[Filed with Secretary of State June 27, 2014.]

LEGISLATIVE COUNSEL'S DIGEST

AJR 1, Gatto. Federal constitutional convention: application.

This measure would constitute an application to the United States Congress to call a constitutional convention pursuant to Article V of the United States Constitution for the sole purpose of proposing an amendment to the United States Constitution that would limit corporate personhood for purposes of campaign finance and political speech and would further declare that money does not constitute speech and may be legislatively limited.

This measure would state that it constitutes a continuing application to call a constitutional convention until at least ⅔ of the state legislatures apply to the United States Congress to call a constitutional convention for that sole purpose. This measure would also state that it is an application for a limited constitutional convention and does not grant Congress the authority to call a constitutional convention for any purpose other than for the sole purpose set forth in this measure.

WHEREAS, Corporations are legal entities that governments create and the rights that they enjoy under the United States Constitution should be more narrowly defined than the rights afforded to natural persons; and

WHEREAS, Corporations do not vote in elections and should not be categorized as persons for purposes related to elections for public office and ballot measures; and

WHEREAS, The United States Supreme Court, in Citizens United v. Federal Election Commission (2010) 130 S.Ct. 876, held that the government may not, under the First Amendment to the United States Constitution, suppress political speech on the basis of the speaker's corporate identity; and

WHEREAS, Article V of the United States Constitution requires the United States Congress to call a constitutional convention upon application of two-thirds of the legislatures of the several states for the purpose of proposing amendments to the United States Constitution; now, therefore, be it

Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California, speaking on behalf of the people of the State of California, hereby applies to the United States Congress to call a constitutional convention pursuant to Article V of the

AMERICAN OVERSIGHT

United States Constitution for the sole purpose of proposing an amendment to the United States Constitution that would limit corporate personhood for purposes of campaign finance and political speech and would further declare that money does not constitute speech and may be legislatively limited; and be it further

Resolved, That this constitutes a continuing application to call a constitutional convention pursuant to Article V of the United States Constitution until at least two-thirds of the legislatures of the several states apply to the United States Congress to call a constitutional convention for the sole purpose of proposing an amendment to the United States Constitution that would limit corporate personhood for purposes of campaign finance and political speech and would further declare that money does not constitute speech and may be legislatively limited; and be it further

Resolved, That this application is for a limited constitutional convention and does not grant Congress the authority to call a constitutional convention for any purpose other than for the sole purpose set forth in this resolution; and be it further

Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, the Minority Leader of the House of Representatives, the Majority Leader of the United States Senate, the Minority Leader of the United States Senate, and to each Senator and Representative from California in the Congress of the United States.

SENATE CONCURRENT RESOLUTION No. 132

STATE OF NEW JERSEY

216th LEGISLATURE

INTRODUCED AUGUST 11, 2014

Sponsored by:
Senator LINDA R. GREENSTEIN
District 14 (Mercer and Middlesex)
Senator BRIAN P. STACK
District 33 (Hudson)
Assemblyman DANIEL R. BENSON
District 14 (Mercer and Middlesex)
Assemblyman HERB CONAWAY, JR.
District 7 (Burlington)
Assemblyman TIM EUSTACE
District 38 (Bergen and Passaic)

Co-Sponsored by:
Senator Gill, Assemblymen Singleton, Diegnan, Gusciora, Assemblywoman Watson Coleman, Assemblymen McKeon, Wimberly, Caputo, Johnson, Assemblywoman Jasey, Assemblyman Chivukula, Assemblywomen Jimenez, Quijano, Assemblyman Coughlin, Assemblywomen Tucker, Sumter, Assemblymen Garcia, Giblin, Assemblywoman Oliver, Assemblyman Burzichelli, Assemblywoman Pinkin and Assemblyman Danielsen

SYNOPSIS

Applies to Congress for limited constitutional convention to limit corrupting influence of money in politics and overturn Citizens United decision and related cases.

CURRENT VERSION OF TEXT

As introduced.

A CONCURRENT RESOLUTION applying to the Congress of the United States for the calling of a convention for the limited purpose of addressing concerns raised by the decision of the United States Supreme Court in the case of *Citizens United v. Federal Elections Commission* and related cases.

AMERICAN OVERSIGHT

WHEREAS, Elections should be free of the corrupting influence of excessive spending by outside interests and fair enough that any citizen can run for public office; and

WHEREAS, Numerous United States Supreme Court decisions have frustrated the will of the American people by eroding our ability to choose our political leadership, write our laws, and determine the fate of our country; and

WHEREAS, The New Jersey General Assembly and the New Jersey State Senate passed Assembly Resolution No. 86 and Senate Resolution No. 47, respectively, in the 2012-2013 legislative session; and

WHEREAS, Those resolutions expressed the Legislature's "strong opposition to [the] U.S. Supreme Court decision in *Citizens United v. Federal Elections Commission* [and called] upon [the] Congress of the United States to propose amending [the] U.S. Constitution" to overturn that decision; and

WHEREAS, Congress has failed to propose, pursuant to Article V of the United States Constitution, amendments thereto that would adequately address the concerns expressed in Assembly Resolution No. 86 and Senate Resolution No. 47; and

WHEREAS, Article V of the United States Constitution also requires Congress to call a convention for proposing amendments thereto upon application by two-thirds of the legislatures of the several states; and

WHEREAS, The State of New Jersey believes that there is a great need for a convention to propose amendments to the Constitution to address the concerns raised by citizens opposed to the decision of the Supreme Court in *Citizens United* and related cases, and believes that such a convention must be limited solely, specifically, and exclusively to addressing those concerns; and

WHEREAS, The State of New Jersey believes that the delegates to such a convention should be selected equally from individuals currently holding State or local office, or selected by election from each Congressional district for the purpose of serving as delegates, though past or present holders of federal elective office should be prohibited from serving as convention delegates, and the State should retain the ability to restrict or expand the power of its delegates within the limits noted above; and

WHEREAS, The State of New Jersey intends that this be a continuing application considered together with all other applications calling for a convention currently pending in other state legislatures, and all other passed, pending, and future applications with the aforementioned concerns until two-thirds of the several states have applied for a convention and it is convened by Congress; now, therefore,

BE IT RESOLVED *by the Senate of the State of New Jersey (the General Assembly concurring):*

1. The Legislature of the State of New Jersey makes application to the Congress of the United States for a convention to be called under Article V of the Constitution of the United States of America for the sole, specific and exclusive purpose of proposing amendments to the Constitution of the United States that would limit the corrupting influence of money in our political system including overturning the decision of the United States Supreme Court in the case of *Citizens United v. Federal Elections Commission* and related cases.

AMERICAN OVERSIGHT

2. Copies of this resolution, as filed with the Secretary of State, shall be transmitted by the Clerk of the General Assembly or the Secretary of the Senate to the President and Vice President of the United States, the Speaker of the United States House of Representatives, the Minority Leader of the United States House of Representatives, the President Pro Tempore of the United States Senate, each Senator and Representative from New Jersey in the Congress of the United States, the Archivist of the United States and the respective clerks of the United States House of Representatives and the United States Senate requesting that they record this application in the published tally of state petitions for a convention of the states under Article V of the United States Constitution, the Governor of each state, and the presiding officer of each house of each state legislature in the United States.

STATEMENT

This concurrent resolution makes application to the Congress of the United States of America for a convention to be called under Article V of the Constitution of the United States for the sole, specific and exclusive purpose of proposing amendments to the Constitution of the United States that would limit the corrupting influence of money in our political system including by overturning the decision of the United States Supreme Court in the case of *Citizens United v. Federal Elections Commission* and related cases.

The resolution provides that copies of the resolution are to be transmitted by the Secretary of the Senate to the President and Vice President of the United States, the Speaker of the United States House of Representatives, the Minority Leader of the United States House of Representatives, the President Pro Tempore of the United States Senate, each Senator and Representative from New Jersey in the Congress of the United States, the Archivist of the United States and the respective clerks of the United States House of Representatives and the United States Senate requesting that they record this application in the published tally of state petitions for a convention of the states under Article V of the United States Constitution, the Governor of each state, and the presiding officer of each house of each state legislature in the United States.

IN GENERAL ASSEMBLY

JANUARY SESSION, A.D. 2016

S E N A T E R E S O L U T I O N

RESPECTFULLY URGING CONGRESS TO RESTORE FREE AND FAIR ELECTIONS IN THE UNITED STATES

Introduced By: Senator Joshua Miller

Date Introduced: February 25, 2016

Referred To: Senate Special Legislation and Veterans Affairs

WHEREAS, The 1st President of the United States George Washington stated, "The basis of our political systems is the right of the people to make and to alter their Constitutions of Government"; and

WHEREAS, It was the stated intention of the framers of the Constitution of the United States of America that the Congress of the United States of America should be "dependent on the people alone." (James Madison, Federalist 52); and

WHEREAS, That dependency has evolved from a dependency on the people alone to a dependency on those who spend excessively in elections, through campaigns or third-party groups; and

WHEREAS, The United States Supreme Court ruling in Citizens United v. Federal Election Commission, 558 U.S. 310 (2010) removed restrictions on amounts of independent political spending; and

WHEREAS, The removal of those restrictions has resulted in the unjust influence of powerful economic forces, which have supplanted the will of the people by undermining our ability to choose our political leadership, write our own laws, and determine the fate of our state; and

WHEREAS, Article V of the United States Constitution requires the United States Congress to call a convention for proposing amendments upon application of two-thirds of the legislatures of the several states for the purpose of proposing amendments to the United States

AMERICAN OVERSIGHT

Constitution; now, therefore be it

RESOLVED, That this Senate of the State of Rhode Island and Providence Plantations hereby sees the need for a convention to propose amendments in order to address concerns such as those raised by the decision of the United States Supreme Court in Citizens United v. Federal Election Commission and related cases and events including those occurring long before or afterward or for a substantially similar purpose, and desires that said convention should be so limited; and be it further

RESOLVED, That this Senate hereby respectfully requests that the delegates to said convention be comprised equally of individuals currently elected to state and local office, or be selected by election, in each Congressional district for the purpose of serving as delegates, though all individuals elected or appointed to federal office, now or in the past, be prohibited from serving as delegates to the Convention, and furthermore requests the ability to restrict or expand the power of its delegates within the limits expressed above; and be it further

RESOLVED, That this Senate hereby intends that this be a continuing application considered together with applications calling for a convention passed in the 2013-2014 Vermont legislature as R454, the 2013-2014 California legislature as Resolution Chapter 77, the 2013-2014 Illinois legislature as Senate Joint Resolution No. 42, the 2014-2015 New Jersey legislature Senate concurrent Resolution No. 132, and all other passed, pending, and future applications, the aforementioned concerns of Rhode Island notwithstanding until such time as two-thirds of the several states have applied for a Convention and said Convention is convened by Congress; and be it further

RESOLVED, That the citizenry of the State of Rhode Island, speaking through this Senate, and pursuant to Article V of the United States Constitution, hereby petitions the United States Congress to call a Convention for the purpose of proposing Amendments to the Constitution of the United States of America as soon as two-thirds of the several states have applied for a Convention; and be it further

AMERICAN OVERSIGHT

RESOLVED, That the Secretary of State be and hereby is authorized and directed to transmit duly certified copies of this resolution to the President of the United States; the Vice President of the United States in his capacity as President of the United States Senate and addressed to him at the office he maintains in the United States Capitol; the Speaker of the United States House of Representatives, the Minority Leader of the United States House of Representatives, the President Pro Tempore of the United States Senate, and the Rhode Island Congressional Delegation.

AMERICAN OVERSIGHT

24-00656D-20

A bill to be entitled

An act relating to electric vehicles; amending s. 316.003, F.S.; revising definitions; authorizing the Department of Transportation to adopt rules; amending s. 334.046, F.S.; revising the department's goals relating to mobility; creating s. 339.0802, F.S.; requiring that certain funds be used for specified purposes relating to the Electric Vehicle Infrastructure Grant Program, beginning in specified years; providing for future repeal of the requirement; creating s. 339.286, F.S.; requiring the department to establish the Electric Vehicle Infrastructure Grant Program; providing the purpose of the program; providing for the distribution of grants to certain entities to install electric vehicle charging infrastructure; providing grant requirements; providing requirements for equipment installed using grant funds; providing criteria for the distribution of grants; requiring that the department continually review emerging research, policies, and standards; authorizing the department to develop a model plan for local governments; requiring the department to adopt rules; amending s. 366.94, F.S.; specifying that certain rules adopted by the Department of Agriculture and Consumer Services may not require specific methods of sale for electric vehicle charging equipment used in this state; providing effectives dates.

Be It Enacted by the Legislature of the State of Florida:

AMERICAN OVERSIGHT

Section 1. Subsections (2) and (55) of section 316.003, Florida Statutes, are amended to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

(2) AUTOCYCLE.—A three-wheeled motorcycle that has two wheels in the front and one wheel in the back; is equipped with a roll cage or roll hoops, a seat belt for each occupant, antilock brakes that meet the requirements of Federal Motor Vehicle Safety Standard No. 122, a steering ~~wheel~~ mechanism, and seating that does not require the operator to straddle or sit astride it; and is manufactured in accordance with the applicable federal motorcycle safety standards in 49 C.F.R. part 571 by a manufacturer registered with the National Highway Traffic Safety Administration.

(55) PERSONAL DELIVERY DEVICE.—An electrically powered device that:

(a) Is operated on sidewalks and crosswalks and intended primarily for transporting property;

(b) Has a weight that does not exceed the maximum weight established by Department of Transportation rule ~~Weighs less than 80 pounds, excluding cargo~~;

(c) Has a maximum speed of 10 miles per hour or, if the Department of Transportation establishes by rule a maximum speed, has a speed that does not exceed that maximum; and

(d) Is equipped with technology to allow for operation of the device with or without the active control or monitoring of a

AMERICAN OVERSIGHT

natural person.

A personal delivery device is not considered a vehicle unless expressly defined by law as a vehicle. A mobile carrier is not considered a personal delivery device. The Department of Transportation may adopt rules to implement this subsection.

Section 2. Paragraph (c) of subsection (4) of section 334.046, Florida Statutes, is amended to read:

334.046 Department mission, goals, and objectives.—

(4) At a minimum, the department's goals shall address the following prevailing principles.

(c) *Mobility.*—Ensuring a cost-effective, statewide, interconnected transportation system. Improvement of travel choices to ensure mobility includes planning and establishment of infrastructure for innovative technologies, including electric vehicle charging infrastructure.

Section 3. Effective upon Senate Bill ___ or other similar legislation being enacted in the 2020 Regular Session or an extension thereof and becoming a law, section 339.0802, Florida Statutes, is created to read:

339.0802 Allocation of increased license tax revenues from licensure of electric and hybrid vehicles.—Funds that result from increased revenues to the State Transportation Trust Fund derived under s. 320.08001(2), (3), and (4) must be used as set forth in this section, notwithstanding any other provision of law.

(1) Beginning in the 2020-2021 fiscal year, and annually for 5 years thereafter, all increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

AMERICAN OVERSIGHT

(2) Beginning in the 2025-2026 fiscal year, and annually for 5 years thereafter, half of the increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(3) This section expires on July 1, 2030.

Section 4. Section 339.286, Florida Statutes, is created to read:

339.286 Electric Vehicle Infrastructure Grant Program.—

(1) The department shall establish the Electric Vehicle Infrastructure Grant Program. The purpose of the program is to provide financial assistance to encourage the installation of electric vehicle charging infrastructure.

(2) State agencies, public universities, public transit agencies, ports, airports, and local governments, including local housing authorities and libraries, may apply to the department for grants for the purpose of installing publicly available electric vehicle charging infrastructure on public or private property.

(3) A grant may be awarded for:

(a) Technical assistance for the development and adoption of:

1. A local or regional plan that establishes an electric vehicle charging infrastructure;

2. Any action plans necessary to address any infrastructure gaps; and

3. Steps necessary to complete the infrastructure plan.

A plan must address actions to deploy the necessary infrastructure in high-density housing areas and low- to moderate-income areas.

AMERICAN OVERSIGHT

(b) Assistance with the purchase of related equipment and the costs of installation of that equipment to provide electric vehicle charging. Such equipment must be capable of collecting and reporting data and must use standard connectors, and must be available to the public.~~.~~

(4)(a) An applicant may apply for a grant for both technical assistance and equipment purchase and installation. A grant for technical assistance requires a minimum match of funds from the applicant of 30 percent of the grant award, but such match is not required for an applicant that is located in a fiscally constrained county. A grant for equipment purchase and installation requires a minimum match of funds from the applicant in the amount of 50 percent of the ~~grant award~~total project cost for Level 2 charging infrastructure or~~,~~ 20 percent of the total project cost for direct current fast charging infrastructure~~or 20 percent for an applicant that is located in a fiscally constrained county~~. The matching funds must be from nonstate resources, but may include private funds provided through a partnership with a private entity or in-kind contributions such as the donation of equipment, services, or land or use of land for establishment of the electric vehicle charging infrastructure. Grant funds may not subsidize the cost for the use of electricity. 20 percent of the funds available under this grant program shall be reserved for applicants or projects in fiscally constrained counties.

(b) The department shall maintain a prioritized list of approved grant applications. The prioritized list must include recommended funding levels for each application and, if staged implementation is appropriate, provide funding requirements for

AMERICAN OVERSIGHT

each stage. Grants must be prioritized based on the extent to which the activities of the grant will encourage growth in the use of electric vehicles and increase the availability of charging locations along evacuation routes. A grant for equipment purchase and installation that will immediately and most effectively serve those who currently own or operate electric vehicles may receive priority. Applicants may engage private sector entities to install charging infrastructure on private property in the same county or local jurisdiction as the applicant.

(5) The department shall continually review emerging research, policies, and standards related to electric vehicle infrastructure. Using such information, the department shall publish best practices for the establishment of electric vehicle charging infrastructure, model infrastructure plan development and components, and other significant information for the implementation and use of electric vehicle charging infrastructure. The department may develop a model plan that local governments may use as a guide to establish an electric vehicle charging infrastructure plan.

(6) The department shall adopt rules to administer this section.

Section 5. Section 366.94, Florida Statutes, is amended to read:

366.94 Electric vehicle charging stations.—

(1) The provision of electric vehicle charging to the public by a nonutility is not the retail sale of electricity for the purposes of this chapter. The rates, terms, and conditions

AMERICAN OVERSIGHT

of electric vehicle charging services by a nonutility are not subject to regulation under this chapter. This section does not affect the ability of individuals, businesses, or governmental entities to acquire, install, or use an electric vehicle charger for their own vehicles.

(2) The Department of Agriculture and Consumer Services shall adopt rules to provide definitions, methods of sale, labeling requirements, and price-posting requirements for electric vehicle charging stations to allow for consistency for consumers and the industry. Rules implemented under this subsection may not require specific methods of sale for electric vehicle charging equipment and services provided~~used~~ in this state.

(3)(a) It is unlawful for a person to stop, stand, or park a vehicle that is not capable of using an electrical recharging station within any parking space specifically designated for charging an electric vehicle.

(b) If a law enforcement officer or specialist finds a motor vehicle in violation of this subsection, the officer or specialist shall charge the operator or other person in charge of the vehicle in violation with a noncriminal traffic infraction, punishable as provided in s. 316.008(4) or s. 318.18.

Section 6. Except as otherwise expressly provided in this act, this act shall take effect July 1, 2020.

of electric vehicle charging services by a nonutility are not subject to regulation under this chapter. This section does not affect the ability of individuals, businesses, or governmental entities to acquire, install, or use an electric vehicle charger for their own vehicles.

(2) The Department of Agriculture and Consumer Services shall adopt rules to provide definitions, methods of sale, labeling requirements, and price-posting requirements for electric vehicle charging stations to allow for consistency for consumers and the industry. Rules implemented under this subsection may not require specific methods of sale for electric vehicle charging equipment and services provided~~used~~ in this state.

(3)(a) It is unlawful for a person to stop, stand, or park a vehicle that is not capable of using an electrical recharging station within any parking space specifically designated for charging an electric vehicle.

(b) If a law enforcement officer or specialist finds a motor vehicle in violation of this subsection, the officer or specialist shall charge the operator or other person in charge of the vehicle in violation with a noncriminal traffic infraction, punishable as provided in s. 316.008(4) or s. 318.18.

Section 6. Except as otherwise expressly provided in this act, this act shall take effect July 1, 2020.

Comment or Question:
Hello Senator Brandes,

My name is Samantha Chery, and I'm the political reporter for The Alligator. I'd like to write a story about the proposed elections bill that you filed on Friday. Would you be available this evening for a phone interview? I see the district office and Tallahassee office phone numbers on the website, but what's the best number to reach you?

I look forward to hearing from you.

Subject: Proposed Legislation - Address Appearing on Identification Presented at Polls

Senator Brandes –

As a follow up to our phone conversation last week:

Your draft bill 24-01581-20 (attached) strikes the following language in 101.043(1)(b) – "The address appearing on the identification presented by the elector may not be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence."

Supervisors of Elections support this change because it allows poll workers to ask the voter if the address on their ID is current.

- If it is, the voter is in the correct voting precinct and will receive the correct ballot.
- If the address is not current but the voter lives in the precinct, the voter may file an address change and vote a regular ballot.
- If the address is not current and the voter does not live in the precinct, the voter will be given directions to the correct precinct polling place where they can file an address change and receive the correct ballot.

Supervisors of Elections support this change because it gives us the ability to ensure voters are casting ballots in their home precincts, as required by F.S. 101.045(1) – "A person is not permitted to vote in any election precinct or district other than the one in which the person has his or her legal residence…"

Poll workers only use picture and signature identification to confirm the voter's identity, as provided in F.S. 101.043 (1)(a) – "…for the purpose of identifying the elector at the polls…"

Identification is not used to determine whether the voter is eligible to vote.

Supervisors feel strongly that confirming voters' residential addresses to ensure they are given correct ballots is essential to the integrity of the election process.

If you have any additional questions, please contact me at (727) 424-0088.

Respectfully,

Deb

Subject: Legislation - Request for Input (Senator Brandes)

Vanessa –

I support the attached bill and appreciate Senator Brandes providing the opportunity to review the language.

Specifically, I want to thank Senator Brandes for proposing additional time to conduct the First Logic and Accuracy Test (line 43) from 10 days to 25 days. This will provide us with additional time to conduct pre-election activities, e.g., program voting equipment. The proposed language also helps to correct a technical issue created in SB 7066. The language the Senator is proposing allows Canvassing Boards to take full advantage of being able to canvass mail ballots 22 days prior to the election.

Also attached are the Florida Supervisors of Elections (FSE) legislative priorities for further consideration.

If you have any questions, my email address is dclark@votepinellas.com; this can be used for all direct correspondence rather than sending to election@votepinellas.com.

Have a safe and happy holiday season.

Sincerely,

Deborah Clark, CERA

AMERICAN OVERSIGHT

24-01581-20

A bill to be entitled

An act relating to elections; amending s. 101.043, F.S.; deleting a provision that prohibits the use of an address appearing on identification presented by an elector at the polls as a basis to confirm or otherwise challenge an elector's legal residence; amending s. 101.5612, F.S.; revising the timeframes for conducting public preelection testing of automatic tabulating equipment; amending s. 101.5614, F.S.; removing the requirement that duplicate ballots be made of vote-by-mail ballots containing overvoted races; amending s. 101.6103, F.S.; revising the timeframe in which the supervisor of elections must mail ballots in elections conducted under the Mail Ballot Election Act; amending s. 103.091, F.S.; expanding the timeframe within which candidates for political party executive committees may qualify for office; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (b) of subsection (1) of section 101.043, Florida Statutes, is amended to read:

101.043 Identification required at polls.—

(1)

(b) If the picture identification does not contain the signature of the elector, an additional identification that provides the elector's signature shall be required. ~~The address appearing on the identification presented by the elector may not~~

AMERICAN OVERSIGHT

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

~~be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence.~~ The elector shall sign his or her name in the space provided on the precinct register or on an electronic device provided for recording the elector's signature. The clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided on the precinct register or on an electronic device provided for that purpose and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.

Section 2. Subsection (2) of section 101.5612, Florida Statutes, is amended to read:

101.5612 Testing of tabulating equipment.—

(2) On any day not more than 25 ~~10~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, the supervisor of elections shall have the automatic tabulating equipment publicly tested to ascertain that the equipment will correctly count the votes cast for all offices and on all measures. If the ballots to be used at the polling place on election day are not available at the time of the testing, the supervisor may conduct an additional test not more than 10 days before election day. Public notice of the time and place of the test shall be given at least 48 hours prior thereto by publication on the supervisor of elections' website and once in one or more newspapers of general circulation in the county or, if there is no newspaper of general circulation in the county, by posting the notice in at least four conspicuous places in the county. The supervisor or the municipal elections official may, at the time of qualifying, give written notice of the time and

AMERICAN OVERSIGHT

location of the public preelection test to each candidate qualifying with that office and obtain a signed receipt that the notice has been given. The Department of State shall give written notice to each statewide candidate at the time of qualifying, or immediately at the end of qualifying, that the voting equipment will be tested and advise each candidate to contact the county supervisor of elections as to the time and location of the public preelection test. The supervisor or the municipal elections official shall, at least 30 ~~15~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, send written notice by certified mail to the county party chair of each political party and to all candidates for other than statewide office whose names appear on the ballot in the county and who did not receive written notification from the supervisor or municipal elections official at the time of qualifying, stating the time and location of the public preelection test of the automatic tabulating equipment. The canvassing board shall convene, and each member of the canvassing board shall certify to the accuracy of the test. For the test, the canvassing board may designate one member to represent it. The test shall be open to representatives of the political parties, the press, and the public. Each political party may designate one person with expertise in the computer field who shall be allowed in the central counting room when all tests are being conducted and when the official votes are being counted. The designee shall not interfere with the normal operation of the canvassing board.

Section 3. Paragraph (a) of subsection (4) of section 101.5614, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

101.5614 Canvass of returns.—

(4)(a) If any vote-by-mail ballot is physically damaged so that it cannot properly be counted by the automatic tabulating equipment, a true duplicate copy shall be made of the damaged ballot in the presence of witnesses and substituted for the damaged ballot. ~~Likewise,~~ A duplicate ballot must also ~~shall~~ be made of ~~a vote-by-mail ballot containing an overvoted race or~~ a marked vote-by-mail ballot in which every race is undervoted, including ~~which shall include~~ all valid votes as determined by the canvassing board based on rules adopted by the division pursuant to s. 102.166(4). Upon request, a physically present candidate, a political party official, a political committee official, or an authorized designee thereof, must be allowed to observe the duplication of ballots. All duplicate ballots shall be clearly labeled "duplicate," bear a serial number which shall be recorded on the defective ballot, and be counted in lieu of the defective ballot. After a ballot has been duplicated, the defective ballot shall be placed in an envelope provided for that purpose, and the duplicate ballot shall be tallied with the other ballots for that precinct.

Section 4. Subsection (1) of section 101.6103, Florida Statutes, is amended to read:

101.6103 Mail ballot election procedure.—

(1) Except as otherwise provided in subsection (7), the supervisor of elections shall mail all official ballots with a secrecy envelope, a return mailing envelope, and instructions sufficient to describe the voting process to each elector entitled to vote in the election not sooner than the 40th ~~20th~~ day before the election and not later than the 10th day before

AMERICAN OVERSIGHT

the date of the election. All such ballots shall be mailed by first-class mail. Ballots shall be addressed to each elector at the address appearing in the registration records and placed in an envelope which is prominently marked "Do Not Forward."

Section 5. Subsection (4) of section 103.091, Florida Statutes, is amended to read:

103.091 Political parties.—

(4) Any political party other than a minor political party may by rule provide for the membership of its state or county executive committee to be elected for 4-year terms at the primary election in each year a presidential election is held. The terms begin ~~shall commence~~ on the first day of the month following each presidential general election,~~;~~ but the names of candidates for political party offices may ~~shall~~ not be placed on the ballot at any other election. The results of such election shall be determined by a plurality of the votes cast. In such event, electors seeking to qualify for such office shall do so with the Department of State or supervisor of elections no ~~not earlier than noon of the 71st day, or~~ later than noon of the 67th day~~,~~ preceding the primary election. The outgoing chair of each county executive committee shall, within 30 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers. The chair of each state executive committee shall, within 60 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers.

Section 6. This act shall take effect July 1, 2020.

Sen. Brandes,

Thank you for taking my call and agreeing to removing the language of concern to our municipalities. Per our discussion, listed below is the language we would like removed from SB 1148:

Lines 211 – 217:

(b) Following notice and a public hearing, a municipality, county, or agency of the state having jurisdiction over a bicycle or multiuse path may restrict or prohibit the operation of an electric bicycle on the path if the municipality, county, or agency finds that such a restriction is necessary in the interest of public safety or to comply with other laws or legal obligations.

As always, I look forward to our continue work on Transportation issues.

Jeff

Good afternoon,

My name is Zachariah Chou and I am writing a freelance op-ed for The Guardian. I wanted to ask you about your recently filed bill.

Concerning the striking out of "The address appearing on the identification presented by the elector may not be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence," I wanted to ask what is the intention behind this change and if the addresses on the IDs will need to match where people are registered.

Additionally, in what instances would a person's address need to be confirmed or challenged?

Best,
Zachariah Chou

AMERICAN OVERSIGHT

Feedback for Senator Brandes' Adult-Use Bill

We are grateful for Sen. Brandes' leadership on marijuana policy and his receptivity to suggestions. Below is sample language for some of the areas where we recommended additions or tweaks to the draft bill, along with two additional general recommendations.

Clarifying that Adult-Use Only Businesses Are Allowed (new recommendation)

- We understand the intent is to allow adult-use *only* growers, processors, and retailers, not just MMTCs. However, the bill refers only to MMTCs when it refers to cannabis businesses. We recommend clarifying the language throughout to ensure there are clear legal protections, regulatory requirements, and licensing procedures for adult-use only businesses.

  For example:
  - Ø lines 445-448 only reference employee identification cards for MMTCs.
  - Ø lines 450-471 only reference MMTCs in reference to seed-to-sale tracking.
  - Ø lines 472-1121, 1174-1375 refer to registration procedures, inspections, and rules for MMTCs only.
  - Ø The legal protections in lines 1487-1496 and 1505-1511 only apply to MMTCs.
  - Ø lines 439-440 clarify that MMTCs are medical marijuana treatment centers, providing "medical marijuana treatment centers (MMTCs)."

Ensuring Free Market Licensing (new recommendation)

- We suggest including more specific language to ensure the licensing is truly free-market, and that all applicants that meet the requirements — and are allowed locally — are issued licenses by a date certain (such as within 90 days of submitting their application).

  Possible language:

  (xx) Within 90 days after receiving an application or renewal application, the department shall issue a registration to the [adult-use business] applicant, unless the department finds:
  (i) the applicant did not submit the materials required by section [xx], or
  (ii) the applicant is not in compliance with regulations enacted pursuant to [xx], or
  (iii) the department is notified by the relevant locality that the applicant is not in compliance with ordinances and regulations made pursuant to [xx].

Defining a Possession Limit

- Rather than allowing a "70-day supply" for adults, there should be a clear, specific possession limit for non-flower marijuana (lines 1542-1543)

AMERICAN OVERSIGHT

- Ten grams of concentrates and infused products up to 2,000 mg THC are about the equivalent of 2.5 ounces of flower.
- The weight/ THC-based limit should also be used for dispensing to adults, rather than a 70-day supply. (lines 860-868)

Since the limit will likely be referenced in many places, it is easiest to make it a defined term.

Suggested language:

"Possession limit" means:
(i) 2.5 ounces of marijuana, not including concentrated marijuana and marijuana products;
(ii) 10 grams of concentrated marijuana; and
(iii) Marijuana products containing no more than 2,000 milligrams of THC.

"Marijuana products" means products that are comprised of marijuana and other ingredients and are intended for use or consumption, including but not limited to, edible products, ointments, and tinctures.

Authorizing — and Regulating — Paraphernalia

- We recommend allowing adults 21+ to possess paraphernalia (for storage, not just delivery).
- In addition, the manufacture and sale of paraphernalia by businesses other than MMTCs should be explicitly "authorized."
  - Otherwise, cannabis businesses buying equipment to grow and store marijuana from other vendors would likely be illegal if the vendor has reason to know what it's intended for, which would be pretty obvious.

If paraphernalia is *authorized* under state law, it's federally legal, too. 21 USC 863(f)

It may also be a good idea to include language directing the health department to regulate paraphernalia used for inhalation, in light of the recent lung illnesses.

Suggested language:

(a) Notwithstanding any other provision of law, except as provided in this section, it is not unlawful and shall not be an offense under Florida law or the law of any political subdivision of Florida or be a basis for seizure or forfeiture of assets under Florida law for persons 21 years of age or older to manufacture, possess, or purchase marijuana paraphernalia, or to distribute or sell marijuana paraphernalia to a person who is 21 years of age or older.
(b) Except as provided in this section, a person who is 21 years of age or older is authorized to manufacture, possess, and purchase marijuana paraphernalia,

AMERICAN OVERSIGHT

and to distribute or sell marijuana paraphernalia to a person who is 21 years of age or older.
(c) This section is intended to meet the requirements of subsection (f) of Section 863 of Title 21 of the United States Code (21 U.S.C. Sec. 863(f)) by authorizing, under state law, any person in compliance with this section to manufacture, possess, or distribute marijuana paraphernalia.
(d) This section does not allow any person to manufacture, distribute, or sell marijuana paraphernalia that violates reasonable regulations enacted by the department.

[and the department-developed regulations will include]
(xx) Reasonable health and safety restrictions on marijuana paraphernalia that may be manufactured or sold in Florida. The department may prohibit vaporizers that are reasonably believed to pose hazards, but may not completely prohibit or unreasonably restrict the manufacture or sale of vaporization devices.

Sharing Marijuana Among Adults, Clarifying Legal Protections

- The bill should allow sharing with other adults of the personal-use amounts. Adults use marijuana socially. Adults who live together, including spouses, typically share cannabis products, rather than buying separate supplies, just as they do with all kinds of other consumable items (wine, food, etc.).

The below suggestion would also ensure that localities cannot criminalize cannabis possession and would otherwise clarify legal protections for adults.

Suggested language to replace 1535-1550:

(a) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, except as otherwise provided in this chapter, the following acts are not unlawful and shall not be a criminal or civil offense under Florida law or the law of any political subdivision of Florida or be a basis for seizure or forfeiture of assets under Florida law for persons 21 years of age or older:
(1) Possessing, consuming, using, purchasing, or transporting an amount of marijuana that does not exceed the possession limit;
(2) Possessing, purchasing, manufacturing, or transporting marijuana paraphernalia, or selling it to a person who is 21 years of age or older;
(3) Transferring an amount of marijuana that does not exceed the possession limit to a person who is 21 years of age or older without remuneration. For purposes of this section, a transfer is for remuneration if marijuana is given away contemporaneously with another transaction between the same parties, if a gift of marijuana is offered or advertised in conjunction with an offer for sale of goods or services, or if the gift of marijuana is contingent upon a separate transaction for goods or services.

AMERICAN OVERSIGHT

(b) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, except as otherwise provided in this chapter, the following acts, when performed by a licensed MMTC ***[or other adult-use licensee?]****, or a person 21 years of age or older who is acting in his or her capacity as an owner, employee, or agent of a licensed MMTC* ***[or other adult-use licensee?]****, are not unlawful and shall not be an offense under [State] law or be a basis for seizure or forfeiture of assets under [State] law: Engaging in any activities involving marijuana or marijuana products if the activities are within the scope of activities the MMTC* ***[or other adult-use licensee?] is permitted to engage in pursuant to a facility permit****.*
(c) Nothing in this section prevents the imposition of penalties for violating this chapter or rules adopted by the department or localities pursuant to this chapter.

Protections for Property Owners and Renters

- The bill should provide that landlords may not prevent tenants from possessing or using marijuana via non-smoked means. (lines 1549-1550)

Rather than "This section does not limit the ability of a private property owner to restrict the use of marijuana on his or her private property," this language could be used:

(a) Except as provided in this section, the provisions of this chapter do not require any person, corporation, or any other entity that occupies, owns, or controls a property to allow the consumption, cultivation, display, sale, or transfer of marijuana on or in that property.
(b) In the case of the rental of a residential dwelling, a landlord may not prohibit the possession of marijuana or the consumption of marijuana by non-smoked means unless:
(1) The tenant is a roomer who is not leasing the entire residential dwelling;
(2) The residence is incidental to detention or the provision of medical, geriatric, educational, counseling, religious, or similar service;
(3) The residence is a transitional housing facility; or
(4) Failing to prohibit marijuana possession or consumption would violate federal law or regulations or cause the landlord to lose a monetary or licensing-related benefit under federal law or regulations.

Home Cultivation Study

- The bill should create a formal study on home cultivation to report back with findings and recommendations by a certain date.

Possible language:

The department shall commission or conduct a study to determine if adults who are 21 years of age or older should be allowed to cultivate marijuana for personal

AMERICAN OVERSIGHT

use, and to determine what restrictions should apply to home cultivation. The study shall include consideration of:
(a) reasonable precautions to ensure that the plants are secure from unauthorized access or access by any individual under 21 years of age,
(b) the location where such marijuana may be grown, and
(c) any other related public safety or regulatory issues the department deems necessary.
Not later than January 1, 2021, the department shall report the conclusions of the study to the [xx committees of the] legislature.

***Note**: We are checking with an ally regarding suggestions to this language and my circle back with a modified recommendation.*

Social Equity and Diversity

- The bill should include provisions to foster equity and diversity in the industry.

  At a minimum, it should include language such as:

  [Regulators must develop …] Procedures and policies to promote and encourage full participation in the regulated marijuana industry by people from communities that have previously been disproportionately harmed by marijuana prohibition and enforcement and to positively impact those communities.

  — and —

  Requiring yearly reporting by each [MMTC and other cannabis business] to the department regarding the diversity of its workforce, managerial positions, and ownership, the overall percentages of which the department shall make available to the public.

  Other worthwhile possibilities include:
  - Providing technical assistance for social equity applicants (and defining such applicants, such as those from communities with disproportionate marijuana arrests or those from communities with high poverty and high unemployment)
  - Providing for low-interest loans for social equity applicants, which can be funded by marijuana tax revenue
  - Providing a head start for applications filed by social equity applicants
  - Requiring licensees to establish and adhere to policies to encourage diversity in the workplaces

Consumer Privacy

- The bill should ensure regulators do not require information to be collected on adult-use consumers to protect privacy and in light of federal law. It should also protect consumers from improper data disclosure from businesses.

AMERICAN OVERSIGHT

Suggested language:

(xx) In order to ensure that individual privacy is protected, the department shall not require a consumer to provide a [MMTC or other licensee] with personal information other than government-issued identification to determine the consumer's age, and a [MMTC or other licensee] shall not be required to acquire and record personal information about consumers.

— and —

[around line 1336, listing conduct an MMTC can be fined for]

5. Improperly disclosing information about customers, including sharing names, addresses, and contact information of customers without their permission.

Preventing Medical Marijuana Shortages

- The bill should include language to avoid medical cannabis shortages and price hikes for patients during a transition period.

Sample language:

Any MMTCs applying to the Department of Business and Professional Regulation [for a license to serve adult-use consumers] must submit a plan explaining how the MMTC intends to continue serving qualified patients without increasing prices or reducing product availability.
[Regulators must establish]
(ii) procedures to suspend any MMTC licensed as an [adult-use business] that has failed to maintain reasonable prices and product availability for qualified patients during the first two years after the MMTC was issued [an adult-use license].

It may also be a good idea to allow regulators to take other actions if there are widespread issues with price hikes and shortages of medical cannabis. For example, if such issues arise, they could be allowed to impose smaller purchase limits for non-patients or even suspend adult-use sales.

Anti-Discrimination Protections

- We recommend including non-discrimination protections so cannabis consumers aren't denied medical care, child custody, and/or employment. The bill should include exceptions for if there's a clinical reason for denying the medical care, a parent endangers a child, an employee is impaired at work, or federal law or contracts require the action to be taken.

AMERICAN OVERSIGHT

Suggested language:

(a) (1) Except as provided in this section, an employer may not discipline, refuse to hire, or take adverse action against an employee or prospective employee because the person uses or used marijuana outside of work.
(2) Except as provided in this section, an employer may not discipline, refuse to hire, or take adverse action against an employee or prospective employee due to the presence of metabolites or components of marijuana in a person's bodily fluids.
(3) Nothing in this section prohibits an employer from disciplining, discharging, or otherwise taking an adverse employment action against an employee for working while under the influence of marijuana or for possessing or using marijuana during work hours or at a place of employment.
(b) (1) Medical care, including an organ or tissue transplant, may not be denied based on the status of marijuana under federal law.
(2) The use of marijuana or presence of metabolites or components of marijuana in a person's bodily fluids may only be considered with respect to the possible denial of medical care, including an organ transplant, in terms of evidence-based clinical criteria.
(c) A person shall not be denied custody of or visitation rights or parenting time with a minor solely due to the use of marijuana, or other actions allowed under this chapter, and there shall be no presumption of neglect or child endangerment unless the person's behavior is such that it creates an unreasonable danger to the safety of the minor as established by clear and convincing evidence.
(d) The rights provided by this section do not apply to the extent that they conflict with an employer or other person's obligations under federal law or regulations, or to the extent that they would disqualify an employer or other person from a monetary or licensing-related benefit under federal law or regulations.

Prohibiting Host Community Agreements

- In Massachusetts, localities negotiate specific "host community agreements" with cannabis businesses, which involve financial benefits that the individual business agrees to. This has caused a lot of controversy and an air of impropriety and unfair favoritism. A mayor has been indicted for bribery in relation to local licensing.

Possible language (line 1109):

Municipalities may not require, request, or accept financial contributions or similar benefits from marijuana businesses other than generally applicable taxes and fees.

Ensuring Appropriate Names/Logos

AMERICAN OVERSIGHT

- The bill provides "An MMTC's trade name and logo may not contain wording or images … which promote recreational use of marijuana." We recommend revising this to be more specific regarding what is prohibited. The current language is vague and almost any name or logo could arguably be prohibited since the signs will all be for stores that sell adult-use marijuana. (1185-1186).

  Suggested language:

  [The department shall develop:]

  - *requirements that the [business's] trade name, logo, advertising, and signage must be tasteful and that it may not appeal to minors, contain cartoon-like figures, attempts at humor, or marijuana-related slang; and*
  - *requirements that the [business] must submit any logo or trade name for review to regulators in accordance with regulations.*

Enforceability of Contracts

- The bill should provide that it's the policy of Florida that contracts related to marijuana are enforceable (such as a contract between a landlord and a cannabis business, or between two cannabis businesses). Otherwise, courts may rule that entire contracts are void and contrary to public policy, due to federal law.

Suggested language:

It is the public policy of this state that contracts related to the operation of a MMTC [or other marijuana establishment] should be enforceable. It is the public policy of this state that no contract entered into by a MMTC [or other marijuana establishment] or its employees or agents, or by those who allow property to be used by an establishment, its employees, or its agents, shall be unenforceable on the basis that cultivating, obtaining, manufacturing, distributing, dispensing, transporting, selling, possessing, or using marijuana is prohibited by federal law.

Professional Licensing

- The bill should provide that CPAs, lawyers, and other professionals who provide services to marijuana businesses and applicants cannot be subject to professional discipline on the basis that marijuana is illegal under federal law.

Suggested language:

(a) A holder of a professional or occupational license may not be subject to professional discipline for providing advice or services related to a MMTC [or other marijuana establishment] or applications to operate marijuana establishments on the basis that marijuana is illegal under federal law.
(b) An applicant for a professional or occupational license may not be denied a license based on previous employment related to MMTCs [or other marijuana establishments] in accordance with state law.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

Bills Still Alive

SJR 142 Abolishing the Constitution Revision Commission

This bill abolishes the Constitution Revision Commission. This bill proposes amendments to the State Constitution to abolish the Constitution Revision Commission.

SJR 146: Homestead Property Tax Assessments/Increased Portability Period

This bill proposes an amendment to Section 4 of Article VII and the creation of a new section in 4 Article XII of the State Constitution to increase the period of time during which the accrued benefit from specified limitations on homestead property tax assessments may be transferred from a prior homestead to a new homestead.

CS/SB 148: Limitations on Homestead Assessments

This bill revises the timeframe during which the accrued benefit from specified limitations on homestead property tax assessments may be transferred from a prior homestead to a new homestead. This bill also revises the timeframe during which an owner of homestead property significantly damaged or destroyed by a named tropical storm or hurricane must establish a new homestead to make a certain election.

SB 150: Sanitary Sewer Laterals

This bill encourages counties and municipalities to establish a sanitary sewer lateral inspection program. This bill also requires a seller of real property to disclose any known defects in the property's sanitary sewer lateral.

SB 152: Dental Therapy

This bill authorizes Medicaid to reimburse for dental services provided in a mobile dental unit that is owned by, operated by, or contracted with a health access setting or another similar setting or program. This bill also requires the chair of the Board of Dentistry to appoint a Council on Dental Therapy effective after a specified timeframe; requiring the board to adopt certain rules relating to dental therapists. Furthermore, the bill provides application requirements and examination and licensure qualifications for dental therapists.

SB 468: Mandatory Sentences

This bill authorizes a court to impose a sentence other than a mandatory minimum term of imprisonment and mandatory fine for a person convicted of trafficking if the court makes certain findings on the record. The court must find on the record that the offender did not engage in a continuing criminal enterprise, did not use or threaten violence or use a weapon during the commission of the offense, and did not cause death or serious bodily injury.

AMERICAN OVERSIGHT

CS/SB 470: Searches of Cellular Phones and Other Electronic Devices

This bill expands the grounds for issuance of a search warrant to include content held within a cellular phone, portable electronic communication device, or microphone-enabled household device when such content constitutes evidence relevant to proving that a felony has been committed. This bill adopts the constitutional protection against unreasonable interception of private communications by any means for purposes of obtaining a search warrant. This bill also prohibits the use of certain communication content in any trial, hearing or other proceeding which was obtained without a specified warrant.

SB 482: Beverage Law

This bill repeals provisions relating to limitations on the size of individual wine containers and individual cider containers. This bill revises provisions that authorize a restaurant to allow patrons to remove partially consumed bottles of wine from the restaurant for off-premises consumption. This bill also revises the requirements for the sale of branded products by a licensed craft distillery to consumers. In addition, the bill authorizes a craft distillery to transfer specified quantities of specified distilled spirits from certain locations to its souvenir gift shop.

SB 550 Sentencing

This bill revises the criteria under which certain offenders sentenced after a specified date may be sentenced to a nonstate prison sanction under a prison diversion program. The bill amends some of the criteria for prison diversion eligibility, which will be applicable to offenders sentenced on or after October 1, 2020.

CS/SB 552 Sentencing

This bill revises the threshold of total sentence points below which a court must sentence nonviolent felony offenders who commit certain offenses and are sentenced on or after a specified date to a nonstate prison sanction. This bill increase total sentence points applicable to prison diversion under this subsection from 22 points or fewer to 44 points or fewer.

CS/SB 554 Sentencing

The bill revises the mitigating circumstances under which a departure from the lowest permissible sentence is reasonably justified. The bill also removes language that restricts mitigation based upon substance abuse or addiction, including intoxication at the time of the offense. The bill also removes language that restricts mitigation based upon substance abuse or addiction, including intoxication at the time of the offense.

CS/SB 556: Inmate Conditional Medical Release

This bill establishes the conditional medical release program within the Department of Corrections. This bill requires any inmate who meets certain criteria to be considered for

AMERICAN OVERSIGHT

conditional medical release; providing for victim notification in certain circumstances. This bill provides that an inmate who is approved for conditional medical release must be released from the department in a reasonable amount of time. This bill provides that a medical release remains in the care, custody, supervision, and control of the department and is eligible to earn or lose gain-time.

SB 560: Sentencing

This bill renames the Criminal Punishment Code as the Public Safety Code. The bill also revises the primary purpose of sentencing under the Public Safety Code from punishing an offender to public safety.

CS/SB 574: Conditional Aging Inmate Release

The bill establishes the conditional aging inmate release program within the Department of Corrections. The bill requires that an inmate who meets certain criteria be considered for conditional aging inmate release. The bill provides victim notification requirements under certain circumstances. The bill also provides that an inmate who is approved for conditional aging inmate release must be released from the department's custody within a reasonable amount of time. The bill prohibits an aging release or his or her community-based housing from being counted in the prison system population and the prison capacity figures, respectively.

SB 760: Independent Special Fire Control Districts

This bill requires an independent special fire control district to have, and authorizing the board of such district to exercise, specified powers and duties.

SB 790: Clerks of the Circuit Court

This bill specifies that certain revenues from service charges collected by the clerk for remittance to the Department of Revenue include only revenues for court-related functions. This bill provides for revenues for county operations to be retained by the clerk. This bill revises the distribution of revenue from filing fees from the institution of certain appellate proceedings. This bill revises retroactive application regarding the collection of revenue for court-related functions for remittance to the department.

CS/SB 914: Contingency Risk Multipliers

Providing that, for certain attorney fees awarded for claims arising under property insurance policies, a strong presumption is created that a lodestar fee is sufficient and reasonable; providing that such presumption may be rebutted only under certain circumstances.

SB 918: Civic Education

This bill requires the Commissioner of Education to develop minimum criteria for a nonpartisan civic literacy practicum for high school students, beginning with a specified school year. This bill authorizes students to apply the hours they devote to practicum

AMERICAN OVERSIGHT

activities to certain community service requirements. This bill requires the State Board of Education to designate certain high schools as Freedom Schools, based on criteria the board establishes relating to students' civic learning and civic engagement.

SB 924: Civil Actions Against Insurers

This bill provides that, in third-party bad faith actions against insurers, insureds and claimants have the burden to prove that an insurer acted in reckless disregard for insured rights which resulted in damage to the insured or the claimant. This bill provides that insured or claimant actions or inactions are relevant in bad faith actions; providing that an insurer is not liable if certain conditions are met; providing that an insurer is not liable beyond available policy limits as to certain competing third-party claims if it files an interpleader action within a certain timeframe.

SB 1116: Trust Funds/State-Operated Institutions Inmate Welfare Trust Fund/Department of Corrections

This bill creates the State-Operated Institutions Inmate Welfare Trust Fund within the Department of Corrections. This bill provides the purpose of the trust fund and provides for future review and termination or re-creation of the trust fund.

CS/SB 1118: Inmate Welfare Trust Funds

This requires that specified proceeds and funds be deposited into the State-Operated Institutions Inmate Welfare Trust Fund. This bill provides that the trust fund is a trust held by the Department of Corrections for the benefit and welfare of certain inmates. This bill requires that funds of the trust fund be used exclusively for specified purposes at correctional facilities operated by the department

SB 1144: Department of Juvenile Justice

This bill revises the list of programs within the department. This bill repeals a provision relating to shared county and state responsibility for juvenile detention. This bill deletes a provision requiring each county that is not a fiscally constrained county to pay its annual percentage share of the total shared detention costs. This bill requires the Department of Juvenile Justice to calculate and provide to each county that is not a fiscally constrained county and that does not provide its own detention care for juveniles its annual percentage share.

CS/SB 1146: Special Risk Class of the Florida Retirement System

This bill adds juvenile justice detention officers I and II and juvenile justice detention officer supervisors employed by the Department of Juvenile Justice who meet certain criteria to the class.

SB 1148: Electric Bicycles

This bill revises definitions relating to the Florida Uniform Traffic Control Law. The bill also requires the driver of a vehicle overtaking an electric bicycle to pass the electric

AMERICAN OVERSIGHT

bicycle at a certain distance. The bill also expands exceptions to a prohibition on persons driving certain vehicles on sidewalks and bicycle paths. Furthermore, the bill provides electric bicycle regulations. This bill requires electric bicycles to comply with specified provisions of law. This bill authorizes operators to ride electric bicycles where bicycles are allowed.

SB 1230: Electric Vehicles

This bill authorizes the Department of Transportation to adopt rules. This bill requires that certain funds be used for specified purposes relating to the Electric Vehicle Infrastructure Grant Program, beginning in specified years. This bill requires the department to establish the Electric Vehicle Infrastructure Grant Program. The bill also provides for the distribution of grants to certain entities to install electric vehicle charging infrastructure and provides grant requirements.

SB 1304: Sentencing

This bill creates conditional sentences for substance use and mental health offenders. This bill provides minimum sentencing requirements and specifies duties of the Department of Corrections. The bill also requires the department to provide written notice to specified parties upon the offender's admission into an in-prison treatment program. This bill also requires that an offender be transitioned to probation upon the completion of an in-prison program.

SB 1308: Criminal Justice

This bill authorizes the resentencing and release of certain persons who are eligible for sentence review under specified provisions. This bill precludes eligibility for a sentence review for young adult offenders who previously committed, or conspired to commit, specified offenses. This bill requires the Department of Corrections to notify young adult offenders in writing of their eligibility for sentence review within certain timeframes. This bill requires the department to provide inmates with certain information upon their release.

SB 1346: Fees/Electric Vehicles

This bill creates an additional fee for electric vehicles. The bill creates a license tax and an additional fee for plug-in hybrid electric vehicles. The bill also requires, on specified dates, the Department of Highway Safety and Motor Vehicles to increase the additional fees, subject to certain requirements. The bill provides that certain vehicles are exempt from specified fees.

SB 1352: Transportation Companies

This bill defines the term "transportation network company digital advertising device". This bill deletes for-hire vehicles from the list of vehicles that are not considered transportation network company (TNC) carriers or are not exempt from certain registration. This bill authorizes TNC drivers or their designees to contract with a

AMERICAN OVERSIGHT

company for the installment of TNC digital advertising devices. The bill also requires companies operating such devices to allocate a specified percentage of advertisement inventory to certain organizations.

SB 1354: Statewide Voter Registration Application

This bill revises requirements for the uniform statewide voter registration application and the acceptance of such applications. This bill deletes an exemption from public records requirements for information related to a voter registration applicant's or voter's prior felony conviction and his or her restoration of voting rights to conform to changes made by the act.

SB 1372: Elections

This bill deletes a provision that prohibits the use of an address appearing on identification presented by an elector at the polls as a basis to confirm or otherwise challenge an elector's legal residence. This bill revises the timeframes for conducting public pre-election testing of automatic tabulating equipment. The bill removes the requirement that duplicate ballots be made of vote-by-mail ballots containing overvoted races. The bill also revises the timeframe in which the supervisor of elections must mail ballots in elections conducted under the Mail Ballot Election Act.

SB 1504: Sentencing

This bill requires certain persons convicted of driving while license suspended, revoked, canceled, or disqualified committed before a specified date to be sentenced in a specified manner in accordance with the amendments in chapter 2019-167, Laws of Florida. This bill requires resentencing for persons who committed such violations before a specified date and are serving terms of imprisonment. This bill provides that persons who meet specified criteria are eligible to petition a court to expunge a criminal history record for convictions of driving while license suspended, revoked, canceled, or disqualified.

SB 1506: Public Records/Expunction of Specified Convictions

This bill provides a public records exemption to include the expunction of specified convictions of certain persons convicted of driving while license suspended, revoked, canceled, or disqualified. The bill provides for legislative review and repeal of the exemption. This bill provides a statement of public necessity.

CS/SB 1510: Jurisdiction of Courts

This bill limits the appellate jurisdiction of the circuit courts to appeals from final administrative orders of local code enforcement boards and other reviews and appeals expressly provided by law. This bill authorizes a county court to certify a question to a district court of appeal in a final judgment that is appealable to a circuit court. The bill authorizes a district court of appeal to review certain questions certified by a county court.

AMERICAN OVERSIGHT

SB 1708: Inmate Reports

This bill revises the information the Department of Corrections is required to publish on its website and update quarterly to include information from each facility regarding health services and conditions, the use of force, reports of abuse, disciplinary reports, the death of inmates, and statistics related to specified officer classes.

SB 1716: Sentencing

This bill revises the required sentencing structure for prison release reoffenders upon proof from a state attorney which establishes that a defendant is a prison release reoffender. This bill applies the revised sentencing structure to certain persons under certain circumstances. The bill provides resentencing requirements. The bill also deletes a provision that requires a state attorney to explain a sentencing deviation in writing under certain circumstances.

CS/SB 1718: Public Meetings and Records/Conditional Aging Inmate Release Program

This bill exempts from public meetings requirements the protected health information of specified inmates being considered for the conditional aging inmate release programs. This bill exempts from public records requirements certain records used by the reviewing panel to make a determination of the appropriateness of conditional aging inmate release and the recordings of closed panel review hearings. The bill provides for legislative review and repeal of the exemption; providing a statement of public necessity.

CS/SB 1728: Public Meetings and Records/Conditional Medical Release Program

This bill exempts from public meetings requirements the protected health information of specified inmates being considered for the conditional medical release program. The bill also exempts from public records requirements certain records used by the reviewing panel to make a determination of the appropriateness of conditional medical release and the recordings of closed panel review hearings. The bill provides for legislative review and repeal of the exemptions. The bill provides a statement of public necessity.

SB 1738: Motor Vehicle Dealers

This bill revises the definition of the term “rental company” to include motor vehicle dealers without limitation and their leasing and rental affiliates for the purpose of minimum insurance coverage requirements. This bill provides that motor vehicle dealers and their affiliates are immune to causes of action and not vicariously liable for harm to persons or property under certain circumstances.

SB 1826: Land Surveyors and Mappers

This bill deletes certain education requirements for an applicant to take the licensure examination to practice as a surveyor or mapper or to be qualified as a surveyor or mapper intern. This bill revises licensure by endorsement requirements. This bill revises the required continuing education hours for licensed surveyors or mappers.

AMERICAN OVERSIGHT

SB 1860: Availability of Marijuana for Adult Use

This bill revises the sales tax exemption for the sale of marijuana and marijuana delivery devices to only include sales to qualified patients or caregivers. This bill revises provisions related to the licensure and functions of medical marijuana treatment centers (MMTCs). The bill also specifies application requirements for MMTCs to obtain cultivation licenses and processing licenses. The bill authorizes MMTCs licensed to cultivate or process marijuana to use contractors to assist with the cultivation and processing of marijuana under certain conditions.

SB 1862: Public Records/Criminal History Records and Related Information

This bill specifies requirements for certain agencies in the disposition of expunged criminal history records; providing an exemption from public records requirements for certain expunged criminal history records and related information of persons who possessed 4 ounces or less of cannabis, with exceptions. The bill provides for future review and repeal of the exemption. The bill provides a statement of public necessity.

SB 1886: Grandparent Visitation Rights

This bill authorizes a grandparent of a minor child whose parent was the victim of a murder to petition the court for court-ordered visitation with the child under certain circumstances. This bill removes the requirement that a grandparent petitioning the court for court-ordered visitation with a minor child make a prima facie showing of parental unfitness or significant harm to the child in a preliminary hearing on such petition and instead requiring the grandparent to make a prima facie showing of other specified conditions.

