	$ 206,192
PhysAsst,AdvRNPrac,CNSpe	RMC	Advanced Professional Nurse Practitioner	$ 51.79	$ 50.38	$ 1.41	2.94	$ 8,639
Dental Hygienist	Dental	Dental Hygienist	$ 31.43	$ 26.72	$ 4.71	21.75	$ 213,239
Dentist	Dental	Medical Dentist	$ 74.61	$ 67.54	$ 7.07	61.67	$ 906,929
Mental Health Director (Psych Services Director)	Mental Health	Mental Health/Psychological Services Manager	$ 49.23	$ 48.03	$ 1.20	13.33	$ 33,192
Registered Nurse Mental Health	Mental Health	Nursing Supervisor	$ 42.14	$ 33.77	$ 8.37	1.42	$ 24,701
Nurse Manager	Institutional Medical	Nursing Supervisor	$ 42.14	$ 35.47	$ 6.66	7.47	$ 103,579
Nurse Manager	RMC	Nursing Supervisor	$ 42.14	$ 33.90	$ 8.24	1.00	$ 17,133
MD Physical Health	RMC	Physician Family Practice	$ 89.70	$ 87.61	$ 2.09	14.02	$ 61,074

Registered Nurse Med	Institutional Medical	Registered Nurse	$ 34.18	$ 30.95	$ 3.23	340.87	$ 2,293,598
					TOTALS	531.06	$ 4,049,836

Exhibit 3.2 Adjustments for Competitive Market Wage
Source: Economic Research Institute (ERI) Database, 2017.

31 Florida Office of Program Policy Analysis & Government Accountability, "Corrections Experiences Turnover and Vacancies, But Performance Not Diminished", OPPAGA Report No. 07-15, February 2007.
32 ERI data identifies position-specific wage rates (before benefits) in the current market environment at the state and local market level (e.g., by zip code). Economic Research Institute (ERI) Database as of June 30, 2017. Positions analyzed: Advanced Professional Nurse Practitioner - Medical, Advanced Professional Nurse Practitioner – Psychiatric, Dental Hygienist, Dental Assistant, Dentist, Mental Health Director, Psychological Services Director, Registered Nurse – Mental Health, Registered Nurse – Medical, Nursing Supervisor - Medical, Nursing Supervisor – Mental Health, Nursing Manager, Physician Physical Health (General Practice), Licensed Practical Nurse – Mental Health, Licensed Practical Nurse – Medical, Physician Assistant, Nursing Assistant - Mental Health, Mental Health Professional, Behavioral Health Technician, Activity Technician/ Therapist, Psychiatrist, and Psychologist.
33 The current vendor salary rate was found to be higher than the ERI wage rate for the other 11 positions analyzed. Notably, Psychiatrists and Psychologists positions were among these positions. As a result, the salary rate used for these 11 positions in the cost estimates remained unchanged from the current vendor salary rate (no market rate wage adjustments). No reductions to existing salaries were included in this cost analysis.

AMERICAN OVERSIGHT

Mental Health Staffing Levels

Adjustments were made for mental health staffing determined by significant deficiencies found in performance and accountability reporting as well as the ongoing litigation against FDC by Disability Rights of Florida, Inc., (DRF) concerning the treatment of inmates with mental health disorders. (See next section for further details.) Significant shortfalls in current mental health staffing levels were found when looking only at the minimum staffing standards recommended for psychological and psychiatric services in prisons.

Mental Health Classifications

Each inmate receives a Mental Health Grade, known as an "S-grade" classification, upon entering the prison system. Each inmate receives a mental health screening and assessment by psychiatric staff during the reception process and is assigned a mental health 'S-grade' classification.

Mental health grades range from S-1 to S-6. The S-1 grade indicates an inmate who does not have an impairment in adaptive functioning associated with a mental disorder that requires ongoing mental health treatment. The S-2 grade denotes an inmate with mild impairment in adaptive functioning associated with a diagnosed mental disorder that requires ongoing outpatient mental health treatment. The S-3 grade indicates moderate impairment in adaptive functioning associated with a mental disorder that requires ongoing outpatient mental health treatment. The S-4, S-5, and S-6 grades indicate severe impairment in adaptive functioning that is associated with a diagnosed mental disorder and requires inpatient mental health treatment in a transitional care unit (TCU), a crisis stabilization unit (CSU), or the Correctional Mental Health Treatment Facility (CMHTF). Admission to a CMHTF requires judicial commitment.[34]

The Exhibits below define the mental health grade classification system and show the Inmate Population by S-Grade as well as the level of mental health staffing as of June 2017.

34 Florida Department of Corrections Office of Health Services, Health Services Bulletin No: 15.03.13: http://www.dc.state.fl.us/business/HealthSvcs/Bulletins/15-03-13%20RD%205-28-14.pdf.

AMERICAN OVERSIGHT

S-Grade	Description
S-1	Defined as the recurring annual cost for the Health Services staff employed by the Demonstrates no significant impairment in the ability to adjust within an institutional environment and does not exhibit symptoms of a mental disorder (which includes intellectual disability). Although inmates classified as S-1 do not require ongoing mental health treatment, they have access to routine mental health services (sick call, emergencies, etc.).
S-2	Exhibits impairment associated with a diagnosed mental disorder. The impairment is not so severe as to prevent satisfactory adjustment in general inmate housing with the assistance of mental health case management, psychological services, and counseling. This mental health grade also applies to an inmate who, as determined by psychiatry staff, is sufficiently stable on select psychotropic medications for medication management by a non-psychiatric physician or ARNP in consultation with a psychologist.
S-3	Shows impairment in adaptive functioning due to a diagnosed mental disorder. The impairment is not so severe as to prevent satisfactory adjustment in general inmate housing with the assistance of mental health case management, psychological services, counseling, and psychiatric consultation for psychotropic medication. S-3 is also assigned routinely to an inmate who is determined to need psychotropic medication, even if the inmate may be exercising the right to refuse such medication.
S-4	Is assigned to a transitional care unit (TCU), which is an inpatient level of mental health care. The mental health classification S-4 can only be assigned or changed at a TCU.
S-5	Is assigned to a crisis stabilization unit (CSU), which is an inpatient level of mental health care. This classification can only be assigned or changed at a CSU.
S-6	Is admitted to a Mental Health Treatment Facility (MHTF), which is the highest and most intensive level of inpatient mental health care. Admission to an MHTF requires judicial commitment.
S-9	Is in the reception process and is scheduled to be evaluated by psychiatry staff.

Source: Florida Department of Corrections, figures as of June 10, 2017.

35 The levels of care that comprise the inpatient mental health care delivery system (i.e., residential or specialized treatment units) are: Transitional Care Units (TCU; S-Grade 4); Crisis Stabilization Units (CSU; S-Grade 5); and, Corrections Mental Health Treatment Facilities; (CMHTF; S-Grade 6). Florida Department of Corrections Office of Health Services, Health Services Bulletin No. 15.05.05: http://www.dc.state.fl.us/business/HealthSvcs/Bulletins/15-05-05current.pdf. Florida Department of Corrections Office of Health Services, Health Services Bulletin No: 15.05.18: http://www.dc.state.fl.us/business/HealthSvcs/Bulletins/15-05-18current.pdf.

36 According to FDC's Health Services Bulletins, each inmate who is prescribed psychotropic medication for a mental disorder(s) shall be assigned an "S" grade of three (3) or higher. S-3 grades indicate inmates who are prescribed psychotropic medication in an outpatient (general population) setting. S-4 to S-6 grades indicate inmates assigned to inpatient (residential) mental health treatment units. Florida Department of Corrections Office of Health Services, Health Services Bulletin No. 15.05.05: http://www.dc.state.fl.us/business/HealthSvcs/Bulletins/15-05-05current.pdf. Florida Department of Corrections Office of Health Services, Health Services Bulletin No: 15.05.18: http://www.dc.state.fl.us/business/HealthSvcs/Bulletins/15-05-18current.pdf

37 FTE count includes the statewide psychiatrist position.

38 This category refers to the following job position category: PhysAsst,AdvRNPrac,CNSpMH – Nurse Practitioner Psychiatric.

39 This category refers to qualified mental health care professionals (QMHP), which is a professional who is licensed or certified at the highest level of their discipline to independently provide psychological mental health care services. For this analysis, QMHP professionals include: Psychologists, Psychology Residents, Registered Nurses, APRNs, Behavioral Health Technicians, Mental Health Consultants, and Mental Health Professionals.

AMERICAN OVERSIGHT

Psychological Services Staff-to-Inmate Standards[40]

The International Association for Correctional and Forensic Psychology (IACFP) recommends that for every 150 to 160 *general population* inmates in prison, there should be one full-time qualified mental health care professional (QMHP).[41] The IACFP also recommends a minimum staffing ratio of 1.0 FTE qualified mental health care professional for every 50 to 75 adult inmates in specialized units (e.g., special management units for mentally ill inmates, etc.).[42]

Based only on these metrics, and assuming there are 86,358 general population inmates and 777 patients in specialized units, FDC should have between 550 and 591 total FTE qualified mental health care professionals on staff to meet the IACFP's minimum recommended staffing levels. This represents a staffing shortfall between 187 and 228 FTEs when compared to current staffing levels. The average total FTEs recommended for psychological services (571 FTEs, or 207 additional FTEs) is included, and accounted for, in the Health Services staff estimates presented in this section.

Psychological Services Standards	Inmate Population	Staff-to-Inmate Ratio	Recommended Staffing Level	Staff-to-Inmate Ratio	Recommended Staffing Level
General Population (S1-S3)	86,358	150	575.72	160	539.74
Specialized Units (S4-S6)	777	50	15.54	75	10.36
		Recommended Staffing Level	**591.26**	570.7	**550.1**
		Current Staffing Level[43]	363.27	363.27	363.27
		Staffing Gap	**-227.99**	**-207.41**	**-186.83**
				Average

43 For this analysis, QMHP professionals include: Psychologists, Psychology Residents, Registered Nurses, APRNs, PhysAsst,AdvRNPrac,CNSpMH – Nurse Practitioner Psychiatric, Behavioral Health Technicians, Mental Health Consultants, and Mental Health Professionals. Excludes LPNs, CNAs, Administrative Assistants and Psychology Interns.

AMERICAN OVERSIGHT

Psychiatric Services Staff-to-Inmate Standards[44]

The American Psychiatric Association (APA) recommends that for every 150 to 200 general population inmate-patients in prison with serious mental illness (SMI) who are receiving psychotropic medication, there should be 1.0 FTE psychiatrist. The APA also recommends a minimum staffing ratio of 1.0 FTE psychiatrist for every 50 inmate-patients in residential treatment units.[45]

Based only on these metrics, and assuming there are 10,345 medicated SMI patients in general population and 777 patients in residential treatment units, FDC should have between 67 and 85 total FTE psychiatrists on staff to meet the APA's minimum recommended staffing levels. This represents a staffing shortfall between 34 and 51 psychiatrist FTEs when compared to current staffing levels. The average total FTEs recommended for psychological services (76 FTEs, or an additional 42 FTE psychiatrists) is included, and accounted for, in the Health Services staff estimates presented in this section.

Psychiatric Staffing Standards	Inmate Population	Staff-to-Inmate Ratio	Recommended Staffing Level	Staff-to-Inmate Ratio	Recommended Staffing Level
Psychotropic General Population (S3)	10,345	150	68.97	200	51.73
Residential Treatment Units (S4-S6)	777	50	15.54	50	15.54
Recommended Staffing Level			**84.51**	75.9	**67.27**
Current Staffing Level FTEs			33.45	33.45	33.45
Staffing Gap			**-51.06**	**-42.43**	**-33.81**
				Average	

Exhibit 3.7 Staffing Ratios for Psychiatric Services in Prison
Source: Florida Department of Corrections, figures as of June 10, 2017.

Based on the staffing ratios presented above, an estimated additional 42.43 psychiatrist FTEs and an additional 207 QMHP FTEs are factored into the staffing level cost estimates presented in this section. It is important to note that these staffing level increases were based only on minimum recommended staffing ratios for psychiatric and psychological services in correctional settings, and that the estimated increase in the mental health staffing does not consider, nor account for, shift relief factors or shift lapses.

Additional Considerations in Staffing Levels

Additional considerations of staffing levels are important to meet the mental health, dental and medical standards of care and performance criteria and measures defined by the Department. This section provides an overview of the potential areas that may require increases in staffing levels based on research and interviews of key Corrections staff and stakeholders. An analysis of performance measures and Correctional Medical Authority (CMA) reports found gaps in performance, some of which classify as areas where the Department should consider staffing adjustments. North Highland noted several areas for consideration and offers the following observations on key factors that influence staffing levels.

44 American Psychiatric Association. Psychiatric Services in Correctional Facilities, Third Edition (2015). Washington, DC: American Psychiatric Association.
45 Ibid.

AMERICAN OVERSIGHT

Unmet Performance Measures

A high-level review of the current vendor's recent performance measure outcomes for medical, dental and mental health services revealed several performance deficiencies that can be attributed in part to insufficient staffing levels.

The ability to meet performance measures is one of many components to consider when evaluating staffing levels. Additional factors to consider include: policies and procedures, facility-level characteristics, staff retention rates, staff experience and skill sets, unit and shift-level factors, inmate acuity, programs and activities, facility-level population and census, space and facility design, proximity to resources, scheduling delays, missed appointments, and more. Additionally, the collaboration required between health services staff and correction officer staff requires an overlay staffing analysis of both disciplines. The *Prison Staffing Analysis* report (2008) prepared for the U.S. Department of Justice (DOJ) may be a useful reference guide for the Department as it provides a comprehensive list of contents, training materials, and staffing analysis practices for correction agencies to consider when establishing a staffing analysis process.[46]

To determine unmet performance measures, North Highland analyzed contract monitoring reports that include target standards of performance and the accompanying results. These performance measures were updated with new categories requested by the Department as a part of the current procurement process associated with the outsourcing of health services. Performance measures resulting in a deficiency of 10% or greater from the target standard were isolated for this analysis with a conclusion that deficiencies may be attributed to inadequate staffing.

Thirty-seven unmet performance measure indicators identified in the contract monitoring report are specific to medical/medical nursing, mental health, and dental disciplines; the highest proportion of deficiencies are within the mental health discipline. Assumptions were made as to which staff role may be accountable for meeting each deficient indicator to suspect if insufficient staffing contributes to missing a performance measure target.[47] Of importance, not all performance measure indicators are applicable to all institutions. See Appendix 5 for a complete list of these performance measure indicators.

Unmet performance measure indicators associated with potentially inadequate staffing levels were found within each of the following staffing disciplines:

- **Mental Health Discipline:** The Mental Health discipline was found to have the greatest number of deficiencies of all the disciplines with 23 unmet performance measures. Roles attributed to performance measure indicators include psychologist and counselors, mental health nursing, Psychiatrist and APRN-Psych, and other mental health workers. Several deficient performance measures were attributed to team collaborative efforts rather than individual staff roles. Of the roles attributed, the highest number of missed targets were found attributed to the Psychiatrist/APRN-Psych roles. For example, the following (not inclusive) unmet performance measures (PM) were identified in the contract monitoring report:
  - **[PM#77 - Deficient]:** A psychiatric evaluation is completed prior to initially prescribing psychotropics (PM is applicable to 26 institutions)
  - **[PM#79 - Deficient]:** Required laboratory tests are ordered for the initiation of psychotropic medication administration (PM is applicable to 26 institutions)
  - **[PM#38 - Deficient]:** Inmates receive a periodic screening (PM is applicable to 54 institutions)
  - **[PM#70 - Deficient]:** Daily counseling by mental health staff (except weekend and holidays) is conducted and appropriately documented (PM is applicable to 43 institutions)

- **Medical Discipline:** Six performance measure indicators exceeded the 10% target with roles attributed specifically to MDs/APRNs and PAs only. In some instances, RNs may have the authority to initiate physician protocols; however, the physicians remain the likely role accountable for meeting the measure. For example, the following (not inclusive) unmet performance measures (PM) were identified in the contract monitoring report:
  - **[PM#18 - Deficient]:** All pregnant inmates will be offered HIV testing (PM is applicable to 1 institution)

46 Camp, C.G. et al (2008, December). Prison staffing analysis: A training manual, with staffing considerations for special populations. Available at: https://s3.amazonaws.com/static.nicic.gov/Library/022667.pdf.
47 Management and Administrative-level positions were not factored into this staffing analysis.

AMERICAN OVERSIGHT

- **[PM#12 - Deficient]:** The Chief Health Officer at the institution is responsible for the treatment of inmates on hunger strike (PM is applicable to 17 institutions)

□ **Medical Nursing Discipline:** According to the Department's full-time employee report, the majority of the corrections health services workforce is nursing staff (i.e., RNs, LPNs, and CNAs). Six performance measure indicators exceeded the 10% target with roles attributed to nursing. There were two instances that a physician was the more likely role to meet the measure. For example, the following (not inclusive) unmet performance measures (PM) were identified in the contract monitoring report:

- **[PM#32 - Deficient]:** Medical Staff delivers care as outlined per policy to inmates who state they are the victim of an alleged sexual battery (PM is applicable to 17 institutions)
- **[PM#38 - Deficient]:** Inmates receive a periodic screening (PM is applicable to 54 institutions)

□ **Dental Discipline:** Of the twenty performance measure indicators specific to the dental discipline, only two performance measure indicators had a deficiency greater than the 10% target. Performance measures in this discipline may not capture specific indicators where staffing role deficiencies may be attributed, or may be realized across measures below the 10% target. Roles attributed to the two unmet measures were different for both indicators and therefore unlikely specifically related to a staffing deficit. A further analysis of this discipline is recommended.

Based on the review and analysis above, a staffing level increase in the areas presented below may assist the Department in meeting performance measure targets. The following positions were determined to be directly associated with the unmet performance measure indicators detailed above:

- **Mental Health Discipline positions**: Mental Health Registered Nurses, Mental Health Licensed Practical Nurses, Mental Health Certified Nursing Assistants, Nurse Practitioners – Psychiatric, Mental Health Professionals, Psychiatrists, Psychologists, and Behavioral Health Technicians.
- **Medical Discipline positions**: Medical MDs, Physician Assistants, and Advanced Practice Registered Nurses.
- **Medical Nursing Discipline positions**: Medical Registered Nurses, Licensed Practical Nurses, Certified Nursing Assistants, and Nursing/Medical Assistants.

It should be noted that the analysis provided here does not consider other factors that may impact service delivery capabilities. The analysis used recent performance measures and outcomes to identify gaps in performance and analyzed the gaps for areas where staffing increases would potentially result in raising the performance levels.

Correctional Medical Authority (CMA) Findings

North Highland reviewed the latest Correctional Medical Authority (CMA) surveys for FDC-run correctional institutions with reception centers, inpatient mental health units, or a large total inmate population.[48] The CMA surveys each major correctional institution once every three years, using specific criteria to evaluate if inmate care and treatment satisfies statutory and Department requirements, and publishes a thorough report on its findings.[49]

CMA's findings and conclusions are based on several methods of evidence collection, including physical evidence,

48 The latest CMA survey reports for the following institutions were reviewed and analyzed: CFRC (2014), NWFRC (2014), SFRC (2017), FWRC (2015), Union (2017), Suwannee (2017), Santa Rosa (2016), Lake (2014), Dade (2015), Zephyrhills (2013), Charlotte (2015), RMC (2015), Everglades (2016), Okeechobee (2014), Gulf (2016), Columbia (2015), Desoto Annex (2016), and Martin (2016). These institutions are reflective of the largest correctional facilities by total inmate population as well as those correctional facilities with inpatient mental health services and/or reception centers.

49 CMA contracts with a variety of licensed community and public health care practitioners, such as physicians, psychiatrists, dentists, nurses, psychologists and licensed mental health professionals. The survey process includes a review of the physical, dental and mental health systems; specifically, the existence and application of written policies and procedures, staff credentials, staff training, confinement practices, and a myriad of additional administrative issues. Individual case reviews are also conducted. The cases selected for review are representative of inmates who are receiving mental and/or physical health services (or who are eligible to receive such services).

AMERICAN OVERSIGHT

testimonial evidence, documentary evidence, and analytical evidence. Findings may arise from a single event or a trend of similar events and may also involve past or present events that either had or may have the potential of compromising inmate health care. All findings identified require corrective action by institutional staff.

A review of CMA reports found areas where the Department should consider staffing adjustments. A summary of CMA findings related directly or in part to staffing levels in the mental health, dental and medical service areas is provided below.

Mental Health

A review of CMA survey findings in mental health revealed wide-spread, persistent vacancies across mental health positions and across institutions. Vacancies were particularly pronounced in psychiatrist, mental health nursing and clinician positions and CMA noted several concerns about the adequacy of mental health nursing and psychiatry position staffing levels in both inpatient and outpatient settings.[50] Nearly all of the CMA's mental health findings were directly or partially associated with inadequate staffing levels and more than one-third of the CMA reports reviewed included an explicit recommendation for the institution to evaluate its mental health staffing levels to ensure inmates have adequate access to mental health services. Several institutions indicated challenges related to adequate clinical and nursing coverage and staff had concerns regarding current workloads and the need to limit the time spent with inmates on their caseload in order to complete other required tasks, such as paperwork. CMA's findings related to staffing levels include:

- **Missing or late initial and follow-up clinical and nursing assessments**
  - Missing evaluations and assessments not completed as required. For example, inmates were not consistently seen by the attending clinician and for post-discharge follow-up. There were also additional nursing findings related to incomplete or missing nursing assessments.
  - Mental status exams were not completed as required for inmates in confinement.
  - Staff indicated that additional mental health professional positions would alleviate the workload so that assessments and follow-up could be provided timely.

- **Provision of Mental Health Services**
  - A review of outpatient services revealed that Individualized Service Plans (ISPs) and informed medication consents were not consistently signed by the inmate. These signatures are significant because they indicate the inmate is involved in the planning and carrying out of his treatment goals.
  - Inmates did not always receive the services and interventions (i.e. counseling, psychiatric services and case management) as indicated and agreed upon in the ISP.
  - Inmates were not provided the appropriate level of structured therapeutic services, noting high inpatient workloads and staffing were key challenges in meeting requirements.
  - The ongoing *Jones v. Disability Rights of Florida, Inc.* lawsuit pertains to these issues and its outcome will have an impact on mental health staffing needs and levels.

- **Lack of documentation in mental health records**
  - Numerous findings related to a lack of documentation of mental health contacts and assessments.
  - Disorganization and back-log delays in completing and filing mental health records.
  - These findings are a concern because without complete documentation, it is impossible to determine if the assessments were completed timely and appropriately.

- **Wide-spread concerns related to psychiatric services and psychotropic medication administration**
  - Many of CMA's findings were related to psychiatric services and psychotropic medication administration (i.e., the prescribing, assessing, and distribution of psychotropic medication) in both inpatient and outpatient mental health settings. CMA cited inadequate staffing levels, level of clinician coverage, and persistent psychiatrist position vacancies as key contributors to these issues.[51]

50 CMA noted that such shortages are covered by agency nurses and locum tenens, but that there continue to be inherent challenges in continuity of care and treatment when relying on temporary staff unfamiliar with facility operations.

51 Psychiatric services are performed by psychiatrists and psychiatric nurses (e.g., RNs and APRNs). A psychiatrist

AMERICAN OVERSIGHT

- Inmates were not seen for follow-up within the required timeframe with some facilities reporting that follow-up was not provided for five to nine months or greater.
- Medication was discontinued when the order expired, however there was no order from a clinician to discontinue the medication.
- Initial and follow-up assessments and lab studies were not performed as required.
- Many records lacked appropriate documentation of the daily administration of medication and, on many occasions, there were gaps in the medication administration record (MAR), which indicates that medication was not administered on that day. Surveyors were concerned that inmates on mental health medications, especially those requiring titration, who do not receive their medications as prescribed may experience adverse physical or psychological effects, further compounding existing caseload challenges.

Dental

A review of CMA reports revealed persistent concerns pertaining to the level of dental staff and clinician coverage. There were also wide-spread concerns regarding the condition of necessary dental equipment.[52] CMA's findings related to dental staffing levels include:

- **Access to Consultations and Specialty Care Services**
  - Most institutions reported long wait times and significant delays in dental care, especially for specialty care services and follow-up consultations.

- **Dental Staffing Coverage**
  - At several institutions, CMA expressed concern that dental staff may be working outside their scope of practice (e.g., taking x-rays without doctor's orders, etc.).
  - In one institution, CMA found that there was a one to five month wait before the x-rays were reviewed by a dentist.
  - Lack of documentation of dental findings and treatments in dental records and charts.

Medical

A review of CMA reports revealed issues related to medical nursing staff levels and clinician coverage in institutional clinics. CMA's findings related to staffing levels in the medical area include:

- **Clinician Coverage in Institutional Clinics**
  - In several institutions, there was no evidence that clinic consultations were performed in a timely manner.
  - Delayed or missed periodic screenings and required follow-up appointments were frequently cited.

- **Medical Nursing Staff**
  - Numerous findings of incomplete, missing or inaccurate documentation in medical records for medication administration, follow-up consultations, laboratory orders, nursing assessments, and periodic screenings also signaled issues with medical nursing staff levels and coverage.
  - A few institutions reported that retaining nursing staff had been difficult and some faced significant vacancies in medical nursing positions.

position is required to serve inmates receiving psychotropic medications.

52 CMA identified several concerns regarding the availability of essential dental equipment and supplies, which can contribute to longer wait times. Necessary equipment was found to be not in proper working order at many institutions. The equipment most often cited were dental chairs, dental operatories, and x-ray equipment. Of note, at the fifth largest correctional institution by inmate population (Gulf CI), CMA found that the infrastructure of the dental clinic was in significant disrepair.

AMERICAN OVERSIGHT

Health Services Staff Estimates

The following Exhibits present the Health Services staff estimates in detail by category.

It is important to note that the Health Services staff estimates remain the same (unchanged) under both delivery models analyzed in this study because both options include insourcing the Health Services workforce. These estimates, shown in the Exhibits below, provide a snapshot of the Health Services staff that would need to be brought in-house to the Department under an insourced model and is not inclusive of all the staffing level changes and increases that would be potentially needed under any type of delivery model, insourced or otherwise, to meet pre-defined performance criteria identified by the Department. The results of this market wage analysis are incorporated and reflected in the staff estimates presented in this section (denoted in green in the Exhibits below).

Exhibit 3.8 Health Services Staffing Estimates

D. Health Services Expenses

Aside from the compensation for Health Services staff, there are a variety of expenses associated with the delivery of health services to inmates, such as medical supplies, claims processing and care provided to inmates outside-the-gate.

Methodology

Baseline estimates for expenses related to Health Services were constructed using historical Department data and current vendor data for direct and indirect health care expenses. The Exhibits below outlines the methodology and assumptions used to estimate Health Services expenses for each delivery model option. See Appendix 7 for a full list of assumptions.

AMERICAN OVERSIGHT

Option	Category	Component	Methodology/Assumptions
All	Direct Health Services Expenses	Outside-the-Gate	Health care services provided to inmates 'outside-the-gate', offsite in the community, either in physician offices or hospital settings. Current vendor expenses for Offsite UM Expenses; Incurred but Not Reported (IBNR) Hospital Inpatient-Ext; IBNR Hospital Outpatient; IBNR Hospital E/R; IBNR Primary Care Physician; IBNR Specialty Care Physician; and, IBNR Other Medical in FY16-17, adjusted for Region 4. Note: Nearly all outside-the-gate expenses are incurred in the Institutional Medical and RMC Disciplines. (RMC's share of IBNR expenses apportioned based on its share (45%) of total Offsite UM Expenses in FY16-17). Mental Health has very minimal outside-the-gate costs as nearly all mental health services are provided on-site.
Option 1		Outside-the-Gate	Outside-the-Gate costs increase by 20% (see Network Management – Option 1). This increase is represented in Exhibit 3.5 under the "Option 1 Network Management Factor" Column.
Option 2		Outside-the-Gate	Assumes the Department currently receives the best negotiated rates available (same as a large payer or TPA would be able to receive in the current market) and therefore, there would be no change in outside-the-gate costs as a result of using a PPO/TPA.
All	Direct Health Services Expenses	Inside-the-Gate	Expenses for health care services provided to inmates 'inside-the-gate', onsite within FDC facilities. Excludes any Health Services staffing costs (see staffing estimates). Current vendor expenses for Onsite UM Expenses (specialty clinics and independent laboratory referrals) and Direct Medical Expenses (costs associated with providing direct health services onsite) in FY16-17, adjusted for Region 4. Note: Inside-the-gate costs related to Dental and Mental Health are covered in the other expense categories.
All	Direct Health Services Expenses	Non-Formulary Drugs	Assumes current vendor expenses for Non-Formulary drugs in FY16-17, adjusted for Region 4.
All	Related Health Services Expenses	Medical Equipment	Assumes the Department's FY17-18 budget appropriation for Health Services Operating Capital Outlay (OCO) ($500,000).
		Medical Supplies	Assumes current vendor expenses for Medical Supplies in FY16-17, adjusted for Region 4.
Option 1	Related Health Services Expenses	Utilization Management (UM)	Assumes UM would be provided by the Department 'in-house', necessitating the purchase of UM software, estimated to cost $110,000 annually, and the net new hiring of 1 Director-level UM RN position with a base salary of $110,000. Cost of software based on past Department quote for InterQual software. Salary determined relative to existing UM staff salary levels.
Option 2		Utilization Management (UM)	Assumes UM would be provided by a third party (PPO/TPA) and the Department would continue to maintain a small UM team to liaise with the contractor and ensure appropriate care is provided to inmate patients. Assumes the net new hiring of 1 Director-level UM RN position with a base salary of $110,000.
All	Oversight and Recruitment	Recruitment	Current vendor expenses for employment advertising and marketing expenses in FY16-17, adjusted for Region 4. Expenses do not include any type of bonus or incentive recruitment programs.
		Training/Licensing	Current vendor expenses for training and seminars, physician credentialing, and licensing and filing fees in FY16-17, adjusted for Region 4.

AMERICAN OVERSIGHT

		Temp Staffing	Current vendor expenses for temporary help in FY16-17, adjusted for Region 4.
Option 1	Related Health Services Expenses	Claims Processing	Assumes claims processing would be provided by a third party (PPO/TPA) at a flat, fixed range of $2-$8 PIPM (median $5 PIPM used in estimates).
Option 2		Claims Processing	Assumes claims processing would be provided by a third party (PPO/TPA) at a flat, fixed range of $2-$8 PIPM (median $5 PIPM used in estimates).
Option 1	Network Management	Individual Contracts	Assumes outside-the-gate costs would increase by 20% because of the Department's reduced purchasing power under Option 1 (i.e., directly contracting with individual providers). Percent increase based on the difference between FY11-12 offsite costs ($120 million, adjusted for inflation) and current vendor FY16-17 offsite costs, adjusted for Region 4 ($95 million). Reflected in "Option 1 Network Management Factor" column in Exhibit 3.5.
Option 2		PPO/TPA Network	Assumes offsite provider network would be managed by a third party (PPO/TPA) for a flat, fixed network access fee ranging from $2-$5 PIPM (median $3.50 PIPM used in estimates). Does not include any initial or one-time setup fees (estimated range: $75,000-$100,000)

Exhibit 3.9 Health Services Expenses Methodology and Assumptions

PPO/TPA Service Fees

Under PPO/TPA arrangements, the Department will pay for the actual cost of the offsite specialty or hospital service and pay administrative fees to a PPO or TPA. These fees may be calculated per-inmate-per-month (PIPM), as a percentage of cost, as a percentage of the network discount, or other ways. Separate fees for network access, claims payment, UM, or other a la cart services may also be charged.

Based on industry research and North Highland Subject Matter Expertise, the following PIPM fee ranges are assumed. The median PIPM is used in the cost estimates. The PIPM fees were applied to a population of 87,656 inmates.[53]

	Estimated PIPM Range		
PPO/TPA Service	**Low**	**Median**	**High**
Network Access & Management	$2.00	$3.50	$5.00
Claims Processing Services	$2.00	$5.00	$8.00
Utilization Management (UM) Services	$2.00	$5.00	$8.00
TOTAL	$6.00	$13.50	$21.00

Exhibit 3.10 Estimated PIPM Fees for PPO/TPA Services

53 As of June 30, there were a total of 87,656 inmates housed in Department-run correctional facilities. Excludes inmates residing in privately-run prisons. Florida Department of Corrections, Bureau of Research and Data Analysis: Inmate Population and Facility profile data as of June 30, 2017.

AMERICAN OVERSIGHT

Expense Estimates

The Exhibit 3.11 and Exhibit 3.12 present the Health Services expense estimates broken down by category, discipline area and delivery model option.

OPTION 1: EXPENSES

E. Comparison of Cost Estimates

The Exhibit below shows the cost comparison for Option 1 and Option 2. The differential between Option 1 and Option 2 is approximately $11.4 million, driven primarily by differences in offsite care expenses.

[a] *OPTION 1: An insourced model for all primary and infirmary-level care provided behind-the-gate with all specialty and hospital care provided through individual contracts with specialists and hospitals (the model primarily employed by FDC before the statewide outsourcing initiative was implemented in 2013).*

[b] *OPTION 2: An insourced model for all primary and infirmary-level care provided behind-the-gate, with all specialty and hospital care as well as utilization management and claims processing functions provided through a PPO/TPA model.*

Exhibit 3.13 Option 1 and Option 2 Cost Comparison

VIII. Conclusions

Based on the analysis and comparison of the two insourced delivery model options, the following observations were concluded:

- With access to a large payer's discounted network rates, Option 2 would provide better contractual rates for specialty and hospital services than Option 1. The companies that offer these PPO/TPA services already cover hundreds of thousands of lives or more, depending on their size and coverage area, and because of this, are able to obtain the best rates for hospital and specialty services through economies of scale that the Department on its own could not achieve.
- Access to a sustainable, adequate network of providers would be guaranteed under Option 2. Prior to outsourcing, the Department had difficulty maintaining a statewide network of hospital and specialty providers at reasonable rates.
- A PPO/TPA arrangement would allow the Department to leverage the technology, expertise, and economies of scale of a large payer. PPOs/TPAs already have state-of-the-art practices, technologies, and

AMERICAN OVERSIGHT

people in place, and using this type of arrangement provides the Department with a cost-effective way to utilize these resources, which would require significant investment or upfront costs to provide in-house.

- By using a PPO/TPA delivery model, the Department would continue to look to the private sector for flexibility, purchasing power, business acumen, and innovation to help contain the largest cost driver for inmate health services.
- With access to large payers' provider networks and their discounted rates, along with state-of-the-art claims processing to identify and prevent potentially costly billing errors, claims fraud and abuse, Option 2 has greater potential for long-term cost containment than Option 1. Additionally, a PPO/TPA reporting capabilities and services could significantly enhance transparency into health care spending and allow the Department to identify opportunities for future cost containment and savings.
- The cost analysis showed projected cost savings associated with Option 2.

Based on this, Option 2 is selected as the more optimal insourced delivery model option.

Should the Department decide to contract with a PPO/TPA(s) to provide third party administration and network management services for offsite care (Option 2), it should do so using a flat, fixed fee structure. Such an agreement should provide claims processing and administration services, access to and maintenance of a broad provider network, and mechanisms to control costs through utilization management and robust reporting services.

Should the Department decide to contract with providers directly (Option 1), it should engage the services of a claims payment vendor, such as a TPA, that can process, review and verify payments, assess for billing errors, and provide robust claims data and reporting services. Contracting with a such a vendor for claims processing services would provide a more effective, efficient, and streamlined operation than if the Department were to do it in-house and could help contain and reduce costs by:

- Identifying and preventing billing errors
- Identifying potential fraud and abuse during claims processing
- Improving procedures for utilization review
- Using industry-leading payment models for offsite care
- Improving the follow-up and monitoring of offsite care
- Improving the coordination and provision of outside care hospital/specialty care
- Promoting better utilization of resources

AMERICAN OVERSIGHT

IX. Other Opportunities for Cost Efficiencies

North Highland identified key areas of opportunity for additional cost efficiencies and savings that the Department could explore to help further contain and offset the cost of inmate health services.

A. Reinstate Reception and Medical Center Laboratory Services

Currently, the Department contracts with a private vendor to provide laboratory services to every correctional facility in the state. Laboratory services are necessary for the Department to maintain an adequate level of health care services. Prior to 2005, the Department established and maintained an accredited and full-service laboratory at the RMC in Lake Butler. The laboratory was a necessity to obtain a hospital accreditation. During its operation, the laboratory serviced the RMC Hospital as well as other institutions from Region 2, which provided opportunities for cost containment. The advantages and disadvantages for reinstating laboratory services at the RMC Hospital are as follows:

Advantages

An onsite laboratory is better aligned to offer more efficient and reliable services compared to sending specimens offsite. Faster specimen result turnaround times reduces potential delays in treatment and reduces the number of unnecessary inmate transfers off property when results are insignificant. An onsite stat lab is more able to meet the high demand for laboratory services creating efficiencies and cost savings. Selected stat lab testing should also be considered at other correctional facilities that house inmates with high medical acuity.

Challenges

The main challenge associated with reinstating the laboratory functions is the potential for hidden upfront costs. Although more exploration would be necessary to fully understand the costs and benefits associated with an on-site laboratory, a large upfront cost would be required of the Department, including recruitment of laboratory personnel, training, and compliance with federal and state regulatory requirements. Another necessity would be conducting an inventory review of Department-owned laboratory equipment and determining any costs associated with purchasing, leasing, or updating equipment.

B. Data and Analytics

There are several ways that the Department can enhance its data and analytics to provide better clinical and administrative decision making and rapid assessment of policies, procedures, and opportunities for cost saving measures. These potential enhancements include:

Advanced Analytics

Advanced analytics would allow the Department to extract meaningful patterns from data to describe, predict, and improve performance. Advanced analytics would also provide the ability to track a wide variety of clinical and operational performance measures against benchmarks at the provider, facility, regional and state level. Analytics should also be used to identify clinical and administrative outliers, frame quality improvement program objectives, develop budgets, and identify emerging trends.

Enterprise Information Management and Business Intelligence (EIMBI)

This potential enhancement would provide opportunities to develop data, information, analytics strategy, and roadmaps that align with business objectives. EIMBI would also improve data quality through data governance across people, process, and technology. The ability to build the underlying infrastructure to support better decision making is an additional advantage.

Data Visualization

High-quality analytics, grounded in clean, secure data would enable the Department to obtain compelling, actionable data stories, scorecards, and dashboards.

AMERICAN OVERSIGHT

C. E-Consult Platform

A major trend in community health and specialty care is the use of E-Consult Platforms. This innovative technology has enormous potential in correctional health services with its ability to provide access to specialists' input to address several well-documented gaps in primary care-specialty care communication and coordination, and provide a foundation for non-face-to-face, asynchronous electronic consultation. In the E-Consult Platform, correctional Primary Care Providers (PCP) considering a specialty referral[54] access the E-Consult technology platform and selects the appropriate clinical guideline template which have been vetted by the specialists and are essential to appropriate referral. The PCP follows the guideline, which issues an electronic specialty referral, and attaches clinical documentation as prescribed in the clinical template. A specialist affiliated with the E-Consult platform reviews the case and responds with treatment recommendations for the Primary Care Physician to use in co-managing the inmate in primary care with on-going specialty consultation. Only if the inmate cannot be safely managed in the primary care setting does an actual referral for in-person/offsite specialty care occur. E-Consult is gaining a strong foothold in corrections and there is ample data to support its use to increase access, provide more timely diagnosis and treatment, and reduce inmate movement.

Specialty Consult Efficiencies

- Response time for the specialty consultation is usually within 72 hours
- Correctional PCPs are supportive of E-Consults, because they learn to better manage inmates through physician-to-physician collaboration. There are rarely denials or delays in care
- Improved access to specialty care (especially for specialists that are hard to find in rural locations)
- Improved provider management of complex conditions
- E-Consult can minimize the security risk of transporting inmates with high 'flight-risks' outside of the facility for care, reduce transport personnel injury, and reduce the exposure of inmates to civilians in community hospital settings
- Significantly reduced need for traditional Utilization Management services

D. Telehealth

Telehealth is not new technology; however, it is increasingly utilized in community and correctional health care settings. It offers the potential for cost savings and performance improvements in correctional settings. Medical staff positions are difficult to fill for many correctional facilities. On-site clinical staff recruitment will continue to be a challenge and high rates of vacant positions are expected to continue. Correctional facilities can leverage virtual health tools to improve inmate access to care, reduce cost, and reduce risk to the Department by providing better inmate health outcomes. Virtual tools can be a more efficient and cost-effective delivery of care.

Benefits

There are many benefits to utilizing telehealth solutions in correctional settings including:

- Increased speed to diagnosis/care
- Increased access to specialty providers, notably for behavioral health
- Access to better care from more advanced, experienced staff who may be more willing to provide care remotely
- Prison population has been aging, resulting in increased need for health services
- Inmate movement is decreased, saving money and enhancing safety

Telehealth presents many opportunities for reduced transportation and medical provider costs. The return on

54 U.S. Centers for Medicare and Medicaid Services, "eConsults/eReferrals: Controlling Costs and Improving Quality at the Interface of Primary Care and Specialty Care", Health Care Innovation Awards Round Two (2017). https://innovation.cms.gov/initiatives/Participant/Health-Care-Innovation-Awards-Round-Two/Association-Of-American-Medical-Colleges.html

AMERICAN OVERSIGHT

investment (ROI) is $40-$70 per telehealth visit compared to $200[55]-$500[56] per transport[57]. This can result in large cost savings for the Department since telehealth visits would require fewer vehicles, fewer transport personnel and reduced overtime accrual. The cost savings associated with decreased medical provider costs relates to the geographical location of the correctional facilities which are often difficult to reach for medical practitioners. These cost savings measures can also lead to reduced risk for the Department and can enhance public safety. Telehealth can minimize the security risk of transporting inmates with high 'flight-risks' outside of the facility for care, reduce transport personnel injury, and reduce the exposure of inmates to civilians in community hospital settings.

Opportunities

There are a variety of medical specialties within inmate health services where telehealth can be greatly utilized. For example, the New York corrections department utilizes tele-triage in their institutional emergency department to supplement outside emergency care. In Florida, Telepsychiatry is minimally utilized in the Department's institutions as a complement to their current mental health practices. Telepsychiatry can expand the services to an increasing mental health population, especially in facilities experiencing difficulties acquiring and retaining mental health staff. Another area for Department exploration is teleradiology, which has more cost savings potential. Virtual health consultation is quickly trending in other community specialties including substance abuse, dermatology, pre-operative, and follow-up, general medical, and Teleneurology.

E. Enhance Medicaid Partnership

Medicaid Eligibility and Funding

For background information, Florida statute *409.9025 Eligibility While An Inmate* states, "In the event that a person who is an inmate in the state's correctional system … was in receipt of medical assistance under this chapter immediately prior to being admitted as an inmate, such person shall remain eligible for medical assistance while an inmate, except that no medical assistance shall be furnished under this chapter for any care, services, or supplies provided during such time as the person is an inmate; however, nothing in this section shall be deemed as preventing the provision of medical assistance for inpatient hospital services furnished to an inmate at a hospital outside of the premises of the inmate's facility to the extent that federal financial participation is available for the costs of such services."

According to this Florida statute and federal regulations, Medicaid funds cannot be used to provide medical services to inmates who are housed in state correctional facilities. However, Medicaid funds can be used to provide inmate medical services at a licensed and secured medical facility that is located outside of the correction system (such as a hospital, nursing home, or psychiatric center). Only a few states have created the infrastructure necessary to draw down federal Medical funds for inmates housed in other medical facilities outside of the state's correctional system.[58] Furthermore, some states have determined that inmates who were not under social and economic assistance at the time of inmate admission may have reached or will likely reach Medicaid eligibility status.

Even though Florida is a Medicaid non-expansion state, opportunities to obtain federal assistance for inmate services in the community appear to exist. Working with the state's Medicaid agency (Agency for Health Care Administration), Governor, and Legislature, FDC could explore implementing a process to access Medicaid funds for eligible inmates who require overnight hospitalization or long-term medical care in community hospitals or facilities.

Some states terminate a Medicaid enrollee's coverage upon incarceration, making it necessary for the ex-offender to

AMERICAN OVERSIGHT

re-enroll upon release from a correctional facility.[59] However, Florida currently suspends Medicaid coverage for inmates. Federal officials confirm suspending inmates' coverage improves access to Medicaid-funded medical services upon release or when accessing community health services.[60]

Without Medicaid coverage, ex-offenders in Florida often qualify for the state's Low Income Pool (LIP) and receive medical services that are paid with LIP funds. If eligible ex-offenders were enrolled for Medicaid, LIP funds would not be needed to provide medical services to ex-offenders who are Medicaid eligible. Pre-enrolling qualified ex-offenders in Medicaid will reduce the state's burden on LIP funds.

Other states have been able to access Medicaid funds for inmates who have suspended Medicaid coverage. For example, Pennsylvania is implementing necessary laws and policies to provide Medicaid reimbursements for inmates requiring medical services outside of the state's correctional facilities. Pennsylvania laws require those non-correctional facilities that provide inmate medical services to bill Medicaid directly for these services at Medicaid rates. This method has also provided opportunities to access federal matching Medicaid funds. Outpatient services are billed at Medicare rates, paid by the contracted vendor and then passed through to Pennsylvania's corrections agency. In Ohio, the state created an Interagency Agreement that permits the state's Medicaid agency to reimburse Ohio's corrections agency for inmate medical services that were provided outside of the correctional facilities.

Considerations for Florida:

- Explore pre-enrolling eligible inmate population into Medicaid
- Ensure Medicaid coverage continues when eligible inmates are released from correctional facilities
- Identify opportunities to access additional federal Medicaid funds to provide inmate medical services at non-correctional facilities

Nursing Homes/Long Term Care

The federal government's Centers for Medicare and Medicaid Services (CMS) allows for community-based nursing homes to provide medical services to inmates with full reimbursement from Medicaid.[61] According to CMS, "Many States are examining the role that the health care system plays in providing vital services to individuals during and following a period of incarceration. For example, some individuals were previously uninsured and may have long-untreated health conditions. Others have aged in prison and may be discharged under compassionate release policies or may need specialized care for chronic or debilitating conditions. In particular, States are considering the role that Medicaid can play in facilitating better access to health care for individuals prior to, during, and after, a stay in a correctional facility."[62]

Given the increasing portion of the system's inmates who are elderly, frail, and deteriorating, FDC's capacity for inmates with high clinical acuity or high medical needs is limited. This limited capacity is a growing concern as Florida's elderly inmate population with high medical needs continues to increase. Florida could pursue opportunities to access Medicaid funds for inmates requiring long-term medical care that is provided in community-based nursing homes.

AMERICAN OVERSIGHT

Prescription Medication Pricing Strategies

In recent years, the cost for prescription medication has increased by as much as 14.1 percent in many states.[63] Prescription medication coverage now represents six percent of total Medicaid spending, and this does not include the cost of physician-administered drugs.[64] In the nation's state correctional facilities, the cost for prescription drugs used to treat inmates is increasing, accounting for nearly $8 billion in spending 2011. This figure did not include new, costly medications used to treat Hepatitis C.[65] To address these emerging trends, new approaches to drug pricing, spending, and utilization could be pursued.

Many states and organizations are working to identify opportunities to contain prescription drug costs and leverage lower-cost Medicaid pricing. For example, the National Academy for State Health Policy (NASHP) developed a comprehensive Work Group of state leaders, including leaders of state corrections departments, to identify new approaches in limiting pharmaceutical costs. The Work Group is exploring policy options for states to consider in the cost containment of drug prices.[66]

Working closely with AHCA, Governor, and Legislature, FDC should continue efforts to contain rising prescription drug costs used to treat inmates in the state's correctional facilities.

X. Transition

The analysis and estimates of the costs associated with both delivery model options do not account for, or include the costs, risks, and timeline associated with transitioning to a new health service delivery model. It should be noted that there are significant risks inherently associated with a transition of this size and scale.

This section describes key service transition activities, risks and approach recommendations to transition to either of the two delivery models analyzed in this study. More robust transition planning beyond the scope of this report would be needed prior to implementing a new health services delivery model.

Service Transition Activities

The activities described below provide high level direction and considerations of work that would need to be performed to transition all or partial health services from contracted service providers.

Test Service Transition Processes, Resources and Services

Implement / Cut-over of Transition Services

Pilot Service Transition

Post Implementation Support

Manage Service Transition Program

Manage Transition Risks and Issues

Provide Communications and Change Management

Risk Factors

The following are potential risks associated with Service Transition:

- Disruption of services
- Reduced adequacy of services
- Turnover of experienced contractor resources
- Reduced skills and experience of new resources
- Market availability of skilled resources
- Inability to manage insourced resources and processes
- Reduced reporting and accountability

AMERICAN OVERSIGHT

Recommendations to reduce the risks of Service Transition include:

- Ensure Department management provides leadership throughout the transition
- Work closely with service providers throughout the process
- Minimize changes during transition phase
- Use a phased transition approach
- Test transition process and perform a pilot transition
- Provide communications and change management throughout service transition

B. Appendix 2: State Market Scan

State Market Scan Questionnaire

Correctional Health Services Delivery Questionnaire
Health Services Delivery Model
Q: What is your Delivery Model for Health Services: Institutional Medical, Mental Health, Dental, Emergency/ Hospital Services, etc.? To what degree are these Health Services privatized/in-sourced (i.e., provided in-house by your Department)? With whom do you contract for privatized services (if any)? Are you satisfied with the delivery model?
A:
Q: What model do you use for medical staff? If you use a vendor, do they provide all of your medical staff (i.e RNs, LPNs, MH PhDs, Med PhDs, etc.)? If not, who do they staff and who do you staff? Why have you chosen that model and how has it generated cost savings or higher quality care?
A:
Q: How do you manage emergency and hospital services? Do you manage separate contracts with individual hospitals? Who manages those contracts? Do you have secure wings in certain hospitals? Or do you use a PPO/HMO model?
A:
Q: Do you use a PPO/HMO delivery model for any of your Health Services? If yes, please describe how that system works in your state. Are you satisfied with how that model is working for you? How long have you been using this model?
A:
Q: How do you subcontract for specialty services? Do you manage the subcontracts directly, use a PPO/HMO model, or something else?
A:
Q: How does your UM process work? Is it managed by your Department, through the vendor, or both? Do you and/or the vendor use a specific type of software or technology to manage the UM system? If so, which one?
A:
Q: Do you currently have Electronic Health Records (EHR)? If so, to what extent? If not, do you have plans to implement an EHR system?
A:

AMERICAN OVERSIGHT

Q: What does your claims process look like? How are grievances handled? Do you and/or the vendor utilize a third-party to handle and/or process claims, or is this done 'in-house'?
A:
Q: Who operates the pharmacy and labs? Are they managed through a vendor, subcontractor or the department?
A:
Q: Do you receive Medicaid Reimbursements? If so, how has it impacted cost savings?
A:
Q: Does the relationship with security effect medical transports or the ability for inmates to receive medical treatment? Can you provide any data related to this?
A:
Q: What metrics do you regularly track for performance? Would you be willing to share your PM tool with us?
A:
Q: Is there anything your department does that generates cost savings or improved quality of care that were not touched upon above?
A:
Q: Do you have any other information you feel is important that we need to know when performing this analysis?

AMERICAN OVERSIGHT

C. Appendix 3: Definitions and Glossary

Terms	**Definition**
Staffing	Defined as the recurring annual costs for the health services staff employed by the Department. These costs include adjusted base salaries and the employer's share of employee benefits. Benefits include retirement, health insurance, life insurance, and Medicare contributions. Costs of workers compensation insurance and any other risk insurance are not included.
Expenses	Defined as the recurring annual expenses *not associated with Staffing* (i.e., all other expenses not associated with the direct costs of Department-employed health services staff). Direct health care expenses are separated into two categories, "inside-the-gate" and "outside-the-gate", defined by the physical location of where care is provided to inmates: Health services provided to inmates within prison facilities are considered "inside-the-gate" (onsite care). Health services provided to inmates outside of prison facilities in the community are considered "outside-the-gate" (offsite care).
Outside-the-Gate Expenses	Health care services provided to inmates 'outside-the-gate', offsite in the community, either in physician offices or hospital settings. These expenses include: • Offsite UM Expenses • Incurred But Not Reported (IBNR) Hospital Inpatient-Ext • IBNR Hospital Outpatient • IBNR Hospital E/R • IBNR Primary Care Physician • IBNR Specialty Care Physician • IBNR Other Medical
Inside-the-Gate Expenses	Health care services provided to inmates 'inside-the-gate', onsite within FDC facilities. Includes primary, infirmary and specialty-level care. These expenses include: • Onsite UM Expenses (specialty clinics and independent laboratory referrals) • Direct Medical Expenses (costs associated with providing direct health services onsite)
Medical Equipment & Supplies	Includes all Medical Supplies purchases and Medical Equipment purchases, leases and maintenance.

AMERICAN OVERSIGHT

Non-Formulary Drugs	The Department maintains an extensive drug formulary system and the cost of all "formulary drugs" prescribed to inmates are currently the responsibility of the Department. These costs represent the majority of drug costs and are paid for out of the Department's existing health services budget. Drugs prescribed to inmates that are not included on the Department's formulary list ("non-formulary drugs") are currently the responsibility of the comprehensive health services vendor. The Department would become newly responsible for the cost of non-formulary drugs under either delivery model option.
Oversight & Recruitment	Oversight and Recruitment costs are categorized as expenses and FTEs associated with health services, but not involved in the direct delivery of health services to inmates.
Oversight	Includes current Contract Monitor FTE positions needed for oversight of health services across disciplines.
Recruitment	Includes employment advertising and marketing expenses. Expenses do not include any type of bonus or incentive recruitment programs. Includes recruitment/recruiter FTE positions.
Training & Licensing	Includes expenses related to training and seminars, physician credentialing, and licensing and filing fees.
Temporary Staffing	Includes expenses related to temporary help and staffing contract services.
Utilization Management (UM)	Expenses and staff associated with the review, authorization, triage and oversight of specialty and hospital care referrals, requests and consults. Includes utilization management information systems and utilization management nursing staff.
Claims Processing	Includes the costs associated with the review, processing and payment of medical claims.
Network Management	Expenses associate with establishing, managing and maintaining an adequate Provider Network for health services not available "inside-the-gate"/ health services provided to inmates in a community setting, primarily for specialty care and hospital services.
Institutional Medical	The "Institutional Medical" discipline is defined as medical health services provided to inmates at all FDC institutions and facilities, with the exception of Reception and Medical Center (RMC) in Lake Butler, FL.
RMC (Discipline)	The "RMC" Discipline is defined as the medical health services provided to inmates at RMC in Lake Butler, FL only. All other medical health services fall under the "Institutional Medical" category.

AMERICAN OVERSIGHT

Mental Health	The "Mental Health" discipline is defined as all mental health services provided to inmates statewide.
Dental	The "Dental" discipline is defined as all dental health services provided to inmates statewide.
Inmate Population	Defined as inmates residing in Department-run correctional facilities. Excludes the private prison inmate population (7 privately-run prisons).
Insourced	Defined as health services provided directly by the Department.
Outsourced	Defined as health services provided by a third party (health services not provided directly by the Department).
PPO/TPA	Preferred Provider Organization (PPO) Third Party Administrator (TPA)
PIPM	Per inmate per month (PIPM). Flat, fixed fee (structure) for PPO/TPA services.
Department-run Facilities	Defined as correctional institutions and facilities operated by the Florida Department of Corrections. Excludes the seven (7) privately-run prisons which are managed by the Florida Department of Management Services (DMS): Bay, Blackwater, Gadsden, Graceville, Lake City, Moorehaven, and South Bay correctional facilities correctional facilities.
Inflation adjustment	All inflation adjustments are based on the Consumer Price Index as published by the Florida Office of Economic and Demographic Research (EDR) National Economic Estimating Conference (NEEC).

AMERICAN OVERSIGHT

D. Appendix 4: Overview of Recent Procurement Efforts

Following the emergency contract with Centurion, the Department decided to re-procure Comprehensive Healthcare Services statewide. Unlike previous procurements, this new procurement used an Invitation to Negotiate (ITN) structure, in order to enhance elements of the health care services provided to inmates.[67]

The re-procurement process began in February 2015 when the Department announced its intention to release an ITN for comprehensive healthcare services. In December 2015, the Department issued four (4) separate ITNs.[68] Each of these four ITNs are broken down into specific segments of comprehensive healthcare services, rather than by geography as had been done in the past. These segments, also known as discipline lines, are: Institutional Medical Care; Medical and Hospital Operations at the Reception and Medical Center (RMC); Inpatient and Outpatient Mental Health Services; and, Dental Services.[69]

Scope of Services & Responsibilities

The Department has issued four (4) separate solicitations for Comprehensive Health Care Services, broken down by discipline. Below is a high-level overview of each of the four disciplines.

Institutional Medical Services for Inmates ("Institutional Medical") ITN

Responsible for the provision of comprehensive medical health care services, excluding dental and mental health services, required at all of the Department's institutions except for RMC in Lake Butler, Florida. The Department runs more than 150 facilities and 49 major correctional institutions statewide.

It is the intention of the Department to contract with a single, statewide vendor for the provision of medical services at all of the Department's institutions.

Medical and Hospital Services at Reception and Medical Center ("RMC") ITN

Responsible for the provision of all medical health care services, excluding dental and mental health services, required at RMC, which includes RMC Hospital, RMC Main Unit, RMC Work Camp, and RMC West Unit. RMC serves as the Department-run correctional hospital and specialty medical center for inmates statewide.

It is the intention of the Department to contract with a single vendor for the provision of medical and hospital services at RMC.

Mental Health Services for Inmates ("Mental Health") ITN

Responsible for the provision of all mental health care services required at all of the Department's institutions statewide. Inmates are not sent to any public Mental Health facility. The Department provides all levels of mental health care inside the gate. Currently, there are 10 inpatient mental health units statewide. It is the intention of the Department to contract with a single, statewide vendor for the provision of mental health services at all of the Department's institutions.

Dental Services for Inmates ("Dental") ITN

Responsible for the provision of all dental care services required at all of the Department's institutions. There are currently 61 dental clinics in the Department's institutions statewide. It is the intention of the Department to contract with a single, statewide vendor for the provision of dental services at all of the Department's institutions.

---

67 "Comprehensive Healthcare Services Procurement", Florida Department of Corrections webpage, available at: http://www.dc.state.fl.us/business/HealthSvcs/index.html.
68 Potential 10 years of the proposed contract: five contract years, five renewal years.
69 Previously, the Department procured its comprehensive health services (i.e., Institutional Medical, Hospital and Emergency Services at RMC, Mental Health, and Dental services) by region, awarding one contractor to provide all health services in each region.

AMERICAN OVERSIGHT

Clinical & Financial Areas of Responsibilities by Discipline

Each ITN identifies where the clinical and financial responsibilities of each discipline line begin and end. These areas are described as "interfaces". The interfaces between these four discipline lines are outlined in the Exhibit below.

Financial Responsibilities	Medical*		Mental Health	Dental
	Institutional	RMC		
Health Records	Y	Y	N	N
Laboratory Costs	Y	Y	N	N
After Hours Care	Y	Y	N	N
Specialists & Specialty Referrals	Y	Y	Y	N
Non-formulary medications prescribed by its providers and Any local pharmacy prescriptions, purchases, deliveries and/or pickup and payment prescribed by its providers	Y	Y	Y	Y

** Responsibility depends on where services were provided (e.g., either at RMC facilities or elsewhere (Institutional).*

Exhibit A: Financial Areas of Responsibilities by Discipline
Source: Florida Department of Corrections, ITNs for Comprehensive Health Services[70]

Dental & Medical Services Interfaces

In addition to the items outlined Exhibit A, the Dental discipline line would also be responsible for the costs associated with the following list of services. All other services and costs not specified below would be the responsibility of the Medical Services (Institutional and RMC) discipline lines:

- Placing/removing dental implants
- Providing Palatal Obturators
- Hyperbaric Oxygen treatment/dives
- Evaluation and nonsurgical/surgical treatment of Temporomandibular Disorder issues/disease except for fractures; treating intra-oral alveolar fractures
- Intra-oral, alveolar and lip biopsies for oral pathology or cancer
- All intra-oral soft tissue grafting and reconstruction of the dentition as needed following surgical procedures and all other health care issues relating to oral pathology/trauma[71]

Mental Health & Medical Services Interfaces

In addition to the items outlined Exhibit A, the Mental Health discipline line would also be responsible for providing and paying for the following list of services. All other services and costs not specified below would be the responsibility of the Medical Services (Institutional and RMC) discipline lines:

- All required nursing care, including medication administration, to inmates housed on an inpatient mental health unit
- All required nursing services that support the outpatient psychiatric provider at S-3 institutions

E. Appendix 5: Performance Measures Outcomes

Office of Health Services (OHS) Performance Measures and Standards

Measures in red indicate where the Standard target was missed by 10 percentage points or more
**Average of Standards reported by applicable institutions in FY16-17*

PM Number	Discipline	FY16-17 Performance Measure	Standard	Average Standard Reported (Regions 1-3)*
73	**MH**	Outcome: In accordance with HSB 15.05.05 Inpatient Mental Health Services, out-of-cell structured therapeutic services are offered to each patient in a CSU, TCU and a CMHTF.	**100%**	13%
76	**MH**	Outcome: Observations and assessments are completed by nursing in accordance with established policy	**100%**	23%
80	**MH**	Outcome: Medical staff, upon completing the medical examination following a use of force, makes a mental health referral for each inmate who is classified S-2 or S-3 on the health profile and sends it to mental health staff, which evaluates S2/S3 inmates no later than the next working day following a use of force.	**100%**	36%
74	**MH**	Outcome: Nursing observations are documented in accordance with established policy.	**90%**	40%
77	**MH**	Outcome: A psychiatric evaluation is completed prior to initially prescribing psychotropics.	**100%**	42%
12	**M**	Outcome: The Chief Health Officer at the institution is responsible for the treatment of inmates on hunger strike.	**100%**	45%
69	**MH**	Outcome: Observations are completed and recorded by nursing according to the interval specified by the Clinician.	**100%**	47%
66	**MH**	Outcome: An Individualized Service Plan (ISP) is initiated and approved by the MDST within the respective timeframes specified in HSB 15.05.11 for admission to TCU, CSU, and CMHTF.	**90%**	52%

AMERICAN OVERSIGHT

PM Number	Discipline	FY16-17 Performance Measure	Standard	Average Standard Reported (Regions 1-3)*
84	**MH**	Outcome: The BRA is completed at the required intervals regardless of S-grade or housing assignment, including when the CM inmate is housed outside the CM unit in order to access necessary medical or mental health care.	**90%**	57%
65	**MH**	Outcome: The initial individualized service plan is completed within the timeframe specified in HSB 15.05.11 for the inmates assigned a mental health classification of S-2 or S-3.	**90%**	61%
63	**MH**	Outcome: If the inmate received inpatient mental health care within the past six (6) months or received psychotropic medication for a mental health disorder in the past thirty (30) days, a psychiatric evaluation is completed within 10 days of referral.	**100%**	65%
19	**M**	Outcome: All pregnant inmates will have a hepatitis B (HBsAg) test at the initial prenatal visit and at twenty-eight (28) weeks to thirty-two (32) weeks gestation.	**100%**	65%
20	**M**	Outcome: All pregnant inmates will have a syphilis test at the initial prenatal visit and at twenty-eight (28) weeks to thirty-two (32) weeks gestation.	**100%**	65%
70	**MH**	Outcome: Daily counseling by mental health staff (except weekend and holidays) is conducted and documented as a SOAP note.	**95%**	66%
79	**MH**	Outcome: Required laboratory tests are ordered for the initiation of psychotropic medication administration.	**100%**	69%
48	**MN**	Outcome: All Department employees whose duties are expected to bring them into contact with inmates and for contract employees, who perform their duties in institutions, must be screened/tested for tuberculosis upon application or hire, as appropriate and screened/tested annually thereafter.	**100%**	69%

AMERICAN OVERSIGHT

PM Number	Discipline	FY16-17 Performance Measure	Standard	Average Standard Reported (Regions 1-3)*
81	**MH**	Outcome: Each inmate who is classified as S-3 and who is assigned to administrative or disciplinary confinement, protective management, or close management status receives a mental status examination within five days of assignment and every 30 days thereafter.	**95%**	69%
18	**M**	Outcome: All pregnant inmates will be offered HIV testing.	**100%**	70%
71	**MH**	Outcome: Mental health staff evaluates relevant mental status and institutional adjustment as required by Procedure 404.001 Suicide and Self-Injury Prevention.	**95%**	71%
60	**MH**	Outcome: Inmate-initiated requests are responded to in accordance with the timeframe specified in HSB 15.05.18 Outpatient Mental Health Services.	**95%**	74%
83	**MH**	Outcome: Mental health staff performs weekly rounds in each confinement unit.	**100%**	74%
75	**MH**	Outcome: Physician's orders document the maximum duration of the order for restraint.	**100%**	76%
130	**ADM**	Outcome: Mortality Review meeting occurs and appropriate paperwork is completed in accordance with policy.	**100%**	76%
38	**MN**	Outcome: Inmates receive a periodic screening.	**95%**	77%
37	**MN**	Outcome: Nurse will perform Infirmary Patient Assessment per policy.	**100%**	77%
86	**MH**	Outcome: All inmates with a mental health grade of S-2 through S-6 who are within 180 days of End of Sentence (EOS) have an updated Individualized Service Plan to address Discharge/Aftercare Planning.	**100%**	77%
39	**M**	Outcome: Inmates receive screening by a clinician prior to release to Customs Enforcement, parole, placement in a work release facility or community correctional center.	**100%**	79%
72	**MH**	Outcome: All patients receive a psychiatric evaluation within the timeframes as specified in HSB 15.05.05 Inpatient Mental Health Services	**100%**	79%

AMERICAN OVERSIGHT

PM Number	Discipline	FY16-17 Performance Measure	Standard	Average Standard Reported (Regions 1-3)*
82	**MH**	Outcome: Each inmate who is classified as S-1 or S-2 and who is assigned to administrative or disciplinary confinement, protective management, or close management status receives a mental status examination within 30 days and every 90 days thereafter.	**95%**	79%
44	**MN**	Outcome: A post use of force physical examination will be performed by nursing staff with notification and/or referral to a clinician as clinically indicated.	**100%**	80%
51	**MN**	Outcome: All bloodborne pathogen exposure incidents must be assessed by medical to determine the significance and risk.	**100%**	81%
90	**D**	Outcome: Inmate waiting times between dental appointments do not exceed three (3) months.	**95%**	82%
41	**ADM**	Outcome: Inmates who are assigned to assist impaired inmates will receive required training.	**100%**	82%
40	**ADM**	Outcome: Inmates with impairments are placed in settings that can adequately provide for their healthcare treatment needs.	**100%**	82%
24	**M**	Outcome: Mammography shall be performed on all inmates with suspicious breast masses or lumps.	**100%**	84%
61	**MH**	Outcome: Inmate-declared emergencies and emergent staff referrals are responded to as soon as possible, but response must be within the timeframe specified in Procedure 404.001 Suicide and Self-Injury Prevention.	**100%**	84%
78	**MH**	Outcome: Informed consent forms for psychotropic medications are completed.	**100%**	84%
68	**MH**	Outcome: For inmates placed on Self-harm Observation Status, there is an order documented in the infirmary record by the attending clinician.	**100%**	85%

AMERICAN OVERSIGHT

PM Number	Discipline	FY16-17 Performance Measure	Standard	Average Standard Reported (Regions 1-3)*
88	**D**	Outcome: Dental sick call is conducted on a daily basis when the dentist is present to provide dental access to those inmates who cannot wait for a routine dental appointment and yet do not meet the criteria for emergency dental care. In the event the dentist is absent for more than seventy-two (72) hours medical staff are to evaluate and triage the inmate according to established protocols.	**100%**	86%
32	**MN**	Outcome: Medical Staff delivers care as outlined per policy to inmates who state they are the victim of an alleged sexual battery.	**100%**	86%
28	**MN**	Outcome: Prevention of and care for inmate's wounds in accordance with the Wound Program in the Infection Control Manual Chapter XXII.	**95%**	86%
85	**MH**	Outcome: All identified sex offenders at a permanent institution whose current sentence is a sex offense has a completed sex offender screening as a part of their medical record.	**90%**	87%
89	**D**	Outcome: The initial wait after request for routine comprehensive dental care does not exceed six (6) months for any inmate.	**95%**	87%
131	**ADM**	Outcome: The institution requests an autopsy, if performed, from the Medical Examiner's Office and sends it to the Central Office Mortality Review Coordinator. If an autopsy is not performed there should be a statement indicating the cause of death from the Medical Examiner.	**100%**	88%
127	**ADM**	Outcome: The contractor safeguards Protected Health Information in accordance with the terms and conditions outlined in the Business Associate Agreement.	**100%**	88%
128	**ADM**	Outcome: Supervision of staff is provided in accordance with statutory requirements for medical, nursing, dental, mental health and pharmacy.	**95%**	89%

AMERICAN OVERSIGHT

PM Number	Discipline	FY16-17 Performance Measure	Standard	Average Standard Reported (Regions 1-3)*
54	**MN**	Outcome: Monthly monitoring by the nurse or clinician if clinically indicated is to be initiated within two (2) weeks after the inmate has been started on INH or TB medications.	**100%**	90%
30	**ADM**	Outcome: Training for emergency care of inmates will be provided to all health care staff	**100%**	90%
109	**P**	Outcome: Deficiencies in previous Consultant Pharmacist Monthly Inspection Report are corrected	**90%**	90%
42	**MN**	Outcome: Inmates in special housing receive a Pre-Confinement Physical.	**100%**	91%
4	**M**	Outcome: Every newly committed inmate will receive a complete medical health appraisal within fourteen (14) days of arrival at the reception center.	**95%**	91%
43	**ADM**	Outcome: Nursing staff make daily rounds in special housing.	**100%**	91%
33	**M**	Outcome: Physician infirmary rounds made on a daily basis (Monday – Friday), except holidays.	**100%**	91%
8	**P**	Outcome: Medications are documented on the DC4-701A Medication and Treatment Record. Each dose of medication not administered is circled and an explanation written on the back of the DC4-701A.	**95%**	91%
126	**ADM**	Outcome: All clinical information significant to inmate health is filed in the health record within 72 hours of receipt.	**95%**	92%
23	**M**	Outcome: Routine screening mammograms are performed in accordance with policy.	**95%**	92%
5	**MN**	Outcome: Transfer section is completed by the sending institution and the Arrival Summary is completed by the receiving institution upon arrival.	**95%**	92%
62	**MH**	Outcome: If the inmate was on psychotropic medication immediately prior to transfer from the county jail, the screening medical staff arranges for continuity of care, until the inmate is seen by psychiatric staff.	**100%**	92%

AMERICAN OVERSIGHT

PM Number	Discipline	FY16-17 Performance Measure	Standard	Average Standard Reported (Regions 1-3)*
121	**ADM**	Outcome: All Corrective Action Plans shall be timely submitted within timeframe in Section II., FF., .3.	**100%**	93%
124	**ADM**	Outcome: All inmate requests, informal and formal grievances are responded to in accordance with established rules, policies and procedures.	**95%**	93%
27	**MN**	Outcome: The inmate's sick call request is scheduled and followed up according to priority. All emergencies are seen immediately.	**95%**	94%
14	**M**	Outcome: Inmate in chronic illness is seen by the clinician in accordance with HSB and clinical need.	**95%**	94%
11	**M**	Outcome: Inmates seen by a specialist will have the Consultant Report reviewed by the clinician. The clinician will either approve recommended procedure/treatment or recommend alternative clinically appropriate treatment options and discuss them with the inmate.	**100%**	94%
129	**ADM**	Outcome: Credentialing records shall comply with all requirements established by the Department.	**100%**	94%

F. Appendix 6: Market Wage Analysis

BENCHMARK OVERVIEW

ECONOMIC RESEARCH INSTITUTE

ERI compiles and collates data from a variety of sources, using role descriptions and job titles to categorize data. There are a number of advantages of this data source

There are a number of benefits of ERI data

Robustness of the benchmark: Data is collected from a number of sources. Sample size bands are provided behind each role and region. Note, for some roles reviewed here some sample sizes are small, given the number of people employed in those positions by region are low

Depth of data: Clear in-depth descriptions provided for each role ensuring benchmarks match roles where titles may be missing. Benchmarks by years of experience as well as local geographic area

Ease of data manipulation: Efficient data portal, format of the data allows for detailed pulling of benchmarks

Data Age: Data utilized for the assessment was updated as of July 1, 2017.

ERI Collects data from a variety of sources to ensure it is robust

Surveys	• 125 industry surveys and 18 job function salary surveys annually • Additional survey data is gathered through ERI partner organizations, with survey methodology carefully controlled and reviewed by ERI • Surveys are completed by employers rather than employees, increasing their robustness
Public records	• Digitalizing U.S. public records (e.g. SEC 8-Ks, 10-Ks, annual reports, and Form 990s) with remuneration data though optical character recognition and manual input
Government data	• Incorporating global government released data • In the U.S. this includes the Department of Labor, the Bureau of Labor Statistics, Occupation Employment Statistics and Census earnings
Job Boards	• Collating job postings from major job boards, under exclusive lease agreements • Note, pay data from job boards are used cautiously as can be high relative to end salaries

ROLES AND REGIONS REVIEWED

ECONOMIC RESEARCH INSTITUTE

18 Roles were reviewed covering Florida Department of Corrections' facilities.

FACILITY AND ERI REGION MAPPING

Regions were mapped by zip code to the closest matching region.

Facility	ERI Region
Suwannee	Lake City, Florida
Everglades	University Park, Florida
Okeechobee	Fort Pierce Florida
Union	Starke, Florida
Gulf	Port St Joe, Florida
RMC	Starke, Florida
Northwest Reception Center	Marianna, Florida
South Florida Reception Center	Doral, Florida
Central Florida Reception Center	Orlando-Delany Park, Florida
Women's Reception Center	Ocala, Florida
Zephryhills	Zephyrhillis, Florida
Lake	Minneola, Florida
Santa Rosa	Milton, Florida
Appalachee	Marianna, Florida
FSP	Starke, Florida
Columbia	Lake City, Florida
Tomoka	Port Orange, Florida

ROLES INCLUDED

18 Roles were included. These were selected based on which were the most important for the facilities, as well as which were available in the database.

Advanced Practice Registered Nurse
Dental Assistant
Dental Hygienist
Licensed Practical Nurse
Medical Dentist
Medical Psychiatric Nurse
Mental Health Manager
Mental Health Technician
Nursing Supervisor
Physician Family Practice
Physician General Practice
Psychiatric Aide
Psychiatric Nurse
Psychiatric Technician
Psychiatrist
Psychological Services Manager
Psychologist
Registered Nurse

AMERICAN OVERSIGHT

PAY VARIANCE BY REGION

There is some variance in pay benchmarks by region, but these are mostly small. Marianna and Port St. Joe have the lowest salary rates, averaging 7.2% across all 18 roles below the median across Florida.

Variance by Region to 'Florida State Average' Median Pay by region and example roles
Percentage, 1 year experience

	Average of all 18 roles	Physician General Practice	Registered Nurse	Mental Health Technician
Doral	1.6%	1.2%	1.6%	0.6%
Florida City	0.9%	1.0%	1.0%	-0.8%
Fort Pierce	-0.6%	-0.3%	-1.1%	0.0%
Lake City	-4.1%	-2.1%	-4.3%	-5.3%

1. Pay variance is displayed for positions with 1 year experience. This was selected to include the largest sample size, although variance was reviewed for 4 and 8 years experience, which showed a similar pattern. Equally data was reviewed for the 25th and 75th percentile by role and region to ensure variances did not increase or decrease significantly, and again the pattern by market was very similar

VARIANCE BY EXPERIENCE

Pay rates increase based on experience fairly consistently across regional and roles. Those with 4 years experience are paid an average of 14% more than those with 1 year experience, and those with 8 years another 14% higher than those with 4 years experience.

Florida State Average Median by Role and Years of Experience
$000's Annually

G. Appendix 7: Methodology and Assumptions

Option	Category	Component	Methodology/Assumptions
All	Health Services Staffing	Level & Composition	Current Health Services staff levels, position titles, and composition (mix of positions), adjusted for Region 4. Adjustments made for deficiencies in mental health staffing levels.
		Salary	Current gross salary wage rates, adjusted for Region 4, were used to construct the base salaries for Health Services staff. Adjustments were then made for select positions where ERI wage rate was higher (more competitive) than the current wage rate; next, the base salary rate was reduced by 5.0% across -the-board to account for the richer benefit package provided to state employees relative to the private sector.
		Total Compensation	State of Florida benefit load applied to Base Salary by CS (40%) and SES (36%) designation. Benefits include employer's share of FRS retirement, family health insurance coverage, life insurance and Medicare contributions. Excludes workers compensation insurance costs.
All	Direct Health Services Expenses	Outside-the-Gate	Health care services provided to inmates 'outside-the-gate', offsite in the community, either in physician offices or hospital settings. Current vendor expenses for Offsite UM Expenses; Incurred but Not Reported (IBNR) Hospital Inpatient-Ext; IBNR Hospital Outpatient; IBNR Hospital E/R; IBNR Primary Care Physician; IBNR Specialty Care Physician; and, IBNR Other Medical in FY16-17, adjusted for Region 4. Note: Nearly all outside-the-gate expenses are incurred in the Institutional Medical and RMC Disciplines. (RMC's share of IBNR expenses apportioned based on its share (45%) of total Offsite UM Expenses in FY16-17). Mental Health has very minimal outside-the-gate costs as nearly all mental health services are provided on-site.
Option 1		Outside-the-Gate	Outside-the-Gate costs increase by 20% (see Network Management – Option 1 and "Option 1 Network Management Factor" column in Exhibit 3.5).
Option 2		Outside-the-Gate	Assumes the Department currently receives the best negotiated rates available (same as a large payer or TPA would be able to receive in the current market) and therefore, there would be no change in outside-the-gate costs as a result of using a PPO/TPA.
All	Direct Health Services Expenses	Inside-the-Gate	Expenses for health care services provided to inmates 'inside-the-gate', onsite within FDC facilities. Excludes any Health Services staffing costs (see staffing estimates). Current vendor expenses for Onsite UM Expenses (specialty clinics and independent laboratory referrals) and Direct Medical Expenses (costs associated with providing direct health services onsite) in FY16-17, adjusted for Region 4. Note: Inside-the-gate costs related to Dental and Mental Health are covered in the other expense categories.
All	Direct Health Services Expenses	Non-Formulary Drugs	Assumes current vendor expenses for Non-Formulary drugs in FY16-17, adjusted for Region 4.
All	Related Health Services Expenses	Medical Equipment	Assumes the Department's FY17-18 budget appropriation for Health Services Operating Capital Outlay (OCO) ($500,000).
		Medical Supplies	Assumes current vendor expenses for Medical Supplies in FY16-17, adjusted for Region 4.

AMERICAN OVERSIGHT

Option 1	Related Health Services Expenses	Utilization Management (UM)	Assumes UM would be provided by the Department 'in-house', necessitating the purchase of UM software, estimated to cost $110,000 annually, and the net new hiring of 1 Director-level utilization management position with a base salary of $110,000. Cost of software based on past Department quote for InterQual software. Salary determined relative to existing UM staff salary levels.
Option 2		Utilization Management (UM)	Assumes UM would be provided by a third party (PPO/TPA) and the Department would continue to maintain a small UM team to liaise with the contractor and ensure appropriate care is provided to inmate patients. Assumes the net new hiring of 1 Director-level utilization management position with a base salary of $110,000.
All	Oversight & Recruitment	Oversight	Current Contract Monitoring FTE positions.
		Recruitment	Current vendor expenses for employment advertising and marketing expenses in FY16-17, adjusted for Region 4. Also includes FTEs for recruitment/recruiter positions. Expenses do not include any type of bonus or incentive recruitment programs.
		Training/Licensing	Current vendor expenses for training and seminars, physician credentialing, and licensing and filing fees in FY16-17, adjusted for Region 4.
		Temp Staffing	Current vendor expenses for temporary help in FY16-17, adjusted for Region 4.
Option 1	Related Health Services Expenses	Claims Processing	Assumes claims processing would be provided by a third party (PPO/TPA) at a flat, fixed range of $2-$8 PIPM (median $5 PIPM used in estimates).
Option 2		Claims Processing	Assumes claims processing would be provided by a third party (PPO/TPA) at a flat, fixed range of $2-$8 PIPM (median $5 PIPM used in estimates).
Option 1	Network Management	Individual Contracts	Assumes outside-the-gate costs would increase by 20% because of the Department's reduced purchasing power under Option 1 (i.e., directly contracting with individual providers). Percent increase based on the difference between FY11-12 offsite costs ($120 million, adjusted for inflation) and current vendor FY16-17 offsite costs, adjusted for Region 4 ($95 million). Reflected under "Option 1 Network Management Factor" column in Exhibit 3.5.
Option 2		PPO/TPA Network	Assumes offsite provider network would be managed by a third party (PPO/TPA) for a flat, fixed network access fee ranging from $2-$5 PIPM (median $3.50 PIPM used in estimates). Does not include any initial or one-time setup fees (estimated range: $75,000-$100,000).
All	Inmate Population	Inmates in Department-run Facilities	As of June 30, 2017, there were a total of 87,656 inmates housed in Department-run facilities. This excludes the inmate population at the state's seven (7) privately-run prisons which are managed by the Florida Department of Management Services (DMS): Bay, Blackwater, Gadsden, Graceville, Lake City, Moorehaven, and South Bay correctional facilities correctional facilities.

Health Care Costs	23
Alternative Service Delivery Models	33
Alternative Service Delivery Models in the Florida Department of Corrections	41

AMERICAN OVERSIGHT

Executive Summary

This report examines the use of the following alternative approaches to the delivery of inmate health care in the Florida Department of Corrections (FDC):

- Insourcing, in which Department staff are directly responsible for managing health care and delivering services in facilities, while still contracting out for services delivered by providers in the community;
- Outsourcing, in which the Department contracts a private company to provide health care service management, staffing, and coordination of off-site care;
- A hybrid insourcing/outsourcing approach which uses elements of both models; and
- University medical school management of correctional health care.

The report describes the current provision of inmate health care services in the Florida Department of Corrections and compares the cost-effectiveness of these alternative models in delivering inmate health care services. Key report findings include:

Florida has a high incidence of chronic medical and mental health illness in the inmate population. With the rapid growth in the geriatric offender population, growing awareness of the needs of mentally ill offenders, and changing standards in the treatment of infectious diseases such as Hepatitis C, the system has experienced growing pressure to increase the levels of service and program performance. This in turn is driving the cost of health care in the prison system higher.

The Florida Department of Corrections' (FDC) health care program design is consistent with contemporary professional standards. Health care policies and procedures are based upon generally accepted professional standards promulgated by the American Correctional Association, the National Commission on Correctional Health Care, the Florida Agency for Health Care Administration Licensure, and best practices developed in other state correctional systems. The FDC oversees delivery of a comprehensive set of medical, mental health, and dental services for state prison system inmates. The FY 2019-20 budget for health care services totals $566.9 million.

The FDC has previously used a hybrid approach in managing inmate health care. During the time in which state employees were used to deliver facility health care services, the Department still maintained an extensive network of contracts with practitioners, hospitals, and vendors to provide off-site health care services in the community.