AMERICAN OVERSIGHT
~~~~~~~~~~~~~~~~

Our Framework recommendations are highlighted in blue

Framework Principle 1 - **Agency Choice, Administrative Structure and Regulations: Maximum Flexibility.** While there is no universal panacea, the best practice is to select the option with the most regulatory flexibility. To adapt quickly to unknown future circumstances, regulatory mandates and requirements should be flexible wherever possible.

Even while approval and regulation of the adult-use MMTCs [*sic*] is kept in the Department of Health, the authorization for adult-use is authorized by the Department of Business and Professional Regulation. This curious agency intervention raises questions of the extent and scope of the approval for each, and whether DBPR should not (or would not) require additional authority in order to make a meaningful determination.

While we typically recommend authority be vested in one agency where possible, we also emphasize the importance of evaluating the constraints of each available option. Here, Department of Health is tasked with regulatory functions that make it well-suited to issue rules on testing and product safety requirements, they likely are not the best choice to enable a fledgling industry to establish new and innovative products in this emerging marketplace.

DBPR, by contrast, has the advantage of applicable institutional experience for adult-use cannabis by virtue of its regulation of alcohol and tobacco.

We recommend the adult-use section be properly developed and comprehensively established in the proper code sections relating to Business and Professions expertise, with meaningful substantive direction to develop a cannabis business authorization - independent of Department of Health's medical-specific regulatory scope.

Given the need to reform the medical system in light of the Amendment 2 litigation, it may be possible to design both systems in the same bill - but far more work is required.

Framework Principle 2 Demand: Maximum Access to Safe, Quality Products

Despite repealing the vertical integration mandates and quantitive caps, ostensibly opening the market, there are numerous remaining mandates that, in aggregate, pose a serious risk to a functional legal market.

Paragraph f(III) on page 27 requires the date sold or dispensed to be included on the packaging label. By moving to a multi-tier system, this is almost impossible. Cultivators and processors are responsible for packaging and labeling; dispensaries are prohibited from repackaging. There is no way for the wholesaler to know when the retailer will dispense a unit
of inventory and include that date on the packaging.

AMERICAN OVERSIGHT

Paragraph 12 on page 28 requires each edible to be individually sealed. This is unusual, since edibles normally come in sealed 10-packs. Also, why are edibles still excluded from qualifying as medical marijuana under Section 2? If anything, edibles are among the healthiest forms of consumption for a medical product.

Onsite consumption is expressly prohibited in paragraph 6 on page 30. Michigan just created the first state-level license for tasting rooms and several cities (e.g. Denver, San Francisco) have created municipal-level licenses. With penalties also assessed against consumption in public areas, the unavailability of public consumption spaces can become a significant barrier in states, like Florida, that have a large volume of tourism. Tourists, convention-goers, and others will have nowhere to legally consume. Also, the penalties for public consumption (page 48) should be reduced from a misdemeanor to a civil fine.

Framework Principle 3 -: Minimum Qualification Criteria for State Licensing.

A way of avoiding complications is to not limit the number of licenses available, but to award them to all applicants who meet certain minimum criteria, such as the lack of a criminal history.

Instead, the bill requires applicants prove the 'capacity to engage' in the very activities that will be regulated - a duplicative and arbitrary barrier that risks unnecessary rejection. Several required items simply cannot be proven definitively before the fact. For instance, what constitutes "proof" that the MMTC has the capability to comply with seed-to-sale tracking requirements? Does acquisition of a software license constitute "proof?" How can a cultivation applicant prove they can establish the necessary infrastructure, and how would the department even be able to evaluate what infrastructure is needed? What constitutes "proof of the applicant's financial ability to maintain operations for the duration of the registration?" Does a financial projection that includes prospective revenues count as "proof?" If not, then this requirement would essentially amount to an insanely high capitalization requirement that shouldn't exist to begin with.

The registration requirements for MMTCs starting on page 17 includes "The physical address of each location where it will apply for a facility permit to cultivate, process, dispense, or store marijuana." A prospective licensee will likely not know these addresses prior to applying and will have difficulty raising the capital necessary to acquire property or property leases without having first acquired a license. Therefore, we recommend that a provisional license be made available, and upon receipt of a provisional license, the licensee can have a period of time (6 or 12 months) to name a specific address and make the license permanent. Nevada and Michigan have followed similar procedures.

The requirement for all principals, employees and contractors to receive state-issued marijuana agent cards before they can begin work has been problematic in other states. Regulatory agencies in Colorado and Nevada did not have the capacity to process the large volume of initial applications once the markets went live. This tied up the labor market for nearly a year in Nevada, where licensees were unable to hire workers because of the backlog of applications with the state. The best approach is the one pursued in California, where it is the licensee's

AMERICAN OVERSIGHT

responsibility to conduct background checks and issue identification cards for every employee/contractor/principal and to retain all the relevant documentation showing these individuals met minimum state requirements. The state can audit and penalize licensees that don't follow these requirements correctly. But, this approach removes a significant burden from the regulatory agency and allows the market to remain dynamic.

Framework Principle 4 - **Local Government Control.** Conflicting desires create the need for a delicate balance between allowing local communities the autonomy to self-govern, while also ensuring those with minority views do not become marginalized. Local governments' level of autonomy for marijuana licensing must be balanced against the needs of patients and recreational consumers.

The draft ostensibly preempts local authority but then allows bans and additional nonsensical restrictions.

The original statute only allowed local governments to prohibit dispensaries within their borders. This new draft also allows them to limit the number of dispensaries (para. 7 on page 38). Capping the number of licenses is a recipe for public corruption, as seen recently in Nevada. The market is the best determinant of how many dispensaries should exist. The same paragraph also allows a local government to levy their own taxes on a dispensary, but does not restrict the rate. There should be a maximum rate spelled out in statute.

Framework Principle 5 - **Product Testing.** Generally, we recommend that states require testing procedures for marijuana products, but also allow licensees the latitude to adapt those procedures to fit within their unique production methods so long as they satisfy certain objective safety standards.

In some ways, the current draft achieves this end, but in other more important aspects, it risks implementation errors. While MMTCs can be exempted from using licensed testing labs before they are available, they must perform the acts themselves.

Moreover, Pages 26-27 state: "An MMTC may use a laboratory that has not been certified by the department under s. 381.988 until such time as at least one laboratory holds the required certification." What if the only licensed lab in in Pensacola and the inventory is in Miami?

With the Department of Health's statutory authority to ensure "safe products", the result may be no market at all.

Framework Principle 6 Medical-specific policies: Physician-Patient Empowerment.

The adult-use system is clearly an afterthought in the current bill. From foundational issues of agency choice and license supply to practical market and business concerns, the current tacking on of adult-use authorization to the still-suboptimal medical policy. Why are they still called MMTCs if they are authorized

AMERICAN OVERSIGHT

for adult use at all, and why subject them to any of the medical-specific rules, justified or otherwise?

AMERICAN OVERSIGHT

Details

Highlights:

1. Removes requirement for MMTCs to carry low-THC cannabis products. So long as high-THC products remain available, the low-THC requirement is likely to be a costly mandate for producing and carrying goods at a financial loss. Low-THC cannabis products are better regulated within the state's structure for industrial hemp and its derivatives.
2. Prudent controls on local governments: They may not ban deliveries even if they have banned retail dispensaries. This ensures people will still have access to safe, legal products. They also can't govern the locations of cultivators or processors (para. 5 on page 38).
3. Removes the requirement for vertical integration. It appears MMTCs will be able to apply for licenses to fill whichever stages of the supply chain they are best at.

Areas of Concern:

1. The distinction between medical and adult-use licensing is artful, but clunky. The bill draft calls little attention to the fact it authorizes adult-use, but it's also unclear how adult-use licenses will be issued by the Department of Business and Professional Regulation. It's productive to consolidate the rules between the two regimes to whatever extent possible to avoid confusion, and to exempt medical marijuana from excise taxation. However, there should likely be more detail on adult-use, especially including the tax rate.
2. Why are edibles still excluded from qualifying as medical marijuana under Section 2? If anything, edibles are among the healthiest forms of consumption for a medical product.
3. The requirement for all principals, employees and contractors to receive state-issued marijuana agent cards before they can begin work has been problematic in other states. Regulatory agencies in Colorado and Nevada did not have the capacity to process the large volume of initial applications once the markets went live. This tied up the labor market for nearly a year in Nevada, where licensees were unable to hire workers because of the backlog of applications with the state. The best approach is the one pursued in California, where it is the licensee's responsibility to conduct background checks and issue identification cards for every employee/contractor/principal and to retain all the relevant documentation showing these individuals met minimum state requirements. The state can audit and penalize licensees that don't follow these requirements correctly. But, this approach removes a significant burden from the regulatory agency and allows the market to remain dynamic.
4. Paragraph 2 on page 16 says "Each MMTC may use its own seed-to-sale system until the department establishes a seed-to-sale tracking system." Does "may" mean this is an optional requirement until the state's system is live? Also, the entire point of seed-to-sale software is that the transfers of inventory are reconciled across the universe of licensees by a central database. Not much is accomplished by requiring each licensee to retain their own tracking database.

AMERICAN OVERSIGHT

5. The registration requirements for MMTCs starting on page 17 includes “The physical address of each location where it will apply for a facility permit to cultivate, process, dispense, or store marijuana.” A prospective licensee will likely not know these addresses prior to applying and will have difficulty raising the capital necessary to acquire property or property leases without having first acquired a license. Therefore, we recommend that a provisional license be made available, and upon receipt of a provisional license, the licensee can have a period of time (6 or 12 months) to name a specific address and make the license permanent. Nevada and Michigan have followed similar procedures.
6. Several required items for registration of an MMTC on pages 18 and 19 require “proof” of items that cannot be proven definitively before the fact. For instance, what constitutes “proof” that the MMTC has the capability to comply with seed-to-sale tracking requirements? Does acquisition of a software license constitute “proof?” How can a cultivation applicant prove they can establish the necessary infrastructure, and how would the department even be able to evaluate what infrastructure is needed? What constitutes “proof of the applicant’s financial ability to maintain operations for the duration of the registration?” Does a financial projection that includes prospective revenues count as “proof?” If not, then this requirement would essentially amount to an insanely high capitalization requirement that shouldn’t exist to begin with.
7. Paragraph 8(b) on page 23 stipulates that marijuana be cultivated in an enclosed facility. Does a greenhouse with a vented roof count as enclosed?
8. Pages 26-27 state: “An MMTC may use a laboratory that has not been certified by the department under s. 381.988 until such time as at least one laboratory holds the required certification.” What if the only licensed lab in in Pensacola and the inventory is in Miami?
9. Paragraph f(III) on page 27 requires the date sold or dispensed to be included on the packaging label. By moving to a multi-tier system, this is almost impossible. Cultivators and processors are responsible for packaging and labeling; dispensaries are prohibited from repackaging. There is no way for the wholesaler to know when the retailer will dispense a unit of inventory and include that date on the packaging.
10. Paragraph 12 on page 28 requires each edible to be individually sealed. This is unusual, since edibles normally come in sealed 10-packs.
11. Onsite consumption is expressly prohibited in paragraph 6 on page 30. Michigan just created the first state-level license for tasting rooms and several cities (e.g. Denver, San Francisco) have created municipal-level licenses. With penalties also assessed against consumption in public areas, the unavailability of public consumption spaces can become a significant barrier in states, like Florida, that have a large volume of tourism. Tourists, convention-goers, and others will have nowhere to legally consume. Also, the penalties for public consumption (page 48) should be reduced from a misdemeanor to a civil fine.
12. The delivery rules in pages 34-36 include no restrictions on signage of a transport vehicle. Since this is an industry that transports large volumes of cash, there can be a legitimate public safety concern if transport vehicles are wrapped or marked with cannabis labeling.

AMERICAN OVERSIGHT

13. Paragraph 4(b) on page 37 restricts a cultivation or processing facility from being within 1,000 feet of a school, child care facility, etc. This restriction may make sense for a dispensary because it is open to the public. But cultivation and processing centers are enclosed, restricted-access locations, so the spatial restriction doesn't make as much sense.
14. The original statute only allowed local governments to prohibit dispensaries within their borders. This new draft also allows them to limit the number of dispensaries (para. 7 on page 38). Capping the number of licenses is a recipe for public corruption, as seen recently in Nevada. The market is the best determinant of how many dispensaries should exist. The same paragraph also allows a local government to levy their own taxes on a dispensary, but does not restrict the rate. There should be a maximum rate spelled out in statute.

>
> Good Morning,
> Here is the latest draft of the EV bill with changes based on our last meeting. Just a few things to note:
> - The Autocycle and PDD issues could be removed and the bill would then relate only to "electric vehicles" and this would match the current "relating to" clause, otherwise the title needs to be expanded.
> - The issues in section 7 related to PSC rate filings needs review by the Innovation, Industry, and Technology Committee.
>
> Please let us know if you have any questions.
> Phillip

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

A bill to be entitled

An act relating to electric vehicles; amending s. 316.003, F.S.; revising the definition of the terms "autocycle" and "personal delivery device"; creating s. 339.286, F.S.; requiring the Department of Transportation to create the Electric-Vehicle Infrastructure Grant Program; providing the purposes of the program; providing for the distribution of grants to certain entities to install electric-vehicle charging infrastructure; providing grant requirements; providing requirements for equipment installed using grant funds; providing criteria for the distribution of grants; amending s. 366.94, F.S.; prohibiting state agencies that implement certain rules from requiring specific methods of sale for electric vehicle charging equipment used in this state; requiring the Florida Public Service Commission to direct all public utilities to file for approval and implement approved rate designs to accommodate and optimize electric vehicle charging activities, subject to certain requirements; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Subsections (2) and (55) of section 316.003, Florida Statutes, is amended to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context

AMERICAN OVERSIGHT

otherwise requires:

(2) AUTOCYCLE.—A three-wheeled motorcycle that has two wheels in the front and one wheel in the back; is equipped with a roll cage or roll hoops, a seat belt for each occupant, brakes meeting the Federal Motor Vehicle Safety Standard 122, a steering mechanism, and seating that does not require the operator to straddle or sit astride it; and is manufactured in accordance with the applicable federal motorcycle safety standards in 49 C.F.R. part 571 by a manufacturer registered with the National Highway Traffic Safety Administration.

(55) PERSONAL DELIVERY DEVICE.—An electrically powered device that:

(a) Is operated on sidewalks and crosswalks and intended primarily for transporting property;

(b) Weighs less than 120 ~~80~~ pounds or, if the Department of Transportation establishes by rule a maximum weight, has a weight that does not exceed that maximum, excluding cargo;

(c) Has a maximum speed of 10 miles per hour or, if the Department of Transportation establishes by rule a maximum speed, has a speed that does not exceed that maximum; and

(d) Is equipped with technology to allow for operation of the device with or without the active control or monitoring of a natural person.

A personal delivery device is not considered a vehicle unless expressly defined by law as a vehicle. A mobile carrier is not considered a personal delivery device.

Section 2. Paragraph (c) of subsection (4) of section 334.046, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

334.046 Department mission, goals, and objectives.—

(4) At a minimum, the department's goals shall address the following prevailing principles.

(c) *Mobility.*—Ensuring a cost-effective, statewide, interconnected transportation system. Improvement of travel choices to ensure mobility includes planning and establishment of infrastructure for innovative technologies, including electric vehicle charging infrastructure.

Section 3. Section 339.286, Florida Statutes, is created to read:

339.286 Electric Vehicle Infrastructure Grant Program.—

(1) The department shall establish the Electric-Vehicle Infrastructure Grant Program. The purpose of the program is to provide financial assistance to encourage the installation of electric vehicle charging infrastructure.

(2) State agencies, public universities, public transit agencies, ports, airports, and local governments, including local housing authorities and libraries, may apply to the department for grants for the purpose of installing electric vehicle charging infrastructure.

(3) A grant may be awarded for:

1. Technical assistance for the creation and adoption of a local or regional plan that establishes an electric vehicle charging infrastructure and the necessary action plans to address any infrastructure gaps and steps to complete the infrastructure plan. A plan must address actions to deploy the necessary infrastructure in high-density housing areas and low- to moderate-income areas.

2. Assistance with the purchase of related equipment and

AMERICAN OVERSIGHT

the costs of installation of that equipment to provide electric vehicle charging. Such equipment must be capable of collecting and reporting data and must use standard connectors.

(4)(a) An applicant may apply for a grant for both technical assistance and equipment purchase and installation. A grant for technical assistance requires a minimum match of funds from the applicant of 30 percent of the grant award, but such match is not required for an applicant that is located in a fiscally constrained county. A grant for equipment purchase and installation requires a minimum match of funds from the applicant of 50 percent of the grant award, or 20 percent for an applicant that is located in a fiscally constrained county. The matching funds must be from nonstate resources, but may include private funds provided through a partnership with a private entity or in-kind contributions such as the donation of equipment, services, or land or use of land for establishment of the electric vehicle charging infrastructure. Grant funds may not subsidize the cost for the use of electricity.

(b) The department shall maintain a prioritized list of approved grant applications. The prioritized list must include recommended funding levels for each application and, if staged implementation is appropriate, provide funding requirements for each stage. Grants must be prioritized based on the extent to which the activities of the grant will encourage growth in the use of electric vehicles and increase the availability of charging locations along evacuation routes. A grant for equipment purchase and installation that will immediately and most effectively serve those who currently own or operate electric vehicles may receive priority.

AMERICAN OVERSIGHT

(5) The department must continually review emerging research, policies, and standards related to electric vehicle infrastructure. Using such information, the department must publish best practices for the establishment of electric vehicle charging infrastructure, model infrastructure plan development and components, and other significant information for the implementation and use of electric vehicle charging infrastructure. The department may develop a model plan that local governments may use as a guide to establish an electric vehicle charging infrastructure plan.

(6) The department shall adopt rules to administer this section.

Section 4. Contingent upon the enactment of Senate Bill XXXX (EV FEES) or other similar legislation enacted in the 2020 Regular Session or an extension thereof, section 339.0802, Florida Statutes, is created to read:

339.0802 .—Allocation of increased revenues derived from amendments to s. 320.0801 by this act.—Funds that result from increased revenues to the State Transportation Trust Fund derived from the amendments to s. 320.0801 made by this act must be used as set forth in this section, notwithstanding any other provision of law.

(1) Beginning in the 2020-2021 Fiscal Year and annually for 5 years thereafter, all increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(2) Beginning in the 2025-2025 Fiscal Year and annually for 5 years thereafter, half of the increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(3) This section expires on July 1, 2030.

AMERICAN OVERSIGHT

CONSIDERATION - I think you need to get a revenue estimate, and do a set amount (or file this as is, get the REC estimate, and then amend accordingly). I think it'll be hard (maybe?) for the department to know how much revenue they are going to get in a year and fund projects. If you do set amounts, then we'd do a subsection (3) and throw the remainder of increased revenues into the work program or whatever.

Section 5. Paragraph (c) of subsection (7) of section 339.175, Florida Statutes, is amended to read:

339.175 Metropolitan planning organization.—

(7) LONG-RANGE TRANSPORTATION PLAN.—Each M.P.O. must develop a long-range transportation plan that addresses at least a 20-year planning horizon. The plan must include both long-range and short-range strategies and must comply with all other state and federal requirements. The prevailing principles to be considered in the long-range transportation plan are: preserving the existing transportation infrastructure; enhancing Florida's economic competitiveness; and improving travel choices to ensure mobility. The long-range transportation plan must be consistent, to the maximum extent feasible, with future land use elements and the goals, objectives, and policies of the approved local government comprehensive plans of the units of local government located within the jurisdiction of the M.P.O. Each M.P.O. is encouraged to consider strategies that integrate transportation and land use planning to provide for sustainable development and reduce greenhouse gas emissions. The approved long-range transportation plan must be considered by local governments in the development of the transportation elements in local

AMERICAN OVERSIGHT

government comprehensive plans and any amendments thereto. The long-range transportation plan must, at a minimum:

(c) Assess capital investment and other measures necessary to:

1. Ensure the preservation of the existing metropolitan transportation system including requirements for the operation, resurfacing, restoration, and rehabilitation of major roadways and requirements for the operation, maintenance, modernization, and rehabilitation of public transportation facilities; and

2. Make the most efficient use of existing transportation facilities to relieve vehicular congestion, improve safety, and maximize the mobility of people and goods. Such efforts must include, but are not limited to, consideration of infrastructure and technological improvements necessary to accommodate advances in vehicle technology, such as automated driving systems, electric vehicles and electric vehicle charging stations, and other developments.

In the development of its long-range transportation plan, each M.P.O. must provide the public, affected public agencies, representatives of transportation agency employees, freight shippers, providers of freight transportation services, private providers of transportation, representatives of users of public transit, and other interested parties with a reasonable opportunity to comment on the long-range transportation plan. The long-range transportation plan must be approved by the M.P.O.

Section 6. Paragraph (c) of subsection (3) of section 339.64, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

339.64 Strategic Intermodal System Plan.—

(3)

(c) The department shall coordinate with federal, regional, and local partners, as well as industry representatives, to consider infrastructure and technological improvements necessary to accommodate advances in vehicle technology, such as automated driving systems, electric vehicles and electric vehicle charging stations, and other developments, in Strategic Intermodal System facilities.

Section 7. Section 366.94, Florida Statutes, is amended to read:

366.94 Electric vehicle charging stations.—

(1) The provision of electric vehicle charging to the public by a nonutility is not the retail sale of electricity for the purposes of this chapter. The rates, terms, and conditions of electric vehicle charging services by a nonutility are not subject to regulation under this chapter. This section does not affect the ability of individuals, businesses, or governmental entities to acquire, install, or use an electric vehicle charger for their own vehicles.

(2) The Department of Agriculture and Consumer Services shall adopt rules to provide definitions, methods of sale, labeling requirements, and price-posting requirements for electric vehicle charging stations to allow for consistency for consumers and the industry. Rules implemented under this subsection may not require specific methods of sale for electric vehicle charging equipment used in this state.

(3)(a) It is unlawful for a person to stop, stand, or park a vehicle that is not capable of using an electrical recharging

AMERICAN OVERSIGHT

station within any parking space specifically designated for charging an electric vehicle.

(b) If a law enforcement officer or specialist finds a motor vehicle in violation of this subsection, the officer or specialist shall charge the operator or other person in charge of the vehicle in violation with a noncriminal traffic infraction, punishable as provided in s. 316.008(4) or s. 318.18.

(4) The commission shall direct all public utilities to file for approval of rate designs, and to implement approved rate designs, to accommodate and optimize electric vehicle charging activities. Rates filed under this subsection must be submitted to the commission by October 1, 2020, and approved rates must remain in effect for at least 5 years. Rates that must be approved and implemented under this subsection include, but are not limited to, both of the following:

(a) Revisions to capacity or demand charges for publicly available, privately operated high-powered charging.

(b) Time-of-use rates for residential charging activities to encourage off-peak charging activities.

Section 8. The Division of Law Revision is directed to replace the phase "this act" wherever it occurs in this act with the chapter law number.

Section 9. Except as otherwise expressly provided, this act shall take effect July 1, 2020.

As previously communicated to you in writing, Ms. Jennifer Lloyd, who currently serves as the DSGI Director, declined, by e-mail on October 30, 2019, at 9:02 AM, to answer my questions re: the above-referenced matter. Although I redirected my unanswered questions to the current Secretary of the DMS, most recently by e-mail on November 15, 2019, at 6:49 AM "Re: ***ALERT* TO YOUR MEDICARE ENROLLED (IN PARTS A & B) RETIREES," said questions remain unanswered. Consequently, and via the e-mail below, which I am hereby forwarding to you for your information, I again redirected my unanswered questions to Mr. Jimmy Cox, who currently serves as the Director of People First, in which I asked him to respond by next Wednesday, November 27, 2019. Although Mr. Cox has not acknowledged my inquiry, he is a CPA and, in accordance with the standards of his profession, I trust he places high importance on the needs to maintain accurate records and to accurately report the information derived from said records, and will, therefore, respond by the requested response date, in order that all of us can have a happy Thanksgiving, which I do hereby wish to all of you, so that no further action on my part will become necessary to satisfactorily resolve this matter. Thank you.**

From: Marc Wilson <marcmbp@icloud.com>
Subject: Incorrect reporting to Medicare
Date: November 21, 2019 at 6:03:43 AM EST
To: "Cox, Jimmy" <Jimmy.Cox@dms.myflorida.com>

Dear Mr. Cox:

I recently became aware that my state Medicare Tier I supplemental group health insurance coverage was incorrectly reported to Medicare as follows:

I do not understand the significance or meaning of "(76442101)" appearing alongside Florida Blue's name, the address shown for them is not the address shown on the back of my member ID card, and the 8/21/2004 beginning date of coverage is incorrect.

In an effort to expedite the correct reporting of the above information to Medicare, I contacted Florida Blue and was told they did not report my supplemental health insurance coverage to Medicare, whereupon I contacted the DSGI and was provided with the following information:

Based on the preceding, and per confirming e-mail from Ms. Dee Fort at the DSGI, the People First Benefits Eligibility Key Information was the source of the incorrect 8/21/2004 beginning date of supplemental coverage that was reported to Medicare for which I have the following additional questions:

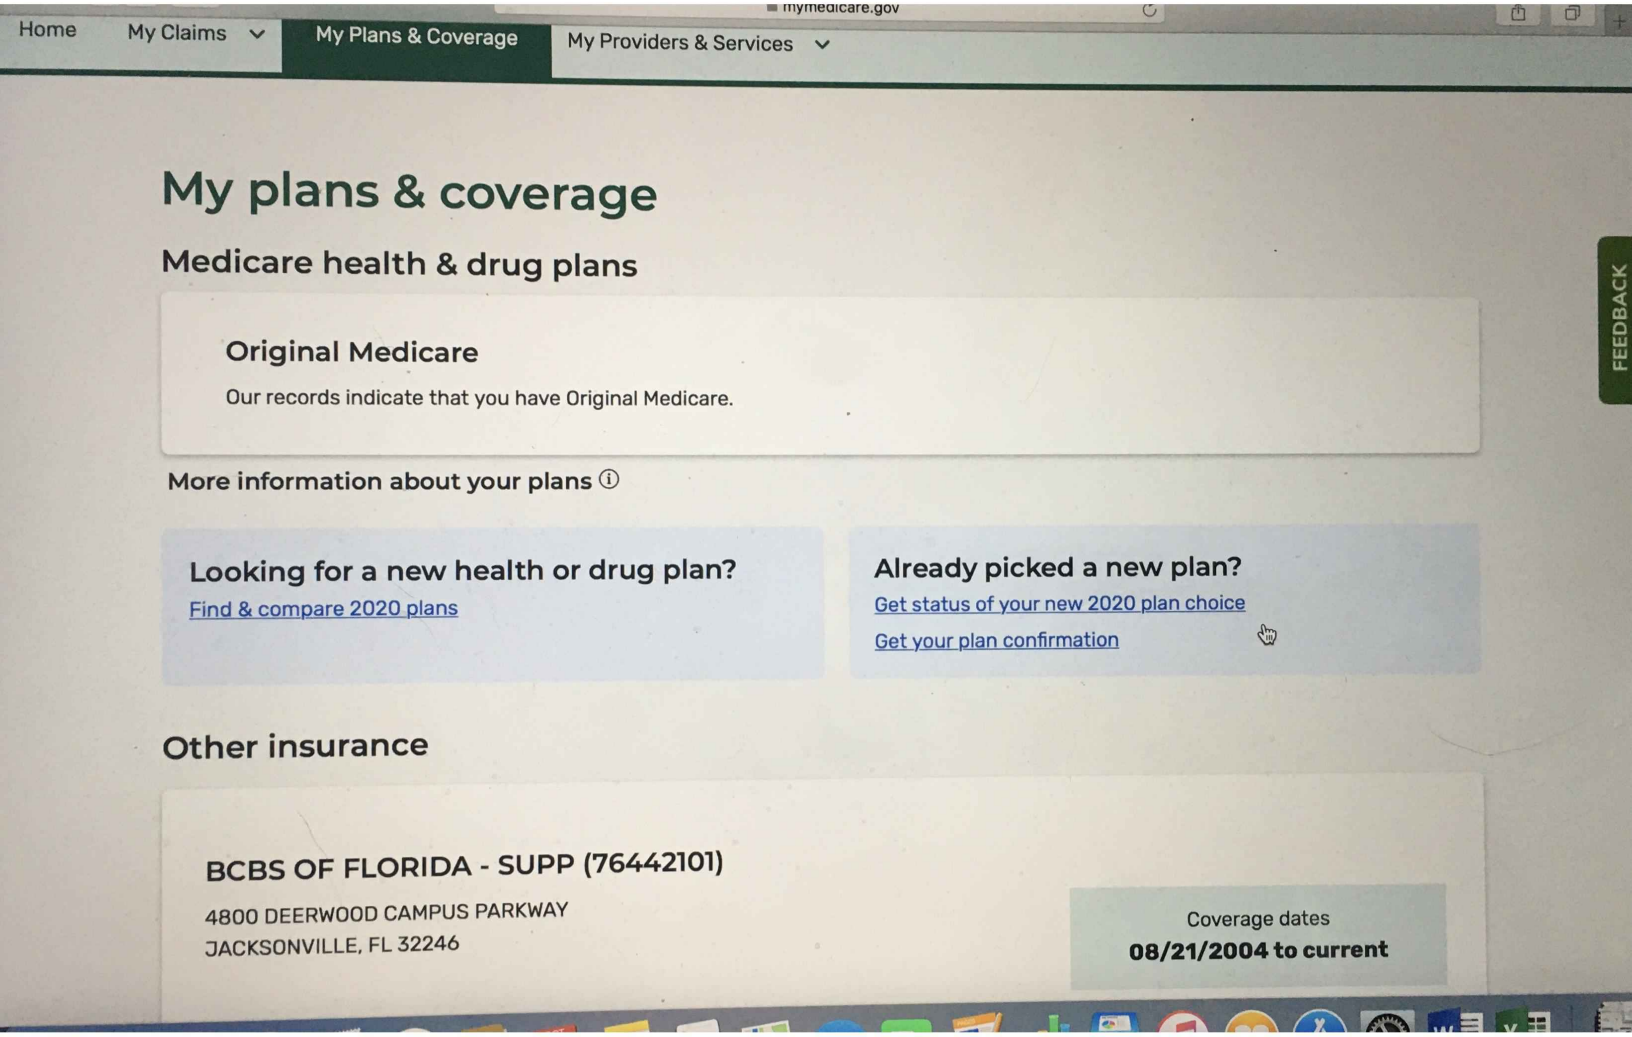
1. **Why was 8/21/2004 incorrectly reported to Medicare as the beginning date of my state group health insurance coverage when the correct date that should have been reported was 6/01/1987 - my "Plan Participation Date" - as per the second and third attachments which follow that were generated for the continuation of my coverage upon retirement, effective 3/01/2016, and subsequently upon becoming Medicare eligible, effective 9/01/2019, respectively?**
2. **Why was my supplemental group health insurance coverage, as incorrectly reported to Medicare, shown as being with "BCBS of Florida - Supp (76442101)" at an address of 4800 Deerwood Campus Parkway, Jacksonville, FL 32246 when, according to the back of my Florida Blue member ID card, the correct address, for sending claims to, and for all correspondence from and to, Florida Blue, is P.O. Box 2896, Jacksonville, FL 32232-0079, as per the first of three attachments which follow?**
3. **Why does People First Benefits Eligibility Key Information incorrectly show me as being an inactive employee, when I'm a retiree, and also incorrectly say that I'm ineligible for benefits when I receive a monthly retirement benefit and have state Medicare Tier I supplemental group health insurance coverage?**

In asking the above questions, I am also hereby additionally requesting that corrected information be reported to Medicare to reflect both the correct address and the beginning date of my supplemental coverage with Florida Blue.

Your response by Wednesday, November 27, 2019, is requested and will be greatly appreciated.

Thank you for your cooperation and assistance, and I look forward to hearing from you.

Sincerely,



Marc Wilson

Senator and VT,

Attached are a handful of materials that Chris requested as they consider a JRI effort. These are either CJI, Pew, Urban Institute or TPPF publications. I've included a couple of assessments of the JRI efforts in particular states. There is the analysis of South Carolina's property crime five years after the JRI bill that increased the felony theft threshold. There's the Urban assessment of Mississippi's use of technical violator centers a few years after Mississippi's JRI bill created them. And there's a description of where reinvestment funds were spent after Louisiana's JRI bill was adopted.

Let me know if you need more.

Also happy to see if we can get a call between Gov. Deal/Gov. Bryant/Gov. Hogan and Gov. Desantis.

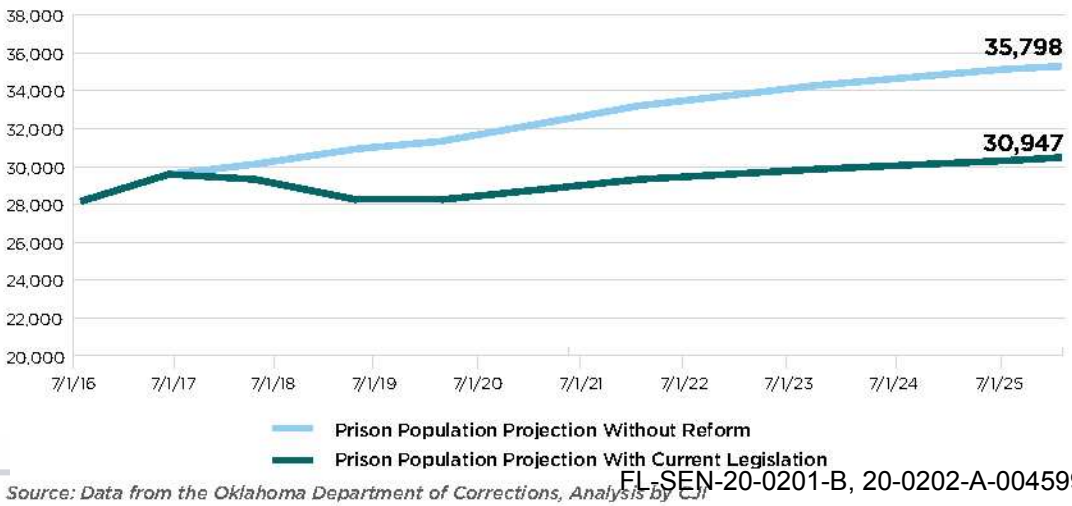
OKLAHOMA'S 2018 CRIMINAL JUSTICE POLICY SOLUTIONS

Data-Driven Policies for Better Public Safety

OCTOBER 2018

The Crime and Justice Institute (CJI), a division of Community Resources for Justice, works to improve public safety and the delivery of justice by providing nonpartisan technical assistance, research, and other services to improve outcomes across the spectrum of the adult and juvenile justice systems, from policing and pretrial through reentry. CJI provides direct technical assistance, assessment, implementation, research, data analysis, training, facilitation, and more. We take pride in our ability to improve evidence-based practices in public safety agencies and gain organizational acceptance of those practices. We create realistic implementation plans, put them into practice, and evaluate their effectiveness to enhance the sustainability of policies, practices, and interventions.

Find out more at www.crj.org/cji.



Overview

On April 26, 2018, Oklahoma Governor Mary Fallin (R) signed into law seven criminal justice measures that will reverse Oklahoma's steep and unsustainable prison growth trends while enhancing public safety, reducing recidivism, and keeping families together. This data-driven policy package was the result of nearly two years of bipartisan policy development and advocacy driven by the Oklahoma Justice Reform Task Force.

The effort was supported by the Justice Reinvestment Initiative, a partnership between Pew Charitable Trusts and the U.S. Department of Justice's Bureau of Justice Assistance. The Crime and Justice Institute (CJI) provided technical assistance to the Task Force, including data analysis and policy development facilitation.

This process resulted in a policy package projected to avert 67 percent of the anticipated growth in Oklahoma's prison population over the next decade, avoiding the need for 4,800 additional prison beds. By changing course, Oklahoma will save over a billion dollars of spending on new prisons and instead invest in treatment and rehabilitation proven to reduce recidivism and protect public safety.

Figure 1. **Reforms Projected to Avert 67% of Prison Growth**

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004599

The people of Oklahoma have decided that we can no longer afford to fill our prisons with individuals suffering from addiction; that strategy has been far too costly in dollars and in lives."

– GOVERNOR MARY FALLIN

BACKGROUND

As states across the country decreased imprisonment rates and saw crime rates drop, Oklahoma's prison population grew by 9 percent from 2011 to 2016, reaching 28,580 inmates. Oklahoma had the second-highest imprisonment rate in the country, 78 percent higher than the national average in 2015. More striking, Oklahoma has had the highest female imprisonment rate in the country since 1991; the female prison population grew 30 percent between 2011 and 2016, and in 2015 Oklahoma incarcerated more than two-and-a-half times as many women per capita as other states. These trends burdened state taxpayers with extraordinary costs, with Oklahoma spending over half a billion dollars on corrections in FY2015. At the same time, this unchecked growth left Oklahoma's prisons overcrowded and unsafe. In 2016, there were more than 2,300 temporary beds in the prison system, a growing county jail back-up, and an additional 7,800 expensive contract beds being used to house the existing population.

In 2016, Oklahoma's prison population was projected to grow 25 percent, adding 7,218 inmates by 2026. A projected 60 percent increase in the female prison population would have driven one-quarter of that overall growth. Even with the reforms advanced in the 2016 session and the defelonization of drug possession through State Question 780 in November of 2016, growth was expected to continue. The projected prison population growth would have cost the state at least $1.2 billion in capital expenditures for three new prisons and an additional $700 million in operating costs over 10 years.

OKLAHOMA JUSTICE REFORM TASK FORCE

PROCESS

In July of 2016, Governor Fallin established the bipartisan, inter-branch Oklahoma Justice Reform Task Force, with support from the Senate President Pro Tempore and the Speaker of the House. The Task Force was charged with:

1. Developing comprehensive criminal justice and corrections reform policy;
2. Identifying more cost-effective, evidence-based sentencing and supervision practices aimed at holding offenders accountable and reducing recidivism;
3. Estimating any resulting savings from the policy recommendations; and
4. Identifying opportunities to reinvest the resulting savings into policies shown to increase public safety, reduce recidivism, and improve offender reentry outcomes.

AMERICAN OVERSIGHT

The 21-member Task Force included law enforcement, legislators, judges, prosecutors, a public defender, agency leaders, representatives from the business community, and advocates for crime victims. Bringing together expertise from across the criminal justice system, the Task Force conducted a comprehensive analysis of Oklahoma's criminal justice system, reviewed the latest research on the most effective strategies to reduce recidivism and improve public safety, and developed recommendations in accordance with the governor's charge. The Task Force convened for seven months starting in the summer of 2016, issuing final recommendations in February of 2017 for consideration during the 2017 and 2018 legislative sessions.

In addition to receiving input and advice from law enforcement, prosecutors, defense attorneys, behavioral health experts, and other criminal justice practitioners, Task Force members held three roundtable discussions with victims; survivors; and victim advocates, including Oklahoma City victim advocates and members of the Seminole Nation and Cherokee Nation, to identify key priorities for victims and victims' advocates.

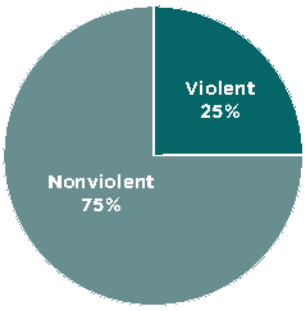
Roy Williams	*Greater Oklahoma City Chamber of Commerce, President and CEO*

AMERICAN OVERSIGHT

KEY FINDINGS

The Task Force identified four primary factors driving Oklahoma's unsustainable prison growth.



- Continued growth in admissions for nonviolent crimes
- Long sentences and limited use of parole
- Disproportionate incarceration of women
- Limited resources impeding effective supervision

CONTINUED GROWTH IN ADMISSIONS FOR NONVIOLENT CRIMES

In examining the use of incarceration as a post-conviction sanction in Oklahoma, the Task Force focused on the number of individuals entering prison for statutorily defined nonviolent offenses. Between FY2011 and FY2015, prison admissions grew 20 percent, with much of that growth driven by nonviolent offenders sentenced directly to prison. Three out of every four people entering prison in Oklahoma were sentenced for nonviolent crimes (See Figure 2). Fifty-six percent of nonviolent offenders sentenced to prison had little or no serious criminal history (See Figure 3).

Figure 2. 75% of Prison Admissions Sentenced for Nonviolent Offenses

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004602

We're past a state of emergency in Oklahoma's criminal justice system; we've reached the point of desperation. We must engage on these issues and make progress very quickly. As business leaders, we support the Governor's statewide criminal justice reform efforts, and we stand ready to support bold recommendations from the Oklahoma Criminal Justice Reform Task Force."

– CLAY BENNETT, OKLAHOMA CITY THUNDER OWNER AND CRIMINAL JUSTICE REFORM ADVOCATE

The Task Force was able to examine felony case filings and conviction records from Oklahoma and Tulsa counties for FY2011 and FY2015 and found that large increases in the number of felony cases filed drove the growth in admissions. This pattern was consistent across more than two-thirds of counties. While the rate at which felony cases received prison sentences did not increase, the sheer volume of cases being processed meant that more offenders were sentenced to prison, even as crime rates continued to decline. Many of those sentenced to prison were first-time felons. In particular, the number of first-time drug possession offenders sentenced to prison more than doubled from FY2011 to FY2015.

From FY2011 to FY2015, admissions to prison for drug sentences in Oklahoma grew 22 percent. Thirty-one percent of all prison admissions were for drug offenses, over a third of which (37 percent) were for drug distribution and manufacturing offenses. The average sentence length for possession with intent to distribute (PWID) and distribution was more than 8.5 years. In other states, a sentence of that length would typically indicate that the person has a violent criminal history, yet 81 percent of drug offenders sentenced to prison in Oklahoma had no prior violent crimes.

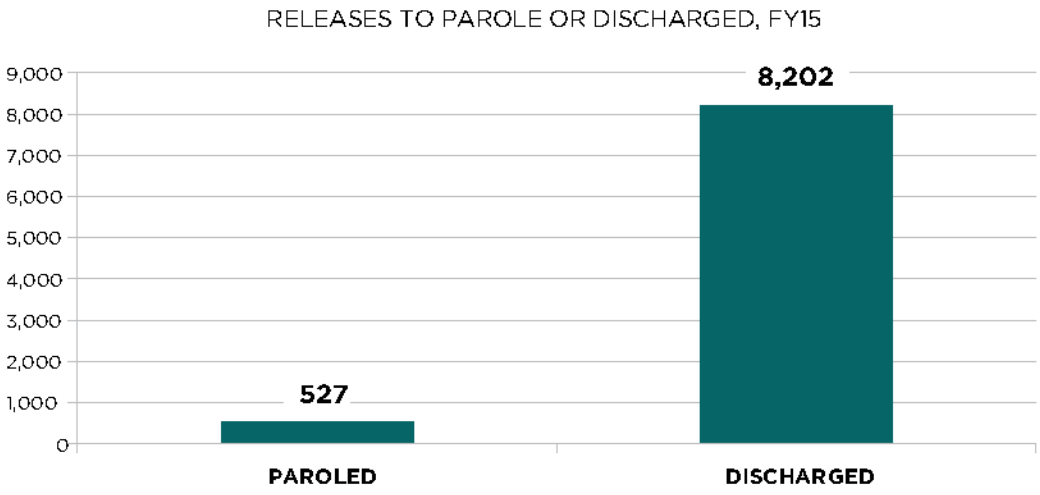
The number of property offenders admitted to prison grew 29 percent from FY2011 to FY2015, including 37 percent growth in the number of people sentenced directly to prison for these crimes. At the same time, average sentence lengths for property crimes grew 11 percent to 68 months. Property offenders admitted to prison in Oklahoma are disproportionately female and most often charged with "paper crimes," such as fraud, forgery, and writing a bad check.

The Task Force compared Oklahoma with neighboring states to better understand Oklahoma's relative use of incarceration. While Missouri and Texas have similar crime rates to Oklahoma, an examination of admissions to prisons from court found that Oklahoma admitted nonviolent offenders to prison at a much higher rate (48 percent higher than Missouri).

LONG SENTENCES AND LIMITED USE OF PAROLE

In comparing Oklahoma to Missouri and Texas, the Task Force found that Oklahoma imposed longer sentences on average than Missouri or Texas, despite a higher proportion of nonviolent offenders in its admissions cohort. Long sentences combined with habitual offender enhancements and low parole rates mean that Oklahomans serve long prison terms, even when incarcerated for nonviolent crimes.

Oklahoma's habitual offender law dramatically increased penalties for a second or subsequent felony conviction, and often increased the maximum punishment to life in prison. These long sentences were well beyond the penalty ranges of neighboring states. The law did not distinguish the seriousness of the prior offense and therefore treated a prior nonviolent felony conviction the same as a violent conviction. Offenders sentenced to prison in FY2015 for a nonviolent crime were more than



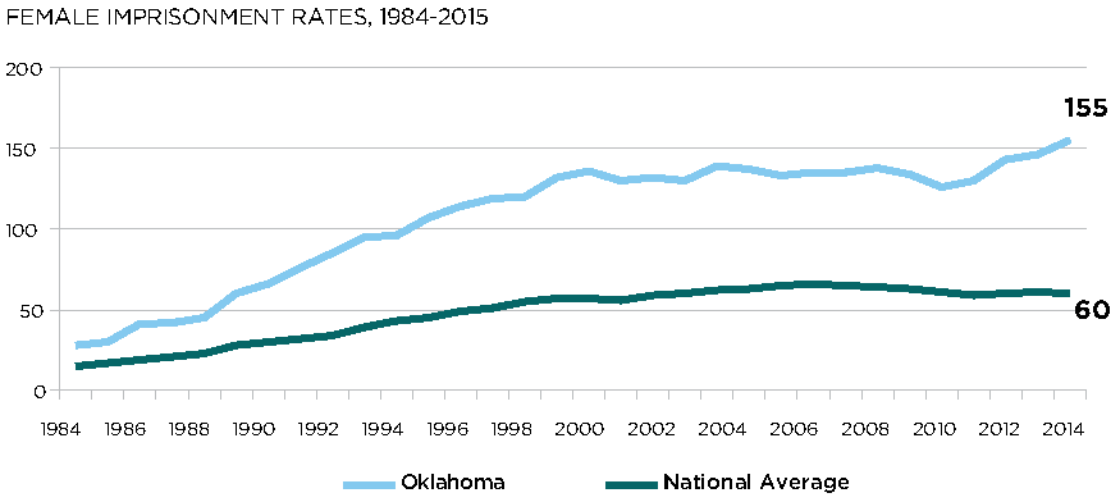
AMERICAN OVERSIGHT

twice as likely to have a sentence of at least 12 years if they had more than one prior felony conviction.

Prior to the 2018 bill, almost all inmates in Oklahoma were eligible to be released on parole once they served a third of their sentence. There were a small number of drug crimes with parole eligibility at 50 percent of their sentence and very serious crimes eligible at 85 percent. Yet very few people were released on parole in Oklahoma. In FY2015, only 6 percent of offenders released from prison were released onto parole, a decline from 12 percent in FY2011. This is one of the lowest parole rates in the country and is especially impactful because parole is the primary mode of early release in Oklahoma (See Figure 4). The Task Force determined that this parole rate was due to a combination of factors: low approval rates by the Pardon and Parole Board; a widespread lack of confidence in the hearing process; and a desire to leave prison without supervision to follow, leading some offenders to waive their right to a parole hearing.

While those with drug convictions were most likely to be released on parole, only 11 percent of those released for a drug offense were paroled. Those convicted of drug offenses served 50 percent of their sentence in prison on average, despite the overwhelming majority of drug offenders reaching parole eligibility at 33 percent of their sentence. Those with drug and property offenses served an average of nine months past parole eligibility.

Figure 4. **Less Than 10% of Prison Releases Paroled**



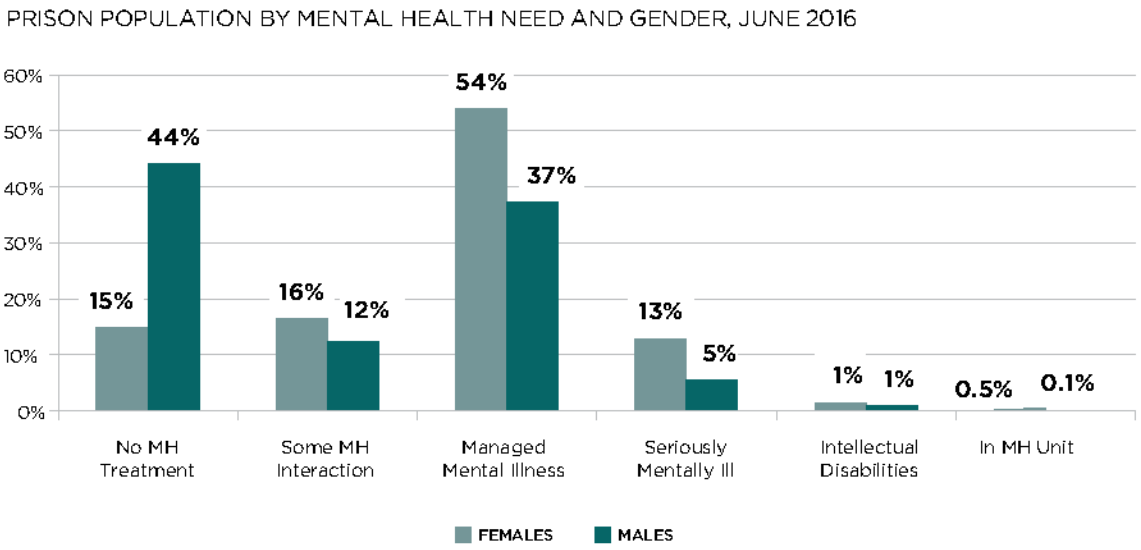
Source: Data from the Oklahoma Department of Corrections, Analysis by CJI

AMERICAN OVERSIGHT

DISPROPORTIONATE INCARCERATION OF WOMEN

Oklahoma has long had the highest female imprisonment rate in the nation, but in the last few years the gap between Oklahoma and the rest of the country has continued to widen. Between FY2011 and FY2015, the female prison population grew 30 percent.

Figure 5. **Oklahoma Has the Highest Female Imprisonment Rate in the Nation, More Than Twice as High as the National Average and Growing**



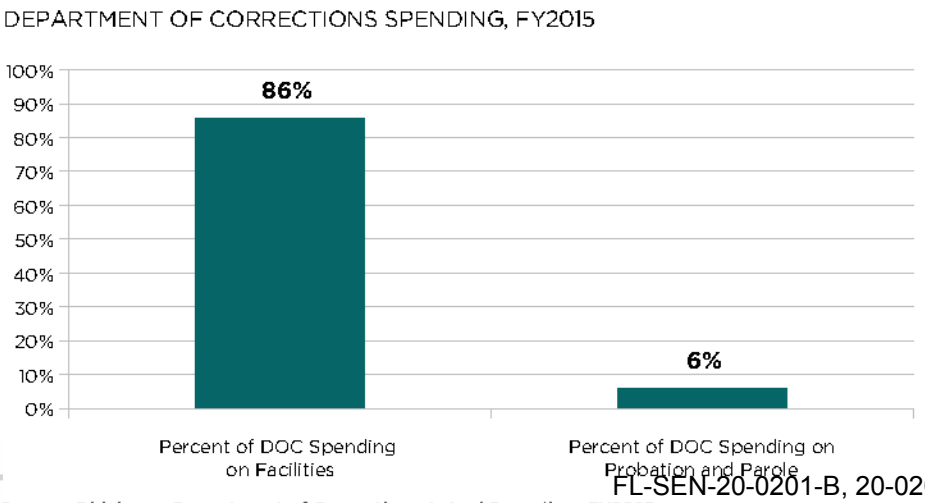
Source: Data from the Bureau of Justice Statistics, Correctional Statistical Analysis Tool

The vast majority of women going to prison in Oklahoma were serving time for drug-related crimes. Eighty-three percent of female prison admissions were for nonviolent crimes, with 42 percent for drug crimes alone. Women serving time for nonviolent offenses comprised nearly two-thirds (64 percent) of the female prison population in June 2016. The female prison population was projected to continue to grow at an alarming rate over the next 10 years.

Women in Oklahoma's prisons are much more likely to suffer from mental illness and substance abuse disorders than incarcerated men. Nearly 70 percent of Oklahoma's incarcerated women in 2016 had an actively managed or serious mental illness, compared to 44 percent of incarcerated men (See Figure 6).

AMERICAN OVERSIGHT

Figure 6. 69% of Women in Prison in Oklahoma Have an Actively Managed or Serious Mental Health Issue



Source: Data from the Oklahoma Department of Corrections, Analysis by CJI

LIMITED RESOURCES IMPEDING EFFECTIVE SUPERVISION

Ninety-four percent of Oklahoma's prison inmates eventually return to their communities, and many more individuals are placed directly on supervision at sentencing. Despite the critical importance of effective supervision for recidivism reduction, resources for probation and parole are limited by Oklahoma's reliance on costly incarceration over community-based supervision. Incarceration in Oklahoma is 13 times more expensive than probation or parole supervision ($16,341 versus $1,218 annually in FY2015) in addition to being an ineffective crime prevention tool. In FY2015, the Department of Corrections (DOC) spent 86 percent of its budget on prison facilities and only 6 percent on probation and parole despite having 45 percent of offenders supervised in the community (See Figure 7).

Figure 7. The Department of Corrections Spends 86% of its Budget on Prison Facilities and Only 6% on Probation and Parole

Source: Oklahoma Department of Corrections Actual Spending, FY2015

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004606

Diverting low-level, nonviolent offenders into effective alternatives such as supervision with treatment makes our communities stronger and saves resources for services for domestic violence victims."

– JAN PEERY AND DIANE BARKER-HEROLD, CRIME VICTIMS' ADVOCATES

While growth in the number of felony filings across the state contributed to an increase in the prison population, it had an even greater impact on the Department of Corrections' supervised population. Between FY2011 and FY2015, the community supervision population grew 16 percent. At the same time, success rates on probation as well as parole supervision fell. The Task Force found that in recent years more than half of probation revocations and 37 percent of parole revocations were for technical violations. In examining the allocation of staff resources, the Task Force discovered that Probation and Parole Services focused many of its supervision resources on low- and moderate-risk offenders rather than on high-risk offenders who are the most likely to reoffend. This practice runs counter to best practices for recidivism reduction and is an ineffective use of scarce resources.

COMPREHENSIVE LEGISLATIVE PACKAGE

In February 2017, the Task Force presented Governor Fallin and the Oklahoma Legislature with 27 policy recommendations. The legislative package, which included three bills passed in the 2017 session and seven bills in the 2018 session, reflects more than a dozen of the original Task Force recommendations. Together, the 10 bills expand access to alternatives to incarceration, adjust sentences for nonviolent offenders, and create release opportunities and improved reentry processes for those posing minimal risk to public safety. The 10 measures passed with large bipartisan majorities in both chambers after extensive vetting in legislative committees.

The legislation has four primary objectives:

Prioritize prison space for serious and violent offenders

- Applies the felony theft threshold established in 2016 to a broader group of low-level property offenses (HB 2281)
  - o Adjusts penalties for a range of low-level property offenses to match the felony theft threshold established by the legislature in 2016
  - o Creates a tiered penalty structure for property offenses by value
  - o Protects small businesses by authorizing multiple thefts committed in separate incidents or the items stolen in a single incident by multiple offenders to be combined to reach the felony threshold

VALUE OF PROPERTY	SENTENCE
$0-$1,000	Up to 12 months in jail
$1,000-$2,500	Up to 2 years in prison
$2,500-$15,000	Up to 5 years in prison
$15,000+	Up to 8 years in prison

AMERICAN OVERSIGHT

- Revises sentencing enhancements for nonviolent offenders (SB 649)
  - Distinguishes between individuals convicted of violent offenses and those with no history of violent offenses in the habitual offender statute
  - For certain eligible nonviolent offenses, revises the enhancement structure to remove any minimum sentence for offenders with a current nonviolent conviction and a nonviolent criminal history, and allows such offenders to be sentenced to no more than two times the maximum sentence otherwise authorized for a first offense
- Modifies burglary sentencing provisions to focus on those who jeopardize public safety (SB 786)
  - Establishes Burglary 3rd Degree for breaking and entering into vehicles, and eliminates the two-year mandatory minimum for Burglary 2nd Degree
- Reduces sentences for commercial drug offenses (SB 793)
  - Eliminates mandatory minimum sentences for possession with intent to distribute and reduces sentences for distribution, manufacturing, and trafficking offenses
  - Allows those convicted of possession with intent to distribute, distribution, or manufacturing to be eligible for a suspended, deferred, or probation sentence
  - Removes the sentence enhancement under the habitual offender statute and replaces it with a tiered penalty structure for repeat drug offenses
- Improves parole and release processes
  - Creates an administrative parole process for offenders convicted of nonviolent offenses who comply with case plans in prison, allowing the Pardon and Parole Board to focus on more serious offenders (HB 2286)
  - Establishes a geriatric parole release mechanism for inmates 60 or older to apply for parole consideration (HB 2286)
  - Lowers parole eligibility from one-third to one-fourth of the sentence for offenders convicted of a nonviolent offense (HB 2286)
  - Enables offenders serving life without parole for a nonviolent offense who no longer pose a threat to public safety to apply for resentencing after serving 10 years, making them eligible for parole and rehabilitation (SB 689)
  - Allows the court to depart from a mandatory minimum sentence for certain nonviolent crimes, if the mandatory sentence is not necessary for the protection of the public (SB 689)

Strengthen community supervision

- Strengthens parole and probation supervision practices (SB 689)
  - Establishes specialized supervision for sex offenders and domestic violence offenders

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004608

- Expands access to alternatives to incarceration for deferred and suspended sentences (SB 689)
  - Allows those with a prior deferred sentence to be eligible to receive a deferred sentence, and places limitations on periods of incarceration as a result of a technical violation
- Reduces financial barriers (SB 689)
  - Requires that the Court of Criminal Appeals implement procedures and rules for establishing payment plans of fines, costs, fees, and assessments for indigent offenders

Reduce recidivism and remove barriers to successful re-entry

- Enhances in-prison case planning (SB 603)
  - Requires the DOC to administer a risk and needs assessment on new inmates, and to use the results of the assessment to develop an individualized case plan to guide rehabilitation and reduce the likelihood of recidivism
- Expands opportunities for expungement (SB 650)
  - Authorizes offenders convicted of no more than one nonviolent felony offense to apply for expungement if they have no new convictions or pending charges within the last seven years, rather than 15 years under prior law
- Improves training on effective recidivism reduction for criminal justice practitioners (HB 2284)
  - Requires the District Attorney Council, the Administrative Office of the Courts, the Board of County Commissioners, public defenders, and the Oklahoma Indigent Defense System to provide training on evidence-based practices related to behavioral health and substance abuse treatment

Support victims of crime

- Improves training for those working with victims of crime to increase protection, address trauma, and improve domestic violence intervention
  - Requires trainings provided by the District Attorney Council and the Administrative Office of the Courts to include training on domestic violence and victim trauma (HB 2284)
  - Requires the Council on Law Enforcement Education and Training to train law enforcement on personal-safety planning for victims of crime during the pretrial stage of the case (SB 604)
- Establishes specialized caseloads for high public safety threats (SB 689)
  - Strengthens supervision for repeat offenders, sex offenders, and domestic violence offenders by creating specialized caseloads for offenders convicted of these offenses and allowing the court to order batterers' assessments and participation in batterers' intervention programs

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004609

INVESTING IN PRACTICES PROVEN TO REDUCE RECIDIVISM AND IMPROVE OUTCOMES IN THE COMMUNITY

Illustrating her commitment to improved public safety and funding that supports effective recidivism reduction, Governor Fallin invested more than $12 million in corrections and treatment programs in the 2018 budget:

$12 MILLION IN CORRECTIONS AND TREATMENT PROGRAMS IN THE 2018 BUDGET:

$7.1 MILLION:

- $5 million to the Department of Mental Health and Substance Abuse Services:
  - $4 million to fund risk/needs assessments
  - $1 million to fund drug and mental health treatment courts
- $2 million to restore treatment provider rate cuts
- $111,000 to the Pardon and Parole Board to fill two new field staff positions to improve the processing of pardons and paroles

$4.8 MILLION to THE DEPARTMENT OF CORRECTIONS

To fund a new Offender Management System that will allow DOC to collect important data and track probationers in a statewide unified system

$500,000 to *PAY FOR SUCCESS*

The program is proven to reduce the number of women sent to prison and mitigate the resulting impact of incarceration on their children

AMERICAN OVERSIGHT

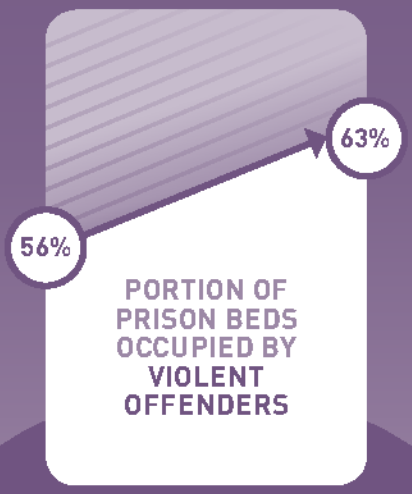
NOVEMBER 2019

JUSTICE REINVESTMENT

PRIORITIZING PRISON RESOURCES WHERE THEY MATTER MOST



The **Justice Reinvestment Initiative (JRI)** is a partnership with state leaders from all three branches of government committed to using their criminal justice data to examine and improve their systems by implementing proven, innovative, and comprehensive approaches to reduce crime, cut recidivism rates, and shift resources toward more effective public safety strategies.

A central goal for states engaging in JRI is to focus prison space on those who have committed serious, violent, or repeat offenses, freeing up resources to invest in more effective recidivism-reduction strategies.

The Justice Reinvestment Initiative is an intensive, data-driven approach that allows states to address key challenges in their criminal justice systems, including violent crime, opioid addiction, mental illness, corrections costs, and recidivism. Funded by the Bureau of Justice Assistance, the initiative supports states to increase the cost-effectiveness of their justice systems and reinvest the savings into high-performing strategies to increase public safety.

Mississippi

JRI PASSED IN 2014

MISSISSIPPI DROVE THIS CHANGE BY:

- **INCREASING** eligibility for prison alternatives such as probation, intensive supervision, and drug court for those convicted of nonviolent offenses
- **GRANTING** the option for retroactive parole eligibility for some individuals incarcerated for a nonviolent offense
- **REQUIRING** mandatory time served before parole eligibility for nonviolent offenses and doubling that time for violent offenses

Utah

JRI PASSED IN 2015

UTAH DROVE THIS CHANGE BY:

- **REDUCING** penalties for certain lower-level offenses, most of which are nonviolent
- **INCREASING** alternative sanctions in lieu of revocation to prison
- **EXPANDING** the availability of community-based drug and mental health treatment

Achieving the Goal

A key indicator of progress toward prioritizing prison resources where they matter is the increase in the proportion of a state's prison population comprised of people convicted of violent offenses versus nonviolent offenses.

Four states that received technical assistance from the Crime and Justice Institute, with funding from the Bureau of Justice Assistance, enacted policies to achieve this goal.

The main strategies to shift the composition of the states' prison populations include:

1

CREATING
tiered penalties to address violent conduct based on severity

2

FOCUSING
recidivism reduction resources on those most likely to reoffend

3

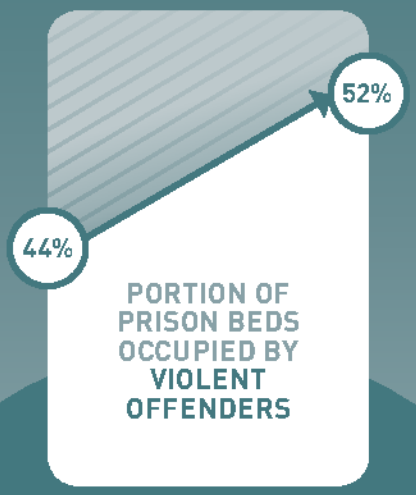
PRIORITIZING
earned time for those convicted of nonviolent offenses

4

EXPANDING
parole eligibility for those convicted of nonviolent offenses

Alaska

JRI PASSED IN 2016*



ALASKA DROVE THIS CHANGE BY:

- **EXPANDING** law enforcement arrest discretion to focus on serious offenses
- **RECLASSIFYING** certain lower-level misdemeanors as violations and some nonviolent felonies as misdemeanors
- **REDUCING** presumptive sentencing ranges for some offenses
- **INCREASING** penalties for homicides

Louisiana

JRI PASSED IN 2017

LOUISIANA DROVE THIS CHANGE BY:

- **REDUCING** penalties for some nonviolent offenses and expanding eligibility for prison alternatives and treatment for some nonviolent offenses
- **ALLOWING** more nonviolent offenders to earn time off their prison sentence through good behavior and participation in rehabilitative programs
- **EXPANDING** parole eligibility to nonviolent, non-sex offenders, including those sentenced under the habitual offender statute

This project was supported by Grant No. 2015-ZB-BX-K002 awarded by the Bureau of Justice Assistance. JRI: HELPING LAW ENFORCEMENT KEEP COMMUNITIES SAFE

October 2019

The Justice Reinvestment Initiative (JRI) helps states' local law enforcement agencies tackle public safety challenges by providing resources to address

- law enforcement training needs;
- crime-fighting strategies;
- data system upgrades;
- people experiencing behavioral health crises; and
- victims services.

INTRODUCTION

Every law enforcement agency faces a unique combination of public safety challenges, such as addressing rising violent crime rates and serving as first responders to people experiencing a mental health crisis or overdose. To respond effectively, law enforcement agencies need to collect, analyze, and utilize data in actionable ways that support strategies to prevent crime and apprehend people who commit crimes. They also need access to the latest research on evidence-based policing practices and the training to implement them.

One way states have helped law enforcement agencies tackle these challenges is through JRI, which is funded by the U.S. Department of Justice's Bureau of Justice Assistance with support from The Pew Charitable Trusts. JRI provides technical assistance to states to analyze data and understand key criminal justice challenges, including violent crime, substance use and mental health disorders, and high recidivism rates; develop policies and practices; and plan budgets accordingly to reduce crime and recidivism, improve responses to behavioral health challenges, and increase public safety.

CSG Justice Center
THE COUNCIL OF STATE GOVERNMENTS

The Council of State Governments (CSG) Justice Center is a national nonprofit, nonpartisan organization that combines the power of a membership association, representing state officials in all three branches of government, with policy and research expertise to develop strategies that increase public safety and strengthen communities. For more information about the CSG Justice Center, visit www.csgjusticecenter.org.

CJI
CRIME AND JUSTICE INSTITUTE
A Division of Community Resources for Justice

The Crime and Justice Institute bridges the gap between research and practice with data-driven solutions that drive bold, transformative improvements. With a reputation built over many decades for innovative thinking, a client-centered approach, and impartial analysis, CJI assists in developing effective policies, creates and supports implementation strategies, and drives positive change across the spectrum of the adult and juvenile justice systems. For more information, visit www.crj.org/cji.

This project was supported by Grant No. 2015-ZB-BX-K001 awarded by the Bureau of Justice Assistance. AMERICAN OVERSIGHT

ARKANSAS

Helping Law Enforcement Respond to People in the Criminal Justice System Who Have Mental Health Disorders

Each year, an estimated 1,300 of the 7,600 people in Arkansas's jails have serious mental health disorders, and most of those jails are not equipped to provide necessary treatment. Arkansas policymakers passed Justice Reinvestment legislation in 2017—Act 423, the Criminal Justice Efficiency and Safety Act—that required and funded Crisis Intervention Team (CIT) training for law enforcement officers and crisis stabilization units (CSUs). This training enabled officers to take people experiencing a mental health crisis to receive treatment at facilities designed to meet their needs instead of going to jail, thereby reducing the burden on jails and law enforcement. In the two years since Act 423's enactment,

- $6.4 million in state funding has been allocated for regional CSUs and CIT training;
- Every county and local law enforcement agency with at least 10 full-time officers has at least one officer who has received intensive CIT training, which enables them to refer people to CSUs;
- All new recruits now receive basic CIT training at the academy, and almost 1,400 veteran officers have received basic CIT training; and
- 4 CSUs serving 28 counties are fully operational.[1]

LOUISIANA

Funding Crime Victims' Services

In June 2017, Louisiana enacted a bipartisan package of 10 bills aimed at protecting public safety and making better use of correctional dollars. The Louisiana Commission on Law Enforcement (LCLE) is an organization that improves public safety by providing training to law enforcement, administering grant programs to benefit crime victims, and supporting coordination between criminal justice organizations. In 2018, LCLE distributed $1.7 million to

- Create a dedicated forensics server for the Louisiana Bureau of Investigations Cyber Crimes Unit;
- Improve electronic notifications for victims by developing a system that will interface with the courts;
- Supplement the Crime Victims' Reparations Fund; and
- Establish a new Family Justice Center in East Baton Rouge Parish.

AMERICAN OVERSIGHT

MASSACHUSETTS

Strengthening Crime and Arrest Data Collection and Reporting

The FBI has notified local law enforcement agencies across the country that by 2021, it will only accept crime and arrest data for its Uniform Crime Reporting Program using the more thorough National Incident-Based Reporting System (NIBRS) instead of the older and limited Summary Reporting System. By collecting more detailed, meaningful, and previously uncollected data about crime and arrests, NIBRS can help local law enforcement agencies identify crime patterns and improve public safety. Policymakers and the public can use the more comprehensive data to hold law enforcement agencies accountable to the communities they serve. Massachusetts was an early adopter of NIBRS; approximately 350 agencies, representing about 84 percent of all agencies in the state, reported data to the FBI using NIBRS in 2017.[2] To ensure that the rest of the state complies with the federal requirements, Senate Bill 2371, which Massachusetts enacted as part of its Justice Reinvestment effort in 2018, includes provisions requiring

- All law enforcement agencies in the state to transition to NIBRS and
- The Department of Criminal Justice Information Services to make data collected through NIBRS publicly available on its website.

MISSOURI

Providing Law Enforcement with Tools to Reduce Violent Crime and Improve Data Collection and Reporting

Missouri enacted Justice Reinvestment legislation, House Bill 1355, in 2018 to provide funding and technical assistance to help local law enforcement agencies reduce violent crime, increase community-based treatment for people in the criminal justice system who have substance use and mental health disorders, and increase support for victims, among other measures. The state developed a grant program to provide financial and technical assistance to create or improve local law enforcement pilot programs that support training opportunities, build analytical capacity and data system upgrades to NIBRS, and enhance community policing efforts. To ensure the grant program meets the needs of local law enforcement, by the end of 2019, Missouri will have

- Surveyed all police chiefs and sheriffs' offices statewide to identify barriers to evidence-based, data-driven violent crime reduction efforts and how the state can help address them;
- Completed seven regional focus groups with sheriffs, police chiefs, and supervisors from across the state to learn more about the needs of law enforcement and identify what the grant funding can do to support their communities; and
- Provided $175,000 in initial grant funding using information gained from the survey and focus groups to support training, enhance use of data, and strengthen policing practices.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004616

NEVADA

Providing Law Enforcement with Tools and Resources to Better Respond to People with Behavioral Health Needs

Through JRI analysis, Nevada's Advisory Commission on the Administration of Justice (ACAJ) determined that given law enforcement's role as the first point of contact for people entering the criminal justice system, they needed additional tools and resources to better respond to people with behavioral health needs. ACAJ's subsequent recommendations were translated into Assembly Bill (AB) 236. Enacted in June 2019, AB 236 requires

- The development of standards for CIT programs to train law enforcement officers to identify signs and symptoms of mental health disorders and provide them with skills to de-escalate situations involving people experiencing a mental health crisis;
- The establishment of a Mental Health Field Response Grant Program to encourage expansion of innovative law enforcement programs;
- Averted costs as a result of AB 236 to be calculated and funding to be prioritized for targeted areas such as behavioral health; and
- The establishment of a JRI local coordinating council that will allow representatives from each county to identify public safety needs and recommend grants for local initiatives, including law enforcement programs.

OKLAHOMA

Funding Local Law Enforcement Agencies to Reduce Violent Crime

Oklahoma state policymakers created the Safe Oklahoma Grant Program in 2012 to fund law enforcement-led strategies to reduce violent crime as part of the state's Justice Reinvestment legislation, House Bill 3052. The grant program provides funding to target five key areas related to violent-crime prevention: implementing evidence-based policing strategies, increasing technological capacity to support crime prevention, improving analytical capacity, engaging with community partners, and providing victim services.

- Oklahoma awarded more than $10 million to 46 local law enforcement agencies across the state between 2012 and 2018 as part of the Safe Oklahoma Grant Program.
- Oklahoma City received funding to implement proactive policing strategies and nuisance abatement activities and develop community partnerships in a high-crime target area.
- The Oklahoma State Bureau of Investigations reported greater reductions in crime in the target area than Oklahoma City overall between 2013 and 2016 (see table below).[3]

Change in Number of Violent Crimes in Target Area Compared to Oklahoma City Overall, 2013–2016

	Target Area	Oklahoma City
Violent Crime Overall	-21.6%	-6.5%
Murder	-50%	-3.2%
Rape	-60%	-8.7%
Robbery	-29.6%	-14%
Aggravated Assault	-11.6%	-3.6%

AMERICAN OVERSIGHT

OREGON

Investing in Law Enforcement Efforts to Use Research-Based Policing Practices

In 2013, Oregon lawmakers passed Justice Reinvestment legislation (House Bill 3194) that created and provided initial funding for the Oregon Center for Policing Excellence (CPE) to develop and deliver training and resources that promote the use of evidence-based policing. In collaboration with the Oregon Criminal Justice Commission, CPE developed the Oregon Knowledge Bank, an online resource that highlights innovative and evidence-based policing, corrections, and community supervision programs operating in the state; provides research conducted on Oregon's criminal justice initiatives; and offers public safety agency profiles.

- The Oregon Criminal Justice Commission provided $3.46 million in the 2013–2015 biennium for the state police to spend on its crime lab and other programs and $2.5 million in the 2017–2019 biennium across seven counties to fund law enforcement and circuit courts.
- Since establishing an annual conference on problem-oriented policing in 2015, CPE has held four conferences with approximately 100 law enforcement officers and/or analyst attendees each year.
- CPE has trained newly promoted public safety supervisors and/or managers on research-informed decision-making since 2014 and public safety professionals and/or behavioral health practitioners with specialized behavioral health training since 2016.
- CPE has incorporated the Oregon Knowledge Bank into its basic police training and its leadership curriculum. The website had attracted almost 30,000 new visitors by 2017, two years after its development.[4]

PENNSYLVANIA

Investing in Tools, Tactics, and Training to Increase Public Safety

In 2012, Pennsylvania enacted Justice Reinvestment legislation (Acts 122 and 196) that established the legislature's funding priorities through a statutory formula. The formula required a portion of the money the state saved through JRI policy changes that reduced incarceration costs to be used to improve public safety and the quality of supervision by funding local law enforcement and county probation supervision. Five years after enacting the legislation, Pennsylvania has

- Provided almost $8.5 million in law enforcement grants for a range of projects, including law enforcement equipment and technology updates; CIT, de-escalation, and use of force training; strategies to prevent opioid overdose deaths; community outreach and relationship building; enhancements to data collection; and improvements to arrest fingerprint submissions; and
- Granted more than $5 million to county probation departments for upgrading equipment and technology; implementing risk assessments; using cognitive behavioral programs; and improving communication and information sharing with law enforcement.[5]

LOUISIANA'S REINVESTMENT INTO RECIDIVISM REDUCTION AND VICTIM SERVICES

FEBRUARY 2019

The Crime and Justice Institute (CJI), a division of Community Resources for Justice, works to improve public safety and the delivery of justice by providing nonpartisan technical assistance, research, and other services to improve outcomes across the spectrum of the adult and juvenile justice systems, from policing and pretrial through reentry. CJI provides direct technical assistance, assessment, implementation, research, data analysis, training, facilitation, and more. We take pride in our ability to improve evidence-based practices in public safety agencies and gain organizational acceptance of those practices. We create realistic implementation plans, put them into practice, and evaluate their effectiveness to enhance the sustainability of policies, practices, and interventions.

Find out more at www.crj.org/cji.

OVERVIEW

One year into Louisiana's implementation of landmark criminal justice reforms, the state no longer leads the nation in imprisonment and has earmarked millions of dollars in savings for reinvestment into programs that reduce recidivism and support crime victims.

In June 2017, Louisiana Governor John Bel Edwards signed into law a bipartisan package of 10 bills aimed at protecting public safety and making better use of correctional dollars. At the time, Louisiana's incarceration rate was nearly twice the national average, costing the state almost $700 million in corrections spending annually. Despite this enormous public investment, one in three inmates released from prison was re-incarcerated within three years.

The policy package was the result of months of study by the Louisiana Justice Reinvestment Task Force, an inter-branch, bipartisan panel of experts. The Task Force found that Louisiana had been sending a growing share of people to prison rather than prison alternatives,[1] yet leading criminologists have found that incarceration does not reduce recidivism more than non-custodial sanctions.[2] This trend was partly due to legislative restrictions on the use of community supervision, treatment, or other approaches such as specialty courts. During this time of more prison and less use of alternatives, the recidivism rate remained unchanged.

The new laws put in place policies designed to steer people convicted of less serious crimes away from prison, strengthen alternatives to incarceration, reduce prison terms for those who can be safely supervised in the community, and remove barriers to successful reentry.

Louisiana sought support from the Department of Justice's Bureau of Justice Assistance (BJA) to implement the new policies, with the Crime and Justice Institute partnering with state leaders to carefully put the policies into action. Louisiana has already begun to see significant results, including a drop in the prison population and larger-than-expected savings that will support state agencies and local partners in continued successful rollout.

[1] The full taskforce report can be found here: http://gov.louisiana.gov/assets/docs/Issues/Criminal-Justice/Justice-Reinvestment-Task-Force-Report_2017.pdf

Matthew Snodgrass, The Effect of Incarceration on Re-Offending: Evidence from a Natural Experiment in Pennsylvania (2013).

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004620

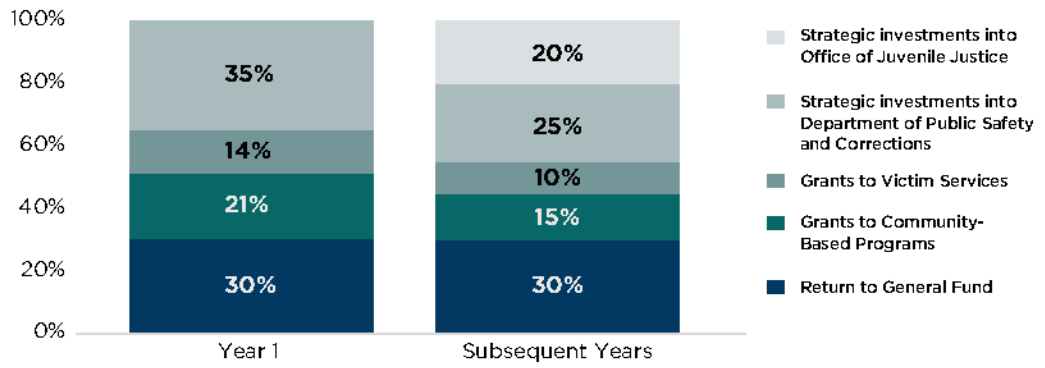
I'm extremely proud of how we're making a huge difference in Louisiana today and for future generations through the passage and implementation of these historic criminal justice reforms. We're saving the state millions of dollars and reinvesting the savings into programs that reduce recidivism, support victims, and improve public safety. In addition, Louisiana no longer has the nation's highest incarceration rate, and we're moving in the right direction to make Louisiana a safer place."

—DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONS SECRETARY JAMES M. LE BLANC

BACKGROUND

For more than two decades, Louisiana had the highest incarceration rate in the nation, fueled partly by stiff mandatory sentencing laws and restrictive parole practices, including for lower-level, nonviolent offenders. By 2017, state spending on corrections was approaching $700 million, yet this increased investment was not reducing recidivism.

In 2016, Louisiana leaders requested help through BJA's Justice Reinvestment Initiative (JRI) to develop solutions that would ease the strain on state budgets while reducing recidivism. Through the JRI process, the Louisiana Justice Reinvestment Task Force recommended a package of policy recommendations that became the basis for the 2017 legislation, which stands as the most comprehensive criminal justice improvement effort in the state's history.



According to data from the Department of Public Safety and Corrections, the makeup of Louisiana's prison population has shifted to make smarter use of the limited resources. The number of people imprisoned for nonviolent offenses has dropped by 20 percent, opening up prison space and resources to focus more on individuals who pose the largest threat to the public. As a result, a majority of Louisiana's prison population (52 percent, as of the first quarter of 2018) is now incarcerated for a violent offense. The overall prison population decreased 7.6 percent since implementation of the policies began.

REINVESTING JRI SAVINGS

These shifts in the correctional population resulted in significant savings, 70 percent of which is slated for reinvestment into programs that reduce recidivism and support victims of crime; this allocation, shown in the graph below, is a statutory requirement that resulted from the Justice Reinvestment effort.[3]

In October 2018, the Department of Public Safety and Corrections (DPS&C) reported a total savings of $12.2 million in the first year of implementation, double the original projected savings of $6.1 million. Of that amount, $8.5 million is going back into recidivism reduction and victim services.

DISTRIBUTION OF REINVESTMENT DOLLARS

Given the required statutory framework for reinvestment, Louisiana policymakers have made available the following amounts for the coming year:

1. **$4.27 million for targeted Department of Public Safety & Corrections investments**
2. **$1.7 million for victim services grants**
3. **$2.53 million in grants to community-based programs**

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004621

[3] Reinvestment requirements are laid out in HB 489, one of the 10 bills in the JRI package.

TARGETED INVESTMENTS INTO DEPARTMENT OF PUBLIC SAFETY & CORRECTIONS

The Department intends to use first-year reinvestment funding to support the following priorities:

- Increase programming for state inmates housed at local jails;
- Enhance and expand Regional Reentry Centers;
- Increase Probation and Parole staffing and Day Reporting Centers;
- Launch a Transitional Housing pilot program;
- Open a new Reception Center to conduct assessments for new inmates; and
- Expand Specialty Courts.

GRANTS TO VICTIM SERVICES

The reinvestment money for victim services will be allocated by the Louisiana Commission on Law Enforcement. The Commission plans to use first-year reinvestment funding to:

- Supplement the Crime Victims' Reparations Fund;
- Establish a new Family Justice Center in East Baton Rouge Parish;
- Improve electronic notifications for victims by developing a system that will interface with all 64 parish clerks of court; and
- Provide funding to the Louisiana Bureau of Investigations for a dedicated forensics server for its Cyber Crimes Unit.

GRANTS TO COMMUNITY-BASED PROGRAMS

To distribute reinvestment funds earmarked for grants to community-based programs, DPS&C created a Community Incentive Grant Program and issued a Request for Proposals (RFP) to distribute the funds effectively and transparently.

The department sought proposals for programs or services to accomplish one or more of the following:

1. **Prioritize incarceration for serious and violent offenders** by expanding alternatives to prison such as pretrial intervention and/or diversion programs;
2. **Reduce crime among those returning to the community** by improving and expanding reentry resources such as employment and employment readiness, transportation, behavioral health care (mental health and substance use treatment), family reunification, education and/or vocational training, mentoring and peer support, and other wraparound services; and
3. **Improve community coordination of reentry resources.**

For the first year of the Community Incentive Grant program, the department appropriated $2.5 million for nonprofit organizations in the five parishes that account for 40 percent of the state's incarcerated population: East Baton Rouge, Caddo, St. Tammany, Jefferson, and Orleans. This first year of reinvestment will serve as a pilot, funding the development of innovative programs that can be expanded to additional parishes in future years.

At the end of October, the department announced awards to 11 nonprofits, some of which operate in multiple parishes. The organizations that received awards will provide a range of services including life skills, peer support, wraparound services, reentry programs, job training, behavioral health support, and legal services.[4] With this funding, these organizations will expand their work and deliver programs to help individuals transition back to the community after incarceration.

[4] All of the first year grantees will focus on priorities 2 (reducing returns to prison) and 3 (improving community coordination of reentry resources). No grantees were selected to focus on expanding alternative to prison.

AMERICAN OVERSIGHT FL-SEN-20-0201-B, 20-0202-A-004622

A SOLID PATH FORWARD

Since passing the most significant criminal justice reform in state history, Louisiana has made meaningful progress in implementing new policies and practices designed to protect public safety and better utilize state corrections dollars.

Though implementation is a long process, the reforms have already had a dramatic impact, moving Louisiana out of its long-held top spot as the most incarcerated state in the nation and surpassing expectations for savings. By channeling $8.5 million in savings into innovative and evidence-based programs, Louisiana leaders are putting the state on a solid path for the positive impact of criminal justice reform to continue and expand.

This project was supported by Grant No. 2015-ZB-BX-K002 awarded by the Bureau of Justice Assistance. The Bureau of Justice Assistance is a component of the Department of Justice's Office of Justice Programs, which also includes the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, the Office for Victims of Crime, and the SMART Office. 2012 Georgia Public Safety Reform

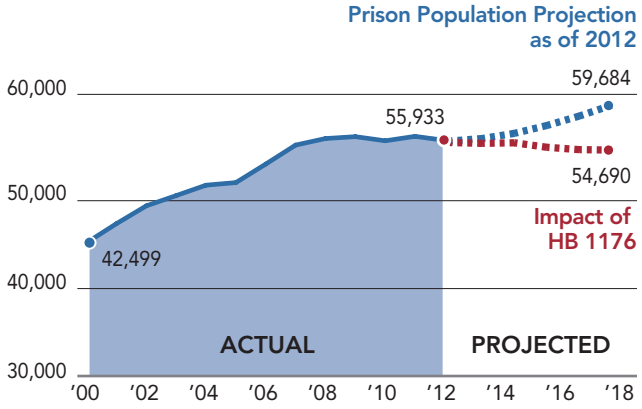
Legislation to Reduce Recidivism and Cut Corrections Costs

Highlights



Problem: Since 1990, Georgia's prison population more than doubled to nearly 56,000 inmates. Today, the state spends more than $1 billion annually on corrections. Despite this growth, the proportion of inmates who were reconvicted of a felony within three years of release remained at nearly 30 percent during the past decade. If current policies had remained, the population was projected to grow 8 percent over five years at a cost of $264 million.

Findings: An extensive review of data by the Special Council on Criminal Justice Reform for Georgians (Council) revealed that drug and property offenders accounted for almost 60 percent of prison admissions. Judges had few viable sentencing options other than prison, and probation and parole agencies lacked the authority and resources to effectively supervise offenders in the community.

Reforms: With technical assistance from the Pew Center on the States and its partners, the Council issued recommendations to improve public safety by focusing prison space on serious offenders, strengthening probation and alternative sentencing options, relieving local jail overcrowding, and improving performance measurement. HB 1176, based on the Council's proposals, passed both chambers of the General Assembly unanimously and was signed by Governor Nathan Deal in May 2012.

The Impact of Public Safety Reform

HB 1176 is projected to reduce the prison population by nearly 5,000 beds over the next five years, saving taxpayers at least $264 million.[1]

Impact: HB 1176 is projected to avert all the anticipated growth in prison population and costs over the next five years, saving at least $264 million. Through accompanying budget initiatives, the state redirected more than $17 million of the savings into efforts to reduce reoffending. Governor Deal signed an Executive Order to continue the Council to monitor and expand on the reforms.

AMERICAN OVERSIGHT

Background

Between 1990 and 2011, the prison population in Georgia more than doubled to nearly 56,000 inmates.[2] Since 2000, the inmate population grew 35 percent.[3] Recent data show that one in 70 Georgia adults was behind bars (in state, local, or federal facilities), compared with the national incarceration rate of one in 100 adults, giving Georgia the fourth highest incarceration rate in the country.[4]

This scale of correctional control and growth came at a substantial cost to Georgia's taxpayers. Today, the state spends more than $1 billion annually on corrections,[5] up from $492 million in fiscal year 1990.[6] With more than $100 million in costs outside the Department of Corrections budget, including capital expenditures and retiree health care contributions, the total cost of the Georgia prison system in fiscal year 2010 was $1.13 billion.[7]

> "We studied this important issue for a year, met with all the stakeholders, weighed the pros and cons, and delivered a product that passed with total support from both sides of the aisle. That's amazing, particularly on an issue that's so often at the center of partisan divides."
>
> — Gov. Nathan Deal

Yet, despite this growth in population and spending, Georgia taxpayers have not received a sufficient public safety return on their corrections dollars: The proportion of inmates who are reconvicted of a felony within three years of release has remained unchanged at nearly 30 percent throughout the past decade.[8]

If current policies had remained in place, analysis at the time indicated that Georgia's prison population would rise by another 8 percent to reach nearly 60,000 inmates within five years.[9] With the state's existing prison facilities filled to 107 percent of capacity,[10] continued inmate growth would have created substantial taxpayer burdens. Absent policy reform, the state faced the need to spend an additional $264 million to expand capacity.[11]

Special Council on Criminal Justice Reform for Georgians

Seeking to protect public safety while controlling the growth of prison costs, the 2011 Georgia General Assembly passed HB 265 to establish the bipartisan, inter-branch Special Council on Criminal

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004625

Justice Reform for Georgians (Council). The legislation also created a Special Joint Committee on Georgia Criminal Justice Reform (Joint Committee), comprised of members from both legislative chambers, to consider the recommendations of the Council in the 2012 legislative session.

Beginning in the summer of 2011, the Council members (see sidebar on page five) began a detailed analysis of Georgia's sentencing and corrections data to identify the factors driving the state's prison growth. They also audited state policies and practices and solicited input from a wide range of stakeholders, including prosecutors, sheriffs, crime victim advocates, and county officials. The Council used that information to develop research-based, fiscally sound policy options to protect public safety, hold offenders accountable, and control corrections costs.

The Council received technical assistance from the Public Safety Performance Project of the Pew Center on the States. Pew and its partners, the Crime and Justice Institute and Applied Research Services, Inc., helped the Council analyze current sentencing and corrections policies and generate data-driven policy options.

Key Findings

The Council determined that the state's prison growth was not explained by an increase in crime. Despite some year-to-year fluctuations, violent and property crime rates have declined in Georgia as they have in most states. In the past decade, violent and property crime rates have fallen 20 and 21 percent, respectively.[12] Despite a resident population that has grown significantly, the total number of violent crimes reported to police in 2009 is the same as it was in 1999.[13]

The Council's extensive data analysis revealed that Georgia's inmate population growth was due in large part to policy decisions about who is being sent to prison and for how long. The Council identified several specific challenges, including:

High Number of Lower-Risk Offenders in Prison: The data showed that drug and property offenders represented almost 60 percent of all prison admissions,[14] and the average length of stay behind bars for drug and property crimes had more than tripled between 1990 and 2010.[15]

Importantly, many of these offenders were identified as lower risk to reoffend. In 2010, Georgia courts sent more than 5,000 lower-risk drug and property offenders to prison who had never been to prison before, accounting for 25 percent of all admissions that year.[16] Looking more

> "There's plenty of evidence that the way we have addressed these types of offenders in the past has not been effective."
>
> — Rep. Jay Neal, R-Lafayette

closely at drug admissions, more than 3,200 offenders were admitted to prison in 2010 on a drug possession conviction (as opposed to a sales or trafficking conviction), and two-thirds of these inmates were assessed as lower risk to reoffend.[17]

Insufficient Supervision Resources: The Council also identified several challenges to the state's ability to effectively supervise offenders in the community and provide interventions to reduce the likelihood of reoffending. Georgia's probation and parole agencies operate some effective programs using evidence-based tools to identify and supervise higher-risk offenders, but the Council's analysis showed that these options were limited and that supervision agencies did not have the resources required to supervise all offenders effectively.

Lack of Options: The Council found that evidence-based services and programs, especially substance abuse and mental health, were either insufficient or unavailable in many areas of the state. For example, the state's existing drug courts covered less than 50 percent of Georgia's counties.[18] Judges and prosecutors alike indicated that expansion of these and other programs, such as Day Reporting Centers, would help them divert greater numbers of lower-risk offenders from prison and achieve better public safety outcomes at a lower cost.

Local Jail Backlog: Local jails in Georgia routinely hold inmates awaiting transfer to state facilities, including newly sentenced offenders and those waiting for a bed at a specific facility. The state had more than 800 inmates housed in county jails awaiting beds at Probation Detention Centers (PDC) and approximately 750 inmates in jails awaiting beds at Residential Substance Abuse Treatment (RSAT) programs.[19] This backlog has been a constant source of tension between state and local governments due to the costs of housing offenders awaiting a transfer.

Outcome Measurement: Most performance measures at the Georgia Department of Corrections track processes such as case flow (e.g., new cases received, cases discharged, cases remaining), activity counts (e.g., number of office or field contacts completed, number of drug tests administered), or point-in-time snapshots (e.g., average caseload size, types of cases supervised). Such measures provide information about the agency workload but fail to address the results achieved by the agency. A comprehensive performance measurement system also tracks and reports on key outcome measures such as recidivism, employment, substance use, and payment of victim restitution.

AMERICAN OVERSIGHT

The Council Report

Council members acknowledged the role that increased incarceration played in helping reduce crime, but saw its mission as finding the best way to deploy state resources to produce steeper drops in crime and recidivism. Based on the data analysis and the assessment of the correctional system, in November 2011 the Council issued a report detailing a broad spectrum of proposals designed to improve public safety, hold offenders accountable, and control corrections costs.[20]

The policy options in the report focused on concentrating prison space on violent and career criminals and more effectively punishing low-level drug users and property offenders through alternatives. Where fiscal savings were achieved, the Council recommended that a portion should be reinvested into those options proven to reduce recidivism and improve public safety. These included expanding the availability of drug and other accountability courts and strengthening community supervision. The Council also proposed investing in effective information and performance measurement systems.

This report was forwarded to the governor, lieutenant governor, speaker of the House of Representatives, and chief justice of the Supreme Court for full consideration by the Joint Committee. At the request of Governor Deal, the policy options in the Council report were translated into legislation and introduced as House Bill 1176 by Representative Rich Golick, co-chair of the Joint Committee.

Superior Court Judge, Atlanta Judicial Circuit

Legislative Reform Package

The Georgia General Assembly unanimously passed HB 1176, with votes of 162-0 in the House and 51-0 in the Senate.[21] The law is expected to avert the projected 8 percent increase in the prison population and the associated cumulative cost of $264 million. Through accompanying budget initiatives, the General Assembly also reinvested more than $17 million of the prison savings into measures designed to reduce reoffending. In addition, Governor Deal signed an Executive Order to reassemble the Council in order to make recommendations on additional areas of improvement to the criminal justice system to protect public safety by reducing recidivism.

How the Public Safety Reform Works

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004629

1. Focuses Prison Space on Serious Offenders

The law reflects a consensus that serious offenders deserve long prison sentences but that many nonviolent offenders can be sentenced to shorter periods of incarceration or effectively supervised in the community. This tiered approach is cost effective and helps ensure that prison beds are available for more serious offenders.

- **Creates degrees of burglary based on the seriousness of the offense.** Increases penalties for serious burglaries and establishes a graduated scale of penalties so that burglary of a residence is punished more severely than burglary of a non-residence.
- **Creates degrees of forgery based on the seriousness of the offense.** Increases penalties for serious forgeries and establishes a graduated scale of penalties based on the type of forgery.
- **Creates levels of theft based on the seriousness of the theft.** Raises the felony theft threshold from $500, which was set in 1982, to $1,500, and creates a graduated scale of penalties for felony theft based on the value of the stolen items. Raises the penalty for the most serious theft (above $25,000) and increases the felony shoplifting threshold from $300 to $500.
- **Revises penalties for simple possession of drugs.** Creates degrees of drug possession based on the weight of drugs and establishes a graduated scale of penalties, with higher penalties for third and subsequent convictions. Also restricts drug possession offenses from applying to the recidivist statute.
- **Reinvests $175,000 to develop a front-end risk assessment tool.** Provides funding to create a new tool to assist judges at sentencing in identifying lower-risk, nonviolent offenders who could be safely diverted from prison.

> “HB 1176 outlines much-needed reforms that will improve public safety, lower recidivism rates, and bring real costs savings to Georgia taxpayers.”
>
> — Sen. Bill Hamrick, R-Carrollton

2. Reduces Recidivism by Strengthening Probation and Alternative Sentencing Options

The new law expands cost-effective sentencing options for the courts and improves the state's ability to reduce recidivism.

- **Allows the courts to order electronic monitoring** with all offenders.
- **Allows probation to impose graduated sanctions** that swiftly and certainly respond to offender violations.

> "[I]n addressing the root problem, we're going to keep people from committing other crimes and reunite them with their families and make them taxpayers, not tax burdens."
>
> — Chief Justice Carol Hunstein

- **Requires the Board of Corrections to ensure the use of evidence-based practices**, including a risk and needs assessment tool, to guide decisions relating to the management and treatment of inmates and probationers.
- **Requires the Administrative Office of the Courts to establish policies and practices for drug and mental health court divisions**, such as the use of tools that identify higher-risk offenders and develop supervision plans that reduce recidivism.
- **Creates a certification and review process** for drug and mental health court divisions and restricts state funds to certified programs.
- **Reinvests $11.6 million of averted prison spending into accountability courts** that focus on drug offenders and those with mental illness.
- **Reinvests $5.7 million of prison savings into new Residential Substance Abuse Treatment (RSAT) programs** to reduce recidivism among inmates with drug and alcohol addictions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004631

3. Relieves Local Jail Crowding

The new law relieves crowding in local jails by reducing the number of state-responsible inmates awaiting transfer to state facilities.

- **Streamlines the transfer of information and inmates from the counties to the state.** Requires sentencing "packets" to be submitted electronically to the state Department of Corrections from counties to reduce the time spent in jail awaiting transfer to prison.
- **Ensures the effective use of Probation Detention Centers (PDC)** by capping sentences to PDCs at 180 days, thereby reducing time spent in jail by those awaiting transfer to a PDC.

4. Improves Performance Measurement

To help state policy makers and corrections officials assess and manage the overall performance of the system, the new law creates a results-oriented reporting and accountability system.

- **Requires the Department of Corrections to collect, analyze, and report on the performance outcomes** related to the treatment programs for inmates and probationers, including the impact on recidivism.

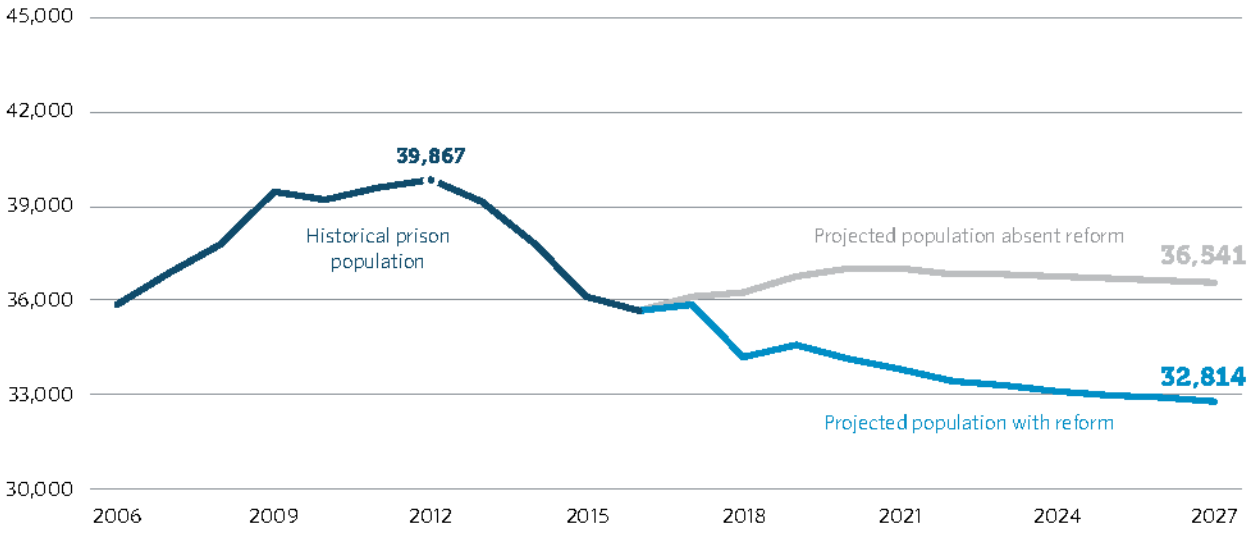
A brief from THE PEW CHARITABLE TRUSTS | March 2018

Louisiana's 2017 Criminal Justice Reforms

The most incarcerated state changes course



Overview

On June 15, 2017, Louisiana Governor John Bel Edwards (D) signed the most comprehensive criminal justice reform in state history. Six Republicans, two Democrats, and one independent authored the bipartisan package of 10 bills, which should enable Louisiana to shed its long-held status as the state with the nation's highest imprisonment rate by the end of 2018. Their efforts received widespread support, earning endorsements from the state district attorneys association, business and faith leaders, and diverse coalitions of advocates and community members. The measures steer people convicted of less serious crimes away from prison, strengthen incarceration alternatives, reduce prison terms for those who can be safely supervised in the community, and remove barriers to re-entry. Over 10 years, the reforms are projected to reduce the prison and community supervision populations by 10 and 12 percent, respectively. Lawmakers also committed to reinvest 70 percent of the estimated $262 million savings in local programs that reduce reoffending and support crime victims.

Bill Sponsors

A bipartisan group of lawmakers sponsored 10 bills that became Louisiana's comprehensive criminal justice reform package. (See pages 10-18 for more information.)

Senator Dan Claitor (R):
S.B. 16 permits most people originally sentenced to life as juveniles to be considered for parole after 25 years in prison.

Senator Daniel Martiny (R):
S.B. 139 broadens eligibility for parole and other prison release provisions; expands eligibility for probation; reduces maximum probation terms; and adopts evidence-based sanctions and incentives to improve community supervision outcomes.

Senate President John Alario (R):
S.B. 220 and S.B. 221 reduce penalties for drug, property, and other nonviolent crimes and modify habitual-offender penalties to make them comparable to those in other states.

Representative Stephen Dwight (R):
H.B. 116 streamlines registration for victim notification and ensures that victims can request safety measures as a condition of a prisoner's release.

Representative Tanner Magee (R):
H.B. 249 tailors criminal justice fines and fees to a defendant's ability to pay by creating a payment plan and debt forgiveness incentive for those facing financial hardship.

Representative Walt Leger (D):
H.B. 489 mandates the collection of data to monitor the reforms and requires the state to redirect 70 percent of corrections savings to community-based prison alternatives, victim services, and recidivism-reduction programs in state prisons and parish jails.

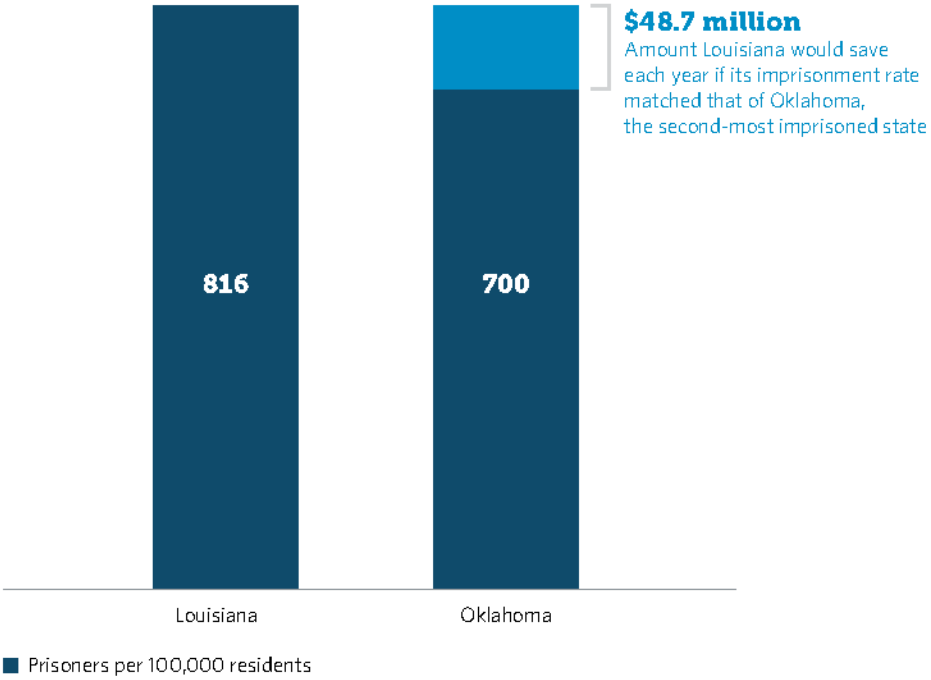
Representative Julie Emerson (R):
H.B. 519 simplifies the occupational licensing process for state residents with criminal convictions.

Representative Joseph Marino (I):
H.B. 680 temporarily suspends child support obligations for inmates incarcerated for more than six months.

Representative Helena Moreno (D):
H.B. 681 lifts the ban on public assistance benefits for people with drug convictions.

AMERICAN OVERSIGHT

Background



Louisiana's prison population peaked in 2012 at roughly 40,000, a fivefold increase since the late 1970s, growing much faster than the state's overall population.[1] Between 2012 and 2015, statutory and administrative changes that expanded evidence-based correctional practices helped lower the number of prisoners by 9 percent while crime also declined.[2] Even with this reduction, however, Louisiana still had more prisoners per capita than any other state and nearly double the national average.[3]

These high levels of imprisonment came at great cost to Louisiana taxpayers. In fiscal year 2017, lawmakers appropriated $625 million for adult corrections—the state's third-largest expenditure behind education and health care.[4] The consequences of these high costs can be best understood by comparing Louisiana with other states. For example, had Louisiana's 2014 imprisonment rate been the same as Oklahoma's—the nation's second-most-imprisoned state—Louisiana would have spent roughly $49 million less annually.[5] (See Figure 2.) Highlighting the burden of being number one in imprisonment, Gov. Edwards and Department of Corrections Secretary James LeBlanc called for reforms that would "reduce the state prison population significantly with the modest goal of not having the highest incarceration rate in the country."[6]

Louisiana Justice Reinvestment Task Force

In 2015, the state Legislature created the Louisiana Justice Reinvestment Task Force to develop recommendations for sentencing and corrections policies and practices that would improve public safety and reduce spending. The task force consisted of legislators, judges, prosecutors, defense attorneys, law enforcement officials, the corrections secretary, and the state sentencing commission chair, as well as faith leaders and victim and community advocates. It held public meetings, town halls, and victim advocate roundtables and formed subgroups to generate policy options for sentencing, community corrections, and budgetary issues. The Department of Corrections and the courts contributed staff support, and The Pew Charitable Trusts and the Crime and Justice Institute provided nonpartisan data analysis and technical assistance as part of the Justice Reinvestment Initiative, a public-private partnership between Pew and the U.S. Department of Justice's Bureau of Justice Assistance.

Task force members

Secretary James LeBlanc (Chair), Louisiana Department of Corrections

Sheriff Michael Cazes, West Baton Rouge

Senator Dan Claitor, Louisiana state Senate

Flozell Daniels, Foundation for Louisiana

Public Defender James Dixon, Louisiana Public Defender Board

District Attorney Bofill Duhé, 16th Judicial District

Judge Bonnie Jackson, 19th Judicial District Court

Chief Justice Bernette Johnson, Louisiana Supreme Court

Judge Lori Landry, 16th Judicial District Court

Representative Terry Landry, Louisiana House of Representatives

Representative Walt Leger, Louisiana House of Representatives

Representative Sherman Mack, Louisiana House of Representatives

Senator Daniel Martiny, Louisiana state Senate

Reverend Gene Mills, Louisiana Family Forum

Judge Laurie White, Louisiana Sentencing Commission

> "[T]he passage of the sprawling 10-bill incarceration package … is the boldest change of direction for Louisiana since the reform of New Orleans public schools after Hurricane Katrina."
>

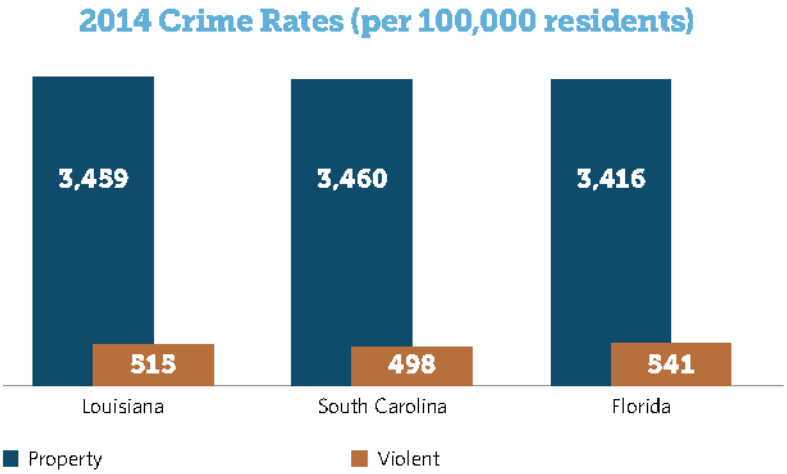
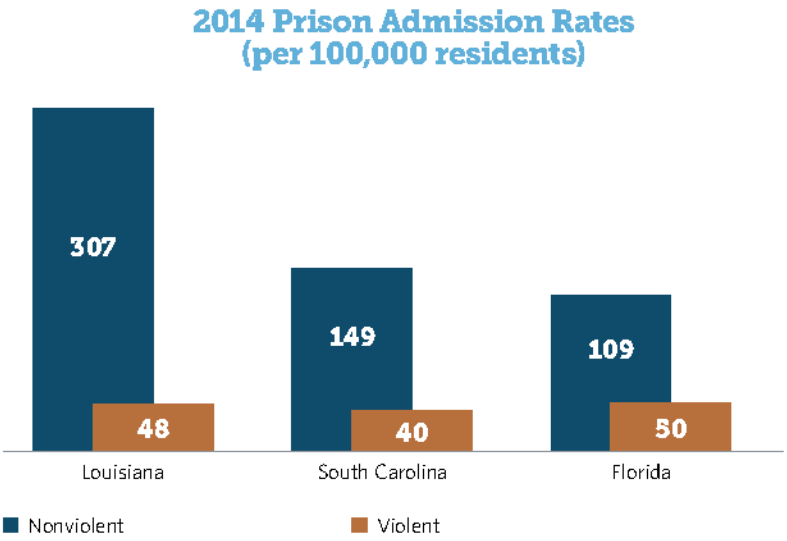
AMERICAN OVERSIGHT

Key findings

The task force identified six principal factors that contributed to Louisiana's highest-in-the-nation imprisonment rate.



Unusually high admissions for nonviolent crimes



Although Louisiana's crime rates were nearly identical to South Carolina's and Florida's, the state was sending people to prison for nonviolent crimes at twice and nearly three times the rates of those states, respectively.[7] (See Figure 3.) The 10 most common convictions resulting in prison sentences in Louisiana were nonviolent, led by drug possession.[8]

Figure 3

Louisiana Sent More People to Prison for Nonviolent Offenses Than Comparable States Did

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004640

Longer prison terms and narrower parole eligibility

The task force found that Louisiana inmates were entering prison with longer sentences and fewer opportunities to earn release than those admitted five to 10 years earlier. Between 2010 and 2015, average sentence lengths for common nonviolent crimes increased by 10 months.[9] Further, the number of inmates who had been in prison for at least 10 years increased by more than 2,400 between 2006 and 2015, accounting for nearly 1 in 5 state prisoners by the end of that decade. In addition, nearly 5,000 individuals were serving life sentences without the possibility of parole, many of whom would have been eligible for parole in other Southern states, including Alabama, Arkansas, Georgia, Mississippi, and Texas.[10]

Meanwhile, the Legislature adopted 80 new restrictions on parole eligibility between 2006 and 2015. Two-thirds of those new rules applied to nonviolent crimes.[11]

Large and growing number of people supervised in the community

Long supervision terms—stretching well beyond the period when probationers and parolees were most likely to reoffend—contributed to caseloads averaging 139 people per officer.[12] At the end of 2015, Louisiana's probation and parole officers supervised more than 70,000 people, an increase of more than 10,000 in just 10 years. The task force found that these large caseloads led to high failure rates, which in turn accounted for most of Louisiana's annual prison admissions; that sanctions for violating supervision conditions were inconsistently applied; and that incentives for compliance were inadequate.[13]

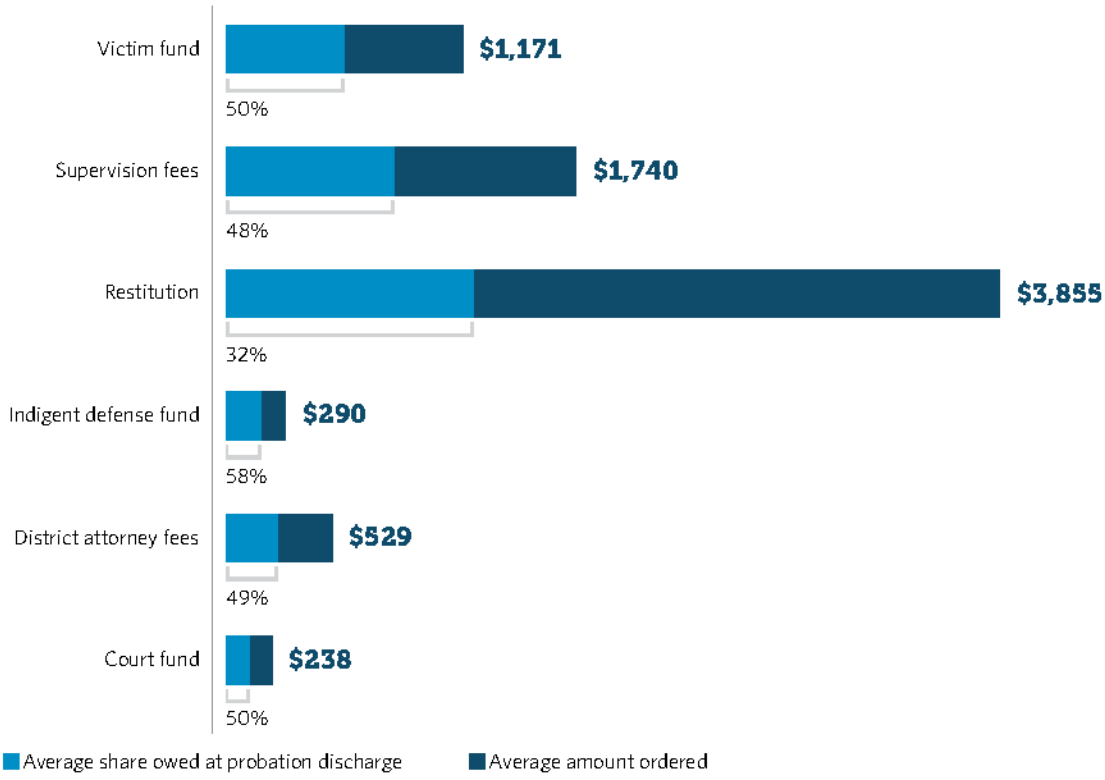
> "The business community is committed to being part of the solution by expanding job opportunities and hiring rehabilitated inmates, but lawmakers must take the first step by casting their votes in favor of reform."
>
> **Stephen Waguespack,** president and CEO, Louisiana Association of Business and Industry (guest column, *The Advocate*, May 24, 2017)

Significant criminal justice debts and other barriers to successful re-entry

Beyond requirements that people convicted of crimes pay restitution to crime victims, plus fines collected as a part of their punishment, Louisiana's statutes authorized the imposition of hundreds of additional fees on those convicted of crimes. These include payments to cover the costs of law enforcement, prosecution, court services, and supervision as well as local jurisdiction surcharges and offense-specific charges for DWIs, drug-related crimes, and other offenses.[14] Although defendants typically agree to fines, fees, and costs as part of plea agreements, the court in most cases was not making determinations regarding their financial ability to meet those obligations.[15] Louisiana's statutes offered no guidance on the use of waivers for criminal justice debt, nor did they address payment plans or debt forgiveness.[16]

The task force found that on average, felony probationers still owed a third of their restitution amounts and half of their other costs and fees at the end of their supervision terms. (See Figure 4.) Because many people with criminal convictions have difficulty finding a job and do not have a reliable income, their court-ordered payments can accrue and harm their financial stability.[17] Further, the state's penalties for failure to pay these debts in full,

AMERICAN OVERSIGHT



FL-SEN-20-0201-B, 20-0202-A-004641

including incarceration and suspension of a driver's license, were compounding the already substantial barriers to re-entry, such as restrictions on employment and public assistance and child support arrears from periods of incarceration.[18]

Figure 4

Fees Exceeded What Average Louisiana Probationers Could Afford

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004642

Budgetary decisions inconsistent with long-term goals

In the years before Louisiana's justice reinvestment process, the Department of Corrections had achieved measurable savings by investing in programs in state prisons to reduce recidivism and help prisoners make the transition back into the community.[19] Lawmakers did not, however, fund sufficient programming for state inmates housed in parish jails or offer local governments financial incentives to develop and expand community-based diversion programs, such as specialty courts and treatment services for substance use disorders, that could lessen the flow of people into the state prison system.

The state had also dramatically scaled back behavioral health services. Between 2012 and 2015, the number of adults served by community programs was cut more than 40 percent, from about 38,000 to just over 21,000. Meanwhile, 13 percent of state inmates in 2016 had serious mental illness (about three times the rate in Louisiana's general population), and 70 percent had a substance use disorder (roughly eight times the rate among the general population).[20]

Inadequate services and supports for crime victims

In roundtable discussions and public testimony, crime victims and their advocates called for increased transparency in and access to the justice system, noting inefficiencies in the state's notification system and the lack of a mechanism to allow victims to offer input on parole conditions that could affect their safety.[21] They also asked that restitution be prioritized over other criminal justice fines and fees and recommended more state investment in safety planning, trauma-informed services, and shelters and transitional housing.

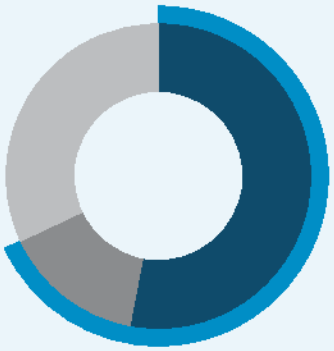
> "We can improve public safety and prevent others from experiencing ... the anguish that far too many families in our state experienced as the result of the violence that plagues our communities. We can do this while reducing our reliance on incarceration, building a stronger system of community accountability, and promoting healing for victims of violent crimes and their families."
>
> **Deborah Cotton,** victim advocate (op-ed, *The Advocate*, March 21, 2017)

Louisiana Voters Prioritize Alternatives to Incarceration

High levels of public support for criminal justice reform were critical to the enactment of Louisiana's new laws. Research by a bipartisan polling team revealed that state voters favored alternatives to imprisonment that hold people accountable for criminal behavior, enhance public safety, and save taxpayer dollars.'

Continued on next page

AMERICAN OVERSIGHT



The survey of 600 likely voters, commissioned by Pew and conducted in March 2017, found that:

- 3 in 4 voters supported eliminating mandatory minimum sentences and giving judges more discretion over criminal penalties.
- Nearly 2 in 3 believed that fewer people should be sent to prison for nonviolent crimes and that eligibility for alternatives such as probation and parole should be expanded.
- Nearly 2 in 3 voters favored reducing penalties for lower-level drug offenses while maintaining those for serious drug trafficking.
- 3 in 4 thought most noncriminal probation and parole violations did not warrant incarceration and that other sanctions, such as community service, would be appropriate.
- Nearly 9 in 10 voters favored tying the amount of monthly criminal justice fines and fees to a defendant's income.

Figure 5

Across Party Lines, Louisiana Voters Prioritized Cutting Recidivism Over Length of Prison Terms

Participants were asked whether they agreed with the following statement: "It does not matter whether a nonviolent offender is in prison 15 or 20 or 24 months. What really matters is that ... when these offenders do get out, they are less likely to commit another crime."

53% Strongly agree

68% Agree

FL-SEN-20-0201-B, 20-0202-A-004644

Comprehensive legislative reform package

In March 2016, the task force presented Gov. Edwards and the Legislature with 21 consensus recommendations, which became the basis of a package of 10 bills. After extensive vetting in legislative committees and negotiations with the Louisiana District Attorneys Association, all 10 bills passed with strong bipartisan majorities. The governor signed them into law June 15, 2017.

Governor John Bel Edwards signs the 10 justice reinvestment bills June 15, 2017.

The legislation has four primary objectives:

Prioritize prison space for those who pose a public safety threat

To steer people with less serious offenses away from prison and reduce the length of imprisonment for those who can be safely supervised in the community, the law:

- **Expands probation and other prison alternatives.**
  - Establishes probation eligibility for third-time nonviolent felonies and certain first-time violent crimes.
  - Broadens eligibility for Louisiana's substance abuse probation program, which combines supervision with drug treatment and counseling, to crimes other than drug possession.
  - Opens drug courts and substance abuse probation to those convicted of certain violent crimes.

AMERICAN OVERSIGHT

- **Tailors drug sentences by weight.**
  - Reduces maximum terms of incarceration for drug possession involving small amounts of controlled substances.
  - Creates penalty tiers for drug sales and manufacturing according to the weight of the substances involved in the offense.
- **Reduces habitual-offender penalties.**
  - Reduces mandatory minimum sentences for most second and third offenses and grants judges discretion to disregard minimum sentences outlined in the habitual-offender statute if they would be cruel and unusual.
  - Eliminates the possibility of a life sentence for a fourth nonviolent conviction.
  - Shortens the "cleansing period"—the time before a felony can no longer be used to enhance a subsequent penalty—for nonviolent offenses.

> "We're hoping that, with these changes, we can generate some savings, build up these services, and lower our incarceration rate safely. That's why we're behind it."
>
> **E. Pete Adams,** executive director, Louisiana District Attorneys Association (news conference, May 16, 2017)

Table 1

Louisiana Reforms Lower Drug Penalties and Habitual-Offender Sentences

Example: Penalties for cocaine offenses under previous and current laws, by conviction type and number

Crime	Law	Standard penalty	Sentence ranges under the habitual-offender statute		
			2nd offense	3rd offense	4th offense
Cocaine possession < 2 grams	Prior law	0-5 years	2.5-10 years	3.3-10 years	20 years-life
	Current law	0-2 years	8 months-4 years	1-4 years	20 years
Cocaine sale > 4 grams	Prior law	2-30 years	15-60 years	20-60 years	20 years-life
	Current law	1-10 years	3.3-20 years	5-20 years	20 years

Note: This table represents changes to drug penalties and to the formula for enhancing sentence ranges under the habitual-offender statute. Underlined numbers reflect mandatory minimum sentences. The sentence ranges in this table apply only to individuals with less serious, nonviolent criminal histories.

FL-SEN-20-0201-B, 20-0202-A-004646

- **Simplifies property crime statutes and raises the felony theft threshold.**
  - Eliminates numerous specialty crime categories that are duplicative of other theft, property damage, and burglary offenses.
  - Creates a single penalty structure for most property crimes and raises to $1,000 the dollar value at which theft is considered a felony.
- **Reduces penalties for other crimes and recategorizes certain offenses as nonviolent.**
  - Brings minimum and maximum penalties for various crimes more in line with those in other states and removes certain offenses from the violent crimes list.
  - Creates a task force to categorize felony offenses.
  - Establishes a working group to develop a felony classification system based on the seriousness of offenses that would create standard sentencing and release provisions.
- **Expands parole eligibility for some violent offenses.**
  - Allows parole consideration for those sentenced for violent crimes who have served 65 percent of their sentences and have no prior violent convictions (see Table 2) and those who have served 75 percent and have one prior violent conviction, unless they are otherwise ineligible for parole consideration.

> "Last month, Louisiana passed one of the most ambitious criminal-justice reform packages in the country—10 new laws that make important changes to everything from drug sentences, parole and community supervision to re-entry and victims' rights. It would have been remarkable coming from any state. It's historic coming from Louisiana."

State Representative Terry Landry (D) speaks at a rally for criminal justice reform at the Louisiana State Capitol in Baton Rouge on April 20, 2017.

- **Streamlines parole release for nonviolent crimes.**
  - Expands parole eligibility to those who have served 25 percent of their sentences for nonviolent crimes, and authorizes their release without a hearing when certain conditions are met. (See Table 2.)
- **Institutes a medical treatment furlough policy.**
  - Authorizes the release and transfer of prisoners with significant health and mobility issues to off-site medical facilities and provides for parole supervision for the remainder of their sentences.
- **Establishes parole consideration for some of Louisiana's longest-serving prisoners.**
  - Creates retroactive and prospective parole eligibility for most people who have served 25 years of life sentences imposed for crimes they committed as juveniles.
  - Makes individuals convicted of second-degree murder between 1973 and 1979 parole eligible.
- **Improves crime victim notification and protections.**
  - Allows victims to submit a "re-entry statement" to the parole board that can include a request for proximity and contact restrictions for the victims' protection.
  - Requires the development of an electronic victim registration and notification system.

AMERICAN OVERSIGHT

Strengthen community supervision

To expand the use of evidence-based community supervision practices that reduce recidivism, the law:

- **Focuses probation and parole officers' time on high-risk periods.**
  - Reduces maximum probation terms for nonviolent crimes from five to three years to concentrate officers' time on the period when those under supervision are most likely to fail.
- **Provides incentives for probationers and parolees to meet their supervision conditions.**
  - Establishes "earned compliance credits" for nonviolent crimes, a policy that awards 30 days off of community supervision terms for every full calendar month of compliance.
- **Requires that successfully completed probation time for nonviolent convictions be credited toward prison sentences imposed for probation violations.**
  - Reduces the time a person revoked from probation serves behind bars by deducting time spent in compliance with supervision. This change was modeled on a policy already in place for those on parole.
- **Establishes swift, certain, and proportional sanctions for supervision violations.**
  - Gives probation officers blanket authority to use administrative sanctions, such as increased reporting, community service, and short jail stays, for probationers with nonviolent convictions who fail to comply with the terms of their supervision. Similar powers had already been granted for all parolees.
  - Prohibits the use of jail as a sanction for first and second low-level violations.
  - Modifies the use of jail sanctions under Acts 402 and 299, which were adopted in 2007 and 2015, respectively, and allow for alternatives to complete revocation of community supervision:[22]
    - Authorizes an unlimited number of jail sanctions for probationers and parolees.
    - Caps stay at 15, 30, and 45 days for the first, second, and subsequent sanctions, respectively. (See Table 3.)
    - Broadens the categories of misconduct that can be addressed with Act 402/299 jail sanctions.
  - Expands the pool of violations for which officers can respond with administrative sanctions.

Table 3

Louisiana Made Intermediate Sanctions More Proportional to Violations

Jail terms under previous and current law, by supervision type and sanction

Act 402/Act 299 sanction number	Prior law		Current law
	Probation	Parole	Probation and parole
First	90 days	90 days	15 days
Second	Ineligible	120 days	30 days
Third or more	Ineligible	180 days	45 days

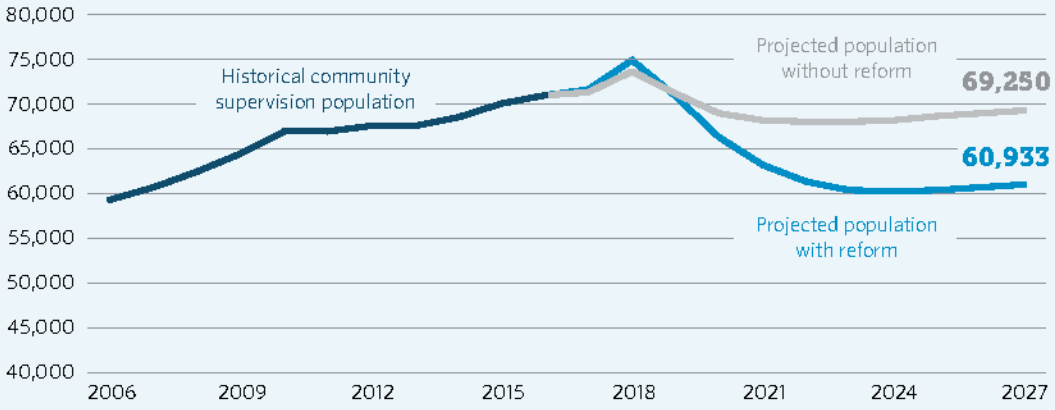
Reducing the Footprint of Community Supervision



Because parolees and probationers are most likely to violate their conditions or commit new crimes during the first year of supervision, the public safety benefit of monitoring them after that time drops significantly.* Despite research that supports front loading resources during this early phase, average probation and parole terms in Louisiana stretched well beyond that high-risk period, contributing to a swelling supervision population and high caseloads: In 2016, the average officer supervised 139 individuals.† In addition, the state's court and corrections system lacked a consistent process for discharging those who had been successful.

By capping probation terms and adopting a system of earned compliance credits, Louisiana aimed to focus its limited resources on the highest-risk stage and reserve extended periods of supervision for those who fail to comply with their conditions. The Louisiana Department of Corrections and the Justice Reinvestment Task Force estimate that these statutory changes will reduce the community supervision population by 12 percent by 2027, dropping average caseloads to 119 cases per officer.

Eliminate barriers to re-entry

To smooth prisoners' re-entry into the community and the workforce and to promote their long-term success and financial stability, the law:

- **Tailors criminal justice fines and fees to a defendant's ability to pay.**
  - Requires courts to determine ability to pay fines, fees, and restitution before ordering and enforcing them in felony cases. If payment of the full amount would cause hardship, the court must waive the obligations or create a payment plan.
  - Matches monthly payments to each defendant's wage for an eight-hour workday, ensuring that the financial burden is adjusted according to the amount of money earned and requires that half of each payment go toward victim restitution when ordered rather than justice system operations.
- **Creates a debt forgiveness incentive to reward consistent payment.**
  - Forgives remaining debt for those who make regular monthly payments for 12 months or half the supervision term, whichever is longer.
- **Modifies penalties for failure to pay.**
  - Limits penalties such as incarceration and driver's license suspension to those cases in which a person was able but refused to pay fines and fees.
  - Prohibits a court from extending a probationary period for the purpose of collecting unpaid financial obligations, except for a single six-month extension for victim restitution, under certain circumstances.
- **Suspends child support during incarceration.**
  - Requires temporary suspension of child support orders for those incarcerated for 180 days or more in order to bolster inmates' long-term financial stability and help ensure consistent payment of child support over time. Payment orders resume after release.
- **Simplifies the application process for professional licenses.**
  - Eliminates waiting periods and provisional licensure for those with nonviolent and non-sex offense convictions who seek a professional license.
- **Lifts restrictions on public assistance programs.**
  - Eliminates constraints that had prevented people with drug convictions from getting public assistance through the Supplemental Nutrition Assistance and the Temporary Assistance for Needy Families programs.

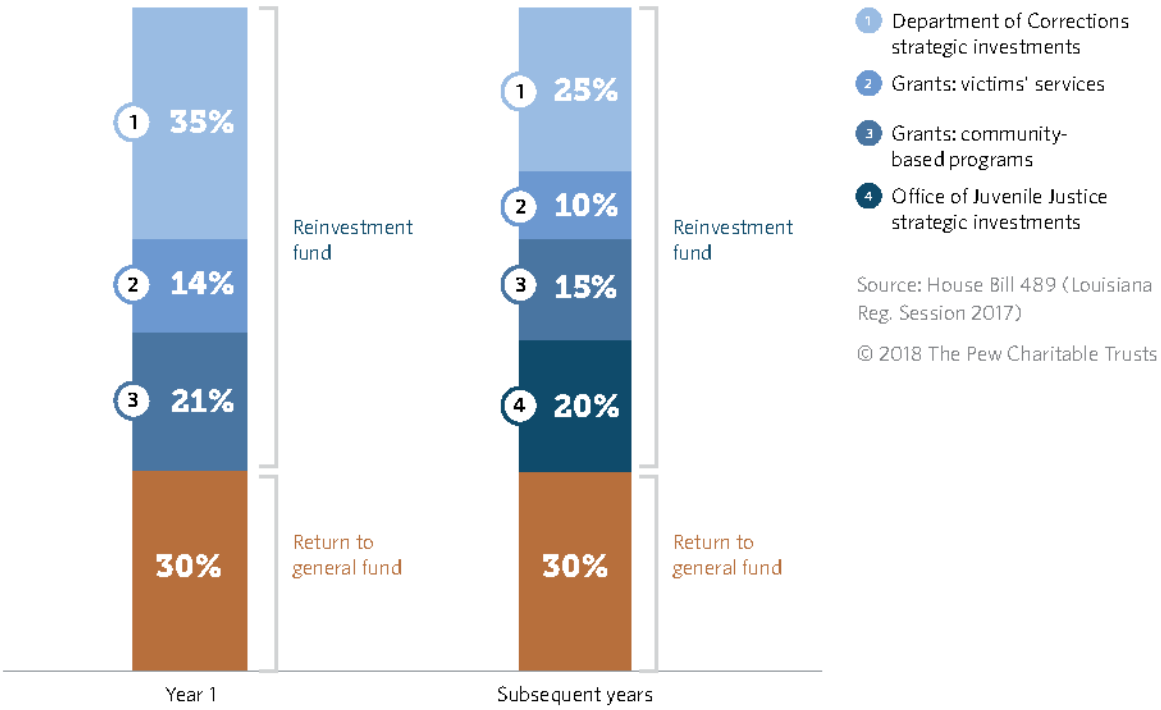
Reinvest prison savings to reduce recidivism, support victims



To reduce reoffending, provide services for crime victims, and save taxpayers money, the law:

- **Returns to the Louisiana general fund 30 percent of the annual savings arising from the reforms.**
  - Requires the Department of Corrections to calculate and report the annual surplus budgeted for housing state inmates as population and costs decline and treats 30 percent of that surplus as net savings to the state.
- **Reinvests 70 percent of the savings in recidivism reduction and victim support programs.**
  - Obliges the state to carry over 70 percent of the surplus to the following year's budget for programs and services, including:
    - Incentive grants to parishes, judicial districts, and nonprofit community partner organizations to expand evidence-backed prison alternatives.
    - Competitive grants for victims' services, treatment, and transitional housing as well as victim-focused training for justice system professionals.
    - Targeted investments in community supervision and recidivism reduction programming in prisons, jails, and work release facilities.
    - Juvenile justice initiatives and programs.

AMERICAN OVERSIGHT

Overview

Since 2000, at least 37 states have raised their felony theft thresholds, or the value of stolen money or goods above which prosecutors may charge theft offenses as felonies, rather than misdemeanors.[1] Felony offenses typically carry a penalty of at least a year in state prison, while misdemeanors generally result in probation or less than a year in a locally run jail. Lawmakers have made these changes to prioritize costly prison space for more serious offenders and ensure that value-based penalties take inflation into account. A felony theft threshold of $1,000 established in 1985, for example, is equivalent to more than twice that much in 2015 dollars.[2]

Critics have warned that these higher cutoff points might embolden offenders and cause property crime, particularly larceny, to rise.[3] To determine whether their concerns have proved to be true, The Pew Charitable Trusts examined crime trends in the 30 states that raised their felony theft thresholds between 2000 and 2012, a period that allows analysis of each jurisdiction from three years before to three years after the policy change. Pew also compared trends in states that raised their thresholds during this period with those that did not.

This chartbook, which updates and reinforces an analysis published in 2016, illustrates three important conclusions:

- Raising the felony theft threshold has no impact on overall property crime or larceny rates.
- States that increased their thresholds reported roughly the same average decrease in crime as the 20 states that did not change their theft laws.
- The amount of a state's felony theft threshold—whether it is $500, $1,000, $2,000, or more—is not correlated with its property crime and larceny rates.

Figure 1

At Least 37 States Have Raised Felony Theft Thresholds Since 2000

Higher sums are designed to take inflation into account

Year of change	State	Previous threshold	Enacted threshold	Legislation
2001	Oklahoma	$50	$500	S.B. 397
2002	Missouri	$150	$500	H.B. 1888
2003	Alabama	$250	$500	H.B. 491
	Mississippi	$250	$500	H.B. 1121
2004	Kansas	$500	$1,000	H.B. 2271
	Wyoming	$500	$1,000	S.F. 66
2005	South Dakota	$500	$1,000	S.B. 43
2006	Arizona	$250	$1,000	H.B. 2581
	New Mexico	$250	$500	H.B. 80
	Vermont	$500	$900	S.B. 265
2007	Colorado	$500	$1,000	S.B. 260
	Minnesota	$500	$1,000	H.F. 829
2009	Connecticut	$1,000	$2,000	H.B. 6576
	Delaware	$1,000	$1,500	H.B. 113
	Kentucky	$300	$500	H.B. 369
	Louisiana	$300	$500	H.B. 555
	Maryland	$500	$1,000	H.B. 66
	Montana	$1,000	$1,500	S.B. 476
	Oregon	$750	$1,000	H.B. 2323
	Washington	$250	$750	S.B. 6167

Continued on the next page

Since 2000, at least 37 states have raised their felony theft thresholds, including nine that did so twice.[4] In terms of percentage, Oklahoma's tenfold increase, from $50 to $500 in 2001, was the largest in the nation.

© 2017 The Pew Charitable Trusts

Changes in state felony theft thresholds have not interrupted the long nationwide decline in property crime and larceny rates that began in the early 1990s. The U.S. property crime rate fell 39 percent from 1998—three years before Oklahoma enacted the first of the state threshold hikes included in this analysis—to 2015, the most recent year for which data are available.[5] The U.S. larceny rate fell 35 percent during that span.[6]

Experts attribute the nation's sustained drop in violent and property crime rates to a host of factors, including better policing; the increased incarceration of certain repeat offenders; an expansion in private security personnel; an aging population that is less prone to criminal behavior; and technological advances, such as the widespread use of surveillance cameras, car- and home-alarm systems, and digital transactions that have reduced the need for cash.[7]

Because property crime and larceny rates have been on a downward trajectory nationwide, it is important to evaluate whether the same trend can be observed in states that have raised their felony theft thresholds. Average property crime and larceny rates continued to fall in the states that raised their thresholds between 2000 and 2012.

AMERICAN OVERSIGHT

Figure 4

States That Raised Felony Theft Thresholds Between 2000 and 2012 Had Crime Declines Similar to Those That Did Not

All states reported sharp decreases in property crime, larceny rates

Notes: Pew evaluated data from 1998 to 2015 to allow for a sufficient before-and-after analysis of all state threshold changes between 2000 and 2012. Pew used a panel random-effects approach to measure changes in property crime and larceny rates and compare states that raised their felony theft thresholds with those that did not. The analysis found no statistically significant relationship between the two groups of states using the standard threshold of 0.05. See the methodological notes for more information about this analysis.

Figure 5

Felony Theft Values Are Unrelated to Property Crime and Larceny Rates

States report similar crime rates regardless of thresholds

The value of states' felony theft thresholds—whether set at $500, $1,000, or $2,000—is not correlated with property crime and larceny rates. Florida, for example, treats theft as a felony if the value of stolen money or goods exceeds $300, but its property crime and larceny rates are considerably higher than those in Pennsylvania, where the threshold is $2,000.

Notes: Pew conducted a linear correlation test to determine whether property crime and larceny rates in 2015 were higher in states with higher felony theft thresholds. The analysis included no control variables and found no statistically significant correlation using the standard threshold of 0.05.

An examination of long-term trends in property crime and larceny rates shows year-over-year fluctuations within many of the 30 states that raised their felony theft thresholds between 2000 and 2012. Nevertheless, for all but six of the 30 states—California, Montana, Nevada, New Mexico, Oregon, and South Dakota—property crime and larceny rates were lower in 2015 than in the year in which each state raised its threshold.[8]

Methodological notes

The statistical models for Figures 3 and 4 isolated the impact of threshold changes on property crime and larceny rates in each state in the year after the policy change and controlled for annual demographic, employment, and income information. The strength of this strategy is that only variables that change over time within each state must be controlled. Demographic data are drawn from the U.S. Census Bureau, and unemployment and income data are derived from the U.S. Bureau of Labor Statistics. State property crime and larceny rates are published by the FBI and are per 100,000 residents. The natural log of property crime and larceny rates was used in the model to account for general declines in rates over time.

Endnotes

1 Pew analysis of legislative information from the National Conference of State Legislatures. The District of Columbia raised its felony theft threshold in 2010 but is not included in this analysis because its crime data are not directly comparable with state crime statistics.

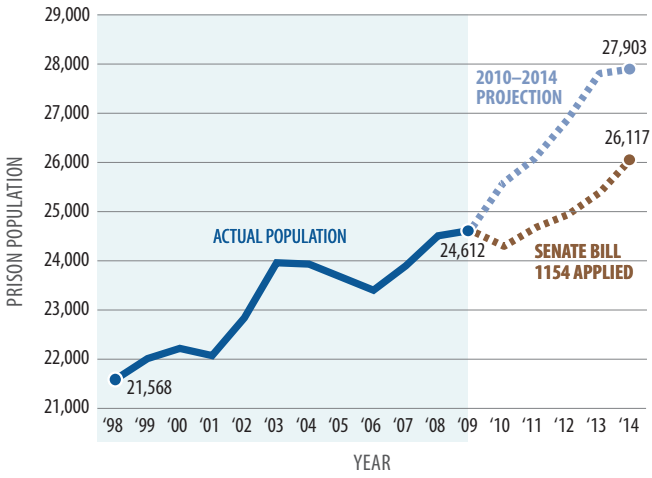
THE PEW CENTER ON THE STATES

South Carolina's Public Safety Reform



Legislation Enacts Research-based Strategies to Cut Prison Growth and Costs

In 2010, South Carolina enacted a comprehensive package of sentencing and corrections legislation that puts the state at the forefront of states advancing research-driven criminal justice policies designed to produce a greater public safety return on corrections spending.

The Omnibus Crime Reduction and Sentencing Reform Act of 2010 (S. 1154)—the result of more than a year of work by the South Carolina Sentencing Reform Commission—passed

PROJECTED IMPACT

S. 1154 reduces the need to build and operate new prison beds during the next five years by 1,786, saving the state a projected total of $241 million during the next five years.

SOURCE: South Carolina Department of Corrections (historical data); Applied Research Services, Inc. (projections).

HIGHLIGHTS

- **Population.** South Carolina's correctional population nearly tripled during the past 25 years and was projected to grow by more than 3,200 inmates by 2014.
- **Costs.** Since 1983, state spending on prisons increased by more than 500 percent to $394 million. Meanwhile, recidivism rates actually increased in recent years.
- **Drivers.** Data collected and analyzed found high rates of repeat offenders, high rates of incarceration for non-violent offenders and over-extended judicial caseloads.
- **Reforms.** With intensive technical assistance from the Pew Center on the States, the Sentencing Reform Commission developed a set of reforms leading to the Omnibus Crime Reduction and Sentencing Reform Act of 2010. The Act, which makes common sense sentencing reforms, improves parole release decision-making, strengthens supervision for offenders on probation and parole and provides ongoing oversight of sentencing and corrections reform in the state.
- **Impact.** The legislation, S. 1154, is designed to protect public safety, hold offenders accountable and control the growth of corrections costs. The law is projected to save the state up to $175 million in construction costs and avoid more than $66 million in operating costs during the next five years.

In this Brief:
p.2 Public Safety and Public Spending in South Carolina
p.4 Building Consensus
p.6 Comprehensive Legislation Seeks Less Crime at Lower Cost

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004679

unanimously in the state Senate and passed the state House 97-4 before being signed into law by the governor.

The Commission's mandate was to make South Carolina safer, reduce recidivism and the revolving door of prison, use tax dollars more effectively and ensure that prison space is available for violent offenders who need to be there.

> "By using corrections dollars more efficiently—making them work harder—we ensure violent criminals remain locked up, reduce the likelihood that low-level offenders will commit new crimes and free up resources for law enforcement efforts that prevent crime in the first place."
>
> —State Senator Gerald Malloy (D), chair, South Carolina Sentencing Reform Commission, February 28, 2010

The bipartisan, inter-branch Commission produced a set of reforms that increase penalties for certain violent crimes and ensure fairness and certainty in sentencing. The reforms also require supervision for offenders leaving prison; focus corrections resources on high-risk offenders; provide greater accountability for non-violent, lower-level offenders; require greater accountability from state agencies; and provide ongoing data-driven oversight of sentencing and corrections reform in the state.

The 2010 legislation, which enacts these reforms, is projected to slow the growth of the state's prison population substantially during the next five years. Forecast models estimate the reforms will reduce the need to build and operate new prison space by 1,786 inmates,[1] saving the state up to $175 million in construction costs and avoiding more than $66 million in operating costs during the next five years.[2] Because the effects of some of the provisions will not be felt for several years, the bill will have an even larger impact on reducing the number of prison beds needed and will achieve even more cost savings after 2014.

The legislation also strengthens community corrections options to reduce recidivism and increase public safety. By improving the use of evidence-based programs, requiring the use of a risk and needs assessment tool and improving supervision for all offenders, this legislation will aid the state in reducing the number of parolees and probationers committing technical violations and new crime, thereby slowing the revolving door of prisons.

South Carolina is a leading example of what can happen when policy makers take a data-driven approach to difficult policy issues and then work together in a bipartisan fashion across the three branches of government to find solutions.

Public Safety and Public Spending in South Carolina

South Carolina's correctional population nearly tripled during the past 25 years, reaching 24,612 in 2009.[3] The correctional population growth has resulted in significant financial cost

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004680

to state taxpayers. Since 1983, state spending on prisons increased by more than 500 percent to $394 million.[4]

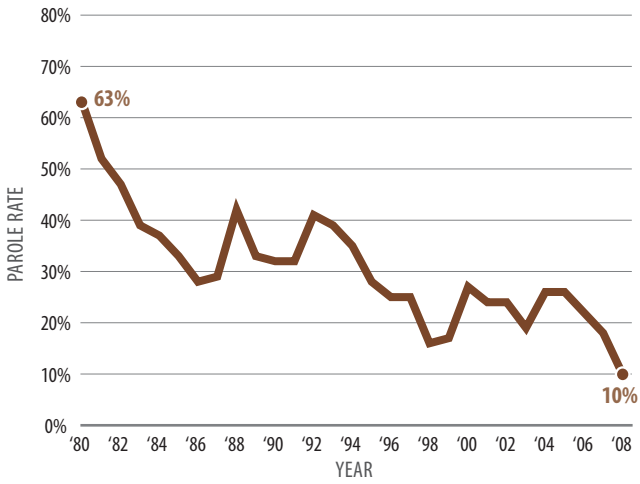
Despite these increases, South Carolina's crime rate remained high. According to the FBI's Uniform Crime Report, South Carolina was the state with the highest violent crime rate in the country in 2008, a distinction held for seven years (2002–2008).[5] In addition, the recidivism rate actually increased. Of the inmates released in fiscal year (FY) 1999, 27.6 percent were returned to prison within three years; of those released in FY 2003, 32.7 percent were returned to prison within three years.[6]

If the state did not take action, the prison population in South Carolina was projected to grow by more than 3,200 inmates by 2014.[7] Such an increase could have added $141 million to the Department of Corrections' operating costs during the next five years, plus another $317 million for the construction of new prison space.[8]

The data collected and analyzed by Pew during the past year demonstrated the problems confronting South Carolina: high rates of repeat offenders, high rates of incarceration for non-violent offenders, growing correctional populations and over-extended judicial caseloads. The analysis found several key factors driving the state's prison growth:

1 Sentencing policies in recent years led to a significant number of offenders entering South Carolina prisons who were committed for low-level offenses for short periods of time. Admissions to prison had increased 26 percent since 2000,[9] and a significant portion of the increase was for less serious offenses with short sentences. In fact, 44 percent of new prison admissions in 2009 had a sentence of fewer than 18 months.[10]

> "About half of South Carolina's prison population is being held for nonviolent offenses… Such low-level violations, as well as certain nonviolent drug-related crimes, can be punished in other ways that aren't as expensive as prison. We build prisons for people we're afraid of. Yet South Carolina has filled them with people we're just mad at."
>
> —Newt Gingrich, former speaker of the U.S. House of Representatives, and Pat Nolan, vice president of Prison Fellowship, May 3, 2010



2 The number of offenders in prison for non-violent offenses, mostly drug and property crimes, increased significantly, largely as a result of sentencing practices. Of South Carolina's prison population, 49 percent (approximately 12,000 inmates) were being held for non-violent offenses.[11] The percentage of offenders incarcerated for drug-related offenses had more than tripled. In 1980, state prisons held 473 inmates convicted of drug-related offenses, six percent of the total prison population. In 2009, that number had increased to 4,682 inmates or 20 percent of the prison population.[12]

3 Increasing numbers of South Carolina offenders on parole and probation were being sent back to prison for breaking the rules of their release, not for committing new crimes. In FY 2009, the Department of Probation, Parole and Pardon Services revoked 3,205 offenders and sent them back to prison, accounting for 24 percent of all prison admissions. Of those offenders 66 percent (more than 2,100) were sent back to prison for non-criminal (technical) violations, such as failure to show up at the probation office, or for alcohol and drug use.[13]

4 The South Carolina Board of Paroles and Pardons (the parole board) substantially cut the rate at which it releases inmates who are eligible for parole. In 2008, the Parole Board rejected 5,358 parole applications and approved 564, or 10 percent of all hearings. In 2000, the Parole Board approved 27 percent of all applications, releasing 1,714 offenders; but in 1980, the Parole Board approved 63 percent of all applications.[14] In addition, a greater number of inmates, including higher-risk offenders, were being released at the end of their sentences and walking out the prison door with no supervision or accountability and no connection to the services or support that would reduce the chances they would return to crime or drug use.

PAROLE GRANT RATES

South Carolina's parole board has substantially cut the rate at which it releases inmates who are eligible for parole, from 63 percent in 1980 to 10 percent in 2008.

SOURCE: Data from the Statistical Analysis Center, South Carolina Department of Public Safety.

Building Consensus

In 2008, the South Carolina legislature established the Sentencing Reform Commission, which included three state senators, three state representatives, three members of the Judiciary and the director of the Department of Corrections. The legislature tasked the commission with reviewing and recommending:

1. Appropriate changes to existing felony sentences;
2. Maintaining, amending or abolishing the current parole system; and
3. Alternatives to incarceration for low-level offenders.

In February 2009, the Commission requested technical assistance from the Public Safety Performance Project of the Pew Center on the States. Pew, along with its partners, the Crime and Justice Institute and Applied Research Services, Inc., assisted the Commission in analyzing South Carolina's sentencing and corrections trends and in generating policy options to protect public safety, hold offenders accountable and control the growth of corrections costs.

Working with Pew and its partners, the Commission analyzed the state's sentencing

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004682

and corrections trends to ensure that the recommendations and subsequent legislation would be based on data and research. Pew obtained data from the Department of Corrections; the Department of Probation, Parole and Pardon Services (PPP); the South Carolina Court Administration; the South Carolina Law Enforcement Division (SLED); and the Statistical Analysis Center (SAC), and merged the data into a common database for analysis. Pew and its partners analyzed the key drivers of prison growth and costs, the increase in the number of offenders on probation and parole, and the population and fiscal impact of various policy options.

> "This approach is soft on the taxpayer and smart on crime. It is soft on the taxpayer because it will reduce the need to build more prisons. It is smart on crime because community-based alternatives such as restitution and drug courts entail more accountability and have been proven to reduce recidivism."
>
> —State Senator George E. "Chip" Campsen III (R), member of the South Carolina Sentencing Reform Commission, April 21, 2010

For nearly a year, the Commission held more than 14 hearings and numerous workgroup meetings to analyze the data and research and to reach consensus on recommendations. Throughout the process, the Commission received input from stakeholders including prosecutors, crime victims, law enforcement, the defense bar and other key members of the criminal justice community.

In February 2010, the Commission submitted its final report to the legislature with 24 specific recommendations. To implement these recommendations, the Commission drafted and introduced legislation—the Omnibus Crime Reduction and Sentencing Reform Act of 2010 (S. 1154). A total of 26 senators co-sponsored the legislation.

Comprehensive Legislation Seeks Less Crime at Lower Cost

The Omnibus Crime Reduction and Sentencing Reform Act of 2010 (S. 1154) makes common sense sentencing reforms, improves parole release decision-making, strengthens supervision for offenders on probation and parole, and provides ongoing oversight of sentencing and corrections reform in the state. Overall, it will ensure that there is more prison space for the state's violent and career criminals while helping stop the revolving door for lower-risk, non-violent offenders.

LESS CRIME, LOWER COST

1	Adopting common sense sentencing reforms
2	Improving release policies
3	Strengthening parole and probation
4	Establishing ongoing oversight

1. ADOPTING COMMON SENSE SENTENCING REFORMS

The legislation increases penalties for certain violent crimes, ensures fairness and certainty in sentencing and provides justice for victims. Specifically, the Act:

- Adds 24 crimes to the "violent crime" list that were not classified as "violent" offenses, even though many resulted in a victim's death.
- Restructures or revises specific violent and property offenses, including:
  - Creating an "attempted murder" offense, with a penalty of up to 30 years, which previously was not included in South Carolina's criminal code.
  - Providing that a person convicted of a "most serious offense" shall be sentenced to life without parole if the person had two or more prior convictions of a "serious offense."
  - Reducing the maximum penalty for burglary in the 2nd degree, non-violent (i.e., burglary of commercial buildings during the daytime) from 15 years to 10 years, and making these offenders eligible for parole.
  - Increasing the property value threshold from $1,000 to $2,000 for all felony property crimes, making all property crimes below $2,000 misdemeanors.
  - Increasing penalties when a habitual motor vehicle offender driving with a suspended license causes an accident that results in great bodily injury or death.
  - Establishing a consolidated assault and battery statute, with graduated penalties for more serious conduct or harm; also eliminating provisions related to assault and battery against special classes of individuals (e.g., sports officials, EMS providers), which are now covered by the consolidated statute.
- Restructures controlled substance offenses, including:
  - Providing that persons convicted for a first or second drug offense, other than trafficking offenses, are eligible for probation or a suspended sentence, parole, work release, good conduct and other credits; and that persons convicted of a third or subsequent drug offense, other than trafficking offenses, be eligible for probation, suspension, parole and credits in limited circumstances. Drug

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004684

trafficking remains a violent offense with no probation or parole allowed.

- Equalizing penalties for drug offenses to erase the disparity for crack and powder cocaine possession.

> "[T]he substance of the law, the way lawmakers worked together to pass it and the change it signals to our counter-productive approach to criminal justice make it one of the most significant accomplishments in a decade."
>
> —The State, *Sentencing reform law will make S.C. safer*, June 6, 2010

- Clarifying the proximity to schools statute (requiring enhanced penalties for controlled substance offenses within the proximity of a school, park or playground) to require intent to commit a controlled substance offense and intent to commit it within the proximity of a school, park or playground.

- Redefining what is considered a second or subsequent drug offense for specific drug crimes (e.g., marijuana possession is no longer counted as a second or subsequent offense if a first offense of marijuana possession occurred more than five years before the conviction; for other offenses for drug possession, the first offense must have been within 10 years to count as a prior offense).

- Requiring drug offenders to pay a controlled substance offense assessment (with a waiver for indigent defendants), and allocating the proceeds to drug treatment court programs.

- Makes other significant sentencing reforms, including:

  - Increasing the amount of victim restitution that can be ordered by magistrates or municipal courts from $5,000 to $7,500; if the civil jurisdiction amount in summary courts increases, the victim restitution limit will also increase.

  - Prohibiting persons convicted of a violent crime from possessing a firearm or ammunition, consistent with federal law.

  - Revising work release provisions so that inmates convicted of certain offenses with long prison terms now may be eligible for work release in the last three years of their sentence.

  - Allowing for a reduction in an offender's sentence based on cooperation with law enforcement, the Department of Corrections or prosecutors.

  - Requiring an accurate fiscal impact statement prior to any committee action for any legislation that would establish a new criminal offense or that would amend the sentencing provisions of an existing criminal offense.

2. IMPROVING RELEASE POLICIES

The Act provides cost-effective prison release methods to improve successful reintegration into society by inmates and ensure public safety. Specifically, the Act:

- Increases the education and experience requirements for the director of the Department of Probation, Parole and Pardon Services and the at-large parole board member and requires annual training for all board members.

AMERICAN OVERSIGHT

- Requires the parole board to adopt a validated actuarial risk and needs assessment tool for use in making parole decisions and setting parole conditions.

- Allows parole for an inmate who is terminally ill, geriatric or permanently incapacitated upon the petition of the Department of Corrections.

- Directs the Department of Corrections and the Department of Probation, Parole and Pardon Services to work with the Department of Motor Vehicles to provide inmates released from prison with a valid photo identification card.

3. STRENGTHENING PAROLE AND PROBATION

The legislation focuses probation and parole supervision resources on high-risk offenders. It also improves the transition of lower-risk offenders—those considered least likely to re-offend—into the community. Specifically, the Act:

- Requires that non-violent inmates who have been incarcerated for at least two years be released to mandatory supervision 180 days before their release date.

- Requires probation agents to conduct actuarial assessments of offenders' risks and needs, and make decisions about the type of supervision and services that are consistent with evidence-based practices.

- Establishes incentives for good behavior (i.e., compliance credits) for offenders with a term of supervision of more than one year; an offender on supervision may earn up to 20 days off of their period of supervision for each 30-day period in which the offender has complied with the conditions of supervision and has no new arrests.

- Allows for administrative monitoring (i.e., a lower, less costly level of supervision) for offenders who have fulfilled all of their conditions of supervision except their payment of financial obligations (e.g., restitution, fines and fees).

- Extends supervision, under administrative monitoring, beyond the current five-year maximum probation term for offenders who have not paid all of their restitution, fines and fees, for the sole purpose of repayment.

- Authorizes the Department of Probation, Parole and Pardon Services to impose administrative sanctions in response to violations of the terms and conditions of supervision.

4. ESTABLISHING ONGOING OVERSIGHT

The Act provides ongoing oversight of sentencing and corrections reform in the state. Specifically, the Act:

- Establishes the Sentencing Reform Oversight Committee to review the implementation of the recommendations made by the Sentencing Reform Commission, oversee the various reports and plans required by S. 1154 and conduct additional studies and evaluations of sentencing reform issues.

- Provides for a system of performance incentive funding that allows for the shifting of resources from prisons to probation and parole. Specifically, the Oversight Committee is required to report on the expenditures avoided by reductions in the revocation rate and reductions in new felony offense convictions by those under supervision, and the Oversight Committee is to recommend to the legislature whether to shift up to 35 percent of any cost savings achieved to the Department of Probation, Parole and Pardon Services.

The TEXAS Model
A TEXAS PUBLIC POLICY FOUNDATION PUBLICATION
September 2011
Center for Effective Justice

Adult Corrections Reform: Lower Crime, Lower Costs

RIGHT ON CRIME

by Marc Levin, Director, Center for Effective Justice

In the last several years, Texas has become emblematic of the growing movement to be both tough and smart on crime, as it has achieved significant declines in both its crime and incarceration rates. Policies initiated since 2005 have expanded capacity in alternatives to incarceration that hold nonviolent offenders accountable and provide effective supervision. Since that time, Texas has seen a double-digit reduction in crime, reaching its lowest crime rate since 1973.[1] In this same period, the state's adult incarceration rate has fallen 9 percent. Texas, which in 2004 had the nation's second highest incarceration rate, now has the fourth highest.[2]

Texas Crime and Incarceration Rates Tumble[3]

Year	FBI Index Crime Rate	Incarceration Rate Per 100k
2005	4,857.1	681
2010	4,236.4	620
% Change	-12.8%	-9.0%

Two key budgetary strategies enabled Texas to cut crime and avoid building more than 17,000 new prison beds.

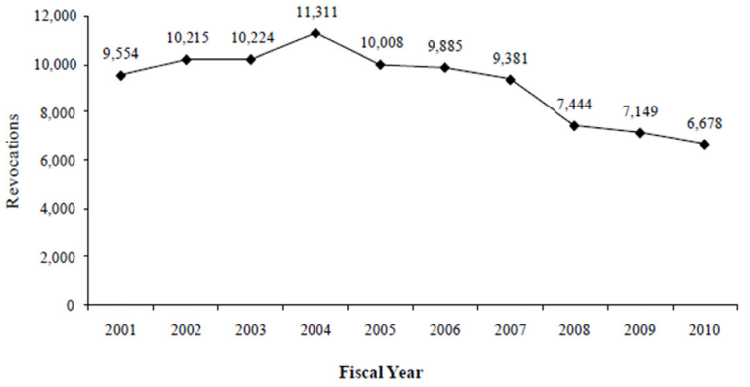
The first strategy involved appropriating $55 million in 2005 for probation departments that agreed to target 10 percent fewer prison revocations and to implement graduated sanctions. Graduated sanctions ensure swift, sure, and commensurate sanctions (e.g., increased reporting, extended term, electronic monitoring, weekend in jail, etc.) for rules violations, such as missing meetings, rather than letting them pile up and then revoking that probationer to prison. Most of the funding went towards reducing caseloads from nearly 150 (in major urban areas) to 110 probationers per officer, and expanding specialized, much smaller caseloads for subgroups such as mentally ill probationers. This facilitated closer supervision, and the consistent application of such sanctions, which led to a decline in revocations in these departments, saving taxpayers $119 million.[4]

The second strategy, in 2007, was the appropriation of $241 million for a package of prison alternatives that included more intermediate sanctions and substance abuse treatment beds, drug courts, and mental illness treatment slots. This package was in lieu of spending $2 billion on 17,332 new prison beds that the Legislative Budget Board (LBB) had otherwise projected would be needed by 2012.[5] The search for alternatives came in response to statements from judges, prosecutors, and corrections officials, bolstered by data, indicating that increasing numbers of low-level, nonviolent offenders were being directly sentenced, or revoked from probation, to prison. Why? Because of long waiting lists for many alternatives.

Furthermore, parolees often remained in prison because of waiting lists for halfway houses and programs they had to complete before release, a backlog addressed by the 2007 package.[6] All told, the 2008-09 budget added 4,000 new probation and parole treatment beds, 500 in-prison treatment beds, 1,200 halfway house beds, 1,500 mental health pre-trial diversion beds, and 3,000 outpatient drug treatment slots.

Perhaps reflecting increased confidence by judges, juries, and prosecutors in probation, sentences to prison actually declined 6 percent in 2009 while more nonviolent offenders went on probation.[7] This reversed the historical increase of 6 percent per year in prison commitments.[8]

Furthermore, probation and parole revocations together account for approximately half of the annual prison intakes, and both have declined recently as supervision has been strengthened.[9] From 2005 to 2010, Texas' probation revocation rate fell from 16.4 to 14.7 percent.[10]



Similarly, during the last several years, parole offices have improved supervision by expanding the use of graduated sanctions, implementing instant drug testing, and restoring the parole chaplaincy program. Thus, despite there being more parolees, the number of new crimes committed by

continued on back

AMERICAN OVERSIGHT

parolees declined 8.5 percent from 2007 to 2010, contributing to a sharp reduction in parole revocations.[11]

Texas Parole Revocations to Prison[12]

Capitalizing on Texas' recent success, the Legislature in 2011 followed the recommendation of both the Texas Public Policy Foundation and Governor Rick Perry in ordering the closure of the Sugar Land Central Unit, the first such prison closure in Texas history. This will save taxpayers approximately $20 million over the biennium in operating costs, in addition to the one-time proceeds from the sale of the property.

In 2011, Texas policymakers also took many additional steps to continue the new Texas trend of lower crime and incarceration rates. First, lawmakers grappling with a challenging budget environment found operational savings such as closing one adult and three juvenile lockups and reducing subsidized housing for high-level corrections officials, rather than cutting back on cost-effective alternatives to prison and in-prison treatment programs that have paid dividends since being expanded in 2007.

In 2011, lawmakers also passed, and the Governor signed, several key bills. SB 1055 allows counties to opt for performance incentive funding based on reducing commitments to prison of low-level offenders while also reducing recidivism, increasing the share of probationers making victim restitution, and increasing the employment rate among probationers. Second, HB 1205 creates a positive incentive for probationers to pursue self-improvement by allowing judges to award time credits for exemplary behavior, such as earning a degree, fully paying restitution, and completing treatment programs.

Finally, HB 2649 is projected to save $49 million by incentivizing state jail inmates, the lowest-level, nonviolent offenders in state lockups, to complete educational, treatment, and vocational programs and exhibit exemplary behavior. Under this legislation, judges can require those offenders who demonstrated such exemplary conduct to spend several months of their sentence on probation, whereas under the former law most state jail felons had no opportunity for probation or supervision upon release. Transitioning exemplary state jail inmates upon rentry to probation ensures that they will be held accountable to an officer, directed to find a job and housing, and required to comply with restrictions such as drug testing, curfews, and avoiding anti-social peers.

While Texas, like all states, has more work to do to strengthen its criminal justice system, Texas' progress over the last several years is a shining example of how states can adopt strategies that deliver less crime and a lower bill to taxpayers. ★

URBAN INSTITUTE

Assessing the Impact of Mississippi's Technical Violation Centers

Justice Reinvestment Initiative

Chloe Warnberg and Robin Olsen

November 2019

Mississippi's prison population grew more than 400 percent between 1980 and 2013[1] and was projected to increase by nearly 2,000 people during the following decade at a cost of $266 million (Pew 2014). State leaders began exploring options to use prison space and other resources to get a better public safety return on correctional spending.

State leaders requested assistance through the Justice Reinvestment Initiative (JRI), a public-private partnership funded by the Bureau of Justice Assistance and the Pew Charitable Trusts. Mississippi convened its interbranch Corrections and Criminal Justice Task Force—with technical assistance from the Pew Charitable Trusts and the Crime and Justice Institute—to examine the drivers of incarceration and make recommendations for curbing corrections costs and improving public safety.

In 2014, Governor Phil Bryant signed House Bill (H.B.) 585 into law. Among other reforms, the legislation gave criminal justice system practitioners more options for responding to technical violations of supervision, which are incidents that violate conditions of supervision but do not involve a new crime. Such incidents could include missing meetings with supervision officers or failing drug tests. In particular, H.B. 585 established a system of graduated sanctions and created technical violation centers (TVCs) as alternatives to the use of lengthy prison sentences to respond to technical violations. Designed to provide programming and services to address the underlying causes of criminal behavior, TVC sentences were capped at 90 and 120 days for the first and second revocations, respectively.

This brief focuses on the implementation and outcomes of TVCs and the associated revocation caps in Mississippi following implementation in 2014. Using data from the Mississippi Department of Corrections (MDOC) and stakeholder interviews, the Urban Institute analyzed overall incarceration,[2] trends in admissions and lengths of stay, and additional outcomes.

AMERICAN OVERSIGHT

Key findings on H.B. 585's impact on Mississippi's prison population (excluding TVCs) include the following:

- Mississippi used **35 percent fewer days of imprisonment for technical violations** in the 3.5 years post-585 than in the 3.5 years pre-585. The majority of this decrease is attributable to a 45 percent decrease in imprisonment days used for technical violations of probation.
- **Admissions to prison for technical revocations increased 7 percent** between 2013 and 2017. During that period, technical revocations from parole increased 87 percent, while technical revocations from probation decreased 25 percent.
- **The average length of stay in prison for technical violations fell 14 percent** between 2013 and 2017. During that period, the average length of stay in prison for technical violations decreased 28 percent for parole and increased 7 percent for probation.

Key findings on H.B. 585's impact on overall incarceration (prisons and TVCs) include the following:

- Mississippi used **16 percent fewer incarceration days (prison and TVCs)** for technical violations in the 3.5 years post-585 than in the 3.5 years pre-585. Incarceration days for technical violations increased 45 percent for parole and decreased 34 percent for probation.
- **Admissions to incarceration (prison and TVCs) for technical violations increased 40 percent** between 2013 and 2017, from 3,077 to 4,321.
- **The average length of incarceration (prison and TVCs) for technical violations decreased 29 percent** between 2013 and 2017. During that period, length of incarceration for technical violations decreased 36 percent for parole and 16 percent for probation.

Background

Between 1980 and 2013, Mississippi's prison population grew more than fivefold, and in 2013, its imprisonment rate was the third highest in the country.[3] Its prison population was projected to grow by nearly 2,000 people at a cost of $266 million during the following 10 years (Pew 2014). With other states reducing crime rates and imprisonment, leaders in Mississippi began questioning whether high corrections spending was producing the best public safety results. To address this unsustainable growth and invest more effectively in public safety, the state convened the bipartisan, interbranch Corrections and Criminal Justice Task Force. With technical assistance from the Pew Charitable Trusts and the Crime and Justice Institute, the task force found that technical revocations of community supervision were a significant driver of the prison population. In 2012, there were more admissions to prison for revocations than for new crimes, and revocation admissions had increased 84 percent during the previous decade (Pew 2014).[4] Community supervision officers lacked options—like graduated sanctions or incentives—to change the behaviors of people on supervision before they rose to the level of revoking someone to prison, and prison revocations were often applied inconsistently and sometimes with significant delays.[5]

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004692

In 2014, Governor Bryant signed H.B. 585 into law. The bill codified task force recommendations and created new options for responding to technical violations. Specifically, the legislation established TVCs for people whose community supervision had been revoked for technical violations. The bill specified that TVCs would provide services to address the underlying causes of the violation—as identified by a risk and needs assessment—and would provide services such as substance use disorder treatment, employment preparation, and education programs to help people avoid future violations. House Bill 585 also capped TVC stays at 90 days for the first technical violation and 120 days for the second. Third technical violations are eligible for up to 180 days in a TVC or revocation to prison for the remainder of the sentence. Lastly, H.B. 585 required the Mississippi Department of Corrections to implement a graduated response approach to technical violations that included developing a grid with the most common sanctions and responses, ranging from verbal warnings to increased reporting or drug and alcohol testing to short jail stays. These guidelines were intended to provide probation and parole officers responses that stop short of incarceration in a TVC or prison for less serious violations, and that address violations with proportional punishments that increase in severity. The legislation took effect July 1, 2014.

In January 2015, Mississippi began receiving technical assistance from the Crime and Justice Institute through the Justice Reinvestment Initiative to aid its implementation efforts. House Bill 585's TVC, revocation cap, and graduated sanction provisions were intended to curb growth in the state's prison population by reducing prison admissions for technical violations, reducing lengths of stay in prison for technical violations, and reducing prison admissions for new crimes by providing interventions that address the underlying causes of criminal behavior (thus preventing new crimes). Technical violation centers were specifically intended to provide targeted programming and services to address identified drivers of criminal behavior.

Throughout the implementation period, Mississippi has experienced challenges related to TVC facilities and programming. To establish TVCs, existing prisons and community work centers were repurposed to house people who committed technical violations of supervision. Flowood Technical Violation Center, which is located outside of Jackson, Mississippi, and is the only TVC that houses women, has been operating steadily since 2014. The number and location of TVC facilities for men, however, has changed since H.B. 585 was passed, and each iteration of TVC facilities has generally offered insufficient programming and services. Additionally, inefficiencies with reception and classification processes created a jail backlog, causing delays placing people in TVCs and giving them access to programming.

These issues made some decisionmakers less willing to send people to TVCs. For people on parole, the decisionmaker is the parole board; for people on probation, the decisionmaker is the judge. The State of Mississippi Parole Board has five members and is located in Jackson, Mississippi, and the state has 57 circuit court judges serving 22 circuit districts. By April 2018, the state had consolidated all of its men's TVCs at one facility—Delta TVC —in northwestern Mississippi. Currently, each person housed at Delta TVC is enrolled in three programs—a workforce training and reentry program, a cognitive training program, and an alcohol and drug program—each of which they attend twice a week. Additionally,

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004693

individual decisionmakers in Mississippi (specifically judges and parole board members) often have considerable discretion over whether to send people with technical violations to prison or a TVC, as well as the duration of the sentence. This discretion has affected the consistency of the use of TVCs and may have impacted the differing trends in Mississippi's use of TVCs and prison to respond to technical violations by people on probation and parole.

Mississippi also experienced challenges with the interpretation of statutory language when implementing TVCs. The language in H.B. 585 specified that revocation caps would be applied according to a person's number of prior technical *violations* (not revocations). This allowed decisionmakers to stack prior violations, bypass TVCs, and send people directly to prison on their first technical revocation. House Bill 387 (2018) adjusted the wording to clarify that revocation caps apply according to a person's number of prior technical *revocations* (not violations). Although this brief does not include quantitative data past 2018, qualitative data show stakeholders expressed differing opinions regarding how much this legislative change has impacted behavior (see this brief's "Additional Outcomes and Recommendations" section for more information). The quantitative analysis in the following sections explores how technical violation centers impacted prisons and incarceration in Mississippi through 2017.

"The violation centers shall be equipped to address the underlying factors that led to the offender's violation as identified based on the results of a risk and needs assessment. At a minimum, each violation center shall include substance abuse services shown to reduce recidivism and a reduction in the use of illicit substances or alcohol, education programs, employment preparation and training programs and behavioral programs."
—Mississippi House Bill 585 (2014)

Using quantitative data from MDOC and stakeholder interviews (box 1), Urban assessed the impact of TVCs since H.B. 585 was passed. This analysis examines:

- the impact of TVCs on the prison population, overall incarceration, and other outcomes;
- how admissions to incarceration for technical violations changed since H.B. 585; and
- how lengths of incarceration for technical violations changed since H.B. 585.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004694

BOX 1

Methodology

Urban received the following quantitative data from MDOC for this brief:

- admissions to and releases from MDOC jurisdiction between 2010 and 2017
- sentencing data
- available data on violations of probation and parole occurring between 2010 and 2017
- demographic data (including gender, race, and dates of birth)
- available data on assessed risk

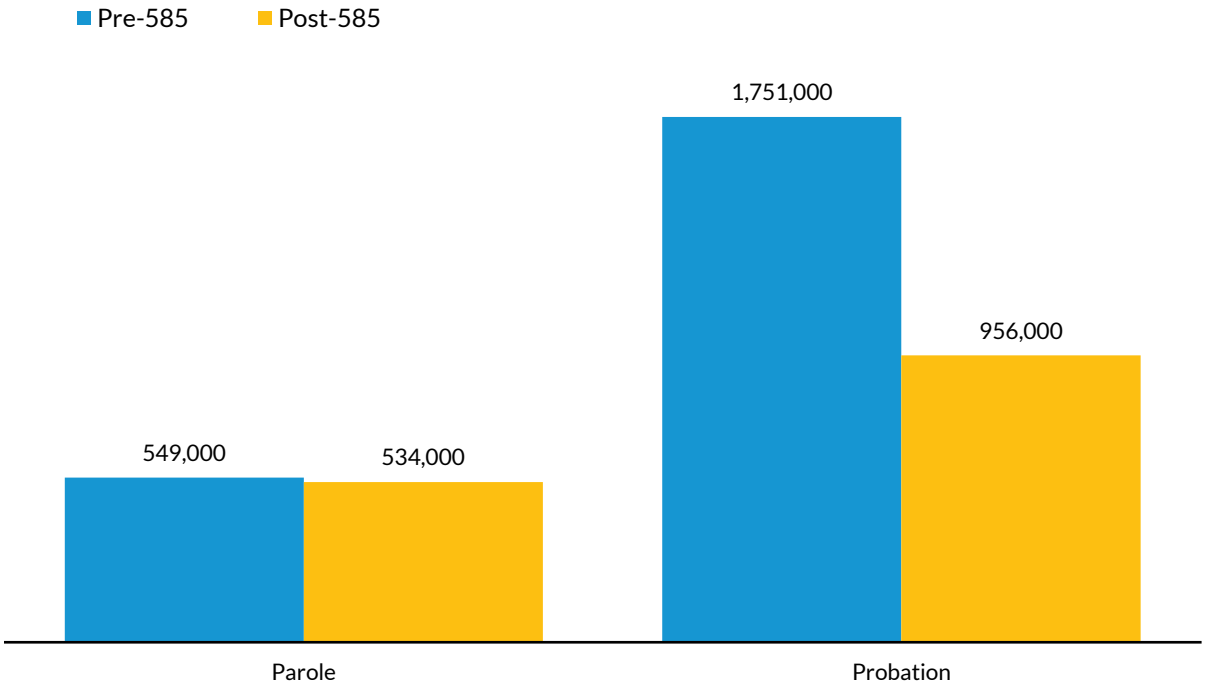
We also interviewed the following stakeholders about Delta TVC:

- MDOC community corrections staff and leadership
- staff and people incarcerated at Delta TVC
- judges
- a parole board member
- community and legislative advocates

Findings

Use of Prison and Incarceration to Respond to Technical Violations

In the 3.5 years after H.B. 585 was implemented, the number of imprisonment days used for technical revocations in Mississippi decreased 35 percent. As figure 1 shows, most of this decline owed to a reduction in imprisonment days used for technical revocations from probation, which decreased 45 percent postimplementation. Imprisonment days for technical revocations from parole decreased by just 3 percent.



AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004695

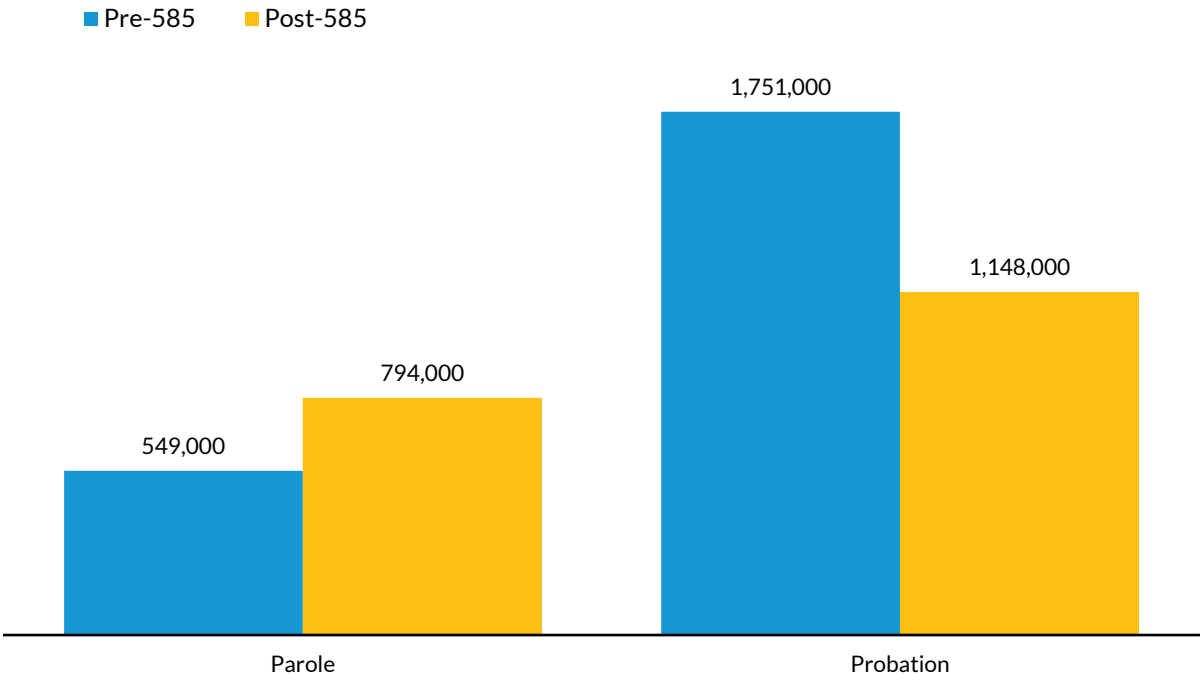
FIGURE 1

Imprisonment Days Have Decreased for Probation and Remained Flat for Parole

Imprisonment days for technical violations before and after H.B. 585 (for people released)

Source: Mississippi Department of Corrections.

Notes: Imprisonment days are calculated by totaling the number of days served in prison for everyone admitted to and released from prison for a technical revocation in the pre-585 and post-585 groups. "Pre-585" includes all people admitted and released between January 1, 2011, and June 30, 2014. "Post-585" includes all people admitted and released between July 1, 2014, and December 31, 2017. Figures are rounded.



With the addition of TVCs, Mississippi's number of incarceration days (including TVCs and prisons) decreased 16 percent in the 3.5 years after H.B. 585. This decrease is largely attributable to decreases in incarceration among people on probation (figure 2). In contrast, the number of days used to incarcerate people on parole for technical violations increased 45 percent after H.B. 585.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004696

FIGURE 2

Incarceration Days Have Decreased for Probation and Increased for Parole

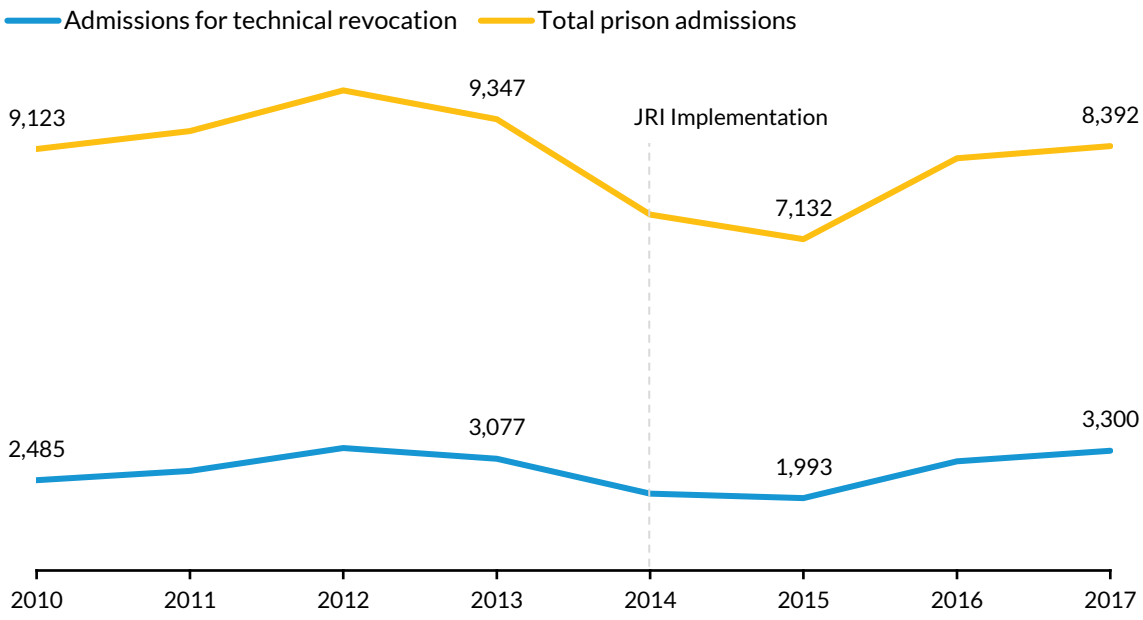
Incarceration days (prison and TVCs) for technical violations before and after H.B. 585 (for people released)

Source: Mississippi Department of Corrections.
Notes: Figures are rounded. Incarceration days are calculated by totaling the number of days served in prison or a TVC for everyone admitted to and released from prison for a technical revocation in the pre-585 and post-585 groups.

Variations in imprisonment or incarceration day usage are driven by changes in admissions to prison and incarceration for technical violations, along with lengths of stay in prison or TVCs.

Admissions to Incarceration for Technical Violations

HOW MANY PEOPLE ARE ADMITTED TO INCARCERATION FOR TECHNICAL VIOLATIONS?



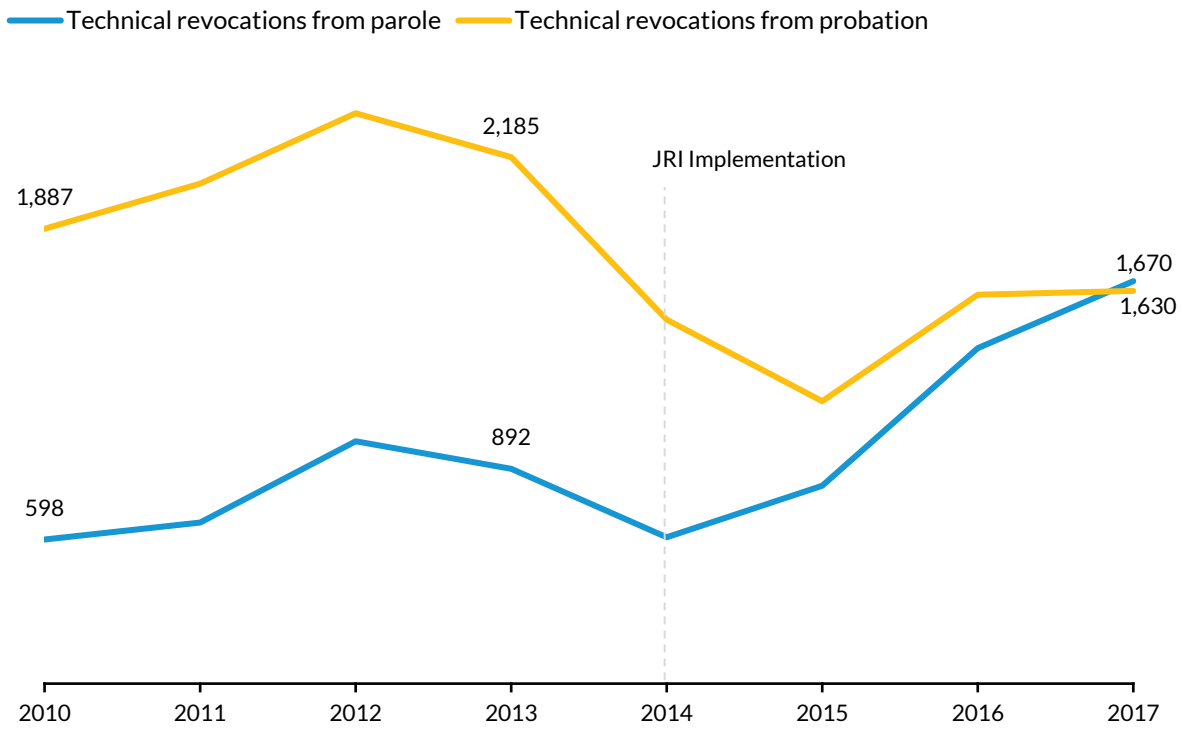
Between 2013 and 2017, overall admissions to Mississippi prisons decreased 10 percent, while prison admissions for technical violations increased 7 percent (figure 3). Technical revocations make up a large and growing share of prison admissions, accounting for 33 percent of all 2013 prison admissions and 39 percent of 2017 prison admissions. Overall, more people on parole were sent to prison or TVCs for technical violations in the years after H.B. 585 than the years before it, whereas approximately the same number of people on probation were sent to prison or TVCs.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004697

FIGURE 3

Technical Revocations to Prison Increased, Whereas Overall Prison Admissions Decreased

Annual prison admissions and technical revocations, 2010–17



Source: Mississippi Department of Corrections.

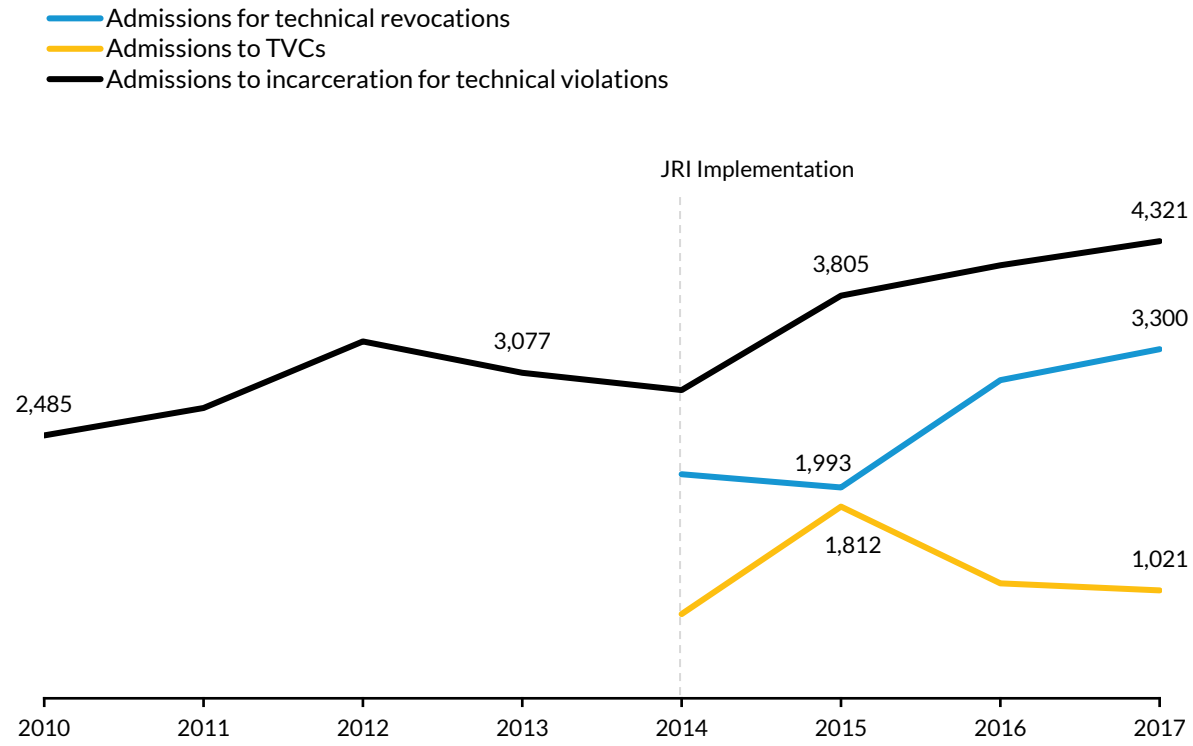
This increase in admissions to prison for technical revocations owes to an increase in technical revocations to prison from parole specifically. Technical revocations from parole increased 87 percent between 2013 and 2017, while technical revocations from probation decreased 25 percent (figure 4). Although Mississippi's parole population has increased since 2013, technical parole revocations have increased at a faster rate; in 2017, 12 percent of the parole population was revoked to prison for a technical parole violation, compared with 9 percent in 2013. Approximately the same proportion of the probation population was revoked to prison for a technical violation in 2017 (4 percent) as in 2013 (5 percent).[6]

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004698

FIGURE 4

Technical Revocations to Prison Increased for Parole and Decreased for Probation

Source: Mississippi Department of Corrections.



People in Mississippi who are admitted to incarceration for technical violations are sent either to prison or a technical violation center. With the addition of TVCs, more people are being admitted to incarceration for technical violations. Total admissions to incarceration—that is, both to prisons and TVCs—for technical violations increased 40 percent between 2013 and 2017 (from 3,077 to 4,321) (figure 5). Again, this increase largely owes to admissions from parole, which increased 145 percent during that period, while admissions from probation remained similar from start to finish with some fluctuations in between.

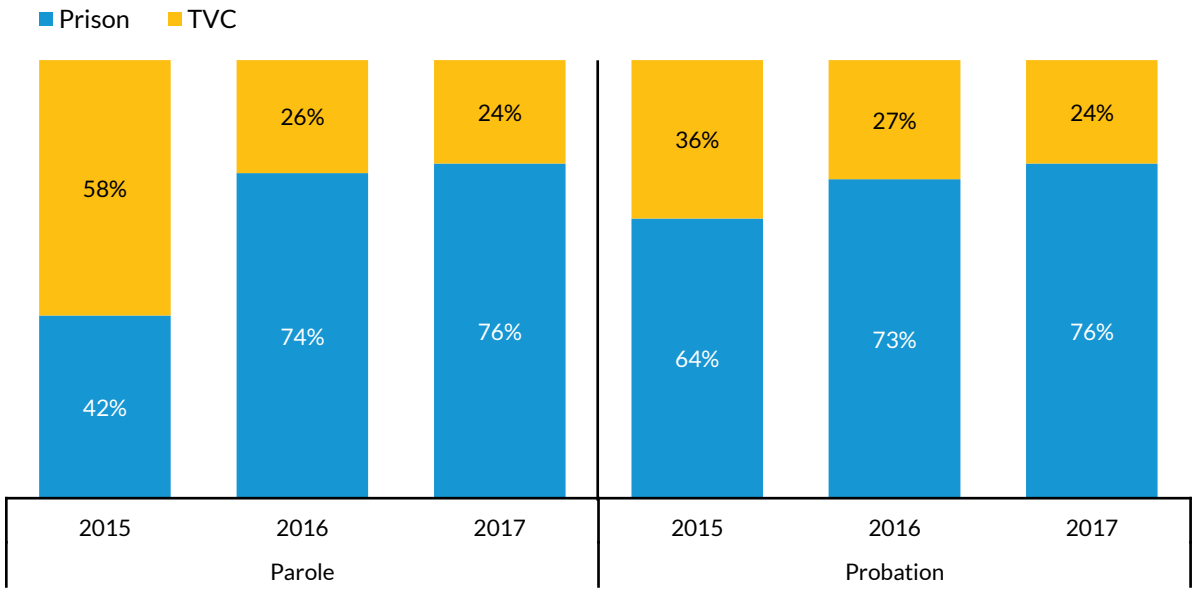
AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004699

FIGURE 5

Total Admissions to Incarceration for Technical Violations Increased

Admissions to incarceration (TVCs and prisons) for technical violations (parole and probation)

Source: Mississippi Department of Corrections.



The proportion of admissions to incarceration for technical violations that result in someone going to a TVC (rather than prison) has decreased since 2015 for both parole and probation. In 2015, 58 percent of people on parole and 36 percent of people on probation who were admitted to incarceration for a technical violation were sent to TVCs rather than prison; in 2017, 24 percent of people on parole and 24 percent of people on probation were sent to TVCs (figure 6).

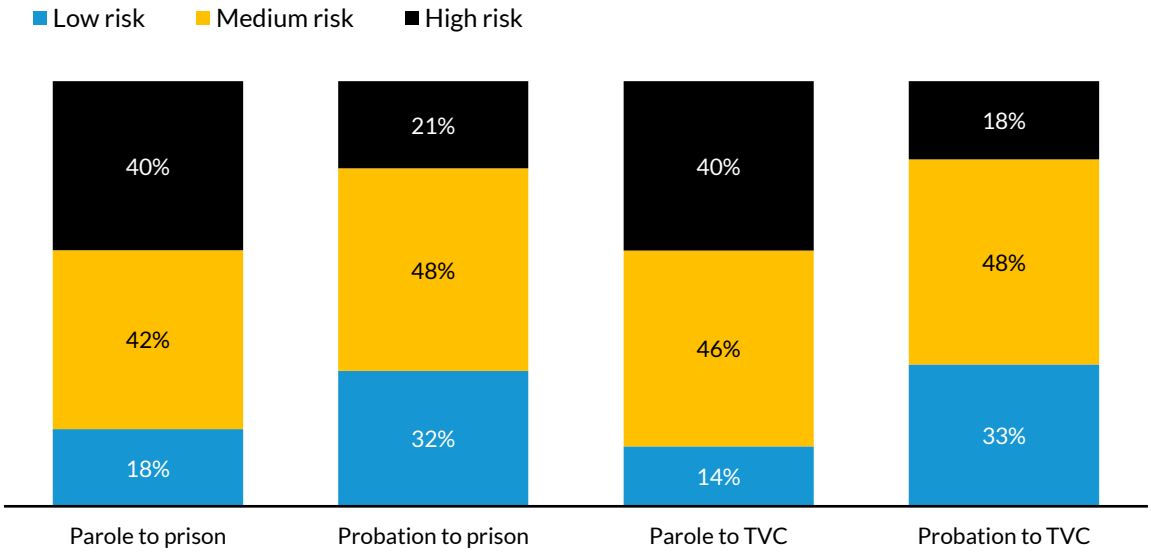
FIGURE 6

The Proportion of Admissions to Incarceration for Technical Violations to TVCs Decreased

Proportion of admissions to incarceration for technical violations; prison versus TVC

Source: Mississippi Department of Corrections.

WHO IS BEING INCARCERATED FOR TECHNICAL VIOLATIONS?



Risk profile. The proportion of people admitted to incarceration for technical violations who are classified as low risk is larger for probation than for parole (this is true for technical revocations to TVCs and for technical revocations to prisons). In 2017, approximately one-third of people revoked for technical violations to prison (32 percent) and to TVCs (33 percent) from probation were classified as low risk (figure 7).

AMERICAN OVERSIGHT

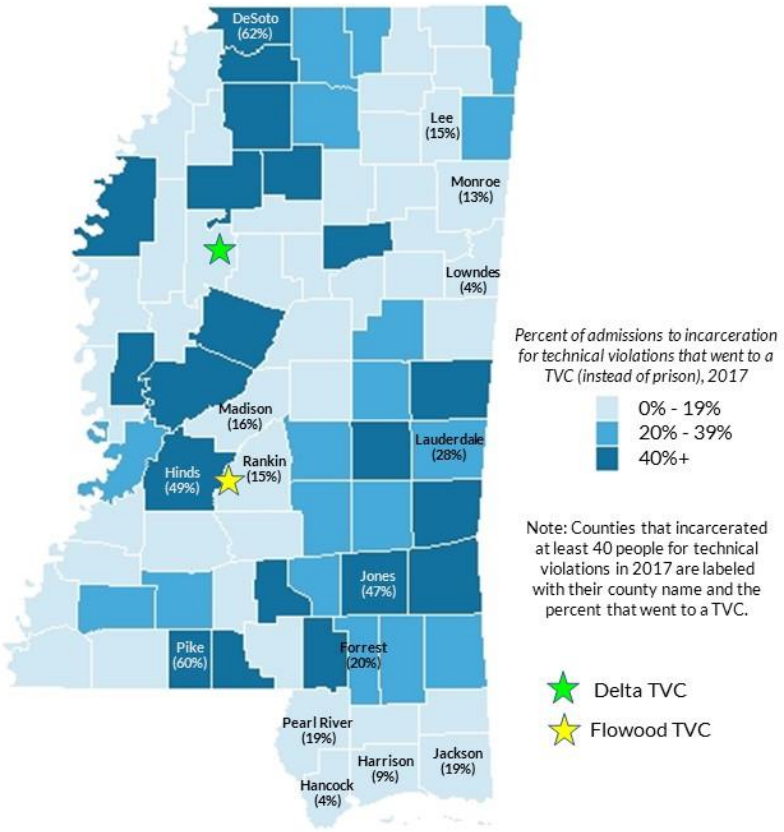
FIGURE 7

Larger Proportion of Technical Revocations to TVCs and Prison from Probation Are Low-Risk

Admissions to incarceration for technical violations by risk level, 2017

Source: Mississippi Department of Corrections.

The proportion of technical revocations from probation to prison accounted for by people who are classified as low risk increased from 29 percent in 2013 to 32 percent in 2017. In contrast, the proportion of technical revocations from parole to prison accounted for by people who are classified as low risk decreased from 24 percent in 2013 to 18 percent in 2017. In 2017, people classified as low risk who were convicted of nonviolent offenses accounted for 15 percent of technical parole revocations to prison (down from 23 percent in 2013) and 27 percent of technical probation revocations to prison (up from 25 percent in 2013). In other words, more than 20 percent of those revoked to prison for technical violations of probation or parole were convicted of nonviolent offenses and classified as low risk.



Geography. The likelihood of being sent to a TVC varies by county,[7] particularly for people on probation. In 2017, in counties where at least 40 people were admitted to either a TVC or prison for a technical violation of probation, the share of people admitted to TVCs rather than prison ranged from 4 percent (Hancock County and Lowndes County) to 62 percent (DeSoto County). For parole, the share of people incarcerated for a technical violation who went to a TVC rather than prison ranged from 16 percent (Pike County) to 35 percent (Clay County). Figure 8 offers a map of admissions to incarceration for technical probation violations by county of conviction.

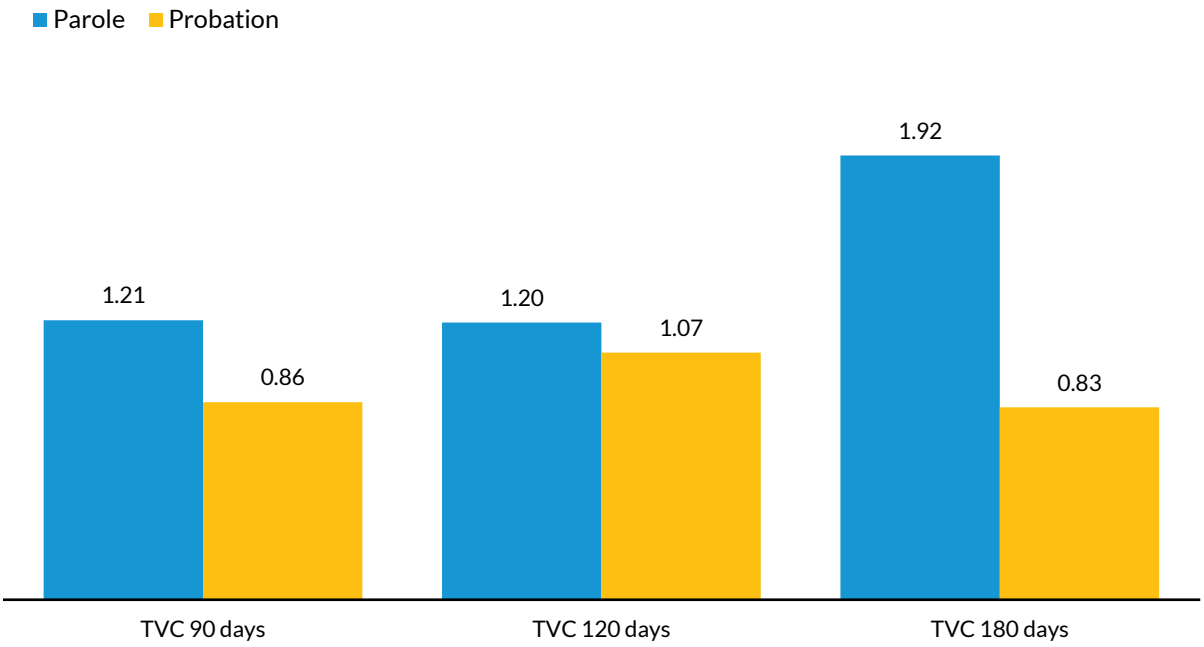
FIGURE 8

Use of TVCs Varies by Geographic Location

Admissions to incarceration for technical violations from probation, by county of conviction (2017)

WHY ARE PEOPLE BEING RECOMMENDED FOR TVCS FOR TECHNICAL VIOLATIONS?



Using sanctions data provided by MDOC,[8] Urban examined the technical violations for which supervision officers recommended technical revocations to TVCs. On average, people on probation recommended for TVCs had fewer prior recorded sanctions than people on parole. This trend holds across all three recorded TVC sanction lengths (90 days, 120 days, and 180 days). People on probation recommended for a 180-day TVC sanction had an average of just 0.83 prior recorded sanctions, meaning probation officers are bypassing shorter stays in TVCs and recommending people who have not previously received any sanctions to the most severe (i.e., the longest) TVC sanction (figure 9).

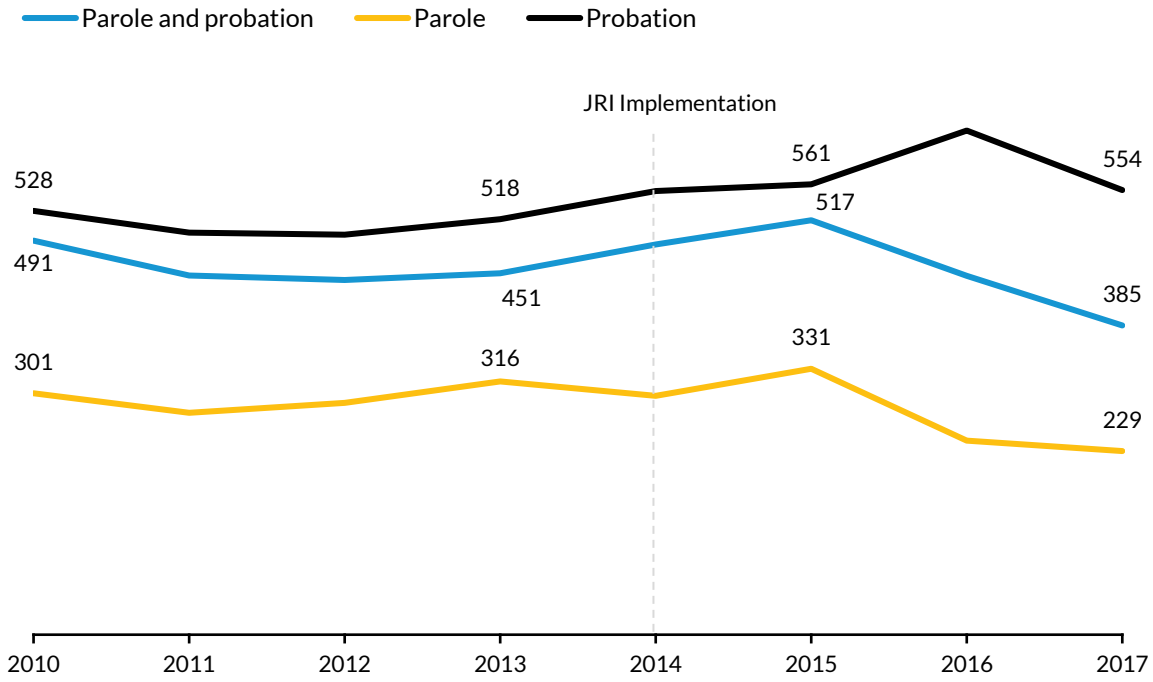
Note: "Abscond" includes failure to report for more than one required contact.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004704



Lengths of Stay for Technical Violations

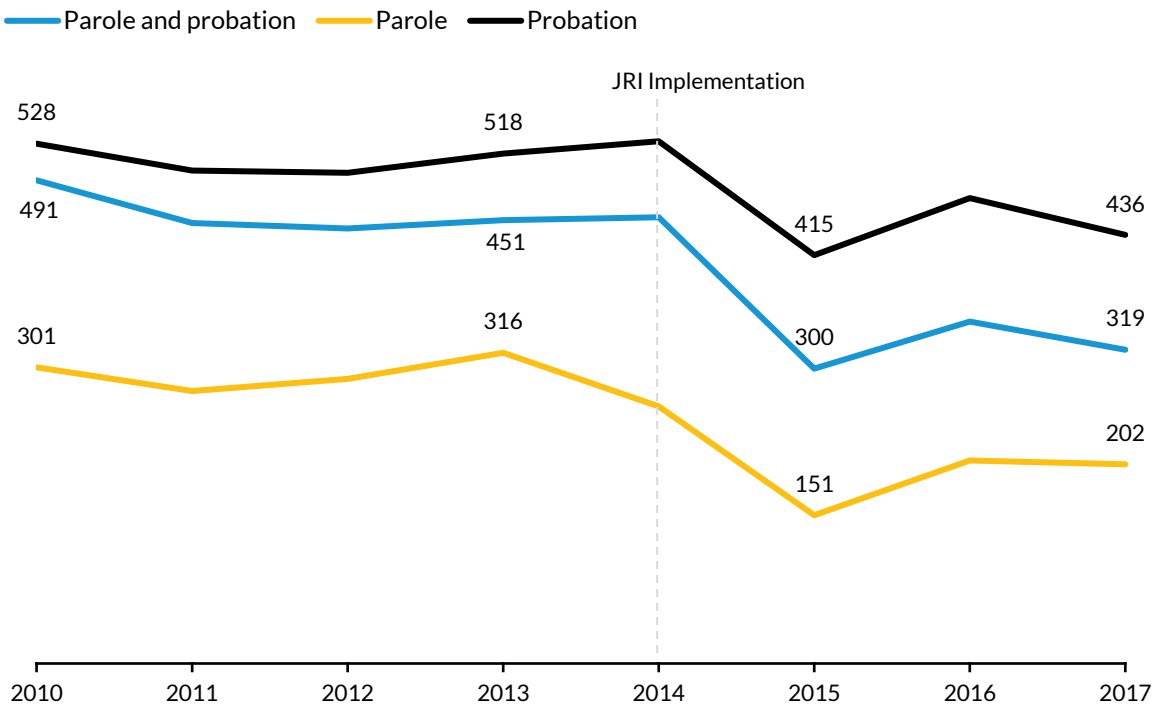
The average prison stay at release[9] for people revoked to prison for technical violations decreased 14 percent between 2013 and 2017. This decrease largely owes to a 28 percent reduction in the average length of stay in prison for technical parole revocations; average length of stay in prison for technical probation revocations increased 7 percent. In 2017, people released from prison after being revoked for a technical violation from probation spent approximately one and a half years (554 days) in prison, whereas people revoked from parole spent approximately 8 months (229 days) (figure 10). People released from TVCs spent an average of 110 days (probation) and 104 days (parole) incarcerated.

FIGURE 10

Lengths of Stay in Prison for Technical Violations Decreased for Parole and Increased for Probation

Days spent in prison for technical violations (for people released)

Source: Mississippi Department of Corrections.



Overall, people on probation and parole in Mississippi are spending less time incarcerated for technical violations than they were before H.B. 585. The average length of incarceration (i.e., in both prison and TVCs) for technical violations decreased 29 percent between 2013 and 2017. During that period, average length of incarceration for technical violations decreased 36 percent for people on parole and 16 percent for people on probation. In 2017, people on probation incarcerated for technical violations spent, on average, more than twice as long in prison as people on parole (14.5 months and 6.7 months, respectively) (figure 11).

Additional Outcomes and Recommendations

A synthesis of findings from interviews with Mississippi criminal justice stakeholders sheds light on some additional potential impacts of TVCs, as well as recommendations for policymakers and administrators to consider.

Additional Outcomes

Although it is too soon to assess recidivism rates for people released from TVCs, recent administrative changes could improve outcomes. Since April 2018, Delta TVC has provided programming to address the factors underlying criminal behavior, including alcohol and drug education, workforce and reentry programming, and cognitive training. It has also provided supplemental programming on an ad hoc basis, including a class on financial well-being. Mississippi Department of Corrections plans to expand programming in Delta TVC to the extent possible. There are not yet any formal assessments of program quality, nor are there risk and needs assessments for tailoring programming.

Additionally, recent legislative changes could better align TVCs with H.B. 585's original intent. As previously discussed, H.B. 387 (passed in 2018) clarified that revocation caps apply according to a

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004706

person's number of prior technical revocations, not violations. This clarification was intended to address the issue of decisionmakers stacking violations to bypass TVCs and revoke people directly to prison. Because the quantitative data in this brief only go through 2017, it is unclear whether these changes have made an impact. However, Mississippi stakeholders have mixed opinions about the extent to which these changes have altered behavior, and about whether decisionmakers are aware of these changes.

Data Recommendations

Data limitations inhibited Urban's ability to examine important outcomes, such as the impact of TVCs on public safety and their ability to address the underlying factors of revocations. Filling gaps in data on TVCs can make future analyses more comprehensive. Priorities for future data collection include detailed information about sanctions for each violation (both recommended sanctions and implemented sanctions); information on incentives given to people on supervision; and information about programming and other treatment offered to and completed by people incarcerated in prison, incarcerated in TVCs, and under community supervision. Additionally, collecting metrics on recidivism—including revocations after a TVC sanction—and metrics on successful supervision case closures—such as time to closure—could be expanded and collected in a more usable format that allows the progression of a case to be tracked more easily.

The analysis presented here highlights the differing responses to technical violations for people on parole and probation and for people in different counties. To better understand and address those variations, it is critical that Mississippi be able to link sanctions and admissions data to specific decisionmakers and geographic areas. These data could be used to identify where and why TVCs are or are not being used, and lead to more targeted, cost-efficient, and effective solutions. Additionally, geographic data can be used to hold system actors accountable for responding to technical violations in accordance with the law.

Other Recommendations

House Bill 585 requires that technical violation centers be "equipped to address the underlying factors that led to the offender's violation as identified based on the results of a risk and needs assessment."[10] Moreover, research has demonstrated that interventions are most effective when based on a person's assessed risks and needs (Andrews and Bonta 2010; Bonta and Andrews 2007). Delta TVC currently provides the same programming in the same dosage to everyone admitted. Moving toward targeted programming in TVCs will help Mississippi prioritize resources for people who will benefit most from programming, and better align its TVC program with H.B. 585 requirements and research on how to address criminal behavior most effectively.

Research has also demonstrated that for people assessed as low risk, interventions are generally less effective and may even create worse outcomes (Andrews and Bonta 2010; Bonta and Andrews 2007; Lowenkamp and Latessa 2004). Interviews with Mississippi stakeholders showed even the shorter 90- or 120-day stays in TVCs disrupt people's lives, including by causing job loss, housing loss,

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004707

and disruption of family relationships. Limiting the use of incarceration to certain supervision violations would allow resources used on incarceration to be redirected toward community-based interventions, thus decreasing the likelihood of these disruptions and allowing people to maintain critical family and community ties while receiving programming targeted to their risks and needs.

Conclusion

States across the US are looking for more effective solutions to respond to technical violations and improve public safety. Mississippi's H.B. 585 established graduated sanctions, revocation caps, and technical violation centers to address the growing number of people admitted to prison for technical violations and to get a better public safety return on its use of correctional resources. Despite challenges implementing TVCs and decisionmakers' hesitation to use them, Mississippi has decreased the number of imprisonment days used for technical violations. More people are being admitted to incarceration for technical violations, but they are spending less time incarcerated. Importantly, this analysis shows TVCs are used differently for people on probation and parole.

For parole, there have been more technical revocations to prison since H.B. 585, and there have been even more overall admissions to incarceration for technical violations (that is, including TVCs). However, the average length of stay—in prison and overall—has decreased. Overall, Mississippi has used approximately the same number of imprisonment days for technical violations of parole as before H.B. 585, but the number of incarceration days (prison and TVCs) for technical violations of parole has increased 45 percent.

For probation, fewer people are being revoked to prison for technical violations. Including TVCs, approximately the same number of people on probation are being admitted to incarceration (both prison and TVCs) for technical violations as before H.B. 585. Though people revoked to prison from probation for technical violations are spending slightly longer terms in prison, the average length of incarceration has decreased. The net impact of these changes is a 45 percent reduction in imprisonment days and a 16 percent reduction in incarceration days for people with technical violations of probation.

Moving forward, Mississippi can use this analysis to inform improvements to the TVC program and to develop more cost-effective, targeted community solutions to reduce the disruptive effects of incarceration and improve public safety. It will also be critical to expand and improve data collection to ensure outcomes are improving and programs align with legislative requirements and research.

[4] *Final Report* (Jackson: Mississippi Corrections and Criminal Justice Task Force, 2013).

[5] *Final Report*, Mississippi Corrections and Criminal Justice Task Force.

[6] Proportions are calculated by taking the parole/probation population on January 1 of a given year and then looking at the percentage of that population that was revoked on a technical violation in the subsequent 365 days.

[7] The data do not permit an examination by county of supervision. County of conviction is likely a better proxy for people on probation than for people on parole.

[8] Available sanctions data only include the sanction that the supervision officer recommended. This is not necessarily the sanction that ended up being used, as judges (for probation) and the parole board (for parole) make the final decision to send someone to a TVC or to prison and do not need to adhere to the supervision officer's recommendation. The analysis presented here is limited to instances where supervision officers recorded their recommended TVC sanction for a person.

[9] Includes all people released from prison in a given year after being revoked for a technical violation.

Hello-

I left a message for both Senator Rouson and Senator Brandes last week concerning the attached matter. I am sending a copy to the Governor and mailing one to Dr Zingale as I cant seem to get an email address for him. We are looking for some support from DOR such that we dont pay Doc Stamps twice on our housing program in Clearwater due to a technicality. Not sure who knows whom where, but appreciate any support either Senator (and staff) can give in helping us resolve this and paying this twice - to the tune of nearly $14k.

I am glad to explain, feel free to call me at 727-656-4989.

Thank you

Michael Jalazo

August 30, 2019

Dr. Jim Zingale, Executive Director
Florida Department of Revenue
5050 West Tennessee Street
Tallahassee FL, 32399

Dear Mr. Zingale:

This purpose of this letter is in search of support and relief. We are listed as business partner 5485305. This past Tuesday I spent part of the morning in a Judge's chamber reviewing a case with our attorney and an attorney for the Florida Department of Revenue.

The Pinellas Ex Offender Re Entry Coalition (PERC) is an agency that exists to help the offender become and remain an ex-offender, taxpaying citizen reunited with family through advocacy, education, programming and comprehensive service delivery and referral. We believe that the successful reentry of offenders who become and remain ex-offenders is excellent public safety policy. In May of 2016, we acquired a facility in Clearwater to provide housing that we use for Veteran's and others who may have had contact with the criminal justice system and transitioning back into society. When we closed on the property, we executed a mortgage and paid Doc Stamps at that time. It was a different type of transaction because we purchased a company from an out of country owner that had one asset (the Continental Inn, now Continental Housing Program). In February of 2017 we made a simple move – to shutter the old company and have the facility in the name of our non-profit corporation. Sometime after this it became an issue with DOR wanting the same Doc Stamp taxes we had already paid. This could have, should have been quickly and easily addressed and this entire situation would be unnecessary. Certainly, the DOR would not expect a non-profit to pay the same taxes twice.

This is where well intentioned people – including myself, messed it up. Through 2018 my office moved twice, and mail concerning this was sent to an office where I am not located. People began putting mail from that facility in a box for me, but no one informed me. We pay most of our bills online, thus nothing seemed out of the ordinary. Finally, in December when looking for something, I discovered this box where the only significant issue was a big set of mail from DOR. I reviewed it, called your staff and sent to my lawyer because we needed to respond and didn't. Regrettably, I assumed my lawyer took care of this before the date, but he hadn't received what I sent him (while I was on a trip to Tallahassee early in session). Currently there is a lien on nearly $14k in my bank account that has been there for many months now while we have gone through the legal channel that was suggested by my lawyer for review.

It doesn't seem from the legal proceeding that the facts of this are in dispute, rather that since we missed the deadline, statute does not allow for any wiggle room on any order. Any order, in fact, that the judge may make could have state-wide implications in precedent setting (maybe unlikely, but possible) which wasn't really our intent. What may happen, as the Judge really did understand the actual issue is that he may dismiss the

AMERICAN OVERSIGHT

complain we made without prejudice, with leave to amend, thus kicking off potential appeals either way it is ruled upon – also not our intent.

What I am appealing to you for is some sort of consideration in this matter such that rulings and courts are out of this, and we can simply move forward. Again, we are a small non-profit that can't afford to spend $14k this way, and certainly not paying for the same Doc Stamps twice. We are completely open minded to working with DOR in some other way, but at this point I thought I would write to you seeking some compassion and relief with the hope of avoiding any precedent setting actions unintentionally.

Please let me know if you have any questions or comments. I can be reached at 727-656-4989, or emailed at mjalazo@exoffender.org.

Thank you for your time and consideration

Sincerely,

Michael Jalazo
CEO/Executive Director
Pinellas Ex Offender Re Entry Coalition

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

Explanation of Section 1 of SB 1372 relating to voter addresses:

Senate Bill 1372 was a list of concepts and clean up language brought to me by the Florida Supervisors of Elections (FSE).

The language in Section 1 is an attempt to clean up a conflict in Florida law. The language drafted by staff did not accurately portray the intent of the clarification.

Poll workers in Florida take an oath to uphold Florida's election laws (§101.24 and 102.012, F.S.). When those laws conflict as it relates to their duties, we must try and resolve those conflicts. Florida Statute 101.043 is one of those statutes.

Paragraph (b) in section 1 of that statute requires that:

"The address appearing on the identification presented by the elector may not be used as the basis to confirm an elector's legal residence or to otherwise challenge an elector's legal residence."

Compare this to the language in paragraph (c) of that same section:

"When an elector presents his or her picture identification and the elector's address on the picture identification matches the elector's address in the supervisor's records, the elector may not be asked to provide additional information or to recite his or her home address."

The very act seemingly required in paragraph (c) – matching the address on the ID with the address in the supervisor's records – clearly violates the provision in paragraph (2) that the "address appearing on the identification presented . . . **may not** be used . . . to **confirm** an elector's legal residence . . . [emphasis added]."

The best way to resolve this would be to strike only the provision against "confirming" the address by matching it; thus keeping the protection for the voter that the address on their ID cannot be used as the sole basis to challenge a voter's eligibility.

The ideal language for Senator Brandes' bill would be:

> *The address appearing on the identification presented by the elector may not be used as the basis to ~~confirm an elector's legal residence or to otherwise~~ challenge an elector's legal residence.*

Also, as a side note for those who see this clean-up as "voter suppression" I would offer the following important reminder: of the twelve valid forms of photo ID allowed under Florida law [§ 101.043 (1)(a), F.S.] only two have an address – the Florida driver's license and the Florida ID card. The remaining 10 valid forms of ID either do not have, or have no requirement under law to have, a voter's residence address on them.

AMERICAN OVERSIGHT

Dear Senator Brandes,
Several other members from the American Advertising Federation (AAF) - Tampa Bay and I will be visiting Tallahassee with other AAF members from around the State on November 5th for “Advertising Day.” The AAF has chapters across the United States, and Florida chapters will be sending about 50 representatives to Tallahassee to discuss our advertising interests, goals, and contributions to the Florida economy.

Our representatives from Tampa Bay would like to set up a brief appointment with you on November 5th. I can be reached by email at kate@socialforces.com and directly on my mobile phone via call or text at 813-545-8560.

Thank you in advance for your time!

KATE WHATLEY

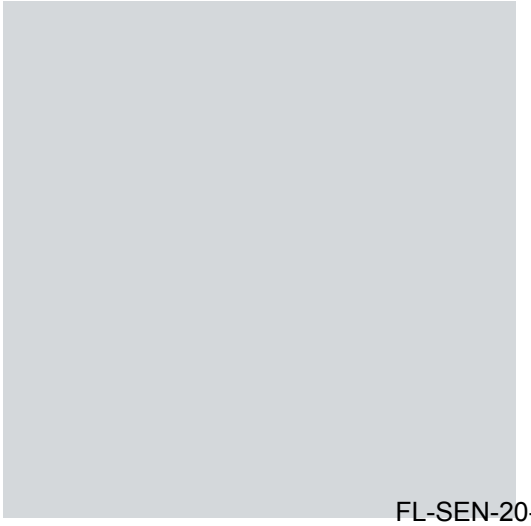
Subject: GLOBAL INNOVATION COMPETITION: The New Age of Mobility | 2020 ITS World Congress

Global Innovation Competition



GLOBAL INNOVATION COMPETITION

The **Global Innovation Competition** is a start-up competition that will highlight emerging technologies and solutions that create a safer, greener, and smarter mobility system. The 2020 competition is hosted by **ITS America, ERTICO, and ITS Asia-Pacific**. Our partners for the competition include **Los Angeles Cleantech Incubator (LACI)** and **Prospect Silicon Valley**.

There will be three semi-final competitions held globally; one in each region - Europe, Asia-Pacific, and North America. There will be two winners selected from each region; and those winners will travel to the 2020 ITS World Congress in Los Angeles to compete to be the two grand prize winners.

This year's theme: Emerging Technologies and Solutions that create a Safer, Greener, Smarter Mobility System.

At the ITS World Congress in Los Angeles, the judges will select a United States-based winner, as well as a global based winner. Both winners will a receive $20,000 USD cash prize, a robust marketing package and extensive networking opportunities with leaders in the ITS industry. Along with this grand prize package; the winners will have the opportunity to attend ITS Asia-Pacific, ERTICO, and ITS America Annual Meetings in 2021.

Good Morning!

This email serves as follow-up to our meeting earlier this week. We appreciated getting to hear from many of you on your expectations for the coming year. Please see the below and attached information in follow up to our discussions:

Meeting Transcript
I've attached a meeting transcript for your reference.

Previous Task Force Reports
As recommended by our Vice Chair Senator Brandes, attached you will find the final report from the 2011-12 and 2015-16 Task Forces they will also be posted to our website: www.dms.myflorida.com/efficiencytaskforce.

Travel Reimbursements
Also attached are forms related to the travel reimbursement process. As a reminder, we will reimburse up to the thresholds listed, not above.

Subcommittee Preferences
If you have not already, please respond directly to me with your placement preference for one of the following subcommittees: Government Operations or Technology & Innovation. Chair Satter will be making appointments after receiving these preferences.

Path Forward
Following subcommittee appointments, we currently plan to schedule subcommittee calls the week of October 28-November 1. It is important that the subcommittees begin to meet to first vet and formulate ideas for discussion by the full task force. As mentioned by Chair Satter, I've also attached a document that will serve as our "Issue and Recommendations" list. Please submit any ideas for potential presentations and action in the spreadsheet. This would include any individuals you recommend to speak to the Task Force.

Sunshine Contacts
If you have questions on the Sunshine requirements/public records issues related to the Task Force please contact Chasity O'Steen chasity.osteen@dms.myflorida.com or Sean Gellis Sean.Gellis@dms.myflorida.com.

We expect the next full meeting of the Task Force to occur either the week of November 18-22 or December 2-6, once the subcommittees are up and running.

Please let me know if you have any questions.

Government Efficiency Task Force
2011-2012

Authority

The Task Force was created by Article III, section 19(i) of the Florida Constitution to develop recommendations for improving governmental operations and reducing costs.

First established in 2007, the Task Force meets each fourth year and submits its recommendations to the chairperson and vice chairperson of the Legislative Budget Commission, the Governor, and the Chief Justice of the Supreme Court.

As enacted in Section 11.9005 of the Florida Statutes, the Task Force is composed of 15 members of the Legislature and representatives from the private and public sectors appointed by the Governor, the President of the Senate, and the Speaker of the House of Representatives.

June 27, 2012

Dear Governor Scott, Senator Alexander, Representative Grimsley, and Chief Justice Canady:

Pursuant to Article III, section 19(i) of the Florida Constitution, the Government Efficiency Task Force submits its recommendations on improving governmental operations and reducing costs to the Governor, the chair and vice chair of the Legislative Budget Commission, and the Chief Justice of the Supreme Court. The Task Force submits the following final report of recommendations upon completion of its one-year term, as provided in section 11.9005, Florida Statutes.

In the area of Health and Human Services, the Task Force recommends:

State Employee Health Insurance Benefits

- Establish uniform premium contribution amounts for all classes of state employees.
- Set contributions for all employees at the current contribution levels of Career Service employees. Equalizing contributions at these levels is estimated to save **$34 million** per year.
- Implement a defined contribution model for state employee health insurance benefits. A defined contribution model is estimated to save **$250-300 million** per year.
- Consider multiple defined contribution options when designing a new defined contribution structure for state employee health insurance.
- Review the state's contribution and adjust for changes in health care costs at a minimum of every three years.

State Procurement of Mental Health and Substance Abuse Services

- Utilize common metrics for contracts when procuring mental health and substance abuse services.
- Ensure unit price information is available to all agencies and require agencies to check pricing for mental health and substance abuse services.
- Provide that agencies make greater use of pooled purchasing arrangements when cost effective.
- Implementing the above recommendations is estimated to achieve a cost savings of 6%-8%, or **$72-$96 million** per year based on current annual expenditures.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004769

Criminal Justice

- Provide the Department of Corrections with flexibility to develop and implement cost savings initiatives, in conjunction with counties. The department should have the flexibility to implement new models of inmate transfer, assignment, or supervision if determined to effectively carry out inmate sentences, following existing statutory requirements, while achieving cost savings. Counties should be able to submit cost savings proposals to the Department of Corrections and appeal decisions to the Governor and Cabinet.
- Provide incentives for counties to participate in initiatives that will achieve efficiencies and cost savings for the state. Incentives should be created for arrangements that promote flexibility and produce mutually-beneficial arrangements for the state and counties. Incentives may include, but are not limited to, diversion of inmates from state to local facilities and increased utilization of community supervision, including electronic monitoring.
- Investigate implementation of a web-based risk and needs assessment tool for use at time of sentencing. Estimated costs for sentencing options should be included in the tool to allow judges to weigh projected results with estimated costs of sentences. The tool should be made available to judges at the time of sentencing and to the public through a web portal.
- Perform a study to determine the potential cost savings resulting from a risk and needs assessment tool.
- Stakeholders should develop recommendations to the Legislature for increasing flexibility in sentencing guidelines. Judges should be provided with the flexibility to consider the many purposes of sentencing, including punishment, rehabilitation, deterrence, restitution, recidivism reduction, and protection of public safety, as well as cost.

In the area of Education, the Task Force recommends:

Early Learning Time and Attendance

- The Task Force recommends that the Office of Early Learning adopt an electronic form of attendance submission for Voluntary Prekindergarten (VPK) and School Readiness (SR) programs. An electronic form of attendance submission is estimated to save **$4 million** per year by eliminating the manual paper process and reducing staff time.
- The Task Force recommends adopting a point of service system utilizing either electronic swipe cards or biometrics to supplement an electronic time and attendance submission process. Adopting this system would:
    - Reduce human error and fraud that result in improper payments;
    - Reduce the time burden on providers in collecting and recording attendance data;
    - Reduce the amount of paper record keeping required of providers;
    - Allow for quicker audits of attendance records;
    - Allow for quicker turnaround time on payments for SR and reconciliation for VPK; and
    - Allow for real time attendance data.
- The savings would be between **$40-60 million** per year if Florida were to realize similar results of other states that have utilized a point of service system. The savings would be based on the reduction of improper payments.
- The Task Force recommends ensuring sufficient time is allowed for implementation and training so providers can effectively learn to use the system.
- The Task Force recommends allowing for the sharing of time and attendance data with other agencies that utilize the information.
- The Task Force recommends utilizing other states' experiences with the point of service system to avoid common implementation mistakes.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004770

Inmate Education and Re-entry

- Individualized Inmate Re-entry Plans
  - Create an individualized inmate re-entry plan that, based on information obtained from assessments, outlines programming to be provided during the period of incarceration.
  - Consider educational needs when determining an inmate's facility placement.
  - Assessments to determine literacy skills are critical. Focus and priority should be given to this process of assessing literacy skills to provide appropriate foundation for other educational programs and opportunities after prison.
  - Develop a program providing literacy and life skills training for inmates who are ineligible for the Mandatory Literacy Program due to prison term length.
- Mandatory Literacy Program
  - Require prisoners who meet the requirements of the Mandatory Literacy Program to successfully complete the program by attaining a total battery score of 6.0 on a Test of Adult Basic Education.
- Online Education Opportunities
  - Investigate opportunities to introduce online and e-learning educational and vocational training in prisons.
  - Set up a pilot program to develop widely-acceptable security protocols for Internet access.
- Mission Driven Prisons
  - Convert some of Florida's prisons to institutions that focus on chemical dependency, literacy and basic education, and vocational education.
  - Align the missions of vocational education prisons to meet the needs of the employment market.
- Program Efficiency
  - Adopt policies regarding prioritizing the eligibility of educational and vocational programs to inmates whose likelihood of recidivism will be most improved as a result of this instruction.
  - Expand vocational education programs.
  - Research implementation of a double-track education system.
- Metrics and Statistics
  - Conduct a cost-benefit analysis to evaluate rehabilitative programs, such as educational and vocational programs.
  - Develop a regular report on the cost-effectiveness of rehabilitative programs, including those provided by entities outside of the Department of Corrections.

Higher Education

- Implement a pilot project for year-round school operations in the State University System.
- The Board of Governors should create a University Review Program.
- Strategies for Degree Production
  - The Blue Ribbon Task Force should develop strategies to increase degree production.
  - There is a high degree of interest among Florida's policy makers to increase the production of science, technology, engineering, and mathematics (STEM) degrees in the state. The Blue Ribbon Task Force should review methods to increase the production of STEM degree graduates in the State University System, and in doing so, consider the actions of HB 7135 and the creation of a statewide STEM strategic plan.
- Optimum Facility Utilization
  - The Blue Ribbon Task Force should review and develop a comprehensive assessment tool to evaluate facility usage, including classroom utilization, to more accurately determine the need for Public Education Capital Outlay program (PECO) funds.

AMERICAN OVERSIGHT

- Funding
  - The Blue Ribbon Task Force should investigate innovative strategies of funding for higher education.
  - The Blue Ribbon Task Force should find ways to increase transparency in state funding of higher education.
  - The Blue Ribbon Task Force should study the issue of market rate tuition and provide recommendations to the Governor and Legislature on its implementation.

University Procurement

- State University Procurement
  - The State University System adopt an electronic procurement platform(s) that offers functionality similar to the systems at the Florida State University and the University of Florida.
- Collaboration with the Department of Management Services
  - The Board of Governors, state universities, and the Department of Management services continue coordinating their efforts in the area of procurement in order to better manage tracking of spend, contracting, strategic sourcing, and best procurement practices.
  - The Department of Management Services and the State University System identify and jointly strategically source common goods and services in order to achieve maximum savings to both parties.
  - State universities utilize state term contracts to achieve savings.
- Florida Polytechnic
  - The Board of Governors leverage the creation of Florida Polytechnic to pursue opportunities to implement shared services models across multiple institutions.

In the area of General Government, the Task Force recommends:

Business Regulation

- Provisional Business Permits
  - Implement a provisional business permit for select industries.
  - Create an evaluation process for industries linked to health and human safety to qualify for a provisional business permit.
  - Utilize information from the business dashboard to indentify key industries that would qualify for the permit.
  - Utilize the provisional permit process to identify and eliminate unnecessary regulations.
  - Conduct a pilot program in selected counties or cities to benchmark the effectiveness of the permit.
- Business Dashboard
  - Implement a business permit dashboard that tracks the amount of time it takes for a company to get started in the State of Florida.
  - Begin the dashboard at the state level, tracking the business as it goes through the state regulatory process.
  - Begin with a pilot program with counties participating on a voluntary basis.
  - Encourage county/city compliance by requiring participation as a condition for certain funding.
  - Utilize current information already collected by state agencies, the Chamber of Commerce, and local governments.
  - Designate one agency, preferably the Department of State, to receive all information related to the business dashboard.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004772

  - Utilize dashboard metrics to identify unnecessary regulations, industries that do not require regulation, and industries or businesses that would qualify for the provisional business permit.
  - Allow private businesses to submit additional information.
  - For each week in reduced startup time resulting from the business dashboard, the state would save an estimated **$3.44 million** in unemployment benefit payments.
- One-Stop Business Portal
  - Implement the One-Stop Portal in stages as recommended by Department of Revenue Executive Director Lisa Vickers.
  - Identify redundancies and potential consolidations as the portal is phased in.
  - Utilize the consolidation process to identify unnecessary agency regulation.
  - Create a "Phase 1a" comprised of a "splash page" website with agency links to fast track businesses through the startup or renewal process.
  - Utilize existing call center functions to include a live chat feature to provide real time assistance to users.
  - Include a mechanism that allows for feedback from businesses regarding regulation, which would be forwarded to the Office of Fiscal Accountability and Regulatory Reform and the Legislature.

Expressway and Bridge Authority Consolidation

- An independent party who specializes in best management practices should assist in effectively consolidating the administrative functions of the Orlando-Orange County Expressway Authority (OOCEA) and Tampa-Hillsborough County Expressway Authority (THEA) into Florida's Turnpike Enterprise (FTE). The Florida Department of Transportation estimates a savings of **$24,318,000** per year. With the utilization of a third party, this process may be more efficient and achieve even greater savings.
- If THEA and OOCEA are consolidated into FTE, all revenue collected in the regions should be spent within the same region and local boards should be maintained to make policy decisions on road construction.
- Consolidate the Mid-Bay Bridge Authority into FTE.
- Consolidate all toll collections into a single entity and system, including all administrative functions, software and IT systems, accounting, collection personnel, enforcement, customer service, and billing.
- Require regional toll agencies to benchmark regional and state transportation and authority salaries to avoid possible excessive salaries.

Consultants' Competitive Negotiation Act (CCNA)

- Allow agencies to utilize the "Best Value" process for all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping. This process would allow price to be a factor of up to 50% when ranking the top three most qualified firms. The process would work best for a project with a well-defined scope.
- Allow agencies to utilize the "Modified Best Value" process for all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping. This process would allow the agency to see the price of the top three most qualified firms, but not re-rank the firms, thus preventing the agency from entering negotiations with insufficient information on pricing. This process would work best for projects that do not have a specific scope and for agencies that would otherwise use the current CCNA over "Best Value."

AMERICAN OVERSIGHT

- Maintain the current CCNA process as an option for agencies to utilize when "Best Value" or "Modified Best Value" would not be appropriate. This process would work best for a project that does not have a well-defined scope.

Enterprise Information Technology

- Redefine the role of the Agency for Enterprise Information Technology (AEIT) in governance of state enterprise information technology (IT) and clarify designated enterprise applications and operations.
- Strengthen statutory language to provide AEIT with enforceable governance.
- Provide AEIT with budget and procurement authority for enterprise IT projects and services.
- Maintain the current organizational structure of AEIT under the Governor and Cabinet.
- Establish an Enterprise Technology Advisory Council of public and private industry chief information officers and IT professionals to function in an advisory capacity to the state Chief Information Officer (CIO).
- Task the CIO with modifying AEIT's organizational structure to provide flexibility and nimbleness and to accommodate further adjustments as necessary.
- Direct AEIT to identify and align agencies in process oriented design structures (PODS), grouping similar business processes and functions across state government.
- Direct AEIT to implement enterprise IT in support of this alignment, executed in successful phases according to business processes and functions.
- Direct AEIT to immediately begin identification and alignment of PODS with financial management, due to the foundational importance of the Florida Accounting and Information Resource (FLAIR) subsystem.

State Procurement

- Increased utilization of state term contracts
  - Review all statutory barriers and remove those unnecessary for full utilization of state term contracts.
  - Create a process that gives the Department of Management Services (DMS) an approval role for non-state term contract purchases by agencies.
  - Estimated savings for strategically sourcing the estimated $1.8-$2.5 billion in potential sourceable spend is 6-10%, or **$108-$180 million** to **$150-$250 million** per year.
- Increased utilization of MyFloridaMarketPlace
  - Review the 1% usage fee for MyFloridaMarketPlace (MFMP) and adjust to allow for the greatest utilization by state agencies and other eligible users. Increased utilization of MFMP is estimated to achieve savings of **$9.5 million** per year.
  - Measure full cycle utilization of MFMP through DMS. Reduction in hard and soft costs is estimated to achieve savings of **$10.9-$11.9 million** per year.
  - Provide a public facing catalog solution for other eligible users of MFMP.
  - Convert Florida commodity codes to the National Institute of Governmental Purchasing codes.
- Increased effectiveness of MyFloridaMarketPlace
  - Implement a data analytics solution for MFMP.
  - Automate electronic posting of solicitations created in Sourcing to the Vendor Bid System.
  - Automate the workflow between the Ariba Buyer and Ariba Sourcing modules of MFMP.
  - Provide a public portal for contract information.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004774

- Strategic sourcing
  - Utilize the increased visibility and volume in spend achieved via increased use of state term contracts and MFMP to strategically procure commodities and services.
  - Create an incentive model that utilizes savings achieved by agencies to encourage participation in strategic sourcing.
- Consultants' Competitive Negotiation Act
  - Allow agencies to utilize the "Best Value" process for all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping. This process would allow price to be a factor of up to 50% when ranking the top three most qualified firms.

Florida Retirement System

- Define a goal for the state retirement system. The state does not currently have a defined goal for the retirement system. The Florida Statutes and Constitution provide requirements, but do not outline a set goal or purpose for the state.
- Prioritize portability and transferability of retirement funds. The defined contribution plan currently offers portability for its members. Due to the changing nature of employment and the increasingly transient nature of employees, the state should place a priority on portability and transferability for all state employee retirement funds.
- Review the assumed long term returns on the pension fund and the acceptable funding level. The current assumed return for the FRS pension fund is 7.75%. This assumed rate should be reviewed in context of past market performance to determine if this is an accurate assumption. Various studies have indicated that a funding level of 80% is generally accepted as actuarially sound. As of June 2011, the FRS pension fund has a funding level of 87.5%. The funding level has many assumptions built in, including an assumed rate of return, length of FRS membership, and vesting time of benefits. The funding level policy should be reviewed in the context of the potential issues surrounding retirement funds. The Task Force also recommends that employees contribute a portion of their salary towards their retirement plan.
- Place a cap on the average salary for calculating pension benefits. High-salaried employees are one of the drivers of increased funding liability for the pension fund. The Internal Revenue Service (IRS) limits the amount of annual salary that may be applied towards retirement under a qualified plan. Currently, the IRS limits the annual salary to $245,000 for members hired on or after July 1, 1996, and $363,820 for members hired prior to July 1, 1996. The Task Force recommends a cap on salary applied towards retirement in line with the average salary of a head of state agency, which is $140,000.
- Consider a hybrid retirement system. Various states have either adopted or are considering a hybrid retirement plan (incorporates both defined benefit and defined contribution plans). Florida should review the hybrid option as a method to reduce future unfunded liability, provide flexibility for employees, and ensure adequate guaranteed retirement funds for state employees, particularly lower earning employees.

Division of Real Estate Development and Management

- State Construction
  - The Task Force recommends utilizing a shared service model for state construction directed by one agency in order to create uniform best practices and achieve cost savings. Currently, the Division of Real Estate Development and Management only manages building construction projects in Department of Management Services (DMS) facilities or those projects designated as DMS managed when appropriated to agencies. Additionally, building construction staff is located in multiple agencies, there are inconsistencies in contracting, and

AMERICAN OVERSIGHT

economies of scale are not leveraged through bundling of similar projects. All agencies involved in building construction should operate a shared services model directed through DMS, allowing for uniform standards, best practices, rules, and procedures for state construction. The state should institute an automatic review process for all state construction projects with a projected cost over a certain threshold. The state should also focus on function, in addition to form, in the design and renovation of state buildings.

- State Leasing
  - The Task Force recommends that DMS continue with current initiatives to increase the value of state leasing while reducing costs. DMS should continue its efforts to renegotiate leases statewide. DMS should propose legislation that will increase its authority in leasing decisions, save time in processing, and reduce the burden on private sector landlords. DMS should continue to work with other agencies and with local governments to maximize space utilization.
- State Building Emergency Management
  - The Task Force recommends that DMS explore options for service management of state buildings and facilities in the event of a natural disaster. The state does not currently have a contracted service for management of state facilities in the case of a natural disaster (i.e. hurricanes). In order to ensure the continued functioning of state facilities, the state should address proper disaster preparedness.

The complete recommendations and analyses are enclosed. Please do not hesitate to contact me or staff director Jeff Woodburn for additional information.

Thank you for the opportunity to serve the citizens of Florida.

Sincerely,

Abraham Uccello
Chair

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: State Employee Health Insurance Benefits

RECOMMENDATION SUMMARY

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding state employee health insurance benefits by a vote of 8 yeas, 0 nays:

- Establish uniform premium contribution amounts for all classes of state employees.
- Set contributions for all employees at the current contribution levels of Career Service employees. Equalizing contributions at these levels is estimated to save **$34 million** per year.
- Implement a defined contribution (DC) model for state employee health insurance benefits**.** A DC model is estimated to save **$250-300 million** per year.
- Consider multiple DC options when designing a new DC structure for state employee health insurance.
- Review the state's contribution and adjust for changes in health care costs at a minimum of every three years.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. BACKGROUND AND RECOMMENDATION(S)

A. STATE EMPLOYEE HEALTH INSURANCE

State Employee Health Insurance Program

The State Employee Health Insurance Program (program) is governed by s. 110.123, F.S. The program is administered by the Division of State Group Insurance (DSGI) within the Department of Management Services (DMS or department).

The program is an optional benefit for all state employees, including state agencies, state universities, the court system and the Legislature. The program includes health, life, dental, vision, disability, and other supplemental insurance benefits.

As implemented by the department, the program offers four types of health plans: a standard statewide Preferred Provider Organization (PPO) Plan, a Health Investor PPO Plan, a standard Health Maintenance Organization (HMO) Plan, and a Health Investor HMO Plan.

The State Employees' PPO plan is a self-insured health plan administered by Blue Cross Blue Shield of Florida and available to employees across the state.[1] Each HMO is a self-administered, pre-paid health plan that provides health services to people who live or work within the HMO's service area. Six HMOs provide coverage in various geographic regions.[2]

The program also offers two high-deductible health plans (HDHP) with health savings accounts (HSA). The Health Investor PPO Plan is the statewide, high deductible health plan administered by Blue Cross Blue Shield of Florida. The Health Investor HMO Plan is a high deductible health plan in which the state has contracted with multiple state and regional HMOs.

A state employee participating in either Health Investor plan is eligible to receive contributions into the employee's health savings account.[3] The participant may draw upon these funds to meet out-of-pocket medical and pharmacy expenses.

Employee premiums for Health Investor plans are lower, and every year since the high-deductible option has been offered, the state has contributed $500 and $1,000 into the HSA for employees with individual or family coverage, respectively. The contribution has annually been reinstated each year in a budget implementing bill.[4]

---

[1] The administrator is responsible for processing health claims, providing access to a Preferred Provider Care Network, and managing customer service, utilization review, and case management functions.

[2] State contracted HMO plan providers are Aetna, AvMed, Capital Health Plan, Coventry Health Care of Florida, Florida Health Care Plans, and United Health Care. Department of Management Services, *State of Florida Employee and Retiree Benefits Guide,* September 2011, http://www.myflorida.com/mybenefits/pdf/BenefitsGuide_2012.pdf (last visited 4/18/2012).

[3] The state makes a $500 per year contribution to the health savings account for single coverage and a $1,000 per year contribution for family coverage. These contributions are not subject to federal income tax on the employee's income. *Id*.

[4] A budget implementing bill makes statutory changes that are only effective for one year.

AMERICAN OVERSIGHT

Employer and Employee Contributions

The State Personnel System (SPS) is divided into categories, including Career Service (CS), Selected Exempt Service (SES), and Senior Management Service (SMS). As of June 30, 2011, CS employees comprised 81.7 percent of the SPS.[5]

Employee health insurance premium contributions differ according to coverage selected and employee category. The State of Florida health program currently offers three tiers of enrollment for employees: individual employee, employee plus family, and spouse. Employees are divided into two general categories based on class and personnel system. CS employees are categorized separately from SES and SMS employees, as well as those employed by the Department of Lottery, Legislature, and Executive Office of the Governor, and personnel in other state employment systems.

Employee contribution levels are not adjusted for variances in benefit value or projected total cost of the chosen plan. The employee contribution and level of benefits are fixed, and the state absorbs any differences in total cost. The chart below details the monthly health insurance contributions for the state and employee.

Florida State Employee and Employer Insurance Contributions

		Standard Plan PPO/HMO			Health Investor Health Plan PPO/HMO		
Category	**Coverage**	**Employer**	**Enrollee**	**Total**	**Employer[6]**	**Enrollee**	**Total**
Career Service	Single	499.80	50.00	549.80	499.80	15.00	514.80
	Family	1,063.34	180.00	1,243.34	1,063.34	64.30	1,127.64
	Spouse[7]	1,243.32	30.00	1,273.32	1,097.64	30.00	1,127.64
SES/SMS/EOG/ LEG/Lottery/other	Single	541.46	8.34	549.80	506.46	8.34	514.80
	Family	1,213.34	30.00	1,243.34	1,097.64	30.00	1,127.64

B. EMPLOYER INSURANCE TRENDS

Average Contributions

Differences in premium amount, copays and deductibles, coverage levels, and other cost-sharing variables present challenges when comparing health benefits between government and private employers. Even within a single employer, each plan type may contract with multiple carriers and value of access varies by carrier and geographic location.[8]

---

[5] Department of Management Services, *State Personnel System Annual Workforce Report: FY 2010 – 2011*, p. 13, http://www.dms.myflorida.com/human_resource_support/human_resource_management/for_state_hr_practitioners/reports (last visited 4/18/2012).

[6] Includes employer tax-free HSA contribution: $500 per year for single coverage and $1,000 per year for family coverage.

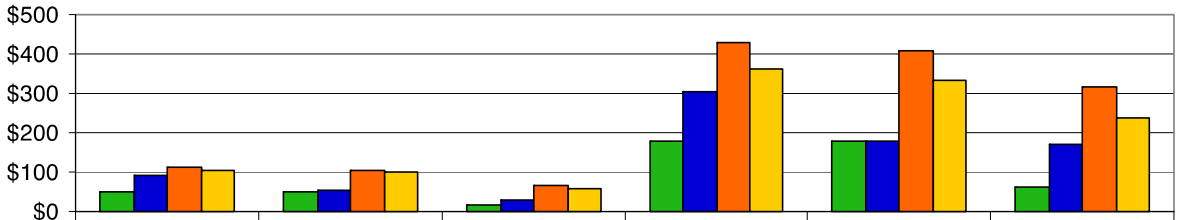
[7] Both spouses must be state employees to participate in the spouse program. Contributions for all employees in the spouse program are the same, regardless of category.

[8] For example, the federal benefits standard family Humana Medical Plan for South Florida requires a $271.87 per month employee contribution versus $310.59 for the same standard family Humana Medical Plan coverage in the Tampa area. United States Office of Personnel Management, *The 2012 Guide to Federal Benefits For Federal Civilian Employees*, November 2011, p. 42, http://www.opm.gov/insure/health/planinfo/2012/guides/70-1.pdf (last visited 4/18/2012).

AMERICAN OVERSIGHT

According to a 2010 study by The Segal Group surveying all 50 states and Washington, DC, over half of state plans are subsidized by the employer at 80% or higher.[9] Employers offering HMOs and HDHPs provide higher premium subsidies than PPOs, which is generally linked to the reduction in the employer's claim cost liability. A 2011 survey of state employee health benefits by the National Conference of State Legislators (NCSL) found that states paid an average of 89% for individual coverage and 80% for family coverage.[10] The State of Florida's contribution for CS employees is 91% of the standard premium and 97% of the health investor plan premium. NCSL found that Florida's employer contribution for individual coverage was $499.80 per month, compared to a national average of $519.13. Florida's contribution for CS employees is 86% of the standard premium and 94% of the health investor plan premium. NCSL found that Florida's employer contribution for family coverage was $1,063.34 per month, compared to a national average of $1,096.63.[11]

DSGI contracted with Mercer Consulting to prepare a Benchmarking Report[12] (report) for the state group insurance program. The report compares Florida's state group insurance program to the programs of other large employers,[13] both in the public and in the private sectors.



The report found that State of Florida contributes a higher percentage of the premium to employee health benefits than other states and private employers. For example, the report found that Florida paid 84% of the monthly premium for a family PPO plan, compared to a 69% average for large national employers. At the time of the study, the average family plan premium for large national employers was $361, while the monthly premium for a family PPO plan for a Florida state employee was $180.[14]

The report also found that the average monthly employee contribution for individual coverage with a State of Florida employer was $50, compared to $93 and $56 for PPO and HMO coverage, respectively, in other states.[15] The average employee contribution for large employers in Florida was $112 and $104 for PPO and HMO coverage, respectively. Mercer's findings are summarized in the following charts comparing monthly employee contributions by dollar amount and as a percentage of premium.[16]

The federal government offers Preferred Provider Organization, Health Maintenance Organization, Point-of-Service, Consumer Driven, and High Deductible Health Savings Account or Health Reimbursement plans. Government agencies pay the lesser of: 72% of the average total premium of all plans weighted by the number of enrollees in each, or 75% of the premium for the specific plan chosen by the employee. For purposes of comparison, the federal employee contribution for Capital Health Plan coverage is $102.27 for individuals and $271.01 for families.[17] State employee participants in Capital Health Plan contribute $50 for individual coverage and $180 for family coverage.

The State of Florida contributes approximately 90% toward the total annual premium for active employees, for a total of $1.43 billion of the total premium of $1.59 billion for FY 2011-12.[18] The state program is estimated to spend $1.9 billion in FY 2011-12 in health benefit costs.[19]

AMERICAN OVERSIGHT

Change and Efficiency

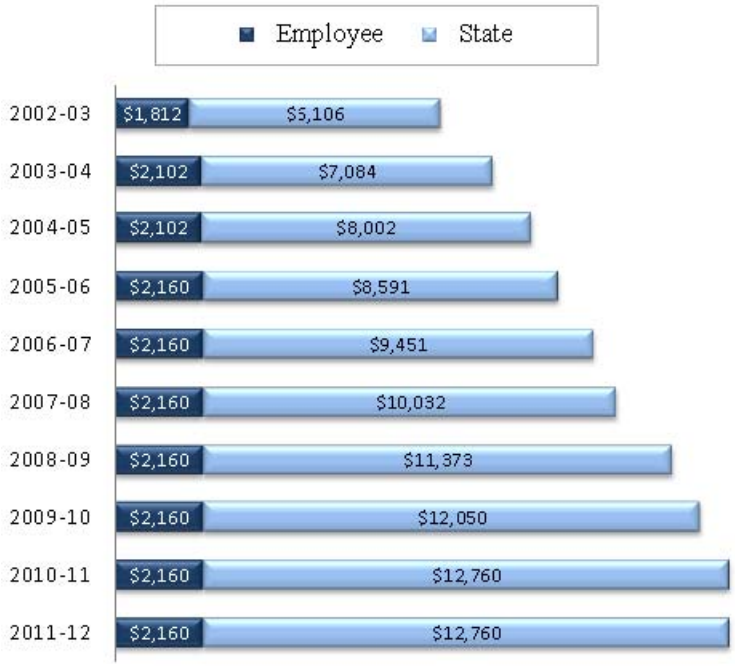
Recommendations

The Task Force recommends establishing uniform premium contribution amounts for all classes of state employees. Currently, SES and SMS employees, as well as those employed by the Department of Lottery, Legislature, Executive Office of the Governor, and other state personnel outside SPS, are contributing lower amounts for the same insurance coverage as CS employees. The current categories for monthly contribution levels do not correlate to average employee salary. On average, SPS employees in the lower monthly contribution category are earning higher salaries than CS employees.[20]

The Task Force recommends setting contributions for all employees at the current contribution levels of Career Service employees: $50 per month for standard individual coverage, $180 per month for standard family coverage, $15.00 per month for individual Health Investor plan coverage, and $64.30 per month for Health Investor plan family coverage. Employee contributions for CS employees are currently below the averages for employees of large state governments, large Florida employers, and large national employers. Equalizing contributions at these levels is estimated to save **$34 million** per year.

Cost and Trends

The state contributes approximately 90% toward the total annual premium for active employees, for a total of $1.43 billion of the total premium of $1.59 billion for FY 2011-12.[21] The state program is estimated to spend $1.9 billion in FY 2011-12 in health benefit costs.[22] Projected total expenses under the State Employees Group Health Program are expected to increase by $800 million over four years, from just over $1.8 billion in FY 2011-12 to just over $2.6 billion in FY 2014-15.[23] Medical and pharmacy costs alone are projected to increase an average of 9.2% each year through Fiscal Year 2015-16.[24]



Health insurance contributions for state employees have not kept pace with annual increases in premium costs. The state has absorbed most of previous cost increases and employee contributions have remained relatively flat, as illustrated by the chart on the following page.[25] From FY 2002-03 to FY 2011-12, the total cost of the policy premium for standard family coverage increased $8,002. Over that time, the Career Service employee's contribution increased by $348, with the state contributing the remaining $7,654 of the premium increase. The employee contribution has not risen since 2005. Over the same time period, the cost of the standard family coverage premium has risen $4,169, and the full cost of the premium increase has been born by the state.

AMERICAN OVERSIGHT

Career Service Family Coverage Yearly Premium

Compared to employees of other state governments, large public and private employers in Florida, and large public and private employers across the country, State of Florida employees are currently paying lower rates for their health insurance coverage. State of Florida employees' lower contribution rates are evident when compared both in terms of the dollar amount of monthly contributions and in the total percentage of the premium. These lower rates translate to an increased cost to the state for health insurance benefits for state employees.

Change and Efficiency

The state employee health insurance program is a defined benefit (DB) program, in which the employer provides a specific benefit package to employees. Another option for providing health insurance benefits is the defined contribution (DC) model, in which the employer provides a specific contribution amount toward an employee's health coverage. The employee pays the remainder of the cost of the premium. The cost to the employee varies according to his or her choice of coverage and level of benefits.

Recommendations

The Task Force recommends implementing a defined contribution model for state employee health insurance benefits. A DC model would give employees more control over their health benefits and, depending on the model implemented, provide increased choice for the employee. The cost of employee health benefits to the state would be more predictable and the state's financial exposure would be limited. The end result is health care that is both better suited to individual employees' needs and more cost efficient for the state. A DC model is estimated to save **$250-300 million** per year.

The Task Force recommends considering multiple DC options when designing a new DC structure for state employee health insurance. DC plans may be implemented in numerous ways, including:

- The employer offers a range of benefit options at varying price levels. The employer contribution is typically set in relation to the lowest cost plan in order to ensure that all employees have access to benefits. The employee pays the difference in premium if he or she chooses a more expensive plan.

AMERICAN OVERSIGHT

- The employer provides a specified contribution toward a medical savings account, intended to be used for low-severity services, and an insurance plan, generally a high-deductible plan intended to cover high-severity and emergency services.
- The employer provides health benefits to employees through an intermediary or purchasing group. The purchasing group or intermediary facilitates the relationship between employers, health plans, and employees, and may be involved at some level in plan and provider selection, contracting, and employee enrollment.
- The employer removes itself from administering benefits and provides the employee its contribution in the form of a voucher, tax credit, or other type of financial transfer. The employee uses the employer contribution to purchase the coverage of his or her choice.
- Various hybrids of the above models.

The Task Force recommends reviewing the state's contribution and adjusting for changes in health care costs at a minimum of every three years. Health insurance premium costs should be periodically reviewed for recent changes and future projections in total costs. The state should adjust its contribution so that both employer and employee have a share of premium cost increases and savings resulting from rate changes.

AMERICAN OVERSIGHT

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: State Procurement of Mental Health and Substance Abuse Services

RECOMMENDATION SUMMARY

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding state procurement of mental health and substance abuse services by a vote of 8 yeas, 0 nays:

- Utilize common metrics for contracts when procuring mental health and substance abuse services.
- Ensure unit price information is available to all agencies and require agencies to check pricing for mental health and substance abuse services.
- Provide that agencies make greater use of pooled purchasing arrangements when cost effective.
- Implementing the above recommendations is estimated to achieve a cost savings of 6%-8%, or **$72-$96 million** per year based on current annual expenditures.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. BACKGROUND AND RECOMMENDATION(S)

A. MENTAL HEALTH AND SUBSTANCE ABUSE SERVICES

Mental health and substance abuse services are provided by the State of Florida to many of its residents.[1] These services are provided through a variety of programs and agencies. Many of these services are outsourced through contracts with for profit and not-for-profit vendors.

The Florida Legislature's Office of Program Policy Analysis and Government Accountability (OPPAGA) conducted research on *State Contract Management Review of Mental Health and Substance Abuse Services* in 2011.[2] As described by OPPAGA's research, for FY 2010-11, the state held contracts totaling $1.27 billion for mental health and substance abuse services.[3] Five state agencies contract with providers to deliver mental health and substance abuse services to eligible populations: the Agency for Health Care Administration (AHCA), and the Departments of Children and Families (DCF), Corrections (DOC), Juvenile Justice (DJJ), and Health (DOH).[4] As shown in Exhibit 1, the five agencies held a total of 641 contracts in FY 2010-11, with the number of contracts per agency ranging from 11 for DOH to 368 for DCF. Not included in this figure are the costs of services provided by managed care under the Medicaid program. This is because blended rates are paid to managed care organizations for health and behavioral health care such as mental health and substance abuse services. For the most part, institutional costs are only included when mental health and substance abuse services could be isolated from other costs and were contracted as opposed to state operated. Of the $1.27 billion in total annual value of the contracts for FY 2010-11, 41% was funded by federal and state trust funds, and 59% was funded by general revenue.[5] The total contract amount for each agency ranged from $2.9 million for DOH to $629.9 million for DCF.[6] The typical contract length was 3 years, but the length ranged from 4 months to 11 years.[7] Approximately 61% (392) of the contracts will end before FY 2012-13.[8] The total lifetime value for the current Mental Health and Substance Abuse contracts, including escalators and extensions, is $5.7 billion.[9]

Exhibit 1
For FY 2010-11, Five State Agencies Held Contracts for Mental Health and Substance Abuse Services Totaling $1.27 Billion[10]

Agency	Number of Contracts	Total Contracted Amount for FY 2010-11		
		Trust Fund	General Revenue	Total
Agency for Health Care Administration	31	$288,595,478	$158,054,191	$446,649,669
Department of Children and Families	368	195,548,935	434,394,242	629,943,178
Department of Corrections	77	1,760,977	37,347,963	39,108,940
Department of Juvenile Justice	154	27,317,281	124,437,096	151,754,377
Department of Health	11	2,678,119	227,902	2,906,021
Total	**641**	**$515,900,791[1]**	**$754,461,395[1]**	**$1,270,362,186[1]**

[1] Totals may differ due to rounding.

[1] Mental health and substance abuse services may include: prevention programs, crisis stabilization, detoxification, residential and transitional housing support services, and outpatient treatment.
[2] OPPAGA, *Substance Abuse and Mental Health Contracting*, September 28, 2011 (copy on file with Government Efficiency Task Force staff).
[3] *Id.* at p. 1.
[4] The scope of this research was to analyze the State Contract Management System database. The judicial branch also contracts for mental health services. In FY 2010-11, the Justice Administrative Commission paid $6.3 million for contracts with approximately 400 mental health experts for assessments. The state court circuits paid $5.6 million for contracts with approximately 600 experts for assessments and testimony. *Id.*

AMERICAN OVERSIGHT

Exhibit 2 describes the types of services provided and populations served by these agencies.

Exhibit 2
Agencies with Substance Abuse and Mental Health Contracts Provide Various Services[11]

Agency	Description of Contracted Services
Agency for Health Care Administration	These contracts include the prepaid mental health plans that serve Medicaid recipients and the Statewide Inpatient Psychiatric Program that serves Medicaid recipients 17 years of age or younger who require placement in a psychiatric residential setting due to serious mental illness or emotional disturbance. The data does not include expenditures for behavioral health care provided by Health Maintenance Organizations or Provider Service Networks but does include prepaid mental health plans. The agency also has a contract for utilization management and a small number of research contracts with state universities.
Department of Children and Families	These contracts primarily are for a range of community-based services, including alcohol prevention programs in schools and Florida Assertive Community Treatment (FACT) teams that serve to prevent psychiatric hospitalizations.[1] They also include a limited number of contracts at state mental health institutions for both direct services, such as therapists, and indirect services, such as food services, and a limited number of contracts for indirect services, such as training for personnel who are involved in involuntary commitment of individuals into the mental health system. The contracts also include the managing entity organizations, which are organized in a regional system of care for substance abuse and mental health clients.[2]
Department of Corrections	These contracts primarily provide services, such as group therapy, to offenders on community supervision. A limited number of contracts provide mental health services to inmates in correctional facilities.
Department of Juvenile Justice	These contracts provide services, such as psychiatric evaluations, for juveniles in detention centers and services such as crisis intervention, psychotropic medication management, and suicide prevention for juveniles with a mental health diagnosis at residential facilities.
Department of Health	These contracts provide a range of community-based services including interventions for medical licensees with substance abuse or mental health problems, group counseling for HIV/AIDS patients, and home-based visits for mothers of children at risk of abuse or neglect.

[1] Individuals served by FACT teams must meet the definition of mental illness as specified in chapter 394, F.S.
[2] These entities will replace the current DCF substance abuse and mental health contracts, thereby reducing the overall number of DCF contracts.

B. ISSUES

Exhibit 3 shows that in FY 2010-11, a total of 369 vendors held the 641 contracts with the five agencies (an average of 1.7 contracts per vendor).[12] The average number of contracts per vendor ranged from 1 for DOH to 2.1 for DJJ. In addition, 48 of these vendors had contracts with multiple agencies. While most of these vendors had only two contracts, one vendor held 20 active substance abuse and mental health contracts with two agencies in FY 2010-11.[13]

Exhibit 3
In FY 2010-11, 369 Vendors Held 641 Substance Abuse and Mental Health Contracts[14]

Agency	Number of Contracts	Number of Vendors	Average Number of Contracts per Vendor
Agency for Health Care Administration	31	21	1.5
Department of Children and Families	368	267	1.4
Department of Corrections	77	50	1.5
Department of Juvenile Justice	154	74	2.1
Department of Health	11	11	1
Total	**641**	**369**[1]	**1.7**

[1] The total number of vendors does not equal the sum of the number of agency vendors. The total is adjusted so that there is not a duplicate count of vendors that have contracts with multiple agencies.

[11] Source: OPPAGA analysis of State Contract Management System database and interviews with agency staff. OPPAGA, *Substance Abuse and Mental Health Contracting*, September 28, 2011, p. 2 (copy on file with Government Efficiency Task Force staff).
[12] The Florida Accounting and Information Resource (FLAIR) subsystem included the tax status for 262 of the vendors in this study. Of these, 178 (68%) have a status of not-for-profit. *Id.* at p. 3.

AMERICAN OVERSIGHT

Section 287.057, F.S., provides that unless otherwise authorized by law, all contracts for the purchase of commodities or contractual services in excess of $35,000 shall be awarded by competitive procurement. The dollar value of the substance abuse and mental health contracts held in FY 2010-11 that were competitively procured was $668 million, or 52% of the $1.27 billion worth of contracts identified in the State Contract Management System.[15] State agencies made most of these competitive procurements through methods such as requests for proposals.

Florida law also provides specific exemptions from competitive procurement, including a "health services exemption."[16] The health services exemption is designated for commodities or contractual services for health services involving examination, diagnosis, treatment, prevention, medical consultation, or administration. In FY 2010-11, 24% of all substance abuse and mental health contracts were executed under the health services exemption. The dollar value of the contracts held in FY 2010-11 that were executed under the health services exemption was $315 million.[17] A variety of procurement methods are used for mental health and substance abuse (see Exhibit 4).

Exhibit 4
Percent of Contract Dollars By Agency By Procurement[18]

Agency	Competitive Bid	Health Services Exempt	Other Non-Competitive	Total
DCF	20 %	40%	40%	$630 Million
AHCA	85%	14%	1%	$447 Million
DJJ	87%	0%	13%	$152 Million
DOC	67%	0%	33%	$39 Million
DOH	1%	99%	0%	$2.9 Million
Total	52%	25%	23%	$1,270 Million

Total = $1.27 Billion **Total Contracts = 641**

In order to assess the range of prices for these services, OPPAGA reviewed a sample of 87 contracts from DCF, DOC, and DJJ.[19] The analysis focused on services in each agency using that agency's service definitions. Prices paid for the same service varied within each agency (see Exhibit 5). In some cases, the prices were different due to factors related to the level of care required by the recipient and the type of security each agency needs to provide. For example, the price of bed days ranged from $19 for adults who voluntarily

[15] *Id.* at p. 4.
[16] *See* s. 287.057(3)(f)5., F.S.
[17] The remaining agency spending for FY 2010-11 was on substance abuse and mental health contracts that were procured using other exemptions. OPPAGA, *Substance Abuse and Mental Health Contracting*, September 28, 2011, p. 4 (copy on file with Government Efficiency Task Force staff).
[18] Source: Analysis of State Contract Management System database. Data provided by Senate Budget Office.
[19] The Agency for Health Care Administration was from this sample because 11 of its contracts will not be renewed due to changes in state Medicaid law and 15 contracts are for Statewide Inpatient Psychiatric Program services, for which policy options may not apply due to federal requirements the facilities must meet. The Department of Health had a relatively small number of contracts; policy options would still apply to the department. *Id* at p. 3.

AMERICAN OVERSIGHT

received substance abuse services while residing at a religious organization's facility to $338 for 24-hour intensive services provided to adolescent girls with mental health and substance abuse issues at a secure facility.

As shown in Exhibit 5, agencies sometimes paid different unit prices for similar types of services. For example, DOC held a contract that paid $14 per person for adults receiving mandatory community-based outpatient group counseling for substance abuse but also held another contract that paid $24 per person for this service. Exhibit 5 shows the range of prices for the 14 service categories that were included in five or more contracts.[20]

Exhibit 5
Agencies Pay Different Unit Prices for Similar Services[21]

Service Category	Agency	Mean	Minimum	Maximum
Comprehensive Evaluations Level II[2]	DJJ	$450	$350	$550
Comprehensive Evaluations Level III[2]	DJJ	717	550	750
Mental Health and Substance Abuse Treatment Services	DJJ	57	25	200
Residential Level II (Intensive Mental Health and Substance Abuse Care)[3]	DCF	156	83	213
Comprehensive Evaluations Level I[2]	DJJ	267	250	350
Outpatient (Individual or Group Therapy)[1]	DCF	53	12	84
Individual Counseling (Community-Based Outpatient Substance Abuse)	DOC	41	11	56
Community-Based Residential Program (Short-Term/Non secure)	DOC	40	19	53
Treatment Plan Review (Community-Based Outpatient Substance Abuse)	DOC	28	10	42
Intake-Screening (Community-Based Outpatient Substance Abuse)	DOC	50	42	53
Group Counseling (Community-Based Outpatient Substance Abuse)	DOC	20	14	24
Substance Abuse Education and Life Skills Training	DOC	19	14	24
Aftercare Groups (Counseling After Completing a Treatment Program)	DOC	19	14	24
Outreach (Education and Engagement of At-risk Groups)	DCF	44	42	46

[1] Outpatient services provide a therapeutic environment designed to improve the functioning or prevent further deterioration.
[2] Comprehensive evaluations levels depend on the need level of youth served; level I evaluations are for lowest-need youth. Evaluations are a service many vendors provide to state agencies in different forms and for a range of unit costs. The Department of Children and Families pays vendors a maximum unit cost of $85.91. The Justice Administrative Commission pays vendors to provide pre-trial competency or sanity evaluations, pre-trial forensic exams, evaluations for departure hearings, and psychological evaluations for juvenile cases; the rates per evaluation range from $150 to $625. While Florida's State Courts System contracts for evaluations, staff could not specify a unit cost. In addition, the Agency for Health Care Administration sets Medicaid fee-for-service evaluation rates at a maximum unit cost of $150 if conducted by non-physician staff and $210 if conducted by a physician.
[3] Residential Level II facilities are licensed, structured rehabilitation-oriented group facilities that provide supervision 24 hours per day, seven days per week. Persons who live in Level II facilities have significant deficits in independent living skills and need extensive support and supervision.

Change and Efficiency

Recommendations

The Task Force recommends that agencies utilize common metrics for contracts when procuring mental health and substance abuse services. As demonstrated in Exhibit 5, variation in unit price exists within agencies. By examining standard definitions of services, unit pricing, and common outcome measures, agencies can attain greater understanding for providing mental health and substance abuse services.

A study should be completed by regions of the state utilizing a consumer price index for services to identify common metrics for substance abuse and mental health contracts. Where practical, such metrics should be used in all mental health and substance abuse service contracts, both by state agencies and any purchasing agents who procure services on behalf of the state. This would improve accountability and procurement of

[20] OPPAGA compared charges for Medicaid's fee-for-service behavioral health services to unit costs for services presented in Exhibit 5 and found comparable service categories for four services: group counseling, individual counseling, intake-screening, and treatment plan review. Medicaid reimbursement rates were higher than the maximum costs for group and individual counseling and treatment plan review. Rates for intake-screening fell within the range of unit prices paid by other agencies. *Id.* at pp. 3-4.

AMERICAN OVERSIGHT

services and allow agencies and purchasing entities visibility into what other programs and agencies pay for similar services.

The Task Force recommends ensuring unit price information is available to all agencies and requiring agencies to check pricing for mental health and substance abuse services. Using common definitions of services and standard units of measure, agencies should enter unit prices in the State Contract Management System for all mental health and substance abuse contracts. The Department of Management Services should calculate average unit prices for each service in State Contract Management System. Agencies should then be required to review unit prices for the service prior to contracting. If an agency chooses to procure a service at a unit price higher than the average, it would have to justify this action. This requirement should be extended to entities that purchase services on behalf of the state to ensure financial accountability.

The Task Force recommends that agencies make greater use of pooled purchasing arrangements when cost effective. There are two options that agencies can utilize to strategically pool the procurement of mental health and substance abuse services.

First, the Department of Management Services should work in conjunction with the Department of Children and Families, as the state's subject matter expert, to determine the feasibility of regional or state term contracts for mental health and substance abuse services. This would allow the agencies to collectively leverage their buying power and achieve saving through economies of scale.

Second, allowing other state agencies to purchase mental health and substance abuse services through purchasing entities may be considered. Regional purchasing entities, such as the managing entities provided by Chapter 2008-243, L.O.F., could broker mental health and substance abuse services for state agencies using Florida's state term contract methodology, if favorable unit pricing could be achieved.

Implementing the above recommendations is estimated to achieve a cost savings of 6%-8%, or **$72-$96 million** per year based on current annual expenditures. Over four years, the total savings equates to a $288-$384 million for mental health and substance abuse services for Florida.

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Criminal Justice

RECOMMENDATION SUMMARY

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding criminal justice by a vote of 8 yeas, 1 nay:

- Provide the Department of Corrections (department) with flexibility to develop and implement cost savings initiatives, in conjunction with counties. The department should have the flexibility to implement new models of inmate transfer, assignment, or supervision if determined to effectively carry out inmate sentences, following existing statutory requirements, while achieving cost savings. Counties should be able to submit cost savings proposals to the department and appeal decisions to the Governor and Cabinet.

- Stakeholders should develop recommendations to the Legislature for increasing flexibility in sentencing guidelines. Judges should be provided with the flexibility to consider the many purposes of sentencing, including punishment, rehabilitation, deterrence, restitution, recidivism reduction, and protection of public safety, as well as cost.

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding criminal justice by a vote of 9 yeas, 0 nays:

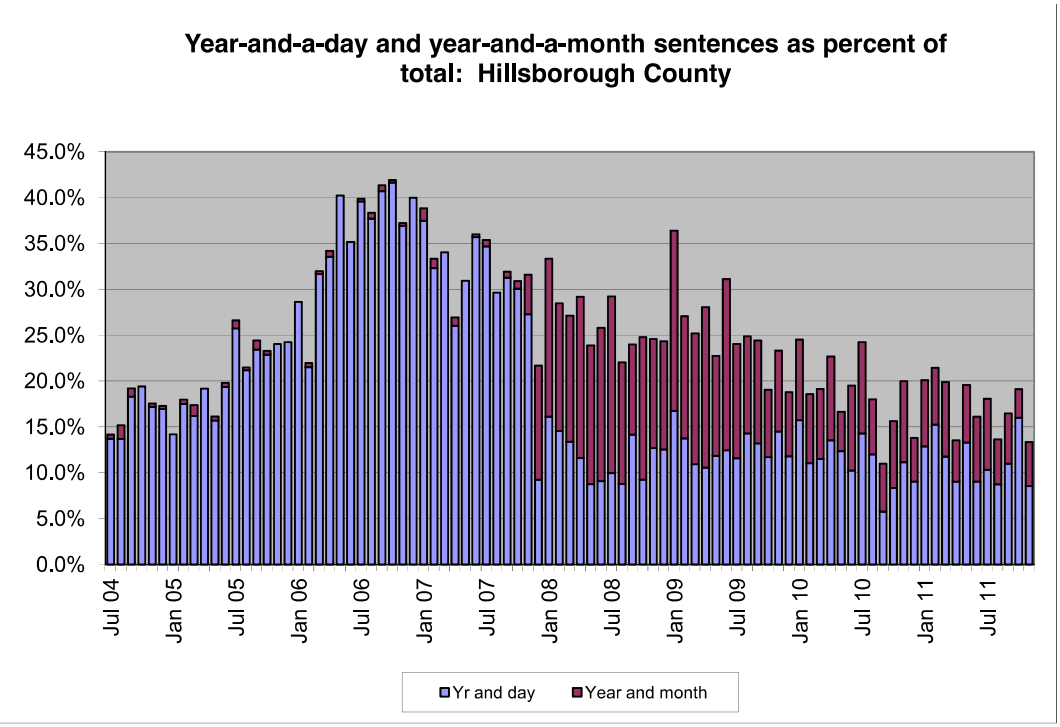
- Provide incentives for counties to participate in initiatives that will achieve efficiencies and cost savings for the state. Incentives should be created for arrangements that promote flexibility and produce mutually-beneficial arrangements for the state and counties. Incentives may include, but are not limited to, diversion of inmates from state to local facilities and increased utilization of community supervision, including electronic monitoring.

- Investigate implementation of a web-based risk and needs assessment tool for use at time of sentencing. Estimated costs for sentencing options should be included in the tool to allow judges to weigh projected results with estimated costs of sentences. The tool should be made available to judges at the time of sentencing and to the public through a web portal.

- Perform a study to determine the potential cost savings resulting from a risk and needs assessment tool.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS



I. BACKGROUND AND RECOMMENDATION(S)

A. STATE AND LOCAL INCARCERATION

State and Local Incarceration in Florida

In Florida, defendants whose sentences include incarceration for one year or less are incarcerated in local prisons. The county in which the individual is incarcerated pays the costs of incarceration in local facilities. If a defendant is sentenced to incarceration for a year and a day or longer, the individual is placed in a state facility and the state pays the costs of incarceration.[1]

Year-and-a-day commitments rose to a peak of 17.7% of all new sentences in FY 2006-07.[2] Attempts to reduce year-and-a-day commitments resulted in a decrease to 8.4% of all new sentences in FY 2010-11.[3] It has been suggested that this reduction reflects a shift to year-and-a-month sentences, rather than shorter sentences resulting in local incarceration, as demonstrated in the graph below comparing year-and-a-day and year-and-a-month sentences in Hillsborough County.[4]

At the time of sentencing, many offenders have already served a portion of their sentence in jail, pending disposition of the case. If the offender is then sentenced for a term of incarceration longer than a year, he or she is transferred to a state facility. Each prisoner transferred to a state facility is first transported to a reception center.[5]

For FY 2010-11, the department reported an average per diem of $53.35 for all facilities, $42.36 for adult male custody facilities, $63.12 for male youthful offender custody facilities, and $69.74 for adult and youthful female

[5] *See* s. 944.17(3), F.S.

AMERICAN OVERSIGHT

custody facilities.[6] Reception centers average a higher per diem of $96.90.[7] Because of the higher cost of reception centers, the overall cost of a sentence just over a year in length, which requires transferring the prisoner to a state facility, may be more per inmate than a sentence just under a year, which is served in a local facility only.

Incentives for Local Incarceration

California, Colorado, Illinois, Kansas, and Texas provide incentives to localities for successfully supervising offenders in the community instead of sending them to state prison.[8] Under these arrangements, local correctional agencies receive state funding and other assistance to implement community-based programming with the goal of reducing recidivism and supervision violations that result in probation revocations.[9]

In Illinois, the Crime Reduction Act[10] established the Adult Redeploy Illinois program, which provides financial incentives to local jurisdictions for designing and utilizing community-based programs to treat offenders instead of sending them to state facilities. Texas utilizes a grant program for counties to implement a system of progressive community-based sanctions.[11] California provides funding to counties for implementing community-based sanctions for probation and parole violations in lieu of prison.[12] In the first year of implementation of a law providing funding to counties for implementing community-based sanctions, Arizona experienced a 14.5 percent decrease in probation revocations to prison.[13]

A potential issue with incentive programs is that data reported by localities may not accurately reflect true diversion from state facilities. In order to receive incentive funds, localities may improperly report diversions of individuals who would have been sentenced to local jails or community-based alternatives without the incentives in place. Other concerns about increasing community-based sanctions include increased potential for absconding.

B. ELECTRONIC MONITORING

Electronic monitoring (EM) by location tracking devices can be used as an aid in supervising pre-trial releasees and sentenced offenders who are not incarcerated. In Florida, electronic monitoring is primarily used by the Department of Corrections (DOC or department) to provide an extra measure of security for high-risk offenders under some form of community supervision, particularly sex offenders. In recent years there have been proposals to reduce corrections costs by replacing all or part of a term of incarceration of low-risk offenders with less expensive community supervision, including EM. In addition to reducing costs, it has been suggested that use of EM may support successful reentry into the community by providing for a period of supervision before release from custody.

AMERICAN OVERSIGHT

Requirements for Electronic Monitoring in Florida

Chapter 948, F.S., permits a sentencing court to order EM for offenders placed on probation or community control.[14] The Florida Parole Commission may also use EM as a condition of post-release supervision.[15] In some cases, the court is required to order EM due to the offender's current or past offenses.[16] The most stringent requirement is found in s. 948.012, F.S., which requires a minimum 25-year prison sentence followed by lifetime supervision with electronic monitoring for any adult offender who commits lewd or lascivious molestation against a child under 12 years of age.[17] EM is a required condition for offenders placed on sex offender probation for certain sex offenses, but can only be ordered "when deemed necessary by the community control or probation officer and his or her supervisor, and ordered by the court at the recommendation of the Department of Corrections."[18]

Apart from the statutory authority given to the courts, DOC has discretion pursuant to section 948.11(1), F.S., to place a community controlee on EM. The department does not exercise this discretion based on case law that an offender's failure to submit to EM ordered by the department cannot be a basis for revocation of community control.[19]

As of February 29, 2012, the department was actively supervising 114,761 offenders on some form of supervision in the community.[20] Of those offenders, 2,984 were being electronically monitored, with the majority (2,981) monitored by global positioning system (GPS) and the remaining 3 by radio frequency (RF) systems.[21] Of the monitored offenders, 1,934 were sex offenders or sexual predators.[22]

Electronic Monitoring Systems and Costs

EM systems mainly consist of two types: radio frequency (RF) monitoring or global positioning system (GPS) monitoring. Early EM systems used RF technology to alert or record an instance when the offender left a restricted area. These systems were typically used to monitor individuals under house arrest and do not provide information about the offender's location when the offender moves outside the range of the receiver.

In 2011, Florida's RF monitoring cost was $1.97 per day per monitored offender, making RF the least expensive form of electronic monitoring. RF system limitations and laws requiring use of monitoring with location tracking technology for sex offenders have led to reduced use by the department.[23]

---

[14] Section 948.101(1)(d), F.S., specifically provides that a court may order electronic monitoring as a condition of community control for any offender. Section 948.03(2), F.S. authorizes a sentencing court to order special conditions of probation not specifically set forth in statute.

[15] The Parole Commission's discretionary authority is authorized by s. 947.18, F.S., (parole), s. 947.1405, F.S., (conditional release), and s. 947.149, F.S., (conditional medical release).

[16] *See* ss. 775.082(3), 947.1405, 948.012, and 948.30(3), F.S.

[17] *See* s. 800.04(5)(b), F.S.

[18] Section 948.30(2)(e), F.S. The Jessica Lunsford Act, Ch. 2005-28, L.O.F., made significant changes to Florida's electronic monitoring program. Among the provisions of the Act were requirements for electronic monitoring of certain sex offenders. Before passage of the Jessica Lunsford Act, the only statute mandating the sentencing court to require electronic monitoring was found in s. 948.101(1)(b), F.S., and applied only to offenders placed on criminal quarantine community control for criminal transmission of HIV. No offenders were ever placed on this form of community supervision, and it was removed from the statutes in 2010.

[19] *See Carson v. State*, 531 So. 2d 1069 (Fla. 4th DCA 1988) and *Anthony v. State*, 854 So. 2d 744 (Fla. 2d DCA 2003).

[20] Another 30,768 offenders were in active-suspense supervision status, meaning that the offender was unavailable for direct supervision for reasons such as incarceration or hospitalization, but was still being monitored by a probation officer. Additionally, the department was monitoring 6,520 offenders whose supervision had been transferred out of state, and 29,342 offenders had absconded from supervision. Department of Corrections, "Florida's Community Supervision Population Monthly Status Report," February 2012, p. 3, http://www.dc.state.fl.us/pub/spop/2012/02/0212.pdf (last visited 5/2/2012).

[21] *Id.* at p. 2.

[22] *Id.*

[23] The Jessica Lunsford Act requires the department to use "a system that actively monitors and identifies the offender's location and timely reports or records the offender's presence near or within a crime scene or in a prohibited area or the offender's departure from

AMERICAN OVERSIGHT

GPS technology allows tracking of an offender's location even when he or she moves away from a fixed location using satellite positioning. Active GPS monitoring provides real-time reporting of an offender's location by incorporating a cell phone into the equipment in order to transmit location coordinates to a monitoring station. The monitoring station alerts the probation officer when the offender either leaves an area to which he or she is restricted or enters an area from which he or she is barred. An active GPS monitoring system includes a Mobile Tracking Device (MTD) that receives, stores, and transmits the location data as well as displays messages and instructions from the monitoring station or probation officer. In 2011, Florida's GPS monitoring cost was approximately $8.94 per day per monitored offender.

Section 948.09, F.S., requires the monitored offender to pay the full cost of the electronic monitoring services. The department has authority to exempt the offender from all or part of the payment under certain circumstances, such as inability to find a job.[24] Willful failure to pay non-exempted monitoring costs is grounds for the court to find a violation of the conditions of supervision. Few offenders have the financial resources to pay this amount on top of restitution, court costs, supervision fees, and other fees that have priority for payment.

Impact of Electronic Monitoring on Supervision

In 2010, researchers from the Florida State University College of Criminology and Criminal Justice submitted a report to the United States Department of Justice that addressed whether EM is "an effective and cost efficient correctional strategy that increases the level of monitoring and supervision of high-risk offenders while maintaining public safety."[25] The study found that:

- Overall, EM reduces the likelihood that an offender will not successfully complete community supervision by approximately 31% relative to the supervision failure rate of offenders who are not subject to it.[26]
- EM significantly reduces the failure rate for all types of offenders but has less of an impact on violent offenders than on offenders who committed sex, drug, property, or other types of crimes.[27]
- Offenders who were monitored by use of active GPS monitoring had a 6% improvement rate in the reduction of supervision failures relative to offenders who were on RF monitoring.[28]

The study also noted drawbacks of EM, including:

- Offenders believe EM has negative consequences on their relationships with their spouses, significant others, and children, and a large proportion felt shame and were stigmatized by others disproportionate to their actions as a result of being on EM.[29]
- Offenders and officers were nearly unanimous in stating that EM is a detriment to the ability to obtain and maintain employment.[30]

A previous study conducted by researchers at the Florida State University found significant reductions in absconding and in revocations for technical violations or new offenses among electronically monitored

AMERICAN OVERSIGHT

offenders as compared to those who were not electronically-monitored. The study also found that electronic monitoring was effective across a range of violent, property, and drug offenders.[31]

The National Conference of State Legislatures (NCSL) Sentencing and Corrections Work Group provided that the value of intermediate sanctions, including EM, "depends upon policies that target resources effectively and focus the highest-level supervision on the highest-risk offenders. Creating more intensive supervision for lower-risk offenders usually does not help meet corrections goals, affect cost control, or reduce reoffending."[32] When used in lieu of incarceration, the Work Group noted that EM can benefit offenders by allowing them to continue working, attend treatment, support their families, and remain in their residences.[33]

The Office of Program Policy Analysis and Government Accountability (OPPAGA) found that in addition to offender costs for EM, logistical problems may occur in monitoring homeless persons lacking a permanent residence and the ability to recharge the unit for eight hours each day. Additionally, in rural areas offenders may be unable to acquire cellular signal for GPS monitoring, and offenders may not meet land-line telephone requirements for RF monitoring.[34]

In a 2010 report, OPPAGA found that increased use of intermediate sanctions, including community supervision with electronic monitoring, could reduce prison costs, but also has both positive and negative considerations.[35] OPPAGA determined that although the majority of persons on EM were sex offenders (70%), non-violent offenders with a Criminal Punishment Code score sheet total in the 45-60 point range are another population that may be effectively sanctioned with EM.[36] EM could be used as a sentencing alternative for persons driving with suspended licenses.[37] OPPAGA estimated potential savings of $1.2 million in the first year for every 100 offenders diverted from prison to EM supervision.[38]

Change and Efficiency

Recommendations

The Task Force recommends providing the Department of Corrections with flexibility to develop and implement cost savings initiatives, in conjunction with counties. The department should have the flexibility to implement new models of inmate transfer, assignment, or supervision if determined to effectively carry out inmate sentences, following existing statutory requirements, while achieving cost savings. Counties should be able to submit cost savings proposals to the department and appeal decisions to the Governor and Cabinet.

The Task Force recommends providing incentives for counties to participate in initiatives that will achieve efficiencies and cost savings for the state. Incentives should be created for arrangements that

AMERICAN OVERSIGHT

promote flexibility and produce mutually-beneficial arrangements for the state and counties. Incentives may include, but are not limited to, diversion of inmates from state to local facilities and increased utilization of community supervision, including electronic monitoring.

C. RISK AND NEEDS ASSESSMENT INSTRUMENTS

Florida's Sentencing Policies

Florida's sentencing policies use items such as nature of the primary offense and any additional offenses, prior criminal history, and injury to the victim to calculate a recommended sentence for the offender. This type of determinant sentencing is put forth in the Criminal Punishment Code.[39] Section 921.002(1)(b), F.S., provides, "The primary purpose of sentencing is to punish the offender. Rehabilitation is a desired goal of the criminal justice system but is subordinate to the goal of punishment."[40] To this end, the Criminal Punishment Code provides that sentences should be commensurate with the severity and circumstances of the primary offense, increase with the length and nature of the offender's prior record, and prioritize incarceration toward offenders of serious offenses and those with long prior records.[41]

A sentencing scoresheet must be completed for each felony defendant prior to sentencing.[42] The offender's score determines the lowest permissible sentence, with upward discretion to the statutory maximum sentence. Florida's sentencing guidelines scoring system has been shown to serve as a valid indicator of offender seriousness.[43] The weighted score produced by this system takes into account an offender's primary offense and all additional offenses, his or her prior record and the seriousness of prior offenses, and other circumstances of the criminal event (victim injury, weapon use, supervision violation, etc.). A study by Padgett, Bales, and Blomberg stated that "In the absence of risk scores derived from psychological or other such inventories, this indicator of offender seriousness is the best available quantitative measure of the risk an offender poses to public safety."[44]

Sentencing Tools

Actuarial risk and needs assessment tools use data about past cases to identify the indicators most closely associated with the likelihood of future criminality. After validation through testing on a known correctional population, this data is applied to individual offenders to produce recommendations based on offender characteristics, criminal history, and severity of current offense.

Once used largely by probation and parole departments to help determine the best supervision and treatment strategies for offenders, use of risk and needs assessment tools is expanding to inform decisions at other points in the criminal justice process. At sentencing, risk and needs assessments are intended to assist judges by providing information on risk management and reduction. Costs of different sentencing options may also be included in results. Judges consider this information in balancing the many purposes of sentencing, including punishment, rehabilitation, deterrence, restitution, recidivism, and public safety.

AMERICAN OVERSIGHT

Application of Risk and Needs Assessment Instruments

According to the National Center for State Courts' National Working Group on Using Risk and Needs Assessment Information at Sentencing, risk and needs assessment tools are effective in determining:

- Public safety and risk management;
- Amenability to probation, community supervision, and intermediate sanctions;
- Effective behavioral treatment options;
- Suspension of all or part of a sentence; and
- Effective conditions of probation and responses to violations.[45]

The Pew Center on the States has found that "whether a particular offender is an appropriate candidate for recidivism reduction cannot accurately be assessed relying solely on the type of offense committed and the offender's prior criminal history. Individual offender characteristics must also be taken into consideration."[46] Pew recommends providing sufficient flexibility to consider recidivism reduction options and that state sentencing rules should avoid mandates that prohibit judges from granting probation.[47]

Alabama, Oregon, California, Arizona, Idaho, South Carolina, Utah, Washington, and Wisconsin have implemented evidence-based sentencing or declared recidivism reduction a goal of sentencing in recent years. Studies have found that actuarial risk and needs assessment tools that use data on prior cases to identify the likelihood of future criminality can be as accurate as human judgment in predicting risk of recidivism, but recommend use of both a third-generation actuarial toll and professional judgment.[48]

The first state supreme court decision to discuss the use of risk and needs information at sentencing was in Indiana in *Malenchik v. State*.[49] In the decision, the Indiana Supreme Court distinguishes use of risk and needs assessment for sentencing alternatives for risk and recidivism management from sentencing as a punishment for criminal behavior. The *Malenchik* decision provides that risk and needs "evaluations and their scores are not intended to serve as aggravating or mitigating circumstances nor to determine the gross length of sentence, but a trial court may employ such results in formulating the manner in which a sentence is to be served."[50]

Risk and Needs Assessments in Other States

A 2010 survey by the Vera Institute of Justice found that over 60 community supervision agencies in 41 states reported using an actuarial assessment tool.[51] Of the survey respondents, 82 percent assessed both risk and need, and the remaining 18 percent assessed only risk.[52]

[52] Nearly all responding probation agencies conduct their assessments in the pre-sentence phase. Releasing authorities were more likely to assess only risk. *Id.* at pp. 1-2.

AMERICAN OVERSIGHT

As of 2010, the Level of Service Inventory-Revised (LSI-R) was the most commonly used assessment tool and was utilized by at least 16 states.[53] LSI-R is used to predict recidivism across a range of correctional settings and assists in determining the necessary level of supervision, sentencing, program or institutional classification, and release from custody. The tool consists of a 54-item scale in the areas of prior criminal history, education, employment, financial situation, family relationships, use of leisure time, companions, alcohol or drug use, mental health, and criminal attitudes.[54]

Other assessment tools include: the Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) and the Level of Service/Case Management Inventory (LS/CMI).[55] Several states use state-specific assessment tools, including Ohio, Arizona, Wisconsin, Virginia, and California.