The Department of Corrections has attempted outsourcing with mixed results over the years. While privatization provided costs savings in the short-term, vendors were unable to provide consistent service that met contract performance standards at the funding levels they had bid. This led to a turbulent period of vendor terminations, transitions, and multiple attempts to attract additional vendors. Service quality issues at the time produced high levels of staff vacancies, decreased access to off-site care, increased inmate grievances, and costly litigation. In its most recent procurement, the

AMERICAN OVERSIGHT

FDC received one responsive proposal for medical services after issuing multiple Invitations to Negotiate.

The current contract for inmate health services follows a cost-plus model. Under the Department's contract with Centurion, the vendor is reimbursed for the actual costs of care provided and paid an additional fee in the amount of 11.5 percent of program costs that cover administration and profit. The annual contract is capped at $421 million for the three years from FY 2019-20 through FY 2021-22. Pharmacy services are not part of the contract but are instead managed directly by the Department.

Florida's spending on inmate health care is low relative to national averages but is comparable to per diem spending levels in six of the ten largest correctional systems. Per inmate spending levels in Florida are close to those of Texas, Illinois, Georgia, and Pennsylvania.

After declining in the period Fiscal Year 2010-11 through Fiscal Year 2014-15, inmate health care costs increased by 36 percent over the past four years, an annual average increase of 9 percent. The increases appear attributable to misalignment between contract funding and service requirements in the initial outsourcing initiatives. Recent litigation on mental health services, Hepatitis C treatment, and hernia repair accounts for nearly $39 million in increased funding in the Fiscal Year 2019-20 budget. The ongoing increase in the geriatric population also continues to increase demand for medical services. The projected annual cost of providing health care for an inmate in a state-managed facility is $6,511 for FY 2019-20.

Correctional systems with insourced delivery systems provide on-site care in prison with state employees in 18 states, including three of the five largest state correctional systems. However, these systems still contract for hospitalization, outpatient, and specialty services provided outside prison.

Outsourcing provides managed health care through contracted providers in 20 state correctional systems. The two primary forms of outsourcing are 1) capitated models in which the vendor assumes primary financial risk for required service delivery and is paid a per diem fee per inmate to cover all program costs; and 2) cost-plus models in which the state reimburses the vendor for program costs and assumes financial risk for required service delivery.

Hybrid models which combine different aspects of both insourcing and outsourcing to meet system needs are used in eight states. Basic hybrid models privatize the management of health care in select facilities while maintaining state management of health care in other system facilities.

University-managed systems rely on a state medical school or health sciences university to manage all or some significant component of correctional health care services. Four correctional systems use the university model, including the Texas prison system, the largest correctional system in the United States.

Insourcing inmate health care services in Florida is feasible and would produce savings from the current system. The FDC has the internal expertise and management infrastructure to adopt an

AMERICAN OVERSIGHT

insourced model for inmate health care. However, recruitment and retention of health care staff would be a significant challenge requiring substantial advance planning. The Department would also require an improved approach in the management of off-site care. This could be accommodated by contracting with an insurance company or health care organization to manage all off-site care, utilization review, and claims management. Implementation of an insourced system could reduce FDC health care spending by an estimated $46 million, primarily through elimination of vendor profit and administration costs.

The current cost-plus approach used by the FDC appears to be the most realistic means available to outsource on a system-wide scale. The cost-plus model is currently used by the FDC because the only vendor in the last procurement cycle willing to work with the Department made it a condition of the contract. By most reports, the current vendor is performing reasonably well under the current cost-plus contract. However, this approach to privatization does not encourage efficiency and appears to be the most expensive service delivery model, as the FDC must pay a significant fee to the vendor to cover overhead and profit, in addition to paying all direct costs. However, the contract is capped at $421 million for the next three years and will provide the FDC with an electronic medical record system, which is a significant benefit.

A capitated approach to outsourcing could produce savings by incentivizing vendors to achieve efficiencies, particularly in the management of off-site care. However, this approach to outsourcing works best in a competitive procurement with multiple viable bidders competing on price and service quality. There are very few vendors who can provide services on the scale required in Florida with a record of acceptable service delivery. Moreover, the high degree of financial risk makes attracting enough bidders to facilitate a competitive environment difficult. Assuming vendors willing to work in Florida on a capitated basis, estimated annual savings of $5.5 million, largely in the management of off-site care, may be possible.

A hybrid insourcing/outsourcing approach would require outsourcing services on a capitated basis for a region or group of select facilities, while insourcing the rest of the system. This approach increases administrative complexity and creates potential issues of equity in apportioning risk and inmates in need of health care among multiple vendors and state facilities. It also assumes that credible vendors are willing to bid on capitated contract services for smaller groups of contracts. If viable, the limited experience with this approach in one of the few states that use this model suggests savings could be achieved roughly equivalent to the level achieved with insourcing.

The university model of health care management has attractive features but requires active cooperation from a medical school. Elimination of profit, reduced administrative costs, and discounted pharmaceutical prices could produce potential annual savings of over $40 million. However, no Florida medical school has indicated any interest in partnering with the FDC to manage inmate health care. One potential approach to building interest in such a model could be partnering with a university to take on one aspect of the correctional health care program, such as management of off-site care for a region or group of facilities.

AMERICAN OVERSIGHT

1. INTRODUCTION

In July 2019, the Office of Program Policy Analysis and Government Accountability (OPPAGA), a joint entity of the Florida Legislature, was required to solicit a contract with an independent consultant for a Study of Correctional Health Care in the Florida Department of Corrections (FDC). The goal of the study was to fulfill requirements of proviso language in the 2019 General Appropriations Act (Ch. 2019-117, Laws of Florida). The language states:

From the funds in Specific Appropriation 2754, the Office of Program Policy Analysis and Government Accountability is directed to contract with an independent third party consulting firm to conduct a review of inmate health care services in order to compare the cost-effectiveness of alternative methods of delivering the services.

OPPAGA directed that the Study address the following key research tasks:

- Describe the current provision of inmate health care services in the Florida Department of Corrections.
- Assess alternative models of delivering inmate health care services in the Florida Department of Corrections.
- Compare the cost-effectiveness of alternative models of delivering inmate health care services.

The proviso language required the review to consider at least the following options: (a) full insourcing of inmate health services, (b) insourcing of outpatient health services provided within state operated correctional facilities and outsourcing inpatient services, and (c) continuation of full outsourcing with modified contract terms imposing appropriate cost controls.

Methodology

In support of our analysis, we requested FDC health care expenditure data, as well as information on service delivery, utilization, and system performance. We also requested performance and activity measure data, planning documents, management reports, and other documentation of operations and programs.

We supplemented the written documentation and data provided by the FDC with information gained from interviews with program administrators and on-site observation of daily operations at the key FDC facilities identified below.

AMERICAN OVERSIGHT

Exhibit 1: On-Site Facility Reviews

Facility	Location	Capacity	Mission
Florida Women's Reception Center	Ocala	1,345	Female offender reception, general population, and in-patient mental health
Lake Correctional Institution	Clermont	1,093	Male offender general population and inpatient mental health
Lowell Correctional Institution	Ocala	1,456	Female offender general population
Reception & Medical Center (RMC)	Lake Butler	1,503	Male offender reception, 120-bed hospital, 34-bed infirmary, surgical unit, dialysis unit, and inpatient mental health
Suwanee Correctional Institution	Live Oak	1,502	Male Youthful Offender Unit, Close Management Unit, inpatient mental health

The CGL team conducted an in-depth tour of all medical/mental health functions at each visited facility. This included observation of sick call, dispensing of medication, observation of chemotherapy and dialysis treatment (at RMC), and group therapy. We toured all health care facilities at these institutions, including the 120-bed hospital at the Reception and Medical Center. Members of the project team observed the intake process, sick call, and mental health service planning.

We selected these facilities, with input from the FDC Office of Health Care Services, to observe the high level of health services and the operational challenges presented. Staff interviews included FDC central office administrators as well as direct service contract staff. These interviews centered on the challenges facing the FDC in delivering effective health care to the inmate population. Staff interviewed were open and candid regarding the challenges and issues associated with the provision of health care in the current system.

AMERICAN OVERSIGHT

2. CURRENT SYSTEM OVERVIEW

A review of different models to provide inmate health care begins with developing an understanding of the current service delivery system. This first requires an analysis of the Florida Department of Correction's (FDC's) health care program goals and how these goals produce the professional standards and policies that guide the system. We next describe the FDC's current system of correctional health care services, utilization of services by the inmate population, and how inmate population characteristics drive service requirements. The final section of the chapter describes the history of the FDC's evolving approaches to management of inmate health care services.

Standards

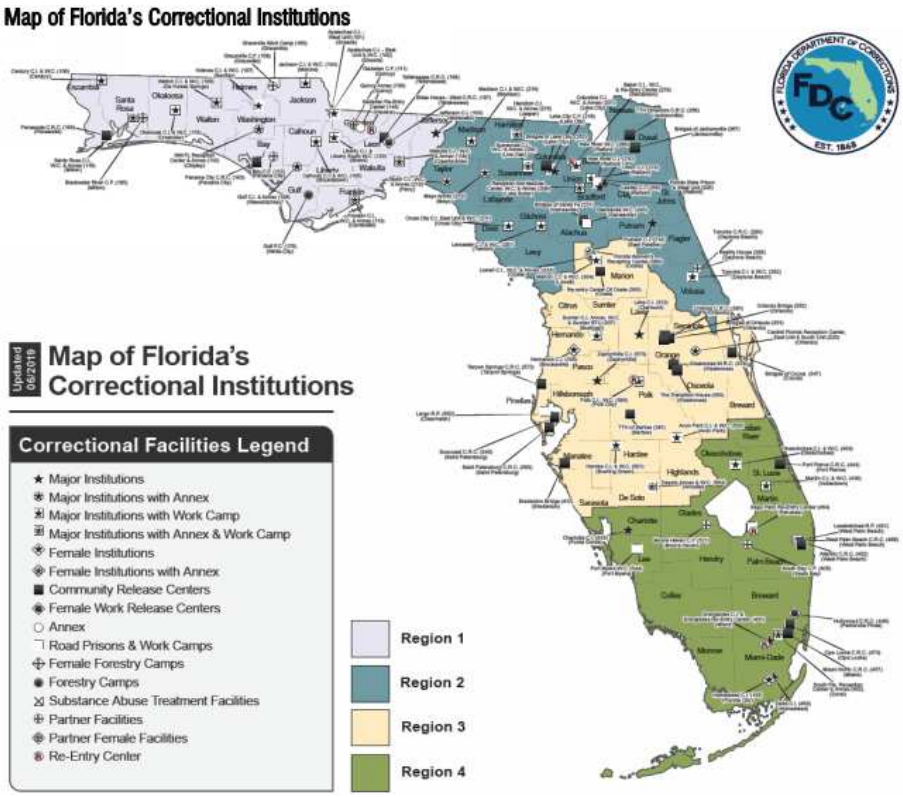
The FDC bases its health care policies and procedures upon generally accepted professional standards promulgated by the American Correctional Association, the National Commission on Correctional Health Care, the Agency for Health Care Administration Licensure, and best practices developed in other state correctional systems. The Department regularly updates policies and standards to reflect care guidelines recommended by the Centers for Disease Control and other recognized public health research organizations.

The FDC organizes its health care policies in 162 Health Services Bulletins (HSBs). These bulletins include multiple memos, information sheets, forms, orientation information, appendices for clinical care, guidelines, fact sheets, and policies. These bulletins provide direction on topics such as chronic illness monitoring (HSB 15.03.05), conditional medical release (HSB 15.02.14), and medical emergency response planning (HSB 15.03.06). In addition to HSBs, the Department has 30 custody-related policies which pertain to services such as therapeutic diets, medical transfers, health services for inmates in special housing, nursing sick call, and medication administration.

The FDC is responsible for providing a level of health care service to inmates consistent with constitutional standards, as determined by the federal courts, in accordance with Sections 945.025(2), and 945.6034, Florida Statutes. These standards, as established by the United States Supreme Court in *Estelle v. Gamble*[1], provide inmates the right to be free from deliberate indifference to their health care needs and that inmates have a right to the same standard of health care as available in the community. In subsequent rulings and case law, the courts have established three key elements of constitutional health care in correctional facilities: 1) the right to access to care, 2) the right to care that is ordered, and 3) the right to a professional judgement.[2]

A 1972 class action lawsuit against the FDC, *Costello v. Wainwright*, resulted in a finding that inadequate health care in the correctional system amounted to cruel and unusual punishment. The case further refined standards for health care delivery in the FDC and resulted in the creation of the

[1] *Estelle v. Gamble*, 420 U.S. 97, 97 S. Ct. 285, 50 L.Ed.2d 251(1978)
[2] B. Jaye Anno, Correctional Health Care: Guidelines for the Management of an Adequate Delivery System, National Commission on Correctional Healthcare, (2001:43).



AMERICAN OVERSIGHT

Correctional Medical Authority (CMA) to provide independent monitoring of health care services.[3] The responsibilities of the CMA include inspection of the delivery of medical and mental health services in FDC facilities, annual reporting on inmate health care delivery to the Governor and the Legislature, and monitoring compliance with consent decrees. More recent litigation that has informed the development of FDC health care standards include *Osterbock v. McDonough*, *Disability Rights Florida, Inc. v. Jones*, *Hoffer v. Jones*, and *Copeland v. Jones*.[4] These cases addressed requirements for mental health programs, Hepatitis C treatment, hernia care, and other services.

Services

Consistent with these standards, the FDC oversees delivery of a comprehensive set of medical, mental health, and dental services for over 95,000 state prison system inmates in 145 facilities located in four regions throughout the state.

AMERICAN OVERSIGHT

The Department's *Comprehensive Health Services Plan*[5] describes the specific services provided. The FDC uses a managed care approach to provide these programs, contracting with a private vendor, Centurion of Florida, LLC.

Medical. The medical program at FDC institutions focuses on primary care. These services include sick call, infection control, immunizations, chronic disease clinics, health education, physical examinations, screenings, and urgent care services. Centurion provides full and part-time physicians, nurse practitioners, nurses and support staff in support of these functions at each state-run facility.

Like other states with large prison populations such as California and Texas, Florida operates a large, licensed hospital to provide inpatient care within a secure facility. Under Centurion management, the Reception and Medical Center (RMC) at Lake Butler supports 120 inpatient beds, as well as a licensed laboratory, same-day surgery center, dialysis treatment, chemotherapy and radiation treatment.

Inmates in need of more serious or advanced treatment may receive care from specialists subcontracted by Centurion, both in the facility or in the community. Inmates also receive inpatient and outpatient care in community hospitals as needed for emergency care or if the RMC has no beds available. Community hospitals are also utilized for specific types of specialty care such as orthopedics or cardiac care. If facility vendor staff cannot provide the services an inmate needs, the inmate is transported to a local hospital or provider's office for offsite care. The FDC has agreements with hospitals that receive a significant volume of inmates, establishing dedicated secure units to support FDC patients. These include Memorial Hospital of Jacksonville and Larkin Community Hospital in Miami. Use of other local community hospitals in non-secure wards requires 24 hour supervision of the inmate patient by two department correctional officers.

A Centurion Utilization Management team reviews all requests for specialty consults and hospital services, including those provided at the RMC. The team reviews and approves all hospital admissions and discharges using evidenced-based clinical criteria to ensure efficient use of resources.

Mental Health. Mental health treatment consists of a range of services dependent upon the care level required by the inmate. FDC policy establishes five levels of treatment, beginning with outpatient care and progressing through more intensive, structured inpatient programs to stabilize and treat inmates with more severe conditions. Inmates receiving inpatient mental health treatment all receive structured out-of-cell therapeutic services. Mental health program staffing provided by Centurion, includes psychiatrists, psychologists, licensed mental health professionals, nurses, and support staff. The FDC manages a continuum of mental health services with each facility's staffing scaled to meet its specific program needs. The FDC also operates a Cognitive Treatment Unit at the Wakulla Annex for inmates with dementia or traumatic brain injury.

Dental. Dental services include examinations, extractions, and emergency treatment at the time of their admission into the correctional system. On an as-needed basis, inmates with less than six months

AMERICAN OVERSIGHT

of time to serve may receive decay control, limited cleaning, and denture repairs. Inmates with more than six months to serve may receive dental exams with x-rays and periodontal screening. If clinically indicated, inmates with at least four months of incarceration time remaining may be provided dentures or non-emergent endodontic therapy. Advanced dental services are available on a limited basis depending upon need. Centurion provides dentists, dental assistants and dental hygienists in support of these services at all facilities except for reentry centers.

Pharmacy. The FDC manages the delivery of pharmacy services with 84 state employees, outside of the Centurion contract. The State pharmacy staff dispense over 1.5 million prescriptions annually from three regional pharmacies and the RMC in response to orders from medical staff at state prisons.[6] Centurion staff then administer medications to patients. Nurses provide unit dose prescriptions of prescribed medications at a pill line for general population inmates, at cell front for inmates in confinement or close management, and bedside in the hospital. Inmates are also allowed to keep common medications such as antihistamines or analgesics on their person (KOP) for use as specified by the prescription. Finally, inmates in dorms, special housing, and work squads may be provided over the counter medications (OTC) such as ibuprofen or antacid on an as-needed basis.

The FDC receives discounted medications for HIV/AIDs and STDs under the Florida Department of Health (DOH) through the 340b program. The 340b program is a US federal government pricing system that requires drug manufacturers to provide outpatient drugs to eligible health care organizations and covered entities at significantly reduced prices. The 340b program provides discounts of up to 40 percent from market rate prices. The Department also participates in the Minnesota Multi-State Contracting Alliance for Pharmacy (MMCAP), a purchasing organization for government institutions that negotiates reduced pharmaceutical prices for member organizations.

Due to the level of drug price purchasing discounts achieved by the FDC, past efforts at potential privatization of the pharmacy program have not shown savings, resulting in retention of the current system of state management of the program.

Exhibit 3 summarizes the key services available to inmates and where they are provided.

The Department manages this system through the Office of Health Services (OHS). The OHS sets policy for the system, monitors contract performance, provides training, reviews grievance appeals, assesses clinical-legal issues, manages the overall budget for health care services, and reviews contractor spending. OHS has 62.5 employees assigned to these functions.

Inmate Patient Profile

The FDC provided health care to an average daily population of approximately 87,000 inmates in state-operated facilities in FY 2018-19.[7] This does not include health care services provided by vendors that operate the seven private correctional facilities under contract with the Department of Management Services (DMS)[8]. Over 28,000 inmates have been admitted to the state prison system in

[7] Florida Department of Corrections, Bureau of Research and Data Analysis.
[8] These facilities include Bay Correctional Facility, Blackwater River Correctional Facility, Gadsden Correctional Facility, Graceville Correctional Facility, Lake City Correctional Facility, Moore Haven Correctional Facility, and South Bay Correctional Facility.

AMERICAN OVERSIGHT

the last 12 months.[9] Each new admission receives a thorough health screening and assessment, which may result in a prescribed treatment plan as indicated.

Inmates in U.S. prisons enter correctional systems with higher incidence of medical and mental health issues than found in the general population. Chronic disease is prevalent with higher rates of tuberculosis, HIV, Hepatitis B and C, arthritis, diabetes, and sexually transmitted disease compared to the general population.[10] Over half of prison inmates have a mental health disorder, and many of these offenders also have a history of substance abuse.[11]

The Florida correctional system population exhibits these same characteristics. In FY 2018-19, the FDC offender population included[12]:

- 57,826 inmates requiring treatment in chronic disease clinics
- 2,561 inmates diagnosed and treated for HIV
- 6,314 inmates diagnosed and treated for Hepatitis C
- 118 inmates with renal failure requiring dialysis treatment
- 4,000 inmates with hearing, mobility, or vision impairments or disabilities

In FY 2018-19, inmates had over 126,000 contacts with clinics for treatment of chronic conditions, with the largest number requiring cardiac or respiratory treatment.

Demographic characteristics of the population also contribute to health care service needs. The FDC incarcerates nearly 5,000 female offenders. Incarcerated women report histories of alcohol and drug abuse, sexually transmitted infection, sexual and physical abuse, and mental illness, at a much higher rate than incarcerated men, and as a result require a more intensive level of health care services. Moreover, female offenders also have gender-specific health needs such as gynecological care that create additional demands for health services. [13] In FY 2018-19 female offenders in Florida accounted for 12.8 percent of clinic encounters for chronic diseases despite representing 6.9 percent of the inmate population.[14]

The number of geriatric offenders in the correctional system also drives demand for health care services. Due to higher risk lifestyle choices and infrequent or irregular access to health care over their lives, many inmates physically age much more quickly than their chronological age would suggest. The National Commission on Correctional Healthcare and at least 20 state correctional systems define as geriatric any inmate over age 50.[15] Older prisoners cost approximately three times as much as younger prisoners to incarcerate, largely due to health care costs.[16]

AMERICAN OVERSIGHT

As of June 30, 2019, over 27 percent of the FDC inmate population was age 50 or older. In fact, the system housed 1,775 inmates aged 70 or over. The proportion of the Florida inmate population that is geriatric exceeds that of the other three largest state correctional systems.

Exhibit 5: Geriatric Populations in Large State Correctional Systems

	Inmate Population	Number of Inmates Age 50+	Percent of Inmates Age 50+
Texas	145,019	31,876	22%
California	129,417	30,298	23%
Florida	95,502	25,732	27%
New York	52,344	10,140	19%

Sources: Texas Department of Criminal Justice, Fiscal Year 2018 Statistical Report; California Department of Corrections and Rehabilitation, Offender Data Points Report, June 2018; Florida Department of Corrections, Bureau of Research and Data Analysis; Office of the New York State Comptroller, New York's Aging Prison Population, April 2017.

The total number of geriatric inmates housed by the FDC has grown by 77 percent over the last ten years, despite a decline in the overall prison population during this period. Older inmates, like older individuals in society, have much greater health care needs than younger inmates. This change in the population has had a profound impact on the demand for health care services in the state correctional system.

AMERICAN OVERSIGHT

Health Care Service Delivery History

The FDC has a long and complicated history in contracting for the delivery of health care to inmates. Exhibit 6 summarizes past FDC health care contracts. Exhibit 7 presents a timeline for the Department's experience with outsourcing.

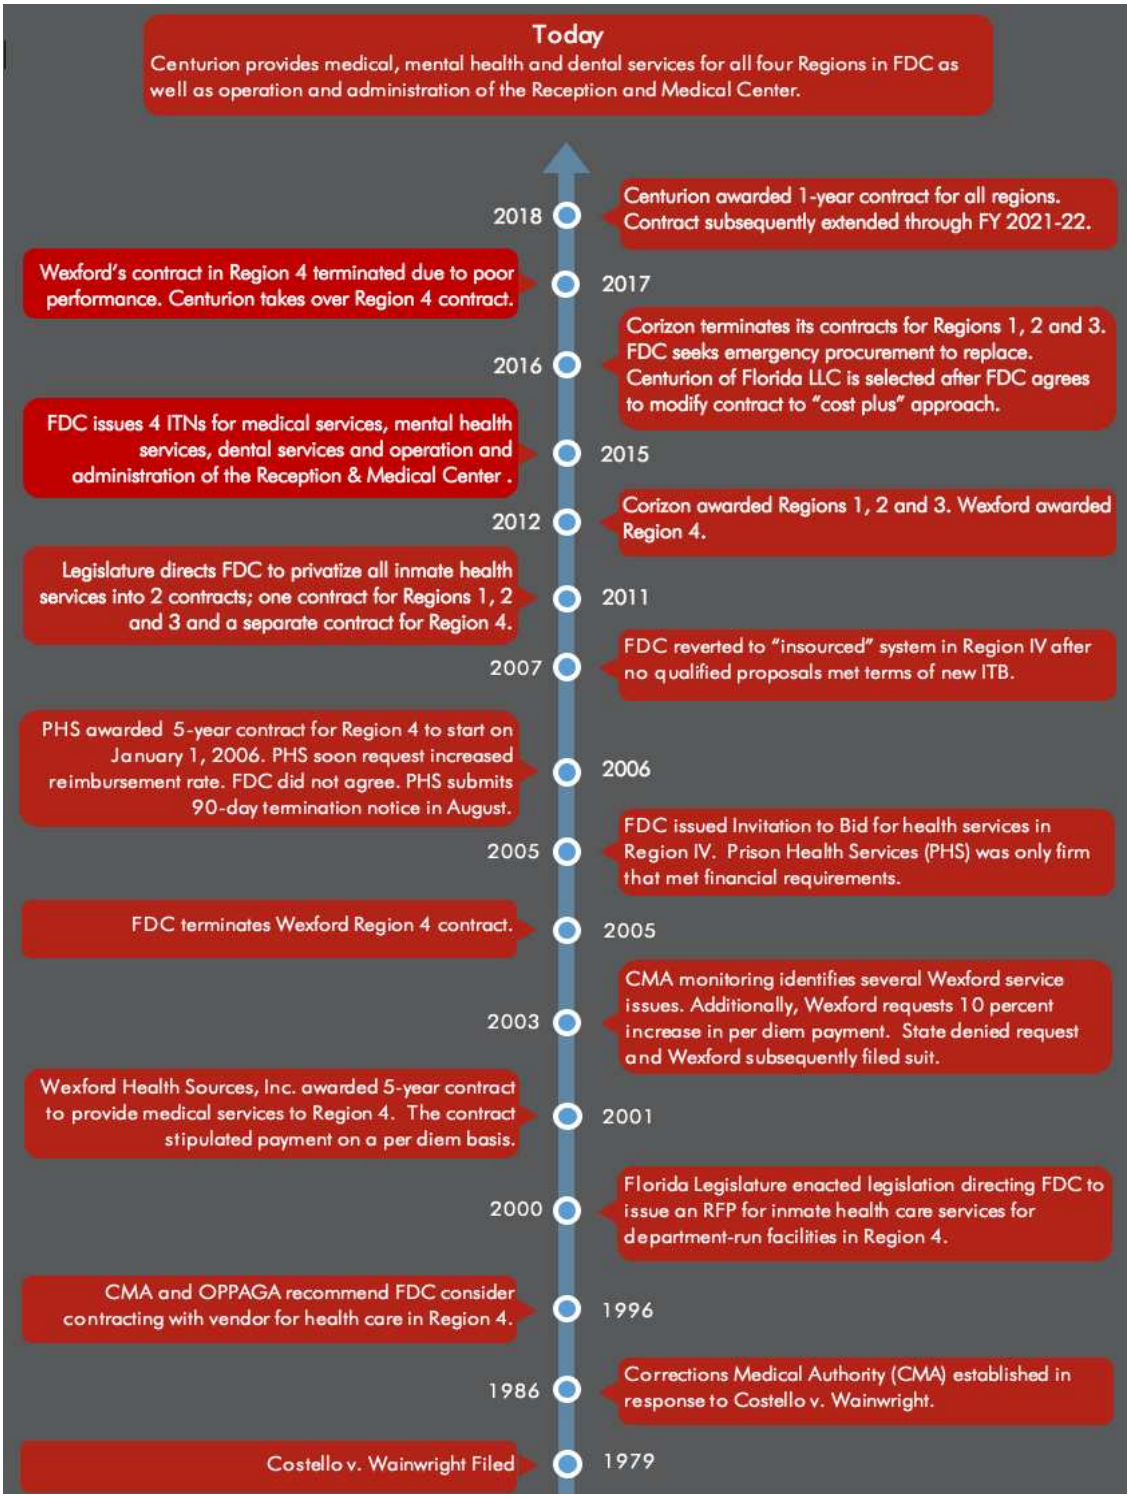

Exhibit 6: FDC Health Care Contract Summary

Contract Term	Vendor	Services
2001-2006	Wexford	Region 4 comprehensive health care
2006	Prison Health Services (PHS)	Region 4 comprehensive health care
2006-2007	Correctional Medical Services (CMS)	Region 4 staffing (after termination of PHS contract)
2006-2009	MHM	Region 4 mental health
2009-2014	Corizon (formerly CMS)	Region 4 mental health
2012-2016	Corizon	Regions 1, 2, & 3 comprehensive health care

Source: Florida Department of Corrections

AMERICAN OVERSIGHT

Prior to and through the period of the *Costello v. Wainwright* litigation during the 1980's, the FDC managed health care services within the prison system with state employees, supplemented by individual contractors as needed. State-managed service included the management and staffing of the RMC's secure medical hospital. Private providers in the community and local hospitals or clinics provided specialty treatment, outpatient care, and inpatient hospitalization. The Department negotiated individual contracts and price agreements with these private providers.

One of the issues the system faced was difficulty in keeping health care staff positions filled, particularly in the Region 4, South Florida area. This is one of the primary challenges associated with insourcing correctional health care and has been a significant factor in the development of alternative approaches to staffing facility health care programs. That said, vendor performance in filling positions has been similar to that experienced by the state.

During this time, the first private company managed care providers specializing in correctional health care emerged onto the market, providing an alternative solution for systems seeking to improve prison health care services and/or reduce costs. In 1996 both the Correctional Medical Authority and the Office of Program Policy Analysis and Government Accountability (OPPAGA) recommended that the FDC consider privatizing correctional health care service for one region to better assess the viability and potential benefits of this approach.[17] The Department did not implement these recommendations, and in 2000, the Florida Legislature enacted legislation on the issue. The bill required the FDC to issue an RFP for inmate health care provided at all Region 4 correctional facilities, with an explicit goal of achieving cost savings.[18]

The subsequent RFP attracted bids from 4 vendors and resulted in the award of a five-year contract with Wexford Health Sources, Inc. for Region 4. The contract used a capitated model in which the vendor assumes financial risk in exchange for enhanced discretion in managing services to achieve efficiency. In this approach the vendor charges a per diem rate multiplied by the average monthly inmate population as compensation. The contract also called for 3 percent annual per diem rate increases.

Correctional Medical Authority (CMA) monitoring of health service delivery under the contract consistently indicated significant vendor service issues, including lack of internal management controls, poor or nonexistent tracking mechanisms, inadequate control and/or tracking of specialty consultations, and an unacceptable pharmacy system.[19] These issues eventually resulted in the FDC assessing financial penalties against Wexford. For their part, the vendor contended that the inmate population in the region contained a higher number of

[17] Corrections Medical Authority 1995-1996 Annual Report; OPPAGA Report No. 96-22, "Review of Inmate Health Services Within the Department of Corrections" (November 1996)

AMERICAN OVERSIGHT

inmates with medical and mental health issues than their bid assumed, and as a result requested a 10 percent increase in the contract per diem rate. Litigation between Wexford and the FDC followed. While Wexford prevailed in the lawsuit, which forced an increase in payment, continued service quality issues resulted in the Department terminating the contract in 2005.

The Department then issued a new Invitation to Bid (ITB) for Region 4 health care services which produced three bids, including one from Wexford. The FDC awarded a five-year contract to Prison Health Services (PHS) in January 2006. The PHS bid was more than $80 million less than the next lowest bidder.[20] The vendor however soon indicated that they had underbid the contract due to the lack of adequate information on service volume during the bid process and requested an increase in contract compensation. In response to the Department's denial of this request, PHS provided notice and terminated the contract eleven months after its commencement.

The Department issued a subsequent ITB for Region 4 in 2007 which received no proposals that met the terms of the procurement. In response, the FDC reverted to an "insourced" system in Region 4, providing institution-based health care services with state employees, while contracting with a network of individual private providers for services provided in the community. This mirrored the approach used by the FDC in managing health care services in Regions 1, 2, and 3. Ultimately the number of contracts between the Department and private providers would exceed 200 across the state.

In 2011 the Legislature directed the FDC to privatize all inmate health services statewide into two contracts, one for Regions 1, 2, and 3; and a separate contract for Region 4.[21] The legislation specifically required that the contractor achieve cost savings of at least seven percent below the Department's FY 2009-10 health care expenditures.[22] The Department issued an RFP for comprehensive health services for all four regions, and in 2012 awarded contracts to Corizon, LLC for Regions 1, 2, and 3; and a contract to Wexford Health Sources, Inc. for Region 4. The total value of these contracts was $1.1 billion for Corizon for 2012-2016, and $237.9 million for Wexford for 2012-2017. The Department adopted a similar approach for these contracts as it had used for previous comprehensive health care contracts, in which the vendor assumes all financial risk and retains maximum flexibility in managing services; with compensation based on a per diem rate applied to the average daily inmate population.

The transition to statewide privatization was difficult. State employee unions sued the Department to block implementation of the contracts. The Department ultimately prevailed in court, but the case delayed contract implementation until 2013. During that time, many state health care staff resigned in

AMERICAN OVERSIGHT

anticipation of losing their positions, forcing the Department to rely on overtime and temporary staff to assure continued services. While both contracts achieved required savings levels (and in fact surpassed the seven percent savings requirement), the vendors in many cases initially reduced spending by maintaining lower health care staffing levels. According to FDC staff, this in turn led to serious performance issues in both contracts.

In response to these issues, the Department issued a new procurement solicitation for inmate health care services in December 2015. The Department adopted a new procurement model, an Invitation to Negotiate (ITN) for this solicitation. Under the RFP format, prospective bidders had limited information on contract scope and very little opportunity for questions and discussion on the services to be provided. Office of Health Services staff indicated that the prior vendors selected by the Department through the RFP process attributed their difficulties in providing services at the prices they bid to the lack of information available in the procurement process, which led them to underprice their proposals. The ITN process differs from an RFP procurement in that it specifically allows for sharing of information with the vendor and answering questions throughout the negotiation process. This generally results in a better understanding of the client's requirements on the part of the vendor.

The Department also made a substantial change in scope of work under the ITN approach. The scope of previous RFPs was for the comprehensive delivery of inmate health services in specific FDC regions. Through several rounds of RFPs this approach attracted a relatively small group of the same companies. None of the companies selected had performed at a level considered satisfactory by the Department. In a new approach under the ITN model, the Department defined scope by discipline, issuing four ITNs for statewide medical services, statewide mental health services, statewide dental services, and operation and administration of the Department's inpatient hospital at RMC. By dividing the scope of health care delivery in this manner the Department hoped to increase competition and attract new vendors. The ITNs also specified provisions to increase accountability and oversight of vendor performance.

As the Department entered into the ITN solicitation, Corizon provided notice that it was terminating their contract for health care services in Regions 1, 2, and 3 effective May 2016. In response to FDC concerns regarding staffing levels and vendor performance, Corizon indicated that the terms of its contract were too constraining to address the Department's concerns. This action forced the Department to seek an emergency procurement to replace Corizon. The procurement resulted in the selection of Centurion of Florida, LLC to provide services in the regions formerly under contract with Corizon. However, because of the risk in assuming this contract, Centurion required the Department to change the contract model to a "cost plus" approach. In this model, the vendor is reimbursed for all expenses related to the provision of required services and paid a management fee in addition to these costs. The cost plus approach effectively eliminates vendor financial risk. This initial contract with Centurion established the management fee at 13.5 percent of service costs.

As the FDC initiated the ITN process, CMA inspections in 2017 documented serious performance issues at the South Florida Reception Center, leading the Department to terminate Wexford's contract for Region 4. Due to the emergency nature of the circumstances, the Department added Region 4 to

AMERICAN OVERSIGHT

the Centurion contract, resulting in the vendor assuming complete statewide responsibility for medical and mental health service delivery up through the original terms of the Corizon and Wexford contracts. This was an emergency action to assure continued service while the Department continued its attempt to procure new vendors through the ITN process.

The ITN solicitations attracted limited vendor responses.

- Medical Services ITN - produced two bidders, one of which (Wexford) dropped out of the process, leaving the Department with one vendor, Centurion, to negotiate a contract. The Department reissued the ITN to attract more responders, but again received only one proposal from Centurion.
- RMC Hospital ITN - resulted in one bidder, Centurion.
- Mental Health ITN - resulted in two bidders, Centurion and Correct Care Solutions.
- Dental Services ITN - attracted two responses from Centurion and Smallwood Prison Dental Services.

Based on the results of the ITNs, in 2018 the Department negotiated a one-year contract with Centurion in the amount of $375 million to provide statewide inmate health care services. The contract has since been amended to extend the term to three years through FY 2021-22.

Current Service Model

As described above, the FDC currently contracts with Centurion to provide inmate health care services at all FDC-operated facilities. Centurion supply the staff who provide treatment at the facilities, coordinates the care of inmates who must receive specialist or hospital services outside the facility, and manages the overall system of care through a system of regional administration, quality assurance, and utilization management.

The current system, however, is not completely outsourced. The Department retains management of the pharmacy system which provides medications to state inmates. Previous efforts to privatize this function failed to demonstrate cost savings, and in fact would have increased the cost of medications to the FDC. The Department's low costs for pharmacy service is primarily due to price discounts it receives for medications purchased through the Minnesota Multi-State Contracting Alliance for Pharmacy (MMCAP), a purchasing organization for government institutions that negotiates reduced pharmaceutical prices for member organizations. Other state correctional systems that participate in MMCAP include North and South Carolina. The Department also receives substantial discounts on medication for HIV/AIDS and sexually transmitted disease through interagency agreements with the Florida Department of Health and five local health departments for treatment of offenders with these conditions. Accordingly, the current service model is more accurately described as a hybrid, combining out-sourced vendor management and delivery of health care services with an in-sourced pharmacy program.

The contract is structured in a "cost plus" model. The vendor receives compensation in two components: 1) reimbursements for all approved health care expenditures; and 2) a percentage of

AMERICAN OVERSIGHT

actual expenses to cover administrative expenses and profit. In effect, the contract passes through the cost of incurred health care expenses to the vendor, which receives a fee for administering the program. The administrative fee in the current contract is 11.5 percent of incurred expenses. The contract contains an overall annual cap on compensation paid out under the contract. The current contract compensation cap is $421 million for the current fiscal year and each of the next two fiscal years. Finally, as part of the services to be provided under the three-year contract term, the vendor will provide the FDC with an Electronic Medical Records system (EMR). This system will modernize FDC management of inmate health care information, enabling substantial efficiencies in patient care management and providing advanced metrics on health care work processes and management. The Centurion contract expires June 30, 2022.

The contract is "outcome-based" in that the vendor is held accountable through its level of achievement on a series of performance measures detailed in the contract. The contractor reports on their compliance with these performance measures quarterly. The level of compliance with performance measure requirements determines whether any financial penalties may be assessed against the vendor. While the vendor is reimbursed for actual expenses incurred, it may be subject to financial penalties if mandated outcomes are not achieved. The contract contains 70 performance measures and 135 pages of program standards covering every element of service and calls for an overall compliance rate of 80 percent for each standard as applicable, consistent with CMA standards. Each performance measure contains a specific financial consequence for non-compliance. Contract monitoring reports provide the basis for imposing these penalties.

Exhibit 8: Centurion Contract Performance Metrics

Measure No.	Description	Expectation	Measurement Duration	Financial Consequence
PM-007	From the time an inmate submits a sick call request form until the request form is triaged by an RN and determined to be either emergent, urgent or routine, shall be no longer than 24 hours.	80% compliance, per institution	Quarterly	For performance below 80%, consequences will be assessed as follows: 70%-79.99%: $2,000 per institution; 60%-69.99%: $4,000 per institution; Less than 60%: $6,000 per institution
PM-008	From the time the request is triaged, sick call requests categorized as emergent should be seen by a Licensed Nurse as soon as possible, not to exceed 60 minutes.	80% compliance per institution	Quarterly	For performance below 80%, consequences will be assessed as follows: 70%-79.99%: $3,000 per institution; 60%-69.99%: $6,000 per institution; Less than 60%: $9,000 per institution

AMERICAN OVERSIGHT

Measure No.	Description	Expectation	Measurement Duration	Financial Consequence
PM-009	From the time the request is triaged, sick call requests categorized as urgent should be seen by a Licensed Nurse within 24 hours.	80% compliance per institution	Quarterly	For performance below 80%, consequences will be assessed as follows: 70%-79.99%: $2,000 per institution; 60%-69.99%: $4,000 per institution; Less than 60%: $6,000 per institution

Source: FDC Contract C2930, Amendment 2.

The FDC and the vendor jointly determine the staffing required to satisfy these performance measures, although this staffing pattern is not a part of the contract and vendor compliance is not monitored. Centurion's current staffing plan has 3,127.9 FTEs, assigned to the following disciplines:

Exhibit 9: Health Care Contract Staff by Discipline

	July 2019 Contract Staffing Plan	Percent of Total Staffing
Medical	1,531.3	49.0%
Mental Health	887.5	28.3%
Dental	228.2	7.3%
Administration	480.9	15.4%
Total	3,127.9	100%

Source: Florida Department of Corrections, Office of Health Services

Staffing levels, however, are not a part of the contract. While maintenance of adequate staffing levels is implicit in the required achievement of the contract performance measures, the contract does not specify staffing requirements or hold the vendor accountable for maintenance of program staffing levels. Provided they do not exceed the overall contract spending cap, the vendor is free to add staff if necessary, to reach standards, or conversely not fill positions without consequence, if they are able to meet the performance standards with lower staffing levels.

Office of Health Services

The FDC Office of Health Services administers the system's health care program. Responsibilities include development of policies, review of grievance appeals, budget management, contract management, and operation of the state pharmacy program. The OHS has 175 authorized positions assigned to Administration, Medical, Mental Health, Dental, Nursing, and Pharmacy offices.

Contract monitoring is a key OHS responsibility. The OHS has 18 monitors who perform contract monitoring. There are three teams each consisting of an administrator leader, two nurses, one mental health monitor, and one data analyst. On a state-wide basis there is one pharmacist and two dental

AMERICAN OVERSIGHT

monitors. In addition, two teams of mental health professionals conduct risk management assessments to identify potential issues and provide solutions in mental health program delivery.

Monitoring visits can be scheduled or unscheduled, announced or unannounced. The monitors use several methodologies in monitoring contract performance including:

- Desk review of any records or documents related to service delivery; this can be a random or statistical sampling
- On-site review on any records
- Interviews
- Reviews of grievances
- Review of monitoring, audits, investigations, evaluations or other reviews of external agencies (CMA, DOH, ACA)

OHS audit teams conduct facility reviews in the first and third quarters of each fiscal year, with each facility self-reporting audit results in the second and fourth quarters. The Department changed its audit instrument in 2019. Where previously there were 262 performance measures, the new audit system contains 70 performance measures, consistent with contract requirements. These measures are similar in nature to prior measures albeit reduced in number. The FDC reduced the number of measures to facilitate more efficient monitoring of the contract.

These measures are Yes/No type compliance questions. The measures contain an outcome and an expected compliance rate for each measure. Ten to 20 records are reviewed based on a random sampling. Examples of monitoring metrics include:

- Within 10 calendar days of arrival at a reception center, an inmate received on medication from county jail will be evaluated by psychiatry.

- A baseline Mammography study will be performed for female inmates at 50 years of age, and every two (2) years thereafter until the age of 74.

- Acute illness patients were assessed by a nurse every eight (8) hours, including vital signs, and documented the evaluation on form DC4-684, Infirmary/Hospital Daily Nursing Evaluation.

AMERICAN OVERSIGHT

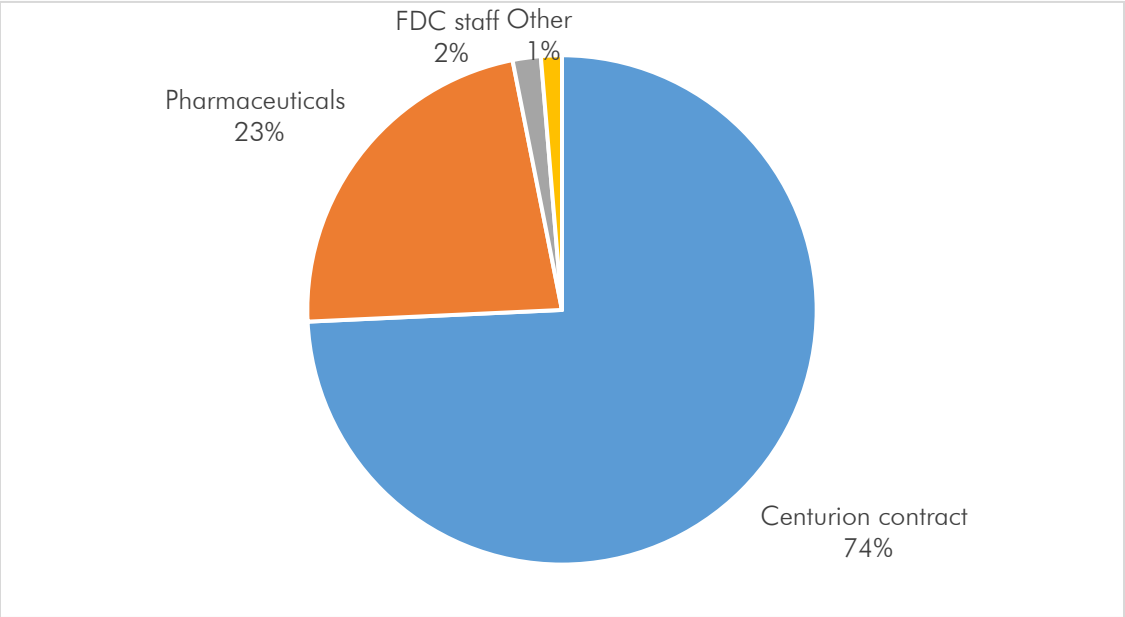
3. HEALTH CARE COSTS

This chapter describes the cost of correctional health care in Florida, including the different elements of health care spending, trends, and key drivers of current and future costs. We also look at how Florida costs for health care compare nationally.

Spending on Inmate Health Care

The FDC appropriation for inmate health care services in FY 2019-20 totals $566.9 million. Appropriations for health care make up 21 percent of the FDC budget, ranking second behind correctional staffing in magnitude of spending. Assuming a stable inmate population through the current fiscal year, this will roughly equate to a cost of $17.84 per day per inmate, or $6,511 annually. Exhibit 10 summarizes the FY 2019-20 budget for inmate health care.

Exhibit 10: FDC FY 2019-20 Inmate Health Care Appropriations



Office of Health Services	FY 2019-20 All Funds Appropriations ($ 000)
Centurion Contract	421,000.0
Pharmaceuticals	128,222.9
OHS Employee Salaries & Benefits	9,721.6
Contracts	4,367.2
Other	3,554.9
TOTAL	566,866.7

Source: Florida Department of Corrections

The state's contract with Centurion for statewide facility health care services makes up 74 percent of health care spending. FDC expenditures for infectious disease, psychotropic, and general medications make up another 23 percent of the budget. The cost of state employees to administer the system and manage the pharmacy program is roughly 2 percent of the budget.

AMERICAN OVERSIGHT

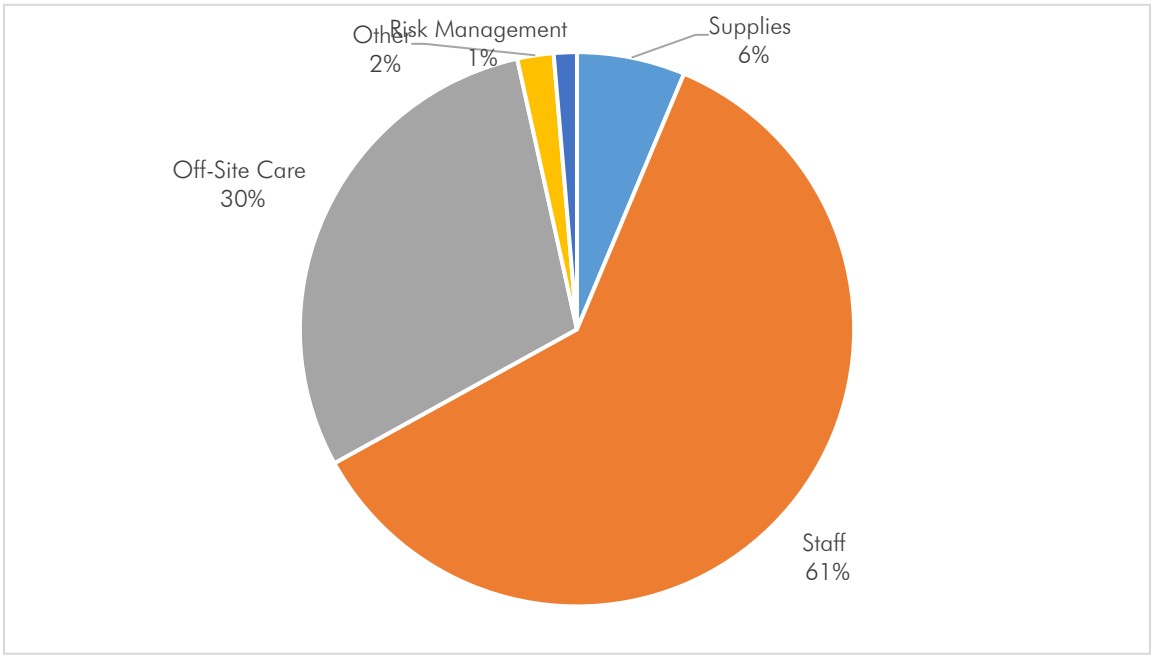


Exhibit 11: Inmate Health Services Expenditures Components

Source: Florida Department of Corrections

In FY 2018-19 Centurion expenditures under the contract for inmate health care totaled $355 million. Approximately 61 percent of expenditures were for health care staff in FDC facilities. Off-site care by hospitals and specialist clinicians made up 30 percent of vendor spending, with supplies and other expenses accounting for less than 10 percent of expenses.

Exhibit 12: FY 2018-19 Centurion Health Care Expenditures

AMERICAN OVERSIGHT

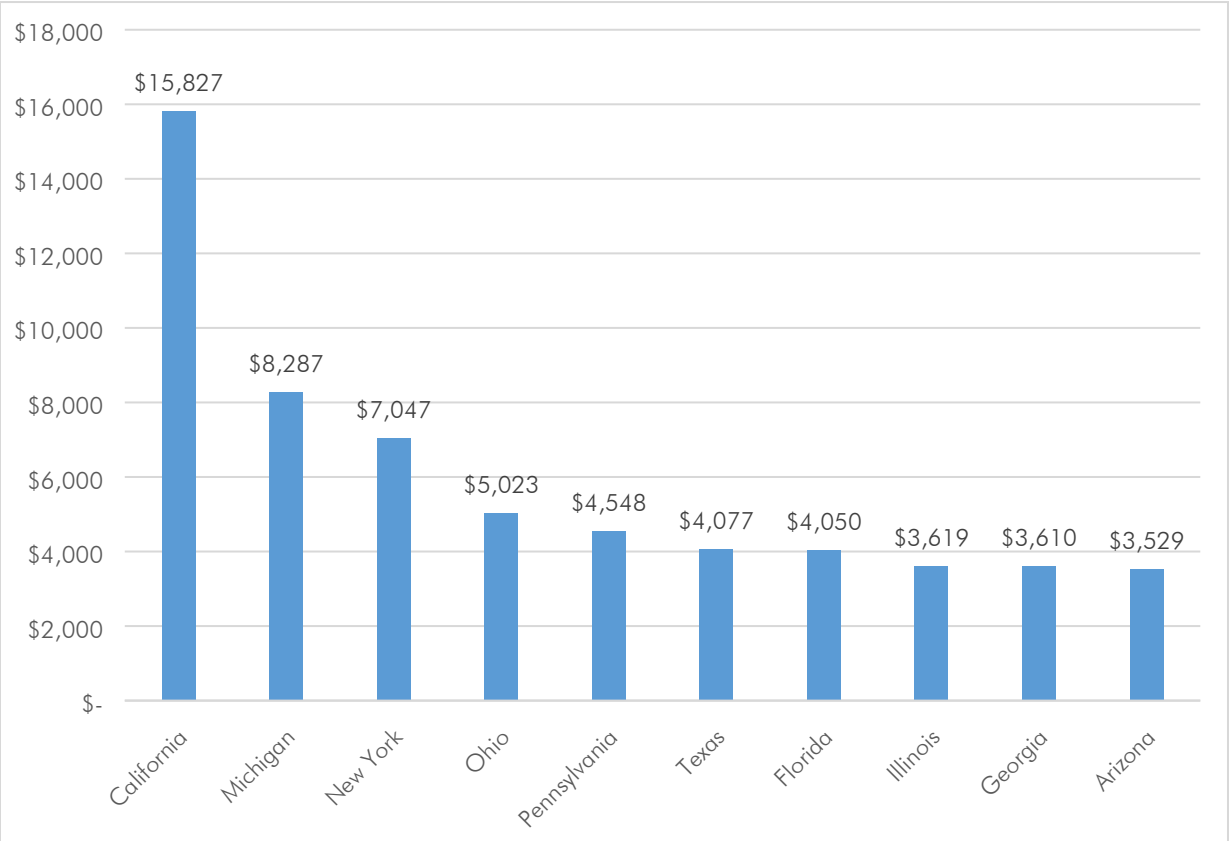
Comparison with Other States

A comparison of Florida's spending with the most recent data available for other state correctional systems shows FDC expenditures per inmate for health care in the bottom quartile of states with the lowest spending levels. A comprehensive review of 2015 correctional system spending in 49 states[23] by the Pew Charitable Trusts documented that annual spending on correctional health care ranged from a high of $15,827 in California to a low of $2,173 in Louisiana.[24]

Exhibit 13: State Spending Per Inmate on Correctional Health Care in 2015

Source: Pew Charitable Trusts, Prison Health Care: Costs and Quality, 2017

Although California is an outlier, most of the states with relatively high spending levels are very small, and their higher costs may reflect a lack of resources or economies of scale. Spending levels for the ten largest correctional systems showed Florida ranked seventh. However, the degree of difference in spending level among the six systems with the lowest average spending level was small. The data shows Florida to have a somewhat lower spending level that is however still comparable to most large state correctional systems, as shown in Exhibit 14.



---

[23] Pew Charitable Trusts conducted a national survey of state correctional systems. All states except New Hampshire responded to the survey.

Cost Trends

More recent trends show the level of FDC spending on inmate health care accelerating since 2016. As shown in Exhibit 15, the amount of funding allocated to inmate health care dropped by 9 percent in the period from FY 2008-09 through FY 2014-15 but has since steadily escalated. The FY 2019-20 budget represents a 54 percent increase over FY 2015-16 spending.

AMERICAN OVERSIGHT

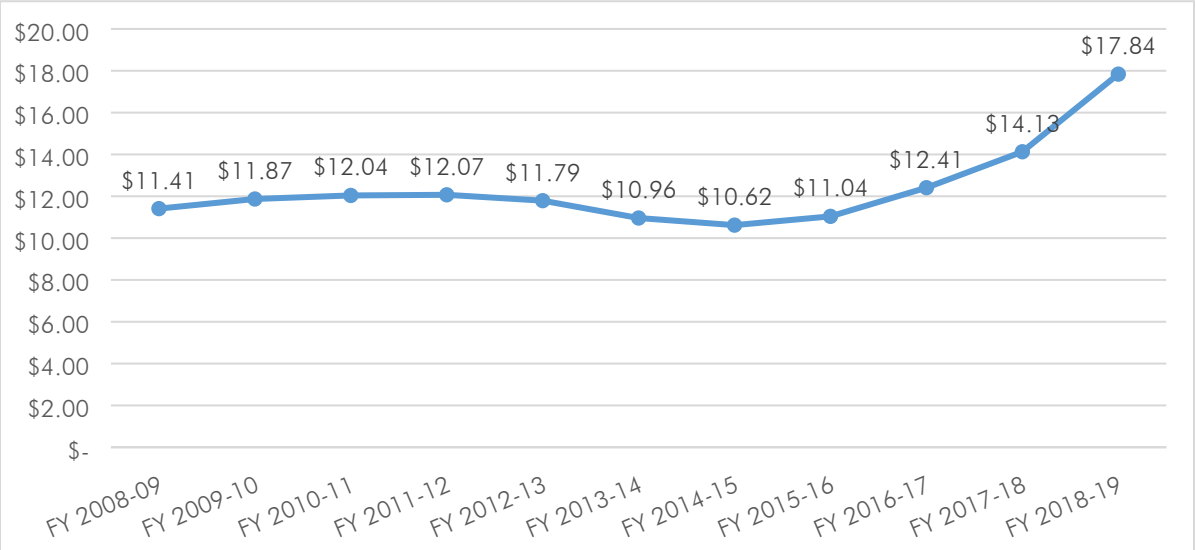

Exhibit 15: Inmate Health Services Spending FY 2008-09 to FY 2018-19

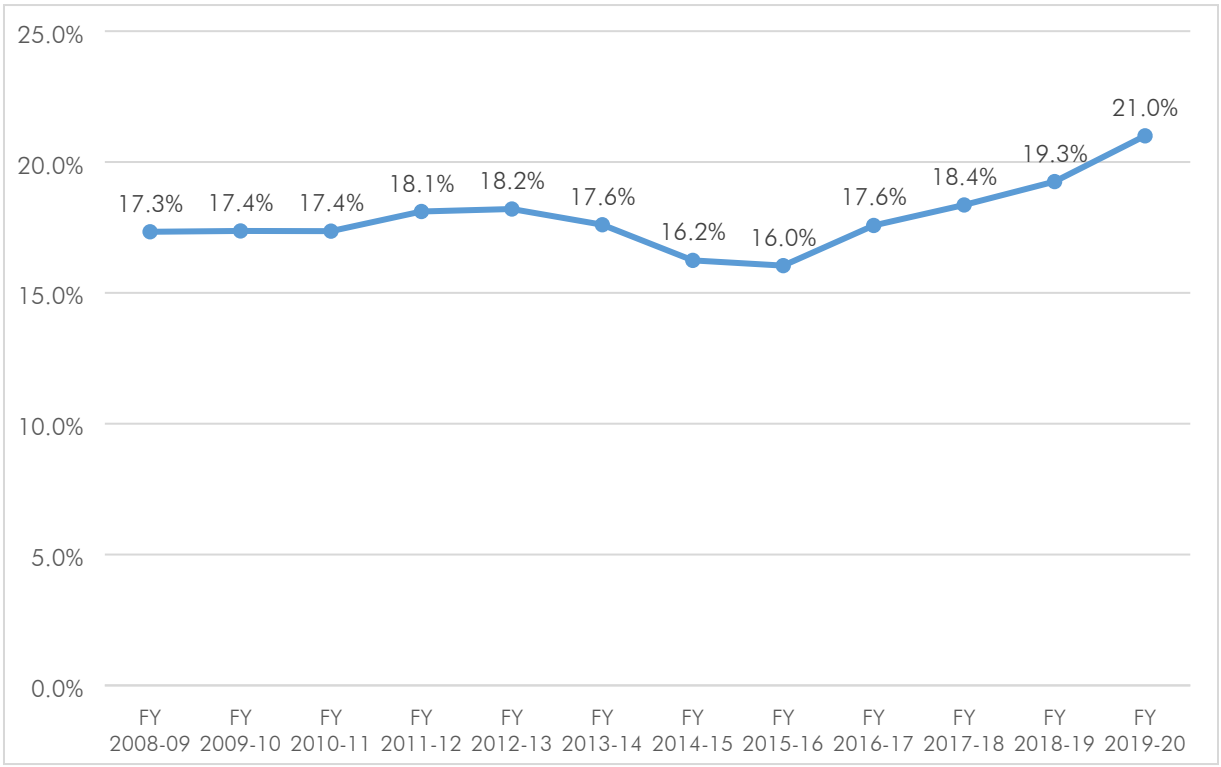
Source: Florida Department of Corrections

Examining per diem spending levels factors in the impact of changes in the average daily inmate population on total health care expenditures. This is a significant factor in evaluating cost trends as the actual average daily inmate population in the Florida correctional system has declined by 6.7 percent since FY 2008-09 from an average daily population of 93,270 in state-operated facilities in FY 2008-09 to 87,032 in FY 2018-19. The per diem cost trend, shows a steady decline through FY 2014-15, followed by significant increases.

Exhibit 16: Inmate Health Services Per Diem Costs FY 2008-09 to FY 2018-19

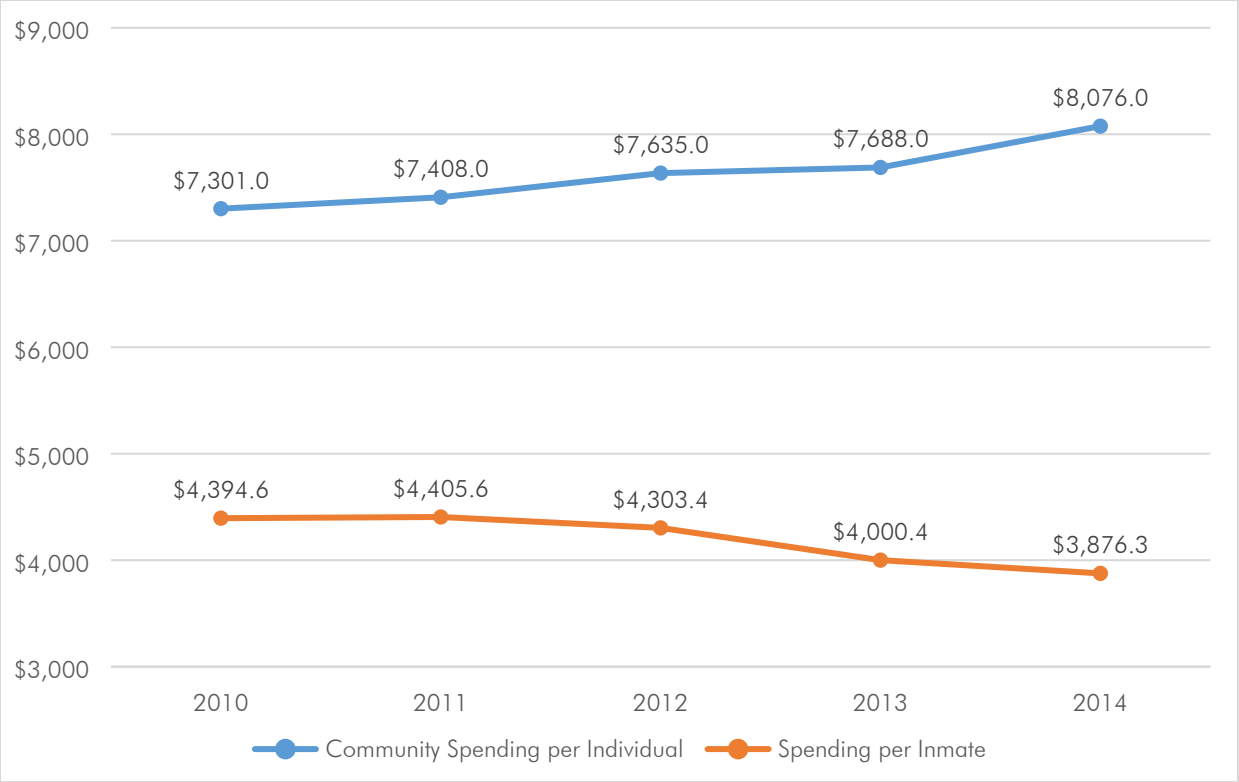


Source: Florida Department of Corrections

AMERICAN OVERSIGHT

The proportion of the FDC budget allocated to inmate health care reflects the increase in reported spending in the last four years. Following several years of decline, by FY 2015-16 the Department was spending 16 percent of its budget on inmate health care. The proportion of the budget allocated to health care has grown more recently in parallel with recent increases in spending.

Exhibit 17: Inmate Health Services as a % of FDC Spending



Source: Florida Department of Corrections

The two most notable factors from this review of spending trends are the significant decline in health care spending from FY 2008-09 to FY 2015-16, followed by the rapid growth in spending that has occurred since that time. This pattern does not follow the overall trend for health care costs in Florida. Annual spending for health care per inmate in the FDC dropped by 12 percent from FY 2008-09 to FY 2014-15. By contrast, according to the Centers for Medicare and Medicaid (CMS), the average cost for personal health care in the state increased by 13 percent over the same period.[25] In 2010, annual per inmate spending on health care was approximately 60 percent of the average level of spending on personal health care. By 2014, inmate health care spending had dropped to 48 percent of the level of personal spending on health care.

[25] Centers for Medicare and Medicaid Services, Health Expenditures by State of Residence, 2017, https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/NationalHealthExpendData/NationalHealthAccountsStateHealthAccountsResidence.html.

AMERICAN OVERSIGHT

Exhibit 18: Annual Community and Inmate Per Diem Spending for Health Care, Florida 2010-2014

Source: Centers for Medicare and Medicaid; Florida Department of Corrections

The primary factor driving this reduction in per inmate spending appears to be the privatization of inmate health care and subsequent decline in the quantity and quality of care provided during this period. The health care contracts with Wexford and Corizon in total reduced the cost of services by 11.2 and 12.9 percent respectively from the Department's FY 2011-12 and FY 2010-11 expenditures. Implementation of these contracts resulted in reductions in staffing, dramatic decreases in episodes of outside care, and increases in the number of grievances submitted by inmates about the poor quality of health care service. CMA inspections noted extensive system-wide areas of concern with the level of medical and mental health care provided.[26] Both vendors later claimed they were not provided enough information to accurately project costs, which resulted in the service issues that developed. Both vendors were unable to provide the level of service required by the Department and did not complete the terms of their contracts.

AMERICAN OVERSIGHT

Cost Drivers

After declining in the period FY 2010-11 through FY 2014-15, inmate health care costs increased by 36 percent over the next four years, an annual average increase of 9 percent. Several factors appear to be driving this trend, including a misalignment between contract funding and service requirements, litigation, the increasing number of geriatric inmates, and increased pharmaceutical spending.

Misalignment between Contract Funding Amounts and Service Requirements. As described above, the Corizon and Wexford contracts reduced state funding for inmate health care. However, this lower funding level did not support a minimally adequate level of service. Accordingly, the reduced levels of spending achieved under these contracts are not an appropriate basis for comparison for contemporary budgets. Increases in funding from the levels required by these contracts need to be viewed in the context of restoring resources to get back to acceptable program performance levels.

Spending on inmate health care by the FDC in FY 2017-18 totaled $460.6 million. Although this represents a substantial $93 million increase from FY 2015-16, using a longer timeframe produces a different conclusion. As shown in Exhibit 15, the FY 2017-18 spending level is only $46 million more than the Department experienced in FY 2009-10. This represents annual growth of 1.3 percent over the eight year period compared with an annual increase in the cost of medical care nationally of 3.6 percent from July 2009 through June 2018.[27]

Much of the apparent increase in spending for inmate health care is attributable to an artificially low baseline spending level experienced by the Department after privatization. Costs went down to levels that could not sustain an adequate level of service. Subsequent increases in spending largely represent a return to levels necessary to support required service levels. Using a longer historical period to evaluate spending levels shows that recent growth in spending levels since FY 2015-16 represents a moderate overall rate of growth in the context of Department spending on health care prior to the privatization initiative of 2013. Further, misalignment between service needs and services provided by the vendors led to a backlog of medical/mental health issues, contributing to subsequent litigation and increased health care spending.

Litigation. Consent decrees and judgements from ongoing litigation on the adequacy of health care services have escalated Department resource needs. The following exhibit summarizes litigation-related increases in the Department's FY 2019-20 budget from the most significant cases that the Department has settled.

Exhibit 19: Impact of Litigation on FY 2019-20 Inmate Health Care Budget

Case	Description	Funding Increase ($ millions)
Disability Rights Florida, Inc. v. Jones; Year 2 implementation of Inpatient Mental Health consent decree	308 staff phased in through the year, including Psychiatric staff, Nursing, Psychologists, Mental Health Professionals, Behavioral Health Technicians and clerical support for expansion of the Suwanee inpatient mental health units.	$16.6
Disability Rights Florida, Inc. v. Jones; Copeland et al v. Jones; Keohane v. Jones; additional staffing	139 staff needed to comply with litigation related to hernia treatment (2 FTEs), gender dysphoria treatment (3 FTEs), the treatment of inmates with disabilities (40 FTEs), as well as additional mental health positions (94 FTEs) included outpatient and inpatient services. In addition, this funds market rates adjustments needed to fill certain positions, such as psychiatrists and psychologists.	$13.4
Hoffer et al v. Jones; Hepatitis C treatment	16 FTEs to provide labs and other medical tests such as Genotyping, Liver Ultrasounds, and Endoscopies. Up to 45,000 screenings and subsequent follow up tests for those testing positive. This does not include the cost of medication.	$8.7

Source: Florida Department of Corrections

Increasing Number of Geriatric Inmates. The number of inmates over the age of 50 has increased from 14,486 on June 30, 2009 to 25,732 on June 30, 2019, an increase of 78 percent over the ten years. As in the community, geriatric patients are disproportionate users of health care. As shown below, despite composing 27 percent of the total inmate population, elderly inmates make up most hospital admissions, inpatient days, outpatient events, and prescriptions dispensed. Department data indicate that when admitted to a hospital, geriatric inmates have a 22 percent longer length of stay than inmates under the age of 50.

Nearly every prison system in the United States faces this same issue of increasing health care costs driven by the growth in the geriatric inmate population. As described earlier, the size of this population in Florida appears larger and growing at a faster rate than that of other large state correctional systems. This trend will continue to place strong upward pressure on inmate health care spending.

Drug Costs. Another significant cost driver is the increasing cost of prescription medications. The FY 2019-20 budget contains a $34.6 million increase for Hepatitis C medications, bringing total Department spending for these drugs to $48.4 million in the upcoming fiscal year. Price increases for other medications account for a $13.9 million increase in the budget. Higher drug costs are a significant growth factor in other state correctional systems as well. For example, increased spending on medications accounted for 33 percent of the growth in spending by the Virginia Department of Corrections from FY12-FY17.[28]

AMERICAN OVERSIGHT

4. Alternative Service Delivery Models

This chapter examines alternative models for delivering correctional health care and their relative utility for the FDC. Models reviewed include insourcing inmate health services, insourcing of outpatient health services provided and outsourcing inpatient services, continuation of the current model of full outsourcing with modified contract terms imposing appropriate cost controls, and management by a third-party public health institution or agency.

Insourcing

An insourced approach to inmate health care management retains management and staffing of the health care services program internally in a state correctional agency and provides as much treatment as possible within the secure facilities of the correctional system. However, not all health care can be provided within a prison. An inmate in need of treatment by a specialist not on staff at the prison will require off-site care with a physician contracted to provide that care, or a contracted specialist to come on site. Similarly, diagnostic procedures that require equipment not maintained in a prison health care unit such as an MRI, will require outpatient care outside the correctional system. Finally, advanced procedures such as heart surgery must be provided in community hospitals that can safely support such treatment. As a result, a completely insourced inmate health care system is not feasible, and in fact virtually all correctional systems since the 1970's have relied on some level of contracting to provide required inmate health care.[29] Accordingly, for the purposes of this analysis, an "insourced" model refers to an approach that maximizes the use of government management and staff in the delivery of services, but still retains the use of contracts for specific services and treatment.

The degree to which a correctional system may rely on insourcing depends upon available resources. Systems that maintain prison hospitals or ambulatory surgical facilities, such as the Federal Bureau of Prisons, Texas Department of Criminal Justice, and California Department of Corrections and Rehabilitation have the capability to provide more services in-house. Florida falls in this category as well. The availability of internal resources reduces the need to take inmates out into the community for health care, diminishing a significant burden on custody staff.

Today, 18 state correctional systems use a primarily insourced model for health care delivery.

AMERICAN OVERSIGHT

Insourcing is used by large correctional systems (California, New York, Ohio) as well as systems with very small inmate populations (Alaska, Hawaii, North Dakota), in every part of the United States. While these systems do contract for inpatient and outpatient care in the community, services in correctional facilities are primarily provided by state employees. The typical exception is for advanced mental health treatment. In almost all cases, psychiatric services are provided by independent contractors, as state personnel systems do not accommodate hiring specialized professionals in high demand.

An insourced system requires substantial internal expertise in correctional health care management and service delivery. Maintaining effective performance in an insourced system requires that a correctional system establish professional care protocols, retain a staff complement with adequate capacity and expertise, and design rigorous systems for monitoring cost and quality of services provided. If these requirements are met, insourcing can meet required standards for correctional health care and provide the following benefits:

- Stability. Use of government employees as service providers and managers provides greater assurance of continuity and consistency in staffing and service approach. The benefit package, particularly for retirement, for a state employee is typically superior to the benefits offered by private companies and acts as an incentive for long-term careers as a correctional system employee. Administrators in insourced systems such as California, Alaska, and Washington report relatively low turnover rates for facility health care staff. A recent report from Arizona indicates health care workers may prefer employment with a state agency, as opposed to a vendor.[30]

  Insourcing also avoids the disruptive transitions in management and employment status that can occur in the change from a government-run health care program to one managed by a private contractor, or in the transition from one vendor to another. In Florida, prior to each privatization initiative, the Department suffered a significant loss of experienced health care staff due to uncertainty regarding their employment status and future compensation level under a vendor. During each subsequent change in vendors, facility health care staff had to transition to a new employer and in most cases lost benefits they had accrued with their prior employer. Moreover, such transitions are highly complex events that place added strain on assuring continuity of adequate care. An insourced system avoids these issues.

- Accountability. The lines of accountability for assuring adequate health care delivery are quite clear in an insourced system, running directly from state employee facility staff and managers up through central office administrators. Contracting, however, transfers operational control to vendors, even while the state retains ultimate liability and responsibility for providing services. This adds a layer of complexity to system management. Similarly, lines of communication and

[30] Marc Stern, Federal Rule 706 Expert, Case 2:12-cv-00601, Report to the Court in the Matter of *Parsons v. Ryan, et al.*, October 2, 2019.

AMERICAN OVERSIGHT

direction are straightforward in a government-run system. Coordination with custody staff is simpler when both health care staff and correctional officers are in the same command structure. Moreover, vendor staff are not directly accountable to state administrators, which can hamper responsiveness.

Problems inherent with insourcing relate to the relative lack of flexibility of government organizations compared to the private sector regarding personnel management. If, for example, a facility experiences chronic high staff vacancy levels, a private vendor generally has the discretion to quickly adjust salary levels or offer signing bonuses to adjust to market conditions. Private vendors generally have more sophisticated staff recruitment systems and a wider range of incentives in attracting employees. Staff with specific skillsets for critical functions such as utilization review and quality assurance may not be readily available within government. Vendors also may quickly redeploy staff as needed to meet operational needs. Finally, private vendors have much greater discretion in terminating staff that do not meet performance standards. State agency deficiencies in hiring and deploying staff to meet correctional system needs is one of the most often cited arguments for privatization.[31]

Another issue with insourcing is that while state agencies may have some expertise in managing facility health care staff and programs, the degree of difficulty associated with effective management of all the various facets of health care delivery is substantial. Few correctional systems have the level of in-house administrative resources and experience required to coordinate outside care and manage multiple contracts with outside providers. Specialized functions such as utilization management and invoice review are far outside the core competency of most state correctional agencies and add a layer of complexity that many systems may have difficulty in managing.

Outsourcing

An outsourced service model relies on a contracted vendor to manage and provide inmate health care services for the state correctional system. In its purest form, the state turns over all aspects of health care service delivery to the vendor.

Until the late 1970s, every state provided prison health care directly in an insourced delivery model. However, widespread litigation following *Estelle v. Gamble* produced judgements that required many states to immediately address significant deficiencies in correctional health care, often requiring that additional clinicians and nurses be hired as soon as possible. Private companies were formed to meet this need. In Illinois for example, in order to meet the need to hire additional staff required under the *Lightfoot v. Walker* consent decree, Illinois Department of Corrections administrators actively solicited a physician's group to help them meet their needs. The company formed by these physicians ultimately became Correctional Medical Services, one of the first companies to specialize in correctional health care, and one of the founders of Corizon Health.

[31] Pew Charitable Trusts.

AMERICAN OVERSIGHT

These early companies soon moved beyond simply providing staffing to provide comprehensive services on a managed care model to both prison systems and jails throughout the United States. Today, 20 states provide most of their inmate health care services using an outsourcing model.

Exhibit 22: States with Outsourced Delivery Systems[32]

Alabama	Kansas	Tennessee
Arizona	Kentucky	Vermont
Arkansas	Massachusetts	West Virginia
Delaware	Maryland	Wyoming
Florida	Maine	
Idaho	Missouri	
Illinois	Mississippi	
Indiana	New Mexico	

Source: Pew Charitable Trusts.

The approach to service delivery in these states differs in terms of the range of services provided, the extent to which they provide system management in addition to clinical services, and whether one or multiple vendors provide services throughout the system. For example, Maryland contracts with separate private companies to provide different services: medical, dental, behavioral health, and pharmaceutical. Illinois has contracted with different vendors to provide comprehensive services to different regions of the state. Massachusetts requires vendors to use a state-managed hospital and pharmacy procurement system. Florida purchases medications and provides pharmacy services with state employees.

There are many specific approaches to outsourcing. The basic distinction lies in how to manage risk, both in terms of service quality and cost. Most outsourced contracts follow either a capitated or cost-plus approach.

Capitated Contracts. The most common approach to outsourcing is the use of a capitated contract. In this model, the state and the vendor agree to a fixed per-person payment rate for all individuals under their care. This vests all risk with the vendor. The intent of the model is to leverage vendor expertise to provide required services at a lower, stable cost.

The fixed per-person rate covers direct care at the facility as well as any specialty or off-site services that may be required. The vendor is responsible for providing contracted services for the number of inmates covered at the agreed rate, regardless of the actual cost. The capitated rate must cover all regular projected costs, a risk premium to cover potential additional liabilities, and a fee to cover administrative costs and profit. If the vendor can reduce costs, it can directly increase profits. If, however, the rate does not account for projected expenses and risks, or if the number of persons covered under the contract falls, the vendor stands to lose money. The state, for its part receives a predictable, stable price for inmate health care.

[32] Pew Charitable Trusts.

AMERICAN OVERSIGHT

A capitated approach requires that the vendor be able to accurately assess the health status of the inmate population, their need for service, and risk factors that may drive up costs. Absent this information, the vendor in a competitive procurement may underbid the contract. The long-term consequences of underbidding are typically either unanticipated requests for additional contract funding, reduced services, or termination of the contract. Outsourcing initiatives in Florida using a capitated model have encountered all these issues.

Cost-Plus Contracts. In this approach the vendor manages health care services but passes through all costs of these services to the state, plus an additional charge for administration and profit. The state assumes all financial risk, while at the same time ceding management control over the program to the vendor. Florida, Pennsylvania, Montana, and Vermont report using the cost-plus model.[33]

This model is often used in systems that either lack data to provide projections of future costs or which have high perceived risks for unforeseen costs. Where the capitated model encourages an aggressive approach to managed care, the cost-plus is more akin to a "fee-for-service" model. The vendor simply manages the health care program and passes along the cost to the state. The primary advantage to the state is the transparency provided in that it reviews and approves all expenses. The contract can also more explicitly focus on service quality and performance as primary objectives. The disadvantage is that it provides little incentive for the vendor to control costs.

In either outsourcing approach, the primary challenge for the state is monitoring the contract to ensure compliance with performance requirements and other contract provisions. In effect outsourcing changes the focus from managing health care operations and services, to managing the contract and vendor performance.

Outsourcing Benefits and Challenges. Both approaches to outsourcing can provide benefits to clients, as well as certain issues. Commonly described benefits of outsourcing include:

- Professional Expertise. For systems that lack internal resources or professional staff, outsourcing provides a means to leverage the professional expertise of a vendor that specializes in correctional health care. Health care is not a core competency of many correctional systems, particularly in areas such as utilization review, quality assurance, network management, and electronic medical records systems. Contracting for health care services provides a relatively straightforward strategy to import these skills, improving performance and allowing correctional administrators to focus on other issues.

- Economies of Scale. Outsourcing can allow small correctional systems to access the economies of scale and more flexible procurement systems used by large, national companies in purchasing pharmaceuticals and supplies. This however is not a significant benefit for larger systems.

[33] Pew Charitable Trusts.

AMERICAN OVERSIGHT

- Staffing. As described in the section on insourcing, private companies often have much more flexibility in setting salary and benefit levels to reflect market conditions in specific areas, and so can more effectively recruit and hire health care staff. This is particularly true in specialized areas such as mental health treatment. To the extent that civil service systems slow hiring or do not offer competitive salary levels, outsourcing provides a potential means to better keep service provider positions filled.

- Cost Savings. At least in the case of capitated contracts, outsourcing provides strong incentives for vendors to reduce costs in order to assure profits. The competitive bidding environment for an outsourcing procurement also tends to promote efficiency and attention to cost savings strategies.

Challenges associated with outsourcing generally revolve around managing performance goals in context with the imperative to control costs. With the capitated model, the vendor will always have the incentive to reduce costs to increase profits. To the extent that cost reduction is achieved through reduced services rather than increased efficiency, the model does not support overall correctional system goals. The disconnect between the vendor responsible for providing care and the state which is legally accountable if care is not adequate can lead to system dysfunction and contract failure. State systems that have experienced serious service issues with outsourced services under capitated contracts include Arizona, Virginia, Illinois, Idaho, and Florida. These issues include excessive number of staff vacancies, failure to refer inmates for off-site treatment, and long wait times for on-site treatment. Strong contract monitoring systems with clear performance metrics are essential to manage these issues.

The cost-plus approach by contrast presents issues of efficiency. The state pays the vendor to manage the system without any offsetting incentives to achieve efficiencies in service delivery. The state must maintain staff to monitor vendor performance against the contract and in addition will typically have an administrative office to provide overall program direction. The vendor however also has a cadre of administrative staff to oversee and coordinate service delivery, in some cases duplicating positions maintained by the state. In a cost-plus contract the state pays for its own administrative staff, covers the cost of the vendor administrative staff assigned to the contract, and then pays the vendor a fee to cover overhead and profit.

A recent review of the Arizona Department of Corrections highlighted this issue. "The vendor has monitors to make sure they comply with the Performance Measures and other requirements of the contract; the Arizona Department of Corrections has monitors to do the same. The vendor has a contract manager and statewide medical director; the Arizona Department of Corrections has a contract overseer and a medical director. The vendor has staff to follow and manage the costs of the contract; the Arizona Department of Corrections has staff to follow and manage the costs of the

AMERICAN OVERSIGHT

contract. The vendor has lawyers to draw up, modify, and deal with issues related to the contract; the Arizona Department of Corrections has lawyers to do the same."[34]

Hybrid Insourcing/Outsourcing

A hybrid service delivery model combines different aspects of both insourcing and outsourcing to meet system needs. As noted earlier, all insourced correctional systems rely on some use of contracts to provide community outpatient services, specialist care, and hospitalization. Hybrid systems go beyond this limited approach to develop more blended systems. Basic hybrid models include outsourcing all care that takes place outside of a secure correctional facility, privatizing the management of health care in select facilities while maintaining state management of other facilities, mixing facility vendor and state staff under the management of state health care administrators, and designating specific disciplines such as mental health, pharmacy, or dental as either state or vendor managed within the context of a outsourced or insourced system.

Historically, hybrid models have evolved as systems experimented with outsourcing on a limited basis to address specific systemic or facility issues. Currently the eight states that use hybrid models which mix state employee and vendor management of health care include Colorado, Louisiana, Michigan, Minnesota, Montana, Pennsylvania, Rhode Island, and Virginia.