Virginia implemented a risk assessment instrument created by a state Sentencing Commission in 2003.[56] Since that time, Virginia judges have used the tool to successfully divert 25% of Virginia's nonviolent offenders who would have otherwise been incarcerated to alternative sanctions programs.[57] Beginning in 2013, Kentucky will include risk and needs assessments in pre-sentence reports, allowing judges to review a defendant's likelihood of future criminal behavior when considering sentencing options.[58]

Missouri's Sentencing Commission developed the Recommended Sentencing Application (RSA), a web-based sentencing tool that provides extensive information about sentencing options and the risks and costs associated with each alternative.[59] RSA calculates recommended sentences, risk assessments, and recidivism projections using gender, prior felony convictions, prior misdemeanors, prior incarcerations, revocations, time since last conviction/release, recidivist offense, education, employment, substance abuse, escapes, and age. Also included in results are the estimated costs of incarceration, supervision, and community-based alternatives, allowing the judge to weigh projected results with estimated costs of sentences.[60]

Change and Efficiency

Recommendations

The Task Force recommends investigating implementation of a web-based risk and needs assessment tool for use at time of sentencing. Using data on the indicators most closely associated with the likelihood of future criminality, risk and needs assessment tools can provide recommended options based on the individual offender's risk of recidivating and effectiveness of various sentencing options. The state should investigate implementing a risk and needs assessment tool to provide judges with additional information on sentencing to effectively manage and reduce risk. Estimated costs for sentencing options should be included in the tool to allow judges to weigh projected results with estimated costs of sentences. The tool should be made available to judges at the time of sentencing and to the public through a web portal.

AMERICAN OVERSIGHT

The Task Force recommends performing a study to determine the potential cost savings resulting from implementing a risk and needs assessment tool. Allowing for judicial discretion at time of sentencing, an assessment tool may lead to savings if judges select appropriate sentencing options that have lower costs. A study should be performed to determine the estimated savings from implementation of an assessment tool that includes costs with recommended sentencing options.

Programs that address the individual needs of inmates and prepare them for successful re-entry into the community should be utilized when appropriate, based on assessments performed at time of sentencing and at time of intake. Educational, vocational, chemical dependency, faith, and character-based programs should be expanded as part of recidivism reduction and re-entry programs.[61]

To effectively implement the recommendations, flexibility in sentencing must be provided to judges. Options presented by a risk and needs assessment tool and initiatives partnering the state and counties must be available for judges to utilize at their discretion.

The Task Force recommends that stakeholders develop recommendations to the Legislature for increasing flexibility in sentencing guidelines. Judges should be provided with the flexibility to consider the many purposes of sentencing, including punishment, rehabilitation, deterrence, restitution, recidivism reduction, and protection of public safety, as well as cost. Judges should be given flexibility to determine the balance of these elements and most effective method of sentencing for each individual offender. Mandatory sentencing requirements should be evaluated and modified, if necessary, when determined to ineffectively limit judicial discretion.

AMERICAN OVERSIGHT

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Early Learning Time and Attendance

RECOMMENDATION SUMMARY

On December 7, 2011, the Government Efficiency Task Force approved the following recommendations regarding early learning time and attendance by a vote of 12 yeas, 1 nay:

- The Task Force recommends that the Office of Early Learning adopt an electronic form of attendance submission for Voluntary Prekindergarten (VPK) and School Readiness (SR) programs. An electronic form of attendance submission is estimated to save **$4 million** per year by eliminating the manual paper process and reducing staff time.

- The Task Force recommends adopting a point of service system utilizing either electronic swipe cards or biometrics to supplement an electronic time and attendance submission process. Adopting this system would:
    - Reduce human error and fraud that result in improper payments;
    - Reduce the time burden on providers in collecting and recording attendance data;
    - Reduce the amount of paper record keeping required of providers;
    - Allow for quicker audits of attendance records;
    - Allow for quicker turnaround time on payments for SR and reconciliation for VPK; and
    - Allow for real time attendance data.

- The savings would be between **$40-60 million** per year if Florida were to realize similar results of other states that have utilized a point of service system. The savings would be based on the reduction of improper payments.

- The Task Force recommends ensuring sufficient time is allowed for implementation and training so providers can effectively learn to use the system.

- The Task Force recommends allowing for the sharing of time and attendance data with other agencies that utilize the information.

- The Task Force recommends utilizing other states' experiences with the point of service system to avoid common implementation mistakes.

- The Task Force recommends leveraging predicted savings in order to pay for the point of service system.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. RECOMMENDATIONS(S) AND BACKGROUND

A. SCHOOL READINESS AND VOLUNTARY PREKINDERGARTEN EDUCATION

School Readiness Program

The School Readiness (SR) Program was created in 1999.[1] The program provides subsidies for early childhood education and child care services to:

- Children of low-income families;
- Children in protective services; and
- Children with disabilities.[2]

The Florida Legislature created regional Early Learning Coalitions (ELCs) in order to administer the SR program at a local level (see appendix one for map).[3] The SR program is administered by the ELCs at the county and regional level, while the Office of Early Learning (OEL) coordinates at the state level.[4] Children are admitted to the program using a priority based system.[5]

The SR program currently has 138,955 children enrolled and 5,054 providers.[6] In FY 2010-11, the state spent $434,835,140 on providers.[7]

School Readiness Program

	# of Children (current)	# of Providers (current)	Amount Spent in FY 2010-11
SR Program	138,955	5,054[8]	$434,835,140

Voluntary Prekindergarten Education Program

The Voluntary Prekindergarten (VPK) program was created by constitutional mandate in 2002 and enacted in law in 2005. The Florida Constitution provides that:

> Every four-year old child in Florida shall be provided by the State a high quality pre-kindergarten learning opportunity in the form of an early childhood development and education program which shall be voluntary, high quality, free, and delivered according to professionally accepted standards.[9]

---

[1] *See* Ch. 99-357 L.O.F.
[2] Section 411.01(6), F.S.
[3] Section 411.01(5), F.S.
[4] The program was administered by the Agency for Workforce Innovation but is now administered by the Office of Early Learning.
[5] *See* s. 411.01(6), F.S.
[6] These numbers are for FY 2011-12 and were provided by the Office of Early Learning (copy on file with Government Efficiency Task Force staff).
[7] Fiscal information provided by the Office of Early Learning. The amount paid to providers is a mix between a federal block grant and state money. In FY 2010-11, a total amount of $615.4 million was appropriated for the SR program: $353.6 million from CCDF block grant, $116.4 million from TANF block grant, $136 million from state general revenue, $9 million from other state funds, and $500,000 from other federal sources. *See* Specific Appropriation 2243, s. 6, Ch. 2010-152, L.O.F.
[8] There are also an additional 3,968 providers that participate in both the SR and VPK program for a total of 10,869 providers for the two programs.
[9] Section 1(b), Art. IX, Florida Constitution.

AMERICAN OVERSIGHT

A VPK provider may be:

- A school-year prekindergarten program delivered by a private prekindergarten provider;[10]
- A summer prekindergarten program delivered by a public school or private prekindergarten provider;[11]
- A school-year prekindergarten program delivered by a public school;[12] or
- A specialized instructional service program for children who have disabilities.[13]

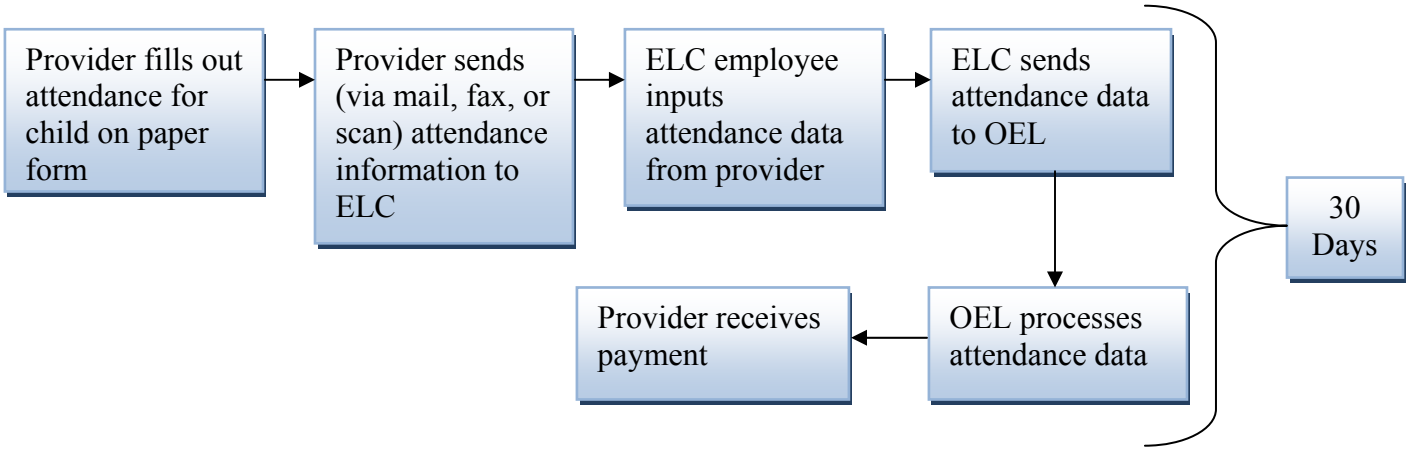
A full-time VPK program consists of 540 instructional hours, while a summer VPK program consists of 300 instructional hours.[14]

The VPK program currently has 134,777 children enrolled and 1,847 providers.[15] The program is overseen by OEL and administered through the 31 ELCs.[16] In FY 2010-11, the state spent $382,607,156 on providers.[17]

Voluntary Prekindergarten Education Program

	# of Children (current)	# of Providers (current)	Amount Spent in FY 2010-11
VPK	134,777	1,847[18]	$382,607,156

B. CURRENT ATTENDANCE AND PAYMENT SYSTEM

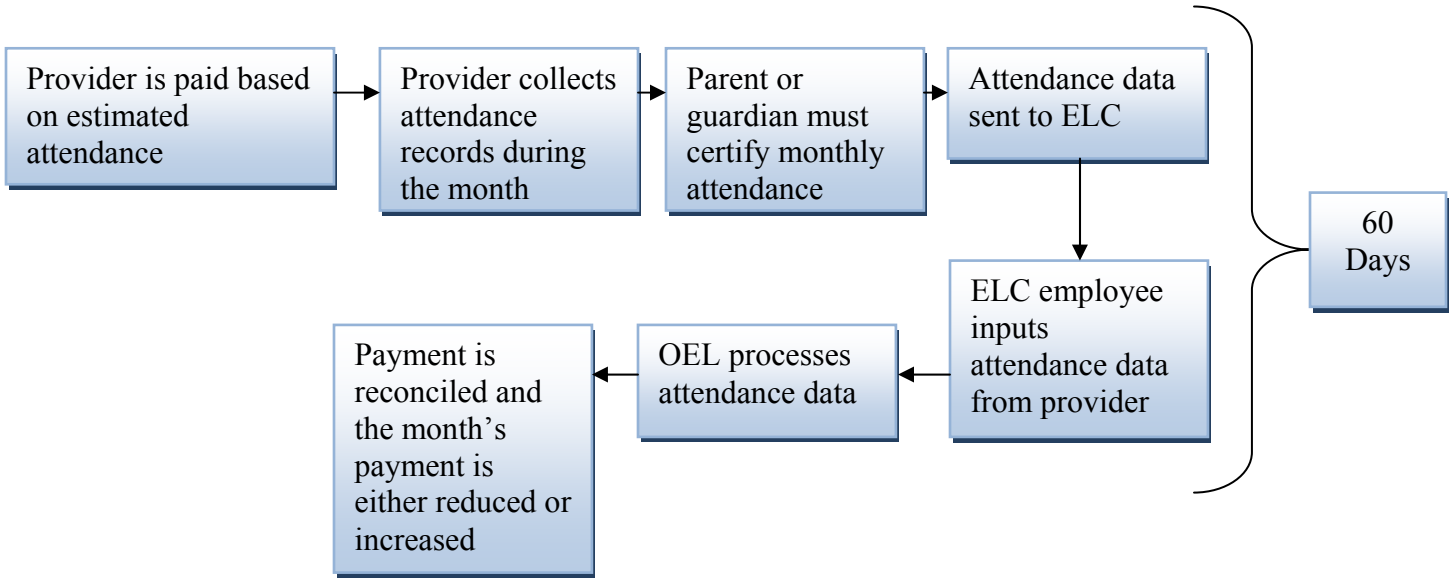


School Readiness Program

The current attendance system for SR is a paper based system in which the provider records time and attendance for each child enrolled at the facility. The attendance paperwork is then sent to the ELCs responsible for that facility. Data is input by the ELC staff and sent to OEL, which processes the data and then issues payment to the provider. The cycle takes an average of 30 days from submission of attendance to receipt of payment.[19]

[10] Section 1002.53(3)(a), F.S., with the requirements to be a private provider pursuant to s. 1002.55, F.S.
[11] Section 1002.53(3)(b), F.S., with the requirements to be a private provider pursuant to s. 1002.61, F.S.
[12] Section 1002.53(3)(c), F.S.
[13] Section 1002.53(3)(d), F.S., with the requirements to be a specialized services program pursuant to s. 1002.71, F.S.
[14] Section 1002.71(2), F.S.
[15] These numbers are for FY 2011-12 and were provided by the Office of Early Learning (copy on file with Government Efficiency Task Force staff). The percentage breakdown of providers is: private centers 81%, public schools 16 %, family day care homes 2%, and private schools 1%.
[16] The Early Learning Coalitions are those that were created pursuant to s. 411.01, F.S.
[17] Information provided by the Office of Early Learning (copy on file with Government Efficiency Task Force staff).
[18] There are also an additional 3,968 providers that participate in both the SR and VPK programs for a total of 10,869 providers for the two programs.
[19] The average is based on information provided by the Office of Early Learning (copy on file with Government Efficiency Task Force staff).

AMERICAN OVERSIGHT



Current SR Attendance and Payment Flow Chart

Voluntary Prekindergarten Education Program

The current attendance system for VPK is a paper-based system similar to the SR process. The main difference is that VPK providers are paid a month ahead and the payment is reconciled after attendance has been provided to the ELC.[20] The parent or guardian is also required to certify the child's attendance every month.[21] The process takes about 60 days to reconcile the actual payment owed to the provider.

Current VPK Attendance and Payment Flow Chart

[20] *See* s. 1002.71(5)(b), F.S.
[21] *See* s. 1002.71(6)(b)(2), F.S. Pursuant to s. 1002.71(6)(b)(3), F.S., the provider must keep each monthly certified attendance form for two years.

AMERICAN OVERSIGHT

Change and Efficiency

There are two primary inefficiencies in the current system of time attendance in the SR and VPK programs: the paper based collection of attendance and the dependence on the provider for attendance records.

Paper-Based System

The paper based system is a burden on OEL, the ELCs, and the provider.[22] The provider is required to turn in attendance to the ELC on a specific form. The ELC must then manually enter the attendance data, which is sent to OEL. The process creates a great amount of paperwork and recordkeeping. OEL estimates that it processes over 34,500 paper attendance rosters per month.

Recommendations

The Task Force recommends that OEL adopt an electronic form of attendance submission.[23] Decreasing paperwork and redundancies in data entry would reduce payment errors, eliminate waste, and decrease the amount of time it takes for OEL to receive attendance data and process provider payments. The end result would be increased efficiency in distributing payment to the provider. OEL estimated that the electronic submission would save an estimated $4 million per year.[24]

Point of Service System

The electronic submission process for attendance would reduce paperwork, but would not address the issue of reliance on the provider for attendance records. A point of service system for checking the child in and out would provide additional efficiencies and savings. The point of service system addresses two issues that lead to improper payments: the first is the possibility of mistakes made by the provider in keeping the records; the second is the possibility of fraud.

The current paper system and the proposed Early Learning Information System (ELIS) rely on the provider for the attendance records. The provider takes the initial attendance,[25] records the attendance on a form, and sends the form (or with ELIS submits the data electronically) to the ELC. By requiring multiple people and steps in order to report attendance, the process is open to the possibility of mistakes. Neither the current process nor the ELIS project addresses these issues.

The current system and the proposed ELIS system do not prevent fraud. For VPK, 20% of the total payment made on behalf of a student to a provider may be for hours during which the student was absent.[26] For SR, the provider may be reimbursed for up to three days per calendar year that the child was absent.[27] This puts tremendous pressure on the provider to make sure the child is present. If the child exceeds the amount of absences allowed by statute or rule, then the provider is not paid. This provides a possible incentive to submit inaccurate attendance records if students are chronically absent.

---

[22] Two Early Learning Work Group members, Mrs. Belinda Keiser and Mr. Robert Stork, visited ELCs and providers and testified at the November 29, 2011, Work Group meeting. The Work Group members testified that there are "voluminous amounts of paperwork," and "providers were open to anything that reduced paperwork." A recording of their testimony is available at http://www.floridaefficiency.com/meetings.cfm (last visited 11/30/2011).

[23] The Early Learning Information System (ELIS) is designed to have the ability to allow the provider to submit attendance data on-line rather than on a paper form. For more information on the ELIS project please see http://www.floridaearlylearning.com/EarlyLearning/OEL_SysDev_ELIS.html (last visited 11/30/2011).

[24] This information is based on the Office of Early Learning Project Briefing from November 1, 2011 (copy on file with Government Efficiency Task Force Staff).

[25] Mrs. Keiser and Mr. Stork noted that in their visits to providers, some providers have already invested in a check-in program for parents and guardians that tracks attendance. The provider is still required to manually enter the attendance data on the prescribed forms.

[26] Section 1002.71(6)(d), F.S.

[27] *See* Office of Early Learning Rule 60BB-4.500(2).

AMERICAN OVERSIGHT

Recommendations

The Task Force recommends adopting a point of service system utilizing either electronic swipe cards or biometrics to supplement an electronic attendance submission process in the Office of Early Learning. Adopting the point of service system would relieve the providers of the responsibility and time requirements of tracking attendance. The parent or guardian would use a swipe card or their finger, in the case of a biometric device, to check the child in and out of the school or day care center. The result would be fewer errors and the reduction in the amount of time the provider must spend in recording attendance data.[28] The point of service system would also reduce multiple steps in recording the attendance, which would result in quicker payments to the provider. The point of service system would also reduce fraud. Since the provider would not be responsible for the attendance data, there is no potential for false attendance records.

The point of service system would:

- Reduce human error and fraud that result in improper payments;
- Reduce the time burden on providers in collecting and recording attendance data;
- Reduce the amount of paper record keeping required of providers;
- Allow for quicker audits of attendance records;
- Allow for quicker turnaround time on payments for SR and reconciliation for VPK; and
- Allow for real time attendance data.

Several other states, including Oklahoma, Indiana, Texas, Louisiana, Colorado, Virginia, New Jersey, North Carolina, Ohio, and Mississippi, have adopted a point of service system. Louisiana adopted a biometric point of service system in 2010 and has estimated savings at $20-30 million per year.[29] Several other states have realized savings of 10%. If Florida were to have similar results, the savings would be $40-60 million dollars per year with implementation of a point of service system.[30]

Other states utilizing point of service systems have varying levels of costs. Oklahoma has approximately 40,000 enrolled children in its SR program and pays $2.97 per month ($1.43 million per year) for swipe card point of service and payment service. Louisiana has approximately 45,000 enrolled children and pays $4.75 per month ($2.57 million per year) for a biometric point of service system. Texas has approximately 148,559 enrolled children and pays $2.66 ($4.74 million per year) for swipe card time and attendance.[31]

Florida has approximately 292,952 students enrolled in SR and VPK for FY 2011-12. If Florida were to adopt swipe card technology for time and attendance collection at a rate similar to Texas, the state would pay about $8.79 million per year.[32] With a conservative savings of 6% of the provider reimbursements, which is a little more than half of what Oklahoma has reported, Florida would net approximately $40 million in savings.

The Task Force recommends leveraging predicted savings in order to pay for the point of service system. Since Florida is nearly double the size of Texas in terms of student population, the state would be able to leverage an economy of scale to competitively bid for a point of service system. The state should also leverage the proposed savings as payment and pay for the service out of the savings only.

---

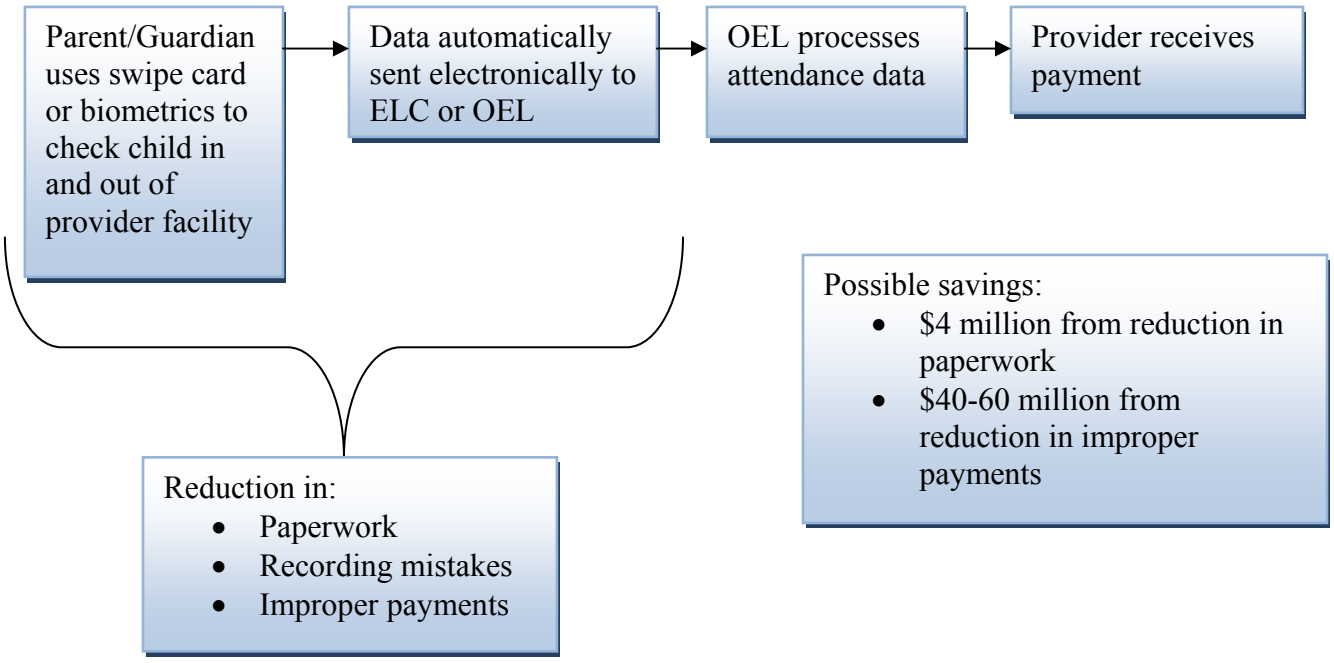
[28] The proposed ELIS system would relieve the ELCs and OEL of the paper process, but providers would still be responsible for maintaining attendance records to submit attendance data and in the case of an audit. The point of service system would save time and money for the providers by reliving them of this responsibility.

[29] Mr. Richard Howze, Undersecretary for Louisiana's Department of Child and Family Services, testified at the November 29, 2011, Work Group meeting that Louisiana saved between $8-10 million the first few months and then saved about $2.5 million per month after that. Mr. Howze also testified that the system paid for itself in less than a year. A recording of his testimony is available at http://www.floridaefficiency.com/meetings.cfm (last visited 11/30/2011).

[30] This estimate is based on a conservative estimate of 5-8% savings of the total amount spent on providers in FY 2010-11 of $817,442,296 (which equates to $40,872,114 to $65,395,383 per year of savings).

[31] The state by state information was provided by ACS (copy on file with the Government Efficiency Task Force staff).

[32] This number is calculated at $2.50 per student per month multiplied by the total number of students for 12 months.

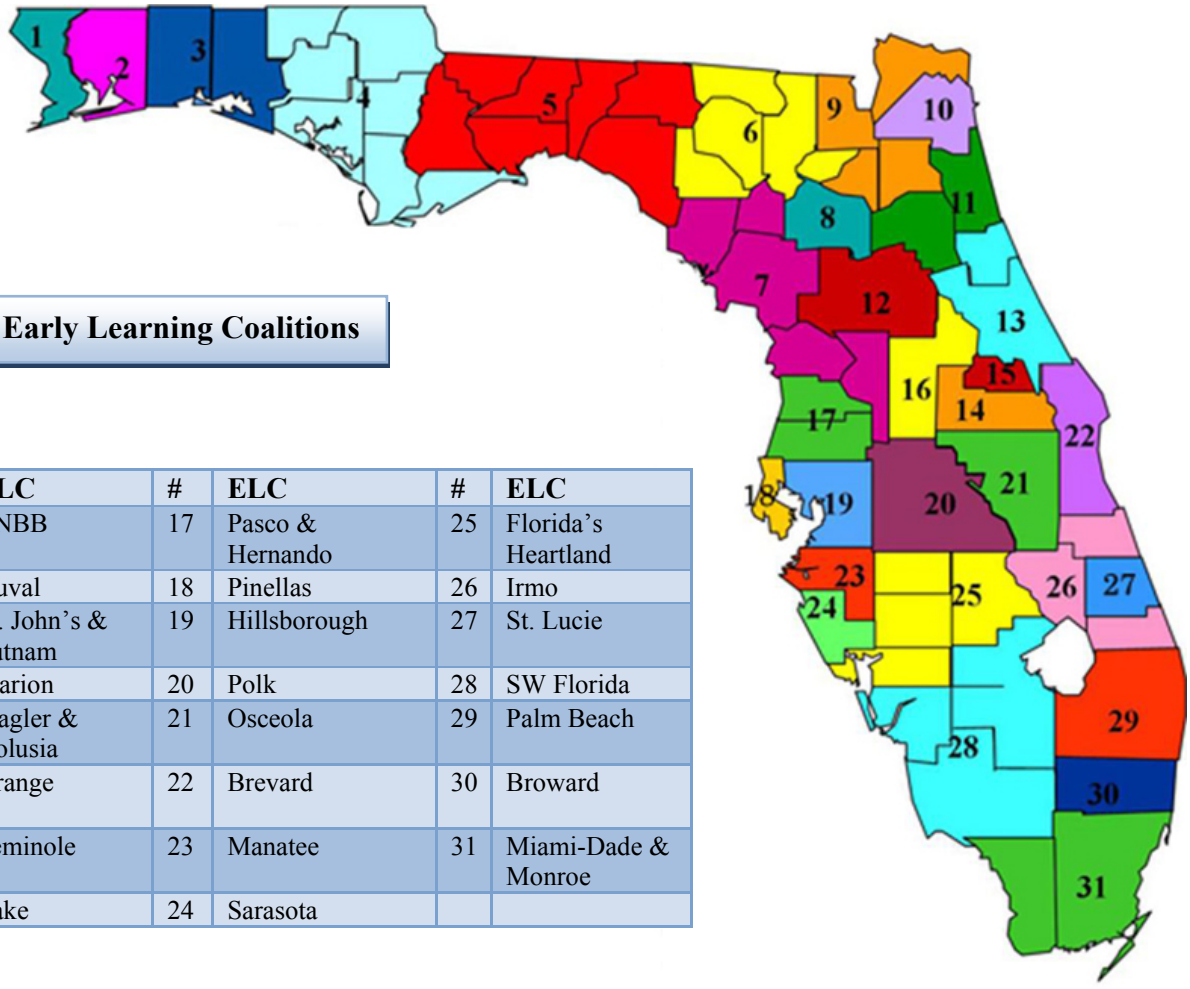


AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004806

In implementing a point of service system, the Task Force recommends:

- Ensuring sufficient time is allowed for implementation and training so providers can effectively use the system.[33]
- Allowing for the sharing of time and attendance data with other agencies that utilize the information.[34]
- Utilizing other states' experiences with the point of service system to avoid common implementation mistakes.



Electronic Attendance Submission Process with Point of Service

[33] In Mr. Howze's testimony, he suggested that a longer implementation and training time would have been beneficial for Louisiana.
[34] The Department of Education and Department of Children and Families utilize time and attendance information.

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Inmate Education and Re-entry

RECOMMENDATION SUMMARY

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding inmate education and re-entry by a vote of 10 yeas, 0 nays:

- **Individualized Inmate Re-entry Plans**
  - Create an individualized inmate re-entry plan that, based on information obtained from assessments, outlines programming to be provided during the period of incarceration.
  - Consider educational needs when determining an inmate's facility placement.
  - Assessments to determine literacy skills are critical. Focus and priority should be given to this process of assessing literacy skills to provide appropriate foundation for other educational programs and opportunities after prison.
  - Develop a program providing literacy and life skills training for inmates who are ineligible for the Mandatory Literacy Program due to prison term length.

- **Mandatory Literacy Program**
  - Require prisoners who meet the requirements of the Mandatory Literacy Program to successfully complete the program by attaining a total battery score of 6.0 on a Test of Adult Basic Education (TABE).

- **Online Education Opportunities**
  - Investigate opportunities to introduce online and e-learning educational and vocational training in prisons.
  - Set up a pilot program to develop widely-acceptable security protocols for Internet access.

- **Mission Driven Prisons**
  - Convert some of Florida's prisons to institutions that focus on chemical dependency, literacy and basic education, and vocational education.
  - Align the missions of vocational education prisons to meet the needs of the employment market.

- **Program Efficiency**
  - Adopt policies regarding prioritizing the eligibility of educational and vocational programs to inmates whose likelihood of recidivism will be most improved as a result of this instruction.
  - Expand vocational education programs.
  - Research implementation of a double-track education system.

- **Metrics and Statistics**
  - Conduct a cost-benefit analysis to evaluate rehabilitative programs, such as educational and vocational programs.
  - Develop a regular report on the cost-effectiveness of rehabilitative programs, including those provided by entities outside of the Department of Corrections.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. BACKGROUND AND RECOMMENDATION(S)

A. INMATE EDUCATION

After inmate and public safety, the most important goal of the correctional system is reducing recidivism.[1] Reducing recidivism results in fewer crimes, fewer victims and cost savings for Floridians.[2] One way to reduce recidivism rates is to promote the successful rehabilitation and re-entry of ex-offenders. This can be implemented by providing substance abuse treatment, educational and vocational training, and by assisting inmates with community support services after their release.[3]

Prisoner Statistics

As of January 2012, Florida housed 100,345 inmates across 60 state prisons, including seven private prisons.[4] The average cost per inmate is $19,473 annually.[5] Most of Florida's inmates (88.6 percent)[6] will eventually be released, and of those approximately one in three will return to prison.[7] The high budgetary demands and social costs incarceration places on the state make reducing recidivism rates a strategic investment. Rehabilitative programs, such as education and vocational training, are shown to reduce the likelihood of repeat offending, decrease inmate idleness and promote institutional security, and may also achieve cost savings.[8] Each inmate who is successfully rehabilitated and does not return to prison saves the State of Florida at least $19,473 each year.

According to the Department of Corrections (department), the probability of reoffending is reduced by 3.7 percent for each grade of adult basic education completed.[9] Currently, 64 percent of the tested inmate population in Florida has not achieved General Education Development (GED) Prep literacy skills (scoring less than 9th grade level[10]).[11] Studies have also found that inmates who have a GED when released recidivate at a rate 7.9 percent less than the overall inmate population.[12] Inmates with vocational certificates are 17 percent less likely to return to prison than those without certificates, and those participating in vocational training are

AMERICAN OVERSIGHT

less likely to have disciplinary issues.[13] Of the 2011 inmate population, those with vocational certificates were 35 percent less likely to have received a disciplinary report that year than inmates without a certificate.[14] The Office of Program Policy Analysis and Government Accountability (OPPAGA) found that inmates who earned a GED or high school diploma were 9.3 percent more likely to be employed than other inmates, and those who earned a vocational certificate were 17.9 percent more likely to be employed than other ex-offenders.[15]

Prisoner Education Programs

The Department of Corrections' Bureau of Re-Entry Programs and Education is responsible for the oversight and support of the department's academic and vocational education programs. In FY 2011-12, the Legislature appropriated $2,277,324,021 to the department, of which $21,779,443, or less than one percent (0.95%), was allocated to correctional education programs.[16] The department currently allocates 299 Full Time Employees (FTE) to meet the educational needs of inmates (students) enrolled in education programs.[17] Academic educational programs are operated in 53 correctional facilities with an enrollment capacity of more than 6,500 students.[18] Local Education Agencies (LEA) operate programs in two additional facilities, each with an enrollment of 55 students.[19] Total enrollment capacity in department-operated academic education programs is approximately 6,600 students, which is 6.5 percent of the total inmate population.[20] In addition to the education services provided in the 53 department-operated facilities, seven contracted facilities utilize 141.5 FTEs to provide education services for students, with an enrollment capacity of approximately 2,471 students.[21]

The department's current allocation of FTEs has enabled the number of inmates earning GED certificates to rise for the fifth year in a row. In FY 2010-11, inmates in department-operated facilities earned 2,930 GED certificates.[22] Contracted facilities awarded 356 GED certificates during the same period.[23] There was a 20 percent increase in the number of vocational certificates awarded in FY 2010-11, for a total of 2,217 certificates earned in department-operated facilities.[24] Contracted facilities awarded 880 vocational certificates during this period.[25]

AMERICAN OVERSIGHT

Academic and Special Education

To assist students in achieving GED and vocational certificates, the department offers several academic programs, including:[26]

- Adult Basic Education/General Education Development (ABE/GED);
- Special Education;
- Close Management Education (CME);
- Inmate Teaching Assistant Program (ITA);
- Local Education Agency (LEA)-Operated Academic Education Programs;
- Volunteer Literacy Programs;
- Mandatory Literacy;
- Ready to Work; and
- Federally-Funded Academic Programs and Services.

The department offers inmates 85 vocational education courses in 36 distinct vocational trades at 33 state operated institutions. The total enrollment capacity for vocational education is 1,584 students, or 1.6 percent of the total inmate population.

Mandatory Literacy Program

The Mandatory Literacy Program is a 150-hour literacy training program required by law[27] for all inmates who have at least two years of their sentence remaining when received at an institution and who receive a Tests of Adult Basic Education (TABE) total battery score below grade level 6.0.[28] The Mandatory Literacy Program is available to all inmates who meet the program requirements, as opposed to the other academic programs offered by the department, which are not mandatory and are provided based on availability.[29]

Recommendations

The Task Force recommends requiring prisoners who meet the requirements of the Mandatory Literacy Program to successfully complete the program by attaining a total battery score of 6.0 on a TABE (Test of Adult Basic Education). Currently, successful completion of the Mandatory Literacy Program requires completion of 150 hours of instruction or achievement of a total battery score of 6.0 or higher on the TABE. The importance of literacy and successful completion of this program is critical to reducing recidivism. The department estimates that only 21 percent[30] of inmates enrolled successfully complete the Mandatory Literacy Program.[31] The Task Force recommends that achievement of a total battery score of 6.0 on a TABE be the only method for successfully completing this program.

Special Education Services

Special education services are provided to inmates with disabilities who are eligible to receive special services required by state and federal law.[32] The Individuals with Disabilities Education Act (IDEA) requires the

AMERICAN OVERSIGHT

department to provide free and appropriate public education in the least restrictive environment to exceptional students. Exceptional students are inmates under the age of twenty-two who have a previous special education history, have yet to obtain a high school diploma, continue to need special education and related services to benefit from participation in an educational assignment, consent to receive special education services, and have a current transition plan/individualized education plan.[33]

Close Management Education Program

The Close Management Education Program (CME) provides close management inmates[34] both cell-front and correspondence-study instruction in mathematics, reading, language, and workforce readiness skills by certified academic teachers. Close management inmates are also afforded the opportunity to secure GED diplomas. CME programs are available in 5 correctional facilities.[35]

Inmate Teaching Assistant Program

Recognizing the need to increase inmate access to education services, the department developed the Inmate Teaching Assistant Program (ITA). The ITA program provides grade-appropriate instruction in mathematics, reading, and language instruction to inmates with educational levels ranging from beginning literacy through GED. The program utilizes Inmate Teaching Assistants working under the direction and supervision of a certified teacher.[36] The Inmate Teaching Assistants are inmates with at least a high school diploma or GED who have received academic and practical training in various instructional methods from certified teachers.[37] The ITA program is available at 34 correctional facilities.[38]

Other Programs

Local Education Agency (LEA)-Operated Academic Education Programs are available at three[39] facilities.[40] LEAs are federal grant-funded adult education programs provided by county school districts or community colleges.[41] Volunteer Literacy Programs utilize citizen volunteers and/or ITAs who have received tutoring training to assist inmates in improving their educational abilities. This program is available at nearly all major institutions, annexes and work camps.[42] The Ready To Work program is a Department of Education sponsored employee credentialing program that tests and scores job skills.[43] The department also received $4,553,864 in federal grant funding in FY 2010-11 to provide academic and exceptional education services to inmates and training to correctional educators.[44]

Recommendations

The Task Force recommends the Department of Corrections conduct a cost-benefit analysis to evaluate its rehabilitative programs, such as educational and vocational programs. After inmate and

AMERICAN OVERSIGHT

public safety, the most important goal of the correctional system is reducing recidivism.[45] With this in mind, the department's educational and vocational programs should be measured by their effectiveness at reducing recidivism. To make a compelling case for increased support for correctional education, the department must conclusively document the contribution correctional education provides to society.[46] A cost-benefit analysis should assess outcomes of cohorts of inmates in the department's various programs and track these inmates after release. This would help identify programs that show the greatest return on investment by improving ex-inmate employment outcomes and reducing recidivism. A cost-benefit analysis will determine if increasing funding for these programs will yield overall monetary benefits and how to allocate resources most effectively.

The Task Force recommends the Department of Corrections develop a regular report on the cost-effectiveness of rehabilitative programs, including those provided by entities outside of the department. The American Correctional Association recommends that programs be evaluated every two years to assess their contribution to an institution's mission.[47] According to OPPAGA, the department occasionally evaluates some rehabilitative programs; however, it does not routinely measure and report on the effectiveness of these programs.[48] A regular report on program and provider cost-effectiveness would provide standardized and transparent information to the department and the Legislature. The report should provide an assessment of programs' success in reducing recidivism and efficiency. This evaluation will enable policy makers and those that provide funding or services to determine which program goals are being met and which require more attention.[49]

Issues Facing Prison Education Programs

When an inmate enters the prison system they are given the TABE, which identifies their grade level. Subsequent assessments are taken at scheduled intervals or when an inmate is transferred to a new facility.[50] Unfortunately, because of limited slots in programs, most inmates are released without addressing their educational skills deficiencies.

Recommendations

The Task Force recommends focus and priority should be given to the process of assessing literacy skills to provide appropriate foundation for other educational programs and opportunities after prison. Providing educational opportunities that will enable most people to read at the eighth-grade level, the level at which a person is considered functionally literate, should be a universal goal within corrections.[51] The Florida Statutes define eligibility for the Mandatory Literacy Program as inmates with more than two years left on their sentence.[52] Many inmates who require or would benefit from literacy or life skills education do not qualify for the Mandatory Literacy program because they have less than two years remaining in their sentences. Therefore, the Task Force recommends that the department develop a program providing literacy and life skills training for inmates who are ineligible for the Mandatory Literacy Program due to prison term length.

The Task Force recommends creating an individualized inmate re-entry plan that, based on information obtained from assessments, outlines programming to be provided during the period of incarceration.

AMERICAN OVERSIGHT

The goal of rehabilitation programs is to reduce recidivism, which will ultimately result in cost savings for the state. In order to accomplish this, inmates must re-enter the community with enough education or skills to avoid returning to the correctional system. An inmate's re-entry plan should begin at intake, addressing an inmate's needs, and plan for the prisoner's eventual release and reintegration into the community. Based on the risk factors and skill deficits determined by the initial assessment, the plan should identify specific activities to be performed or skills to be acquired to prepare the prisoner for successful re-entry.[53] Relevant skill areas may include: education, including literacy and life skills training; employment;[54] health, mental health and substance abuse challenges; managing family conflict; mentoring; and strategies to develop pro-social behavior and desistance from crime. Each inmate's re-entry plan should be updated and modified as he or she moves through the correctional process and should reflect both progress and changes in risk and need.[55] The plan should be kept electronically, which will ensure that the plan can be shared system-wide, regularly updated, and accessed if the inmate returns to the system.[56]

A critical component of the individualized inmate re-entry plan is the needs assessment. The department should make sure to go beyond the medical, mental health, education, alcohol abuse, and drug assessments to provide an in-depth assessment addressing anger management, work and vocational training, criminological risks and needs, and pre-release/re-entry planning needs.[57] A study in 1992 found that inmates often lacked the ability to fully read and understand the types of documents encountered in everyday life, such as job applications, credit applications, and health forms.[58] Because of these deficiencies, the department should also investigate the implementation of an assessment of functional and life skills to identify possible deficiencies and barriers to a successful re-entry into the community.[59] These assessments should go beyond identification of education level to assess personal abilities that will enable the inmate to succeed in the workplace.[60] Once the assessments are completed, a program that prioritizes the inmate's highest needs first should be developed.[61]

Re-entry Statistics

According to the department, of the 35,117 inmates released in FY 2010-11:

- Approximately 66 percent left with TABE scores below the 9th grade level;
- 17,383, or 69.5 percent, of the 25,002 inmates eligible for academic programs did not receive services prior to release; and
- 11,442, or 82.7 percent, of the 13,836 inmates eligible for vocational training did not receive services prior to release.[62]

AMERICAN OVERSIGHT

Recommendations

The Task Force recommends the Department of Corrections expand its vocational education programs. These programs have been proven to reduce recidivism, increase ex-offender employment success, and are cost effective. Additionally, these programs give the department the ability to partner with local businesses for additional job training.

The Task Force recommends the Department of Corrections adopt policies regarding prioritizing the eligibility of educational and vocational programs to inmates whose likelihood of recidivism will be most improved as a result of this instruction. Currently, the department initially assesses an inmate's needs using the Corrections Integrated Needs Assessment System (CINAS).[63] This assessment determines the inmate's risk to recidivate measured on a scale of 1 (least likely) to 5 (most likely).[64] The department uses this as a factor, along with release date, Mandatory Literacy Program eligibility, special education designation, and whether the inmate has a verified high school diploma or GED, to determine the inmate's academic program score.[65] The program score is used in a ranking algorithm[66] that includes the inmate's number of days before release and the inmate's Targeted Academic Services Score (TASS)[67] to rank inmates in order of highest need.[68]

This program focuses its limited space to those inmates with a higher risk of returning to prison and who do not already possess a high school diploma or GED, within the last three years of incarceration.[69] The Task Force recommends that the system take into account which inmates will be able to complete a program, not just those nearing the end of their sentence. It is a better use of resources to ensure space is allocated to those inmates able to complete the program and most likely to find gainful employment after release (i.e. younger inmates with non-violent crimes).

By making a concerted effort to effectively target resources on inmates with the highest-potential of successful completion, the department should be able to reduce recidivism. The assessment tool will be critical in identifying those who will be the most successful at education and vocation programs. The assessment should have vocational and educational components. The department should also develop an assessment tool, similar to those used for the unemployed, that is appropriate for the prison population and can be utilized to determine the type of vocational or educational training most compatible with an individual's interests and capacities.[70] The assessment should also take into account the inmate's readiness for work, along with a review of work history, skills, and educational attainment.[71]

The Task Force recommends considering inmates' educational needs when determining facility placement. A key to reducing recidivism is using the time of incarceration to create positive change by diagnostically identifying the inmate's individual needs, creating an inmate re-entry plan, and providing the services and support for the plan. To ensure the re-entry plan is successful, effort should be made to place and keep inmates in facilities that have programs commensurate with their educational needs. At times, department operations can cause inmates to be transferred before an education or vocation program can be

AMERICAN OVERSIGHT

completed.[72] The Task Force recommends that the department should take steps to avoid transferring inmates who are nearing a program's completion to avoid program disruptions.

Currently, the department places an inmate based on medical and security needs. The inmate will be transferred to a facility that can meet both types of needs at the level identified for that inmate.[73] Inmates are not normally placed in a permanent facility based on education or program needs, but rather are assessed for core programs (academic, vocational or substance abuse) once placed at their first permanent facility.[74] After those needs are established and the inmate reaches the programming time frame (three years prior to release), the inmate will be moved as necessary based on the his or her specific program need and priority ranking for placement.[75] Generally, placements are made at institutions that have available beds.[76]

Educational Program Length Challenges

While studies show that inmates who complete these educational and vocational programs are less likely to recidivate, OPPAGA found that 90 percent of inmates enrolled in ABE do not successfully complete the program, often for reasons within the department's control.[77] OPPAGA[78] found that while participants in GED and vocational programs had high completion rates, inmates in ABE programs either failed to complete program requirements or left the program for administrative reasons (such as being transferred) before completing the program. In a two-year study,[79] OPPAGA found that 79 percent of participating inmates completed GED courses; 73 percent completed vocational courses; and 90 percent of inmates taking the GED exam achieved a passing grade. However, only 10 percent of ABE students completed their courses over the same two-year period. OPPAGA attributed the lower success rate to program length, inmate demographic and behavioral characteristics, and department operations.

Adult Basic Education (ABE) programs often take inmates longer to complete than other programs, such as GED or vocational programs. To complete the ABE program, an inmate must attain a 9th grade level on the TABE, which may require more than two years of instruction. Additionally, ABE programs serve inmates with low educational levels (those with TABE scores below 9th grade), inmates requiring English as a Second Language instruction, and inmates with special education needs. Inmates participating in GED or vocational training can complete these programs in a two-year period. A GED program is completed when the inmate earns a GED Certificate, and most vocational training is completed in 9 to 40 weeks.

Because ABE classes are longer, there is a greater chance for the inmate to drop out, be discharged from the program for poor behavior, or be transferred to another institution. OPPAGA found that inmates who did not complete the ABE program had more disciplinary reports; spent more time in prison; had a higher number of drug offenses; and were more likely to have high custody classifications than inmates who completed the program.[80] Department operations cause some inmates to be removed before the program could be completed. Over 64 percent of the inmates in ABE programs were released from prison before completing the program. This can occur because the department moves inmates to meet a security or institutional need or transfers inmates to another facility for other reasons.

AMERICAN OVERSIGHT

Recommendations

The Task Force recommends the Department of Corrections research implementation of a double-track education system. One track should consist of basic academic, life-skill and vocational education programs designed specifically for inmates incarcerated for less than one year. The program for this track should be designed to be completed in less than nine months. The second track should provide basic academic and vocational programs for inmates incarcerated for more than one year. A two-track system would enable the department to use the entry assessments to identify the most appropriate track for the educational or vocational programs in the inmate's re-entry plan.

In North Carolina, prison's educational offerings are determined by the minimum length of stay in the facility.[81] All facilities offer some type of programming, but a matrix is used to ensure that programs are only provided at facilities where inmates will be able to finish them.[82] In an attempt to accommodate those inmates whose sentences are not long enough to complete the entire GED curriculum during incarceration, the state of Washington offers a fast-tracked GED course offered at some facilities.[83] This program is available to offenders who already have the knowledge to pass a GED test, but may need additional practice preparing to take the test.[84]

The Task Force recommends the Department of Corrections investigate opportunities to introduce online and e-learning educational and vocational training in prisons. Internet access in Florida's prisons would make enormous amounts of educational resources available to corrections staff and inmates.[85] To address funding and capacity constraints that limit access to educational and vocational training, policies should be revised to support development and expansion of Internet-based and electronic platforms for program delivery. Internet-based instruction allows a single instructor to deliver educational content to an unlimited number of incarcerated students across multiple prisons or the prison system as a whole.[86] In addition, Internet-based coursework allows more students to be educated in a reduced space. Computer labs can accommodate terminals that allow students to progress through individualized educational programs at their own pace while sharing a physical space.[87] This is difficult to accommodate in a traditional classroom setting.[88] Finally, the economies of scale of Internet-based instructional methods would reduce the per-student cost of providing educational programs, which would allow the department to make more efficient use of its funding for educational services.[89]

Because many inmates have had limited exposure to technology, using computers, the Internet, and other communication technologies can be a learning experience in itself.[90] Interaction with computers or the Internet can serve as a form of vocational training,[91] as both are an increasingly essential part of today's world. Many security concerns can be addressed with careful planning and regulations governing access and use.[92]

AMERICAN OVERSIGHT

Firewalls and content filters can restrict Internet access, and clear rules and sanctions can deter misuse of technology.[93]

The Task Force recommends the Department of Corrections set up a pilot program to develop widely-acceptable security protocols for Internet access. While security concerns exist with providing inmates with Internet access, new computer and communication technologies have recently been incorporated into correctional education across the nation.[94] The department should investigate multimedia content and interactive learning opportunities delivered via the Internet, closed or restricted computer networks, satellite, closed-circuit TV, CDs or DVDs, videotapes, or videoconferencing[95] for the pilot program.

The Correctional Education Association received grant money to conduct a feasibility study to identify potential technologies that may be appropriate to consider in providing future distance learning services through the nationwide Transforming Lives Network.[96, 97] The feasibility study indicated that security measures exist to prevent security breaches.[98] By establishing a successful pilot program, some of these security concerns can be alleviated by developing acceptable security protocols for Internet access. These protocols would serve as a model for other Florida prisons.

The Task Force recommends converting some of Florida's prisons to institutions that focus on chemical dependency, literacy and basic education, and vocational education. Currently, Florida operates faith and character-based and re-entry institutions. Expanding on that concept, this recommendation will work in conjunction with the recommendation on individualized inmate re-entry plans. An inmate's initial assessments should determine the type of facility best suited to the inmate's needs.

The Task Force recommends aligning the missions of vocational education prisons to meet the needs of the employment market. Employment is highly correlated with successful reintegration into society.[99] It is important that the vocational education programs are demand-driven and focus on jobs available in regional areas. An advisory group should be created for each prison, consisting of representatives of local employers, economic development agencies, workforce investment boards, One-Stops,[100] educational institutions, and targeted community-community based organizations. The group should use its familiarity with the local job market to provide input on correctional programs to ensure that participants obtain skills necessary to find employment when they re-enter the community. By focusing on the needs of employers in the community, prisoners can attain skills for industries in high demand outside the prison. The advisory group should meet every 12 to 18 months to ensure that the vocational course offerings are relevant to the current job market and are up-to-date with advances in technology and methodology.[101]

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Higher Education

RECOMMENDATION SUMMARY

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding higher education by a vote of 10 yeas, 0 nays:

- **Year-Round Operations**
  - Implement a pilot project for year-round school operations in the State University System (SUS).
- **System Efficiency**
  - The Board of Governors (BOG) should create a "University Review Program."
- **Strategies for Degree Production**
  - The Blue Ribbon Task Force should develop strategies to increase degree production.
  - There is a high degree of interest among Florida's policy makers to increase the production of science, technology, engineering, and mathematics (STEM) degrees in the state. The Blue Ribbon Task Force should review methods to increase the production of STEM degree graduates in the SUS, and in doing so, consider the actions of HB 7135 and the creation of a statewide STEM strategic plan.
- **Optimum Facility Utilization**
  - The Blue Ribbon Task Force should review and develop a comprehensive assessment tool to evaluate facility usage, including classroom utilization, to more accurately determine the need for Public Education Capital Outlay program (PECO) funds.
- **Funding**
  - The Blue Ribbon Task Force should investigate innovative strategies of funding for higher education.
  - The Blue Ribbon Task Force should find ways to increase transparency in state funding of higher education.
  - The Blue Ribbon Task Force should study the issue of market rate tuition and provide recommendations to the Governor and Legislature on its implementation.

AMERICAN OVERSIGHT

FULL RECOMMENATION(S) ANALYSIS

I. BACKGROUND AND RECOMMENDATION(S)

A. HIGHER EDUCATION

State University System of Florida

The State University System of Florida (SUS) provides students with undergraduate and graduate level instruction leading to baccalaureate, masters, doctoral and professional degrees.[1] Additionally, SUS institutions conduct research and engage in public service.[2] Currently, state universities have over 324,000 students enrolled; offer nearly 1,800 degree programs at the baccalaureate, graduate, and professional levels; and annually award over 73,000 degrees at all levels.[3]

Governance

The governing body for the SUS is the Board of Governors (BOG).[4] The BOG is the constitutionally created body required to "operate, regulate, control, and be fully responsible for the management of the whole university system."[5]

Locally, each institution is governed by a board of trustees[6] comprised of 13 members.[7] The local boards of trustees are responsible for governing their institutions in accordance with BOG rules and regulations.[8] Each local board's responsibilities include, but are not limited to, strategic planning and adopting policies regarding admissions, educational programming, administration, personnel, contracts, grants, and facilities.[9]

Legislature

The BOG's oversight of the SUS is subject to the Legislature's power to appropriate funds, as well as the Legislature's responsibility to provide for the establishment, maintenance, and operation of institutions of higher learning and other public education programs that the needs of the people may require.[10] The Legislature is also responsible for establishing tuition and fees and establishing policies relating to merit and need-based student financial aid.[11]

Higher Education Coordinating Council

On March 24, 2010, the Chair of the BOG, the Chancellor of the SUS, legislative leaders and the Governor signed a SUS Governance Agreement acknowledging their shared constitutional authority for the state universities. Among the provisions adopted in the agreement was the creation of the Higher Education

AMERICAN OVERSIGHT

Coordinating Council (HECC).[12] The HECC[13] was created by the Legislature in 2010 to identify unmet needs and to facilitate solutions to disputes regarding the creation of new degree programs and the establishment of new institutes, campuses, or centers.[14] The HECC is required to act as an advisory board to the Legislature, the SBE, and the BOG.[15]

On December 31, 2011, the HECC submitted a report of recommendations for legislative consideration during the 2012 Legislative Session.[16] The report's recommendations include:

- SUS institutions should identify their primary areas of research expertise based on the unique strengths and missions of each institution.
- The HECC should receive an annual list of prospective programs being planned by postsecondary education sectors to increase coordination. The offerings will be guided by comparative cost analyses and employment demand.
- The educational sectors should set goals for increased degree completion, with a particular emphasis on STEM degree production. Incentives should be provided to encourage STEM education.
- The Legislature should align financial aid and grant programs to encourage and accelerate access, graduation, and time-to-degree. Grants should be available for summer sessions.
- A new funding formula for the SUS and the Florida College System (FCS) needs to be examined based on performance-based accountability.[17]

Blue Ribbon Task Force

On May 4, 2012, Governor Scott issued an executive order creating the Blue Ribbon Task Force on State Higher Education Reform (BRTF).[18] The vision for the BRTF is to advance the SUS's Constitutional charge to operate, regulate, control, and be fully responsible for the management of the whole university system.[19] BRTF's responsibilities include, but are not limited to:

- Catalog and consolidate the recommendations of the various efforts addressing Florida's higher education system with respect to the SUS;
- Assess strengths and weaknesses of the SUS's governance model related to its Constitutional charge;
- Analyze the ability of state universities to contribute to the SUS 2012-2025 strategic plan;
- Recommend strategies, such as incentive systems and governance improvements, to encourage cooperation between institutions leading to reduced duplication and improved efficiencies;
- Recommend amendments to statutes and BOG regulations necessary to improve accountability and transparency on the part of state universities to the BOG and the BOG to the Legislature and Governor; and

[12] Other components of the SUS Governance Agreement include: master planning and coordination of Florida's higher education systems; strategic planning; university governance; financial aid programs; the Administrative Procedures Act and BOG regulations; tuition; and fees. *See* Ch. 2010-78, L.O.F.
[13] The HECC is comprised of the following members: the Commissioner of Education; the Chancellor of the State University System of Florida; the Chancellor of the FCS; the Executive Director of the Commission for Independent Education; the Executive Director of the Independent Colleges and Universities of Florida; and two members representing the business community, one appointed by the President of the Senate and one appointed by the Speaker of the House of Representatives. *See* s. 1004.015(2), F.S.
[14] Section 1004.015(1), F.S.
[15] HECC goals and guiding principles are provided in s. 1004.015(3), F.S.
[16] Section 1004.015(5), F.S.

AMERICAN OVERSIGHT

- Conduct a review and analysis of efforts to achieve national preeminence and academic and research excellence by Florida universities, including elements that may be considered for future legislation to advance higher education.[20]

B. YEAR-ROUND OPERATIONS

Currently, there is a growing movement for universities to re-evaluate their operations to better serve students while lowering costs by moving to year-round operations. Year-round operation requires universities to conduct regular academic programs over the entire year, without lowering the level of academic offerings and services over the summer.[21] Universities would provide courses and services in quantity and quality comparable to every other term of the year.[22] Through year-round operations, universities can provide a full academic year of instruction to at least one-third more[23] students compared to institutions using traditional calendars of three quarters or two semesters. This provides students with the opportunity to accelerate their studies or vary the season in which they take an annual break.[24] Several states and postsecondary institutions have begun instituting the idea of the year-round operations.

California

In 1999, the state of California looked at implementing a year-round university system as a way to facilitate enrollment growth.[25] A report by the California State Legislative Analyst's Office (LAO) found that year-round operations in higher education could serve one-third more students in existing instructional facilities and save several billions of dollars that would be otherwise spent on additional buildings. The report determined that year-round operations would have no impact on faculty workload, while increasing students' access to high-demand campuses and allowing students to accelerate their timeline to degree completion.[26]

Following the LAO report, a feasibility study[27] by the University of California found that year-round instruction addresses many critical needs, including:

- Responding to concerns about impacts on local communities by shifting some students away from the traditional Fall-Winter-Spring attendance patterns;
- Decreasing some of the impacts of large and rapid enrollment growth on campuses, including crowding that will occur if new construction cannot keep pace with growth; and
- Making better use of existing classroom and class laboratory facilities to avoid capital costs of $200 to $240 million and associated maintenance costs, thereby freeing up funds for construction of other new core academic space that will be needed.[28]

The State of California subsequently provided funding for the University of California and California State University to begin year-round operations in the 2001 summer term.[29] By 2006, the California State LAO

AMERICAN OVERSIGHT

found that summer enrollment had increased for all of the University of California campuses by 103% combined.[30]

Postsecondary Institutions

In January 2012, the president of Purdue University announced that the school would begin a shift towards a year-round, trimester-based calendar.[31] According to the university, offering a third semester will provide students with the opportunity to complete a four-year degree in as little as three-years, saving students time and money.[32] This move is estimated to create $40 million dollars in additional revenue for the university while making better use of classrooms, residence halls and other campus facilities during the summer months.[33] Brigham Young University (BYU)-Idaho offers a three semester or three-track system. Students are on campus for two semesters and, once they have proven they can succeed, they may apply to attend year-round. This has enabled BYU-Idaho to grow from 14,892 students in 1998 to 22,997 in 2009.[34] BYU-Idaho faculty increased to accommodate the increase in students; however the square footage per student decreased, (153 to 126 per student) and the operation cost per student increase was less than 7 percent ($5,771 to $6,155).[35]

University of Florida Innovation Academy

In 2011, the University of Florida was authorized to develop and implement a student enrollment plan for the spring and summer terms to align on-campus student enrollment with the availability of instructional facilities.[36] As a new enrollment model operating on a spring-summer calendar, students in this pilot are limited to on-campus enrollment during these terms.[37] The University of Florida cites this as an effort to increase access to the university and better spread its resources by boosting enrollment in the summer;[38] it is not an actual year-round school model.

Change and Efficiency

There are many benefits identified with moving to a year-round university schedule. With more classes available each year, students would be able to accelerate their graduation timelines.[39] A year-round calendar

AMERICAN OVERSIGHT

would allow students requiring remedial courses to begin college with a lighter course load.[40] Nationally, about 53 percent of entering freshman must take at least one remedial course to prepare for the rigor of college-level work, and many of these students could benefit by having a lighter course load early in their college career.[41] Businesses and communities near the university could benefit by avoiding the traditional summer sales drop-off.[42] The University would benefit by maximizing the number of students served while minimizing the duplication of departmental overhead expenses.[43] The financial efficiency of campus operations would increase by ensuring that upkeep for buildings on campus are being paid for by the students actually using them.[44]

Some issues raised by those opposed to year-round operations relate to building maintenance and energy costs. The California LAO report found the amount of money spent on wear caused by additional students in the summer would be similar to what would have cost for the additional buildings required in the absence of year-round operations.[45] Additionally, they found that campus utility costs would not increase substantially because campuses cool many buildings in the summer, even when they are not being used at or near their full capacities.[46]

Recommendations

The Task Force recommends implementing a pilot project for year-round school operation in the State University System at one of Florida's universities. This pilot program should serve as a model for other SUS institutions and carefully consider the success of existing year-round operation models, such as the California higher education system and BYU-Idaho Campus. These universities, among others, successfully employed unique year-round school models to increase access, optimize degree completion and minimize operating costs.

C. DEGREE PRODUCTION

Florida faces an emerging talent gap, and this crisis in human capital represents a vast and growing unmet need for a highly skilled and educated workforce.[47] A highly skilled and educated workforce is our state's most important resource for driving sustainable economic development and a diversified economy.[48] The Florida Council of 100 found that for Florida to reach the education level of the 10 most productive states within the next 20 years, we will need 4.5 million adults with baccalaureate degrees – 1.3 million more than expected at the current rates.[49] In order to address these issues, Florida must increase degree production to meet the needs of this new global economy.

AMERICAN OVERSIGHT

Degree Completion

Florida's economic future may be dependent on having a highly educated and skilled workforce to remain competitive with other states and nations.[50] Of young adults between the ages of 25 and 34, persons with a college degree, working year-round, earn about 40 percent more than persons with some college education who have not completed a degree, and about two-thirds more than persons with just a high school degree.[51] Additionally, Americans with bachelor's degrees and higher have almost half the unemployment rate as Americans with some college or associate degrees.[52] Only 26.6 percent of adults (between the ages of 25 and 64) in Florida have a baccalaureate degree or higher, compared to the U.S. average of 29.8 percent.[53]

When a student enrolls in college but does not complete a degree, the State of Florida receives little return on its investment in the student's education. The cost of first-year dropouts from 2003-2008 to the state of Florida was $274,900,000 in state expenditures and another $18,400,000 was lost in federal student grants.[54] The costs to the individual and to the state are also felt in the form of lost wages and tax revenue. Florida college students who started college in fall 2002 but did not graduate in 6 years lost a potential one-year total of $132 million in income and lost a potential of $5.6 billion in income over the course of their lifetimes.[55] For those same students, the federal government has lost a potential one-year total of $19 million in tax revenue and a potential $1.1 billion in tax revenue over the course of their lifetimes.[56]

Three-year Degree

With the economic downturn, more pressure has been placed on the higher education system to reduce the cost of obtaining a degree. Although not a new idea, the three-year degree has recently become more popular. According to Lamar Alexander, "the three-year degree could become the higher-education equivalent of the fuel-efficient car."[57] Eliminating an extra year of school can save students 25 percent in non-tuition costs.[58] Students must still earn the same number of credits required for a bachelor's degree, but the programs typically cost less because they eliminate an extra year of room-and-board and other non-tuition costs.[59]

Building on former Governor Ted Strickland's dual enrollment initiative for high school seniors,[60] current Ohio Governor John Kasich has ordered Ohio state universities "to investigate ways for students to get a bachelor's

AMERICAN OVERSIGHT

degree in three years."[61] In 2009, the Rhode Island Legislature passed "The Rhode Island Bachelor's Degree in Three Program Act,"[62] which enabled students in Rhode Island to apply advanced placement (AP), dual enrollment and other credit-bearing courses taken in high school to their college program. [63] Ideally, this program will reduce a year of their college education.[64]

Several U.S. colleges and universities currently offer three-year degree programs. The University of North Carolina Greensboro launched "UNCG in 3" in the fall of 2010.[65] This program is open to students in 17 departments and requires that students enter the program with 12 hours of college credit gained in high school.[66] Florida State University has offered a three-year program since 2000.[67] From 2007 to 2009, the enrollment in this program rose 73%, from 71 students to 123 students.[68]

Adult Completer Programs

Currently, there are an estimated two million[69] Floridians who have not finished college and do not have the skills needed for high-wage, high-skill jobs that our economy requires.[70] This year the Legislature established a Degree Completion Pilot Program[71] for the purpose of recruiting, recovering, and retaining the state's adult learners and assisting them in completing an associate or baccalaureate degree aligned to high-wage, high-skilled workforce needs.[72] Recently, other states have implemented similar programs.

Texas has the GradTX[73] program, which is a statewide initiative targeting adult learners who have earned at least 90 semester credit hours of college work, but never completed their program and encourages them to return to college to earn their bachelors degree.[74] Oklahoma's Reach Higher program is designed for working adults who have earned some college credit[75] by offering flexible class schedules that enable students to keep full-time jobs while earning their college education.[76] The program offers limited[77] degree options and classes are available in an online format in eight-week durations.[78]

AMERICAN OVERSIGHT

Project Win-Win is a collaborative effort between the Institute for Higher Education Policy and the State Higher Education Executive Officer, and funded principally by Lumina Foundation for Education.[79] The program partners with colleges and four-year institutions authorized to award associate's degrees to identify former students, no longer enrolled anywhere and never awarded any degree, whose record qualifies them for an associate's degree, and award those degrees retroactively.[80] Simultaneously, these institutions identify former students who are "academically short" of an associate's degree by no more than nine to 12 credits, find them, and seek to bring them back to complete the degree.[81] Currently Broward College, Indian River State College, and St. Johns River State College will be serving as pilot colleges for Florida.[82]

Excess Credits and Incentives

It is important for Florida that students graduate on time and without excess credits. A 2006 OPPAGA study found that excess credit hours cost the state $62 million in Fiscal Year 2004-05.[83] Currently, the state charges a surcharge for students who graduate with excess credit hours. Florida requires a surcharge of 100 percent of tuition for each credit hour in excess of 110[84] percent of the number of credit hours required for completion of the students' registered degree program.[85]

Other states offer tuition incentives in the form of credits or discounts if students commit to meeting certain goals, such as graduating on time or early.[86] Other states like Texas offer $1,000 in a tuition rebate for students who complete a bachelor's degree efficiently, taking as few courses outside their degree plan as possible.[87] To receive the rebate a student enrolled after high school graduation at a college or university for the first time in fall of 1997 or later must graduate with no more than three semester credit hours in excess of the minimum number of credit hours required to degree.[88] Students enrolled after high school graduation at a college or university for the first time in fall 2005 or later must also graduate in a timely manner[89] to earn the rebate.[90]

Recommendations

The Task Force recommends the Blue Ribbon Task Force develop strategies to increase degree production. Example strategies may include incentives for timely and expedited completion of bachelor degrees, creating more three-year degree programs, and developing a statewide degree completer program.

AMERICAN OVERSIGHT

The Task Force recommends that the BRTF study the Project Win-Win program and its results at participating Florida colleges to determine if this program (or similar program) could be applied to SUS institutions. The BRTF should investigate initiatives in other states to see the value to Florida of an adult completer program that requires state funding. The Task Force recommends the BRTF research the effectiveness of programs aimed at student retention in higher education.

D. SYSTEM EFFICIENCY

Sharpening the Pencil Act

Building on the Best Financial Management Practice (BFMP) Reviews,[91] the Legislature passed the "Sharpening the Pencil Act" in 2001 to assist school districts in identifying and realizing cost savings through implementation of best financial management practices.[92] These reviews were intended to improve the use of resources, identify cost savings, and improve the districts' performance accountability systems.[93] To achieve these goals, the Commissioner of Education was required to develop best practices in several areas, including efficient delivery of educational services, facilities construction and maintenance, performance accountability, and cost control systems.[94]

The scope of the reviews focused on the best practices adopted by the Commissioner; however, OPPAGA could include additional items after seeking input from the district and the Department of Education.[95] The reviews culminated in a final report containing an action plan for addressing financial management. The total savings realized by Florida school districts from the BFMP and Sharpening the Pencil reviews,[96] over a five year period, was $933,209,474.00.[97]

University Audits

Currently, the Auditor General is required to conduct annual financial audits[98] of all state universities and colleges, and at least every three years, conduct operational audits[99] of the accounts of state universities and colleges.[100] Audits are made to determine whether financial resources are properly accounted for; whether public officials comply with applicable laws, rules, regulations and other legal requirements; whether proper and effective internal controls are in place over entity operations; and whether assets are properly safeguarded.[101]

---

[91] BFMP reviews were an assessment system based on a comprehensive set of best practices to improve school districts' management and use of resources. The best practices covered a broad range of school district educational and program services. *See* s. 11.515, F.S., repealed in 2001 (*see also* Ch. 2001-86, L.O.F). These reviews were in-depth projects that involved reviewing district operations at the individual program level. *See* The Florida House of Representatives, Bill Analysis, CS/CS/HB 0269, Committee on General Education, June 1, 2001, p. 10 (copy on file with Government Efficiency Task Force staff).

AMERICAN OVERSIGHT

Recommendations

The Task Force recommends the Board of Governors (BOG) create a University Review Program. This program should be similar to the K-12 system's BFMP reviews and the "Sharpening the Pencil" Act. The university reviews should identify ways each university can achieve savings; improve management; and increase efficiency and effectiveness. The BOG should compile a list of best practices, including innovative strategies successfully implemented at individual universities. While the Task Force recognizes the Auditor General's Office conducts financial and operational audits to promote government accountability and stewardship and improve government operations, the objectives[102] of these audits are broader than the purpose of the recommended "University Review Program." The "University Review Program's" main focus should be on cost saving strategies and efficiencies.

E. SCIENCE, TECHNOLOGY, ENGINEERING AND MATHEMATICS (STEM) DEGREES

STEM Degrees

Research conducted by the Center on Education and the Workforce at Georgetown University found the risk of unemployment among recent graduates, along with the amount of money a graduate makes, depends on their major.[103] Median earnings among recent college graduates is $36,000 higher for a Computer Engineering major than a Physiology major.[104] This is just one indicator of the importance of STEM degrees in today's economy.

A major factor in Florida's future economic growth will be the ability of the state university and state college systems to promote economic growth and meet the needs of the state's businesses. In order to do this, Florida's universities must produce more graduates in STEM fields, increase their STEM research productivity that can be commercialized and expanded into new economic opportunities, and build strong relationships with the business community to expand services such as business incubators that will promote targeted economic growth.[105] Governor Scott recognized the importance of STEM initiatives and included it as one of his seven key steps in the Governor's 2012 Job Creation and Economic Growth Agenda.[106]

Florida is a leader in multiple high-tech sectors, ranking among the top four in space and defense systems manufacturing, photonics manufacturing, internet and telecommunications services, engineering services, and computer training.[107] Overall, Florida ranks fifth in the nation for employing high-tech workers.[108] Although the research has not effectively addressed the human and financial capital necessary to generate a sufficient STEM talent pool, the current economic landscape demands that targeted investments be made, not in spite of the economic downturn, but rather because of it.[109] The leading companies and clusters that will emerge over the next 20 years will locate themselves in states where they have access to a top-quality workforce.[110]

AMERICAN OVERSIGHT

The Florida Council of 100 found that within five years, Florida will need at least 100,000 more science and technology professionals than we are currently on track to produce.[111] By 2018, Florida's economy will demand a total of 385,010 STEM jobs, up from 322,560 in 2008.[112] Of those jobs, 58 percent will require a bachelor's degree or higher and a total of 89 percent will require some postsecondary education and training.[113] Currently,[114] less than 20 percent of bachelor's degrees awarded through the SUS[115] were in STEM fields.[116]

Florida's STEM Strategic Plan Efforts

In 2007, the Legislature created the Florida Center for Research in Science, Technology, Engineering and Mathematics (FCR-STEM).[117] FCR-STEM is housed at Florida State University's Learning System's Institute.[118] FCR-STEM's mission is to help the State of Florida improve teaching and learning in K-12 science, technology, engineering and math and prepare students for higher education and STEM careers in the 21st century.[119] A National Governor's Association (NGA) response to an FCR-STEM grant proposal, noted:

> Florida's gap analysis completed for NGA's grant application indicates that the state has many STEM partners, programs, and activities, but they are not well connected, aligned, or working cooperatively to achieve the common goal of improving student achievement in STEM areas. Additionally, despite these multiple STEM programs in public schools, colleges, universities, Space Florida, and STEM-related business and industry, student achievement in STEM content areas and programs is not where it needs to be for students' future success in these areas. Secondary students lack essential competencies to succeed in postsecondary STEM education and 21st Century STEM careers. As a result, employers are looking outside of Florida and the nation to fill high skill STEM positions.[120]

As a result of the NGA's findings, FRC-STEM, in partnership with the Florida Chamber of Commerce (Florida Chamber Foundation), established a task force to develop a cohesive state plan to engage the educational and workforce entities essential to create a sustained and high-skilled workforce and a more viable state economy.[121] In 2009, Workforce Florida, Inc., announced a request for proposal (RFP) to provide funding in support of efforts to improve STEM outcomes in Florida.[122] In order to avoid duplication of efforts and increase

AMERICAN OVERSIGHT

the likelihood of developing a STEM Plan that would have a state-wide impact, leaders of the FCR-STEM task force decided to collaborate with the Consortium of Florida's Education Foundation and others in responding to the RFP.[123] STEM*florida* initiative was selected[124] and the eventual result was the Florida STEM Strategic Plan issued in December 2011.[125]

The STEM Strategic Task Force was composed of over 70 members of the business, industry, education, policy and philanthropic communities, who relied on state of the state reports, literature reviews, roundtable discussions, and earlier initiatives to gain a clear picture of both the current and necessary STEM performance in Florida and business-recommended and evidence-based strategies for overcoming that gap.[126] The plan focuses on three main areas: students, educators, and sustainable infrastructure.[127] For students, the goal is to increase the percentage of students successful at each level to ensure our diverse population is:

- Capable of conducting real-world STEM projects and inquiry;
- Capable of authentic and collaborative problem solving;
- Proficient in applying multidisciplinary knowledge and skills through STEM;
- Proficient in English and other languages in order to succeed on a global scale; and
- Knowledgeable about and interested in STEM careers.[128]

For educators, the goal is to increase the quality of STEM educators.[129] Lastly, for a sustainable infrastructure, the goal is to create a statewide sustainable STEM leadership organization to align existing and emerging STEM initiatives and represent Florida as one voice in meeting STEM demands.[130]

The Legislature, noticing the lack of a statewide strategic STEM plan, passed HB 7135 in 2012.[131] HB 7135 requires the SBE, in consultation with the BOG and the Department of Economic Opportunity, to adopt a unified plan to improve K-20 STEM education and prepare students for high-skill, high-wage, and high-demand employment in STEM and STEM-related fields.[132]

Economic Security Report (HB 7135 – Post Secondary Education)[133]

Passed during the 2012 Regular Session, HB 7135 requires the Department of Economic Opportunity (DEO) to prepare, or contract with an entity to prepare, an annual *Economic Security Report* of employment and earning outcomes report using Florida Education and Training Placement Information Program (FETPIP) data, FCS data, SUS data, and the Integrated Postsecondary Education Data System (IPEDS). The report will include information on graduates, degrees, education delivery system, public assistance, student loan debt, employment, income, continuing education, and graduate degrees for all students who earn a degree in the SUS, the FCS, and those who hold industry certifications.

Beginning in the 2014-15 academic year and each year thereafter, SUS institutions and FCS institutions will be required to provide students with the DEO report by the time of course registration. Each state university is also required to provide students with information detailing the top 25 percent and lowest 10 percent of degrees in regard to earnings.

AMERICAN OVERSIGHT

State University Accountability and Strategic Plan (HB 7135 – Post Secondary Education)[134]

The State University System Strategic Plan 2005-2013 outlined seven accountability measures for the SUS: graduation rates, degree production, meeting statewide and professional workforce needs, enrolling underserved populations, licensure passage, academic learning compacts, and building world-class nationally recognized programs.[135] HB 7135 expands the specific performance metrics and standards used to monitor the performance at the system level in each of the major areas of instruction, research, and public service, while recognizing the differing mission of each of the state universities. Metrics are to be included in the SUS strategic plan, and university and system progress will be reported annually in the accountability plans. The bill does not delineate the specific performance metrics and standards common to all institutions or metrics and standards unique to institutions depending on institutional core missions, but specifies certain metrics and standards, including: admission requirements, graduation, retention, employment, continuing education, licensure passage, excess hours, student loan burden and default rates, and well-known, highly-respected national rankings for institutional and program achievements.

The university system accountability process requires each board of trustees to submit to the BOG a university annual report that describes progress regarding articulated goals and summarizes other key data, including the above-mentioned performance metrics, with accompanying narrative to highlight or explain information. The plan must include student enrollment and performance data by method of instruction including traditional, online, and distance learning. The BOG must submit an annual report to the Governor, the President of the Senate, and the Speaker of the House of Representatives. This accountability process provides for the systematic, ongoing evaluation of quality and effectiveness of state universities by the BOG. The strategic plan must also consider reports and recommendations of the HECC and the Articulation Coordinating Committee .

Recommendations

The Task Force is aware of the high degree of interest among policy makers in increasing the production of science, technology, engineering, and mathematics (STEM) degrees in the State of Florida and concurs with that as a stated and laudable goal of the Blue Ribbon Task Force (BRTF). The Task Force recommends the BRTF review methods to increase the production of STEM degree graduates in the SUS, and in doing so, consider the actions of HB 7135 (Chapter 2012-195, L.O.F.) and the creation of a statewide STEM strategic plan. Graduates with STEM degrees have high employment rates and are drivers of economic progress for the State of Florida. Efforts, like those in HB 7135, should be encouraged and expanded. The BRTF should look at the strategic plan developed by FCR-STEM, but also examine initiatives other states have undertaken related to statewide STEM planning. The BRTF should make sure to investigate Florida's economy and identify STEM fields that are most important to expanding our economy and include in the plan.

The plan should establish metrics that enable all those involved with higher education to understand the economic impact of particular degree programs at each SUS institution. Beyond the requirements of HB 7135's Economic Security Report, this should involve a cost-per-degree assessment to provide students with the economic value based on a degree holders' median earnings. Multiple performance measures should be developed to provide the absolute and relative economic value of degree programs, and provide transparency to those involved the process so resource and allocation decisions can be based on a higher return on investment to the state and its citizens.

AMERICAN OVERSIGHT

The plan must take into account, coordinate, and streamline all STEM initiatives taking place throughout the K-20 system. STEM initiatives taking place at all higher education institutions must factor into the development of the State University Accountability and Strategic Plan,[136] including adding a metric for number of STEM degrees produced by each state university and college.

F. FACILITY UTILIZATION

Public Education Capital Outlay

The Public Education Capital Outlay program (PECO) is Florida's primary source of facility funding for the SUS, which utilizes the funds for new teaching and research facilities and to keep existing buildings functional with deferred maintenance spending.[137] PECO was established in 1963 by constitutional amendment to fund public higher education construction and maintenance projects.[138] PECO works to fund Florida's long-term need for education facilities with a portion of the gross receipts tax on utilities, including electricity, telecommunications and cable.[139] The GRT is utilized to borrow money at very low interest rates by issuing tax-exempt PECO bond offerings.[140] Currently, PECO bonds[141] account for nearly 40 percent of the state's debt.[142]

Within the SUS, fixed capital outlay expenditures are based on 3-year[143] and 5-year[144] plans provided by the institutions.[145] The plans are submitted to the BOG, which approves a 3-year PECO list.[146] The list is then sent to the Legislature, which determines the projects to receive PECO funding. Additionally, SUS institutions have a supplementary revenue source for capital improvements in the Capital Improvement Trust Fund Fee (CITF) and the building fee.[147]

Postsecondary institutions rely heavily on PECO funds to pay for fixed capital outlay projects.[148] In January 2012, the Revenue Estimating Conference reduced the PECO funding amount to zero for the next two years[149,150] It is critical SUS institutions utilize existing facilities as efficiently as possible, because increasing

[147] Section 1009.24(8), F.S., establishes the Capital Improvement Trust Fund Fee (CITF) and the building fee. Prior to this legislative session, the CITF was capped at $2.44 per credit hour and the building fee was capped at $2.32 per credit hour. HB 5201 (*see* Ch. 2012-134, L.O.F) allows universities to increase the CITF up to 10 percent of tuition or the sum of tuition and out-of-state fees as approved by a fee committee and the board of trustees. The fee may increase no more than $2 per credit hour over the prior year for resident students.

AMERICAN OVERSIGHT

building utilization can delay the need for new classrooms.[151] The BOG has identified the importance of utilization in these tough economic times. For the 2013-14 Fixed Capital Outlay Budget Request, the BOG required SUS universities to consider utilization in the prioritization of their projects.[152]

Utilization

Florida law requires classrooms to be used at least 40 hours per week and that 60% of student stations be occupied.[153] The statutory language for higher education presumes a 40-hour work week, based primarily on faculty schedules of the past, and the standard 40-hour work week.[154] With the addition of distance learning, expansion of adjunct faculty, and other non-traditional approaches that blend classroom and non-classroom instruction, the 40-hour paradigm may no longer be the most appropriate bench mark.[155]

A 2006 OPPAGA report found classrooms at some state universities and colleges were underutilized.[156] As a result of this report, the BOG established a facilities task force in May 2006, which made recommendations for updating the formulas used in the planning process to determine need for additional classrooms and other types of instructional and non-instructional space. Currently, the BOG has not acted on the recommendations to update to the formula.[157] In a 2009 follow-up report, OPPAGA found that higher education classroom utilization remains low during some time periods despite the efforts of some postsecondary institutions.[158] OPPAGA noted that more state-level action is needed to improve classroom utilization and the facilities planning process.[159,160] This year the BOG has established another Facilities Task Force, which is required to produce final recommendations by November 7, 2012.[161] The Facilities Task Force's focus will be on studying ways to address the "facilities funding crisis."[162]

Recommendations

The Task Force recommends the Blue Ribbon Task Force review and develop a comprehensive assessment tool to evaluate facility usage, including classroom utilization, to more accurately determine the need for PECO funds. The BOG should make recommendations to the BRTF for consideration regarding maximization of facility usage and optimum facility utilization. Other recommendations

AMERICAN OVERSIGHT

should focus on ways to improve utilization data to ensure postsecondary institutions are meeting their potential for enrollment and whether steps are necessary to address underutilization at these sites.[163]

G. UNIVERSITY FUNDING

State universities receive funding from state appropriations, student tuition and fees, private sources, and federal programs.[164] This year's budget provided about $3.5 billion to the SUS.[165] According to the BOG, the SUS's overall budget was in excess of $9.7 billion last year.[166]

Performance-based Funding

Performance-based funding (or outcomes-based funding) is a postsecondary finance strategy that links state funding for public colleges and universities with institutional performance.[167] Unlike traditional funding, which has been based on linking appropriations to enrollment growth, performance-based funding links state appropriations to outcomes that align with the state's goals and priorities.[168] Performance-based funding has been promoted as a policy option for improving campus productivity and boosting college completion by the Lumina Foundation, Bill and Melinda Gates Foundation, College Board, National Conference of State Legislatures, National Governors Association, and Education Commission of the States.[169] The main components for performance-based funding are goals, measurements and incentives.[170] In order to be successful, these three components must be aligned and complementary with each other.[171]

There are three main delivery models that link state funding and campus outcomes: output-based funding, performance contracts, and performance set-asides.[172] Output-based systems are funding formulas linking state funding and outputs.[173] Performance contracts are negotiated agreements between states and institutions to achieve results.[174] Finally, performance set-asides are a separate portion of state funding designed to improve university performance, which may be a bonus fund or a separate portion of a regular state appropriation.[175]

AMERICAN OVERSIGHT

There are many advantages to performance-based funding. It can lead to greater awareness of performance on college campuses, while improving the delineation of state and institutional priorities.[176] Performance-based funding can also enhance transparency and accountability and increase productivity.[177]

Other States Using Performance-based Funding

Tennessee

Tennessee, which first implemented performance-based funding in 1979, passed legislation in 2010[178] to restructure the state's higher education funding model.[179] They have changed their primarily enrollment-driven higher education finance system to an output-based approach[180] that will eventually tie 100 percent of state funding for two and four-year colleges and universities to a new set of outcome-based metrics.[181] Currently, Tennessee is the only state utilizing outcomes and an institution-specific weighting structure to completely replace the enrollment-based funding model in higher education finance policy.[182]

The Tennessee model weights outcomes for each institution separately,[183] which allows the model to be tailored to an institution's specific mission.[184] Each institution's formula calculation is independent of other institutions and there are no state-imposed targets or pre-determined goals.[185] The allocation of available state appropriations is competitive and the distribution follows a pro-rata share of each institution's formula calculation.[186] For instance, if the state funds 50 percent of the overall higher education request, then each institution will receive 50 percent of its outcomes formula request.[187] Every year the funding allocation for higher education is available again; no institutions are entitled to appropriations based on prior-year funding.[188]

The Tennessee Higher Education Commission cited several advantages of the outcome-based model, including:

- Multiple measures of productivity, previously unaccounted for, will now be credited to the institution.
- The formula is not prescriptive in how to achieve success and excellence.
- The model does not penalize failure to achieve pre-determined goals.
- The model emphasizes unique institutional mission.
- The model is more flexible and can accommodate future shifts in mission or desired outcomes.
- The model is more transparent and simpler for state government.

AMERICAN OVERSIGHT

- The model is directly linked to the educational attainment goals of Tennessee's Public Agenda for higher education.[189]
- The model establishes a framework for government to have an ongoing policy of discussion with higher education.
- The model is adjustable to account for new outcomes or a different policy focus by changing the weights.[190]

This model allows state government to be clear in its expectations for higher education, while institutions are given wide latitude in organizational, budgetary, programmatic and academic matters.[191] The state provides incentives for achievement, but is not interfering with instructional judgments about how to achieve these goals.[192]

Pennsylvania

The Pennsylvania State System of Higher Education (PASSHE) has been cited by the Lumina Foundation for Education as a national leader in performance-based funding. In 2000, PASSHE implemented performance funding, allocating a portion of its funds each year to reward those institutions that demonstrate improvements in key areas including student achievement.[193] Since implementing performance-based funding, PASSHE has experienced significant changes in its campuses' attitudes toward performance, with gains cited in student retention and graduation rates, campus diversity, program quality and faculty productivity.[194] The average number of credits at graduation has decreased, while retention and graduation rates have increased.[195]

In 2011, PASSHE approved a new performance-based funding system that will replace the system old system that had been in place since 2000.[196] Pennsylvania's goals for their new system are to emphasize results instead of inputs; be aligned with PASSHE's strategic goals and national accountability efforts; create a funding system that will reduce competition among universities; and allow for institution-specific measures.[197] The new system is based on the core values of student success, access, and institutional stewardship of resources.[198] Each PASSHE university is measured on 10 performance indicators, five of which will be the same for all institutions and five of which will be selected by the individual universities based on their strategic goals.[199] All indicators will measure the universities' progress toward institution-specific goals and against external comparisons or expectations.[200] The new model changes how money is

[189] The Tennessee Public Agenda for higher education establishes the direct link between the state's economic development and its educational system. The overarching goal is to have Tennessee meet the projected national average in educational attainment by 2025. *See* http://tn.gov/thec/complete_college_tn/ccta_summary.html (last visited 5/21/2012).

AMERICAN OVERSIGHT

appropriated. Under this model, the performance funding pool will be set at 2.4 percent of PASSHE's total Educational and General Appropriation, resulting in approximately the same funding level but ensuring greater productivity for universities.[201]

Texas

In 2011 the Texas legislature passed the "Higher Education Outcomes-Based Funding Act,"[202] which required the Texas Higher Education Coordinating Board to include in its biennial funding proposal to the Legislature a portion of funding (no more than 10 percent of the total appropriations for higher education) to reward institutions for achieving student success outcomes, such as increased graduation rates.[203] In April 2012, the Texas Higher Education Coordinating Board approved recommendations for outcomes-based funding. For two-year colleges, 10 percent of funding would use the outcomes-based methodology beginning in 2014-15.[204] These institutions would earn momentum points for the number of students annually completing certain metrics and the funding would be allocated to an institution in proportion to its share of the total momentum points earned statewide.[205]

For universities, the proposal would institute an outcomes-based allocation model to be funded outside the instruction and operations formula with 10 percent of funding that would have been allocated to undergraduate weighted credit hours.[206] The university model allocates funds based on a three-year rolling average of institutions' performance on certain metrics, which are all weighted the same[207] and based only on undergraduates.[208] The board noted that because the state's public health-related institutions have high graduation rates and do not face the same challenges with increasing student degree attainment as Texas' public universities and two-year colleges, they were not recommended for outcomes-based funding.[209]

Florida Performance-based Funding Initiatives

Colleges

The FCS first implemented performance-based funding in FY 1996-97, when the Legislature provided a specific appropriation for performance incentives.[210] The most recent year the Legislature appropriated funding for performance incentives was FY 2008-09.[211] Performance-based funding was distributed on a formula approved by the Council of Presidents and recommended to the Legislature. The formula recognized performance in efficiency (time to degree), program completions, degrees and certificates awarded, job placements, and meeting critical employment needs.[212]

AMERICAN OVERSIGHT

Performance funding was applied to as much as six percent of total college funding.[213] Florida did realize some success from the performance-based funding system. Over a six-year period, remedial students passing the highest remedial course within two years increased by 7.6 percent for reading, 4.3 percent by math, and 4.6 percent for writing.[214]

SUS Performance Based Funding (HB 7135 – Post Secondary Education)

For Fiscal Year 2012-13, the Legislature allocated $15 million[215] for performance funding for state universities.[216] HB 7135 outlines the formula by which the BOG must review and rank each state university that applies for performance funding:

- Twenty-five percent of a state university's score must be based on the percentage of employed graduates who have earned degrees in computer and information science, computer engineering, information system technology, and management information systems.
- Twenty-five percent of a state university's score must be based on the percentage of graduates who earned baccalaureate degrees in the concentrations above and who earn industry certifications in a related field from a FCS institution or state university before beginning a baccalaureate degree program.
- Fifty percent of a state university's score must be based on factors determined by the BOG that relate to increasing the probability that graduates who have earned degrees in computer and information science, computer engineering, information systems technology, and management information systems will be employed in high-skill, high-wage, and high-demand jobs.

The BOG must award up to $15 million to the highest-ranked state universities from funds appropriated for this purpose. The minimum amount awarded to a state university must be at least 25 percent of the total amount appropriated.

Colorado's Higher Education Voucher System

In May 2004, Colorado implemented the first, and to date only, voucher-based financing system for higher education statewide.[217] Colorado no longer appropriates money to institutions for undergrad education, but provides direct funding to in-state undergraduate students through the "College Opportunity Fund" (COF).[218] Students apply for and authorize the use of the voucher, which is applied to the student's university bill.[219] Unlike most funding systems where taxpayer money that a university receives for each student is not transparent, this plan shows the state's contribution on the tuition bill.[220] The state directs university expenses through fee-for-service contracts and conditional funding based on performance measures.[221] The fee-for-service contracts are negotiated between the institution and the state Department of Higher Education to fund several specific state needs, such as graduate education,

[221] *Id.*

AMERICAN OVERSIGHT

specialized education services, and professional degrees.[222] Performance contracts are negotiated and established for accountability purposes.[223] With guaranteed funding, the state has created incentives for universities to keep operating costs and sticker prices low, in order to attract a larger pool of applicants.[224]

Recommendations

The Task Force recommends the Blue Ribbon Task Force investigate innovative strategies of funding for higher education. This should include a review of other successful funding mechanisms for higher education being employed by other states, including Tennessee, Pennsylvania, Texas and Colorado.

Transparency in Higher Education Funding

Transparency in government is not a new issue, nor is transparency in higher education funding. Several states have recognized the worthiness of making higher education funding more transparent. Effective May 2009, Utah State agencies, including higher education institutions, were required to provide financial data (including transactional data) to the Utah State Division of Finance website for transparency.[225] Similarly, the Virginia's State Legislature added language to its 2011 appropriations bill to require the Governor's Commission on Higher Education Reform, Innovation, and Investment to review a proposal to no longer permit the transfer of general fund appropriations to non-general funds for institutions of higher education.[226] Implementation of this proposal would improve transparency in the accounting system for higher education by separately accounting for expenditures in educational and general funds that are paid with tax dollars (general funds) and non-general funds (tuition).[227]

Recommendations

The Task Force recommends the Blue Ribbon Task Force find ways to increase transparency in state funding of higher education. The BRTF should review how other states, like Utah and Virginia, are increasing transparency in their higher education funding and analyze the potential use for Florida. Increasing transparency will enable the higher education system to align with Florida's other state transparency initiatives.

Market Rate Tuition (HB 7129 – State University of Academic and Research Excellence and National Preeminence)

Passed by the Legislature during the 2012 Regular Session, HB 7129 would have exempted state research universities of national preeminence, defined as those meeting 11 of 14 specified criteria, from statutory limits on the amount of tuition and fees that could be charged to undergraduate students and would have authorized the universities to establish undergraduate and graduate tuition at differentiated and market rates. During 2011-12, the tuition and fee average for Florida's public universities was $5,626 per year, making Florida 45th in

AMERICAN OVERSIGHT

the nation for average tuition cost.[228] The national average for the same period of time was $8,244.[229] At this time only the University of Florida and Florida State University meet 11 of the 14 preeminence measures.[230]

Veto

On April 27, 2012, the Governor vetoed HB 7129 citing concerns about the increased debt burden on students and a lack of evidence that the increased tuition would provide additional return on investment for students.[231] The Governor stated that in order to move the SUS toward excellence for the good of Florida, the university system will need to develop a statewide plan and distinctive mission tied to degree production, geographic location, and excellence for each university, and conduct an operational review of each university to identify potential cost savings and efficiencies.

Recommendations

The Task Force recommends the Blue Ribbon Task Force study the issue of market rate tuition and provide recommendations to the Governor and Legislature on its implementation. The study should include whether sufficient evidence exists for increasing tuition at certain universities above the current 15 percent cap. The study should analyze the possible effect on the return on investment for students and the SUS as a whole. If the BRTF recommends market rate tuition, it should identify a plan to ensure flat rate tuition for First-Time-In-College (FTIC) students for their first four years and upper level transfer students for two years.

AMERICAN OVERSIGHT

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: University Procurement

RECOMMENDATION SUMMARY

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding university procurement by a vote of 10 yeas, 0 nays:

- **State University Procurement**
  - The State University System adopt an electronic procurement platform(s) that offers functionality similar to the systems at the Florida State University and the University of Florida.
- **Collaboration with the Department of Management Services**
  - The Board of Governors, state universities, and the Department of Management services continue coordinating their efforts in the area of procurement in order to better manage tracking of spend, contracting, strategic sourcing, and best procurement practices.
  - The Department of Management Services and the State University System identify and jointly strategically source common goods and services in order to achieve maximum savings to both parties.
  - State universities utilize state term contracts to achieve savings.
- **Florida Polytechnic**
  - The Board of Governors leverage the creation of Florida Polytechnic to pursue opportunities to implement shared services models across multiple institutions.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. BACKGROUND AND RECOMMENDATION(S)

A. STATE UNIVERSITY SYSTEM

Governance

The governing body for the State University System (SUS) is the Board of Governors (BOG).[1] The BOG is made up of 17 members, including the Commissioner of Education, the chair of the Advisory Council of Faculty Senates, the Florida Student Association president, and 14 citizen-appointments made by the Governor and confirmed by the Florida Senate.[2] The BOG is the constitutionally created body required to "operate, regulate, control, and be fully responsible for the management of the whole university system."[3]

Locally, each institution is governed by a board of trustees[4] comprised of 13 members (the chair of the faculty senate, the president of the institution's student body, six members appointed by the Governor and confirmed by the Florida Senate, and five members appointed by the BOG and confirmed by the Florida Senate).[5] The local boards of trustees are responsible for governing their institutions in accordance with BOG rules and regulations.[6]

Each university is charged with managing its own procurement and purchasing services. Pursuant to BOG regulations, "each university Board of Trustees shall adopt regulations establishing basic criteria related to procurement, including procedures and practices to be used in acquiring commodities and contractual services".[7]

B. UNIVERSITY PROCUREMENT

Inter-institutional Committee on Purchasing

The Inter-institutional Committee on Purchasing (ICOP) is an association comprised of SUS institutions' purchasing directors. ICOP goals include increasing coordination of purchasing operations, reducing operating costs, increasing efficiencies, and leveraging quantities of scale to maximize volume discount opportunities for the purchase of shared goods and services. ICOP develops policies and guidelines for establishing system-wide contracts and cooperative agreements for use by universities. The ICOP listserv is utilized to share information on advantageous contract pricing through other purchasing groups and consortia.

Procurement Regulation

SUS institutions must adhere to the following regulations when purchasing goods and services:

- Chapter 18 of the Board of Governors Regulations provides regulations for purchasing, including competitive solicitation, notice and protest procedures, and solicitation bonding requirements.[8] University Boards of Trustees are permitted to establish a competitive solicitation threshold up to $75,000.[9]

[5] Section 1001.71(1), F.S.
[6] Art. IX, s. 7(c), Fla. Const.; *see also* Florida Board of Governors Regulation 1.001 (Feb. 16, 2012).
[7] Florida Board of Governors Regulation 18.001(1).
[8] Florida Board of Governors Regulation Chapter 18.
[9] Florida Board of Governors Regulation 18.001(2).

AMERICAN OVERSIGHT

- Due to federal procurement requirements, BOG procurement regulations continue to be aligned with the procurement provisions in ch. 287, F.S.
- Universities are subject to annual operational audits by federal, state, and internal auditors.
- Universities are required to complete federally-mandated education and training in procurement best practices.

The Florida State University and University of Florida Strategic Sourcing and E-Procurement Initiative

Although the use of strategic sourcing best practices is common throughout the SUS, the Florida State University (FSU) and the University of Florida (UF) have developed a fully integrated electronic procurement system, including an on-line catalog of purchasing options. The system contract was awarded to SciQuest, the premier provider of e-procurement software for research universities and institutions.

UF and FSU focused on six commodity areas for strategic sourcing throughout the university procurement process: IT hardware, courier, office products, scientific supplies, copiers, and maintenance, repairs, and operations. SUS institutions purchase from a contract between the Florida Distance Learning Consortium and Blackboard. Pricing is negotiated based on aggregate spend. The BOG leveraged aggregate spend and utilized the e-procurement system to purchase a system-wide contract with Microsoft.

FSU and UF collaboratively issued joint, strategically sourced invitations to negotiate (ITN) to establish e-procurement contracts for information technology equipment and scientific and medical supplies. The ITNs resulted in three joint IT contracts and ten lab supply contracts and agreements.

Recommendations

The Task Force recommends the State University System adopt an electronic procurement platform(s) that offers functionality similar to the systems at the Florida State University and the University of Florida. FSU and UF utilize an electronic platform for procurement. Implementation of the system resulted in improved control and tracking of procurement spend,[10] decreased ordering time for universities and vendors, and a reduction in paperwork. Utilization of technology, along with changes in procurement law, has allowed FSU to reduce its procurement work force by eleven positions.[11] Implementation of similar procurement platforms would allow the other nine universities of the SUS to realize similar benefits and savings.[12] Consideration should be given to leveraging of such a system across multiple institutions.

Other Buying Groups and Consortia

Each SUS institution is a member of the National Association of Educational Procurement (NAEP). NAEP members are eligible to use dozens of competitively-bid and strategically-sourced contracts established by Educational & Institutional Cooperative Service, Inc. (E&I). E&I is a not-for-profit buying cooperative established by members of NAEP to provide goods and services to members at the best possible value.[13]

SUS institutions are also eligible to use competitively-bid consortium contracts established by other government groups, such as the Western States Contracting Alliance, and buying groups, such as the U.S. Communities and Horizon Resource Group.

---

[10] The improved control and tracking of spend allows for the ability to utilize strategic sourcing, which may lead to cost savings in the procurement of services and commodities.

[11] The elimination of positions occurred over a 20-year period of changing procurement law and substantial adoption of technology to increase efficiency. FSU staff has estimated that it has saved over $1.3 million in staff reduction and $900,000 in cost avoidance over the last 9 years. Information provided by FSU (copy on file with Government Efficiency Task Force staff). Other factors include increased efficiency of current staff use, less ordering time, better tracking of spend, and more predictable ordering.

[12] A recent proposal to implement a system to similar to that of FSU and UF among the other nine SUS institutions was estimated to cost between $1.4 to $1.7 million annually, with an additional one-time implementation cost of $2 million. Information provided by ICOP (copy on file with Government Efficiency Task Force staff).

[13] *See* https://www.eandi.org/ (last visited 05/29/2012).

AMERICAN OVERSIGHT

Regional Procurement

By working with larger institutions, smaller state universities with specialized needs have achieved procurement savings at the regional level. For example, the University of North Florida (UNF) implemented the SunGuard Banner ERP system in FY 2003-04 as a result of a SUS ITN initiative chaired by UF, FSU, UNF, the University of Central Florida (UCF), and Florida Atlantic University (FAU). UNF has achieved significant savings through its solicitation process. UNF's procurement savings was $570,628 in 2010, $352,059 in 2011, and $361,293 through the third quarter of 2012. UNF's purchasing department has generated revenue over the past five years, including two signing bonuses for office supply contracts utilizing strategic sourcing with other universities and rebates from E&I contracts.

C. UNIVERSITY COLLABORATION WITH STATE PURCHASING

The Department of Management Services (DMS) has organized a group of representatives from local governments, state colleges, and state universities (referred to as other eligible users or OEUs) called Florida Professionals for Public Procurement. The group meets monthly and has representation from the University of Florida, the University of North Florida, Polk State College, Florida Atlantic University, and Florida Gulf Coast University.

The group has several long term objectives including:

- Maximizing best in class procurement processes;
- Bringing the best value to the state and OEUs through strategic sourcing, standard contracts, and standard processes;
- Managing administrative costs through supply chain management and a shared services delivery model;
- Working with the Division of State Purchasing (the division) to create a flexible technology platform;[14] and
- Maximizing spend visibility.

In addition, the division also communicates with universities through the Florida Association of Public Procurement Officials.[15]

SUS institutions also utilize DMS's Vendor Bid System to post solicitations in order to increase competition and are substantial users of DMS state term contracts.[16]

Recommendations

The Task Force recommends that the Board of Governors, state universities, and the Department of Management services continue coordinating their efforts in the area of procurement in order to better manage tracking of spend, contracting, strategic sourcing, and best procurement practices. Representatives from DMS and several SUS institutions (UF, University of North Florida (UNF), Florida Atlantic University (FAU) and Florida Gulf Coast University (FGCU)) meet monthly to coordinate and improve procurement. This cooperative effort should continue and be expanded by the addition of other SUS institutions. The BOG should also consider having one person or current SUS institution procurement officer be the point person for DMS to contact regarding procurement issues and strategic procurement.

---

[14] This would include the following items from the Task Force recommendations on state procurement: provide a public facing catalog solution for OEUs to purchase state term contract items; convert Florida commodity codes to the National Institute of Governmental Purchasing (NIGP) codes; and increase utilization of MyFloridaMarketPlace (MFMP).

[15] *See* http://www.fappo.org/ (last visited 5/29/2012).

[16] Examples of use of state contracts include: furniture, IT, gasoline, carpet, rental cars, lab supplies, office supplies, audio visual, bank services, and telecommunication. Information provided by ICOP (copy on file with Government Efficiency Task Force staff).

AMERICAN OVERSIGHT

The Task Force recommends that the Department of Management Services and the State University System identify and jointly strategically source common goods and services in order to achieve maximum savings to both parties. DMS should work with SUS institutions to identify those common goods and services in order to strategically procure them to the benefit of both the state and the SUS.

The Task Force recommends that state universities utilize state term contracts to achieve savings. Utilization of state term contracts allows the state and OEUs to achieve savings, track spending, and leverage volume to strategically procure commonly-utilized goods and services. Increasing OEU utilization of state term contracts will provide additional leverage for DMS in negotiating better pricing. DMS and the SUS institutions should also evaluate university contracts to determine if university pricing is more competitive than current state contracts.[17]

D. FLORIDA POLYTECHNIC UNIVERSITY

Passed during the 2012 Regular Session, Senate Bill 1994[18] provided for the creation of Florida Polytechnic University as a new, independent institution in the state university system,[19] effective upon becoming law. Florida Polytechnic is required to meet the following BOG requirements by December 31, 2016:

- Achieve regional accreditation from the Commission on Colleges of the Southern Association of Colleges and Schools (SACS);
- Initiate development of new STEM programs;
- Seek discipline-specific accreditation for programs;
- Attain a minimum full-time equivalent student enrollment (FTE) of 1,244, with a minimum 50 percent of that FTE in STEM fields and 20 percent in STEM-related fields;
- Complete, at minimum, construction of the Science and Technology Building, Phase I of the Wellness Center, and a residence hall or halls with at least 190 beds;
- Have the ability to provide administration of financial aid, admissions, student support, information technology, and finance and accounting with an internal audit function.

USF Lakeland (formerly USF Polytechnic) has about 1,300 students: 60% of them are part-time, approximately 70% are from Polk County, and 98% are FL residents. Currently, there are only upper-division students, but the first class of freshman is expected to start in fall 2012. There are also approximately 196 faculty and staff, with an additional 18 employed by the Florida Industrial and Phosphate Research Institute. USF Lakeland occupies half of a joint-use building in Lakeland, shared with Polk State College. Construction on Phase 1 of the Science and Technology Building has begun, but Florida Polytechnic will share the joint-use facility until construction is completed. Currently, there are no students associated with Florida Polytechnic University; the University will require an appointed of Board of Trustees, who will then hire a president before they can begin enrolling new students.[20]

Recommendations

The Board of Governors should leverage the creation of Florida Polytechnic to pursue opportunities to implement shared services models across multiple institutions. With the addition of Florida Polytechnic as the 12th university in the SUS, there is an opportunity to create shared service models and find efficiencies that can be applied system wide. Initial focus should be on shared services for smaller institutions that have comparable needs.

---

[17] DMS should also take into consideration other incentives that SUS institutions utilize such as rebates. For example, ICOP reports that when rebates and incentives are taken into consideration, the FSU contract pricing for office supplies is lower than the current state term contract. Information provided by ICOP (copy on file with Government Efficiency Task Force staff).

AMERICAN OVERSIGHT

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Business Regulation

RECOMMENDATION SUMMARY

On November 2, 2011, the Government Efficiency Task Force approved the following recommendations regarding business regulation by a vote of 14 yeas, 0 nays:

- **Provisional Business Permits**
  - Implement a provisional business permit for select industries.
  - Create an evaluation process for industries linked to health and human safety to qualify for a provisional business permit.
  - Utilize information from the business dashboard to indentify key industries that would qualify for the permit.
  - Utilize the provisional permit process to identify and eliminate unnecessary regulations.
  - Conduct a pilot program in selected counties or cities to benchmark the effectiveness of the permit.

- **Business Dashboard**
  - Implement a business permit dashboard that tracks the amount of time it takes for a company to get started in the State of Florida.
  - Begin the dashboard at the state level, tracking the business as it goes through the state regulatory process.
  - Begin with a pilot program with counties participating on a voluntary basis.
  - Encourage county/city compliance by requiring participation as a condition for certain funding.
  - Utilize current information already collected by state agencies, the Chamber of Commerce, and local governments.
  - Designate one agency, preferably the Department of State, to receive all information related to the business dashboard.
  - Utilize dashboard metrics to identify unnecessary regulations, industries that do not require regulation, and industries or businesses that would qualify for the provisional business permit.
  - Allow private businesses to submit additional information.
  - For each week in reduced startup time resulting from the business dashboard, the state would save an estimated **$3.44 million** in unemployment benefit payments.

- **One-Stop Business Portal**
  - Implement the One-Stop Portal in stages as recommended by Department of Revenue Executive Director Lisa Vickers.
  - Identify redundancies and potential consolidations as the portal is phased in.
  - Utilize the consolidation process to identify unnecessary agency regulation.
  - Create a “Phase Ia” comprised of a “splash page” website with agency links to fast track businesses through the startup or renewal process.
  - Utilize existing call center functions to include a live chat feature to provide real time assistance to users.
  - Include a mechanism that allows for feedback from businesses regarding regulation, which would be forwarded to the Office of Fiscal Accountability and Regulatory Reform and the Legislature.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. RECOMMENDATIONS(S) AND BACKGROUND

A. PROVISIONAL BUSINESS PERMITS

Background

A provisional business permit would allow industries that do not affect health and human safety to start a business more quickly and be managed to compliance after the business is in operation. This would allow for reduced startup and hiring times in applicable industries. The result would be higher employment and enhanced revenue to the state. The increased ease of doing business in Florida may also attract more business to the state and encourage more people to create startup businesses.

Change and Efficiency

The new process would require a reorganization of the manner in which the state regulates businesses. This would result in a culture change as regulators look for creative ways to regulate to compliance after the business is open rather than requiring all regulation at the beginning of the process. Implementing new processes of provisional permitting may also identify and eliminate unnecessary regulations.

The efficiencies achieved would include reduced startup times for new businesses and more efficient hiring of new employees. More businesses leads to increased job creation in Florida, and would also generate increased revenue for the state.

Recommendations

The Task Force recommends the following:

- Implement a provisional business permit for select industries;
- Create an evaluation process for industries linked to health and human safety to qualify for a provisional business permit;
- Utilize information from the business dashboard to indentify key industries that would qualify for the permit;
- Utilize the provisional permit process to identify and eliminate unnecessary regulations; and
- Conduct a pilot program in selected counties or cities to benchmark the effectiveness of the permit.

B. BUSINESS DASHBOARD

Background

The purpose of the dashboard is to provide metrics for the time it takes for a business to be fully licensed and permitted. Currently, the state tracks the time it takes for a business to receive certain permits or licenses. For example, the Department of Business and Professional Regulation (DBPR) consistently tracks the amount of time it takes for a person or business to receive a professional license, which is often one of the many steps to open a business. The state does not currently measure the total time it takes for a business to open. Since the majority of business regulation and permitting takes place at the local level, local government participation would be needed in order for the program to achieve its goals. Once implemented, the dashboard could provide information on the startup phase of a business from all levels of regulation, state and local. Once collected, the data could be analyzed to see where the delays and challenges occur for businesses. The data could also be displayed online for the public to use in deciding where to locate their business and planning throughout the startup process.

AMERICAN OVERSIGHT

Change and Efficiency

The most significant change implemented with the business dashboard is the data collected and its impact. Government, at all levels, currently tracks how long it takes to receive permits or licenses, but no state or local governmental entity tracks how long it takes an individual business to open. Displaying this data could lead to a culture change that encourages local governments to become more efficient in order to compete for businesses and jobs in their area. The data collected may also help analyze current regulations at all levels and indicate what regulations are unnecessary burdens on business. The implementation of a dashboard system could provide crucial information to assist businesses starting in the state and deciding in which county or city to locate.

The cost savings is difficult to calculate. The data itself would not create cost savings or efficiencies, but the application of the data could speed up the business startup process. By identifying and eliminating potential impediments that the dashboard uncovers, businesses can get started more quickly. Each week a business is not operating translates to lost income to the business owner, the potential employee, and the state. Also, if some of the potential employees are unemployed, the state may be paying them unemployment benefits. Based on the statistics that Mr. Tarren Bragdon[1] presented, startups created 172,236 jobs in 2009. If we assume that 10% of those hired by the startup businesses were on unemployment and receiving benefits ($200 a week for this calculation), the state would save **$3.44 million** in unemployment benefit payments per each week less that those individuals are collecting benefits.

Recommendations

The Task Force recommends the following:

- Implement a business permit dashboard that tracks the amount of time it takes for a company to get started in the State of Florida;
- Begin the dashboard at the state level, tracking the business as it goes through the entire state regulatory process;
- Begin with a pilot program with counties participating on a voluntary basis;
- Encourage county/city participation by requiring participation as a condition for certain funding;
- Utilize current information already collected by state agencies, the Chamber of Commerce, and local governments;
- Designate one agency, preferably the Department of State, to receive all information related to the business dashboard;
- Utilize dashboard metrics to identify unnecessary regulations, industries that do not require regulation, and industries or businesses that would qualify for the provisional business permit; and
- Allow private businesses to submit additional information.

C. ONE STOP BUSINESS PORTAL

Background

The One-Stop Business Portal is a method to "virtually consolidate" agency functions when it applies to the registration and regulation of businesses. The portal would consolidate all information collection for businesses into one website and would then send the data collected to the appropriate agency. The portal would include a wizard program to steer individuals through the registration process and to help guide the new business owner

[1] Mr. Bragdon is the Chief Executive Officer of the Foundation for Government Accountability. The organization's website is http://www.floridafga.org/ (last visited 10/27/2011). Mr. Bragdon presented to the Government Efficiency Task Force on October 19, 2011. Video and materials available at www.floridaefficiency.com/meetings.cfm (last visited 10/27/2011).

AMERICAN OVERSIGHT

to the appropriate registrations.[2] The implementation, as described by Ms. Lisa Vickers, would allow the portal to be phased in. A phased approach would give agencies time to make necessary adjustments to the new process, lessen the initial cost of the portal, and possibly spread out the costs over several years.[3]

Change and Efficiency

The implementation of the portal would lead to greater government efficiency by eliminating duplicative business processes as the different phases are adopted, which could lead to lower costs in administering government regulation. The one-stop initiative could also lead to identifying and eliminating unneeded agency regulation. The ability for local government to participate in the portal will deliver the best possible efficiencies for Florida businesses.

Recommendations

The Task Force recommends the following:

- Implement the One-Stop Portal in stages as recommended by Department of Revenue Executive Director Lisa Vickers;
- Identify redundancies and potential consolidations as the portal is phased in;
- Utilize the consolidation process to identify unnecessary agency regulation;
- Create a "Phase 1a" comprised of a "splash page" website with agency links to fast track businesses through the startup or renewal process;
- Utilize existing call center functions to include a live chat feature to provide real time assistance to users; and
- Include a mechanism that allows for feedback from businesses regarding regulation, which would be forwarded to the Office of Fiscal Accountability and Regulatory Reform and the Legislature.[4]

[2] An example given by Ms. Vickers would be a barber shop. The barber shop is required to register the business with the Department of State and apply for a professional license with DBPR. The wizard program would ask a question such as, "Will you be selling hair care products?" If the person answers yes, the program will know to collect sales tax registration information.
[3] Ms. Vickers believes that Phase 1 can be done within the current budget of the participating agencies.
[4] The Florida Legislature is currently collecting data related to regulatory rules called "YourVoice." *See* http://www.myfloridahouse.gov/Sections/Documents/loaddoc.aspx?DocumentType=Press Release&FileName=449 (last visited 10/27/2011).

AMERICAN OVERSIGHT

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Expressway and Bridge Authority Consolidation

RECOMMENDATION SUMMARY

On November 16, 2011, the Government Efficiency Task Force approved the following recommendations regarding expressway and bridge authority consolidation by a vote of 10 yeas, 3 nays:

- An independent party who specializes in best management practices should assist in effectively consolidating the administrative functions of the Orlando-Orange County Expressway Authority (OOCEA) and Tampa-Hillsborough County Expressway Authority (THEA) into Florida's Turnpike Enterprise (FTE). The Florida Department of Transportation (FDOT) estimates a savings of **$24,318,000** per year. With the utilization of a third party, this process may be more efficient and achieve even greater savings.

- If THEA and OOCEA are consolidated into FTE, all revenue collected in the regions should be spent within the same region and local boards should be maintained to make policy decisions on road construction.

- Consolidate the Mid-Bay Bridge Authority into FTE.

- Consolidate all toll collections into a single entity and system, including all administrative functions, software and IT systems, accounting, collection personnel, enforcement, customer service, and billing.

- Require regional toll agencies to benchmark regional and state transportation and authority salaries to avoid possible excessive salaries.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. RECOMMENDATIONS(S) AND BACKGROUND

A. REGIONAL EXPRESSWAY AND BRIDGE AUTHORITIES GLOBAL CONSOLIDATION

There are three independent Expressway and Bridge Authorities considered in the recommendation: Orlando-Orange County Expressway Authority (OOCEA), Tampa-Hillsborough Regional Expressway Authority (THEA), and the Mid-Bay Bridge Authority (MBBA). All three authorities currently operate pursuant to a lease-purchase agreement[1] with the Florida Department of Transportation (FDOT).[2]

The Florida Turnpike Enterprise

Florida's Turnpike was created in 1953 as the Florida State Turnpike Authority. The State Turnpike authority became part of the department in 1969. The Turnpike was reorganized as an office within the department in 1988 and as a district in 1994. Florida's Turnpike Enterprise (FTE), a business-focused organization within the department, was created by the Legislature in 2002 to manage the Turnpike System (Turnpike). The Turnpike is a system of toll-financed expressways serving sixteen Florida counties covering 460 miles.[3]

The Florida Turnpike Enterprise

	Lane Miles	Gross Toll Revenue FY 2010-11	Toll Transactions FY 2010-11	Bond Debt Outstanding	Long Term Payable to FDOT
FTE	2,112	$600,897,000	652,900,000	$2,811,830,000	$162,403,077

Orlando-Orange County Expressway Authority

The Orlando-Orange County Expressway Authority (OOCEA) was created in 1963 by the Florida Legislature.[4] The purpose of the authority is for the construction and operation of an expressway road system in Central Florida. OOCEA has the statutory authority to construct, operate, and maintain roads, bridges, avenues of access, thoroughfares, and boulevards together with authority to construct, repair, replace, operate, install, and maintain electronic toll payment systems outside of Orange County with the respective county's written consent. OCCEA is also authorized to issue toll revenue bonds to finance portions of the system.

Orlando-Orange County Expressway Authority

	Lane Miles	Gross Toll Revenue FY 2010-11	Toll Transactions FY 2010-11	Bond Debt Outstanding	Long Term Payable to FDOT
OOCEA	671	$263,787,000	292,477,739	$2,696,415,000	$270,088,808

[1] For more information regarding lease-purchase agreements, see The Florida Senate, *Toll Facility Lease-Purchase Agreements*, Issue Brief 2011-227, prepared by Senate Committee on Transportation, http://www.flsenate.gov/Committees/InterimReports/2011/2011-227tr.pdf (last visited 11/10/2011).
[2] The Santa Rosa Bay Bridge Authority also operates pursuant to a lease-purchase agreement with FDOT but is not considered in this recommendation report.
[3] *See* The Florida Senate, *Cost Effectiveness of Regional Expressway and Bridge Authorities*, Issue Brief 2012-208, prepared by Budget Subcommittee on Transportation, Tourism, and Economic Development Appropriations, http://www.flsenate.gov/PublishedContent/Session/2012/InterimReports/2012-208%20BTA.pdf (last visited 11/10/2011).
[4] OOCEA operates pursuant to ch. 348, F.S., part V.

AMERICAN OVERSIGHT

Tampa-Hillsborough County Expressway Authority

The Tampa-Hillsborough County Expressway Authority (THEA) was created in 1963 as an agency of the state pursuant to ch. 348, F.S., for the purposes of and having the authority to construct, reconstruct, improve, extend, repair, maintain and operate the expressway system within Hillsborough County.

Tampa-Hillsborough County Expressway Authority

	Lane Miles	Gross Toll Revenue FY 2010-11	Toll Transactions FY 2010-11	Bond Debt Outstanding	Long Term Payable to FDOT
THEA	112	$40,476,072	31,634,997	$324,520,000	$200,655,481

Change and Efficiency

OOCEA and THEA

The Task Force found there is waste and inefficiency by having separate toll agencies. Each toll agency performs the same functions: administration of road construction and toll collection. Therefore, each agency has duplicative systems and personnel. Significant savings and efficiencies can be achieved through reduction of administrative personnel and consolidation of different systems into one larger system.[5]

Estimates from FDOT provide that the following savings may be realized by consolidating THEA and OOCEA into FTE:

- $6,572,000 per year from authority contract services;[6]
- $5,850,000 per year from authority administrative salaries and benefits;[7] and
- $14,877,000 per year from authority back office toll collection.[8]

FDOT also estimates a savings of $1,712,000 per year for the removal of the airport plaza and installation of electronic tolling at ramps. With an estimated recurring cost of $4,693,000 per year to FTE, the consolidation of OOCEA and THEA into FTE would lead to a conservative savings estimate of **$24,318,000** per year.[9]

Staff of the Senate Committee on Budget, during the 2011 session, also estimated that Florida taxpayers would save $24 million each year by merging all of the independent toll agencies into the Florida Turnpike Authority.[10]

To better assess the benefits of a merger/consolidation, Expressway and Bridge Authority Consolidation Work Group Chairman Matthew Falconer researched past mergers and consolidations in other states. The most

[5] Mr. Falconer visited the facilities of OOCEA, THEA, and FTE (Mr. Falconer's visit reports are on file with Government Efficiency Task Force staff).
[6] Savings are estimated at $6.145 million per year for OOCEA and $427,000 per year for THEA (estimates on file with Government Efficiency Task Force staff).
[7] Savings are estimated at $3.781 million per year for OOCEA and $2.069 million per year for THEA (estimates on file with Government Efficiency Task Force staff).
[8] Savings are estimated at $14.261 million per year for OOCEA and $616,000 per year for THEA (estimates on file with Government Efficiency Task Force staff).
[9] This does not take into account any possible savings from real estate holdings, leased property and related maintenance and utilities. Savings resulting from debt refinancing are also excluded.
[10] The Florida Senate Bill Analysis and Fiscal Impact Statement, SB 2152 (SPB 7198), Senate Committee on Budget, April 1, 2011, http://www.flsenate.gov/Session/Bill/2011/2152/Analyses/Vwph1SsHimSG5hGTFLi2jnfIuuM=%7C7/Public/Bills/2100-2199/2152/Analysis/2011s2152.bc.PDF (last visited 11/10/2011).

AMERICAN OVERSIGHT

relevant example found was the merger of the New Jersey Turnpike and the Garden State Parkway.[11] The New Jersey Turnpike and Garden State Parkway collect 2.2 million tolls per day and $650,000,000 per year. The consolidation allowed for a reduction of 212 employee positions and achieved administrative savings of $8,200,000 per year. The consolidation also reduced the amount of office space required. Consolidation achieved savings and reduced time for road project completion due to the combined resources of the larger agency.[12]

Recommendations

Task Force research concluded a global consolidation will result in significant savings, similar to that of the New Jersey Turnpike. Separate agencies require additional administration and multiple software and IT recourses. Savings from a global consolidation are estimated to be in the tens of millions of dollars annually. In addition, the savings in terms of interest are estimated to be in the tens of millions of dollars as a result of the lower interest rate available to FTE.[13]

Consolidation may also result in a changed business model for the raising of capital for roadway projects and expense planning. THEA and OOCEA currently have $3.02 billion in outstanding bond debt compared to FTE's $2.812 billion.[14] FTE, which is required to sell bonds through the Division of Bond Finance, tends to be more conservative in its approach to bond debt. Consolidation may result in a more conservative business model, resulting in less debt and quicker repayment of operations and maintenance expenses to the state.

While there appears to be considerable savings through administrative savings and culture change, because of the complexity of such a consolidation, the Task Force believes that it is beyond the group's capacity to detail how a consolidation would be carried out. **The Task Force recommends that an independent party who specializes in best management practices should assist in effectively consolidating the administrative functions of the Orlando-Orange County Expressway Authority (OOCEA) and Tampa-Hillsborough County Expressway Authority (THEA) into Florida's Turnpike Enterprise (FTE).**[15]

If a global consolidation or merger is completed, the Task Force recommends the following to ensure local governments maintain their influence on local decisions:

The Task Force recommends that revenue collected stay in the same system in which it is collected. The funds collected should be placed into a separate account or be designated for use in the same road system where the funds are collected.

The Task Force recommends that local boards be maintained to make policy decisions on road projects built within their system. Local boards should maintain control of their systems even if administered by a consolidated agency.

[12] *See Consolidation Case Study: The New Jersey Turnpike Authority and The New Jersey Highway Authority, Two Years Later,* September 26, 2005 http://www.ibtta.org/files/PDFs/Diane%20Scaccetti.pdf (last visited 11/10/2011).

[13] The Expressways have a lower bond rating than FTE. OOCEA's bond rating was recently lowered by Moody's Investor Service to A2 with a negative outlook. The downgrade was due to "continued lower than forecasted traffic and revenue growth combined with reduced operating revenue support from Florida's Department of Transportation (FDOT) which we expect will result in lower debt service coverage ratios (DSCRs) going forward. Additional pressures include potential opposition to planned toll increases; a complex and increasingly back-loaded debt structure with substantial exposure to variable rate debt and swaps; and large as yet unfunded capital needs over the next three years" (copy of letter on file with Government Efficiency Task Force staff).

[14] These numbers are based on the presentation by Reynold Myer, staff director of the Florida Senate Budget Subcommittee on Transportation, Tourism, and Economic Development Appropriations. Presentations materials are available at http://www.floridaefficiency.com/UserContent/docs/File/20111005MeetingPacket.pdf (last visited 11/10/2011).

[15] The Hay group performed such a study in the consolidation of the New Jersey Turnpike and the Garden State Parkway.

AMERICAN OVERSIGHT

B. CONSOLIDATION OF MID-BAY BRIDGE AUTHORITY INTO THE FLORIDA TURNPIKE ENTERPRISE

Mid-Bay Bridge Authority

In 1986, the Legislature created the Mid-Bay Bridge Authority (MBBA) as the governing body of an independent special district in Okaloosa County for the purpose of planning, constructing, operating and maintaining a bridge traversing Choctawhatchee Bay.

Mid-Bay Bridge Authority

	Lane Miles	Gross Toll Revenue FY 2010-11	Toll Transactions FY 2010-11	Bond Debt Outstanding	Long Term Payable to FDOT
MBBA	20.6	$15,476,000	6,519,391	$287,115,000	$17,120,448

Change and Efficiency

The Task Force researched the consolidation of the Mid-Bay Bridge Authority into FTE. The Task Force reviewed the Florida Senate issue brief on authority cost effectiveness[16] and received testimony from MBBA Executive Director Jim Vest.[17] MBBA currently consists of two employees and oversees 20.6 lane miles of roadway and bridge.[18]

Task Force research concluded MBBA's lower credit rating costs an additional $5 million to $10 million per year in interest payments when compared to FTE's interest rate.[19]

FDOT and FTE can absorb oversight of management of the existing construction project and HRE contract. FDOT may be able to better handle the project than an agency with one Executive Director and one administrative assistant.

If the MBBA is consolidated into FTE, FDOT projects an annual reduction in operational costs of $400,000 to $500,000.[20] Possible savings on bond refinancing may be between $5 million and $10 million per year.[21]

Due to lower interest rates and operational costs, consolidation of MBBA into FTE will prevent a possible default situation like the Santa Rose Bay Bridge.[22] The Task Force members believe that consolidation of MBBA into FTE is in the best interest of the customers of the Mid-Bay Bridge and the taxpayers of Florida.

---

[16] The Florida Senate, *Cost Effectiveness of Regional Expressway and Bridge Authorities*, Issue Brief 2012-208, prepared by Budget Subcommittee on Transportation, Tourism, and Economic Development Appropriations, http://www.flsenate.gov/PublishedContent/Session/2012/InterimReports/2012-208%20BTA.pdf (last visited 11/10/2011).
[17] Mr. Vest testified during the November 4th Expressway and Bridge Authority Consolidation Work Group meeting and answered questions from members. The podcast is available at http://www.floridaefficiency.com/meetings.cfm (last visited 11/10/2011).
[18] *See* The Florida Senate, *Cost Effectiveness of Regional Expressway and Bridge Authorities*, Issue Brief 2012-208, prepared by Budget Subcommittee on Transportation, Tourism, and Economic Development Appropriations, p. 1, http://www.flsenate.gov/PublishedContent/Session/2012/InterimReports/2012-208%20BTA.pdf (last visited 11/10/2011).
[19] This estimate is based on FTE issuing bonds at a higher credit rating compared to MBBA issuing bonds at its current credit rating.
[20] Savings based on FDOT estimates with $302,000 savings from authority contractual services (non-toll) and $224,000 from authority administrative salaries and benefits (estimates on file with Government Efficiency Task Force staff).
[21] This savings estimate is based on refinancing existing debt obligations of MBBA under the FTE bond rating.

AMERICAN OVERSIGHT

Recommendations

The Task Force recommends MBBA be consolidated into FTE without further study. This consolidation is estimated to result in immediate savings of $400,000 to $500,000 per year and produce annual savings of $5 million to $10 million per year if the revenue bonds can be refinanced by FTE. With only two employees, there is little reason to keep MBBA a separate agency, and consolidation will cost very little to execute. The five-member MBBA board should remain intact to provide local input to FTE.

C. CONSOLIDATION OF TOLL COLLECTION

Toll Collection

The Task Force also reviewed consolidating services provided by the toll agencies. Aside from road design and construction, toll collection is perhaps the most important service the toll agencies provide. The Task Force reviewed toll collection both from a cost standpoint as well as the effective and efficient use of time by the toll paying public.

Currently, there are three toll transponder systems in Florida:

- Sun Pass;[23]
- E-Pass;[24] and
- Lee-Way.[25]

In addition, several agencies have gone to "Pay by Plate" systems and "all electronic tolling." In these locations there is no option to pay cash, and new customers or customers without transponders are mailed invoices for use of the toll roads.

Residents of Florida and visitors must comply with different rules and transponder systems. Currently, Florida's Turnpike Enterprise (FTE), Orlando-Orange County Expressway (OOCEA), and the Tampa Hillsborough Expressway Authority (THEA) all use different toll collection systems. This requires three separate software systems, three separate vendors, three separate IT systems, and three different invoice and enforcement policies.

Change and Efficiency

Having a different collection system for each authority and turnpike is inefficient from a collection standpoint as well as from the customer's point of view. There are duplicative costs and inconsistent regulations regarding collection between counties. A customer with a dead battery in their toll transponder can receive violations from three separate agencies in the same day, leading to confusion.[26]

---

[23] Administered by Florida's Turnpike Enterprise and the Florida Department of Transportation. *See* https://www.sunpass.com/index (last visited 11/10/2011).

[24] Administered by the Orlando-Orange County Expressway Authority. *See* http://www.expresswayauthority.com/corporate/epass/ (last visited 11/10//2011).

[25] Used for three bridges in Lee County. *See* https://www.leewayinfo.com/ (last visited 11/10/2011).

[26] The Expressway and Bridge Authority Consolidation Work Group received testimony from an Orlando resident, Darlene Petty Raimondi. Ms. Raimondi had a transponder in her car but was unaware that her battery in the transponder lost power. Ms. Raimondi used the toll roads and received violations for unpaid tolls. Unaware there are two separate tolling agencies on the same highway, Ms. Raimondi resolved the toll violation with one agency. The other agency's toll violation was not resolved, resulting in Ms. Raimondi's license being suspended. As a result Ms. Raimondi's insurance rates went up. A unified toll collection system and enforcement procedures will be more efficient from the taxpayer's perspective.

AMERICAN OVERSIGHT

The Orlando-Orange County Expressway (OOCEA) testified that consolidating toll collections under one agency can "save $22 million per year."[27] The savings will come from the economies of scale using one software system and one vendor.

Currently, Florida's Turnpike Enterprise processes 652 million transactions each year. FTE also collects tolls for MBBA. THEA processes 31 million transactions per year and OOCEA processes 292 million.[28] SunPass (FTE) has by far the largest number of transponders in service and 3100 locations for customers to buy and replenish accounts.

Recommendations

The Task Force recommends that Florida's Turnpike Enterprise be responsible for all toll collection in Florida. All toll collections should be consolidated into a single entity and system, including all administrative functions, software and IT systems, accounting, collection personnel, enforcement, customer service, and billing.

Florida's Turnpike Enterprise has by far the most transponders in Florida and processes double the transactions of all other agencies combined. The transformation will allow every customer to utilize one transponder system and will reduce collection costs significantly.

A single system should have a uniform procedure and fee for collecting the toll revenue. For example, if an electronic toll is collected by the Turnpike and paid to OOCEA, the Turnpike should be able to deduct the cost of collecting that toll. By setting that fee at or below current collection costs, there will be no loss of revenue to any toll agency.

The cost to collect tolls will be reduced and have an estimated savings of $22 million per year. The customer will enjoy a better service when dealing with one collection entity.

D. WAGE PARITY

Authority Wages vs. Turnpike Wages

During the course of the research, the Task Force was provided documentation on employee salaries of the various agencies. Salaries between the authorities and FTE varied greatly, even when the job descriptions were identical. As an example, the Executive Director of OOCEA makes $247,000 and the Florida Secretary of Transportation makes $140,000, despite having more than ten times the staff.[29] Of the 61 employees at OOCEA, ten make over $100,000 per year.[30]

---

[27] Executive Director of OOCEA, Mike Snyder, testified before the Government Efficiency Task Force on October 5th, 2011. Video available at http://www.floridaefficiency.com/meetings.cfm (last visited 11/10/2011). FDOT estimates a conservative savings of $14 to $15 million per year.

AMERICAN OVERSIGHT

	MBBA	THEA	OOCEA	Combined Authorities	FTE
Salary & Benefits	$223,000	$2,010,194	$6,419,842	$8,663,036	$30,197,148
FTEs	2	17	61	80	468
Average per FTE	$111,500	$118,247	$105,243	$108,288	$64,524[31]

Change and Efficiency

Recommendations

Regional authority employees perform the same functions as the state employees who make a fraction of the salary. There is considerable cost savings by requiring the expressway and bridge authorities to follow a pay scale similar to FDOT. **The Task Force recommends that regional toll agencies should benchmark regional and state transportation and authority salaries to avoid possible excessive salaries.** Pay parity will ensure taxpayers are getting value for the public service being performed.

[31] Averages are calculated by dividing the total amount of salary & benefits by the total number of FTEs.

AMERICAN OVERSIGHT

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Consultants' Competitive Negotiation Act (s. 287.055, F.S.)

RECOMMENDATION SUMMARY

On November 16, 2011, the Government Efficiency Task Force approved the following recommendations regarding the Consultants' Competitive Negotiation Act by a vote of 11 yeas, 2 nays:

- Allow agencies to utilize the "Best Value" process for all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping. This process would allow price to be a factor of up to 50% when ranking the top three most qualified firms. The process would work best for a project with a well-defined scope.

- Allow agencies to utilize the "Modified Best Value" process for all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping. This process would allow the agency to see the price of the top three most qualified firms, but not re-rank the firms, thus preventing the agency from entering negotiations with insufficient information on pricing. This process would work best for projects that do not have a specific scope and for agencies that would otherwise use the current CCNA over "Best Value."

- Maintain the current CCNA process as an option for agencies to utilize when "Best Value" or "Modified Best Value" would not be appropriate. This process would work best for a project that does not have a well-defined scope.

FULL RECOMMENDATION(S) ANALYSIS

I. RECOMMENDATION(S) AND BACKGROUND

A. CONSULTANTS' COMPETITIVE NEGOTIATION ACT (CCNA)

The Consultants' Competitive Negotiation Act (CCNA) was passed in 1973.[1] The Act is largely based on the Federal Brooks Act, which was passed in 1972.[2] CCNA provides that all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping[3] be contracted according to qualifications-based selection (QBS). CCNA applies to all projects above $325,000 and all studies above $35,000[4] bid out by the state, a state agency, a municipality, a political subdivision, a school district, or a school board.[5]

QBS follows these phases:

Phase One

1. The agency publicly announces the project or study.[6]
2. The agency evaluates current statements of qualifications and performance currently on file, together with those that are submitted by other firms and conducts discussions with no fewer than three firms regarding their qualifications, approach to the project, and ability to furnish the required services.[7]
3. The agency then selects in order of preference no fewer than three firms deemed to be the most qualified.[8]
4. The agency may consider the following factors in determining whether a firm is qualified: ability of professional personnel; whether a firm is a certified minority business enterprise; past performance; willingness to meet time and budget requirements; location; recent, current, and projected firm workload; and the volume of work previously awarded to each firm by the agency.[9]
5. The agency may not consider compensation during this phase.[10]

Phase Two

1. The agency negotiates with the most qualified firm regarding compensation.[11]
2. If the agency cannot come to an agreement with the most qualified firm, then negotiations with that firm must be formally terminated.[12]
3. The agency may then begin negotiations with the second most qualified firm.[13]
4. If the agency cannot come to an agreement with the second most qualified firm, then negotiations with that firm must be formally terminated.[14]
5. The agency may then begin negotiations with the third most qualified firm.[15]

AMERICAN OVERSIGHT

6. If the agency cannot come to an agreement with the third most qualified firm, then negotiations with that firm must by formally terminated.[16]
7. If the agency cannot negotiate a satisfactory contract with any of the three most qualified firms, the agency can negotiate with additional firms selected in order of their competence and qualifications.[17]
8. Once negotiations with a firm are terminated, the agency may not resume negotiations with that firm for the project.

Change and Efficiency

The Government Efficiency Task Force and the Design Procurement Work Group heard testimony from interested parties regarding CCNA.[18] Local government officials raised the following inefficiencies with CCNA:

- **Price is not considered.** The agency may not consider cost until the second phase when negotiating with the most qualified firm.
- **Negotiations with a firm may not be resumed once formally terminated.** If the agency is unable to negotiate a price within budget with the most qualified firm, he or she must completely close out negotiations and not resume them with that firm. The inability to reopen negotiations reduces the agency's negotiating power and limits them to the remaining firms, even if those firms negotiate a higher fee.
- **Excludes smaller firms.** Since larger firms are more qualified based on the set parameters, smaller or solo firms have a more difficult time procuring contracts for public works, thus hindering competition.
- **Lack of transparency.** The selection process is not as open and competitive as other procurement methods and taxpayers lack the ability to access prices and costs.

The Task Force and Work Group also heard testimony and comments from industry representatives. Industry representatives cited the following benefits of CCNA:

- **Focuses negotiations on qualifications rather than price.** This protects the health and safety of the public.
- **QBS process helps control construction costs.** Since the QBS process facilities negotiations that focus on the scope of the project rather than costs, there are fewer change orders and cost overruns. Both parties have a better understanding of the project at the outset.
- **Scope of the project is not well-defined.** Industry representatives provided that in many solicitations, the scope of the project is not well-defined, making it difficult to provide an accurate bid. The current QBS process facilities planning while negotiating, which may lead to lower costs.

The Task Force members discussed the testimony and comments. The Task Force recommends adopting two additional procurement methods for agencies[19] to follow in the selection of architecture, professional engineering, landscape architecture, or registered surveying and mapping services in addition to the current CCNA process.

The first recommended process is the "Best Value" process. [20] The best value process is defined as:

> The selection of a firm or firms whose proposal provides the greatest overall benefit to an agency in accordance with the requirements of a formal solicitation.

---

[16] *Id.*
[17] Section 287.055(5)(c), F.S.
[18] Senator Pat Neal, Chairman of the Design Procurement Work Group, presented to the Task Force at the November 2, 2011, meeting regarding reforming CCNA. Carlos Beruff and Steve Carnell also presented. Video and podcast of the meeting are available at http://www.floridaefficiency.com/meetings.cfm (last visited 11/10/2011).
[19] Agencies includes: state agencies, state entities, local government, school boards, and the university system.
[20] The process was presented by Mr. Steve Carnell at the November 2, 2011, meeting of the Government Efficiency Task Force.

AMERICAN OVERSIGHT

The best value process would allow agencies to:

1. Solicit proposals and include a written scope of work for the project to the competing firms.
2. Rank all firms based on qualifications and establish a "short list."[21]
3. Rank "short listed" firms on qualifications and price.[22]

Price would be allowed to be solicited from the top three most qualified firms only and would be factored in to the evaluation at no more than 50%. Since unqualified firms would not make the original short list, only the most qualified firms would have an opportunity to be awarded the contract. This would address the concerns raised about health and human safety in the procurement process. The best value option would work most effectively with projects that have a well-defined scope.

The second recommended process is the 'Modified Best Value" process. The modified best value process would allow agencies to:

1. Solicit proposals and include a written scope of work for the project to the competing firms.
2. Rank all firms based on qualifications and establish a "short list."[23]
3. The agency would be able to see the price bid for the top qualified firms, but the firms would not be re-ranked with price as a factor.

This process would eliminate the concern that procurement officers have about entering negotiations with insufficient information on pricing. This method allows the agency to know the price of the other two bids, but still begin negotiations with the most qualified firm. This gives the agency a stronger position during negotiations. This method would be most effective for agencies that would otherwise use CCNA, not best value, or when the scope of the project is not well-defined.

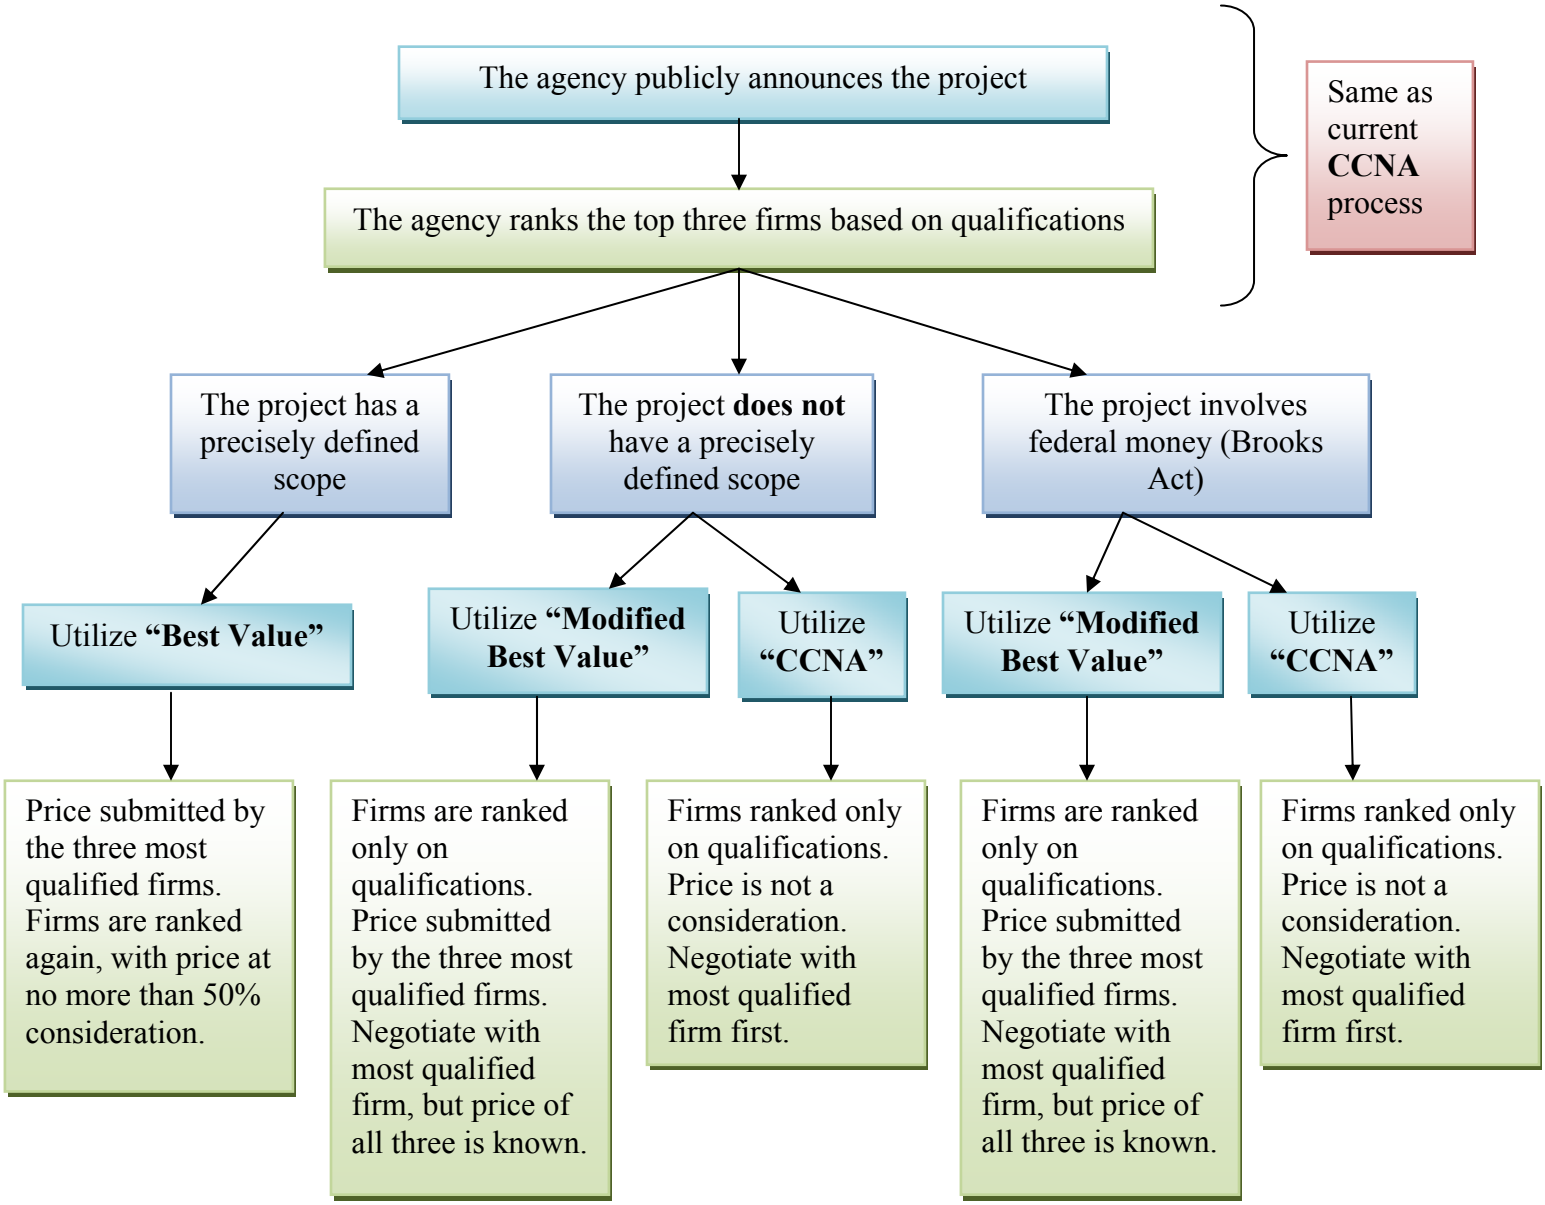
The Task Force also recommends maintaining the current CCNA procedures as an option for an agency when "Best Value" or "Modified Best Value" would not be appropriate. The process is effective and bases all bidding on qualifications. For projects that do not have a well-defined scope, this may be the best method for an agency. However, in projects with a well-defined scope, this procedure would not be the best method of procurement and may result in higher costs to the agency.

The Task Force recommends changes to CCNA because the increased procurement options would:

- Give public agencies more discretion in the procurement of professional services;
- Align the procurement method for CCNA professional services with how other professional services are purchased; and
- Be a vehicle to increase transparency and public confidence in the procurement process as a whole.

Recommendations

- Allow agencies to utilize the "Best Value" process for all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping. This process would allow price to be a factor of up to 50% when ranking the top three most qualified firms. The process would work best for a project with a well-defined scope.
- Allow agencies to utilize the "Modified Best Value" process for all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping. This process would allow the agency to see the price of the top three most qualified firms, but not re-rank the firms, thus preventing the agency from entering negotiations with insufficient information on



[21] The first two steps are the same as the current CCNA process and would remain the same under Best Value.
[22] The third step is a deviation from CCNA and would allow price to be a component of ranking the short list.
[23] The first two steps are the same as the current CCNA process and proposed best value process.

AMERICAN OVERSIGHT

pricing. This process would work best for agencies that would otherwise use the current CCNA over best value or for a project that does not have a specific scope.[24]

- Maintain the current CCNA process as an option for agencies to utilize when "Best Value" or "Modified Best Value" would not be appropriate. This process would work best for a project that does not have a well-defined scope.

Task Force Recommendation: "Procurement Officer Tool Box"

[24] The "Modified-Best Value" may be able to be used by agencies that come under the Brooks Act. The Brooks Act dictates the procurement process when federal dollars are used.

AMERICAN OVERSIGHT

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Enterprise Information Technology

RECOMMENDATION SUMMARY

On December 16, 2011, the Government Efficiency Task Force approved the following recommendations regarding enterprise information technology by a vote of 11 yeas, 0 nays:

- Redefine the role of the Agency for Enterprise Information Technology (AEIT) in governance of state enterprise information technology (IT) and clarify designated enterprise applications and operations.
- Strengthen statutory language to provide AEIT with enforceable governance.
- Provide AEIT with budget and procurement authority for enterprise IT projects and services.
- Maintain the current organizational structure of AEIT under the Governor and Cabinet.
- Establish an Enterprise Technology Advisory Council (ETAC) of public and private industry chief information officers and IT professionals to function in an advisory capacity to the state Chief Information Officer (CIO).
- Task the CIO with modifying AEIT's organizational structure to provide flexibility and nimbleness and to accommodate further adjustments as necessary.
- Direct AEIT to identify and align agencies in process oriented design structures (PODS), grouping similar business processes and functions across state government.
- Direct AEIT to implement enterprise IT in support of this alignment, executed in successful phases according to business processes and functions.
- Direct AEIT to immediately begin identification and alignment of PODS with financial management, due to the foundational importance of the Florida Accounting and Information Resource (FLAIR) subsystem.

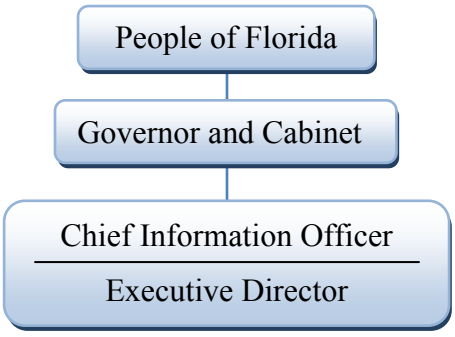
AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. RECOMMENDATIONS(S) AND BACKGROUND

A. AGENCY FOR ENTERPRISE INFORMATION TECHNOLOGY (AEIT)

In 2006, the Florida House of Representatives issued a report that identified the following issues with Florida's information technology (IT) governance:



- A lack of a clear vision for the future of IT, its role in government operations, and its value to the state;
- An absence of an enterprise governance framework, which limits Florida's ability to capitalize on enterprise-wide technology solutions; and
- Inadequate visibility into IT funding of agencies and across the enterprise.[1]

In 2007, the Florida Senate issued a similar report that cited insufficient planning, management, and governance of enterprise IT services. The report provided that many state projects experience cost overruns and fall behind schedule, management does not understand or value IT governance and investments, and IT is often an impediment to innovative new processes.[2] Additionally, lack of planning, contract management, and accurate assessment of IT capabilities resulted in suspension of projects and led to substantial changes in direction and scope during development and implementation.[3]

The Senate report concluded that "The state would benefit financially and organizationally from defining enterprise- and agency-level IT projects and operations."[4] The report also provided that Florida "would improve its enterprise IT capabilities by requiring shared service delivery, planning, management, and operations for common, non-strategic IT services."[5]

The Senate and House committee recommendations led to the creation of the Agency for Enterprise Information Technology (AEIT or the agency). The agency's focus is IT as an enterprise responsibility linking the state's separate business and jurisdictional entities.[6] The agency reports to the Governor and Cabinet, and is administratively housed within the Executive Office of the Governor (EOG), but is a separate budget entity and not subject to control, supervision, or direction by EOG. The agency is headed by a Chief Information Officer (CIO) who is appointed by the Governor and confirmed by the Cabinet, subject to confirmation by the Senate, and serves at the pleasure of the Governor and Cabinet.[7]

Current AEIT high-level organizational structure

[7] Section 14.204(1), (2), and (3), F.S.

AMERICAN OVERSIGHT

Principal responsibilities of AEIT include:

- Developing strategies for the design, delivery, and management of enterprise IT services;
- Planning and establishing policies and standards for enterprise IT services;
- Identifying and recommending strategies and opportunities to improve delivery of cost-effective and efficient enterprise IT services;
- Coordinating acquisition planning and procurement negotiations for hardware and software products and services;
- In consultation with the Department of Management Services (DMS), establishing best practices for the procurement of IT products; and
- Providing recommendations for consolidating the purchase of IT commodities and services, and for establishing a process to achieve savings through consolidated purchases.[8]

Pursuant to legislative direction, AEIT organizes the required consolidation of agency data centers, and is working on the implementation of an enterprise-wide email system.[9]

Change and Efficiency

Governance

The current operations and organizational configuration of IT is dispersed throughout individual state agencies and departments. This process limits the ability to execute system-wide changes and oversight. A lack of centralized IT governance also hinders streamlining and elimination of duplication to achieve efficiencies and cost savings.

Recommendations

The Task Force recommends redefining the role of AEIT in governance of state enterprise IT and clarifying designated enterprise applications and operations. Enterprise IT services for all state agencies and departments should be further defined under AEIT, with special considerations and exemptions determined by the agency. Centralizing all enterprise IT under AEIT will allow the agency to examine technology across all agencies to identify duplication in applications, operations, and associated processes. Eliminating duplication and consolidating technology assets will achieve cost savings and lead to more efficient, effective service for both agencies and the citizens they serve. Centralization will lead to a great economy of scale, which can be leveraged for significant cost savings in negotiation of contracts, licensing, and purchasing.

Clarifying enterprise applications and operations under a single agency will provide clear direction to the agency. This will allow AEIT to evaluate and make decisions on maintaining, advancing, or outsourcing technology solutions to best achieve efficiencies and cost savings.

Current law limits the scope of AEIT to IT services established in law as enterprise and used by all agencies or a subset of agencies. AEIT makes recommendations to the Legislature concerning services that should be designed, delivered, and managed as enterprise IT services, but the Legislature designates services as enterprise.[10]

[8] Section 14.204(4), F.S.
[9] Sections 282.201 and 282.282.34, F.S.
[10] *See* s. 282.0041(11), F.S.

AMERICAN OVERSIGHT

The Legislature should include the following applications and operations identified by the Task Force for centralization under AEIT:

- MyFloridaMarketPlace (MFMP);
- Legislative Appropriations System/Planning and Budgeting System (LAS/PBS);
- Florida Accounting and Information Resource (FLAIR) subsystem;
- PeopleFirst;
- Network services;
- E-mail; and
- Data centers.

Telecommunications and call centers should also be considered for centralization. These applications have considerable impact and utilization across multiple agencies. Centralization would eliminate duplicative equipment costs and physical lease space, streamline agency support models, and provide world class customer service.

Authority

AEIT is tasked with the responsibility for developing strategies for enterprise IT and writing policies for enterprise IT services established in law. Design, planning, project management and implementation are the responsibility of AEIT, while supervision, design, delivery, and management are handled by individual agencies.[11] In its current form, AEIT lacks the ability to implement and enforce its administrative rules across all state agencies.[12] This inhibits AEIT's effectiveness and allows agencies to delay or decline implementation of rules and recommendations for cost-effective and efficient enterprise projects.

Recommendations

The Task Force recommends strengthening statutory language to provide AEIT with enforceable governance. Section 14.204 and Chapter 282, F.S., should be modified to remove optional language for agency implementation of AEIT's recommendations and rules.[13] Affirmative language will allow AEIT to enforce its policies to effectively design, plan, and manage enterprise IT services in order to leverage assets in the most effective and efficient manner. AEIT should have the authority to create and enforce rules related to enterprise IT strategy, planning, standards, policy, project management, licensing, and contract management. AEIT should work with the Legislature to create enforceable standards that facilitate communication, collaboration, and consensus among agencies.

The Task Force recommends providing AEIT with budget and procurement authority for enterprise IT projects and services. Placing budget authority within AEIT instead of under disparate agencies will enhance consistency in IT allocations and spending. Budget authority will provide AEIT with the ability to enforce its recommendations and standards. Centralizing IT budgets will also provide transparency for IT funding across agencies. This transparency will facilitate faster discovery of efficiencies and cost savings.

Structure

Current law provides that the head of AEIT is the Governor and Cabinet, with an executive director who is the state's Chief Information Officer.[14] AEIT's responsibility is limited to executive branch agencies, including Cabinet agencies and departments.[15]

---

[11] *See* s. 282.0055, F.S.
[12] *See* ss. 14.204(4), (6), and (7), F.S. and s. 282.201(6), F.S.
[13] An example of strengthening language would be: "Develop, publish, and biennially update a long-term strategic enterprise information technology plan that identifies and provides governance for ~~recommends~~ strategies and opportunities to improve the delivery of cost-effective and efficient enterprise information technology services to be proposed for establishment pursuant to s. 282.0056." Section 14.204(4)(e), F.S.
[14] *See* ss. 14.204(1) and (3), F.S.

AMERICAN OVERSIGHT

Multiple attempts to create new enterprise IT governance structures have been unsuccessful or have had limited success.[16] The creation of new agencies may provide solutions, but may also create additional problems. For example, business processes could be transferred without sufficient evaluation. Also, new and unanticipated issues may arise from insufficient planning and management in the transfer of duties and creation of a new agency. Creation of a new entity is not the most effective solution. Any adjustments to IT centralization should include a thorough evaluation of business processes and sufficient planning and management to avoid past mistakes.

Recommendations

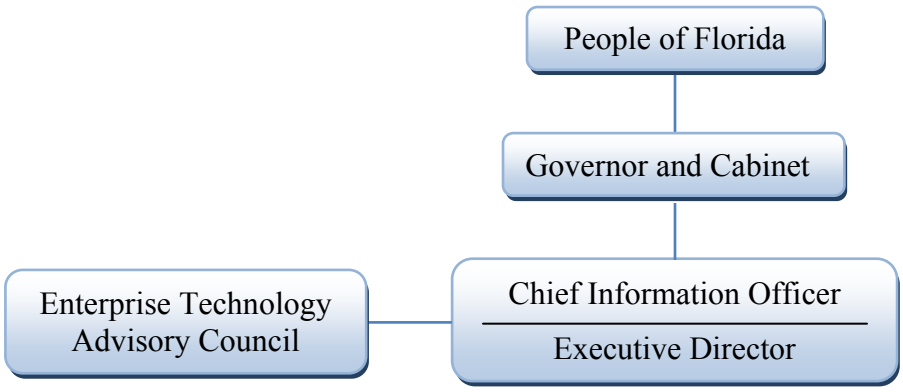
The Task Force recommends maintaining the current organizational structure of AEIT under the Governor and Cabinet. With governance of IT projects across all state agencies, AEIT should continue to be overseen by the Governor and Cabinet. This will provide appropriate oversight by stakeholders whose IT functions are managed by AEIT.

Successful implementation of enterprise IT projects requires agency cooperation and support. This issue has been raised by current agency CIOs as a critical element in establishing strong, centralized IT governance. Agency CIOs suggested that a method to improve AEIT's ability to garner agency support is through increased leverage of industry best practices, including those of both public and private sectors.[17]

The Task Force recommends establishing an Enterprise Technology Advisory Council (ETAC) of public and private industry chief information officers and IT professionals to function in an advisory capacity to the state CIO. ETAC will provide independent analysis of data to assist the CIO in developing standards and policies for enterprise services. Input from industry professionals with knowledge of current industry best practices will provide the CIO with additional resources and support for enterprise initiatives. ETAC will also assist in building consensus across agencies for enterprise projects and provide additional credence to AEIT initiatives. The council will help facilitate AEIT's ability to develop standards, and manage procurement and contracts to maximize efficiency and cost savings.

The Task Force recommends tasking the CIO with modifying AEIT's organizational structure to provide flexibility and nimbleness and to accommodate further adjustments as necessary. The CIO should be given authority to determine AEIT's internal organizational structure with consideration for the needs of the Governor, Cabinet, state agencies, and citizens of Florida. Flexibility to modify AEIT's structure will help the agency adapt to changing technology, business processes, and state needs.

---



[15] AEIT services are limited to "executive branch agencies created or authorized in statute to perform legislatively delegated functions." Section 282.0055, F.S. A list of executive branch agencies can be found at the State of Florida website, http://www.myflorida.com/taxonomy/government/executive%20branch/ (last visited 12/12/2011).

[16] The Legislature created the State Technology Office (STO) in 2000 to oversee agency IT resources. Due to issues in funding and legislative support, the law authorizing STO as the central state IT service entity was only partially implemented. Further changes to the responsibilities of STO and creation of the Florida Technology Council (FTC) to take over the role of IT oversight were vetoed by the Governor on June 27, 2005, and STO underwent de facto dissolution. The Florida House of Representatives, *Information Technology Management in Florida,* State Infrastructure Council/Spaceport and Technology Committee, January 2006 (copy on file with Government Efficiency Task Force staff). *See also* Ch. 2000-164, L.O.F., Ch. 2001-261, L.O.F., Senate Bill 1494 (2005), and Veto Message for Committee Substitute for Committee Substitute for Senate Bill 1494, June 27, 2005.

[17] An enterprise IT questionnaire developed by the Task Force was distributed to select state agency CIOs on November 18, 2011. Responses were compiled and distributed to the enterprise information technology work group members on December 2, 2011, (questionnaire and CIO responses on file with Government Efficiency Task Force staff).

AMERICAN OVERSIGHT

Recommended AEIT high-level organizational structure

Implementation

Agencies have historically approached IT projects within the scope of the individual agency, even when administering enterprise services. It is a challenge for agencies to accurately examine their role in the larger picture of state IT. Current enterprise IT projects would benefit from the focus provided by a single agency tasked with developing and implementing an overarching vision for enterprise IT services.

Recommendations

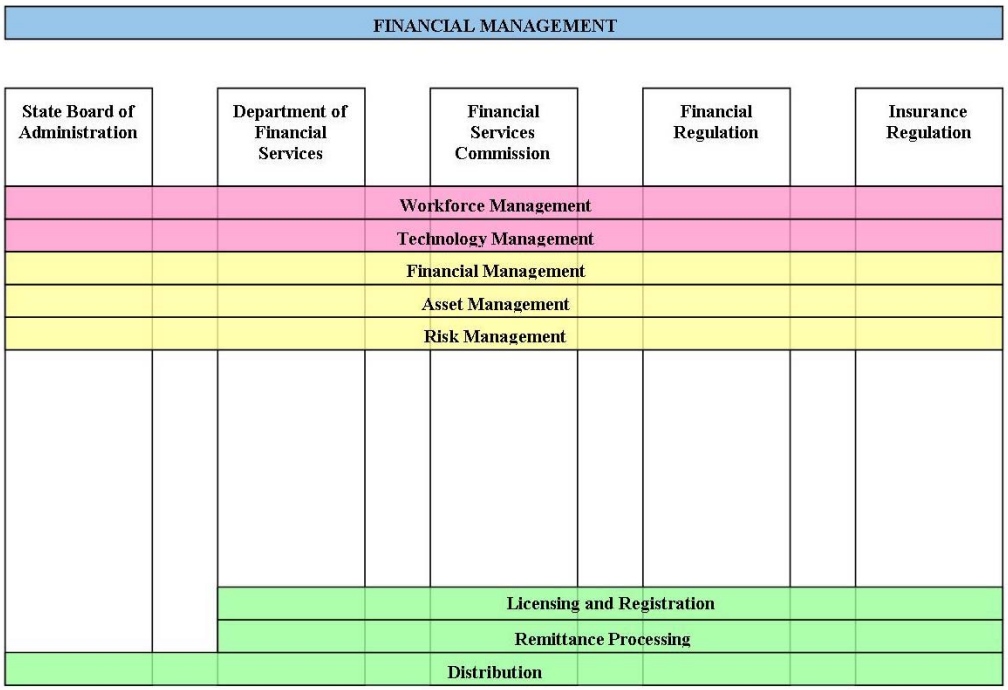
The Task Force recommends directing AEIT to identify and align agencies in process oriented design structures (PODS), grouping similar business processes and functions across state government. Lisa Vickers, Executive Director of the Florida Department of Revenue, presented a framework of state entities organized into process oriented design structures (PODS), or units based on similar functions, processes, and resources.[18] This model can be used to create an overarching schema for enterprise IT that supports all agencies, encourages collaboration, and locates efficiencies.[19]

The Task Force recommends directing AEIT to implement enterprise IT in support of this alignment, executed in successful phases according to business processes and functions. A phased approach will allow AEIT to effectively implement new strategies, governance concepts, and processes within logical, focused units.

The Task Force recommends directing AEIT to immediately begin identification and alignment of PODS with financial management, due to the foundational importance of the Florida Accounting and Information Resource (FLAIR) subsystem. Financial management serves a critical function to state operations, and its applications and data are utilized across numerous state agencies. An effective enterprise financial application would create efficiency and transparency, and provide effective tools for cost analysis.

The Task Force recommends implementing Phase 1 in a unit comprised of financial management agencies, including: the State Board of Administration, the Department of Financial Services, the Financial Services Commission, the Office of Financial Regulation, and the Office of Insurance Regulation (see appendix 1). Before starting Phase 1, AEIT should communicate with agencies to build consensus on the basic framework for a statewide financial management system. Initiating implementation with financial management, which includes a significant IT component, would provide a greater benefit to the state and realize substantial cost savings.

---



[18] Lisa Vickers, Executive Director of the Florida Department of Revenue, presented a consolidated government concept utilizing this structure to the Task Force on December 2, 2011. Presentation video, audio podcast, and materials are available at www.floridaefficiency.com/meetings.cfm (last visited 12/13/2011).

AMERICAN OVERSIGHT

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: State Procurement

RECOMMENDATION SUMMARY

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding state procurement by a vote of 10 yeas, 0 nays:

- **Increased utilization of state term contracts**
  - Review all statutory barriers and remove those unnecessary for full utilization of state term contracts.
  - Create a process that gives the Department of Management Services (DMS) an approval role for non-state term contract purchases by agencies.
  - Estimated savings for strategically sourcing the estimated $1.8-$2.5 billion in potential sourceable spend is 6-10%, or **$108-$180 million** to **$150-$250 million** per year.

- **Increased utilization of MyFloridaMarketPlace**
  - Review the 1% usage fee for MyFloridaMarketPlace (MFMP) and adjust to allow for the greatest utilization by state agencies and other eligible users. Increased utilization is estimated to achieve savings of **$9.5 million** per year.
  - Measure full cycle utilization of MFMP through DMS. Reduction in hard and soft costs is estimated to achieve savings of **$10.9-$11.9 million** per year.
  - Provide a public facing catalog solution for other eligible users of MFMP.
  - Convert Florida commodity codes to the National Institute of Governmental Purchasing (NIGP) codes.

- **Increased effectiveness of MyFloridaMarketPlace**
  - Implement a data analytics solution for MFMP.
  - Automate electronic posting of solicitations created in Sourcing to the Vendor Bid System.
  - Automate the workflow between the Ariba Buyer and Ariba Sourcing modules of MFMP.
  - Provide a public portal for contract information.

- **Strategic sourcing**
  - Utilize the increased visibility and volume in spend achieved via increased use of state term contracts and MFMP to strategically procure commodities and services.
  - Create an incentive model that utilizes savings achieved by agencies to encourage participation in strategic sourcing.

- **Consultants' Competitive Negotiation Act (CCNA)**
  - Allow agencies to utilize the "Best Value" process for all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping. This process would allow price to be a factor of up to 50% when ranking the top three most qualified firms.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. BACKGROUND AND RECOMMENDATION(S)

A. STATE PROCUREMENT

Department of Management Services

The Department of Management Services (DMS) provides administrative and support services to other state agencies and to state employees. DMS's areas of responsibility include, but are not limited to:

- Employee benefits (retirement and insurance);
- Human resource management;
- Business operations (real estate development and management, state purchasing, and specialized services);
- Telecommunications; and
- Agency administration.[1]

State Procurement of and Contracts for Personal Property and Services

Under ch. 287, F.S., the Division of State Purchasing in DMS is responsible for developing and administering standardized procurement policies, procedures, and practices to be used by state agencies in acquiring commodities, contractual services, and information technology. A variety of procurement methods are available for use by the agencies depending on the cost and characteristics of the needed good or service, the complexity of the procurement, and the number of available vendors. To guide the procedures for the procurement method to be used, the type of review required, and the method for the award of any contract, the following purchasing categories with threshold amounts have been established:

- Category one: $20,000
- Category two: $35,000
- Category three: $65,000
- Category four: $195,000
- Category five: $325,000[2]

DMS prescribes methods of securing competitive sealed bids, proposals, and replies.[3] The competitive solicitation process must be used for procurement of commodities or contractual services in excess of the category two threshold amount and include any of the following solicitation methods: invitations to bid, requests of proposals, and invitations to negotiate. Many services procured by state agencies are exempt from competitive solicitation requirements regardless of whether the purchase exceeds the applicable cost threshold, including artistic services, auditing services, and legal services.[4] Agencies currently must seek approval from DMS to use an alternate contract source to purchase commodities or services from term contracts or requirements contracts competitively established by other governmental entities. In approving the alternate contract source, DMS determines if the contract source is cost-effective and in the best interest of the state.[5]

All agreements in excess of the category two threshold must be evidenced by a written agreement and include provisions for the required minimum level of service to be performed by the contractor, criteria for evaluating the successful completion of each deliverable, and financial consequences for nonperformance. There must

AMERICAN OVERSIGHT

also be a provision dividing the contract into quantifiable, measurable, and verifiable units of deliverables that must be received and accepted in writing by the contract manager before payment. Each deliverable must be directly related to the scope of work and specify the required minimum level of service to be performed and criteria for evaluating the successful completion of each deliverable.[6]

State agencies may use a variety of procurement methods, depending on the cost and characteristics of the needed good or service, the complexity of the procurement, and the number of available vendors. These include the following:

- "Single source contracts," which are used when an agency determines that only one vendor is available to provide a commodity or service at the time of purchase;
- "Invitations to bid," which are used when an agency determines that standard services or goods will meet its needs, wide competition is available, and vendors' experience will not greatly influence the agency's results;
- "Requests for proposals," which are used when the procurement requirements allow for consideration of various solutions and the agency believes more than two or three vendors with the ability to provide the required goods or services exist; and
- "Invitations to negotiate," which are used when negotiations are determined to be necessary to obtain the best value and involve a request for highly complex and customized services by an agency dealing with a limited number of vendors.[7]

Chapter 287, F.S., also establishes a process by which a person may file an action protesting a decision or intended decision pertaining to contracts administered by DMS, a water management district, or certain other agencies.[8]

State Term Contracts

Agencies also purchase commodities and contractual services utilizing agreements called “state term contracts” procured by DMS.[9] A state term contract is an agreement that leverages the state’s volume and buying power to procure the best price for services and commodities. DMS negotiates state term contracts when it is in the best interest of the state to purchase mass quantities of a specific commodity or service. DMS is also responsible for compiling statistical procurement data concerning the method of procurement, terms, usage, and disposition of commodities and contractual services by agencies. This data is available in the Florida Accounting Information Resource (FLAIR) subsystem and the state’s MyFloridaMarketPlace (MFMP) centralized e-procurement system.[10]

The advantage of state term contracts is that the procurement process allows the state to leverage increased volume and buying power to provide commodities and services at lower cost to state agencies and other eligible users (OEUs).[11] The more state agencies and OEUs utilize state term contracts, the more leverage DMS has in negotiating a better price. In FY 2011-12, the Division tracked the following state term contracts:

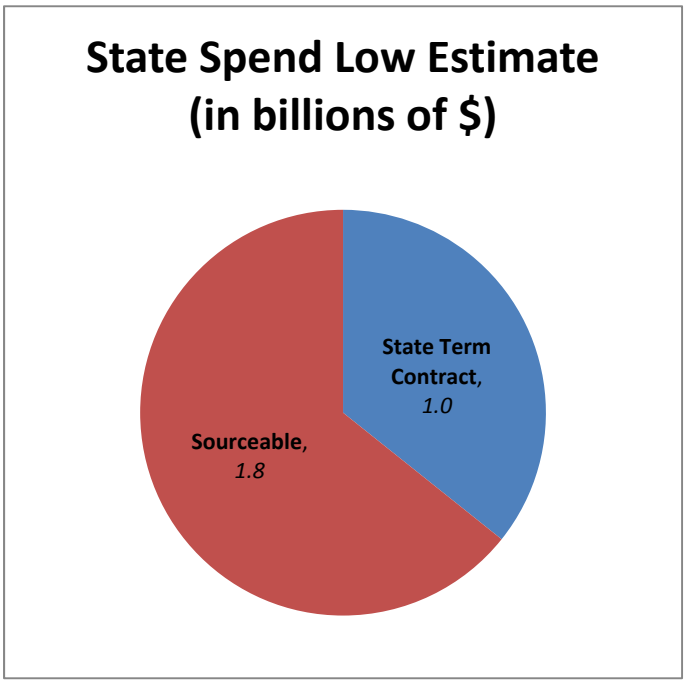
[11] Section 287.012(11), F.S., provides that “’Eligible user’ means any person or entity authorized by the department pursuant to rule to purchase from state term contracts or to use the online procurement system.” Rule 60A-1.005, F.A.C., provides that the following entities are eligible users: governmental entities as defined in s. 163.3164, F.S., (a county, city, school board, or special district that has a physical presence in Florida) and any independent, nonprofit college or university that is located within the State of Florida and is accredited by the Southern Association of Colleges and Schools.

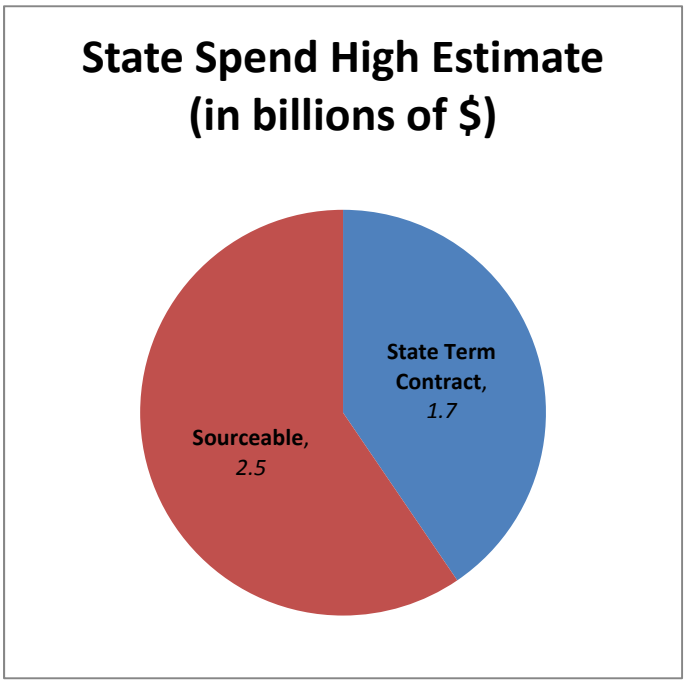
AMERICAN OVERSIGHT

- PCs, laptops, and monitors;[12]
- Information Technology (IT) network infrastructure;[13]
- Medical and dental supplies;[14]
- Office and classroom supplies;[15]
- Uniforms;[16] and
- Office and educational consumables.[17]

DMS identified $41.6 million in annualized savings over FY 2011-12, which equates to 19% savings compared to the estimated spend under the pre-state term contract price.[18]



Category	Estimated Annual Spend (Before Sourcing)	Actual Identified Annual Savings $	Actual Identified Annual Savings %	Impacted FY 2011-12 Spend	Actual FY 2011-12 Spend	Actual FY 2011-12 Savings
PCs, Laptops and Monitors	$174,861,114	$56,834,099	33%	$88,944,688.47	$60,035,496	$28,909,172.47
IT Hardware: Network Infrastructure	$133,857,238	$15,661,312	12%	$91,204,979.65	$80,533,987	$10,670,922.65
Medical/Dental Supplies	$8,466,927	$2,024,192	24%	$1,569,471.19	$1,194,257.00	$375,214.19
Office and Classroom Supplies	$45,717,154	$3,116,256	7%	$4,915,976.74	$4,580,885.00	$335,091.74
Uniforms	$2,285,981	$325,461	14%	$718,246.76	$615,988.00	$102,258.76
Office and Education Consumables	$40,463,264	$1,627,757	4%	$31,235,860.42	$29,986,426.00	$1,249,434.42
Totals	**$405,651,678**	**$79,589,077**	**19.6%**	**$218,589,203.23**	**$176,947,039**	**$41,642,164.23**



Despite the demonstrated success that DMS has attained in reducing costs for services and commodities through state term contracts, there is a large amount of unaddressed state spend that is not volume purchased through these contracts.[19] Many state agencies have not taken full advantage of the state term contracts provided by DMS, so volume purchasing opportunities are missed. DMS estimates that $1 to $1.7 billion[20] was purchased by state agencies through a state term contract last fiscal year with the opportunity to source[21] an

[12] Contract 250-040-08-1.

[19] Florida Senate, *State Contract Management System*, February 2011.
[20] DMS was able to track $1 billion of state term contract spend through MFMP and estimates that an additional $700 million was purchased on state term contracts outside of MFMP through FLAIR for a total estimate of $1 to $1.7 billion in total agency spend.
[21] "Opportunity to source" refers to agency spend to which a strategic sourcing methodology could be applied (i.e., a state term contract could be negotiated to procure the service or commodity).

AMERICAN OVERSIGHT

additional $1.8 to $2.5 billion of state agency spend. This potential sourceable spend does not include OEUs, or commodities or services exempted pursuant to s. 287.057(3)(f), F.S.

If DMS was able to strategically source the additional $1.8 to $2.5 billion in sourceable spend through multiple state term contracts and achieve a savings between 6-10%, the result would be in the range of $108-$180 million[22] to $150-$250 million[23] per year.

Change and Efficiency

Increase Use of State Term Contacts

The Task Force identified two primary reasons for under-utilization of state term contracts:

1. Lack of enforcement capability of DMS for state term contracts; and
2. Statutory barriers in the form of exceptions of use.

Approval of Non-Use of State Term Contracts

Section 287.042(2)(a), F.S., provides that DMS has the duty:

> To establish purchasing agreements and procure state term contracts for commodities and contractual services, pursuant to s. 287.057, under which *state agencies shall*, and eligible users may, make purchases pursuant to s. 287.056.[24]

[22] This range is based on a 6% or 10% savings on the additional $1.8 billion of potential sourceable spend.
[23] This range is based on a 6% or 10% savings on the additional $2.5 billion of potential sourceable spend.
[24] Emphasis added.

AMERICAN OVERSIGHT

Additionally, s. 287.056, F.S., provides that:

> *Agencies shall*, and eligible users may, purchase commodities and contractual services from purchasing agreements established and state term contracts procured, pursuant to s. 287.057, by the department.[25]

While state agencies are required to utilize state term contracts pursuant to statute,[26] DMS lacks an enforcement mechanism. Pursuant to Rule 60A-1.044, F.A.C., an agency that chooses to purchase outside a state term contract need only document why the state term contract does not meet its needs. Since DMS does not have a part in the approval process for non-state term purchases, the department does not receive feedback for improvement of state term contracts, which leads to ineffective contract negotiation and spend analysis.

Recommendations

The Task Force recommends creating a process that gives the Department of Management Services an approval role for non-state term contract purchases by agencies. Currently, while an agency may be mandated by statute to purchase from a state term contract, there is no approval or enforcement mechanism. DMS should have an approval role for agency purchases when the purchase can be made on a state term contract and the agency wants to purchase elsewhere. This would aid DMS in collecting data regarding the effectiveness of the state term contract and also enforce utilization of the state term contract when appropriate. This recommendation would aid DMS in strategically sourcing the estimated $1.8-$2.5 billion in potential sourceable spend to achieve an estimated savings between 6-10%. This would equate to a savings of **$108-$180 million**[27] to **$150-$250 million**[28] per year.[29]

Statutory Barriers to Use of State Term Contracts

There are several statutory barriers to use of state term contracts. Section 287.057(3)(f), F.S., lists exceptions to the competitive solicitation requirements, including:

- Artistic services;
- Academic program reviews;
- Lectures by individuals;
- Legal services;
- Health services;
- Services provided to persons with mental or physical disabilities by not-for-profit corporations;
- Medicaid services delivered to an eligible Medicaid recipient;
- Family placement services;
- Prevention services related to mental health;
- Training and education services;
- Contracts entered pursuant to s. 337.11, F.S.; and
- Services or commodities provided by governmental agencies.

For example, in FY 2010-11, $315 million, or 24% of the $1.27 billion, in substance abuse and mental health contracts were procured under the health services exemption.[30] This spend may be sourceable, but due to the

[25] Emphasis added.
[26] *See* ss. 287.042(2)(a), and 287.056(1), F.S.
[27] This range is based on a 6% or 10% savings on the additional $1.8 billion of potential sourceable spend.
[28] This range is based on a 6% or 10% savings on the additional $2.5 billion of potential sourceable spend.
[29] Sourcing and management of the added state term contracts may require additional staff.

AMERICAN OVERSIGHT

statutory authority, the purchase is exempt. Additionally, the combined spend for all exempt procurements is $8.4 billion annually.[31]

Recommendations

The Task Force recommends removing statutory barriers to full utilization of state term contracts. All exceptions to the competitive procurement process should be reviewed and those that are unnecessary should be repealed. By removing exemptions, there will be an increase in competition and ensure the best value for the State of Florida.

MyFloridaMarketPlace

MyFloridaMarketPlace (MFMP) was established to create a procure-to-pay system for commodities and services. The system aids DMS in utilizing a strategic sourcing methodology for state purchasing.[32] MFMP's purpose is to increase visibility and analysis into statewide spend, which allows the state to consolidate purchases across state entities. The strategic sourcing model used by the Division of State Purchasing (the division) seeks to maximize usage of MFMP by state agencies and other eligible users (OEUs) to:

- Increase total spend under management;
- Increase spend visibility; and
- Leverage the increased visibility and volume of spend to develop better procurements.

This visibility allows the division to target deeper discounts through negotiations with suppliers, resulting in stronger contracts. The state as a whole, including local governments, realizes reduced costs of procured products and services from these contracts. MFMP currently provides catalog availability only to agencies in the State of Florida. Currently, less than 50 percent of State of Florida spend is under management. Industry best practice is to achieve spend management of more than 80 percent, which has been achieved by other states.[33]

Utilization of MFMP by agencies provides the following benefits to the state:

1. Supply base management, which reduces procurement costs;
2. Supplier portal/network access, which creates greater competition;
3. Spend analysis, which provides a better understanding of state purchases;
4. Strategic sourcing, which leverages more dollars in order to achieve better pricing;
5. Contract lifecycle management, which reduces transition costs and providers greater visibility of spend; and
6. Procure-to-Pay availability, which reduces transaction costs.

In order for the state of Florida to achieve the greatest procurement efficiency and savings, state agencies need to utilize MFMP to its fullest capability. With greater use, the state agencies will achieve:

- Tighter control and better visibility of their purchases;
- Better control of encumbered funds;
- Significant reduction in invoicing and payment costs; and
- Easier detail and accessibility of spend data for audit purposes.

AMERICAN OVERSIGHT

State Agency Utilization of MFMP

Currently, MFMP is not fully utilized by all agencies across state government. Measuring agency utilization is best captured in terms of the percent of addressable spend that is captured in agency MFMP Purchase Order (PO) dollars. Currently, DMS State Purchasing identified $3.8 billion of addressable spend in FY 2011-12. This was derived from FLAIR payments to vendors, categorized by accounting object code.

The expected total MFMP PO dollars at full agency utilization totals an estimated $3.6 billion. Currently, there are state agencies that are exempted from both competitive solicitation and utilization of MFMP. According to DMS, exempt agencies account for an additional estimated $100 million in addressable spend, while purchasing card (P-card) transactions account for an additional estimated $123 million in addressable spend. Additionally, approximately $1.7 billion of the $3.6 billion (47 percent) went through MFMP POs in FY 2011-12. Lastly, 32 vendors account for more than 65 percent of PO dollars not entered in MFMP. To better understand current state agency utilization trends, the Task Force has broken down agency MFMP PO utilization below into three categories:

1. State agencies with high utilization;
2. State agencies with medium utilization; and
3. State agencies with low utilization.

The chart below shows the agencies organized by MFMP utilization.

State Agencies with High MFMP Utilization (75% or More PO Adoption)	State Agencies with Medium MFMP Utilization (75-30% PO Adoption)	State Agencies with Low MFMP Utilization (Less than 30% PO Adoption)
The Agency for Work Force Innovation[34]	Department of Health	State Courts System
Department of Highway Safety and Motor Vehicles	Department of Corrections	Department of Revenue
Division of Administrative Hearings	Department of State	Department of Juvenile Justice
Department of Veteran Affairs	Department of Elder Affairs	Department of Transportation
Florida Fish and Wildlife Conservation Commission	Attorney General and Legal Affairs	Department of Environmental Protection
Department of Financial Services	Executive Office of the Governor	Department of Military Affairs
Florida Department of Law Enforcement	Department of Community Affairs[35]	Agency for Health Care Administration
Department of Children and Families[1]	Florida Parole Commission	Department of Citrus
Department of Business and Professional Regulation	Florida School for the Deaf and Blind	Florida Lottery
Department of Management Services		Department of Education
Agency for Persons with Disabilities		

[1] As of March 2012, the Department of Children and Families has 100 percent fully integrated MFMP utilization throughout the agency.

Change and Efficiency

Increase Usage of MyFloridaMarketPlace

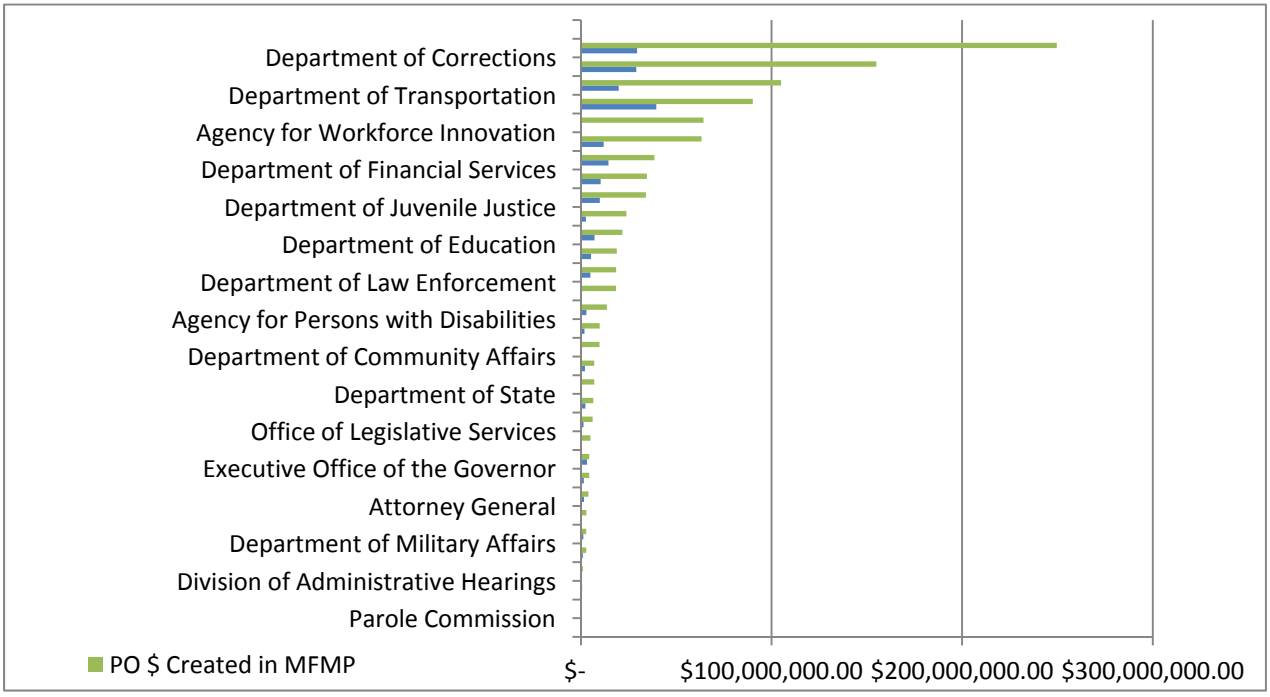
1% Transaction Fee

One of the main identified factors for under utilization involved the 1% fee currently charged to vendors who utilize MFMP. Section 287.057(22)(c), F.S., provides that: “The department may impose and shall collect all

[34] Transitioned to Department of Economic Opportunity in 2011.
[35] Transitioned to Department of Economic Opportunity in 2011.

AMERICAN OVERSIGHT

fees for the use of the online procurement systems." The statute provides DMS flexibility in setting the fees for usage of MFMP. The current 1% is established via Rule 60A-1.031, F.A.C., with a list of exceptions to the 1% fee provided in Rule 60A-1.032, F.A.C.



Recommendations

The Task Force recommends that the 1% usage fee for MyFloridaMarketPlace be reviewed and adjusted to allow for the greatest utilization by state agencies and other eligible users. Users of MFMP are charged a 1% usage fee. The fee and funding structure of MFMP should be reviewed and changed to allow for the greatest utilization.[36] If increased utilization was able to generate a 1% savings on only 50% of the possible spend that could utilize MFMP, the savings would total **$9.5 million** per year.[37]

Full Cycle Utilization

As demonstrated in the below graph, agencies do not fully utilize MFMP. Many agencies will order (create a PO) within the system, but will not utilize the e-Invoicing system; instead the agency will utilize FLAIR. Utilizing FLAIR creates additional soft and hard costs[38] involved in the invoicing process. Two separate reports estimate a savings of $10-$15 per transaction if the order were to be processed via the e-Invoicing in MFMP rather than through FLAIR.[39] DMS has estimated a cost savings of $10.9-$11.9 million per year if 80% of addressable spend were to utilize the e-Invoicing system with MFMP.

MFMP Invoice Payment dollars against MFMP POs

[36] DMS provided several high-level concepts of a revised fee, including reducing the fee, an e-transaction incentive model, and two hybrid models (copy on file with Government Efficiency Task Force staff).
[37] This is calculated by taking 1% of the 50% of the $1.9 billion in potential MFMP spend (1% of $950 million), which equates to $9.5 million.
[38] Soft costs refer to the labor involved in processing the order, while hard costs refer to the printing and sending of the invoice.
[39] These reports were done by Forrester and Accenture (copy on file with Government Efficiency Task Force staff).

AMERICAN OVERSIGHT

Recommendations

The Task Force recommends that DMS measure full cycle utilization. There are significant savings to be realized by not printing and mailing out invoices to customers. The hard costs alone (postage, paper, custom envelopes) are significant enough to justify adoption, but there are also significant soft costs in labor savings. Agencies should utilize MFMP for invoicing. This recommendation would result in savings of **$10.9-$11.9 million** per year if implemented.[40]

MFMP Enhancements

DMS's objective is to establish the following guiding principles to ensure that MFMP is fully as a best-in class[41] e-Procurement solution:

- Maximize spend visibility;
- Maximize usage by both agencies and other governmental entities;
- Bring best value to the state through strategic sourcing, standard contracts, and processes;
- Manage administrative costs through self-service and a shared services delivery model; and
- Create a flexible technology platform that is easy to use and maintain.

There are several enhancements available to the MFMP system that can further improve the realized efficiencies, produce greater savings from economies of scale, support open government requirements, better leverage OEU spend to Florida's collective benefit, further ease implementation of a unified statewide procurement process, embrace national and best-in-class standards, and embrace new cloud technology.

Recommendations

The Task Force recommends implementing a data analytics solution. MFMP should be modified to assist the state in gaining greater spend visibility for goods and/or services than is currently available. The goal should be data normalization at a minimum standard of 80 percent of the available dataset covering:

a. Suppliers – including but not limited to:
    i. Utilizing an external database to demonstrate parent-child relationships
    ii. Federal employer identification number (FEIN) validation
    iii. Physical location detail
b. Commodity code– including but not limited to:
    i. Transition to National Institute of Governmental Purchasing commodity codes
    ii. Validate commodity code spend against vendor business class
c. Supplier business status validation from a vendor-supplied database covering:
    i. Minority
    ii. Veteran
    iii. Small Business

The services should provide information that will support the shared services initiatives the state is currently undertaking and should provide greater visibility in expenditures made by state agencies. This enhancement provides the necessary data to support a strategic sourcing process for the State of Florida. The ability to access disparate data sources and normalize spend creates a benchmarking opportunity that allows agencies and other users to evaluate procurement performance.

The Task Force recommends automating electronic posting of solicitations created in Sourcing to the Vendor Bid System (VBS). DMS developed and manages the VBS, to which approximately 1,000 solicitations

[40] The savings estimate uses DMS calculations based on two reports by Accenture and Forrester.
[41] Gartner, *Understanding Your Top Procurement Processes*, May 11, 2011 (copy on file with Government Efficiency Task Force staff).

AMERICAN OVERSIGHT

are posted each year. DMS also uses the Ariba Sourcing application to post solicitations and receive responses. One of DMS's goals is to roll-out the Ariba Sourcing application to all agencies. Currently all agencies use VBS and are required to manually post information in the system. DMS should create a solution to facilitate the automated posting of solicitation information in VBS from Ariba Sourcing to avoid manually entering data in both systems. This enhancement will reduce the duplication of efforts by state agencies as the Ariba Sourcing module is rolled out to other agencies in Florida.

The Task Force recommends that DMS automate the workflow between the Ariba Buyer and Ariba Sourcing modules. Buyers must manually create a requisition within MFMP Buyer when an electronic quote or sourcing event is awarded in the Sourcing tool. DMS should create a solution to automate the creation of requisitions in Buyer for electronic quotes awarded in Sourcing.

The Task Force recommends providing a public portal for contract information. DMS maintains all statewide agreement documents and contract information on the DMS website, as well as in the MFMP application. A best-in-class solution will provide a tool to maintain contract information within MFMP complemented by a public portal for contract information, in order to prevent the duplication of data in multiple locations. This enhancement would replace the DMS state term contract website and would be available to other agencies in a shared solutions model to support transparency in Florida.

Other Eligible Users (OEUs)

OEUs account for a significant amount of the sourceable spend on state term contracts. The more OEUs utilize state term contracts and MFMP, the more DMS is able to negotiate better prices due to increase in volume of spend. MFMP does not currently utilize a public facing catalog for OEUs. The public facing catalog would be similar to the platform on amazon.com or other on-line stores. The catalog would significantly increase the ease of ordering from MFMP for OEUs.[42]

MFMP also utilizes Florida commodity codes. This codes are unique to the state and do not correspond with the majority of industry codes. Most OEUs use National Institute of Governmental Purchasing (NIGP) codes. The difference in coding makes it difficult for OEUs to navigate and locate the commodities they wish to purchase through MFMP and post solicitations on VBS once it becomes available to OEUs.

Recommendations

The Task Force recommends providing a public facing catalog solution. DMS establishes catalogs for all state term contracts in MFMP Buyer from which customers purchase. Current catalog types include line items, punch-outs (an interface between a supplier's online ordering portal and Buyer), and ordering instructions (general instructions to buyers on how to purchase). DMS is working to create a solution to make the MFMP catalog component available to OEUs (e.g., cities, counties, and universities). This enhancement will also allow users to create a shopping cart of various items for print view reference and will accept P-card payment functionality. This addition will support the goal of increasing spend visibility by capturing purchases from OEUs and making them reportable in MFMP analysis. This enhancement will better drive spend to state term contracts. Leveraging purchases across the entire State of Florida is a key component of strategic sourcing and will deliver better value to all Florida taxpayers.

The Task Force recommends converting Florida commodity codes to the National Institute of Governmental Purchasing (NIGP) codes. The State of Florida currently leverages custom commodity codes. These commodity codes are maintained by the Division of State Purchasing (the division) and are associated to a default object code (defined by DFS). DMS is interested in moving away from Florida customized commodity codes to a set of standard industry codes. Most OEUs utilize NIGP codes. If they are adopted as the State of Florida standard, it will be easier for the OEUs to utilize MFMP and VBS.

[42] OEU spend is not currently tracked through MFMP. Vendors self report the sales in order to reconcile the 1% fee with the state. It is estimated that the amount reported by vendors is lower than the actual amount. *See* Rule 60A-1.031, F.A.C.

AMERICAN OVERSIGHT

Strategic Sourcing

The ultimate goal of the Task Force recommendations is to aid DMS in its mission to strategically source commodities and services, for both the state and OEUs, in order to achieve the best price. Increased utilization of state term contracts will immediately realize savings by negotiating a better price for agency purchases and will also allow DMS to continually negotiate better state term contracts through the increase in the volume of spend. Increased use of MFMP allows DMS to track spending and in turn negotiate new state term contracts or identify new avenues for savings.

Recommendations

The Task Force recommends utilizing the increased visibility and volume in spend achieved via increased use of state term contracts and MFMP to strategically procure commodities and services. If utilization of state term contracts and utilization of MFMP are increased, the state will achieve greater spend visibility and purchasing leverage. DMS should utilize these processes to strategically procure and achieve greater savings.

The Task Force recommends creating an incentive model that utilizes savings achieved by agencies to encourage participation in strategic sourcing. In order to encourage agency compliance with the utilization of state term contracts and MFMP, the state should adopt an incentive model that awards an agency for cost savings through strategic procurement. The state should set realistic goals for savings achievement and reward agencies for achieving those goals, not just for participating.

Consultants' Competitive Negotiation Act

The Consultants' Competitive Negotiation Act (CCNA) was passed in 1973.[43] The Act is largely based on the Federal Brooks Act, which was passed in 1972.[44] CCNA provides that all professional services within architecture, professional engineering, landscape architecture, or registered surveying and mapping[45] be contracted according to qualifications-based selection (QBS). CCNA applies to all projects above $325,000 and all studies above $35,000[46] bid out by the state, a state agency, a municipality, a political subdivision, a school district, or a school board.[47]

QBS follows these phases:

Phase One

1. The agency publicly announces the project or study.[48]
2. The agency evaluates current statements of qualifications and performance currently on file, together with those that are submitted by other firms and conducts discussions with no fewer than three firms regarding their qualifications, approach to the project, and ability to furnish the required services.[49]
3. The agency then selects in order of preference no fewer than three firms deemed to be the most qualified.[50]
4. The agency may consider the following factors in determining whether a firm is qualified: ability of professional personnel; whether a firm is a certified minority business enterprise; past performance;

[43] *See* s. 287.055, F.S.
[44] *See* Public Law 92-582.
[45] Section 287.055(2)(a), F.S.
[46] *See* s. 287.055(3)(a)(1), F.S., which cites to s. 287.017, F.S. Section 287.017(5), F.S., provides that a category 5 project is defined as a project over $325,000 and s. 287.017(2), F.S. provides that a category 2 is a study over $35,000.
[47] Section 287.055(2)(b), F.S.
[48] Section 287.055(3)(a)(1), F.S.
[49] Section 287.055(4)(a), F.S.
[50] Section 287.055(4)(b), F.S.

AMERICAN OVERSIGHT

willingness to meet time and budget requirements; location; recent, current, and projected firm workload; and the volume of work previously awarded to each firm by the agency.[51]

5. The agency may not consider compensation during this phase.[52]

Phase Two

1. The agency negotiates with the most qualified firm regarding compensation.[53]
2. If the agency cannot come to an agreement with the most qualified firm, then negotiations with that firm must be formally terminated.[54]
3. The agency may then begin negotiations with the second most qualified firm.[55]
4. If the agency cannot come to an agreement with the second most qualified firm, then negotiations with that firm must be formally terminated.[56]
5. The agency may then begin negotiations with the third most qualified firm.[57]
6. If the agency cannot come to an agreement with the third most qualified firm, then negotiations with that firm must by formally terminated.[58]
7. If the agency cannot negotiate a satisfactory contract with any of the three most qualified firms, the agency can negotiate with additional firms selected in order of their competence and qualifications.[59]
8. Once negotiations with a firm are terminated, the agency may not resume negotiations with that firm for the project.

Recommendations

The Task Force recommends that state agencies utilize the "Best Value" process.[60] The best value process is defined as:

> The selection of a firm or firms whose proposal provides the greatest overall benefit to an agency in accordance with the requirements of a formal solicitation.

The best value process allows agencies to:

1. Solicit proposals and include a written scope of work for the project to the competing firms.
2. Rank all firms based on qualifications and establish a "short list."[61]
3. Rank "short listed" firms on qualifications and price.[62]

Price would be allowed to be solicited from the top three most qualified firms only and would be factored in to the evaluation at no more than 50%. Since unqualified firms would not make the original short list, only the most qualified firms would have an opportunity to be awarded the contract. This would address the concerns raised about health and human safety in the procurement process.

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Florida Retirement System (FRS)

RECOMMENDATION SUMMARY

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding the Florida Retirement System (FRS) by a vote of 10 yeas, 0 nays:

- **Define a goal for the state retirement system.** The state does not currently have a defined goal for the retirement system. The Florida Statutes and Constitution provide requirements, but do not outline a set goal or purpose for the state.

- **Prioritize portability and transferability of retirement funds.** The defined contribution (DC) plan currently offers portability for its members. Due to the changing nature of employment and the increasingly transient nature of employees, the state should place a priority on portability and transferability for all state employee retirement funds.

- **Review the assumed long term returns on the pension fund and the acceptable funding level.** The current assumed return for the FRS pension fund is 7.75%. This assumed rate should be reviewed in context of past market performance to determine if this is an accurate assumption. Various studies have indicated that a funding level of 80% is generally accepted as actuarially sound. As of June 2011, the FRS pension fund has a funding level of 87.5%. The funding level has many assumptions built in, including an assumed rate of return, length of FRS membership, and vesting time of benefits. The funding level policy should be reviewed in the context of the potential issues surrounding retirement funds. The Task Force also recommends that employees contribute a portion of their salary towards their retirement plan.

- **Place a cap on the average salary for calculating pension benefits.** High-salaried employees are one of the drivers of increased funding liability for the pension fund. The Internal Revenue Service (IRS) limits the amount of annual salary that may be applied towards retirement under a qualified plan. Currently, the IRS limits the annual salary to $245,000 for members hired on or after July 1, 1996, and $363,820 for members hired prior to July 1, 1996. The Task Force recommends a cap on salary applied towards retirement in line with the average salary of a head of state agency, which is $140,000.

- **Consider a hybrid retirement system.** Various states have either adopted or are considering a hybrid retirement plan (incorporates both defined benefit (DB) and DC plans). Florida should review the hybrid option as a method to reduce future unfunded liability, provide flexibility for employees, and ensure adequate guaranteed retirement funds for state employees, particularly lower earning employees.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. BACKGROUND AND RECOMMENDATION(S)

A. FLORIDA RETIREMENT SYSTEM

The Florida Retirement System (FRS) was established in 1970 when the Legislature consolidated the Teachers' Retirement System, the State and County Officers and Employees' Retirement System, and the Highway Patrol Pension Fund.[1] The Florida Retirement System Act[2] governs the FRS, which is a multi-employer plan that provides retirement benefits to 643,680 active members,[3] 319,689 retired members and beneficiaries, and 45,092 members in the Deferred Retirement Option Program (DROP).[4] The FRS is the primary retirement plan for employees of state and county government agencies, district school boards, community colleges, and universities.[5] Participation in the FRS is compulsory for most state employees.[6] The FRS also serves as the retirement plan for participating employees of 185 cities and 243 special districts.[7]

The membership of FRS is divided into five membership classes:

- Regular Class:[8] 561,126 (87.1%)
- Special Risk Class:[9] 72,675 (11.3%)
- Special Risk Administrative Support Class:[10] 63 (0.01%)
- Elected Officers' Class:[11] 2,218 (0.34%)
- Senior Management Service Class:[12] 7,598 (1.2%)[13]

There are currently two retirement programs in which a member of the Florida Retirement System may participate: The Florida Retirement System Pension Plan (defined benefit or DB plan) or the Florida Retirement System Investment Plan (defined contribution or DC plan).

FRS Pension Plan

The FRS DB Plan was created in 1970 and is administered by the Secretary of the Department of Management Services through the Division of Retirement. Investment management is performed by the State Board of Administration. The DB plan also serves as the default retirement plan membership for all FRS

AMERICAN OVERSIGHT

participants. As of July 1, 2011, all active FRS members are required to contribute three percent of their gross salary towards their retirement plan.[14]

A member vests in the pension plan and becomes eligible for lifetime pension benefits after six years of employment with an FRS employer if initially enrolled before July 1, 2011, or after eight years if initially enrolled July 1, 2011, and after.[15] The benefits payable are calculated based on the years of service times the accrual rate times the average final compensation.[16] As of February 29, 2012, the market value of the pension fund was $126.125 billion.[17]

FRS Investment Plan

In 2000, the Legislature created the FRS Investment Plan (DC plan), a defined contribution plan offered to eligible employees as an alternative to the pension (DB) plan. The earliest any member could participate in the investment plan was July 1, 2002.

The plan is similar to private sector 401(k) plans. Benefits under the investment plan accrue in individual member accounts funded by employee and employer contributions.[18] Benefits are provided though employee directed investments offered by approved investment providers.[19] As of February 29, 2012, the total amount of funds in the investment plan was $7.067 billion.[20]

Employer and Employee Contributions

Section 121.71, F.S., provides employee and employer contributions to the Florida Retirement System. For FY 2011-12, all active FRS members are required to contribute three percent of their gross compensation, with the exception of members of DROP.[21] The contribution rates to fund normal cost benefits by employers for each membership class for FY 2011-12 are:

- Regular Class: 3.28%
- Special Risk Class: 10.21%
- Special Risk Administrative Support Class: 4.07%
- Elected Officers' Class:[22] 7.02%
- Elected Officers' Class:[23] 9.78%
- Elected Officers' Class:[24] 9.27%
- Senior Management Class: 4.81%
- DROP: 3.31%[25]

Section 121.71(5), F.S., also provides for employer contributions in order to address unfunded actuarial liabilities of the FRS Pension Plan. The contribution rates for employers for each membership class for FY 2011-12 are:

---

[14] *See* s. 121.71(3), F.S.
[15] *See* s. 121.021(45)(b), F.S. The eight-year vesting period applies to employees covered under the FRS plan hired after July 1, 2011. The vesting period is six years for employees hired prior to July 1, 2011.

AMERICAN OVERSIGHT

- Regular Class: 0.49%
- Special Risk Class: 2.75%
- Special Risk Administrative Support Class: 0.83%
- Elected Officers' Class:[26] 0.88%
- Elected Officers' Class:[27] 0.77%
- Elected Officers' Class:[28] 0.73%
- Senior Management Class: 0.32%
- DROP: 0.00%[29]

Employer and employee contributions are contributed monthly to the Division of Retirement and are initially deposited in the Florida Retirement System Contributions Clearing Trust Fund.[30] Allocations to investment plan member accounts are established pursuant to section 121.72(3), F.S., by membership class. For FY 2011-12, the allocations for the investment plan members are:

- Regular Class: 9.00%
- Special Risk Class: 20.00%
- Special Risk Administrative Support Class: 11.35%
- Elected Officers' Class:[31] 13.40%
- Elected Officers' Class:[32] 18.90%
- Elected Officers' Class:[33] 16.20%
- Senior Management Class: 10.95%[34]

After making the allocations required by statute,[35] the remaining balance in the Florida Retirement System Contributions Clearing Trust Fund is transferred to the Florida Retirement Trust Fund to pay the costs of providing pension plan benefits and plan administration.[36] The disability coverage for Investment Plan members is administered by the Division of Retirement and the funding specified in s. 121.71(3), F.S., is transferred to the Florida Retirement System Trust Fund to pay the cost of this benefit.

Employee Participation

At the time of initial employment, a member of the FRS may choose to either participate in the pension plan or investment plan. If the member does not choose, the default choice is the pension plan. A member has one additional choice before termination or retirement to change retirement plans. The charts below reflect the current membership of the FRS by class and by retirement plan.[37]

AMERICAN OVERSIGHT

	Class	Members in Pension Plan	Total Salary	Members in Investment Plan	Total Salary
FRS	Regular	472,198	$18,585,083,221	88,928	$3,439,293,624
	Senior Management	5,430	$453,933,974	2,168	$145,877,359
	Special Risk	61,280	$3,315,508,794	11,395	$624,543,868
	Special Risk Administrative Support	45	$2,070,774	18	$796,462
	Elected Officers	1,682	$142,579,733	536	$26,073,922

The vast majority of FRS members participate in the pension plan (84%) versus the investment plan (16%). The percentage breakdown per class is as follows:

- Regular Class: 84.2% (Pension Plan) and 15.8% (Investment Plan)
- Senior Management Class: 71.5% (Pension Plan) and 28.5% (Investment Plan)
- Special Risk Class: 84.3% (Pension Plan) and 15.7% (Investment Plan)
- Special Risk Administrative Support Class: 71.4% (Pension Plan) and 28.6% (Investment Plan)
- Elected Officers' Class: 75.8% (Pension Plan) and 24.2% (Investment Plan)

Member plan choice has been consistent over the last three fiscal years. The chart below shows new employee choice of retirement plans.[38]

Participant Election Data			
	New Employee Elections		
	**Default to Pension	Pension Plan	Investment Plan
FY 2009-10	21,501 (55.5%)	8,158 (21.1%)	9,071 (23.4%)
FY 2010-11	21,049 (52.6%)	9,042 (22.6%)	9,960 (24.8%)
FY 2011-12*	6,317 (51.4%)	2,782 (22.7%)	3,179 (25.9%)
Total	48,867 (53.7%)	19,982 (21.9%)	22,210 (24.4%)
* Percentages are shares of FY Totals as of 12/31/2011 ** Based on focus group and survey data, up to 45% of defaulters use this option as their active plan election choice to the pension plan

AMERICAN OVERSIGHT

Change and Efficiency

Goal of the Florida Retirement System

The Florida Retirement System does not have an overriding goal in the Constitution or in statute. The Task Force provided several questions regarding the purpose of the FRS including:

- What is the state policy regarding the FRS?
- Is the purpose of the FRS for recruitment and retention of state and local employees?
- Is there a comparison between private and public retirement systems that provides a consistent balance between the two?

One articulation of the retirement system was that it was a three prong approach to retirement, where the FRS benefit served as one prong, with social security and personal savings serving as the other two prongs.[39]

Recommendations

The Task Force recommends defining a goal for the Florida Retirement System. The state does not currently have a defined goal for the retirement system. The Florida Statutes and Constitution provide requirements, but do not outline a set goal or purpose for the state.[40]

The Task Force recommends that portability and transferability of retirement funds be placed as a priority. The DC plan currently offers portability for its members. Due to the changing nature of employment and the increasingly transient nature of employees, the state should place a priority on portability and transferability for all state employee retirement funds.

B. FUNDING

The pension plan is funded through a combination of employee and employer contributions and investment earnings. Since the retirement benefits are guaranteed by the state, there is the potential for the pension fund to have a shortfall if the investment earnings are below the projected returns for the long term, or if the actuarially-required contributions are not paid to the system by employees and/or employers.
The pension fund's funding ratio[41] over the last twenty-five years has had a high of 118.1% and a low of 54.3%.[42] A 100% funding ratio indicates that the pension fund is able to meet its liabilities as of the valuation date for current retirees and current members who retire. In 2009, the funding ratio was 88.5%, in 2010 it was 87.9%, and in 2011 it was 87.5%.[43] Experts generally consider public pension plans with funding ratios at or above 80% to be fiscally sound.[44] The economic downturn has shown that state pension funds are vulnerable to market downturns.

---

[39] As provided by Sarabeth Snuggs, Director of the Division of Retirement, at the meeting of the Subcommittee on General Government, May 2, 2012. This is not an official position of DMS, but a common articulation of various pension plans. Ms. Snuggs also noted that a fourth prong would also be any retirement benefits from other employers in the course of the FRS member's career. *See* http://www.floridaefficiency.com/meetings.cfm (last visited 5/8/2012).
[40] The Task Force does not recommend a particular goal.
[41] A funding ratio is a comparison of a pension's assets to its liabilities (current and future).
[42] *See* State Board of Administration, *Pension Portfolio Overview as of 6/30/2011*, p. 2 (copy on file with Government Efficiency Task Force staff).
[43] *Id*. *See also* https://www.rol.frs.state.fl.us/forms/Asset_Liability_Chart.pdf (last visited 5/15/2012). The funding ratio represents assets versus liabilities at a given point in time. The percentages were calculated as of June 30th of that year.

AMERICAN OVERSIGHT

Change and Efficiency

Funding Ratio Assumptions

In calculating the funding ratios of pension funds, actuaries take several assumptions into consideration including: salary increases, inflation, and investment returns. Most states have an assumed return of around 8 percent.[45] The economic downturn has caused some to question if the assumed rate is too optimistic.[46] The board that oversees the California Public Employees' Retirement System (Calpers) reduced their assumed rate from 7.75% to 7.5%,[47] while the Illinois State Employees' Retirement System lowered their rate from 8.5% to 7.75%.[48] Florida has a return assumption of 7.75%.[49]

The Pew Center report outlines the main debate regarding the assumed return rate:

> At the heart of the debate surrounding the appropriate discount rate assumption is whether states should calculate the current value of these long-term promises using an expected rate of return. In other words, if investment returns are disappointing and do not meet expectations, states are still required to pay retirees the benefits they have earned.[50]

The study provides that several experts have recommended a riskless rate instead.[51] Two suggestions were the rate on 30-year treasury bonds[52] or the investment return required by the Final Accounting Standards Board, which is based on corporate bond rates.[53]

If Florida were to use a lower assumed rate of return, the funding ratio would be lower and additional contributions would be needed for the pension fund.[54] Based on the 2009 funding ratio, if the assumed rate were to be lowered to 5.22% the funding ratio would be 61% and if the rate was lowered to 4.38% the ratio would be 54%.[55]

[51] *Id.*
[52] *Id.* As of 5/10/2012, the yield on a 30-year treasury bond was 3.08 (at the time of the Pew Study the yield was 4.38). *See* http://www.bloomberg.com/markets/rates-bonds/government-bonds/us/ (last visited 5/10/2012).
[53] *Id.* As of 5/10/2012, the yield on a AA Corporate bond was 3.95 (at the time of the Pew Study the yield was 5.22) *See* http://www.bloomberg.com/quote/MOODCAA:IND (last visited 5/10/2012).
[54] The City of New York recently lowered the assumed rate of return from 8% to 7% on its pension fund, which will result in an additional $1 billion in contributions to the fund. Moody's gave this action a positive credit outlook, providing that, "While pension costs in the budget will increase, the plan over the long run will lead to greater stability, since using the 7% rate will mitigate market volatility in actuarial calculations of the city's pension liabilities." *See Moody's Welcomes Lower Investment Return Assumptions by Public Pensions*, Market News International, February 13, 2012, https://mninews.deutsche-boerse.com/index.php/moodys-welcomes-lower-invst-return-assump-public-pensions?q=content/moodys-welcomes-lower-invst-return-assump-public-pensions (last visited 5/15/2012).
[55] The ratio calculations are based on February 2009 pension figures released by the state and reflect the interest rate for a high end corporate bond (5.22%) and a 30 year US Treasury bond of 3/11. *See Can Investment Assumptions Worsen the State Pension Fund Crisis*, PBS News Hour, June 22, 2011, http://www.pbs.org/newshour/rundown/2011/06/can-investment-assumptions-worsen-the-state-pension-fund-crisis-1.html (last visited 5/15/2012).

AMERICAN OVERSIGHT

Recommendations

The Task Force recommends reviewing the assumed long-term returns on the pension fund and the acceptable funding level. The current assumed return for the FRS pension fund is 7.75%. This assumed rate should be reviewed in context of past market performance to determine if this is an accurate assumption.[56] Various studies have indicated that a funding level of 80% is generally accepted as actuarially sound. As of June of 2011, the FRS pension fund has a funding level of 87.5%. The funding level has many assumptions built in, including an assumed rate of return, length of FRS membership, and vesting time of benefits. The funding level policy should be reviewed in the context of the potential issues surrounding retirement funds. The Task Force also recommends that employees continue to contribute a portion of their salary towards their retirement plan.

The Task Force recommends that a cap be placed on the average salary for calculating pension benefits. High-salaried employees are one of the drivers of increased funding liability for the pension fund.[57] The Internal Revenue Service (IRS) limits the amount of annual salary that may be applied towards retirement under a qualified plan.[58] Currently, the IRS limits the annual salary to $245,000 for members hired on or after July 1, 1996, and $363,820 for members hired prior to July 1, 1996.[59] The Task Force recommends a cap on salary applied towards retirement in line with the average salary of a head of state agency, which is $140,000.[60]

C. GOVERNMENT RETIREMENT SYSTEMS

There are three main categories of retirement systems utilized by states:

- **Defined Benefit (DB)** – The traditional public pension structure in which the state (employer) assumes the risk of return and guarantees the employee's payments. The size of the employee's pension is based on a pre-defined equation that includes the employee's duration of service and salary. DB plans use final or greatest salary averages to determine an employee's pensionable salary. As such, the greatest portion of employer liability is accumulated during the latter years of employment.

- **Defined Contribution (DC)** – Similar to the private sector's 401(k) plan. The employee and/or the employer pay a portion of wages into an individual retirement savings account that is invested per the employee's direction. The eventual retirement benefits are determined by the value of the account. Investment risk is borne entirely by the employee.

  Cash Balance (CB) plans are also categorized as DC plans. These combine some elements of DB and DC in that the employer bears the risk of return, but the contributions are made into individual retirement accounts.

- **Hybrid Plans (HP)** – These combine DB and DC plans and can be parallel or stacked. Stacked HP plans offer DB benefits on a prescribed level of income (usually set at no more than the average salary) and enroll employees in an additional DC plan. Employee and employer contributions to the DC portion

---

[56] Staff of the State Board of Administration recently suggested reducing the target return by a half a percentage point. *See* Cotterell, Bill, "SBA report says it may be time for government employers to put more in pension fund," *Florida Current*, May 17, 2012, http://www.thefloridacurrent.com/article.cfm?id=27741971 (last visited 5/20/2012).

[57] There are currently 2455 members who make over $140,000 per year enrolled in the defined benefit plan and 361 members enrolled in the defined contribution plan. Information provided by DMS (copy on file with the Government Efficiency Task Force staff).

[58] Section 401(a)(17) of the Internal Revenue Code.

[59] *Id.* The amount is based on the original cap of $150,000 for members employed on or after July 1, 1996, and $250,000 for members employed prior to July 1, 1996, and is annually adjusted by the IRS to reflect cost-of-living increases. Salary caps from 1996 to 2011 are on file with the Government Efficiency Task Force staff.

[60] Based on salaries of the Secretaries of Transportation, Lottery, Department of Business and Professional Regulation, and Department of Children and Families. Information provided by DMS.

AMERICAN OVERSIGHT

of the plan can be optional or mandatory. Parallel HPs give the employee the option to save for retirement with a DC plan.

Hybrid Retirement Plan

Four states, Georgia, Indiana, Oregon, and Rhode Island, all operate mandatory HPs. Three states, Ohio, Utah, and Washington, offer optional HPs. States have taken different approaches as to administering the different elements of the plans. Some administer the DB portion themselves but outsource the DC element, whereas others administer both elements. Generally, the employer makes the vast majority, or even all, of the contributions required for the DB portion of the plan, while the employee is required to make a specified contribution to the DC portion.

Advantages of hybrid retirement plans include:

- Provides a guaranteed benefit to the retiree;
- Provides some portability through a DC plan for salary above the average employee salary; and
- The benefit liability of the state is lessened since the salary level is capped.

Disadvantages of hybrid plans include:

- Higher earning employees will have a lower guaranteed benefit; and
- It may be more expensive to administer dual plans as compared to one plan.

Rhode Island Hybrid Plan

Rhode Island is the most recent state to switch to a hybrid retirement plan. Rhode Island was facing an unfunded pension liability of $7.3 billion, which equated to a 48.4% funding ratio.[61] In 2011, the state adopted a stacked hybrid plan that includes a smaller DB plan with a DC plan. The main difference between Rhode Island and other states is that Rhode Island has enrolled most current employees as well as new employees.

Rhode Island estimates that the switch to a hybrid plan will decrease the states unfunded pension liability to $4.3 billion (approximately 41% decrease) and raise the funding ratio to 59.8%.[62] The pension plan is projected to achieve 80% funding by 2030 for Rhode Island state employees.[63]

Change and Efficiency

Types of Retirement Plans Offered

Florida currently offers a DB plan and a DC plan. The choice of plan is at the discretion of the member. Both plans have advantages and disadvantages for the FRS member and the FRS. The DB plan provides a guaranteed amount of retirement funds for the employee with a longer vesting period, but the FRS retains the liability for providing that amount regardless of market performance. The DC plan provides flexibility and portability for the members and there is no liability for the FRS, but the retirement amount is not guaranteed.[64] The hybrid retirement plan offers the benefits of both plans, while mitigating some of the disadvantages. In the hybrid plan, members receive a lower guaranteed benefit amount than a traditional DB plan, but are

[63] *Id.*
[64] The retirement funds are employee directed and may not have a market performance equal or greater than the state pension plan.

AMERICAN OVERSIGHT

supplemented by a DC plan as well. The hybrid plan reduces FRS liability, but continues to provide a reliable source of retirement funds for members.[65]

Recommendations

The Task Force recommends considering a hybrid retirement system. Various states have either adopted or are considering a hybrid retirement plan (incorporates both DB and DC plans). Florida should review the hybrid option as a method to reduce future unfunded liability, provide flexibility for employees, and ensure adequate guaranteed retirement funds for state employees.

[65] There are various different models of the hybrid plan. The Task Force does not recommend a particular model. The state should utilize SBA and DMS staff and private sector advisors to determine the benefits of each model for the State of Florida.

AMERICAN OVERSIGHT

Florida Government Efficiency Task Force

Recommendation Analysis

Subject Matter: Division of Real Estate Development and Management

RECOMMENDATION SUMMARY

On June 6, 2012, the Government Efficiency Task Force approved the following recommendations regarding the Division of Real Estate Development and Management by a vote of 9 yeas, 0 nays:

- **State Construction**

  The Task Force recommends utilizing a shared service model for state construction directed by one agency in order to create uniform best practices and achieve cost savings. Currently, the Division of Real Estate Development and Management only manages building construction projects in Department of Management Services (DMS) facilities or those projects designated as DMS managed when appropriated to agencies. Additionally, building construction staff is located in multiple agencies, there are inconsistencies in contracting, and economies of scale are not leveraged through bundling of similar projects. All agencies involved in building construction should operate a shared services model directed through DMS, allowing for uniform standards, best practices, rules, and procedures for state construction. The state should institute an automatic review process for all state construction projects with a projected cost over a certain threshold. The state should also focus on function, in addition to form, in the design and renovation of state buildings.

- **State Leasing**

  The Task Force recommends that DMS continue with current initiatives to increase the value of state leasing while reducing costs. DMS should continue its efforts to renegotiate leases statewide. DMS should propose legislation that will increase its authority in leasing decisions, save time in processing, and reduce the burden on private sector landlords. DMS should continue to work with other agencies and with local governments to maximize space utilization.

- **State Building Emergency Management**

  The Task Force recommends that DMS explore options for service management of state buildings and facilities in the event of a natural disaster. The state does not currently have a contracted service for management of state facilities in the case of a natural disaster (i.e. hurricanes). In order to ensure the continued functioning of state facilities, the state should address proper disaster preparedness.

AMERICAN OVERSIGHT

FULL RECOMMENDATION(S) ANALYSIS

I. BACKGROUND AND RECOMMENDATION(S)

A. DEPARTMENT OF MANAGEMENT SERVICES

The Division of Real Estate Development and Management

The Division of Real Estate Development and Management (REDM) is a division of the Department of Management Services (DMS).[1] REDM manages the Florida Facilities Pool (Pool),[2] administers public and private leasing for state agencies, and coordinates parking activities statewide. REDM manages construction projects for other agencies and serves as the state's lead real estate development consultant on state-administered construction projects.

As of July 1, 2011, there are 104 facilities in the DMS REDM-managed Pool.[3] By total, the facilities in the Pool represent less than one percent of the more than 20,000 facilities the state owns and manages.[4] REDM is responsible for a diverse set of resources within the Pool, ranging from the Capitol and Historic Capitol to the high-performance Department of Revenue complex in Tallahassee and the Department of Law Enforcement laboratory in Orlando.

Of these 104 Pool facilities, 69 are revenue-producing (available to lease).[5] The remaining 35 facilities in the Pool are special purpose properties such as the Historic Capitol, parking garages, and other structures that are not available for lease. As of July 1, 2011, DMS has 203 leases with state agencies in the 69 revenue-producing buildings.[6] In addition, as of July 1, 2011, agencies have entered into 971 leases with private landlords or federal and local government entities.[7]

Construction Management Oversight

Licensed professional staff within the Bureau of Building Construction provides project management oversight of public construction projects to help maintain the integrity of outsourced contracts with private providers.[8] In a process that often involves substantial tax dollars,[9] this oversight protects the public trust by ensuring that project managers spend taxpayer funds in accordance with legislative intent. REDM works with each customer to ensure the building meets the customer's business needs within the legislatively appropriated budget.

Change and Efficiency

Shared Service Model

Currently, REDM only manages building construction projects in DMS facilities or those projects designated as DMS managed when appropriated to agencies. Additionally, building construction staff[10] is located in multiple

---

[1] REDM has statutory authority pursuant to Chapters 215, 216, 255, 272, 281, 287, 288 and 489, F.S. The Division has 298.5 positions with an operating budget of $59.5 million and fixed capital outlay of $46.5 million. AMERICAN OVERSIGHT

agencies,[11] there are inconsistencies in contracting, and economies of scale are not leveraged through bundling of similar projects.

Recommendations

The Task Force recommends utilizing a shared service model for state construction directed by one agency in order to create uniform best practices and achieve cost savings. All agencies involved in building construction should operate a shared services model directed through DMS, allowing for uniform standards, best practices, rules, and procedures for state construction. The state should institute an automatic review process for all state construction projects with a projected cost over a certain threshold. The state should also focus on function, in addition to form, in the design and renovation of state buildings. The shared service model allows for cross agency utilization of design and construction staff, which will reduce costs and allow for accountability.

Leasing Management and Parking

REDM is the landlord for tenant agencies that occupy the 69 revenue-producing Pool facilities. Under the state's partially decentralized leasing model, Bureau of Leasing staff oversees agency acquisition of private leased space, in concert with the state's three contracted tenant brokers, with the goal to ensure effective use of taxpayer dollars.

- Bureau of Leasing staff members oversee 1,174 leases (203 Pool leases and 971 private leases), accounting for more than 13.9 million square feet of space that houses the majority of the more than 120,000 State of Florida employees.[12]
- Held at $17.18 per square foot for the last five years, the Pool rental rate is consistently below the market rate statewide.[13]
- DMS currently maintains a 96 percent occupancy rate for the Florida Facilities Pool.
- REDM provides parking for more than 29,000 users in 92 parking lots and garages statewide.

REDM has several leasing initiatives including:

- Implementing strategy spelled out in the 2011 Strategic Leasing Plan and Master Leasing Report to reduce the state's lease costs;[14] and
- Coordinating with agencies to reduce lease costs by 20 percent over FY 2011-12 and 2012-13.

Lease Cost Savings

Governor Rick Scott directed DMS to secure a 20 percent reduction in lease cost savings over FY 2011-12 and FY 2012-13, which equates to $24.2 million. DMS has coordinated with state agencies and the state's tenant brokers to renegotiate lease contracts for private office space in excess of 2,000 square feet. To date, renegotiations since July 1, 2011, will result in a reduction of lease costs of more than $15 million and a net reduction of the state's leased portfolio by more than 350,000 square feet. DMS has projected that it will exceed the Governor's expectations and timeline.

---

[11] These agencies include the Department of Health, Department of Children and Families, Department of Corrections, Department of Environmental Protection, Department of Highway Safety and Motor Vehicles, and Department of Transportation.
[12] Information provided by REDM (copy on file with Government Efficiency Task Force staff).
[13] The pool rental rate is established in the General Appropriations Act each year. DMS annually submits a budget in accordance with s. 255.511, F.S. The rate accounts for the following factors: annual debt service, capital depreciation, reserve deposits, tenant space improvement funding, Capitol Police, and expenditures related to the operation and maintenance of each facility in the pool.
[14] For a copy of the Lease Renegotiation Status Report please see: http://www.dms.myflorida.com/business_operations/real_estate_development_management/facilities_management/lease_management (last visited 5/29/2012).

AMERICAN OVERSIGHT

Recommendations

The Task Force recommends that DMS continue with current initiatives to increase the value of state leasing while reducing costs. DMS should continue its efforts to renegotiate leases statewide. DMS should propose legislation that will increase its authority in leasing decisions, save time in processing, and reduce the burden on private sector landlords. DMS should continue to work with other agencies and with local governments to maximize space utilization.

Facility Management

REDM operates and maintains more than 12.1 million gross square feet of space in Pool facilities, including adjacent grounds and parking facilities.[15] Building oversight tasks include, but are not limited to: building supervision, engineering and technical support, energy management, electrical, heating, ventilation and air conditioning, renovation services, central maintenance, parking, grounds keeping, fire and life safety, Americans with Disabilities Act compliance, and environmental and custodial services.

Emergency Services

The state does not currently have a contracted service for emergency management of state facilities in the case of a natural disaster. With the many state owned and managed facilities, it is necessary to have a contracted service to provide for the management of state properties.

Recommendations

The Task Force recommends that DMS explore options for service management of state buildings and facilities in the event of a natural disaster. The state does not currently have a contracted service for management of state facilities in the case of a natural disaster (i.e. hurricanes). In order to ensure the continued functioning of state facilities, the state should address proper disaster preparedness.

Dear Governor Scott, Chief Justice Labarga, Representative Corcoran, and Senator Lee:

Pursuant to Article III, section 19(i) of the Florida Constitution, the Government Efficiency Task Force ("Task Force") is pleased to submit its final recommendations to the Governor, the Chief Justice of the Supreme Court, the Chair and Vice Chair of the Legislative Budget Commission. The enclosed report includes 29 recommendations which, if implemented, will significantly improve the efficiency of government operations and will reduce the costs of government by more than $2 billion annually. The Task Force extends its appreciation to the staff at Florida TaxWatch for their assistance in the preparation of this report.

Thank you for the opportunity to serve the taxpayers of Florida.

Sincerely,

John R. Alexander
Chair

INTRODUCTION

PURPOSE

This report represents the final recommendations of the 2015-16 Government Efficiency Task Force. These 29 recommendations, if implemented, will significantly improve the efficiency of government and reduce the cost of government by an estimated $2.14 billion (low estimate) to $12.14 billion (high estimate) annually. When eliminating the remaining barriers to telehealth is considered, Florida taxpayers stand to save billions in healthcare costs annually.

ABOUT THE GOVERNMENT EFFICIENCY TASK FORCE

In 2006, voters approved an amendment to the Florida Constitution creating the Government Efficiency Task Force[1] ("Task Force"), for the purpose of developing recommendations to improve governmental operations and reduce costs. First established in 2007, the Task Force is required to meet every four years and submit its recommendations to the Chairperson and Vice Chairperson of the Legislative Budget Commission, the Governor, and the Chief Justice of the Supreme Court. The Task Force is composed of 15 members of the Legislature and representatives from the private and public sectors who are appointed by the Governor (5), the Speaker of the House of Representatives (5), and the President of the Senate (5). The Task Force has one year in which to complete its work and submit its recommendations.[2]

The Task Force began its deliberations in September 2015, under the direction of Chairman John Alexander and Vice-Chairman Representative Dan Raulerson. Using the final report of the 2011 Task Force as a starting point, the Task Force reviewed reports by the Office of Program Policy Analysis and Government Accountability (OPPAGA), the Auditor General, agency inspectors general, legislative reports, and other agency reports to identify issues that could produce cost savings or improve government efficiency. Task Force members and taxpayers were also invited to submit issues to the Task Force for consideration.

This review produced an initial list of 36 issues that, if implemented, would improve government efficiency or reduce the costs of government. These issues were assigned to one of four committees for further review—the Civil and Criminal Justice Committee, chaired by former Supreme Court Justice Ken Bell; the General Government Committee, chaired by Senator Jeff Brandes; the Health and Human Services Committee, chaired by Representative Jason Brodeur; and the Government Efficiency Committee, chaired by Florida TaxWatch President and CEO Dominic Calabro.

Upon completion of their due diligence, the Committees recommended 11 issues for inclusion in an interim report[3] that was submitted to the chairperson and vice chairperson of the Legislative Budget Commission, the Governor, and the Chief Justice of the Supreme Court before the start of the 2016 legislative session. Copies were also made available to each member of the Florida Legislature. Each issue included in the Interim Report was selected based upon the following criteria: (1) there must be demonstrated cost savings or improvement in government efficiency; (2) the cost savings must be significant; (3) the cost savings must be recurring; and (4) there is a good chance of implementation.

Delays in appointing Task Force members and the early start of the 2016 legislative session limited the effectiveness of the Interim Report and, for these reasons, many of the recommendations contained in the Interim Report have been carried over to the final report.

1 Article III, Section 19, Florida Constitution, codified in section 11.905, Florida Statutes.
2 Section 11.9005(6), Florida Statutes.
3 Government Efficiency Task Force, "Interim Report January 2016," January 10, 2016.

FL-SEN-20-0201-B, 20-0202-A-004902

Despite these limitations, the Task Force was able to achieve the following successes during the 2016 legislative session:

- Legislation was passed and approved by the Governor that establishes a pilot program to offenders who have mental illnesses or concurrent mental illnesses and substance use disorders and who are involved in or at risk of entering state forensic mental health treatment facilities, prisons, jails, or state civil mental health treatment facilities;
- Funding was appropriated to continue the replacement of FLAIR and CMS. These funds are provided to the Department of Financial Services (DFS) to complete all tasks associated with the Pre-Design, Development, and Implementation phase as recommended in the March 31, 2014, DFS FLAIR Study;
- Funding was appropriated to continue the implementation of the Agency for State Technology. Proviso language in the General Appropriations Act requires AST collaboration with several state agencies on large-scale technology projects; and
- Legislation was passed and approved by the Governor that authorizes licensed health care professionals to use telehealth to deliver health care services within their respective scopes of practice.

After the 2016 legislative session, the Task Force continued its efforts to identify and recommend ways to improve governmental operations and reduce costs. Task Force members reviewed those remaining issues that had been previously considered but not included in the Interim Report, as well as any new issues. The result of this process was 18 new recommendations, which are included in this report.

In addition to recommendations to improve government efficiency and reduce the costs of government, the Task Force offers the following recommendations designed to maximize the effectiveness of the 2019-20 Government Efficiency Task Force:

1. **The Task Force recommends the Governor, President of the Senate, and Speaker of the House of Representatives complete their appointments to the 2019 Government Efficiency Task Force before January 1, 2019.** This will ensure compliance with the requirements contained in Article III, Section 19(i), Florida Constitution, and in section 11.905, Florida Statutes. This will provide the Task Force a window of opportunity (albeit a brief one) to present interim recommendations before the March 5, 2019 start of the 2019 regular legislative session. This will also ensure that the Task Force has the maximum amount of time permitted under the Constitution and Florida Statutes in which to present its recommendations to the chairperson and vice chairperson of the Legislative Budget Commission, the Governor, and the Chief Justice of the Supreme Court, and to educate legislators on its recommendations, before the start of the 2020 regular legislative session.
2. **The Task Force recommends the 2018 and 2019 legislatures appropriate funding for a full-time Executive Director and dedicated staff to support the 2019-20 Government Efficiency Task Force. The Executive Director should be hired and staff in place before January 1, 2019.** The use of current State of Florida employees to support the activities of the 2015-16 Task Force, in addition to their normal job duties and responsibilities, proved to be ineffective. Having staff dedicated to the Task Force on a full-time basis will greatly improve the operation and effectiveness of the Task Force.

SUMMARY OF RECOMMENDATIONS

ISSUE #	RECOMMENDATION	IMPROVED EFFICIENCY	EST. ANNUAL SAVINGS
GE 1	The Task Force recommends legislation be enacted to require the Governor to include as part of his or her budget recommendations, and the Legislature to consider as part of the annual General Appropriations Act, recommendations for improving governmental operations and reducing costs.	Yes	Significant Yet Indeterminate
CCJ 1	The Task Force recommends the Legislature introduce a bill for consideration during the 2017 Legislative Session to establish an inter-branch, bipartisan criminal justice task force of stakeholders from both inside and outside of state government to conduct an operational review of the Department of Corrections (DOC). The task force should publish and deliver a report to the Governor, Legislature, and Supreme Court on its findings and recommendations no later than December 1, 2017.	Yes	Significant Yet Indeterminate
CCJ 2	The Task Force recommends the Florida Commission on Offender Review amend its release eligibility standards to authorize the supervised release of certain non-violent elderly inmates. The establishment of prerequisites such as a place to live and access to services, like health care, should be added to the conditions of discretionary release.	Yes	$75.7 - $79.9 million
CCJ 3	The Task Force recommends the State develop risk/needs assessment and cost analysis tools to be used at the time of sentencing that provide judges with extensive information about sentencing options and the risks and costs associated with each option.	Yes	$2.8 million
CCJ 4	The Task Force recommends legislation be enacted and funding appropriated to expand the number of community-based alternative forensic sites that provide an added emphasis on reintegration as well as competency restoration.	Yes	$11 million
CCJ 5	The Task Force recommends the Legislature increase access to work release programs to permit more inmates to begin their transition back into the community sooner. This transition will be less expensive to the state and will likely result in improved outcomes (e.g., reduced recidivism) for the inmates.	Yes	$3.36 - $5.76 million

FL-SEN-20-0201-B, 20-0202-A-004905

ISSUE #	RECOMMENDATION	IMPROVED EFFICIENCY	EST. ANNUAL SAVINGS
CCJ 6	The Task Force recommends the Legislature appropriate funding to expand the use of electronic monitoring as a means of diverting low-risk, non-violent offenders from prison.	Yes	$18.3 - $21.6 million
GG1	The Task Force recommends the Legislature continue funding to replace the Florida Accounting Information Resource (FLAIR) and Cash Management System (CMS), consistent with the March 2014 business case study submitted by the Department of Financial Services (DFS) to the Legislature. To provide the Legislature with the information necessary to appropriate sufficient funding each year and to avoid delays or disruptions, a multi-year financial model to cover the entire project life cycle should be developed and maintained.	Yes	Significant risk and cost avoidance
GG2	The Task Force recommends the Legislature require the AST to develop and maintain a multi-year financial model to cover the next 5-10 year life cycle to ensure sufficient funding and spending authority are appropriated to implement the AST's core mission. The use of public-private partnerships as a means for delivering cost-effective implementation of the financial model should be explored. The Task Force also recommends a joint committee of the House and Senate be appointed to provide the proper governance, oversight and direction of the AST.	Yes	Significant risk and cost avoidance
GG 3	The Task Force recommends the Legislature direct the AST to adopt a "cloud first" protocol for state agencies to follow. The protocol must, at a minimum, establish IT security standards and direct a state agency to consider the role the applications play in the organization, the operational costs associated with its use in the new environment, the type of usage expected, and considerations related to ensuring IT security.	Yes	Significant risk and cost avoidance
GG 4	The Task Force recommends the Legislature amend Florida procurement laws to implement additional measures to reduce the number of bid protests and simplify the bid process, including a flexible and responsive "debriefing process" that permit all parties to benefit from the early identification and resolution of any errors or other issues.	Yes	Significant risk and cost avoidance

FL-SEN-20-0201-B, 20-0202-A-004906

ISSUE #	RECOMMENDATION	IMPROVED EFFICIENCY	EST. ANNUAL SAVINGS
GG 5	The Task Force recommends the State of Florida increase its commitment to having well-qualified and well-trained procurement personnel. It should be the policy of the state that training for procurement staff should be limited to enhancing or honing procurement skills, and not to develop basic procurement skills and core competencies.	Yes	Significant Yet Indeterminate
GG 6	The Task Force recommends the Legislature provide funds to DMS to contract with an independent third-party consulting firm with experience in strategic sourcing and procurement to complete a business case study of the State of Florida's procurement function focusing on the enterprise-wide organizational structure, governance, and operating model. This study would build upon, and not duplicate, the 2010 business case analysis prepared for MyFloridaMarketPlace (MFMP).	Yes	$1.4 billion
GG 7	The Task Force recommends the Department of Management Services (DMS) be designated the responsibility and authority by the Legislature to accelerate the implementation of best practices and a shared-services model by consolidating and standardizing facility management, operations, construction, and leasing to optimize the state's real estate portfolio to achieve significant long-term cost avoidance.	Yes	$70 - $80 million
GG 8	The Task Force recommends the Legislature enroll all new Florida Retirement System (FRS) members in the Defined Contribution Investment Plan to ensure that the FRS is actuarially sound going forward, and avoid billions in future liabilities and to increase the retirement wealth of state employees.	Yes	$12.9 million - $9.8 billion
GG 9	The Task Force recommends the Legislature consider consolidating management of all state agency vehicles into one statewide fleet program under one state agency (either DMS or FDOT) or third-party vendor with uniform standards for procurement, assignment, utilization, maintenance, and disposal of fleet vehicles.	Yes	$10.9 million
GG 10	The Task Force recommends the Legislature authorize the use of temporary, restricted use license plates during the private sale of motor vehicles to facilitate the transfer of ownership.	Yes	Significant Yet Indeterminate

FL-SEN-20-0201-B, 20-0202-A-004907

ISSUE #	RECOMMENDATION	IMPROVED EFFICIENCY	EST. ANNUAL SAVINGS
GG 11	The Task Force recommends the Legislature lift the suspension of state matching funds for the Alec P. Courtelis University Facility Enhancement Challenge Grant Program and the University Major Gifts Program.	Yes	$178.5 million
GG 12	The Task Force recommends the Legislature increase the DOR's sales and use tax audit coverage by adding new auditors, creating new state positions, and contracting with private auditors. In addition, the Legislature should expand the Certified Audit Program to allow recipients of Notices of Intent to Audit to use a DOR-certified private auditor in lieu of an audit by the DOR.	Yes	$2.9 million
GG 13	The Task Force recommends that all Florida government entities take advantage of the opportunity to recover taxpayer investment in recently completed building or retrofits through the retroactivity provisions of Section 179D of the Internal Revenue Code, and to help defer future costs of building and retrofitting.	Yes	Significant Yet Indeterminate
GG 14	The Task Force recommends the Legislature provide funds to contract with an independent third party firm to partner with the Florida Department of Environmental Protection (DEP) and Department of Management Services (DMS), as well as any other state agencies, to inventory, survey and provide condition assessment of state owned facilities. The survey should, at a minimum, consist of identifying location, key characteristics, valuable assets, facility condition and occupancy.	Yes	Significant Yet Indeterminate
HHS 1	The Task Force recommends the state increase copayments for emergency room visits by state employees that do not result in hospitalization from $100 to $250 to better reflect true costs and deter an increased utilization and reliance on costly emergency room care, thus avoiding unnecessary costs. The copayment would continue to be waived 100 percent if the visit results in hospitalization.	Yes	$5.64 million
HHS 2	The Task Force recommends the Legislature appropriate funding for a comprehensive audit of eligibility status of dependents covered under the State Group Insurance Program (SGIP) and switch from a passive enrollment process to an annual active enrollment process to avoid unnecessary costs paid for ineligible recipients.	Yes	$69.6 million

FL-SEN-20-0201-B, 20-0202-A-004908

ISSUE #	RECOMMENDATION	IMPROVED EFFICIENCY	EST. ANNUAL SAVINGS
HHS 3	The Task Force recommends the Legislature contribute a set amount or percent toward the annual health insurance premiums of state employees that is consistent with that paid by other large public and private employers. This cost shift would result in significant savings for the state.	Yes	$268.8 - $448.0 million
HHS 4	The Task Force recommends the Legislature further remove disincentives and barriers to the use of telehealth services, and while detailed policies are being determined, Florida should provide a foundation for the statewide expansion of telehealth. This will increase access to healthcare and avoid future costs.	Yes	$13.2 billion
HHS 5	The Task Force recommends the Legislature increase the health plan options available to employees enrolled in the State Group Insurance Program (SGIP) by establishing employee contribution rates that reflect the actuarial benefit differences between the existing plans. This will bring employee premiums and plan benefits more in line with industry benchmarks.	Yes	Significant Yet Indeterminate
HHS 6	The Task Force recommends the Legislature implement a state employee wellness program adopting only those practices that have evidenced a high return on investment.	Yes	Significant Yet Indeterminate
HHS 7	The Task Force recommends the Legislature begin a follow-up program of determining outcomes for those who have been served by the Florida foster care system a minimum of three years. The follow-up program will ask outcomes of former foster care clients at 3, 5 and 10 years after aging out of foster care.	Yes	Significant Yet Indeterminate
HHS 8	The Task Force recommends the Legislature appropriate funding to implement and support the recommendations contained in the Medicaid & Public Assistance Fraud Strike Force's October 2012 Annual Report.	Yes	$10.6 - $21.2 million
Total Estimated Annual Government Savings		**$2.14 billion - $12.14 billion**	
Total Annual Healthcare Savings to Private Sector (HHS 4)		**$13.2 billion**	

FL-SEN-20-0201-B, 20-0202-A-004909

GOVERNMENT EFFICIENCY

RECOMMENDATION GE 1: PROPOSED FLORIDA GOVERNMENT EFFICIENCY ACT

The Task Force recommends legislation be enacted to require the Governor to include as part of his or her budget recommendations, and the Legislature to consider as part of the annual General Appropriations Act, recommendations for improving governmental operations and reducing costs.

Rationale: Florida can demonstrate a strong and recurring commitment to improving governmental operations and reducing costs by implementing legislation establishing the "Florida Government Efficiency Act." The Governor's annual budget recommendations should include recommendations for improving governmental operations and reducing costs. These recommendations would consider reports and recommendations issued by the Auditor General, the Office of Program Policy Analysis and Government Accountability, the Government Efficiency Task Force, agency inspectors general, and state agencies. A mechanism could be put into place to solicit and encourage recommendations to be submitted to the Executive Office of the Governor by the general public.

Each state agency responsible for implementing the Governor's recommendations for improving governmental operations and reducing costs should be required to submit quarterly a report of their implementation status and any demonstrated cost savings to the legislative appropriations committees and to the Chair and Vice Chair of the Legislative Budget Commission.

A draft of the proposed Florida Government Efficiency Act is included as Appendix A (page 38).

Cost Savings / Government Efficiency: The major benefits of establishing the Florida Government Efficiency Act are significant recurring cost savings and improved efficiency of government. Estimates of actual cost savings would vary from year to year, but would be expected to be substantial.

FL-SEN-20-0201-B, 20-0202-A-004910

CRIMINAL AND CIVIL JUSTICE

RECOMMENDATION CCJ 1: INTER-BRANCH BIPARTISAN CRIMINAL JUSTICE TASK FORCE

The Task Force recommends the Legislature introduce a bill for consideration during the 2017 Legislative Session to establish an inter-branch, bipartisan criminal justice task force of stakeholders from both inside and outside of state government to conduct an operational review of the Department of Corrections (DOC). The task force should publish and deliver a report to the Governor, Legislature, and Supreme Court on its findings and recommendations no later than December 1, 2017.

Rationale: Florida currently has the third largest prison population in the United States with nearly 100,000 inmates and less than 12,000 correctional officers to oversee and manage them. The costs of maintaining this system are significant with the Legislature appropriating more than $2.4 billion during the 2016 legislative session to the DOC, representing more than half of the total $4.9 billion appropriated to Criminal and Civil Justice.

In 2015, the Office of Program Policy Analysis and Government Accountability (OPPAGA) contracted with an independent consultant for a study of operations of the Florida DOC.[4] Specifically the report reviewed correctional officer staffing, security operations, inmate programs, and a risk and needs assessment. The study found that DOC's staffing is inexperienced due to high turnover, and the number of staff is insufficient. The rate of turnover in FY 2014-15 was 17.6% and there were more than 2,900 separations. In addition, one-half of the department's correctional officers had less than 3.1 years of work experience.

Staffing was observed at some times to drop below the minimum acceptable levels. Many staff have not completed basic training—there are nearly 1,400 officers on temporary employment authorization. The study found that certain polices or procedures led to inmate idleness, the mixing of populations, or the ability to move contraband articles, all of which could lead to violence or other problems arising within the facility and population. The study also found that "[p]erimeter security systems are outdated, in poor operational condition, and fencing is in disrepair." The study recommended the DOC review comprehensive staffing, perimeter security, emergency management plans, facility repairs, contraband and abuse policies, inmate safety and interaction policies, and inmate programs and their effectiveness.

This task force will partner with nationally recognized criminal justice policy experts who will review the work and advise the task force on industry best practices. The operational review will establish a baseline of the current status, performance, and outlook for the DOC. This will include, but not be limited to, an evaluation of performance measures; explanation of factors that have contributed to any failures; promptness and effectiveness with which the department resolves complaints; a comprehensive staffing analysis; and an assessment of the extent to which the department has corrected deficiencies. Additionally, the task force will analyze the drivers of Florida's prison population, including how and why individuals are sentenced into the correctional and probation systems, and developing policy proposals for a complete set of reforms that keep the public safe whilst wisely investing state resources. The review should consider these aspects of the criminal justice system, as well as any overlapping aspects of the juvenile justice system.

Cost Savings / Government Efficiency: The major benefits of an operational review of the Florida DOC are significant recurring cost savings and improved efficiency of government. Estimates of actual cost savings would vary from year to year, but would be expected to be substantial.

FL-SEN-20-0201-B, 20-0202-A-004911

RECOMMENDATION CCJ 2: SUPERVISED RELEASE OF NON-VIOLENT ELDERLY INMATES

The Task Force recommends the Florida Commission on Offender Review amend its release eligibility standards to authorize the supervised release of certain non-violent elderly inmates. The establishment of prerequisites such as a place to live and access to services, like health care, should be added to the conditions of discretionary release.

Rationale: Florida continues to bear the increasing medical and housing costs of a growing elderly prison population. From 2000 to 2014, Florida's elderly prison population (aged 50 years of age and older) grew from 5,605 to 21,002, at an average increase of 9.9 percent per year. This growth rate is more than three times the growth rate of the general prison population.[5] As of May 2016, Florida has 6,642 prisoners at least 60 years of age, 1,300 prisoners at least 70 years old, 151 octogenarians, and 12 nonagenarians.[6] Among the octogenarians, 40 percent were sentenced to terms of years as opposed to life without parole, and 19 have release dates in the next 3 years. Florida also has two prisoners aged 92, who rank at the top of the oldest prisoners in the US.[7] By 2020, one out of every three prisoners in Florida will be elderly. This rate will be double the 16 percent national average, and impose huge and unsustainable fiscal burdens on Florida taxpayers.[8]

Many of these elderly inmates were originally incarcerated for a non-violent primary offense, and would pose little if any risk to the public if they were released from prison. The Department of Corrections reports that, as of June 30, 2015, 37 percent of inmates aged 50 years of age and older, and 18 percent of inmates aged 65 years of age or older, were incarcerated for a non-violent primary offense.[9]

Elderly prisoners cost the most to incarcerate, but pose the least danger to public safety. The National Institute of Corrections estimates that states spend on average $70,000 per year to incarcerate someone age 50 or older, nearly three times what it costs to house a younger prisoner, largely because of the difference in healthcare costs.[10] Elderly inmates are not eligible for federal healthcare support; however they are eligible for federally funded Medicaid (with state match) and/or Medicare upon their release. The average Medicaid spending per aged enrollee in Florida (including both state and federal payments) is $8,532.[11] The average Medicare spending on personal health care services and products per enrollee in Florida (including both state and federal payments) is $11,893.[12] This represents an average savings to the state of $58,107 to $61,468 per elderly inmate per year.

Cost Savings / Government Efficiency: Based on the average savings and the number of inmates, the supervised release of only those elderly inmates who are 70 years of age or older could result in estimated annual savings of $75.5 million to $79.9 million.

FL-SEN-20-0201-B, 20-0202-A-004912

RECOMMENDATION CCJ 3: ENHANCED SENTENCING TOOLS

The Task Force recommends the State develop risk/needs assessment and cost analysis tools to be used at the time of sentencing that provide judges with extensive information about sentencing options and the risks and costs associated with each option.

Rationale: Over the past 20-25 years, Florida's sentencing guidelines have been revised on several occasions to provide for increased sanctions and sanction length in certain instances. Compared to the sentencing guidelines that existed in 1994, the current Criminal Punishment Code includes provisions whereby all felony offenders have the potential to receive a prison sentence (many under the guidelines would be excluded from such a possibility), and provisions for far greater sentence lengths than were permissible under the guidelines.[13] The calculation used to determine the sentence focuses not on risk or needs, or the likelihood of reoffending, but on the appropriate level of punishment, based on factors such as the nature of the primary offense and any additional offenses, prior criminal history, and injury to the victim. Two decades after Congress passed the Violent Crime Control and Law Enforcement Act of 1994, Florida's crime has decreased 54 percent and its imprisonment rate has increased 31 percent.

A 2006 National Center for State Courts survey identified restrictions on judicial discretion that limited the ability of judges to sentence more fairly and effectively as a major concern among state trial judges hearing felony cases. The survey also found that the state chief justices believed that the most important sentencing reform objective facing the state courts was to improve public safety and reduce recidivism through the expanded use of evidence-based practices and programs, including offender risk and needs assessment tools. In response, many states are moving toward sentencing policies and practices based on what research has demonstrated to be effective in reducing criminality, keeping corrections budgets in check, and helping rehabilitate convicted offenders.