The variety of different approaches to hybrid insourced/outsourced models and the relatively small number of states that use this model makes it difficult to draw conclusions as to specific advantages or disadvantages to the approach. Rather, it appears that each state has attempted to develop a customized approach to best meet its unique needs. Michigan for example had a specific challenge in contracting with clinicians and managing off-site care. Their model uses state employee nurses and dentists, while contracting for doctors, psychiatrists, and off-site care with a capitated approach. Colorado uses state employees to provide on-site services but outsources all off-site care. Virginia outsources all health care at select facilities that are difficult to staff or that provide specialized services such as dialysis, while insourcing health care services in its other facilities.

University Management

A final alternative model for the delivery of inmate health care is contracting system management to a state medical school or health sciences university. The model is like more conventional outsourcing but removes the cost of profit and relies on existing university administrative infrastructure to reduce expenses. Currently Texas, Georgia, and New Jersey contract with state universities to manage inmate health care. In these cases, the state approached the medical schools for assistance in response to lawsuits mandating improvement in the delivery of inmate health care services. Connecticut, Louisiana, and Massachusetts have also recently experimented with forms of this approach, ranging from full university management of inmate health care services, to providing certain specified services.

[34] Stern.

AMERICAN OVERSIGHT

Illinois and Virginia maintain more limited contracts for use of state medical school hospitals with secure inpatient units.

This model offers several advantages to state correctional systems. Affiliation with a recognized medical school signals a commitment to service quality and provides state correctional health programs with increased credibility. Medical school partnership also provides much improved access to qualified clinicians. Recruiting physicians to work for a state medical school is often easier than recruiting a physician to work for a prison health care company. In New Jersey, the vacancy rate for correctional facility physicians dropped well below 10 percent following establishment of a contract with Rutgers University.[35] University medical schools also generally have well-developed quality assurance programs, excellent access to contemporary data on best practices in treatment, and well-developed electronic medical records programs. The contracts are generally structured in a cost-plus model, but absent the private vendor profit margin, thereby reducing cost. Finally, affiliation with a university can facilitate access to 340b discount pricing on pharmaceuticals. As described earlier the 340b program provides outpatient drugs to covered entities at significantly reduced prices.

For universities, the primary benefit of such a relationship is the delivery of treatment to a historically underserved population, inmates. The fact that nearly all inmates eventually reenter the community also makes treatment of chronic and infectious diseases in prison a significant component of a comprehensive approach to public health promotion. Also, the inmate population, with its high incidence of pathology provides a medical school with unique professional training opportunities.

5. Alternative Service Delivery Models in the FDC

This chapter assesses the application of each of the service models described in Chapter 4 to the delivery of inmate health care services in the Florida Department of Corrections (FDC). There is no consensus in current research on which model is most effective in supporting effective system performance while containing costs.[36] Instead, it appears that each model can work well depending upon the specific characteristics of the correctional system. This analysis examines the degree to which each of these alternatives provides an effective approach to managing the issues and needs of the FDC.

Insourcing

The feasibility of insourcing inmate health care services in the FDC is well established through the history of the Department. Except for an outsourced contract for Region 4 facilities from 2001-2007, the FDC managed a largely insourced system until the privatization of the system in 2013. The effectiveness of insourcing as a future service delivery model for the Department depends upon the Department's internal resources to effectively manage and support this approach.

FDC Internal Capacity to Support Insourcing

Requirements for successful management of an insourced correctional health care system include internal subject matter expertise, readily available data on key system metrics, an effective management infrastructure, and understanding of program spending and cost drivers.

Subject Matter Expertise. The lack of in-house clinical and management experts in correctional health care is a primary factor motivating correctional systems to privatize their health care delivery systems. The FDC does not have this problem. Senior leadership in the Department's Office of Health Services (OHS) has extensive correctional health care management experience dating back to the period of FDC insourcing of health care, and has taken an aggressive, hands-on approach to monitoring contractor performance. Staff are well-versed in contemporary professional standards and best practices as prescribed by the National Commission on Correctional Health Care and the American Correctional Association.

On the clinical side, OHS employs a Chief of Medical Services, a Senior Physician, a Chief and Assistant Chief of Dental Services, a Chief of Mental Health Services with two Assistant Mental Health Chiefs, a Chief of Nursing Services, and a Chief of Pharmacy Services. The Department also has a Chief Clinical Advisor that serves as the final professional authority for clinical decisions.

The Department appears to have ample in-house management and clinical expertise to support an insourced delivery system.

[36] Pew Charitable Trusts.

AMERICAN OVERSIGHT

Data. Modern health care systems rely heavily upon ready access to data to facilitate effective patient treatment and for use of performance analytics to more effectively manage system outcomes. This requires systemwide use of an Electronic Medical Record (EMR) system. Unfortunately, the FDC relies on a legacy system of non-integrated databases that do not communicate with each other, are cumbersome to use and maintain, and that falls far short of contemporary standards. This can impair treatment (e.g. lack of standardization of the record, issues with continuity of care) and quality reviews.

With an EMR, information required for quality reviews, statistics, and audit data could be easily gathered. Currently, due to the number of audits (e.g. American Correctional Association (ACA), legal settlement agreement monitoring) staff spend a great deal of time gathering information to provide to the auditors. This paperwork burden could potentially be reduced with an EMR. In addition, an EMR would allow for benefits such as easier scheduling, alerts regarding the need for follow up appointments, and medication specific protocols so that required laboratory examinations are not missed. The lack of an EMR would impair the effectiveness of any future insourced system, but also handicaps the Department in managing vendors in any type of outsourced model.

Under the current Centurion contract, the vendor has committed to developing a comprehensive EMR for the Department within its contracted annual budget of $421 million for each of the next three years. This project will commence in June 2020 and should be completed by June 2022. Continued support and development of this project will be a key to future improvements in system performance and should be a top Department priority.

Management Infrastructure. The OHS has well-developed systems for oversight, policy development, and contract monitoring. The 18 staff assigned to contract monitoring could readily be reassigned to operational oversight and compliance in an insourced system. The Department's existing Quality Management (QM) program would also transition well to insourcing. The QM program supports ongoing reviews performed by institutional and regional staff to ensure efficient operations by the contractor. Activities include chart reviews of clinical functions such as chronic illness clinics, care reviews, medication/treatment administration, dental care, and mental health care; as well as site visits to monitor and assure proper health care system performance.

The Department also maintains a Behavioral Risk Management Team to provide operational stabilization and clinical integrity of the mental health delivery system. Multidisciplinary committees established at the institution, region, and statewide levels make recommendations for program service improvements, and evaluate corrective actions. It appears that the Department has ample administrative infrastructure to support management of an insourced system.

The primary administrative impact of insourcing would be in personnel management. The Department's Office of Human Resources would require 12 additional positions to support the hiring and personnel actions required to add and maintain over 2,000 new staff. This estimate is based on the increased workload across all areas of Human Resources and Staff Development and the number

AMERICAN OVERSIGHT

of positions dedicated to these functions that were abolished after privatization. These staff would be assigned to recruitment, labor relations, classification, payroll, and staff development. The estimated annualized cost of these additional staff is $774,371.

Exhibit 23: Additional FDC Human Resource Staff Required for Insourcing

Title	Duties	FTE	Salary/Benefit Annual Cost
Human Resource Specialist	Manage position movement, shift changes, supervisor changes and classification	1	$ 67,086
Personnel Services Specialist	Labor/Employee Relations	1	$ 59,546
Personnel Services Specialist	Recruitment	4	$ 238,186
Personnel Technician III	Payroll	2	$ 114,191
Research & Training Specialists	Staff Development	3	$ 205,073
Human Resource Manager	Staff Development	1	$ 90,288
TOTAL		**12**	**$ 774,371**

Source: Florida Department of Corrections, Humans Resources Bureau

Insourcing could also potentially affect procurement workload, depending upon the approach taken by the Department in managing those contracts for off-site care that would still be required in an insourced model. The Department's past practice of establishing and managing over 200 individual contracts for off-site services created substantial internal procurement and management workload. An alternative approach, centralizing coordination and management of off-site care under a single contract is discussed later in this analysis.

Budget Management. Lack of information on spending components and inadequate understanding of cost drivers is a significant risk faced by systems transitioning from an outsourced model to insourcing. While capitated models provide low risk and predictable funding requirements for clients, they do not typically offer any detail on their actual costs for the components of service they provide, such as outpatient treatment, hospitalization, and medication. This deprives correctional systems of detailed knowledge of the characteristics of their spending requirements.

However, the cost-plus model used in the current Centurion contract provides near total transparency on costs, as the Department reviews and approves every expenditure made by Centurion under the contract. This provides excellent data on spending trends and equips the Department with an understanding of projected costs in an insourced system.

AMERICAN OVERSIGHT

Impact of Insourcing Inmate Health Care Performance and Cost

As the Department appears to have the internal capability to manage an insourced health care program, an argument can be made for insourcing as a superior model of service delivery if it provides improved performance and/or lower costs in the core functional areas of inmate health care: on-site facility health care services and treatment, off-site care, and pharmacy services.

Facility Health Care Services. The central element of the inmate health care services provided on-site is the health care staff who manage the program and provide treatment. As of July 2019, Centurion's staffing plan included 2,953.4 FTEs. The key dimensions of an analysis of the FDC's ability to transition to insourced inmate health care include staff retention and recruitment, staff resources requirements, and staffing costs.

Staff Retention/Recruitment. When a correctional health care vendor transition occurs, the employees of a prior vendor typically remain. If the state chose to insource, it is likely most current staff would prefer to remain. Anecdotal reports indicate that many current facility health care staff are former state employees who transitioned to working for vendors with the implementation of privatization. FDC management indicates that many of the staff would welcome an opportunity to return to state employment. Facility managers reported that staff have told them they would take a pay cut to return to state employment. State employment, particularly due to the health insurance and retirement benefits, appears to be an attractive option for at least some vendor staff. The Reception and Medical Center (RMC) in fact lost many medical staff when the first outsourcing occurred as state employees left to find employment in other state agencies.

However, the fact is that the vendor currently pays higher salaries than the state for many staff positions, and still has trouble competing with local hospitals and community health care providers in hiring staff. Centurion has particular difficulty in recruiting and retaining nursing and mental health staff. During our visit to Lowell Correctional Institution, we noted the facility staffing plan called for four psychiatrists and two psychiatric nurse practitioners. Instead the facility had two full time psychiatrists working on the inpatient program and one psychiatric nurse practitioner splitting time between the inpatient and outpatient programs.

The challenge of recruiting and retaining staff will be a significant concern in an insourced service delivery model. If insourcing appears a viable option, the FDC needs to devote significant attention to a strategy to address the issue of recruiting and retaining professional staff. Financial pay differentials and bonuses may be required to sustain required staffing levels. In addition, the FDC would require development of a sophisticated recruitment strategy that includes nursing schools, social media, and community job fairs. A major difficulty will be in hiring and maintaining qualified professional physician and psychiatric staff. Realistically, many of these positions will require salary levels well beyond what is available to a state employee. As a result, even under an insourced service delivery model, many of these positions will have to be contracted out to individual practitioners.

Staffing Levels. Current facility staffing levels have been determined by the current vendor, in consultation with the Department, as the number needed to enable achievement of the service level

AMERICAN OVERSIGHT

and program outcomes required by the contract. A high level review of current facility staffing does not indicate any apparent opportunities to reduce employee levels, given the number of inmates served and the level of services required. To test this conclusion, we compared overall health care program staffing levels in Florida with national staffing trends.

A 2017 nation-wide review of health care staffing in state prisons documented a median staffing level of 40.1 FTEs per 1,000 inmates[37]. The July 1, 2019 staffing plan for Centurion shows total contract staffing of 2,831.4 employees. Adding in OHS management and pharmacy staff of 168 positions, total correctional health care staffing in Florida is 2,999.4 staff. Based on the FDC's reported average daily inmate count of 87,032 for FY 2018-19 in state-operated facilities, this equates to 34.5 FTEs per 1,000 inmates in 2019, 14% below the national median number of FTEs per 1,000 inmates in prisons nationwide.

Correctional Medical Authority (CMA) audits for FY 2017-18 included 16 institutions with a total inmate population of 24,333.[38] These facilities had 16 physician positions. This equates to one doctor for every 1,520 inmates. CGL team member physicians, recognized as national experts in correctional health care, indicate a more typical ratio in most prison systems would be one doctor for every 800 inmates. CMA noted understaffing as a concern in their annual report as indicated by failure to follow up on diagnostic testing on a system wide basis, and recommended reviewing staffing levels for physical health staff including physicians, mid-level practitioners, and nursing staff as a possible cause of these failures.

Health care staffing is a complicated issue and the observations noted above are not conclusive regarding specific FDC staffing needs. However, a high level review shows no evidence of opportunities to reduce facility health care staffing under an insourced model. This is further supported by the increased staffing required of the Department under recent litigation to raise service levels to meet constitutional requirements. Prior to any change in service delivery models, the FDC should commission a detailed analysis of facility health care staffing to determine the level and composition of staffing required to meet performance expectations.

However, a transition to an insourced model would enable the elimination of many vendor administrative positions which are paid for under the contract. In most cases these positions either duplicate existing department OHS staff positions, have duties which can be absorbed by OHS, or would no longer be necessary. We reviewed Centurion regional and statewide administrative staffing and identified 37.5 statewide administrative positions that could potentially be eliminated under an insourced model:

	FTE
Statewide Dental Director	1.0
Regional Dental Director-Region I	0.5
Regional Dental Director-Region II	0.5

[37] Pew Charitable Trusts
[38] CMA

AMERICAN OVERSIGHT

Regional Dental Director-Region III	0.5
Regional Dental Director-Region IV	0.5
Quality Management Program Director	1.0
Data Analyst	0.5
Administrative Coordinator	1.0
Administrative Assistant	2.0
Offender Based Information Specialist	1.0
Continuous Quality Improvement Program Director	1.0
Continuous Quality Improvement Program Coordinators	4.0
Pharmacy Director	1.0
Reentry Director	1.0
Regional Reentry Coordinators	4.0
Data Analyst	1.0
Administrative Coordinator	1.0
Administrative Assistants	7.0
Referral Specialist	3.0
Human Resource Administrator	2.0
Senior Human Resource Business Partner	1.0
Human Resource Business Partner	3.0

Elimination of these positions under an insourced service model would save an estimated $3.2 million. We do note that some vendor administrative FTEs should be retained, including those assigned to the electronic medical record (EMR) project, Information Technology, Utilization Management, Health Education, Infection Control, and Regional Mental Health.

Staffing Cost. Assuming the same level of facility staffing as provided under the current contract, the cost to the state of these staff will change somewhat, given the FDC's lower salary scale and higher benefit package. To determine the impact of such a change, using the payroll titles that were used by the FDC when it last insourced health care services, we attempted to convert existing vendor staff titles to comparable Florida state position titles. Using the midpoint of the pay grades as a salary assumption and applying the state's benefit package for Career and Selected Exempt Service (SES) employee categories, we developed an estimate of the annual cost of the current facility vendor staff if converted to state employees. We then added a 2 percent differential to address potential issues of recruitment and retention in a competitive market for health care workers. We made a separate calculation for the cost of senior clinical positions such as psychiatrists on the assumption that these positions would have to be contracted out to meet market compensation levels.

The results of this analysis show a projected cost of insourced facility health care staffing of $199.2 million. This compares to a Fiscal Year 2018-19 payroll and benefit cost for vendor staff under the Centurion contract of $209 million. Adjusting the Centurion payroll amount to take out the administrative positions recommended for elimination reduces Centurion's cost to $205.7 million, approximately $6.5 million or 3.3 percent above projected insourced costs for the same staffing plan. While this cost estimate will require further refinement, the level of cost difference is consistent with reports of the variance between vendor and state salary and benefit levels. The following tables summarize our projected cost of insourcing current vendor health care staff.

Pharmacy. Insourcing would entail no change in pharmacy services as the Department already manages this function. Based on past attempts to privatize, insourcing is the most cost-effective means to provide the service.

Off-site care management. Coordination and management of off-site care was a substantial challenge for the Department when the system was insourced. A 2005 performance review of the Department found the following and recommended that the Department contract out management of all off-site care to a professional managed care firm[39]:

- Office of Health Services (OHS) staff managed over 170 major contracts
- Most contracts were with providers with long-term relationships with the Department, were exempt from bidding, and were renewed annually
- Staff were primarily oriented toward maintaining service levels, not necessarily toward holding contractors accountable
- Contract terms did not provide adequate monitoring terms or performance measures
- Monitoring of contractor performance by regional staff was perfunctory
- Contractor invoices were generally processed by clerical staff without meaningful review

OHS managers acknowledged the system of contracting and coordinating off-site care used by the Department was cumbersome to administer and did not achieve effective performance. Insourcing management of off-site care using this same system would defeat the purpose of increasing operational efficiency.

A 2017 study of this issue by the consulting group North Highland projected that in the event of insourcing, a restoration of the Department's former status quo method of managing contracts for off-site care would likely increase costs by 20 percent. In order to maintain costs at the more efficient level achieved under the outsourced health services contract, North Highland recommended that the Department contract with a managed care organization such as a Preferred Provider Organization (PPO) or Third Party Administrator (TPA).

Health care network administration and these related functions are not a core competency of correctional systems. These are complex functions that require a high degree of technical expertise in a very specific field to perform well. This is a classic example of specialized work that can be performed more efficiently by private organizations with appropriate skillsets and experience. Serious consideration of any insourcing scenario should incorporate outsourcing of off-site health care services to achieve maximum efficiency.

[39] MGT of America, Performance Review of the Florida Department of Corrections, 2005.

AMERICAN OVERSIGHT

In this approach, the correctional system contracts with outside health care or insurance company to manage its offsite care network for a flat, fixed fee per inmate on top of actual utilization. The PPO or TPA would then administer the Department's hospital and specialty provider network, provide claims adjudication and processing, conduct utilization management reviews, and develop data analytics on network performance.[40] Network efficiencies and negotiated discounts could more than offset the cost of the contract. This approach has been used successfully in the Virginia Department of Corrections.[41] Based on the North Highland analysis, this approach should enable the Department to maintain offsite care costs at approximately the same level as now experienced under Centurion management.

Administration. Given the history of OHS with insourced system management and the experience of the current senior management, the reconfiguration of its responsibilities from a policy direction/contract monitoring role, to insourced system manager can be accommodated with existing resources, augmented by select retained vendor administrative positions and contracting out for offsite care management. This approach will require ongoing investment in development of internal management resources.

Custody Support. Whether the medical program is insourced or outsourced, effective provision of correctional health care services requires support from across FDC operations. While correctional officer staffing levels present many serious issues across the entirety of FDC operations, shortfalls in staffing can have a serious impact on access to care. As of November 4, 2019, the FDC had 2,305 correctional officer vacancies, placing severe stress on operations in nearly all its facilities. The project team's limited review of FDC facility operations indicated that the availability of correctional officer staff to escort inmates to treatment is a significant issue. The demand on staffing for outside transportation can also be substantial. For example, movement and supervision of severely mentally ill offenders in need of hospitalization requires the assignment of three officers, 24 hours per day, seven days per week. Facility administrators and staff appear to appropriately prioritize custody support for health care but are handicapped by chronic shortages in correctional officer staffing.

Technology. Telemedicine has huge potential application in the FDC, particularly in the delivery of psychiatric services. However, while telepsychiatry is available, there are limitations in availability. Many facilities have network bandwidth problems that severely limit telemedicine capacity. For example, at Lowell Correctional Institution, the technology to allow for the provision of telepsychiatry was available for outpatient treatment only. Staff at the facility were unable to utilize telepsychiatry on the inpatient units due to technology infrastructure issues.

The FDC should augment its cable and wiring infrastructure to accommodate a robust telemedicine program. This type of upgrade will be needed to support the electronic medical record (EMR) system as well. Some of the advantages of an EMR going forward will be expedited electronic submission of

AMERICAN OVERSIGHT

medical orders, improved accuracy and access to patient records, and monitoring of the delivery of health care services statewide. There will also be potential operational efficiencies as clinicians and nurses directly enter data into the system instead of handing off encounter forms to a data entry operator/medical records clerk. Again, this is an issue that should be addressed irrespective of the future service delivery model adopted by the Department.

Implementation. The timeline for actual implementation of a transition to insourcing needs to address the short-term transition of current vendor staff to state employment as well as development of a long-term strategy to address the long-term challenge of recruiting and retaining health care staff in a competitive labor marker.

Assuming that most vendor staff would transition to state employment if offered, FDC Human Resource staff indicate that the hiring and onboarding of these employees would take approximately 60 days. This process would entail establishing standardized selection criteria and guidelines for each position title, verifying staff credentials and conducting background checks. The Department would bring on six temporary Personnel Technicians to facilitate the transition at a one-time projected cost of $238,794.

The next phase in the implementation process would be filling remaining vacant positions, which will require an aggressive recruitment campaign using Jobs.myflorida.com, colleges and universities job placement programs, social media advertising/ Indeed.com, and regional/local job fairs. The final step would be development of a long-term strategy to address future recruitment and retention issues.

Planning an effective approach to address recruitment and retention is the biggest challenge facing the FDC in the implementation of insourcing. In the past, the Department has experienced issues in keeping health care positions filled and attracting a stable pool of applicants. Vendors have experienced the same issues. A transition to insourced health services will require an intensive review of possible strategies to address this issue over an extended time period. While the FDC has successfully managed transitions from insourced to outsourced services and multiple transitions to different vendors without serious operational disruptions, a change to an insourced service delivery model will require more intensive preparation to assure successful implementation.

Cost-Effectiveness. This analysis has examined the impact of insourcing on the primary components of the inmate health care delivery system. To summarize, insourcing appears to reduce staffing costs by $3.3 million through eliminating vendor administrative positions and $10.4 million by converting contract positions to state employees. With the use of a contracted provider to manage off-site care, costs for these services should be equivalent to the level experienced under Centurion. Pharmacy costs would remain unchanged. The Department already pays the actual costs of ancillary items such as laboratory expenses, supplies, and equipment, under the current cost-plus contract and these expenses would remain unchanged. The administrative burden of hiring and retaining over 2,000 new staff would create additional ongoing human resource expenses for the Department, totaling $774.3 thousand along with a one-time cost of $238.8 thousand to manage the initial hiring/transition process.

AMERICAN OVERSIGHT

The final and most significant savings element associated with in-sourcing is elimination of the administration/profit fee paid annually to the vendor. The rate for this fee under the contract is set at 11.5 percent of reimbursable expenses, which are essentially the direct expenditures for service on behalf of the FDC. The FDC is reimbursed for direct expenditures for service and pays a fee in the amount of 11.5 percent of these expenses to the vendor to cover overhead and profit. The administrative/profit fee paid against Centurion's contract for Fiscal Year 2018-19 totals $37.3 million. Insourcing eliminates this expense.

In summary a transition to an insourced model of inmate health care delivery could reduce FDC annual spending by $46.2 million.

Exhibit 25: Projected Savings Impact of Insourcing

	$ millions
Elimination of Vendor Administrative positions	$ 3.2
Convert Vendor positions to state employees	$ 6.5
Eliminate vendor administration/profit fee	$ 37.3
Additional HR costs	$ (0.8)
Total Savings	**$ 46.2**

Source: CGL analysis

The FDC has the internal capability and expertise to manage inmate health care delivery. Insourcing the delivery of on-site facility health care serviced throughout the correctional system is feasible, although the FDC would face substantial challenges in recruiting and retaining staff. The Department, however, would require substantial improvement in management of off-site care. This could be accommodated by contracting with an insurance company or health care organization to manage all off-site care, utilization review, and claims management for the FDC. The resulting approach would move the FDC closer to a hybrid insourcing/outsourcing model.

Outsourcing

As described earlier, the FDC has experimented with a variety of different approaches to outsourcing over the last eighteen years. Early efforts to use outsourcing to drive health care costs lower appear to have had some success, but also produced substantial problems in service delivery, including reduced staffing levels, dramatic decreases in episodes of outside care; increases in health care grievances; and a proliferation of litigation.

These performance issues have been addressed in more recent contracts. However, growth in program spending has accelerated. The overall utility of outsourcing as a future service delivery model for the Department depends upon achieving a balance between efficiencies in cost management and adequate program quality.

AMERICAN OVERSIGHT

FDC Internal Capacity to Support Outsourcing

Effective management of an outsourced health care system requires that a correctional system take a pro-active stance toward accountability and oversight of the vendor. The FDC over the course of its experience with privatization has developed a sound management infrastructure for outsourcing. Components of this infrastructure include:

- Policies – the Office of Health Services has a comprehensive set of policies, bulletins, and procedures to provide clear direction to a vendor on the expectations and parameters for health care delivery.
- Contract – the outcome-based format of the contract establishes clear standards and metrics that directly relate to policies and service quality objectives.
- Monitoring – FDC monitoring teams and protocols provide a ready means to assess vendor performance and enforce contract terms. Its QM program provides clinical reviews of service delivery systems and outcomes. Department monitoring is also supplemented by external reviews of service delivery by the Correctional Medical Authority.

The FDC, both through the Office of Health Services and its administrative bureaus, supports effective use of outsourcing. The one notable area of need is timely access to data documenting program activity and performance. The lack of an electronic medical record (EMR) system hampers management access to quality reviews, statistics, and audit data and requires a labor-intensive process to gather data for review. The plans for EMR development under the current contract with Centurion will ultimately address this need.

Outsourcing Impact on Cost and Performance

The impact of outsourcing on health care service cost and quality depends upon the outsourcing model employed, The FDC has used both risk-based and cost-plus models in its history with privatization. This analysis first examines the impact of the current outsourcing model.

Cost. The FDC's current contract with Centurion follows a cost-plus model. The Department reimburses Centurion for direct health care costs up to a designated cap, including staffing, and pays the vendor a fee to cover its overhead and profit. The contract has recently been amended to provide a three-year extension at an annual funding cap of $421 million for each of the contract years. As described earlier, the increase in funding for FY 2019-20 covers over 460 additional staff required to comply with the terms of recent litigation, maintenance of current staffing and service levels, an 11.5 percent administrative fee, and development of an EMR system.

After several years of significant increases in health care spending, the FDC is now assured of annual contract spending that will remain stable at no more than $421 million for each of the next three years. The contract will not entail any additional administrative workload or cost on the Department. Other than additional potential costs associated with litigation and increased costs for

AMERICAN OVERSIGHT

pharmaceuticals, the Department should experience relatively constant overall health care costs under this contract through FY 2021-22.

Exhibit 26: Actual and Projected Cost-Plus Health Care Annual Contract Caps, FY 2017-2022
($ millions)

	FY 2017-18	FY 2018-19	FY 2019-20	FY 2020-21	FY 2021-22	Average Annual Increase
Centurion Contract Cap	$321	$375	$421	$421	$421	6.2%

Source: Florida Department of Corrections

Performance. Service quality levels attained under this contract approach should be comparable to the Department's experience with Centurion over the last two years. This experience has been relatively positive, particularly when contrasted with the FDC's experience with prior contractors. Central office and facility administrators indicated improvements in service have been achieved under the cost-plus model. This is a feature of the cost-plus approach, in that the vendor has no incentive to reduce services to lower costs and manage risk. Any additional costs that may be incurred to achieve required service levels are simply passed on to the client. However, there are two areas where modifications in the model could facilitate improved service quality, staffing and performance measurement.

Maintaining adequate facility staffing levels is a critical component of health care service quality. Most cost-plus contracts make detailed facility staffing plans part of the contract and monitor vacancy levels. The FDC contract with Centurion is somewhat unique in that it does not specify or require monitoring of facility staffing levels. As an outcome-based contract, in the current model vendor performance is assessed solely based on program results. This assumes that these performance measures completely convey the quality of vendor services provided.

The impact of staffing levels on services however is so significant that it arguably should be tracked, and the vendor held accountable for providing agreed levels. This can be seen in recent consent decrees entered by the Department where the plaintiffs have required that the Department add specific numbers and types of staff to facilities, rather than only require attainment of specific outcome measures.

A reliable facility health care program that consistently produces good results requires a stable cadre of full-time professional staff. Vacancies need to be filled in a timely manner. However, under the Department's current cost-plus approach, the vendor may choose to use registry, temporary contract, or locum tenens staff to fill vacancies for extended periods of time rather than recruit and hire permanent replacements. This has an impact on service quality, as temporary staff do not generally provide the same level of performance. Additionally, under this approach costs are typically higher than hiring replacement staff. Tracking and holding the vendor accountable for compliance with an agreed staffing plan would provide the department with an additional, valuable tool for managing vendor performance.

AMERICAN OVERSIGHT

Another approach to improving vendor performance under the cost-plus model would be to shift the focus of the current contract measures away from process or compliance measures, to more qualitative metrics. Internal monitoring should be linked to the quality management program. FDC monitoring teams are now attempting to evaluate identified problems and to train staff so that there can be improvement. Many health care organizations are utilizing lean manufacturing and six sigma techniques in their quality improvement programs. The California prison system has a robust six sigma and quality improvement program utilizing these techniques.

The following compliance monitoring items should be considered in addition to current compliance questions.

- Percent of all types of scheduled appointments (nurse sick call, physician on-site appointments, off-site consultations and diagnostic testing, dental appointments, mental health appointments, mental health programming) kept with reasons for no show
- Time to triage health service requests
- Time to nursing assessment appointments for health service requests
- Percent of patients who require nurse sick call for a health request and who are evaluated with 72 hours
- Percent of ordered doses of medication that patients receive in a timely manner
- Percent of patients who failed to receive their first dose of ordered medication within 24 hours of the order
- Percent of patients who failed to have intake screening done within 24 hours
- Percent of patients who failed to have intake physical examination within a week
- Number and percent of patients who missed intake screening
- Percent of patients in need of screening who obtained tuberculosis screening
- Percent of patient admitted to infirmaries who have an nurse intake note within two hours of admission
- Percent of patients admitted to infirmaries who have a provider admission note within 24 hours and have a discharge summary completed the day of discharge
- Percent of off-site diagnostic test results and consultation reports that are scanned to the record within 3 business days
- The number and percent of patients who failed to meet time tables for specialty care appointments as determined by clinical necessity

AMERICAN OVERSIGHT

- The number and percent of urgent appointments occurring within 14 days and routine appointments occurring within 45 days
- Percent of patients who receive immunizations as indicated by the Advisory Committee on Immunization Practices (ACIP)
- Percent of patients with diabetes who have hemoglobin A1c at 7 or below (considered good control)
- Percent of patients with diabetes who have hemoglobin A1c above 9 (considered poor control)
- Percent of patients with hypertension who have blood pressure controlled below 140/90
- Percent of diabetics who have an annual eye examination
- Percent of diabetics who are annually screened for nephropathy (with micro-albumin)

Compliance measures can be displayed on a shared intranet as a dashboard as is done in California.[42] Dashboards are a concise display of compliance type process measures that are a component of the quality program. Integrated into the electronic record system, this approach will free up quality improvement and monitoring time for other purposes.

One additional quality monitoring function should include safety/sanitation/administrative checklist tours that verify that every institution has adequate clinical space, supplies, equipment, and sanitation. These rounds can result in scoring and corrective action plans.

A second additional function of the quality management program is to institute clinical quality review. Almost all physician care at the institutions is primary care. Board certified primary care physicians[43] (or at a minimum, physicians who completed residency training in primary care) should perform clinical quality record reviews. These should include mortality reviews, sentinel event reviews, and potentially preventable hospitalizations. Health organizations nationwide, including the Mayo Clinic, have robust mortality review processes that assist in improvement of clinical care and process improvement.

Nursing reviews should also be performed for potentially serious complaints on health requests; for emergency evaluations; and for care on the infirmary unit.

These clinical quality reviews should have an aim of identifying opportunities for improvement and detection of systemic errors. These reviews can also provide professional performance evaluations (peer review). The clinical quality reviews and compliance monitoring should be incorporated into

[42] The California prison dashboard can be found at https://cchcs.ca.gov/reports/#dashboard
[43] A primary care physician is a physician who completed residency in internal medicine or family practice. In some cases physicians who completed residency in emergency medicine is adequate.

AMERICAN OVERSIGHT

the quality improvement program. The program should track the number of clinical quality reviews that result in identification of opportunities for improvement.

A process improvement strategy like the lean manufacturing or six sigma model would provide the data needed by the quality management team to reduce cost and improve quality.

Alternative Approaches to Outsourcing. The primary alternative to the cost-plus outsourcing model is the capitated approach in which the vendor is paid at a per diem rate per inmate to manage all health care services. This approach shifts all financial risk to the vendor and has the greatest potential for achieving cost savings as it incentivizes the vendor to maximize efficiency in order to achieve profits. In fact, the primary basis for the Department's initial adoption of an outsourcing model was potential cost savings. The capitated contract approach used by the Department in its initial approach to outsourcing was entirely consistent with this goal.

Impact of Capitation on Cost. A change to a capitated model could reduce costs if potential vendors in the market perceive an opportunity to leverage their expertise to achieve efficiencies in service delivery. The two primary areas to achieve potential efficiencies with a significant impact on cost are staffing and off-site services. Due to the transparency of the Department's current cost-plus contract, current levels of expenditures in these areas is readily available.

Fiscal Year 2018-19 expenditures for staff salary and benefits under the Centurion contract totaled $209 million. This amount will increase with the additional staff provided in the FY 2019-20 budget to address litigation requirements. Comparisons with national data on health care staffing suggests that current facility health care staffing levels are below levels maintained in other states.[44] Our high-level review on facility staffing plans and onsite operational reviews provided no indications of excess or inefficient use of staff in the system.

Under a capitated approach, the vendor can reduce staffing costs by eliminating positions, leaving vacancies open, or reducing compensation and benefits levels. Eliminating positions and keeping vacancies open directly reduces services, while lowering compensation levels would exacerbate issues in maintaining adequate staffing. None of these measures is advisable and all would likely have a very negative impact on service quality. In fact, any shift to a capitated outsourcing model would likely need to be accompanied by strong contract monitoring provisions that provide a means to hold the vendor accountable for maintaining required staffing levels. Accordingly, significant cost savings from current contract levels in the area of facility staffing levels are unlikely in a change to a capitated approach.

Off-site health care services under the Centurion contract totaled $109 million in FY 2018-19. Approximately 52 percent of this amount was for inpatient hospitalization, 23 percent for outpatient services, 14.6 percent for specialist care, and 4.9 percent for emergency room treatment. While

[44] Pew Charitable Trusts

AMERICAN OVERSIGHT

Centurion does provide utilization and invoice review, the fact that these costs are simply passed through to the FDC indicates at least a potential for an incentivized vendor to identify savings.

There are no studies of the relative impact on health care costs in correctional systems of a cost-plus versus capitated approach to off-site care management. However, there has been substantial research on the impact of managed care programs compared to fee-for-service plans under Medicaid, which is in many respects analogous to the capitated health care program management versus the cost-plus model. One meta-review of the research on this topic found that managed care plans in 24 studies showed savings ranging from 1 percent to 20 percent from fee-for service plans.[45]

The median of the savings identified in these studies is 10.5 percent. Applying this rate of savings to all the off-site care paid for under the Centurion contract in FY 2018-19 results in potential savings under a capitated model of $11 million. How much of the savings achieved under the contract are passed back to the client versus retained as profit is an open question. Assuming the vendor passed 50 percent of the savings achieved back to the client, this model could achieve a potential cost reduction of $5.5 million.

Impact of Capitation on Service. The risk assumed by the vendor in the capitated model places added stress on service quality. Adverse utilization experience or cost exposure incentivizes reduction in services to mitigate the negative financial consequences for the vendor. This describes much of the FDC's experience with capitated health care outsourcing from 2001-2017.While privatization provided costs savings in the short-term under the capitated model, vendors were unable to provide consistent service that met contract performance standards at the funding levels they had bid. This led to a turbulent period of vendor appeals for additional funding, contract terminations, and multiple vendor transitions. For its part, the FDC experienced reduced facility staffing levels, reduced access to off-site care, increased inmate grievances regarding health care services, and ultimately significant costly litigation.

To avoid this scenario, any change in outsourcing approaches needs to be accompanied by a very robust system of contract monitoring, thorough vendor understanding of program service requirements, and a realistic sense of program funding needs. The capitated Wexford and Corizon contracts which the FDC entered in 2013 produced substantial cost savings, but also had a pronounced negative impact on service quality. Future outsourcing initiatives need to balance these objectives.

Impact of Modified Contract Terms. An alternative to cost-plus or capitated models is to incorporate cost containment mechanisms into the current framework. The Department's current cost-plus contract does include an overall cost containment measure in the annual cap that it places on total compensation to the vendor. This provides the Department with certainty regarding overall contract expenditures. Additional cost containment measures commonly found in correctional health care contracts are variations on approaches to lower vendor risk. If the vendor is responsible for managing

[45] The Lewin Group, Medicaid Managed Care Cost Savings: A Synthesis of 24 Studies. Prepared for America's Health Insurance Plans, (March 2009).

AMERICAN OVERSIGHT

all health care costs, as under the capitated model, they typically must include a substantial risk premium as insurance against adverse experience. By sharing or reducing this risk, states can reasonably expect lower per diem cost proposals. Vendors can effectively price the more routine care and will not build in the additional cost to cover the major cases that might occur. Common approaches to mitigating vendor risk include:

- Stop Loss – Require the vendor to cover off-site care costs subject to a stop-loss cap, either on a per case basis or in aggregate. This eliminates the risk premium that vendors must build in to cover catastrophic losses and shifts risk to the state. In effect the state self-insures the vendor.

- Shared Risk – The vendor and the Department establish a framework for sharing off-site care costs above a certain threshold, typically on a per case basis. For example, the vendor may be 100 percent responsible for care up to $50,000 per case, share 50 percent of the cost up to $100,000, and the state assumes responsibility for costs above $100,000. This approach diminishes vendor risk on an escalating scale, while preserving some incentive for their management of costs up to a catastrophic level.

- Condition Exemptions – Many states will exclude the cost of care for certain treatments or conditions to reduce vendor risk. Common exemptions include the cost of treatment of HIV/AIDS, Hepatitis C, hemophilia, or organ transplants.

These approaches all entail a trade-off in the price reduction to the state realized through reducing vendor risk and the increased cost to the state in assuming some level of responsibility for catastrophic or high treatment cost cases. The projected impact of any of these measures on cost relies upon how vendors use these provisions in pricing their services in a competitive bid process. Any cost savings again would accrue only to the off-site care expenses covered under the contract. A further 5 percent reduction in the contract price covering off-site care would lower up-front contract costs to the Department by an additional $5.5 million. These savings would be offset at least to a partial degree, depending upon the level of shared financial risk assumed by the Department.

Implementation. The Department has signed a contract extension with Centurion that covers the next three years, through FY 2021-22. Adopting a new outsourcing model would require development of an ITN or RFP, evaluation of responses, and negotiation of a contract. Based upon the Department's experience with the ITN process, the entire process to select a vendor under a new outsourcing model could take approximately 12 months, allowing time for ITN development, solicitation, evaluation, negotiation, and rebidding if necessary. At the same time, the Department would provide Centurion with notice of intent to terminate the contract, a minimum of 60 days.

Outsourcing Competitive Environment. Outsourcing works best in a procurement environment where there is ample competitive pressure on potential bidders to produce better quality proposals at lower prices. Competition is unfortunately limited in Florida. The high degree of financial risk makes attracting enough bidders to facilitate a competitive environment extremely difficult. This degree of risk also makes the use of capitated contracts a strong disincentive for potential vendors.

AMERICAN OVERSIGHT

In its ITN process, the Department made multiple attempts to attract additional vendors in order to create competition on price and service level for a capitated outsourcing model. The process culminated in only one vendor proposing to contract with the Department to provide its required services. Further, that vendor required the Department to adopt a cost-plus model to minimize its risk exposure.

There are few vendors who can provide services on the scale required by FDC, which also diminishes competition. Nationally, there are only three vendors that have managed entire state correctional health care systems: Centurion, Wexford, and Corizon. The FDC has substantial negative experience with both Corizon and Wexford. Centurion was the only responsive bidder to the FDC's most outsourcing procurement. This level of vendor interest makes obtaining competitive proposals unlikely.

Based on this experience, any discussion of alternative approaches to outsourcing appear to be hypothetical. The size of the system, the level of risk inherent in assuming responsibility for cost and service management, and the very limited number of vendors capable of delivering this service diminishes competition to a level where the benefits produced by outsourcing are substantially reduced.

The current cost-plus approach appears to be the only means available to the FDC to privatize on a system-wide scale. Efforts to achieve savings by instituting shared risk provisions or stop losses in a future contract will likely result in higher vendor cost proposals as they factor increased risk into their budgets. Because there is no competition for this contract, the FDC has little choice but to accept the current contract approach if it wants to continue to use outsourcing. By most reports, the current vendor is performing reasonably well, and quality of care has improved under the current cost-plus contract. However, this approach to privatization does not incentivize efficiency and requires the FDC pay a significant administration/profit to the vendor in addition to paying all direct costs.

Hybrid Systems

Because there are several different forms of hybrid systems, it is important to define the form to be reviewed here. As described earlier, the FDC in effect has always operated a hybrid system. During that time where the Department provided on-site services with a largely state employee workforce, it still maintained an extensive network of contracts for off-site care. In this report, we have defined this approach as a form of insourcing. Similarly, the current service model is a hybrid in that the Department manages its substantial pharmacy program with state employees while contracting for all other services. In this report, we have defined this approach as outsourcing.

As used here, a hybrid system refers to an approach where the Department manages some facilities with state employees and their own network of off-site contracts, while also outsourcing other facilities in the correctional system to vendors that provide comprehensive health care services. The Department in effect used this approach during that time in which Region 4 health care services were outsourced while all other facilities provided services with FDC employees.

AMERICAN OVERSIGHT

Cost. The primary factor in favor of a hybrid approach is the fact that smaller contracts, centered on a region or facility, should be more manageable for smaller firms than a large statewide contract, and therefore may attract more competition, which should have a favorable impact on price and service quality. The counter-argument is that the smaller contractors that bid on these contracts may lack the economies of scale to achieve efficient procurement of services such as pharmaceuticals. Moreover, the smaller population bases of these contracts provide less margin against risk of catastrophic cases. The cost of high cost cases may be better managed against a larger population base in order to spread the risk across a broader revenue base.

There is very little research on the cost performance of this hybrid model versus more conventional insourcing and outsourcing approaches. The one study that has been conducted examined the cost performance of privately contracted health care for correctional facilities relative to state-provided healthcare in the Virginia correctional system. Approximately 50 percent of the state's prison population is housed in facilities that receive outsourced health care services from two vendors, Armor Correctional Health Services and Mediko Correctional Healthcare. Outsourcing was used for these facilities primarily because of their specialized mission, providing intensive, specialized health care services such as dialysis, advanced infirmary care, and specialized behavioral health services.[46] Because of these services, these facilities require larger numbers of more specialized health care professionals. The Virginia Department of Corrections used a capitated outsourcing model in contracting for all health care services in these facilities.

The Virginia Joint Legislative Audit and Review Commission conducted a sophisticated statistical analysis of correctional health care spending over three fiscal years in outsourced and insourced Virginia Department of Corrections facilities, controlling for inmate demographics including age and race, as well as health characteristics such as mental health status and chronic disease diagnoses. The analysis found no evidence that outsourced facilities had lower costs for inmate health care than facilities that provided services with Virginia Department of Corrections staff. Insourced facilities in a hybrid system experienced the same levels of health care cost as the outsourced facilities.[47]

Applying the results of this study to Florida, a hybrid system which relies both on insourced and outsourced capitated health care can be expected to have a cost profile in which contracted facilities have the same level of cost as insourced facilities. With no difference in cost between outsourced and insourced facilities, the system would in effect have the same overall cost as an entirely insourced model. Our previous analysis showed that insourcing would provide approximately $46.2 million in savings from the current cost-plus model used by the FDC. The Virginia study of health care costs in that state's correctional system suggests that a hybrid system would have a similar cost profile and consequently, would provide the same level of savings. This assumes that private companies would be willing to bid on smaller capitated contracts for regions or groups of facilities.

[46] Virginia Joint Legislative Audit and Review Commission.
[47] Ibid

AMERICAN OVERSIGHT

Performance. The primary issue with hybrid systems is establishing a fair allocation of healthy and sick inmates for the different insourced and outsourced facilities. In Florida's experience with a hybrid model, the vendor responsible for outsourced health care in Region 4 charged that the FDC was sending them the sickest inmates, allocating healthier inmates to insourced health care programs in state-managed health care programs. This seems unlikely, particularly given that the Reception and Medical Center, operated by the FDC, housed the sickest inmates in the system. However, the issue of cost shifting between facilities and regions becomes significant considering the extreme difficulty in achieving an even distribution of inmate health care needs among facilities managed by different vendors. Perceived inequities in health care requirements can create contract disputes, or efforts by vendors to reduce service levels to compensate for these perceived inequities.

The administrative complexity of managing multiple vendors can also make partial outsourcing on a facility basis a less effective approach. The transfer of inmates between facilities managed by different companies and state employees necessarily requires a higher level of coordination to assure continuity of care.

The Virginia Department of Corrections addressed this issue by explicitly assigning outsourced health care contracts to facilities with specific health care missions. These vendors had an expectation that they would serve populations with more intensive health care needs and structured their proposals accordingly. This suggests that transparency and access to population and utilization data are effective means to address this issue. As with other models, a robust system of quality assurance monitoring, focused on qualitative performance metrics provides the best approach to assuring adequate service quality under a hybrid model.

Implementation. Transitioning to a hybrid system is a more complex process than implementation of other models. The multiple approaches to health care delivery require that the Department develop a plan to both insource programs at facilities or regions to be determined, and at the same time conduct a procurement process for capitated contracts at other facilities or regions. The resulting transition to different management models in different parts of the state would also be challenging.

A phased approach would require a longer implementation period but would facilitate management of these issues. In the first phase, the Department would develop a plan that identifies which facilities or regions would be insourced or outsourced. The next step could be procurement and implementation of capitated outsourcing in the facilities or regions designated. If successful, the Department could then proceed with implementation of insourcing in remaining facilities or regions. Alternatively, if the outsourcing initiative fails to attract bidders at anticipated prices, the Department could proceed with insourcing of the entire system. The entire process could take up to 12- 16 months.

University Model

In this model, the FDC would develop partnerships with one or more of the state's medical schools such as the University of Florida, Florida State University, or the University of Miami. The structure of

AMERICAN OVERSIGHT

such a partnership could be similar to the Department's current cost-plus contract but could be initiated as a pilot program covering a smaller number of facilities. The university health system would be responsible for management and staffing for onsite care in the facility and assume responsibility for offsite care and prescription drugs. This can be done as a contract with each agency as is done in Texas or by development of an independent entity that then contracts with the prison system as is done in Georgia.

Among other state correctional systems using this approach, Texas has the most comprehensive system, with two universities, the University of Texas Medical Branch and Texas Tech University, managing the delivery of all inmate health care. The Texas correctional health care system is widely recognized as one of the most effective in the United States and provides services with a lower cost per inmate than Florida. New Jersey also contracts with the state university medical program for comprehensive health care delivery. Several other states including Ohio and Illinois have partial contracting agreements. The University of Ohio contracts with the Ohio prison system for specialty care and telemedicine care for HIV. The University of Illinois at Chicago medical school contracts with the Illinois Department of Corrections for HIV and hepatitis C care via telemedicine.

Cost. The cost structure of a university-operated model using the same approach as Texas, combines elements of the outsourced cost-plus and insourced models. Facility health care staff would be employees of the university medical system, with a compensation cost comparable to that of an insourced model. For off-site care, the University would provide managed care services to coordinate contracted services in addition to providing services at university-operated inpatient and outpatient facilities. Costs should be comparable to levels achieved through outsourced models. As a public sector organization, a university model would still charge an administrative fee to cover indirect and overhead costs, but this would not include the profit built into the administrative fee paid under the FDC's current cost-plus contract. The University of Texas Medical Branch charges the Texas Department of Criminal Justice a 2.75 percent fee to cover administrative costs. This compares with an 11.5 percent administrative fee charged by Centurion under the FDC's current outsourcing model. Substituting this rate for the administration/profit fee of paid by the FDC would reduce this fee from $37.3 million to $8.1 million.

Because a University operates the entire medical program, it is also possible to obtain 340b pricing for all pharmaceuticals. Significant savings can accrue when the entire pharmacy budget is subject to 340b pricing. Department pharmacy expenditures in 2018-19 were $85 million of which approximately 60% were for "infectious disease drugs". Part of the infectious disease component would be for Hepatitis C drugs which are not part of the 340b pricing discount currently received by the FDC through the Department of Health. This discount allows from 23 – 40 percent discounts on outpatient medications. Due to the consent agreement on Hepatitis C, many more additional inmates can be expected to require treatment, increasing demand for the medications. The projected cost of Hepatitis C drugs in the FY 2019-20 budget is $49.2 million. Applying a 23 percent discount factor to these drugs alone would reduce costs by $11.3 million.

Potential savings provided by University Management model total $40.5 million, as shown below.

AMERICAN OVERSIGHT

Exhibit 28: Projected Savings Impact of a University Management Model

	$ millions
340b discount for Hepatitis C drugs	$ 11.3
Reduce vendor administration/profit fee	$ 29.2
Total Savings	**$ 40.5**

Source: CGL analysis

Performance. As discussed earlier, the quality of care under the University model appears to be high. University medical school programs also have more professional prestige than state prison systems and can be expected to have more success in recruiting and retaining professional staff. The other significant benefit to a University program is that medical schools credential physicians appropriately, requiring physicians to work only in areas for which they have residency training. A University program can also effectively coordinate the use of telemedicine including primary care.

Implementation. FDC managers indicated they have approached several of the state's medical schools but have been unable to generate any interest in the concept of university-managed correctional health care. Absent cooperation from one of the state's university medical programs, the potential application of this model in Florida is moot.

In order to further this concept in Virginia, the state legislature has considered legislation creating a pilot project in which Virginia Commonwealth University (VCU) would build on its current relationship of providing inpatient hospital services to the state correctional system, to assume authority for comprehensive management of health care delivery at one prison. The Department of Corrections and VCU are currently in discussions for further development of the concept. A similar approach in Florida could pilot an interim model in which a university agrees to take on one aspect of the correctional health care program, such as management of off-site care for a region or group of facilities.

The implementation of such an approach is realistically a long-term alternative at best. However, as more states experience problems with conventional outsourcing with private vendors, interest in this concept will likely grow.

Subject: Death Penalty Cross Jurisdictional Program Publication
Attachment(s): "The Empirical Economics Letters.pdf"

Good Afternoon Honorable Chair Jeff Brandes,

I hope you are having a good day.

In our previous meeting, I shared with you information about the Death Penalty Cross Jurisdictional Program which I created. The program was designed to save taxpayer dollars, create educational opportunities, and ensure quality representation in death penalty cases. I showed you the paper I wrote that was the genesis for the program. I am very honored to report that the revised draft of the paper was submitted, accepted, peer reviewed, and published in the Empirical Economics Letters (EEL) Journal.

Please see the attachment of my publication, entitled "Minimizing the 'Price' of the Death Penalty in Florida" where I am the primary author.

This study was published in Volume 18, Issue 10 (October, 2019), of The Empirical Economics Letters (EEL) journal. As noted by the journal, EEL "*has been able to publish contributions from over 250 institutions of 100 countries spread over six continents of the world*." Its distribution, editorship, and rigorous peer review process are also international in scope and function. Publications in this journal are further required to have an empirical (numerical) focus, and the journal makes it very clear that it is difficult to be published to this journal, listing the review process as "very competitive." The journal is indexed in both EconLit—a database published by the American Economic Association (considered to be one of the most prestigious associations of economists in the world)—as well as by the highly publicized Cabell's Directory of journals. I would also like to emphasize that I chose to publish this work in an economics journal since, among other issues; economics concerns itself with statistically and rigorously determining how policies can affect resource distribution and the resultant societal impacts. In this instance, my interest was in how the cost of preparation and litigation of the death penalty relates to the use of resources in the State of Florida.

Thank you and have a great day.

Sincerely,

Ita Neymotin

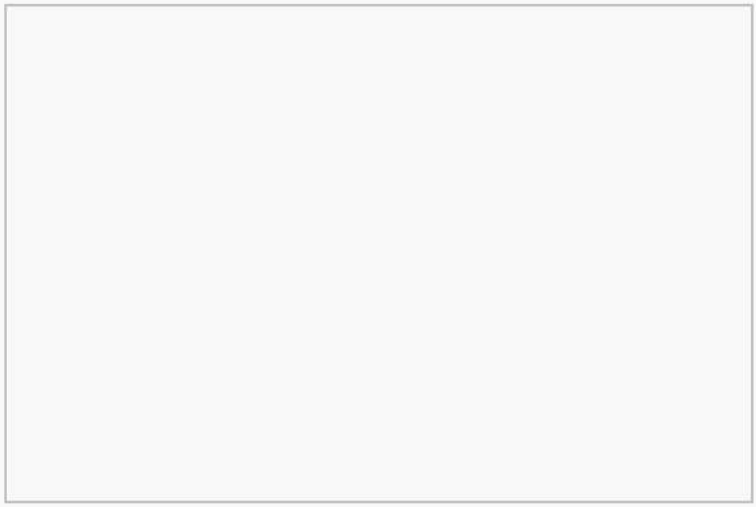
To: Hubbard, Zachary <Hubbard.Zachary@flsenate.gov>
Subject: Delegation ☐ for 11.12.19: Impeachment gets real ⚖ — Hong Kong — Panhandle grants ☐ — Jax VA ☐ — flood insurance ☐



IMPEACHMENT INQUIRY GETS REAL

No set of Capitol Hill hearings in recent memory has generated the buzz this week's live testimony of witnesses in the impeachment inquiry of President **Donald Trump**. While the Republican-led investigation into President **Bill Clinton** in 1998 was covered extensively, the televised spectacle involving President **Richard Nixon** in 1973 is unmatched.

Millions will be watching as cable news networks will provide gavel-to-gavel coverage. After three committees took part in depositions, the Intelligence Committee, led by controversial Chairman **Adam Schiff**, is leading the probe.

Most Americans seem to have their minds made up with polling showing a 50-50 breakdown. The delegation **is just as divided**

"It's obviously 100% partisan, despite the fact that (Speaker) **Nancy Pelosi**, Adam Schiff and (Judiciary Committee Chairman) **Jerrold Nadler** all were quoted as saying if this was not a bipartisan impeachment that it would not be good for the American people," said Rep. **Greg Steube** of Sarasota.

The revolution (or at least the impeachment hearings) will be televised.

The two sides could come closer together, as they did in 1973, if a bombshell drops that makes clear Trump's guilt or innocence. Republicans are confident there is no **Alexander Butterfield**-type of witness that will force the President from office.

In 1973, Butterfield was the deputy assistant to the President who shockingly revealed under oath the existence of an Oval Office recording system. That set in motion the events that led to Nixon's resignation, preceded by Tennessee Republican **Howard Baker**'s famous question, "What did the President know and when did he know it?"

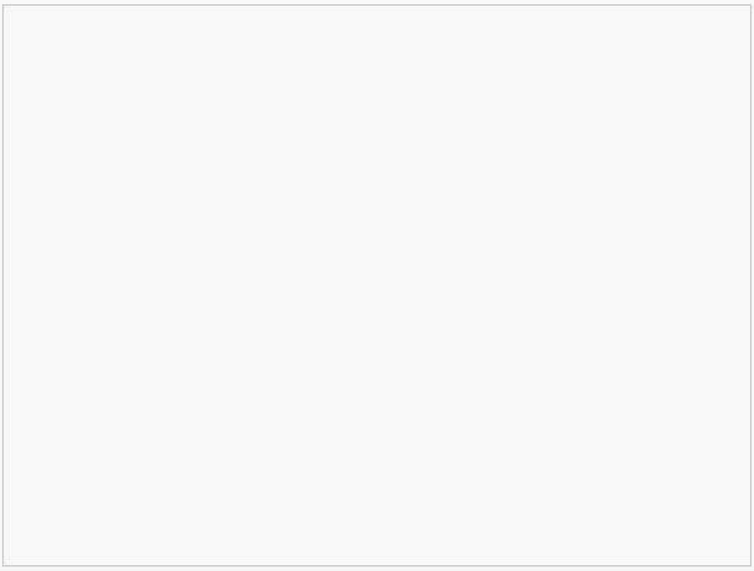
Most Democrats feel they have enough already without a blockbuster witness. This week's lineup of Ambassador **William Taylor**, State Department Official **George Kent**, and former U.S. Ambassador to Ukraine **Marie Yovanovich** all provided negative information on Trump, according to transcripts.

"With regard to the Ukraine matter, we saw a transcript that showed pretty strong evidence of allegations that the president had abused power by asking a foreign country to investigate his top rival," said Kissimmee Democrat **Darren Soto**. "We saw allegations of bribery, holding back $391 million in foreign aid to Ukraine to push for that investigation."

Republicans say they are **prepared for the opportunity** to question the witnesses in public. Minority Leader **Kevin McCarthy** guaranteed **some extra fireworks** by appointing controversial Ohio Republican Rep. **Jim Jordan** to the committee for the duration of the hearings.

The GOP put together **a list of witnesses** they wished to call, including the "whistleblower," all who helped that whistleblower draft the complaint, and **Hunter Biden**, among others. Schiff indicated the entire list would not be fulfilled.

Floridians are playing a limited role in this phase. Orlando Democrat **Val Demings** is the only Floridian on



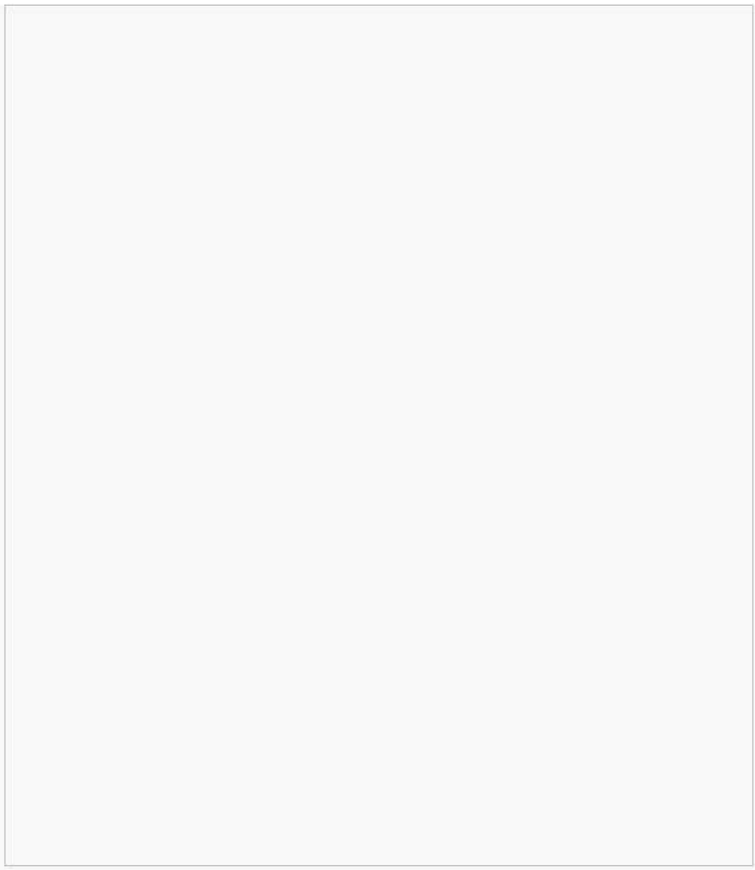
AMERICAN OVERSIGHT

the Intelligence Committee. Others will come into play when Schiff presents a final report to the Judiciary Committee for any action on drafting articles of impeachment.

Demings also serves on that committee, along with Democratic colleagues **Ted Deutch** of Boca Raton and **Debbie Mucarsel-Powell** of Miami. Republicans include **Matt Gaetz** of Fort Walton Beach and **Greg Steube** of Sarasota.

If the House follows through with impeachment, Deutch would be a likely candidate to serve as one of the "prosecutors," formally known as managers. During the 1999 impeachment trial of Clinton in the Senate, Republicans **Bill McCollum** and **Charles Canady** served in that role.

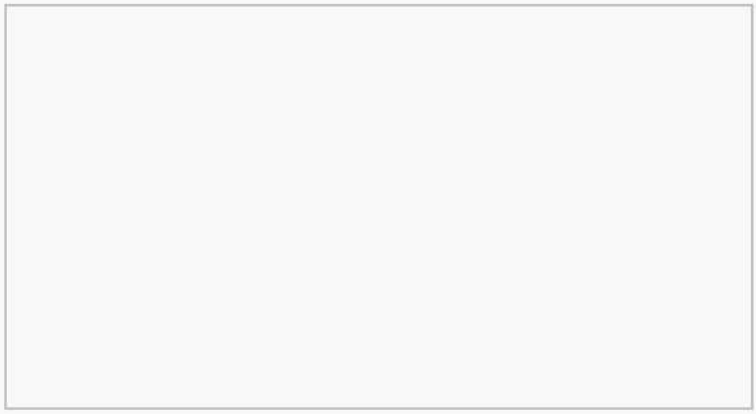
Another phase of U.S. history is about to begin. So, too are the partisan games.



SENATORS FEAR MORE VIOLENCE

Conditions are deteriorating in Hong Kong. The latest violence saw police officers shooting two demonstrators, while a counterdemonstrator was set on fire, prompting Hong Kong leader **Carrie Lam** to describe protesters as "**the people's enemy**."

Lawmakers, including both Florida Senators, are becoming more concerned that China will seek to put an end to the violence once and for all while mourning one who died.



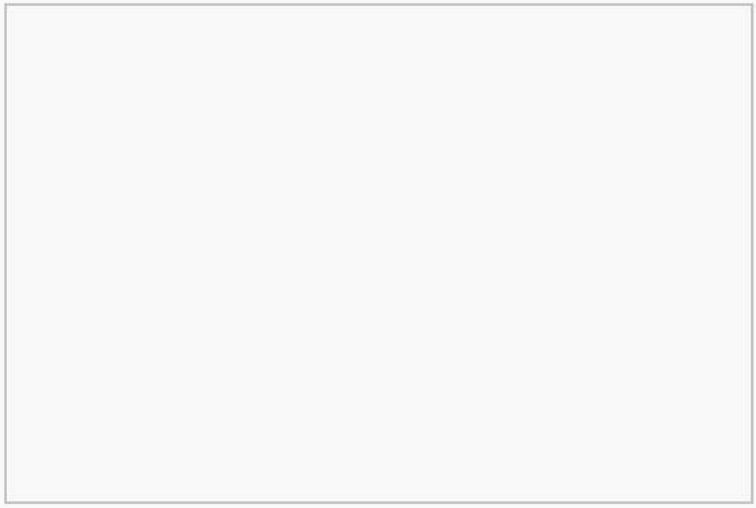
Sen. **Rick Scott**, who traveled there last month, **tweeted**:

AMERICAN OVERSIGHT

Lam also told protesters they "will not succeed in securing their demands." Rubio expressed concern the violence may increase.

Rubio **tweeted**:

The protests have continued for more than five months.



AMERICAN OVERSIGHT

PANHANDLE GETS AGRICULTURE GRANTS

The Florida Panhandle received a significant lifeline with the announcement of a **$380 million block grant** designed to provide relief to farmers and help clean up rotting timber felled by Hurricane Michael. It was the first such grant Florida has ever received from the U.S. Department of Agriculture (USDA).

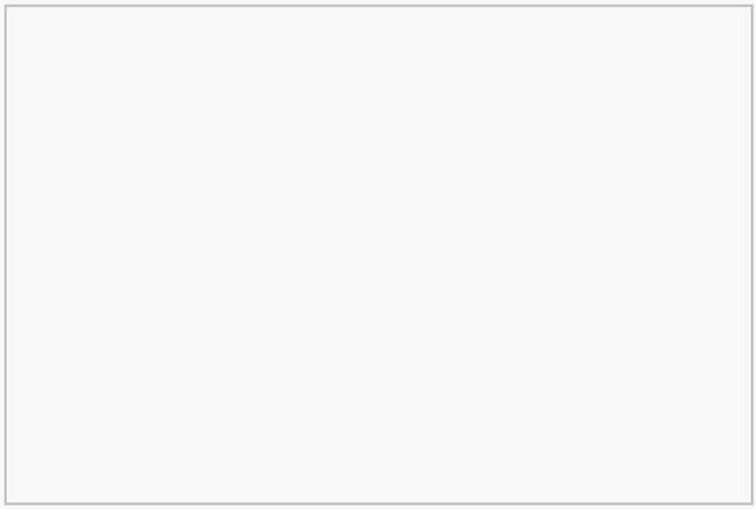
With the agriculture industry suffering $3 billion in losses, the funds will not make timber farmers whole, but will provide them with some relief to recoup some of their losses and replant trees. Also, funding will go toward repairing irrigation infrastructure.

"Our Florida foresters are our best environmental stewards, and their livelihood depends on smart and sustainable conservation practices," said Panama City Republican **Neal Dunn**, whose district was hit the hardest by Michael.

Neal Dunn is applauding the $380 million federal lifeline to the Panhandle for helping clean up downed timber from Hurricane Michael.

"These block grants will provide much-needed relief. I was happy to work with colleagues in Congress and (Agriculture) Secretary (**Sonny**) **Perdue** to ensure that the necessary resources flow to North Florida to revitalize our timber industry."

According to Dunn, Timber was not eligible for loss payments in the 2017 Wildfires and Hurricanes Indemnity Program (WHIP). State of Florida officials and members of the delegation worked with Perdue and the Department of Agriculture to ensure that timber producers could receive aid.



"The Panhandle has waited patiently for this money after the devastating effects of Hurricane Michael," said Gaetz, whose district was also affected. "Thanks to the help of President Donald Trump, Gov. DeSantis, Sen. Rubio and Sen. Scott, Northwest Florida can continue the rebuilding process of our beautiful emerald coast."

AMERICAN OVERSIGHT

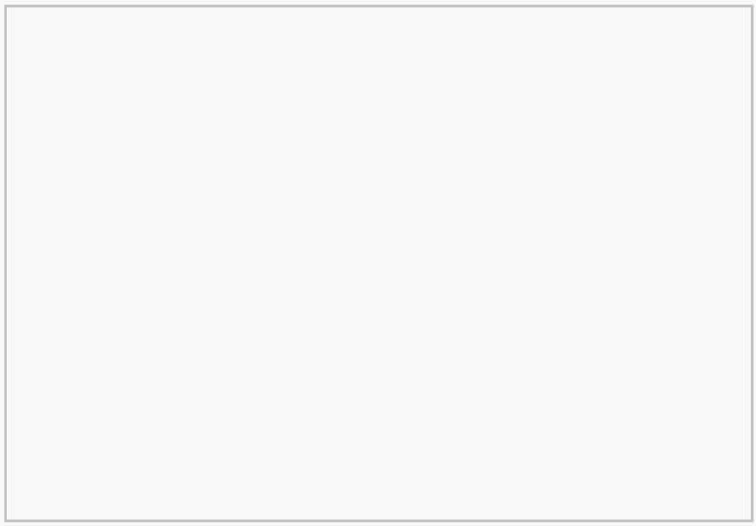
JACKSONVILLE VA HOSPITAL SOUGHT

For years, efforts to establish a Veterans Affairs hospital in Jacksonville have come up short. Democratic Rep. **Al Lawson** has taken another step forward by reintroducing the Veterans Emergency Treatment Services Act.

Currently, veterans in the Jacksonville area requiring hospitalization must travel more than 60 miles to Gainesville and Lake City to receive emergency care. Lawson believes an area with so many veterans needs to provide for them.

Al Lawson makes headway toward setting up a VA facility in Jacksonville.

"Jacksonville has one of the highest veteran populations in the nation and the highest concentration of veterans in the state of Florida," Lawson said. "Establishing a VA hospital in Jacksonville is necessary to provide our service members with the critical care they need. Our brave men and women who have fought for our freedom deserve to be taken care of in their own community when they return home."



Lawson, whose father was a disabled World War II veteran, has spent much of his career advocating for veterans. This includes providing employment, job training programs, access to health care, education benefits and affordable housing options.

HACKING NOTIFICATION GUIDELINES ISSUED

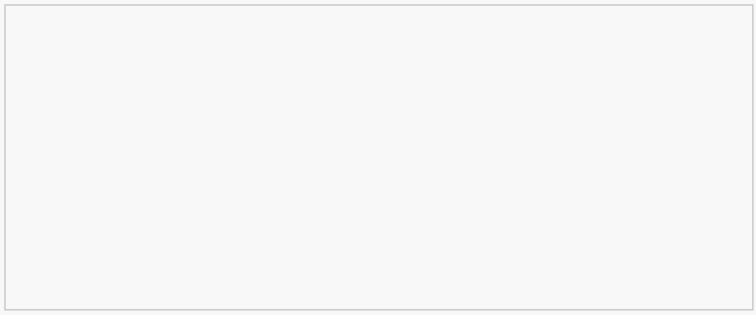
AMERICAN OVERSIGHT

It took two years for Florida officials to be briefed on **breaches into two county election systems**. Winter Park Democrat **Stephanie Murphy** is among those outraged Florida officials to demand more transparency from the FBI and the federal government.

Late last week, the **Trump administration released guidelines** for when it would notify the public of election interference. Murphy tweaked the administration for the slow response, but was grateful they took action.

Stephanie Murphy is grateful for the Trump administration's guidelines over election interference, despite it taking more than two years.

"I'm pleased the Trump administration has finally recognized how important public notification is to the integrity and credibility of our elections and established a framework for when and how notification should occur," Murphy said in a statement.



In a Sept. 3 op-ed for The Washington Post, Murphy **has called for increased transparency** in the event of interference by a foreign adversary. She joined with St. Augustine Republican **Mike Waltz** to introduce the **ALERTS Act** that would require notification to appropriate members of Congress and relevant state and local officials when an election system is breached, and voter information may have been compromised.

"While this belated step moves us in the right direction, I will continue to push for passage of the ALERTS Act because I believe Congress should establish a clear and consistent standard for notification and not leave this decision to the sole discretion of the executive branch," Murphy added.

AMERICAN OVERSIGHT

FLOOD INSURANCE HIKE HALTED

Floridians are concerned with a possible significant increase in their flood insurance premiums following the stream of natural disasters in recent history. However, thanks to political pressure from members of Congress, including Reps. **Charlie Crist,** Mucarsel-Powell and **Francis Rooney**, they will have a year of reprieve before they face those challenges.

Charlie Crist, Debbie Mucarsel-Powell and Francis Rooney were among the delegation members who helped get a reprieve for flood insurance premium hikes.

Action taken by the Federal Emergency Management Agency (FEMA) delayed the proposed rate calculation changes from the National Flood Insurance Program (NFIP) from Oct. 1, 2020, to Oct. 1, 2021. The decision came after the members led more than 60 of their colleagues **in a letter supporting a delay in Risk Rating 2.0** as part of changes necessary to a long-term reauthorization of the National Flood Insurance Program.

"We're encouraged that FEMA is listening to Congress' concerns about the impacts of Risk Rating 2.0. FEMA's promise to protect policyholders and minimize any unintentional negative effects in the transition is vital to ensuring the NFIP remains successful," the group said. "We hope FEMA will more actively engage with Congress to ensure transparency around the fundamental changes they have proposed."

The planned change to the method in which NFIP charges policyholders is meant to get the program out of its multibillion-dollar debts and help the country adapt to the growing risk of climate change.

No state would face a more considerable financial impact than Florida, where 35% of the program's policies are written. The agency initially planned to release its new rate structure in April 2020.

AMERICAN OVERSIGHT

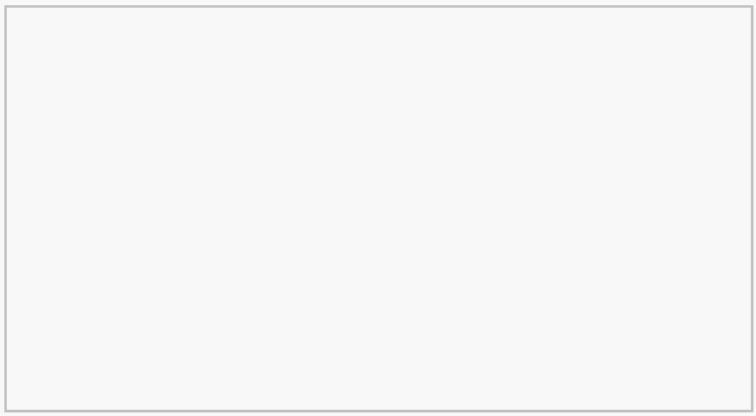
CD 19 FIELD GROWS

The campaign to succeed retiring Rep. Rooney is picking up steam. Some are deciding against a run for the Florida's 19th Congressional District seat, while some are making their run official.

Jumping in was Cape Coral Republican **Dane Eagle**. The current Florida House Majority Leader announced late last week and raised $100,000 during the first 24 hours. Naples Urologist Dr. **William Figlesthaler** opened a campaign account, the first step in getting into the race.

Florida House Majority Leader Dane Eagle throws his hat in the ring for CD 19.

While Eagle was likely pleased, State Sen. **Lizbeth Benacquisto** and Lee County Commissioner **Cecil Pendergrass** **decided against running**, as did **Commissioner Brian Hamman**, locally-known state Reps. **Heather Fitzenhagen** of Ft. Myers and **Bob Rommel** of Naples are leaving the door open.



A survey taken shortly after Rooney's announcement should give Eagle some encouragement. The study conducted by **St. Pete Polls** put Benacquisto in the lead, followed by former state Rep. **Matt Caldwell**, with Eagle in third. Caldwell has not expressed any interest in running.

More Republicans will weigh whether to join the race, if not a Democrat or two, but the winner of the GOP primary in the solidly red district will most likely be headed to Washington in January 2021.

AMERICAN OVERSIGHT

WASSERMAN SCHULTZ SEEKS CHAIRMANSHIP

A rumored interest by Rep. **Debbie Wasserman Schultz** to seek a top leadership position is becoming more transparent. The Weston Democrat is reportedly **seeking to become chair** of the House Appropriations Committee for the 117th Congress.

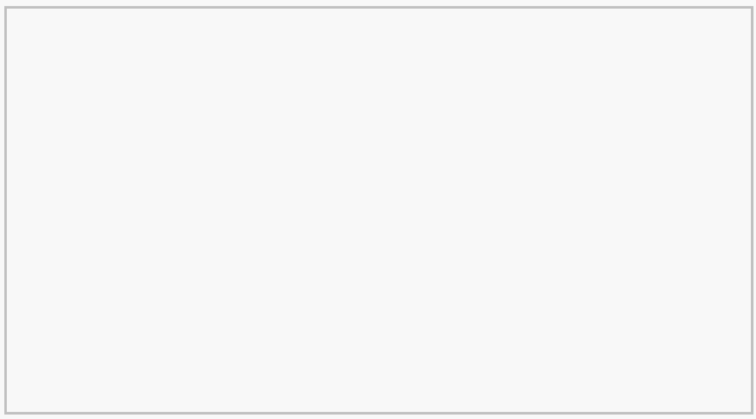
It's clear Debbie Wasserman Schultz is jockeying for a top leadership post.

The position is open due to the **pending retirement** of the current chair, 32-year veteran Rep. **Nita Lowey** of New York. Assuming Democrats retain control of the House, Wasserman Schultz would need to leap over a number of more senior Democrats.

Among those: Rep. **Marcy Kaptur** of Ohio, the longest-serving woman in the House, and Rep. **Rosa DeLauro** of Connecticut. Kaptur, 73, and DeLauro, 76, have both indicated they would seek the post.

Wasserman Schultz does have some backing within the delegation. One committee Democrat with more seniority, Rep. **Peter Visclosky** of Indiana, is also retiring.

"I'm excited that she's making a bid for Appropriations chair," said Soto of Kissimmee. "She has over 10 years of experience and is a very savvy and hardworking member of Congress, one of the hardest working members of Congress."



Wasserman Schultz currently chairs the appropriations subcommittee that oversees military construction. Only one Floridian, the late Republican Rep. **Bill Young**, has previously led the committee.

AMERICAN OVERSIGHT

FARM WORKFORCE LEGISLATION PROPOSED

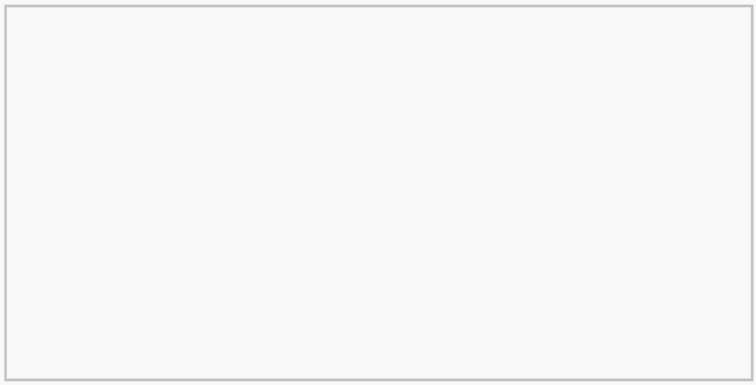
Farmers and ranchers across the United States are in desperate need of a high-quality, reliable workforce, and the current H-2A, guest worker program, requires meaningful, bipartisan reform. To help address the situation, Miami Republican **Mario Diaz-Balart** has joined with a bipartisan group of colleagues to introduce the **Farm Workforce Modernization Act** of 2019.

The bill establishes a program for agricultural workers in the United States to earn legal status through continued agricultural employment and contribution to the U.S. agricultural economy. It follows months of negotiations also creates a first-of-its-kind, merit-based visa program specifically designed for the nation's agricultural sector.

Mario Diaz-Balart has joined the bipartisan effort to fill the need for a high-quality, reliable workforce by way of a guest worker program.

"The success of our farmers, growers, and producers is essential not only for our economy but for our national security. For far too long, we've suffered from a broken H2A visa system — making it difficult for farmers to hire the workforce necessary to provide to the American people," said Diaz-Balart.

If enacted, agricultural employers would be required to use the E-Verify system to guarantee the eligibility of workers. It would also ensure the due process of those rejected.



The bill is sponsored by California Democrat **Zoe Lofgren**, with 46 co-sponsors. Those include, in addition to Diaz-Balart, Rep. Lawson of Tallahassee.

AMERICAN OVERSIGHT

KENNEDY SPACE CENTER HONORED

Purple Hearts are awarded to those in the military who were wounded and/or killed in action. Another type of Purple Heart is awarded to those recognized as supportive of veterans.

Last week, the Military Order of the Purple Heart **honored the Kennedy Space Center** (KSC) or their demonstrated record of supporting veterans. The recognition was presented during a ceremony at the KSC auditorium in Cape Canaveral.

The Kennedy Space Center wins a Purple Heart for its support of veterans.

"Usually when veterans get out, they want to be away from any kind of government service," said **Christopher Vedvick**, Commander, Department of Florida Military Order of the Purple Heart. "Here at Kennedy, they've embraced that ... they have their own group of veterans who really make up the fabric of what we felt to be Kennedy Space Center."

Kennedy is being recognized as a Purple Heart Entity for the support of veterans through employment opportunities and services provided to veterans by the center's veterans employee resource group. More than 300 veterans are employed at KSC.

"Veterans will continue to play a vital role in securing the legacy of America's space program," said KSC Associate Director **Kelvin Manning**. "We would not be successful without our veteran contributions. Service goes beyond the uniform. This Veterans Day, we honor the men and women who have worn the uniform and continue to serve our country."

AMERICAN OVERSIGHT

ON THIS DAY

Nov. 12, 2018 — As the recount in Broward County continued, Gov. Scott and Attorney General **Pam Bondi** demanded an investigation amid claims of voter fraud. Circuit Judge **Jack Tuter** rejected Scott's call to impound Broward voting machines.

Scott has seen his election night lead over Democratic Sen. **Bill Nelson** dwindle from 57,000 votes to 12,500, while in the Governor's race, a 77,000-vote lead for former Rep. **Ron DeSantis** over Tallahassee Mayor **Andrew Gillum** has dropped to nearly 34,000 votes. Scott has called for an investigation by the Florida Department of Law Enforcement but has not forwarded a formal, written request.

Nov. 12, 2007 — House Democrats ignored a White House veto threat and passed legislation that would require the government to negotiate lower prices for Medicare's prescription drug program. President **George W. Bush** has vowed to veto the bill if it clears the Senate.

Speaker Pelosi called the vote "a resounding victory for America's seniors over the special interests." The measure passed by a vote of 255-170 with 24 Republicans joining with Democrats, including **Vern Buchanan** from Sarasota and **Jeff Miller** from Pensacola.

Subject: Department of Legal Affairs and Attorney General Proposed Budget Amendment EOG Log# B0348

To All Legislative Members: This request is pending approval by the Executive Office of the Governor and is now in Legislative Consultation. It will be implemented at the end of the consultation period on 2/26/2020 if no formal objection is filed, pursuant to Chapter 216.177 F.S.

Budget Amendment Request #:	B0348
Requested by:	Department of Legal Affairs and Attorney General

Problem Statement:

The Office of the Attorney General requires $240,500 in nonoperating authority to cover transfers to the administrative trust fund for general administrative costs such as information technology refreshes, human resources services, finance and accounting services etc. These costs were under estimated at the beginning of the fiscal year for the

AMERICAN OVERSIGHT

Medicaid Fraud Control Unit, Lemon Law, Florida Elections Commission and the Florida Crime Prevention Institute.

Agency Request:

The Office of the Attorney General requires $240,500 in nonoperating authority to cover transfers to the administrative trust fund for general administrative costs such as information technology refreshes, human resources services, finance and accounting services etc.

Additional authority is needed as follows:

Victim Services

Transfer to Administrative Trust Fund
- Florida Crime Prevention Training

AMERICAN OVERSIGHT

Institute Trust Fund - 70,000

Florida Elections Commission

Transfer to Administrative Trust Fund - Elections Commission Trust Fund - 1,500

Criminal and Civil Litigation

Transfer to Administrative Trust Fund - Motor Vehicle Warranty Trust Fund - 136,000

Transfer to Administrative Trust Fund - Federal Grants Trust Fund - 33,000

Agency Contact: Sarah Nortelus
(850)414-3414

Subject: Devil in Divorce – Politics of Florida Permanent Alimony

Devil in Divorce – Politics of Florida Permanent Alimony

To: Governor DeSantis, and ALL Republican Members of the Florida Senate and House of Representatives:

I am hoping, on behalf of the Florida Republican Party, that you have made the wise decision to distance yourself from the former Mrs. Florida, Karyn Turk, who is headed to prison for stealing her elderly mother's Social Security checks. See the article below:

https://www.palmbeachpost.com/news/20200109/former-mrs-florida-headed-to-prison-for-stealing-elderly-momrsquos-ssi-checks?template=ampart

Karyn Turk recently aired a video on YouTube entitled *Devil in Divorce –Alimony Reform*, where she interviewed Florida attorney Alan Elkins. During the interview, she comments on her excitement over the support of Governor DeSantis regarding alimony reform. She seems as embedded with the Republican Party as she is fixated on stealing from underdogs, such as her mother and the recipients of alimony.

Is this who our Florida Republican lawmakers want to be associated with, someone of such deplorable character, self-absorption and narcissism? If so, you are willing to associate with a devil who reaches far beyond the politics of permanent alimony or any other covetous topic. You are also willing to lose your future female votes.

AMERICAN OVERSIGHT

With the inevitable blue-state exodus increasing in momentum, states such as Florida and Texas cannot take the chance of losing their female Republican Vote. Association with people like Karyn Turk and her selfish personal agenda will cause the Republican Party to lose female support. The Republican Party does not need to lose female voters since we are a major swing state that determines national level elections. So, if you truly value your party, you will dismiss Ms. Karyn Turk and any ideology spewing from her muzzle, and put the real, everyday women of Florida first. It would be in Florida's best interest if Governor DeSantis did not embrace any of Karyn Turk's twisted ideology in any way.

Respectfully,

Kristina Gabriel

AMERICAN OVERSIGHT

POLICY ANALYSIS

1. EXECUTIVE SUMMARY

Prohibiting the purchase or possession of less than a certain amount of specified substances; authorizing a court to impose a sentence other than a mandatory minimum term of imprisonment and mandatory fine for a person convicted of trafficking if the court makes certain findings on the record; requiring that a custodial interrogation conducted at a place of detention in connection with certain offenses be electronically recorded in its entirety; providing exceptions to the electronic recording requirement; revising the circumstances under which a wrongfully incarcerated person is eligible for compensation, etc.

2. SUBSTANTIVE BILL ANALYSIS

1. **PRESENT SITUATION:** Currently, s. 893.13 F.S., provides mandatory sentences of trafficking hydrocodone, oxycodone, fentanyl and fentanyl derivatives and other controlled substances. Presently, law enforcement officers are permitted to detain and interrogate individuals suspected of the covered offenses listed in SB346 without restriction. At this time, s. 961.04 F.S., provides eligibility and ineligibility conditions for compensation for wrongful incarceration.

2. **EFFECT OF THE BILL:** Section 1, lines 45-50: Creates s. 893.13(10), F.S., specifying a person who purchases or possesses less than two grams of a controlled substance, excluding fentanyl, may not be imprisoned for longer than 12 months. Section 2, lines 57-79: Amends ss. 893.135(6-7), F.S., specifying a court may impose a sentence other than the mandatory minimum imprisonment for a violation that fits listed circumstances (lines 62-79); creating new exclusion listed for offenses that carry a mandatory minimum of 25 years imprisonment (lines 81-83). Section 3, lines 86-163: Creates s. 900.06 F.S., regarding recording of custodial interrogations for certain offenses. Section 4, lines 184-202: Amends ss. 961.04(1-5), F.S., removing ineligibility conditions for wrongfully incarcerated compensation. Section 5, lines 267-274: Amends s. 893.03(3), F.S., concerning standards and scheduling of Schedule III controlled substances

3. DOES THE LEGISLATION DIRECT OR ALLOW THE AGENCY/BOARD/COMMISSION/DEPARTMENT TO DEVELOP, ADOPT, OR ELIMINATE RULES, REGULATIONS, POLICIES OR PROCEDURES? Y ☐ N ☐

If yes, explain:	
What is the expected impact to the agency's core mission?	**Y ☐ N ☐**
Rule(s) impacted (provide references to F.A.C., etc.):	

4. WHAT IS THE POSITION OF AFFECTED CITIZENS OR STAKEHOLDER GROUPS?

List any known proponents and opponents:	
Provide a summary of the proponents' and opponents' positions:	

5. ARE THERE ANY REPORTS OR STUDIES REQUIRED BY THIS BILL? Y ☐ N ☒

If yes, provide a description:	
Date Due:	
Bill Section Number:	

AMERICAN OVERSIGHT

6. ARE THERE ANY NEW GUBERNATORIAL APPOINTMENTS OR CHANGES TO EXISTING BOARDS, TASK FORCES, COUNCILS, COMMISSION, ETC. REQURIED BY THIS BILL? Y ☐ N ☒

Board:	
Board Purpose:	
Who Appointments:	
Appointee Term:	
Changes:	
Bill Section Number(s):	

FISCAL ANALYSIS

1. DOES THE BILL HAVE A FISCAL IMPACT TO LOCAL GOVERNMENT? Y ☐ N ☒

Revenues:	
Expenditures:	For small departments with limited manpower and those with limited technological resources, this requirement could be burdensome to the point where the effectiveness of interviews is impacted by delay as additional witnesses and/or recording equipment is brought to bear.
Does the legislation increase local taxes or fees?	
If yes, does the legislation provide for a local referendum or local governing body public vote prior to implementation of the tax or fee increase?	

2. DOES THE BILL HAVE A FISCAL IMPACT TO STATE GOVERNMENT? Y ☐ N ☒

Revenues:	
Expenditures:	
Does the legislation contain a State Government appropriation?	
If yes, was this appropriated last year?	

3. DOES THE BILL HAVE A FISCAL IMPACT TO THE PRIVATE SECTOR? Y ☐ N ☒

Revenues:	
Expenditures:	
Other:	

AMERICAN OVERSIGHT

4. DOES THE BILL INCREASE OR DECREASE TAXES, FEES, OR FINES? Y ☐ N ☒

Does the bill increase taxes, fees or fines?	
Does the bill decrease taxes, fees or fines?	
What is the impact of the increase or decrease?	
Bill Section Number:	

TECHNOLOGY IMPACT

1. DOES THE LEGISLATION IMPACTTHE AGENCY'S TECHNOLOGY SYSTEMS (I.E., IT SUPPORT, LICENSING, SOFTWARE, DATA STORAGE, ETC.)? Y ☐ N ☒

If yes, describe the anticipated impact to the agency including any fiscal impact.	

FEDERAL IMPACT

1. DOES THE LEGISLATION HAVE A FEDERAL IMPACT (I.E., FEDERAL COMPLIANCE, FEDERAL FUNDING, FEDERAL AGECY INVOLVEMENT, ETC.)? Y ☒ N ☐

If yes, describe the anticipated impact including any fiscal impact.	Many agencies, the FBI being the preeminent, have policies that discourage/forbid recording in many circumstances contemplated by this bill. Collaboration with those agencies would be complicated if this bill were to become law.

LEGAL - GENERAL COUNSEL'S OFFICE REVIEW

Issues/concerns/comments and recommended action:	• Section 3 (2)(c) requires a law enforcement officer who conducts a custodial interrogation outside of a place of detention to prepare a written report documenting why the officer did not comply with the requirements of section 3 (2)(a), yet section 3 (2)(a) only applies to custodial interrogations *at a place of detention*. This effectively eliminates the locus requirement. • Section 3 (3) requires courts to consider the failure to record custodial statements a factor to consider regarding admissibility. The test for admissibility under s. 90.403, F.S., is that "relevant evidence is inadmissible if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of issues, misleading the jury, or needless presentation of cumulative evidence." The standard provided in section (3) conflicts with s. 90.403, F.S., and could lead to a wide, unpredictable array of judicial determinations in admissibility.

ADDITIONAL COMMENTS

- SB346 proposes a penalty of imprisonment for no more than 12 months for possessing or purchasing less than two grams of a controlled substance; lines 44-50 exclude fentanyl from this change. If the intent is to exclude not just fentanyl, but all derivatives of fentanyl as the labs commonly see in submissions, it is suggested to use the following wording instead:

  Lines 44-50: "893.13 Prohibited acts; penalties.—
  (10) Notwithstanding any provision of this section or any other law relating to the punishment for purchasing or possessing a controlled substance, a person who purchases or possesses less than 2 grams of a controlled substance, other than Alfentanil, as described in s. 893.03(2)(b)1., Carfentanil, as described in s. 893.03(2)(b)6., Fentanyl, as described in s. 893.03(2)(b)9., Sufentanil, as described in s. 893.03(2)(b)30., or a fentanyl derivative, as described in s. 893.03(1)(a)62., may not be imprisoned for a term longer than 12 months."

AMERICAN OVERSIGHT

- Although not a direct conflict, the two gram threshold for a first degree misdemeanor appears to create inconsistency with the intent of s. 893.135(1)(c)1., F.S., relative to “Trafficking in Illegal Drugs”, with the threshold amount set at 4 grams, and the designation as a first degree felony. With respect to the proposed legislation, a difference of two grams results in an increase of three degrees of severity. Cocaine, which continues to be a problem in Florida with a recent rise in overdose deaths (2017), could be viewed similarly. Two grams of cocaine hydrochloride (powder) is multiple dosages and two grams of crack cocaine, an especially addictive form of cocaine, could be divided into many “rocks” typically weighing about 0.1 gram to 0.2 gram.

- Poly-substance abuse, the practice of ingesting multiple drugs is of great concern with regard to drug overdoses and deaths. The results of forensic chemistry testing upon drug seizures often involves two, three or even four substances, each with their own properties and effects, but unknown effects on the physiological and psychological well-being of the user. The effect of the proposed legislation reduces the penalty risk to possessors (buyers and sellers) of poly-substances. A person was in possession of multiple illegal drugs, each substance below two grams would likely result in multiple first degree misdemeanors and likely combined at sentencing to result in one less than 12 month penalty.

- Criminal history background checks are required across many employment sectors and licensing authorities. Employers and licensing regulators are primarily concerned about felony convictions, and often felony drug convictions. As proposed, the language of the bill would potentially obscure the seriousness of the illegal activities of a perspective employer or licensing authority creating a false security for employers or licensing authorities concerned with the effects of illegal drugs on an applicant.

- In s. 900.06(2)(d)2, F.S., (Line 144-146) the proposed legislation provides that the requirement does not apply “if a suspect refuses to participate in a custodial interrogation if his or her statements are to be electronically recorded.” Although not specifically articulated within the proposed legislation, this language implies that a suspect would be made aware that his or her custodial interrogation would be recorded. It is commonly known among law enforcement professionals that suspects are less inclined to provide a true statement when faced with the knowledge that their statement is being recorded.

Zach --

Here is our first pass comments to the draft bill. When is a good time to call you tomorrow? We were thinking splitting some of this up.

Lena

AMERICAN OVERSIGHT

24-00656A-20

A bill to be entitled

An act relating to electric vehicles; amending s. 316.003, F.S.; revising the definition of the terms "autocycle" and "personal delivery device"; creating s. 339.286, F.S.; requiring the Department of Transportation to create the Electric-Vehicle Infrastructure Grant Program; providing the purposes of the program; providing for the distribution of grants to certain entities to install electric-vehicle charging infrastructure; providing grant requirements; providing requirements for equipment installed using grant funds; providing criteria for the distribution of grants; amending s. 366.94, F.S.; prohibiting state agencies that implement certain rules from requiring specific methods of sale for electric vehicle charging equipment used in this state; requiring the Florida Public Service Commission to direct all public utilities to file for approval and implement approved rate designs to accommodate and optimize electric vehicle charging activities, subject to certain requirements; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Subsections (2) and (55) of section 316.003, Florida Statutes, is amended to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

otherwise requires:

(2) AUTOCYCLE.—A three-wheeled motorcycle that has two wheels in the front and one wheel in the back; is equipped with a roll cage or roll hoops, a seat belt for each occupant, brakes meeting the Federal Motor Vehicle Safety Standard 122, a steering mechanism, and seating that does not require the operator to straddle or sit astride it; and is manufactured in accordance with the applicable federal motorcycle safety standards in 49 C.F.R. part 571 by a manufacturer registered with the National Highway Traffic Safety Administration.

(55) PERSONAL DELIVERY DEVICE.—An electrically powered device that:

(a) Is operated on sidewalks and crosswalks and intended primarily for transporting property;

(b) Weighs less than 120 ~~80~~ pounds or, if the Department of Transportation establishes by rule a maximum weight, has a weight that does not exceed that maximum, excluding cargo;

(c) Has a maximum speed of 10 miles per hour or, if the Department of Transportation establishes by rule a maximum speed, has a speed that does not exceed that maximum; and

(d) Is equipped with technology to allow for operation of the device with or without the active control or monitoring of a natural person.

A personal delivery device is not considered a vehicle unless expressly defined by law as a vehicle. A mobile carrier is not considered a personal delivery device.

Section 2. Paragraph (c) of subsection (4) of section 334.046, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003290

334.046 Department mission, goals, and objectives.—

(4) At a minimum, the department's goals shall address the following prevailing principles.

(c) *Mobility.*—Ensuring a cost-effective, statewide, interconnected transportation system. Improvement of travel choices to ensure mobility includes planning and establishment of infrastructure for innovative technologies, including electric vehicle charging infrastructure.

Section 3. Section 339.286, Florida Statutes, is created to read:

339.286 Electric Vehicle Infrastructure Grant Program.—

(1) The department shall establish the Electric-Vehicle Infrastructure Grant Program. The purpose of the program is to provide financial assistance to encourage the installation of electric vehicle charging infrastructure.

(2) State agencies, public universities, public transit agencies, ports, airports, and local governments, including local housing authorities and libraries, may apply to the department for grants for the purpose of installing electric vehicle charging infrastructure.

(3) A grant may be awarded for:

1. Technical assistance for the creation and adoption of a local or regional plan that establishes an electric vehicle charging infrastructure and the necessary action plans to address any infrastructure gaps and steps to complete the infrastructure plan. A plan must address actions to deploy the necessary infrastructure in high-density housing areas and low- to moderate-income areas.

2. Assistance with the purchase of related equipment and

Commented [DS1]: Recommend that the entity need not locate charging stations on public property, but may be located on private property for public use in the same county or local jurisdiction as the applying entity.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003291

the costs of installation of that equipment to provide electric vehicle charging. Such equipment must be capable of collecting and reporting data and must use standard connectors.

(4)(a) An applicant may apply for a grant for both technical assistance and equipment purchase and installation. A grant for technical assistance requires a minimum match of funds from the applicant of 30 percent of the grant award, but such match is not required for an applicant that is located in a fiscally constrained county. A grant for equipment purchase and installation requires a minimum match of funds from the applicant of 50 percent of the grant award, or 20 percent for an applicant that is located in a fiscally constrained county. The matching funds must be from nonstate resources, but may include private funds provided through a partnership with a private entity or in-kind contributions such as the donation of equipment, services, or land or use of land for establishment of the electric vehicle charging infrastructure. Grant funds may not subsidize the cost for the use of electricity.

(b) The department shall maintain a prioritized list of approved grant applications. The prioritized list must include recommended funding levels for each application and, if staged implementation is appropriate, provide funding requirements for each stage. Grants must be prioritized based on the extent to which the activities of the grant will encourage growth in the use of electric vehicles and increase the availability of charging locations along evacuation routes. A grant for equipment purchase and installation that will immediately and most effectively serve those who currently own or operate electric vehicles may receive priority.

Commented [DS2]: Publicly available as well.

Commented [DS3]: Recommend that the match of Level 2 and DC Fast Charging be separated out. 50% for Level 2 and 20% for DC Fast. The cost structures for these are very different. At 50% cost share, this program would have limited interest from DCFC deployments.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003292

(5) The department must continually review emerging research, policies, and standards related to electric vehicle infrastructure. Using such information, the department must publish best practices for the establishment of electric vehicle charging infrastructure, model infrastructure plan development and components, and other significant information for the implementation and use of electric vehicle charging infrastructure. The department may develop a model plan that local governments may use as a guide to establish an electric vehicle charging infrastructure plan.

(6) The department shall adopt rules to administer this section.

Section 4. Contingent upon the enactment of Senate Bill XXXX (EV FEES) or other similar legislation enacted in the 2020 Regular Session or an extension thereof, section 339.0802, Florida Statutes, is created to read:

339.0802 .—Allocation of increased revenues derived from amendments to s. 320.0801 by this act.—Funds that result from increased revenues to the State Transportation Trust Fund derived from the amendments to s. 320.0801 made by this act must be used as set forth in this section, notwithstanding any other provision of law.

Commented [DS4]: Is this a separate bill for EV fees?

(1) Beginning in the 2020-2021 Fiscal Year and annually for 5 years thereafter, all increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(2) Beginning in the 2025-2025 Fiscal Year and annually for 5 years thereafter, half of the increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(3) This section expires on July 1, 2030.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003293

CONSIDERATION - I think you need to get a revenue estimate, and do a set amount (or file this as is, get the REC estimate, and then amend accordingly). I think it'll be hard (maybe?) for the department to know how much revenue they are going to get in a year and fund projects. If you do set amounts, then we'd do a subsection (3) and throw the remainder of increased revenues into the work program or whatever.

Commented [DS5]: I agree that the department will likely need a 1-year lead on collected revenues to know how much they are spending each year. Otherwise, has to be a set amount that is recouped in fees after the fact. Or projected from the year prior DOT registration data.

Section 5. Paragraph (c) of subsection (7) of section 339.175, Florida Statutes, is amended to read:

339.175 Metropolitan planning organization.—

(7) LONG-RANGE TRANSPORTATION PLAN.—Each M.P.O. must develop a long-range transportation plan that addresses at least a 20-year planning horizon. The plan must include both long-range and short-range strategies and must comply with all other state and federal requirements. The prevailing principles to be considered in the long-range transportation plan are: preserving the existing transportation infrastructure; enhancing Florida's economic competitiveness; and improving travel choices to ensure mobility. The long-range transportation plan must be consistent, to the maximum extent feasible, with future land use elements and the goals, objectives, and policies of the approved local government comprehensive plans of the units of local government located within the jurisdiction of the M.P.O. Each M.P.O. is encouraged to consider strategies that integrate transportation and land use planning to provide for sustainable development and reduce greenhouse gas emissions. The approved long-range transportation plan must be considered by local governments in the development of the transportation elements in local

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003294

government comprehensive plans and any amendments thereto. The long-range transportation plan must, at a minimum:

(c) Assess capital investment and other measures necessary to:

1. Ensure the preservation of the existing metropolitan transportation system including requirements for the operation, resurfacing, restoration, and rehabilitation of major roadways and requirements for the operation, maintenance, modernization, and rehabilitation of public transportation facilities; and

2. Make the most efficient use of existing transportation facilities to relieve vehicular congestion, improve safety, and maximize the mobility of people and goods. Such efforts must include, but are not limited to, consideration of infrastructure and technological improvements necessary to accommodate advances in vehicle technology, such as automated driving systems, electric vehicles and electric vehicle charging stations, and other developments.

In the development of its long-range transportation plan, each M.P.O. must provide the public, affected public agencies, representatives of transportation agency employees, freight shippers, providers of freight transportation services, private providers of transportation, representatives of users of public transit, and other interested parties with a reasonable opportunity to comment on the long-range transportation plan. The long-range transportation plan must be approved by the M.P.O.

Section 6. Paragraph (c) of subsection (3) of section 339.64, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003295

339.64 Strategic Intermodal System Plan.—

(3)

(c) The department shall coordinate with federal, regional, and local partners, as well as industry representatives, to consider infrastructure and technological improvements necessary to accommodate advances in vehicle technology, such as automated driving systems, electric vehicles and electric vehicle charging stations, and other developments, in Strategic Intermodal System facilities.

Section 7. Section 366.94, Florida Statutes, is amended to read:

366.94 Electric vehicle charging stations.—

(1) The provision of electric vehicle charging to the public by a nonutility is not the retail sale of electricity for the purposes of this chapter. The rates, terms, and conditions of electric vehicle charging services by a nonutility are not subject to regulation under this chapter. This section does not affect the ability of individuals, businesses, or governmental entities to acquire, install, or use an electric vehicle charger for their own vehicles.

(2) The Department of Agriculture and Consumer Services shall adopt rules to provide definitions, methods of sale, labeling requirements, and price-posting requirements for electric vehicle charging stations to allow for consistency for consumers and the industry. Rules implemented under this subsection may not require specific methods of sale for electric vehicle charging equipment used in this state.

(3)(a) It is unlawful for a person to stop, stand, or park a vehicle that is not capable of using an electrical recharging

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003296

station within any parking space specifically designated for charging an electric vehicle.

(b) If a law enforcement officer or specialist finds a motor vehicle in violation of this subsection, the officer or specialist shall charge the operator or other person in charge of the vehicle in violation with a noncriminal traffic infraction, punishable as provided in s. 316.008(4) or s. 318.18.

(4) The commission shall direct all public utilities to file for approval of rate designs, and to implement approved rate designs, to accommodate and optimize electric vehicle charging activities. Rates filed under this subsection must be submitted to the commission by October 1, 2020, and approved rates must remain in effect for at least 5 years. Rates that must be approved and implemented under this subsection include, but are not limited to, both of the following:

(a) Revisions to capacity or demand charges for publicly available, privately operated high-powered charging.

(b) Time-of-use rates for residential charging activities to encourage off-peak charging activities.

Section 8. The Division of Law Revision is directed to replace the phase "this act" wherever it occurs in this act with the chapter law number.

Section 9. Except as otherwise expressly provided, this act shall take effect July 1, 2020.

Attached is the draft bill. Cindy in my office is going to request a meeting next week on this topic. Thanks. Carol

AMERICAN OVERSIGHT

A bill to be entitled

An act relating to voting systems; amending s. 97.021, F.S.; defining the term "automatic tabulating equipment" for purposes of the Florida Election Code; amending s. 101.5614, F.S.; revising procedures governing the canvassing of returns to specify usage of a voting system's automatic tabulating equipment; amending s. 102.141, F.S.; specifying the circumstances under which ballots must be processed through automatic tabulating equipment in a recount; amending s. 102.166, F.S.; specifying the manner by which a manual recount may be conducted; revising requirements for hardware or software used in a manual recount; authorizing overvotes and undervotes to be identified and sorted physically or digitally in a manual recount; revising minimum requirements for Department of State rules to require procedures regarding the certification and use of automatic tabulating equipment for manual recounts; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Present subsections (5) through (46) of section 97.021, Florida Statutes, are renumbered as subsections (6)

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003299

through (47), respectively, and a new subsection (5) is added to that section, to read:

97.021 Definitions.—For the purposes of this code, except where the context clearly indicates otherwise, the term:

(5) "Automatic tabulating equipment" means an apparatus that automatically examines, counts, and records votes.

Section 2. Paragraph (a) of subsection (4) and subsections (6) and (7) of section 101.5614, Florida Statutes, are amended to read:

101.5614 Canvass of returns.—

(4)(a) If any vote-by-mail ballot is physically damaged so that it cannot properly be counted by the voting system's automatic tabulating equipment, a true duplicate copy shall be made of the damaged ballot in the presence of witnesses and substituted for the damaged ballot. Likewise, a duplicate ballot shall be made of a vote-by-mail ballot containing an overvoted race or a marked vote-by-mail ballot in which every race is undervoted which shall include all valid votes as determined by the canvassing board based on rules adopted by the division pursuant to s. 102.166(4). Upon request, a physically present candidate, a political party official, a political committee official, or an authorized designee thereof, must be allowed to observe the duplication of ballots. All duplicate ballots shall be clearly labeled "duplicate," bear a serial number which shall be recorded on the defective ballot, and be counted in lieu of

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003300

the defective ballot. After a ballot has been duplicated, the defective ballot shall be placed in an envelope provided for that purpose, and the duplicate ballot shall be tallied with the other ballots for that precinct.

(6) Vote-by-mail ballots may be counted by the voting system's automatic tabulating equipment if they have been marked in a manner which will enable them to be properly counted by such equipment.

(7) The return printed by the voting system's automatic tabulating equipment, to which has been added the return of write-in, vote-by-mail, and manually counted votes and votes from provisional ballots, shall constitute the official return of the election upon certification by the canvassing board. Upon completion of the count, the returns shall be open to the public. A copy of the returns may be posted at the central counting place or at the office of the supervisor of elections in lieu of the posting of returns at individual precincts.

Section 3. Paragraph (a) of subsection (7) of section 102.141, Florida Statutes, is amended to read:

102.141 County canvassing board; duties.—

(7) If the unofficial returns reflect that a candidate for any office was defeated or eliminated by one-half of a percent or less of the votes cast for such office, that a candidate for retention to a judicial office was retained or not retained by one-half of a percent or less of the votes cast on the question

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003301

of retention, or that a measure appearing on the ballot was approved or rejected by one-half of a percent or less of the votes cast on such measure, a recount shall be ordered of the votes cast with respect to such office or measure. The Secretary of State is responsible for ordering recounts in federal, state, and multicounty races. The county canvassing board or the local board responsible for certifying the election is responsible for ordering recounts in all other races. A recount need not be ordered with respect to the returns for any office, however, if the candidate or candidates defeated or eliminated from contention for such office by one-half of a percent or less of the votes cast for such office request in writing that a recount not be made.

(a) Each canvassing board responsible for conducting a recount shall put each marksense ballot through automatic tabulating equipment and determine whether the returns correctly reflect the votes cast. If any marksense ballot is physically damaged so that it cannot be properly counted by the automatic tabulating equipment during the recount, a true duplicate shall be made of the damaged ballot pursuant to the procedures in s. 101.5614(4). Immediately before the start of the recount, a test of the tabulating equipment shall be conducted as provided in s. 101.5612. If the test indicates no error, the recount tabulation of the ballots cast shall be presumed correct and such votes shall be canvassed accordingly. If an error is detected, the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003302

cause therefor shall be ascertained and corrected and the recount repeated, as necessary. The canvassing board shall immediately report the error, along with the cause of the error and the corrective measures being taken, to the Department of State. No later than 11 days after the election, the canvassing board shall file a separate incident report with the Department of State, detailing the resolution of the matter and identifying any measures that will avoid a future recurrence of the error. If the automatic tabulating equipment used in a recount is not part of the voting system and the ballots have already been processed through such equipment, the canvassing board is not required to put each ballot through any automatic tabulating equipment again.

Section 4. Subsections (1), (2), and (5) of section 102.166, Florida Statutes, are amended to read:

102.166 Manual recounts of overvotes and undervotes.—

(1) If the second set of unofficial returns pursuant to s. 102.141 indicates that a candidate for any office was defeated or eliminated by one-quarter of a percent or less of the votes cast for such office, that a candidate for retention to a judicial office was retained or not retained by one-quarter of a percent or less of the votes cast on the question of retention, or that a measure appearing on the ballot was approved or rejected by one-quarter of a percent or less of the votes cast on such measure, a manual recount of the overvotes and

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003303

undervotes cast in the entire geographic jurisdiction of such office or ballot measure shall be ordered unless:

(a) The candidate or candidates defeated or eliminated from contention by one-quarter of 1 percent or fewer of the votes cast for such office request in writing that a recount not be made; or

(b) The number of overvotes and undervotes is fewer than the number of votes needed to change the outcome of the election.

The Secretary of State is responsible for ordering a manual recount for federal, state, and multicounty races. The county canvassing board or local board responsible for certifying the election is responsible for ordering a manual recount for all other races. A manual recount consists of a recount of marksense ballots or of digital images of those ballots by a person.

(2) Any hardware or software used to identify and sort overvotes and undervotes for a given race or ballot measure must be certified by the Department of State ~~as part of the voting system pursuant to s. 101.015~~. Any such hardware or software must be capable of simultaneously identifying and sorting overvotes and undervotes in multiple races while simultaneously counting votes. Overvotes and undervotes must be identified and sorted while recounting ballots pursuant to s. 102.141. Overvotes and undervotes may be identified and sorted physically

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003304

or digitally.

(5) Procedures for a manual recount are as follows:

(a) The county canvassing board shall appoint as many counting teams of at least two electors as is necessary to manually recount the ballots. A counting team must have, when possible, members of at least two political parties. A candidate involved in the race shall not be a member of the counting team.

(b) Each duplicate ballot prepared pursuant to s. 101.5614(4) or s. 102.141(7) shall be compared with the original ballot to ensure the correctness of the duplicate.

(c) If a counting team is unable to determine whether the ballot contains a clear indication that the voter has made a definite choice, the ballot shall be presented to the county canvassing board for a determination.

(d) The Department of State shall adopt detailed rules prescribing additional recount procedures for each certified voting system which shall be uniform to the extent practicable. The rules shall address, at a minimum, the following areas:

1. Security of ballots during the recount process;

2. Time and place of recounts;

3. Public observance of recounts;

4. Objections to ballot determinations;

5. Record of recount proceedings; ~~and~~

6. Procedures relating to candidate and petitioner representatives; and

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-003305

7. Procedures relating to the certification and the use of automatic tabulating equipment that is not part of a voting system.

Section 5. This act shall take effect July 1, 2020.

AMERICAN OVERSIGHT

24-01114-20

A bill to be entitled

An act relating to electric bicycles; amending s. 261.03, F.S.; revising the definition of the term "OHM" or "off-highway motorcycle"; amending s. 316.003, F.S.; revising definitions relating to the Florida Uniform Traffic Control Law; defining the term "electric bicycle"; amending s. 316.027, F.S.; revising the definition of the term "vulnerable road user"; amending s. 316.083, F.S.; revising a rule related to drivers of vehicles overtaking electric bicycles; amending s. 316.1995, F.S.; expanding exceptions to a prohibition on persons driving certain vehicles on sidewalks and bicycle paths; creating s. 316.20655, F.S.; providing electric bicycle regulations; providing for rights and privileges of electric bicycles and operators of electric bicycles; providing that electric bicycles are vehicles to the same extent as bicycles; providing that electric bicycles and operators of electric bicycles are not subject to specified provisions; requiring manufacturers and distributers, beginning on a specified date, to apply a label containing certain information to each electric bicycle; prohibiting persons from tampering with or modifying electric bicycles for certain purposes; providing an exception; requiring electric bicycles to comply with specified provisions of law; requiring electric bicycles to operate in a manner that meets certain requirements; authorizing operators to ride electric bicycles where

AMERICAN OVERSIGHT

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

bicycles are allowed; authorizing municipalities, counties, and agencies of the state to prohibit the operation of certain classes of electric bicycles under certain conditions; providing applicability; authorizing such municipalities, counties, and agencies to regulate the use of electric bicycles on certain trails; prohibiting persons under a specified age from operating class 3 electric bicycles; authorizing such persons to ride as passengers on such electric bicycles; requiring class 3 electric bicycles to be equipped with a speedometer that meets certain requirements; amending ss. 320.01, 322.01, and 324.021, F.S.; revising the definitions of the term "motor vehicle"; amending s. 320.08, F.S.; conforming a provision to changes made by the act; amending ss. 316.306 and 655.960, F.S.; conforming cross-references; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Subsection (4) of section 261.03, Florida Statutes, is amended to read:

261.03 Definitions.—As used in this chapter, the term:

(4) "OHM" or "off-highway motorcycle" means any motor vehicle used off the roads or highways of this state that has a seat or saddle for the use of the rider and is designed to travel with not more than two wheels in contact with the ground, but excludes a tractor, an electric bicycle, or a moped.

Section 2. Present subsections (22) through (104) of

AMERICAN OVERSIGHT

section 316.003, Florida Statutes, are redesignated as subsections (23) through (105), respectively, a new subsection (22) is added to that section, and subsection (4) and present subsections (41), (43), (44), (45), and (61) of that section are amended, to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

(4) BICYCLE.—Every vehicle propelled solely by human power~~, and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more than 20 miles per hour on level ground upon which any person may ride~~, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or a scooter or similar device. ~~A person under the age of 16 may not operate or ride upon a motorized bicycle.~~

(22) ELECTRIC BICYCLE.—A bicycle or tricycle equipped with fully operable pedals, a seat or saddle for the use of the rider, and an electric motor of less than 750 watts which meets the requirements of one of the following three classifications:

(a) "Class 1 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling, and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour.

(b) "Class 2 electric bicycle" means an electric bicycle

AMERICAN OVERSIGHT

equipped with a motor that may be used exclusively to propel the electric bicycle, and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour.

(c) "Class 3 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling, and that ceases to provide assistance when the electric bicycle reaches the speed of 28 miles per hour.

(42) ~~(41)~~ MOPED.—Any vehicle with pedals to permit propulsion by human power, having a seat or saddle for the use of the rider and designed to travel on not more than three wheels, with a motor rated not in excess of 2 brake horsepower and not capable of propelling the vehicle at a speed greater than 30 miles per hour on level ground and with a power-drive system that functions directly or automatically without clutching or shifting gears by the operator after the drive system is engaged. If an internal combustion engine is used, the displacement may not exceed 50 cubic centimeters. The term does not include an electric bicycle.

(44) ~~(43)~~ MOTOR VEHICLE.—Except when used in s. 316.1001, a self-propelled vehicle not operated upon rails or guideway, but not including any bicycle, electric bicycle, motorized scooter, electric personal assistive mobility device, mobile carrier, personal delivery device, swamp buggy, or moped. For purposes of s. 316.1001, "motor vehicle" has the same meaning as provided in s. 320.01(1)(a).

(45) ~~(44)~~ MOTORCYCLE.—Any motor vehicle having a seat or saddle for the use of the rider and designed to travel on not more than three wheels in contact with the ground. The term includes an autocycle, but does not include a tractor, a moped,

AMERICAN OVERSIGHT

electric bicycle, or any vehicle in which the operator is enclosed by a cabin unless it meets the requirements set forth by the National Highway Traffic Safety Administration for a motorcycle.

(46) ~~(45)~~ MOTORIZED SCOOTER.—Any vehicle or micromobility device that is powered by a motor with or without a seat or saddle for the use of the rider, which is designed to travel on not more than three wheels, and which is not capable of propelling the vehicle at a speed greater than 20 miles per hour on level ground. The term does not include an electric bicycle.

(62) ~~(61)~~ PRIVATE ROAD OR DRIVEWAY.—Except as otherwise provided in paragraph (84)(b) ~~(83)(b)~~, any privately owned way or place used for vehicular travel by the owner and those having express or implied permission from the owner, but not by other persons.

Section 3. Paragraph (b) of subsection (1) of section 316.027, Florida Statutes, is amended to read:

316.027 Crash involving death or personal injuries.—

(1) As used in this section, the term:

(b) "Vulnerable road user" means:

1. A pedestrian, including a person actually engaged in work upon a highway, or in work upon utility facilities along a highway, or engaged in the provision of emergency services within the right-of-way;

2. A person operating a bicycle, an electric bicycle, a motorcycle, a scooter, or a moped lawfully on the roadway;

3. A person riding an animal; or

4. A person lawfully operating on a public right-of-way, crosswalk, or shoulder of the roadway:

AMERICAN OVERSIGHT

a. A farm tractor or similar vehicle designed primarily for farm use;

b. A skateboard, roller skates, or in-line skates;

c. A horse-drawn carriage;

d. An electric personal assistive mobility device; or

e. A wheelchair.

Section 4. Subsection (1) of section 316.083, Florida Statutes, is amended to read:

316.083 Overtaking and passing a vehicle.—The following rules shall govern the overtaking and passing of vehicles proceeding in the same direction, subject to those limitations, exceptions, and special rules hereinafter stated:

(1) The driver of a vehicle overtaking another vehicle proceeding in the same direction shall give an appropriate signal as provided for in s. 316.156, shall pass to the left thereof at a safe distance, and shall not again drive to the right side of the roadway until safely clear of the overtaken vehicle. The driver of a vehicle overtaking a bicycle, an electric bicycle, or other nonmotorized vehicle must pass the bicycle, electric bicycle, or other nonmotorized vehicle at a safe distance of not less than 3 feet between the vehicle and the bicycle, electric bicycle, or other nonmotorized vehicle.

Section 5. Section 316.1995, Florida Statutes, is amended to read:

316.1995 Driving upon sidewalk or bicycle path.—

(1) Except as provided in s. 316.008, s. 316.212(8), s. 316.20655, or s. 316.2128, a person may not drive any vehicle other than by human power upon a bicycle path, sidewalk, or sidewalk area, except upon a permanent or duly authorized

AMERICAN OVERSIGHT

temporary driveway.

(2) A violation of this section is a noncriminal traffic infraction, punishable as a moving violation as provided in chapter 318.

(3) This section does not apply to motorized wheelchairs.

Section 6. Section 316.20655, Florida Statutes, is created to read:

316.20655 Electric bicycle regulations.—

(1) Except as otherwise provided in this section, an electric bicycle or an operator of an electric bicycle shall be afforded all the rights and privileges, and be subject to all of the duties, of a bicycle or the operator of a bicycle, including s. 316.2065. An electric bicycle is a vehicle to the same extent as a bicycle.

(2) An electric bicycle or an operator of an electric bicycle is not subject to the provisions of this code relating to financial responsibility, driver or motor vehicle licenses, vehicle registration, title certificates, off-highway motorcycles, or off-highway vehicles.

(3) Beginning on January 1, 2021, manufacturers and distributors of electric bicycles shall apply a label that is permanently affixed in a prominent location to each electric bicycle. The label shall contain the classification number, top assisted speed, and motor wattage of the electric bicycle, and must be printed in Arial font in at least 9-point type.

(4) A person may not tamper with or modify an electric bicycle so as to change the motor-powered speed capability or engagement of an electric bicycle, unless the label indicating the classification required in subsection (3) is replaced after

AMERICAN OVERSIGHT

such modification.

(5) An electric bicycle must comply with the equipment and manufacturing requirements for bicycles adopted by the United States Consumer Product Safety Commission under 16 C.F.R. part 1512.

(6) An electric bicycle must operate in a manner so that the electric motor is disengaged or ceases to function when the rider stops pedaling or when the brakes are applied.

(7)(a) An operator may ride an electric bicycle where bicycles are allowed, including, but not limited to, streets, highways, roadways, shoulders, bicycle lanes, and bicycle or multiuse paths.

(b) Following notice and a public hearing, a municipality, county, or agency of the state having jurisdiction over a bicycle or multiuse path may prohibit the operation of a class 1 electric bicycle or class 2 electric bicycle on that path, if the municipality, county, or agency finds that such a restriction is necessary in the interest of safety or to comply with other laws or legal obligations.

(c) A municipality, county, or agency of the state having jurisdiction over a bicycle or multiuse path may prohibit the operation of a class 3 electric bicycle on that path.

(d) This subsection does not apply to a trail that is specifically designated as nonmotorized and that has a natural surface tread that is made by clearing and grading the native soil with no added surfacing materials. A municipality, county, or agency of the state having jurisdiction over a trail described in this subsection may regulate the use of an electric bicycle on such trail.

AMERICAN OVERSIGHT

(8)(a) A person under the age of 16 may not operate a class 3 electric bicycle. A person under the age of 16 may ride as a passenger on a class 3 electric bicycle that is designed to accommodate passengers.

(b) All class 3 electric bicycles must be equipped with a speedometer that displays the speed at which the bicycle is traveling in miles per hour.

Section 7. Paragraph (a) of subsection (1) of section 320.01, Florida Statutes, is amended to read:

320.01 Definitions, general.—As used in the Florida Statutes, except as otherwise provided, the term:

(1) "Motor vehicle" means:

(a) An automobile, motorcycle, truck, trailer, semitrailer, truck tractor and semitrailer combination, or any other vehicle operated on the roads of this state, used to transport persons or property, and propelled by power other than muscular power, but the term does not include traction engines, road rollers, motorized scooters, micromobility devices, personal delivery devices and mobile carriers as defined in s. 316.003, special mobile equipment as defined in s. 316.003, vehicles that run only upon a track, bicycles, electric bicycles, swamp buggies, or mopeds.

Section 8. Subsection (27) of section 322.01, Florida Statutes, is amended to read:

322.01 Definitions.—As used in this chapter:

(27) "Motor vehicle" means any self-propelled vehicle, including a motor vehicle combination, not operated upon rails or guideway, excluding vehicles moved solely by human power, motorized wheelchairs, and electric ~~motorized~~ bicycles as

AMERICAN OVERSIGHT

defined in s. 316.003.

Section 9. Subsection (1) of section 324.021, Florida Statutes, is amended to read:

324.021 Definitions; minimum insurance required.—The following words and phrases when used in this chapter shall, for the purpose of this chapter, have the meanings respectively ascribed to them in this section, except in those instances where the context clearly indicates a different meaning:

(1) MOTOR VEHICLE.—Every self-propelled vehicle that is designed and required to be licensed for use upon a highway, including trailers and semitrailers designed for use with such vehicles, except traction engines, road rollers, farm tractors, power shovels, and well drillers, and every vehicle that is propelled by electric power obtained from overhead wires but not operated upon rails, but not including any personal delivery device or mobile carrier as defined in s. 316.003, bicycle, electric bicycle, or moped. However, the term "motor vehicle" does not include a motor vehicle as defined in s. 627.732(3) when the owner of such vehicle has complied with the requirements of ss. 627.730-627.7405, inclusive, unless the provisions of s. 324.051 apply; and, in such case, the applicable proof of insurance provisions of s. 320.02 apply.

Section 10. Section 320.08, Florida Statutes, is amended to read:

320.08 License taxes.—Except as otherwise provided herein, there are hereby levied and imposed annual license taxes for the operation of motor vehicles, mopeds, ~~motorized bicycles as defined in s. 316.003(4),~~ tri-vehicles as defined in s. 316.003, and mobile homes as defined in s. 320.01, which shall be paid to

AMERICAN OVERSIGHT

and collected by the department or its agent upon the registration or renewal of registration of the following:

(1) MOTORCYCLES AND MOPEDS.—

(a) Any motorcycle: $10 flat.

(b) Any moped: $5 flat.

(c) Upon registration of a motorcycle, motor-driven cycle, or moped, in addition to the license taxes specified in this subsection, a nonrefundable motorcycle safety education fee in the amount of $2.50 shall be paid. The proceeds of such additional fee shall be deposited in the Highway Safety Operating Trust Fund to fund a motorcycle driver improvement program implemented pursuant to s. 322.025, the Florida Motorcycle Safety Education Program established in s. 322.0255, or the general operations of the department.

(d) An ancient or antique motorcycle: $7.50 flat.

(2) AUTOMOBILES OR TRI-VEHICLES FOR PRIVATE USE.—

(a) An ancient or antique automobile, as defined in s. 320.086, or a street rod, as defined in s. 320.0863: $7.50 flat.

(b) Net weight of less than 2,500 pounds: $14.50 flat.

(c) Net weight of 2,500 pounds or more, but less than 3,500 pounds: $22.50 flat.

(d) Net weight of 3,500 pounds or more: $32.50 flat.

(3) TRUCKS.—

(a) Net weight of less than 2,000 pounds: $14.50 flat.

(b) Net weight of 2,000 pounds or more, but not more than 3,000 pounds: $22.50 flat.

(c) Net weight more than 3,000 pounds, but not more than 5,000 pounds: $32.50 flat.

(d) A truck defined as a "goat," or other vehicle if used

AMERICAN OVERSIGHT

in the field by a farmer or in the woods for the purpose of harvesting a crop, including naval stores, during such harvesting operations, and which is not principally operated upon the roads of the state: $7.50 flat. The term "goat" means a motor vehicle designed, constructed, and used principally for the transportation of citrus fruit within citrus groves or for the transportation of crops on farms, and which can also be used for hauling associated equipment or supplies, including required sanitary equipment, and the towing of farm trailers.

(e) An ancient or antique truck, as defined in s. 320.086: $7.50 flat.

(4) HEAVY TRUCKS, TRUCK TRACTORS, FEES ACCORDING TO GROSS VEHICLE WEIGHT.—

(a) Gross vehicle weight of 5,001 pounds or more, but less than 6,000 pounds: $60.75 flat.

(b) Gross vehicle weight of 6,000 pounds or more, but less than 8,000 pounds: $87.75 flat.

(c) Gross vehicle weight of 8,000 pounds or more, but less than 10,000 pounds: $103 flat.

(d) Gross vehicle weight of 10,000 pounds or more, but less than 15,000 pounds: $118 flat.

(e) Gross vehicle weight of 15,000 pounds or more, but less than 20,000 pounds: $177 flat.

(f) Gross vehicle weight of 20,000 pounds or more, but less than 26,001 pounds: $251 flat.

(g) Gross vehicle weight of 26,001 pounds or more, but less than 35,000: $324 flat.

(h) Gross vehicle weight of 35,000 pounds or more, but less than 44,000 pounds: $405 flat.

AMERICAN OVERSIGHT

(i) Gross vehicle weight of 44,000 pounds or more, but less than 55,000 pounds: $773 flat.

(j) Gross vehicle weight of 55,000 pounds or more, but less than 62,000 pounds: $916 flat.

(k) Gross vehicle weight of 62,000 pounds or more, but less than 72,000 pounds: $1,080 flat.

(l) Gross vehicle weight of 72,000 pounds or more: $1,322 flat.

(m) Notwithstanding the declared gross vehicle weight, a truck tractor used within the state or within a 150-mile radius of its home address is eligible for a license plate for a fee of $324 flat if:

1. The truck tractor is used exclusively for hauling forestry products; or

2. The truck tractor is used primarily for the hauling of forestry products, and is also used for the hauling of associated forestry harvesting equipment used by the owner of the truck tractor.

(n) A truck tractor or heavy truck, not operated as a for-hire vehicle and which is engaged exclusively in transporting raw, unprocessed, and nonmanufactured agricultural or horticultural products within the state or within a 150-mile radius of its home address is eligible for a restricted license plate for a fee of:

1. If such vehicle’s declared gross vehicle weight is less than 44,000 pounds, $87.75 flat.

2. If such vehicle’s declared gross vehicle weight is 44,000 pounds or more and such vehicle only transports from the point of production to the point of primary manufacture; to the

AMERICAN OVERSIGHT

point of assembling the same; or to a shipping point of a rail, water, or motor transportation company, $324 flat.

Such not-for-hire truck tractors and heavy trucks used exclusively in transporting raw, unprocessed, and nonmanufactured agricultural or horticultural products may be incidentally used to haul farm implements and fertilizers delivered direct to the growers. The department may require any documentation deemed necessary to determine eligibility before issuance of this license plate. For the purpose of this paragraph, "not-for-hire" means the owner of the motor vehicle must also be the owner of the raw, unprocessed, and nonmanufactured agricultural or horticultural product, or the user of the farm implements and fertilizer being delivered.

(5) SEMITRAILERS, FEES ACCORDING TO GROSS VEHICLE WEIGHT; SCHOOL BUSES; SPECIAL PURPOSE VEHICLES.—

(a)1. A semitrailer drawn by a GVW truck tractor by means of a fifth-wheel arrangement: $13.50 flat per registration year or any part thereof.

2. A semitrailer drawn by a GVW truck tractor by means of a fifth-wheel arrangement: $68 flat per permanent registration.

(b) A motor vehicle equipped with machinery and designed for the exclusive purpose of well drilling, excavation, construction, spraying, or similar activity, and which is not designed or used to transport loads other than the machinery described above over public roads: $44 flat.

(c) A school bus used exclusively to transport pupils to and from school or school or church activities or functions within their own county: $41 flat.

AMERICAN OVERSIGHT

(d) A wrecker, as defined in s. 320.01, which is used to tow a vessel as defined in s. 327.02, a disabled, abandoned, stolen-recovered, or impounded motor vehicle as defined in s. 320.01, or a replacement motor vehicle as defined in s. 320.01: $41 flat.

(e) A wrecker that is used to tow any nondisabled motor vehicle, a vessel, or any other cargo unless used as defined in paragraph (d), as follows:

1. Gross vehicle weight of 10,000 pounds or more, but less than 15,000 pounds: $118 flat.

2. Gross vehicle weight of 15,000 pounds or more, but less than 20,000 pounds: $177 flat.

3. Gross vehicle weight of 20,000 pounds or more, but less than 26,000 pounds: $251 flat.

4. Gross vehicle weight of 26,000 pounds or more, but less than 35,000 pounds: $324 flat.

5. Gross vehicle weight of 35,000 pounds or more, but less than 44,000 pounds: $405 flat.

6. Gross vehicle weight of 44,000 pounds or more, but less than 55,000 pounds: $772 flat.

7. Gross vehicle weight of 55,000 pounds or more, but less than 62,000 pounds: $915 flat.

8. Gross vehicle weight of 62,000 pounds or more, but less than 72,000 pounds: $1,080 flat.

9. Gross vehicle weight of 72,000 pounds or more: $1,322 flat.

(f) A hearse or ambulance: $40.50 flat.

(6) MOTOR VEHICLES FOR HIRE.—

(a) Under nine passengers: $17 flat plus $1.50 per cwt.

AMERICAN OVERSIGHT

(b) Nine passengers and over: $17 flat plus $2 per cwt.

(7) TRAILERS FOR PRIVATE USE.—

(a) Any trailer weighing 500 pounds or less: $6.75 flat per year or any part thereof.

(b) Net weight over 500 pounds: $3.50 flat plus $1 per cwt.

(8) TRAILERS FOR HIRE.—

(a) Net weight under 2,000 pounds: $3.50 flat plus $1.50 per cwt.

(b) Net weight 2,000 pounds or more: $13.50 flat plus $1.50 per cwt.

(9) RECREATIONAL VEHICLE-TYPE UNITS.—

(a) A travel trailer or fifth-wheel trailer, as defined by s. 320.01(1)(b), that does not exceed 35 feet in length: $27 flat.

(b) A camping trailer, as defined by s. 320.01(1)(b)2.: $13.50 flat.

(c) A motor home, as defined by s. 320.01(1)(b)4.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(d) A truck camper as defined by s. 320.01(1)(b)3.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(e) A private motor coach as defined by s. 320.01(1)(b)5.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(10) PARK TRAILERS; TRAVEL TRAILERS; FIFTH-WHEEL TRAILERS; 35 FEET TO 40 FEET.—

(a) *Park trailers.*—Any park trailer, as defined in s. 320.01(1)(b)7.: $25 flat.

AMERICAN OVERSIGHT

(b) *Travel trailers or fifth-wheel trailers.*—A travel trailer or fifth-wheel trailer, as defined in s. 320.01(1)(b), that exceeds 35 feet: $25 flat.

(11) MOBILE HOMES.—

(a) A mobile home not exceeding 35 feet in length: $20 flat.

(b) A mobile home over 35 feet in length, but not exceeding 40 feet: $25 flat.

(c) A mobile home over 40 feet in length, but not exceeding 45 feet: $30 flat.

(d) A mobile home over 45 feet in length, but not exceeding 50 feet: $35 flat.

(e) A mobile home over 50 feet in length, but not exceeding 55 feet: $40 flat.

(f) A mobile home over 55 feet in length, but not exceeding 60 feet: $45 flat.

(g) A mobile home over 60 feet in length, but not exceeding 65 feet: $50 flat.

(h) A mobile home over 65 feet in length: $80 flat.

(12) DEALER AND MANUFACTURER LICENSE PLATES.—A franchised motor vehicle dealer, independent motor vehicle dealer, marine boat trailer dealer, or mobile home dealer and manufacturer license plate: $17 flat.

(13) EXEMPT OR OFFICIAL LICENSE PLATES.—Any exempt or official license plate: $4 flat, except that the registration or renewal of a registration of a marine boat trailer exempt under s. 320.102 is not subject to any license tax.

(14) LOCALLY OPERATED MOTOR VEHICLES FOR HIRE.—A motor vehicle for hire operated wholly within a city or within 25

AMERICAN OVERSIGHT

miles thereof: $17 flat plus $2 per cwt.

(15) TRANSPORTER.—Any transporter license plate issued to a transporter pursuant to s. 320.133: $101.25 flat.

Section 11. Paragraph (a) of subsection (3) of section 316.306, Florida Statutes, is amended to read:

316.306 School and work zones; prohibition on the use of a wireless communications device in a handheld manner.—

(3)(a)1. A person may not operate a motor vehicle while using a wireless communications device in a handheld manner in a designated school crossing, school zone, or work zone area as defined in s. 316.003(105) ~~s. 316.003(104)~~. This subparagraph shall only be applicable to work zone areas if construction personnel are present or are operating equipment on the road or immediately adjacent to the work zone area. For the purposes of this paragraph, a motor vehicle that is stationary is not being operated and is not subject to the prohibition in this paragraph.

2.a. During the period from October 1, 2019, through December 31, 2019, a law enforcement officer may stop motor vehicles to issue verbal or written warnings to persons who are in violation of subparagraph 1. for the purposes of informing and educating such persons of this section. This sub-subparagraph shall stand repealed on October 1, 2020.

b. Effective January 1, 2020, a law enforcement officer may stop motor vehicles and issue citations to persons who are driving while using a wireless communications device in a handheld manner in violation of subparagraph 1.

Section 12. Subsection (1) of section 655.960, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

655.960 Definitions; ss. 655.960-655.965.—As used in this section and ss. 655.961-655.965, unless the context otherwise requires:

(1) "Access area" means any paved walkway or sidewalk which is within 50 feet of any automated teller machine. The term does not include any street or highway open to the use of the public, as defined in s. 316.003(84)(a) or (b) ~~s. 316.003(83)(a) or (b)~~, including any adjacent sidewalk, as defined in s. 316.003.

Section 13. This act shall take effect July 1, 2020.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

A bill to be entitled

An act relating to electric bicycles; amending s. 261.03, F.S.; revising the definition of the term "OHM" or "off-highway motorcycle"; amending s. 316.003, F.S.; revising definitions relating to the Florida Uniform Traffic Control Law; defining the term "electric bicycle"; amending s. 316.027, F.S.; revising the definition of the term "vulnerable road user"; amending s. 316.083, F.S.; revising a rule related to drivers of vehicles overtaking electric bicycles; amending s. 316.1995, F.S.; expanding exceptions to a prohibition on persons driving certain vehicles on sidewalks and bicycle paths; creating s. 316.20655, F.S.; providing electric bicycle regulations; providing for rights and privileges of electric bicycles and operators of electric bicycles; providing that electric bicycles are vehicles to the same extent as bicycles; providing that electric bicycles and operators of electric bicycles are not subject to specified provisions; requiring manufacturers and distributers, beginning on a specified date, to apply a label containing certain information to each electric bicycle; prohibiting persons from tampering with or modifying electric bicycles for certain purposes; providing an exception; requiring electric bicycles to comply with specified provisions of law; requiring electric bicycles to operate in a manner that meets certain requirements; authorizing operators to ride electric bicycles where

AMERICAN OVERSIGHT

bicycles are allowed; authorizing municipalities, counties, and agencies of the state to prohibit the operation of certain classes of electric bicycles under certain conditions; providing applicability; authorizing such municipalities, counties, and agencies to regulate the use of electric bicycles on certain trails; prohibiting persons under a specified age from operating class 3 electric bicycles; authorizing such persons to ride as passengers on such electric bicycles; requiring class 3 electric bicycles to be equipped with a speedometer that meets certain requirements; amending ss. 320.01, 322.01, and 324.021, F.S.; revising the definitions of the term "motor vehicle"; amending s. 320.08, F.S.; conforming a provision to changes made by the act; amending ss. 316.306 and 655.960, F.S.; conforming cross-references; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Subsection (4) of section 261.03, Florida Statutes, is amended to read:

261.03 Definitions.—As used in this chapter, the term:

(4) "OHM" or "off-highway motorcycle" means any motor vehicle used off the roads or highways of this state that has a seat or saddle for the use of the rider and is designed to travel with not more than two wheels in contact with the ground, but excludes a tractor, an electric bicycle, or a moped.

Section 2. Present subsections (22) through (104) of

AMERICAN OVERSIGHT

section 316.003, Florida Statutes, are redesignated as subsections (23) through (105), respectively, a new subsection (22) is added to that section, and subsection (4) and present subsections (41), (43), (44), (45), and (61) of that section are amended, to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

(4) BICYCLE.—Every vehicle propelled solely by human power~~,~~ ~~and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more than 20 miles per hour on level ground upon which any person may ride~~, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or a scooter or similar device. ~~A person under the age of 16 may not operate or ride upon a motorized bicycle.~~

(22) ELECTRIC BICYCLE.—A bicycle or tricycle equipped with fully operable pedals, a seat or saddle for the use of the rider, and an electric motor of less than 750 watts which meets the requirements of one of the following three classifications:

(a) "Class 1 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling, and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour.

(b) "Class 2 electric bicycle" means an electric bicycle

AMERICAN OVERSIGHT

equipped with a motor that may be used exclusively to propel the electric bicycle, and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour.

(c) "Class 3 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling, and that ceases to provide assistance when the electric bicycle reaches the speed of 28 miles per hour.

(42) ~~(41)~~ MOPED.—Any vehicle with pedals to permit propulsion by human power, having a seat or saddle for the use of the rider and designed to travel on not more than three wheels, with a motor rated not in excess of 2 brake horsepower and not capable of propelling the vehicle at a speed greater than 30 miles per hour on level ground and with a power-drive system that functions directly or automatically without clutching or shifting gears by the operator after the drive system is engaged. If an internal combustion engine is used, the displacement may not exceed 50 cubic centimeters. The term does not include an electric bicycle.

(44) ~~(43)~~ MOTOR VEHICLE.—Except when used in s. 316.1001, a self-propelled vehicle not operated upon rails or guideway, but not including any bicycle, electric bicycle, motorized scooter, electric personal assistive mobility device, mobile carrier, personal delivery device, swamp buggy, or moped. For purposes of s. 316.1001, "motor vehicle" has the same meaning as provided in s. 320.01(1)(a).

(45) ~~(44)~~ MOTORCYCLE.—Any motor vehicle having a seat or saddle for the use of the rider and designed to travel on not more than three wheels in contact with the ground. The term includes an autocycle, but does not include a tractor, a moped,

AMERICAN OVERSIGHT

electric bicycle, or any vehicle in which the operator is enclosed by a cabin unless it meets the requirements set forth by the National Highway Traffic Safety Administration for a motorcycle.

(46) ~~(45)~~ MOTORIZED SCOOTER.—Any vehicle or micromobility device that is powered by a motor with or without a seat or saddle for the use of the rider, which is designed to travel on not more than three wheels, and which is not capable of propelling the vehicle at a speed greater than 20 miles per hour on level ground. The term does not include an electric bicycle.

(62) ~~(61)~~ PRIVATE ROAD OR DRIVEWAY.—Except as otherwise provided in paragraph (84)(b) ~~(83)(b)~~, any privately owned way or place used for vehicular travel by the owner and those having express or implied permission from the owner, but not by other persons.

Section 3. Paragraph (b) of subsection (1) of section 316.027, Florida Statutes, is amended to read:

316.027 Crash involving death or personal injuries.—

(1) As used in this section, the term:

(b) "Vulnerable road user" means:

1. A pedestrian, including a person actually engaged in work upon a highway, or in work upon utility facilities along a highway, or engaged in the provision of emergency services within the right-of-way;

2. A person operating a bicycle, an electric bicycle, a motorcycle, a scooter, or a moped lawfully on the roadway;

3. A person riding an animal; or

4. A person lawfully operating on a public right-of-way, crosswalk, or shoulder of the roadway:

AMERICAN OVERSIGHT

a. A farm tractor or similar vehicle designed primarily for farm use;

b. A skateboard, roller skates, or in-line skates;

c. A horse-drawn carriage;

d. An electric personal assistive mobility device; or

e. A wheelchair.

Section 4. Subsection (1) of section 316.083, Florida Statutes, is amended to read:

316.083 Overtaking and passing a vehicle.—The following rules shall govern the overtaking and passing of vehicles proceeding in the same direction, subject to those limitations, exceptions, and special rules hereinafter stated:

(1) The driver of a vehicle overtaking another vehicle proceeding in the same direction shall give an appropriate signal as provided for in s. 316.156, shall pass to the left thereof at a safe distance, and shall not again drive to the right side of the roadway until safely clear of the overtaken vehicle. The driver of a vehicle overtaking a bicycle, an electric bicycle, or other nonmotorized vehicle must pass the bicycle, electric bicycle, or other nonmotorized vehicle at a safe distance of not less than 3 feet between the vehicle and the bicycle, electric bicycle, or other nonmotorized vehicle.

Section 5. Section 316.1995, Florida Statutes, is amended to read:

316.1995 Driving upon sidewalk or bicycle path.—

(1) Except as provided in s. 316.008, s. 316.212(8), s. 316.20655, or s. 316.2128, a person may not drive any vehicle other than by human power upon a bicycle path, sidewalk, or sidewalk area, except upon a permanent or duly authorized

AMERICAN OVERSIGHT

temporary driveway.

(2) A violation of this section is a noncriminal traffic infraction, punishable as a moving violation as provided in chapter 318.

(3) This section does not apply to motorized wheelchairs.

Section 6. Section 316.20655, Florida Statutes, is created to read:

316.20655 Electric bicycle regulations.—

(1) Except as otherwise provided in this section, an electric bicycle or an operator of an electric bicycle shall be afforded all the rights and privileges, and be subject to all of the duties, of a bicycle or the operator of a bicycle, including s. 316.2065. An electric bicycle is a vehicle to the same extent as a bicycle.

(2) An electric bicycle or an operator of an electric bicycle is not subject to the provisions of this code relating to financial responsibility, driver or motor vehicle licenses, vehicle registration, title certificates, off-highway motorcycles, or off-highway vehicles.

(3) Beginning on January 1, 2021, manufacturers and distributors of electric bicycles shall apply a label that is permanently affixed in a prominent location to each electric bicycle. The label shall contain the classification number, top assisted speed, and motor wattage of the electric bicycle, and must be printed in Arial font in at least 9-point type.

(4) A person may not tamper with or modify an electric bicycle so as to change the motor-powered speed capability or engagement of an electric bicycle, unless the label indicating the classification required in subsection (3) is replaced after

AMERICAN OVERSIGHT

such modification.

(5) An electric bicycle must comply with the equipment and manufacturing requirements for bicycles adopted by the United States Consumer Product Safety Commission under 16 C.F.R. part 1512.

(6) An electric bicycle must operate in a manner so that the electric motor is disengaged or ceases to function when the rider stops pedaling or when the brakes are applied.

(7)(a) An operator may ride an electric bicycle where bicycles are allowed, including, but not limited to, streets, highways, roadways, shoulders, bicycle lanes, and bicycle or multiuse paths.

(b) Following notice and a public hearing, a municipality, county, or agency of the state having jurisdiction over a bicycle or multiuse path may prohibit the operation of a class 1 electric bicycle or class 2 electric bicycle on that path, if the municipality, county, or agency finds that such a restriction is necessary in the interest of safety or to comply with other laws or legal obligations.

(c) A municipality, county, or agency of the state having jurisdiction over a bicycle or multiuse path may prohibit the operation of a class 3 electric bicycle on that path.

(d) This subsection does not apply to a trail that is specifically designated as nonmotorized and that has a natural surface tread that is made by clearing and grading the native soil with no added surfacing materials. A municipality, county, or agency of the state having jurisdiction over a trail described in this subsection may regulate the use of an electric bicycle on such trail.

AMERICAN OVERSIGHT

(8)(a) A person under the age of 16 may not operate a class 3 electric bicycle. A person under the age of 16 may ride as a passenger on a class 3 electric bicycle that is designed to accommodate passengers.

(b) All class 3 electric bicycles must be equipped with a speedometer that displays the speed at which the bicycle is traveling in miles per hour.

Section 7. Paragraph (a) of subsection (1) of section 320.01, Florida Statutes, is amended to read:

320.01 Definitions, general.—As used in the Florida Statutes, except as otherwise provided, the term:

(1) "Motor vehicle" means:

(a) An automobile, motorcycle, truck, trailer, semitrailer, truck tractor and semitrailer combination, or any other vehicle operated on the roads of this state, used to transport persons or property, and propelled by power other than muscular power, but the term does not include traction engines, road rollers, motorized scooters, micromobility devices, personal delivery devices and mobile carriers as defined in s. 316.003, special mobile equipment as defined in s. 316.003, vehicles that run only upon a track, bicycles, electric bicycles, swamp buggies, or mopeds.

Section 8. Subsection (27) of section 322.01, Florida Statutes, is amended to read:

322.01 Definitions.—As used in this chapter:

(27) "Motor vehicle" means any self-propelled vehicle, including a motor vehicle combination, not operated upon rails or guideway, excluding vehicles moved solely by human power, motorized wheelchairs, and electric ~~motorized~~ bicycles as

AMERICAN OVERSIGHT

defined in s. 316.003.

Section 9. Subsection (1) of section 324.021, Florida Statutes, is amended to read:

324.021 Definitions; minimum insurance required.—The following words and phrases when used in this chapter shall, for the purpose of this chapter, have the meanings respectively ascribed to them in this section, except in those instances where the context clearly indicates a different meaning:

(1) MOTOR VEHICLE.—Every self-propelled vehicle that is designed and required to be licensed for use upon a highway, including trailers and semitrailers designed for use with such vehicles, except traction engines, road rollers, farm tractors, power shovels, and well drillers, and every vehicle that is propelled by electric power obtained from overhead wires but not operated upon rails, but not including any personal delivery device or mobile carrier as defined in s. 316.003, bicycle, electric bicycle, or moped. However, the term "motor vehicle" does not include a motor vehicle as defined in s. 627.732(3) when the owner of such vehicle has complied with the requirements of ss. 627.730-627.7405, inclusive, unless the provisions of s. 324.051 apply; and, in such case, the applicable proof of insurance provisions of s. 320.02 apply.

Section 10. Section 320.08, Florida Statutes, is amended to read:

320.08 License taxes.—Except as otherwise provided herein, there are hereby levied and imposed annual license taxes for the operation of motor vehicles, mopeds, ~~motorized bicycles as defined in s. 316.003(4),~~ tri-vehicles as defined in s. 316.003, and mobile homes as defined in s. 320.01, which shall be paid to

AMERICAN OVERSIGHT

and collected by the department or its agent upon the registration or renewal of registration of the following:

(1) MOTORCYCLES AND MOPEDS.—

(a) Any motorcycle: $10 flat.

(b) Any moped: $5 flat.

(c) Upon registration of a motorcycle, motor-driven cycle, or moped, in addition to the license taxes specified in this subsection, a nonrefundable motorcycle safety education fee in the amount of $2.50 shall be paid. The proceeds of such additional fee shall be deposited in the Highway Safety Operating Trust Fund to fund a motorcycle driver improvement program implemented pursuant to s. 322.025, the Florida Motorcycle Safety Education Program established in s. 322.0255, or the general operations of the department.

(d) An ancient or antique motorcycle: $7.50 flat.

(2) AUTOMOBILES OR TRI-VEHICLES FOR PRIVATE USE.—

(a) An ancient or antique automobile, as defined in s. 320.086, or a street rod, as defined in s. 320.0863: $7.50 flat.

(b) Net weight of less than 2,500 pounds: $14.50 flat.

(c) Net weight of 2,500 pounds or more, but less than 3,500 pounds: $22.50 flat.

(d) Net weight of 3,500 pounds or more: $32.50 flat.

(3) TRUCKS.—

(a) Net weight of less than 2,000 pounds: $14.50 flat.

(b) Net weight of 2,000 pounds or more, but not more than 3,000 pounds: $22.50 flat.

(c) Net weight more than 3,000 pounds, but not more than 5,000 pounds: $32.50 flat.

(d) A truck defined as a "goat," or other vehicle if used

AMERICAN OVERSIGHT

in the field by a farmer or in the woods for the purpose of harvesting a crop, including naval stores, during such harvesting operations, and which is not principally operated upon the roads of the state: $7.50 flat. The term "goat" means a motor vehicle designed, constructed, and used principally for the transportation of citrus fruit within citrus groves or for the transportation of crops on farms, and which can also be used for hauling associated equipment or supplies, including required sanitary equipment, and the towing of farm trailers.

(e) An ancient or antique truck, as defined in s. 320.086: $7.50 flat.

(4) HEAVY TRUCKS, TRUCK TRACTORS, FEES ACCORDING TO GROSS VEHICLE WEIGHT.—

(a) Gross vehicle weight of 5,001 pounds or more, but less than 6,000 pounds: $60.75 flat.

(b) Gross vehicle weight of 6,000 pounds or more, but less than 8,000 pounds: $87.75 flat.

(c) Gross vehicle weight of 8,000 pounds or more, but less than 10,000 pounds: $103 flat.

(d) Gross vehicle weight of 10,000 pounds or more, but less than 15,000 pounds: $118 flat.

(e) Gross vehicle weight of 15,000 pounds or more, but less than 20,000 pounds: $177 flat.

(f) Gross vehicle weight of 20,000 pounds or more, but less than 26,001 pounds: $251 flat.

(g) Gross vehicle weight of 26,001 pounds or more, but less than 35,000: $324 flat.

(h) Gross vehicle weight of 35,000 pounds or more, but less than 44,000 pounds: $405 flat.

AMERICAN OVERSIGHT

(i) Gross vehicle weight of 44,000 pounds or more, but less than 55,000 pounds: $773 flat.

(j) Gross vehicle weight of 55,000 pounds or more, but less than 62,000 pounds: $916 flat.

(k) Gross vehicle weight of 62,000 pounds or more, but less than 72,000 pounds: $1,080 flat.

(l) Gross vehicle weight of 72,000 pounds or more: $1,322 flat.

(m) Notwithstanding the declared gross vehicle weight, a truck tractor used within the state or within a 150-mile radius of its home address is eligible for a license plate for a fee of $324 flat if:

1. The truck tractor is used exclusively for hauling forestry products; or

2. The truck tractor is used primarily for the hauling of forestry products, and is also used for the hauling of associated forestry harvesting equipment used by the owner of the truck tractor.

(n) A truck tractor or heavy truck, not operated as a for-hire vehicle and which is engaged exclusively in transporting raw, unprocessed, and nonmanufactured agricultural or horticultural products within the state or within a 150-mile radius of its home address is eligible for a restricted license plate for a fee of:

1. If such vehicle’s declared gross vehicle weight is less than 44,000 pounds, $87.75 flat.

2. If such vehicle’s declared gross vehicle weight is 44,000 pounds or more and such vehicle only transports from the point of production to the point of primary manufacture; to the

AMERICAN OVERSIGHT

point of assembling the same; or to a shipping point of a rail, water, or motor transportation company, $324 flat.

Such not-for-hire truck tractors and heavy trucks used exclusively in transporting raw, unprocessed, and nonmanufactured agricultural or horticultural products may be incidentally used to haul farm implements and fertilizers delivered direct to the growers. The department may require any documentation deemed necessary to determine eligibility before issuance of this license plate. For the purpose of this paragraph, "not-for-hire" means the owner of the motor vehicle must also be the owner of the raw, unprocessed, and nonmanufactured agricultural or horticultural product, or the user of the farm implements and fertilizer being delivered.

(5) SEMITRAILERS, FEES ACCORDING TO GROSS VEHICLE WEIGHT; SCHOOL BUSES; SPECIAL PURPOSE VEHICLES.—

(a)1. A semitrailer drawn by a GVW truck tractor by means of a fifth-wheel arrangement: $13.50 flat per registration year or any part thereof.

2. A semitrailer drawn by a GVW truck tractor by means of a fifth-wheel arrangement: $68 flat per permanent registration.

(b) A motor vehicle equipped with machinery and designed for the exclusive purpose of well drilling, excavation, construction, spraying, or similar activity, and which is not designed or used to transport loads other than the machinery described above over public roads: $44 flat.

(c) A school bus used exclusively to transport pupils to and from school or school or church activities or functions within their own county: $41 flat.

AMERICAN OVERSIGHT

(d) A wrecker, as defined in s. 320.01, which is used to tow a vessel as defined in s. 327.02, a disabled, abandoned, stolen-recovered, or impounded motor vehicle as defined in s. 320.01, or a replacement motor vehicle as defined in s. 320.01: $41 flat.

(e) A wrecker that is used to tow any nondisabled motor vehicle, a vessel, or any other cargo unless used as defined in paragraph (d), as follows:

1. Gross vehicle weight of 10,000 pounds or more, but less than 15,000 pounds: $118 flat.

2. Gross vehicle weight of 15,000 pounds or more, but less than 20,000 pounds: $177 flat.

3. Gross vehicle weight of 20,000 pounds or more, but less than 26,000 pounds: $251 flat.

4. Gross vehicle weight of 26,000 pounds or more, but less than 35,000 pounds: $324 flat.

5. Gross vehicle weight of 35,000 pounds or more, but less than 44,000 pounds: $405 flat.

6. Gross vehicle weight of 44,000 pounds or more, but less than 55,000 pounds: $772 flat.

7. Gross vehicle weight of 55,000 pounds or more, but less than 62,000 pounds: $915 flat.

8. Gross vehicle weight of 62,000 pounds or more, but less than 72,000 pounds: $1,080 flat.

9. Gross vehicle weight of 72,000 pounds or more: $1,322 flat.

(f) A hearse or ambulance: $40.50 flat.

(6) MOTOR VEHICLES FOR HIRE.—

(a) Under nine passengers: $17 flat plus $1.50 per cwt.

AMERICAN OVERSIGHT

(b) Nine passengers and over: $17 flat plus $2 per cwt.

(7) TRAILERS FOR PRIVATE USE.—

(a) Any trailer weighing 500 pounds or less: $6.75 flat per year or any part thereof.

(b) Net weight over 500 pounds: $3.50 flat plus $1 per cwt.

(8) TRAILERS FOR HIRE.—

(a) Net weight under 2,000 pounds: $3.50 flat plus $1.50 per cwt.

(b) Net weight 2,000 pounds or more: $13.50 flat plus $1.50 per cwt.

(9) RECREATIONAL VEHICLE-TYPE UNITS.—

(a) A travel trailer or fifth-wheel trailer, as defined by s. 320.01(1)(b), that does not exceed 35 feet in length: $27 flat.

(b) A camping trailer, as defined by s. 320.01(1)(b)2.: $13.50 flat.

(c) A motor home, as defined by s. 320.01(1)(b)4.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(d) A truck camper as defined by s. 320.01(1)(b)3.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(e) A private motor coach as defined by s. 320.01(1)(b)5.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(10) PARK TRAILERS; TRAVEL TRAILERS; FIFTH-WHEEL TRAILERS; 35 FEET TO 40 FEET.—

(a) *Park trailers.*—Any park trailer, as defined in s. 320.01(1)(b)7.: $25 flat.

AMERICAN OVERSIGHT

(b) *Travel trailers or fifth-wheel trailers.*—A travel trailer or fifth-wheel trailer, as defined in s. 320.01(1)(b), that exceeds 35 feet: $25 flat.

(11) MOBILE HOMES.—

(a) A mobile home not exceeding 35 feet in length: $20 flat.

(b) A mobile home over 35 feet in length, but not exceeding 40 feet: $25 flat.

(c) A mobile home over 40 feet in length, but not exceeding 45 feet: $30 flat.

(d) A mobile home over 45 feet in length, but not exceeding 50 feet: $35 flat.

(e) A mobile home over 50 feet in length, but not exceeding 55 feet: $40 flat.

(f) A mobile home over 55 feet in length, but not exceeding 60 feet: $45 flat.

(g) A mobile home over 60 feet in length, but not exceeding 65 feet: $50 flat.

(h) A mobile home over 65 feet in length: $80 flat.

(12) DEALER AND MANUFACTURER LICENSE PLATES.—A franchised motor vehicle dealer, independent motor vehicle dealer, marine boat trailer dealer, or mobile home dealer and manufacturer license plate: $17 flat.

(13) EXEMPT OR OFFICIAL LICENSE PLATES.—Any exempt or official license plate: $4 flat, except that the registration or renewal of a registration of a marine boat trailer exempt under s. 320.102 is not subject to any license tax.

(14) LOCALLY OPERATED MOTOR VEHICLES FOR HIRE.—A motor vehicle for hire operated wholly within a city or within 25

AMERICAN OVERSIGHT

miles thereof: $17 flat plus $2 per cwt.

(15) TRANSPORTER.—Any transporter license plate issued to a transporter pursuant to s. 320.133: $101.25 flat.

Section 11. Paragraph (a) of subsection (3) of section 316.306, Florida Statutes, is amended to read:

316.306 School and work zones; prohibition on the use of a wireless communications device in a handheld manner.—

(3)(a)1. A person may not operate a motor vehicle while using a wireless communications device in a handheld manner in a designated school crossing, school zone, or work zone area as defined in s. 316.003(105) ~~s. 316.003(104)~~. This subparagraph shall only be applicable to work zone areas if construction personnel are present or are operating equipment on the road or immediately adjacent to the work zone area. For the purposes of this paragraph, a motor vehicle that is stationary is not being operated and is not subject to the prohibition in this paragraph.

2.a. During the period from October 1, 2019, through December 31, 2019, a law enforcement officer may stop motor vehicles to issue verbal or written warnings to persons who are in violation of subparagraph 1. for the purposes of informing and educating such persons of this section. This sub-subparagraph shall stand repealed on October 1, 2020.

b. Effective January 1, 2020, a law enforcement officer may stop motor vehicles and issue citations to persons who are driving while using a wireless communications device in a handheld manner in violation of subparagraph 1.

Section 12. Subsection (1) of section 655.960, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

655.960 Definitions; ss. 655.960-655.965.—As used in this section and ss. 655.961-655.965, unless the context otherwise requires:

(1) "Access area" means any paved walkway or sidewalk which is within 50 feet of any automated teller machine. The term does not include any street or highway open to the use of the public, as defined in s. 316.003(84)(a) or (b) ~~s. 316.003(83)(a) or (b)~~, including any adjacent sidewalk, as defined in s. 316.003.

Section 13. This act shall take effect July 1, 2020.

AMERICAN OVERSIGHT

SFWMD Moves Forward on Four Key Comprehensive Everglades Restoration Plan (CERP) Projects

Actions taken advance completion of EAA Reservoir Project, authorization of the Lake Okeechobee Watershed Restoration Project, development of Western Everglades Restoration Project and authorization of the Loxahatchee River Restoration Project

The South Florida Water Management District (SFWMD) recently took several actions to advance four projects that are part of the Comprehensive Everglades Restoration Plan (CERP) to restore Florida's Everglades.

The actions taken by SFWMD include:

- Everglades Agricultural Area (EAA) Reservoir Project. SFWMD issued a "Request For Bids" for the construction of an inflow/outflow canal that will bring water from Lake Okeechobee into the Stormwater Treatment Area (STA) and reservoir. The 240,000 acre-foot reservoir will help dramatically reduce damaging discharges from Lake Okeechobee to the coastal estuaries during the wet season and help send additional clean water south to the Everglades. The associated stormwater treatment area component of the project will clean the water stored in the reservoir to meet state water quality standards. **To read more about the EAA Reservoir project click HERE.**
- Lake Okeechobee Watershed Restoration Project (LOWRP). SFWMD sent a letter to the U.S. Army Corps of Engineers, its federal partner in Everglades restoration, supporting the project's authorization. LOWRP is a planning effort being conducted by the U.S. Army Corps of Engineers and the South Florida Water Management District to identify opportunities to improve the quantity, timing and distribution of flows into the 730-square-mile lake. The project area, where placement of potential features are being considered, covers a large portion of the Lake Okeechobee Watershed north of the lake. **Click HERE to read the letter of support.**
- Western Everglades Restoration Project (WERP). SFWMD sent a letter to the U.S. Army Corps of Engineers encouraging continued development and offering assistance to move the project forward. The District recommends additional research to support planning efforts in addition to finding solutions for lands needed for the project. This restoration project will restore and reconnect the western Everglades ecosystem. **Click HERE to read the letter.**
- Loxahatchee River Watershed Restoration Project. SFWMD sent a letter to the U.S. Army Corps of Engineers, its federal partner in Everglades restoration, supporting the project's authorization. The Loxahatchee River Watershed Restoration Project aims to restore and sustain the overall quantity, quality, timing and distribution of fresh water to the federally designated "National Wild and Scenic" Northwest Fork of the Loxahatchee River for current and future generations. This project also seeks to restore, sustain and reconnect the wetlands and watersheds that form the historic headwaters for the river. **Click HERE to read the letter of support.**

These four efforts are important to making progress on the Comprehensive Everglades Restoration Plan and garner significant public attention. The District is committed to continuing to work with local stakeholders as parts of these projects continue to develop and advance.

AMERICAN OVERSIGHT

Aquifer Storage and Recovery

Aquifer Storage and Recovery (ASR) facilities have been used in Florida and throughout the United States for about 40 years. ASR facilities inject and recover treated and untreated groundwater, partially treated surface water and reclaimed wastewater. ASR technology can store more water than a typical aboveground reservoir. An ASR system also can provide large volumes of water over longer periods of time, increasing water supplies during seasonal and multi-year droughts.

Most ASR facilities in Florida store water in the upper Floridan Aquifer, primarily in areas where the aquifer is brackish or somewhat salty. The injected fresh water displaces brackish water in the aquifer to form a "freshwater bubble," that may be highly irregular in shape.

CERP ASR Regional Study (Updated June 2015)

As part of the Comprehensive Everglades Restoration Plan (CERP), the District and the U.S. Army Corps of Engineers have been investigating the use of ASR for water storage to benefit the Everglades and other natural systems in South Florida. The jointly developed ASR Regional Study documents the results of more than a decade's worth of scientific and engineering investigations and will serve as a technical guide when considering ASR as part of future Everglades restoration efforts.

The study incorporates results from two pilot ASR projects successfully constructed and tested along the Kissimmee River and the Hillsboro Canal. The study also includes results from numerous regional investigations conducted by a multi-agency, multi-disciplinary team of scientists and engineers to address technical uncertainties.

The National Research Council (NRC) released a peer review of the draft study in April 2015, concluding that it "significantly advances understanding of large-scale implementation of ASR in South Florida." An incremental adaptive restoration approach for ASR may involve one or more clusters of five ASR wells to address critical uncertainties such as recovery efficiencies, performance, long-term water quality and ecological effects.

Summary

The Florida Everglades, a unique aquatic ecosystem that supports a diversity of habitats and 67 threatened and endangered species, has been greatly altered over the past century by water management to support agricultural and urban development. The Comprehensive Everglades

AMERICAN OVERSIGHT

Restoration Plan (CERP), launched in 2000, is a joint effort led by the state and federal government to reverse the decline of the ecosystem. Increasing water storage is a critical component of the restoration, and the CERP included projects that would drill over 330 aquifer storage and recovery (ASR) wells to store up to 1.7 billion gallons per day in porous and permeable units in the Floridan aquifer system during wet periods for recovery during seasonal or longer-term dry periods.

To address uncertainties regarding regional effects of large-scale ASR implementation in the Everglades, the U.S. Army Corps of Engineers (USACE) and the South Florida Water Management District conducted an 11-year ASR Regional Study, focusing on the hydrogeology of the Floridan aquifer system, water quality changes during aquifer storage, possible ecological risks posed by recovered water, and the regional capacity for ASR implementation. At the request of the USACE, the National Research Council's Water Science and Technology Board convened a committee of experts to review the ASR Regional Study Technical Data Report (TDR) and assess progress reducing uncertainties related to full-scale CERP ASR implementation (see Box S-1). The committee was not asked to provide recommendations on the appropriate role of ASR in the CERP.

The ASR Regional Study, which included literature syntheses, laboratory testing, and field-scale experimentation primarily at two pilot ASR sites, represents a significant advancement in the understanding of large-scale ASR implementation in South Florida. The Regional Study improved the understanding of the hydrogeology of the Floridan aquifer system in southern Florida and used this information to develop a regional groundwater model.

Through modeling simulations, the study concluded that the number of ASR wells that can be operated without significant regional effects on well pressure and groundwater heads is much lower (approximately 131 wells) than originally envisioned in the CERP.

The study also examined subsurface geochemical changes and associated mechanisms that are likely to occur through water-rock interactions. **The Regional Study TDR reported reductions in mercury and phosphorus in recovered water and initially elevated arsenic levels that become substantially reduced with additional cycles and storage.**

The Regional Study also examined pressures that could cause hydraulic fracturing and ranked components of ecological risk.

The committee agrees with the Regional Study findings that no "fatal flaws" have been discovered, but many uncertainties remain that merit additional study before large-scale ASR should be implemented. The following represent the highest-priority uncertainties, considering their implications to CERP decision making.

Deep Well Injection Conference
March 2 & 3, 2020

Miami Dade Water and Sewer Department
3071 SW 38th Ave.
Miami, FL 33146

Optional Field Trip Opportunity Offered on Sunday, March 1, 2020

(CLICK HERE FOR FIELD TRIP DETAILS)

This objective of this AGWT program is to provide an update on the status of deep well injection disposals in Florida and to showcase the "state-of-the-art" and operation-economics for current users and potential adopters of the technology. Presentations will include information on disposal policies that are the drivers for DWI installations. Experts will present information about the latest technologies in design, construction, operation, maintenance and monitoring of deep well injection, including case studies from DWI operations the US and overseas. The two-day program will provide a focused information exchange and discussion opportunity among presenters and participants.