The Oregon Judicial Conference, for example, requires judges to consider the sentence's potential impact on reducing future criminal conduct. Building flexibility into sentencing laws allows judges to better select sanctions that provide the best chance of reducing recidivism. Missouri's Sentencing Commission has developed a web-based tool for judges to use in sentencing that provides them extensive information about sentencing options and the risks and costs associated with each alternative. This tool is available for use by judges, prosecutors, defendants and their attorneys, and the public. The user simply inputs data for the highest level offense upon which the defendant has been (or will be) convicted, along with demographic, criminal history, substance abuse involvement, education and other information about the defendant. The tool provides the user with the recommended sentence, the risk assessment, recidivism projections and the costs of incarceration, supervision, and community alternatives, including treatment where warranted.

Florida should build on Missouri's success and create a similar risk/needs assessment tool that allows judges access to offense/offender-specific cost and recidivism estimates and enable them to use evidence in order to develop sentencing options best targeted to individual offenders. This will reduce the overall prison population over time, and help Florida save money without jeopardizing public safety.

Cost Savings / Government Efficiency: Every 5 percent reduction in recidivism represents 420 fewer inmates per release cohort returning to incarceration over a 3-year period and an estimated cost avoidance of approximately $8.3 million ($2.8 million annually).[14]

13 Florida Department of Corrections, "Florida's Criminal Punishment Code: A Comparative Assessment (FY 2000-2001)," retrieved from http://www.dc.state.fl.us/pub/sg_annual/0001/intro.html, March 22, 2016.

14 420 inmates X $15.91 per inmate per day X 365 days X 3.4 years = $8.3 million / 3 year = $2.8 million per year.

FL-SEN-20-0201-B, 20-0202-A-004913

RECOMMENDATION CCJ 4: EXPAND ALTERNATIVE FORENSIC MENTAL HEALTH PROGRAMS

The Task Force recommends legislation be enacted and funding appropriated to expand the number of community-based alternative forensic sites that provide an added emphasis on reintegration as well as competency restoration.

Rationale: Florida law requires that individuals must be able to understand the reasons for and the nature of the charges as against them, understand the penalties and consequences that may be imposed upon them should they be convicted, and be able to effectively communicate in order to stand trial. Competency restoration programs help restore competency to individuals who could not meet this requirement at the time of trial and have been deemed incompetent to proceed due to mental illness or disability.

Competency programs operate in about half of Florida's 67 counties[15] and there are two primary types: community competency services, which provide competency restoration to individuals who do not need a secure environment and conditionally receive services and training in the community;[16] and forensic facilities, which provide competency restoration for individuals that need a secure environment. Between 150,000 and 170,000 Floridians need acute mental health treatment each year, but the state spends over 20 percent of its total adult mental health budget on restoring competency for just 4,500 people.[17] Despite this, the number of people in prisons with mental health issues went from 8,000 to 16,000 between 2003 and 2015; a number that is expected to double in the coming years.

In August of 2009, Miami-Dade created a community-based program for competency restoration that combines elements of both community-based and state forensic facility programs and diverts individuals with mental illnesses from state hospital placement. Participants are initially placed in a secure inpatient setting, where they receive crisis stabilization and short-term residential services. They are regularly evaluated and, when ready, are moved to a less restrictive community placement with outpatient services. Throughout the entire process, participants are provided with reentry assistance as well as ongoing service engagement.[18] Legislation was proposed in 2015 that would have created four more sites for this program. It passed individually, but later died as part of a larger bill.[19] Two more bills with the same intent were filed for the 2016 Florida Legislative Session.[20]

Cost Savings / Government Efficiency: Alternative forensic mental health programs, such as the Forensic Alternative Center program in Miami-Dade County, have potential to provide significant cost-savings. The average cost to provide services through the program is an estimated $63 to $107 less per day than the cost of services provided in state forensic treatment facilities.[21] State facilities have the capacity to handle approximately 1,100 individuals in need of competency restoration services at any one time. Diverting 25 percent of these individuals into alternative forensic mental health programs would save an estimated $11 million annually.

FL-SEN-20-0201-B, 20-0202-A-004914

RECOMMENDATION CCJ 5: INCREASE ACCESS TO WORK RELEASE PROGRAMS

The Task Force recommends the Legislature increase access to work release programs to permit more inmates to begin their transition back into the community sooner. This transition will be less expensive to the state and will likely result in improved outcomes (e.g., reduced recidivism) for the inmates.

Rationale: Florida offers transitional community work release for selected low-risk inmates to work at paid employment in the community while living in work release centers outside of prison. While in work release, the inmate earns money and a portion must be set aside for when the inmate is released. The inmate learns skills, which increases their chances of finding jobs after their release. The majority (75 percent) of participants' earnings in work release programs is used for restitution, child support, and subsistence in the facility, with only 10 percent specifically earmarked for saving.[22]

Florida has 34 work release centers[23] that serve about 3,000 inmates annually[24] at an average inmate cost per day of $30.57.[25] In contrast, the average inmate cost per day in a state-operated facility is about $51.65.[26] The annual cost to house an inmate in a work release center is approximately 60 percent of the cost to house an inmate in a state-operated facility. Every day an inmate is housed in a work release center saves the state $21.08. Over the course of a year, this represents a savings of $7,694.

Research shows that the work experience gained by inmates in work release programs reduces the likelihood that these inmates will recidivate within one year.[27]

- Inmates who receive a GED and participate in work release for 60 days or more are 10.1% less likely to recidivate than those who receive a GED and have no work experience.
- Inmates who complete a substance abuse program and participate in a work release program for at least 60 days are 5.9% less likely to recidivate than those who complete a program and have no work experience.

Cost Savings / Government Efficiency: Housing inmates at work release centers instead of in a state-operated facility saves the state approximately $23 million annually.[28] Expanding the capacity of existing programs or establishing new work release programs will save the state an additional $7,694 per inmate per year. Based on the differences in recidivism rates that can be attributed to the work experience gained through participation in work release (5.9 percent to 10.1 percent), the state would save an estimated $3.36 million to $5.76 million annually.[29] Assuming an inmate works 32 hours a week at minimum wage ($8.05/hr.), the inmate would earn approximately $13,395 annually, $7,367 (55 percent) of which would pay for subsistence at the work release center; $1,340 (10 percent) of which would go to restitution or court ordered payments; $1,340 (10 percent) of which would go to family assistance, including child support; $1,340 (10 percent) of which would go to the inmate's savings account; and the remainder would go to the inmate's general account and for incidental expenses.[30]

22 "Frequently Asked Questions Regarding Work Release." (Accessed: January 6, 2016). Florida Department of Corrections.
23 Florida Department of Corrections Facility Directory. (Accessed January 6, 2016; Last Updated November 13, 2015).
24 "Frequently Asked Questions." (Accessed January 6, 2016). Florida Department of Corrections.
25 Florida Department of Corrections, Annual Report 2014-15.
26 Ibid.
27 Florida Department of Corrections, "Academic, Vocational, and Substance Abuse Program Impacts," retrieved from http://www.dc.state.fl.us/pub/recidivismprog/tab1.html, April 28, 2016.
28 3000 inmates X $21.08 (difference in daily costs) X 365 days = $23,082,600.
29 Based on a formula developed by the Office of Program Policy Analysis and Government Accountability (Report Number 00-23, page 48), cost avoidance is derived by multiplying the number of inmates who complete a program by the reduction in recidivism percentage (difference in completers and non-completers) and multiplying this number by an annual incarceration rate of $19,000 per inmate.
30 Supra, footnote 22.

FL-SEN-20-0201-B, 20-0202-A-004915

RECOMMENDATION CCJ 6: EXPAND ELECTRONIC MONITORING FOR LOW-RISK NON-VIOLENT OFFENDERS

The Task Force recommends the Legislature appropriate funding to expand the use of electronic monitoring as a means of diverting low-risk, non-violent offenders from prison.

Rationale: The Florida Department of Corrections (FDOC) began using electronic monitoring in 1987 to track offenders, increase compliance with the terms of offenders' release into the community, and reduce recidivism. Although used primarily to provide an extra measure of security for high-risk offenders (particularly sex offenders), there is increasing support for the use of electronic monitoring of low-risk offenders. Replacing all or part of a term of incarceration of low-risk offenders with less expensive community supervision that includes electronic monitoring will reduce the cost of corrections. The use of electronic monitoring in lieu of the last part of a period of incarceration would support successful reentry of low-risk, non-violent offenders into the community by providing for a period of supervision before release from custody.[31]

A 2010 Florida State University study[32] examined outcome data on approximately 272,000 medium-risk and high-risk offenders who were on community supervision in Florida at some time during the period between June 1, 2001 and June 30, 2007. Of these offenders, 5,034 were on electronic monitoring and 266,991 were not. The study found that offenders on electronic monitoring are 31 percent more likely to successfully complete community supervision than offenders who are not electronically monitored. Electronic monitoring significantly reduces the failure rate for all types of offenders, but has less of an impact on violent offenders (26% reduction) than on offenders who committed sex, drug, property, or other types of crimes (36% reduction).

Offenders sentenced to prison for non-violent offenses (e.g., drug, property, or other offense) make-up approximately 47 percent of Florida's FY2012-13 prison population.[33] The average inmate per diem cost of incarceration is $47.50.[34] In contrast, Global Positioning Satellite monitoring costs $8.94 per day (approximately $270 per month) and Radio Frequency monitoring costs $1.97 per day (approximately $60 per month).[35] Based on this, every day a low-risk, non-violent offender is incarcerated therefore costs the state $38.56 to $45.53 more than if that offender were electronically monitored.

Cost Savings / Government Efficiency: At a cost savings of $38.56 to $45.53 per day, every low-risk, non-violent offender sentenced to community supervision that includes electronic monitoring will reduce the cost of corrections by an estimated $14,074 to $16,618 annually. If community supervision that includes electronic monitoring were used for the 1,300 current inmates who are 70 years of age or older, the state would save an estimated $18.3 million - $21.6 million, exclusive of these inmates' healthcare costs.

FL-SEN-20-0201-B, 20-0202-A-004916

GENERAL GOVERNMENT

RECOMMENDATION GG 1: REPLACE THE FLORIDA ACCOUNTING INFORMATION RESOURCE (FLAIR) AND THE CASH MANAGEMENT SYSTEM (CMS)

The Task Force recommends the Legislature continue funding to replace the Florida Accounting Information Resource (FLAIR) and Cash Management System (CMS), consistent with the March 2014 business case study submitted by the Department of Financial Services (DFS) to the Legislature. To provide the Legislature with the information necessary to appropriate sufficient funding each year and to avoid delays or disruptions, a multi-year financial model to cover the entire project life cycle should be developed and maintained.

Rationale: FLAIR is a 30 year-old, double-entry, computer-based, general ledger accounting system, which is used to perform the state's accounting and financial management functions. State agency activities related to payments for payroll, retirement, unemployment compensation, expenses, and public assistance are processed through FLAIR. The programming language (COBOL) and data file structure are obsolete and, within the marketplace, there are few (if any) companies with the resources and staff knowledgeable enough to support FLAIR's underlying technology. FLAIR is currently maintained by DFS internal IT support staff, more than 40 percent of which have 30 years or more of service. These employees have considerable institutional knowledge and technical expertise and, as they retire, the chances of replacing this knowledge and expertise in today's market are highly unlikely.

For CMS, there is a similar, albeit more modern, situation regarding support staff. While a portion of CMS functionality was replaced by more modern technology, the resource pool supporting and developing the modern components is constrained by a small number of existing senior employees. This presents additional risk across the functions of the Treasury.

A 2014 study by North Highland[36] looked at four options and recommended that Florida pursue the replacement of FLAIR and CMS with a "commercial off the shelf" enterprise resource plan solution for the financial management processes to support the constitutional obligations of DFS. The total costs, spread over a 15-year period, were estimated to be $667.6 million, almost $100 million of which reflects expenses associated with supporting FLAIR until it is retired in the next 8-9 years. The replacement of FLAIR and CMS would:

- Mitigate the risks associated with maintaining an increasingly fragile technology platform;
- Implement a statewide accounting system to enforce standardization of business practices;
- Act as a scalable foundation to evolve as business needs change; and
- Position Florida for future innovation with the ability to consider a true enterprise system.

Maintaining the FLAIR system will cost the state nearly $100 million during the next few years, and significantly more after that if the system is not replaced or overhauled. DFS should continue to make smart business decisions, and do the high-level planning and project management necessary to minimize risk to the state.

Cost Savings / Government Efficiency: The major benefits of replacing FLAIR and CMS focus on risk avoidance and cost avoidance, as opposed to cost savings. Costs will be avoided as a result of agency business process standardization, reduced costs to maintain the system, and a reduced need for agency-run financial management systems and external financial data repositories.

36 Florida Department of Financial Affairs. "FLAIR Study." Deliverable 5, North Highland Worldwide Consulting, March 31, 2014.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004917

RECOMMENDATION GG 2: FUNDING AND GOVERNANCE OF THE AGENCY FOR STATE TECHNOLOGY (AST)

The Task Force recommends the Legislature require the AST to develop and maintain a multi-year financial model to cover the next 5-10 year life cycle to ensure sufficient funding and spending authority are appropriated to implement the AST's core mission. The use of public-private partnerships as a means for delivering cost-effective implementation of the financial model should be explored. The Task Force also recommends a joint committee of the House and Senate be appointed to provide the proper governance, oversight and direction of the AST.

Rationale: The newly created Agency for State Technology (AST) affords state leaders an opportunity to look at all technology projects on an enterprise-wide level, with a view toward consolidation and standardization, as appropriate. While the creation of the AST is a great success for the state, it represents the third time in the past 15 years the state has tried to establish an enterprise-wide IT agency. Given the most recent failures, it is imperative that the state "get it right" this time. Implementing the AST and meeting the established requirements within established timelines will be challenging. The successful implementation of the AST will require extraordinary leadership, cooperation and vision at the executive and legislative levels to capture and ensure cost and delivery efficiency in all aspects of IT services and solutions.

To ensure the Legislature has the information it needs to adequately fund the AST, and avoid delays and disruptions, a multi-year financial model to cover the next 5-10 year life cycle of AST projects needs to be developed and maintained. Budgetary constraints and private sector efficiencies and expertise dictate that the AST look closely at the use of public-private partnership models, as appropriate, to deliver technology infrastructure projects that would have been previously built using only public sector finances.

Legislatively, oversight of the AST is provided by a number of "general government" policy and budget committees, which oversee the AST and a number of other agencies. A joint committee of the House and Senate on information technology appointed by House and Senate leaders, with whom is vested sole and exclusive authority for overseeing the governance of the AST and IT policy and budget issues, will help to ensure the successful implementation and operation of the AST.

This Task Force recommendation is in no way intended to undermine or usurp the responsibilities of the Governor and Cabinet, and the Technology Advisory Committee, in the implementation and administration of the AST. The Task Force recommendation is intended to more effectively discharge the Legislature's oversight responsibility through the establishment of a single joint committee.

Cost Savings / Government Efficiency: The major benefits of successfully implementing the AST are significant cost and risk avoidance and a significant increase in government efficiency as a result of more consistent enterprise technology policy for the state and more effective oversight of large IT projects.

FL-SEN-20-0201-B, 20-0202-A-004918

RECOMMENDATION GG 3: CLOUD FIRST PROTOCOL

The Task Force recommends the Legislature direct the AST to adopt a "cloud first" protocol for state agencies to follow. The protocol must, at a minimum, establish IT security standards and direct a state agency to consider the role the applications play in the organization, the operational costs associated with its use in the new environment, the type of usage expected, and considerations related to ensuring IT security.

Rationale: As technology has improved and become cheaper, state agencies now manage a large amount of digital data. In recent years, especially with the increased usage of mobile devices, the "cloud" has become part of everyday use. Cloud computing relies on Internet-based services and resources to provide computing services to customers, while freeing them from the burden and costs of maintaining the underlying infrastructure."[37] Cloud computing moves away from the traditional model of buying physical IT assets such as servers, storage, and routers and into buying the functionality provided by those devices as-a-service."[38] Benefits include: (1) Users pay for what they consume, and can increase or decrease their usage; (2) The cloud customer can spend less time managing complex IT resources and more time investing in core mission work; and (3) The providers benefit from economies of scale, enabling lower individual usage costs and centralized infrastructure costs.

The federal government recognized the inefficiencies created by fragmented demand for resources, duplicative systems, and other issues and implemented a "cloud-first" policy in 2011, the goal of which is to "maximize capacity utilization, improve IT flexibility and responsiveness, and minimize cost."[39] The consolidation of data centers and the use of cloud services have resulted in a cost savings of $3.6 billion over 4 years.[40]

The 2015 Legislature directed the AST to use a third-party consulting firm, in consultation with the State Data Center and the applicable state agency customers, to complete an assessment of applications hosted at the State Data Center to see if they are ready to be migrated to the cloud. A January 2016 assessment analyzed 931 applications and found that there are no applications located in the State Data Center that may be categorized as "cloud ready."[41]

Florida should be on the leading edge for the adoption of sound cloud-first policies. While federal agencies continue to implement cloud computing services, Florida can learn from their progress and adopt such a policy for state agencies to follow. As the state plans for major investments in technology, agencies should research the opportunities to leverage the innovations provided by cloud computing. This requires an evaluation of external service providers' capabilities and limitations to ensure compliance with business objectives while factoring in agility, security, risk mitigation, and opportunities for a reduced total cost of ownership. The use of cloud-services going forward or the migration of old data to cloud services would be undertaken if such decisions result in a cost savings or risk avoidance for the state.

Cost Savings / Government Efficiency: The major benefits of establishing a "cloud first" protocol for state agencies are significant recurring cost savings, significance avoidance of risk, and improved efficiency of government. Estimates of actual cost savings would vary from year to year, but would be expected to be substantial.

RECOMMENDATION GG 4: MINIMIZE BID PROTESTS

The Task Force recommends the Legislature amend Florida procurement laws to implement additional measures to reduce the number of bid protests and simplify the bid process, including a flexible and responsive "debriefing process" that permits all parties to benefit from the early identification and resolution of any errors or other issues.

Rationale: Bid protests are expensive and are often used to delay contract awards and to force concessions (settlement agreements) from agencies or the winning bidders. Many protests are filed simply because the unsuccessful bidder does not understand the process or how its proposal was scored. The procurement process affords limited access to relevant information in advance of the award, so many bidders feel compelled to file a protest just to gain a better understanding of why they lost. Using the "case search" function on the DOAH website, staff reviewed 91 bid cases[42] that had been reviewed by DOAH since 2014 and found that 51 of these cases (56 percent) had been settled and/or dismissed prior to the entry of a recommended order or final order.

Responding to bid protests is a time consuming effort, requiring considerable staff time and legal support. In Florida, agencies may recover the costs of their legal staff from an unsuccessful bidder; however, the costs incurred by agency staff (staff time) and the successful bidder (legal and staff time) to prepare their response and defend the state's selection are not recovered.[43]

Although Florida's bid protest process is fundamentally sound, the adoption of provisions that permit the use of "debriefings" would deter bid protests and save money for taxpayers by avoiding the costs associated with the protests and preventing delays of the procurement process. These debriefings would be conducted before the agency formally issues an award, at which time vendors would have an opportunity to discuss their bid response with the agency and get a better understanding of the process and how their proposal was scored. The agency would also have an opportunity to correct or resolve any errors it may have made during the process.

The focus would be on the bidder's proposal and how it satisfied or did not satisfy the evaluation criteria. The debriefing would get the necessary parties to the table and allow the bidder to be heard and understood by the agency. The debriefing process would include mechanisms that would permit an agency to stop the bid process, respond as lawful and appropriate to address the issue(s), and then resume the process, thereby avoiding the bidder having to file a protest to resolve the issue(s). This additional transparency will help to stem unnecessary bid protests. Information on proposals from other bidders would not be shared and would only be made available after an award was formally issued. This would help to ensure a fair but structured process that ensured a bidder's hearing, but not at the expense of taxpayer value or the project's timeline.

Cost Savings / Government Efficiency: Estimating the cost savings is difficult since, according to a 2013 survey conducted by the National Association of State Procurement Officers, only three states that allow bid protests quantify the cost for a protest.[44] Most states, like Florida, absorb the bid protest cost as a cost of doing business. The major benefits would be significant cost and risk avoidance and a significant increase in government efficiency as a result of the reduced number of bid protests.

RECOMMENDATION GG 5: EMPLOYMENT OF EXPERIENCED AND WELL-TRAINED PROCUREMENT PERSONNEL

The Task Force recommends the State of Florida increase its commitment to having well-qualified and well-trained procurement personnel. It should be the policy of the state that training for procurement staff should be limited to enhancing or honing procurement skills, and not to develop basic procurement skills and core competencies.

Rationale: One of the challenges facing state agencies is whether to "hire and train" or "buy and hold" its procurement staff. The "hire and train" strategy permits agencies to use internal promotion as a way to provide lower-level employees a career path to higher-paying, more responsible jobs. The Division of State Purchasing's professional development program offers professional development opportunities designed to maintain, broaden, and improve the knowledge, skills, and abilities of public procurement professionals while helping them remain relevant and competitive in the public procurement industry.[45] The retirement of the Florida Certified Purchasing Agent and Florida Certified Purchasing Manager certification programs[46], however, decreases the likelihood that procurement employees will receive the training necessary to function effectively in higher paying and more responsible jobs. A review of the DMS website identified 181 purchasing agents and 160 purchasing managers who have been certified through these programs.[47]

In contrast, the "buy and hold" strategy permits public procurement agencies to recruit procurement staff that is already well-qualified and well-trained. Because these employees will already have the core competencies necessary to function effectively, any additional investment into their training or professional development is likely to be minimal. This strategy acknowledges the importance of post-secondary education, professional certification and previous procurement experience when recruiting procurement staff.

The Universal Public Procurement Certification Council has established guidelines for obtaining the Certified Public Procurement Officer (CPPO) and Certified Professional Public Buyer (CPPB) designations. The CPPO and CPPB designations are recognized credentials throughout the world and signify that the designated individual has reached a specific level of education and experience and has demonstrated an established level of knowledge necessary to competently perform the work of a public procurement officer or buyer.[48] These, or comparable, certification requirements could be included in the hiring criteria for hiring procurement staff.

The "buy and hold" strategy would likely require the state to reevaluate the compensation package for procurement officers to recruit and retain procurement staff with the desired qualifications.[49]

Cost Savings / Government Efficiency: The benefits from recruiting and retaining qualified staff ("buy and hold") to manage state purchasing are significant yet indeterminate.

FL-SEN-20-0201-B, 20-0202-A-004921

RECOMMENDATION GG 6: CONSOLIDATED PROCUREMENT PERSONNEL

The Task Force recommends the Legislature provide funds to DMS to contract with an independent third-party consulting firm with experience in strategic sourcing and procurement to complete a business case study of the State of Florida's procurement function focusing on the enterprise-wide organizational structure, governance, and operating model. This study would build upon, and not duplicate, the 2010 business case analysis prepared for MyFloridaMarketPlace (MFMP).

Rationale: State and local government agencies spend a tremendous amount of taxpayer money procuring commodities and services, and even a small improvement in efficiency will generate a large savings. The potential for greater improvements in efficiency and even greater savings to taxpayers justifies a thorough review of how Florida's procurement program works and how it can be improved.

Florida's procurement program is neither consolidated nor unconsolidated, but a combination of the two. Consolidated management is the responsibility of DMS' Division of State Purchasing—DMS is charged with providing uniform commodity and contractual service procurement policies, rules, procedures, and forms for use by agencies and eligible users.[50] DMS negotiates state terms for services and commodities used by all state agencies to leverage the state's buying power. State agencies and other public entities are granted a certain level of independence from DMS and are authorized to process, oversee, and/or approve purchases up to certain dollar thresholds and negotiate their own contracts. Each agency has its own budget for procurement staff and activities. The DMS website identifies 37 state agencies, committees, commissions and other governmental entities that have their own agency purchasing officer and staff.[51]

DMS does not record the procurement activities of all state agencies, as MyFloridaMarketPlace (MFMP), the state's e-Procurement tool, has been historically underutilized by all state agencies. In 2012 the state launched an effort to improve MFMP utilization by state agencies. Utilization goals and performance levels were established and tracked monthly, and agency performance is available for review on a scorecard on the MFMP website.[52]

An analysis by McKinsey & Company found that the highest performing private-sector procurement organizations take a centralized, or similar, approach to managing procurement.[53] This suggests that Florida's hybrid model of procurement authority could be strengthened by making it more consolidated. Furthermore, there is evidence to suggest that there is some inefficiency in Florida's agency-based approach, despite a number of valiant efforts to improve functionality. Working toward a shared services model, where staff from one agency with particular expertise assists another agency that needs that expertise, would improve the state's procurement efficiency.

Cost Savings / Government Efficiency: In more than 500 purchasing projects that the management consulting firm McKinsey & Company has supported in both the private and public sectors over the past five years, improved purchasing in the public sector yields an average savings of 28 percent.[54] A 28 percent savings would save Florida taxpayers an estimated $1.4 billion annually.[55]

FL-SEN-20-0201-B, 20-0202-A-004922

RECOMMENDATION GG 7: CONSOLIDATED REAL ESTATE AND FACILITIES SHARED SERVICES

The Task Force recommends the Department of Management Services (DMS) be designated the responsibility and authority by the Legislature to accelerate the implementation of best practices and a shared-services model by consolidating and standardizing facility management, operations, construction, and leasing to optimize the state's real estate portfolio to achieve significant long-term cost avoidance.

Rationale: Florida's current real estate delivery model is decentralized among, and within, multiple agencies. Twenty state agencies manage over 13,000 facilities totaling more than 63 million square feet. DMS is the only agency with facility management, operations, construction and leasing as its core mission. Despite this, the department only manages a footprint of more than 12 million square feet, and oversees only 108 facilities. The inefficiency of facility management of state owned assets is costing taxpayers millions each year.[56]

The Florida Department of Environmental Protection (DEP) and DMS recently collaborated to generate the FL-SOLARIS database, a centralized database for the collection of records for all state-owned real estate. This is the first step in changing the current decentralization of facility management, and a platform for implementing an enterprise-wide shared facility management model. In August 2012, DMS contracted with CBRE Group, Inc., to develop a comprehensive Real Estate Optimization Plan that spans across all state agencies, space types, uses and geographies.[57]

While the initial investment outlined in the CBRE Group, Inc. report was in excess of $493 million, DMS has a more focused and fiscally prudent implementation plan which would include the following strategies and recommendations:

- Reduce occupancy management costs by reducing the amount of space needed for agency operations;
- Consolidate oversight and operations of the state's real estate function into DMS. This includes moving all operations, maintenance and leasing positions into DMS;
- Enhance sourcing strategy; restructure contracts for consistent service delivery and unit cost reductions by implementing statewide procurements instead of individual agency procurements for local facilities;
- Transfer responsibility for portfolio-wide facilities-related energy management to DMS; and
- Help the state utilize its real estate in the highest and best use or to monetize its assets.

Cost Savings / Government Efficiency: The DMS has already worked with agencies to better utilize existing state owned space and reducing the leased space footprint. From July 1, 2011 through June 30, 2014, agencies that utilized DMS' expertise reduced their leasing spend by more than $48 million and square footage by more than 900,000 square feet. Similar efforts in operations, contracts and energy management across other State-owned properties could produce an additional estimated $70 million to $80 million in reduced costs.[58]

FL-SEN-20-0201-B, 20-0202-A-004923

RECOMMENDATION GG 8: FLORIDA RETIREMENT SYSTEM (FRS) INVESTMENT INDEPENDENCE PROGRAM

The Task Force recommends the Legislature enroll all new Florida Retirement System (FRS) members in the Defined Contribution Investment Plan to ensure that the FRS is actuarially sound going forward, and avoid billions in future liabilities and to increase the retirement wealth of state employees.

Rationale: While nearly all private sector companies offer only Defined Contribution (DC) retirement plans to employees, the majority of FRS members participate in the Defined Benefit (DB) pension plan.[59] A DB pension plan provides a specified payment amount to the employee upon retirement, based on the employee's salary, years of service, and other factors. The employer bears the investment risk of ensuring the defined benefit amount will be available to be paid to the retired employee. Due to this risk, defined benefit plans require complex actuarial projections and insurance for guarantees, making the costs of administration very high. This has made defined benefit plans all but obsolete.[60]

In contrast, a DC plan allows employees and employers to contribute and invest funds over time to save for retirement. The contributions can be invested, at the participant's direction, in select mutual funds, money market funds, annuities or stock offered by the plan. This allows the participant to better align their investment risks and rewards. Because the employer no longer has any obligation for the performance of the contributions after they are deposited, the work required by, and the risk to, the employer are low. It is incumbent upon the employee to direct the contributions and investments to grow the assets for their retirement. The goal is for the employee to end up with more financial wealth upon their retirement. By offering incentives such as increased employer match, the state is in position to help employees who are enrolled in the DC plan earn more retirement wealth over the long run.

As of June 30, 2014, the FRS had 622,089 members who were covered by the provisions of the system including 363,034 annuitants. Regular Class membership comprised 87.35%, Special Risk Class membership comprised 11.03%, and Senior Management Services Class comprised 1.25%. All others classes combined comprised less than 0.5% of FRS members.[61]

The FRS Actuarial Assumption Conference met on October 6th and October 15th, 2015, to adopt updated economic assumptions to be used for the actuarial valuation of the FRS. The preliminary results show that the FRS continues to have an unfunded actuarial liability (UAL). As updated, the projected UAL is expected to increase from last year's $21.5 billion to $23.0 billion. In 2014, the system was 86.6% funded on an actuarial basis; however, the funded status is expected to decrease to 86.2% in the 2015 updated valuation.[62]

Cost Savings / Government Efficiency: The Florida Legislature commissioned a report by the state's actuaries to determine the costs associated with closing the DB plan to new state employees. An analysis of the actuarial study by the professional staff of the Florida House of Representatives determined an initial cost of $2.7 million in FY2014-15, then an estimated savings of $12.9 million in FY2015-16, out to an estimated $9.8 billion in savings in FY2042-43.[63]

FL-SEN-20-0201-B, 20-0202-A-004924

RECOMMENDATION GG 9: CONSOLIDATED MANAGEMENT OF STATE AGENCY VEHICLES

The Task Force recommends the Legislature consider consolidating management of all state agency vehicles into one statewide fleet program under one state agency (either DMS or FDOT) or third-party vendor with uniform standards for procurement, assignment, utilization, maintenance, and disposal of fleet vehicles.

Rationale: The Department of Management Services (DMS) is responsible for the oversight of the state's fleet of motor vehicles, which includes approximately 25,000 automobiles and light trucks, medium and heavy trucks, aircraft, construction and industrial equipment, marine equipment (e.g., boats, airboats, boat engines, etc.), trailers, tractors and mowers, small utility, motorcycles and all-terrain vehicles.[64] DMS operates and maintains the Florida Equipment Electronic Tracking (FLEET) System, which provides information necessary to effectively and efficiently manage the state's vehicle fleet.

A 2011 report by OPPAGA[65] found that, although DMS has authority to manage fleet operations, it has delegated much of its authority to state agencies, permitting the agencies to independently manage their vehicle fleets. Decisions concerning operations and management of state-owned vehicles are delegated to 30 state agencies. This decentralized model, according to OPPAGA, hinders coordination, which reduces efficiency and increases costs. Permitting state agencies to independently manage their vehicle fleets resulted in poor overall management, unnecessary fleet expenditures, duplication of effort, and agencies spending resources on activities that are not central to their core missions.

OPPAGA offered several recommendations[66] to improve fleet management. Consolidating the management of all state agency vehicles into one statewide fleet program with uniform standards for procurement, assignment, utilization, maintenance, and disposal would improve efficiency and could reduce costs by leveraging the state's buying power. The most logical agencies to manage the vehicle fleet would be DMS (which currently has statutory authority to manage the fleet program) or FDOT (which currently has the largest fleet and most fleet managers).

A December 2013 independent business case study by Mercury Associates, Inc.,[67] found that Florida's FLEET System was "the least capable system we have encountered in any of the 34 states we have worked with" and recommended the expansion of DMS' role and staff resources to provide increased and centralized oversight, analysis, and services to manage the state's fleet. DMS requested and received funding during the FY 2016 legislative session to procure a commercially available solution to support a centralized Fleet Management Information System with the capacity to manage all state-owned and leased equipment.

Cost Savings / Government Efficiency: The major benefits of improved fleet management are significant cost savings and improved efficiency resulting from a reduction of unnecessary fleet expenditures and duplication of effort, and duplication of effort. Based on the Mercury Business Case, opportunities to achieve cost savings include a five-year cumulative benefit of implementing the operating best practice recommendations (estimated at $8.8 million annually) and right sizing recommendations (estimated at $2.1 million annually) that total $26.8 million in projected savings.[68]

64 Professional Staff of the Committee on Appropriations, "Bill Analysis and Fiscal Impact Statement, PCS/CS/SB 326,"Bill Analysis and Fiscal Impact Statement," March 2, 2016.

67 Mercury Associates, Inc., "Fleet Management Business Case for the State of Florida," December 2013.

68 Supra, footnote 64.

FL-SEN-20-0201-B, 20-0202-A-004925

RECOMMENDATION GG 10: CREATION OF TEMPORARY RESTRICTED-USE LICENSE PLATES

The Task Force recommends the Legislature authorize the use of temporary, restricted use license plates during the private sale of motor vehicles to facilitate the transfer of ownership.

Rationale: If one buys a vehicle from a Florida dealership, one receives a temporary plate that is valid for 30 days after the date of purchase. This allows the buyer to drive the vehicle while waiting for the vehicle title and registration. In the private sale of a vehicle, however, the buyer cannot get a temporary license plate. The seller is required to remove the license plate from the vehicle and either return it to the Department of Highway Safety & Motor Vehicles or the county tax collector/local tag office.[69] After completing the transfer of the title by the seller, the buyer and seller must then go to the Department of Highway Safety & Motor Vehicles or the county tax collector/local tag office to ensure the vehicle is transferred out of seller's name and into the buyer's name.

A restricted use, temporary (3 days) permit would allow the buyer in a private vehicle sale to operate an unregistered vehicle or a vehicle with a suspended registration from the present location of the vehicle to a specified destination (e.g., county tag office) to transfer the title and register the vehicle. The restricted use, temporary permit could be printed from the buyer's home computer printer, after making an appropriate on-line payment, by following the steps outlined on the Department of Highway Safety & Motor Vehicles' website.

Cost Savings / Government Efficiency: This is a revenue-generating opportunity. In Arizona, for example, the fee for a 3-day restricted use permit is $1.00; however, the Legislature has the authority to establish whatever fee amount it deems necessary and appropriate. The amount of revenue to be generated cannot be determined.

69 Section 320.0609(2)(a), Florida Statutes.

FL-SEN-20-0201-B, 20-0202-A-004926

RECOMMENDATION GG 11: REACTIVATION OF STATE MATCHING FUNDS

The Task Force recommends the Legislature lift the suspension of state matching funds for the Alec P. Courtelis University Facility Enhancement Challenge Grant Program and the University Major Gifts Program.

Rationale: Recognizing that state universities do not have sufficient physical facilities to meet the demands of their instructional and research programs, and that there are sources of private support that, if matched with state support, can assist in constructing much-needed facilities, the Legislature established the Alec P. Courtelis University Facility Enhancement Challenge Grant Program for the purpose of assisting universities build high priority instructional and research-related capital facilities.[70] This program provides a dollar-for-dollar match for operating gifts for capital construction for instruction or research facilities. All projects must be on the 5-year capital improvement plan and be approved by the Board of Governors or Legislature to be eligible for a state matching gift.[71]

In addition, the University Major Gifts Program provides opportunities for each state university to receive and match challenge grants to enhance their libraries and instruction and research programs. The amount of state matching funds allocated to each university is based on the amount of the donation and the restrictions applied to the donation.[72]

Effective July 1, 2011, state matching funds to the challenge grant programs (University Major Gifts and Alec P. Courtelis University Facility Enhancement) were temporarily suspended for donations received on or after June 30, 2011. Existing eligible donations remain eligible for future matching funds. The program may be restarted after $200 million of the current backlog is paid. The timing of this is uncertain.[73] The Major Gift Matching Program has a current backlog of $285.0 million; investing this amount will release more than $370.7 million in donations, which could otherwise be used to fund endowments and scholarships but which currently sit idle.[74] The Courtelis University Facility Enhancement Program has a current backlog of $92.7 million; investing this amount will release an equal amount of donations that could be used to fund capital improvements.[75]

Cost Savings / Government Efficiency: Lifting the suspension and investing the $377.8 million total backlog will result in the release of $556.3 million in donations, a return of almost $178.5 million (32 percent) and saving Taxpayers $556.3 million for needed University facilities.

FL-SEN-20-0201-B, 20-0202-A-004927

RECOMMENDATION GG 12: IMPROVE EFFICIENCY OF SALES AND USE TAX AUDITS

The Task Force recommends the Legislature increase the DOR's sales and use tax audit coverage by adding new auditors, creating new state positions, and contracting with private auditors. In addition, the Legislature should expand the Certified Audit Program to allow recipients of Notices of Intent to Audit to use a DOR-certified private auditor in lieu of an audit by the DOR.

Rationale: The Department of Revenue (DOR) is responsible for auditing Florida businesses to make sure state taxes are properly reported, collected, and paid. Accurate and efficient auditing is a key to DOR's success in bringing taxpayers into compliance and promoting voluntary compliance. The DOR audits only about one-half of one-percent percent of its taxpayer accounts, whereas the federal Internal Revenue Service's audit coverage is 1.1 percent for individuals and 1.5 percent for corporations.[76] DOR would need to hire almost 400 additional auditors just to be able to audit one-percent percent of its taxpayer accounts.[77]

To encourage voluntarily compliance, s.213.285, F.S., established a Certified Audit Program as a cooperative effort between DOR and the Florida Institute of Certified Public Accountants ("FICPA"). The program allows taxpayers to hire qualified CPA firms to review their tax compliance for the tourist development taxes imposed by ss. 125.0104 and 125.0108, F.S, and the sales and use tax imposed by ch. 212, F.S. Taxpayers who take advantage of the certified audit program may see their tax liability decrease due to the abatement of interest and waiver of penalties. CPAs who are certified by DOR to conduct such audits will see additional demand for their services should the expanded eligibility lead to more participation.[78]

Expanding the scope and/or increasing participation in the certified audit program should free up resources to allow DOR to conduct more audits and collect additional taxes from noncompliant taxpayers whose liability would have otherwise gone undetected.

Cost Savings / Government Efficiency: On March 16, 2013, the Revenue Estimating Conference estimated that allowing taxpayers to enter the certified audit program after receiving a notice of intent to audit would have a recurring savings of $2.4 million to the state and $0.5 million to local governments.[79]

FL-SEN-20-0201-B, 20-0202-A-004928

RECOMMENDATION GG 13: IMPROVED ENERGY EFFICIENCY IN STATE BUILDINGS

The Task Force recommends that all Florida government entities take advantage of the opportunity to recover taxpayer investment in recently completed building or retrofits through the retroactivity provisions of Section 179D of the Internal Revenue Code , and to help defer future costs of building and retrofitting.

Rationale: Section 179D of the Internal Revenue Code, created as part of the 2005 Energy Policy Act, allows owners of commercial properties to receive federal tax deduction for costs associated with the installation of energy efficient lighting, HVAC and/or building envelope systems. Originally set to expire December 31, 2014, Section 179D was recently extended for 2 years, through December 31, 2016, and retroactively for 2015.[80] The deduction may be applied retroactively to 2006.

Building owners and tenants who make improvements that cause new or renovated commercial buildings to be more energy efficient, and designers of qualifying government buildings, will be eligible to receive a federal tax deduction of up to $1.80 per square foot. The resulting tax savings can offset the costs of implementing the energy efficiency measures. Since government entities do not pay taxes, they are not eligible to receive the direct deduction; however Section 179D's Special Rule for Government-Owned Buildings allows government to allocate the benefit to a tax-paying 'designer' and receive savings in return for the allocation.

To receive the maximum deduction, the building's energy and power costs must be reduced by a minimum of 50 percent as compared to predetermined ASHRAE standards. Buildings that do not achieve 50 percent savings can still qualify for a deduction of $0.60 – $1.20 per square foot. Available deductions for partially qualifying systems include: $0.60/sq. ft. for HVAC systems that meet 15 percent savings; $0.60/sq. ft. for lighting systems that meet 25 percent savings; and $0.60/sq. ft. for building envelope systems that meet 10 percent savings.[81] To determine whether a commercial building qualifies, an energy savings calculation must be performed with Department of Energy approved software. To verify results, an on-site inspection must be conducted after the energy efficient installation(s) has been placed into service. This certification process and inspection must be completed by a qualified engineer or contractor in the jurisdiction of the qualifying building.[82]

The University of Florida (UF) retained a qualified environmental consulting firm to administer its 179D allocation process and initially secured $135,000 in savings, with more expected.[83] Miami-Dade County took a similar approach and received $1.135 million in savings associated with recent improvements to the County's downtown chilled water system.[84]

Cost Savings / Government Efficiency: To illustrate, consider a government entity with 5,000,000 sq. ft. of qualifying area that hires a "designer" to pursue the deduction. Assuming a minimum 179D allocation of $0.60/sq. ft., the total tax deduction would be $3 million. Assuming a 35 percent tax bracket for the designer, the total tax benefit would be $1,050,000. If this benefit were split equally, the government entity would receive $525,000 for projects already completed using taxpayer resources. If this example could be applied to larger entities like the State University System or local school districts, which have significant numbers of buildings, the savings could be substantial.

FL-SEN-20-0201-B, 20-0202-A-004929

RECOMMENDATION GG 14: IMPROVE MANAGEMENT OF ASSETS AND FACILITIES

The Task Force recommends the Legislature provide funds to contract with an independent third party firm to partner with the Florida Department of Environmental Protection (DEP) and Department of Management Services (DMS), as well as any other state agencies, to inventory, survey and provide condition assessment of state owned facilities. The survey should, at a minimum, consist of identifying location, key characteristics, valuable assets, facility condition and occupancy.

Rationale: Florida's current real estate delivery model is decentralized among multiple agencies currently estimated at more than 13,000 facilities managed by 20 state agencies- totaling more than 63 million square feet. Inaccurate or incomplete inventory data and lack of timely information on these assets are largely to blame for the inefficiencies in facility management of state owned assets, costing taxpayers millions, increasing risk to the state and making planning and oversight challenging.

The state has taken the first step in changing the current decentralized model and improving the information used for decision-making through collaboration between DEP and the DMS for the creation of a consolidated real estate database (FL-SOLARIS). In order to achieve the maximum return on investment, the state needs a way of not only creating an initial inventory that is accurate and complete but needs a software tool to collect and maintain important information such as geospatial information, key characteristics, high value assets, compliance information (ex. ADA), facility condition and occupancy. This information then could be made available to other state agencies, the public and businesses.

Effective implementation would help address the state's persistent management and oversight challenges by providing standardized, high-quality data. In addition, this initiative would help promote transparency across agencies, to the public and aid in addressing ongoing government management challenges by expanding the quality and availability of state facility data. Having better data also will make it possible to gauge the magnitude of the state investments, help agencies make more fully informed decisions about how resources should be allocated, and provide agencies and the audit community with additional data analytic tools to aid in compliance risk mitigation, disaster recovery and planning.

Finally this initiative would greatly compliment the goals set by both the CBRE group and DMS to implement the following strategies:

- Reduce occupancy management costs by reducing the amount of space needed for agency operations;
- Consolidate oversight of facility operations;
- Help the state utilize its real estate in highest and best use or monetize its assets;
- Ensure state facilities are ADA compliant; and
- Create operation capacity gains from a simplified, centralized and streamlined tool for conducting facility management, operations, inspections, and maintenance/issue remediation.

Cost Savings / Government Efficiency: The benefits from inventorying, surveying and assessing the condition of state-owned and leased facilities are significant yet indeterminate.

FL-SEN-20-0201-B, 20-0202-A-004930

HEALTH AND HUMAN SERVICES

RECOMMENDATION HHS 1: RIGHT-PRICING FOR EMERGENCY ROOM VISITS

The Task Force recommends the state increase copayments for emergency room visits by state employees that do not result in hospitalization from $100 to $250 to better reflect true costs and deter an increased utilization and reliance on costly emergency room care, thus avoiding unnecessary costs. The copayment would continue to be waived 100 percent if the visit results in hospitalization.

Rationale: Today, hospital emergency departments are a major source of primary health care in the community, treating a broad range of health problems that include many visits for minor ailments and other non-urgent conditions.[85] Health care consumers are generally over-dependent on emergency room services, when many health issues can be prevented or mitigated in a more efficient way through proactive primary care.

In recent years, freestanding, hospital-owned emergency centers have increased across Florida. These stand-alone centers may have limited facilities not equipped for true emergencies and closer to urgent care services, but still bill the plan as an emergency room visit. Any emergency room visit costs the patient and insurer considerably more than a visit to the patient's doctor or to an urgent care center. As a result, every non-essential or non-urgent emergency room visit increases the costs to consumers and insurers. For the same type of outpatient visit, Medicare reimburses medical providers $316 if a patient is treated in an emergency room, compared with $138 in an urgent care center.[86]

The emergency room visit copayment for state group insurance plan members is $100 across all available health plans. Within the industry, emergency room visit copayment levels on other health plans are frequently in the range of $150 to $250, with public sector employer plans often trending toward the lower end of the range. Other health plans use structures that vary copayments depending on usage.

Data indicate that emergency room usage by individuals on the state group health plan is higher than the average usage by insured individuals. Emergency room utilization by individuals on the state plan in 2014 averaged 249 visits per 1000 members.[87] With 171,749 state group health plan policy holders,[88] this equates to more than 42,700 emergency room visits annually. The Centers for Disease Control (CDC) report that only 11.9 percent of emergency room visits result in hospital admission,[89] suggesting that 88.1 percent of all state employees visiting emergency rooms (37,619 visits) could be treated more efficiently and at a lower cost by primary care practitioners or urgent care facilities.

Cost Savings / Government Efficiency: Marginal copayments create little incentive for state employees to better anticipate their health needs by regular visits to primary care practitioners, or to obtain lower cost care at urgent care facilities. An increase of copayment from $100 to $250 for emergency room visits will cover more of the total cost (6.8 percent of the average cost per visit), and save the state an estimated $5.64 million annually.[90]

90 37,619 unnecessary visits X $150 increased copayment per visit = $5,642,850.

FL-SEN-20-0201-B, 20-0202-A-004931

RECOMMENDATION HHS 2: IMPROVED DEPENDENT EDUCATION AND ELIGIBILITY UNDER THE SGIP

The Task Force recommends the Legislature appropriate funding for a comprehensive audit of eligibility status of dependents covered under the State Group Insurance Program (SGIP) and switch from a passive enrollment process to an annual active enrollment process to avoid unnecessary costs paid for ineligible recipients.

Rationale: There is currently an unknown, but substantial, number of ineligible dependents improperly receiving health coverage and benefits under the State Group Insurance Program. State contracted plan vendors may report information to the DMS if the vendor becomes aware of a potentially-ineligible dependent. Once reported, the DMS researches and/or contacts the enrollee to request documentation demonstrating the dependent is eligible. The DMS may remove the dependent from coverage if it determines the individual is ineligible. BMI Audit Services, a professional health care benefits auditing company, reports that the number of ineligible dependents for any given organization can range between 2 -10%.[91] Most studies suggest that roughly 8 percent of dependents enrolled in health-care plans are ineligible for coverage.[92]

Currently, enrollees in the state group health insurance plan register eligible dependents (spouses and children) through a passive enrollment process which allows employees to roll over their benefits from year to year without requiring them to assess their plan options or learn more about their benefits. As a result, many ineligible dependents continue to receive benefits. Shifting to an annual active enrollment process would require employees to choose an enrollment plan and identify their dependents each year, regardless of their coverage and dependents from the previous year.

It is important that an extensive education and communication effort should precede the audit to inform health plan subscribers about the audit, increase response rates, and reduce the number of appeals. It may be necessary to procure the services of a third-party to assist in this communications effort. Those health plan subscribers identified in the audit as having ineligible dependents should be afforded an opportunity to make the necessary changes in their state health plans before any sanctions are imposed.

Cost Savings / Government Efficiency: The major benefits of purging the SGIP of ineligible recipients would be immediate and recurring savings to the state. Based upon the average annual per dependent cost ($5,670) and average dependent enrollment for plan year 2014 (152,541 enrollees), it is estimated that, for every 1 percent of dependents found to be ineligible, that the state would avoid $8.7 million in costs. Based on the industry average of 8 percent of covered dependents in a given plan found to be ineligible, the dependent eligibility audit would save the state an estimated $69.6 million annually.

FL-SEN-20-0201-B, 20-0202-A-004932

RECOMMENDATION HHS 3: SGIP PREMIUM PARTICIPATION PROGRAM

The Task Force recommends the Legislature contribute a set amount or percent toward the annual health insurance premiums of state employees that is consistent with that paid by other large public and private employers. This cost shift would result in significant savings for the state.

Rationale: Currently, there are three categories within the State Group Insurance Program (SGIP): employee only coverage, spouse coverage[93], and family coverage. Like the Florida Retirement System, the SGIP is a defined-benefit program, in which the employee pays a fixed amount toward the monthly premium and the state pays the remainder. In 2004, the employee's share of the $4,383 annual premium was $584 (13.3 percent). The state paid the remaining $3,869.[94] By 2014, the annual premium had increased to $7,698, with the employee paying only $600 (8.5 percent). The state paid the remaining $7,098.[95] The same is true for family coverage. In 2004, the employee's share of the $10,104 annual premium was $2,102 (20.8 percent). The state paid the remaining $8,002.[96] By 2014, the annual premium had increased to $17,328, with the employee paying only $2,160 (12.5 percent). The state paid the remaining $15,168.[97] It is clear that, over the past decade, the state has paid more and more of employee health insurance annual premiums and the amount the state pays continues to increase each year.

A 2010 benchmarking report by Mercer Consulting[98] compared Florida's state health insurance program to other large (500 or more employees) private and public sector programs. Mercer found that the state contributed a higher percentage of the annual health insurance premium than other states and private employers. The state now pays approximately 88 percent of the annual premium for a family Preferred Provider Option (PPO) plan, whereas large national employers pay 71 percent to 79 percent.[99] During fiscal year 2014-15, the state contributed approximately 91 percent ($1.68 billion) of the $1.85 billion total premium for active employees.

In a defined-contribution program, the state would contribute a set amount or percentage toward the employee's annual premium and the employee would pay the remainder. Establishing a set amount or percent that is consistent with that paid by other large public and private employers would shift more of the annual employee health insurance annual premiums to the employee and would result in significant savings for the state.

Cost Savings / Government Efficiency: Based on projected fiscal year 2015-16 state health insurance program costs of $2.24 billion[100], reducing the state's contribution toward employees' annual health insurance premiums from 91 percent to 71-79 percent would save the state an estimated $268.8 million to $448.0 million annually.

93 Both employees must work for the state.

FL-SEN-20-0201-B, 20-0202-A-004933

RECOMMENDATION HHS 4: IMPROVED ACCESS AND USE OF TELEHEALTH SERVICES

The Task Force recommends the Legislature further remove disincentives and barriers to the use of telehealth services, and while detailed policies are being determined, Florida should provide a foundation for the statewide expansion of telehealth. This will increase access to healthcare and avoid future costs.

Rationale: The availability of health manpower and resources to serve Florida's growing population continues to be a problem, a problem that is not confined to just rural areas. As of December 2012, there were 36 federally designated Medically Underserved Areas in Florida, 12 of which were rural counties. All 67 Florida counties have at least one underserved geographic area or population. In addition, there were 121 designated primary care shortage areas located in 65 counties.[101]

According to the federal shortage designation statistics, the number of Floridians without access to a primary care provider is 4,190,410 or 26.6 percent of Florida's population. Sixty-one counties also have Dental Health Professional Shortage Areas and 44 counties have Mental Health Professional Shortage Areas, most of which are rural. The ratio of population to practicing primary care physicians in 2011 for the 30 rural counties (2,067 per physician) was almost twice that for the state as a whole (1,304 persons per physician) and ranged from 905 in Union County to 5,577 persons per primary care physician in Hardee County. One rural county (Liberty) had no practicing primary care physicians.[102]

Telehealth services have been successfully implemented in other states and some isolated pockets of Florida as a way to: (1) address the shortages of specialists such as dermatologists, neurologists, radiologists, critical care doctors, and mental health specialists; (2) close the care gap for patients who live in rural areas; and (3) close the care gap for patients with debilitating illnesses for whom travel is difficult or impossible. While telehealth has proven to be effective in providing access to quality care, there are barriers and disincentives that limit its expansion.

Breaking down these barriers and disincentives will require, at minimum, promoting the continuation of good current telehealth practices across a full range of healthcare providers, setting standards of care and recordkeeping, and empowering respective practice boards. Additional financial incentives and expanded availability for telehealth provision, especially in high-need, high-cost populations such as the aging and individuals with disabilities should be explored. Continued discussion of telehealth policy issues across all industries and stakeholders is encouraged and necessary as practices and needs evolve.[103]

Cost Savings / Government Efficiency: A telehealth pilot study examining the first six months of results for 135 patients with multiple chronic conditions identified as the most complex and most costly – the top 5 percent of patients who account for roughly half of all healthcare expenditures - reduced the cost of care by 27 percent and reduced long-term and acute care costs by 32 percent.[104] Florida healthcare expenditures total $132.5 billion annually, equaling approximately $7,156 per person and roughly 6.3 percent of the United States' total healthcare expenditures.[105] If reducing the remaining barriers to telehealth could reduce the cost of healthcare by a more modest 10 percent, Floridians would save an estimated $13.2 billion annually.

FL-SEN-20-0201-B, 20-0202-A-004934

RECOMMENDATION HHS 5: RIGHT-PRICING AND ENHANCED CHOICES FOR THE SGIP

The Task Force recommends the Legislature increase the health plan options available to employees enrolled in the State Group Insurance Program (SGIP) by establishing employee contribution rates that reflect the actuarial benefit differences between the existing plans. This will bring employee premiums and plan benefits more in line with industry benchmarks.

Rationale: Health plan options for state employees are limited to the following:

- Preferred Provider Organization (PPO) Plan—a statewide self-insured plan administered by Florida Blue;
- Health Maintenance Organization (HMO)—an insurance arrangement in which the state has contracted with 6 statewide and regional HMOs;
- Health Investor PPO Plan—a statewide high-deductible health plan (HDHP) with an integrated health savings account (HSA) administered by Florida Blue; and
- Health Investor HMO Plan—an HDHP with an integrated HSA in which the state has contracted with 6 statewide and regional HMOs.

There are currently 171,794 state policyholders, 50.3 percent of which are enrolled in the standard HMO plan and 48.3 percent of which are enrolled in the standard PPO plan. The remaining 1.4 percent are enrolled in either of the HDHP plans.[106] This is contrary to the trend among large employer health plans over the past decade of increasing enrollment in HDHPs and declining enrollment in HMOs.

The actuarial value (AV) measures the percentage of expected medical costs that a health plan will cover and is generally considered a measure of the health plan's generosity. The state program's standard HMO plan has an AV of 92.6%, the standard PPO plan has an AV of 88.9%, and the HDHP has an AV of 80%.[107] Many employees in the SGIP enroll in the low-cost, high-value HMO because of its high AV and because there is no difference in premiums between the HMO and PPO plans.[108] A March 2015 AV analysis concluded that state employees "have little real choice among health plan options since there is only a 4 percent difference in the "richness of the benefits" between the HMO and PPO, and the price is the same."[109] As a result, state employees have little incentive to enroll in the HDHP plans.

Because there is a 4 percent difference in the AV between the standard HMO and standard PPO plans, the state must pay more for HMO benefits than for PPO benefits. These payments come from the State Employees' Group Health Self Insurance Trust Fund, funds from which are also used to pay administrative expenses of the SGIP.

Cost Savings / Government Efficiency: Because DMS is currently procuring HMO contracts for the SGIP, the value of the benefits offered by the HMOs that will receive a contract is unknown. Employee contribution rates that reflect the different values of the HMO and the PPO cannot be determined until the conclusion of the procurement.[110]

FL-SEN-20-0201-B, 20-0202-A-004935

RECOMMENDATION HHS 6: STATE EMPLOYEE WELLNESS PROGRAM

The Task Force recommends the Legislature implement a state employee wellness program adopting only those practices that have evidenced a high return on investment.

Rationale: Health insurance for employees costs the state nearly $2 billion each year and an estimated 75 percent of all health care spending is attributed to preventable medical conditions. State agencies are increasingly looking for ways to reduce employee health care costs. A study in the peer-reviewed journal Health Affairs, found that private companies with wellness programs have seen a 28 percent decrease in sick leave, a 26 percent reduction in adjunctive health care costs, and a 30 percent reduction in disability and workers compensation costs.[111] A meta-analysis of the literature on costs and savings associated with workplace wellness programs found that medical costs fall by about $3.27 for every $1 spent on wellness programs, and that absenteeism costs fall by about $2.73 for every $1 spent.[112]

Successful wellness programs must focus on encouraging only prevention behaviors that are evidence-based, reflect nationally-recognized health indicators, and have been proven to reduce undesirable costly outcomes, such as chronic diseases, emergency room visits, and hospital readmissions. A well-designed incentive program for state employees could yield benefits primarily because of the longevity of the employer-employee relationship. State employees tend to remain employed with the state for long periods of time; therefore, a wellness program would likely have a high return on investment.[113] An emerging trend is to offer incentives to employees based on leading health indicators, primarily tobacco use and body mass index, as part of employee wellness programs.[114]

Cost Savings / Government Efficiency: Every dollar invested into evidence-based workplace wellness programs can be expected to reduce medical costs by about $3.27 and reduce absenteeism costs by about $2.73.[115] Other benefits of implementing a worksite wellness program, the costs of which are indeterminate, include improved employee morale, reduced absenteeism, improved employee health, reduced workers compensation claims, and increased productivity.

FL-SEN-20-0201-B, 20-0202-A-004936

RECOMMENDATION HHS 7: ASCERTAIN FOSTER CARE SYSTEM OUTCOMES

The Task Force recommends the Legislature begin a follow-up program of determining outcomes for those who have been served by the Florida foster care system a minimum of three years. The follow-up program will ask outcomes of former foster care system clients at 3, 5 and 10 years after aging out of foster care.

Rationale: Many former foster kids have a tough time out on their own. When they "age out" of the system, they're more likely than their peers to end up in jail, homeless or pregnant. They're also less likely to have a job or go to college.[116] Conservative studies find one in five will become homeless after 18; at 24, only half will be employed; less than 3% will have earned a college degree; 71% of women will be pregnant by 21; and one in four will have experienced post-traumatic stress disorder at twice the rate of United States war veterans. And too often, many are at risk of moving back into government systems -- from juvenile centers to prison.[117]

Children born to mothers raised in foster care are five times more likely to end up in foster care themselves. Stopping the generational cycle of foster care requires a collaborative and comprehensive approach that starts with education — beginning with information about pregnancy prevention. Foster children who become pregnant need extra attention to make sure they get the services and resources that will prepare them not only for parenting, but also for life.[118]

Florida's Department of Children and Families (DCF) has implemented an expanded version of the National Youth in Transition Database (NYTD) Survey to be used on an annual basis to survey young people ages 18-22 who have aged out the state foster care system. The 2015 Florida NYTD Survey included responses of 1,288 respondents aged 18 to 22 who turned 18 while in Florida's foster care system, and found that 25 percent had given birth or fathered children, and that 69 percent had no healthcare insurance other than Medicaid.[119]

While the Legislature and the DCF are to be commended for their efforts to improve child welfare outcomes, Florida does not have sufficient data to precisely know what happens to these children after they age out of the foster care system. Outcome data should be collected at 3, 5 and 10 years after aging out of foster care to get a better idea of how successful Florida's foster care children are, and determine whether they have access to services that will help them meet their goals in various aspects of their lives (i.e., education and employment).

Cost Savings / Government Efficiency: The major benefits of addressing the generational issues of foster children are significant cost avoidance. Costs will be avoided as a result of improved services available to pregnant and parenting foster children and resulting improved outcomes. The recurring cost savings to the state would be significant, yet indeterminate.

FL-SEN-20-0201-B, 20-0202-A-004937

RECOMMENDATION HHS 8: REDUCING MEDICAID AND PUBLIC ASSISTANCE FRAUD

The Task Force recommends the Legislature appropriate funding to implement and support the recommendations contained in the Medicaid & Public Assistance Fraud Strike Force's October 2012 Annual Report.

Rationale: Medicaid fraud in Florida is big-dollar crime. Medicaid services are provided through a managed care system in which Medicaid health benefits and services are provided through contracted arrangements between the Agency for Health Care Administration and managed care organizations (MCOs). The MCOs are paid a set amount per member per month (capitation) for these services.

The healthcare program for the poor in Florida costs taxpayers $21.2 billion, nearly a third of the state's overall budget. Of the total, $11.6 billion is paid for by the federal government. Estimates put the amount lost to fraud in Florida each year at between 5 and 10 percent of the state healthcare budget ($1.06 billion - $2.12 billion).[120] Because services are provided by the MCOs, the MCOs also have an obligation to go after fraud wherever they find it. Between December 2007 and December 2011, requests for assistance submitted through ACCESS increased by 28%. SNAP (food stamp) caseloads increased 139 percent and Temporary Assistance for Needy Families (TANF) caseloads increased by 18 percent.[121]

Federal law requires each state to have a Medicaid program integrity (MPI) unit within the Medicaid state agency to detect and investigate Medicaid fraud and abuse. Located within AHCA, the prevention of Medicaid fraud and after-the-fact recovery efforts is a high-priority activity of the MPI. Federal law also requires states to establish and operate a Medicaid Fraud Control Unit (MFCU) to conduct a statewide program for the investigation and prosecution of health care providers that defraud the Medicaid program.

Located within the Office of the Attorney General, the MFCU investigates allegations of patient abuse, neglect, and exploitation in facilities receiving payments under the Medicaid program, such as nursing homes, facilities for the mentally and physically disabled, and assisted living facilities. The MFCU also investigates a wide range of misconduct originating primarily from fraudulent billing schemes.

The Florida Legislature established the Medicaid and Public Assistance Fraud Strike Force (Strike Force) to develop and implement a statewide strategy to coordinate state and local agencies, law enforcement entities, and investigative units in order to increase the effectiveness of programs and initiatives dealing with the prevention, detection, and prosecution of Medicaid and public assistance fraud.[122] The Strike Force included in its October 2012 Annual Report 22 recommendations that, if implemented, would:

- Secure additional funding to adequately support existing processes intended to prevent, detect, investigate and prosecute fraud;
- Put into place the technology to connect all the databases that contain health care fraud and related data;
- Facilitate intra- and inter-agency coordination and communications;
- Identify critical activities that will enhance prevention efforts; and
- Provide opportunities to partner with local and federal agencies to enhance detection, investigation and enforcement efforts.[123]

Cost Savings / Government Efficiency: With estimates of the amount lost to fraud in Florida each year between 5 and 10 percent ($1.06 – $2.12 billion), the implementation of a Medicaid and public assistance fraud strategy that plan that reduced Medicaid fraud by 1 percent would save the state an estimated $10.6 million to $21.2 million annually.

APPENDIX A

PROPOSED FLORIDA GOVERNMENT EFFICIENCY ACT

A bill to be entitled

An act relating to government efficiency; creating s._____, F.S.; creating s._____, F.S.; amending Subsection (2) of section 216.162; amending Subsection (2) of section 216.163; amending Section 216.167; and providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Section 216.___ is created to read:

216.___ Short Title.- The provisions of this act shall be known and may be cited as the "Florida Government Efficiency Act."

Section 2. Section 216.___ is created to read:

216.___ Governor's annual government efficiency recommendations.—

(1) The Governor shall include in his or her budget recommendations, and the Legislature shall consider as part of the General Appropriations Act, recommendations for improving governmental operations and reducing costs.

(2) The Governor's recommendations for improving governmental operations and reducing costs shall consider reports and recommendations issued by the Auditor General, the Office of Program Policy Analysis and Government Accountability, the Government Efficiency Task Force, agency inspectors general, , state agencies, and recommendations submitted to the Executive Office of the Governor by the general public.

(3) Each state agency responsible for implementing the Governor's recommendations for improving governmental operations and reducing costs shall submit quarterly a report of their implementation status and any demonstrated cost savings to the legislative appropriations committees and to the Chair and Vice Chair of the Legislative Budget Commission.

Section 3. Subsection (2) of section 216.162, Florida Statutes, is amended to read:

216.162 Governor's recommended budget to be furnished Legislature; copies to members.—

(2) There shall be included in such document the details of the Governor's recommended balanced budget, including his or her recommended appropriations pursuant to s. 216.163, his or her recommended revenues pursuant to s. 216.165, his or her recommendations for improving governmental operations and reducing costs pursuant to s. 216___, and a financial schedule showing that his or her estimates of state revenues will be sufficient to fund the Governor's recommendations pursuant to s. 216.167.

FL-SEN-20-0201-B, 20-0202-A-004939

Section 4. Subsection (2) of section 216.163, Florida Statutes, is amended to read:

216.163 Governor's recommended budget; form and content; declaration of collective bargaining impasses.—

(2) The Governor's recommended budget shall also include:

(a) The Governor's recommendations for operating each state agency, and those of the Chief Justice of the Supreme Court for operating the judicial branch, for the next fiscal year. These recommendations shall be displayed by appropriation category within each budget entity and shall also include the legislative budget request of the corresponding agency. In order to present a balanced budget as required by s. 216.162, the Governor's recommendations for operating appropriations may include an alternative recommendation to that of the Chief Justice.

(b)1. The Governor's recommendations and those of the Chief Justice for fixed capital outlay appropriations for the next fiscal year. These recommendations shall be displayed by budget entity and shall also include the legislative budget request of the corresponding agency. In order to present a balanced budget as required by s. 216.162, the Governor's recommendations for fixed capital outlay appropriations may include an alternative recommendation to that of the Chief Justice.

2. For each specific fixed capital outlay project or group of projects or operating capital outlay requests recommended to be funded from a proposed state debt or obligation, he or she shall make available pursuant to s. 216.164(1)(a) the documents set forth in s. 216.0442(2).

(c) The evaluation of the fixed capital outlay request of each agency and the judicial branch and alternatives to the proposed projects as made by the Department of Management Services pursuant to s. 216.044.

(d) A summary statement of the amount of appropriations requested by each state agency and as recommended by the Governor and by the judicial branch.

(e) A distinct listing of all nonrecurring appropriations recommended by the Governor or the Chief Justice.

(f) A distinct listing of his or her recommendations for improving governmental operations and reducing costs pursuant to s. 216___.

(g)~~(f)~~ Any additional information which the Governor or Chief Justice feels is needed to justify his or her recommendations.

Section 5. Section 216.167, Florida Statutes, is amended to read:

216.167 Governor's recommendations.—The Governor's recommendations shall include a financial schedule that provides:

(1) The Governor's estimate of the recommended recurring revenues available in the Budget Stabilization Fund and the General Revenue Fund.

(2) The Governor's estimate of the recommended nonrecurring revenues available in the Budget Stabilization Fund and the General Revenue Fund.

FL-SEN-20-0201-B, 20-0202-A-004940

(3) The Governor's recommended recurring and nonrecurring appropriations from the Budget Stabilization Fund and the General Revenue Fund.

(4) The Governor's estimate of any cost savings realized through the implementation of the recommendations contained in Section 216.___.

~~(4)~~(5) The Governor's estimates of any interfund loans or temporary obligations of the Budget Stabilization Fund, the General Revenue Fund, or trust funds, which loans or obligations are needed to implement his or her recommended budget.

~~(5)~~(6)(a) For any recommendation to be funded by a proposed state debt or obligation as defined in s. 216.0442, the documents set forth in s. 216.0442(2) and a 5-year estimate of the program operational costs associated with any proposed fixed capital outlay project to be funded by the proposed state debt or obligation.

(b) The Governor's estimates of the debt service and reserve requirements for any recommended new bond issues or reissues and his or her recommended debt service appropriations for all outstanding fixed capital outlay bond issues.

Section 6. This act shall become effective upon becoming law.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004941

The Florida Government Efficiency Task Force was convened
under the authority of the Florida Constitution, Article III, Section 19(i).

- -

ARTICLE III

SECTION 19. State Budgeting, Planning and Appropriations Processes.—

(i) GOVERNMENT EFFICIENCY TASK FORCE. No later than January of 2007, and each fourth year thereafter, the president of the senate, the speaker of the house of representatives, and the governor shall appoint a government efficiency task force, the membership of which shall be established by general law. The task force shall be composed of members of the legislature and representatives from the private and public sectors who shall develop recommendations for improving governmental operations and reducing costs. Staff to assist the task force in performing its duties shall be assigned by general law, and the task force may obtain assistance from the private sector. The task force shall complete its work within one year and shall submit its recommendations to the joint legislative budget commission, the governor, and the chief justice of the supreme court.

- -

The Chairman and the Members of the Government Efficiency Task Force acknowledge and thank the professional staff of Florida TaxWatch and the executive and legislative staff for their assistance researching, drafting, formatting, and publishing this report.

CourtSmart Tag Report

Room: EL 110 **Case No.:** **Type:**
Caption: Government Efficiency Task Force **Judge:**

Started: 10/8/2019 10:01:29 AM
Ends: 10/8/2019 10:53:20 AM Length: 00:51:52

10:01:28 AM Meeting held while waiting for 2 persons to arrive.
10:02:05 AM Meeting recording has begun
10:02:21 AM Meeting is called to order by Cody Farrill, Director of Legislative Affairs, Office of the Secretary, Department of Management Services
10:02:48 AM Roll call by Administrative Assistant
10:04:40 AM In attendance by phone: Senator Randolph Bracy, Senator Jeff Brandes, Senator Keith Perry Rachel Carpenter.
In attendance in person: Tarren Bragdon, Representative Jason Fischer, Robert Griggs, Ed Moore, Sal Nuzzo, Secretary Jonathan Satter, Bob Ward, Keith Wold.
Absentee: Patricia Levesque, Pat Neal, Representative Bob Rommel
10:04:43 AM **Cody Farrill** welcomes members to first meeting of 2019 - 2020 of the Government Efficiency Task Force. The Task Force was formed after amendment of the Florida Constitution was passed and is required to meet every four years. The meeting was published in the Administrative Register on September 27, 2019. Moving forward all notices will continue to be on the FLAR and will be available on FDMS website. DMS is the back office for the Florida Government. We are responsible for delivery of business, technology, and workforce services.
10:05:15 AM To partner with us this year are Tiffany Harrington, House of Representatives, Katherine Becker, of Florida Senate Committee of Agriculture
10:05:32 AM Adopt procedures for this year. Rules are detailed on meeting Tab 2 in the meeting packet.
10:05:48 AM Same task force rules as in 2011-2016. Is there a motion to approve? Motion made by Ed Moore, Secretary Satter seconds the motion. All in favor all opposed? – approved.
10:06:09 AM Member Introduction: Each member of the Task Force are asked to share their background and goals.
10:06:21 AM **Bob Wold** – Degree in Geology and two degrees law. Interested in efficiency in water management through policy objectives of the DeSantis administration, primarily focused on water quality. The 1972 law was not focused on quality when it was adopted. In favor of run off and ground water; and those water districts drawn along those boundary lines.
10:07:40 AM The geologic and hydrologic map of the state the boundaries don't coincide. How to manage those boundaries.
10:07:47 AM Area of dispute settlement, there should be mandatory dispute settlement for all dispute parties including governmental entity. This will also largely achieve the implementation of water quality policy. Advocate the judges come from the state administrative courts.
10:07:58 AM Need judges that have been trained to deal with water quality issues.
10:08:33 AM Area of agency overlap - focus water management issues in government - each agency to file and pursue applications to take over jurisdiction from federal agency currently managing the same issue. These could all be handled by state agencies.
10:09:57 AM Dealing with data management between entities and the government agencies.
10:10:14 AM data management and the internet should be free and open to everyone on a profit level. A democracy cannot exist without free open exchange ideas. The cost should be kept to minimal on a solution.
10:10:23 AM data more used than we need to. This costs time, energy and money.
10:11:19 AM Cody Farrill introduces Ed Moore
10:11:20 AM **Ed Moore**- Doctorate in Organizational Learning Theories.
10:11:42 AM Preference when divide individual members into committees: to look at interagency cooperation evidence when natural disaster – very good at reacting to it. Post disaster communication linkages and relationships need strengthening. How best to deliver services to the people of Florida, as we continue to be a growing state.
10:12:36 AM Tax Law-
10:12:50 AM Make sure services and equipment keep cost low as possible.
10:13:36 AM Develop actional items we can take to the legislature for them to respond to.
10:13:37 AM **Jonathan Satter**, Secretary of Department of Management Services (DMS) since beginning 2019
10:14:11 AM Means reducing friction improve service to residents and visitors
10:14:34 AM Government efficiency means – reduce friction in government; improve service to business, residents and visitors within the state.
10:14:54 AM Three areas: Analytics various components and agencies of the state generate a significant amount of data. Fan of evidence based policy making. Data has been traditionally treated as a bi-product rather than an asset.

AMERICAN OVERSIGHT

10:15:23 AM 2. Technology arm - rapid growth need to streamline it- largest stem of Government. How we structure its use and govern it can be very valuable.
10:15:58 AM 3. How do we address shared services across the enterprise- fleet, real estate, and technology?
10:16:29 AM **Tarron Bragdon**- founded and runs the Foundation of Government Accountability, a conservative think tank in Naples FL. We work on three areas: Welfare, Workforce and Health Care.
10:16:56 AM Florida is a national leader throughout many states.
10:17:09 AM 2012 CFO take info public available- turned over to Moore center at FSU. In partner with the DeSantis administration to undertake a study of welfare reform policy and tracking the outcomes and impact on people.
10:19:21 AM How we push through information to the public-- How we make that data easily consumable to the relevant end user. Use technology toward customer service- How do we live, work, and create jobs better.
10:19:53 AM **Sal Nuzzo** – Vice President of Policy with James Madison Institute focus on Economic Principles in Florida. 2- focus: 1 – Technological operability. Data and systems shared- overlapping services delivered and to minimize side effects that generate negative publicity. 2-Govt services at certain levels at times provide barriers to individuals in gaining employment becoming members of society.
10:20:18 AM Regulatory systems and licensing- try to streamline the barriers
10:20:39 AM **Bob Ward** – President CEO FL council 100. Businesses that give back to the community.
10:21:06 AM In public employment 26 years
10:21:18 AM HB 5301 - continue tracking area of cyber security
10:21:39 AM **Representative Jason Fischer**- align of small limited government. Background in Electrical Engineering.
10:22:07 AM Views on government are limited major transportation
10:22:22 AM Goal: Be as efficient as possible in how we operate in government, and communicate what we do to citizens of Florida.
10:22:54 AM How to make our lives and interaction with government more effective.
10:23:08 AM In legislature have spent time with technology solutions: 1- how government interacts with itself and 2- how the government interacts with the public. Government should be small and effective.
10:23:49 AM **Mr. Bobby Griggs** - small business man- Realty development.
10:23:59 AM FIU – from Miami
10:24:11 AM Limiting government with more tech aspect
10:24:28 AM **Cody Farrill** calls on Senator Brandes
10:24:30 AM **Senator Brandes** addresses team
10:24:37 AM Served on last task force
10:24:46 AM Encourage to review last few years reports and focus on a small area of items at one time.
10:25:11 AM **Senator Randolph Bracy** - Orlando first task force.
10:25:31 AM **Rachel Carpenter**, Co-founder and CEO- brings entrepreneur to the table. Doctorate in Finance, self-taught Engineering and Technology.
10:25:53 AM Background finance
10:26:35 AM If you want to build and grow - it's not possible unless we have clean data organized equally distributable
10:27:11 AM Municipalities
10:27:28 AM Ways to be efficient
10:27:46 AM **Cody Farrill** introduces Senator Perry-
10:27:51 AM **Senator Keith Perry** has served six years in House, and four years in the Senate. Owns and works private business 40 + years.
10:28:10 AM Majority with government agencies
10:28:20 AM Costs - more effective to business to do work
10:29:09 AM **Cody Farrill** asks were any members not able to join that missed roll? Names called and no answer. We need to nominate for chair for the committee.
10:29:22 AM **Sal Nuzzo** nominating based on use of Technology, since- DMS is the backbone office for this force; would like to formally nominate Secretary Jonathan Satter as the Chair. Is there a second motion? The motion was seconded.
10:30:19 AM Secretary Jonathan Satter is nominated and approved as chair of the committee. Chair Satter moves to the position of Chair of committee.
10:30:59 AM **Chair Satter** asks for nominations for Vice-chair. Senator Bracy nominates Senator Jeff Brandes as Vice-Chair.
10:31:34 AM The motion is seconded. No opposition.
10:31:43 AM **Senator Brandes** accepts Vice-Chair position.
10:32:02 AM Chair Satter explains and presents Tab 3 with purpose and responsibility of the task force
10:32:30 AM Cody Farrill- Task Force was established due to adopted amendment to the 2006 Florida Constitution which created new section of law requiring the following: Meet no later than January 1, 2007 and thereafter –meet every four years; the requirements are read to the committee. Contact DMS for details, posted on the DMS site
10:33:10 AM President of the Senate and the Speaker of the House, and the Governor shall appoint members Membership being established by general law; to be from the Senate, the House of Representatives, and the Public Sector and Executive Branch. Required to complete the work in one year. Present recommendations to the Joint

AMERICAN OVERSIGHT

Legislative Budget Commission, the Governor, and the Chief justice of the Supreme Court
10:33:20 AM Additional guidance passed in 2007 – Sec. 11.9005 F.S. **(1) (2) (3)**
10:33:36 AM Task Force is to be composed of 15 members, for term of one year; requires elected chair from its members.
10:33:46 AM Meet quarterly – members entitled to receive reimbursement for travel and per Diem.
10:34:00 AM Requires recommendation submitted, and a final summary report.
10:34:07 AM 2011- 2015 reports will be on DMS website
10:34:25 AM 2011 - 3 subsidies health education and general government
10:34:39 AM Several recommendations:
10:34:43 AM Business regulation and licensing
10:34:56 AM Expressway and bridge authority consolidation
10:35:01 AM Consultant's competitive negotiation act
10:35:11 AM Enterprise information technology to redefine and strengthen governance
10:35:24 AM 2015- 2016
10:35:28 AM Focus on Government Efficiency; Health and Human services, Criminal and civil Justice
10:35:37 AM Recommendations: Expand alternative forensic mental health programs;
10:35:44 AM Replace FLAIR
10:35:48 AM Additional funding and governance of the Agency for State Technology (AST)
10:35:56 AM Improve access and use of telehealth services
10:36:11 AM 2018-19
10:36:22 AM Technology & Innovation
10:36:36 AM Government operations
10:36:55 AM DeSantis Administration- law centralize single point of contact- interoperability between agencies.
10:37:26 AM Specific Focus on future on FL data
10:37:30 AM 1- future Florida Data 2 cyber sec
10:37:41 AM 3-data cataloging - collaboration
10:37:59 AM data why we collect -
10:38:15 AM Targeted - government operation
10:38:27 AM Move forward
10:38:29 AM Consider
10:38:33 AM 1How can state better leverage technology to increase efficiency?
10:38:38 AM 2 Can Floridians and visitors be better served with new technology?
10:38:52 AM 3 How can we increase efficiency in customer service operations across the state
10:39:09 AM Chair with comments
10:39:22 AM Chair introduces Sean Gellar
10:39:22 AM Discussion of sunshine public records law - Deputy Counsel of DMS
10:40:18 AM Meetings of public boards - open to public
10:40:27 AM Reasonable notice of meetings must be given. Minutes must be taken open for inspection
10:40:39 AM General rules

Task Force Traveler Guidelines

What to Know Before You Travel

- Please keep in mind that you are required to use the most economical method of travel when planning any trip, in order to be in compliance with section 112.061, Florida Statutes.
- Please make sure to review all cancellation policies carefully before booking. If you need to cancel after the trip has been authorized, the traveler may be responsible for fees incurred.

Transportation

Vehicle

The traveler has the option to use either a personal vehicle or a rental vehicle. If the traveler opts for a rental vehicle, the traveler must choose from a state authorized vendor. Use this link for reserving the rental vehicle: https://partners.rentalcar.com/stateofflorida/#/business. The traveler must choose either the compact or economy size vehicle. If an upgraded class of vehicle is chosen, the traveler will not be reimbursed for the difference. When the traveler chooses to use their personal vehicle, they will be reimbursed for the lesser of the mileage allowance (currently 44.5 cents per mile) or the most economical rental car rate. The traveler will be reimbursed for fuel based upon the rate of up to 38mpg.

Airfare

If the traveler chooses to fly, they will be reimbursed for what would be the most economical method of travel. For example, if the cost to drive (including rental car fee and fuel) is less than the price of an airline ticket, the traveler would be reimbursed for the lesser amount. Travelers are responsible for all travel arrangements and ticket purchases. Travelers are required to use coach/economy class. Airlines may have optional fees/upgrades that are not included in the base airfare such as preferred seating or priority boarding. These are considered personal preference for the traveler and will not be reimbursed.

Lodging

The traveler is encouraged to find the most economical option available for lodging. The traveler will be reimbursed up to $150 per night for lodging accommodations. If lodging costs exceed the state authorized amount of $150 per night, the traveler will not be reimbursed for the difference.

Meal Allowances

Travelers are eligible for meal allowances if overnight travel is required. If overnight travel is not required, meals will not be reimbursed.

Meal	Allowance	May only be claimed if…
Breakfast	$6	Travel begins before 6 a.m., and extends beyond 8 a.m.
Lunch	$11	Travel begins before 12 p.m., and extends beyond 2 p.m.
Dinner	$19	Travel begins before 6 p.m., and extends beyond 8 p.m., or when travel occurs during nighttime hours due to special assignment

AMERICAN OVERSIGHT

Per Diem

Travelers may be eligible for per diem if overnight travel is required. If overnight travel is not required, per diem will not be paid to the traveler.

For Class A and Class B travel, travelers may receive a maximum daily per diem of $80. Per diem is calculated for six-hour time periods.

- Midnight to 6 a.m.
- 6 a.m. to Noon
- Noon to 6 p.m.
- 6 p.m. to Midnight

What to Submit After Travel is Complete

Once the travel is complete, the traveler will need to submit the trip details form and all receipts for expenses related to the travel. All trip receipts and the completed form will need to be submitted to Vangie Felix at Vangie.Felix@dms.myflorida.com. Vangie can be reached via email or phone at (850) 487-2178.

Subject: HB843 and SB1832
Attachment(s): "Ending Permanent Alimony.pdf"

To All Members of the Florida Legislature,

HB843 and SB1832 are both a direct violation of Section 1 of the 14th Amendment. They will both be appealed, for certain, as they allow for absolutely no judicial discretion, meaning any party needing to seek refuge through the courts have no rights. Both sides need to have rights.

In addition, if these two alimony reform bills pass as they are written, equitable distribution laws will need to be rewritten simultaneously. Please see the attached file for an explanation of this relationship.

For the sake of all, please read the attached article.

Thank you for your time and consideration.

AMERICAN OVERSIGHT

by Jerry Reiss and Marc H. Brawer

Ending Permanent Periodic Alimony: A Crisis for Enforcing Equitable Distribution Waiting to Happen

The Florida Legislature has taken steps in recent years to end permanent periodic alimony. If they are successful, this will have a major impact on enforcing equitable distribution on a wide array of assets. These include assets controlled by one spouse before the final judgment is entered and are subsequently "stolen" by that spouse after it is entered. They also include assets intentionally dissipated before filing the petition for divorce, which then cannot be dealt with by unequally distributing other assets, has been cured in the past by awarding permanently periodic alimony.[1]

The assets affected include a plethora of things awaiting distribution under the deferred distribution method. They include most retirement plans, executive compensation payments and perks, unvested nonretirement benefits, and compensation enriched by future work effort designed to pay bonuses, including but not limited to employer stock and stock options. Assets affected also include forgivable loans repaid with a bonus schedule that is automatically repaid in full at death or disability, equalization payments, and intellectual properties. In most instances these assets, when present in equitable distribution, represent the lion's share of assets divided. Because they include most retirement benefits, few economic classes will be immune from the impact.

This article addresses appellate rulings that are part of the reason for the harmful effect and possible corrective measures that the legislature might consider passing into law that cannot work under our current state constitution. It will show that some of these matters are long overdue for our Supreme Court to address.

Problems of Enforcement

The enforcement problems can begin when the final judgment is entered. Property awarded is considered distributed and is enforceable only with respect to individual rights arising from the final judgment.[2] This means if that asset or its proceeds *are no longer available*, the court no longer retains jurisdiction to enforce that award against other marital property.[3] Thus, one issue ripe for consideration by the Florida Supreme Court is whether certain appellate rulings conflicting with the majority of sister state rulings that came to an opposite conclusion on whether the proceeds of the assets are no longer available are correct as matter of law. This will be dealt with when we address the faulty reasoning the First DCA employed in its ruling in *Board of Trustees v. Vizcaino*, 635 So. 2d 1012 (Fla. 1st DCA 1994), the refusal of other DCAs to rule otherwise,[4] and the issues the Fifth DCA raised in *Langford v. Langford*, 833 So. 2d 230 (Fla. 5th DCA 2002), certifying its ruling as a matter of great public importance to the Florida Supreme Court. The holding in *Vizcaino* cannot be cured simply by the Florida Legislature drafting a state statute for a qualified domestic relations order because that statute cannot do more than require municipal and other state retirement benefits to be enforced as property with an income deduction order. Anything else increases plan cost not presently funded, and the bill cannot require municipalities to increase plan cost not previously approved by city council. This would violate Fla. Const. art. X, §14, by increasing costs that have not been funded. Such a statute will do nothing to cure the underlying cause where it traces back to whether the proceeds are available as cash (to be discussed later in the article).

• *Fraudulent Conveyance to Jointly Titled Real Estate* — If the proceeds of any affected awarded asset are deposited to joint or tenants by the entireties property after the final judgment is entered, the only way it can be secured is by civilly piercing through that protected status by invalidating it. This requires proving fraud by showing the other spouse committed a willful fraudulent conveyance of property. After that is done, the property must be partitioned, and unless it can be shown that the other spouse had knowledge of and actively participated in the fraud, partitioning will release only half of the asset because the new spouse owns the other half once joint titling takes place. If the value of the "stolen" property exceeds that half, recovery is limited by half the proceeds on the sale. In addition, a successful outcome often requires litigating in more than one court. Then, as oftentimes is the case, the property is outside Florida, this requires litigating the matter in two separate states, which involves registration of that judgment and adjudication of the fraud. This can be done, but is an expensive undertaking.[5] A foreign court may need to be called upon to construe Florida law.

• *Enforcement in a Foreign Country* — A spouse who liquidates some assets and relocates with the remaining assets to a foreign country may be subject to enforcement if that country is part of the Hague Convention.[6] That involves a great deal of expense because a lawyer knowledgeable about Hague

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004953

located locally must be employed along with a lawyer in the country where the property is located for a coordinated effort. If the person resides in a country not subject to Hague, alimony can be used to get access to pension benefits not awarded with a qualified domestic relations order (QDRO) or an income deduction order (IDO), as applicable.[7] If none, there are always Social Security benefits that can be garnished, but only for need.[8] But they are only available as a source to pay support.[9] If permanent alimony ends, recovery is limited to the term limit on alimony.

• *Role Permanent Alimony Plays* — Permanent alimony affords some relief because temporary awards can be made permanent when this occurs.[10] Likewise, a court may refuse to consider a petition to modify a final judgment on support at retirement or when there is less income by finding that the substantial change of circumstances was self-inflicted,[11] ruling that the payor spouse voluntary divested himself or herself of assets, which if not fraudulently conveyed outside the reach of the court could have been used to demonstrate an ability to pay alimony.[12] Alimony awards are enforceable out-of-state making enforcement more realistic.[13] The roadblocks to enforcing equitable distribution described here would not be limited to tenants by the entireties property if permanent alimony were to end. They include any property over which the guilty spouse lacks control, such as many trust instruments in which he or she has a beneficiary interest. It also includes all property not spent or otherwise destroyed requiring enforcement by ordering the spouse to retitle the asset when the only means of enforcement is with contempt and that spouse resides outside Florida's reach. Alimony can be enforced out-of-state under the Uniform Reciprocal Enforcement of Support Act (URESA) replaced by UIFSA[14] of 1992 adopted by all 50 states.[15] More importantly, it can be enforced against Social Security payments and all retirement plans (including the spouse's awarded interest as property) overcoming *DeSantis v. DeSantis*, 714 So. 2d 637 (Fla. 4th DCA 1998), and any other rulings addressing enforcing a property interest using a retirement plan.

• *Enforcing Most Retirement Plans* — Retirement plans fall into a number of different categories, and each must be separately addressed in order to understand the different enforcement problems associated with each classification. They include ERISA-defined benefit plans, which have different challenges depending on whether they meet I.R.C. §401(a) conditions and are, therefore, qualified plans. They affect local government plans seeking plan qualification status a bit differently, because not all of the requirements need be followed by governmental plans seeking qualification, including exemption from offering QDRO enforcement.

Separate categories exist and breakdown almost identically for all defined contribution plans, with the exception of many governmental defined contribution plans, because they require certain IRS protection on asset accumulations, which is the reason why they sought qualification in the first place. That means that while they are exempt from offering a 29 U.S.C. §1056(d)(3) QDRO under an ERISA requirement, if they require a trust that relies on 29 U.S.C. §1056(d)(1) protection to individual account balances, they must, nonetheless, provide an I.R.C. §401(a) trust that requires QDRO access as part of the requirement for qualification. Therefore, different enforcement problems exist for local government defined contribution plans than local government defined benefit plans, apart from the basic problems for enforcing all retirement benefit awards. Each will be identified.

Exemption from statutory QDRO access does not mean that the non-assignment clause found in all retirement plans prevents assignment to spouses in matrimonial actions as the *Vizcaino* line of cases concluded.[16] They can be assigned because the purpose of such benefits was established before divorce became so commonplace an occurrence, and it was added to the retirement plan to protect retirement for the intact family unit, which included women and children.[17] The courts and most experts generally do not understand the distinction between QDRO enforcement that grants rights not covered by the basic plan, and involves substantial extra cost by adding underwriting risk the basic plan doesn't face, and a simple assignment. A simple assignment only provides access to payments as made. Nor do they understand that the nonassignment clause only prevents actual creditors from seizing the proceeds inside the trust, but after that payment is made, that protection is lost (unless it finds its way inside another protected asset, such as a qualified IRA).[18]

Enforcement and Valuations

The problem of enforcement with any retirement plan begins when attorneys fail to do valuations determining basic things, such as the dollar amount of the award, before the final judgment is entered. Even if perfectly bifurcated in the final judgment by fully retaining jurisdiction to determine said amounts, the information to do this won't always be available, and when it is, often requires subpoena power. The valuation can be complex depending on a host of factors that haven't yet come into play, and there may be no appetite for the client to engage in legal and discovery expense years later. The other spouse is forced to revisit how much that spouse didn't want to share his or her retirement plan benefits in the first place and is eager to defend against what has to be shared. This easily becomes a disputed contest making enforcement of the final judgment both expensive and very difficult to accomplish.

Traditional Pensions and Other Defined Benefit Plans

• *Ancillary Benefits* — Ancillary benefits include subsidies that exist in many different forms (some marital property and some not), survivor benefits payable to one beneficiary and others like a period certain or refund premium feature, which may or may not be payable to only one spouse, DROP[19] payments, and minimum guarantees, such as a floor benefit feature. These are not divisible with a QDRO but represent value to either the participant or beneficiary spouse depending on the feature. Therefore, the QDRO *cannot* divide all benefits and requires adjustments outside of it, and few lawyers appreciate this. A reservation of jurisdiction will not cure a 50% division that does not make allowances for a benefit feature that is marital property, but by design is paid only to one spouse. If there are cash benefits that accumulate, as in

AMERICAN OVERSIGHT

FL-SEN-20-0201-B; 20-0202-A 004954

DROP, failure to account for those allowances exacerbates the unequal division halving the payments that a QDRO provides. This is because the DROP payment is directly related to the amount of pension payment that the other spouse is entitled to share, and if unadjusted because no valuation was done, only skews the unequal division that much more because DROP is involved.

• *When the Employee Outlives the Spouse* — When survivor benefits are not in play and pension payments are divided with a QDRO and the payment is shared over the employee's lifetime, half the payments cannot be achieved because all plan administrators require that the assigned share revert to the plan participant upon the death of the beneficiary spouse. The courts seldom care because the spouse is not alive and doesn't need it. Property divisions are not based on need but rights. When health issues arise, division by QDRO often results in one spouse receiving nearly all of the benefit, and which spouse receives the windfall depends on facts yet to be determined.

Other Retirement Plans

These issues apply equally to defined contribution plans because family law brings with it so many operating principals that can apply to retirement plans. As one example, because the trust owns the assets, loans distribute property that involve marital and non-marital contributions, the percentage of split property depending on the extent of marital contribution when the loan is made. They are almost always repaid with automatic employee deductions, which are marital wages and, therefore, marital property. The process of repayment involves transmutation principles changing nonmarital property into marital property that occurs outside the trust. Thus, while the assets are exempt from transmutation while they sit inside the trust, that doesn't apply once the assets commingle outside the trust. Attorneys understand this when nonmarital funds are deposited to a marital account. But they give no thought to this when loan proceeds outside the trust instrument are repaid with marital funds.

A few loans can easily change a one-third marital classification based on contributions into a two-thirds marital classification based on the nonmarital portion of the loan property transmuting into marital property when it is repaid. When such benefits involving a nonmarital portion are divided it is absolutely mind boggling when that half hasn't been determined and is left for the plan administrator to do, which will never happen with defined contribution plans, even when loans are not in issue. In many instances, leaving valuation issues as post-dissolution tasks creates an environment in which assets are liquidated or for theft or dissipation to occur.

If permanent periodic alimony ends, retirement plans will have many enforcement issues that occur after the final judgment is entered. As previously mentioned, this is the result when valuations weren't performed, identifying which benefits can be divided inside a QDRO, which benefits cannot, and when offsets need be enforced at the same time the QDRO pays the benefit. It also occurs because attorneys do not understand that they divide the benefits when the final judgment is entered, not when the QDRO enforcing the final judgment is entered. Thus, when attorneys who do understand benefits enter final judgments without professional assistance from true benefit professionals, they can unknowingly create a host of enforcement problems, including unclear divisions that are contested later when enforcement is sought. The authors also believe that the faulty *Vizcaino* reasoning of the First DCA bled into other enforcement caselaw involving other assets, compounding the problem.

• *The Vizcaino Problem* — The *Board of Pension Trustees v. Vizcaino*, 635 So. 2d 1012 (Fla. 1st DCA 1994), dealt with the city of Jacksonville retirement plan, sponsored by a government entity, exempted from a QDRO under 29 U.S.C. §1056(d)(1). The former wife sought to enforce her interest with a QDRO covered by ERISA 206(d)(3) and in the alternative, if she could not, under an assignment with an IDO under Florida's income deduction statute. The court first concluded correctly that government entities were exempt under the ERISA nonassignment clause, and only those subject to it could avail themselves of a 29 U.S.C. §1056(d)(3) QDRO. Then it ruled that an IDO cannot be used to enforce the property awarded, finding the spouse was now a creditor prevented from getting an assignment, because the state statute requiring nonassignment to creditors prevented it. The court came to that conclusion because the Florida Supreme Court concluded in *Alvarez v. Board of Trustees*, 580 So. 2d 151 (Fla. 1991), that the IDO statute authorizes its use to collect alimony with an IDO and may be used to collect alimony from the city of Tampa pension plan. *Vizcaino* concluded that its failure to mention that it equally applied to a property division yielded the result that the city nonassignment clause applied to spouses awarded a property interest, and not because that was the narrow issue decided by *Alvarez*.

It has already been discussed that the nonassignment clause was added to retirement plans to protect women and children from creditors and not for the purpose of depriving a spouse from sharing benefits, especially after state law made that spouse an owner in one-half the benefit. In addition, the nonassignment clause in the city pension plan was established in 1937, 51 years before Florida's equitable distribution was created, and, therefore, had nothing to do with spouses enforcing a property right given to them under F.S. §61.075(5). How could the beneficiary spouse be a creditor when that spouse is an owner of property to which he or she seeks enforcement once the final judgment is entered?

How the *Vizcaino* Reasoning Affects Enforcement of Other Assets

The key point missed by the line of cases that rely on *Vizcaino* is that the employee does not own a retirement plan asset unless the asset is an individually titled insured annuity. The trust owns all retirement plan assets, and the plan sponsor(s) own(s) the trust. The plan sponsor is the employer providing benefits, or with union plans, the plan sponsors are the class of employers (referred to as multiple-employer plans) paying benefits. The employee doesn't own the asset but only has rights to benefits from the trust, which are always paid in cash. That makes all plan benefits cash benefits. This cannot be over emphasized because only the owner of the trust has the capacity to change or terminate the trust.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-004955

As money is fungible, all cash benefits are indistinguishable from each other. After the final judgment is entered and a pension award or other property right passes to individual property rights, this does not magically transform the property owner into a debt collector because they already own the cash payments under the same state law under which they seek to enforce it.

The other thing the caselaw does not consider is that these cash payments, once made, can be assigned by creditors seeking to collect a debt, because the nonassignment clause only attaches to the payment while it sits in the trust owned by the employer.[20] Therefore, there is nothing that distinguishes the cash payment from other cash, making the cash proceeds the actual asset the employee owns. A court can enforce equitable distribution by entering an order forcing payment of the cash proceeds. Therefore, all cash-based property should be enforceable with a QDRO, which only accesses cash, because the only time the concept of a creditor comes up is with the faulty reasoning employed by *Vizcaino,* and the overwhelming majority of sister state rulings determined the reasoning employed by *Vizcaino* is wrong.[21] This is why we believe rulings like *Vizcaino*, involving a municipal retirement plan and *DeSantis*, refusing to enforce an equalization payment with a QDRO distributing and assigning a like amount of cash, are incorrect. But until the *Vizcaino* and the *DeSantis* line of cases are reversed by our Supreme Court by recognizing that spouses awarded property are not creditors, the appellate rulings tie the hands of trial courts enforcing in-kind cash payments, and the only way to enforce in-kind cash and other assets is with permanent periodic alimony.

Conclusion

As equitable distribution cannot be enforced with contempt, and alimony can, it is plain to see that it will be nearly impossible to enforce a stream of payments produced by intellectual properties, or any other property that is distributed over years, because each separate payment or distribution must be enforced with contempt as it occurs.[22] This is further complicated by the caselaw that creates distinct different asset classifications for different cash and in-kind cash payments, making it easy for the spouse who does not want to share what was promised or awarded. Alimony is pliable because it is subject to modification. A term award of alimony can be converted to permanent alimony when need is increased because the spouse in need has not been paid the property awarded in equitable distribution. But this will not be possible when permanent alimony is no longer available.❑

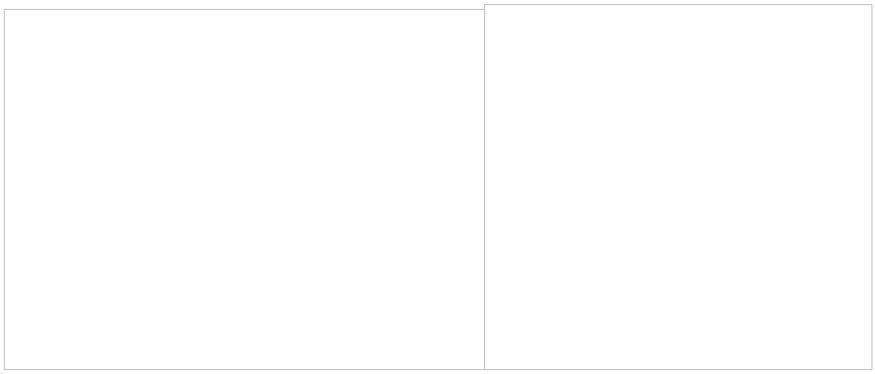
Friend

Paul Deering

CALLING ALL VOLUNTEERS!



President Trump NEEDS YOU THIS WEEKEND.

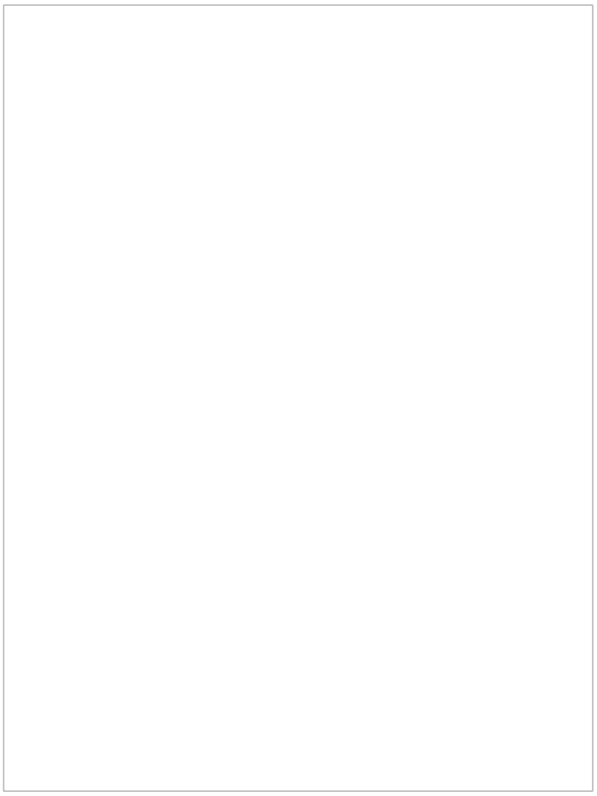
SIGN UP TO VOLUNTEER FOR

TRUMP VICTORY VOTER REGISTRATION AT THE

BLUE SPRING MANATEE FESTIVAL IN ORANGE CITY!

AMERICAN OVERSIGHT

We need volunteers for shifts anytime between 9 am and 5 pm at the Festival in Valentine Park, 1511 W French Avenue, off 1792 in Orange City. You can take exit 114 from the I-4 and follow the signs.



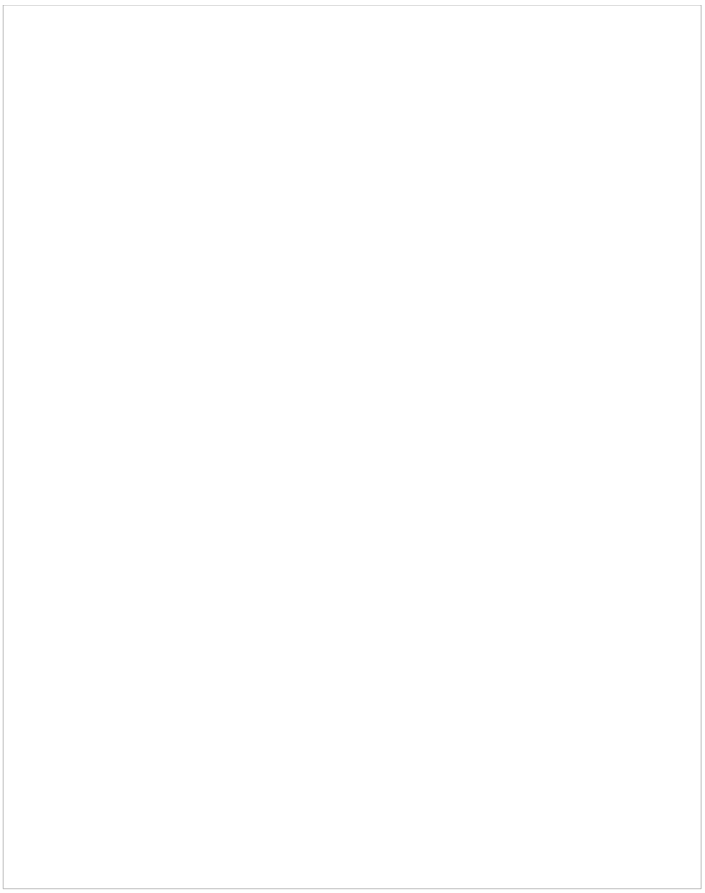
Contact Kathy Pugh 386 956 8427 text/call or emailkatannpugh@gmail.com

---

SIGN UP BELOW TO VOLUNTEER THIS WEEKEND FOR

TRUMP VICTORY VOTER REGISTRATION

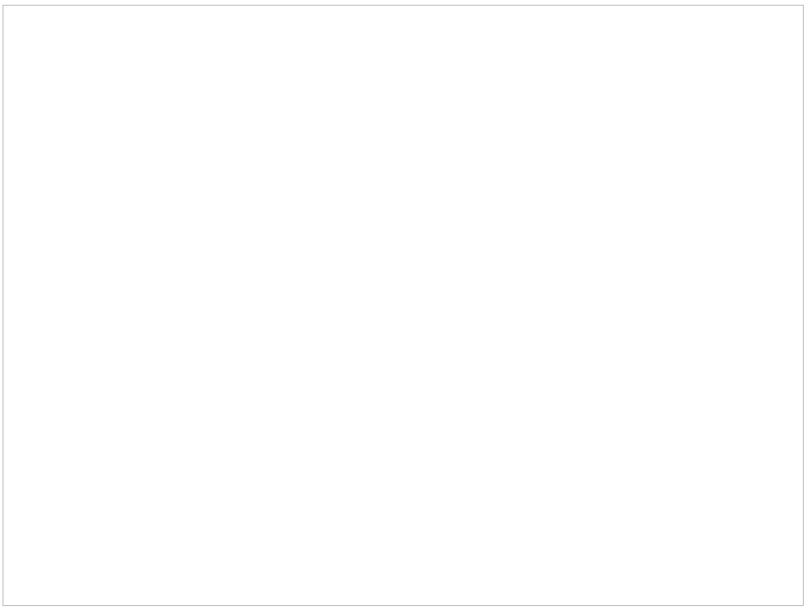
AT THE DAYTONA FLEA AND FARMERS' MARKET



Here is another chance for you to be a volunteer and help our great President out! We need MAGA warriors to staff our voter registration kiosk at the Flea Market in Daytona Beach Friday, Saturday and Sunday. We do this every weekend.
Please sign up for a shift at the Daytona Beach Flea Market. We are at South C #41 just 3 booths past the restroom sign in the middle aisle.
If you have any questions please feel free to text or call Kathy Pugh at 386 956 8427 or personal email katannpugh@gmail.com

DAYTONA FLEA MARKET

Get ready for the sequel to Trump Talk Live!
TRUMP TALK NOW debuts 7 pm Thursday, January 23rd



in front of a live audience at Volusia Top Gun.

AMERICAN OVERSIGHT

Our Special guests are Rep. Mike Waltz & Clint Lorance, a former Army Lt. Clint Lorance who was recently pardoned by the President.

Make plans to arrive early and have dinner with us at the Double Barrel Grill as we resume our fearless truth-telling about America's transformational 45th President.

Host Vic Baker (on right) & Co-host Joe Fieldus (on left) return for this MAGA KAG America First revival.

You can also watch us live each week by going to TRUMP TALK NOW on Facebook

RSVP HERE

Subject: Hurricane Dorian: 9.30.19 facts sheet and map
Attachment(s): "09.30.19 - USAID-DCHA The Bahamas Hurricane Dorian Fact Sheet #12.pdf","09.30.19 - USAID-DCHA The Bahamas Hurricane Dorian Response Map.pdf"

Hi all,

Please find the attached facts sheet and map that provide updated information on the humanitarian response to Hurricane Dorian in the Bahamas.

To date, USAID has provided more than $25 million to the Hurricane Dorian response, bringing the total U.S. Government (USG) contribution to nearly $34 million. The USG remains the largest humanitarian donor to the response.

This message will be the final email update to this group. Please note that future updates, facts sheets, and maps can be found at https://www.usaid.gov/dorian.

Thank you for your interest and support in this response, and please let me know if you have any further questions.

Best,
Monica

AMERICAN OVERSIGHT

USAID
FROM THE AMERICAN PEOPLE

THE BAHAMAS - HURRICANE DORIAN

FACT SHEET #12, FISCAL YEAR (FY) 2019 — SEPTEMBER 30, 2019

NUMBERS AT A GLANCE

58
Deaths Reported in The Bahamas due to Hurricane Dorian as of September 30
GoB – September 2019

54,000
Number of People Targeted by USAID In-Kind Commodities
USG – September 2019

17,200
Pre-Hurricane Estimated Population of Abaco
UN – September 2019

51,000
Pre-Hurricane Estimated Population of Grand Bahama
UN – September 2019

HIGHLIGHTS

- USAID provides additional $7.5 million to Hurricane Dorian response for health, shelter, and WASH activities
- USAID partner IOM scales up early recovery shelter assistance
- Relief actors continue to fulfill health, protection, and WASH needs

HUMANITARIAN FUNDING

FOR THE BAHAMAS HURRICANE RESPONSE IN FY 2019

USAID/OFDA[1]	$24,304,837
USAID/FFP[2]	$1,000,000
DoD[3]	$8,490,000
$33,794,837	

KEY DEVELOPMENTS

- USAID recently contributed $7.5 million to Samaritan's Purse to support health, shelter, and water, sanitation, and hygiene (WASH) projects in The Bahamas' Abaco and Grand Bahama islands, which experienced widespread destruction due to Hurricane Dorian. Samaritan's Purse established a field hospital in Grand Bahama and is delivering critical health services to more than 100 patients daily, as well as providing access to safe drinking water for affected populations on the islands.
- To date, USAID has provided more than $25 million to the Hurricane Dorian response, bringing the total U.S. Government (USG) contribution to nearly $34 million. The USG remains the largest humanitarian donor to the response.
- One month after Hurricane Dorian, the Government of The Bahamas (GoB) and humanitarian partners continue to address affected populations' basic needs, while also prioritizing strategies for economic and social recovery. As organizations are completing emergency activities, some relief actors are departing the country and transitioning operations to organizations focused on early recovery and reconstruction.
- As debris removal activities progress, the GoB and other relief actors continue efforts to confirm numbers of victims and individuals displaced by the storm. On September 30, the Royal Bahamian Police Force announced the death toll had risen to 58, with 49 deaths recorded in Abaco and nine in Grand Bahama, due to ongoing victim identification and recovery work. Meanwhile, the GoB National Emergency Management Agency (NEMA) announced that nearly 700 of the more than 1,300 people reported missing to a GoB missing persons registry were identified and located by September 25.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-004964

CURRENT SITUATION

- Prime Minister (PM) of The Bahamas Hubert Minnis addressed the UN General Assembly on September 27, where he expressed gratitude to the international community for mobilizing humanitarian response efforts in the wake of Hurricane Dorian.
- The GoB continues to conduct daily assessments of damage to infrastructure, residences, and critical service systems, including testing water samples and subsequently spreading public messages to inform populations in Abaco and Grand Bahama of varying levels of water quality. The Ministry of Public Works is conducting long-term infrastructure and damage assessments in storm-affected areas of Abaco and Grand Bahama, with support from the UN Development Program (UNDP). As of September 27, approximately 50 percent of assessed buildings in Abaco and 16 percent of assessed buildings in Grand Bahama were deemed unsalvageable, although the government agency noted that thousands of buildings were still in need of assessments.
- Bahamas Power and Light Company (BPLC) restored power to southern Abaco's Casuarina Point and Winding Bay communities by September 30, marking the first populations in the area to gain sustained access to electricity since the storm. The BPLC is also working to restore consistent power to all critical infrastructure in Abaco's Marsh Harbour town, including a government complex, a Water and Sewerage Corporation (WSC) plant, and the Marsh Harbour Clinic, which have been relying on temporary power generation to date.
- On September 26, Aliv, one of The Bahamas' main telecommunications providers, completed restoration of all mobile towers in Abaco and eastern Grand Bahama, which were damaged by Hurricane Dorian. The company is coordinating with the Bahamas Telecommunications Company—which had restored approximately 20 percent and 40 percent of mobile network coverage in Abaco and Grand Bahama, respectively, as of September 25—to provide long-term telecommunications solutions for all affected populations. To fill existing gaps in affected areas, the non-governmental organization (NGO) NetHope had installed more than 32 emergency telecommunications networks at distribution points for relief commodities and food assistance, government facilities, health facilities, and shelters as of September 26. NetHope plans to continue operations in The Bahamas over the next two to three months to support the full restoration of power and telecommunication services, particularly as the GoB facilitates the transition of displaced populations back to areas of origin in Abaco and Grand Bahama.

DISPLACEMENT AND SHELTER

- On September 25, NEMA announced that 692 people previously reported as missing following Hurricane Dorian had been identified and located due to the efforts of the GoB Department of Social Services (DSS) and other relief actors, including the USAID Disaster Assistance Response Team (DART), who are cross-checking the missing persons registry against collective shelter lists and other records of displaced individuals; 608 people remained reported missing as of September 25.
- The number of displaced people in GoB-led collective shelters continues to decline, with nearly 1,550 people in six New Providence Island shelters as of September 30 and approximately 50 people in two Grand Bahama shelters as of September 25. Two churches and a community center functioning as collective shelters are scheduled to close during the week of September 30, enabling the facilities to resume normal operations; approximately 200 occupants will move to the largest collective shelter, Sir Kendall Issacs Gym, the Pan American Health Organization (PAHO) reports. Additionally, more than 3,400 people who registered as evacuees with the DSS were residing in alternative accommodations—including sheltering with relatives and friends, renting apartments, or staying in hotels and condominiums supported by private sector actors—in New Providence as of September 26. Relief actors continue efforts to determine exact quantity of displaced individuals in New Providence and returnees to storm-affected islands, and the DSS is conducting door-to-door demographic data collection, property inspections, and needs assessments of individuals remaining in damaged houses in Abaco and Grand Bahama.
- With USAID support, the International Organization for Migration (IOM) is scaling up efforts to provide shelter assistance during the early recovery phase of the response, as it remains a priority need for storm-affected populations. While displaced populations remain in collective shelters, which are not equipped for prolonged habitation, the IOM is

AMERICAN OVERSIGHT

supporting the GoB in camp management and coordination, and plans to provide additional relief commodities, including non-food items and WASH supplies, to the shelters as needed. In anticipation of households returning to areas of origin, IOM plans to assist the GoB with debris and rubble removal operations in Abaco and Grand Bahama through partnering with local contractors and, where necessary, employing a cash-for-work approach. IOM also plans to provide tools and necessary training for households returning to areas of origin to facilitate small-scale reconstruction and rebuilding efforts.

- IOM continues to collect data through a second round of its USAID-supported Displacement Tracking Matrix (DTM) exercise, which aims to identify, register, and monitor displaced households and assess living conditions and vulnerabilities among displaced populations. During the first DTM round in mid-September, IOM highlighted the need for psychosocial support and funding for long-term rental options, particularly for those without livelihood opportunities. Additionally, IOM participated in a September 18 inter-agency rapid shelter assessment in Abaco, which identified the lack of labor and basic services, including education, banking, and security, necessary to facilitate returns. IOM and other relief actors continue to work closely with the GoB to flesh out plans to develop temporary housing units in Abaco.

HEALTH, PROTECTION, AND WASH

- As the health sector in affected areas of The Bahamas recovers, relief actors continue to supplement GoB Ministry of Health (MoH) capacity to meet health care needs of storm-affected populations, including mental health and psychosocial support (MHPSS), which the MoH has identified as a priority. The MoH has established a 24-hour hotline for individuals seeking MHPSS services, and USAID/OFDA partner PAHO continues to coordinate efforts to establish a MHPSS referral pathway for communities in need.
- PAHO is also supporting the MoH to strengthen epidemiological surveillance and outbreak early warning systems, particularly for water- and vector-borne diseases. PAHO delivered vector surveillance supplies to Abaco and Grand Bahama on September 25, and the UN agency contributed to a GoB Department of Environmental Health Services operational vector surveillance and control plan for the upcoming four months.
- Four of the seven emergency medical teams (EMTs)—groups of health professionals that meet internationally recognized standards to respond to foreign disasters or emergencies—initially deployed to The Bahamas remained active as of September 26, including two mobile EMTs providing outpatient services and MHPSS in Abaco and New Providence collective shelters. In Grand Bahama, a USAID-supported International Medical Corps (IMC) EMT is expanding MHPSS services, and has treated more than 420 patients from September 9 to 30. Finally, USAID partner Samaritan's Purse is operating an EMT field hospital with surgical capacity in Grand Bahama's Freeport city, which provided approximately 2,300 outpatient consultations and performed more than 50 surgeries from September 8 to 27.
- In addition to the EMTs, other relief partners continue to provide critical health services in The Bahamas. Medical professionals from Project HOPE are providing services at three collective shelters in The Bahamas' capital city of Nassau, including health screenings for children enrolling in local schools, and in Abaco's Marsh Harbour Clinic, including pharmacy supply chain management and WASH interventions. The NGO is also facilitating the provision of three interagency emergency health kits, which contain medicines and medical supplies sufficient to meet the needs of 30,000 people over three months. Project HOPE plans to maintain staff presence in affected areas of The Bahamas through late November.
- As of September 24, UN Children's Emergency Fund (UNICEF) had provided more than 300 school-aged children residing in collective shelters in Nassau with MHPSS services. Additionally, the UN agency collaborated with the GoB Ministry of Education and NGO IsraAID to train nearly 70 school counsellors and school psychologists on MHPSS in schools. UNICEF is also addressing hurricane-related child protection concerns for displaced and host communities with the DSS.
- UNICEF continues to support the WSC to lead coordination of relief actors conducting WASH activities, including Mercy Corps and Mission Resolve Foundation. The relief organizations installed two reverse osmosis water treatment units that provide 7,500 gallons of safe drinking water daily to health clinics and public tap systems in Grand Bahama.

AMERICAN OVERSIGHT

Additionally, Mercy Corps is utilizing UNICEF-provided WASH supplies, including 1,000 jerry cans, six 5,000-liter water tanks, and 100 water disinfection tablets, to benefit approximately 5,000 people in Grand Bahama.

- With USAID support, Samaritan's Purse installed reverse osmosis units in Abaco's Cooper's Town and Treasure Cay, each with capacity to produce 2,500 gallons of safe drinking water per day. The NGO is also supporting WSC with fuel distribution to enable functioning of water pumping systems across the island. As of September 25, only 10 percent of Abaco's population had access to piped water, while the remaining population continued to rely on partner-provided safe drinking water. Samaritan's Purse is also providing WASH services in Grand Bahama, where 75 percent of the population had access to piped water by September 25.

FOOD SECURITY AND LOGISTICS

- The UN World Food Program (WFP) continues to lead food security coordination efforts, ensuring that immediate food needs of affected populations are met daily by organizations providing food assistance. As of September 30, NGOs and UN agencies had reportedly delivered nearly 350,000 meals in Abaco, Grand Bahama, and New Providence, according to the UN; the figure does not capture the amount of food assistance provided by the GoB or private sector actors, which also continue to address daily food needs.
- With USAID funding, WFP has provided significant logistics support for humanitarian and early recovery operations. As of September 23, four WFP-chartered vessels transported more than 214 metric tons of relief commodities, including construction materials, food assistance, medical supplies, and safe drinking water, from Nassau to hurricane-affected islands. The UN agency continues to provide warehouse management and supply chain coordination in four mobile storage facilities at the Marsh Harbour port and two at the Marsh Harbour International Airport; two additional mobile storage facilities remain on stand-by in Grand Bahama.

EARLY RECOVERY, INFRASTRUCTURE, LIVELIHOODS

- Debris removal and waste management remain priorities for the GoB during the early recovery phase of the Hurricane Dorian response. The GoB Ministry of Environment and Housing recently produced a comprehensive debris management plan which provides a framework for organizing the rapid, safe, and cost effective removal, recycling, and disposal of disaster-generated debris, while minimizing debris-related threats to public health and safety, the environment, and economic recovery of affected areas.
- Relief actors are also focused on assessing the storm's economic impact and effects on people's livelihoods. The GoB, with assistance from the UN Food and Agricultural Organization, continues to assess the damage Hurricane Dorian caused to the agricultural, fishing, and tourism sectors, which comprise the main economic industries in Abaco and Grand Bahama. The BRCS is also conducting livelihoods recovery needs assessments to inform early interventions; preliminary results indicate severe disruption of income-generating opportunities and activities for populations affected by Hurricane Dorian, as productive assets such as crops, agricultural and fishing equipment, and business commodities and infrastructure have been damaged or destroyed in parts of Abaco and Grand Bahama.
- The International Federation of Red Cross and Red Crescent Societies (IFRC) initiated preparation for multi-purpose cash assistance to help households meet basic needs in New Providence, where most Hurricane Dorian evacuees are currently residing. As of September 27, IFRC and the Bahamas Red Cross Society (BRCS), in coordination with the GoB Ministry of Social Services and Urban Development, had begun efforts to identify, verify, and register beneficiaries who qualify for cash assistance. Additionally, IFRC is deploying a Recovery Assessment Team to assist the GoB with implementing comprehensive early recovery strategies in economic and social development, information management, and shelter and reconstruction.
- On September 27, UNDP announced a $1 million contribution for early recovery interventions in The Bahamas. UNDP aims to promote environmentally sustainable disaster resilient infrastructure, develop national and local capacities for disaster risk reduction and recovery, and support livelihoods and economic recovery for vulnerable communities.

AMERICAN OVERSIGHT

CONTEXT

- From September 1 to 2, Hurricane Dorian made landfall over Abaco and Grand Bahama as a Category 5 storm on the Saffir-Simpson Hurricane Wind Scale, bringing sustained winds of approximately 180 miles per hour, heavy rains, and storm surges of up to 23 feet to the islands.
- As a result of widespread flooding and destruction to infrastructure caused by Hurricane Dorian, U.S. Chargé d'Affaires Stephanie Bowers declared a disaster in The Bahamas on September 2. In response, USAID/OFDA provided an initial $200,000 to the BRCS and rapidly activated a DART and Response Management Team. USAID/OFDA is working with multiple USG agencies, partners, and the GoB to swiftly provide humanitarian assistance to populations in The Bahamas most severely affected by the hurricane.

USG HUMANITARIAN FUNDING FOR THE BAHAMAS HURRICANE DORIAN RESPONSE IN FY 2019[1]

IMPLEMENTING PARTNER	ACTIVITY	LOCATION	AMOUNT
USAID/OFDA			
The Bahamas Red Cross Society (BRCS)	Shelter and Settlements, WASH	Countrywide	$200,000

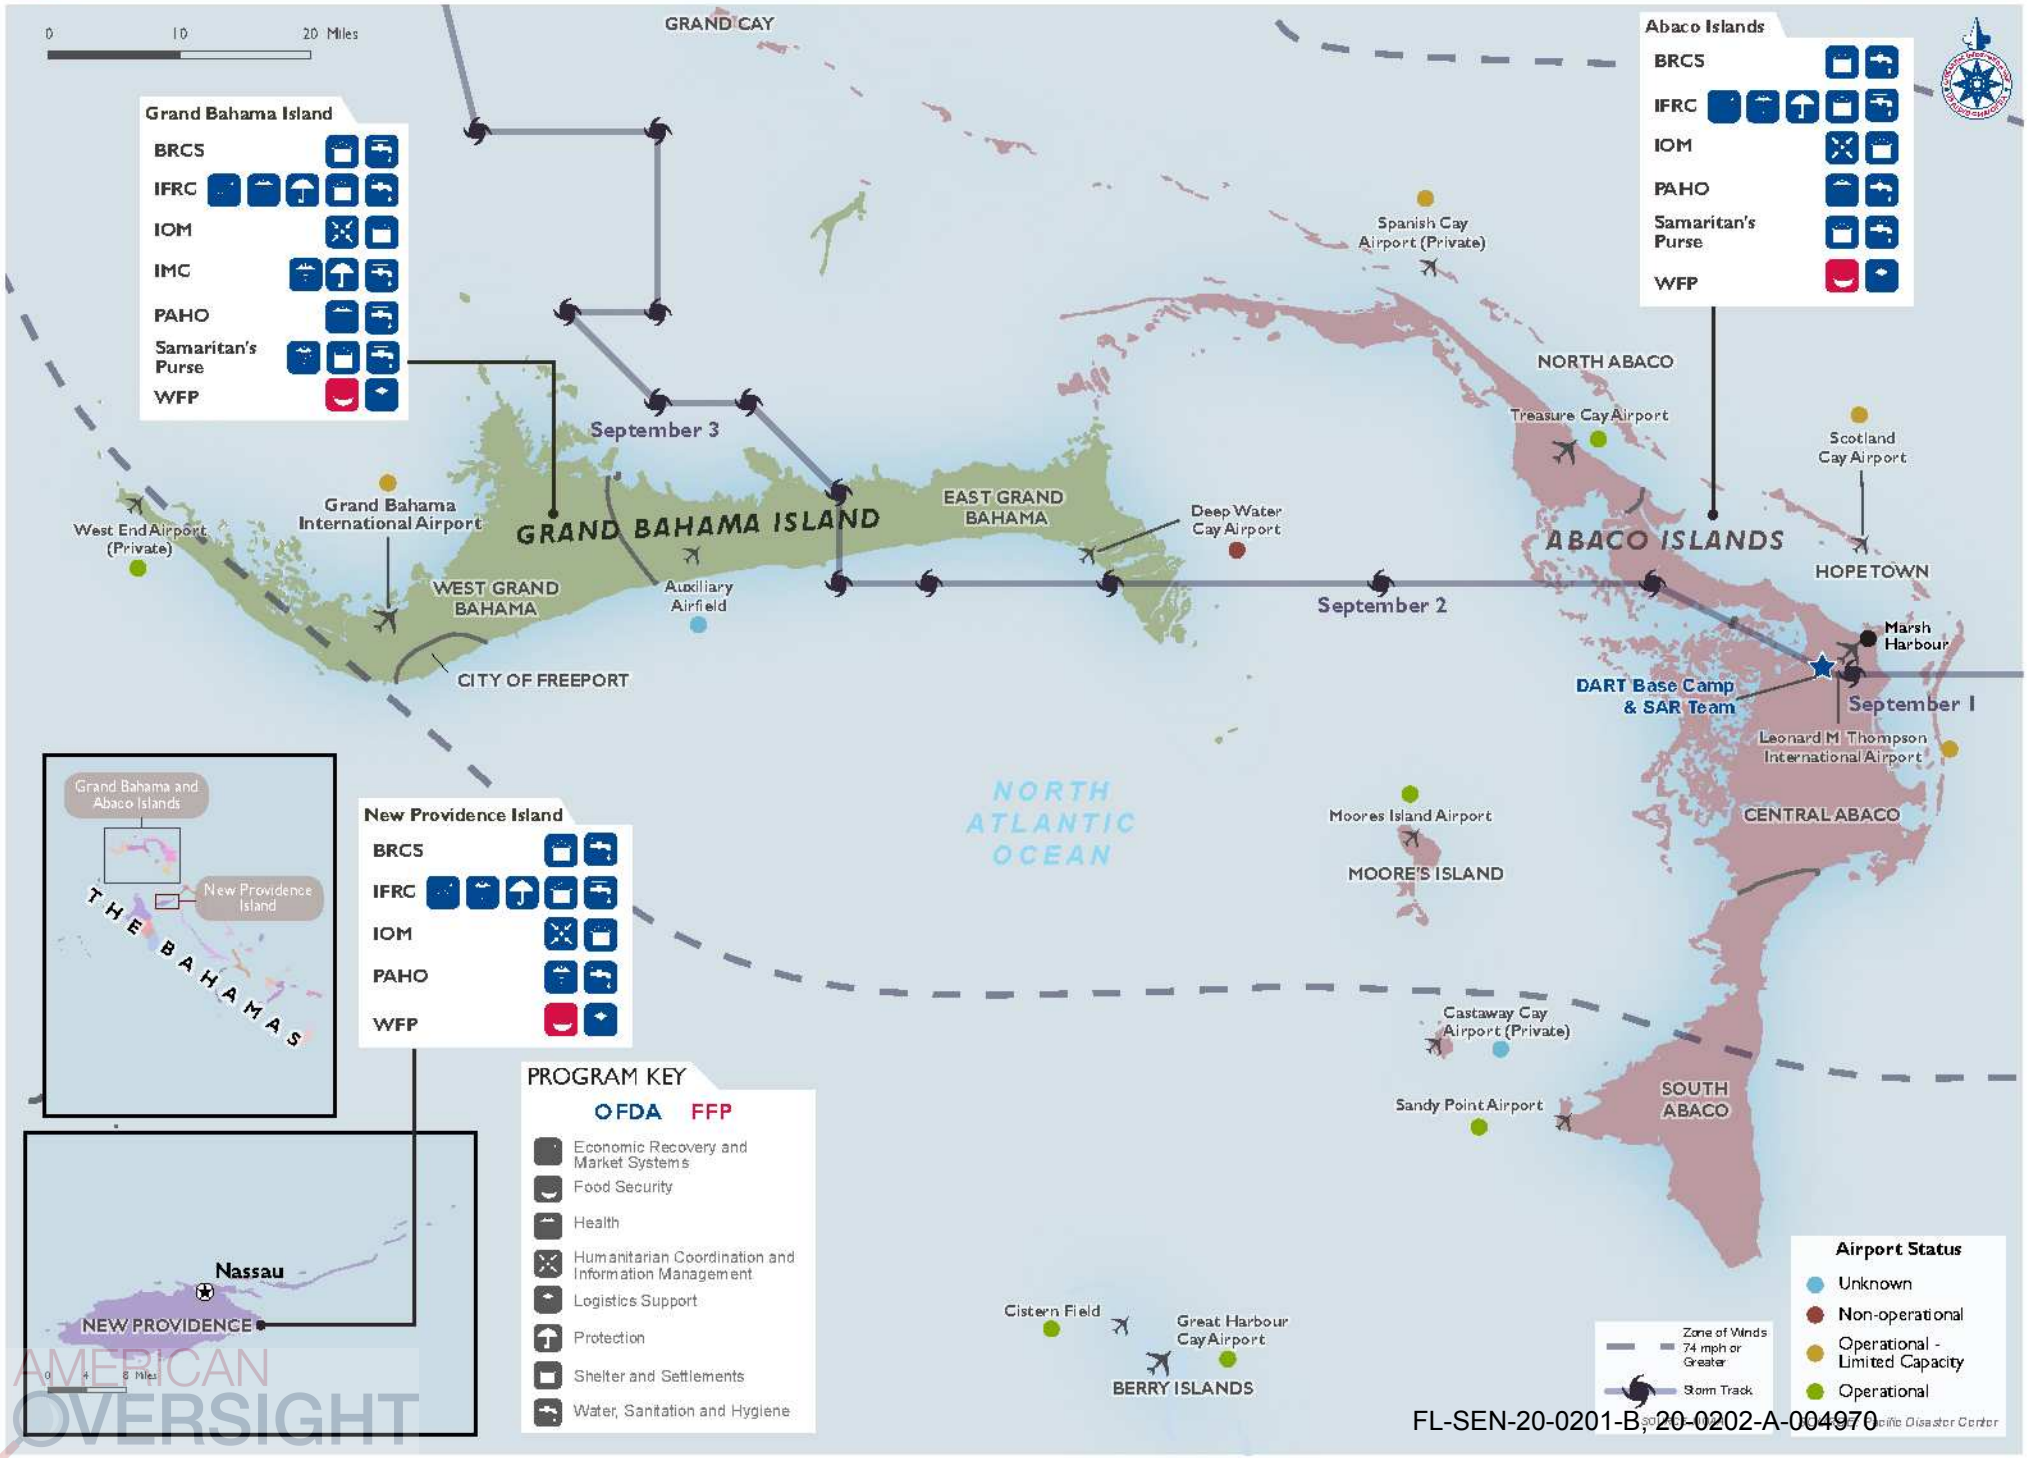
[1] Year of funding indicates the date of commitment or obligation, not appropriation, of funds. Funding figures reflect anticipated or actual obligated amounts as of September 30, 2019. There may be slight changes to FY 2019 funding totals following financial reconciling conducted after the end of the fiscal year.
[2] Figures are subject to change. Los Angeles County Fire Department personnel comprised part of the Americas Support Team.
[3] DoD figures reflect publicly announced funding as of September 24.



PUBLIC DONATION INFORMATION

- The most effective way people can assist relief efforts is by making cash contributions to humanitarian organizations that are conducting relief operations. A list of humanitarian organizations that are accepting cash donations for disaster responses around the world can be found at www.interaction.org.
- USAID encourages cash donations because they allow aid professionals to procure the exact items needed (often in the affected region); reduce the burden on scarce resources (such as transportation routes, staff time, and warehouse space); can be transferred very quickly and without transportation costs; support the economy of the disaster-stricken region; and ensure culturally, dietarily, and environmentally appropriate assistance.
- More information can be found at:
  - USAID Center for International Disaster Information: www.cidi.org/hurricane-dorian/.
  - USAID Center for International Disaster Information Call Center: +1.202.661.7710.
  - Information on relief activities of the humanitarian community can be found at www.reliefweb.int.

AMERICAN OVERSIGHT

It's National Influenza Vaccination Week; make sure all your patients are protected against flu!

National Influenza Vaccination Week (NIVW), observed this week, was established by CDC in 2005 as an awareness week to highlight the importance of continuing influenza vaccination activities throughout the holiday season and beyond. It's a great time to vaccinate people who have not yet been protected against flu and to call or send a reminder message to those who have not been vaccinated to be sure they get protected. Vaccination efforts should continue through the holiday season and beyond because peak influenza activity generally does not occur until February (with some variability year to year). Providers are encouraged to continue vaccinating patients throughout the influenza season, including into the spring months.

This year, CDC is focusing on groups at high risk of flu-related complications, hospitalizations, and death, such as children younger than 5 years, adults over 65, people with chronic conditions such as asthma, heart disease, and diabetes, and pregnant women. Click on the graphic above to access the NIVW campaign resources from CDC, including web tools, videos, communication hints, matte articles to submit to newspapers, animated images, graphics, and more.

CDC has stated in its Weekly U.S. Influenza Surveillance Report, FluView, that as of the week ending November 23, the geographic spread of influenza was reported as widespread in 10 states, with regional activity in 14 states. Puerto Rico and 19 states reported local activity; the U.S. Virgin Islands and 7 states reported sporadic activity; and District of Columbia and Guam did not report.

One influenza-associated pediatric death was reported to CDC during the week ending November 23. A total of five influenza-associated pediatric deaths have been reported for the 2019–20 season.

Influenza vaccination is recommended for everyone six months of age and older, so please continue to vaccinate all your patients in this age range. If you don't provide influenza vaccination in your clinic, please recommend vaccination to your patients and refer them to a clinic or pharmacy that provides vaccines. The HealthMap Vaccine Finder can help patients locate influenza vaccination services near them.

IAC Spotlight: Just in case you missed them, these IAC materials and web pages were updated during October and November

In almost every issue of *IAC Express,* we provide readers with information about new and updated educational materials for healthcare professionals and handouts for patients that have been posted during the past week on IAC's website for healthcare professionals, immunize.org. All these materials are CDC-reviewed and available free for you to download, print, copy, and distribute in your healthcare settings. We also announce major updates to the content on various web sections and pages on immunize.org.

Below you'll find a listing of the new and updated items and web pages we've announced in *IAC Express* during the months of October and November, in case you've missed any of them.

Educational Materials for Healthcare Professionals

Influenza Educational Materials for Healthcare Professionals

- Communicating the Benefits of Seasonal Influenza Vaccination
- Influenza: Questions and Answers
- Screening Checklist for Contraindications to Inactivated Injectable Influenza Vaccination; also available in Spanish

Other Staff Education Materials

- Leading Medical Organizations Endorse Strong School and Childcare Vaccination Requirements and Elimination of Non-Medical Exemptions
- Current Dates of Vaccine Information Statements (VISs)
- You Must Provide Patients with Vaccine Information Statements (VISs) – It's Federal Law!
- Standing Orders for Administering Human Papillomavirus Vaccine to Adults
- Personal Belief Exemptions for Vaccination Put People at Risk. Examine the Evidence for Yourself.

Handouts for Your Patients

- Vaccinations for Pregnant Women; also available in:
  - Spanish
  - Arabic
  - Chinese – Simplified
  - French
  - Korean
  - Russian
  - Vietnamese
- You're 16…We Recommend These Vaccines for You!; also available in Spanish
- Chickenpox Is a Serious Disease…Make Sure Your Child Is Protected!
- Hepatitis A Is a Serious Disease…Make Sure Your Child Is Protected!
- Hepatitis B Is a Serious Disease…Make Sure Your Child Is Protected!
- Hib Is a Serious Disease…Make Sure Your Child Is Protected!
- HPV Is a Serious Disease…Make Sure Your Child Is Protected!
- Influenza Is a Serious Disease…Make Sure Your Child Is Protected!
- Measles, Mumps, and Rubella Are Serious Diseases…Make Sure Your Child Is Protected!
- Meningococcal Disease Is Serious…Make Sure Your Child Is Protected!
- Pneumococcal Disease Is Serious…Make Sure Your Child Is Protected!
- Polio Is a Serious Disease…Make Sure Your Child Is Protected!
- Rotavirus Is a Serious Disease…Make Sure Your Child Is Protected!
- Whooping Cough, Tetanus, and Diphtheria Are Serious Diseases…Make Sure Your Child Is Protected!

IAC's elegantly designed "Vaccines Save Lives" black enamel pins make great gifts for the holidays!

IAC's new elegantly designed "Vaccines Save Lives" pin on hard black enamel with gold lettering and edges makes a meaningful gift for people who care about immunization.

The pin is a stick-through-post variety with the back end covered by a round rubber cap that holds the pin securely. A gold metal spring-lock clasp is also provided. The pin makes a refined statement, measuring 1.125" x 0.75".

Wear these pins on clothing, uniforms, lab coats, tote bags, and backpacks to show that you value vaccines!

Click here for "Vaccines Save Lives" pins pricing and ordering information.

AMERICAN OVERSIGHT

Visit Shop IAC for additional items, including "FLU VACCINE" buttons and stickers, patient record cards, and a vaccine administration training video.

Back to top

Flu season is here, so make sure you have IAC's new "FLU VACCINE" buttons for staff and patient stickers on hand!

IAC's "FLU VACCINE" buttons and stickers are ready to ship! Their bright red color helps broadcast your important message about the need for flu vaccination. And the cost is nominal.

"FLU VACCINE" BUTTONS

The button measures 1.25" across and carries a bold message! Pin on lab coats, uniforms, other clothing, tote bags, or backpacks to show support for flu vaccine.

Buttons are delivered in bags of 10 buttons per bag.

Click here for pricing and ordering information for "FLU VACCINE" buttons.

"FLU VACCINE" STICKERS

Measuring 1.5" across and printed on Avery labels, theses stickers adhere well to clothing and have an easy-peel-off back.

Stickers are delivered to you cut individually (not on rolls)—available in bundles of 100.

Click here for pricing and ordering information for "FLU VACCINE" stickers.

Visit Shop IAC for additional items, including "Vaccines Save Lives" enamel pins, patient record cards, and a vaccine administration training video.

There are now 1,113 organizations enrolled in IAC's Influenza Vaccination Honor Roll for mandatory healthcare worker vaccination

There are now **1,113 organizations** enrolled in IAC's Influenza Vaccination Honor Roll. The honor roll recognizes hospitals, long-term care facilities (LTCFs), medical practices, pharmacies, professional organizations, health departments, and other government entities that have taken a stand for patient safety by implementing mandatory influenza vaccination policies for healthcare personnel.

Since November 6, when *IAC Express* last reported on the Influenza Vaccination Honor Roll, four additional healthcare organizations have been enrolled.

IAC urges qualifying healthcare organizations to apply by visiting the Application page.

Newly added healthcare organizations, hospitals, government agencies, medical practices, long-term care facilities, and pharmacies

- Mason County Health Department, Havana, IL
- The Manor Health and Rehabilitation Center, Freehold, NJ
- Washoe Tribal Health Center, Gardnerville, NV
- Eagle Valley Children's Home, Carson City, NV

National Adult and Influenza Immunization Summit soliciting nominations for its 2020 Immunization Excellence Awards; deadline is February 1

The National Adult and Influenza Immunization Summit (NAIIS) is soliciting nominations for the 2020 NAIIS Immunization Excellence Awards. The 2020 awards recognize individuals and organizations that have made extraordinary contributions towards improving vaccination rates within their communities during 2019. Awardees exemplify the meaning of the "immunization neighborhood" (collaboration, coordination, and communication among immunization stakeholders dedicated to meeting the immunization needs of the patient and protecting the community from vaccine-preventable diseases). Unless an award criterion is specifically focused on influenza, it is the intent of the Summit to recognize broader adult immunization activities.

A National Winner will be selected for each award category, and where appropriate, an Honorable Mention recipient. The winners will be presented with their awards at the NAIIS meeting to be held on May 18 in Atlanta, GA, in conjunction with CDC's National Immunization Conference. The National Winner in each category will be invited to present their programs at the NAIIS meeting.

Access information on the award categories and the nomination form.

VACCINE INFORMATION STATEMENTS

Small correction made to Japanese-language translation of the varicella VIS

A small correction has been made to the Japanese-language translation of the varicella VIS. In "Section 1: Why Get Vaccinated?" the VIS translation now correctly states "some children who get chickenpox stay home from school or childcare for at least 5–6 days."

Many thanks to the sharp-eyed immunization staff at the Michigan Department of Health and Human Services for pointing out the error.

The updated Japanese translation is for the varicella VIS published on August 12, 2018. On August 15, 2019, CDC released a new interim VIS for varicella; a translation of this new interim VIS is not available. CDC states that it is acceptable to use the out-of-date VIS translation since there have not been significant content changes from the 2018 version to the 2019 interim version.

CDC also states that the corresponding up-to-date English-language VIS must also be provided when providing an out-of-date translation.

AMERICAN OVERSIGHT

When downloading the corrected version, you may have to "refresh" the page or use a different browser if you recently accessed the piece, as the previous version may be cached in your system.

IAC's comprehensive *Vaccinating Adults: A Step-by-Step Guide* is available for free download either by chapter or in its entirety (142 pages)

In late 2017, the Immunization Action Coalition (IAC) announced the publication of its new book, *Vaccinating Adults: A Step-by-Step Guide (Guide)*.

This completely updated "how to" guide on adult immunization provides easy-to-use, practical information covering essential adult immunization activities. It helps vaccine providers enhance their existing adult immunization services or introduce them into any clinical setting. Topics include:

- setting up for vaccination services,
- storing and handling vaccines,
- deciding which people should receive which vaccines,
- administering vaccines,
- documenting vaccinations (including legal issues), and
- understanding financial considerations and billing information.

In addition, the *Guide* is filled with hundreds of web addresses and references to help providers stay up to date on the latest immunization information, both now and in the future.

The *Guide* is available to download/print either by chapter or in its entirety free of charge at www.immunize.org/guide. The downloaded version is suitable for double-sided printing. The National Vaccine Program Office and CDC both supported the development of the *Guide* and provided early technical review.

The *Guide* is a uniquely valuable resource to assist providers in increasing adult immunization rates. Be sure to get a copy today!

JOURNAL ARTICLES AND NEWSLETTERS

Pediatrics publishes "Safety of the 9-Valent Human Papillomavirus Vaccine"

The journal *Pediatrics* has published Safety of the 9-Valent Human Papillomavirus Vaccine, by T. Shimabukuro, et al., in its November 2019 issue. The Conclusions section of the abstract is reprinted below.

CONCLUSIONS: No new or unexpected safety concerns or reporting patterns of 9vHPV with clinically important AEs were detected. The safety profile of 9vHPV is consistent with data from prelicensure trials and from postmarketing safety data of its predecessor, the quadrivalent human papillomavirus vaccine.

Access the complete abstract.

WHO and CDC issue joint press release reporting more than 140,000 died from measles worldwide in 2018 and urging increased global investment in immunization and response

On December 5, the World Health Organization (WHO) and CDC issued a joint press release highlighting the surge in worldwide measles cases in 2018. The press release stresses the risk for complications among infants and young children, with most deaths from complications occurring in children under 5 years of age. Populations that are hardest hit by measles outbreaks are those in the poorest countries, especially in sub-Saharan Africa. The joint statement calls for ongoing investment in high-quality national immunization programs and disease surveillance in addition to improved outbreak response.

CDC updates ACIP recommendations on use of anthrax vaccine in the U.S.

CDC published Use of Anthrax Vaccine in the United States: Recommendations of the Advisory Committee on Immunization Practices, 2019 in the December 13 issue of *MMWR Recommendations and Report*s. The first paragraph of the summary for the press is reprinted below.

This report updates the 2009 recommendations from the CDC Advisory Committee on Immunization Practices (ACIP) regarding use of anthrax vaccine in the United States (Wright JG, Quinn CP, Shadomy S, Messonnier N. Use of anthrax vaccine in the United States: recommendations of the Advisory Committee on Immunization Practices [ACIP)], 2009. MMWR Recomm Rep 2010;59[No. RR-6]). The report 1) summarizes data on estimated efficacy in humans using a correlates of protection model and safety data published since the last ACIP review, 2) provides updated guidance for use of anthrax vaccine adsorbed (AVA) for preexposure prophylaxis (PrEP) and in conjunction with

WORLD NEWS

Democratic Republic of the Congo, experiencing world's largest measles epidemic, launches phase 2 of campaign to vaccinate 18.9 million children by end of 2019

According to the World Health Organization (WHO), the Democratic Republic of the Congo (DRC), currently experiencing the world's largest measles epidemic, has begun its effort to vaccinate 2.2 million children against measles in North Kivu. This effort is phase 2 of its campaign to vaccinate 18.9 million children against measles by end of 2019. The third and final phase of the campaign will target the ten remaining provinces. At this time, the DRC is also dealing with the world's second worst Ebola outbreak.

Pakistan, first country worldwide to introduce typhoid conjugate vaccine into its routine immunization program, vaccinates 9.4 million children against typhoid fever in Sindh province

On December 4, the World Health Organization (WHO) reported that Pakistan had vaccinated 9.4 million children against typhoid fever in the Sindh province. This campaign, conducted with the financial support of Gavi, the Vaccine Alliance, and technical support from WHO and UNICEF, included more than 8,000 skilled vaccinators, 20,000 organizers and on-the-ground mobilizers, and more than 2,000 supervisors and monitors between November 18–30, 2019. Pakistan is the first country in the world to introduce the typhoid conjugate vaccine (TCV) into its routine vaccination program.

FEATURED RESOURCES

Seasonal influenza activity in the U.S. elevated for five weeks and continues to increase. Make sure all your patients are getting vaccinated!

According to CDC, seasonal influenza activity in the United States has been elevated for five weeks and continues to increase. CDC stated in its Weekly U.S. Influenza Surveillance Report, FluView, that as of the week ending December 7, the number of jurisdictions reporting regional or widespread activity increased to 38 this week from 30 last week.

AMERICAN OVERSIGHT

Four new influenza-associated pediatric deaths were reported to CDC during the week ending December 7. A total of 10 influenza-associated pediatric deaths have been reported for the 2019–20 season.

Visit the CDC's Weekly U.S. Influenza Surveillance Report, FluView, for details.

Influenza vaccination is recommended for everyone six months of age and older, so please continue to vaccinate all your patients in this age range. If you don't provide influenza vaccination in your clinic, please recommend vaccination to your patients and refer them to a clinic or pharmacy that provides vaccines or to the HealthMap Vaccine Finder to locate influenza vaccination services near them.

New 16-minute personal background film about Dr. Maurice Hilleman released by the Vaccine Makers Project at VEC

A new 16-minute film about Dr. Maurice Hilleman titled *Maurice Hilleman: The Man behind the Science,* presents the personal background of Dr. Hilleman through memories shared by those who were close to him. It has been released on the Hillemanfilm.com website, which is sponsored by the Vaccine Education Center at Children's Hospital of Philadelphia.

Dr. Hilleman is considered by many to be the "father of modern vaccines" because of his work in preventing pandemic flu, combining the measles, mumps, and rubella vaccines, and other achievements. His work has been estimated to save about 8 million lives every year.

Read about Dr. Hilleman's life and accomplishments and access a link to watch the film on the About Dr. Hilleman web page of Hillemanfilm.com.

IAC's comprehensive *Vaccinating Adults: A Step-by-Step Guide* is available for free download either by chapter or in its entirety (142 pages)

In late 2017, the Immunization Action Coalition (IAC) announced the publication of its new book, *Vaccinating Adults: A Step-by-Step Guide (Guide).*

This completely updated "how to" guide on adult immunization provides easy-to-use, practical information covering essential adult immunization activities. It helps vaccine providers enhance their existing adult immunization services or introduce them into any clinical setting. Topics include:

- setting up for vaccination services,
- storing and handling vaccines,
- deciding which people should receive which vaccines,
- administering vaccines,
- documenting vaccinations (including legal issues), and
- understanding financial considerations and billing information.

In addition, the *Guide* is filled with hundreds of web addresses and references to help providers stay up to date on the latest immunization information, both now and in the future.

The *Guide* is available to download/print either by chapter or in its entirety free of charge at www.immunize.org/guide. The downloaded version is suitable for double-sided printing. The National Vaccine

AMERICAN OVERSIGHT

Program Office and CDC both supported the development of the *Guide* and provided early technical review.

The *Guide* is a uniquely valuable resource to assist providers in increasing adult immunization rates. Be sure to get a copy today!

JOURNAL ARTICLES AND NEWSLETTERS

JAMA Pediatrics study finds need for strategies to increase MMR vaccination rates among pediatric travelers to reduce measles outbreaks in the U.S.

On December 9, *JAMA Pediatrics* published a study titled Clinical Practices for Measles-Mumps-Rubella Vaccination among U.S. Pediatric International Travelers (Emily P. Hyle, et al.). The first and last paragraphs of the abstract are reprinted below.

Importance
The U.S. population is experiencing a resurgence of measles, with more than 1,000 cases during the first 6 months of 2019. Imported measles cases among returning international travelers are the source of most US measles outbreaks, and these importations can be reduced with pretravel measles-mumps-rubella (MMR) vaccination of pediatric travelers. Although it is estimated that children account for less than 10% of U.S. international travelers, pediatric travelers account for 47% of all known measles importations.

Conclusions and Relevance
Although most infant and preschool-aged travelers evaluated at GTEN [Global TravEpiNet] *sites were eligible for pretravel MMR vaccination, only 41.3% were vaccinated during pretravel consultation, mostly because of clinician decision or guardian refusal. Strategies may be needed to improve MMR vaccination among pediatric travelers and to reduce measles importations and outbreaks in the United States.*

CDC reports influenza activity remains high and has increased over the last two weeks; please continue vaccinating this season to prevent flu from spreading further

According to CDC's Weekly U.S. Influenza Surveillance Report, FluView for the week ending January 25, key indicators that track flu activity remain high and, after falling during the first two weeks of the year, increased over the last two weeks. Indicators that track severity (hospitalizations and deaths) are not high at this point in the season.

Forty-nine states and Puerto Rico reported widespread activity, while Hawaii, the District of Columbia, and the U.S. Virgin Islands reported regional, local, or sporadic activity for this time period.

A total of 68 influenza-associated pediatric deaths have been reported for the 2019–20 season, 45 associated with influenza B viruses. Fourteen influenza-associated pediatric deaths were reported to CDC between weeks ending November 9–January 25.

Visit the CDC's Weekly U.S. Influenza Surveillance Report, FluView, for details.

Influenza vaccination is recommended for everyone six months of age and older, so please continue to vaccinate all your patients in this age range. If you don't provide influenza vaccination in your clinic, please recommend

Deadline extended to February 10 for submitting nominations for 2020 Immunization Excellence Awards for the National Adult and Influenza Summit

The deadline for submitting nominations for the 2020 Immunization Excellence Awards for the National Adult and Influenza Immunization Summit (NAIIS) has been extended until Feb 10.

The 2020 awards recognize individuals and organizations that have made extraordinary contributions towards improving vaccination rates within their communities during 2019. Awardees exemplify the meaning of the "immunization neighborhood" (collaboration, coordination, and communication among immunization stakeholders dedicated to meeting the immunization needs of the patient and protecting the community from vaccine-preventable diseases).

A National Winner will be selected for each award category, and where appropriate, an Honorable Mention recipient. The winners will be presented with their awards at the NAIIS meeting to be held May 18 in Atlanta; the awards ceremony will be May 18. The national winner in each category will be invited to present their programs at the meeting.

The deadline for nominations has been extended to February 10.

Access information on the award categories and the nomination form.

IAC's elegantly designed "Vaccines Save Lives" black enamel pins are a great way to show you value immunization!

IAC's elegantly designed "Vaccines Save Lives" pin on hard black enamel with gold lettering and edges makes a meaningful gift for people who care about immunization.

The pin is a stick-through-post variety with the back end covered by a round rubber cap that holds the pin securely. A gold metal spring-lock clasp is also provided. The pin makes a refined statement, measuring 1.125" x 0.75".

Wear these pins on clothing, uniforms, lab coats, tote bags, and backpacks to show that you value vaccines!

Click here for "Vaccines Save Lives" pins pricing and ordering information.

Visit Shop IAC for additional items, including "FLU VACCINE" buttons and stickers, patient record cards, and a vaccine administration training video.

Back to top

Flu season is ongoing, so make sure you have IAC's "FLU VACCINE" buttons for staff and patient stickers on hand!

IAC's "FLU VACCINE" buttons and stickers are ready to ship! Their bright red color helps broadcast your important message about the need for flu vaccination. And the cost is nominal.

AMERICAN OVERSIGHT

“FLU VACCINE” BUTTONS

The button measures 1.25" across and carries a bold message! Pin on lab coats, uniforms, other clothing, tote bags, or backpacks to show support for flu vaccine.

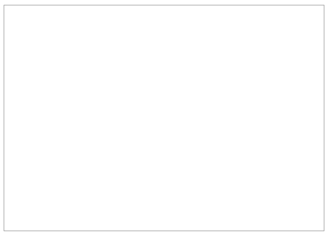
Buttons are delivered in bags of 10 buttons per bag.

Click here for pricing and ordering information for "FLU VACCINE" buttons.

“FLU VACCINE” STICKERS

Measuring 1.5" across and printed on Avery labels, theses stickers adhere well to clothing and have an easy-peel-off back.

Stickers are delivered to you cut individually (not on rolls)—available in bundles of 100.



Click here for pricing and ordering information for “FLU VACCINE” stickers.

Visit Shop IAC for additional items, including "Vaccines Save Lives" enamel pins, patient record cards, and a vaccine administration training video.

Clinical Infectious Diseases publishes a review of measles outbreak cost estimates in the U.S. between 2004–2017

Clinical Infectious Diseases published A review of measles outbreak cost estimates from the U.S. in the post-elimination era (2004–2017): estimates by perspective and cost type in its January 22 issue. The abstract is reprinted below.

Despite the elimination of measles in the U.S. in the year 2000, cases continue to occur with measles outbreaks having occurred in various jurisdictions in the U.S. in 2018 and 2019. Understanding the cost associated to measles outbreaks can inform cost-of-illness and cost-effectiveness studies of measles and measles prevention. We performed a literature review and identified 10 published studies from 2001–2018 that presented cost estimates from 11 measles outbreaks. Median total costs per measles outbreak were $152,308 (range, $9,862–$1,063,936); median cost per case was $32,805 (range, $7,396–$76,154) and median cost per contact was $223 (range, $81–$746). There was limited data on direct and indirect costs associated with measles. These findings highlight how costly measles outbreaks can be, the value of this information for public health department budgeting, and the importance of more broadly documenting the cost of measles outbreaks.

CONFERENCES AND MEETINGS

Reminder: The 49th National Immunization Conference will be held in Atlanta on May 19–21

The 49th National Immunization Conference (NIC) will be held May 19–21 at the Westin Peachtree Plaza Hotel in Atlanta, GA. NIC brings together more than 1,500 local, state, federal, and private-sector immunization stakeholders and partners to explore science, policy, education, and planning issues related to immunization and vaccine-preventable diseases.

Registration for the conference is now open.

Visit the National Immunization Conference web page for more information about conference and hotel registration, fees, and more.

iBudget Redesign: We Invite Your Comments and Questions

The Agency for Persons with Disabilities (APD) has been working in conjunction with the Agency for Health Care Administration (AHCA) to develop a redesign of the Medicaid iBudget Waiver Program, in hopes to create a plan structured to end its frequent operation at a deficit. Throughout this year, Disability Rights Florida has been in contact with APD to receive more detailed and transparent information regarding the iBudget redesign plan. We have filed official comments with APD and have provided them for the public's view.

We encourage you to review our commentary and critiques, and to please share your comments or questions with us via email at ibudgetredesign@drflorida.org.

Learn more and read the official comments!

New Goals, Priorities and Objectives for 2020

This summer, we asked you to provide input on what you would like to see our organization accomplish over the next year. Your responses played an integral role in formulating what disability issues are most important to you and helped us learn what you have on your mind.

View our updated 2020 Goals, Priorities, and Objectives on our website.

Happy National Disability Employment Awareness Month!

October is National Disability Employment Awareness Month (NDEAM). It is a national campaign that raises awareness about disability employment issues and celebrates the many and varied contributions of America's workers with disabilities. The theme for 2019 is "The Right Talent, Right Now."

Learn more about National Disability Employment Awareness Month.

Subject: JLAC Follow-up questions for the City of Palm Bay
Attachment(s): "12.18.19 JLAC Palm Bay Audit Hearing Additional Questions - Senator Mayfield.pdf"

Hi Kathy,
In follow up from the Joint Legislative Auditing Committee hearing on December 12, 2019, I have drafted some additional questions that the City of Palm Bay did not have the opportunity to answer in the meeting. Please see attached. I appreciate the Chairman providing this opportunity and thank you for coordinating communication on this important matter.

Sincerely,
Debbie Mayfield

SENATOR DEBBIE MAYFIELD
17th District

December 18, 2019

Kathy Dubose
Joint Legislative Auditing Committee
Claude Pepper Building
111 West Madison Street, Suite 876
Tallahassee, FL 32399

Dear Ms. Dubose,

I am writing in regards to the operational audit of the City of Palm Bay. At the Joint Legislative Auditing Committee (JLAC) hearing on December 12, 2019, the City of Palm Bay had the opportunity to respond to the audit findings, but city staff had limited answers to questions asked by members at that time.

The audit examined records for the St. Johns Heritage Parkway (SJHP)/I-95 Interchange to Babcock Street project, of which there have been a series of contractual improprieties. The City of Palm Bay signed a Memorandum of Agreement with the Florida Department of Transportation (FDOT) on May 16, 2013, outlining the SJHP construction schedule. The construction schedule hinged on the City's commitment to have completed the connection to a public roadway network. FDOT completed the SJHP/I-95 interchange in summer 2019 as outlined in the agreement, however the interchange still remains unopened due to the City's delay in constructing the connecting road. FDOT has incurred approximately $475,000 in additional costs to keep the interchange closed until the City's connecting road is complete. The urgency to complete this project and open the interchange cannot be understated.

I respectfully request that the following questions be included in the JLAC follow-up letter to the City of Palm Bay for response:

1. It is my understanding that the estimated cost to construct the connecting road is approximately $7 million. The City of Palm Bay conveyed that they had approximately $3 million reserved for the connector road project as of October 16, 2019. Has the City of Palm Bay secured the full funding necessary for completion of this project?

2. Based on historical documentation, it is apparent that the developers who stood to profit from the SJHP/I-95 Interchange had originally agreed to provide financial or in-kind support of the connector road. The audit findings specified that "*it was not apparent, of record, why the City*

did not make a more concerted effort to compel developers benefitting from the Interchange to contribute towards costs related to the Interchange or SJHP Projects." Is the City of Palm Bay actively working to secure funding or in-kind support for the connector road project from the parties that originally pledged the financial backing?

3. As specified in Finding 1 of the Audit, the City of Palm Bay ordinances contain transportation provisions that address methods for meeting identified transportation needs. "*To mitigate the transportation-related costs incurred by the City as the result of a development project, homebuilders or developers are responsible for paying transportation impact fees or proportionate share contributions.*" How much has been secured from the developer(s) in transportation impact fees or proportionate share contributions to date for this project? Is the City of Palm continuing to issue construction permits to the developer(s) that had originally committed to providing the financial or in-kind support for the project?

4. It is my understanding that there are ten property owners along the corridor. Has the City of Palm Bay secured the right-of-way from each of the private property owners needed to move forward with the project? Please provide supporting documentation.

5. On December 21, 2017 the Palm Bay City Council directed city staff to initiate Phase 4 of the Project Development & Environment (PD&E) planning study for the corridor. What is the current status of the SJHP PD&E planning study for the corridor? If the study has not been completed, please provide reasoning for the delay as this step is necessary for the project's successful completion.

Thank you for coordinating communication on this matter. I look forward to reviewing the responses provided by the City of Palm Bay.

Sincerely,

Debbie Mayfield

Vanessa –

I support the attached bill and appreciate Senator Brandes providing the opportunity to review the language.

Specifically, I want to thank Senator Brandes for proposing additional time to conduct the First Logic and Accuracy Test (line 43) from 10 days to 25 days. This will provide us with additional time to conduct pre-election activities, e.g., program voting equipment. The proposed language also helps to correct a technical issue created in SB 7066. The language the Senator is proposing allows Canvassing Boards to take full advantage of being able to canvass mail ballots 22 days prior to the election.

Also attached are the Florida Supervisors of Elections (FSE) legislative priorities for further consideration.

If you have any questions, my email address is dclark@votepinellas.com; this can be used for all direct correspondence rather than sending to election@votepinellas.com.

Have a safe and happy holiday season.

Sincerely,

Deborah Clark, CERA

Florida Supervisors Association

2020 Legislative Priorities and Issues

The Florida Supervisors of Elections respectfully asks the Legislature to assist us in the coming 2020 elections by adopting these priorities and supporting these issues for the coming session.

1. Funding for ERIC - Electronic Registration Information Center - Legislation was passed in 2018 authorizing Florida to join ERIC. It was announced by the Governor DeSantis and Secretary of State Lee on August 21, 2019 that Florida will join ERIC. The financial obligations are approximately $1.3 million to improve voter registration by contacting potentially eligible but unregistered voters with instructions on how to register to vote. The outreach to potentially eligible voters is conducted every two years ahead of each federal general election. It is far better to do this statewide than doing it county by county. (House budget bill and Senate project sponsors needed)

2. Super Voting Sites - As evidenced by the disruption of voting sites and locations after Hurricane Michael, and still today, many precincts in Bay County are unavailable to be used or are destroyed. Legislation is needed to allow each SOE the option, at the county level, for early voting and on Election Day to use Super Voting Sites where any voter from the county can cast their ballot. The benefits include less confusion for voters on precinct changes, equipment and personnel cost savings, greater organization and ease of location provided to voters, and ballots not rejected for being at the wrong precinct. In essence this is early voting extended through Election Day at 7:00 PM. This will also empower SOE's to utilize Super Sites in the event of another hurricane or natural disaster without having to wait on action by the Governor.

3. Allow a local supervisor and canvassing board the option to utilize for recounts, automated independent audit systems which have been approved and certified by the Division of Elections Bureau of Standards. (SB 582 in 2019)

AMERICAN OVERSIGHT

4. Public Records Exemption for ALL voter information contained in the statewide voter database, including email addresses and phone numbers, except for use for legitimate political purposes. (Amend 97.0585) This will assist in the completion of signature cure issues as well as improve the security of personal information of the voters.

5. Remove the $.10 limitation for initiative signature petition review and allow the Department of State, by rule, to set the actual cost to county taxpayers that must be paid for the cost of review. (Amend 99.097(4)) The $0.10 maximum allowed now is woefully inadequate!!

6. Remove language added in the 2019 Session requiring solicitation to be allowed on Private Property used as a polling place beyond the 150' No Solicitation Zone. (Amend 102.031) This language has resulted in the loss of several previously utilized polling places. The property owners refuse to allow solicitation on their property and thus are refusing to allow their facility to be a polling place.

7. Extend the current 30 day review period for initiative petition verification to 60 days.

8. Allow two additional days for recount deadlines. This will greatly assist the large counties who have several million ballots to recount.

9. Review and match statute for Mail-Only-Elections to comply with the time frames and certificate envelope match of Vote-By-Mail Ballots.

10. Modify the qualifying bounced check requirements in statute as a result of Wright v. City of Miami Gardens. Require the qualifying check to be either a cashier's check or a bank check.

11. In the instance of polling hours being extended by Court order or by order of a Governor's action, eliminate the requirement to use provisional ballot envelopes for all votes cast by voters not in line at 7:00 PM. The ballot cast during the extended time can be securely segregated much easier and more reliably than using provisional ballot envelopes. The envelopes slow down the whole process.

12. Expand the allowed number of "wildcard" early voting locations to allow a total of two locations.

AMERICAN OVERSIGHT

TECHNICAL CHANGES IN STATUTE NEEDED

- Amend 103.091 to allow State Committeemen and State Committeewomen to prequalify. They are currently allowed to qualify only during qualifying week, a VERY busy week for every SOE.
- Move Logic & Accuracy Testing to 25 days before the election. The 2019 changes allowed canvassing of ballots 22 days prior to the election. L&A Testing needs to be allowed prior to canvassing.
- Remove conflict in 101.043(1)(b)&(c) regarding providing identification and confirming address and correct precinct of voter.
- Remove portion of 101.5614 which requires duplication of over-voted ballots. This duplication is very time consuming and completely wasteful.

AMERICAN OVERSIGHT

24-01581-20

A bill to be entitled

An act relating to elections; amending s. 101.043, F.S.; deleting a provision that prohibits the use of an address appearing on identification presented by an elector at the polls as a basis to confirm or otherwise challenge an elector's legal residence; amending s. 101.5612, F.S.; revising the timeframes for conducting public preelection testing of automatic tabulating equipment; amending s. 101.5614, F.S.; removing the requirement that duplicate ballots be made of vote-by-mail ballots containing overvoted races; amending s. 101.6103, F.S.; revising the timeframe in which the supervisor of elections must mail ballots in elections conducted under the Mail Ballot Election Act; amending s. 103.091, F.S.; expanding the timeframe within which candidates for political party executive committees may qualify for office; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (b) of subsection (1) of section 101.043, Florida Statutes, is amended to read:

101.043 Identification required at polls.—

(1)

(b) If the picture identification does not contain the signature of the elector, an additional identification that provides the elector's signature shall be required. ~~The address appearing on the identification presented by the elector may not~~

AMERICAN OVERSIGHT

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

~~be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence.~~ The elector shall sign his or her name in the space provided on the precinct register or on an electronic device provided for recording the elector's signature. The clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided on the precinct register or on an electronic device provided for that purpose and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.

Section 2. Subsection (2) of section 101.5612, Florida Statutes, is amended to read:

101.5612 Testing of tabulating equipment.—

(2) On any day not more than 25 ~~10~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, the supervisor of elections shall have the automatic tabulating equipment publicly tested to ascertain that the equipment will correctly count the votes cast for all offices and on all measures. If the ballots to be used at the polling place on election day are not available at the time of the testing, the supervisor may conduct an additional test not more than 10 days before election day. Public notice of the time and place of the test shall be given at least 48 hours prior thereto by publication on the supervisor of elections' website and once in one or more newspapers of general circulation in the county or, if there is no newspaper of general circulation in the county, by posting the notice in at least four conspicuous places in the county. The supervisor or the municipal elections official may, at the time of qualifying, give written notice of the time and

AMERICAN OVERSIGHT

location of the public preelection test to each candidate qualifying with that office and obtain a signed receipt that the notice has been given. The Department of State shall give written notice to each statewide candidate at the time of qualifying, or immediately at the end of qualifying, that the voting equipment will be tested and advise each candidate to contact the county supervisor of elections as to the time and location of the public preelection test. The supervisor or the municipal elections official shall, at least 30 ~~15~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, send written notice by certified mail to the county party chair of each political party and to all candidates for other than statewide office whose names appear on the ballot in the county and who did not receive written notification from the supervisor or municipal elections official at the time of qualifying, stating the time and location of the public preelection test of the automatic tabulating equipment. The canvassing board shall convene, and each member of the canvassing board shall certify to the accuracy of the test. For the test, the canvassing board may designate one member to represent it. The test shall be open to representatives of the political parties, the press, and the public. Each political party may designate one person with expertise in the computer field who shall be allowed in the central counting room when all tests are being conducted and when the official votes are being counted. The designee shall not interfere with the normal operation of the canvassing board.

Section 3. Paragraph (a) of subsection (4) of section 101.5614, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

101.5614 Canvass of returns.—

(4)(a) If any vote-by-mail ballot is physically damaged so that it cannot properly be counted by the automatic tabulating equipment, a true duplicate copy shall be made of the damaged ballot in the presence of witnesses and substituted for the damaged ballot. ~~Likewise,~~ A duplicate ballot must also ~~shall~~ be made of ~~a vote-by-mail ballot containing an overvoted race or~~ a marked vote-by-mail ballot in which every race is undervoted, including ~~which shall include~~ all valid votes as determined by the canvassing board based on rules adopted by the division pursuant to s. 102.166(4). Upon request, a physically present candidate, a political party official, a political committee official, or an authorized designee thereof, must be allowed to observe the duplication of ballots. All duplicate ballots shall be clearly labeled "duplicate," bear a serial number which shall be recorded on the defective ballot, and be counted in lieu of the defective ballot. After a ballot has been duplicated, the defective ballot shall be placed in an envelope provided for that purpose, and the duplicate ballot shall be tallied with the other ballots for that precinct.

Section 4. Subsection (1) of section 101.6103, Florida Statutes, is amended to read:

101.6103 Mail ballot election procedure.—

(1) Except as otherwise provided in subsection (7), the supervisor of elections shall mail all official ballots with a secrecy envelope, a return mailing envelope, and instructions sufficient to describe the voting process to each elector entitled to vote in the election not sooner than the 40th ~~20th~~ day before the election and not later than the 10th day before

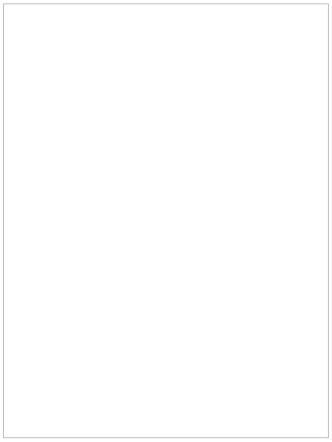
AMERICAN OVERSIGHT

the date of the election. All such ballots shall be mailed by first-class mail. Ballots shall be addressed to each elector at the address appearing in the registration records and placed in an envelope which is prominently marked "Do Not Forward."

Section 5. Subsection (4) of section 103.091, Florida Statutes, is amended to read:

103.091 Political parties.—

(4) Any political party other than a minor political party may by rule provide for the membership of its state or county executive committee to be elected for 4-year terms at the primary election in each year a presidential election is held. The terms begin ~~shall commence~~ on the first day of the month following each presidential general election,~~;~~ but the names of candidates for political party offices may ~~shall~~ not be placed on the ballot at any other election. The results of such election shall be determined by a plurality of the votes cast. In such event, electors seeking to qualify for such office shall do so with the Department of State or supervisor of elections no ~~not earlier than noon of the 71st day, or~~ later than noon of the 67th day~~,~~ preceding the primary election. The outgoing chair of each county executive committee shall, within 30 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers. The chair of each state executive committee shall, within 60 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers.



Section 6. This act shall take effect July 1, 2020.

REPUBLICAN CLUB OF SOUTHWEST VOLUSIA

6 pm Thursday, February 6 at VFW Post 8093

351 S Charles Richard Beall Blvd, DeBary

FEATURED SPEAKER: HORACE ANDERSON, JR.

February is Black History Month.

This is a fitting timed to tell the REAL story about the role of the Republican Party in emancipating the slaves,

and passing the 13th, 14th and 15th Amendments ending slavery, guaranteeing rights of citizenship, the vote and due process to all Americans.

Republicans did all this without any help from the Democrats who fought a Civil War over slavery and then spawned the KKK,

Jim Crow laws and another century of lynchings, segregations and discrimination until the civil rights movement brought new legislation in the 60's.

Horace has been producing video vignettes on YouTube and plans to write a book to tell the real story of the Civil War against Civil Rights.

Subject: Meeting for Tomorrow?
Attachment(s): "Free and Fair Elections_Digital Packet_wLanguageStates.pdf"

Hello,

I am writing to request a short meeting with Sen. Brandes for any time tomorrow in his Capitol Office to discuss the subject campaign finance reform, and specifically the FREE AND FAIR ELECTIONS memorial that as introduced in both chambers last session.

Below, I have links to the bill texts for last session along with a .PDF attachment containing supporting and informational documents.

I am a Florida resident spending my own time on this because I believe without serious change to our campaign finance laws, our Federal Congress will continue to be inefficient partly due to the massive amount of time they spend fundraising, and that government will not be able to truly represent me or the other citizens of Florida and the US.

2019 Bill Text, HM883 - Article V Convention for Free and Fair Elections

2019 Bill Text, SM1230 - Permanently Restore Free and Fair Elections

I look forward to hearing from you,

-Scott Bajgrowicz

AMERICAN OVERSIGHT

A Nation United Against Corruption

— THE —
FREE & FAIR ELECTIONS
— RESOLUTION —

This is not a left or right issue, it's an **American issue**.

Let's take responsibility, as citizens and elected officials, to fix our broken campaign finance system in America and renew the people's trust in government.

This resolution uses a **proven strategy** to bring about much needed constitutional change when Congress is unwilling or unable to take action, by calling for a limited convention under Article V of the U.S. Constitution to address the topic of campaign finance reform.

We must ensure that elections in America are transparent, **free from** the undue influence of special interests, and **fair enough** that any citizen can be elected.

The Problem is we are in danger of losing a country dependent upon the people alone. This fundamental American principle has been distorted by a dependency on powerful special interests, often with little to no transparency, and eroded the people's trust in government.

The Solution is a U.S. Constitutional Amendment. Why an Amendment?

- **An Amendment is the only solution that goes above Congress and the Supreme Court.**
- **An Amendment is a lasting solution and can protect state and local laws.**

There are only **two** ways to propose amendments to the Constitution:

- **2/3 of Congress can propose...**
- **2/3 of the States can apply for a convention to propose...**

Ratification: Any amendment proposed by Congress or a convention **must be approved by 75% of the States** afterwards. This extremely high bar **ensures** that only the most reasonable amendments, those with widespread appeal across the political spectrum, will become part of the Constitution.

Facts

— The majority of U.S Constitutional Amendments have included a convention campaign from the States.

— 85% of Americans believe our campaign finance system needs fundamental changes.

AMERICAN OVERSIGHT

Taking Responsibility for Fixing our Broken Government

"Money's dominance over politics is a top problem our nation faces. It prevents us from tackling anything else. We have reached a stunning point: Either we are a country that makes decisions based on the common good, or one where the size of your wallet determines the worth of your ideas. Either we uphold the values of a representative democracy or we allow greed and wealth to destroy the great American experiment in self-governance."

— former Senator Alan Simpson (R-WY)

"Millionaires, billionaires can put in unlimited amounts of money directly into the campaign. In a way, it gives legal bribery a chance to prevail, because almost all the candidates, whether they're honest or not, and whether they're Democratic or Republican, depend on these massive infusions of money from very rich people in order to have money to campaign."

— former President Jimmy Carter

"Our nation is facing a crisis of liberty if we do not control campaign expenditures. We must prove that elective office is not for sale. We must convince the public that elected officials are what James Madison intended us to be, agents of the sovereign people, not the hired hands of rich givers…"

— former Senator Barry Goldwater (R-AZ)

"The need for real campaign finance reform is not a progressive issue. It is not a conservative issue. It is an American issue. It is an issue that should concern all Americans, regardless of their political point of view, who wish to preserve the essence of the longest standing democracy in the world, a government that represents all of the people and not a handful of powerful and wealthy special interests."

— Senator Bernie Sanders (D-VT)

"Conservatives want to see more transparency in politics. We deserve an America where our views are not dismissed simply because we might disagree with a high-priced lobbyist who happened to give more money to a politician."

— John Pudner, Executive Director, Take Back Our Republic

AMERICAN OVERSIGHT

Article V Convention Quotes

"We are convinced that Article V was designed to permit limited conventions and that a variety of legal and political means are available to help to enforce such limits."

- **Office of Legal Policy, U.S. Department of Justice**, *Limited Constitutional Conventions under Article V of the United States Constitution*

"Our two-year study of the subject has led us to conclude that a national constitutional convention can be channeled so as not to be a [radical force] but rather an orderly mechanism of effecting constitutional change when circumstances require its use. The charge of radicalism does a disservice to the ability of the states and people to act responsibly when dealing with the Constitution."

- **American Bar Association**, *Amendment of the Constitution by the Convention Method under Article V*

"The Article V Convention for proposing amendments was the subject of considerable debate and forethought at the Constitutional Convention. The founders clearly intended it as a balance to proposal of amendments by Congress, providing the people, through their state legislatures, with an alternative means to consider amendments, particularly if Congress was unable or unwilling to act on its own."

- **Congressional Research Service**, *The Article V Convention for Proposing Constitutional Amendments: Historical Perspectives for Congress*

"...The Convention Clause provides an important means to adopt or force Congress to adopt amendments that are perceived to be in the national interest by significant percentages of the American population, but that are detrimental to the interests of members of Congress."

- **Harvard Journal of Law & Public Policy**, *The Other Way to Amend the Constitution: The Article V Constitutional Convention Amendment Process*

"The framers did not provide an unchecked grant of power to a convention: every amendment proposed would be subject to the same conditions faced by those proposed by Congress—"... the notion of a 'runaway' convention, succeeding in amending the Constitution in a manner opposed by the American people, is not merely remote, it is impossible."

- **U.S. Senate Judiciary Committee**, Report to the 98th Congress

"I think the convention can be limited. The fact is that the majority of the scholars in America share my view."

- **Former Attorney General of the United States,** Hon. Griffin Bell

AMERICAN OVERSIGHT

Article V Convention Quotes (Continued)

"The majority view, however, is that Congress may limit the convention's deliberations. The arguments for this proposition, at least on our consideration of them, appear to be persuasive."

- **U.S. Department of Justice**, Constitutional Law—Constitution—Article V—The Amending Process—The Convention Method

"Much of the fear surrounding a convention is unfounded. The Convention Clause's text and history indicate that it grants power to the States to limit the scope of any such convention. In addition, the States have the ability to reject any amendments proposed by a convention through the ratification process."

- **Harvard Journal of Law & Public Policy**, *The Other Way to Amend the Constitution: The Article V Constitutional Convention Amendment Process*

"While I make no recommendation of amendments, I fully recognize the rightful authority of the people over the whole subject, to be exercised in either of the modes prescribed in the instrument itself; and I should, under existing circumstances, favor rather than oppose a fair opportunity being afforded the people to act upon it. I will venture to add that to me the convention mode seems preferable, in that it allows amendments to originate with the people themselves."

- **President Abraham Lincoln**, *First Inaugural Address*

"We will state our conclusions in advance. First, we think that if a convention for proposing amendments were called under Article V, the constitutionally mandated procedures would operate to deprive the convention of power to make constitutionally viable proposals except with respect to subjects within a predetermined field. [...] Second, we think that Article V gives Congress no power to provide for the ratification of any constitutional proposal that is not developed and proposed in accordance with the procedures contemplated by Article V. Just as Congress would have no power to submit one of its own constitutional proposals for ratification unless two-thirds of the Members of both Houses were in accord that the proposal was necessary and desirable, Congress would have no power to provide for the ratification of any proposal propounded by a constitutional convention unless that proposal were responsive to the application that justified the gathering of the convention in the first instance."

- **U.S. Department of Justice,** *Constitutional Convention—Limitation of Power to Propose Amendments to the Constitution*

AMERICAN OVERSIGHT

Understanding Article V of the U.S. Constitution

The complete text of Article V:

" The Congress, whenever two thirds of both houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the legislatures of two thirds of the several states, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the legislatures of three fourths of the several states, or by conventions in three fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the ninth section of the first article; and that no state, without its consent, shall be deprived of its equal suffrage in the Senate. "

" *A convention for proposing amendments* "

- A convention called under Article V of the U.S. Constitution is only given the power to **propose** amendments

" *Shall be valid [...] when ratified* "

- Any proposal from a convention is **not** valid until ratified by ¾ of the states (38 states currently)
- Only 13 states are required to block unreasonable proposals, ensuring that only those proposals with widespread support across the political spectrum will become part of the Constitution

AMERICAN OVERSIGHT

The Convention of 1787 in Philadelphia only made a *proposal* to Congress.

"... the Convention of 1787 did not ignore Congress. The draft Constitution was submitted to Congress, consented to by Congress, and transmitted by Congress to the states for ratification by popularly-elected conventions."

- The American Bar Association, Special Constitutional Convention Study Committee

"It is also somewhat misleading to say that the Philadelphia Convention was 'runaway,' for the 'call' for that convention by the Continental Congress did speak in broad terms. There were 'defects in the present Confederation,' and 'alterations and provisions' seemed necessary. No specific defects were enumerated."

- Office of Legal Policy, U.S. Department of Justice

It was Congress that ultimately proposed a new Constitution, not the convention.

"The Articles of this confederation shall be inviolably observed by every State, and the union shall be perpetual; nor shall any alteration at any time hereafter be made in any of them; unless such alteration be agreed to in a Congress of the United States, and be afterwards confirmed by the legislatures of every State."

- Article XIII of the Articles of Confederation

- A convention like the one in Philadelphia had no authority to propose changes to the Articles of Confederation; only Congress had that power. A convention could only offer a suggestion to Congress, much like a committee called to research a subject. Congress was the body that officially proposed the U.S. Constitution, because they believed that suggestion to be one that the states should consider and decide themselves.

The Federal Convention of 1787 did not ignore the ratification requirement.

Many note that the Constitution required nine states to be ratified rather than unanimity like the Articles of Confederation and think that means they ignored the procedure.

- In fact, the Convention sent its proposal to Congress, not the States. Congress sent it to the States who used their inherent authority to pull out of the Confederation, which was nothing more than a treaty among sovereign nation-states. Under the Articles, no State could bind any other and indeed they didn't. Rhode Island and North Carolina were not part of the new government when it went into effect because they chose not to ratify. Rhode Island even sent a letter to the first Congress asking for good foreign relations.

AMERICAN OVERSIGHT

Article V Convention Applications must be on the same topic in order to count towards the 34 state constitutional threshold required to hold a convention

How do we know this?

- Congress is constitutionally required to call a convention upon the applications of 2/3 of the state legislatures (currently 34 states), yet throughout our history there have been over 400 applications submitted from all 50 states on a variety of topics.

- Congress has officially counted over 70 applications from **35 states**- more than the constitutional threshold. This count can be found on the U.S. House Clerk's website. If Congress was counting applications without considering subject matter they would have to call a convention tomorrow, but they are clearly counting them in separate piles based on the specific topic or group of topics found in each application.

"In summary, we believe that a substantively-limited Article V convention is consistent with the purpose of the alternative method since the states and people would have a complete vehicle other than the Congress for remedying specific abuses of power by the national government; consistent with the actual history of the amending article throughout which only amendments on single subjects have been proposed by Congress; consistent with state practice under which limited conventions have been held under constitutional provisions not expressly sanctioning a substantively-limited convention; and consistent with democratic principles because convention delegates would be chosen by the people in an election in

AMERICAN OVERSIGHT

which the subject matter to be dealt with would be known and the issues identified, thereby enabling the electorate to exercise an informed judgment in the choice of delegates." - ***American Bar Association***, *Amendment of the Constitution by the Convention Method Under Article V*

"With some notable exceptions, most commentators hold that state applications for a convention must address the same issue in order to be counted toward the two-thirds threshold established by the Constitution, but they need not be identical." - ***Congressional Research Service***, *The Article V Convention Method for Proposing Constitutional Amendments: Historical Perspectives*

AMERICAN OVERSIGHT

SENATE JOINT RESOLUTION

WHEREAS, The first President of the United States, George Washington, stated in his Farewell Address: "The basis of our political systems is the right of the people to make and to alter their Constitutions of Government."; and

WHEREAS, It was the stated intention of the framers of the Constitution of the United States of America that the Congress of the United States of America should be "dependent on the people alone" (James Madison, Federalist 52); and

WHEREAS, That dependency has evolved from a dependency on the people alone to a dependency on those who spend excessively in elections, through campaigns or third-party groups; and

WHEREAS, The United States Supreme Court ruling in *Citizens United v. Federal Election Commission*, 558 U.S. 310 (2010), removed restrictions on amounts of independent political spending; and

WHEREAS, Article V of the United States Constitution requires the United States Congress to call a convention for proposing amendments upon application of two-thirds of the legislatures of the several states for the purpose of proposing amendments to the United States Constitution; and

AMERICAN OVERSIGHT

WHEREAS, The State of Illinois sees the need for a convention to propose amendments in order to address concerns such as those raised by the decision of the United States Supreme Court in *Citizens United v. Federal Election Commission* and related cases and events, including those occurring long before or afterward, or for a substantially similar purpose, and desires that the convention should be so limited; and

WHEREAS, The State of Illinois desires that the delegates to the convention shall be comprised equally from individuals currently elected to State and local office, or be selected by election in each Congressional district for the purpose of serving as delegates, though all individuals elected or appointed to federal office, now or in the past, be prohibited from serving as delegates to the Convention, and intends to retain the ability to restrict or expand the power of its delegates within the limits expressed above; and

WHEREAS, The State of Illinois intends that this be a continuing application, considered together with applications calling for a convention currently pending in the 188th Massachusetts legislature as S.1727 and H.3190, the 2013-2014 Vermont legislature as J.R.S. 27, and the 2013-2014 California legislature as AJR 1, and all other passed, pending, and future applications, the aforementioned concerns of Illinois

AMERICAN OVERSIGHT

notwithstanding until such time as two-thirds of the several states have applied for a Convention and that Convention is convened by Congress; therefore, be it

RESOLVED, BY THE SENATE OF THE NINETY-EIGHTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, THE HOUSE OF REPRESENTATIVES CONCURRING HEREIN, that we, the legislature of the State of Illinois, hereby make application to the Congress, under the provisions of Article V of the Constitution of the United States, for the calling of a convention for proposing amendments; and be it further

RESOLVED, That this application shall be deemed an application for a convention to address each and any of the subjects listed in this resolution; for purposes of determining whether two-thirds of the states have applied for a convention addressing any subject, this application is to be aggregated with the applications of any other state legislatures limited to one or more of the subjects listed in this resolution; and be it further

RESOLVED, That this resolution constitutes a continuing application and remains in effect until rescission by any sitting session of the legislature of this State; this application does not constitute a recognition that any particular activity or activities currently undertaken by the

AMERICAN OVERSIGHT

federal government is or are authorized by the Constitution; and be it further

RESOLVED, That suitable copies of this resolution be delivered to the President and Secretary of the United States Senate, the Speaker and Clerk of the House of Representatives of the United States Congress, and the Archivist of the United States; to the members of the United States Senate and House of Representatives from this State; and to the presiding officers of each of the legislative chambers in the several States, requesting their cooperation.

AMERICAN OVERSIGHT

Journal of the Senate

TUESDAY, APRIL 16, 2013

The Senate was called to order by the President.

Devotional Exercises

A moment of silence was observed in lieu of devotions.

Pledge of Allegiance

The President then led the members of the Senate in the pledge of allegiance.

Bill Referred to Committee on Appropriations

S. 165.

Senate bill of the following title, appearing on the Calendar for notice and carrying an appropriation or requiring the expenditure of funds, under the rule was referred to the Committee on Appropriations:

An act relating to collective bargaining for deputy state's attorneys.

Joint Senate Resolution Adopted on the Part of the Senate

Joint Senate resolution of the following title was offered, read and adopted on the part of the Senate, and is as follows:

By Senators Baruth and Benning,

J.R.S. 26. Joint resolution relating to weekend adjournment.

Resolved by the Senate and House of Representatives:

That when the two Houses adjourn on Friday, April 19, 2013, it be to meet again no later than Tuesday, April 23, 2013.

Joint Resolution Referred

J.R.S. 27.

Joint Senate resolution of the following title was offered, read the first time and is as follows:

By Senators Lyons, Ashe, Baruth, Cummings, Fox, Hartwell, Pollina and Rodgers,

Printed on 100% Recycled Paper

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005037

J.R.S. 27. Joint resolution relating to an application of the General Assembly for Congress to call a convention for proposing amendments to the U.S. Constitution.

Whereas, it was the stated intention of the framers of the Constitution of the United States of America that the Congress of the United States of America should be "dependent on the people alone" (James Madison or Alexander Hamilton, Federalist 52), and

Whereas, that dependency has evolved from a dependency on the people alone to a dependency on those who spend excessively in elections through campaigns or third-party groups, and

Whereas, the U.S. Supreme Court ruling in *Citizens United v. Federal Election Commission*, 130 S.Ct. 876 (2010), removed restrictions on amounts of independent political spending, and

Whereas, the removal of those restrictions has resulted in the corrupting influence of powerful economic forces, which have supplanted the will of the people by undermining our ability to choose our political leadership, write our own laws, and determine the fate of our State, and

Whereas, the State of Vermont believes that a convention called pursuant to Article V of the U.S. Constitution should be convened to consider amendments to that Constitution to limit the corrupting influence of money in our political system and desires that said convention should be so limited, and

Whereas, the Congress of the United States has failed to propose, pursuant to Article V of the Constitution, amendments that would adequately address the concerns of Vermont, *now therefore be it*

Resolved by the Senate and House of Representatives:

That the General Assembly, pursuant to Article V of the U.S. Constitution, hereby petitions the U.S. Congress to call a convention for the purpose of proposing amendments to the Constitution of the United States of America, *and be it further*

Resolved: That not intending to condition this petition, Vermont requests that its specific concerns notwithstanding, the agenda of the convention be limited to those matters enumerated by at least 10 of the states calling for the convention, *and be it further*

Resolved: That the Secretary of State be directed to send a copy of this resolution to the Vice President of the United States; the President Pro Tempore and the Secretary of the Senate of the United States; the Speaker and Clerk of the House of Representatives of the United States; the Archivist of the United States; and the Vermont Congressional Delegation.

AMERICAN OVERSIGHT

Thereupon, the President, in his discretion, treated the joint resolution as a bill and referred it to the Committee on Judiciary.

Bills Referred

House bills of the following titles were severally read the first time and referred:

H. 198.

An act relating to the Legacy Insurance Management Act.

To the Committee on Rules.

H. 529.

An act relating to approval of an amendment to the charter of the Winooski Incorporated School District related to the term of district treasurer.

To the Committee on Rules.

House Proposal of Amendment Concurred In

S. 144.

House proposal of amendment to Senate bill entitled:

An act relating to the St. Albans state office building.

Was taken up.

The House proposes to the Senate to amend the bill by striking out all after the enacting clause and inserting in lieu thereof the following:

Sec. 1. SALE OF ST. ALBANS STATE OFFICE BUILDING

(a) Notwithstanding 29 V.S.A. § 166(b), the Commissioner of Buildings and General Services is authorized to sell the state office building at 20 Houghton Street in St. Albans. The Commissioner is authorized to convey 20 Houghton Street by warranty deed.

(b) The Commissioner of Buildings and General Services is authorized to negotiate and enter into a lease or lease-purchase agreement to replace the state office building at 20 Houghton Street in St. Albans. It is the intent of the General Assembly that the replacement state office building remain in downtown St. Albans.

Sec. 2. EFFECTIVE DATE

This act shall take effect on passage.

Thereupon, the question, Shall the Senate concur in the House proposal of amendment?, was decided in the affirmative.

AMERICAN OVERSIGHT

Bill Passed in Concurrence

H. 13.

House bill of the following title was read the third time and passed in concurrence:

An act relating to statutory revision.

Proposals of Amendment; Third Reading Ordered

H. 71.

Senator Cummings, for the Committee on Economic Development, Housing and General Affairs, to which was referred House bill entitled:

An act relating to tobacco products.

Reported recommending that the Senate propose to the House to amend the bill as follows:

First: In Sec. 22, 33 V.S.A. § 1918, in subdivision (f)(1), by striking out the second sentence in its entirety and inserting in lieu thereof the following: The bond shall be issued by a surety company in good standing and authorized to transact business in this State to secure the payment of any escrow due or which may become due from the nonparticipating manufacturer or its United States importer.

Second: By striking out Sec. 23 in its entirety and inserting in lieu thereof a new Sec. 23 to read as follows:

Sec. 23. EFFECTIVE DATES

This section shall take effect on passage. Sec. 19 of this act shall take effect on June 30, 2013. All remaining sections shall take effect on July 1, 2013.

And that the bill ought to pass in concurrence with such proposals of amendment.

Senator MacDonald, for the Committee on Finance, to which the bill was referred, reported recommending that the bill ought to pass in concurrence with proposal of amendment as recommended by the Committee on Economic Development, Housing and General Affairs.

Thereupon, the bill was read the second time by title only pursuant to Rule 43, and the proposals of amendment were collectively agreed to, and third reading of the bill was ordered.

Adjournment

On motion of Senator Baruth, the Senate adjourned until one o'clock and thirty minutes in the afternoon on Wednesday, April 17, 2013.

AMERICAN OVERSIGHT

Assembly Joint Resolution No. 1

RESOLUTION CHAPTER 77

Assembly Joint Resolution No. 1—Relative to a federal constitutional convention.

[Filed with Secretary of State June 27, 2014.]

LEGISLATIVE COUNSEL'S DIGEST

AJR 1, Gatto. Federal constitutional convention: application.

This measure would constitute an application to the United States Congress to call a constitutional convention pursuant to Article V of the United States Constitution for the sole purpose of proposing an amendment to the United States Constitution that would limit corporate personhood for purposes of campaign finance and political speech and would further declare that money does not constitute speech and may be legislatively limited.

This measure would state that it constitutes a continuing application to call a constitutional convention until at least ⅔ of the state legislatures apply to the United States Congress to call a constitutional convention for that sole purpose. This measure would also state that it is an application for a limited constitutional convention and does not grant Congress the authority to call a constitutional convention for any purpose other than for the sole purpose set forth in this measure.

WHEREAS, Corporations are legal entities that governments create and the rights that they enjoy under the United States Constitution should be more narrowly defined than the rights afforded to natural persons; and

WHEREAS, Corporations do not vote in elections and should not be categorized as persons for purposes related to elections for public office and ballot measures; and

WHEREAS, The United States Supreme Court, in Citizens United v. Federal Election Commission (2010) 130 S.Ct. 876, held that the government may not, under the First Amendment to the United States Constitution, suppress political speech on the basis of the speaker's corporate identity; and

WHEREAS, Article V of the United States Constitution requires the United States Congress to call a constitutional convention upon application of two-thirds of the legislatures of the several states for the purpose of proposing amendments to the United States Constitution; now, therefore, be it

Resolved by the Assembly and the Senate of the State of California, jointly, That the Legislature of the State of California, speaking on behalf of the people of the State of California, hereby applies to the United States Congress to call a constitutional convention pursuant to Article V of the

AMERICAN OVERSIGHT

United States Constitution for the sole purpose of proposing an amendment to the United States Constitution that would limit corporate personhood for purposes of campaign finance and political speech and would further declare that money does not constitute speech and may be legislatively limited; and be it further

Resolved, That this constitutes a continuing application to call a constitutional convention pursuant to Article V of the United States Constitution until at least two-thirds of the legislatures of the several states apply to the United States Congress to call a constitutional convention for the sole purpose of proposing an amendment to the United States Constitution that would limit corporate personhood for purposes of campaign finance and political speech and would further declare that money does not constitute speech and may be legislatively limited; and be it further

Resolved, That this application is for a limited constitutional convention and does not grant Congress the authority to call a constitutional convention for any purpose other than for the sole purpose set forth in this resolution; and be it further

Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, the Minority Leader of the House of Representatives, the Majority Leader of the United States Senate, the Minority Leader of the United States Senate, and to each Senator and Representative from California in the Congress of the United States.

SENATE CONCURRENT RESOLUTION No. 132

STATE OF NEW JERSEY

216th LEGISLATURE

INTRODUCED AUGUST 11, 2014

Sponsored by:
Senator LINDA R. GREENSTEIN
District 14 (Mercer and Middlesex)
Senator BRIAN P. STACK
District 33 (Hudson)
Assemblyman DANIEL R. BENSON
District 14 (Mercer and Middlesex)
Assemblyman HERB CONAWAY, JR.
District 7 (Burlington)
Assemblyman TIM EUSTACE
District 38 (Bergen and Passaic)

Co-Sponsored by:
Senator Gill, Assemblymen Singleton, Diegnan, Gusciora, Assemblywoman Watson Coleman, Assemblymen McKeon, Wimberly, Caputo, Johnson, Assemblywoman Jasey, Assemblyman Chivukula, Assemblywomen Jimenez, Quijano, Assemblyman Coughlin, Assemblywomen Tucker, Sumter, Assemblymen Garcia, Giblin, Assemblywoman Oliver, Assemblyman Burzichelli, Assemblywoman Pinkin and Assemblyman Danielsen

SYNOPSIS

Applies to Congress for limited constitutional convention to limit corrupting influence of money in politics and overturn Citizens United decision and related cases.

CURRENT VERSION OF TEXT

As introduced.

A CONCURRENT RESOLUTION applying to the Congress of the United States for the calling of a convention for the limited purpose of addressing concerns raised by the decision of the United States Supreme Court in the case of *Citizens United v. Federal Elections Commission* and related cases.

AMERICAN OVERSIGHT

WHEREAS, Elections should be free of the corrupting influence of excessive spending by outside interests and fair enough that any citizen can run for public office; and

WHEREAS, Numerous United States Supreme Court decisions have frustrated the will of the American people by eroding our ability to choose our political leadership, write our laws, and determine the fate of our country; and

WHEREAS, The New Jersey General Assembly and the New Jersey State Senate passed Assembly Resolution No. 86 and Senate Resolution No. 47, respectively, in the 2012-2013 legislative session; and

WHEREAS, Those resolutions expressed the Legislature's "strong opposition to [the] U.S. Supreme Court decision in *Citizens United v. Federal Elections Commission* [and called] upon [the] Congress of the United States to propose amending [the] U.S. Constitution" to overturn that decision; and

WHEREAS, Congress has failed to propose, pursuant to Article V of the United States Constitution, amendments thereto that would adequately address the concerns expressed in Assembly Resolution No. 86 and Senate Resolution No. 47; and

WHEREAS, Article V of the United States Constitution also requires Congress to call a convention for proposing amendments thereto upon application by two-thirds of the legislatures of the several states; and

WHEREAS, The State of New Jersey believes that there is a great need for a convention to propose amendments to the Constitution to address the concerns raised by citizens opposed to the decision of the Supreme Court in *Citizens United* and related cases, and believes that such a convention must be limited solely, specifically, and exclusively to addressing those concerns; and

WHEREAS, The State of New Jersey believes that the delegates to such a convention should be selected equally from individuals currently holding State or local office, or selected by election from each Congressional district for the purpose of serving as delegates, though past or present holders of federal elective office should be prohibited from serving as convention delegates, and the State should retain the ability to restrict or expand the power of its delegates within the limits noted above; and

WHEREAS, The State of New Jersey intends that this be a continuing application considered together with all other applications calling for a convention currently pending in other state legislatures, and all other passed, pending, and future applications with the aforementioned concerns until two-thirds of the several states have applied for a convention and it is convened by Congress; now, therefore,

BE IT RESOLVED *by the Senate of the State of New Jersey (the General Assembly concurring):*

1. The Legislature of the State of New Jersey makes application to the Congress of the United States for a convention to be called under Article V of the Constitution of the United States of America for the sole, specific and exclusive purpose of proposing amendments to the Constitution of the United States that would limit the corrupting influence of money in our political system including overturning the decision of the United States Supreme Court in the case of *Citizens United v. Federal Elections Commission* and related cases.

AMERICAN OVERSIGHT

2. Copies of this resolution, as filed with the Secretary of State, shall be transmitted by the Clerk of the General Assembly or the Secretary of the Senate to the President and Vice President of the United States, the Speaker of the United States House of Representatives, the Minority Leader of the United States House of Representatives, the President Pro Tempore of the United States Senate, each Senator and Representative from New Jersey in the Congress of the United States, the Archivist of the United States and the respective clerks of the United States House of Representatives and the United States Senate requesting that they record this application in the published tally of state petitions for a convention of the states under Article V of the United States Constitution, the Governor of each state, and the presiding officer of each house of each state legislature in the United States.

STATEMENT

This concurrent resolution makes application to the Congress of the United States of America for a convention to be called under Article V of the Constitution of the United States for the sole, specific and exclusive purpose of proposing amendments to the Constitution of the United States that would limit the corrupting influence of money in our political system including by overturning the decision of the United States Supreme Court in the case of *Citizens United v. Federal Elections Commission* and related cases.

The resolution provides that copies of the resolution are to be transmitted by the Secretary of the Senate to the President and Vice President of the United States, the Speaker of the United States House of Representatives, the Minority Leader of the United States House of Representatives, the President Pro Tempore of the United States Senate, each Senator and Representative from New Jersey in the Congress of the United States, the Archivist of the United States and the respective clerks of the United States House of Representatives and the United States Senate requesting that they record this application in the published tally of state petitions for a convention of the states under Article V of the United States Constitution, the Governor of each state, and the presiding officer of each house of each state legislature in the United States.

IN GENERAL ASSEMBLY

JANUARY SESSION, A.D. 2016

S E N A T E R E S O L U T I O N

RESPECTFULLY URGING CONGRESS TO RESTORE FREE AND FAIR ELECTIONS IN THE UNITED STATES

Introduced By: Senator Joshua Miller

Date Introduced: February 25, 2016

Referred To: Senate Special Legislation and Veterans Affairs

WHEREAS, The 1st President of the United States George Washington stated, "The basis of our political systems is the right of the people to make and to alter their Constitutions of Government"; and

WHEREAS, It was the stated intention of the framers of the Constitution of the United States of America that the Congress of the United States of America should be "dependent on the people alone." (James Madison, Federalist 52); and

WHEREAS, That dependency has evolved from a dependency on the people alone to a dependency on those who spend excessively in elections, through campaigns or third-party groups; and

WHEREAS, The United States Supreme Court ruling in Citizens United v. Federal Election Commission, 558 U.S. 310 (2010) removed restrictions on amounts of independent political spending; and

WHEREAS, The removal of those restrictions has resulted in the unjust influence of powerful economic forces, which have supplanted the will of the people by undermining our ability to choose our political leadership, write our own laws, and determine the fate of our state; and

WHEREAS, Article V of the United States Constitution requires the United States Congress to call a convention for proposing amendments upon application of two-thirds of the legislatures of the several states for the purpose of proposing amendments to the United States

AMERICAN OVERSIGHT

Constitution; now, therefore be it

RESOLVED, That this Senate of the State of Rhode Island and Providence Plantations hereby sees the need for a convention to propose amendments in order to address concerns such as those raised by the decision of the United States Supreme Court in Citizens United v. Federal Election Commission and related cases and events including those occurring long before or afterward or for a substantially similar purpose, and desires that said convention should be so limited; and be it further

RESOLVED, That this Senate hereby respectfully requests that the delegates to said convention be comprised equally of individuals currently elected to state and local office, or be selected by election, in each Congressional district for the purpose of serving as delegates, though all individuals elected or appointed to federal office, now or in the past, be prohibited from serving as delegates to the Convention, and furthermore requests the ability to restrict or expand the power of its delegates within the limits expressed above; and be it further

RESOLVED, That this Senate hereby intends that this be a continuing application considered together with applications calling for a convention passed in the 2013-2014 Vermont legislature as R454, the 2013-2014 California legislature as Resolution Chapter 77, the 2013-2014 Illinois legislature as Senate Joint Resolution No. 42, the 2014-2015 New Jersey legislature Senate concurrent Resolution No. 132, and all other passed, pending, and future applications, the aforementioned concerns of Rhode Island notwithstanding until such time as two-thirds of the several states have applied for a Convention and said Convention is convened by Congress; and be it further

RESOLVED, That the citizenry of the State of Rhode Island, speaking through this Senate, and pursuant to Article V of the United States Constitution, hereby petitions the United States Congress to call a Convention for the purpose of proposing Amendments to the Constitution of the United States of America as soon as two-thirds of the several states have applied for a Convention; and be it further

AMERICAN OVERSIGHT

RESOLVED, That the Secretary of State be and hereby is authorized and directed to transmit duly certified copies of this resolution to the President of the United States; the Vice President of the United States in his capacity as President of the United States Senate and addressed to him at the office he maintains in the United States Capitol; the Speaker of the United States House of Representatives, the Minority Leader of the United States House of Representatives, the President Pro Tempore of the United States Senate, and the Rhode Island Congressional Delegation.

Hey Melissa!

Carol Bracy would like to request time with Senator Brandes during the week of October 21, for herself and Bill Murphy with Clear Ballot. They would like to discuss some possible legislation for elections reform and auditing.

Bill will be in town from Tampa that week. As we get closer, please let me know what might be available on the calendar.

Thanks so much!
Cindy

Good morning Melissa,

Following up with you to see if Senator Brandes has an opening in his schedule this week on Wednesday or Thursday to discuss possible steps for prison education via technology. It appears we are in a much better position than originally thought and do not require the support of Florida LamdaRail. We look forward to discussing this further.

All the best,

- Jim

Subject: Meeting w/Florida Housing 10/24
Attachment(s): "image001.jpg","Pinellas County LHAP.pdf"

Good Morning!

In anticipation of Trey and Stephanie's meeting with Senator Brandes this Thursday (10/24) I was asked to provide a copy of the Pinellas County Local Housing Assistance Plan (LHAP). The LHAP is a requirement of the State Housing Initiatives Partnership program (SHIP), which provides funds to local governments as an incentive to create partnerships that produce and preserve affordable homeownership and multifamily housing. The program was designed to serve very low, low and moderate income families.

Please see attached.

All LHAPs are posted on our website.

Let us know if you have any questions.

Thank you,
Jennifer

Ordinance: (If changed from the original creating ordinance) G. Interlocal Agreement	

AMERICAN OVERSIGHT

I. Program Details:

A. Name of the participating local government: Pinellas County
Is there an Interlocal Agreement: Yes _____ No X

B. Purpose of the program:
1. To meet the housing needs of the very low, low and moderate income households;
2. To expand production of and preserve affordable housing; and
3. To further the housing element of the local government comprehensive plan specific to affordable housing.

C. Fiscal years covered by the Plan: 2018-2019, 2019-2020, 2020-2021

D. Governance: The SHIP Program is established in accordance with Section 420.907-9079, Florida Statutes and Chapter 67-37, Florida Administrative Code. Cities and Counties must be in compliance with these applicable statutes, rules and any additional requirements as established through the Legislative process.

E. Local Housing Partnership: The SHIP Program encourages building active partnerships between government, lending institutions, builders and developers, not-for-profit and community based housing providers and service organizations, providers of professional services related to affordable housing, advocates for low-income persons, real estate professionals, persons or entities that can provide housing or support services and lead agencies of the local continuums of care.

F. Leveraging: The Plan is intended to increase the availability of affordable residential units by combining local resources and cost saving measures into a local housing partnership and using public and private funds to reduce the cost of housing. SHIP funds may be leveraged with or used to supplement other Florida Housing Finance Corporation programs and to provide local match to obtain federal housing grants or programs.

G. Public Input: Public input was solicited through face-to-face meetings with housing providers,

AMERICAN OVERSIGHT

social service providers and local lenders and neighborhood associations. Public input was solicited through the local newspaper in the advertising of the Local Housing Assistance Plan and the Notice of Funding Availability.

H. Advertising and Outreach: SHIP funding availability shall be advertised in a newspaper of general circulation and periodicals serving ethnic and diverse neighborhoods, at least 30 days before the beginning of the application period. If no funding is available due to a waiting list, no notice of funding availability is required.

I. Waiting List/Priorities: A waiting list will be established when there are eligible applicants for strategies that no longer have funding available. Those households on the waiting list will be notified of their status. Applicants will be maintained in an order that is consistent with the time applications were submitted as well as any established funding priorities as described in this plan.

The following priorities for funding described/listed here apply to all strategies unless otherwise stated in the strategy:

Should funding not be available, the County will establish a waiting list. The ranking priority will be:

- Special Needs Households
  Extremely Low
  Very Low
  Low
  Moderate
- Essential Services Personnel
  Extremely Low
  Very Low
  Low
  Moderate

AMERICAN OVERSIGHT

- After Special Needs and Essential Personnel, the following:
  Extremely Low
  Very Low
  Low
  Moderate

J. Discrimination: In accordance with the provisions of ss.760.20-760.37, it is unlawful to discriminate on the basis of race, color, religion, sex, national origin, age, handicap, or marital status in the award application process for eligible housing.

K. Support Services and Counseling: Support services are available from various sources. Available support services may include but are not limited to Homeownership Counseling (Pre and Post), Credit Counseling, Tenant Counseling, Foreclosure Counseling and Budgeting Counseling.

L. Purchase Price Limits: The sales price or value of new or existing eligible housing may not exceed 90% of the average area purchase price in the statistical area in which the eligible housing is located. Such average area purchase price may be that calculated for any 12-month period beginning not earlier than the fourth calendar year prior to the year in which the award occurs. The sales price of new and existing units, which can be lower but may not exceed 90% of the median area purchase price established by the U.S. Treasury Department or as described above.

The methodology used is:

__X__ U.S. Treasury Department

_____ Local HFA Numbers

M. Income Limits, Rent Limits and Affordability: The Income and Rent Limits used in the SHIP Program are updated annually by the Department of Housing and Urban Development and posted at www.floridahousing.org.

AMERICAN OVERSIGHT

"Affordable" means that monthly rents or mortgage payments including taxes and insurance do not exceed 30 percent of that amount which represents the percentage of the median annual gross income for the households as indicated in Sections 420.9071, F.S. However, it is not the intent to limit an individual household's ability to devote more than 30% of its income for housing, and housing for which a household devotes more than 30% of its income shall be deemed Affordable if the first institutional mortgage lender is satisfied that the household can afford mortgage payments in excess of the 30% benchmark and in the case of rental housing does not exceed those rental limits adjusted for bedroom size.

N. Welfare Transition Program: Should an eligible sponsor be used, a qualification system and selection criteria for applications for Awards to eligible sponsors shall be developed, which includes a description that demonstrates how eligible sponsors that employ personnel from the Welfare Transition Program will be given preference in the selection process.

O. Monitoring and First Right of Refusal: In the case of rental housing, the staff and any entity that has administrative authority for implementing the local housing assistance plan assisting rental developments shall annually monitor and determine tenant eligibility or, to the extent another governmental entity provides periodic monitoring and determination, a municipality, county or local housing financing authority may rely on such monitoring and determination of tenant eligibility. However, any loan or grant in the original amount of $10,000 or less shall not be subject to these annual monitoring and determination of tenant eligibility requirements. Tenant eligibility will be monitored annually for no less than 15 years or the term of assistance whichever is longer unless as specified above. Eligible sponsors that offer rental housing for sale before 15 years or that have remaining mortgages funded under this program must give a first right of refusal to eligible nonprofit organizations for purchase at the current market value for continued occupancy by eligible persons.

P. Administrative Budget: A line-item budget of proposed Administrative Expenditures is attached as Exhibit A.

AMERICAN OVERSIGHT

Pinellas County finds that the moneys deposited in the local housing assistance trust fund shall be used to administer and implement the local housing assistance plan.

Section 420.9075 Florida Statute and Chapter 67-37, Florida Administrative Code, states: *"A county or an eligible municipality may not exceed the 5 percent limitation on administrative costs, unless its governing body finds, by resolution, that 5 percent of the local housing distribution plus 5 percent of program income is insufficient to adequately pay the necessary costs of administering the local housing assistance plan."*

Section 420.9075 Florida Statute and Chapter 67-37, Florida Administrative Code, further states: *"The cost of administering the program may not exceed 10 percent of the local housing distribution plus 5 percent of program income deposited into the trust fund, except that small counties, as defined in s. 120.52(19), and eligible municipalities receiving a local housing distribution of up to $350,000 may use up to 10 percent of program income for administrative costs." The applicable local jurisdiction has adopted the above findings in the resolution attached as Exhibit E.*

Pinellas County finds that five percent (5%) of the estimated local distribution plus five percent (5%) of program income is insufficient to adequately pay the necessary costs of administering the local housing assistance plan and authorizes expenditures not to exceed ten percent (10%) of distributed funds, to be supplemented by expenditures not to exceed five percent (5%)of program income.

Q. Program Administration: Administration of the local housing assistance plan will be wholly performed and maintained by the County.

R. Project Delivery Costs: In addition to the administrative costs listed above, the County will charge a reasonable project delivery cost to cover inspections, and work write-ups for rehabilitation projects. The County may contract for these services. The fee will not exceed 5% of the contracted SHIP award and will be included in the Loan.

S. Essential Service Personnel Definition: **Essential Service Personnel** means active duty/reserve military personnel; teachers and educators; employees of school districts, community colleges, or universities; police and fire personnel including police, fire, emergency medical service and 9-1-1

AMERICAN OVERSIGHT

dispatchers; health care personnel and employees in health care related fields including employees of hospitals, assisted living facilities, medical providers and pharmacies; and skilled building trades personnel.

T. Describe efforts to incorporate Green Building and Energy Saving products and processes: Pinellas County housing rehabilitation and new construction standards include design features that include green building features, storm resistant construction and other elements that reduce the long term costs relating to maintenance, utilities, and insurance while enhancing marketability and having a lower impact on the environment. Features such as Energy Star appliances, windows, shingles, and HVAC systems reduce energy use and lower monthly housing costs. Structural enhancements such as roofing, tie downs and impact resistant windows lower homeowner insurance costs.

Pinellas County design criteria include, but are not limited to the following:

- Structural components shall be of sound condition. This shall include strengthening a structure to withstand adverse environmental conditions. Any structural defects shall be repaired or replaced;
- Upgrade insulation where feasible;
- Provide caulking and weather stripping of windows and doors;
- Replace windows that are not substantially weatherproofed with windows containing impact glass;
- New plumbing fixtures shall be low flow;
- Energy Star rated appliances;
- Low VOC paints and coatings;
- Replacement of HVAC systems shall be a minimum of 14 SEER.

U. Describe efforts to meet the 20% Special Needs set-aside: For each annual allocation with a requirement to serve persons with special needs, the County will meet the requirements through the following housing program, further defined in the Homeowner and Rental Housing Strategies:

- Purchase Assistance Without Rehab
- Owner Occupied Rehabilitation
- Acquisition/Rehabilitation/New Construction

AMERICAN OVERSIGHT

- Disaster Mitigation
- Rental Development
- Rental Assistance

V. Describe efforts to reduce homelessness: The County will coordinate with agencies that serve the homeless population. The County has implemented the rapid re-housing and prevention assistance program with Emergency Solutions Grant funding to assist individuals and families with rental assistance. The County will also use SHIP funds to create/rehabilitate housing units to provide housing for chronically homeless individuals with special needs.

AMERICAN OVERSIGHT

Section II. LHAP Strategies:

A. Purchase Assistance	*Code 1, 2*

a. Summary of Strategy: SHIP funds will be awarded, based on need after qualifying for the first mortgage. Funds will be provided for down payment and closing costs to income eligible households to assist with purchasing a new or existing home. A newly constructed home must have received a certificate of occupancy within the previous 12 months.

b. Fiscal Years Covered: 2018-2019, 2019-2020, 2020-2021

c. Income Categories to be served: Extremely Low, Very Low, Low, and Moderate

d. Maximum award:

Extremely Low:	$20,000
Very Low:	$20,000
Low:	$20,000
Moderate:	$10,000

e. Terms:

1. Repayment loan/deferred loan/grant: Funds will be awarded as a temporarily deferred loan. The funds will be secured with a recorded mortgage and promissory note.
2. Interest Rate: 0%
3. Years in loan term: 20 Years
4. Forgiveness: N/A
5. Repayment: Repayment is temporarily deferred for five (5) years with repayment beginning in year six (6). Repayment of loan will be amortized over 15 years.
6. Default: The loan will be determined to be in default if any of the following occurs: sale, transfer, or conveyance of property; conversion to a rental property; loss of homestead exemption status; or failure to occupy the home as their primary residence. If any of these occur, the outstanding balance will be due and payable.

   In cases where the qualifying homeowner(s) die(s) during the loan term, the loan may be assumed by a SHIP eligible heir who will occupy the home as a

AMERICAN OVERSIGHT

primary residence. If the legal heir is not SHIP eligible or chooses not to occupy the home, the outstanding balance of the loan will be due and payable. If the home is foreclosed on by a superior mortgage holder, the county will make an effort to recapture funds through the legal process if it is determined that adequate funds may be available to justify pursuing a recapture.

f. Recipient Selection Criteria: Applicants will be prioritized for assistance based on a first-qualified, first-served basis with the priorities for Special Needs, Essential Services Personnel and income groups if a waiting list has been established.

g. Sponsor/Developer Selection Criteria: N/A

h. Additional Information: Applicants must secure a Fixed Rate, first mortgage from an approved lender. Applicants are required to complete a homebuyer counseling course from a HUD or County approved counseling agency. The maximum award includes associated soft costs.

B. Owner Occupied Rehabilitation	***Code 3***

a. Summary of Strategy: SHIP funds will be awarded to income eligible households to make home improvement repairs to electrical, plumbing, roofing, windows and other structural items and for needed accessibility modifications. Exterior enhancing improvements may be included if funds are available after completing all required repairs listed above.

b. Fiscal Years Covered: 2018-2019, 2019-2020, 2020-2021

c. Income Categories to be served: Extremely Low, Very Low, Low

d. Maximum award: $50,000

e. Terms:

1. Repayment loan/deferred loan/grant: Funds will be awarded as deferred and repayment loans based on income, award amount and loan underwriting guidelines which include debt to income ratios, loan to value ratio and credit history.

   i. Borrowers with incomes less than 50% Area Median Income will be awarded deferred loans up to an amount of $25,000. If the rehabilitation exceeds the $25,000 and the borrower has a debt ratio less than 50%, they

AMERICAN OVERSIGHT

may qualify for a partial repayment loan in addition to the deferred loan. If the borrower does not qualify for a partial repayment, the scope of work must be reduced to the $25,000.

ii. Low income eligible borrowers that exceed the 50% area median income, will be awarded an amortizing loan for an amount that doesn't exceed the maximum award amount **and** does not have a debt ratio that exceeds 50%.

2. Interest Rate: 0%
3. Years in loan term: 20 Years
4. Forgiveness: Deferred loans provided to very low income households will be reduced on a prorated basis of 5% annually until the end of the 20 year period.
5. Repayment: Amortizing loan payments will begin 120 days from the loan closing and amortized over a 20-year period.
6. Default: The loan will be determined to be in default if any of the following occurs: sale, transfer, or conveyance of property; conversion to a rental property; loss of homestead exemption status; or failure to occupy the home as their primary residence. If any of these occur, the outstanding balance will be due and payable.

   In cases where the qualifying homeowner(s) die(s) during the loan term, the loan may be assumed by a SHIP eligible heir who will occupy the home as a primary residence. If the legal heir is not SHIP eligible or chooses not to occupy the home, the outstanding balance of the loan will be due and payable. If the home is foreclosed on by a superior mortgage holder, the county will make an effort to recapture funds through the legal process if it is determined that adequate funds may be available to justify pursuing a recapture.

f. Recipient Selection Criteria: Applicants will be prioritized for assistance based on a first-qualified, first-served basis with the priorities for Special Needs, Essential Services Personnel and income groups if a waiting list has been established.

g. Sponsor/Developer Selection Criteria: N/A

h. Additional Information: The maximum award includes associated soft costs.

AMERICAN OVERSIGHT

C. Acquisition/Rehabilitation/New Construction	*Code 9, 10*

a. Summary of Strategy: Funds will be awarded to developers of affordable homeownership housing for construction financing. Eligible costs include property acquisition, demolition, site improvements, rehabilitation and new construction. Houses rehabilitated or constructed will be sold to SHIP income eligible buyers. The strategy promotes infill housing development, green building and mixed income neighborhoods. Funds will be awarded for acquisition, demolition, construction, and rehabilitation for resale to income eligible households.

b. Fiscal Years Covered: 2018-2019, 2019-2020, 2020-2021

c. Income Categories to be served: Very Low, Low, and Moderate

d. Maximum award: $250,000

e. Terms: Developer

1. Repayment loan/deferred loan/grant: Funds will be awarded as a repayment loan secured by a recorded mortgage and note.
2. Interest Rate: 0%
3. Years in loan term: 2 Years
4. Forgiveness: Once the developer has successfully completed the construction, the subsidy provided to the development during construction will be passed through to the eligible homebuyer in the form of a subordinate mortgage. In the event that through no fault of the developer, the project suffers a reduction in market value, the County reserves the right to allow for a forgiveness equal to the difference between the project development cost and market value.
5. Repayment: All proceeds from the sale of the property are due and payable upon sale of the property.
6. Default: The loan will be in default if the Developer fails to meet the requirements outlined in the Land Use Restriction Agreement.

Terms: Recipient

1. Loan/deferred loan/grant: Funds will be awarded in an amount equal to the market value sales price reduction as a deferred loan secured by a recorded subordinate mortgage and note.

AMERICAN OVERSIGHT

2. Interest Rate: 0%
3. Term: 20 Years
4. Forgiveness: The loan amount will be reduced by 5% annually over 20-year affordability period. The loan amount is forgiven at the end of the term. If the property is sold prior to the 20 year affordability period, the repayment amount will be the outstanding balance remaining on the loan.
5. Default: The loan will be determined to be in default if any of the following occurs: sale, transfer, or conveyance of property; conversion to a rental property; loss of homestead exemption status; or failure to occupy the home as their primary residence.

   In cases where the qualifying homeowner(s) die(s) during the loan term, the loan may be assumed by a SHIP eligible heir who will occupy the home as a primary residence. If the legal heir is not SHIP eligible or chooses not to occupy the home, the outstanding balance of the loan will be due and payable. If the home is foreclosed on by a superior mortgage holder, the county will make an effort to recapture funds through the legal process if it is determined that adequate funds may be available to justify pursuing a recapture.

f. Recipient Selection Criteria: Assistance will be awarded on a first qualified, first served basis to an income eligible household.

g. Sponsor/Developer Selection Criteria: Affordable Housing Development applications will be funded on a first qualified, first eligible basis according to the established Affordable Housing Development guidelines and underwriting criteria.

h. Additional Information: The maximum award amount is on a per unit basis and is provided as construction financing.

D. Disaster Mitigation	***Code 5***

a. Summary of Strategy: Funds will be awarded to applicants in need of home repairs directly caused by a disaster that is declared by an Executive Order of the President or Governor. In addition to repair awarded funds may be used for additional mitigation items. Repairs will be prioritized as follows:

- Immediate threat to health and safety (sewage, windows, roofing, tree removal)

AMERICAN OVERSIGHT

in cases where the home is still habitable.

- Imminent residual damage to the home (such as damage caused by a leaking roof) in cases where the home is still habitable.
- Repairs to mitigate future damage (hurricane shutters, tie-downs) in cases where the home is still habitable.

b. Fiscal Years Covered: 2018-2019, 2019-2020, 2020-2021

c. Income Categories to be served: Extremely Low, Very Low, Low, Moderate

d. Maximum award: $15,000

e. Terms:

1. Repayment loan/deferred loan/grant: Funds will be awarded as a grant with no recapture terms.
2. Interest Rate: N/A
3. Years in loan term: N/A
4. Forgiveness: N/A
5. Repayment: N/A
6. Default: N/A

f. Recipient Selection Criteria: Applicants will be assisted on a first-qualified, first served basis.

g. Sponsor/Developer Selection Criteria: N/A

h. Additional Information: Documentation that the applicant has attempted to obtain all other resources first, such as insurance coverage, Federal Emergency Management Agency (FEMA) funds and any funding available through the Small Business Administration.

E. Rental Development	***Code 14, 21***

a. Summary of Strategy: Funds will be awarded to developers of affordable rental units through the Affordable Development Program. Funds may be used to assist projects with acquisition, rehabilitation and new construction. Eligible costs may include demolition and reconstruction of rental units. SHIP funding is not intended to be the only source of financing, but the financing of last resort. All financing for the project must be secured prior to award of SHIP funds.

AMERICAN OVERSIGHT

b. Fiscal Years Covered: 2018-2019, 2019-2020, 2020-2021

c. Income Categories to be served: Extremely Low, Very Low, Low, and Moderate

d. Maximum award: $250,000 per unit

e. Terms:

1. Repayment loan/deferred loan/grant: Funds will be awarded as a loan secured by a recorded subordinate mortgage and note. Payment will be deferred for three (3) years to provide for construction, lease-up and property stabilization and then amortized for the remaining loan term.
2. Interest Rate: 0-3%
3. Years in loan term: 30 Years
4. Forgiveness: Partial loan forgiveness may be provided at the end of the loan term for nonprofit affordable housing providers if it is documented that the development doesn't have sufficient cash flow.
5. Repayment: The loan is due and payable at the end of the term unless an extended loan term is negotiated to secure the affordable rental unit or if partial loan forgiveness is provided as described above.
6. Default: The loan will be considered in default and due and payable if there is a sale of the property, transfer of property, conversion to another use, failure to maintain compliance standards as required by the funding source.

f. Recipient Selection Criteria: All households that occupy a SHIP assisted unit must be income eligible for the program as determined by Pinellas County staff or a third party entity hired by the developer to annually monitor for compliance.

g. Sponsor/Developer Selection Criteria: Affordable Housing Development applications will be funded on a first qualified, first eligible basis according to the established Affordable Housing Development guidelines and underwriting criteria. Proposed projects are reviewed by staff to determine project viability and the developer's ability to repay a loan under the terms and conditions requested. When providing subordinate financing, the senior lender's underwriting will be used.

h. Additional Information: The interest rate of the developer loan is determined through the underwriting process that includes a cash flow analysis, with the debt to income ratios at 1.2.

AMERICAN OVERSIGHT

F. Rental Assistance	*Code 13, 23*

a. Summary of Strategy: Funds will be awarded to income eligible rental households to prevent eviction and becoming homeless. Eligible expenses include utility deposits, security deposits and assistance for utility payments and rent that is in arrears.

b. Fiscal Years Covered: 2018-2019, 2019-2020, 2020-2021

c. Income Categories to be served: Extremely Low, Very Low

d. Maximum award: $10,000

e. Terms:

1. Repayment loan/deferred loan/grant: Funds will be awarded as a grant.
2. Interest Rate: N/A
3. Years in loan term: N/A
4. Forgiveness: N/A
5. Repayment: N/A
6. Default: N/A

f. Recipient Selection Criteria: Applicants will be referred through the Coordinated Entry System established for the area. Applicants must be at imminent risk of homelessness. Assistance will be provided on a first qualified, first served basis.

g. Sponsor/Developer Selection Criteria: N/A

h. Additional Information: Applicants can receive up to $10,000, including deposits, and Six (6) months of assistance, including rent arrears. The household is required to have a lease and the unit must meet Housing Quality Standards.

III. LHAP Incentive Strategies

In addition to the **required Incentive Strategy A and Strategy B**, include all adopted incentives with the policies and procedures used for implementation as provided in Section 420.9076, F.S.:

A. Name of the Strategy: **Expedited Permitting**

Permits as defined in s. 163.3177 (6) (f) (3) for affordable housing projects are expedited to a greater degree than other projects.

AMERICAN OVERSIGHT

Provide a description of the procedures used to implement this strategy:

Builders and developers must submit an Affordable Housing Development (AHD) application to the Pinellas County Planning Department. County staff reviews AHD applications and determines AHD certification eligibility. If a project is certified as an AHD, the developer is provided with a certification to be submitted with the permit and review application. Applications with the certification are given priority review with a target to complete the review process in two weeks. In addition to expedited permit processing, AHDs are entitled to permit and review fee waivers.

B. Name of the Strategy: **Ongoing Review Process**

An ongoing process for review of local policies, ordinances, regulations and plan provisions that increase the cost of housing prior to their adoption.

Provide a description of the procedures used to implement this strategy:

Coordination between Planning staff and Building Development Review Services occurs when changes in the code are proposed and information provided to the committee for input and recommendations. Planning staff attends the AHAC meetings as requested to provide an overview of major changes being considered.

C. Other Incentive Strategies Adopted:

- Allowance for Increased Density Levels
- Reduction of Parking Requirements
- Reduction of Setback Requirements
- Allowance of Zero-Lot-Line Configurations
- Street Design (Modification of Street Requirements)
- Donation of Publicly Owned Land
- Identifying Qualified Buyers or Renters
- Accessory Housing Units – Guest Cottages
- Affordable Housing Development (Mixed-Use Developments)

AMERICAN OVERSIGHT

IV. EXHIBITS:

A. Administrative Budget for each fiscal year covered in the Plan.

B. Timeline for Estimated Encumbrance and Expenditure.

C. Housing Delivery Goals Chart (HDGC) for each fiscal year covered in the Plan.

D. Signed LHAP Certification.

E. Signed, dated, witnessed or attested adopting resolution.

F. Ordinance: (If changed from the original creating ordinance).

G. Interlocal Agreement.

(local government)

Fiscal Year	Encumbered	Expended	1st Year AR	2nd Year AR	Closeout AR
2018-2019	6/30/2020	6/30/2021	9/15/2019	9/15/2020	9/15/2021
2019-2020	6/30/2021	6/30/2022	9/15/2020	9/15/2021	9/15/2022
2020-2021	6/30/2022	6/30/2023	9/15/2021	9/15/2022	9/15/2023

If funds allocated for these fiscal years is not anticipated to meet any of the deadlines in the table above, Florida Housing Finance Corporation will be notified according to the following chart:

Fiscal Year	Funds Not Encumbered	Funds Not Expended	1st Year AR Not Submitted	2nd Year AR Not Submitted	Closeout AR Not Submitted
2018-2019	3/30/2020	3/30/2021	6/15/2019	6/15/2020	6/15/2021
2019-2020	3/30/2021	3/30/2022	6/15/2020	6/15/2021	6/15/2022
2020-2021	3/30/2022	3/30/2023	6/15/2021	6/15/2022	6/15/2023

Requests for Expenditure Extensions (close-out year ONLY) must be received by FHFC by June 15 of the year in which funds are required to be expended. The extension request shall be emailed to robert.dearduff@floridahousing.org and terry.auringer@floridahousing.org and include:

1. A statement that "(city/county) requests an extension to the expenditure deadline for fiscal year _____.
2. The amount of funds that is not expended.
3. The amount of funds that is not encumbered or has been recaptured.
4. A detailed plan of how/when the money will be expended.

Note: an extension to the expenditure deadline (June 30) does not relieve the requirement to submit (September 15) the annual report online detailing all funds that have been expended. Please email terry.auringer@floridahousing.org when you are ready to "submit" the AR.

Other Key Deadlines:

AHAC reports are due for each local government the same year as the local government's LHAP being submitted. Local governments receiving the minimum or less allocation are not required to report.

AMERICAN OVERSIGHT

Exhibit D
67-37.005(1), F.A.C.
[eff. date]

CERTIFICATION TO
FLORIDA HOUSING FINANCE CORPORATION

Local Government or Interlocal Entity: Pinellas County

Certifies that:

(1) The availability of SHIP funds will be advertised pursuant to program requirements in 420.907-420.9079, Florida Statutes.

(2) All SHIP funds will be expended in a manner which will insure that there will be no discrimination on the basis of race, color, national origin, sex, handicap, familial status, or religion.

(3) A process to determine eligibility and for selection of recipients for funds has been developed.

(4) Recipients of funds will be required to contractually commit to program guidelines and loan terms.

(5) Florida Housing will be notified promptly if the local government /interlocal entity will be unable to comply with any provision of the local housing assistance plan (LHAP).

(6) The LHAP provides a plan for the encumbrance of funds within twelve months of the end of the State fiscal year in which they are received and a plan for the expenditure of SHIP funds including allocation, program income and recaptured funds within 24 months following the end of the State fiscal year in which they are received.

(7) The LHAP conforms to the Local Government Comprehensive Plan, or that an amendment to the Local Government Comprehensive Plan will be initiated at the next available opportunity to insure conformance with the LHAP.

(8) Amendments to the approved LHAP shall be provided to the Florida Housing for review and/or approval within 21 days after adoption.

(9) The trust fund exists with a qualified depository for all SHIP funds as well as program income or recaptured funds.

(10) Amounts on deposit in the local housing assistance trust fund shall be invested as permitted by law.

(11) The local housing assistance trust fund shall be separately stated as a special revenue fund in the local governments audited financial statements (CAFR). An electronic copy of the CAFR or a hyperlink to the document shall be provided to Florida Housing by June 30 of the applicable year.

AMERICAN OVERSIGHT

(12) Evidence of compliance with the Florida Single Audit Act, as referenced in Section 215.97, F.S. shall be provided to Florida Housing by June 30 of the applicable year.

(13) SHIP funds will not be pledged for debt service on bonds.

(14) Developers receiving assistance from both SHIP and the Low Income Housing Tax Credit (LIHTC) Program shall comply with the income, affordability and other LIHTC requirements, similarly, any units receiving assistance from other federal programs shall comply with all Federal and SHIP program requirements.

(15) Loans shall be provided for periods not exceeding 30 years, except for deferred payment loans or loans that extend beyond 30 years which continue to serve eligible persons.

(16) Rental Units constructed or rehabilitated with SHIP funds shall be monitored for compliance with tenant income requirements and affordability requirements or as required in Section 420.9075 (3)(e). To the extent another governmental entity provides periodic monitoring and determination, a municipality, county or local housing financing authority may rely on such monitoring and determination of tenant eligibility.

(17) The LHAP meets the requirements of Section 420.907-9079 FS, and Rule Chapter 67-37 FAC.

(18) The provisions of Chapter 83-220, Laws of Florida have not been implemented (except for Miami-Dade County).

BOARD OF COUNTY COMMISSIONERS SEAL PINELLAS COUNTY, FLORIDA

AMERICAN OVERSIGHT

RESOLUTION NO. 18-__22__

A RESOLUTION OF THE BOARD OF COUNTY COMMISSIONERS OF PINELLAS COUNTY, FLORIDA APPROVING THE 2018-2019, 2019-2020, 2020-2021 LOCAL HOUSING ASSISTANCE PLAN; AUTHORIZATION FOR THE CHAIRMAN, OR DESIGNEE, TO EXECUTE AND THE CLERK TO ATTEST PLAN CERTIFICATIONS AND DOCUMENTS; AUTHORIZATION FOR THE SUBMISSION OF THE LOCAL HOUSING ASSISTANCE PLAN TO THE FLORIDA HOUSING FINANCE CORPORATION FOR REVIEW AND APPROVAL; AUTHORIZATION FOR THE COUNTY ADMINISTRATOR TO IMPLEMENT THE HOUSING STRATEGIES AND PROGRAMS AS DEFINED IN THE PLAN; AUTHORIZATION FOR THE COUNTY ADMINISTRATOR, OR DESIGNEE, TO EXECUTE AGREEMENTS WITH VENDORS, SUBRECIPIENTS, SPONSORS, HOUSING DEVELOPERS AND OTHER ENTITIES TO IMPLEMENT HOUSING PROGRAMS AND STRATEGIES; AUTHORIZATION FOR THE COUNTY ADMINISTRATOR, OR DESIGNEE, TO EXECUTE HOUSING PROGRAM SECURITY INSTRUMENTS, AGENCY AGREEMENTS, LAND USE RESTRICTION AGREEMENTS, AND AMENDMENTS; AUTHORIZATION FOR THE PLANNING DEPARTMENT DIRECTOR, OR DESIGNEE, TO SIGN AND SUBMIT FORMS, REPORTS, AND OTHER ADMINISTRATIVE DOCUMENTS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the State of Florida enacted the William E. Sadowski Affordable Housing Act, Chapter 92-317 of Florida Sessions Laws, allocating a portion of documentary stamp taxes on deeds to local governments for the development and maintenance of affordable housing; and

WHEREAS, the State Housing Initiatives Partnership (SHIP) Act, ss. 420.907-420.9079, Florida Statutes (1992), and Rule Chapter 67-37, Florida Administrative Code, requires local governments to develop a one- to three-year Local Housing Assistance Plan outlining how funds will be used; and

WHEREAS, the SHIP Act requires local governments to establish the maximum SHIP funds allowable for each strategy; and

WHEREAS, the SHIP Act further requires local governments to establish an average area purchase price for new and existing housing benefiting from awards made pursuant to the Act; The methodology and purchase prices used are defined in the attached Local Housing Assistance Plan; and

WHEREAS, as required by section 420.9075, F.S. it is found that 5 percent of the local housing distribution plus 5 percent of program income is insufficient to adequately pay the necessary costs of administering the Local Housing Assistance Plan. The cost of administering the program may not

AMERICAN OVERSIGHT

exceed 10 percent of the local housing distribution plus 5% of program income deposited into the trust fund; and

WHEREAS, Pinellas County has prepared a three-year Local Housing Assistance Plan for submission to the Florida Housing Finance Corporation; and

WHEREAS, the Board of County Commissioners finds that it is in the best interest of the public for Pinellas County to submit the Local Housing Assistance Plan for review and approval so as to qualify for said SHIP funds.

NOW, THEREFORE, BE IT RESOLVED by the Board of County Commissioners of Pinellas County, Florida:

SECTION 1. The Local Housing Assistance Plan, as attached and incorporated hereto for submission to the Florida Housing Finance Corporation as required by ss. 420.907-420-9079, Florida Statutes, for fiscal years 2018-2019, 2019-2020, and 2020-2021 is approved.

SECTION 2. The Chairman, or designee, is designated and authorized to execute and the Clerk to attest any documents and certifications required by the Florida Housing Finance Corporation as related to the Local Housing Assistance Plan, and to do all things necessary and proper to carry out the term and conditions of said program.

SECTION 3. The County Administrator is authorized to implement the housing strategies and programs as defined in the plan.

SECTION 4. The County Administrator, or designee, is authorized to execute agreements with vendors, subrecipients, sponsors, housing developers and other entities to implement housing programs and strategies.

SECTION 5. The County Administrator, or designee, is authorized to execute housing program security instruments, agency agreements, land use restriction agreements, and amendments thereto, pursuant to the Local Housing Assistance Plan.

SECTION 6. The Planning Department Director, or designee, is authorized to sign and submit forms, reports, and other administrative documents related to the administration and operation of the Local Housing Assistance Plan. The Planning Department Director or designee shall also have authority to authorize actions and execute documentation necessary in administering mortgage and mortgage notes associated with any housing program referenced herein, including but not limited to authorizing and executing mortgage accelerations, reinstatements, and

AMERICAN OVERSIGHT

assignments.

SECTION 7. EFFECTIVE DATE. This resolution shall become effective upon adoption as provided by law.

In a regular meeting duly assembled on the 24th day of April, 2018, Commissioner Gerard offered the foregoing Resolution and hereby moved its adoption, which was seconded by Commissioner Justice and upon roll call the vote was:

Ayes: Welch, Seel, Eggers, Gerard, Justice, and Long.

Nays: None.

Absent and Not Voting: Morroni.

Attachment(s): "FLORIDA'S-FAILURE-TO-REGULATE-FINAL.pdf","FPL Draft Legislation.pdf","FLORIDA'S-FAILURE-TO-REGULATE-FINAL.pdf","FPL Draft Legislation.pdf"

Dear Senator Brandes,

I am contacting you on behalf of the MEP Coalition, a state wide coalition of over 23,000 mechanical electrical and plumbing contractors who are very concerned about the impacts of regulated utility monopolies entering into unregulated businesses.

This type of subsidization leveraging monopoly status and ratepayer assets is fundamentally unfair and undermines consumer and anti-trust protections. Florida Power & Light (FPL) is leading the way with their entry into the home services market which includes air conditioning, heating, plumbing and electrical services. If FPL is allowed to circumvent oversight and legislative and regulatory intent with ratepayer subsidized expansions, the rest of the state's utilities are likely to follow in their footsteps.

There is already significant consumer confusion as highlighted by this investigative news report.

Moreover, we have concerns about the company using public resources as a ratepayer funded utility for private gain. Across the country, other states have imposed and enforced rules to protect ratepayers and prohibit or regulate these activities under "affiliate transaction rules."

Attached you will find the Draft Legislation and a copy of Florida's Failure to Regulate which extensively documents how other states have already taken steps to prohibit or restrict utility expansions to protect ratepayers, local businesses, jobs and consumers.

We would appreciate an opportunity to meet with you to explain the issue and its impacts on your constituents and businesses across the state. Members of our coalition will be in Tallahassee November 5th and 6th. Please let us know a convenient time and we will arrange for them to give you a quick briefing on the issue and our efforts to address it.

Thank you!

FLORIDA'S FAILURE TO REGULATE

Despite massive political spending and lobbying, most states have found a way to enact and enforce regulations to protect citizens from monopoly utility expansions.

Florida has yet to do so…

EXECUTIVE BRIEF

Florida's oversight of utility monopolies has failed.

The Florida Public Service Commission, the State Legislature, the Attorney General and all those charged with the protection of consumers have failed to act to provide reasonable regulatory oversight and restrictions on the expansion of utility monopolies. This leaves consumers, rate payers, small businesses and local communities at risk while utilities leverage their monopoly status and use ratepayer funds to subsidize expansion into new unregulated industries.

This has already been prohibited or regulated across much of the United States.
Florida has fallen behind most other states and has allowed powerful utility lobbyists and political donations to inhibit reasonable and responsible governance.

All businesses are driven by growth. Building shareholder value, increasing market share and growing profitability are the benchmarks for success especially among large publicly traded companies.

Utility companies, because they maintain vital public infrastructure, are granted special rights and privileges including monopoly-like status – the ability to operate as a sole supplier free from competition. All commercial and residential customers must use the one utility monopoly that services their area as there is essentially no reasonable alternative. In return for this special status and exemption from a myriad of laws designed to encourage competition, utility monopolies are regulated with special rules and laws designed to protect the rights of ratepayers and consumers who cannot choose another supplier if they do not think the company is providing good service, dealing with them fairly or pricing their services reasonably.

The job of protecting the ratepayer, consumer and citizen from the corporation's drive to grow and expand their monopoly status into greater market power and profitability falls to regulators charged to act in the public interest. Public Service Commissions, Attorneys General and state legislators have direct oversight responsibility to keep utility monopolies in check and protect citizens.

Using utility ratepayer funds to subsidize new businesses.
The expansion of regulated utility monopolies using ratepayer funds to enter unregulated businesses are not new. Over the past twenty years, many utilities have attempted to leverage their monopoly power, access to customer data and ratepayer funded infrastructure to subsidize easy entry into electrical, heating, air conditioning, plumbing and other industries.

States across the U.S. have enacted laws to regulate so-called **Utility Affiliate Transactions,** preventing regulated utilities from using ratepayer funded resources to subsidize nonregulated subsidiaries. Florida has yet to implement even the most basic regulatory protections.

Massive political spending, lobbying, and donations as well as contributions specifically targeted at those with the power to nominate members to the Florida Public Service Commission, the state regulatory authority, have all contributed to the undermining of regulatory oversight and reasonable safeguards against the misuse of ratepayer funds.

Undermining Regulatory Oversight

Major campaign donations. Florida's four largest energy companies contributed more than $43 million to state level candidates, political parties and political committees in the 2014 and 2016 election cycles.

- **Political spending increasing.** The energy companies spent more than twice as much in the most recent four-year period than in the previous ten-year period.
- **Lobby expenditures trending upward.** Utilities continue to have an outsized lobbying presence in the Florida Capitol, employing more than one lobbyist for every two legislators.
- **Trade associations used to lobby.** While the energy companies are not supposed to use customer dollars to lobby, regulators allow them to bypass the ban by paying dues to trade groups and associations that lobby.

Utility	Average Number of Contract Lobbyists Per Year 2014 – 2017	Total Paid 2014 - 2017
Duke Energy	25	$750,000
Florida Power & Light	32	1,760,000
Gulf Power Company	13	$940,000
TECO/Tampa Electric	24	$2,098,000
Totals	94	$5,548,000

(SOURCE: Power Play Redux: Political Influence of Florida's Top Energy Corporations: http://www.integrityflorida.org/wp-content/uploads/2018/05/Power-Play-Redux-final.pdf)

Our review of 13 states chosen randomly illustrates the type of restrictions used across the country to prohibit misuse of ratepayer funds and prevent subsidization. These regulations address the sharing of customer data, joint marketing, sharing of personnel and corporate infrastructure and much more in order to shield ratepayers, local businesses and entire industries from insurmountable and unfair competition.

Federal Trade Commission and Consumer Protections

The Federal Trade Commission weighed in on this issue and offers guidelines for utility/affiliate codes of conduct in their July 2000 report, "Competition and Consumer Protection Perspectives on Electric Power Regulatory Reform."

> ***"The chief concerns in the context of affiliate transactions in retail competition typically include discrimination as well as cross-subsidization or cost-shifting that favors the unregulated affiliate relative to its competitors. Consumers are harmed because discrimination and cross-subsidization may displace more efficient and innovative competitors and shift production to less efficient suppliers… Most states have rules or codes of conduct against cost shifts and cross-subsidization already in place because of the traditional concern about burdening ratepayers with unrelated costs."***

Moreover, the FTC dedicates an entire sub-section to logo usage, where they identify concerns of using a utility's logo resulting in consumer deception and cross-subsidization.

> ***"Harm to competition may occur because the unregulated affiliate's access to the logo of its regulated parent gives it a cost advantage through potential cross-subsidization that otherwise equally efficient competitors cannot match. The anticompetitive results may include (1) higher-than-necessary average operating (i.e., non-logo-related) costs for the industry and higher prices for consumers due to the continued operation of the affiliate, which can survive with higher-than-necessary costs due to the cross-subsidization; (2) greater market concentration and less competition than would occur absent the cross-subsidization;(78) and (3) discouragement of potential entry that likely would have occurred absent the cross-subsidization, including entry involving innovative products and production processes."***

There is no need to reinvent the wheel as most states have already successfully acted to reign in ratepayer subsidized utility expansions. Aggressive lobbying and political spending must not prevent legislators and regulators from doing their jobs and acting in the public trust. Florida must finally take action and enact real legislative and regulatory controls, as other states have done, to protect consumers, ratepayers and small businesses.

Other states have found a way through the wall of corporate lobbying and political spending to protect citizens. Failing to do so in Florida will result in irreparable harm and will be a distressing demonstration of a complete breakdown and abdication of legislative and regulatory oversight bought and paid for with utility ratepayer funds.

FLORIDA DRAFT LEGISLATION

Currently seeking Florida legislators willing to sponsor this bill or a version of it to provide Florida with consumer protections currently written into law in states across the country.

Chapter 366, Florida Statutes, Public Utilities

Section 366.____ is created to read:

Section 366.____ Public utility or electric utility prohibited from engaging in construction contracting services, exceptions, penalty.—

(1) A public utility or electric utility, as defined in s. 366.02, may not engage in construction contracting services, as defined in ch. 489, unless otherwise provided in subsection (7).

(2) No affiliate or utility contractor may use any facility, electronic processing or communication mechanism, public relations or marketing product or service, vehicle, service tool, instrument, employee, or any other public utility or electric utility asset, the cost of which is recoverable in the regulated rate for utility service, to engage in construction contracting services unless the public utility or electric utility is compensated for the use of such asset at cost to the public utility or electric utility.

(3) No affiliate or utility contractor may use or combine any bookkeeping, billing, mailing, financing, legal services, or insurance product or service procured or owned by a public utility or electric utility for any activity related to construction contracting.

(4) A public utility or electric utility may not provide any affiliate or utility contractor with bookkeeping, billing, mailing, financing, legal services, or insurance product or service related to construction contracting, including service warranty or home warranty products or services under ch. 634 or construction liens under part I, ch. 713.

(5) A public utility or electric utility may not use or allow any affiliate or utility contractor to use the name, trade or service mark, logo, or slogan of such public utility or electric utility to engage in construction contracting services.

(6) A public utility or electric utility may not engage in or assist any affiliate or utility contractor in engaging in construction contracting services in a manner which subsidizes the activities of such public utility, electric utility, affiliate or utility contractor to the extent of changing the rates or charges for the public utility's or electric utility's regulated services above or below the rates or charges that would be in effect if the public utility or electric utility were not engaged in or assisting any affiliate or utility contractor in engaging in such activities.

(7) Any affiliate or utility contractor engaged in construction contracting services shall maintain accounts, bookkeeping and records separate and distinct from the public utility or electric utility.

(8) The provisions of this section shall apply to any affiliate or utility contractor engaged in construction contracting services that is owned, controlled or under common control with a public utility or electric utility providing regulated utility service in this state or any other state.