SCHEDULED PROGRAMS February 2020

21st Annual Everglades Day Family Festival
Saturday, February 8, 9:00 a.m. - 4:00 p.m.
Parking at West Delray Regional Park, 10875 W Atlantic Ave, Delray Beach
Join us for Everglades Day, our all-day family festival, with activities for all ages. This year's theme is "Habitats of the Everglades." Enjoy guided tours, nature walks, bird walks, wildlife demonstrations, presentations, exhibits, games, kids' fishing, kids' archery, face painting, canoeing, live music, dance, food trucks and much more! The Palm Beach Zoo, Busch Wildlife Sanctuary and Okeeheelee Nature Center will exhibit some of their rehabilitated wildlife and the Plein Air painters will be all around the Refuge painting what they see.

All day free admission. Free parking for visitors 3 miles south of the Refuge at West Delray Regional Park, 10875 W Atlantic Ave, with buses running to the Refuge Visitor Center and back continuously, from 8:30 a.m. to 4:30 p.m. Visitors in wheelchairs and those with other special needs can use one of two vans that will be looping among festival venues, starting at the Visitor Center. Volunteers also park at West Delray Regional Park, with the first bus leaving at 7:00 a.m. for those helping with setup.

WATER QUALITY IS A TOP PRIORITY FOR FLORIDA

That's why, less than 48 hours after being sworn in, Governor Ron DeSantis issued an Executive Order outlining his bold vision to achieve more now for Florida's environment. The Executive Order directs strategic action with a focus on accountability, transparency and collaboration and includes a proposed $2.5 billion investment over the next four years.

Protecting Florida Together

WHAT WE DO

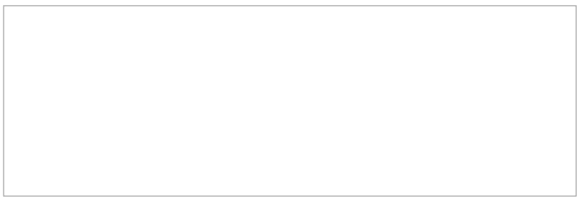
The central theme of all Florida Earth is to provide programs that enable participants and partners in developing and implementing solutions to challenges in the water space. We are about connecting people together and collaborating as a community of science, engineering, policy, and other multi-discipline experts who have a desire to solve problems.

1. Development of Knowledge Exchange Platforms

All Florida Earth programs have a knowledge exchange platform component, whether at the local, state, national or global level. Examples of connectivity include:

- **Nation to nation - USNC Professional Program**
- **University to university - USNC Academic Program**
- **Professional organization to professional organization - USNC Professional Program & Module Series**
- **Governmental organization to private sector - all programs**
- **Private sector to private sector - all programs**

2. Facilitation of solutions development



Florida Earth teams have been instrumental in providing innovative approaches to helping organizations derive solutions to stakeholder issues. By having a global reach, programs are designed to help expand thinking and reduce conflict surrounding water related issues. Examples of that function include:

- **Direct facilitation around contentious issues - Blue-Green Project**
- **Education forums addressing water related controversy - Florida Land Use Forums and Water Choices**
- **Conflict Resolution Training - Florida Earth support of University of Florida's Natural Resources Leadership Institute**

3. Expansion of already existing programs

Using Florida Earth's extensive partner network, organizations have collaborated with us to expand and enhance their programs that have similar goals and components. Examples of that function are:

- **Law School Study Abroad Programs - The USNC Comparative Water Law Course**
- **The International Water Association's Young Professional Program - USNC Professional Program**
- **Events that engage partner institutions - A Night with the Governors**

A Night with the Governors at St. Thomas University School of Law included Bob Graham, Buddy McKay and Charlie Crist

4. Providing basic and advanced training to developing countries

Helping others find solutions that already exists for their problems is a Florida Earth mandate. Programs that exemplify this principle include:

- **Florida Earth's "Flagship" Program - The UNESCO-IHE Florida Program and the Water Ambassadors**
- **The new USNC Urban Coastal Short Course - Being developed in partnership with UNESCO-IHE under their short-course professional program.**

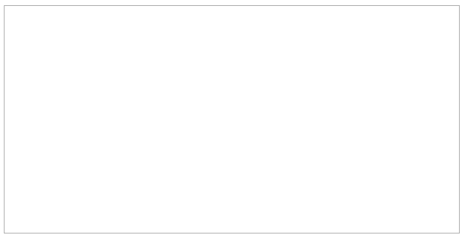
Ballot summary

The official ballot summary was as follows:



" Funds the Land Acquisition Trust Fund to acquire, restore, improve, and manage conservation lands including wetlands and forests; fish and wildlife habitat; lands protecting water resources and drinking water sources, including the Everglades, and the water quality of rivers, lakes, and streams; beaches and shores; outdoor recreational lands; working farms and ranches; and historic or geologic sites, by dedicating 33 percent of net revenues from the existing excise tax on documents for 20 years. "

https://ballotpedia.org/Florida_Water_and_Land_Conservation_Initiative,_Amendment_1_(2014)

The Land Acquisition Trust Fund was developed to acquire and improve conservation easements, wildlife management areas, wetlands, forests, fish and wildlife habitats, beaches and shores, recreational trails and parks, urban open space, rural landscapes, working farms and ranches, historical and geological sites, lands protecting water and drinking water resources and lands in the Everglades Agricultural Areas and the Everglades Protection Area. The fund was designed to manage and restore natural systems and to enhance public access and recreational use of conservation lands.

FINAL DRAFT Chapter 4 IPCC SR Ocean and Cryosphere

Executive Summary

This chapter assesses past and future contributions to global, regional and extreme sea level changes, associated risk to low-lying islands, coasts, cities, and settlements, and response options and pathways to resilience and sustainable development along the coast. **Global mean sea level (GMSL) is rising (virtually certain1) and accelerating (high confidence2). The sum of glacier and ice sheet contributions is now the dominant source of GMSL rise (very high confidence).** GMSL from tide gauges and altimetry observations increased from 1.4 mm yr-1 over the period 1901-1990 to 2.1 mm yr-1 over the period 1970-2015 to 3.2 mm yr-1 over the period 1993-2015 to 3.6 mm yr-1 over the period 2005-2015 (high confidence). The dominant cause of global mean sea level rise since 1970 is anthropogenic forcing (high confidence) (4.2.2.1.6, 4.2.2.5). **....more.... 169 pages**

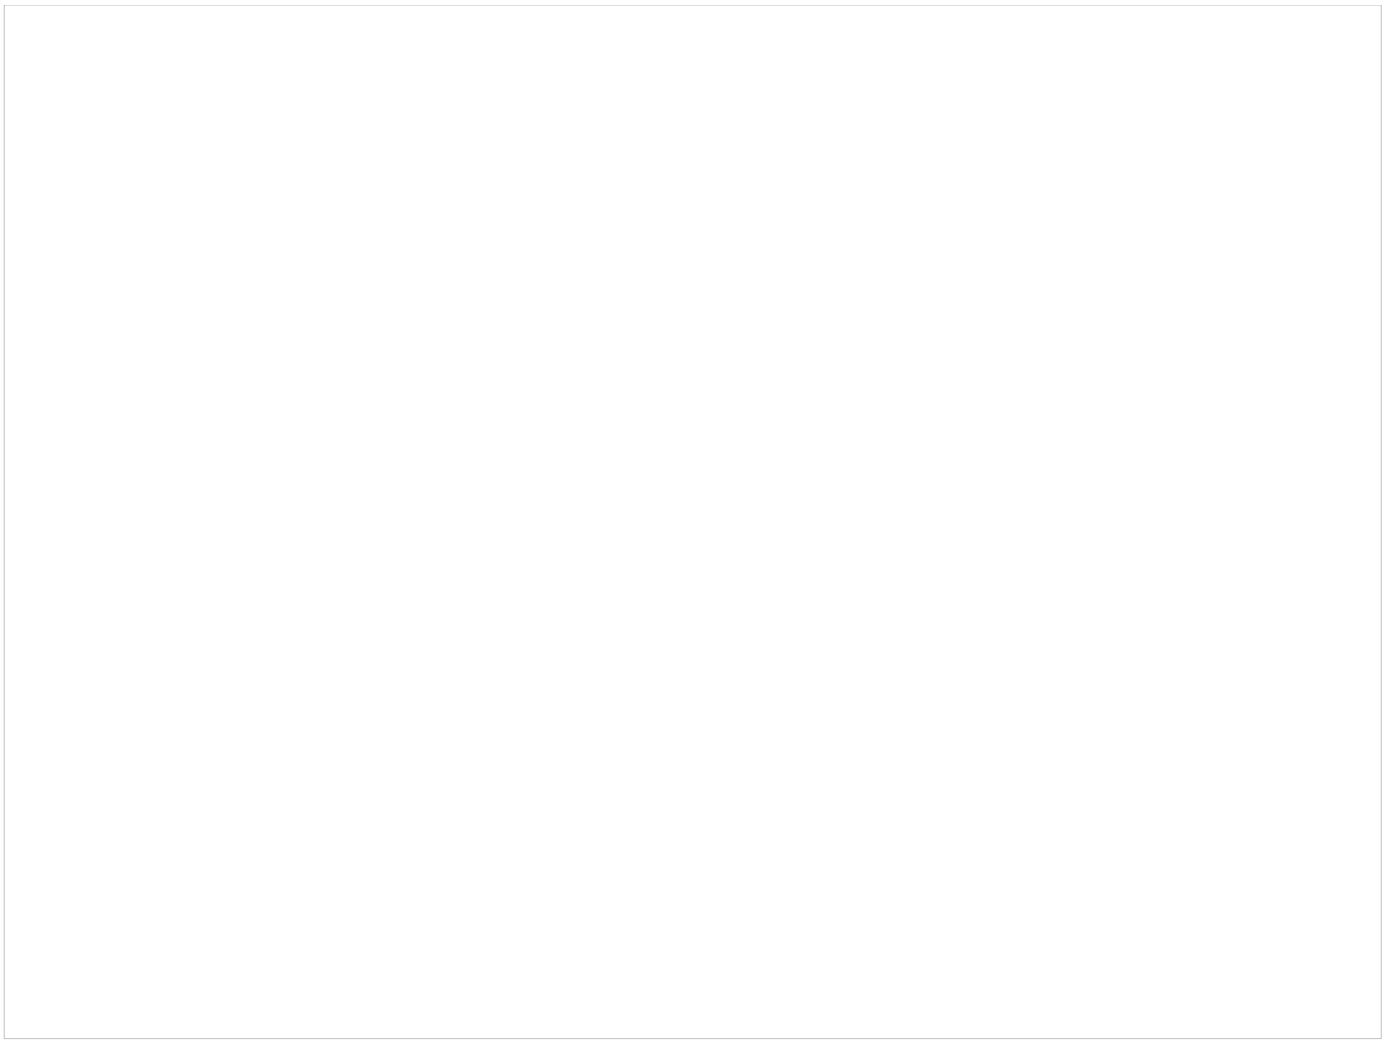
Make plans to attend the Becoming an Outdoors-Woman workshop in West Palm Beach

Register now to participate in the Florida Fish and Wildlife Conservation Commission's (FWC) Feb. 7-9, 2020 Becoming an Outdoors-Woman workshop near West Palm Beach.

The weekend workshop, hosted at the Everglades Youth Conservation Camp, is open to anyone 18 years of age or older interested in developing a variety of outdoor skills. The workshop features expert instructors and safe, hands-on opportunities to learn about fishing, archery, paddling, hunting, nature photography, outdoor survival, boating, birdwatching and more.



The Everglades Youth Conservation Camp is in the J.W. Corbett Wildlife Management Area in northwest Palm Beach County. Cabins offer comfortable dormitory-style lodging with modern restroom facilities. Home-cooked meals are served in the cafeteria. Sessions begin Friday afternoon and end Sunday with lunch.

The cost to participate in the weekend workshop is $200. Partial scholarships are available for participants who qualify. Workshops are limited to 100 participants and registration is on a first-come, first-served basis.

Learn more about the FWC's Becoming an Outdoors-Woman program and register for the Feb. 7-9 event by visiting MyFWC.com/BOW or calling 561-625-5122.

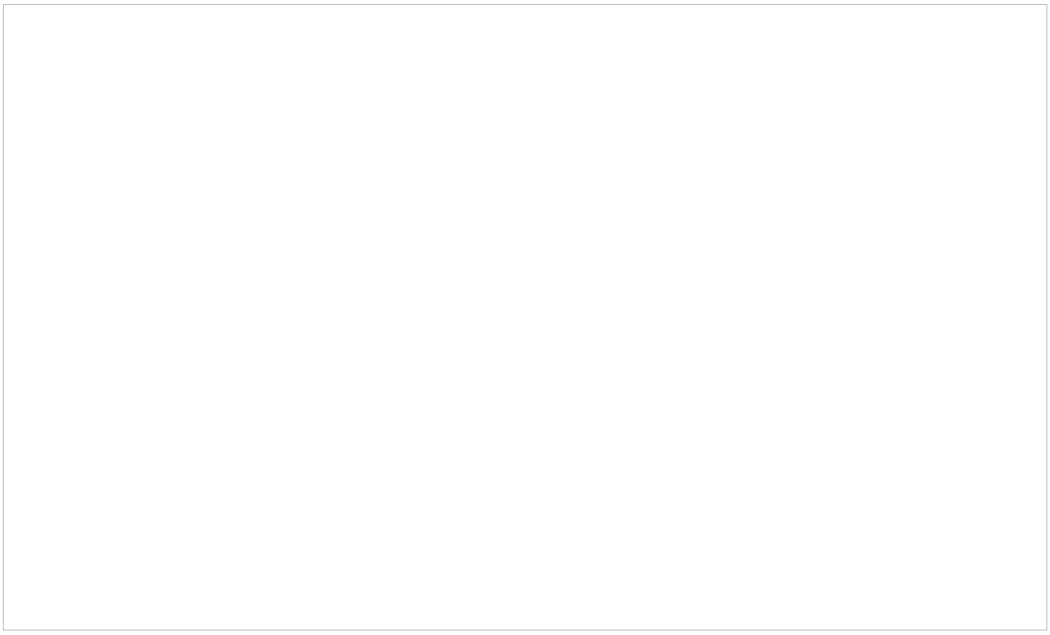
Water Levels

SITE STATUS REPORT: Real-time water levels upstream and downstream of hundreds of water control structures, flow volume and more.

The Site Status Report provides comprehensive up-to-the minute information for hundreds of water control structures throughout the SFWMD water management system, organized by regions for ease of navigation. It shows the current volume of water being moved and the water level upstream and downstream at each location. It also shows the daily water level for lakes and other large water bodies. Companion maps, on the far right tab, show key locations with real-time information of volumes of water being moved and daily water levels.

Daily Water Levels

The U.S. Army Corps of Engineers regulates and reports the official daily water levels of Lake Okeechobee and these major water bodies and areas within the South Florida Water Management District:



- **Lake Okeechobee**
- **Kissimmee River Basin**
- **Everglades Water Conservation Area 1 (Loxahatchee National Wildlife Refuge)**
- **Everglades Water Conservation Area 2**
- **Everglades Water Conservation Area 3**

> **All navigation locks to and from Lake Okeechobee, the Kissimmee River and Upper Kissimmee Chain of Lakes will reopen at 9 a.m. Wednesday.**
>
> **Boaters will be able to move freely now that Hurricane Dorian has all but cleared South Florida.**
>
> **Visit sfwmd.gov/navigation for more information on navigating through South Florida Water Management District structures and waterways.**

Legislative Update

Appropriations Committee Approves 2020-2021 Balanced Budget, Maintains $3.5 Billion in Reserves

The Senate Committee on Appropriations, chaired by Senator Rob Bradley, passed Senate Proposed Bill 2500: Appropriations, a proposed state budget for the 2020-2021 fiscal year. The proposed Senate budget invests in Florida's teachers, state employees, and environment while maintaining $3.5 billion in total reserves. The state budget includes $500 million for a new Teacher Salary Increase Allocation, along with $325 million in increased flexible funding through the Base Student Allocation, which districts can invest in teachers and school district personnel. $643.6 million is appropriated to address water quality and protection in order to restore and preserve Florida's unique environment.

The Senate budget also invests in hardworking state employees with $403 million to fund across-the-board salary increases for state employees, as well as health insurance and retirement benefits. Additionally, the Florida Senate's budget continues to prioritize critical areas such as hurricane recovery, tax relief for Floridians, protection for Florida's vulnerable populations, health and human services, transportation and elections security.

Legislation Working to Divert Girls from Juvenile Justice System Passes Senate

Senate Bill 1056: PACE Center for Girls by Senator Wilton Simpson unanimously passed the Florida Senate. This legislation creates Florida statute authorizing the Department of Juvenile Justice to contract with PACE Center for Girls to provide services including education, counseling, training, and advocacy to girls and young women as an alternative to commitment and institutionalization. This legislation would also allow for future recurring funding for these services, provided funds are appropriated.

The PACE Center for Girls (PACE) is a non-profit organization whose mission is to provide girls and young women an opportunity for a better future and is recognized as a national model for reducing recidivism and improving school success, employment, and self-sufficiency. PACE has 21 centers in Florida, which serve over 3,000 girls and young women per year.

Pro-Law Enforcement Legislation Passes Senate

The Florida Senate unanimously voted to approve Senate Bill 476: Law Enforcement Vehicles, by Senator Ed Hooper. This legislation ensures law enforcement officers have the ability to park their patrol cars at their homes without fear of penalties or fines from homeowners or condominium associations. SB 476 targets an issue that arose after a Clearwater police officer was threatened with daily fines by her homeowners association for parking her squad car outside of her home.

The Florida Senate stands with our law enforcement and is committed to ensuring they feel welcome in our communities and neighborhoods throughout the Sunshine State.

AMERICAN OVERSIGHT

Sincerely,

Senator Lizbeth Benacquisto

Feds consider a plan to protect Miami-Dade from storm surge:

10-foot walls by the coast

BY ALEX HARRIS

Climate change threatens to dramatically alter the coastal landscape of Miami-Dade in coming decades - one way or another.

It's not just rising seas and the threat of stronger hurricanes that could do it. The emerging federal plan to protect communities from those climate risks could also remake entire neighborhoods - starting with running high walls, something akin to I-95 sound barriers, down miles of streets now lined with thousands of homes and businesses.

To get the land it needs for the 10- to 13-foot-high walls, the Corps could seize more than 350 properties through eminent domain. The plan also envisions massive moveable storm surge barriers at the mouths of Miami's rivers and major drainage canals along Biscayne Bay. It would also elevate 10,000 homes and floodproof 7,000 buildings.

All those proposals also come with an equally stunning price tag: An estimated $8 billion, similar to the original cost estimate to restore the entire Everglades (a number that has since easily doubled).

These new details come from a presentation the Army Corps gave Miami-Dade County in January and the Miami Herald obtained with a public records request - ahead of the formal release of its draft suggestions this spring. A final decision won't come for more than a year.

The Corps, the federal government's engineering arm, has been tasked with coming up with solutions to protect 2.8 million people and $311 billion in property value from the more destructive hurricanes and rising seas climate change is expected to bring to the region. The Army Corps plan looks to 2080, when they predict South Florida could see more than three feet of sea rise.

The big question, obviously, is where would these walls go? The initial maps, planners stress, are far from concrete.

AMERICAN OVERSIGHT

"How do we establish the location of the wall and understand the consequences of that option," said James Murley, the county's chief resilience officer. "Those are our questions."

The draft presentation shows five separate lengths of what are labeled as storm surge barriers or SSBs: crossing the Miami River, on the coast of Brickell, along the water by Edgewater and two roughly tracing Biscayne Boulevard in Miami Shores and North Miami. The walls are nearly contiguous, except for a large gap near the Upper East Side.

Each of them appears to be several miles long, but the Corps did not offer specifics on how many miles of walls were proposed.

When crossing roads or water, the walls would have gates that swing closed for a storm but stay open the rest of the time.

Marco Ruiz *ARMY CORPS OF ENGINEERS*

At 10 to 13 feet high, the walls would be designed to stop storm surge during a hurricane. They would be ineffective against sea level rise, because the porous rock underneath Miami allows water to seep through.

That could be a blessing for residents on the inside of the wall, but not so much for property outside of it.

Susan Layton, the Army Corps Chief of Planning and Policy for the Norfolk District, said the lines on the map are just estimates and will require much more research to figure out precisely where and how high the walls would need to be.

"Certainly not this part in the study process and not until later in the design would we have the information we need to decide where a flood wall would go," she said. "We are still gathering that information."

Before it builds walls, the Army Corps has to consider how they would affect everything from the environment to the real estate market to the lives of the residents nearby.

"When you build such a big structure you're going to have some impacts on almost everything, but we'll do our best to minimize those impacts," Layton said.

In the presentation, the Corps mentions that acquiring the land needed to build the floodwalls and storm surge barriers could involve forcing owners to sell their property, a process known as condemnation or eminent domain. They estimate they would buy out, relocate or purchase a part of 359 properties in Miami-Dade, many of which are condominiums.

At one point, it notes that Miami-Dade County "has yet to determine willingness to pursue acquisition via condemnation, if necessary."

"We try to avoid the use of eminent domain. If you're talking about a large structure like a flood wall, sometimes there's no way to avoid acquisition," Layton said. 'It's never our first choice."

Read Next

REAL-ESTATE-NEWS

As seas rise, your coastal home in Florida could lose value. One report says 15% by 2030

JANUARY 16, 2020 6:47 AM

Like any local government, Miami-Dade has the power to compel property sales as long as it follows the law. Murley said any possible use of eminent domain would have to be "vetted completely," but did not rule out the possibility.

"As this discussion has proceeded, we've said this is an area in our community that would have to be very well understood," he said.

A central point of this plan to protect Miami-Dade relies on barriers across the mouths of the Miami River, Little River and Biscayne Canal. The barriers would be designed to remain open most of the time but closed just before a hurricane came through. They protect inland areas from the surge of ocean water that comes with tropical storms.

To make them work, they'd have to connect to floodwalls on either side.

"There are surge barriers throughout the world and it's something we're looking at more and more often in the U.S.," Layton said.

The plan would also involve elevating 10,000 properties and floodproofing another 7,000. Floodproofing includes anything from installing flood barriers at doors to using flooring that can stand to be flooded repeatedly.

Those numbers could decrease, Layton said, as plans solidify. She said details on how exactly they would go about picking which buildings needed to be lifted or renovated and how it would get paid for is something the county would likely be in charge of deciding.

"It's been done differently throughout the nation, based on local needs and what works best for the community," she said.

The plan also calls for mangrove replanting on the coast of Cutler Bay. So-called natural solutions

AMERICAN OVERSIGHT

like mangroves have been shown to break up the strong waves from hurricanes as well as clean the water and store carbon dioxide.

Miami's plan to survive impacts of climate change: figure out a way to pay for it
JANUARY 23, 2020 12:34 PM

The report is an update from a draft set of options suggested in June, when the Corps held workshops and asked people to choose which solutions they preferred. This presentation shows the Corps is leaning toward option seven, the most comprehensive and expensive of the bunch.
It also shows ideas the Corps considered but decided not to pursue, including raising the causeways and building barrier islands.
Because this is not yet an official plan from the Army Corps, Miami-Dade has no formal position on the concept, Murley said.
"We think it's important to get to the point where we have a fully established document. That is forthcoming," he said.
The Corps plans to release a formalized version of this plan around May, as well as hold a public meeting and accept comments from the public for more than a month.
The final version of the report won't be done until October 2021, then it's up to Congress to find the money for the projects it recommends. On an aggressive timeline, that means project design and engineering wouldn't get started until 2023 and construction wouldn't begin until 2026.
The Corps is also working on a similar study of the Florida Keys, but instead of giving Monroe County officials a presentation via PowerPoint last month, officials presented it as an online webinar. Monroe County said it did not have a copy of the webinar to provide the Miami Herald in response to a public records request.
The vast majority of the cost - 65 percent - would be borne by the Army Corps. Miami-Dade and its cities could pick up the rest of the tab. Layton said the $8 billion cost estimate is likely to change as the plan gets more detailed.
The presentation also said the measures would save the region $2 billion a year in avoided damages and other benefits.
"These are all recommendations that are continuing to evolve," Layton said. "When we release that draft report we hope we will receive lots of feedback."
To send comments about the draft plan to the Army Corps, email Alicia Logalbo at alicia.logalbo@usace.army.mil or call 757-201-7210.

CONTACT YOUR LEGISLATOR

There are State Legislators and Federal Legislators.
Not sure who your State House Representative and State Senator are? **HERE'S THE LINK** to find them. Phone calls are best. They mostly ignore emails (sad, but true).
Need to find out who your U.S. Congressperson or U.S. Senator are? THIS LINK tells you who they are. You should call them as well, phone calls are more effective.

Citizens' Climate Lobby

You are invited to the 2020 Citizens' Climate Education Southeast Regional Conference

Saturday 3/28, 8:30 a.m. to Sunday 3/29, 12:30pm

University of Tennessee Conference Center

Knoxville, Tennessee

Register Now

Citizens' Climate Lobby (CCL) and Citizens' Climate Education (CCE) provides education about the climate crisis that helps to build political will for our elected representatives to take effective action on climate change. Optimism and volunteer support has allowed us to achieve the impossible, including the introduction of bipartisan climate legislation in both the U.S. House and U.S. Senate in late 2018.

Our Regional Conference is an opportunity for newcomers and experienced members to come together, to learn, practice skills, inspire each other, network, and strategize in moving our country toward climate solutions.

Register Now

Sponsored by Kroger's Zero Hunger/Zero Waste initiative.

For hotel locations and information: https://www.visitknoxville.com/hotels/find-by-region/

NOTE: There are limited student and low-income scholarships available for those who qualify. Please inquire at the contact email below.

For more information contact: Chet Hunt (chunt51@comcast.net)

We look forward to seeing you in March!

CREW, Clean Renewable Energy Worldwide, has set out to decentralize power production by allowing each building to own the switch from the old model of energy production to the new model that empowers people. We educate everyone on the option of solar and build a winning relationship by "spreading sunshine" through residential and commercial solar installations.

Residential solar maximizes the benefits of the sun to provide energy and increase property values. A homeowner directly improves the environment by reducing their carbon footprint. A home installation of 5kW equates to:

15,227 gallons of gasoline saved
18 homes electricity use annually
3,470 trees being planted
48 tons of landfill waste

The property value increase is based on the size of the system. According toNational Renewable Energy Laboratory a home's value increases by $20 for every $1 in energy bill savings.

It can also be calculated as $5,911 for each 1 kilowatt (kW) of solar installed according toCleanTechnica, that is $29,555 for a 5kW system.

IS NATURAL GAS A FOSSIL FUEL? - Yes!, Clean? No.

Fossil fuels are the energy of the past. With new technologies like wind, solar, and advanced batteries in our hands, we can power today and tomorrow with clean, reliable energy that doesn't harm our health or destroy our planet.

The shift to a clean energy economy is on - and accelerating by the day.

Year after year, the cost of wind, solar, and other renewable energy technologies continues to fall. In more and more regions of the US and around the world,

AMERICAN OVERSIGHT

energy from renewables is as cheap or cheaper than dirty fossil fuel energy.

Which brings us straight to an increasingly popular fuel that many are putting a lot of faith in: natural gas. A fuel often praised for its affordability. A fuel some go so far as to call clean - or at the very least, cleaner.

A fuel that inspires a lot of wishful thinking.

According to the **US Energy Information Administration (EIA)**, "Coal, crude oil, and natural gas are all considered fossil fuels because they were formed from the buried remains of plants and animals that lived millions of years ago."

So, to answer the headline question - **yes, natural gas is a fossil fuel**.

But now, let's dig just a bit deeper so we're all on the same page about exactly what that means as well as the reality of what we're dealing with when it comes to natural gas, its extraction, processing, and use.

WHERE NATURAL GAS COMES FROM

Natural gas, like all fossil fuels, is a non-renewable source of energy formed in the earth over approximately the past 550 million years, typically from the remains of marine microorganisms and plants.

Over time, these organic remains decompose and become buried under more and more dirt, rock, and other decaying materials. This process seals off oxygen and puts this organic matter under ever-increasing amounts of heat and pressure, leading to a thermal breakdown process that ultimately converts it to hydrocarbons.

The lightest of these hydrocarbons occur in a gaseous state known collectively as "natural gas," which in its pure form is a colorless, odorless gas composed primarily of methane.

Natural gas is found in underground rocks called reservoirs. These rocks have tiny spaces, called pores, which allow them to hold the natural gas, as well as water and sometimes oil. An impermeable rock - appropriately called a "cap rock" - traps the natural gas underground, where it stays until it's extracted.

Conventional natural gas can be extracted by drilling wells. However, there are also "unconventional" forms of natural gas - like shale gas, tight gas, and coal bed methane - and these have extraction techniques all their own.

One, in particular, we feel confident you've heard of - hydraulic fracturing, or "fracking."

Fracking is "the process of drilling down into the earth before a high-pressure water mixture is directed at the rock to release the gas inside. ... The process can be carried out vertically or, more commonly, by drilling horizontally to the rock layer, which can create new pathways to release gas or used to extend existing channels."

Fracking is used primarily to extract natural gas from shale, and its development has played a big role in the increased production of natural gas in recent years.

In the US, Texas and Pennsylvania tower over all other states in terms of **natural gas production**. The Lone Star state produced around 23 percent of US natural gas in 2017, while the Keystone State produced about 20 percent. Oklahoma and Louisiana follow with 8 percent each.

HOW DOES IT GET FROM THE GROUND TO MY LIGHT SWITCH?

Natural gas is largely used for domestic or industrial heating and to generate electricity. It's also used in industrial chemical processes that we will get into pretty directly. And the journey it takes from rocks underground to your home, office, or school is rife with potential problems.

Once extracted, natural gas is typically sent through small pipelines to plants for processing. There, the various hydrocarbons and fluids are separated from the pure natural gas to produce what is known as "pipeline quality dry natural gas."

This higher-quality, processed gas is then transported through feeder pipelines to distribution centers for use - or it's sometimes stored in underground reservoirs to be used later.

At many stages of this process, the methane - which is a powerful heat-trapping greenhouse gas (see below) - can leak through faulty pipes and other infrastructure into the atmosphere. These leaks **can be substantial**, and significantly accelerate global warming.

Proponents like to shout about natural gas as a "bridge fuel" to a low-carbon economy, but these leaks and all the extra heat they help trap likely eliminate any of the alleged benefits.

But that's not quite the full picture, either. Because there are actually two types of natural gas - dry and wet - and the story of the latter has as much to do with refrigerants ,and plastic production as it does the electrical outlets in your home.

Dry natural gas is mostly methane, while wet gas also contains compounds like ethane and butane. These natural gas liquids (NGLs) are separated from the pipeline quality gas described above. Then, they're utilized at sites like ethane cracker plants to manufacture products like plastics.

AMERICAN OVERSIGHT

The bad news is that cracker plants and other parts of gas infrastructure produce all kinds of volatile organic compounds (VOCs) like benzene, **which can cause cancer in humans**. And these chemicals have a way of getting into the air and water that workers and local communities breathe and drink every day. The result is often a ticking time bomb for public health.

>> ***Learn more about the dangers of petrochemical facilities here.*** <<

IS NATURAL GAS A CLEAN FORM OF ENERGY?

No.

See, that was easy.

When people make this argument, they're (mostly) referring to one thing in particular that is indeed true of natural gas: a new, efficient natural gas power plant **emits around 50 percent less carbon dioxide (CO2) during combustion** when compared with a typical coal-based power plant, according to the **National Energy Technology Laboratory (NETL)**.

To be sure, we should take seriously any source of energy that reduces our dependence on coal and oil, the primary sources of the carbon emissions that drive climate change. But let's also engage in some real talk: 50 percent less CO2 isn't zero CO2, and reaching net-zero greenhouse gas (GHG) emissions by the second half of this century is essential to the long-term health of our planet and ourselves.

Plus, CO2 isn't the only harmful GHG emission generated by natural gas development. Which brings us back to methane.

Methane is a very, *very* powerful greenhouse gas. In the atmosphere, compared to carbon, it's fairly short-lived: only about 20 percent of the methane emitted today will still be in the atmosphere after 20 years. However, when it first enters the atmosphere, **it's around 120 times more powerful** than CO2 at trapping heat and 86 times stronger over a 20-year period.

"While methane doesn't linger as long in the atmosphere as carbon dioxide, it is initially far more devastating to the climate because of how effectively it absorbs heat," according to the **Environmental Defense Fund (EDF)**.

Bottom line: We're still talking about a fossil fuel here, one that still contributes to climate change when burned.

Period.

PERSONAL KNOWLEDGE IS PERSONAL POWER

So what do we do? We fight back.

Fossil fuels (all of them!) are the energy of the past. With new technologies like wind, solar, and advanced batteries in our hands, we can power today and tomorrow with clean, reliable energy that doesn't harm our health or destroy our planet.

We know our fight can seem daunting, which is why working together to take action is so important. To get where we need to go, we need everyone.

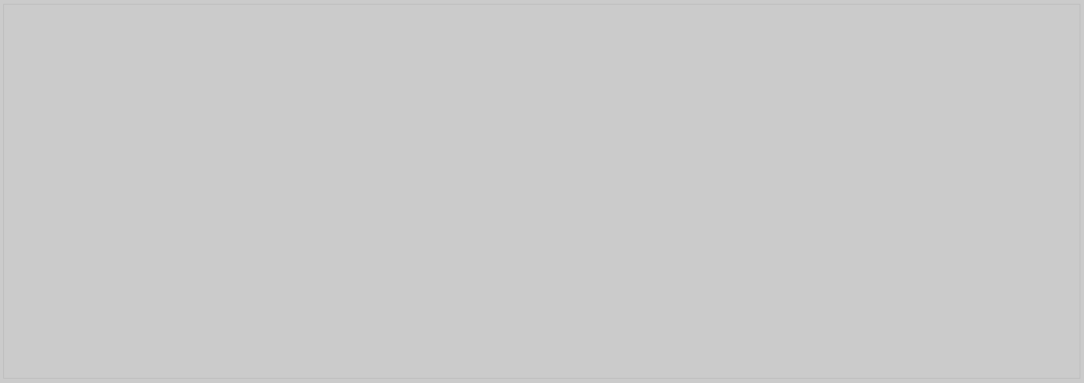
That's why programs like our own **Climate Reality Leadership Corps** and **local chapters**, as well as initiatives like the **County Climate Coalition**, are so important.

The **County Climate Coalition** is a nationwide community of counties that have signed on to uphold the Paris Agreement. Once your county signs up, you become part of a national network - offering real opportunities for progress on climate at a time when it matters most.

Whether you're in California or Maryland or any state in between, within the County Climate Coalition, you'll have allies who share your goals and want to work together to protect our future.

This is your opportunity to take a stand.

LEARN MORE SO YOU CAN FIGHT BACK



But to take a stand, you must be ready with the facts.

Download our free new fact sheet, ***Climate 101: Natural Gas***, to get more detail on natural gas, fracking, the dangers of methane emissions, and why it's so important that we act together to fight its expansion.

In it, we offer up the facts - **and just the facts**.

If natural gas expansion comes at the expense of renewables, the greenhouse gas emissions threat to our climate continues. **That's why it's so vital to learn more about why natural gas is a bridge to nowhere now.**

AMERICAN OVERSIGHT

Babcock Ranch

click for website

To understand how solar works at Babcock Ranch, first consider the solar field's massive scale: 440 acres.

How big is that? Imagine 333 football fields of solar panels soaking up the sun's energy.

In a partnership with Florida Power & Light, Babcock Ranch developer Kitson & Partners provides a massive 74.5 megawatts of energy. The 330,000 solar panels will power the 19,500 homes and 6 million square feet of commercial space when Babcock Ranch is built out.

The solar field is located north of the town of Babcock Ranch on land donated by Kitson and is owned and operated by Florida Power. The FPL Babcock Ranch Energy Center will produce so much energy that there will be extra left over to power other areas of Southwest Florida.

How Babcock Ranch Harnesses the Sun

Florida Power harnesses the energy from the sun on a large scale. Here's how solar works at Babcock Ranch:

As sunlight hits the solar panels, the energy is converted into direct current (DC) electricity before flowing into power inverters where it's converted to alternating current (AC). The electricity then travels through transformers and the voltage is boosted for delivery into the grid and distributed to FPL customers to power their homes and businesses.

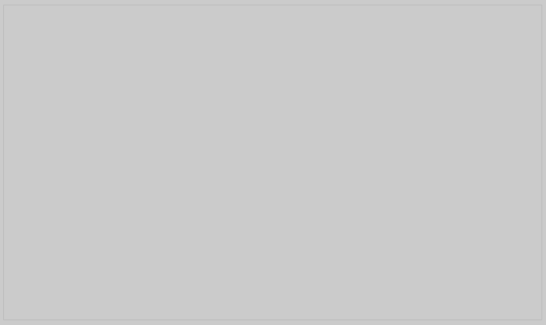
AMERICAN OVERSIGHT

The FPL Babcock Ranch Energy Center is the most cost-effective way to build solar power in Florida. That's because large-scale solar plants such as this one can produce 2.5 times more energy for the money than residential rooftop solar.

The energy generated at the solar-energy plant flows to the substation located next to the water and wastewater facility and into the town of Babcock Ranch. Any energy that is left over after fulfilling the needs of the town flows into the FPL power grid to serve customers outside the town.

Electric power always flows from the nearest generation, so during the day the town will use energy from the FPL Babcock Ranch Solar Energy Center. When the sun goes down and the solar plant is not generating energy, Babcock Ranch will pull electricity off the grid from the closest FPL natural-gas power plant.

Other Solar Initiatives



In addition to the FPL Babcock Energy Center, the town has additional solar initiatives to capture energy from the sun.

For example, solar panels will be installed on the roofs of commercial buildings in downtown Babcock Ranch's Founders Square. These are the first of several solar "micro-communities" that will expand solar-generating capacity as the town grows.

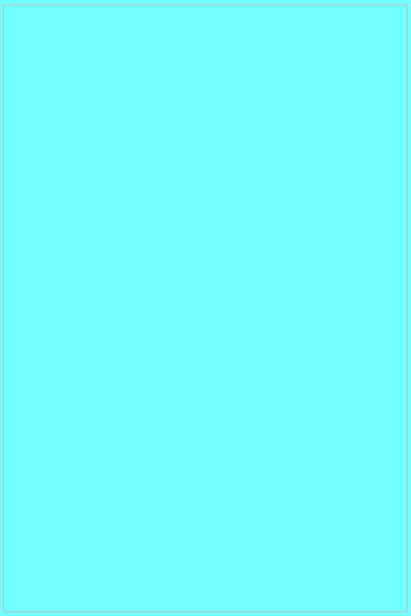
In addition, solar panels on poles called "solar trees" will be installed at Founder's Square and other neighborhood parks. These solar trees are a focal point for solar-energy education and will allow people to charge their phones and other handheld devices.

Homeowners too will be able to install solar panels on their roofs. It's a standard option offered by all the homebuilders at Babcock Ranch.

Learn more about the solar town by calling us at 877-484-4344.

click for website

A large-scale universal solar installation, such as one of FPL's solar power plants, is the fastest and most cost-effective way to bring solar energy to more Floridians. Since the 1980s, FPL has been working to advance solar in Florida, and today, we are able to build solar plants cost-effectively - meaning they save our customers money over time. We're adding more solar all the time while keeping our customers' bills among the lowest in the nation.



More than 30 million Solar Panels by 2030

Already one of the cleanest energy companies in the nation, FPL recently announced a groundbreaking '30-by-30' plan to install 30 million solar panels by 2030, making Florida a world leader in solar energy. This year, solar will outpace coal and oil combined as a percentage of FPL's energy mix. In other words, we'll soon be generating more energy from the sun than from power plants

AMERICAN OVERSIGHT

fueled by coal and oil.

Commentary

FPL CEO: "Short-term thinking" worries me

As president and chief executive officer of the largest electric utility in the United States, I'm often asked the following: What keeps you up at night?

The short answer - everything.

Candidly, it's my job to worry, whether it's about hurricanes, cybersecurity threats or the safety and well-being of Florida Power & Light Co.'s nearly 9,000 employees and their families.

But, there is one issue that truly worries me: short-term thinking.

As we enter 2020, it's more apparent than ever that short-term thinking is prevalent and pervasive. We've all become accustomed to whipping out smart devices in search of quick, easy, instantaneous answers. Real solutions to real problems are almost never easy and can rarely be described in simple, 30-second sound bites.

I will tell you that if I ran FPL as a short-term thinker, I certainly wouldn't be doing my job very effectively and our customers would undoubtedly pay a heavy price.

That's why, at FPL, we spend a tremendous amount of time and energy trying to look over the horizon. Serving nearly 11 million Floridians with clean, affordable, 24/7 power requires us to plan and, most importantly, act with a long-term vision.

Smart, long-term investments, however, are rarely quick and easy to execute.

Take, for instance, FPL's decision nearly 20 years ago to modernize our fleet of power plants, systematically tearing down aging, oil-fired plants and replacing them with ultra-efficient clean energy centers that run on U.S.produced natural gas.

At the time, short-term thinkers relentlessly attacked FPL, arguing the old, inefficient plants were fully paid for and customers shouldn't be forced to pick up the tab for new power plants. The plants had worked for decades and didn't violate any environmental rules, so why change?

Fortunately, these short-sighted arguments didn't prevail.

Fast forward to today, and customers continue to benefit from our state-of-the- art power plants that produce more electricity using much less fuel than those they replaced. Not only has FPL eliminated 130 million tons of carbon dioxide emissions, customers have also saved $10 billion and counting in fuel costs. That's $10 billion in fuel, mostly imported oil, that we simply didn't buy. Instead, that money stayed in customers' pockets and Florida's economy.

We're continuing to transform our power-generation fleet, making Florida a world leader in solar energy by installing more than 30 million solar panels by 2030. In fact, we'll bring 10 more solar power plants currently under construction into operation in 2020 alone.

Again, this didn't happen by accident. FPL began researching and building small solar projects in 1984, long before it was cool to be green! Back then, solar wasn't economically viable. But by staying open-minded and being willing to listen and work with others throughout the industry and community, we are now bringing customers unprecedented amounts of solar power while keeping bills among the lowest in the country.

We continue to invest billions of dollars annually in Florida and our steadfast commitment to clean, efficient energy and our long-term thinking is why we're able to lower typical residential monthly bills by nearly $4 starting this month.

FPL is also continuing to build America's strongest, smartest energy grid with a new emphasis on putting more neighborhood power lines underground. While this will take decades to complete, it's unequivocally the right thing to do for the resiliency of our state, both during day-to-day operations and during major storms which will, undoubtedly, hit us again.

Here's the bottom line. Sometimes doing the right thing isn't always easy. Sometimes, it means making a decision that may not benefit you directly in the short term, but instead positions your children, your grandchildren and future generations for success. My parents, who grew up with very little during the Great Depression and lived through World War II, taught me that. They worked hard to provide us with opportunities they never had and I believe it's our responsibility to do the same.

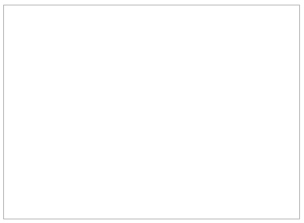
As short-term thinkers come and go, my commitment to you is that FPL will stay focused on delivering best-in-class value and reliability while never wavering from our long-term approach.

Eric Silagy is the president and chief executive officer of Florida Power & Light Co.

AMERICAN OVERSIGHT

FPL to build the world's largest solar-powered battery

and drive accelerated retirement of fossil fuel generation - Innovative modernization plan will replace a pair of aging natural gas power generating units with clean and renewable energy, saving FPL customers more than $100 million while eliminating more than 1 million tons of carbon dioxide emissions -



The FPL Manatee Energy Storage Center's battery system is projected to have four times the capacity of the world's largest battery system currently in operation - Charged by an existing, co-located FPL solar power plant, the planned battery storage center will increase the predictability of solar - extending its benefits even when the sun is not shining

The urgency of climate change demands that we transition - quickly, responsibly, and equitably - to a clean energy future. We need to advance solutions that can rise to the scale of our challenge. **Offshore wind power is one of those solutions.**
The urgency of climate change demands that we transition - quickly, responsibly, and equitably - from a fossil fuel dependent world to a clean energy future. We need to advance solutions that can rise to the scale of our challenge. Offshore wind power is one of those solutions, and states along the Atlantic Coast are preparing to power millions of homes and businesses with its clean, local power.
Importantly, we are also at the table ensuring wildlife are protected every step of the way. From choosing the right locations to negotiating construction schedules that accommodate the migration of critically endangered North Atlantic right whales - and much in between - we are speaking up for birds, marine wildlife, and communities. Offshore wind power can and must be part of an energy future that allows wildlife and people to thrive. One we can all be proud of. To learn more and to help us seize the opportunity off our shores, please visit offshorewind.nwf.org.
Thank you for all that you do for wildlife.

Amber Hewett

Sincerely,
Amber Hewett,
Campaign Manager, Offshore Wind Energy Campaign
The National Wildlife Federation

More than 2,190 Collier County students, teachers and parents, braced in bright orange vests and a willingness to get wet and muddy, stepped out of the classroom and into Big Cypress this year for a day of learning, adventure and fun.

As the school year comes to a close, we want to say THANK YOU to the **Community Foundation of Collier County, to South Florida photographer Clyde Butcher and his family, to this year's Wine & Wildlife attendees** and the many others who gave generously this year to support the Swamp Water and Me Program (SWAMP) in Big Cypress National Preserve.

This year's program was a success in so many ways... for the 6th-grade students who spent a day in nature ("I feel so brave," one student said) and the teachers who joined them... that we can't wait to do it again. Read our final program report to find out why...

AMERICAN OVERSIGHT

Friend of The Trust for Public Land,

Sometimes it seems as though every time we take a step forward, we get pushed back a step soon after.

You were undoubtedly as pleased and proud as we were when the public lands package S.47 was signed into law **because it permanently reauthorized the Land and Water Conservation Fund.**

However, this great news came the day after President Trump submitted his proposed 2020 budget to Congress, **which virtually eliminates funding for the LWCF!** Neutralizing America's best conservation program right after reauthorizing it is contradictory, unacceptable, and places the future of our public lands at risk.

And so, we are once again fighting on Capitol Hill for the protection of public lands. We won't rest until Congress fully funds the LWCF - that's $900 million, each and every year. But that is not our only goal at The Trust for Public Land. Here are several more:

- **Protecting public lands in other ways,** such as codifying the Antiquities Act, which presidents have used for more than a century to protect outstanding natural, historical, and cultural resources.
- **Creating close to home community green spaces** - giving people access to parks, gardens, and trails, keeping families active and healthy.
- **Combatting climate change** through our **Climate-Smart Cities™** program, helping cities mitigate the effects of rising sea levels, increased flooding, and heat waves - as well as enhance carbon-free transportation options.

The Environmental Issue Republicans Can't Ignore

Red-state governors are focusing on water issues-which could be a bridge to climate change.

Cynthia Barnett
Environmental journalist and author of three books on water

When Florida Governor Ron DeSantis declared on his inauguration day that

AMERICAN OVERSIGHT

water is "part and parcel of Florida's DNA," and vowed to fight the pollution and toxic algae that choked the state's beaches and fresh waters last summer, his critics rolled their eyes to the Tallahassee heavens above. DeSantis had a poor environmental voting record in Congress. He'd helped found the House Freedom Caucus, which urged President Donald Trump to eliminate the Clean Water Rule and dozens of other environmental safeguards.

But two days later, the critics looked to those same heavens in wonder. Florida's new governor began his tenure with one of the furthest-reaching environmental orders in state history, calling for a record $2.5 billion for Everglades restoration, a harmful-algae task force, a chief science officer, and an office of resilience and coastal protection to fund and coordinate Florida's response to rising seas. Under the headline "Florida's Green Governor," the state's largest newspaper, the *Tampa Bay Times*, declared that DeSantis "has done more to protect the environment and tackle climate change in one week than his predecessor did in eight years."

DeSantis's actions reflect a broader effort by some red-state governors to confront the unifying issue of water, even though they remain quiet, if not completely silent, on the larger crisis of a warming world.

MORE BY CYNTHIA BARNETT

Mysterious Glowing Clams Could Help Save the Planet
CYNTHIA BARNETT

Making Perfume From the Rain
CYNTHIA BARNETT

Concern about climate change has surged to record levels over the past year. Yet anti-science operatives funded by the fossil-fuel industry still relentlessly spread misinformation; the recent video "Why Climate Change Is Fake News" has drawn 10 million views on Facebook. And as his administration systematically rolls back environmental regulations, Trump seems to like stoking distrust of the scientific establishment. It is no surprise, then, that political affiliation continues to shape belief: 86 percent of Democrats believe the climate is changing, compared with 52 percent of Republicans, according to a University of Chicago/AP poll released last week.

Read: They're here to fix climate change! They're college Republicans.

What's happening to water around the nation, however, permits no alternative claims: the piles of stinking algae and rotting fish heaped up on both coasts of Florida last year. The hundreds of thousands of gallons of raw sewage and hog waste that swirled in the North Carolina floodwaters after Hurricane Florence. The chalky walls-now too large to be called bathtub rings-exposed as Arizona's Lake Mead drops to record-low levels.

Like DeSantis, Arizona's Republican Governor Doug Ducey focused on water in his first major address of the new year-without using the words *climate change*. During his reelection campaign, water was "one of the issues I was asked about most by real people," he said. Noting that Arizona faces a January 31 deadline to figure out how to reallocate its dwindling portion of the Colorado River, Ducey urged the legislature to see beyond politics and partisanship to "do the things that matter and secure Arizona's future."

AMERICAN OVERSIGHT

"At the top of that list," he said, is "securing our water future."

It was the same in Idaho, where newly elected Republican Governor Brad Little devoted part of his State of the State speech to "Idaho's lifeblood"-water-spotlighting the once arcane issue of Eastern Snake Plain Aquifer replenishment.

These red-state GOP governors are not taking aim at greenhouse-gas emissions like their blue-state Republican counterparts Governors Larry Hogan of Maryland, Charlie Baker of Massachusetts, and Phil Scott of Vermont. Still, environmentalists should not dismiss their momentum on water. In several states won by Trump, water, literally a chemical bond, is also proving a bond that brings disparate people, groups, and political parties together around shared concerns for the Everglades, the Great Lakes, the Colorado River, and other liquid life systems. "We have this phenomenon where one of the ways to work on climate change without triggering the cultural wars is to work on water," says John Fleck, the director of the University of New Mexico Water Resources Program, who researches the Colorado River and solutions to water scarcity.

Read: The GOP just lost its most important climate moderates

Water progress is climate progress. It takes an intense amount of energy to extract water, treat it, and dispose of it, and to clean water when it's polluted. Nationally, water consumption peaked in 1980 and has dropped steadily, even as the economy and population have grown. That shift, in waterworks and minds, affirms Americans' willingness to live differently once we understand how painless the better path is. The same will be true for decoupling carbon growth from economic growth, though it may have to wait out Trump: U.S. carbon-dioxide emissions surged last year, even as a near-record number of coal plants shuttered.

If DeSantis, Ducey, and Little can make strides on water, they will also make strides for the Republican Party, said Christine Todd Whitman, a former EPA administrator and Republican governor of New Jersey. "It comes down to issues of human life and safety," she said, "and that's what we're supposed to be all about." America's Everglades and Chesapeake Bay restorations, Great Lakes compact, Colorado River drought planning, and other hard-won partnerships have taken decades of bipartisan leadership to bear fruit. By preserving and even strengthening those state-federal alliances in the Trump era, the governors help their party salvage a legacy to which the GOP is entitled.

A half century ago, President Richard Nixon pushed the Environmental Protection Agency, the Clean Water Act, and other safeguards in response to a broad public outcry over the industrial and sewage pollution then fouling rivers, bays, and coastlines. This June 22 will mark the 50th anniversary of the 1969 Cuyahoga River fire credited with sparking that outcry. But amid all the events and retrospective articles planned to commemorate that date, the more important one to remember might be 1868. That was the first of at least a dozen times the Cuyahoga burst into flames, sparking a century of pollution disasters, some fatal.

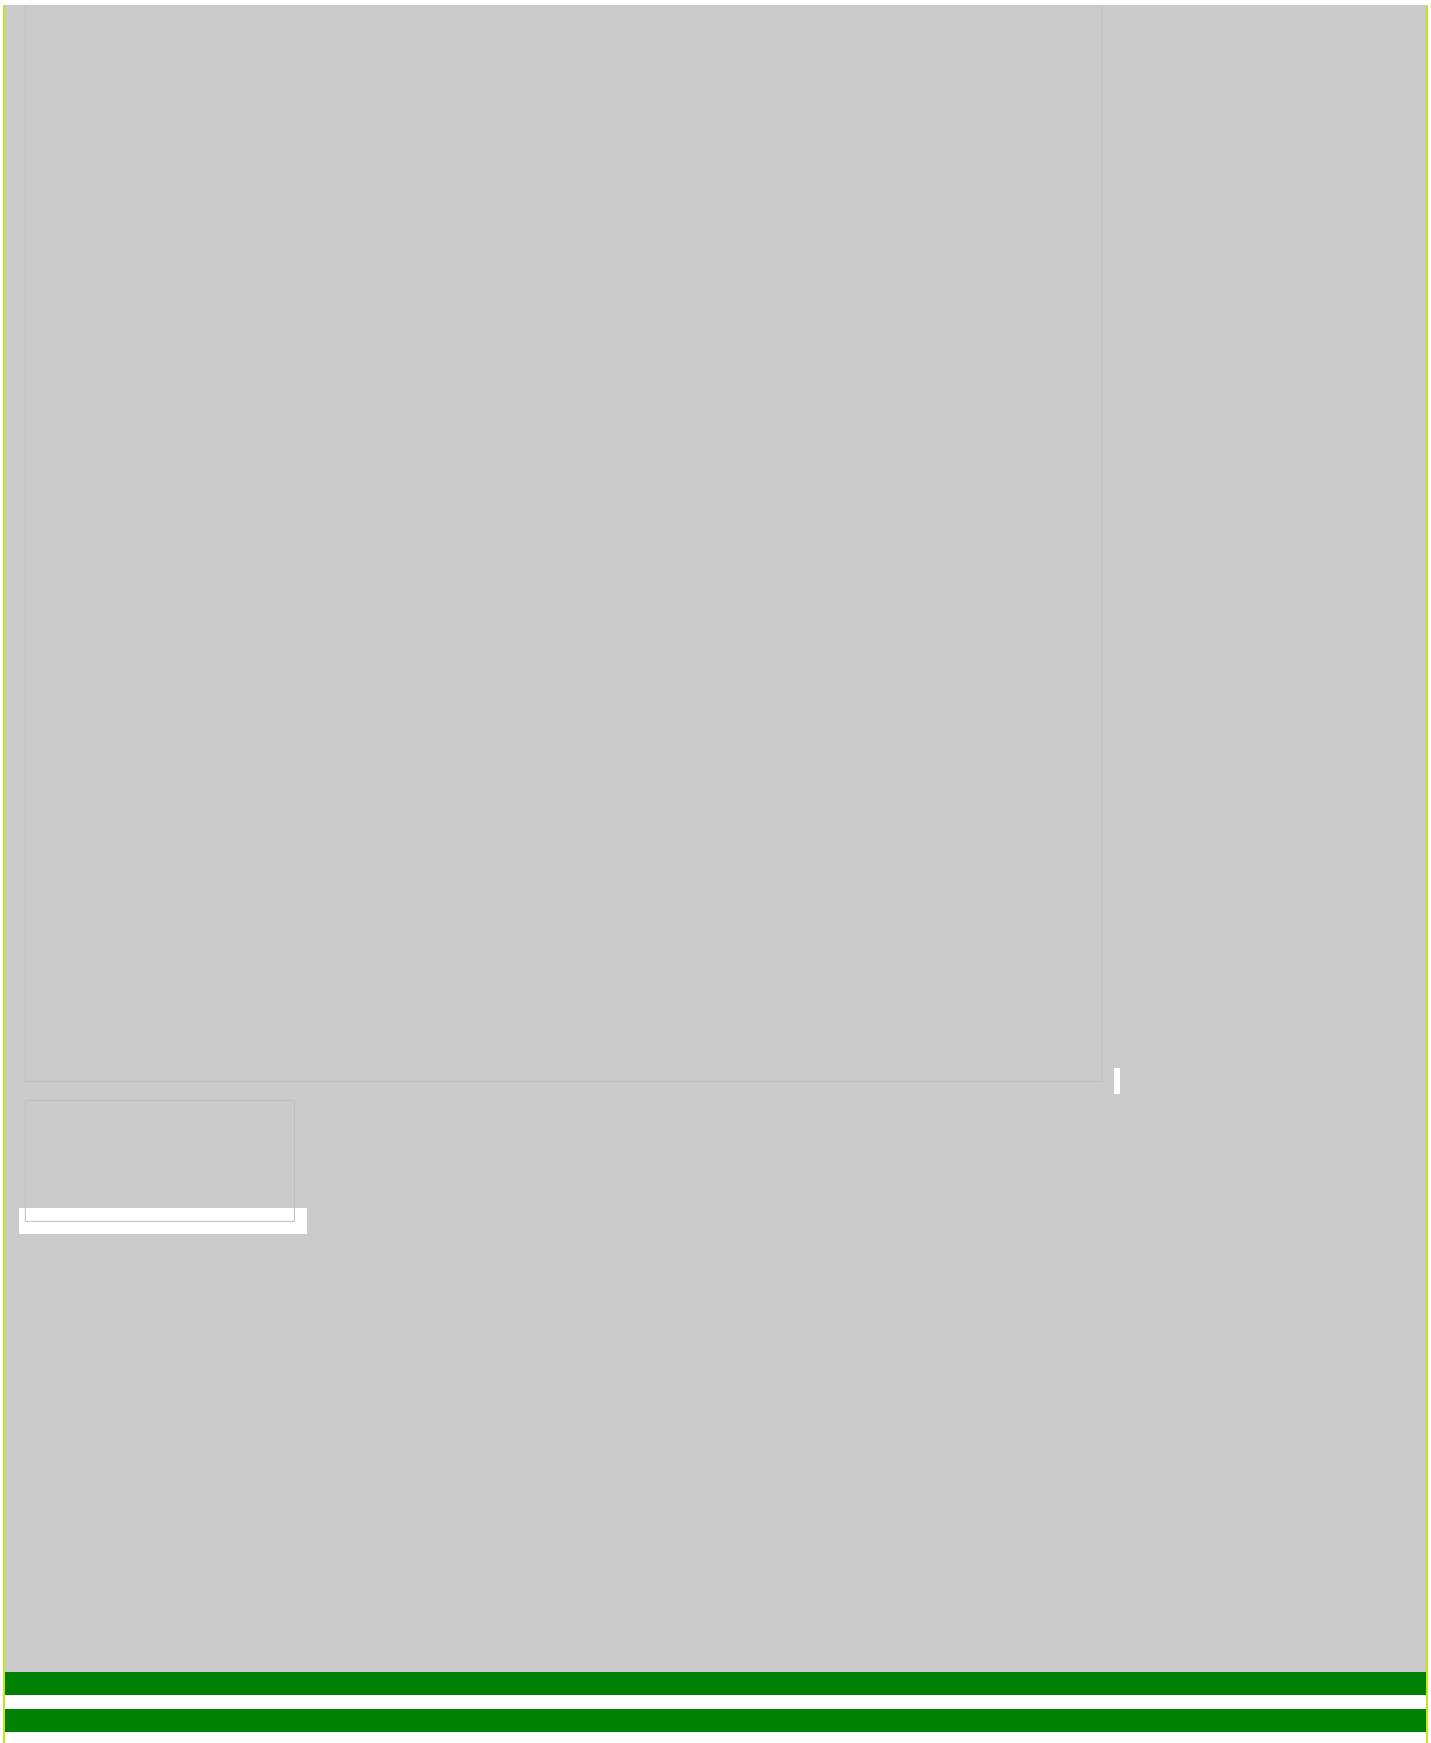
Read: The Republicans who want Trump to fight climate change

All that time, Americans accepted industrial pollution as an inevitable consequence of progress. Now we don't have the hundred years we spent watching the Cuyahoga burn to watch the planet do the same. We must hope that the red-state governors' attention to water will lead them to act on climate change, because the sorry truth is that even the boldest work on water won't mean much if we can't also stop warming.

In the early 2000s, Australia faced a drought so severe that abandoning major cities such as Perth seemed like a real possibility; the continent was feeling the water effects of climate change earlier than the rest of the world,

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003384

For two decades, the Aussies have pioneered desalination, water markets, sewage recycling-and generally some of the most conscientious water habits in the developed world. And yet all that is not enough. It is summer in Australia. This month, record temperatures have contributed to wildfires, horses found dead in dry watering holes, and unprecedented fish kills in the iconic Darling River.



Hundreds of thousands of fish float belly up there, in striking and sickening similarity to Florida's summer. DeSantis said it best: Water issues "do not fall on partisan lines." Nor, ultimately, will climate change.

We want to hear what you think about this article. Submit a letter to the editor or write to letters@theatlantic.com.

When the Comprehensive Everglades Restoration Plan went into effect during the Clinton administration, Florida's great grassy wilderness garnered a host of national attention -- and has since become a breeding ground for environmental dispute. What does it take to "save" a forest? How can it be preserved?
Enter W. Hodding Carter. For an *Outside* magazine feature he's agreed to paddle the ninety-nine-mile waterway in Everglades National Park to examine the landscape from all angles -- physical, political, cultural, and very personal -- and get to the rock-bottom heart of the story. *Stolen Water* is the outgrowth of Carter's journey. Through investigative research, eyewitness accounts, and interviews with key players in the conservation controversy, Carter offers a rare portrait of a national treasure. Utterly important, and at times downright hilarious, *Stolen Water* is a classic American adventure tale, and an environmental parable for our time.

AMERICAN OVERSIGHT

Benefits of Reclaimed Water for Irrigating the Landscape and Protecting the Environment1 (SS587)

George Hochmuth, Laurie Trenholm, Don Rainey, Esen Momol, Claire Lewis, and Brian Niemann
2

Publication #SL385

This publication is part of a series developed to assist Florida homeowners with managing their landscapes to reduce environmental impacts. This is a joint publication of multiple departments and programs in UF/IFAS, including the Florida-Friendly Landscaping™ program, the Department of Soil and Water Science, the Environmental Horticulture Department, and the Center for Landscape Conservation and Ecology. This fact sheet was produced with support from the Florida Turfgrass Association through a Florida Department of Agriculture and Consumer Services Specialty Crops Block Grant.
For the rest of this series, visit **http://edis.ifas.ufl..._landscape_management**.

Introduction

Reclaimed water is water that has been treated in municipal wastewater facilities and is safe to use for designated purposes, including residential landscape irrigation. "Water reuse" is the term used to describe the beneficial application of reclaimed water. Approximately 663 million gallons of reclaimed water are used daily in Florida (Florida Department of Environmental Protection [FDEP] 2012). Florida is a national leader in using reclaimed water, and in 2006 Florida's reuse program received the first U.S. Environmental Protection Agency (EPA) Water Efficiency Leader Award. Using reclaimed water in Florida meets a state objective for conserving freshwater supplies, and preserves the water quality of rivers, streams, lakes, and aquifers. This publication discusses the benefits of using reclaimed water to irrigate the landscape and explains how using reclaimed water helps to protect the environment.

From local roots, Save Our Streams blossomed into a national initiative that raises public awareness about threats to clean water ... and helps every American improve water quality.

It's also the springboard for our truly transformational **Clean Water Challenge** - an ambitious campaign to mobilize volunteers to test water quality in 100,000 more streams by 2022 ... and share those results with their communities.

Following 50 years of success, we're not slowing down - we're setting our sights even higher.

We trained more than 400 new volunteer stream monitors across 13 states just last year ... and our new Clean Water Hub will make it easier to find information about water quality in local streams.

We need your help today to do even more to protect clean water.

- **Mobilize hundreds of volunteers** to monitor more stream sites nationwide
- **Galvanize public awareness** through Stream Selfie and other outreach campaigns
- **Share monitoring results** with policymakers, the media, and communities nationwide

#SAVECLEANWATER

Each week, we feature a photo of a small stream that could lose protection if EPA changes the Clean Water Rule. By sharing a photo of a small stream near you, you help us create a visual library of what's at risk. It's easy - just post your photo to Facebook or Instagram with the hashtag #SaveCleanWater and the city and state where you found the stream. (Location info helps congresspeople see that *their* constituents care about clean water.) Thank you for taking action to #SaveCleanWater!

AMERICAN OVERSIGHT

Ecosystem Restoration

As a result of the engineering performed as early as the 1880s to make south Florida more habitable, the natural flow of water to-and through-the Everglades was severely altered. The construction of roads, canals, and levees created barriers that interrupt the natural flow of water that's necessary for the Everglades to survive.

Upon Congressional authorization of the Comprehensive Everglades Restoration Plan (CERP) in 2000, the federal government and the state of Florida entered into a programmatic 50/50 partnership to restore, protect, and preserve water resources in central and southern Florida, including the Everglades. The Corps is the lead federal agency and the South Florida Water Management District (SFWMD) is the lead state agency in this effort.

In partnership with SFWMD, the Corps is currently planning, designing, and constructing multiple components of the South Florida Ecosystem Restoration (SFER) program, which includes the CERP-the largest ecosystem restoration program in the world.

Progress made in each respective area supports efforts in the others to deliver essential benefits. Every incremental success complements the overall efforts to restore this national treasure. These efforts will ultimately improve 2.4 million acres of south Florida's ecosystem (including Everglades National Park), reduce high-volume discharges from Lake Okeechobee to the estuaries, improve water deliveries to the Florida and Biscayne Bays, and enhance water supply.

For additional background information on Everglades restoration efforts, visit:www.evergladesrestoration.gov/

National Academies of Sciences, Engineering, and Medicine; Division on Earth and Life Studies; Board on Atmospheric Sciences and Climate; Board on Agriculture and Natural Resources; Board on Earth Sciences and Resources; Board on Energy and Environmental Systems; Board on Environmental Studies and Toxicology; Committee on Anthropogenic Methane Emissions in the United States: Improving Measurement, Monitoring, Presentation of Results, and Development of Inventories

Description

Understanding, quantifying, and tracking atmospheric methane and emissions is essential for addressing concerns and informing decisions that affect the climate, economy, and human health and safety. Atmospheric methane is a potent greenhouse gas (GHG) that contributes to global warming. While carbon dioxide is by far the dominant cause of the rise in global average temperatures, methane also plays a significant role because it absorbs more energy per unit mass than carbon dioxide does, giving it a disproportionately large effect on global radiative forcing. In addition to contributing to climate change, methane also affects human health as a precursor to ozone pollution in the lower atmosphere.

Understanding Waterfowl: The Magic of Migration

When and where waterfowl migrate is determined largely by day length, weather, and food availability

By Tom Moorman, Ph.D.

Migration embodies much of what fascinates us about waterfowl. It compels us to wake up at 4 a.m., slog through the marsh, and set decoys before dawn-all in hopes of intercepting a few birds before the majority continue to points unknown. The essence of Ducks Unlimited's mission is to conserve habitat to ensure that future generations can also marvel at the sights and sounds of migrating waterfowl.

Waterfowl are very adaptable. They have evolved with an ability to fly long distances in search of the most favorable habitats and environmental conditions, which can vary year to year based on weather. Migration may seem like an arduous journey, but this behavior enables waterfowl to find food-rich habitats on wintering and migration areas when landscapes to the north are frozen and covered with snow. This allows most of the birds to survive and breed in subsequent years.

Day length, or photoperiod, is the main factor that drives migration. However, changes in day length only prepare birds physiologically for migration. Weather events are largely what stimulate them to actually migrate.

Most hunters recognize that weather affects migration, and many of our most memorable hunts occur on "flight days," when large numbers of birds are moving south on the heels of a powerful cold front. However, waterfowl are flexible in how they respond to weather

AMERICAN OVERSIGHT

conditions, which can affect the timing and distance of their movements. This flexibility can affect the number of birds that we see while hunting. You can blame the weatherman when mild weather causes waterfowl to remain to the north, but remember to thank him when winter arrives early and forces birds to move south far and fast. Whether it works in our favor or not, we cannot control the weather, and the birds are simply responding in a way in which they are hardwired-to migrate only as far as necessary to find food and open water.

Differences in migration timing and distance among waterfowl species are related to the birds' feeding ecology. For example, blue-winged teal, which feed on seeds and invertebrates in shallow wetlands, reliably depart the breeding grounds in August and September because their preferred feeding areas are the first to freeze in fall. Gadwalls, which feed almost exclusively on aquatic plants in slightly larger and deeper wetlands, usually depart breeding areas in October and typically do not wait for winter to arrive before heading south. Like bluewings, they must fuel up, store fat, and depart the breeding grounds before their preferred foods are trapped under ice.

Meanwhile, most diving ducks and mallards may remain up north well into November, until Old Man Winter finally gives them a hard nudge. Canvasbacks, redheads, scaup, and ring-necked ducks typically feed on aquatic plants and invertebrates in larger, deeper marshes that are the last to freeze, allowing them to linger and store fat until bitter-cold temperatures force them to migrate to warmer latitudes.

Mallards sometimes don't arrive on wintering areas until late December, and then in reduced numbers in some years. Mallards, northern pintails, American green-winged teal, and American wigeon consume waste grain in both dry and flooded fields, in addition to feeding on seeds and aquatic plants in wetlands. For these birds, especially mallards, cold weather often isn't enough to send them packing to their winter haunts; significant snowfall must also cover their food supplies in harvested grain fields and wetlands. Mallards in good condition, with fat making up nearly 25 percent of their body mass, can withstand periods of up to seven days without food, allowing them to wait out short periods of harsh weather. If a winter thaw occurs, they may even move north again. This "strategy" enables the birds to minimize the risks associated with migration and allows them to return to the breeding grounds as soon as possible in spring.

Weather also influences migration and winter habitats. Droughts or floods during the growing season can reduce summer plant growth and thereby impact fall and winter food abundance. Fall and winter droughts and floods can also impact food availability. A lack of water, or water that is too deep, can limit access to food resources, while widespread shallow flooding can create extensive new feeding habitats, causing waterfowl to disperse widely across the landscape.

Waterfowlers hope for winter storms that dump snow and freeze wetlands to the north, pushing waves of waterfowl down the flyways. They also wish for enough rainfall to flood traditional hunting areas. But always remember the adage: "Be careful what you wish for."

uwf2SO19

Photo © GARYKRAMER.NET

Last year, waterfowl appeared to be scarce across much of the eastern half of the continent. Early winter storms in October and early November had many hunters cheering the weather forecasts, but in late November temperatures warmed substantially as far north as prairie Canada, where snow and ice were nearly nonexistent well into January. According to the National Centers for Environmental Information, the period from August 2018 to January 2019 was among the warmest on record for the United States and the wettest in more than a century in eastern states. The combination of warm temperatures and heavy precipitation undoubtedly exerted a strong influence on the migration by creating abundant feeding habitat, which significantly reduced the southward movements of waterfowl. That was a perfect recipe for a challenging duck season for hunters.

Given the impact of the weather on waterfowl migration, what might the future hold for waterfowlers? In short, they should expect significant variation in the timing of waterfowl migrations, which will likely coincide with increasingly variable and warmer weather conditions. Waterfowl managers will need to understand these long-term trends and consider changes in season dates and wetland management to provide habitat for ducks and hunters during peak waterfowl abundance in their respective areas.

DU scientists are working to understand potential changes in the winter distribution of waterfowl. And, importantly, we are contemplating ways to communicate any changes that are

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003395

detected to hunters. We cannot control the weather, but we can adjust our conservation programs to ensure that waterfowl have habitat options despite highly variable weather conditions. We can also help hunters understand how waterfowl are likely to respond to warmer winters in coming years.

The next time you hear wings ripping the air as a flock of dabblers or divers drops altitude to investigate your decoys, remember you are witnessing a finely honed behavioral adaptation that has allowed the birds to thrive for millennia. Hopefully, you will make a good shot, and as your dog retrieves your prized bird, know that your support for Ducks Unlimited will help perpetuate the experience for generations to come.

Dr. Tom Moorman is Ducks Unlimited's chief scientist.

Action Alert! An important bill could soon be coming to a vote! The Wildlife Corridor Conservation Act of 2019, HR 2795, would designate National Wildlife Corridors on federal lands and establish a grant program for state localities and private landowners to support wildlife, including species that depend on the Florida Wildlife Corridor, like panthers and black bears. Reach out to your representatives and urge them to support HR 2795! https://www.house.gov/representati.../find-your-representative

By doing so, they'll join previous generations of Floridians who had the foresight to secure parks and preserves across our great state to protect our beautiful natural landscape and the diverse animals that call it home. This bill will help ensure that these treasures remain protected and connected for future generations.

Thank you to Representatives Vern Buchanan and Francis Rooney for cosponsoring this bill! #KeepFLwild #ConnectProtectRestore

Counting is Caring: Join the Great Backyard Bird Count

The 23rd Annual Great Backyard Bird Count (GBBC) begins next week on Valentine's Day, Friday, February 14, and continues through Monday, February 17. And when the latest science shows that two-thirds of North American birds are threatened by climate change, there is no better time to get involved.

The GBBC is a free, fun, and family-friendly way to support bird conservation. Here's how it works: spend as little as 15 minutes on one or more days of the count tallying birds in your community, and then submit your lists online. The data collected by volunteers from around the world powers conservation initiatives and helps us better understand how climate change will impact the birds we all love.

All it takes is 15 minutes to make a difference. Keep reading to learn how to participate in this year's Great Backyard Bird Count.

Learn More

For some folks, the best part of President's Day is having an extra 24 hours to veg out. But for others, it's that joyous time of year when they get to tally up birds for the annual Great Backyard Bird Count (GBBC). The dates for the 2020 GBBC are February 14 to 17.

During the GBBC, people from around the world count wild birds on the same weekend and then submit their data online for scientists to use in their research. The kid-friendly event is run by the Cornell Lab of Ornithology and National Audubon Society, plus other sponsors and international partners.

Whether you're a sage expert or a first-time birder, you can help create a snapshot of avian populations and provide critical information for future conservation efforts just by reporting what you see and hear. Every observation you submit gives scientists more insight into research areas such as how birds are adapting to suburban sprawl, West Nile Virus, and climate change. It's free, it's fun, and it makes a difference.

So how do you take part? Read on to learn the ins and outs of running your own count.

Make a Plan

Before you hit the great outdoors (or your backyard), you will need to sort out logistics so that when the weekend comes, you're properly prepared.
First, make sure you have a way to submit your data after the count is over. If you already have an account at the GBBC website, an eBird account, or have registered for another Cornell Lab citizen science project (such as FeederWatch or NestWatch), you can use your existing information to log into the database. If you haven't participated in the last two years, creating a new account is easy. Once you're set, download the mobile app from the eBird website. Participants who don't have smartphones can use their computers to plug in data.

Next, decide where you're going to count and for how long you want to do it. You can devote as little as 15 minutes on a single day, or make a full weekend of it. And though you're welcome to stick to your window or yard, you can count anywhere: your neighborhood, a local park, a rooftop, a national wildlife refuge or sanctuary, or a birding hotspot farther afield. You can also move between locations during the survey, so feel free to visit several different spots.

Rather than tackling it alone, recruit a group to go out with you. Solo counts are still fun and challenging, but partners can provide levity and extra eyes to help identify elusive species or large flocks. The GBBC is also a great opportunity to

AMERICAN OVERSIGHT

introduce the joys of birding to someone new by taking the Pledge to Fledge-a program that encourages experienced birders to bring beginners into the fold.

You might also want to study up ahead of time to get a sense of the birds you're likely to see. Most of the species you will encounter will be local and familiar. (Snow Geese and European Starlings always rank among "most numerous" during the count.) The GBBC website offers online guides and ID tips you can use to hone your skills. Our free Audubon Bird Guide app will also prove handy. Other good apps to download are the free Merlin ID, which identifies birds from uploaded photos, or the new iPhone app Song Sleuth, which puts a name to a birdsong.

Snow Geese. Photo: Michael Gale/Audubon Photography Awards

Get Out There

Collecting and reporting data for the GBBC is straightforward: At each location, identify any species you see or hear, and tally up the number of individuals. (You can also note any interesting behaviors.) Create a checklist for each location and time; if you revisit a spot, start a new checklist. Remember to keep track of start and end times for each checklist, as well as distance traveled. The mobile app automatically tracks the time after you open a new checklist. Your smartphone should also have a health app that logs steps and miles.

Be as accurate as possible, but don't panic if your numbers are inexact. Counting a large flock of fussy juncos is a challenge. Estimate when you have to: If you tally only 20 birds, but it seems like there are twice that many, 40 is a safe estimate. (eBird has a helpful article on estimating flock sizes.) Snapping a photo of the scene can help you total up flocks later, so keep a camera on hand if possible. (Did we mention that there's a photo contest?)

During the GBBC, rarity doesn't matter; the hundreds of House Sparrows count just as much as the more unusual species. But that doesn't mean that seeing a rare bird isn't part of the allure. Perhaps you will find a bird that's never been seen in your area, or record a historically high number of a particular species. Last year, counters in Philadelphia found the GBBC's first-ever Barnacle Geese, which usually winter in Europe. And southwestern birders posted three tropical marvels: the White-throated Thrush, Clay-colored Thrush, and Rufous-backed Robin. Rare birds are exciting, but it's important to be cautious and rule out less exciting possibilities first. Carefully document any unusual sightings; it's good practice, and can help with verification later on.

Above all, remember to take your time. Approaching birds too quickly is a surefire way to scare some off. A little patience will keep them visible to you and minimize the stress for them, providing a better experience for all.

Eastern Bluebirds. Photo: K. Bartels/Great Backyard Bird Count

Share the Wealth

Once you've seen some beautiful birds and collected valuable data, leave the rest to the scientists by submitting your observations. For those using the mobile app, it's a simple matter of reviewing your checklists for accuracy, adding photos, and then hitting "submit." If you plan to record your data by hand, the process is almost as easy: All you have to do is log in to the GBBC website, head to the "submit your observations" page, and then plug in your results and photos. (The site guides you through each step, and allows you to share entries with your counting partners.) Another option is to submit your tallies directly into eBird.

Now comes the hard part: waiting for results. With data streaming in from all over the world (last year, participants from more than 130 countries submitted 162,052 checklists), it takes about two weeks to crunch the numbers. Once the wait is over, check out the GBBC or Audubon websites for the final results. There should be a few surprising stories and photo galleries to enjoy as well-and maybe even one from your own count.

AMERICAN OVERSIGHT

Legislative Update - Week 4

2020 Legislative Update - Week 4

Growth Management - HB 519 Private Property Rights Protection by Grant and **SB 1766** by Lee passed out of their committees this week. These two damaging bills limit local government's ability to manage growth and exposes them and their taxpayers to unlimited liability. The House version requires a local government, when settling property rights claims under the Bert Harris Act, to apply the same settlement to all "similarly situated residential properties." If the government settles or the property owner secures a judgment declaring an inordinate burden, there is a presumption that similarly situated parcels are also inordinately burdened and entitled to the same settlement terms or judicial determination. A Senate amendment on this bill was introduced this week and was successful in removing the provision that Bert Harris settlements apply to all "similarly situated residential properties." **HB 519** has passed all of its committees and will be heard next by the full House. The Senate version, **SB 1766**, is on the agenda of its second referred committee, Community Affairs, for next Monday

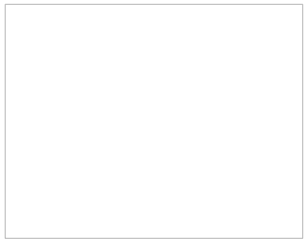
Endangered and Threatened Species
SB 680 - Shark Fins by Hutson passed out of the Senate Environment and Natural Resources committee on Tuesday after a bill weakening amendment was withdrawn. This bill prohibits the import and export of shark fins to and from Florida. The bill will be heard next in Sen. Commerce and Tourism.

Water Quality
SB 712 - Water Quality Improvements by Mayfield was on the Senate Appropriations agenda for Wednesday but was temporarily postponed. Also at the Appropriations meeting, Sen Mayfield presented the Senate's budget for water quality protection and improvements as vetted through the Senate Appropriations Subcommittee on Agriculture, Environment and General Government. Some of the highlights of the Senate Budget recommendations are:

- $643 million for Water Quality Protection (Everglades, Springs, Alt water supply)
- $198 million for Water Quality Improvements (septic to sewer, regional watershed protections)
- $33 million to combat Harmful Algal Blooms
- $125 for Florida Forever programs

Everglades Day in Tallahassee
SCCFs CEO and Policy staff will join other advocates in Tallahassee Monday and Tuesday for Everglades Action Day. We will be there to support full funding of Governor DeSantis's proposed $322 million dollar budget for Everglades restoration, Legislative action to strengthen protection of all Florida's waters, Reinstatement of strong statewide land use planning for sustainable growth and protecting Everglades restoration investments from climate change.

AMERICAN OVERSIGHT



About M-CORES

The Multi-use Corridors of Regional Economic Significance (M-CORES) program is intended to revitalize rural communities, encourage job creation and provide regional connectivity while leveraging technology, enhancing the quality of life and public safety, and protecting the environment and natural resources. The program was signed into law by Governor Ron DeSantis on May 17, 2019. The intended benefits include, but are not limited to, addressing issues such as:

- Hurricane evacuation
- Congestion mitigation
- Trade and logistics
- Broadband, water and sewer connectivity
- Energy distribution
- Autonomous, connected, shared and electric vehicle technology
- Other transportation modes, such as shared-use nonmotorized trails, freight and passenger rail, and public transit
- Mobility as a service
- Availability of a trained workforce skilled in traditional and emerging technologies
- Protection or enhancement of wildlife corridors or environmentally sensitive areas
- Protection or enhancement of primary springs protection zones and farmland preservation areas

The Florida Department of Transportation (FDOT) is assigned with assembling task forces to studythree specific corridors:

- The Suncoast Connector, extending from Citrus County to Jefferson County
- The Northern Turnpike Connector, extending from the northern terminus of Florida's Turnpike northwest to the Suncoast Parkway
- The Southwest-Central Florida Connector, extending from Collier County to Polk County

Overview

The University of Florida Water Institute and Duke Energy partner to host the 7th biennial UF Water Institute Symposium. The Symposium will bring together individuals from a broad range of disciplines and organizations to explore complex water challenges from multiple perspectives. The 2020 Symposium will focus on innovative science, technology, cultural, policy, and management solutions to the following pressing issues:

1. **Harmful algae blooms in springs, lakes and coastal waters**
2. **Sources, impacts, and management of contaminants**
3. **Water scarcity, allocation, and use**
4. **Impacts of and resilience to climate change, extreme events and sea level rise**

The Planning Committee encourages presentations that consider influences across a full range of spatial and temporal scales; present innovative analytical methods, technologies, monitoring, and modeling approaches, and focus on public perceptions, science communication, education, and stakeholder engagement.

Technical Review of Options to Move Water from Lake Okeechobee to the Everglades

In 2013, after a particularly wet season in the region and large regulatory discharges to the estuaries, concerns arose about the timing of completing CERP, especially about the timing of construction and completion of projects that would reduce damaging estuary releases and increase the flow of clean water south to the Everglades. Stakeholders have questioned whether there are more immediate solutions especially to the problem of high discharges of poor quality freshwater to the estuaries. In response to the recommendations of the Florida Senate Select Committee on Indian River Lagoon and Lake Okeechobee Basin, The Florida Senate request the UF Water Institute to conduct an independent review of agency-adopted and other proposed plans to move even more water to the Everglades to: (1) ensure that existing evaluations of plans by the agencies are technically sound; and (2) possibly identify innovative, new approaches that have not previously been considered.

Modernize the Pittman-Robertson Act

The law that is broadly and affectionately known as PR ironically doesn't allow state wildlife agencies to market hunting to a new generation of license buyers-the sportsmen and women we desperately need to keep funding conservation

By now, you probably know that every time you buy a hunting or fishing license and certain gear, you're paying into a hugely successful system of conservation in America-where those of us who enjoy and take something from our natural resources also give back to fish and wildlife. You're probably even aware of the two laws that made this happen: the Pittman-Robertson Act for hunting-related spending and the Dingell-Johnson Act for fishing-related spending.

[.]

But there's a major difference between these policies that has become glaring as fishing participation has crept back up and hunting participation has taken a steep nosedive.

Photo by US Fish and Wildlife Service Midwest Region.

Between 2011 and 2016, the number of hunters declined by 16 percent. Hunters spend fewer days afield and less money on equipment on average than they used to. In that same time period, 2.7 million more Americans started fishing, and spending on fishing equipment increased by more than 36 percent.

This could be because about $12 million in funds created by the Dingell-Johnson Act annually go toward national efforts to recruit, retain, and reactivate (R3) anglers. Meanwhile, no such provision is made in Pittman-Robertson.

Besides the next generation of sportsmen and women, ,
because many of these conservation-focused departments depend entirely on P-R and D-J dollars. But, as the laws are written, even a state department of natural resources with an excellent apprentice hunter program can't so much as print up a poster to advertise it using P-R funding.

The ability to communicate with and educate the public about hunting is so much more important today than it was in the 1930s when this bill was written. At that time, more than half the country hunted or had access to someone who could likely show them how. This just isn't the case anymore.

The Bottom Line

It's time to modernize Pittman-Robertson and allocate just a small portion of its funds to R3 activities-the return on investment is likely to be millions of more active and engaged outdoorspeople paying into a conservation model that supports some of America's greatest traditions. Failing to do so could create a conservation funding crisis like we've never seen before.

Legislation called Modernizing the Pittman-Robertson Fund for Tomorrow's Needs Act (H.R. 877) has been reintroduced this Congress and debated in a House Natural Resources Committee hearing earlier this year. After the August recess, we need to move this bill forward without delay and before we lose lawmakers' attention to the chaos that comes with an election year.

Have you seen state agency efforts to attract and educate new hunters that deserve more of a PR spotlight? Tell us in the comments.

AMERICAN OVERSIGHT

NOAA Fisheries Evaluates Angler Reporting Apps in Recreational Fisheries

A fisherman uses an opt-in catch reporting app called iAngler.

In a new report, NOAA Fisheries describes how electronic technologies, including web and app-based data collection programs, may improve the agency's estimates of marine recreational catch. The report finds "opt-in," or non-mandatory, angler reporting apps to be appropriate for collecting qualitative data that support citizen science-based studies. But for these apps to produce population-level estimates of recreational catch, a large proportion of anglers would have to consistently use them to report accurate information about their fishing trips, and a statistically valid probability-based sampling survey would have to validate self-reported data, monitor the extent of reporting, and account for unreported trips.

The report (PDF, 12 pages) is part of the MRIP Action Plan on Implementing Electronic Reporting. Its recommendations are based on an external review of electronic reporting options for recreational fishing surveys, as well as our own assessment of two projects that evaluate the use of iAngler and iSnapper to collect recreational fisheries data.

Electronic reporting is a method of data collection that can include smartphones, tablets, and other technologies used to record, send, and store data. When electronic reporting is part of a probability-based sampling survey design, it has the potential to reduce data collection costs and improve the quality of reported information. But when recreational catch estimates are produced with only those data collected through an opt-in website or mobile app, the estimates are likely to be biased.

Challenges to Opt-in Angler Reporting Apps Reporting Rates

Even with extensive outreach and education campaigns, voluntary apps such as iAngler and iSnapper suffer from low recruitment and retention rates. In addition to introducing the potential for bias, low reporting rates can negatively impact estimate precision.

Selection Bias

Estimates derived from data voluntarily reported through an angler app are susceptible to extreme selection bias, to the extent that anglers using the app fish differently from anglers not using the app.

Sampling Methods

Opt-in angler reporting apps are a non-probability sampling technique: the probability that an angler will use these apps is unknown. Sampling theory for non-probability surveys is poorly developed, and non-probability sampling and estimation methods follow no single standardized approach. As this report states, non-probability surveys cannot reliably produce scientifically sound population statistics without a consistent standard to support a valid sampling design.

Appropriate Uses for Electronic Reporting

Statistically valid survey designs that employ electronic reporting have been used to produce population-level estimates of recreational catch. In 2018, for example, NOAA Fisheries certified Alabama's Snapper Check and Mississippi's Tails n' Scales "capture-recapture" survey designs. Both surveys use a mobile app as the primary mode of collecting recreational red snapper fishing data during the "capture" phase. A mandatory, probability-based dockside intercept survey qualifies angler reporting during the "recapture" phase.

NOAA Fisheries remains committed to identifying ways electronic reporting can improve our recreational fishing surveys. Later this year, NOAA Fisheries will begin working with the South Atlantic Fishery Management Council to explore:

What motivates anglers to use mobile apps;

What anglers are willing to report through mobile apps; and

What impacts the recruitment and retention of app users.

About MRIP

The Marine Recreational Information Program (MRIP) is the state-regional-federal partnership responsible for developing, improving, and implementing surveys that measure how many trips saltwater anglers take and how many fish they catch.

Do you have a question about recreational fishing data collection or estimation? Email Dave Bard at david.bard@noaa.gov or visit countmyfish.noaa.gov.

AMERICAN OVERSIGHT

Recreational fishing has a significant economic impact on communities throughout the U.S. But what does that really mean?

The American Sportfishing Association (ASA) teamed up with Southwick Associates to create the *2019Economic Contributions of Recreational Fishing: U.S. Congressional Districts*, which updates the 2016 version. This also includes a new series of one-page infographics, which clearly illustrate recreational fishing's economic impact on all 435 Congressional districts and the 50 states.

The reports use macro data from the 2016 U.S. Fish and Wildlife Services' *National Survey of Fishing, Hunting and Wildlife-Associated Recreation*, which is condensed into ASA's *Sportfishing in America* report. The study used mapping and population software to hone in on smaller geographic areas in a way that is particularly relevant to members of the U.S. House of Representatives.

America's 49 million anglers generate nearly $50 billion in retail sales with a $125 billion impact on the nation's economy creating employment for more 800,000 people.

Economic Impacts of Recreational Fishing Report (PDF)

Economic Impacts of Recreational Fishing Report- Senate Version (PDF)

Economic Impacts of Recreational Fishing Report- House Version (PDF)

2019 Economic Contributions of Recreational Fishing Report.

For those who don't want to plow through it, here are some highlights.
Florida leads the nation with 4.1 million anglers and $4.18 BILLION in fishing-related retail sales.
The 54,000+ fishing-related jobs in this state lead the nation and fishing-related federal tax revenue and state tax revenue are $533 million and $350 million respectively.

FWC Commission Meetings

The Florida Constitution authorizes the Fish and Wildlife Conservation Commission to enact rules and regulations regarding the state's fish and wildlife resources.

To do this, the 7 Commissioners meet 5 times each year to hear staff reports, consider rule proposals and conduct other Commission business. Because stakeholder involvement is an important part of the process, we conduct Commission meetings at different locations across the state and offer people the opportunity to address the Commission about issues under consideration.

This section of MyFWC.com connects you to all you need to know about Commission meetings, including schedules, agendas, minutes and other information.

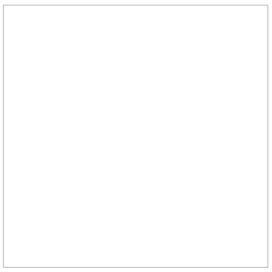
Speaker Registration Guidelines:

If you wish to speak during one of the public commenting opportunities, please complete the electronic registration process on-site at the meeting. FWC staff members are available at the registration table to assist you as needed.

To accommodate as much input as possible from those attending the Commission Meeting, the Chairman reserves the right to designate the amount of time given to a topic or speaker, including time donation to other speakers.

Please be aware of the following FWC public speaking guidelines. By registering to speak, you agree to follow these guidelines.

Unless otherwise directed by the FWC Chairman:



- Each speaker will be allotted three (3) minutes to speak on any one topic.
- Speakers may receive one (1) additional three (3) minute donation from another registered speaker.
- Speakers must register for the item they wish to speak on prior to the beginning of the presentation on that topic.
- Speakers who are registered to speak will have their names called by the Vice Chairman during the designated public comment time for each agenda topic.
- Speakers are responsible for being in the Commission Meeting room when their name is called. Failure to respond when

AMERICAN OVERSIGHT

your name is called may result in loss of opportunity to comment on that topic.

- Displays such as signs, props, presentations, and recordings generally are not permitted in the meeting room. Please see registration desk staff for assistance.
- Speakers may provide paper handouts for FWC Commissioners:
  - Please prepare eleven (11) copies of any information you wish to provide, including your name and the topic on each front page so Commissioners know whose information they are reviewing.
  - When you complete your registration to speak, let staff at the registration table know that you wish to provide written items for the Commissioners. They will ensure the materials are ready to distribute to the Commissioners when it is your turn to speak.
  - Registration staff are unable to print, copy or provide other office supplies or services for these information packets.

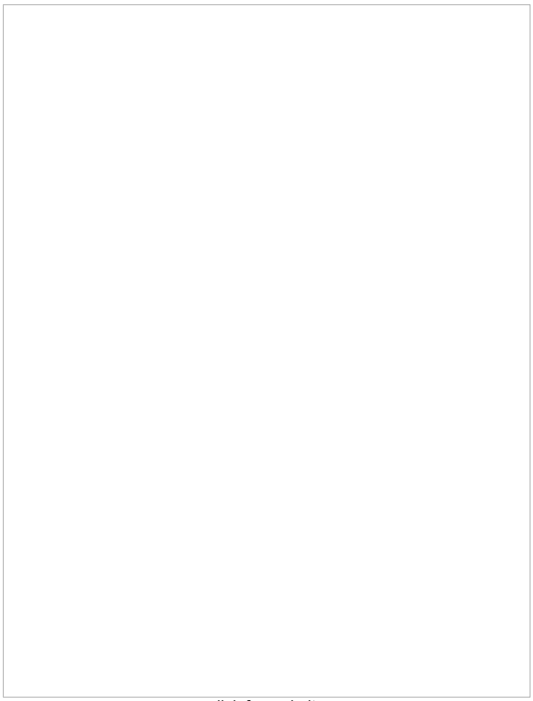
Land and Water Conservation Fund



From Wikipedia, the free encyclopedia

The United States' **Land and Water Conservation Fund** (**LWCF**) is a federal program that was established by Act of Congress in 1965 to provide funds and matching grants to federal, state and local governments for the acquisition of land and water, and easements on land and water, for the benefit of all Americans.[1] The main emphases of the fund are recreation and the protection of national natural treasures in the forms of parks and protected forest and wildlife areas. The LWCF has a broad-based coalition of support and oversight, including the National Parks Conservation Association, Environment America, The Wilderness Society, the Land Trust Alliance,the Nature Conservancy, and The Conservation Fund.

The Land and Water Conservation Fund was permanently reauthorized as part of the bipartisan John D. Dingell, Jr. Conservation, Management, and Recreation Act, signed into law on March 12, 2019.[3][9][10] It requires at least 40% of funds to be used by federal agencies and at least 40% to be allocated to the states.

Though LWCF is authorized with a budget cap of $900 million annually, this cap has been met only twice during the program's decades of existence. [6] As of 2015 the program generated about $2.5 million a day from leases on offshore oil and gas drilling.

Resiliency

THE TERM "RESILIENCE" IS EVERYWHERE - BUT WHAT DOES IT REALLY MEAN?
As resilience moves from technical term to buzzword, there's value to be had in clarifying exactly what it is we're talking about

Is this a watershed moment for the environment?

In the past couple of weeks, we've heard that electric vehicles are on the verge of becoming cheaper than combustion engine cars, meatless Whoppers are rolling out nationwide, climate change is emerging as a top issue for many prospective voters in the U.S., and, in April, renewable energy replaced coal for the first time ever as the second largest source of electricity in the U.S.

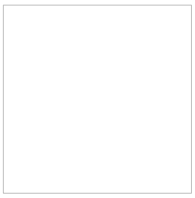
Amid this flood of positive news for the environment, massive challenges remain. Globally, greenhouse gas emissions continue to increase, storms - such as the pair of cyclones that hit Mozambique recently - are becoming more intense, and the U.N. just released a report saying wildlife extinction and the loss of biodiversity may be worse than previously known.

Taken together, this news underscores the importance of resilience. But have you ever stopped to ask: What does the word resilience even mean?

In this week's feature story for Ensia, sustainability scholar Kate Knuth tackles that question. As she writes in the intro, "The term resilience is everywhere. And everywhere, it seems, it means something a little different."

Why does this matter? "Given the state of the planet, resilience will likely continue to be called upon to provide a framework for working across sectors and disciplines to grapple with all kinds of change," Knuth writes.

The term "resilience" is everywhere. And everywhere, it seems, it means something a little different.



Resilience has been used to describe people and systems that bounce back from negative experiences and disturbances. It has also been used to refer to systems that survive being jostled around - whether or not they go back to where they were before, or to any stable state, for that matter.

While some have argued resilience is an empty concept, the widespread use of the idea of resilience across disciplines, sectors and professions suggests it is a necessary concept. Resilience is related to change. And given the rapid change happening in the environment, technology and society, such extensive use of the term reflects this need.

It does, however, lead to some questions. Where did the idea of resilience come from, and how has it developed? More importantly, how can the concept be used in ways that help us navigate a rapidly changing planet?

Scientists working on better understanding algae blooms

....."Hopefully in the future we will be able to predict when a bloom will happen and if we can get to that point, predictive, then we can prevent these blooms and that might take a larger scale effort of prohibiting certain nutrients from the watershed," said Jose Lopez, a professor at Nova Southeastern University. "But that's beyond science in some ways."

Information the group collects will eventually become published science that may help guide things like land-use decisions and nutrient removal programs, Lopez said.

Mike Parsons, a Florida Gulf Coast University professor, is a member of the state's Blue-Green Algae Task Force and said this study is the type of information the task force wants.

"These kind of data are useful because they can help us find the solution," Parsons said.

Barry Rosen, a biologist with the USGS.; said the group hopes to find a way to eventually prevent these types of blooms, which can cripple local economies and the real estate and tourism industries.

Buy Photo

Elizabeth Schroeder, a FGCU student pulls a water sample from a plastic tube placed by the USGS at the Franklin Locks on the Caloosahatchee River on Monday 7/8/2019. They will used in a scientific experiment studying cyanobacteria or blue-green algae. The scientists will study the affects of of nutrients such as nitrate, ammonia and/or phosphorus and and assess what will happen to the algae. *(Photo: Andrew West/The News-Press)*

"Can we find a kink in the armor?" Rosen said. "Is there something going on in that sequence that we can target because once you get a massive bloom it's almost impossible to control? And we don't want to wait for that. We're a long way from finding it out but that's what we're targeting."

Rosen said the group hopes to find out what's causing the recent blue-green algae blooms but actually changing the amount of nutrients flowing into the historic Everglades is up to others agencies.

"If you find nitrate is something that is worth controlling moving forward then you would look upstream into the watershed," Rosen said. "There's a fair amount of land between here and Lake Okeechobee and there's a fair amount of watershed contribution of nutrients. (But taking regulatory actions) is something other agencies would have to target."

How to erase 100 years of carbon emissions? Plant trees-lots of them.

Increasing the Earth's forests by an area the size of the United States would cut atmospheric carbon dioxide 25 percent.

5 MINUTE READ

BY STEPHEN LEAHY FOR NATIONAL GEOGRAPHIC

An area the size of the United States could be restored as forests with the potential of erasing nearly 100 years of carbon emissions, according to the first ever study to determine how many trees the Earth could support.

Published today in *Science*, "The global tree restoration potential" report found that there is enough suitable land to increase the world's forest cover by one-third without affecting existing cities or agriculture. However, the amount of

AMERICAN OVERSIGHT

suitable land area diminishes as global temperatures rise. Even if global warming is limited to 1.5 degrees Celsius, the area available for forest restoration could be reduced by a fifth by 2050 because it would be too warm for some tropical forests.

"Our study shows clearly that forest restoration is the best climate change solution available today," said Tom Crowther, a researcher at ETH Zürich, and senior author of the study.

That does not alter the vital importance of protecting existing forests and phasing out fossil fuels since new forests would take decades to mature, Crowther said in a statement.

"If we act now, this could cut carbon dioxide in the atmosphere by up to 25 percent, to levels last seen almost a century ago," he says.

It could take more than a hundred years to add enough mature forest to get sufficient levels of carbon reduction. Meanwhile 40 billion tons of carbon dioxide (CO_2) from burning fossil fuels are being added to the atmosphere every year, said Glen Peters, research director at Norway's Center for International Climate Research.

ICELAND IS GROWING NEW FORESTS FOR THE FIRST TIME IN 1,000 YEARS

See how Icelandic trees are making a comeback in this short film by Eufores.

"The only way we can keep below 1.5C or 2C, is to stop emitting fossil fuels," Peters says in an email.

That means no new fossil fuel-using infrastructure can be built, and some existing power plants need to shut down early, based on a major studypublished in Nature on July 1.

That said, large-scale CO_2 removal through reforestation will help offset emissions from sectors like aviation where alternatives are not yet available, and perhaps help lower temperatures, he said.

Carbon-eating trees

Trees-all plants, in fact-use the energy of sunlight, and through the process of photosynthesis they take carbon dioxide (CO_2) from the air and water from the ground. In the process of converting it into wood they release oxygen into the air. In addition to the CO_2 that trees capture, they also help soil capture significant amounts of carbon.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003414

Researchers studied nearly 80,000 high-resolution satellite photographs of protected forest areas across a range of ecosystems to determine the natural level of tree cover in each. That was combined with the mapping software of Google Earth Engine to generate a predictive model to map potential tree cover worldwide.

It turns out that more than half the potential to restore trees can be found in just six countries: Russia (151 million hectares); USA (103 million); Canada (78 million); Australia (58 million); Brazil (50 million); and China (40 million). Those countries have so much potential because they've already removed much of their existing forests, said lead author Jean-Francois Bastin of ETH Zürich.

"Anyone can plant a tree and we can start doing it tomorrow. Reforestation can buy us time to cut our carbon emissions," says Bastin.

While tree plantations can also store carbon, they don't support much wildlife such as pollinators, whose decline is very worrying, he said.

"In my opinion the implications of our study are that we need to respect forests as humanity's best ally to protect the climate and our life support system," he says.

Africa's potential for trees

Having suitable land area to grow forests is just one factor. Forests are far more important than their ability to soak up carbon. Tropical forests, for example, are where 90 percent of all terrestrial species are found, said Robin Chazdon, an ecologist at the University of Connecticut.

Climate change isn't humanity's only global environmental challenge. Earlier this year a landmark UN global assessment warned that one million species are at risk of extinction, threatening the very foundations of our economies, livelihoods, food security, health, and quality of life.

It takes a long time to make a new forest so there has to be a wide range of benefits for local people and society at large beyond just capturing carbon, said Chazdon. Along with 11 other experts, she used high-resolution satellite imagery and the latest peer-reviewed research to rank regions that provided the best carbon, water, wildlife, and other benefits and were the least costly and risky to reforest.

> If we don't make fundamental changes, conditions for humanity will only get worse.
>
> ROBIN CHAZDON, ECOLOGIST AT THE UNIVERSITY OF CONNECTICUT

In total they identified more than 100 million hectares of lost lowland tropical rain forests spread out across Central and South America, Africa, and Southeast Asia. Their findings appeared July 3 in the journal Science Advances.

The top forest restoration hotspots are all in Africa: Rwanda, Uganda, Burundi, Togo, South Sudan, and Madagascar. Reforesting some of the marginal cropland and pasture lands that were identified brings great opportunities to protect a diversity of species at low cost and low risk, while bringing a range of benefits to local people with enough financial support, Chazdon explained.

ANIMALS
Why shark attacks are more common in the Atlantic than the Pacific

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003415

Different paths, same goal

Forest restoration can take many forms-from enriching pastures with trees, to growing coffee or cocoa beneath a forest canopy, to adding forest buffers for national parks and protected areas to enhance tourism.

"Many locals want these kinds of things to happen but they have to be involved and supportive or it won't work," Chazdon says.

Indigenous Peoples and local communities hold at least half of the world's land, including most tropical forests. Deforestation rates are far lower in forests where indigenous land tenure is recognized.

"We have served as guardians of these lands for generations... . We also understand how to restore them to health," says Joan Carling, a member of the Kankanaey tribe in the Philippines and Co-convener of the Indigenous Peoples Major Group for Sustainable Development.

"With the security of our lands and resources, we can prevent destructive logging, mining, agri-business, and other projects from occurring in our territories," says Carling via email.

That security is under threat in many regions, most recently in Brazil. According to recent reports deforestation in the Amazon rainforest is accelerating under the new Brazilian government. Satellite images reveal that the area of forest being cleared is equivalent to losing a football field-sized amount every minute. In June, forest loss was 88 percent higher than a year ago.

A number of international efforts have been launched to secure existing forests and plant many more, including the Bonn Challenge, where 59 countries have agreed to restore 150 million hectares of forest by 2020 and 350 million hectares by 2030.

Under the New York Declaration on Forests, countries have pledged to halve the rate of deforestation by 2020, to end it by 2030, and to restore hundreds of millions of acres of degraded land. And the Trillion Tree Campaign is mobilizing school children and communities around the world who have already planted 13.6 billion trees since 2007, when a 9-year-old Felix Finkbeiner of Germany launched the idea.

"If we don't make fundamental changes, conditions for humanity will only get worse," said Chazdon. "Reforestation can solve a lot of problems."

AMERICAN OVERSIGHT

Highly endangered Florida grasshopper sparrows reared in captivity are released

By KEVIN SPEAR

| ORLANDO SENTINEL |

Three of the rarest birds in Florida took an extraordinary adventure Monday, slipping out of a large pen into the freedom of an expansive, treeless prairie south of Orlando.

The year-old Florida grasshopper sparrows were hatched and raised in captivity, and designated as pioneers in a perilous bid to save their kind from oblivion.

Staffers of the Florida Fish and Wildlife Conservation Commission, the U.S. Fish and Wildlife Service and other organizations lined a dirt road, observing the pen in the far distance as a pair of biologists removed panels from the enclosure.

Then, with a light breeze, clouds of love bugs and an air of worry and optimism, the group waited quietly for an hour for the secretive birds to make their move.

"One flew out," came a text message, followed a short while later by a text suggesting the other two had fled, as they are programmed to do, by running unseen through shrubs and grass.

There are fewer than 80 of the sparrows in the wild - residing exclusively in remote, open spaces of southern Central Florida - and fewer than 70 in captivity.

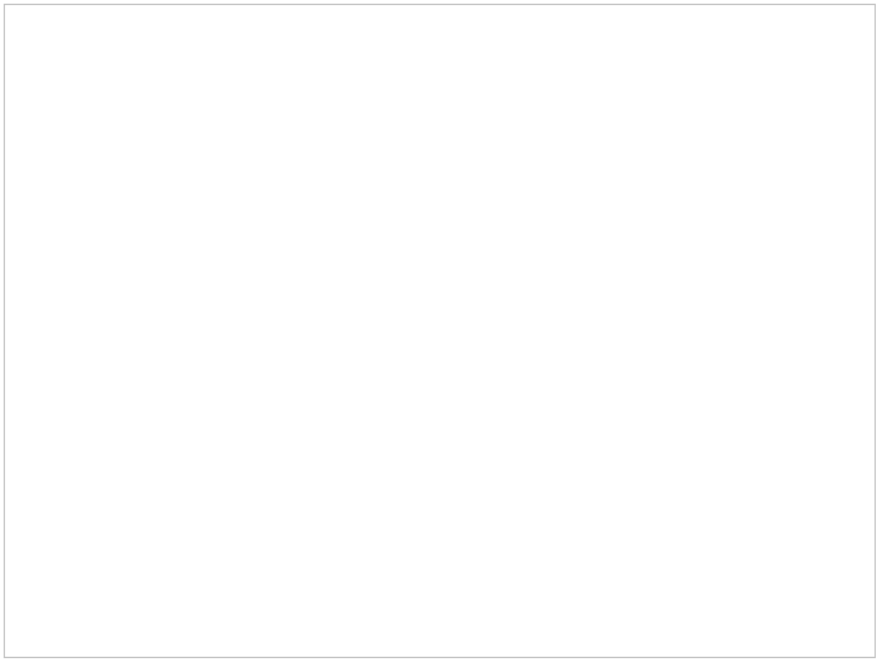
With such a small population, they are thought of as a blink from oblivion.

In 2015, three males and four females were taken as chicks as the start of what was then uncharted territory; very little was known about how to raise the birds in a cage, including how to turn their eggs, when to expose them to light and what to feed them.

The effort of breeding birds in captivity for release into Florida's environment to stave off extinction was done with Central Florida's dusky seaside sparrows in the early 1980s and with whooping cranes more recently.

The seaside sparrows perished; the cranes survived. The odds for the grasshopper sparrows are still uncertain. But this time, dozens of biologists and veterinarians from conservation groups, universities and government agencies collaborated.

"This was a really monumental effort to crack the code on how to do this," said Larry Williams, state supervisor for the Fish and Wildlife



AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003417

Service ecological services.

Few birds in Florida have received the attention that has been mustered for the Florida grasshopper sparrow, a bird not much bigger than a golf ball and feathered as plainly as a grocery bag.

Others that do get such intensive care in Florida are superstars: the red-cockaded woodpecker, snail kite and scrub jay.

But the sparrows' release was not without controversy.

A team of biologists and environmental officials gather in south Osceola County to release Florida grasshopper sparrows that were raised in captivity. A biologist here tracks the birds as they leave their pen. (Kevin Spear / Orlando Sentinel)

Paul Reillo, director of the Rare Species Conservatory Foundation, which raised many of the birds in captivity, has warned that birds in captivity may have ailments that could lethally infect wild birds. He also challenged the timing and technique of the release.

"All trial methods should be data-justified and fully vetted well before releases are to be attempted," Reillo said in an email on the eve of the release.

Many in the group at the release said the risks have been analyzed at length, leading to a prevailing worry that inaction is a greater risk for the sparrows.

Craig Faulhaber, avian conservation coordinator for the state Fish and Wildlife Conservation Commission, said several more will be released this year.

The goal, he said, is to sustain the wild population while further research probes what's behind the sparrow's rapid decline.

Like many species of wildlife, Florida grasshopper sparrows have been hard hit by the loss of habitat and the suppression of wildfires that in more natural times kept forests and prairies pruned and healthy.

Yet in a little more than the past decade, something else has attacked the birds.

At the Avon Park Air Force Range adjacent to south Osceola County, there were 300 Florida grasshopper sparrows through the 1990s. Now there is a handful.

"We were the first to do the nose dive," said Troy Hershberger, a range biologist.

Several years of research found that the young and adults are faring reasonably well, but that nesting outcomes are dismal.

Further research learned that corn, black racer and yellow rat snakes, and spotted skunks prey voraciously on sparrow nests.

AMERICAN OVERSIGHT

But those predator species and sparrows have always coincided.

"What's changed that we can tweak? That what we have to learn," Faulhaber said.

Eco-Voice, Inc.

A team of biologists and environmental officials gather in south Osceola County to release Florida grasshopper sparrows that were raised in captivity. The birds' pen is in the background. (Kevin Spear / Orlando Sentinel)

That's meant, primarily, a controlled burn every two years, which trims back saw palmettos and promotes a low growth of miniature live oak and chalky bluestem and dozens of other shrubs and grasses where sparrows hide.

"Unless they are perched up high somewhere, you never see them," said Shayna Jacques, a state biologist.

The mesh pen used for the release - measuring 60 feet long, 20 feet wide and 8 feet tall - was installed earlier this year after a controlled burn was conducted.

That allowed time for native vegetation to grow so that the "inside of the pen looks like the outside," Faulhaber said.

Except for a few biologists with spotting scopes and with antennas for tracking tiny, radio transmitters on the birds, all others attending the release remained 200 yards back.

When it was over, Roxanna Hinzman, Florida ecological services field supervisor for the Fish and Wildlife Service, summed up the experience.

"I saw about as much as I expected to see," Hinzman said, with a laugh.

While that was not even a single flicker of a feather, the group witnessed, said Williams, a "huge milestone that was six years in the making."

Editorial: We need task force, money to begin addressing effects of rising seas

It's 2020. Florida's legislators need to provide the money to establish a potent task force that finally will begin to address the effects of the rising seas.

Talk is cheap, and time is running out for Florida to get on with the difficult and expensive task of protecting its citizens from rising seas along its 1,197-mile coastline.

So, it's welcome news that lawmakers are getting behind Gov. Ron DeSantis' pledge to prepare Florida for the environmental, physical and economic impacts of sea-level rise.

DeSantis took the first step in August with the appointment of Julia Nesheiwat as Florida's chief resilience officer. The Lake County native reports directly to the governor and appears well qualified to quarterback his environmental protection efforts. Her appointment was a huge and welcome paradigm shift after eight years of DeSantis' predecessor, Rick Scott, whose efforts to deal with climate change consisted of pretending it doesn't exist.

Now, the Legislature appears poised to give Nesheiwat a team that can deliver desperately needed resiliency results. SPB 7016 and HB 1073 put flesh on the bones and money in the bank for a Statewide Sea-Level Rise Task Force within a Governor's Statewide Office of Resiliency.

As it considers these bills, the Legislature will be playing catch-up with public opinion. More than two-thirds of Floridians say that government must do more to address the impacts of climate change, and nearly half are willing to pony up $10 a month to make the state's infrastructure more resilient.

>>>Related content: Editorial: 'Climate change' enters Florida GOP lexicon. But we need action.

Ongoing reporting for The Invading Sea has assembled an ocean of evidence that Floridians clearly understand that they cannot maintain their way of life -- indeed, their very lives -- without a sustained and focused effort by state government to get us on the road to resilience. Properly funded and staffed, the proposed Office of Resiliency offers hope for a coherent statewide strategy to make our homes, businesses, streets, highways and sewers able to resist the rising seas.

The Senate and House bills under consideration create a lot of seats at the task force table, the majority under DeSantis' direct control.

Both proposals mandate that the task force be chaired by his chief resilience officer, with the vice chair position occupied by the state's chief science officer of the Department of Environmental Protection (DEP), one of the many agencies that labored in silence and impotence under Scott's climate-change gag order.

Other task force members will come from the Department of Transportation; Emergency Management; Fish and Wildlife; and Economic Opportunity, all under DeSantis' direct control. The Senate president, House speaker, and commissioner of agriculture each will appoint one person to the task force. It is essential that each of the appointees has the highest level of subject matter expertise and the time necessary to give this work the focus and attention appropriate to addressing an existential threat.

Under the proposed legislation, the task force is required to "develop official scientific information necessary to make recommendations on consensus baseline projections of the expected rise in sea level."

AMERICAN OVERSIGHT

Thankfully, the Task Force will not be required to *invent* the wheel.

Climate scientists and scholars with expertise in architecture, agriculture, transportation, land use planning, supply chain management, evolutionary biology and other disciplines relevant to helping a stressed-out population find its way through times of unimaginable change, have been developing this kind of information for decades, often in public agencies and universities.

Skeptics can be forgiven for wondering how serious DeSantis is about taking meaningful action to meet the threat posed by rising seas. His DEP claims to have "no grounds to deny" oil drilling permits in the Apalachicola River basin, and he has made no effort to use the tools at a governor's disposal to derail a drilling operation in the Everglades near Miramar. Aside from the serious threat that drilling poses to our clean water supply, Florida can and must be a leader in the fight against the industries that have created the resilience crisis we face.

Speaking this week at a conference in Tampa, Nesheiwat said Florida needs to grow jobs in the field of clean energy and "ask ourselves really difficult questions about whether our current model of growth is indeed sustainable."

Plainly, it is not.

The good news is that we have solid science, and there are achievable paths to the resiliency Florida requires. What we have not had is a governor steadfastly invested in making the Legislature take the issue seriously.

SPB 7016 and companion bill HB 1073 suggest that we may at last be ready to get on with the work we must do in the 21st century if Florida families and businesses are to survive and thrive in the 22nd century. To this end, DeSantis must be loud, clear and consistent in his support. When it comes to Florida's invading sea, this is no time for mixed messages.

AMERICAN OVERSIGHT

29TH ANNUAL SOUTHWEST FLORIDA WATER RESOURCES CONFERENCE

When 24 Jan 2020
Location Fort Myers, Florida

Registered 99 registrants

Registration

(A1) Professional + AWRA Florida Membership - $100.00
Includes conference, lunch and 2020 membership to AWRA Florida

(A2) Professional - $75.00
Includes conference and lunch

(B1) FGCU Student + AWRA Florida Membership - $5.00
For FGCU Students ONLY; Includes conference, lunch and 2020 membership to AWRA Florida

(B2) Student Non-Member - $10.00
Full-time College or High School student; Includes conference, lunch and 2020 membership to AWRA Florida

(B3) Student member - $5.00
Full-time College or High School student and AWRA Florida Member; Includes conference and lunch

(C) FGCU Faculty or Staff - $35.00
Includes conference and lunch

After online pre-registration is closed, you can register and pay in person (via cash, check or credit card) at the meeting.

Register

FGCU Water School and Emerging Priorities for Our Region

Location

Florida Gulf Coast University | Cohen Center Ballroom | 11090 FGCU Blvd. North, Fort Myers, FL 33965 | Parking: FREE for the day in Parking Garage 1 (PG1 on Campus Map). The Cohen Center (17 on Campus Map) is a short (and covered) walk from PG1.

Sponsors/Exhibitors

Organizations wishing to participate as conference sponsors should go here and contact Kellie Clark at 239-271-2641. Click here to pay/donate.

Technical Program

PDF | Web

All registration options include conference and lunch.

A free companion Cela Tega 2020 Conference is being held Saturday, January 25. A Caloosahatchee River Boat Trip is planned for Sunday, January 26.

Water Resources Student Research Poster Contest

Abstract Submittal Deadline: December 14, 2019

Call for Abstracts | Submit Abstract

Registration

Online payments are processed by PayPal. However, a PayPal account is not required. Click on the "Register" button to get started. After being directed to the PayPal website, just click "Pay with Credit or Debit Card". ONLINE REGISTRATION ENDS 2 DAYS PRIOR TO THE MEETING. After this date, you can register and pay in person (via cash, check or credit card) at the conference.

Note: Professional exhibits differ from research posters. Visit the conference website or contact the conference steering committee for details.

If you would like to pay by check, please register online and send a copy of your meeting registration confirmation email or invoice along with a check payable to "AWRA Florida" to NorthStar Contracting Group, Inc., Attn: AWRA Florida Treasurer, 2760 South Falkenburg Road, Riverview, FL 33578 .

Hotel Information

AWRA Florida Board of Directors Meeting

Date: Thursday, January 23, 2020 @ 5:00 - 6:30pm

Location: Pinchers (The Marina and Edison Ford) | 2360 West First Street, Fort Myers, FL 33901

All are welcome to attend as the Board of Directors handles the business of the section. Guests: Email us if you are planning to attend.

AMERICAN OVERSIGHT

Blue-Green Algae Task Force Jan. 23rd Meeting - Postponed

The Florida Department of Environmental Protection is rescheduling the next meeting of the Blue-Green Algae Task Force to provide more time for the task force to consider additional scientific information, synthesize existing research and gather public comment. This meeting was previously scheduled for Thursday, January 23, 2020 at 9:00 a.m. It will be held at the same location on Monday, March 16, 2020 at 9:00 a.m.

Parties who wish to submit comments for consideration in advance of the March meeting can email comments to BlueGreenAlgaeTaskForce@floridadep.gov. This is an opportunity for public comment in the interim, and there will be time allotted for public comment during the rescheduled meeting as well.

The agenda for this meeting will be made available on the Task Force website.

WHAT: Blue-Green Algae Task Force Meeting

WHEN: March 16, 2020

9 a.m. Eastern Standard Time

WHERE: Florida Atlantic University

Harbor Branch Oceanographic Institute

5600 US 1 North

Fort Pierce, FL 34946

If using Google maps, type in Harbor Branch Oceanographic Institute.

The meeting will be streamed live online. The details of how to access the broadcasts will be posted to the website as soon as they are available.

Conservation Policy Resolutions

IWLA members set our conservation policies through our resolutions process, which ends with a vote at the national convention. At the July 2019 national convention, delegates passed the following resolutions. (More details will be coming soon.)

ARMY CORPS ACCOUNTABILITY

The Izaak Walton League of America calls on the United States Army Corps of Engineers (USACE) to fully evaluate impacts of permits and construction projects involving "Natural Resource Related Systems" as to their actual tangible real economic impacts to all entities engaged in the utilization of the resource for aesthetic, drinking water, food, recreation, business, or any other activity of economic importance. The reviews and decision making process must be fully subject to public review and comment.

ASIAN CARP BARRIERS

The Izaak Walton League of America supports the continued operation, expansion of technologies as deemed necessary, and maintenance of a barrier system, as prescribed by The Great Lakes and Mississippi River Interbasin Study - Brandon Road Integrated Feasibility Study and Environmental Impact Statement, until such time as the Mississippi River basin and Great Lakes basin are hydrologically separated.

CLIMATE CHANGE

The Izaak Walton League of America encourages League programs on fighting climate change and declares that the League is acting immediately to take steps to reduce greenhouse gas production at all levels in League operations, and to make anti-CO2 and methane reduction a major emphasis in our advocacy. The League challenges all IWLA Divisions and Chapters to make greenhouse gas reduction a goal of their operations, including, wherever possible, conversion to solar photovoltaic or wind power and implementation of whatever other strategies they can find to achieve that end.

EVERGLADES RESTORATION

Therefore, be it resolved, the Izaak Walton League of America, assembled in convention in Des Moines, Iowa, July 19, 2019, calls upon Congress to fulfill its obligations under the agreement with Florida established in the Water Resources Development Act of 2000, and promptly provide the approximately $1 billion in funding that it has fallen behind for its half of the costs for the Comprehensive Everglades Restoration Plan. Further, the League calls on Congress to provide sufficient annual funding for the Comprehensive Everglades Restoration Plan for the remainder of the project. Additionally, Congress should provide annual funding to acquire land or conservation easements on land that is of acute conservation importance to the Everglades Headwaters National Wildlife Refuge.

NEONICOTINOIDS ON PUBLIC LANDS

The Izaak Walton League of America supports passage of legislation that would prohibit the use of neonicotinoid pesticides on all public lands.

OPPOSE SEISMIC EXPLORATION AND OIL DRILLING IN THE ARCTIC NATIONAL WILDLIFE REFUGE

The Izaak Walton League of America opposes any seismic exploration, leasing for, or development of, oil or natural gas resources in the Arctic National Wildlife Refuge.

PLASTIC POLLUTION

The Izaak Walton League of America recognizes that plastic waste is one of the world's most pressing environmental issues. The League also recognizes the need to sharply reduce the amount of plastic being washed into the world's streams, rivers, and oceans. The League encourages every unit of government to enact legislation and regulations to curtail and where possible, ban the use of single-use plastics, such as disposable water bottles, drinking straws, and grocery bags.

Further resolved, the League urges the United States to ratify the *1989 Basel Convention* on the control of hazardous waste, including plastic.

AMERICAN OVERSIGHT

Study shows 12-15 feet range best for lake's ecology

Dec 8th, 2019 · by Katrina Elsken · Comments: 0

What will the new Lake Okeechobee Systems Operations Manual (LOSOM) look like? In meetings around Lake Okeechobee, area residents encouraged the U.S. Army Corps of Engineers to follow the science.

Special to the Lake Okeechobee News/Zach Welch/SFWMD
Submerged aquatic vegetation in Lake Okeechobee has increased over the past year. Occasional but rare, extreme low water levels can benefit the SAV. The RECOVER Lake Stage measures put the lake level at 12 to 15 feet with deviations no more often than once a decade.

If the corps follows the recommendations of their own scientists, the new lake schedule will vary only slightly from the current plan, which strives to keep the lake between a low of 12.5 feet above sea level and a high of 15.5 feet.

The draft RECOVER Lake Okeechobee Stage Envelope Performance Measure, published online on Dec. 5, sets the preferred lake level at 12-to-15 feet.

The target is for the lake to remain within in the desired envelope and avoid extreme stages.

"A wide body of published research documents the benefits of seasonally variable water levels within the range of 12.0 feet as a June-July low and 15.0 feet as a November-January high, on the plant and animal communities of Lake Okeechobee," the documentation states.

Keeping the lake in the healthy 12-to-15 feet range has many benefits, the report continues:

*** Falling water levels from late winter to spring concentrates prey resources in the littoral zone for improved wading bird foraging and nesting.**

*** Water levels near 12 feet benefit submerged plants and bulrush at the outer edges of the marsh by reducing light attenuation in the summer months and promoting growth of underground biomass for survival during turbid, high-water events.**

*** A natural rocky reef in the southern portion of the lake isolates turbid water from large areas of the near-shore zone at a lake stage around 14 feet. This helps improve water clarity, promotes submerged aquatic vegetation (SAV) and reduces phosphorus levels.**

*** Seasonal variation within the 12-to-15 feet envelope results in annual flooding and drying of the majority of the marsh, which favors development of a diverse emergent plant community and reduces muck accumulation.**

*** Extreme high stages allows wind-driven waves to uproot SAV.**

*** High stages allow deposition of mud into the near-shore regions, covering sand and peat sediments and reducing their suitability for SAV.**

Levels above the target range are harmful to the lake, the report continues.

*** High stages transport nutrient-rich water from the mid-lake region into the littoral zone where the higher nutrient levels encourage the growth of invasive aquatic vegetation which crowds out the native SAV.**

While rare, occasional low lake stages can benefit the lake's marshes, extreme low lake levels - more often than once a decade - can also be harmful, the report continues.

*** Low lake stages result in direct losses of habitat and can severely limit or even eliminate entire breeding seasons for many species of fish and wildlife.**

*** Exposing peak in the southern portions of the lake can degrade habitat for the endangered Okeechobee gourd and increase risk of peak fires, leading to a permanent loss of marsh elevation.**

*** Ecological recovery from extreme low lake stages can take multiple years.**

Ideally, the lake should slowly rise during the wet season and slowly fall during the dry season.

The report notes:
*** High lake stages (above 14.5 feet) at the end of the wet season maximize the wetlands and aquatic habitat for the breeding season for many species of fish and wildlife.**
*** A moderate recession (less than 0.2 feet per week), throughout the majority of the spring avoids stranding breeding fish.**
*** Moderate ascension rates (less than 0.25 feet per week) throughout the majority of the wet season reduce the flooding of alligator nests, snail kite nests and apple snail eggs, while allowing SAV growth to keep up with the light reducing penetration.**

The evaluation was based on 52 years of data (1965 through 2016). The 15-page report includes two pages just to reference the studies referred to, and to

AMERICAN OVERSIGHT

acknowledge the scientists and researchers who contributed to the studies.

Comments on the 15-page Draft Lake Okeechobee Stage Envelope Performance Measure will be accepted through Dec. 20. Please submit comments via email to Gretchen.S.Ehlinger@usace.army.mil if possible (recommended subject: RECOVER Lake O Stage Envelope PM Comments) and reference the line and/or page numbers to expedite the review process.

Comments may also be mailed to: Dr. Gretchen Ehlinger, U.S. Army Corps of Engineers Jacksonville District, P.O. Box 4970, Jacksonville, FL 32232-0019.

Additional information on RECOVER is available online at saj.usace.army.mil/RECOVER/.

Great Success!

Mark your calendars for the 8th Annual Everglades Action Day on February 10 & 11 in Tallahassee.

Register

Once again, the Everglades Coalition is coordinating the 8th Everglades Action Day in Tallahassee to connect with state elected leaders about priority issues for the Everglades. Legislative session begins in January, 2020 and Everglades Action Day will take place on Tuesday, February 11th. Team leaders will arrange meetings with target legislative offices and all materials will be provided. Just bring yourself, your passion, your voice. Speak up for our Everglades, estuaries, and water!

This will be a full two day event with FREE group transportation available!

AMERICAN OVERSIGHT

Open-primary plan receives spot on November ballot

A petition-driven constitutional amendment that would radically reshape Florida's primaries by opening them to all voters regardless of their party affiliation has earned a place on the November 2020 ballot.

The All Voters Vote campaign has achieved the number of verified signatures to get on the ballot's number three spot, according to the secretary of state's website.

It still must pass muster with the Florida Supreme Court over whether the ballot language meets the single issue requirement.

"While there are still several steps left in this process, namely the ruling from the Florida Supreme Court and of course getting 60% of voters, we are thrilled to be making progress towards allowing every registered and qualified voter the ability to be able to vote in elections that matter," said Glenn Burhans, chairman of All Voters Vote.

The ballot initiative, which has been bankrolled almost exclusively by Miami businessman Mike Fernandez, had 769,537 registered signatures of the 766,200 needed to get a spot on the November 2020 ballot. Organizers said they collected more than a million petitions months ago.

If approved by 60% or more of the voters, it would take effect Jan. 1, 2024.

The amendment would create a "top-two" primary system, where all registered voters regardless of party affiliation would vote for all candidates for state legislature, governor and cabinet, with the two highest vote-getters advancing to the general election, regardless of their party affiliation.

California and Washington have similar primaries.

It would give voters not registered with any party a chance to vote in primaries in Florida, and eliminate a loophole that closes any primary in which there is a write-in candidate.

It has drawn opposition from both the Democrat and Republican party officials, who say the open primary would rob registered voters with either party of the right to choose their own candidate for office.

"The amendment is redefining what has been in place for over a century in this state - what a party nominee is," Florida Republican Party attorney Benjamin Gibson told the Florida Supreme Court last week.

AMERICAN OVERSIGHT

It's time to consider "Category 6" hurricanes

If you live in a hurricane-prone area, you probably know about the five-category Saffir-Simpson Hurricane Wind Scale. It defines Atlantic Basin hurricanes on the basis of sustained wind speeds at a hurricane's core and likely damage levels.

Category 1 ranges from 74 to 95 mph; Category 2 is 96-110 mph; Category 3 (which starts the "major hurricane" range) is 111-129 mph; and Category 4 runs from 130-156 mph.

The problem is Category 5, which is set at 157 mph or higher. Category 5 has no upper limit and scientists and the media calling a storm a "strong" Category 5 really doesn't communicate much.

Where does "strong" begin and, more important, where does it end? And then what?

The idea of a Category 6 has already seen some discussion in scientific circles, including by The Weather Channel, but it's time for the scientific community, in cooperation with the media, to lead a much broader public discussion.

To help trigger this discussion, what if Category 5 storms were capped at 179 mph and Category 6 storms set as 180 mph or higher?

The historical record actually bears out creating a Category 6. The "Great Labor Day Hurricane" in 1935 reached 185 mph when it hit the Florida Keys, and in 1980, Hurricane Allen hit 190 mph sustained. Later, Mitch (1998), Rita (2005) and Irma (2017) reached 180 mph. Gilbert (1988) and Wilma (2005) reached 185 mph, as did this year's Dorian.

The point is that we already have had Cat 6 storms. Then, should the need arise for a Category 7, Category 6 storms could be capped at 199 mph, with Category 7 starting at 200 mph.

Let's hope that isn't necessary, although in 2015 Hurricane Patricia off the west coast of Mexico hit an astounding 215 mph before rapidly weakening against the interior mountains.

Opening a discussion of at least a Category 6 for Atlantic Basin storms has some urgency. Climate-change scientists are arguing for increasing numbers of more intense storms in coming decades. That is, storms with sustained wind speeds of 180 mph should no longer be viewed as extremely rare.

One solution to the category-numbering problem would be to take a page from the earth science community's complicated saga of attempts in the 19th and 20th centuries to define levels of "felt and observed" earthquake effects on the built environment.

The eventual result was the "Modified Mercalli Intensity" (MMI) scale (not to be confused with earthquake magnitudes, which measure an event's energy release at its point of origin deep in the Earth).

Currently, the U.S. Geological Survey employs a 10-category MMI scale. That scale uses Roman numerals, with I indicating "not felt," and X indicating widespread masonry building collapses and even buildings designed to be earthquake-resistant showing "moderate to severe damage."

With the MMI scale as a template, the hurricane solution would be a Modified Saffir-Simpson Hurricane Wind Scale with, for now, six categories. The implications are, of course, enormous for building codes and ensuring post-impact critical facilities to emergency management.

Let us start a robust Category 6 and "Modified Saffir-Simpson" conversation now. The 2019 hurricane season officially ended on Nov. 30 - and the next season will be only six months away.

Richard S. Olson, Ph.D., is director of the Extreme Events Institute, director of the International Hurricane Research Center and professor at Florida International University in Miami.

"The Invading Sea" is the opinion arm of the Florida Climate Reporting Network, a collaborative of news organizations across the state focusing on the threats posed by the climate.

About M-CORES

The Multi-use Corridors of Regional Economic Significance (M-CORES) program is intended to revitalize rural communities, encourage job creation and provide regional connectivity while leveraging technology, enhancing the quality of life and public safety, and protecting the environment and natural resources. The program was signed into law by Governor Ron DeSantis on May 17, 2019. The intended benefits include, but are not limited to, addressing issues such as:

- Hurricane evacuation
- Congestion mitigation
- Trade and logistics
- Broadband, water and sewer connectivity
- Energy distribution
- Autonomous, connected, shared and electric vehicle technology
- Other transportation modes, such as shared-use nonmotorized trails, freight and passenger rail, and public transit
- Mobility as a service
- Availability of a trained workforce skilled in traditional and emerging technologies
- Protection or enhancement of wildlife corridors or environmentally sensitive areas
- Protection or enhancement of primary springs protection zones and farmland preservation areas

The Florida Department of Transportation (FDOT) is assigned with assembling task forces to study three specific corridors:

- The Suncoast Connector, extending from Citrus County to Jefferson County
- The Northern Turnpike Connector, extending from the northern terminus of Florida's Turnpike northwest to the Suncoast Parkway
- The Southwest-Central Florida Connector, extending from Collier County to Polk County

CS/SB 7068 - Transportation

by Appropriations Committee and Infrastructure and Security Committee

This summary is provided for information only and does not represent the opinion of any Senator, Senate Officer, or Senate Office.

Prepared by: Infrastructure and Security Committee (IS)

Multi-use Corridors of Regional Economic Significance

The bill creates the Multi-use Corridors of Regional Economic Significance (M-CORES) Program within the Florida Department of Transportation (FDOT), with the purpose of revitalizing rural communities, encouraging job creation, and providing regional connectivity, while leveraging technology, enhancing quality of life and public safety, and protecting the environment and natural resources. The program is designed to advance construction of regional corridors that will accommodate multiple modes of transportation and multiple types of infrastructure.

The bill sets out the intended benefits of the program and identifies three corridors comprising the program:

1. Southwest-Central Florida Connector, extending from Collier County to Polk County;
2. Suncoast Connector, extending from Citrus County to Jefferson County;
3. Northern Turnpike Connector, extending from the north end of the Florida Turnpike northwest to the Suncoast Parkway.

M-CORES projects will be Turnpike projects and are subject to statutory economic and environmental feasibility criteria, as well as additional environmental and other evaluation requirements set out in the bill. Decisions on M-CORES corridor configuration and alignment must be determined in accordance with the FDOT's rules, policies, and procedures. To the greatest extent practical, the projects must be designed to minimize project construction within conservation lands.

FDOT must convene a task force for each corridor comprised of representatives from various stakeholders to evaluate and coordinate corridor analysis, environmental and land use impacts, and other pertinent impacts of the corridors. Each task force must issue a written report by October 1, 2020. To the maximum extent feasible, the bill requires project construction to begin no later than December 31, 2022, with projects open to traffic no later than December 31, 2030.

The bill authorizes corridor project funding, including redirecting to the State Transportation Trust Fund (STTF), on a phased-in schedule, portions of motor vehicle license taxes currently deposited into the General Revenue (GR) Fund. The bill specifies how and when the increased revenues available from the State Transportation Trust Fund are to be distributed. This shift of revenues will be over a multiyear schedule:

- 2019-2020: $45M to STTF & $83.9M to GR
- 2020-2021: $90M to STTF & $40.12M to GR
- 2021-2022 and thereafter: $132.5M to STTF

AMERICAN OVERSIGHT

After being fully phased-in by Fiscal Year 2022- 2023, about $135 million will be annually available to fund M-CORES and other transportation programs. The bill also authorizes annual funding for programs benefiting rural areas:

- $10 million annually for the Small County Road Assistance Program (SCRAP);
- $10 million annually for the Small County Outreach Program (SCOP); and
- $10 million annually for the Transportation Disadvantaged (TD) Program.

In addition, the bill creates and provides three years of funding - $2.5 million per year - for a construction workforce development program within the FDOT.

Bid Protest Settlements

The bill also provides requirements relating to payments by the FDOT of $1 million or more to a non-selected responsive bidder through a settlement agreement. The bill requires the FDOT, when it determines that it is in the best interest of the public to resolve a bid protest of the award of certain contracts through a settlement agreement requiring such payment, to:

- Document in the FDOT secretary's written memorandum the specific reasons that such settlement and payment is in the best interest of the state, including:
    - A description of the rights, trademarks, engineering or other design work the FDOT will acquire or retain as a result of the settlement; and
    - The specific appropriation in the existing General Appropriations Act which the FDOT intends to use to provide the payment.
- Provide a written notice that settlement discussions have begun in earnest and a written notice at least five business days, or as soon thereafter as practicable, before the FDOT makes the agreement final.

Finally, the bill prohibits the FDOT from pledging any current or future action by another branch of state government as a condition of any procurement action. The bill provides that any settlement committing the state to spending amounts in excess of current appropriations, to appropriation of funds in a subsequent fiscal year, or to policy changes inconsistent with current state law must be contingent upon legislative appropriation or statutory amendment.

Approved by the Governor, these provisions take effect July 1, 2019.

Support the Biscayne National Park Fishery Management Plan

The Florida Fish and Wildlife Conservation Commission (FWC) and National Park Service and have released a proposed management plan that will balance outdoor recreation, fisheries management, and conservation for Biscayne National Park - the nation's largest recreational marine park in the National Park System.

The plan's goal is to avoid unnecessary restrictions, all while increasing the abundance and size of fish species by 10 percent. The plan is a win for anglers and boaters alike, requires the use of sound, science-based fisheries management tools like regular reviews for size and bag limits, and provides reasonable and responsible recreational access.

As an outdoor recreation enthusiast, the Florida Fish and Wildlife Conservation Commission needs to hear from you before the plan is finalized. Tell them you support the proposed Biscayne National Park Fishery Management Plan!

This **presentation** provides a summary of potential draft rules that staff anticipates bringing forward at the December Commission meeting. These anticipated draft rules would create a new rule chapter, 68B-7, Florida Administrative Code (FAC), to house regulations specific to Biscayne National Park (BNP), as well as modifying various species-specific regulations elsewhere in 68B, FAC, as they apply within BNP. Division: Marine Fisheries Management Authors: Jessica McCawley, John Hunt, Mason Smith, and Melissa Recks Contact Phone Number: 850-487-0554 Report date: September 27, 2019 Unless otherwise noted, images throughout the presentation are by FWC.

AMERICAN OVERSIGHT

Red tide covered nearly 1,000 miles of Florida coast. How do we help? | Column

A state task force meets this week in St. Petersburg to listen and discuss the options.

By J.P. Brooker

Piles of dead fish smothering sandy beaches. Distressed and dying sea turtles, manatees and whale sharks. Respiratory distress in children and the elderly. Tourists fleeing beaches and hotel rooms. Charter captains, restaurant servers and tourism operators laid off.

Who can forget the severity and magnitude of the massive red tide outbreak that started in 2017 and lasted well into 2018? At its peak, the bloom covered nearly 1,000 miles of Florida coastline, with an area the size of New Jersey affected in the Gulf. And, as of last month, red tide had returned, although it was less widespread and intense.

J.P. Brooker [Times staff]

With the 2017-2018 event still so fresh in the minds of Floridians, Ocean Conservancy partnered with Florida Sea Grant to conduct a survey of state stakeholders to get a snapshot of how red tides and other harmful algal blooms are perceived. The results of our survey will be presented to the Harmful Algal Bloom Task Force, reinstated by Gov. Ron DeSantis, when the task force meets in St. Petersburg this week.

And there should be little surprise that Floridians, who are deeply in tune with the beaches and waterways that are our backyards, feel that the water quality situation in the state is rapidly deteriorating, and that events such

AMERICAN OVERSIGHT

as red tide are becoming more severe and frequent.

But despite the bleak picture, our survey shows that Floridians believe that all levels of society can play a role in protecting water quality, and that state and local governments possess the right tools to alleviate the environmental and economic impacts of harmful algal blooms such as red tide.

We should permanently fund ocean observation and data collection to improve forecasting of red tide events. We should have real-time beach air quality monitoring to detect respiratory threats to people and pets and pinpoint red tide events as they are occurring. We should prioritize science, and seek to fill gaps in understanding the impact of climate change on red tide bloom frequency, intensity, and duration. We should ensure that the Florida Fish and Wildlife Commission and local marine wildlife networks have the adequate capacity and support for response for stranded animals. And we should improve education and outreach to make sure that red tide event information is being widely and effectively broadcast.

Red tide is a naturally occurring organism, and we should never expect to be rid of it entirely. But we can lessen the impacts of severe events by responding adequately and appropriately, and by curbing potential man-made factors such as nutrient loads that contribute to the magnitude and frequency of events, especially in nearshore waters.

The task force has an opportunity this week to listen to the concerns of Floridians, and I am hopeful they will recommend actions that will improve what we know about red tides and how to mitigate their far-reaching effects.

J.P. Brooker is senior manager and policy counsel for Florida conservation for the Ocean Conservancy.

Airglades International Airport to break ground in spring

Sep 11th, 2019 · by Chris Felker · Comments: 0

HENDRY COUNTY - Airglades International Airport LLC's Chief Executive Officer Fred Ford has been busy building momentum behind the private takeover of the former Riddle Field. Now he and his investor groups are putting the last touches on all the myriad details of their 10-year project to convert the public airport into a privately developed and owned (future) air cargo hub. Those details must be - and are on track to be - finalized by Sept. 30 to the FAA and FDOT. That is the "deadline to meet terms for the 2018 privatization reauthorization."

The Airglades airport conversion is a promise that a large group of people has been joining in on through the decade since 2010 when Mr. Ford first brought the idea forward. Now there is near-unanimous backing from all around Lake Okeechobee and across South Florida. The Federal Aviation Administration and Florida Department of Transportation are expected to sign off by the end of February 2020 to enable construction to begin as planned in March, he said Tuesday.

The AIA project begun under the U.S. Airport Investment Partnership Program is in the final public comment period, ending in about two weeks.

The Clewiston City Commission unanimously approved of a resolution urging the final OK. The Glades County Board of Commissioners followed the next morning, during their regular meeting Sept. 10, after Mr. Ford appeared before commissioners to give a presentation about his timeline and the expected ripple effects across the economies of all the cities and counties in the region.

Glades County Board Chairman Tim Stanley said after the meeting that he was encouraged, impressed and eager to see the accompanying development.

"The presentation was very important, and it was very promising. They should have something by March, and for the whole area it's going to be a great influx of jobs and business, so that's the reason we're backing it.

"They intend to support the small businesses that are already in the communities, too," he added. He was referring to the final federal and state approval that's expected then.

This is the resolution as passed by the Clewiston City Commission on Monday night, which has been joined by many local municipalities and county governments:

Lake Okeechobee News/Chris Felker
... And bears this plaque, whose inscription reads as follows: "Dedicated in honor and in memory of the cadets and staff of the No. 5 British Flying Training School (No. 5 B.F.T.S.) who trained at Riddle Air Field during the period of 1941-1945.
"Their efforts to preserve the freedom of the world were not in vain and will never be forgotten."

"WHEREAS, the South Florida region is a global logistics hub through which more than 83 percent of all commodities imported to the United States from the Americas by air is received and more than 79 percent of all commodities exported from the United States to the Americas leaves; and
"WHEREAS, the growth of trade presents an opportunity for Hendry County and nearby communities to serve as a global logistics hub for Florida and the U.S. with the establishment of an international airport; and
"WHEREAS, the Airglades Airport is a county-owned, public-use airport with interest from private investment and opportunity for expansion in Hendry County; and
"WHEREAS, the planned expansion of the Airglades Airport includes 600,000 square feet of refrigerated space to receive, process and distribute perishable cargo imported to the U.S. or exported to the Americas; and
"WHEREAS, the expansion of the Airglades Airport is expected to create more than 10,000 jobs during the construction phase; and
"WHEREAS, the establishment of the Airglades International Airport will create 1,700 long-term, good-paying jobs for the people of Hendry County, the City of Clewiston and neighboring communities; and
"WHEREAS, the economic opportunity that comes with the Airglades International Airport will not only create jobs for Florida families, but will also diversify the local economy and protect the region from the devastating impacts of a future economic downturn; and
"WHEREAS, the Airglades International Airport is estimated to generate millions in ad valorem revenues per year, which will be invested in the essential services provided to this community.

"Now, therefore, be it resolved by the City Commission of the City of Clewiston, Florida, as follows:
"SECTION 1. The City Commission of the City of Clewiston, Florida, hereby fully supports the Federal Aviation Administration's approval of the Airglades International Airport Investment Partnership Program.
"Passed and adopted in open session this 9th day of September 2019."

Clean Water Act

Federal Water Pollution Control Act Amendments of 1972	
Long title	An Act to amend the Federal Water Pollution Control Act.

The Clean Water Act is a U.S. federal law that regulates the discharge of pollutants into the nation's surface waters, including lakes, rivers, streams, wetlands, and coastal areas. Passed in 1972 and amended in 1977 and 1987, the Clean Water Act was originally known as the Federal Water Pollution Control Act. Oct 9, 2019

The Clean Water Act (CWA) establishes the basic structure for regulating discharges of pollutants into the waters of the United States and regulating quality standards for surface waters. ... The CWA made it unlawful to discharge any pollutant from a point source into navigable waters, unless a permit was obtained.

Land and Water Conservation Fund Coalition Sign-on Letter

Thank you for your interest in signing the Land and Water Conservation Fund (LWCF) Coalition letter! Your voice is critical to ensuring that LWCF will continue to permanently open access to America's public lands and protect the places where Americans go to enjoy the great outdoors. To add your voice to the chorus of LWCF supporters, please fill in the form fields below. You can rest assured that nobody will speak on behalf of your organization outside of specific messages contained in this letter. You can view the text of the letter at the bottom of the form.

For more information on our campaign, check out www.lwcfcoalition.org or contact LWCF Coalition staffer Caleb Abbott at cabbott@outdoorsamerica.org.

CURRENT LEGISLATION IN THE 116TH CONGRESS ADDRESSING LWCF

H.R. 3195

S. 1081

Introduced **by Rep. Jeff Van Drew (D-NJ), Committee Chair Raúl Grijalva (D-AZ), and Rep. Brian Fitzpatrick (R-PA)** on June 11, 2019, the Land and Water Conservation Fund Permanent Funding Act would **provide full, dedicated funding** to the Land and Water Conservation Fund (LWCF). This legislation is the companion to S. 1081 and would **guarantee the full, authorized $900 million for LWCF is not raided by the annual appropriations process.** H.R 3195 was introduced with a bipartisan group of 11 additional cosponsors. Text and cosponsors can be found here.

Introduced **by Sen. Manchin (D-WV)** and **Sen. Gardner (R-CO)** on April 9, 2019, the Land and Water Conservation Fund Permanent Funding Act would **provide full, dedicated funding** to the Land and Water Conservation Fund (LWCF). This legislation would **guarantee the full, authorized $900 million for LWCF is not raided by the annual appropriations process**, ensuring the commitment to America's communities, economy, and beautiful landscapes. S. 1081 was introduced with a bipartisan group of 12 additional cosponsors. Text and cosponsors can be found here.

PUBLIC LAW NO. 116-9 - S. 47

Introduced by **Sen. Murkowski (R-AK)** and **Sen. Cantwell (D-WA), the John D. Dingell, Jr. Conservation, Management, and Recreation Act approved permanent authorization of the Land and Water Conservation Fund (LWCF).** With broad bipartisan support, **S. 47 passed the Senate 92-8 on February 12, 2019 and the House of Representatives 363-62 on February 26, 2019.** On March 12, 2019, the President signed permanent authorization of LWCF into public law, culminating a major victory for public land and outdoor recreation opportunities. Text and cosponsors can be found here.

SFWMD Governing Board Meeting (February 1) St. Lucie County

Beginning at:

February 1, 2020, 09:00 AM

Ending at:

February 1, 2020, 04:00 PM

LOCATION: City of Port St. Lucie City Hall, 121 S.W. Port St. Lucie Blvd.

CONTACT INFORMATION: District Clerk Rosie Byrd, 561-682-6805 or rbyrd@sfwmd.gov

GENERAL SUBJECT MATTER TO BE DISCUSSED:

All or part of this meeting may be conducted as a teleconference in order to permit maximum participation by Governing Board members. The Governing Board may take official action at the meetings on any item appearing on the agenda and on any item that is added to the agenda as a result of a change to the agenda approved by the presiding officer of the meeting pursuant to Section 120.525, Florida Statutes.

Governing Board to discuss and consider District business, including regulatory and non-regulatory matters.

A copy of the agenda may be obtained by contacting: Rosie Byrd, rbyrd@sfwmd.gov, 561-682-6805, or at https://www.sfwmd.gov/news-events/meetings, seven days prior to the meeting.

Governing Board Workshop (January 31) - St. Lucie County

Beginning at:

January 31, 2020, 09:00 AM

Ending at:

January 31, 2020, 04:00 PM

Another Opinion: Is Florida ready for 2030?

By The Florida Times-Union (Jacksonville)

The year 2030 is just around the corner for Florida, so addressing challenges on a statewide level requires immediate action.

That's what the Florida Chamber Foundation has done with its report titled Florida: 2030"

It's clear that Florida will be a dramatically transformed state by 2030. Some examples:

* The population will continue to grow; Florida will have about 5 million new residents.

* About 1 in 4 Floridians will be 65 or older.

AMERICAN OVERSIGHT

* Non-ethnic whites will become a minority by 2030, and nearly 1 in 5 Floridians will be foreign-born.

* People will pack the cities. Rural areas will account for 86 percent of Florida's land area but just 10 percent of its population.

* Millennials will take over as the dominant age group, but they will be dealing with massive amounts of student loan debt.

So are we actually ready for 2030?

At 83 town hall meetings to discuss Florida's path ahead - sessions that involved more than 10,000 Floridians in all 67 counties - 87 percent of the respondents said they were optimistic about Florida's future.

But most of the respondents said their own communities weren't "positioned for global competitiveness, prosperity and vibrant and sustainable communities."

The most critical challenge identified by Floridians in the town halls was "affordable housing." The problem is that Florida has long had an identified revenue stream to deal with affordable housing, but the Legislature continues to sweep much of the money into the general fund.

The Sadowski Fund uses a portion of documentary stamp revenue paid on home sales for affordable housing; it is shared on a per capita basis in Florida counties. The structure of the fund is brilliant: as home sale values increase, so does the doc stamp revenue for affordable housing. Yet the Legislature is not allowing the money to be fully used for its stated purpose.

Is there any wonder why many of the Floridians taking part in the town halls listed "responsiveness of government" as one of the state's weaknesses?

What's the key to Florida's future? A well-trained and growing workforce.

If Florida's workforce isn't prepared for the challenges of 2030?

"We would struggle to gain a foothold in emerging industries and our economy would miss out on next-generation opportunities ... ," according to the Chamber Foundation report.

The Chamber report, as detailed as it is, must be paired with a report by a coalition of Florida environmental groups titled " Trouble in Paradise". The report calls for acquiring and protecting land to protect drinking water, fisheries and recreation.

The challenges posed by sea level rise and storm surge contain billion-dollar price tags;. The best way to deal with storm surge and sea level rise is by protecting our wetlands.

Resilience is the key. Prevention is cheaper than repair damage.

In addition the Floridan Aquifer, Florida's precious underground water supply, is going to be stressed as millions of new residents pack into coastal communities - so the springs that need the Aquifer must be protected

Are sinking soils in the Everglades related to climate change?

Date: January 15, 2020
Source: American Society of Agronomy

Characterized by alligators, airboats and catfish, the Everglades is a region of swampy wetlands in southern Florida. In addition to the area's role in Florida's tourism industry, the Everglades play a significant part in protecting our environment -- through carbon sequestration.

Over a quarter of the Everglades are encompassed in the Everglades Agricultural Area. The Everglades Agricultural Area includes 700,000 acres of farmland where sugar cane, winter vegetables and other crops are grown.

The farmland was created by draining the Everglades, starting over 100 years ago. There are four main canals that drain the area. Farmers also have systems of ditches to manage the water levels in their fields and to provide irrigation to crops.

Since the 1950s, scientists have been studying an environmental change in the Everglades, called soil subsidence. Soil subsidence is the sinking or settling of the earth's surface. Researchers estimate a subsidence rate of about 1 inch per year.

Soil subsidence is a growing problem. In recent years, soils around the Everglades are so shallow that farmers are struggling to manage water and grow crops.

Previously, it was not clear if carbon quality played a role in soil subsidence. So, Andres Rodriguez, a researcher at University of Florida, was ready to find out. Ultimately, Rodriguez and his team want to improve soil conservation and explore different water management strategies. This research is important to protect the Everglades Agricultural Area, which plays a large role in Florida's agriculture economy.

Carbon sequestration is a process where carbon from the atmosphere is stored in the soil, which helps lessen global warming. Plants, ocean, and the soil all capture and store carbon.

The soil of the Everglades, called peat, is largely made up of waterlogged, decomposing plant and animal materials. The peat soil stores a large amount of carbon compared to other soils across the globe.

When the Everglades Agricultural Area was drained, the soil was exposed to higher levels of oxygen. Decomposition of the plant and animal materials happens much faster with more oxygen. When the carbon in the soil decomposes, it becomes carbon dioxide gas. The mass of the soil decreases, and gas goes into the atmosphere. It's a big chemistry equation.

"It's not easy to picture a soil that disappears," says Rodriguez. "The most challenging process I have to explain -- and the most striking -- is how carbon in the soil goes from the soil to the atmosphere."

The process of soil subsidence can release significant amounts of greenhouse gasses. This can have connections with climate change.

"To improve soil conservation, I recommend farmers avoid using short flood cycles," says Rodriguez. "I also suggest they use a crop rotation with rice during the summer." These practices decrease the amount of oxygen reaching the soil, which minimizes decomposition.

He also encourages increasing soil carbon by adding plant material back into the soil. Farmers can do this by incorporating residue from sugarcane harvest into the soil. "I am aware that the practices I recommend present challenges from the agronomic point of view, but I am confident they can be sorted." Says Rodriguez.

Rodriguez presented his research at the November International Annual Meeting of the American Society of Agronomy, Crop Science Society of America, and Soil Science Society of America in San Antonio. This research was funded by the Soil and Water Sciences Department and the Everglades Research and Education Center at the University of Florida.

AMERICAN OVERSIGHT

Three-Quarters of New US Generating Capacity in 2020 Will Be Renewable, EIA Says

2020 will be a record year for U.S. renewables construction as 6 gigawatts of coal capacity goes offline, according to new government figures.

click on headline for great graphics.

by Jeff St. John
January 14, 2020
The U.S. Energy Information Administration has confirmed what it and industry watchers predicted a year ago - that wind and solar power will expand on their already-large share of new U.S. generation capacity in 2020.
According to EIA data released Tuesday, wind and solar will make up 32 of the 42 gigawatts of new capacity additions expected to start commercial operation in 2020, respectively, dwarfing the 9.3 gigawatts of natural-gas-fired plants to come online this year.
EIA's numbers also break records for both wind and solar in terms of annual capacity additions. The 18.5 gigawatts of wind power capacity set to come online in 2020 surpasses 2012's record of 13.2 gigawatts and pushes total U.S. production well past the 100-gigawatt milestone set in the third quarter of 2019.
Wood Mackenzie is expecting 15.2 gigawatts of new wind this year, with some projects delayed into 2021 amid a historic wind construction boom.
Meanwhile, EIA's forecast of 13.5 gigawatts of utility-scale PV would break 2016's record 8 gigawatts, with growth heavily concentrated in just four states: Texas with 22 percent of the national market, California at 15 percent, Florida at 11 percent and South Carolina at 10 percent. And EIA's projection of 5.1 gigawatts of distributed solar to be installed this year, part of its *Short-Term Energy Outlook* forecast, would break annual records for rooftop PV.
These solar forecasts line up with those from the latest *U.S. Solar Market Insight* report from Wood Mackenzie and the Solar Energy Industries Association. They also correspond to trends EIA predicted back in January 2019 when it declared wind and solar the likely fastest-growing resource for "at least the next two years."

Driving this expansion is the coming expiration of the federal Investment Tax Credit for solar power and Production Tax Credit for wind power, which sets hard deadlines for completing projects seeking the credits. While Congress in December extended the PTC through 2020 for future wind farms, solar industry lobbying failed to win an extension of the ITC past current plans to phase it down to a permanent 10 percent for developers by 2022.
EIA's latest data also puts the focus on coal's continued decline, with coal-fired power plants making up 5.8 gigawatts of the 11 gigawatts of capacity retirements scheduled for 2020, half of it in Kentucky and Ohio.
Older natural-gas-fired power plants in California will account for most of the 3.7 gigawatts of natural-gas retirements projected for the year; two closing nuclear power plants - New York's Indian Point and Iowa's Duane Arnold Energy Center - will remove 1.6 gigawatts of capacity.

SFWMD to increase its monitoring of our water quality in 2020

None of us like the idea of having green gunk in our backyards. Right now, plans are underway for the South Florida Water Management District to increase its monitoring of our water quality.

Back in August, WINK News told you about the SFWMD's plans to expand water quality monitoring.

Chauncey Goss, the chairman of the SFWMD governing board, said it is going from 161 monitoring sites to 243 across Lake Okeechobee and northern Everglades watersheds.

"I do know we're putting in 15 in the Caloosahatchee watershed," Goss said. "And those 15 are going in on Thursday."

The sites will test for qualities like temperatures, dissolved oxygen and nutrients, which can fuel blue-green algae blooms.

"Then we can start to tackle some of those point sources and non-point sources to figure out how best to get rid of the nutrients," Goss said, "which will then starve the algae."

Dr. Mike Parsons, a professor at The Water School at Florida Gulf Coast University, said we need more data to understand water conditions.

"Because when something blooms," Parsons said, "it means that not only does it really like the conditions but it can out-compete everything else and then it dominates."

"The easy part is to find out, okay, this is where it's coming from," Goss said.

The next question is why it is happening.

The SFWMD said with the expansion, it will monitor about 5.5 million acres of watersheds, including monitoring stations north of Lake Okeechobee.

AMERICAN OVERSIGHT

click for website

Monitoring conditions is equivalent to what doctors do for patients.

They use the information that they get from their monitors in order to determine what is wrong with a patient and to be sure that whatever they are doing is making the patient better and not worse.

ORCA's goal is to provide the information that is needed to determine what aspects of the Lagoon have become unhealthy and what we can best do to put things back in balance.

Ecotoxicity Program

ORCA's Ecotoxicity Program is a "canary in a coal mine" approach to assessing the health of a marine ecosystem. We complete dense sampling protocols and test sediment samples for a wide array of easily measured toxicity and nutrient parameters. The results are then mapped to show pollution hot-spots which are then monitored by the Kilroy Network to identify pollution sources.

Kilroy Network

ORCA's innovative Kilroy network lets scientists, as well as community members, monitor an extensive array of water quality data in real time in order to identify and remedy pollution sources.

Sentinel Program

By sampling bivalves (oysters, clams, mussels, etc.) located in the Indian River Lagoon, ORCA researchers are able to monitor water contaminants such as a variety of toxic organic compounds and heavy metals.

Indoor Salmon fish farm in Florida aims to take over US market

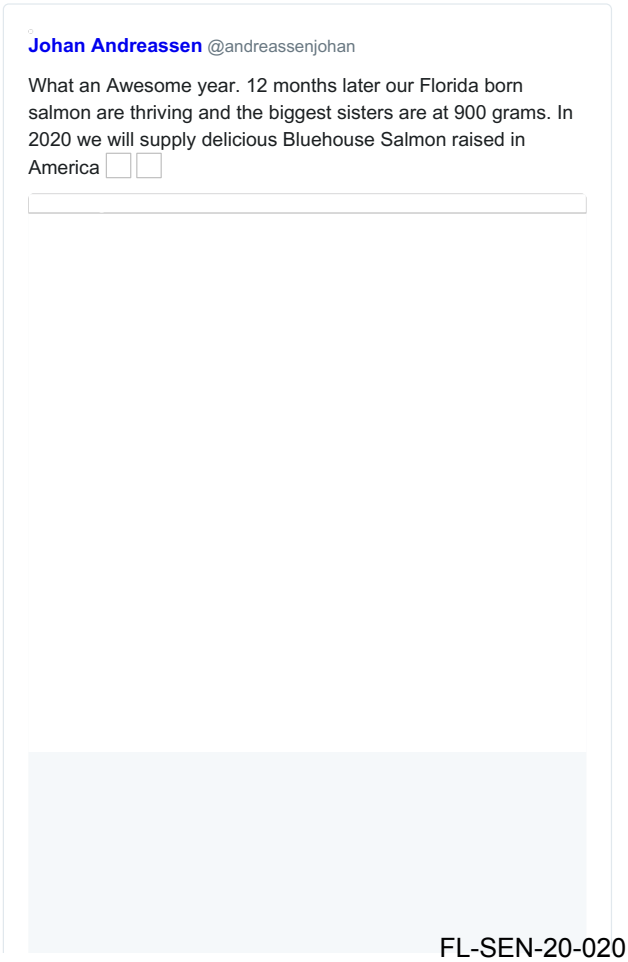
AMERICAN OVERSIGHT

Atlantic Sapphire, the Norwegian indoor salmon fish farm, might have gotten its start in 2010, but the company is heading into the new decade with ambitious goals in the American fish market.

The fish farm is on track to finish construction on one of three facilities in Miami-Dade by July, according to Miami Today.

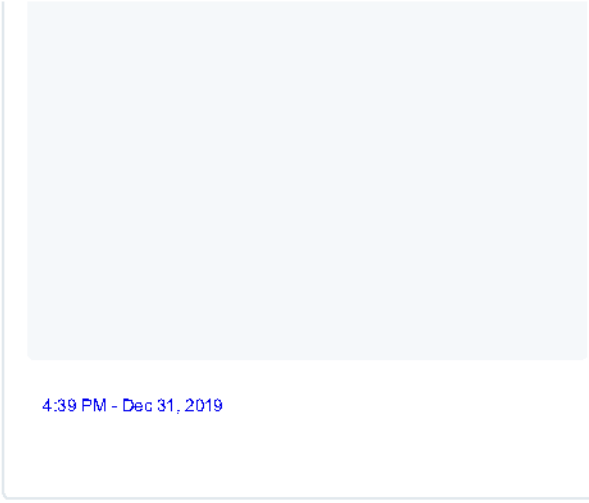
Once completed, Atlantic Sapphire aims to produce 100,000 tons of salmon by 2026 and then increase production to 242,000 tons by 2031 to feed health-conscious Americans, according to a report by the United Press International on Monday. If successful, Atlantic Sapphire would output half of the nation's current salmon consumption, which falls in line with the National Fisheries Institute's prediction that Americans will increase their salmon intake.

In December 2018, the institute found that Americans were eating around 2.41 pounds of salmon per year.



"We sort of stumbled upon the fact that Florida's aquifers were ideal for us because I found a YouTube video about it," Atlantic Sapphire's founder Johan Andreassen told UPI, regarding how the company chose its U.S. location. "America should be able to produce its own food. Americans are waking up to the benefits of heart-healthy fish like salmon."

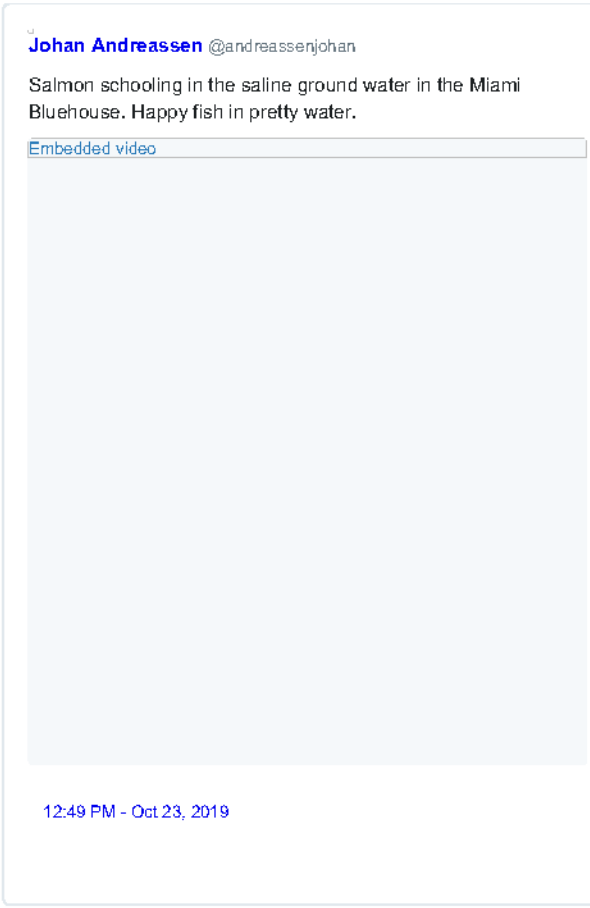
(Atlantic Sapphire)



TYSON FOODS TAKES STAKE IN PLANT-BASED FISH COMPANY

Outside Miami, Atlantic Sapphire built a fish farm in Homestead, Florida, two years ago, which operates on underground aquifers and both freshwater and saltwater, according to UPI. The water is maintained at a temperature of 59 degrees Fahrenheit to ensure the salmon grow in optimum conditions.

So far, the farm is working to get its salmon to the market size of 9 pounds. The process takes around 20 months, according to Andreassen.

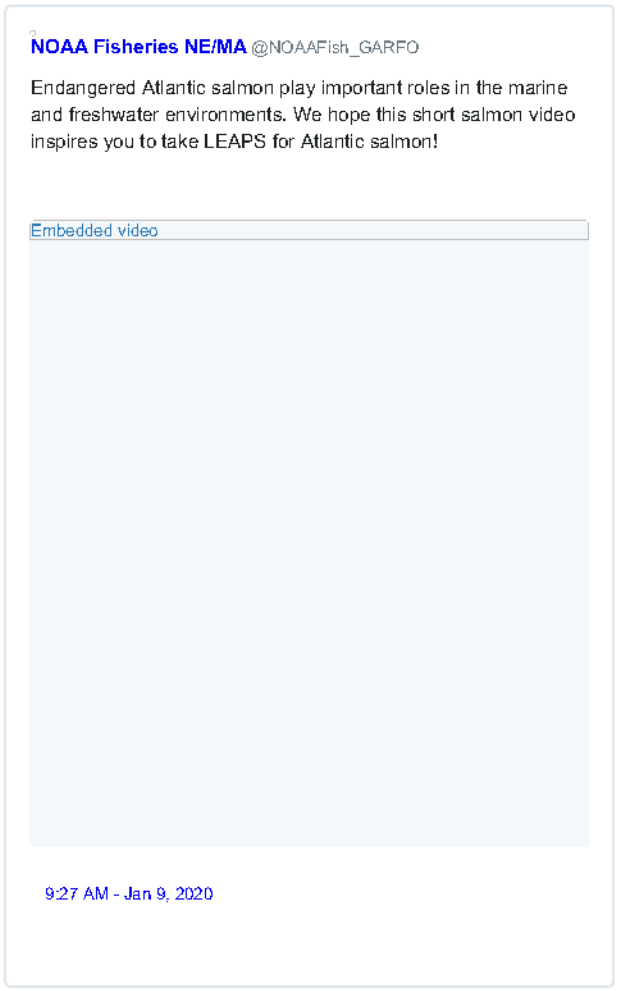


AMERICAN OVERSIGHT

The company's largest tanks can hold around 25,000 fish, and about three million are being raised for fresh and frozen consumption.

BIOENGINEERED SALMON WON'T COME FROM US'S BIGGEST FARM STATE

Recirculating indoor fish farming facilities like Atlantic Sapphire are said to be better for the environment when compared to outdoor ones that pollute oceans and spread diseases to other sea life, but the amount of water it takes to run an operation of this size is substantial.



Andreassen told UPI he received permits from the South Florida Water Management District in 2016 that allow Atlantic Sapphire to siphon about 20 million gallons of water per day for the company's 160 acres.

GET FOX BUSINESS ON THE GO BY CLICKING HERE

However, it is important to note that all consumable Atlantic salmon - which is the type Atlantic Sapphire raises - are farmed due to the species' endangered status. **Commercial and recreational fishing for Atlantic salmon is prohibited in the U.S.**

AMERICAN OVERSIGHT

About 72 percent of the world's salmon consumption is farmed, according to the 2019 Salmon Farming Industry Handbook by Norwegian seafood company Mowi ASA (formerly known as Marine Harvest ASA). The handbook notes that most fish farm producers are ocean-based and operate in Norway, Chile, Scotland and Canada.

Atlantic Sapphire is publicly traded in Oslo and has about 1,000 shareholders, according to Andreassen. He told UPI the company has raised around $3 billion from its investors and employs over 100 Florida residents so far.

About $250 million has been spent on the fish farm facilities.

AMERICAN OVERSIGHT

Global Temperature in 2019

15 January 2020

Abstract. **Global surface temperature in 2019 was the 2nd highest in the period of instrumental measurements in the Goddard Institute for Space Studies (GISS) analysis. The rate of global warming has accelerated in the past decade. The 2019 global temperature was +1.2°C (~2.2°F) warmer than in the 1880-1920 base period; global temperature in that base period is a reasonable estimate of 'pre-industrial' temperature. The five warmest years in the GISS record all occur in the past five years, and the 10 warmest years are all in the 21st century. Growth rates of the greenhouse gases driving global warming are increasing, not declining.**

Update of the GISS (Goddard Institute for Space Studies) global temperature analysis (GISTEMP) (Fig. 1), finds 2019 to be the 2nd warmest year in the instrumental record. More detail is available at http://data.giss.nasa.gov/gistemp/ and http://www.columbia.edu/~mhs119/Temperature. Figures shown here are available from Makiko Sato on the latter web site.

We use 1880-1920 as baseline, i.e., as the zero-point for temperature anomalies, in part because it is the earliest period with substantial global coverage of instrumental measurements. Global temperature in 1880-1920 should approximate 'preindustrial' temperature, because the small warming from human-made greenhouse gases in that period tends to be offset by unusually high volcanic activity then.

The five warmest years in the GISS record are the past five years, 2015-2019. 2014 is the 6thwarmest year, but its temperature is practically indistinguishable from that of 2010. Figure 2 compares the temperature anomalies for each of these years relative to the 1951-1980 base period. We use 1951-1980 as base period for global maps because it allows good global coverage, including data for Antarctica.

Fig. 1. Global surface temperatures relative to 1880-1920 based on GISTEMP data, which employs GHCN.v4 for meteorological stations, NOAA ERSST.v5 for sea surface temperature, and Antarctic research station data.

Fig. 2. Temperature anomalies in the past six years relative to the 1951-1980 base period.

Decadal average surface temperature anomalies (Fig. 3) show that since the 1970s each decade has been notably warmer than the prior decade. Average warming over land is twice as large as over ocean, and warming is greatest in the Arctic (Figs. 2 and 3). Average warming over land is now about 3°F (more than 1.5°C). The warming is reaching magnitudes at which it is easier for the public to notice that warming is occurring, even though it is small compared with the magnitude of weather fluctuations.

Cooling or absence of warming southeast of Greenland and in the Southern Ocean surrounding Antarctica is associated with and likely a consequence of injection of freshwater in the upper ocean layers as a result of increasing melt of ice shelves and the ice sheets. If the melting rate continues to increase, the associated regional cooling will increase and may put a damper on (slow the rate of) global warming. That relative cooling effect, if it occurs, would be no cause for celebration, as it would imply an increased heat flux into the ocean, an increased warming rate within the ocean that further increases the melt of ice shelves, and an accelerating rate of sea level rise.

Fig. 3. Temperature anomalies relative to 1880-1920 for global land and global ocean areas.

Fig. 4. Global surface temperature since 1960 relative to the 1880-1920 base period. The red-blue diagram is the Niño3.4 index, which is the temperature in a region along the equator in the Pacific Ocean used to characterize the El Niño status. Green triangles mark volcanic eruptions that produced a large amount of stratospheric aerosols.

AMERICAN OVERSIGHT

Interannual variability of global temperature is highly correlated with the tropical Southern Oscillation, the El Niño/La Niña cycle (Fig. 4). The rate of warming had been almost constant for several decades, at about 0.18°C/decade, if short-term variability is removed by 132-month (11-year) running mean (Fig. 4). However, data for the past several years suggest that the warming rate may be accelerating.

Global warming is linked to increasing long-lived atmospheric greenhouse gases, especially CO_2 and CH_4, and in turn these are linked to a substantial degree with fossil fuel use. Thus we also update here fossil fuel CO_2 emissions, CO_2 and CH_4 growth rates, and the resulting growth rate of greenhouse gas climate forcing. The latest data on global energy use and fossil fuel emissions (Fig. 5) are through December 2018. Greenhouse gases are up-to-date within a few months, and are estimated to the end of 2019, as is the resulting climate forcing. Energy use and CO_2 emissions are continuing to rise (Fig. 5).

Fig. 5. Global energy consumption and fossil fuel emissions through December 2018. Energy is based on Boden et al. to 1965 and BP subsequently. CO_2 is based on Boden through 2014 and subsequently BP.

Fig. 6. (a) Global CO_2 annual growth based on NOAA data (http://www.esrl.noaa.gov/gmd/ccgg/trends/). Red curve is monthly global mean relative to the same month of prior year; black curve is 12-month running mean of red curve. (b) CO_2 growth rate is highly correlated with global temperature, with the CO_2change lagging global temperature change by 10 months;

Annual growth of atmospheric CO_2 has increased from less than 1 ppm (parts per million) per year when Keeling began his measurement in the late 1950s to about 2.5 ppm per year averaged over the past several years (Fig. 6). The CO_2 growth rate has a strong correlation with the global temperature anomaly with CO_2 lagging the temperature by 10 months. This suggests that the CO_2 growth rate may increase in 2020, but this is uncertain because the recent tropical and global warming was weak (Fig. 4).

The annual growth of atmospheric CH_4, after falling to near zero in the early 21 st century, has increased to about 10 ppb (Fig. 7). Mechanisms that may have contributed to this resurgence of methane growth include leakage during increased use of hydrofracturing in fossil fuel mining, increased emissions from warming wetlands, increased emissions from melting tundra and methane hydrates, but contributions from these processes have not been adequately quantified.

Fig. 7. Global CH_4 from Dlugokencky (2016), NOAA/ESRL (http://www.esrl.noaa.gov/gmd/ccgg/trends_ch4/). End months for three indicated slopes are January 1984, May 1992, August 2006, and September 2019. Data extend through September 2019.

Fig. 8. Greenhouse gas climate forcing annual growth rate. Colored areas are 5-year running means. Gray dots connected by grey lines are annual changes of the total forcing by all gases. Greenhouse gas amounts are from NOAA/ESRL Global Monitoring Division. O_3 changes are not fully included, as they are not well measured, but O_3 tropospheric changes are partially included via the effective CH_4 forcing. MPTGs are Montreal Protocol Trace Gases and OTGs are Other Trace Gases. The added future warming (right scale) is the equilibrium warming for the added forcing, assuming a climate sensitivity of 0.75°C per W/m^2.

As a result of the increasing growth rates of the greenhouse gases, the annual growth of the greenhouse gas climate forcing is tending to increase. Large interannual fluctuation in the CO_2growth causes interannual fluctuation in annual growth of the total greenhouse gas climate forcing, but the smoothed growth rate has increased steadily over the past decade.

2020 Scholarship and Grant Applications Are Now Being Accepted

APPLICATION SUBMITTAL DEADLINE: MARCH 31, 2020

AWRA Florida has a mission to support education through the Rosanne Clementi Education Program and awards scholarships and grants to Florida undergraduate and graduate college or university students, high school seniors, pre-Kindergarten through 12th grade teachers, and environmental education centers.

The Sanford N. Young Scholarship is designed to provide funding for one (1) **$3,000** scholarship for an exceptional water resources graduate student.

The William V. Storch Student Award is available to graduate and undergraduate water resources students to support educational activities. In 2020, up to four (4) **$1,500** awards are available to graduate students and up to two (3) **$1,500** awards are available to undergraduate students.

The Buddy & Laura Blain High School Scholarship is available to exceptional Florida high school seniors who have an intent to pursue academic studies at a Florida college or university. At least one (1) **$1,000** scholarship is available each year.

The J.B. Butler Science Grant is available to pre-Kindergarten through 12th grade teachers and/or environmental education centers to aid in water resources education. Six (6) **$500** grants are typically awarded each year.

Click here for more information and to download application forms and instructions. All applications must be submitted electronically as a single PDF file by **March 31, 2020** to awra@awraflorida.org. If you are not an AWRA Florida Student member, please consider joining. Annual student membership is only $5.

If you have any questions, please reply to this email or contact Gordon Brown.

Climate Change, Invasive Species Threaten Everglades

Everglades National Park, in the American state of Florida, is home to a large number of different kinds of wildlife. There are, for example, more than 360 species of birds.

The Everglades is the only place in the world where freshwater alligators and saltwater crocodiles live together, some say.

But the park is facing problems, including climate change and invasive species.

Environmental problems

Over the last century, about half of the Everglades has disappeared.

What survives is not really a natural **ecosystem**. It depends on a large network of human-made waterways, dams, pump stations and other water-control structures.

It is what the U.S. Army Corps of Engineers calls a "highly **managed** system." Critics call it a "Disney Everglades."

New information about the speed of climate change has led some to question how much of the Everglades can ever be saved.

"I **tend** to think that everything can be saved," says Fred Sklar of the South Florida Water Management District, which is responsible for much of the Everglades' **infrastructure**. "Restored is another question."

Tiffany Troxler is a director of Florida International University's Sea Level Solutions Center. She recently showed reporters from the Associated Press some of the environmental problems. These include evidence of the collapse of a thick soil that supports the ecosystem.

"You can think about these soils as your bank account," she said. "In the condition that this **marsh** is [in] right now, the outlook is not good."

A lack of fresh water and an increase in sea water have caused salt levels to rise in the marshes, Troxler and others say. This appears to be slowing or stopping plant growth.

Earlier this year, a group that includes the Corps of Engineers and the National Park Service issued its latest Everglades System Status Report.

It reads, "The Florida Everglades is struggling to survive in the face of **sustained** pressure from human activities" and the increasing effects of climate change.

Invasive species

But climate change is only one of the problems facing the Everglades. Invasive species are another.

Of all the invasive species in the Everglades, the Burmese python is the most difficult to deal with. No one is quite sure how a huge snake native to Southeast Asia arrived in South Florida. Many believe the first pythons escaped - or were released - in the late 1970s. Estimates of their population run into the hundreds of thousands.

Scientists suspect the python is responsible for the disappearance of up to 99 percent of the marsh rabbits, raccoons and other small animals in the national park.

Scientist Ian Bartoszek heads the Conservancy of Southwest Florida's snake research and removal program. Since 2013, he has been using pythons to catch pythons.

Every two weeks, he flies over the Everglades, picking up the signal of radio devices placed in 25 snakes. The hope is that these so-called "**Judas** snakes" will lead his team to others, especially females of reproductive age.

In the past six years, the conservancy team has removed more than 500 pythons with a combined weight of about 5,000 kilograms. However,

AMERICAN OVERSIGHT

Bartoszek thinks a total removal of the Burmese python is impossible.

Bartoszek noted that the Burmese pythons seem "to be**adapting** and **evolving** [in] real time here in the Everglades ecosystem." He added that it may be more correct to call them Everglades pythons. "Because they're ours now. They're here," he said.

Some hopeful signs

Still, there are some hopeful signs.

Some adaptation is taking place. Scientists have found evidence that local wood storks, a kind of bird, are eating non-native African jewelfish.

And the endangered Everglades snail kite has been eating a rare kind of mollusk, another invasive species in the area.

Perhaps the most hopeful development of all is the ongoing $578 million project to restore 103 square kilometers of the Kissimmee River Basin.

Since the destruction of some dams, part of the river has returned to its natural path. The wetlands are spreading and the numbers of wildlife are increasing in that area.

Thomas Van Lent, vice president of science and education at the Everglades Foundation, recently took a boat trip on a three-kilometer part of the restored river.

"And there were snail kites everywhere," he says. "It's just**amazing** to see the effects."

I'm John Russell.

And I'm Jill Robbins.

Some definitions and terminology from both the US Army Corps and the South Florida Water Management District (SFWMD)
Courtesy Cong. Francis Rooney's website

CERP?
-Comprehensive Everglades Restoration Plan (CERP). CERP aims to increase storage of wet season waters to augment the supplies during the dry season for both the natural system and urban and agricultural users. The plan consists of 68 projects costing over $16 billion to complete.

CEPP?
-Central Everglades Planning Project (CEPP) is to deliver a finalized plan, known as a Project Implementation Report (PIR), for a suite of restoration projects in the central Everglades to prepare for congressional authorization, as part of the Comprehensive Everglades Restoration Plan (CERP). The Central Everglades Planning Project will identify and plan for projects on land already in public ownership to allow more water to be directed south to the central Everglades, Everglades National Park, and Florida Bay.

WRDA?
-Water Resources Development Act (WRDA), is a reference to public laws enacted by Congress to deal with various aspects of water resources including but not limited too environmental, structural, navigational, and flood protection.

HHD?
-Herbert Hoover Dike (HHD) is a 143-mile earthen dam that surrounds Lake Okeechobee, the heart of the Kissimmee-Okeechobee-Everglades system. The project reduces impacts from flooding as a result of high lake levels for a large area of south Florida.

EAA /
- Everglades Agricultural Area (EAA). 700,000-acre area south of Lake Okeechobee.

From the SFWMD Website
"The Water Resources Law of 2017 (Laws of Florida, Chapter 2017-10, Senate Bill 10) directs the expedited design and construction of a water storage reservoir in the Everglades Agricultural Area (EAA) to provide for a significant increase in southern storage to reduce high-volume discharges from Lake Okeechobee.

AMERICAN OVERSIGHT

A project component of CERP, the reservoir will be designed to hold at least 240,000 acre-feet of water and include water quality features necessary to meet state and federal water quality standards. The law requires the South Florida Water Management District (SFWMD) to meet certain timelines for implementing the project."

C-43 West Storage Basin
-Caloosahatchee River (C-43) West Basin Storage Reservoir Project is a Congress authorized project in the Water Resources Reform Development Act (WRRDA) of 2014. This project is a component of the Comprehensive Everglades Restoration Plan (CERP). The project is designed to capture excess C-43 Basin runoff and regulatory releases from Lake Okeechobee during the wet season and release water from the reservoir during the dry season. The project includes development of one aboveground reservoir with a total storage capacity of approximately 170,000 acre-feet (ac-ft). The project will reduce the extreme salinity changes in the Caloosahatchee River Estuary by providing a more consistent flow of water discharging into the estuary. The project will also provide water supply benefits and some flood attenuation.

Picayune Strand
-The Picayune Strand Restoration Project, when completed, the project will restore historic water flows that benefit coastal estuaries, recharge the aquifer, and protect the water supply, while maintaining current levels of flood protection. The restoration involves plugging 48 miles of canals, removing 260 miles of crumbling roads, and constructing three major pump stations, all of which will restore more than 55,000 acres of natural habitat in an area once partially developed for an intended sprawling residential area.

Corps?
-The U.S. Army Corps of Engineers is a U.S. Federal Agency underneath the Department of Defense. The U.S. Army Corps is tasked with carrying out the 68 projects in the CERP for Everglades restoration.

SFWMD?
-The South Florida Water Management District. The South Florida Water Management District is the oldest and largest of the state's five water management districts, managing water resources in a 16-county region that stretches from Orlando to the Florida Keys.
**From the SFWMD Website*

ASR
-Aquifer storage and recovery.

C&SF
-Central and Southern Florida (C&SF) is a Congress authorized project in the Flood Control Act of 1948 and subsequent authorizations through the Water Infrastructure Improvements for the Nation (WIIN) Act of 2016. The C&SF project is a multi-purpose project that provides flood control; water supply for municipal, industrial, and agricultural uses; prevention of saltwater intrusion; water supply for the Everglades National Park and protection of fish and wildlife resources.

Legacy Florida
-Is a State Sponsored piece of legislation, passed by the Governor of Florida on April 7, 2016. Committed up to $200 million every year for Everglades Restoration efforts.

Amendment 1
The Florida Water and Land Conservation Initiative, Amendment 1 was a constitutional amendment offered to the state in 2014.

Red Tide
-According to NOAA: A "red tide" is a common term used for a harmful algal bloom.
Harmful algal blooms, or HABs, occur when colonies of algae-simple plants that live in the sea and freshwater-grow out of control while producing toxic or harmful effects on people, fish, shellfish, marine mammals, and birds. The human illnesses caused by HABs, though rare, can be debilitating or even fatal.

While many people call these blooms 'red tides,' scientists prefer the term harmful algal bloom. One of the best known HABs in the nation occurs nearly every summer along Florida's Gulf Coast. This bloom, like many HABs, is caused by microscopic algae that produce toxins that kill fish and make shellfish dangerous to eat. The toxins may also make the surrounding air difficult to breathe. As the name suggests, the bloom of algae often turns the water red.

A small percentage of algae, however, produce powerful toxins that can kill fish, shellfish, mammals, and birds, and may directly or indirectly cause illness in people. HABs also include blooms of non-toxic species that have harmful effects on marine ecosystems. For example, when masses of algae die and decompose, the decaying process can deplete oxygen in the water, causing the water to become so low in oxygen that animals either leave the area or die.

Blue/Green Algae
According to FWC - Cyanobacteria are some of the Earth's oldest organisms, with fossils dating back 3.5 billion years. Yet, they can still be found today in all of Florida's freshwater and brackish habitats - lakes, rivers and estuaries. Like red tides, cyanobacteria can grow and accumulate, or bloom, when environmental conditions such as light availability and temperature are favorable. Nutrient pollution from agricultural and urban runoff causes the majority of freshwater cyanobacteria blooms. Other conditions that contribute to blooms are stagnant water resulting from a lack of natural flushing and land clearing. Cyanobacteria blooms can destroy submerged vegetation like seagrass by blocking sunlight. Blooms can also reduce oxygen availability to other aquatic organisms and introduce toxins that pass through the food chain. Toxins produced by cyanobacteria can be harmful to humans, affecting the liver (hepatotoxins), the nervous system (neurotoxins) and skin (dermatotoxins).

AMERICAN OVERSIGHT

Opinion

Editorial: After five years, it's past time to give Forever Florida its due

By The Palm Beach Post Editorial Board

Five years after its passage in a landslide, the Amendment promise's to protect Florida's environment remains only partially fulfilled. It's scandalous, and it has to end.

Florida voters were clear in their intentions by approving Amendment 1 in 2014: spend tax money to buy and conserve our land and waters. It's past time state lawmakers listened.

Florida's voters spoke as an unmistakable chorus on Election Day 2014: 75% said "yes" to the ballot measure for land conservation and water protection -- including an overwhelming 84 percent in Palm Beach County. It got 4.2 million votes, more than any politician (including then-Gov. Rick Scott).

The idea was to give 33% of tax collections from real-estate documentary stamps to the state's Land Acquisition Trust Fund to protect the state's biggest asset: the environment. That would come out to about $23 billion over 20 years, according to recent projections.

But with development relentlessly gobbling up Florida's open lands and pollutants fouling Florida waterways, the voters saw the need. The bounty from real-estate sales would be used to "acquire, restore, improve, and manage conservation lands."

Florida legislators and Scott had other ideas. For years they had harshly cut budgets when it came to the environment. Scott's administration, with the Republican-controlled Legislature's blessing, prioritized green-lighting industry and development ahead of protecting beloved assets like the St. Lucie River and Caloosahatchee River estuaries.

And even after the people roared their disapproval with that vote five years ago, Scott was content to keep on starving Florida Forever, the state's main conservation land-buying program.

Land-buying had previously been a favorite occupation of Florida governors. Until the Great Recession hit in 2009 in the middle of Charlie Crist's four years in office, Florida Forever and its predecessor, Preservation 2000, were routinely funded at $300 million a year.

Not Scott, governor from 2011 until last January. Former state representative Paula Dockery tells it succinctly: Scott "signed eight annual budgets funding Florida Forever at zero, $8.4 million, $20 million, $12.5 million, $15 million, zero, zero, and $100 million during his two terms in office."

Note that those last four budgets were while Amendment 1 was in effect. And the final of those four encompassed an election year when Scott ran for the U.S. Senate.

Of course, lawmakers did spend money from the Amendment 1 trust fund. Only, they often spent it on things that didn't seem to fit the aims or spirit of the amendment.

In 2015 alone, they directed $152 million to pay for salaries at agencies that deal with the environment in some way, such as hunting, freshwater fisheries, and archaeological and historic sites. Instead of expanding environmental protections, in other words, they used the new funds for business as usual.

When environmental groups took this abhorrent legislative behavior to court, a judge found unconstitutional 185 spending provisions totaling more than $420 million. But the case is in limbo. An appellate court in September tossed it back to the trial court for further review without specifying whether Amendment 1 money had been misused.

Meantime, the unmet potential of Amendment 1 continues under Gov. Ron DeSantis. True, the new governor is taking some big swings for the environment. In September, for instance, he requested annual environmental spending of $625 million for the next three years. That includes $300 million for Everglades restoration and the long-delayed southern reservoir, and millions more for attacking harmful algal blooms.

But his official press release doesn't mention Florida Forever at all. And in the current fiscal year, which started July 1, Florida Forever gets only $34.5 million.

Keep in mind, the Amendment 1 fund is expected to generate more than $906 million this fiscal year. By anyone's arithmetic, there's plenty more money available for environmental needs.

Last week, the Senate Environment and Natural Resources Committee took a step forward by voting unanimously to designate $100 million of Amendment 1 money to Florida Forever each year to provide the program with "a stable annual funding floor," according to the bill's sponsor, Sen. Linda Stewart, D-Orlando. The bill is filed for consideration in the legislative session that begins Jan. 14.

A $100 million guarantee is a nice start. Still, we agree with environmental groups that insist upon a minimum of $300 million annually. After all, that's what the program used to get, years before voters provided a pot exceeding $900 million a year.

It's good to see attitudes on protecting the environment improving in this state from the dark ages of the Scott administration. But bolder action is possible. The state's voters demanded it in 2014. They're still waiting. And they shouldn't be.

AMERICAN OVERSIGHT

Florida officials are getting ready once again to evaluate the state's water-quality standards as part of a triennial review. This is our chance to address the toxic-algae nightmare that's been plaguing our precious lakes, rivers and springs.
Tell the Florida Department of Environmental Protection to adopt strict, numeric limits for algae blooms and the dangerous cyanotoxins they produce.
People exposed to cyanotoxins - usually through polluted water, contaminated seafood, skin exposure or inhalation - are at serious risk of falling sick. They're also much more likely to suffer a wide range of health problems, including liver and neurodegenerative disease.
Right now Florida has no set limits for cyanotoxins in recreational waters. So establishing them will help notify the public when blooms become dangerous. It'll also help long-term planning and prevention.
Act now to send a letter to state officials urging them to set strict limits on toxic algae in Florida.

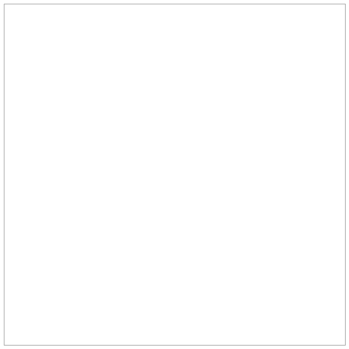
Take Action

Flood Insurance Was About To Get A Whole Lot More Expensive, But That's Been Delayed

By ALEX HARRIS AND ALEX DAUGHERTY

Floridians have another year of reprieve before they face a likely hike in their flood insurance premiums, thanks to political pressure from Congress over a potentially drastic revamp to the National Flood Insurance Program.

The planned change to the way the NFIP charges policyholders is meant to claw the program out of its multibillion-dollar debts and help the



AMERICAN OVERSIGHT

nation adapt to the growing risk of climate change - in exchange for an end to the subsidies coastal residents have relied on for decades.

No state would face a bigger financial impact than Florida, where 35 percent of the program's policies are written.

A week after dozens of members of Congress worried about skyrocketing rates for their constituents pushed the Federal Emergency Management Agency to defer its planned rate restructuring - known as Risk Rating 2.0 - the agency announced it would enact the new rates in October 2021 instead of October 2020.

"Some additional time is required to conduct a comprehensive analysis of the proposed rating structure so as to protect policyholders and minimize any unintentional negative effects of the transition," the agency said in a statement. The delay also allows FEMA to switch everyone's rates at once instead of in phases, as originally planned.

Check your risk
Wow Detailed Maps! - https://msc.fema.gov/portal/search

The agency originally planned to release its new rate structure in April 2020, so it's unclear exactly how much higher rates will get. Last week, FEMA announced that renewal premiums will increase an average of 11.3 percent nationwide, and that's without the impact of the revamped rates.

Risk Rating 2.0 is the NFIP's big plan to get itself back in financial shape. The organization is deeply in debt after decades of expensive back-to-back natural disasters and inaccurate pricing for many coastal homes left the NFIP paying out more than consumers paid in.

Coastal residents, in particular, enjoy flood insurance policies that are cheaper than they should be thanks to the organization's outdated risk modeling, which doesn't take sea level rise or tidal flooding into account. But that modeling, along with FEMA's outdated and inaccurate mapping, have led people across the country to believe their homes are safe from flooding when they really aren't.

"People for 40 years were led to believe that FEMA flood maps were the gospel on their flood risk," said Albert Slap, president of Florida-based Coastal Risk Consulting. "People have been wiped out as a result of following FEMA flood maps."

He cites the example of Hurricane Harvey, which flooded more than 200,000 homes in Houston, Texas. Three-quarters of those homes were in a FEMA flood zone where flood insurance isn't mandatory, he said, so most of them didn't have flood insurance.

Slap agrees with former NFIP Head Roy Wright, who said last year that everyone with a Florida driver's license should have flood insurance.

The last time the NFIP changed its rate structure to reflect the real risk of flooding, the results were disastrous for homeowners. Premiums increased tenfold in places like the Keys, and the changes were walked back two years later.

AMERICAN OVERSIGHT

Rep. Debbie Mucarsel-Powell, D-Miami, said she hopes the yearlong delay will give FEMA more time to determine optimal flood insurance rates that will not dramatically increase costs for residents and businesses in Florida.

"I support FEMA's decision to defer implementation of Risk Rating 2.0 for an additional year," Mucarsel-Powell, who represents the low-lying Florida Keys, said in a statement. "I urge FEMA to use this extra time to protect policyholders and conduct a comprehensive analysis of the program. I hope this delay will result in greater clarity and transparency from FEMA in the future. Homeowners and businesses deserve more information regarding any significant changes in their flood insurance premiums."

Six of the seven House members from Miami-Dade and Broward counties signed on to a letter urging a long-term flood insurance fix from FEMA in lieu of raising flood insurance rates around Election Day 2020. Rep. Frederica Wilson, D-Miami Gardens, was the only lawmaker from South Florida who didn't sign the letter. Fifteen of Florida's 27 House members, including Democrats like Broward Rep. Debbie Wasserman Schultz and Republicans like Panhandle Rep. Matt Gaetz, signed the letter.

Florida Reps. Francis Rooney, R-Naples; Charlie Crist, D-St. Petersburg; and Mucarsel-Powell also issued a joint statement praising FEMA's decision but said the agency should not issue a double-digit rate increase to flood insurance premiums.

"We're encouraged that FEMA is listening to Congress's concerns about the impacts of Risk Rating 2.0," the lawmakers said. "FEMA's promise to protect policyholders and minimize any unintentional negative effects in the transition is vital to ensuring the NFIP remains successful. We hope FEMA will more actively engage with Congress to ensure transparency around the fundamental changes they have proposed.

"We led the call for a lower premium cap and delay of Risk Rating 2.0 because our constituents cannot suffer a double-digit rate increase. While this temporary reprieve should prevent rate shocks next year, it does not change that premium hikes are on the horizon. We remain committed to our goal of preventing premium spikes and making the NFIP more affordable. A long-term reauthorization is an opportunity to increase the affordability, sustainability and usability of the program and we must get it right."

This story was produced in partnership with the Florida Climate Reporting Network, a multi-newsroom initiative founded by the Miami Herald, the South Florida Sun Sentinel, The Palm Beach Post, the Orlando Sentinel, WLRN Public Media and the Tampa Bay Times.

AMERICAN OVERSIGHT

More Elevation for Coastal Construction?

Dennis Maley *

Sunday, Nov 17, 2019

BRADENTON - Florida's nationally-renowned statewide building code does not currently take sea-level rise into consideration. That could change this year, however, thanks to a new study commissioned by the Florida Building Commission.

The study, which was performed by Florida International University, recommends that all new construction along the coast be brought up an additional foot to mitigate potential floodwaters. This follows changes that were made in 2016 that required new construction along the coast to elevate buildings by one foot.

Florida did not have state building codes when Hurricane Andrew devastated its southern tip in 1992. The law creating the Florida Building Code was enacted by the state legislature in 1998 and became effective on March 1, 2002. It has never directly dealt with the idea of sea-level rise, which is predicted to hit two feet by 2060 due to global warming.

Another recommendation in the report calls for the review of groundwater maps prior to allowing septic tanks to be installed, because of rising groundwater from sea level rise, which has already caused septic failures across Miami-Dade County.

Many other states have implemented similar codes following disastrous floods, including both New Jersey and New York, which each instituted two-foot coastal elevation requirements following Superstorm Sandy in 2013. Some cities have even tougher criteria. Annapolis requires two feet, New Orleans goes up three feet, and Nashville requires four feet.

Developers have resisted increased "freeboard" requirements, because of additional costs that they say can further challenge affordable housing. That cost varies from the less expensive option of raising the home to the most expensive option of using fill only to increase the elevation of the foundation. However, proponents note that each foot provides for a significant flood insurance reduction, which could offset that cost over time.

One study by the Association of State Floodplain managers estimated that it took **around 3.3 years** for premium savings to pay for construction costs, creating significant savings over a 30-year mortgage. Proponents also note the much higher cost of rebuilding homes and other properties that are destroyed by flooding.

AMERICAN OVERSIGHT

Seagrass beds are starting to revive along the Indian River Lagoon; but for how long?

Tyler Treadway, Treasure Coast Newspapers

Don't cue the ticker-tape parade quite yet, but seagrass is starting to make a comeback in the Indian River Lagoon along the Treasure Coast and Space Coast.

Not a huge comeback, mind you, but after years of losing thousands of acres of seagrass beds throughout the 156-mile lagoon - up to 95 percent of their coverage in some areas over the last 20 years, according to a University of Florida report - any turnaround is welcome.

Buy Photo

Kathryn "Katie" Tiling (left), a research associate at Florida Oceanographic Society, leads a volunteer-based seagrass survey Wednesday, Aug. 21, 2019, in the Indian River Lagoon. Tiling said seagrass in Martin County is making a slow recovery after a summer without Lake Okeechobee discharges. *(PHOTO: LEAH VOSS/ICPALM)*

Why? Because seagrass beds are an essential part of the lagoon.

Seagrasses are known as a "foundation species" in the lagoon, said Kathryn "Katie" Tiling, at the Florida Oceanographic Society in Stuart.

CONSIDER SUBSCRIBING TODAY: Help support our local journalism

"Seagrass beds harbor lots of native fish species, and they're nurseries for lots of popular game fish," said Capt. Paul Fafeita of Vero Beach, a fishing guide and president of the Clean Water Coalition of Indian River County.

"Seagrass is crucial for their existence as well as other species from crabs to wading birds. If you lose seagrass, you lose the ecosystem."

Buy Photo

Capt. Paul Fafeita, of Vero Beach, a fishing guide and president of the Clean Water Coalition of Indian River County, heads south on the Indian River Lagoon in a search for seagrass on Monday, Aug. 19, 2019, in Vero Beach. The lagoon is home to seven species of seagrass: Johnson's seagrass, manatee grass, paddle grass, shoal grass, star grass, turtle grass and widgeon grass. *(PHOTO: LEAH VOSS/ICPALM)*

Seagrasses also help keep lagoon water clean by holding down sediment.

"When you lose seagrass, the water becomes more turbid," Tiling said.

And when water gets turbid, seagrass can't get sunlight to photosynthesize food, so you lose more seagrass.

"It's a snowball effect," Tiling said.

Environmental, economic impact

According to the St. Johns River Water Management District, 2.5 acres of seagrass can support:

- up to 100,000 fish
- up to 100 million invertebrates such as worms, clams and snails
- $5,000 to $10,000 in economic activity

So, what's been killing seagrass in the lagoon?

The short answer: nutrients, particularly nitrogen and phosphorus.

AMERICAN OVERSIGHT

Seagrasses feed on nutrients just like the grass in your yard, but too much nitrogen and phosphorus spurs the growth of algae.

"Algae utilizes nutrients faster than seagrass," Tiling said. "So algae grows faster than seagrass and can eventually choke it out."

Where the nutrients come from varies depending on the section of the lagoon.

So do the reasons nutrient loads are lower this year and seagrass is coming back.

Martin County

"This year we've definitely seen some, a little, recovery," said Tiling. "Not having Lake Okeechobee discharges has definitely been a benefit because we've had a lack of turbidity and plenty of salinity."

Seagrass beds seeing signs of growth in the lagoon can be found at Bessey Cove north of Sailfish Point, near Boy Scout Island and behind the society's Coastal Center, where staffers take school kids seining, which involves pulling long nets through the shallow water to see what kinds of critters show up.

Buy Photo

Zack Jud, director of education and exhibits at Florida Oceanographic Society in Stuart, says seagrass is "one of the foundations of a healthy lagoon." In Martin County, seagrass in the Indian River Lagoon has been suffering since Lake Okeechobee discharges in 2013 sent massive loads of fresh water and nutrients into the estuary. *(Photo: LEAH VOSS/TCPALM)*

"In the years when we had no seagrass, we'd get virtually nothing at all," said Zack Jud, the nonprofit's director of education and exhibits. "But this past summer, all the seining we did resulted in real high biodiversity. That shows you just how vital seagrass is. It's one of the foundations of a healthy lagoon."

Tiling cautioned, however, the seagrass in the lagoon is "way far off from what it should be like."

To see what seagrass in the lagoon should be like, you'd have to go back to 2012 or early 2013, before the "lost summer" brought on by massive Lake O discharges to the St. Lucie River.

Buy Photo

Shoal grass in the Indian River Lagoon at Bessey Cove in Martin County on Wednesday, Aug. 21, 2019. *(Photo: LEAH VOSS/TCPALM)*

"Since the 2013 discharges, we've seen seagrass decline more and more over the years," Tiling said. "Growth would perk up a bit in the years with no discharges, but overall it's been a downward trend."

It's "extremely hard" to say how many discharge-free years would be needed for the seagrass beds to fully recover, Tiling said.

"I can say it took decades of active restoration for seagrass in Chesapeake Bay to come back," Tiling said. "It doesn't take much time to crush the system, but it takes a lot more for the system to recover."

St. Lucie and Indian River counties

The seagrass beds from south of Fort Pierce to Vero Beach "are probably the healthiest in the entire lagoon," Tiling said.

The reason: The Fort Pierce Inlet does a good job of flushing out dirty water and bringing in clean ocean water.

But the inlet can't keep the lagoon around it pristine.

In June, an influx of nutrient-rich water coming down Taylor Creek and the C-25 Canal caused a blue-green algae bloom in Harbortown Marina, where the creek empties into the lagoon in northern Fort Pierce.

Buy Photo

A healthy patch of turtle grass is among 440 acres of seagrass inhabiting a protected area of the Indian River Lagoon in Indian River County. Nutrients, particularly nitrogen and phosphorus, have been a major reason that up to 95 percent of seagrass coverage in some areas have been lost over the last 20 years. The seagrass beds from south of Fort Pierce to Vero Beach are healthy because the Fort Pierce Inlet flushes out dirty water and brings in clean ocean water. *(Photo: LEAH VOSS/TCPALM)*

Fortunately, the cleanest stretch of the lagoon contains some of its most important seagrass beds:

- Off Bear Point south of Fort Pierce
- Just north of Florida Atlantic University's Harbor Branch Oceanographic Institute
- Off the Oslo Road boat ramp and the Moorings Flats, where 24 tethered buoys encircle 440 acres of the lagoon's most delicate habitat.

The protected area is the result of a four-year, nearly $20,000 effort by Vero Beach Rotary clubs, known as the Rotary Initiative for Submerged Seagrass Awareness (RISSA), to warn boaters to keep off shallow seagrass beds.

Buy Photo

A group of 24 tethered buoys, encircling 440 acres of the Indian River Lagoon off the Oslo Road boat ramp and the Moorings Flats in Indian River County, warns boaters to keep off shallow seagrass beds. The protected area, funded by a project called the Rotary Initiative for Submerged Seagrass Awareness, has helped this section of the lagoon grow some of the healthiest seagrass around. *(Photo: LEAH VOSS/TCPALM)*

The Rotarians' work has helped protect that seagrass bed, Fafeita said, but others need protection as well.

Indian River County is "the least-patrolled county on the Florida east coast," he said. "The FWC (Florida Fish and Wildlife Conservation Commission) says there aren't enough boat owners here to justify more patrols."

Local law enforcement agencies only take their boats out onto the lagoon "for fatalities and parades," Fafeita, a former Indian River County sheriff's deputy, added. "I know patrolling the lagoon is expensive, but it's vitally important."

Brevard County

Much of the lagoon in Brevard County suffered through a 22-month algae bloom in 2017 and 2018, said Lori Morris, an environmental scientist at the St. Johns River Water Management District.

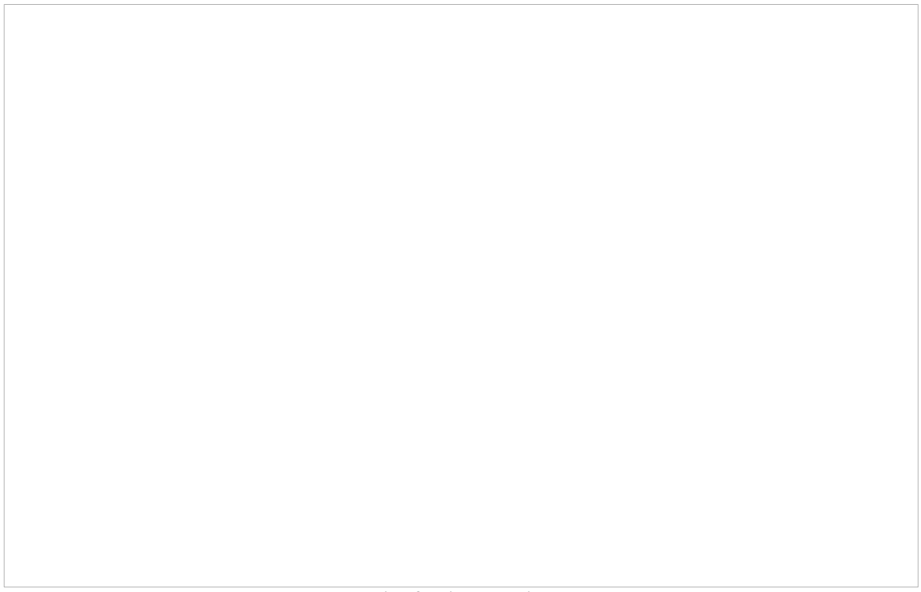
"Fortunately, it hasn't been present in 2019," Morris said. "That's helped a lot because it allowed the seagrass to have a full growing season through the spring and

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003467

summer. I wouldn't call it a recovery, but the seagrass beds have spread out a little more."

The exception: the Banana River, where brown tide lingered this year until the end of July to early August.

"That's not giving the grass a chance to grow," Morris said.



Seagrass is recovering in most of the northern lagoon this year, said Chuck Jacoby, supervising environmental scientist at the St. Johns River Water Management District.

"There hasn't been a tremendous amount of rainfall" and there have been successful efforts to reduce the amount of nutrients, primarily nitrogen and phosphorus, in the water that feed algae blooms, he said.

Those efforts include dredging projects to remove muck holding bloom-feeding nutrient, improved stormwater detention and septic-to-sewer conversions.

In recent years, communities along the lagoon also have enacted summer fertilizer bans to keep runoff out of the water, but it's still too early to determine what effects they've had.

"This is a start," Morris said. "Recovery won't happen overnight. It will take a long time because there's so far to go."

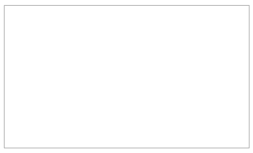
'Glades Restoration projects to help "Goldilocks" bird -

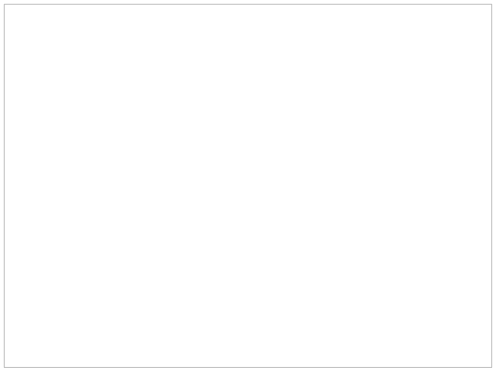
Cape Sable Seaside Sparrow

By Kevin Wadlow Free Press Staff



FLORIDA KEYS - Sending more fresh water through the northeast Shark River Slough would do more than put critical flows into Florida Bay and Everglades National Park.

AMERICAN OVERSIGHT



Redirecting water from the western Everglades back to a historic channel also may save the endangered Cape Sable seaside sparrow from extinction.

On Sept. 12, the U.S. Senate's Appropriations Committee voted for an Energy and Water Appropriations bill, which brings it closer to full Senate approval for $200 million in construction funding for South Florida ecosystem restoration.

"It reflects the urgency that is desperately needed to kick-start vital Everglades restoration projects, including the Everglades Agricultural Area Reservoir," Eric Eikenberg, chief executive of The Everglades Foundation, said in a statement. "... When the dollars flow south from [Washington,] D.C., so too will clean water flow south from Lake Okeechobee to Florida Bay."

"We are seeing advances on a few fronts along the Tamiami Trail," said Stephen Davis, Everglades Foundation's senior ecologist and communications director.

New bridges along U.S. 41, also known as the Tamiami Trail, now allow more water to move south in the Everglades system's historic flow. Funding to raise the highway to accommodate several large culverts will add to the progress on restoration by putting more water where it should be, he said.

Water returned to the northeastern Shark River Slough - "the original deep channel," Davis described - allows state and federal water managers to limit potentially damaging water discharges that threaten western nesting grounds for the protected Cape Sable seaside sparrow.

"The Cape Sable seaside sparrow is sometimes known as the 'Goldilocks bird' as conditions have to be just right to survive," says a Florida Fish and Wildlife Conservation Commission fact sheet. "Cape Sable seaside sparrows can be found only in Everglades National Park and Big Cypress National Preserve in Miami-Dade and Monroe counties, as they are the only bird restricted to the Everglades' ecosystem."

"The original freshwater flow has been cut off since the Tamiami Trail was built in the 1920s," Davis said. "Without the capacity to send water into eastern Shark River Slough, it was sent west where it sometimes led to flooding in Water Conservation Area 3A. ... There have been restrictions on when water can be sent through the control structures because it caused harm to the sparrows' nesting."

AMERICAN OVERSIGHT

Reducing levels of fresh water in the western Everglades can help preserve the seaside sparrows and "relieve detrimental conditions that also affect deer and tree islands," he said. The new flow "mimics the natural pattern of flow in the historic Everglades."

Man made changes to the Everglades system also altered the environment of Everglades National Park.

Now with the new bridges along Tamiami Trail, agencies can send "nearly a 1 billion gallons of water per day under that segment," Davis said. "We've consistently seen 1,500 cubic feet per second this wet season," which he called "a record high."

"This is clean water and we know that Florida Bay and the national park really need it. In April and May, it's not uncommon to see zero cubic feet per second, which basically means the park is drying out," he said.

Eikenberg commended "the persistent diligence of our entire Florida congressional delegation in supporting full federal funding. We especially want to thank U.S. Sen. Marco Rubio. As a member of the Appropriations Committee, he has been a stalwart supporter of the Everglades throughout this process."

Florida Gov. Ron DeSantis this month also urged Florida state legislators "to establish a recurring revenue stream for Everglades restoration, clean water, springs protection and other environmental needs of $625 million annually for each of the next three years," according to the foundation.

The Everglades, forever more

The story of one of histor's most ambitious restoration projects

*Wetlands will be discussed at the Global Landscapes Forum New York 2019. Learn more about how to **join here.***

For Jerry Lorenz, if there's one lesson to be learned from the ongoing restoration of the Everglades, it's that wetlands are easily destroyed and immensely painstaking to repair.

*"It's much easier to break them than to fix them," says Lorenz, director of research at **Audubon Florida's Everglades Science Center**. "Once you've done damage to your wetlands, you're going to start appreciating that they are the ecosystem's kidneys. They protect you from storm surges, and without them, you're not going to have drinking water. So you've got to protect your watershed entirely."*

In the past century, 50 years of dredging and diking has transformed most of the once vast network of sub-tropical freshwater ecosystems in the U.S. state

AMERICAN OVERSIGHT

of Florida into arable land and urban areas, which 8.7 million people now call home.

***Read More :* Fast facts: Wetlands**

Historically, a shallow sheet of water covering almost 28,000 square kilometers flowed unimpeded through central Florida's Kissimmee River Valley to the estuaries of Florida Bay and Biscayne Bay off the state's southernmost coasts, creating on its way a mosaic of ponds, sloughs and sawgrass marshes and, on natural rises, tropical hardwood hammocks and forested uplands. This highly diverse and unique landscape supported an array of extraordinary wildlife, including over 350 bird species alone.

In her 1947 non-fiction book The Everglades: River of Grass, published the inaugural year of Everglades National Park, journalist Marjory Stoneman Douglas described the lands in dream-like tones: "The miracle of the light pours over the green and brown expanse of saw grass and of water, shining and slow-moving below, the grass and water that is the meaning and the central fact of the Everglades of Florida. It is a river of grass."

But even after Douglas penned her ode to raise awareness of this invaluable stretch of ecosystems, their rivers, lakes and marshes continued to be meddled with, having measurable negative impacts on vertebrate fauna - from manatees and crocodiles to roseate spoonbills and bald eagles - and their habitat. Invasive species like melaleuca have displaced native vegetation in wetland and upland environments, and seawater infiltration is eating away at the sawgrass prairies, leaving behind dead vegetation and standing water - like holes in a moth-eaten sweater.

"Just because there's land beneath that water doesn't mean that you should take the water off it," says Lorenz.

For the last 20 years, however, engineers have been steadily working at turning back the clock. Funded and authorized by the Water Resources Development Act of 2000, the USD 10 billion program aims to restore more than 1.2 million hectares of the historic ecosystem back to health and then some, with flood protection and public infrastructure such as waste water treatment and fresh drinking water.

***Read More :* Urban Wetlands: Now coming to a city near you**

Endemic to the southeastern U.S., the American Alligator can be found throughout the Everglades. A. Sanchez, NPS Photo

Adam Gelber, director of the Office of Everglades Restoration Initiatives, describes the program as "super complex." It has taken "a lot of planning to get it as right as possible," he adds.

Getting it as right as possible means building or altering infrastructure to restore the quantity, quality, timing and distribution of water flows from the Kissimmee River and Lake Okeechobee south to Florida Bay and Biscayne Bay.

According to Gelber, four out of the five so-called foundation projects have been completed. One, the Kissimmee River Restoration project, "is in its final stages," he says. In the 1960s, the Kissimmee was channeled away from its natural floodplain.

AMERICAN OVERSIGHT

Compartmentalized with levees and water-control structures, the river was transformed into a series of five relatively stagnant pools, and wetland-dependent wildlife declined drastically. The project is "restoring the meandering nature of the river to provide environmental benefits that were removed as a result of straightening."

Another key project still in construction is called C-44 - the 'C' designating a canal - an above-ground reservoir spanning 1,376 hectares located halfway between Lake Okeechobee and the ocean, which captures and treats stormwater, removing pollution and chemical nutrients from agricultural run-off before releasing it into C-44, and onward into the Indian River Lagoon and the St. Lucie Estuary.

In the Everglades at sunrise. NPS Photo

A great egret stands in calm waters. NPS Photo

The C-111 Spreader Canal Western Project, meanwhile, is creating a 10-kilometer-long hydraulic ridge adjacent to Everglades National Park. Its 238-hectare above-ground detention area and two pumping stations will keep more natural rainfall and water movement within Taylor Slough, which flows in and over the Everglades, down to the bays.

One of the most important projects, however, is the lifting of the 443-kilometer-long Tamiami Trail, a highway that crosses the Everglades from Miami to Tampa and acts as a giant plug. Funded by a partnership between state and federal governments, the roadway has been successfully lifted and reconnected with 9 kilometers of bridges.

"The raising of the Tamiami Trail is the lynchpin," says Lorenz. "There's no two ways about that. But we now have to put in some infrastructure that will allow us to raise the canal to the north of it. That will increase the flow under the bridges. And at that point, yes, we get a hydrological reconnection between Shark River Slough, the main flow through the Everglades and Taylor Slough, the main flow way to Florida Bay."

An Everglades park ranger. NPS Photo

Indeed, the raising of the canal, Gelber says, "will allow us, in the next five or six years if we stay on track, to get back approximately 70 percent of the historic flows to Everglades National Park."

In terms of wildlife coming back, "we're not there yet," says Lorenz. "All in all, we are seeing a net increase in freshwater flow and a response in the submerged plants. But we are not seeing it up the food chain at this point. It's too subtle for it to translate into the higher organisms."

While scientists have seen a slight increase in the freshwater fish numbers, he said, the coastal marshes are still salty or brackish. Sea level rise is also complicating matters.

"Even though we can push the saltwater back out," says Lorenz, "it's actually getting a little too deep for the wading birds. We need drier conditions during the dry season to concentrate the prey fish." That, he adds, would help bird species such as pelicans, ospreys and bald eagles, because they don't require shallow water. "But for the wading birds that forage in that habitat, it's simply becoming too deep. They have to go further inland," he says.

Restoring the Everglades is viewed by local and national government as a vital tool for protecting Florida from extreme

AMERICAN OVERSIGHT

weather and sea level rise resulting from climate change. Daniel Miguel, NPS Photo

While Lorenz is confident that the Everglades' wildlife will come back to their former haunts if all of the restoration projects are managed successfully, there are a lot of players in the Everglades game, and their interests aren't always in sync.

According to Gelber, the South Florida Ecosystem Restoration Taskforce is made up of 14 members, including representatives of two Native American tribes and city governments, as well as diverse state and federal authorities. "Trying to find that balance between economic development and providing for a better life for people and the environment - how to thread that needle is quite challenging," he says.

Yet the importance of finishing the job is incontestable. The resources of the Everglades are not only environmentally valuable but also economically vital, says Lorenz. The Florida Reef is the world's third-largest reef and the only living coral barrier in the continental United States; together with the Florida Bay and Florida Keys, the region attracts thousands of tourists every year.

"We've already seen that when Florida Bay goes through a prolonged period of inconsistent health, fish kills and algae blooms, it greatly affects our economy, not only from the tourism side but also from the property value side," says Lorenz.

Indeed, says Gelber, "the sooner we get to full restoration, the sooner the society will reap all of the benefits."

Fracking may be a bigger climate problem than we thought

The mysterious recent spike in methane emissions? It just might be US fracking.

By David Roberts

As greenhouse gases go, methane gets less attention than carbon dioxide, but it is a key contributor to climate change.

Methane doesn't stay in the atmosphere as long as CO2 and is reabsorbed into terrestrial cycles via chemical reactions within 12 years or so. But while it's up there, it's much more potent, trapping heat at roughly 84 times the rate of CO2. Scientists estimate that around 25 percent of current global warming traces to methane.

When it comes to reducing CO2 emissions, the chain between cause and effect is frustratingly long and diffuse. Reduced emissions today won't show up as reduced climate impacts for decades.

But with methane, the chain of causation is much shorter and simpler. Reduced emissions have an almost immediate climate impact. It's a short-term climate lever, and if the countries of the world are going to hold rising temperatures to the United Nations' target of "well below" 2 degrees Celsius above the preindustrial baseline, they're going to need all the short-term climate levers they can get.

In the real world, though, the news about methane is bad and getting worse. It turns out that a mysterious recent spike in global methane levels that's putting climate targets at risk may be coming from US oil and gas fracking. If that's true, it's bad news, because there's lots more shale gas development in the pipeline and the Trump administration is busy rolling back regulations on the industry.

5:00 PM - Feb 23, 2016

62 people are talking about this

The mysterious spike in atmospheric methane may lead to America's doorstep

Global methane emissions rose steeply in the last decades of the 20th century and then leveled off. But around 2006, they started **heading up again**. Why? What was the source? Scientists were baffled. (Jonathan Mingle wrote a **great story** for Undark on scientists' search for answers.)

There are two broad sources of methane emissions: biogenic (plant and animal-based) and fossil fuel production. The former is mainly about agriculture (cow burps, pig poop, rotting organic waste) and tropical wetlands. As for the latter, methane is leaked or deliberately "flared" (burned off) at virtually every stage of fossil fuel production and transport, a problem that is notoriously bad for **fracked shale gas and tight oil**.

A few studies, including a **major** one in the journal *Science* in 2016, largely traced the recent spike in methane to biogenic sources, mainly because recent atmospheric methane has been "lighter," depleted of its heavier carbon stable isotope (13C). Generally speaking, fossil fuel production produces heavier methane and biogenic sources produce lighter methane, so researchers have taken the trend as an indication that the recent spike is mostly biogenic in origin.

But it was a perplexing finding, one that the *Science* authors **characterized** as "unexpected, given the recent boom in unconventional gas production and reported resurgence in coal mining and the Asian economy." If you see a big boom in fossil fuel production happening alongside a big spike in methane, you might expect to find the two connected.

In a **new paper** released in *Biogeosciences*, **Robert Howarth** of Cornell University has proposed a solution to the riddle.

Howarth is a familiar name to those who have followed methane debates over the years. He and colleagues at Cornell have been arguing for years that natural gas methane emissions are much higher than the government estimates or the industry admits, high enough to wipe out its supposed climate advantage over coal. That is a **controversial position**, to say the least. (Estimates of methane leakage vary widely, but Howarth's is at the very top end.)

In his latest paper, Howarth is making a different point, springing from two facts he says previous studies have overlooked.

EIA

First, 63 percent of the total increase in global natural gas production in the 21st century has come from shale gas. And second, shale gas production using modern hydrofracturing techniques tends to produce lighter methane than conventional natural gas drilling.

Howarth finds that if the lighter methane of shale gas production is explicitly accounted for, "shale-gas production in North America over the past decade may have contributed more than half of all of the increased [methane] emissions from fossil fuels globally and approximately one-third of the total increased emissions from all sources globally over the past decade."

Since 89 percent of the shale gas production comes from **the US** (Canada produced the rest), that's a whole lot of accelerated global warming tracing right back to America's front door.

It is worth emphasizing that this is only one paper in a very active field of research, from a controversial source, and it is sure to be debated and contested in coming years. But if it is right, or even only half right, it is bad news.

All signs point toward increased methane in coming years

If increased methane from shale gas is helping drive the spike in global methane emissions, the climate is in serious trouble, because there is every indication that shale gas emissions are higher than generally estimated and set to keep rising.

AMERICAN OVERSIGHT

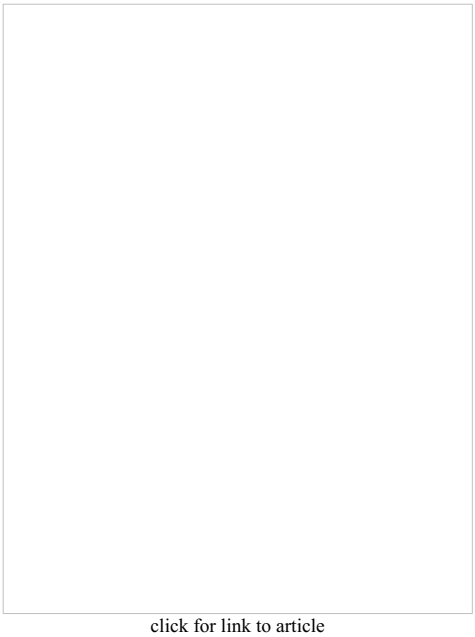
First, **six years of intensive research** from the Environmental Defense Fund has shown that methane emissions from US oil and natural gas production are as much as 60 percent higher than government estimates. **This recent paper in *Science*** summarizes: "Methane emissions of this magnitude, per unit of natural gas consumed, produce radiative forcing over a 20-year time horizon comparable to the CO2 from natural gas combustion." Getting natural gas out of the ground and to its final destination releases as much methane as burning it - which, whether or not it makes gas "worse than coal," makes it pretty bad.

Meanwhile, as Jennifer Dlouhy **reports for Bloomberg**, "the Trump administration is readying a plan to end direct federal regulation of methane leaks from oil and gas facilities, even as some energy companies insist they don't want the relief." The high-profile energy companies, the ones with large operations and lots of exposure to public opinion, rightly see this as a terrible idea. It makes them look like climate villains; it increases their exposure to climate risk and future policy shifts; it makes investors uncertain and hesitant. Oh, and it exacerbates climate change.

But the little companies, with lots of small, leaky wells scattered about, don't want to be forced to clean them up; in many cases, being forced to run clean would destroy the economics and shut down the wells.

And Trump is personally dedicated to reversing everything Obama did, so ... methane-wise, it's back to the Wild West.

Trump with his EPA director Andrew Wheeler. Getty Images



Third and most disturbingly, the US appears to be in the early stages of a massive fracking infrastructure buildout. A **recent report from Food & Water Watch** (FWW) charted this buildout, identifying "more than 700 fracked gas infrastructure projects that have been recently built or proposed for development."....

Despite **escalating concerns over the climate impact of natural gas** and signs that it is **flagging somewhat in the electricity sector**, the industry seems poised for enormous expansion. That is wildly irresponsible in the face of the widely agreed upon (by **everyone but Republicans**) need to reach net-zero greenhouse gas emissions, in the US and globally, by midcentury.

With jurisdiction over the rapidly metastasizing shale gas industry, the US has direct control over one of the biggest and fastest-growing sources of potent, fast-acting methane. That means it also has, within its reach, the ability to make early and substantial progress on climate change.

Several Democratic candidates have proposed ending fracking on public lands; only a few (Jay Inslee, Bernie Sanders, and Tom Steyer) have explicitly proposed pursuing a national ban. That hasn't been a top-tier policy dispute yet, but as scientists make the grim effects of fracking clearer and clearer, it's going to become one.

"Wetland Mitigation" law protects natural resources and promotes development

A new law will protect Florida's natural resources while still allowing the state to prosper and welcome new residents.

Gov. Ron DeSantis approved **HB 521: Wetland Mitigation (text)** in June, and it took effect July 1.

It directly allows local governments to allow wetland restoration on government-owned lands under certain circumstances.

"The first thing they have to do is to look for federal or state mitigation banks within the near area to be able to make up for the damage that they're doing," said Win Everham, FGCU professor of marine and ecological science.

click for link to article

This helps with the continued population growth in the state.

"The motivation here is to make sure that we're prepared for the growth that's coming to the state," said Shelton Weeks, FGCU chair of Department of Economics and Finance.

It's also looking to protect wetlands while supporting growth.

"It's looking at what is the ecological impact of this wetland," Everham said. "And if you're going to fill it in, how would you make up for that someplace else?"

Weeks explains how versatile the new law will be for local governments.

"This bill is going to allow municipalities to utilize land that's already in place," Weeks said. "That's being protected to give another pathway for mitigating the impacts of development."

It's sort of like a land swap to be used for both purposes - development and preservation or restoration.

"And can get some resources in to be able to manage and restore those preserved lands," Everham said.

In the long run, the law could make more land available for conservation management and restoration while trying to offset the influx of people wanting to live in a slice of paradise.

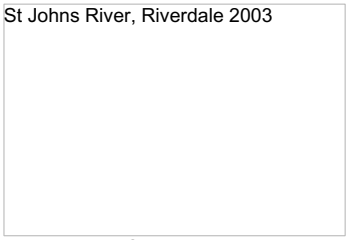
Corps Tiny Weapon Winning the Bio Control Battle - click for video

Invasive Species Management



The Jacksonville District Invasive Species Management Branch utilizes Integrated Pest Management (IPM) to manage invasive species. IPM is the coordinated use of the most appropriate strategy to prevent or reduce unacceptable levels of invasive species and their damage by the most economical means, and with the least possible hazard to people, property and the environment.

St Johns River, Riverdale 1973

St. Johns River, Riverdale 1973

St Johns River, Riverdale 2003

St. Johns River, Riverdale 2003

An IPM strategy:

- Identifies the nonnative, invasive or nuisance species.
- Assesses the means of introduction or dispersal to prevent new areas from being contaminated.
- Identifies desirable species.
- Determines the pest control goal(s) based on site-specific information.
- Establishes acceptable levels of individual species, both native and desirable species and nonnative, invasive or nuisance species.
- Determines available control methods to achieve the goal(s) of the strategy.
- Evaluates the benefits and risks of each method, or a combination of methods.
- Selects a strategy based on effectiveness and least possible hazard to people, property, and the environment.
- Utilizes each tactic correctly observing all applicable Federal, State, and local regulations.
- Educates the public and stakeholders about invasive species, their effect on the environment, and the importance of maintaining healthy ecosystems.
- Monitors results of the strategy, and reevaluates management options.

Land and Water Conservation Fund

Everyone loves our national, state, and local parks. That's why we must fully and permanently fund the Land and Water Conservation Fund, which has helped build some of our favorite outdoor places across the country like Everglades National Park. Like most large conservation projects, consistent funding is key to success and will help us save what's left of America's natural, cultural, and historic treasures. We were heartened to see that the Florida delegation members were enthusiastic about the LWCF and the impacts it has in Florida and the country - especially as it relates to protecting our drinking water and economy.

Bills Would Invest in the Land and Water Conservation Fund

A group of bipartisan House lawmakers have introduced a bipartisan bill (H.R. 3195) to fully and permanently fund the Land and Water Conservation Fund and invest in sportsmen's access.

Public lands advocates have been calling for this permanent investment in the successful outdoor recreation access program for several years now, with ramped up support for this needed fix since Congress permanently reauthorized LWCF in March 2019.

"Securing permanent authorization for LWCF was a significant milestone, but it means very little without predictable, robust funding to unlock inaccessible public lands and create new outdoor recreation opportunities all across the country," says Whit Fosburgh, president and CEO of the Theodore Roosevelt Conservation Partnership. "We're grateful to see lawmakers respond to this fact and remain committed to the success of this important program."

U.S. Representatives Jeff Van Drew (D-N.J.) and Brian Fitzpatrick (R-Pa.) introduced the bipartisan legislation, which directs $900 million annually to the LWCF trust fund account. The bill also has support from House Natural Resources Committee Chairman Raúl Grijalva (D-Ariz.) and the five Natural Resource Subcommittee Chairs.

When the LWCF was created, Congress intended for the full $900 million, underwritten by a small portion of annual offshore oil and gas lease revenues, to be used for conservation projects each year. However, only about half of those funds are, in fact, allocated to conservation efforts annually. To date, more than $20 billion in potential LWCF funds have been diverted elsewhere. This legislation would ensure $900 million in funding is directed annually to the LWCF account and expended only for projects benefitting conservation, outdoor recreation and access as Congress originally intended for the program.

Over its 50-year history, LWCF has expanded access in every state and supported over 41,000 state and local park projects. ...

Lake O level rises with rain back over 13'

Water Levels

The **Site Status Report** provides comprehensive up-to-the minute information for hundreds of water control structures throughout the SFWMD water management system, organized by regions for ease of navigation. It shows the current volume of water being moved and the water level upstream and downstream at each location. It also shows the daily water level for lakes and other large water bodies. Companion maps, on the far right tab, show key locations with real-time information of volumes of water being moved and daily water levels.

Daily Water Levels

The U.S. Army Corps of Engineers regulates and reports the official daily water levels of Lake Okeechobee and these major water bodies and areas within the South Florida Water Management District:

- Lake Okeechobee
- Kissimmee River Basin
- Everglades Water Conservation Area 1 (Loxahatchee National Wildlife Refuge)
- Everglades Water Conservation Area 2
- Everglades Water Conservation Area 3

Nitrogen runoff is also killing coral reefs

By **Kay Vandette**
Earth.com staff writer

While many studies have rightly attributed the cause of these bleachings to climate change, increasing ocean temperatures, and ocean acidification, a new study has discovered another root cause of the world's coral catastrophe.

After reviewing 30 years of unique data from the Lower Florida Keys, researchers from the Harbor Branch Oceanographic Institute at Florida Atlantic University found that increases in nitrogen levels are starving out corals and making them susceptible to bleaching.

"Citing climate change as the exclusive cause of coral reef demise worldwide misses the critical point that water quality plays a role, too," said James W. Porter, a co-author of the study. "While there is little that communities living near coral reefs can do to stop global warming, there is a lot they can do to reduce nitrogen runoff. Our study shows that the fight to preserve coral reefs requires local, not just global, action."

Nutrient runoff from fertilizers, topsoil, and improperly treated sewage are adding nitrogen to the environment. This added nitrogen has led to phosphorus starvation in corals which lowers the coral's threshold for bleaching.

The study, published in the journal *Marine Biology*, provides one of the longest records to date of nutrient levels and algae concentrations in coral reefs.

"Our results provide compelling evidence that nitrogen loading from the Florida Keys and greater Everglades ecosystem caused by humans, rather than warming temperatures, is the primary driver of coral reef degradation at Looe Key Sanctuary Preservation Area during our long-term study," said Brian Lapointe, the senior author of the study.

AMERICAN OVERSIGHT

Nutrient runoff from topsoil and fertilizer have increased the nitrogen to phosphorus ratio in reef algae.

The researchers collected seawater and seaweed samples from the Looe Key Sanctuary Preservation Area during wet and dry seasons and analyzed data from 1984 through 2014.

Coral cover in the sanctuary decreased from 33 percent in 1984 to less than six percent in 2008.

Nutrient levels, salinity, and temperature were also monitored to see how nitrogen made its way downstream from the Everglades to the Florida Keys reefs.

In the early 1990s, a spike in nutrient runoff from the Everglades increased phytoplankton and nitrogen levels in the coral reefs and even though nitrogen levels have decreased, the corals have still not recovered.

Nitrogen levels are expected to increase worldwide by 19 percent further endangering corals and increasing susceptibility to bleaching events.

This study reveals a root cause of coral bleaching, which can help better manage and conserve coral reefs in the future.

"The future success of the Comprehensive Everglades Restoration Plan will rely on recognizing the hydrological and nitrogen linkages between the Everglades, Florida Bay, and the Florida Keys," said Lapointe. "The good news is that we can do something about the nitrogen problem such as better sewage treatment, reducing fertilizer inputs, and increasing storage and treatment of stormwater on the Florida mainland."

US Census Bureau: 94.7M Americans Live in Coastline Regions

About 60.2M Live in Areas Most Vulnerable to Hurricanes

By
DARRYL COHEN

The 2019 hurricane season has begun and, once again, the number of people living in some of the most vulnerable coastline regions is growing.

About 94.7 million people, or about 29.1% of the total U.S. population, lived in coastline counties in 2017, a 15.3% growth since 2000.

The first hurricane of the season, Barry, made landfall Saturday in Louisiana as a Category 1 and was later downgraded to a tropical storm, causing widespread flooding and power outages along the Gulf Coast.

Coastline counties - those adjacent to coastal water or territorial sea - are grouped into the Atlantic, Gulf of Mexico and Pacific regions.

About 60.2 million people lived in the Atlantic and Gulf of Mexico regions - those most vulnerable to hurricanes. These areas added 8.3 million people between 2000 and 2017, a 16% increase.

A closer look at areas in the path of hurricanes:

- The Gulf of Mexico was the fastest growing of the coastline regions. It added more than 3 million people between 2000 and 2017, a 26.1% increase. The nation as a whole grew by 15.7% over the same period.
- The Gulf of Mexico's high rate of population growth was reflected in the percentage of its workforce employed in construction industries: 8.5%, compared to 6.4% nationally. Employment in natural resources, construction and maintenance occupations was also higher than the national rate: 10.8% compared to 8.9%.
- Coastline counties continued to be more ethnically diverse than other counties. While non-Hispanic whites made up 60.7% of the U.S. population in 2017, they accounted for less than half of the population (47.9%) in coastline counties.
- There were 13 hurricanes that caused more than $10 billion in damage each in the Atlantic and Gulf of Mexico regions

AMERICAN OVERSIGHT

between 2000 and 2017. Seven occurred in just two years (2004 and 2005). While the population in these areas remained at about 54.5 million between 2005 and 2006, their aggregate population has continued to

Boating and angling community rally congressional support for Everglades restoration

April 10, 2019

With federal appropriations season fully underway, nearly a dozen boating and fishing organizations recently wrote to Senate appropriators and encouraged lawmakers to continue the long-time support for the protection and restoration of America's Everglades by providing robust funding for the Comprehensive Everglades Restoration Plan (CERP). Everglades restoration is a top NMMA advocacy priority and the association played a leading role in drafting the letter.

The U.S. Army Corps of Engineers has made great strides towards restoring Florida's ecosystems, but additional support and funding is necessary to continue their work improving water quality and, in turn, the health of the Everglades. Boating and angling stakeholders requested the Subcommittee on Energy and Water to fund the South Florida Ecosystems Restoration at $200 million for construction and $10 million for operations and maintenance in FY20. This funding level is essential reducing toxic discharges from Lake Okeechobee into Florida's waterways and to protect the livelihood of anglers, guides, boat captains, and retailers that rely upon Florida's vibrant fisheries and coastal waterways.

Some of the Everglades most iconic and essential projects fall under CERP. Projects such as the Picayune Strand Restoration, Indian River Lagoon-South, the Broward County Water Preserve Area, and the Biscayne Bay Coastal Wetlands will all be supported through the subcommittee's investment in South Florida Ecosystem Restoration.

The group also requested the Subcommittee on Interior to include three critical authorizations, including:

- $700 million within the Department of the Interior in support of ongoing projects to improve water quality and waterway health;
- $3.2 million in the Environmental Protection Agency's (EPA) South Florida Geographic Program - which is essential to ensuring clean water flows through Everglades National Park; and
- $700,000 to each of the EPA's National Estuary Program's (NEP) and an additional $1.5 million for the NEP competitive program.

Florida has already pledged $260 million in 2019 to prioritize Everglades restoration projects. Paired with renewed federal investments, these critical initiatives can be realized and the unique ecosystem of the Everglades - the beating heart of the largest fishing economy in the country - can be restored and protected for generations to come.

Register today to join Everglades advocates in Tallahassee for the**8th Everglades Action Day, February 10 & 11.** This is a great opportunity to meet with legislators in Tallahassee to educate elected leaders on water quality and ask for their support of Everglades and Estuary restoration. Materials and advocacy training will be provided.Free bus transportation and scholarships are available.

The Everglades Coalition will sponsor group transportation to make it easy for all to get to Tallahassee with buses departing from the west coast and east coasts.

This will be a full two-day event with FREE group transportation available! Regional pick up locations will be available on both coasts.

Tentative schedule:
Mon. 2/10 early morning -- group transportation leaves South Florida
Mon. 2/10 afternoon -- groups arrive at Wyndham Garden Tallahassee Hotel
Mon. 2/10 at 6pm -- casual & fun group dinner at Applebee's in hotel lobby
Mon. 2/10 at 8pm - one-hour advocacy training in hotel business center
Tues. 2/11 at 7am -- breakfast provided by the coalition
Tues. 2/11 at 8am -- charter bus transportation to Florida Capitol
Tues. 2/11 morning & early afternoon -- meetings with elected leaders
Tues. 2/11 afternoon -- group transportation back to South Florida

Registration is live, sign-up here: https://www.surveymonkey.com/r/2BK8VKK

A block of hotel rooms are available at a discounted rate of $169 at the Wyndham Garden Tallahassee Capitol. Use this link to make your hotel reservation:
https://www.wyndhamhotels.com/groups/gn/everglades-coalition3

A limited number of scholarships will be available to cover lodging for students and other individuals, contact info@evergladescoalition.org

Please email info@evergladescoalition.org with any questions or concerns.

Voters to decide in November whether to bring back tax for Conservation Collier

Patrick Riley, Naples Daily News

Conservation Collier, a longstanding land preservation program, will be back on the ballot this fall.

Commissioners this week voted 4-1 to approve ballot language to ask voters this November whether they support bringing back a special tax to continue to buy and manage environmentally sensitive lands.

Voters will be able to decide whether they agree with reestablishing a quarter-mill property tax for 10 years, although Commission Chairman Burt Saunders noted that the proposed rate could be adjusted up until ballots are actually printed.

"This is nothing that's cast in stone," he said at Tuesday's hearing on the issue. "So we can have further discussion, but it'll get the dialogue started."

More: Environmental advocates gear up for Conservation Collier vote

And: Collier County land preservation program moving too slowly for some conservationists

Buy Photo

Nearly 10,000 acres of the Half Circle L Ranch east of Immokalee, seen on Friday, Aug.18, 2017, has been offered for sale to Conservation Collier. *(Photo: Justin Gilliland/Special to the Naples Daily News)*

A quarter-mill tax rate is estimated to raise $287 million in 10 years. For homeowners it means they would pay 25 cents per $1,000 of assessed value, or $75 a year for a $300,000 home.

The first year of a reestablished Conservation Collier tax levy is expected to be fiscal 2022, generating tax revenue between $23.9 and $24.9 million, according to the county.

Commissioner Bill McDaniel voted against putting the question to voters. He had proposed in December to instead put a line item for a voluntary contribution on residents' tax bills to see "what kind of support Conservation Collier gets from a voluntary standpoint."

AMERICAN OVERSIGHT

Buy Photo

Adrian Rosales walks through a field of blooming Southeastern sunflowers (Helianthus agrestis) at Pepper Ranch Preserve in 2018. Conservation Collier bought the 2,500-acre ranch in 2009. The preserve, named for the family that acquired the ranch in 1926, features trails for hiking, horseback riding and mountain biking; public access roads; camping and an old lodge. Environmental groups are gearing up for a 2020 referendum on whether to extend the land preservation program. *(Photo: H. Leo Kim, Naples Daily News)*

McDaniel said Tuesday he was concerned about the county's taxpayers, saying he didn't "think we need to burden our community right now in this manner" and noting that "eventually we're going to see a downturn in the overall economy."

Asking for voluntary contributions, McDaniel said, would give the county an opportunity to "survey 100 percent" of Collier's taxpayers and then "make necessary adjustments to a good program."

"There's nothing wrong with Conservation Collier," he said. "I just have a concern about a small portion of the population who actually show up to vote telling 100% of the people what they have to do."

Commissioner Donna Fiala, however, noted that the program has been helping the county protect its future water sources.

"That is so important," she said. "It also protects some of the animals in that area. These places are put in preservation forever, because they're most important to our future in Collier County."

Buy Photo

Alexandra Sulecki, then-coordinator of the Conservation Collier Program, points out existing and planned trails to visitors during the soft opening of the Naithlorlendun Sanctuary, also known as the Gore sanctuary, on Sunday, Nov. 18, 2018, in Golden Gate Estates. *(Photo: Alex Driehaus/Naples Daily News)*

Tuesday's move to place the program back on the ballot was supported by environmental organizations, including the Conservancy of Southwest Florida, Audubon of the Western Everglades, Audubon Florida and the Florida Wildlife Federation.

"We are lucky to live in a county where bonding isn't necessary to raise the funds needed to continue meaningfully investing in our water quality, drinking water sources, wildlife habitat and quality of life via acquisition of new conservation lands," Gladys Delgadillo, environmental policy specialist for the Conservancy, told commissioners.

All four groups supported a version of ballot language without an option for the county to borrow money using bonds.

More: Collier to turn Gore sanctuary into permanent preserve

Buy Photo

Trails punctuated by six lookout pavilions wind around the lakes in the western side of the park. *(Photo: Donn Brown, Special to the Naples Daily News)*

Advocates for Conservation Collier have already begun mounting a political campaign in favor of the program with the creation of a political action committee to boost public support.

Almost 60% of voters backed the program during the first referendum in November 2002, agreeing to a property tax increase of up to .25 mills for up to 10 years and bonding for up to $75 million. The program began operations the following March.

In 2006, more than 80% of voters favored continuing Conservation Collier until 2013 when the tax sunsetted.

The original 10-year tax collection cycle generated nearly $152.5 million in revenue for the program.

Latest news updates during the emergency.

Delivery: Varies

Your Email

Since its inception in 2003, the program has acquired 20 properties totaling 4,300 acres for about $106 million.

The program's initial acquisition phase was closed in 2011, and available funds were put in a maintenance trust fund as the program moved into a preserve management phase, including opening the preserves for public access and managing and hosting visitors, according to the county.

Currently, the trust fund has about $30 million.

In 2017, commissioners approved the use of management funds to buy more land. In 2018 and 2019, three projects totaling 200 acres were

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-003489

purchased for close to $1.6 million. Last month, commissioners approved another purchase for a 37-acre parcel for $1.58 million.

Two Florida Springs will soon be opened for public access

A deal to purchase privately owned land will soon mean two more springs available for people to enjoy in North Central Florida.

We'll show you who is buying the land and why they say it's all to improve the health of a Florida treasure.

The two springs are located on 245 acres of land along the Santa Fe River and come with a 1.4 million dollar price tag.
Melissa Hill is the project coordinator for the Santa Fe River basin who explained, "by purchasing this property, people will be able to view the spring, enjoy it, have a picnic by parking their car directly on-site and walking down and seeing this absolutely gorgeous Florida treasure."

Alachua Conservation Trust will be making the purchase but still need roughly 200-thousand dollars by mid-February to make them the owners of North Central Florida's newest attraction.
Hill explained, "we're still fundraising to make sure we have all the funds necessary to finish purchasing it as well as putting in infrastructure so people can enjoy it safely. Typically once we purchase a property it will be open in a year."

However, the main reason for the purchase is preservation said Hill.
"Being able to manage a spring as a preserve ensures that people are able to access it safely in a way that doesn't hurt the spring and more importantly the property around it doesn't pollute the water source itself."

TV20's Landon Harrar paddled upstream to see one of the springs and reported "you may have noticed this spring is very dark right now and that's partly because of how deep it is more than 80 feet. Also, the nutrient and water levels affect the clarity of it. However, I have been reassured there are definitely times during the year it will take on that crystal blue hue you are used to seeing in all of Florida's springs."

Stuart Alan, a self-proclaimed water conservation enthusiast also made the trip and said: "I will definitely come back and I will bring other people with me, this is a diamond in North Central Florida and we really need to preserve it. It's beautiful and it's a wonderful place to spend a few hours outside."

Hill says they also plan to mark hiking and birding trails on the land for the public to utilize and enjoy.

Sunny January raises risk of brush fires on horizon

The dry season is finally starting to live up to its name.

WHY DRY MONTH MATTERS

After an early end to the 2019 rainy season and a soggy December, January has turned out to be all dry, and

AMERICAN OVERSIGHT

meteorologists are calling for above-average temperatures between now and the start of the rainy season in May.

What does that all mean?

Wildfire season is here; Lake Okeechobee levels are receding; the Caloosahatchee River isn't getting the water it needs, environmental groups say; and the historic Everglades is getting crispy dry.

A scant 0.16 inches fell across Lee and Collier counties, on average, so far this year, according to South Florida Water Management District records.

That's down 1.8 inches compared to an average January.

"We're significantly below normal, and we've had a couple of fronts come through

that produced dry air," said Dustin Norman, a meteorologist with the National Weather Service in Ruskin, which covers the Lee County area.

Norman said the cold fronts that have made their way through the state in recent weeks brought Arctic air, which is typically drier than air that would accompany a front that developed over the mainland United States or Gulf of Mexico.

"We had shots of cool air with recent fronts, and with those we're not going to receive as much rainfall," he said.

The National Oceanic and Atmospheric Administration, or NOAA, says lands south of Lake Okeechobee are abnormally dry, although they're not quite dry enough to cause NOAA to declare a drought.

An abnormally hot spring could further dry out the Sunshine State.

NOAA is calling for above-average chances of above-average temperatures for the region between now and the beginning of the rainy season in May.

Rainfall chances will be average for that period, according to NOAA. Wildfire risks are rising, too.

The Florida Forestry Service ranks South Florida high on its wildfire risk scale while lands north of Okeechobee are relatively saturated and safe.

Federal agencies are in the middle of prescribed burns in large preserves lands like the Big Cypress National Preserve in Collier.

The region would be much drier had December not brought a one-two cold front punch that dumped more than a foot of rain on some localized areas south of Lake Okeechobee.

Six inches fell in Fort Myers in a matter of days, more rain than has fallen at the Page Field airport for the month of December in nearly a century, according to NWS records.

Rain that fell north of the lake in December helped keep the surface levels of Lake Okeechobee within the limits of the management plan used by the U.S. Army Corps of Engineers.

The Army Corps controls lake levels and has typically kept the surface of the lake between 12.5 and 15.5 feet above sea level to ensure water supply to agriculture and urbanized areas while also providing water to natural systems like the Caloosahatchee River.

Both the Caloosahatchee and the St. Lucie rivers were connected to Okeechobee decades ago to drain South Florida for farming and development.

And while the St. Lucie never benefits from Okeechobee water, the Caloosahatchee relies on the big lake to feed it during the dry season.

Army Corps spokeswoman Erica Skolte said lake levels are about 7 or 8 inches below average, but the agency is not worried there will be severe water shortages between now and the beginning of the 2020 rainy season.

"We think we'll be in a good place come June 1 and the beginning of the rainy season," Skolte said. "The lake is in pretty good shape."

Environmental groups are watching lake releases, hoping for more water from Okeechobee.

"The salinity (in the Caloosahatchee River's estuary) gets too high," said Calusa Waterkeeper John Cassani. "It's the primary reason we haven't been able to restore sea grass in the upper estuary."

Restoring sea grass in the upper estuary would be an indication of a functional river system that's getting the amount of freshwater it needs to stay healthy.

"It continually adds harm to the system during the dry season," Cassani said of fewer Lake Okeechobee releases.

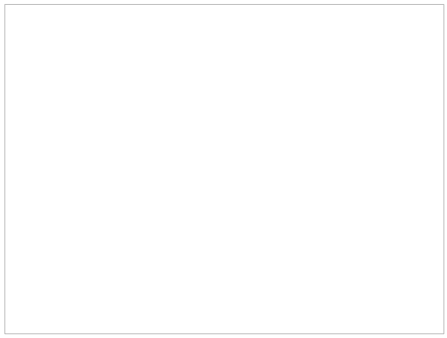
The Army Corps is releasing water to the Caloosahatchee River, more water than the state mandates.

But it's still not enough, Cassani and others say.

Norman said the region could see some relief this weekend.

AMERICAN OVERSIGHT

"Saturday we're looking at a quarter to a half-inch of rain, but forecasting the amount of rain five days out is difficult," Norman said. "But certainly Friday into Saturday is our next large rain producer."



This front will be the opposite of recent fronts. It won't be as cool but will bring precipitation.

"We're not really looking at a significant cool down, we're just looking at rain chances increasing," he said. "It's not going to be a strong, potent front but a Gulf pressure system that will produce rain."

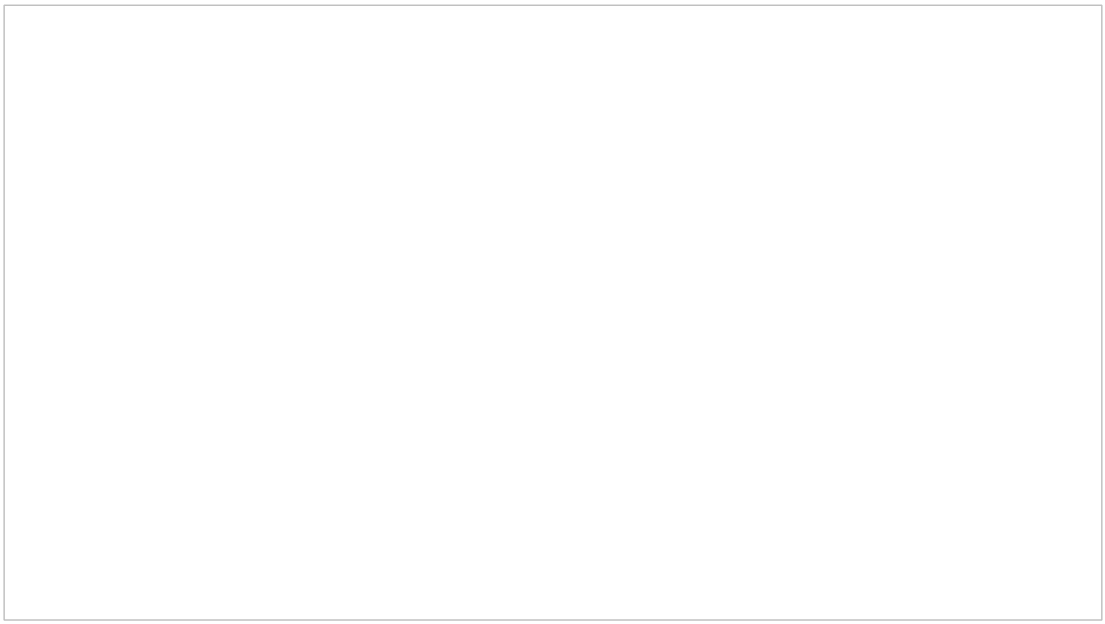
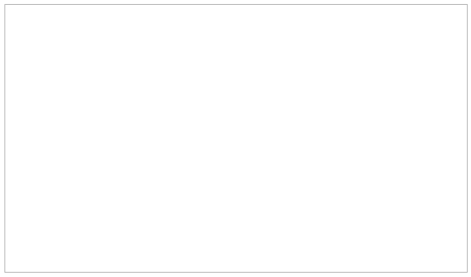
Loxahatchee River Watershed Restoration Project

The purpose of the Loxahatchee River Watershed Restoration Plan is to restore and sustain the overall quantity, quality, timing and distribution of fresh water to the federally designated "National Wild and Scenic" Northwest Fork of the Loxahatchee River for current and future generations. This project also seeks to restore, sustain and reconnect the wetlands and watersheds that form the historic headwaters for the river.



These areas include Jonathan Dickinson State Park, Pal Mar East/Cypress Creek, DuPuis Wildlife and Environmental Management Areas, J.W. Corbett Wildlife Management Area, Grassy Waters Preserve, Loxahatchee Slough, the federally designated "Wild and Scenic" Northwest Fork of the Loxahatchee River and the Loxahatchee River Estuary.

- USACE: Loxahatchee River Watershed Restoration Project
- Presentations from May 9, 2018, Project Delivery Team Meeting



MODELING RESULTS

The Project Delivery Team utilized modeling to simulate hydrologic conditions over a 41-year period in southern Martin County and northern Palm Beach County. The modeling results are presented in two sets of Performance Measure Graphics that show comparisons of water flows, water levels and related indicators.

About the Refuge

Beginning with the Swampland Act of 1845, and later the 1907 Everglades Drainage Act, excessive drainage activities occurred in the Everglades to pave the way for agriculture and development. To meet the ever-increasing water needs of agriculture and population expansion, three water storage areas called Water Conservation Areas 1, 2, and 3 were constructed by the U.S. Army Corps of Engineers in the 1940s. Bounded by levees and connected by a series of canals, these areas were placed under the jurisdiction of what is now the South Florida Water Management District (the District), an agency of the State of Florida.

In 1951, a license agreement between the South Florida Water Management District and the U.S. Fish and Wildlife Service, under the Migratory Bird Conservation Act, enabled the establishment of the 143,954-acre Loxahatchee National Wildlife Refuge (the 216th refuge in the system) at Water Conservation Area 1. Loxahatchee NWRs name was changed in 1986 under public law 99-615 to include a noted local conservationist Arthur Raymond Marshall. This "refuge interior" land, as it is called, is owned by the State of Florida, but managed by the Service. The license agreement was later amended to include the 1,604-acre Strazzulla Marsh, which lies adjacent to Water Conservation Area 1. In addition to the lands licensed from the District, the Fish and Wildlife Service owns 2,550 acres to the east and west of the refuge interior. This acreage is sub-divided into four management compartments A,B,C,D, and the Cypress Swamp.

Arthur R. Marshall Loxahatchee National Wildlife Refuge is the only remnant of the northern Everglades in Palm Beach County, Florida. To the northwest of the refuge is the Everglades Agriculture Area which includes sugar cane farms, winter vegetables, sod farms, and cattle ranches. The land east of the refuge is predominately urban with the exception of the agricultural lands of the East Coast Buffer area. To the south and southwest of the refuge lie Water Conservation Areas 2 and 3, and Everglades National Park the only remaining portions of the Everglades fresh water marsh.

Florida will face major challenges by 2030 - and we need to prepare | Opinion

The Florida Times-Union

AMERICAN OVERSIGHT

The year 2030, slightly more than a decade from now, is just around the corner for the state of Florida.

Addressing challenges on a statewide level requires immediate action, an action plan.

That's what the Florida Chamber Foundation has done with its report titled " Florida: 2030."

Port St. Lucie is one of only six cities that had 50,000 or more residents in 2000 and that more than doubled in population over the last two decades. The city's population grew from 88,769 to 178,778, faster than all but five other cities in the state. *(Photo: Anthony M. Inswasty / Getty Images)*

The challenges at first glance appear overwhelming. Florida will be disrupted and transformed by 2030.

- The population will continue to grow with about 5 million new residents.
- Retiring boomers will come to Florida as their elders did. About 1 in 4 Floridians will be 65 or older.
- Non-ethnic Whites will become a minority by 2030. And nearly 1 in 5 Floridians will be foreign-born.
- People will pack the cities. Rural areas will account for 86 percent of Florida's land area but just 10 percent of its population.
- Florida has five of the top 25 fastest-growing metro areas: Fort Walton Beach, the Villages, Orlando, Cape Coral and Naples.
- Millennials will take over as the dominant age group but they will be dealing with massive amounts of student loan debt, outpacing credit card and auto loan debt.

Are we ready for 2030? Floridians apparently don't know.

At 83 town hall meetings involving over 10,000 Floridians in all 67 counties, 87 percent of respondents said they were optimistic about Florida's future but most said their own communities weren't "positioned for global competitiveness, prosperity and vibrant and sustainable communities."

That's an odd answer since usually people are more optimistic closer to home. For instance, people-re-elect their member of Congress while disliking Congress as a whole.

So far as challenges, the most critical challenge identified by Floridians involves affordable housing. So let's throw up our arms in disgust, since Florida has long had an identified revenue stream to deal with it but the Legislature continues to seep much of it into the general fund.

The Sadowski Fund uses a portion of documentary stamp revenue paid at home sales for affordable housing. It's shared on a per capita basis in Florida counties. The structure of the fund is brilliant; as home sale values increase, so does the doc stamp revenue for affordable housing.

So it's no surprise that another weakness is "responsiveness of government."

So what's the key to Florida's future? It's simple. A well-trained and growing work force.

The economic battleground of the 21st century involves competition for talented workers. That starts with an outstanding K-12 public school system and continues through college.

Florida's university system has perhaps the best value in the nation with affordable tuition paired with quality institutions.

What happens if Florida's work force isn't prepared for the challenges of 2030?

"We would struggle to gain a foothold in emerging industries and our economy would miss out on next-generation opportunities and only remain focused on services and trade jobs," according to the Chamber Foundation report.

That would create a vicious cycle in which demands increase but the ability to meet them would decline.

The Chamber report, as detailed as it is, needs to be paired with a report titled "Trouble in Paradise" by a coalition of Florida environmental groups.

The report calls for acquiring and protecting land to protect drinking water, fisheries and recreation.

The challenges posed by sea level rise and storm surge contain billion-dollar price tags. Just look at Hurricane Michael has done to the Panhandle.

The best way to deal with storm surge and sea level rise is by using wetlands, Mother Nature.

"A protected flood plan contains no property to be damaged and acts as a permanent safety valve for flooding, reducing destruction of developed areas downstream," according to the report.

Resilience is the key. Prevention is cheaper than repair damage.

Florida's precious underground water supply, the Floridan Aquifer, is going to be stressed as millions of new residents pack into coastal communities. The springs that need the Aquifer must be protected.

"Now more than ever, Florida needs strong, bold and decisive leaders," the environmental report concludes. "Leaders with vision and dedication. Leaders with the best interests of Florida at heart. Our quality of life and Florida's very economy depends on it."

Once Florida's beauty is gone, we won't know it anymore.

GUEST EDITORIAL: Water quality requires expanding best practices on agricultural lands - Opinion - Sarasota Herald-Tribune

by Jim Strickland

I've been a rancher since I was 17 years old. As the owner of Strickland Ranch and a managing partner of Big Red Cattle Company and Blackbeard Ranch, my goal has been to manage the land as a model for sustainable agriculture and conservation. I use the latest technology and scientific research to implement sustainable conservation practices on agricultural land in Sarasota and Manatee counties, each and every day.

Since I was in the Boy Scouts, I've believed in the value of our land and our water, and that taking care of the land is about integrity and responsibility. Over the last few decades, I have seen thousands of acres around me move into development for housing. As I saw the agricultural land recede, conserving Florida's land became even more important.

That's why I have been involved in the state's Best Management Practices for agriculture from the very beginning. BMPs are technologies and tactics farmers use to conserve water and prevent nutrients, like fertilizer, from running off farm lands into streams, lakes and rivers. BMPs were developed by the Florida Department of Agriculture and Consumer Services in collaboration with Water Management Districts, local governments, universities and other stakeholders, and have been approved by the Florida Department of Environmental Protection. They are proven to be effective in restoring the health of Florida's water resources.

In recent years, however, our state's water bodies have been plagued by toxic blue-green algae. This bacteria in our lakes, rivers and shorelines affects our health, our environment and our economy. We must do more to protect our water.

That's why Governor Ron DeSantis created the Blue Green Algae Task Force, which brought together scientists and researchers to examine the crisis and outline a plan of action. The task force issued recommendations, including preventing wastewater discharges, converting septic tanks to sewer and strengthening agricultural BMPs.

These recommendations - part of a comprehensive approach to a complex problem - are based on sound science. And these recommendations are now being considered by the Florida Legislature.

I support continuously improving Best Management Practices to incorporate the latest research, innovations and technologies. BMPs prove to the millions of residents of Florida that we are accountable for what happens on our land. We don't live on the Gulf, and we don't live on the Atlantic, but everything we do on our piece of dirt affects those bodies of water, and we take that very seriously.

Our smart farming techniques ensure we are conserving water and using nutrients efficiently. We use infrared technology to help us level the land to prevent runoff and monitor our crops. We use computers and global satellites and invest in more technology every year. Because of these investments, our lands provide filtration systems to clean water and provide thousands of acres of habitat for wildlife.

A proactive, collaborative approach to adopt science-based solutions can make a big difference for our state. Agriculture is an important part of this comprehensive solution.

Keeping land in agriculture and green space protects the landscape from development. It allows farmers to continue to be the best stewards of the land that we can be - something I am committed to doing for the rest of my life.

Jim Strickland has won numerous awards for conservation of agricultural lands.

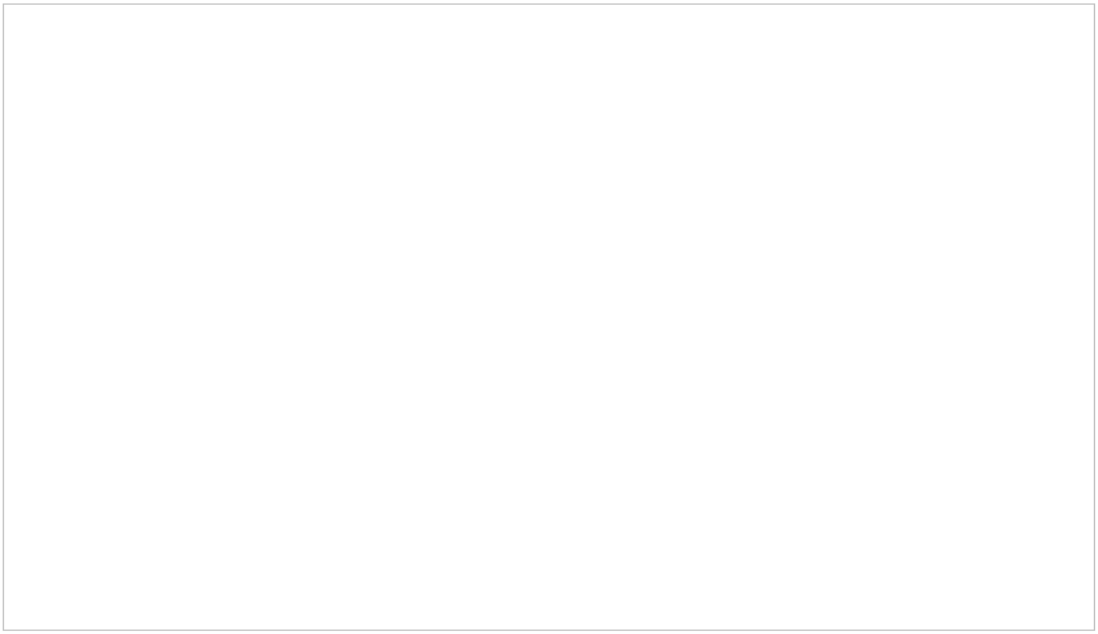
Audubon

Will you help count birds for climate change?

AMERICAN OVERSIGHT

Audubon's latest science, **Survival by Degrees**, indicates that birds are under threat from climate change, and birds tell us we need to act now.



Understanding how birds are responding to climate change is essential to protecting them. We need your help to do just that by counting and documenting how their ranges are shifting. Audubon's Climate Watch program contributes to our scientific analysis by providing vital data on how birds are faring with climate change. The more information we have on birds across the country, the better prepared we will be to help them in a changing climate.

Read our 2016-2018 report to learn how the work of Climate Watch volunteers is helping to reveal how birds are responding to climate change.

If you have previously participated in Climate Watch, THANK YOU! We value your time and help in this important effort. The program has been growing steadily and we have received a high volume of checklists in 2019. Thank you for your patience as we go through these growing pains. If you are new to Climate Watch, please join us. You can find out more about the program here.

Save the dates of the winter survey period taking place **January 15 - February 15, 2020** and help us count bluebirds, nuthatches, goldfinches, towhees, or Painted Bunting.

Land and Water Conservation Fund: Overview, Funding History, and Issues

AMERICAN OVERSIGHT

The Land and Water Conservation Fund (LWCF) Act of 1965 was enacted to help preserve, develop, and ensure access to outdoor recreation facilities to strengthen the health of U.S. citizens. The law created the Land and Water Conservation Fund in the U.S. Treasury as a funding source to implement its outdoor recreation goals.

The LWCF has been used for three general purposes. First, it has been the principal source of monies for land acquisition for outdoor recreation by four federal agencies-the Forest Service, National Park Service, Fish and Wildlife Service, and Bureau of Land Management. Second, the LWCF provides "financial assistance to states" by authorizing a matching grant program to assist states in recreational planning, acquiring recreational lands and waters, and developing outdoor recreational facilities. There are two components to this "stateside" program: the traditional formula state grants and the more recent competitive state grants. Third, beginning in FY1998, LWCF has been used to fund other federal programs with natural resource-related purposes, such as the Forest Legacy program of the Forest Service and grants under the Cooperative Endangered Species Conservation Fund of the Fish and Wildlife Service.

Under the LWCF Act, the fund is authorized to accrue $900 million annually from multiple sources. However, nearly all of the revenue is derived from oil and gas leasing in the Outer Continental Shelf (OCS). The LWCF receives additional money under more recent legislation (P.L. 109-432, "GOMESA"). Throughout the history of the LWCF, $40.9 billion in revenues have accrued under both the LWCF Act and GOMESA.

Congress determines the level of discretionary funding for the three LWCF purposes through the annual appropriations process. These discretionary appropriations have fluctuated widely since the origin of the program. In addition, any funds deposited under GOMESA are mandatory appropriations for the state grant program. Mandatory appropriations were relatively small from FY2009 to FY2017. They increased substantially beginning in FY2018 and are expected to remain relatively high over at least the next decade.

Less than half of the $40.9 billion in total revenues that have accrued in the LWCF have been appropriated ($18.9 billion), leaving an unappropriated balance of approximately $22.0 billion in the fund. FY2001 marked the highest funding ever, with appropriations from the LWCF exceeding the authorized level by reaching nearly $1 billion. For FY2019, the most recent fiscal year, the total appropriation was $506.6 million (with $435.0 million in discretionary funds and $71.6 million in mandatory funds).

The $18.9 billion appropriated through the history of the program has been allocated unevenly among federal land acquisition (60%), the state grant program (26%), and other purposes (14%). Similarly, federal land acquisition funds have been allocated unevenly among the four agencies.

Recent Congresses have considered a variety of issues pertaining to the LWCF, through authorizing and appropriations legislation and other debates. The 116th Congress enacted several changes to the LWCF Act (in P.L. 116-9, Section 3001), including to make permanent annual deposits to the fund of $900 million and to specify portions of funding for "financial assistance to states" and land acquisitions that foster access to federal lands for recreation. Other issues remain under debate. A recurring question is the optimal level of funding for LWCF overall and its individual components. Other questions involve whether to provide additional mandatory appropriations to the LWCF; authorize LWCF funds for other programs or purposes, such as maintenance of agency lands and assets; and alter the formula for traditional stateside grants.

SFWMD moving forward with storage wells

Jul 31st, 2019 · by · Comments: 0

WEST PALM BEACH - The South Florida Water Management District (SFWMD) appears to be moving forward with plans to use $50 million recently provided by the Florida Legislature to build Aquifer Storage and Recovery (ASR) wells to store water north of Lake Okeechobee.

A July 22 letter from SFWMD executive director Drew Bartlett to Col. Andrew Kelly of the U.S. Army Corps of Engineers, "based on our initial analysis and review of the research, we will be pursuing the ASR features of LOWRP to quickly provide benefits to the northern estuaries by offering short- and long-term recoverable storage."

Florida Senate Bill 2500 states: "The funds in Specific Appropriation 1642A shall be distributed to the South Florida Water Management District for the design, engineering, and construction of the specific project components designed to achieve the greatest reductions in harmful discharges to the Caloosahatchee and St. Lucie Estuaries as identified in the Comprehensive Everglades Restoration Plan Lake Okeechobee Watershed Restoration Project (LOWRP) Draft Integrated Project Implementation Report and Environmental Impact Statement dated July 2018. The South Florida Water Management District is directed to negotiate a pre-partnership credit agreement with the United States Army Corps of Engineers as authorized under Section 6004 of the Water Resources Development Act of 2007."

This state funding, by law, can only be used for projects already identified for LOWRP. In LOWRP, the U.S. Army Corps of Engineers proposes a shallow (with water up to about 4 feet deep) Wetland Attenuation Feature (WAF) with a storage volume of approximately 46,000 acre-feet; 80 aquifer storage and recovery (ASR) wells with a storage volume of approximately 448,000 acre-feet per year; and two wetland restoration sites along the Kissimmee River, Paradise Run and Kissimmee River Center.

While the wetlands restoration plans received widespread support at the July 17 SFWMD meeting, wetlands do not provide significant storage to reduce discharges to the coastal estuaries, a requirement for the use of the funding. The WAF, which will provide storage, will take an estimated 20 years to build and will cost around $1.2 billion. Both the wetlands restoration and the WAF will require the purchase of land that is currently in private ownership. Comments made at LOWRP public hearings in 2018 indicate most (if not all) of those property owners will not be willing sellers.

The legislation requires SFWMD use the $50 million for LOWRP features "designed to achieve the greatest reductions in harmful discharges to the Caloosahatchee and St. Lucie Estuaries."

According to information shared at the July 17 SFWMD meeting, a cluster of 10 ASRs with an on-site a water treatment facility could be built for $50 million on property the state already owns. Ten ASRs would provide storage of about 56,000 acre feet of water.

At the SFWMD July meeting, Tim Gysan, U.S. Army Corps of Engineers Senior project manager, said before water is injected into an ASR well, it is treated to drinking water standards, using UV and filtering, before the water is put into the ground. The water injected into the ASR stays in a "bubble" area around the well. He said they estimate recovery of 70 percent of the stored water, but added this is a conservative estimate because a pilot project found a higher rate of recovery in wells north of the lake. He said with an above-ground reservoir, water is lost to evaporation. With ASR, there is no water lost to evaporation.

Unlike other components of LOWRP, the ASRs can be phased in. Because the state already owns the land, work could begin immediately.

Members of the public who spoke at the July 17 meeting in favor of the ASRs included: Beth Lewis of the Nature Conservancy; Nyla Pipes of One Florida; Pete Quasius of Audubon of the Western Everglades; Newton Cook of United Waterfowlers; Gary Ritter of Florida Farm Bureau; Kerry Kates with the Florida Fruit and Vegetable Association; Ernie Barnett of Florida Land Council; Mike

AMERICAN OVERSIGHT

Collins, a former member of the Water Resources Analysis Coalition; Steve Walker, representing the Seminole Tribe; and, Rich Budell, who served as director of Office of Agricultural Water Policy with the Florida Department of Agriculture and Consumer Services for 17 years.

In the July 22, letter to Col. Kelly, Mr. Bartlett, wrote: "During the 2019 legislative session, Florida legislators approved $50 million as part of Specific Appropriation 1642A. This legislation directs the South Florida Water Management District to use the funding for the design, engineering and construction of specific project components within the Lake Okeechobee Watershed District (LOWRP) that are designed to achieve the greatest reductions in harmful discharges to the Caloosahatchee and St. Lucie Estuaries. It also directs the district to negotiate a Pre-Partnership Credit Agreement (PPCA) with the U.S. Army Corps of Engineers.

"The district is seeking to enter into PPCA No. 1 with the USACE for the LOWRP. This initial PPCA would encompass any of the Aquifer Storage and Recovery (ASR) or wetland restoration features identified in the LOWRP Draft Project Implementation Report and Environmental Impact Statement. Based on our initial analysis and review of the research, we will be pursuing the ASR features of LOWRP to quickly provide benefits to the northern estuaries by offering short- and long-term recoverable storage, consistent with the legislative intent of the appropriation. The Kissimmee Pilot ASR has already demonstrated promising results for this important tool for LOWRP.

"However, as partners, we must be confident that we fully understand the extensive ASR research already conducted prior to the new ASR well construction and utilize this information to responsibly move forward. We plan to thoroughly review previous pilot studies, reports and other research, and request that the U.S. Army Corps of Engineers participate in and assist with this review.

"The generous state funding became available on July 1, 2019."

How today's global warming is unlike the last 2,000 years of climate shifts

Previous cooldowns and warm-ups were regional, driven by natural forces, paleoclimate data show

By Carolyn Gramling

Across 98 percent of Earth, the end of the 20th century saw the hottest temperatures of the last two millennia. Since then, average global temperatures are still increasing, causing record-breaking heat waves such as struck New York City (shown) in mid-July. Jeenah Moon/Bloomberg via Getty Images Temperatures across 98 percent of Earth's surface were hotter at the end of the 20th century than at any time in the previous 2,000 years. Such nearly universal warming, occurring in lockstep across the planet, is unique to this current era, scientists say. By contrast, other well-known cold and warm snaps of the past, such as the Little Ice Age or the Medieval Warm Period, were, in fact, regional rather than worldwide. What's more, the rate at which temperatures are increasing now far exceeds any previous temperature fluctuations measured in the last two millennia. Those are the conclusions of a trio of new papers examining temperature trends over the last 2,000 years, published online July 24 in Nature and Nature Geoscience.

Those previous climate fluctuations were primarily driven by natural causes, including powerful volcanic eruptions, rather than human-caused greenhouse gas emissions. The findings, which are based on newly available global paleoclimate data, reinforce an inescapable conclusion, says Michael Mann, a climate scientist at Penn State University who was not involved in the new studies: "The current period of warmth is unprecedented in its global scope in the last 2,000 years."

In the Nature study, a team led by Raphael Neukom, a climate scientist at the University of Bern in Switzerland, used many different types of temperature records from around the world to create thousands of climate reconstructions of the last two millennia, from A.D. 1 to 2000. Those data were collected by an international group of scientists called the Consortium. They include proxies for

AMERICAN OVERSIGHT

temperatures derived from tree rings, glacier ice cores, lake and ocean sediments, cave deposits such as stalactites and stalagmites and historical documents . Using those data, as well as direct temperature measurements collected in some locations since the 1800s and some climate simulations, the team produced more than 15,000 different climate reconstructions of past global temperatures. Then, the researchers took a close look at the precise timing of warming or cooling within four previously identified "climate epochs" - the Roman Warm Period from about A.D. 1 to 300, the Dark Ages Cold Period from 400 to 800, the Medieval Warm Period from about 800 to 1200 and the Little Ice Age from 1300 to 1850.

Hot and cold

Well-known climate fluctuations of the last 2,000 years were once thought to be global. But research using new available temperature proxy data from around the planet reveals that these fluctuations were regional. In each map, different colors represent the warmest (or coldest) century for a given location within the represented time period. For example, the Dark Ages Cold Period is thought to span from about A.D. 400 to 800. But colder temperatures occurred several hundred years earlier in the Pacific Ocean (white to pale purple) and several hundred years later in East Asia and other locations (darker purple). Similarly, the Medieval Warm Period (or Medieval Climate Anomaly) lasted roughly from 800 to 1200, with peak warmth occurring during the 11th centu northwestern Europe (orange). But central South America saw peak warmth several hundred years later (brow Across all 2,000 years included in the new research, however, temperatures were hottest at the end of the 20th century for 98 percent of the planet (shown in the third map). Cold and warm snaps of the past were regional, unlike current global warming R. Neukom et al/Nature 2019 Although the same datasets were input into the climate reproductions, the team used different methodologies, varying widely in computational complexity, to process the data and calculate past temperatures. Regardless of which method was used, the story was the same, the researchers found: Those past climate epochs were not simultaneous, global events. The Little Ice Age, for example, was a cold snap thought to have lasted from roughly 1350 to 1850. But the deep freezes didn't occur everywhere at the same time, the new analysis shows. Northwestern Europe and southeastern North America got their coldest temperatures during the 17th century, while the area encompassing the central and eastern Pacific Ocean were coldest two hundred years earlier, during the 15th century, the team found. The Medieval Warm Period, also called the Medieval Climate Anomaly, showed the warmest temperatures in northwestern Europe and eastern North America during the 11th century. But peak warmth occurred several hundred years later in central South America, and several hundred years earlier in the eastern and central Pacific Ocean. "The traditional understanding is that these [climate epochs, like the Little Ice Age] were global-scale phenomena," says Nathan Steiger, a climate scientist at Columbia University. "That's not the case." That finding stands in stark contrast to the team's conclusions about the current era of warming: It is occurring concurrently around the globe, with the hottest temperatures in the study found to be right at the end of the 20th century. "It is coherent in a way we didn't experience over the last 2,000 years," Steiger says. Because the study's temperature data go only to 2000, the last two decades of temperatures weren't included. But NASA and the National Oceanic and Atmospheric Administration reported in February that nine of the 10 warmest years on record have occurred since 2005, and the last five years were the five hottest on record .

Human activities have been repeatedly cited by scientists as the cause of these ongoing record-breaking temperatures . At a news conference on July 22, Steiger noted that the Nature study didn't specifically mention that the current warming is due to anthropogenic activities, in part because so many previous studies have repeatedly and clearly demonstrated that link. "We don't need to look at paleoclimate to know that." A second study, published in Nature Geoscience, does address the question of anthropogenic warming more explicitly. The study, authored by Neukom and other members of the PAGES 2k Consortium, used the same temperature proxies as the Nature study. But instead of comparing spatial patterns of warming and cooling around the globe, the team looked at the average global temperature through time. That, Neukom said at the news conference, revealed that the current rate of warming is much faster than anything observed in the last 2,000 years that can be attributed to natural variability. "It's another angle to look at the extraordinary nature of current warming," he said. A third study, also in Nature Geoscience, added another layer of context to the trends, by looking at what natural forces may have been behind large regional temperature

AMERICAN OVERSIGHT

fluctuations such as the Little Ice Age.

A series of powerful volcanic eruptions, including the 1815 eruption of Mount Tambora, powered the end of the cold period known as the Little Ice Age, which spanned from about 1350 to 1850. Such climate fluctuations, once thought to span the entire globe, are now known to be regional. JialiangGao/Wikimedia commons (CC BY-SA 3.0) Led by University of Bern climate scientist Stefan Brönnimann, the researchers found that before the onset of the Industrial Revolution in the mid-1800s, powerful volcanic eruptions were the main engine behind such large-scale temperature fluctuations. For instance, five powerful eruptions, including the 1815 eruption of Mount Tambora, occurred toward the end of the Little Ice Age, which began around 1350 and ended around 1850 . The eruptions initially led to cooling and climate upheaval, and then a period of recovery as the planet warmed up again. That recovery coincides with the onset of the Industrial Revolution, at which point greenhouse gases became the primary driver for warming, the researchers note. Mann notes that the studies' findings - that these past climate epochs weren't global and that current warming is proceeding at an unprecedented rate - aren't exactly new ideas. In 1998, he and colleagues published a famous study in Nature, sometimes referred to as the "hockey stick" paper, that revealed a dramatic upward tick in temperatures at the end of the 20th century - a pattern that, when plotted through time, takes the shape of a hockey stick. "It's gratifying that independent, international teams using entirely different approaches have come to virtually identical conclusions," Mann says. Raymond Bradley, a climate scientist at the University of Massachusetts Amherst who coauthored the hockey stick study, agrees. "In that paper, we were widely criticized for saying the last decade was the warmest in the last 1,000 years," he says. Bradley adds that the new studies are a valuable addition, with a "high quality, carefully screened set of data" as well as powerful simulations that can synthesize and reproduce those past temperatures. "They've done everything right," he adds. But the database of temperature proxies still contains some glaring holes, particularly in tropical regions and in the oceans. Such data won't change the underlying storyline, but could help scientists see global temperature fluctuations even more clearly,

Farmers utilizing urea for nitrogen (N) fertilization should be aware of climatic conditions that can reduce crop yields. Frequent and intense rainfall events cause N leaching through the root zone, and high soil temperatures, low soil moisture, high soil pH, and low soil nutrient holding capacity cause N volatilization into the atmosphere. Credit: Doug Mayo, UF/IFAS.

Soil and climatic conditions in North Florida can pose serious challenges to growers aiming to maximize returns on investments made in nitrogen (N) fertilizer. Most plant available N in local soils is in the nitrate (NO_3^-) form. Frequent and intense rainfall events, coupled with the lighter-textured soils that dominate much of North Florida, can lead to substantial NO_3-leaching. Additionally, local climatic conditions often favor gaseous losses of N from surface-applied urea through ammonia (NH_3) volatilization. Conditions favoring volatilization include high soil temperatures, low soil moisture, high soil pH, and low soil nutrient holding capacity. Although summer rainfall can be plentiful, rapid drainage on lighter-textured soils, in addition to dry spells at N topdressing, can create low moisture conditions at the soil surface. The possibility also exists for soil microsites high in pH that allow for volatile losses of NH_3.

Given how susceptible N fertilizer is to environmental losses in North Florida, UF/IFAS Extension recommends that growers follow the "4Rs" of nutrient management as a best management practice to optimize N fertilizer recovery by crops. These four fertilizer management principles are:

1. Right source of fertilizer - Think of expense, ease of application, and soil health.
2. Right rate of fertilizer- Consult your soil test report and think about yield goals.
3. Right placement of fertilizer - Banding vs. broadcasting, depends on crop in question.
4. Right timing of fertilizer - When does rapid nutrient uptake occur for your crop?

FINAL DRAFT Chapter 4 IPCC SR Ocean and Cryosphere

Executive Summary

This chapter assesses past and future contributions to global, regional and extreme sea level changes, associated risk to low-lying islands, coasts, cities, and settlements, and response options and pathways to resilience and sustainable development along the coast. **Global mean sea level (GMSL) is rising (virtually certain1) and accelerating (high confidence2). The sum of glacier and ice sheet contributions is now the dominant source of GMSL rise (very high confidence).** GMSL from tide gauges and altimetry observations increased from 1.4 mm yr-1 over the period 1901-1990 to 2.1 mm yr-1 over the period 1970-2015 to 3.2 mm yr-1 over the period 1993-2015 to 3.6 mm yr-1 over the period 2005-2015 (high confidence). The dominant cause of global mean sea level rise since 1970 is anthropogenic forcing (high confidence) (4.2.2.1.6, 4.2.2.5). **....more.... 169 pages**

WHAT WE DO

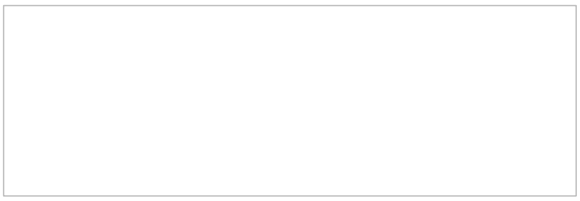
The central theme of all Florida Earth is to provide programs that enable participants and partners in developing and implementing solutions to challenges in the water space. We are about connecting people together and collaborating as a community of science, engineering, policy, and other multi-discipline experts who have a desire to solve problems.

1. Development of Knowledge Exchange Platforms

All Florida Earth programs have a knowledge exchange platform component, whether at the local, state, national or global level. Examples of connectivity include:

- **Nation to nation -USNC Professional Program**
- **University to university -USNC Academic Program**
- **Professional organization to professional organization -USNC Professional Program & Module Series**
- **Governmental organization to private sector - all programs**
- **Private sector to private sector - all programs**

2. Facilitation of solutions development



Florida Earth teams have been instrumental in providing innovative approaches to helping organizations derive solutions to stakeholder issues. By having a global reach, programs are designed to help expand thinking and reduce conflict surrounding water related issues. Examples of that function include:

- **Direct facilitation around contentious issues - Blue-Green Project**
- **Education forums addressing water related controversy -Florida Land Use Forums and Water Choices**
- **Conflict Resolution Training - Florida Earth support ofUniversity of Florida's Natural Resources Leadership Institute**

3. Expansion of already existing programs

Using Florida Earth's extensive partner network, organizations have collaborated with us to expand and enhance their programs that have similar goals and components. Examples of that function are:

- **Law School Study Abroad Programs -The USNC Comparative Water Law Course**
- **The International Water Association's Young Professional Program - USNC Professional Program**
- **Events that engage partner institutions - A Night with the Governors**

A Night with the Governors at St. Thomas University School of Law included Bob Graham, Buddy McKay and Charlie Crist

4. Providing basic and advanced training to developing countries

Helping others find solutions that already exists for their problems is a Florida Earth mandate. Programs that exemplify this principle include:

- **Florida Earth's "Flagship" Program - TheUNESCO-IHE Florida Program and the Water Ambassadors**
- **The new USNC Urban Coastal Short Course - Being developed in partnership with UNESCO-IHE under their short-course professional program.**

An October Heat Wave Bakes the Southeast and Mid-Atlantic. Is This Our Future?

RACHEL LICKER, SENIOR CLIMATE SCIENTIST

As I write this, an air conditioning repairman is on his way to my house as the fan broke a couple of days ago. Normally at this time of year we could wait to get it fixed, but it's going to be dangerously hot today. It's October 2, and temperatures are expected to reach at least 96°F today in Washington, D.C., with an even higher heat index-a record high for this date, and possibly for October, in the nation's capital. And we're not alone.

Unseasonable heat

This unseasonable heat is hanging over much of the country, with 162 communities or more facing potentially record highs this week. Wilmington, Ohio's National Weather

AMERICAN OVERSIGHT

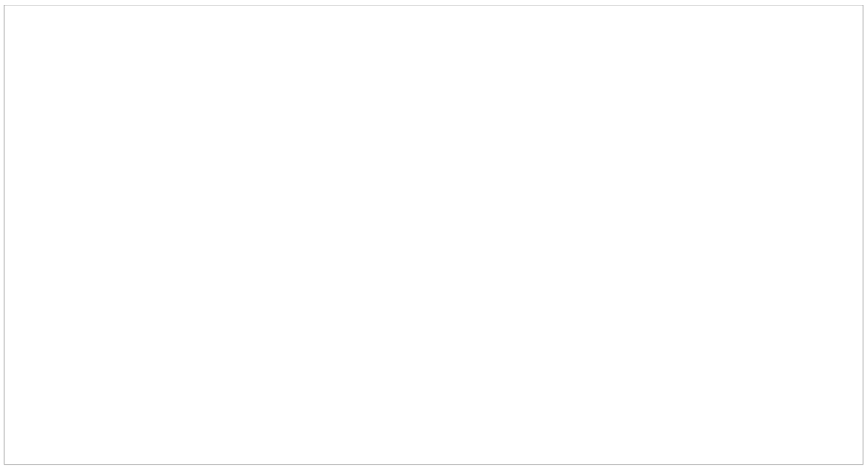
Forecast issued a statement today that heat indices in the region are projected to soar into the mid-to-upper 90s, twenty-five to thirty degrees above average. South Central, Indiana, and Central Kentucky's local weather forecast office put out a hazardous weather outlook warning residents of unseasonable heat and drought, creating a risk of wildfires.

In Baltimore, public schools without air conditioning units are closed. And for the second day in a row, Columbus, Ohio closed the more than 100 schools in its system due to the soaring heat index and lack of air conditioning. Not only are those high temperatures dangerous to children's health, studies correlate elevated temperatures with reduced student performance (e.g. lower test scores).

And it's not just on land-sea surface temperatures are also above average across much of the North Atlantic at the moment, fueling tropical storms like Lorenzo which broke the record for a category 5 hurricane this far north and east in the Atlantic .

Extreme heat is forecast to blanket the Southeast and mid-Atlantic this week. Source: Climatereanalyzer.org

Extreme heat in the future



A vital takeaway from this autumn heat wave is that, for hundreds of cities and towns, this kind of heat is projected to become standard throughout the warm season and into the fall as a result of climate change, assuming we remain on our current path. In our Killer Heat study that we released in July, we looked at projections of the heat index (the combination of temperature and humidity also known as the "feels like" temperature) for the lower 48 and found that all cities see increases in 90 degree days, and that a great many are projected to become unrecognizably hot if we do not take action to reduce our global warming emissions now.

Take Atlanta. This city, no stranger to heat, could break its record for days over 90 degrees Fahrenheit (90 days in a single year) if the next few days hit that mark as they are predicted to. But what's important to bear in mind is that our analysis forecasts Atlanta to experience 90 degree temperatures on average 104 times every year by mid-century, making this year's extreme-heat outlier the norm in just a few decades.

And in Columbus, Ohio, where schools are closed today, 90-degree days should be expected on average 65 times each year by mid-century, and extreme heat days that could spill into the school year with greater frequency. By late century, the city would see more than three months' worth of such conditions in an average year if we do not take action on climate change.

With air conditioners costing US households about $29 billion annually, the prospect of a much hotter future looks not only dangerous, but costly. That threat requires us to act to reduce heat-trapping emissions both to curtail the growth in extreme heat and to limit the accompanying harm and costs.

Florida Crystals voluntarily agrees to terminate lease early to expedite construction of storm water treatment area

Oct 3rd, 2019 · by Katrina Elsken ·

TALLAHASSEE - Governor Ron DeSantis, the South Florida Water Management District (SFWMD) and the Florida Department of Environmental Protection (DEP) have announced the early termination of the Florida Crystals Lease for the land needed for the storm water treatment area (STA) component of the Everglades Agricultural Area (EAA) Reservoir Project.

On Monday, Sept. 30, the New Hope Sugar Company (part of the Florida Crystals Corporation) sent a letter voluntarily terminating its lease on lands needed to expedite completion of the 6,000-acre STA.

"New Hope understands that the district is accelerating construction of the EAA reservoir project. New Hope will transition land covered by this lease as needed by the district for construction of the Stormwater Treatment Area associated with the EAA reservoir in advance of the lease's earliest termination date of March 31, 2021," states the letter signed by Armando Tabernilla.

"Pursuant to section 13.3 of the lease, New Hope hereby provides notice that it is terminating designated fields in the lease early in accordance with the schedule in the attached Exhibit A. Per S. 373.4598, Florida Statutes, New Hope many continue to farm these fields on a field-by-field basis until its operations are incompatible with implementation of the EAA Reservoir Project, as reasonably determined by the district. It is our understanding that the district will provide at least 5 days notice to New Hope in advance of proposed work to allow for the harvest of crops."

The schedule phases out the lease on the 6,000 acres planned for the STA site. There are two leases involved, one signed by the SFWMD district governing board in 2018, and one signed by the Florida Department of Environmental Protection in 2014.

For the property owned by SFWMD, the lease will be phased out:
*** Sept. 30, 2019: 2,022 acres;**
*** Dec. 31, 2020: 1,077 acres;**
*** March 31, 2021: 3,071 acres.**

The lease with New Hope Sugar Company on the portion of the land owned by the state, signed March 28, 2014 by Katy Fenton, Deputy Secretary for Land and Recreation, State of Florida, Department of Environmental Protection, expires in 2046, and includes a three-year termination notice. New Hope Sugar has volunteered to terminate that lease early as well.

For the lease on the property owned by the State of Florida voluntary early termination includes:
*** Sept. 30, 2019: 80 acres;**
*** Dec. 31, 2020: 278 acres;**
*** March 31, 2021: 876 acres.**

"Getting the EAA Reservoir Project built and operational is a top priority, and this termination means we can continue to expedite this critical project," said SFWMD Executive Director Drew Bartlett.

Mr. Bartlett will review the termination letter with the district's governing board at next week's public Governing Board meeting. In June and August, the District applied for permits from the U.S. Army Corps of Engineers for the STA component of the EAA Reservoir Project. Once issued, site preparations for the STA component will begin.

The EAA Reservoir Project is a joint Everglades restoration project between the U.S. Army Corps of Engineers and SFWMD. The U.S. Army Corps of Engineers will construct the storage reservoir and the district will construct the water-cleansing STA.

The reservoir footprint is about 10,000 acres. The STA will cover about 6,000 acres.

Under the provisions of the 2018 lease extension, SFWMD is already conducting geotechnical work on the project site. SFWMD

AMERICAN OVERSIGHT

will begin site preparations for the STA as soon as the permits for the project are approved by the U.S. Army Corps of Engineers.

Background

In November 2018, the SFWMD board voted to extend a lease on about 16,000 acres of farmland in the EAA for 8 years, with a provision that the lease could be terminated after 20 months with four months notice. Former governing board chair Federico Fernandez said the lease change would accelerate EAA reservoir construction because it allowed SFWMD to immediately take back 560 acres to use as a staging area to stockpile rocks and materials, and to mine for additional material. Provisions within the lease extension also allowed SFWMD and the U.S. Army Corps of Engineers to conduct geological testing throughout the property, even on active sugar cane fields.

This map, which was included in the South Florida Water Management District lease discussed at the November 2018 governing board meeting as Exhibit B, shows the area designated for the Everglades Agricultural Area (EAA) reservoir. The land owned by SFWMD is in light blue. The 560 acres that SFWMD took back as part of the lease extension are in purple (parcel 1) and bright green (parcel 2). The Trustees of the Internal Improvement Trust Fund (TIITF) lands - 1,251 acres under the control of Florida Department of Environmental Regulation - are shown in light orange. Special to the Lake Okeechobee News/SFWMD.

Why lease out the state land?

The site of the future EAA reservoir has been in state ownership for more than 20 years. It was purchased in anticipation of the future need for the land for the Comprehensive Everglades Restoration Plan (CERP). There are many reasons for leasing out the land until the corps is ready to start construction of the reservoir:

* The lease generates about $1.6 million a year ($100 an acre) in lease payments. The per acre lease value was determined as market value by an appraiser chosen by SFWMD.

* Leasing the land for agriculture means it stays on the county tax rolls. When the state takes over the land, the county (in this case Palm Beach County) will lose that annual tax revenue. When the county loses that tax base, other property owners in the county will have to pay more to maintain the level of county services.

* Keeping the land in agriculture is required by state law. Florida Senate Bill 10, which authorizes moving the EAA reservoir up on the CERP Integrated Delivery Schedule (IDS) requires the land be kept in agricultural use until the corps or SFWMD is ready to start construction.

* If the land were not leased, SFWMD would be responsible for managing the land, which includes removing any invasive plants. Under the terms of the lease, this responsibility falls on the farmers. In South Florida, land left fallow quickly becomes overrun with invasives such as tropical soda apples, Brazilian peppers, Melaleuca trees and other non-native plants. Agencies involved establishing the Florida Wildlife Corridor discovered that any land allowed to "return to nature" was soon so overrun with invasives that not only were native plants forced out, but the invasives grew so dense that Florida native wildlife was also forced out. If the lease were terminated before construction starts, SFWMD would have the added expense of land management. SFWMD staff are well aware of the effort needed to control invasive plants. They use the millions generated from the leased EAA land to control invasive plants on other state-owned property.

* If the land were not leased, and an endangered species moved in before construction started, the federal government could halt the project. According to former SFWMD Director of Everglades Policy Eva Velez, this has actually happened on other projects, and the federal requirements to move the animals or change the project plans to accommodate the endangered species resulted in delays.

* The lease helps preserve jobs - union jobs - in the sugar mill for as long as possible until the reservoir construction starts. Less cane to harvest will mean less work at the mill. Jobs that pay more than minimum wage are already scarce in rural areas south of the big lake, and the jobs at the mill provide attractive pay and benefits. (A vo-tech program to train future sugar mill workers in welding, electric and machine work references journeyman pay of $25 an hour.)

* Keeping the fields in sugar cane helps clean the water. According to a University of Florida Institute of Agricultural Sciences (UF/IFAS) sugar cane is a "nutrient sink." Sugar cane is a grass. The water from the lake enters the cane fields higher in phosphorus than water leaves the fields. Every time an acre of sugar cane is harvested, about 20 pounds of phosphorus is removed from the watershed. Runoff from cane fields is also lower in phosphorus than run off from fallow fields, according to the IFAS study.

* Sugar cane planting is rotated with rice. Flooded rice fields act like stormwater treatment areas (STAs), filtering the water from the lake.

* The EAA farmers provide food for America. The rich muck soil, called the "black gold" of the EAA, is highly productive. In addition to the sugar cane grown in the EAA, farmers rotate cane with rice. In the past five years, 31 million pounds of rice was harvested in the 16,000 acre property leased to Florida Cyrstals.

* There's an additional risk if the state takes the land back before construction starts. If the property were left fallow for five years, it could be declared a wetland by the federal government, and result in additional bureaucratic paperwork for federal permits to start construction of the reservoir ... or even of the accompanying Stormwater Treatment Area (STA). (You need a

AMERICAN OVERSIGHT

federal permit to turn an area designated as wetland into a project that is also essentially a wetland.)

Multi-year leases typical for farming

Typically leases on land used for farming are for much longer than eight years, according to Gaston Cantens, vice president of Florida Crystals. Leases with sugar cane growers usually have a three-year termination clause.

Sugar cane is not a "one year" crop. In the EAA, cane may be harvested two, three or even four times after the initial planting, depending on the condition of the soil and the type of sugar cane grown.

Some cane fields are planted once and then harvested three times before they are planted with rice and flooded for a year, for a four-year rotation. Fields used for Florida Crystal's organic sugarcane products are on a three-year cycle with two harvests of cane before the fields are planted with rice and then flooded.

Rice has a growing cycle of 120 days. After the rice germinates, the farmers flood the fields, and they stay flooded for about 80 days. Flooding naturally kills weeds and pests and conserves soil by keeping it out of contact with air. Rice fields function as STAs, removing nutrients from the water. Rice is also a low-input crop; the majority of Florida Crystal's rice is grown without the use of fertilizer. The fields are kept for a year in rice and then planted again in sugar cane.

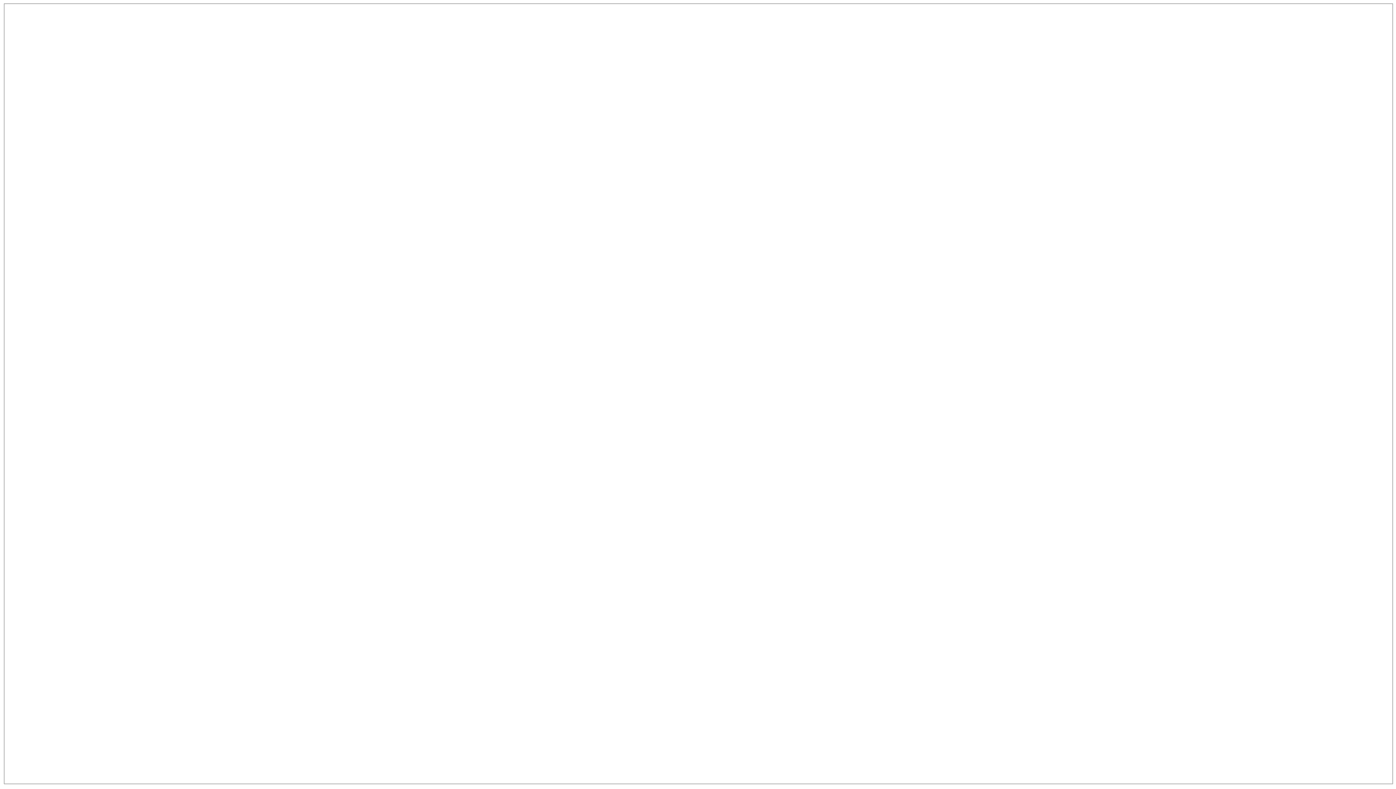
Sugar Lease end could help Everglades reservoir plan

Posted: 9:03 AM, Oct 04, 2019 **Updated: 9:03 AM, Oct 04, 2019**

By: Jim Turner, The News Service of Florida...



....

"We look forward to working closely with the (U.S. Army) Corps to expedite federal permits so we can immediately begin site preparation work," district Executive Director Drew Bartlett said in the announcement from the governor's office.
The district governing board will review the termination letter next week.
The district applied for permits from the Army Corps in June and August for the stormwater-treatment area component of the reservoir project....

Red tide counts growing in Lee, Collier waters

Counts ranged this week from background levels to more than 100,000 cells per liter, enough to cause fish kills and breathing issues in humans, marine mammals and sea turtles.

Artificial Reefs could turn tide on oysters

One artificial reef is finished, another is partially done, third is planned to boost bivalve population

When it comes to marine conservation efforts, much of the attention is focused on manatees and sea turtles, but there's another creature that may be less visible but needs just as much help: oysters.

Naples Bay has lost nearly 80% of its oyster reefs since the 1950s, but now the city is trying to turn the tide through its artificial reef project.

"The bay used to be almost unnavigable" due to the abundance of oyster reefs, said Stephanie Molloy, the city's natural resources director. "But due to dredging projects, we've lost those and what they do for the bay."

The city is creating artificial reefs at three locations in the bay to try to revive the oyster population. Site one is just west of Windstar and has already been completed. Site three, which is located near where Rock Creek flows into the Gordon River, is about 50% complete, Molloy said, and should be finished within the next fiscal year.

The city is still seeking funding for the second reef site, which will be near the mouth of Haldeman Creek.

Each reef site will contain reef balls, man-made structures designed to mimic natural reefs; mesh bags of oyster shells; and a limestone and shell mixture, Molloy said. The hard surfaces provide a place for juvenile oysters, or oyster spat, to adhere to and start growing to form new reefs, she said.

Scientists from Florida Gulf Coast University will begin regularly monitoring the reefs later this month to evaluate the success of the project and provide information for future restoration efforts, Molloy said, but initial, non-scientific test results look good.

"While we were out there a couple of times we just turned over a couple of rocks on the reefs and we're already seeing oyster spat," she said. "And we haven't seeded these; these are naturally- seeded oyster spat. So that's very encouraging for us." Oysters will be counted at the restoration sites and reference sites to determine density, and oyster sizes will be measured to determine the age structure of the oyster population. Oyster reef monitoring includes analyzing water quality around the reefs.

The city isn't the only organization working to revive the oyster population; last month members of the Naples Area Board of Realtors 2019 Leadership Class built 16 artificial oyster reefs using donated hockey sticks as part of FGCU's Marine Science Division's Rink2Reef Oyster Habitats Waterways Restoration Program.

"Being Realtors in the area we obviously care about how the economy does, and over the last year the press about water quality had a direct impact on hotels, restaurants and the real estate industry," said Renee Hahn, a member of NABOR's 2019 Leadership Class.

"So we thought if we could band together and tackle a project that helps with the vibrancy and success of the community, then it's a no-brainer."

Each Rink2Reef reef has the potential to house up to 400 oysters, and each oyster can filter up to 50 gallons of water per day. Since NABOR is installing 16 reefs, that means the oysters could collectively filter more than 300,000 gallons of water every day, Hahn said.

The program also has the added benefit of reducing waste. Because the hockey sticks have a carbon-composite material, they don't decompose when put into landfills, but when assembled in a Lincoln Log-esque manner, they make the perfect home for oysters.

"The building process was really simple because they've got it down to a sciencenow," Hahn said. "And (Rink2Reef) actually has an instruction manual on its website, so this is something anyone can do to help make a positive impact on the environment."

NABOR will install the reef habitats beneath the boat docks at Celebration Park off Bayshore Drive in

AMERICAN OVERSIGHT

U.S. Army Corps to release water from Lake O into Caloosahatchee estuary

The U.S. Army Corps of Engineers will release water from Lake Okeechobee into Caloosahatchee estuary again.

Scientists think releases may have fueled our blue-green algae crisis last year.

But right now, the Army Corps has other concerns.

The release began Saturday morning.

"This week was probably the toughest decision we've had in a long time," said Colonel Andrew Kelly, USACE Jacksonville District.

A tough decision for more reasons than one.

"What we are proposing to do this week is to target releases from Lake Okeechobee to the Caloosahatchee," said Kelly.

The Army Corps says the Caloosahatchee estuary is in need of fresh water.

"The runoff in the basins that usually feed the estuaries has kind of run out," Kelly said.

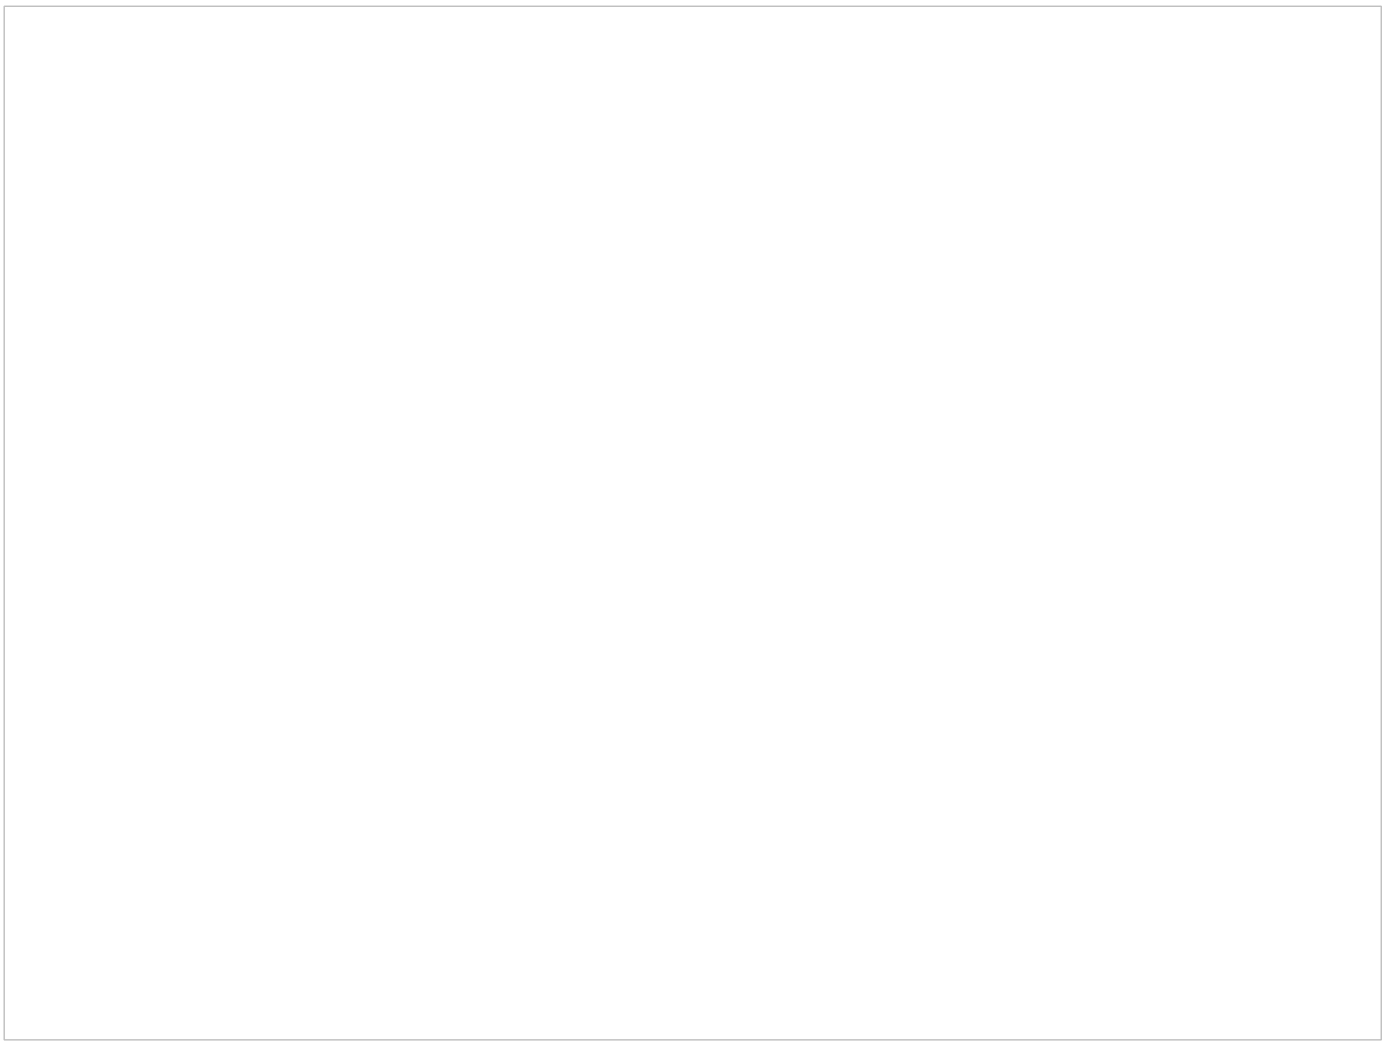
Couple that with an unusually dry wet season...

"What we've seen is another, about, tenth of a foot drop in the lake given, you know, I think a record-breaking September, which is the driest on record, I think, since 1932."

...and you have two bodies of water that could use more water.

But it's also a matter of considering water quantity versus water quality.

"We're releasing water as we have done for years and as we have done last season during the dry season. The Caloosahatchee requests water to maintain freshwater levels and salinity levels," said Kelly.



Meaning the Corps isn't cleaning the water in the lake before releasing it into the Caloosahatchee.

Now, we wait for the results.

Although there is a pilot experiment that was done over the summer to remove algae from Lake O's water, the Corps say they won't be using that because there is not much algae on the lake right now.

Water Levels

SITE STATUS REPORT: Real-time water levels upstream and downstream of hundreds of water control structures, flow volume and more.

The Site Status Report provides comprehensive up-to-the minute information for hundreds of water control structures throughout the SFWMD water management system, organized by regions for ease of navigation. It shows the current volume of water being moved and the water level upstream and downstream at each location. It also shows the daily water level for lakes and other large water bodies. Companion maps, on the far right tab, show key locations with real-time information of volumes of water being moved and daily water levels.

Daily Water Levels

The U.S. Army Corps of Engineers regulates and reports the official daily water levels of Lake Okeechobee and these major water bodies and areas within the South Florida Water Management District:

- **Lake Okeechobee**
- **Kissimmee River Basin**
- **Everglades Water Conservation Area 1 (Loxahatchee National Wildlife Refuge)**
- **Everglades Water Conservation Area 2**
- **Everglades Water Conservation Area 3**

All navigation locks to and from Lake Okeechobee, the Kissimmee River and Upper Kissimmee Chain of Lakes will reopen at 9 a.m. Wednesday.

Boaters will be able to move freely now that Hurricane Dorian has all but cleared South Florida.

Visit sfwmd.gov/navigation for more information on navigating through South Florida Water Management District structures and waterways.

More fresh water coming to Everglades, Florida Bay

By KEVIN WADLOW Free Press Staff

Progress on removing an old section of the Tamiami Trail and a recent decision by the U.S. Army Corps of Engineers signals a significant step toward putting more fresh water into Shark River Slough, a waterway to western Florida Bay, officials say.
The Corps last week approved sending more water flow to the northern part of the Everglades, which the South Florida Water Management District hailed as a major milestone.

File
Tamiami Trail has acted as a dam that prevents fresh water from entering Everglades National Park. The addition of bridges along the roadway now allows for more water to flow south into the park.

"We'll be pushing as much water under the Tamiami Trail as we can, considering all the other things that we have to be aware of," SFWMD board member Cheryl Meads of Islamorada said this week. "This district is moving water in that direction as quickly as we can."
Work on the old road is part of $100 million project that also includes raising the current U.S. 41 roadway to install large culverts and some "small bridges" to send water into the Everglades and Florida Bay.
The old-road project should be complete by next September with the additional elevation of U.S. 1 done by 2023.
The ongoing old-road project "removes a barrier blocking the natural sheet flow of water south into Everglades National Park," a SFWMD summary

AMERICAN OVERSIGHT

says. One part of the effort involves removing Florida Power and Light lines and poles along the old road, south of U.S. 41.
"This critical Everglades restoration project will restore the historical flow of freshwater south into Everglades National Park and Florida Bay that has been blocked for nearly a century."
Taylor Slough carries water to eastern Florida Bay while the Shark River Slough feeds the western bay.
Everglades Foundation chief executive Eric Eikenberg said, "The Old Tamiami Trail is a relic of the past, and removing it will allow natural habitat within this 'wetland of international importance' to re-establish."
"In the southern Everglades, the lack of fresh water impacts wildlife and destroys critical habitat," Eikenberg said earlier this summer. "In Florida Bay, it is ruining the delicate saltwater balance, killing seagrass habitat needed to support world-class recreational fishing in the Florida Keys."
Meads said the water management district, working with the Army Corps of Engineers on the massive Comprehensive Everglades Restoration Plan, must balance the needs of the environment along with impacts on members of the Seminole and Miccosukee tribes, and farmers in western Miami-Dade County.
"We can't just flood them out and do not want to," she said. "Tree islands are very important to the tribes' culture."
State and federal agencies also must consider areas like the 8.5-Square Mile Area in southern Miami-Dade that have been given legal protection.
"Difficult decisions have to be made along the way," Meads said. "No one takes these decisions lightly. There will be times when we can send water, and times when we can't."
Concern over potential South Florida flooding from Hurricane Dorian serves as an example, she said.
Previous Tamiami Trail improvement projects included the one-mile eastern bridge completed in 2014, and the 2.3 miles of western bridges completed in April 2019.

Editorial: Sea-level rise is real and needs attention now

OPINION By The South Florida Sun-Sentinel Editorial Board

No graver threat faces the future of South Florida than the accelerating pace of sea-level rise. In the past century, the sea has risen 9 inches in Key West. In the past 23 years, it's risen 3 inches. By 2060, it's predicted to rise another 2 feet, with no sign of slowing down. Think about that. Water levels could easily be 2 feet higher in 40 years. And scientists say that's a conservative estimate. Because of melting ice sheets and how oceans circulate, there's a chance South Florida's sea level could be 3 feet higher by 2060 and as much as 8 feet by 2100, according to the National Oceanic and Atmospheric Administration.

It's not just a matter of how much land we're going to lose, though the barrier islands and low-lying communities will be largely uninhabitable once the ocean rises by 3 feet. It's a matter of what can be saved. And elsewhere, how we're going to manage the retreat.

RELATED: Editorial: Florida needs real plan to fight real rising seas threat

You see the evidence several times a year in Miami Beach, the finger isles of Fort Lauderdale and along the Intracoastal Waterway in Delray Beach. During king tides on sunny days, seawater bubbles up through storm drains and over seawalls into lawns, streets and storefronts. That didn't happen 20 years ago, but it's going to happen more and more.

Of the 25 American cities most vulnerable to sea-level rise, 22 are in Florida, according to the nonprofit research group Climate Central. They're not all along the coast, either. Along with New York City and Miami, the inland cities of Pembroke Pines, Coral Springs and Miramar round out the top five.

AMERICAN OVERSIGHT

Flooding also is increasing in South Florida's western communities - like Miami-Dade's Sweetwater and The Acreage in Palm Beach County - because seawater is pushing inward through our porous limestone foundation and upward into our aged flood control systems, diminishing capacity. Sawgrass Mills, a huge shopping complex in western Broward, closed for three days last year because the region's stormwater system couldn't handle a heavy afternoon thunderstorm. You've never seen that before.

A growing reality

More than the rest of the country, South Floridians get it. TheYale Climate Opinion Maps show 75 percent of us believe global warming is happening, even if we don't all agree on the cause. We understand that when water gets hotter, it expands. And warmer waters are melting the ice sheets in Greenland and Antarctica. If all of Greenland's ice were to melt - and make no mistake, it's melting at an increasing clip - scientists say ocean waters could rise 20 feet.

The problem is, too few of us are convinced sea-level rise will personally harm us in our lifetimes. We've got to change that mind-set because it already is. Lila Young, who has lived on the Intracoastal in West Palm Beach for 30 years, said she's seen the king tides progressively getting higher and flooding her neighborhood more often.

One reason sea-level rise feels like a distant threat is because construction cranes still dot our skylines, the population keeps growing and politicians keep approving new waterfront developments.

Yet government officials see the danger ahead. South Florida's four counties have created a forward-thinking climate compact that, among many things, requires new construction to anticipate that minimal 2-foot rise in water levels by 2060.

RELATED: Goodman: Counties, and now some businesses, focusing on climate threat

However, sea-level rise is not yet on the short-term horizons of the mortgage and insurance industries. Perhaps that's because lenders generally recoup their money within 10 years and insurers can cancel your policy year to year.

But government officials well know their successors will be stuck with abandoned properties when the water rises. And part of their responsibility will be to clean up the debris to ensure pristine ocean water for future generations.

Perhaps you think you're safe because the flood map shows your home is on high ground. But you will still need infrastructure - things like roads, power plants, water treatment facilities, airports and drinking-water wellfields. So while your house may be high and dry, good luck getting to the grocery store, the doctor's office or out of town.

Good fortune gave Palm Beach County a slightly higher elevation, which means the risks aren't quite so acute here as for our neighbors to the south. Still, the high-priced real estate on the barrier islands is equally vulnerable, along with the low-lying mainland along much of West Palm Beach's Flagler Drive. As the sea level rises, the agricultural area south of Lake Okeechobee will drain more and more slowly after a major rainfall. And when significant hurricanes and floods hit farther south, we may see a sudden flood of people from Monroe, Miami-Dade and Broward counties.

It's tricky to trumpet the threat headed our way. Scientists like Harold Wanless, a noted University of Miami coastal geologist, have the freedom to be blunt. "If you're not building a boat, you don't understand what's happening here," Wanless told science writer Jeff Goodell, author of "The Water Will Come."

AMERICAN OVERSIGHT

But local leaders fear scaring people and damaging our economy. Though our region is certain to be reshaped, they express confidence that we can adapt if we start planning now to raise roads, elevate buildings, update the region's 70-year-old flood control system, buy out flood-prone properties and make smart choices about what to save and where to invest.

Political, business leadership needed

At the federal level, little leadership is being shown on this critical issue. President Donald Trump recently rolled back the Obama-era order that requires infrastructure projects, like roads and bridges, be designed to survive rising sea levels. And though membership is growing in Congress' bipartisan Climate Solutions Caucus - of which U.S. Rep. Ted Deutch, D-Boca Raton, is a founding co-chair - too many Republican members still deny the reality of climate change and sea-level rise, perhaps fearing political retribution by right-wing deniers. U.S. Sen. Marco Rubio resides in that camp.

In Tallahassee, after years of silence on sea-level rise, Gov. Rick Scott this year finally requested $3.6 million - a pittance, really - to help local governments plan. But despite the efforts of some South Florida lawmakers, the issue wasn't on the Legislature's agenda, partly because of the politics of climate change and partly because term limits create a revolving door of lawmakers who focus on today's hot buttons, not tomorrow's existential threats.

"It's not something we've taken a position on," Cragin Mosteller, spokeswoman for the Florida Association of Counties, said when asked about sea-level rise. "We represent 67 counties who have differing opinions ... So for us, we're trying to focus on the things counties need to manage like stormwater, water treatment."

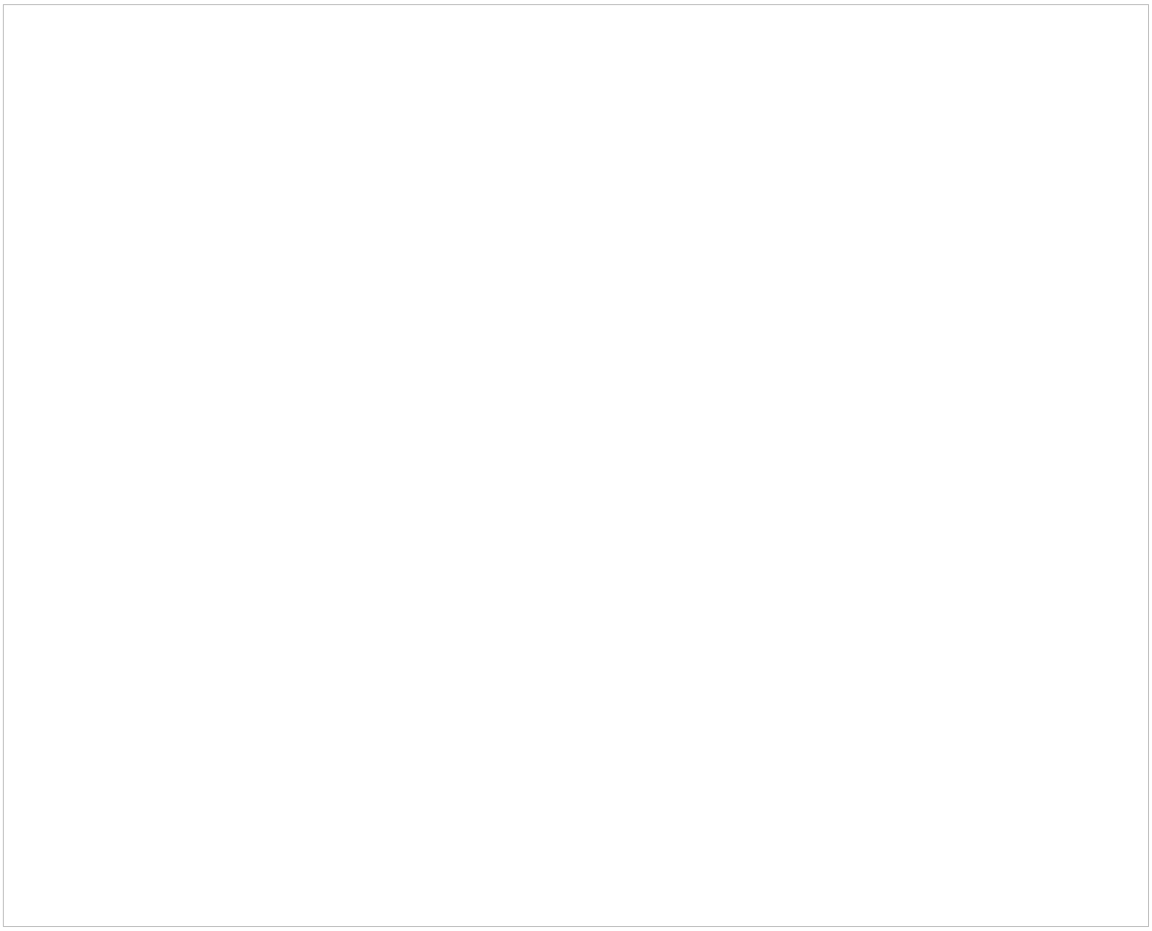
RELATED: **Editorial: Climate change report: It's the Florida economy, stupid**

Mark Wilson, president of the Florida Chamber of Commerce, says that to get Tallahassee's attention, public awareness must first be raised. Then, people need to make their voices heard.

"I travel the state more than anybody but the governor. I promise you that people are not demanding that their local House member and their local senator drop what they're doing and do something about sea-level rise," Wilson said. "The solution is to raise awareness."

To that end, the editorial boards of the South Florida Sun Sentinel, Miami Herald and Palm Beach Post - with reporting help from WLRN Public Media - are joining hands in an unprecedented collaboration this election year to raise awareness about the threat facing South Florida from sea-level rise. In drumbeat fashion, we plan to inform, engage, provoke and build momentum to address the slow-motion tidal wave coming our way.

Sea-level rise is the defining issue of the 21st Century for South Florida. Some of us might not live long enough to see its full effects, but our children and grandchildren will. To prepare for a future that will look far different, we've got to start planning and adapting today.



"The Invading Sea" is a collaboration of the editorial boards of the South Florida Sun Sentinel, Miami Herald and Palm Beach Post, with reporting and community engagement assistance from WLRN Public Media. For more information, go to TheInvadingSea.com.

No greater threat faces South Florida than sea-level rise. Local governments

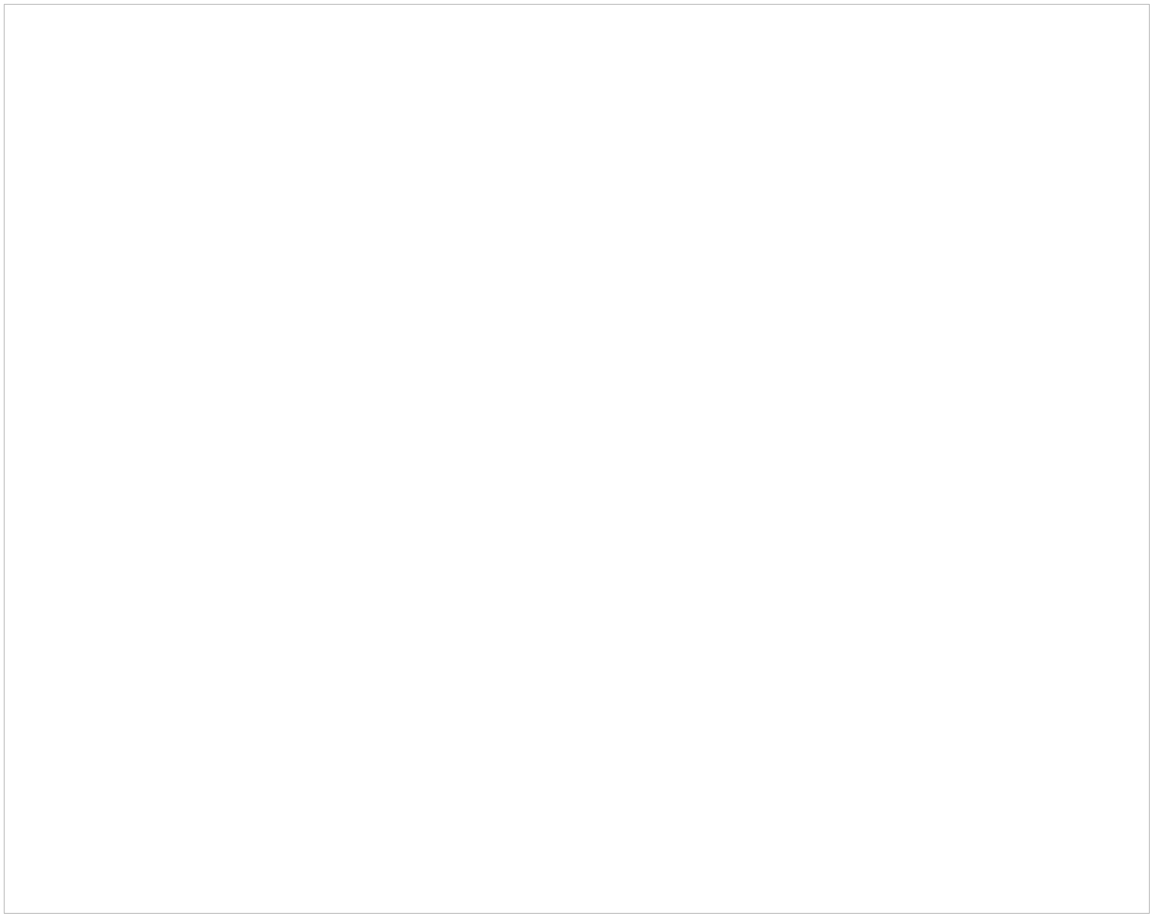
What is My Water Daily?



My Water Daily is a newsletter service for water industry professionals in the United States - or anyone that's interested in water issues. Every morning, we pull together news articles and job postings, categorize them based on topic and location, and send a customized email to each of our subscribers. Emails are sent each morning between 7am and 8am Eastern Time. If daily emails are too much, you can choose a weekly summary. Weekly summaries are sent on Monday mornings.

My Water Daily is completely free to use and you can unsubscribe at any time. .

The South Florida Water Management District (SFWMD) this week unveiled a new webpage to provide the public with easy access to its geospatial/GIS datasets. The public can browse, search, filter, preview and download the GIS datasets in a variety of formats.
The South Florida Water Management District Open Data Portal website offers GIS datasets in many different categories from environmental to hydrography to land resources to permits to regulatory datasets. These datasets are maintained by SFWMD and are used by water managers to make operational decisions for the agency's critical missions.

Data available for public viewing include maps of watershed and basin boundaries, sites of District facilities, water utility service boundaries and maps of vegetation in the Kissimmee River floodplain dating back to 1952.

"This Governing Board wants the public to have as much access to the data that goes into water management decisions as possible, so they can understand and play a valuable role in the process," said SFWMD Governing Board Chairman Federico Fernandez. "This new geospatial website puts crucial data just a click away for the 8.1 million residents we serve."

The Open Data Portal Geospatial website is just the latest online platform created by SFWMD to further public access to information. The District has also launched the Strategic Projects Interactive Maps website which allows the public to get information on dozens of ongoing projects, the SFWMD TV YouTube channel for informational videos and the Managing High Water website to give the public access to information on steps being taken to address the current high water emergency situation.