(9) The provisions of this section shall not be construed to prohibit a public utility or electric utility from providing emergency service, providing any service required by law, providing any service exempt from construction contracting licensure under s. 489.103(5), or providing a program pursuant to an existing tariff, rule or order of the Commission.

AMERICAN OVERSIGHT

FEDERAL ENERGY REGULATORY COMMISSION

Rule: Cross-Subsidization Restrictions on Affiliate Transactions, [Docket No. RM07-15-000; Order No. 707][1]

SUMMARY: In this Final Rule, pursuant to sections 205 and 206 of the Federal Power Act, the Federal Energy Regulatory Commission (Commission) is amending its regulations to codify restrictions on affiliate transactions between franchised public utilities that have captive customers or that own or provide transmission service over jurisdictional transmission facilities, and their market-regulated power sales affiliates or non-utility affiliates. These restrictions will supplement other restrictions the Commission has in place to protect captive customers of franchised public utilities or transmission customers of franchised public utilities that own or provide transmission service over jurisdictional transmission facilities from inappropriate cross-subsidization of affiliates.

Order No. 707 expands the applicability of recently-adopted affiliate transaction restrictions. FERC's restrictions are meant to prevent franchised public utilities (that is, utilities with franchised service obligations under state law) with captive customers from unfairly subsidizing their unregulated affiliates at the captive customers' expense. FERC traditionally has addressed this issue in the context of market-based rate sellers, and recently codified in its regulations a series of restrictions on transactions between franchised public utilities with captive customers and their affiliates that sell power at marketbased rates. Even more recently, in a 2007 order approving the acquisition of KeySpan by National Grid, FERC applied those conditions not only to the relationship between a franchised public utility with captive customers and its affiliates that sell power at market-based rates, but also to the relationship between the utility and all of its other affiliates, even those that do not engage in power sales.

Order No. 707 further broadens the scope of the affiliate transaction restrictions so that the rules adopted in the National Grid merger proceeding will apply to all FERC-jurisdictional franchised utilities that either (1) serve wholesale or retail customers under cost-based regulation, or (2) own or provide transmission service over FERC jurisdictional transmission facilities. However, FERC clarifies that if a franchised public utility has received a determination from FERC that it does not have captive customers, it may continue to rely on that determination. If a franchised public utility is subject to the affiliate restrictions under Order No. 707, it must comply with the following rules:

‡ FERC approval is required for any wholesale sale by the utility to an affiliate eligible to sell wholesale energy at market-based rates, or by such an affiliate to the utility.

‡ Sales of non-power goods and services to any affiliate must be at the higher of cost or market price.

‡ With the exception of purchases from "centralized service companies" (i.e., a service company providing legal, accounting, tax, human resources, and related services) purchases of non-power goods and services from any affiliate must be at a price no higher than the market price.

‡ Purchases by a franchised utility of non-power goods and services from a "centralized service company" must be at cost.[2]

FEDERAL TRADE COMMISSION

Competition and Consumer Protection Perspectives on Electric Power Regulatory Reform[3]

Limits on Transactions Between Regulated Utilities and Their Unregulated Affiliates

As discussed above, we have significant reservations about the effectiveness of relying exclusively on behavioral rules [to discourage discrimination in transactions between regulated utilities and their unregulated affiliates]. If the scale, scope, or vertical integration economies of affiliation are substantial and can be realized even in the presence of functional unbundling, [a state commission] may wish to strengthen its approach by requiring the affiliates to operate independently, on a bid-based, arm's-length basis. For example, [a state commission] may wish to require that the bulk of regulated utility purchases from unregulated affiliates be restricted to contracts won through an objective bidding process in which a third party evaluates the bids.

A critical element of workable bidding systems is the perceived and actual objectivity of the bid evaluation process. The system must be perceived as objective in order to attract bidders. Potential bidders, other than affiliates, may be unwilling to incur the costs of making a bid if the system is perceived as biased in favor of affiliates. The system must also be objective in fact in order to avoid raising costs for customers of the regulated utility. The use of third-party evaluations of the bids is one technique for achieving such objectivity.(70)

In addition, [a state commission] may wish to consider restrictions on asset transfers from the parent distribution utility to an affiliate. Some states are considering making such transfers subject to particular price bounds to assure that ratepayers do not unfairly subsidize the activities of the affiliate.(71) This proposal raises issues similar to determining the value of assets in assessing stranded costs. Just as some states, such as Massachusetts, have determined that the market is the best gauge of value to determine the value of generating assets in a stranded cost assessment,(72) [a state commission] may wish to use actual market values, rather than a band of prices, for asset transfers. The arm's-length bid process discussed above is an example of a method to establish actual market values.

Benefits and Costs of Allowing Unregulated Affiliates to Use the Parent, Regulated Distribution Firm's Logo

[A state commission] may wish to compare the benefits and costs of allowing affiliates of regulated distribution firms to use the corporate logo of the distribution firm.(73) One benefit of such use may be to reduce prices in the competitive markets served by affiliates. With access to the parent company's logo, the affiliate is likely to have lower marketing costs that may be passed along to consumers in a competitive market.(74) The lower prices of the affiliate may encourage other firms serving this market to charge lower prices as well, resulting in lower prices for the market as a whole.(75) If consumers' perceptions of the implications of an affiliate's use of the parent utility's logo are accurate,(76) a second prospective benefit may be reduced search costs for consumers.

On the cost side, we have identified two potential concerns about the use of logos by affiliates: deception of consumers and cross-subsidization.

(1) Potential Deception: [This is discussed in Chapter VIII.]

(2) Potential Cross-subsidization and the Use of the Parent Utility's Logo: Although some forms of cross-subsidization may be effectively addressed by transfer pricing rules,(77) other forms may be more difficult to assess. Cross-subsidization could take the form of cost-shifting among inputs used for both regulated and unregulated products, such as the use of a corporate logo in marketing the affiliate's products and services as well as the regulated parent utility's products and services. Costs of shared inputs could be assigned in a biased manner (i.e., with additional costs assigned to the regulated side of the business) so that the regulated entity can justify

[3] https://www.ftc.gov/reports/competition-consumer-protection-perspectives-electric-power-regulatory-reform#Limits

higher rates. This biased assignment of costs, which is often difficult for regulators to detect and remedy, distorts competition and produces inefficiencies in the unregulated business as well.

The risk of failing to detect anticompetitive cross-subsidization is heightened if (1) the reputation of the regulated parent utility is effectively embodied or represented by its logo; (2) the regulated parent firm can improve its reputation by incurring costs of the type that regulators would traditionally include in the rate base of the regulated firm; and (3) the unregulated affiliate can enhance its own reputation among consumers by using the logo of the regulated parent firm, even if elements of the regulated firm's reputation do not apply to the affiliate. When these factors are present, a regulated incumbent will have a heightened incentive to overinvest in reputation-building because it can expect to incorporate a greater share of these investments into its rate base than if the assets were not shared with the affiliate. Moreover, the affiliate would realize additional profits from its increased sales in the unregulated market. The principal obstacle to deterring this conduct is that it may be extraordinarily difficult to distinguish competitive from anticompetitive levels of investment in reputation-building. Harm to competition and consumers may result from such overinvestment and subsequent cross-subsidization.

Harm to competition may occur because the unregulated affiliate's access to the logo of its regulated parent gives it a cost advantage through potential cross-subsidization that otherwise equally efficient competitors cannot match. The anticompetitive results may include (1) higher-than-necessary average operating (i.e., non-logo-related) costs for the industry and higher prices for consumers due to the continued operation of the affiliate, which can survive with higher-than-necessary costs due to the cross-subsidization; (2) greater market concentration and less competition than would occur absent the cross-subsidization;(78) and (3) discouragement of potential entry that likely would have occurred absent the cross-subsidization, including entry involving innovative products and production processes.

If [a state commission] upon more detailed study determines that there are substantial economies of vertical integration that cannot be realized without allowing affiliates to use the logos of their respective regulated parent utilities, [a state commission] may wish to consider two policy alternatives that are designed to obtain some of the potential benefits of affiliate use of the parent distribution firm's logo without incurring the costs. First, some states are considering allowing the use of the logo by affiliates, contingent upon use of a disclaimer that avoids consumer deception. [A state commission] may wish to evaluate this alternative by examining the impression that consumers are likely to have with the use of the logo accompanied by a disclaimer, and whether that impression would be accurate.(79)Consumer research designed to investigate the effects of several alternative policies on consumers may be the most effective approach.(80) A disclaimer that suffices to avoid consumer deception also may suffice to discourage cross-subsidization in the form of excessive investment in reliability.

Another alternative for transfer of the rights to use the parent firm's logo is to require that the affiliate (and any other firms granted the right to use the logo) pay the parent for the right to use the logo.(81) Because the logo is an asset, use of the logo by other firms, including affiliates, represents an asset transfer from the parent firm, and [a state commission] may wish to treat it like other asset transfers.(82) In order to avoid cross-subsidization in such a transaction, the use of the parent logo must be fairly evaluated.

MASSACHUSETTS

Rule: 220 CMR 12.00 STANDARDS OF CONDUCT FOR DISTRIBUTION COMPANIES AND THEIR AFFILIATES[4] and Proposed Bills H3513 and H860[5]

Market Value Asset Transfers

A Distribution Company may sell, lease, or otherwise transfer to an Affiliate, including a Competitive Affiliate, an asset, the cost of which has been reflected in the Distribution Company's rates for regulated service, provided that the price charged the Affiliate is the higher of the net book value or market value of the asset. The Department shall determine the market value of any such asset sold, leased, or otherwise transferred, based on the highest price that the asset could have reasonably realized after an open and competitive sale.

A Distribution Company may sell, lease, or otherwise transfer to an affiliate, including a Competitive Affiliate, assets other than those subject to 220 CMR 12.04(1), and may also provide services to an affiliate, including a Competitive Affiliate, provided that the price charged for such asset or service is equal to or greater than the Distribution Company's fully allocated cost to provide the asset or service.

An Affiliated Company may sell, lease, or otherwise transfer an asset to a Distribution Company, and may also provide services to a Distribution Company, provided that the price charged to the Distribution Company is no greater than the market value of the asset or service provided.

A Distribution Company must maintain a log of all transactions with Affiliated Companies made pursuant to 220 CMR 12.04(1) through (3). The log shall include the date of the transaction, the nature and quantity of the asset or service provided, the price charged, and an explanation of how the price was derived for purposes of compliance with 220 CMR 12.04. All log entries must be dated and made contemporaneously with relevant transactions. The log shall be kept up to date. The Distribution Company shall file a copy of the log with the Department no later than January 15 of each year, covering the previous year.

Sharing Customer Data

A Distribution Company shall not release any proprietary customer information to an Affiliate without the prior written authorization of the customer.

To the extent that a Distribution Company provides a Competitive Affiliate with information not readily available or generally known to any Non-affiliated Supplier, which information was obtained by the Distribution Company in the course of providing distribution service to its customers, the Distribution Company shall make that information available on a non-discriminatory basis to all Non-affiliated Suppliers transacting business in its service territory. 220 CMR 12.03(10) does not apply to customer-specific information obtained with proper authorization, information necessary to fulfill the provisions of a contract, or information relating to the provision of general and administrative support services.

Joint Marketing

The Distribution Company shall not engage in joint advertising or marketing programs of any sort with its Competitive Energy Affiliate, nor shall the Distribution Company directly promote or market any product or service offered by any Competitive Affiliate.

[4] https://www.mass.gov/files/220_cmr_12.00_10_3_08.pdf

[5] https://malegislature.gov/Bills/187/H860

Sharing Employees

Employees of a Distribution Company shall not be shared with a Competitive Energy Affiliate, and shall be physically separated from those of the Competitive Energy Affiliate. The Distribution Company shall fully and transparently allocate costs for any shared facilities or general and administrative support services provided to any Competitive Affiliate.

Logo Usage

Subject to 220 CMR 12.03(12), a Distribution Company may allow an Affiliate, including a Competitive Energy Affiliate, to identify itself, through the use of a name, logo, or both, as an Affiliate of the Distribution Company, provided that such use by a Competitive Energy Affiliate shall be accompanied by a disclaimer that shall state that no advantage accrues to customers or others in the use of the Distribution Company's services as a result of that customer or others dealing with the Competitive Energy Affiliate, and that the customer or others need not purchase any product or service from any Competitive Energy Affiliate in order to obtain services from the Distribution Company on a non-discriminatory basis. The disclaimer shall be written or spoken, or both, as may be appropriate given the context of the use of the name or logo.

CALIFORNIA

Rule: Public Utilities Commission Affiliate Transaction Rules Applicable to Large California Energy Utilities[6]

Subsidization

Corporate Support: As a general principle, a utility, its parent holding company, or a separate affiliate created solely to perform corporate support services may share with its affiliates joint corporate oversight, governance, support systems and personnel. Any shared support shall be priced, reported and conducted in accordance with the Separation and Information Standards set forth herein, as well as other applicable Commission pricing and reporting requirements.

As a general principle, such joint utilization shall not allow or provide a means for the transfer of confidential information from the utility to the affiliate, create the opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates. In the compliance plan, a corporate officer from the utility and holding company shall verify the adequacy of the specific mechanisms and procedures in place to ensure the utility follows the mandates of this paragraph, and to ensure the utility is not utilizing joint corporate support services as a conduit to circumvent these Rules.

Market Value Asset Transfers

Transfer of Goods and Services: To the extent that these Rules do not prohibit transfers of goods and services between a utility and its affiliates, all such transfers shall be subject to the following pricing provisions:

1. Transfers from the utility to its affiliates of goods and services produced, purchased or developed for sale on the open market by the utility will be priced at fair market value.

2. Transfers from an affiliate to the utility of goods and services produced, purchased or developed for sale on the open market by the affiliate shall be priced at no more than fair market value.

3. For goods or services for which the price is regulated by a state or federal agency, that price shall be deemed to be the fair market value, except that in cases where more than one state commission regulates the price of goods or services, this Commission's pricing provisions govern.

4. Goods and services produced, purchased or developed for sale on the open market by the utility will be provided to its affiliates and unaffiliated companies on a nondiscriminatory basis, except as otherwise required or permitted by these Rules or applicable law.

5. Transfers from the utility to its affiliates of goods and services not produced, purchased or developed for sale by the utility will be priced at fully loaded cost plus 5% of direct labor cost.

6. Transfers from an affiliate to the utility of goods and services not produced, purchased or developed for sale by the affiliate will be priced at the lower of fully loaded cost or fair market value.

Sharing Customer Data

Customer Information: A utility shall provide customer information to its affiliates and unaffiliated entities on a strictly non-discriminatory basis, and only with prior affirmative customer written consent.

Non-Customer Specific Non-Public Information: A utility shall make non-customer specific non-public information, including but not limited to information about a utility's natural gas or electricity purchases, sales, or operations or about the utility's gas-related goods or services, electricity-related goods or services, available to the utility's affiliates only if the utility makes that information contemporaneously available to all other service providers on

[6] http://www.cpuc.ca.gov/General.aspx?id=1459

the same terms and conditions, and keeps the information open to public inspection. Unless otherwise provided by these Rules, a utility continues to be bound by all Commission-adopted pricing and reporting guidelines for such transactions. Utilities are also permitted to exchange proprietary information on an exclusive basis with their affiliates, provided the utility follows all Commission-adopted pricing and reporting guidelines for such transactions, and it is necessary to exchange this information in the provision of the corporate support services permitted by Rule V E below. The affiliate's use of such proprietary information is limited to use in conjunction with the permitted corporate support services, and is not permitted for any other use. Nothing in this Rule precludes the exchange of information pursuant to D.97-10-031.

Joint Marketing

A utility shall not participate in joint advertising or joint marketing with its affiliates. This prohibition means that utilities may not engage in activities which include, but are not limited to the following:

1. A utility shall not participate with its affiliates in joint sales calls, through joint call centers or otherwise, or joint proposals (including responses to requests for proposals (RFPs)) to existing or potential customers. At a customer's unsolicited request, a utility may participate, on a nondiscriminatory basis, in non-sales meetings with its affiliates or any other market participant to discuss technical or operational subjects regarding the utility's provision of transportation service to the customer;

2. Except as otherwise provided for by these Rules, a utility shall not participate in any joint activity with its affiliates. The term "joint activities" includes, but is not limited to, advertising, sales, marketing, communications and correspondence with any existing or potential customer;

3. A utility shall not participate with its affiliates in trade shows, conferences, or other information or marketing events held in California.

Sharing Employees

1. Except as permitted in Section V E (corporate support), a utility and its affiliates shall not jointly employ the same employees. This Rule prohibiting joint employees also applies to Board Directors and corporate officers, except for the following circumstances: In instances when this Rule is applicable to holding companies, any board member or corporate officer may serve on the holding company and with either the utility or affiliate (but not both). Where the utility is a multi-state utility, is not a member of a holding company structure, and assumes the corporate governance functions for the affiliates, the prohibition against any board member or corporate officer of the utility also serving as a board member or corporate officer of an affiliate shall only apply to affiliates that operate within California. In the case of shared directors and officers, a corporate officer from the utility and holding company shall verify in the utility's compliance plan the adequacy of the specific mechanisms and procedures in place to ensure that the utility is not utilizing shared officers and directors as a conduit to circumvent any of these Rules.

2. All employee movement between a utility and its affiliates shall be consistent with the following provisions:

    a. A utility shall track and report to the Commission all employee movement between the utility and affiliates. The utility shall report this information annually pursuant to our Affiliate Transaction Reporting Decision, D.93-02-016, 48 CPUC2d 163, 171-172 and 180 (Appendix A, Section I and Section II H.).

    b. Once an employee of a utility becomes an employee of an affiliate, the employee may not return to the utility for a period of one year. This Rule is inapplicable if the affiliate to which the employee transfers goes out of business during the one-year period. In the event that such an employee returns to the utility, such employee cannot be retransferred, reassigned, or otherwise employed by the affiliate for a period of two years.

Employees transferring from the utility to the affiliate are expressly prohibited from using information gained from the utility in a discriminatory or exclusive fashion, to the benefit of the affiliate or to the detriment of other unaffiliated service providers.

c. When an employee of a utility is transferred, assigned, or otherwise employed by the affiliate, the affiliate shall make a one-time payment to the utility in an amount equivalent to 25% of the employee's base annual compensation, unless the utility can demonstrate that some lesser percentage (equal to at least 15%) is appropriate for the class of employee included. All such fees paid to the utility shall be accounted for in a separate memorandum account to track them for future ratemaking treatment (i.e. credited to the Electric Revenue Adjustment Account or the Core and Non-core Gas Fixed Cost Accounts, or other ratemaking treatment, as appropriate), on an annual basis, or as otherwise necessary to ensure that the utility's ratepayers receive the fees. This transfer payment provision will not apply to clerical workers. Nor will it apply to the initial transfer of employees to the utility's holding company to perform corporate support functions or to a separate affiliate performing corporate support functions, provided that that transfer is made during the initial implementation period of these rules or pursuant to a § 851 application or other Commission proceeding. However, the rule will apply to any subsequent transfers or assignments between a utility and its affiliates of all covered employees at a later time.

d. Any utility employee hired by an affiliate shall not remove or otherwise provide information to the affiliate which the affiliate would otherwise be precluded from having pursuant to these Rules.

e. A utility shall not make temporary or intermittent assignments, or rotations to its affiliates.

Sharing Corporate Infrastructure

Corporate Support: As a general principle, a utility, its parent holding company, or a separate affiliate created solely to perform corporate support services may share with its affiliates joint corporate oversight, governance, support systems and personnel. Any shared support shall be priced, reported and conducted in accordance with the Separation and Information Standards set forth herein, as well as other applicable Commission pricing and reporting requirements.

As a general principle, such joint utilization shall not allow or provide a means for the transfer of confidential information from the utility to the affiliate, create the opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates. In the compliance plan, a corporate officer from the utility and holding company shall verify the adequacy of the specific mechanisms and procedures in place to ensure the utility follows the mandates of this paragraph, and to ensure the utility is not utilizing joint corporate support services as a conduit to circumvent these Rules.

Examples of services that may be shared include: payroll, taxes, shareholder services, insurance, financial reporting, financial planning and analysis, corporate accounting, corporate security, human resources (compensation, benefits, employment policies), employee records, regulatory affairs, lobbying, legal, and pension management.

Examples of services that may not be shared include: employee recruiting, engineering, hedging and financial derivatives and arbitrage services, gas and electric purchasing for resale, purchasing of gas transportation and storage capacity, purchasing of electric transmission, system operations, and marketing.

Logo Usage

1. A utility shall not trade upon, promote, or advertise its affiliate's affiliation with the utility, nor allow the utility name or logo to be used by the affiliate or in any material circulated by the affiliate, unless it discloses in plain legible or audible language, on the first page or at the first point where the utility name or logo appears that:

    a. the affiliate "is not the same company as [i.e. PG&E, Edison, the Gas Company, etc.], the utility,";

    b. the affiliate is not regulated by the California Public Utilities Commission; and

    c. "you do not have to buy [the affiliate's] products in order to continue to receive quality regulated services from the utility."
    The application of the name/logo disclaimer is limited to the use of the name or logo in California.

2. A utility, through action or words, shall not represent that, as a result of the affiliate's affiliation with the utility, its affiliates will receive any different treatment than other service providers.

3. A utility shall not offer or provide to its affiliates advertising space in utility billing envelopes or any other form of utility customer written communication unless it provides access to all other unaffiliated service providers on the same terms and conditions.

4. A utility shall not participate in joint advertising or joint marketing with its affiliates. This prohibition means that utilities may not engage in activities which include, but are not limited to the following:

    a. A utility shall not participate with its affiliates in joint sales calls, through joint call centers or otherwise, or joint proposals (including responses to requests for proposals (RFPs)) to existing or potential customers. At a customer's unsolicited request, a utility may participate, on a nondiscriminatory basis, in non-sales meetings with its affiliates or any other market participant to discuss technical or operational subjects regarding the utility's provision of transportation service to the customer;

    b. Except as otherwise provided for by these Rules, a utility shall not participate in any joint activity with its affiliates. The term "joint activities" includes, but is not limited to, advertising, sales, marketing, communications and correspondence with any existing or potential customer;

    c. A utility shall not participate with its affiliates in trade shows, conferences, or other information or marketing events held in California.

5. A utility shall not share or subsidize costs, fees, or payments with its affiliates associated with research and development activities or investment in advanced technology research.

MISSOURI

Rule: Code of State Regulations 4 CSR 240-40.015[7]

Subsidization

4 CSR 240-40.015 Affiliate Transactions
PURPOSE: This rule is intended to prevent regulated utilities from subsidizing their nonregulated operations. In order to accomplish this objective, the rule sets forth financial standards, evidentiary standards and record keeping requirements applicable to any Missouri Public Service Commission (commission) regulated gas corporation whenever such corporation participates in transactions with any affiliated entity (except with regard to HVAC services as defined in section 386.754, RSMo Supp. 1998, by the General Assembly of Missouri). The rule and its effective enforcement will provide the public the assurance that their rates are not adversely impacted by the utilities' nonregulated activities.

4 CSR 240-40.017 HVAC Services Affiliate Transactions
PURPOSE: This rule prescribes the requirements for HVAC services affiliated entities and regulated gas corporations when such gas corporations participate in affiliated transactions with an HVAC affiliated entity as set forth in sections 386.754, 386.756, 386.760, 386.762 and 386.764, RSMo by the General Assembly of the State of Missouri.

A regulated gas corporation may not engage in or assist any affiliated entity or utility contractor in engaging in HVAC services in a manner which subsidizes the activities of such regulated gas corporation, affiliated entity or utility contractor to the extent of changing the rates or charges for the regulated gas corporation's services above or below the rates or charges that would be in effect if the regulated gas corporation were not engaged in or assisting any affiliated entity or utility contractor in engaging in such activities.

Market Value Asset Transfers

(D) In transactions involving the purchase of goods or services by the regulated gas corporation from an affiliated entity, the regulated gas corporation will use a commission approved Cost Allocation Manual (CAM) which sets forth cost allocation, market valuation and internal cost methods. This CAM can use benchmarking practices that can constitute compliance with the market value requirements of this section if approved by the commission.

In transactions involving the purchase of information, assets, goods or services by the regulated gas corporation from an affiliated entity, the regulated gas corporation will use a commission-approved CAM which sets forth cost allocation, market valuation and internal cost methods. This CAM can use bench marking practices that can constitute compliance with the market value requirements of this section if approved by the commission.

Sharing Customer Data

Specific customer information shall be made available to affiliated or unaffiliated entities only upon consent of the customer or as otherwise provided by law or commission rules or orders. General or aggregated customer information shall be made available to affiliated or unaffiliated entities upon similar terms and conditions. The regulated gas corporation may set reasonable charges for costs incurred in producing customer information. Customer information includes information provided to the regulated utility by affiliated or unaffiliated entities.

Joint Marketing/Logo Usage

Marketing materials, information or advertisements by an affiliate entity that share an exact or similar name, logo or trademark of the regulated utility shall clearly display or announce that the affiliate entity is not regulated by the Missouri Public Service Commission.

TEXAS

Rule: Texas Administrative Code Title 16 Part 2 Chapter 25 Subchapter K RULE §25.272[8]
(See also: Project 41616 2014 Texas PUC Ruling[9] and Texas Court of Appeals Dissenting Opinion[10] for issues including logo sharing)

Subsidization

A utility shall not subsidize the business activities of any affiliate with revenues from a regulated service. In accordance with PURA and the commission's rules, a utility and its affiliates shall fully allocate costs for any shared services, including corporate support services, offices, employees, property, equipment, computer systems, information systems, and any other shared assets, services, or products.

Market Value Asset Transfers

Sale of products or services by a utility. Unless otherwise approved by the commission and except for corporate support services, any sale of a product or service by a utility shall be governed by a tariff approved by the commission. Products and services shall be made available to any third party entity on the same terms and conditions as the utility makes those products and services available to its affiliates.

Sharing Customer Data

1) Proprietary customer information. A utility shall provide a customer with the customer's proprietary customer information, upon request by the customer. Unless a utility obtains prior affirmative written consent or other verifiable authorization from the customer as determined by the commission, or unless otherwise permitted under this subsection, it shall not release any proprietary customer information to a competitive affiliate or any other entity, other than the customer, an independent organization as defined by PURA §39.151, or a provider of corporate support services for the sole purpose of providing corporate support services in accordance with subsection (e)(2)(A) of this section. The utility shall maintain records that include the date, time, and nature of information released when it releases customer proprietary information to another entity in accordance with this paragraph. The utility shall maintain records of such information for a minimum of three years, and shall make the records available for third party review within 72 hours of a written request, or at a time mutually agreeable to the utility and the third party. When the third party requesting review of the records is not the customer, commission, or Office of Public Utility Counsel, the records may be redacted in such a way as to protect the customer's identity. If proprietary customer information is released to an independent organization or a provider of corporate support services, the independent organization or entity providing corporate support services is subject to the rules in this subsection with respect to releasing the information to other persons.

    (A) Exception for law, regulation, or legal process. A utility may release proprietary customer information to another entity without customer authorization where authorized or requested to do so by the commission or where required to do so by law, regulation, or legal process.

10 https://cases.justia.com/texas/third-court-of-appeals/2014-03-13-00358-cv-1.pdf?ts=1405646304

(B) Exception for release to governmental entity. A utility may release proprietary customer information without customer authorization to a federal, state, or local governmental entity or in connection with a court or administrative proceeding involving the customer or the utility; provided, however, that the utility shall take all reasonable actions to protect the confidentiality of such information, including, but not limited to, providing such information under a confidentiality agreement or protective order, and shall also promptly notify the affected customer in writing that such information has been requested.

(C) Exception to facilitate transition to customer choice. In order to facilitate the transition to customer choice, a utility may release proprietary customer information to its affiliated retail electric provider or providers of last resort without authorization of those customers only during a period prescribed by the commission.

(D) Exception for release to providers of last resort. On or after January 1, 2002, a utility may provide proprietary customer information to a provider of last resort without customer authorization for the purpose of serving customers who have been switched to the provider of last resort.

(E) Exception for release to State of Texas' Division of Emergency Management. Beginning January 1, 2011, a utility may provide proprietary customer information to the State of Texas' Division of Emergency Management, upon that agency's request for purposes of identifying the customer as a critical care residential customer pursuant to §25.497 of this title (relating to Critical Load Industrial Customers, Critical Load Public Safety Customers, Critical Care Residential Customers, and Chronic Condition Residential Customers).

2) Nondiscriminatory availability of aggregate customer information. A utility may aggregate non-proprietary customer information, including, but not limited to, information about a utility's energy purchases, sales, or operations or about a utility's energy-related goods or services. However, except in circumstances solely involving the provision of corporate support services in accordance with subsection (e)(2)(A) of this section, a utility shall aggregate non-proprietary customer information for a competitive affiliate only if the utility makes such aggregation service available to all non-affiliates under the same terms and conditions and at the same price as it is made available to any of its affiliates. In addition, no later than 24 hours prior to a utility's provision to its competitive affiliate of aggregate customer information, the utility shall post a conspicuous notice on its Internet site or other public electronic bulletin board for at least 30 consecutive calendar days, providing the following information: the name of the competitive affiliate to which the information will be provided, the rate charged for the information, a meaningful description of the information provided, and the procedures by which non-affiliates may obtain the same information under the same terms and conditions. The utility shall maintain records of such information for a minimum of three years, and shall make such records available for third party review within 72 hours of a written request, or at a time mutually agreeable to the utility and the third party.

3) No preferential access to transmission and distribution information. A utility shall not allow preferential access by its competitive affiliates to information about its transmission and distribution systems.

4) Other limitations on information disclosure. Nothing in this rule is intended to alter the specific limitations on disclosure of confidential information in the Texas Utilities Code, the Texas Government Code, Chapter 552, or the commission's substantive and procedural rules.

5) Other information. Except as otherwise allowed in this subsection, a utility shall not share information, except for information required to perform allowed corporate support services, with competitive affiliates unless the utility can prove to the commission that the sharing will not compromise the public interest prior to any such sharing. Information that is publicly available, or that is unrelated in any way to utility activities, may be shared.

Joint Marketing/Sharing Corporate Infrastructure

Corporate support services--Services shared by a utility, its parent holding company, or a separate affiliate created to perform corporate support services, with its affiliates of joint corporate oversight, governance, support systems, and personnel. Examples of services that may be shared, to the extent the services comply with the requirements prescribed by PURA §39.157(d) and (g) and rules implementing those requirements, include human resources, procurement, information technology, regulatory services, administrative services, real estate services, legal services, accounting, environmental services, research and development unrelated to marketing activity and/or business development for the competitive affiliate regarding its services and products, internal audit, community relations, corporate communications, financial services, financial planning and management support, corporate services, corporate secretary, lobbying, and corporate planning.

Examples of services that may not be shared include engineering, purchasing of electric transmission facilities and service, transmission and distribution system operations, and marketing, unless such services are provided by a utility, or a separate affiliate created to perform such services, exclusively to affiliated regulated utilities and only for provision of regulated utility services.

(h) Safeguards relating to joint marketing and advertising.
(1) Joint marketing, advertising, and promotional activities.
(A) A utility shall not:
i. provide or acquire leads on behalf of its competitive affiliates;
ii. solicit business or acquire information on behalf of any of its competitive affiliates;
iii. give the appearance of speaking or acting on behalf of any of its competitive affiliates;
iv. share market analysis reports or other proprietary or non-publicly available reports, with its competitive affiliates;
v. represent to customers or potential customers that it can offer competitive retail services bundled with its tariffed services; or
vi. request authorization from its customers to pass on information exclusively to its competitive affiliate.

(B) A utility shall not engage in joint marketing, advertising, or promotional activities of its products or services with those of a competitive affiliate in a manner that favors the affiliate. Such joint marketing, advertising, or promotional activities include, but are not limited to, the following activities:
i. acting or appearing to act on behalf of a competitive affiliate in any communications and contacts with any existing or potential customers;
ii. joint sales calls;
ii. joint proposals, either as requests for proposals or responses to requests for proposals:
iv. joint promotional communications or correspondence, except that a utility may allow a competitive affiliate access to customer bill advertising inserts according to the terms of a commission-approved tariff so long as access to such inserts is made available on the same terms and conditions to non-affiliates offering similar services as the competitive affiliate that uses bill inserts;

v. joint presentation at trade shows, conferences, or other marketing events within the State of Texas; and
vi. providing links between any of a utility's websites and social media platforms, and any of the websites and social media platforms of its competitive affiliates.

Sharing Employees

Sharing of employees, facilities, or other resources. Except as otherwise allowed in paragraph (3), (4), (5), or (7) of this subsection, a utility shall not share employees, facilities, or other resources with its competitive affiliates unless the utility can prove to the commission prior to such sharing that the sharing will not compromise the public interest. Such sharing may be allowed if the utility implements adequate safeguards precluding employees of a competitive affiliate from gaining access to information in a manner that would allow or provide a means to transfer confidential information from a utility to an affiliate, create an opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates.

(3) Sharing officers and directors, property, equipment, computer systems, information systems, and corporate services. A utility and a competitive affiliate may share common officers and directors, property, equipment, computer systems, information systems and corporate support services, if the utility implements safeguards that the commission determines are adequate to preclude employees of a competitive affiliate from gaining access to information in a manner that would allow or provide a means to transfer confidential information from a utility to an affiliate, create an opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates

(4) Employee transfers and temporary assignments. A utility shall not assign, for less than one year, utility employees engaged in transmission or distribution system operations to a competitive affiliate unless the employee does not have knowledge of confidential information. Utility employees engaged in transmission or distribution system operations, including persons employed by a service company affiliated with the utility who are engaged in transmission system operations on a day-to-day basis or have knowledge of transmission or distribution system operations and are transferred to a competitive affiliate, shall not remove or otherwise provide or use confidential property or information gained from the utility or affiliated service company in a discriminatory or exclusive fashion, to the benefit of the competitive affiliate or to the detriment of non-affiliated electric suppliers. Movement of an employee engaged in transmission or distribution system operations, including a person employed by a service company affiliated with the utility who is engaged in transmission or distribution system operations on a day-to-day basis or has knowledge of transmission or distribution system operations from a utility to a competitive affiliate or vice versa, may be accomplished through either the employee's termination of employment with one company and acceptance of employment with the other, or a transfer to another company, as long as the transfer of an employee from the utility to an affiliate results in the utility bearing no ongoing costs associated with that employee. Transferring employees shall sign a statement indicating that they are aware of and understand the restrictions and penalties set forth in this section. The utility also shall post a conspicuous notice of such a transfer on its Internet site or other public electronic bulletin board within 24 hours and for at least 30 consecutive calendar days. The exception to this provision is that employees may be temporarily assigned to an affiliate or non-affiliated utility to assist in restoring power in the event of a major service interruption or assist in resolving emergency situations affecting system reliability. Consistent with §25.84(h) of this title (relating to Reporting of Affiliate Transactions for Electric Utilities), however, within 30 days of such a deviation from the code of conduct, the utility shall report this information to the commission and shall conspicuously post the information on its Internet site or other public electronic bulletin board for 30 consecutive calendar days.

(5) Sharing of office space. A utility's office space shall be physically separate from that of its competitive affiliates, where physical separation is accomplished by having office space in separate buildings or, if within the same building, by a method such as having offices on separate floors or with separate access, unless otherwise approved by the commission.

(6) Separate books and records. A utility and its affiliates shall keep separate books of accounts and records, and the commission may review records relating to a transaction between a utility and an affiliate.

(A) In accordance with generally accepted accounting principles or state and federal guidelines, as appropriate, a utility shall record all transactions with its affiliates, whether they involve direct or indirect expenses.

(B) A utility shall prepare financial statements that are not consolidated with those of its affiliates.

(C) A utility and its affiliates shall maintain sufficient records to allow for an audit of the transactions between the utility and its affiliates. At any time, the commission may, at its discretion, require a utility to initiate, at the utility's expense, an audit of transactions between the utility and its affiliates performed by an independent third party.

(7) Limited credit support by a utility. A utility may share credit, investment, or financing arrangements with its competitive affiliates if it complies with subparagraphs (A) and (B) of this paragraph.

(A) The utility shall implement adequate safeguards precluding employees of a competitive affiliate from gaining access to information in a manner that would allow or provide a means to transfer confidential information from a utility to an affiliate, create an opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates.

(B) The utility shall not allow an affiliate to obtain credit under any arrangement that would include a specific pledge of any assets in the rate base of the utility or a pledge of cash reasonably necessary for utility operations. This subsection does not affect a utility's obligations under other law or regulations, such as the obligations of a public utility holding company under §25.271(c)(2) of this title (relating to Foreign Utility Company Ownership by Exempt Holding Companies).

CONNECTICUT

Rule: Department of Public Utility Control: Code of Conduct for Electric Distribution Companies Sec 16-244h1-7[11]

Subsidization

(5) An electric distribution company shall not share or subsidize costs, fees, or payments with its affiliates associated with research and development activities or investment in advanced technology research.

Market Value Asset Transfers

(3) An electric distribution company shall pay fair market value for all goods and services produced, purchased or developed by its generation entities or affiliates. The electric distribution company's purchasing practices shall be non-discriminatory and shall result in fair prices to its customers. All transfers from a generation entity or affiliate to its electric distribution company shall be posted on the affiliate discount internet web page referenced in section 16-244h-3(f) of the Regulations of Connecticut State Agencies within 24 hours of the time at which the service provided by the generation entity or affiliate is so provided.

Sharing Customer Data

(1) Unless the electric distribution company has received a form from a customer requesting that the customer's name, address, telephone number and rate class not be released, the electric distribution company may release such information to its generation entities or affiliates without customer consent, so long as such information is released only on a strictly non-discriminatory basis pursuant to the provisions of section 16-245o(d) of the Connecticut General Statutes. Customer consent is not required for an electric distribution company to provide load data concerning existing customers of its generation entities or affiliates necessary for customer billing and load reporting to the regional independent system operator, as that term is defined in section 16-1 of the Connecticut General Statutes.

(2) An electric distribution company shall receive prior affirmative written customer consent before releasing any customer information not referenced in subdivision (1) of this subsection. If an electric distribution company releases customer specific information not referenced in subdivision (1) of this subsection to its generation entity or affiliate, it shall make similar customer specific information available to other electric suppliers on a strictly non-discriminatory basis and on the same terms and conditions.

(3) If an electric distribution company releases customer information to its generation entities or affiliates for which no tariff or standard fee applies, within 24 hours of the time at which an electric distribution company releases such customer information, the electric distribution company shall post, either directly on or directly linked to the discount page required pursuant to section 16-244h-3(f) of the Regulations of Connecticut State Agencies, a notice providing the terms and conditions of such release of information. The notice shall include, but is not limited to:

(A) The name of the generation entity or affiliate receiving the information;
(B) The number of names provided;
(C) The type of information provided (e.g., customer specific load profiles);
(D) The price charged to the generation entity or affiliate; and
(E) The electronic form in which the information was provided.

Joint Marketing/Advertising/Logo Usage

(1) An electric distribution company shall not trade upon, promote, or advertise its generation entity or affiliate's affiliation with the electric distribution company, nor allow the electric distribution company name or logo to be used by the generation entity or affiliate in any advertisement or in any

[11] https://www.ct.gov/pura/lib/pura/regs/16-244h-1to7.pdf

material circulated by the generation entity or affiliate, unless it discloses in plain legible or audible language, on the first page or at the first point where the electric distribution company's name or logo appears that:

(A) The generation entity or affiliate ''is not the same company as [i.e. The Connecticut Light and Power Company, The United Illuminating Company], the electric distribution company,''; and

(B) ''You do not have to buy [the generation entity or affiliate's] products in order to continue to receive quality regulated services from the electric distribution company.''

The application of the name/logo disclaimer is limited to the use of the name or logo in Connecticut. Any written disclaimer shall be in bold print, and shall not utilize a typeface of less than eight points in size. Compensation for ratemaking purposes for the use of the electric distribution company's logo by a generation entity or affiliate shall be determined by the department in any rate case held pursuant to section 16-19 of the Connecticut General Statutes. The electric distribution company shall record any such use of its logo by its generation entity or affiliate.

(2) An electric distribution company, through action or words, shall not represent that, as a result of the generation entity or affiliate's relationship with the electric distribution company, its generation entity or affiliates will receive any different treatment than other service providers.

(3) An electric distribution company shall not offer or provide to any generation entity or affiliate advertising space in electric distribution company billing envelopes or any other form of written electric distribution company customer communication. The appearance of a generation entity or affiliate's name or logo on a customer bill to indicate the customer's choice of electric supplier shall not be considered trading upon or promoting the generation entity or affiliate's affiliation with the electric distribution company under subdivision (1) of this subsection, and shall not be considered joint advertising or joint marketing prohibited in subdivision (4) of this section. An electric distribution company shall offer each electric supplier the ability to display its name or logo or both on the customer bill, to indicate the customer's choice of electric supplier, under the same terms and conditions as those offered to the electric distribution company's generation entities or affiliates. The appearance of an electric distribution company's logo on a customer bill to indicate the provider of electric distribution services shall not require the disclaimers listed in subdivision (1) of this section.

(4) An electric distribution company shall not participate in joint advertising or joint marketing with its generation entities or affiliates. This prohibition against joint advertising or joint marketing includes, but is not limited to the following:

(A) An electric distribution company shall not participate with its generation entities or affiliates through joint sales calls, through joint call centers or otherwise, or through joint proposals (including responses to requests for proposals) to existing or potential customers. This subparagraph does not prohibit an electric distribution company from participating, on a nondiscriminatory basis, in non-sales meetings with its generation entities or affiliates or any other electric supplier to discuss technical or operational subjects regarding the electric distribution company's provision of transportation service to the customer. An electric distribution company shall maintain a record of all such meetings that shall include, but is not limited to, the customer's name and customer class, the customers electric supplier at the time of the meeting, the date of the meeting and a general description of the subject matter discussed. The record of meetings shall be open to inspection by the department and its staff consistent with the provisions of section 16-244h-5(b) of the Regulations of Connecticut State Agencies;

(B) Except as otherwise provided for by sections 16-244h-1 to 16-244h-7, inclusive, of the Regulations of Connecticut State Agencies, an electric distribution company shall not participate in any joint activity with its generation entities or affiliates. The term ''joint activity'' includes, but is not limited to, advertising, sales, marketing, communications and correspondence with any existing or potential customer;

(C) An electric distribution company shall not participate with its generation entities or affiliates in trade shows, conferences, or other information or marketing events.

(5) An electric distribution company shall not share or subsidize costs, fees, or payments with its affiliates associated with research and development activities or investment in advanced technology research.

Corporate Support/Sharing Employees

(f) Corporate Support:
(1) An electric distribution company, its parent holding company, or a separate affiliate created solely to perform corporate support services may share with its generation entities or affiliates joint corporate oversight, governance, support systems and personnel. Any shared corporate support shall be priced, reported and conducted in accordance with the separation and information standards set forth in sections 16-244h-1 to 16-244h-7, inclusive, of the Regulations of Connecticut State Agencies, as well as other applicable department pricing and reporting requirements.

(2) Such shared corporate support shall not allow or provide a means for the transfer of confidential information such as customer information or noncustomer specific non-public information from the electric distribution company to the affiliate, create the opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create opportunities for cross subsidization of generation entities or affiliates. In the compliance plan submitted pursuant to section 16-244h-7 of the Regulations of Connecticut State Agencies, a corporate officer from the electric distribution company and holding company shall verify the adequacy of the specific mechanisms and procedures in place to ensure the electric distribution company follows the mandates of this subsection, and to ensure the electric distribution company is not utilizing shared corporate support services as a means to circumvent sections 16-244h-1 to 16-244h-7, inclusive of the Regulations of Connecticut State Agencies.

(3) Examples of services that may be shared include, but are not limited to: payroll, taxes, shareholder services, insurance, financial reporting, corporate financial planning and analysis, corporate accounting, corporate security, human resources (compensation, benefits, employment policies), employee records, regulatory affairs, lobbying, legal, and pension management. Examples of services that may not be shared include: employee recruiting, engineering, hedging and financial derivatives and arbitrage services, electric purchasing for resale, purchasing of electric transmission, system operations and marketing.

(h) Employees:
(1) Except as permitted in subsection (f) of this section, an electric distribution company and its generation entities or affiliates shall not jointly employ the same employees. This prohibition against joint employees also applies to board of directors and corporate officers, except that if an electric distribution company and its generation entities or affiliates are controlled by a holding company, any board member or corporate officer may serve on the holding company and with either the electric distribution company or its generation entities or affiliates, but not both. In the case of shared directors and officers, a corporate officer from the electric distribution company and holding company shall verify in the electric distribution company's compliance plan submitted pursuant to section 16-244h-7 of the Regulations of Connecticut State Agencies the adequacy of the specific mechanisms and procedures in place to ensure that the electric distribution company is not utilizing shared officers and directors as a means to circumvent sections 16-244h-1 to 16-244h-7, inclusive, of the Regulations of Connecticut State Agencies.

(2) All employee transfers between an electric distribution company and its generation entities or affiliates shall be consistent with the following provisions:

(A) An electric distribution company shall track and report to the department all employee transfers between the electric distribution company and generation entities or affiliates. The

electric distribution company shall report this information to the department no later than July 1, 2000 and annually thereafter.
(B) Once an employee of an electric distribution company becomes an employee of a generation entity or affiliate, the employee shall not return to the electric distribution company for a period of one year. This prohibition is inapplicable if the generation entity or affiliate to which the employee transfers no longer transacts business in this state during the one-year period. In the event that an employee returns to the electric distribution company, such employee shall not be retransferred, reassigned, or otherwise employed by a generation entity or affiliate for a period of two years. An employee that is hired by the generation entity or affiliate and becomes an employee of the electric distribution company shall not be retransferred, reassigned, or otherwise employed by a generation entity or affiliate for a period of two years. Employees transferring from the electric distribution company to a from the electric distribution company in a discriminatory or exclusive fashion, to the benefit of the generation entity or affiliate or to the detriment of unaffiliated electric suppliers.

(C) Any electric distribution company employee hired by a generation entity or affiliate shall not remove or otherwise provide information to the generation entity or affiliate which the generation entity or affiliate would otherwise be precluded from having pursuant to sections 16-244h-1 to 16 244h-7, inclusive, of the Regulations of Connecticut State Agencies.

(D) An electric distribution company shall not make temporary or intermittent assignments, or rotations of its employees to its generation entities or affiliates.

(E) A transferring employee shall sign a statement attesting that the employee is aware of and understands the restrictions set forth in sections 16-244h-1 to 16-244h-7, inclusive, of the Regulations of Connecticut State Agencies and the attendant consequences of violations of those sections.

MAINE

Rule: PUC 65-407[12] Chapters 304 and 820

304 SUMMARY - This Chapter establishes standards of conduct applicable to both large and small investor-owned distribution utilities and affiliated competitive providers, a method of tracking the retail sales made by an affiliated competitive provider within the service territory of its affiliated distribution utility and a requirement that consumer-owned utilities notify the Commission of any wholesale generation sales.

820 SUMMARY: This rule describes the record keeping, accounting and structural requirements that Maine utilities must comply with if they engage in non-core business activities consistent with the requirements in 35-A M.R.S.A. §§ 503, 707, 708, 713, 714 and 715.

Subsidization (304)

No Subsidization. A distribution utility may not subsidize the business of its affiliated competitive provider at ratepayer expense in any manner not specifically authorized under this section.

Sharing of Customer Data (820)

i. Limits on Use of Customer Information.
   i. Use by Affiliate of Customer Specific Information (CSI) or Aggregate Customer Information (ACI). A utility affiliate must purchase any CSI or ACI it wishes to use from the core utility at market value.
   ii. Availability of CSI or ACI. If a utility makes CSI or ACI available to a non-core utility subsidiary, it must make the CSI or ACI available to any other entity requesting it, on the same terms.
   iii. Affirmative Permission of Customer Required. To use any CSI (as distinguished from ACI), the utility must obtain affirmative, written permission from the customer.

ii. Obligation to Provide Information. If a utility provides information to an affiliate related to its status as a public utility, it must provide such information upon request to nonaffiliated companies.

iii. Preferences Forbidden. The utility may not act in preference to its affiliate or affiliates in providing access to utility facilities or services or in influencing utility customers to use the services of its affiliates. A utility that provides the name of its affiliate to a customer interested in the services of its affiliate must also provide the names of non-affiliated entities providing such services.

iv. Additional Standards of Conduct. This rule does not limit the Commission from imposing additional standards of conduct on a utility's activities related to its affiliated interests to the extent necessary to protect the public interest.

Joint Marketing (304 and 820)

Joint Advertising or Marketing. Joint advertising or marketing is any advertising or marketing that includes, directly or indirectly, references to both the distribution utility and its affiliated competitive provider. It also includes the use by the affiliated competitive provider of the same or substantially similar name or logo as the distribution utility in a way that would require a payment for good will under Chapter 820.

i. Promotion of Affiliate; Joint Marketing.

[12] https://www.maine.gov/sos/cec/rules/65/chaps65.htm

1) Neither a distribution utility nor its affiliated competitive provider may give any appearance of speaking on behalf of the other.
2) Neither a distribution utility nor an affiliated competitive provider may in any way represent that any advantage accrues to customers or others in the use of the distribution utility's services as a result of that customer's or others' dealing with the affiliated competitive provider.

3) A distribution utility and its affiliated competitive provider may not engage in joint advertising or marketing.

4) The distribution utility may not in any manner promote its affiliated competitive provider or any product or service offered by its affiliated competitive provider nor may the affiliated competitive provider promote any product or service offered by the distribution utility.

5) The Commission shall maintain a current list of all competitive providers available to customers in each distribution utility's service territory. The Commission shall update the list and rearrange the names on the list in a random sequence at least every 60 days. If a customer requests information about competitive electricity providers or where the customer may obtain generation services, the distribution utility shall provide a copy of the most recent list of competitive electricity providers issued by the Commission.

6) Unless the distribution utility or affiliated competitive provider is specifically asked what the relationship is between the two entities or whether the distribution utility or affiliated competitive provider has an affiliation or association with a competitive provider or distribution utility, respectively, employees of those entities may not disclose the affiliation. If they are specifically asked, employees may disclose the affiliation but must inform the questioner that:
   a. The affiliated competitive provider is not regulated by the Public Utilities Commission;
   b. No advantage will accrue to any customer of the affiliated competitive provider due to the affiliate's relationship with the distribution utility; and
   c. Customers may select another competitive electricity provider.

   The distribution utility shall submit as part of its implementation plan under Section 5 a script containing the information specified above that distribution utility and affiliated competitive provider employees shall use in responding to inquiries regarding affiliated status.

Sharing Employees (304)

Sharing of Employee Prohibition. Employees of a distribution utility must be located in a separate building from the employees of the affiliated competitive provider. Employees may not be shared between a distribution utility and its affiliated competitive provider. An employee is considered to be shared if the employee performs work for both entities. The employees of a distribution utility and the employees of an affiliated competitive provider must be served by separate telecommunications and computer systems. An employee who is transferred from an affiliated competitive provider to the distribution utility cannot return to the affiliated competitive provider for at least one year.

1. Exemption.

   The Commission may approve an exemption from this subsection upon a finding that:

a. Sharing employees or facilities would be in the best interest of the public;
b. Sharing employees or facilities would have no anticompetitive effect; and
c. The costs of any shared employees or facilities can be fully and accurately allocated between the distribution utility and the affiliated competitive provider.

Any request for an exemption must be accompanied by a full and transparent allocation of costs for any shared facilities or general and administrative support services. The Commission shall allow a reasonable opportunity for parties to submit comments regarding any request for an exemption. An exemption is valid until the Commission determines that modification or removal of the exemption is necessary.

ARKANSAS

Rule: Arkansas PSC Order No. 7 Docket No. 06-112-R Affiliate Transaction Rules[13]
The purpose of these rules is to ensure that all transactions among or between a public utility and any affiliates or divisions do not result in rates which are unreasonable and in violation of Ark. Code Ann. §§ 23-4- 103 and 23-4-104; to ensure that the rates charged by public utilities do not provide any subsidy to affiliates or divisions of the public utility which are involved in non-utility activities or which provide services to the public utility; to prevent anti-competitive behavior, and market manipulation or market power; and to prevent financial risk to rate-regulated public utility operations which may arise from business endeavors of an unregulated affiliate.

Rule IV - Affiliate Financial Transactions

A. Except as otherwise provided in this Rule IV or in other applicable law, a public utility shall not engage in any affiliate transaction in which the public utility:
    1. provides to or shares with any affiliate any financial resource or financial benefit, including but not limited to any:
        a. loan, extension of credit, guarantee or assumption of debt, indemnification, pledge of collateral; or
        b. encumbrance of or restriction on the disposition of any public utility;
    2. incurs any debt for purposes of investing in, or otherwise supporting, any business other than the provision of public utility service in Arkansas.

B. A public utility may obtain financial resources from an affiliate for public utility purposes, provided that the cost to the public utility of such financial resource does not exceed the lower of market price or the affiliate's fully allocated cost.

C. Rule IV shall not apply to or prohibit any of the following unless the Commission finds, after notice and hearing, unless waived by the parties, and consistent with applicable law, that such arrangement is not consistent with the purposes of these rules as defined in Rule II:
    1. An inter-affiliate financial transaction integral to an affiliate transaction for goods or services subject to and consistent with Rule V.
    2. The payment of dividends by a public utility to affiliates that own stock in such public utility (including adjustments to the capital accounts of divisions within the public utility).
    3. Transactions in connection with the factoring of accounts receivable, the creation and use of special Purpose financing entities, and the creation and use of money pool or cash management arrangements, subject to safeguards to prevent cross-subsidization and unauthorized pledges or encumbrances of public utility assets.
    4. Any loan, extension of credit, guarantee, assumption of debt, restriction on disposition of assets, indemnification, investment, or pledge of assets by a public utility for the purpose of supporting the utility related business activities of an affiliate.
    5. Any debt incurred by a public utility, including debt that imposes any encumbrance on, or any restriction placed on the disposition of any assets of, the public utility for the purpose of supporting the utility related business activities of an affiliate.
    6. Receipt by a public utility of capital contributions or proceeds from the sale of common stock to its parent holding company.
    7. Receipt by a public utility of financial resources from an affiliate for any non-public utility Purpose, provided that the cost to the public utility of such financial resource shall not be recovered from the public utility's customers in Arkansas.

[13] http://www.apscservices.info/Rules/affiliate_transaction_rules.pdf

8. Any financing arrangement involving a public utility and any affiliate that was in existence as of the effective date of these rules; provided the public utility files with the Commission a description of each such arrangement involving a public utility and any affiliate having an annual value or amount in excess of $350,000 and such filing is received within 120 days of the effective date of these rules.
9. Any other affiliate financial transaction proposed by a public utility, provided that:
    a. the public utility first files with the Commission an application for approval of such proposed affiliate financial transaction including a detailed description thereof and any relevant supporting documentation, and
    b. the Commission finds, after notice and hearing, unless waived by the parties, on such application, that the proposed affiliate financial transaction is consistent with the purposes of these rules as defined in Rule II.

D. Nothing in this Rule IV shall alter or amend the Commission's authority or the obligation of public utilities set out in Rule 5.01 of the Commission's Rules of Practice and Procedure.

Rule V Affiliate - Transactions Other Than Financial Transactions

A. Except as otherwise provided in this Rule V, or in other applicable law, with respect to an affiliate transaction involving assets, goods, services, information having competitive value, or personnel, a public utility shall not:
    1. receive anything of value, unless the compensation paid by the public utility does not exceed the lower of market price or fully allocated cost of the item received; and,
    2. provide anything of value, unless the compensation received by the public utility is no less than the higher of market price or fully allocated cost of the item provided.

B. Rule V shall not apply to or prohibit any of the following unless the Commission finds, after notice and hearing, unless waived by the parties, and consistent with applicable law, that such arrangement is not consistent with the Purposes of these rules as defined in Rule II:
    1. Exchanges of information:
        a. necessary to the reliable provision of public utility service by a public utility, provided such exchange occurs consistently with guidelines published by the utility and applied equally to affiliates and nonaffiliate entities;
        b. required by or necessary to comply with federal statutes or regulations; or,
        c. between or among a public utility, its parent holding company, a service company and any affiliated rate-regulated utility in another State of the United States.
    2. The provisions of shared corporate support services, at fully allocated cost, between or among a public utility and any affiliate, including a service company.
    3. The provision, at fully allocated cost, of assets, goods, services, or personnel between or among a public utility and a affiliated rate-regulated utility in another State of the United States.
    4. The provision of assets, goods, services, information having competitive value, or personnel, at a price determined by competitive bidding or pursuant to a regulatory filed or approved tariff or contract.
    5. Any other affiliate transaction proposed by a public utility to be exempted from Rule V.A provided that
        a. the public utility first files with the Commission an application for an exemption of such proposed affiliate transaction from the requirements of Rule V.A, including a detailed description of the proposed transaction and any relevant supporting documentation, and

b. the Commission finds, after notice and hearing, unless waived by the parties, on such application and consistent with applicable law, that the proposed exemption is consistent with the Purposes of these rules as defined in Rule II.

Rule VI Books, Records and Procedures

A. Recordkeeping

1. The public utility shall:
    a. keep books and records separately from the books and records of its affiliates; and,
    b. maintain such books and records in accordance with the applicable rules and orders of the Commission, and with Generally Accepted Accounting Principles (GAAP) as amended;

   provided, that, any multi-jurisdictional public utility whose Arkansas rates are set pursuant to jurisdictional allocations among such public utility's various regulatory jurisdictions shall not be required to keep books and records other than on a combined basis including all its utility business.
2. Such books and records shall contain all information necessary to:
    a. Identify all affiliate transactions in which the public utility participated; and,
    b. Identify and allocate or impute all revenues and costs (both direct and indirect) associated with all such affiliated transactions.
3. Upon the creation of a new affiliate that will participate in affiliate transactions with a public utility, the utility shall, no later than 60 days after the creation of such affiliate, notify the Commission by letter to the Secretary of the Commission of the creation of such new affiliate, which notice shall include an explanation of how the public utility will implement these rules with respect to such new affiliate.
4. Each public utility shall maintain, for at least five years, records of each affiliate transaction in which it participated, and the records shall:
    a. Be made contemporaneously with each affiliate transaction;
    b. Be in a readily retrievable format, and;
    c. Include, for each affiliate transaction;
        (1) The identity of the affiliate involved in the affiliate transaction;
        (2) The commencement and termination dates of the affiliate transaction;
        (3) a description of the affiliate transaction, including the nature and quantity of value provided and received;
        (4) the dollar amount of the affiliate transaction and the manner in which such dollar amount was calculated;
        (5) all other terms of the affiliate transaction;
        (6) the direct and indirect costs associated with the affiliate transaction, including any allocation formula used to attribute indirect costs; and,
        (7) all information necessary to verify compliance with these rules and the accuracy of amounts stated on the public utility's books and records, such information to include, but not be limited to:

(a) invoices, vouchers, communications, journal entries, workpapers; and,
(b) information supporting the price of each affiliate transaction, including but not limited to the cost and allocation method of the affiliate transaction and, when the cost was the result of a competitive bidding process, the market price and basis for the market price of the affiliate transaction; and,

d. be summarized and said summary for the prior calendar year shall be filed annually with the Commission as part of the annual report required by Rule IX. Unless otherwise ordered by the Commission, a public utility may satisfy the requirement of this Rule VI.A.4.d by filing with the Commission a copy of Federal Energy Regulatory Commission Form 60, Annual Report of Centralized Service Companies.

5. Each public utility shall file contemporaneously with its annual report under Rule VI.A.4.d the following information: a summary report indicating the aggregate dollar amount of all transactions described in Rule III.G(1), (2), (3), and (4) which the utility has conducted with each affiliate, as defined under Rule III.A, including the name of each such affiliate.
6. Each public utility shall maintain, update annually, train appropriate employees in, and (within 120 days following the effectiveness of these rules, and thereafter, to the extent of material changes, in each annual report required under Rule IX) file with the Commission, written procedures which ensure compliance with these rules; and, such written procedures shall include, at a minimum:
    a. all internal rules, practices, financial record keeping requirements, and other policies governing affiliate transactions among or between the public utility and its affiliates;
    b. the names and addresses of all the public utility's affiliates that participate in affiliate transactions with the public utility;
    c. an organizational chart depicting the ownership relationships between the public utility and those affiliates that participate in affiliate transactions with the public utility;
    d. a description of the types of assets, goods and services provided in any existing affiliate transaction lasting more than one year; and,
    e. a cost allocation manual or other description of the methods used to determine allocations in affiliate transactions.

B. The Commission shall have access to all books and records, of a public utility and its affiliates that participate in transactions with the public utility, to the extent such access is relevant to determining compliance with all applicable Arkansas statutes and rules or establishing rates subject to the Commission's jurisdiction.

NEW HAMPSHIRE

Rule: Chapter PUC 2100 Affiliate Transaction Rules[14]

Subsidization

(d) Shared corporate support permitted by this section shall not:

(1) Allow or provide a means for the transfer of customer information or distribution system information from the utility to the competitive affiliate;

(2) Create the opportunity for preferential treatment, unfair competitive advantage, or cross subsidization of competitive affiliates; or

(3) Create customer confusion.

Market Value Asset Transfers

Puc 2105.09 Transfer of Goods, Services, and Assets.

(a) To the extent that these rules do not prohibit transfers between a utility and its affiliates, the permitted transfers shall be subject to the following pricing provisions:

(1) A utility may sell, lease, or otherwise transfer to an affiliate an asset, the cost of which has been reflected in the utility's rates for regulated service, provided that the price charged the affiliate is the highest of the net book value, fully loaded cost, and the current market value of the asset, as applicable;

(2) A utility may sell, lease, or otherwise transfer to an affiliate assets other than those subject to (1) above, and may also provide services to an affiliate, provided that the price charged for such asset or service is the highest of the net book value, fully loaded cost, and its current market value, as applicable;

(3) An affiliate may sell, lease, or otherwise transfer an asset to a utility, and may provide services to a utility, provided that the price charged to the utility is the lesser of the market value, the net book value, and the fully loaded cost, as applicable;

(4) Joint or shared costs allowed in Puc 2105.03 and Puc 2105.04 shall be allocated and shall be priced to the utility and its competitive affiliate based on fully loaded costs;

(5) Products or services which are price regulated by a state or federal agency shall be priced 'at the tariffed or regulated rate;

(6) In cases where more than one state commission regulates the price of products or services provided to or by a utility, this commission's pricing provisions shall govern such transactions in New Hampshire; and

(7) For purposes of this section, the market value of any asset sold, leased, or otherwise transferred, shall be determined based on the highest price that the asset could have reasonably realized after an open and competitive sale.

Customer Information

Puc 2103.02 Preferences to Competitive Affiliates Regarding Products and Services, Distribution System Information, and Customer Information.

(a) A utility shall provide its products and services, including but not limited to terms and conditions, pricing, and timing, to competitive affiliates, and to non-affiliated competitors in a non-discriminatory manner;

(b) A utility shall provide access to distribution system information to its competitive affiliates and to non-affiliated competitors in a non-discriminatory manner; or

(c) A utility shall not allow an employee, officer, director, or agent of a competitive affiliate access to customer information except as permitted in accordance with Puc 2104.01.

PART Puc 2104 DISCLOSURE AND INFORMATION

Puc 2104.01 Release of Customer Information to Competitive Affiliate. A utility shall not release any customer information to a competitive affiliate without the prior written authorization of the customer.

[14] https://www.puc.nh.gov/Regulatory/Rules/PUC2100.pdf

Puc 2105.04 Shared Services

(d) Shared corporate support permitted by this section shall not: (1) Allow or provide a means for the transfer of customer information or distribution system information from the utility to the competitive affiliate;

Puc 2105.06 Employee Transfers. All employee transfers between a utility and its competitive energy affiliates shall comply with the following provisions:

(j) Utility employees transferring from the utility to a competitive energy affiliate and shared utility employees shall not use customer information and distribution system information in a discriminatory fashion to the benefit of the competitive energy affiliate or to the detriment of non-affiliated energy competitors;

Joint Advertising and Marketing

Puc 2105.07 Joint Advertising and Marketing. A utility shall not:

(a) Engage in joint advertising or marketing programs of any sort directly or indirectly with its competitive energy affiliates.

(b) This section shall not prohibit a utility from participating, on a nondiscriminatory basis, in non-sales meetings with its competitive energy affiliates or any non-affiliated energy competitor to discuss technical or operational subjects.

Sharing Employees

Puc 2105.04 Shared Services.

(e) Examples of services, systems, and personnel that shall not be shared include, but are not limited to:

(1) Employee recruiting;

(f) Any shared corporate support shall be priced, reported, and conducted in accordance with the separation and information standards set forth in these rules and in other applicable commission pricing and reporting requirements.

Corporate Infrastructure

Puc 2105.02 Shared Facilities, Services and Data.

(a) Except to the extent necessary to perform shared corporate support functions permitted under Puc 2105.04, a utility shall not:

(1) Share office space, office equipment, services, or computer data with its competitive energy affiliates; or

(2) Allow its competitive energy affiliates to access its computer data.

(b) The separation required by this section shall, at a minimum, be accomplished by methods such as:

(1) Use of secure passwords and firewalls; and

(2) Occupation of separate floors of an office building, or distinct wings.

Corporate Identification/Logo usage

Puc 2105.08 Corporate Identification.

(a) Subject to Puc 2105.07, a utility may allow any affiliate to identify itself through the use of a name, logo, or both as an affiliate of the utility, provided that such use by a competitive energy affiliate shall be accompanied by a disclaimer stating that:

(1) No advantage accrues to customers or others in the use of the utility's services as a result of that customer or others dealing with the competitive energy affiliate; and

(2) The customer or others need not purchase any product or service from any competitive energy affiliate in order to obtain services from the utility on a non-discriminatory basis.

(b) The disclaimer referred to in (a) above shall be written or spoken, or both, as is appropriate given the context of the use of the name or logo.
(c) The disclaimer referred to in (a) above shall not be required where the name or logo is merely being used for identification of assets or employees and it is impractical to include such disclaimer, such as on the competitive energy affiliate's vehicles, business locations, equipment, employee business cards, or clothing.
(d) A utility shall not provide to its competitive affiliates:

(1) Advertising space in its billing envelopes used for regulated utility services unless it provides access on the same terms and conditions for all similarly situated non-affiliated competitors; or

(2) Access to any other form of written communication with utility customers unless it provides access on the same terms and conditions to all similarly situated non-affiliated competitors.

RHODE ISLAND

Rule: Public Utilities Commission Regulations for Utility Interaction with Gas Marketers R.I.G.L. § 39-1-11 and § 39-3-7[15]

INTRODUCTION

These regulations, enacted pursuant to R.I.G.L. § 39-1-11 and § 39-3-7, set forth the entry requirements for gas marketers and the standards of conduct for utilities with respect to gas marketers. They further apply to transactions, direct or indirect, between public utilities and gas marketers. The standards are intended to promote fair competition and a level playing field among all participants in the natural gas marketplace in Rhode Island.

"Gas marketer" means an entity which markets gas and gas-related services, and is authorized to provide services in Rhode Island in accordance with Section III of these regulations.

"Marketing affiliate" means a gas marketer residing within a corporate structure that includes a Rhode Island public utility. A marketing affiliate includes any arm of the utility or parent of the utility, either owned or subject to common control, or part of a separate legal entity, which functions as a gas marketer.

STANDARDS OF CONDUCT

A. PERSONNEL

1. (a) A utility employee may not do any of the following on behalf of a gas marketer:

Purchase gas, pipeline capacity or storage capacity. Market or sell gas and related services. Price or administer transportation upstream of the city gate and related tariff services, non-tariff and competitive products and services. Hire and train gas marketer employees.

(b) A utility employee may offer to sell or otherwise proffer gas, pipeline capacity or storage capacity, and related services to a gas marketer or to others on behalf of the utility. A utility employee may respond to transportation and related tariff service requests or inquires from the gas marketer as well as from others on behalf of the utility.

2. (a) A marketing affiliate may receive corporate-level support affiliated with the preparation of joint financial statements and shareholder relations.

(b) The use of shared employees shall be minimized. A shared employee shall record time in a manner consistent with the master service framework, if applicable.

3. The use of utility operating personnel, as established in a master service framework is permitted, subject to all of the following limitations:

(a)The use of a utility employee by a gas marketer or the use of a gas marketer employee by the utility is not allowed if it is likely to result in the sharing or exposure of market sensitive information or an unfair competitive advantage for either party.

Advice and assistance in human resource management shall be limited to general personnel and corporate matters. It shall not include job or position specific hiring or training advice or assistance dealing with the functions to be performed by the employee.

[15] http://www.ripuc.org/utilityinfo/natgas/gasregsmarket.html

4. Advice or assistance with regard to engineering and construction matters as well as gas consulting services shall be made available to all gas marketers on an equal basis

5. Utility operating personnel may engage in transactions involving natural gas supply, capacity, or both, with a gas marketer, but may not share with the gas marketer any information related to sales by other gas marketers of natural gas supply, capacity, or both.

6. An individual may not be an officer of both a utility and a gas marketer.

ADVERTISING

Promotional materials may allow marketers to be identified as affiliated with utilities. However, neither utilities nor marketing affiliate personnel may represent that any advantage accrues to customers or others in the use of the utility's services as a result of that customer or others dealing with the marketing affiliate. Joint promotions between the utility and the marketing affiliate are prohibited, unless such promotions are offered to all other competitors under the same terms and conditions. A utility and a marketing affiliate may not share trademarks or logos.

STANDARDS FOR COMPETITIVE GAS MARKETING

MARKETING LIMITATIONS

1. Utilities shall not provide leads to gas marketers and shall refrain from giving any appearance that the utility speaks on behalf of any gas marketer. Nor shall the marketing affiliate suggest that its receives preferential treatment as a result of its affiliation. If a customer requests information about marketers, a utility should provide a list of all approved gas marketers, including its affiliate, but should not promote its affiliate.

2. To the extent a utility provides a marketing affiliate information related to transportation which is not readily available or generally known to other gas marketers, including but not limited to utility customer lists, it must contemporaneously provide that information to all gas marketers on its system. A utility must file with the Commission procedures that will enable the Commission to determine how the utility is complying with this standard.

3. Utilities shall not condition or tie their agreements to release interstate pipeline capacity to any agreement by a gas supplier, customer or other third party relating to any service in which their marketers are involved.

B. CONDITIONS FOR COMPETITIVE SALES

1. A utility shall communicate with all market participants when it has gas supply or capacity, or both, available for release.

2. A utility may not sell gas supply or capacity to a marketing affiliate at less than a market-clearing price without either posting on an electronic bulletin board that is a well known source or placing an offering that would constitute an offering to the market of capacity or supply.

3. Utilities must apply any tariff provision relating to transportation in the same manner to the same or similarly situated gas marketers if there is discretion in the application of the provision.

4. Utilities shall uniformly enforce tariff provisions for which there is no discretion in the application of the provision for all transportation customers.

5. Utilities may not, through a tariff provision or otherwise, give a gas marketer or its customers preference over other gas marketers or customers in matters relating to transportation including, but not limited to, scheduling, balancing, metering, storage, standby service or curtailment policy. Utilities may not sell to their marketing affiliates gas and capacity on a bundled basis, unless such bundled service is offered contemporaneously on a similar basis to other gas marketers.

6. If a utility offers its marketing affiliate, or a customer of its affiliate, a discount, rebate, or fee waiver for transportation services, balancing, meters or meter installation, storage, standby service or any other service offered to shippers, it must contemporaneously offer the same discount, rebate, or fee waiver to all similarly situated non-affiliated gas marketers or customers by providing appropriate notification to the non-affiliated gas marketers or customers. A utility must file with the Commission procedures that will enable the Commission to determine how the utility is complying with this standard.

7. Utilities must process all similar requests for transportation in the same manner and within a similar period of time.

8. Utilities shall not disclose to any gas marketer any information obtained in connection with providing delivery or related services to another gas marketer or customer, a potential supplier or customer, any agent of such customer or potential supplier, or any other entity seeking to supply gas to a customer or potential customer.

VI. ADMINISTRATIVE STANDARDS

ACCOUNTING AND REPORTING

1. Utilities and their marketing affiliates shall keep separate books of accounts and records.

2. A utility shall keep sufficient records of transactions with a marketing affiliate to document, for all consummated sales or release transactions, all offers of, bids for, requests for, and sales of natural gas supplies, capacity, or both, including the evaluation criteria for acceptance and rejection. A utility shall maintain documentation of such marketing affiliates transactions, such as phone logs, so that the utility's activities can be audited.

3. If a utility provides tariffed on-system distribution services at a discounted rate, the utility shall maintain complete and accurate records of all service requests, service refusals, and service transactions arising under its tariffs.

4. A utility shall publicly disclose sales at wholesale or transfers of gas supply or capacity and related services for all transactions that are not tariffed transactions. A utility shall report all transactions within 30 days following the end of the month in which the transaction occurred.

5. For each transaction under Rule VI.A.4(a), disclosure shall include all of the following:

The date of the contract or arrangement.

The period covered.

The type of transaction (commodity, capacity, storage balancing, etc.).
Units sold or transferred.

Conditions or restrictions placed on the transaction.

The price for the transaction, including separate prices for each service offered on a stand-alone basis.

ENFORCEMENT

Should a utility or gas marketer be found to have violated these regulatory requirements, it will be subject to appropriate sanctions as determined by the Commission or any other entity having jurisdiction.

NEW JERSEY

Rule: NJ Administrative Code Title 14:4-3[16]

(a) This subchapter shall apply as follows:

1. N.J.A.C. 14:4-3.3 through 3.5 set forth standards of conduct applicable to transactions, between an electric public utility or gas public utility, including a related competitive business segment of an electric or gas public utility, and a related competitive business segment of the electric or gas public utility holding company providing or offering competitive services to retail customers in New Jersey or the public utility holding company itself providing or offering competitive services to retail customers in New Jersey;

2. N.J.A.C. 14:4-3.6 sets forth standards of conduct applicable to electric and/or gas public utilities and the related competitive business segments of each electric public utility and gas public utility, as well as the transactions, interactions and relations between an electric and/or gas public utility and a related competitive business segment of an electric and/or gas public utility; and

3. N.J.A.C. 14:4-3.7 through 3.9 address regulatory oversight, dispute resolution and violations and penalties applicable to electric and/or gas public utilities regarding affiliate relations, fair competition, accounting standards and related reporting requirements.

(b) A New Jersey electric and/or gas public utility, which is also a multi-state electric and/or gas public utility and subject to the jurisdiction of other state or Federal regulatory commissions, may file an application, requesting a limited exemption from this subchapter or part(s) thereof, for transactions between the electric and/or gas public utility and its affiliate(s) solely in its role of serving its jurisdictional areas wholly outside of New Jersey. To obtain such an exception, the applicant shall meet the requirements of N.J.A.C. 14:1-1.2(b).

Nondiscrimination

(a) An electric and/or gas public utility shall not unreasonably discriminate against any competitor in favor of its affiliate(s) or related competitive business segment.
(b) An electric or gas public utility shall not represent that, as a result of the relationship with the electric and/or gas public utility or for any other reason, a related competitive business segment of its public utility holding company, or customers of a related competitive business segment of its public utility holding company will receive any different treatment by the electric and/or gas public utility than the treatment the electric and/or gas public utility provides to other, unaffiliated companies or their customers.
(c) An electric or gas public utility shall not provide a related competitive business segment of its public utility holding company, or customers of a related competitive business segment of its public utility holding company, any preference (including, but not limited to, terms and conditions, pricing, or timing) over non-affiliated suppliers or their customers in the provision of products and/or services offered by the electric and/or gas public utility.
(d) Transactions between an electric and/or gas public utility and a related competitive business segment of its public utility holding company shall be prohibited, except for the following:

1. Tariffed products and services;

2. The sale or purchase of goods, property, products or services made generally available by the electric and/or gas public utility, by the PUHC or a related competitive business segment of its public utility holding company to all market participants through an open, competitive bidding process; or

[16] https://advance.lexis.com/documentpage/?pdmfid=1000516&crid=fd1cf359-9fc0-45c0-a207-b4629aa27d50&pdistocdocslideraccess=true&config=00JAA1YTg5OGJlYi04MTI4LTRlNjQtYTc4Yi03NTQxN2E5NmE0ZjQKAFBvZENhdGFsb2ftaXPxZTR7bRPtX1Jok9kz&pddocfullpath=%2Fshared%2Fdocument%2Fadministrative-codes%2Furn%3AcontentItem%3A5V8M-DSM0-00BY-K0JN-00008-00&pdcomponentid=234124&pdtocnodeidentifier=AAUAAEAAFAAB&ecomp=bgqfkkk&prid=c69df815-1e1b-4d1e-8aa0-22620d090d85

3. As provided for in N.J.A.C. 14:4-3.5(g) and (h), in (i) and (j) or 3.6(a) through (f), provided the transactions specified in N.J.A.C. 14:4-3.6 comply with all other applicable rules.

(e) An electric and/or gas public utility shall provide access to utility information, services, and unused capacity or supply on a non-discriminatory basis to all market participants, including affiliated and non-affiliated companies, except as provided for in N.J.A.C. 14:4-3.4, 3.5 and 3.6, provided the transactions specified in N.J.A.C. 14:4-3.6, Competitive utility products and/or services, comply with all other applicable rules.

1. If an electric and/or gas public utility provides supply, capacity, services, or information to a related competitive business segment of its public utility holding company, it shall make the offering available, via a public posting, on a non-discriminatory basis to non-affiliated market participants, which include competitors serving the same market as the related competitive business segment of the electric and/or gas public utility's holding company.

(*o*) Except as otherwise provided by this subchapter, an electric and/or gas public utility shall not provide any assistance, aid or services to its PUHC or related competitive segment of the PUHC if related to customer enrollment, marketing or business development unless offered to all competitors on a nondiscriminatory basis. By way of example, but not limited to, an electric or gas public utility shall not:

1. Provide leads to its PUHC or a related competitive business segment of its public utility holding company;

2. Solicit business on behalf of its PUHC or a related competitive business segment of its public utility holding company;

3. Acquire information on behalf of or to provide to its PUHC or a related competitive business segment of its public utility holding company;

4. Share market analysis reports or any other type(s) of proprietary or non-publicly available reports, including, but not limited to, market, forecast, planning or strategic reports, with its PUHC or a related competitive business segment of its public utility holding company;

5. Share customer usage or end use equipment information, obtained during the course of providing electric and/or gas public utility services, with its PUHC or a related competitive business segment of its public utility holding company;

6. Request authorization from its customers to pass on customer information exclusively to its PUHC or a related competitive business segment of its public utility holding company;

7. Represent or imply that the electric and/or gas public utility speaks on behalf of its PUHC or a related competitive business segment of its public utility holding company or that the customer will receive preferential treatment as a consequence of conducting business with the related competitive business segment of its public utility holding company; or

8. Represent or imply that its PUHC or a related competitive business segment of its public utility holding company speaks on behalf of the electric and/or gas public utility.

Information Disclosure

(a) An electric and/or gas public utility may provide individual proprietary information to its PUHC or a related competitive business segment of its PUHC, only with prior affirmative customer written consent, or as otherwise authorized by the Board, and only if that same proprietary information is provided to unaffiliated entities on a non-discriminatory basis with prior affirmative customer written consent, or as otherwise authorized by the Board.

(b) An electric and/or gas public utility shall make available non-customer specific non-public information acquired as a result of operating the public utility's distribution system, including information about an electric and/or gas public utility's natural gas or electricity purchases, sales, or operations or about an electric and/or gas public utility's gas-related goods or services, electricity-related goods or services, to a related competitive business segment of its public utility holding company only if the electric and/or gas public utility makes such information available, via a public posting, to all other service providers on a nondiscriminatory basis, and keeps the information open to public inspection.

1. An electric or gas public utility is permitted to exchange proprietary information on an exclusive basis with its PUHC or a related competitive business segment of its public utility holding company, provided it is necessary to exchange this information in the provision of the corporate support services permitted by N.J.A.C. 14:4-3.5(i) and (j).

2. The PUHC's or related competitive business segment's use of such proprietary information is limited to its use in conjunction with the permitted corporate support services, and is not permitted for any other use.

(h) An electric and/or gas public utility shall maintain complete and accurate records, documenting all tariffed and non-tariffed transactions with its PUHC and a related competitive business segment of its public utility holding company, including, but not limited to, all waivers of tariff or contract provisions.

(i) An electric and/or gas public utility shall maintain such records in compliance with the time frame required by N.J.A.C. 14:5-5.2 or longer if another government agency so requires.

(j) The electric and/or gas public utility shall make such records available for Board and/or Rate Counsel review upon 72 hours notice, or at a time mutually agreeable to the electric and/or gas public utility and the Board and/or Rate Counsel.

(k) An electric and/or gas public utility shall maintain a record of all contracts and related bids for the provision of work, products and/or services to and from the electric and/or gas public utility to and from the PUHC or related competitive business segments of its public utility holding company in compliance with N.J.A.C. 14:5-5.2 or longer if another government agency so requires.

Separation

(a) An electric and/or gas public utility, its PUHC and related competitive business segments of its public utility holding company shall be separate corporate entities.

(b) An electric and/or gas public utility and related competitive business segments of its public utility holding company shall keep separate books and records.

(e) An electric and/or gas public utility shall not share office space, office equipment, services, and systems with a related competitive business segment of its public utility holding company, except to the extent appropriate to perform shared corporate support functions as follows:

1. An electric and/or gas public utility may access the computer or information systems of a competitive related business segment of its PUHC or allow a related competitive business segment of its PUHC to access its computer or information systems, for purposes of the sharing of computer hardware and software systems and may share office space, office equipment, services and systems, provided adequate system protections are in place to prevent the accessing of information or data between the utility and its affiliate(s), which would be in violation of this subchapter.

i. Prevention of unauthorized access to computer and information systems shall be specifically addressed as part of an electric and/or gas public utility's compliance plan submitted pursuant to N.J.A.C. 14:4-3.7(b).

(i) An electric and/or gas public utility, its public utility holding company and related competitive business segments, or separate business segments of the public utility holding company created solely to perform corporate support services may share joint corporate oversight, governance, support systems and personnel. Any shared support shall be priced, reported and conducted in accordance with N.J.A.C. 14:4-3.4 and this section, as well as other applicable Board pricing and reporting rules.

(j) Such joint utilization shall not allow or provide a means for the transfer of confidential customer or market information from the electric and/or gas public utility to a related competitive business segment of its public utility holding company in violation of this subchapter, create the opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of a related competitive business segment of the public utility holding company. In the compliance plan required pursuant to N.J.A.C. 14:4-3.7(a) through (e), a senior corporate officer from the electric and/or gas public utility and public utility holding company shall verify the adequacy of the specific mechanisms and procedures in place to ensure the electric and/or gas public utility follows the mandates of this subchapter, and to ensure the electric and/or gas public utility is not utilizing joint corporate support services as a conduit to circumvent this subchapter.

(k) A related competitive business segment of a public utility holding company shall not trade upon, promote, or advertise its relationship with the electric and/or gas public utility, nor use the electric and/or gas public utility's name and/or logo in any circulated material, including, but not limited to, hard copy, correspondence, business cards, faxes electronic mail, electronic or hardcopy advertising or marketing materials, unless it discloses clearly and conspicuously or in audible language that:

1. The PUHC or related competitive business segment of the public utility holding company "is not the same company as the electric and/or gas public utility";

2. The PUHC or related competitive business segment of the public utility holding company is not regulated by the Board; and

3. "You do not have to buy products in order to continue to receive quality regulated services from the electric and/or gas public utility."

(l) The requirement of the name and/or logo disclaimer set forth in (k) above is limited to the use of the name and/or logo in New Jersey.

(m) An electric and/or gas public utility, through action or words, shall not represent that, as a result of its PUHC or a related competitive business segment of the public utility holding company's relationship with the electric and/or gas public utility, its affiliate(s) will receive any different treatment than other product and/or service providers.

(n) An electric and/or gas public utility shall not offer or provide to its PUHC or a related competitive business segment of its public utility holding company advertising space in the electric and/or gas public utility's billing envelope(s) or any other form of electric and/or gas public utility's written communication to its customers, unless it provides access to all other unaffiliated service providers on the same terms and conditions.

(o) An electric and/or gas public utility shall not participate in joint advertising or joint marketing activities with its PUHC or related competitive business segments of its public utility holding company, which activities include, but are not limited to, joint sales calls, through joint call centers or otherwise, or joint proposals (including responses to requests for proposals) to existing or potential customers.

1. The prohibition in (o) above notwithstanding, at a customer's unsolicited request, an electric and/or gas public utility may participate, on a nondiscriminatory basis, in non-sales meetings with its PUHC or a related competitive business segment of its public utility holding company or any other market participant to discuss technical or operational subjects regarding the electric and/or gas public utility's provision of distribution service to the customer;

2. Except as otherwise provided for by this subchapter, an electric and/or gas public utility shall not participate in any joint business activity(ies) with its PUHC or a related competitive business segment of its public utility holding company, which includes, but is not limited to, advertising, sales, marketing, communications and correspondence with any existing or potential customer;

3. An electric and/or gas public utility shall not participate jointly with its PUHC or a related competitive business segment of the PUHC in trade shows, conferences, or other information or marketing events held in New Jersey. For the purposes of this paragraph, "joint participation" includes any sharing of costs or facilities associated with the event, such as using the same signage, handouts, transport, advertising, booth or space, or presentation time; and

4. An electric and/or gas public utility shall not subsidize costs, fees, or payments with its PUHC or related competitive business segments of its public utility holding company associated with research and development activities or investment in advanced technology research.

(p) Except as permitted in (i) and (j) above, an electric and/or gas public utility and its PUHC or related competitive business segments of its public utility holding company, that are engaged in offering merchant functions and/or electric related services or gas related services shall not employ the same employees or otherwise retain, with or without compensation, as employees, independent contractors, consultants, or otherwise.

1. Other than shared administration and overheads, employees of the competitive services business unit of the public utility holding company shall not also be involved in the provision of non-competitive utility and safety services, and the competitive services shall be provided utilizing separate assets than those utilized to provide non-competitive utility and safety services.

MICHIGAN

Rule: Public Act 141, MCL 460.10 Code of Conduct[17]

This code of conduct is intended to promote fair competition by establishing measures to prevent cross-subsidization, information sharing, and preferential treatment between the regulated and unregulated operations of electric utilities, alternative electric suppliers, and their affiliates. An electric utility or alternative electric supplier is prohibited from taking punitive action against any individual (including an employee) or entity who files a complaint with the electric utility, the alternative electric supplier, or the Commission, or otherwise causes an alleged violation of this code of conduct to come to the attention of the Commission.

II. Separation

An electric utility or alternative electric supplier that offers, itself or through its affiliates, both regulated and unregulated services shall do so with the structural or functional separation needed to prevent cross-subsidization, information sharing, and preferential treatment between the regulated and unregulated services. This includes, but is not limited to, the following:

A. An electric utility shall not offer unregulated services or products except through one or more affiliates or through other entities within the corporate structure, such as divisions.

B. An electric utility's or alternative electric supplier's regulated services shall not subsidize in any manner, directly or indirectly, the unregulated business of its affiliates or other separate entities.

C. An electric utility or alternative electric supplier shall maintain its books and records separately from those of its affiliates or other entities within its corporate structure. An electric cooperative offering unregulated services shall maintain an accounting system that allocates costs between its regulated and unregulated ventures on a fully allocated embedded cost basis, and any transfers of services, products, or property must be in compliance with the provisions of Section III, paragraph C.

D. An electric utility or alternative electric supplier and its affiliates or other entities within its corporate structure shall not share facilities, equipment, or operating employees, but may share computer hardware and software with documented protection to prevent discriminatory access to competitively sensitive information.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005138

E. An electric utility's or alternative electric supplier's operating employees and the operating employees of its affiliates or other entities within its corporate structure shall function independently of each other and maintain separate offices.

F. An electric utility or alternative electric supplier shall not finance or co-sign loans for affiliates.

G. An electric utility may transfer employees between the electric utility and any of its affiliates or other entities within the corporate structure as long as the electric utility documents those transfers and files semi-annually with the Commission a report of each occasion on which an employee of the electric utility became an employee of an affiliate or other entity within its corporate structure and/or an employee of an affiliate or other entity within its corporate structure became an employee of the electric utility.

H. An electric utility and its affiliates or other entities within the corporate structure and an alternative electric supplier and its affiliates or other entities within the corporate structure offering both regulated and unregulated services or products in Michigan shall not engage in joint advertising, marketing, or other promotional activities related to the provision of regulated and unregulated services, nor shall they jointly sell regulated and unregulated services.

I. An electric utility or alternative electric supplier offering regulated service in Michigan shall not suggest that it will provide any customer with preferential treatment or service by doing business with the electric utility or the alternative electric supplier, affiliates, or other entities within the corporate structure offering unregulated services or products, nor shall the electric utility or alternative electric supplier suggest that any customer will receive inferior treatment or service by doing business with an unaffiliated supplier.

J. An electric utility or alternative electric supplier offering regulated service in Michigan shall not condition or otherwise tie the provision of a regulated service or the availability of discounts, rates, other charges, fees, rebates, or waivers of terms and conditions for regulated service to the taking of any unregulated goods or services from the electric utility or alternative electric supplier, affiliates, or other entities within the corporate structure.

K. An electric utility or alternative electric supplier offering regulated service in Michigan shall not allow its affiliates to use its logo unless the affiliate includes, in a clearly visible position and easily readable by customers, the following statement:

"(Affiliate name) is not regulated by the Michigan Public Service Commission."

L. If an electric utility, its affiliate, or other entity within the corporate structure offers an unregulated service, any use of its logo shall include, in a clearly visible position and easily readable by customers, the following statement: "(Service) is not regulated by the Michigan Public Service Commission."

M. None of the provisions of this code shall be interpreted to require a cooperative electric utility or an independent investor-owned utility with fewer than 60 employees to maintain separate facilities, operations, or personnel, used to deliver electricity to retail customers, provide retail electric service, or to be an alternative electric supplier.

III. Discrimination

An electric utility or alternative electric supplier that offers, itself or through its affiliates, both regulated and unregulated services shall not unduly discriminate in favor of or against any party, including its affiliates. This includes, but is not limited to, the following:

A. An electric utility or alternative electric supplier that offers, itself or through its affiliates, both regulated and unregulated service shall not provide any affiliate or other entity within its corporate structure, preferential treatment or any other advantages that are not offered under the same terms and conditions and contemporaneously to other suppliers offering services or products within the same service territory or to customers of those suppliers. This provision includes, but is not limited to, all aspects of the electric utility's or alternative electric supplier's service, including pricing, responsiveness to requests for service or repair, the availability of firm and interruptible service, and metering requirements.

B. If an electric utility provides to any affiliate or other separate entity, or customers of an affiliate or other separate entity within its corporate structure, a discount, rebate, fee waiver, or waiver of its regulated tariffed terms and conditions for services or products, it shall contemporaneously provide notice of and offer the same discount, rebate, fee waiver, or waiver to all alternative electric suppliers operating within the electric utility's service territory or all alternative electric suppliers' customers.

C. If an electric utility or alternative electric supplier offering regulated service in Michigan provides services, products, or property to any affiliate or other entity within the corporate structure, compensation shall be based upon the higher of fully allocated embedded cost or market price. If an affiliate or other entity within the corporate structure provides services, products, or property to an electric utility or alternative electric supplier offering regulated service in Michigan, compensation for services and supplies shall be at the lower of market price or 10% over fully allocated embedded cost and transfers of assets shall be based upon the lower of fully allocated embedded cost or market price.

D. If an electric utility provides a customer or potential customer with the names of its affiliates or other entities within the corporate structure that are alternative electric suppliers, it shall do so only by distributing their names along with the names of all licensed alternative electric suppliers.

E. An electric utility or alternative electric supplier offering regulated service in Michigan shall not provide information or consultation to an affiliate or other entity within the corporate structure offering unregulated electric service in Michigan regarding a potential business arrangement between that affiliate or other entity within the corporate structure and a potential customer.

F. An electric utility or alternative electric supplier offering regulated service in Michigan shall not refer a customer or potential customer to an affiliate or other entity within the corporate structure offering unregulated electric service in Michigan, nor steer a potential customer away from a non-affiliated entity offering unregulated electric service in Michigan, nor shall the electric utility or alternative electric supplier offering regulated service in Michigan provide a customer or potential customer with advice or assistance regarding the selection of or relationship with an affiliate, other entity within the corporate structure, or other service provider offering unregulated electric service in Michigan.

IV. Disclosure of Information

Information obtained by an electric utility or alternative electric supplier in the course of conducting its regulated business in Michigan shall not be shared directly or indirectly with its affiliates or other entities within its corporate structure unless that same information is provided to competitors operating in the state on the same terms and conditions and contemporaneously. This provision includes, but is not limited to, the following:

A. Customer specific names and addresses shall not be provided to an affiliate or other entity within the corporate structure unless the same information is offered on the same terms and conditions, and contemporaneously, to all competitors.

B. Customer specific consumption or billing data shall not be provided to any affiliate or other entity within the corporate structure or alternative electric supplier without prior written approval of the customer. Once each calendar year a request for up to 12 months of historic usage or billing data may be made at no cost.

C. If an electric utility or alternative electric supplier offering regulated service in Michigan provides non-customer specific, or aggregated, customer information to its affiliate or other entity within its corporate structure, it must offer the same information on the same terms and conditions, in the same form and manner, and contemporaneously to all competitors.

D. An electric utility shall not provide its affiliates or other entities within its corporate structure with information about the distribution system, including operation and expansion, without offering the same information under the same terms and conditions, in the same form and manner, and contemporaneously to all licensed alternative electric suppliers.

E. An electric utility or alternative electric supplier offering regulated service in Michigan shall not provide any information received from or as a result of doing business with a competitor to an affiliate or other entity within its corporate structure without the written approval of the competitor.

V. Electric Utility – Alternative Electric Supplier Relationship

Except for instances covered by Section 10a(3) of 2000 PA 141 or other instances approved by the Commission, an electric utility shall not in any way interfere in the business operations of an alternative electric supplier. This provision includes, but is not limited to, the following:

A. An electric utility shall not give the appearance in any way that it speaks on behalf of any alternative electric supplier.

B. An electric utility shall not interfere in any manner in the contractual relationship between the alternative electric supplier and its customers unless such involvement is clearly permitted in the contract between the customer and the alternative electric supplier or in tariffs approved by the Commission.

VI. Compliance Plans

Each electric utility or alternative electric supplier shall file a code of conduct compliance plan within 60 days of the order on rehearing on this code of conduct by the Commission. The compliance plan shall:

A. Designate a corporate officer of the electric utility or alternative electric supplier who will oversee compliance with the code of conduct and be available to serve as the Commission's primary contact regarding compliance with the code.

B. Include an affidavit signed by the designated corporate officer certifying that the electric utility or alternative electric supplier will comply fully with the code of conduct.

C. Include a clear organization chart of the parent or holding company showing all regulated entities and affiliates and a description of all services and products provided between the regulated entity and its affiliates.

The electric utility or alternative electric supplier shall file revisions to its compliance plan needed to keep the information contained therein current.

In the compliance filing, the electric utility or alternative electric supplier may request a waiver from one or more provisions of this code of conduct. The electric utility or alternative electric supplier carries the burden of demonstrating that such a waiver will not inhibit the development or functioning of the competitive market.

VII. Oversight, Enforcement, and Penalties

A. An electric utility or alternative electric supplier shall maintain documentation needed to investigate compliance with the code of conduct. All documentation shall be kept at a designated company office in Michigan. The electric utility or alternative electric supplier shall make this information available for review upon request by the Commission or its Staff. The designated officer will either be available or make personnel available who are knowledgeable to respond to inquiries by the Commission or its Staff regarding compliance with the provisions of the code of conduct.

B. The electric utility or alternative electric supplier shall use a documented dispute resolution process separate from any process that might be available from the Commission. This dispute resolution process shall address complaints arising from application of the code of conduct. The electric utility or alternative electric supplier shall keep a log of all complaints, including: (1) the name of the person or entity filing the complaint, (2) the date the complaint was filed, (3) a written statement of the nature of the complaint, and (4) the results of the resolution process.

C. Each electric utility or alternative electric supplier shall file an annual report with the commission summarizing the number and types of complaints received and their resolution.

D. Penalties for violations of the code of conduct will be as provided in Section 10c of the Customer Choice and Electricity Reliability Act, MCL 460.10c.

ILLINOIS

Rule: Public Utilities Act for Electric Utilities, Illinois Commerce Commission
TITLE 83: PUBLIC UTILITIES CHAPTER I: ILLINOIS COMMERCE COMMISSION SUBCHAPTER c: ELECTRIC UTILITIES
PART 450 NON-DISCRIMINATION IN AFFILIATE TRANSACTIONS FOR ELECTRIC UTILITIES[18]

Non-Discrimination

a. Electric utilities shall not provide affiliated interests or customers of affiliated interests preferential treatment or advantages relative to unaffiliated entities or their customers in connection with services provided under tariffs on file with the Illinois Commerce Commission (Commission). This provision applies broadly to all aspects of service, including, but not limited to, responsiveness to requests for service, the availability of firm versus interruptible services, the imposition of special metering requirements, and all terms and conditions and charges specified in the tariff.

b. Except for corporate support transactions and services that have been declared competitive pursuant to Section 16-113 of the Act, transactions between an electric utility and one or more of its affiliated interests in competition with alternative retail electric suppliers that are not governed by tariff sheets on file with the Commission shall not discriminate in relation to unaffiliated alternative retail electric suppliers.

c. Electric utilities and affiliated interests shall not notify potential or actual customers, either directly or indirectly, advertise to the public, or otherwise communicate that the electric utility provides any advantages relating to the scheduling, transmission or distribution of electricity to affiliated interests or their customers relative to unaffiliated entities and their customers.

d. A utility shall process requests for similar services provided by the utility in the same manner and within the same time period for its affiliated interests in competition with alternative retail electric suppliers and for all similarly situated unaffiliated alternative retail electric suppliers and their respective customers.

e. If discretion is permitted in application of a tariff provision, electric utilities shall maintain a log detailing each instance in which it exercised discretion, as required in Section 450.140(d).

f. If an electric utility offers affiliated interests or customers of affiliated interests a discount, rebate, fee waiver or waivers of its ordinary terms and conditions for services provided under tariffs on file with the Commission, it shall contemporaneously offer the same discount, rebate, fee waiver or waivers of its ordinary terms and conditions to all unaffiliated entities and customers of unaffiliated entities, to the extent consistent with the tariffs, provided, however, that this subsection shall not apply to billing experiments under Section 16-106 of the Act or competitive services under Sections 16-102 and 16-116(b) of the Act. Electric utilities shall maintain a log of such instances, as required in Section 450.140(d).

g. A customer's eligibility for participation in any billing experiments under Section 16-106 of the Act or contracts for competitive service under Sections 16-102 and 16-116(b) of the Act, except for those competitive services that have been declared competitive pursuant to Section 16-113 of the Act, shall not be conditioned on, nor tied to, the taking of any goods and services from the utility's affiliated interests. Electric utilities shall inform customers of this prohibition in writing before customers begin taking such service.

h. When providing delivery services as a component of any bundled service, an electric utility shall not offer affiliated interests or the customers of affiliated interests a discount, rebate, fee waiver or waivers of its ordinary terms and conditions for delivery services on file with the Commission unless delivery services have been declared competitive service pursuant to Section 16-113 of the Act or the electric utility

[18] ftp://www.ilga.gov/jcar/admincode/083/08300450sections.html

contemporaneously offers the same discount, rebate, fee waiver or waivers of its ordinary terms and conditions to all unaffiliated entities and customers of unaffiliated entities.

Marketing and Advertising

a. An electric utility shall neither jointly advertise nor jointly market its services or products with those of an affiliated interest in competition with Alternative Retail Electric Suppliers (ARES).

b. Nothing in subsection (a) shall be construed as prohibiting an affiliated interest in competition with ARES from using the corporate name or logo of an electric utility or electric utility holding company.

Customer Information

a. Customer information shall be made available in accordance with Section 16-122 of the Public Utilities Act [220 ILCS 5/16-122], without preference to affiliated interests or their customers. Electric utilities shall not provide any preferences to affiliated interests in requesting authorization for the release of customer information.

b. An unaffiliated ARES may submit, to an electric utility, a written standing request for any generic customer information concerning the usage, load shape curve or other general characteristics of customers by rate classification that the electric utility provides to its affiliated interests in competition with ARES. A standing request made pursuant to this Section shall expire one year after being received by the utility unless renewed in writing by the ARES.

c. The electric utility shall contemporaneously, and in the same form and manner, make available to any unaffiliated alternative retail electric suppliers that have submitted a standing request, pursuant to subsection (b) of this Section, any generic customer information concerning the usage, load shape curve or other general characteristics of customers by rate classification that the utility makes available to its affiliated interests in competition with alternative retail electric suppliers.

d. Any unaffiliated ARES that receives generic customer information pursuant to a standing request made under this Section or any affiliated interest in competition with ARES that receives generic customer information concerning the usage, load shape curve or other general characteristics of customers by rate classification from the electric utility shall, in accordance with Section 16-122(b) of the Act, pay the electric utility a reasonable fee in each instance that such information is provided.

Independent Functioning

a. Except in relation to corporate support and emergency support, electric utilities and affiliated interests in competition with ARES that provide services to customers within the utility's service territory shall function independently of each other and shall not share services or facilities.

Employees

a. Except in relation to corporate support and emergency support, electric utilities and their affiliated interests in competition with alternative retail electric suppliers shall not jointly employ or otherwise share the same employees.

b. Electric utilities shall not jointly employ or otherwise share employees engaged in providing delivery services with their affiliated interests in competition with alternative retail electric suppliers.

c. Subsections (a), (b) and (d) of this Section shall not apply to any employee covered by a collective bargaining agreement subject to federal labor law, including the Labor Management Relations Act and the National Labor Relations Act.

d. Each electric utility that has an affiliated interest in competition with ARES shall maintain a log detailing the transfer of employees: from the utility to its affiliated interests in competition with ARES; from the utility to its other affiliated interests; and from the utility's other affiliated interests to its affiliated interests in competition with ARES. This subsection shall not apply to employee transfers to or from corporations that are affiliated interests of the electric utility solely because they share a common director. The log shall be made available to the Commission upon request.

Transfer of Goods

a. Transactions between an electric utility and its affiliated interests shall not be allowed to subsidize the affiliated interests.

b. In connection with an application for a certificate of service authority filed by an affiliated interest of an electric utility, pursuant to Section 16-115 of the Act, the affiliated interest shall provide a copy of a Commission approved services and facilities or affiliated interest agreement that explicitly addresses the cost allocation and valuation methodology to be applied to any transfer of goods and services: between the electric utility and its affiliated interests in competition with ARES; between the utility and its other affiliated interests; and between the utility's other affiliated interests and its affiliated interests in competition with ARES. In the event that there is no Commission approved agreement addressing these issues, the applicant shall submit such an agreement for approval as part of its application.

c. Costs associated with the transfer of goods and services between an electric utility and its affiliated interests, including affiliated interests in competition with ARES, shall be priced as specified in, and allocated pursuant to, the Commission approved services and facilities agreement or affiliated interests agreement presented in the affiliated ARES certification proceeding. Any transfer of goods and services between an electric utility and its affiliated interests, including affiliated interests in competition with ARES, that is not explicitly addressed in a Commission approved services and facilities or affiliated interests agreement is prohibited unless the transfer has been otherwise specifically approved by the Commission pursuant to Section 7-101 of the Act or approval has been waived by statute or Commission rule.

Maintenance of Books and Records and Commission Access

a. An electric utility shall maintain books, accounts, and records separate from those of its affiliated interests.

b. In connection with an application for a certificate of service authority filed by an affiliated interest of an electric utility, pursuant to Section 16-115 of the Act, the affiliated interest shall provide a copy of a Commission approved services and facilities or affiliated interest agreement that explicitly sets forth both the cost allocation guidelines and the accounting conventions to be applied to any transactions: between the electric utility and its affiliated interests in competition with ARES; between the utility and its other affiliated interests; and between the utility's affiliated interests in competition with ARES and its other affiliated interests. In the event that there is no Commission approved agreement addressing cost allocation and accounting conventions, the applicant shall submit such an agreement for approval as part of its application.

c. Upon the request of the Commission, electric utilities shall make personnel available who are competent to respond to the Commission's inquiries regarding the nature of any transactions that have taken place between the electric utility and its affiliated interests, including but not limited to the goods and services provided, the prices, terms and conditions, and other considerations given for the goods and services provided.

d. Each electric utility shall maintain a log detailing: each instance in which it exercised discretion in the application of tariff provisions; each instance in which it offered affiliated interests or customers of affiliated interests services not governed by tariffs, except for corporate support transactions and services that have been declared competitive pursuant to Section 16-113 of the Act; and each instance in which it offered affiliated interests or customers of affiliated interests a discount, rebate, fee waiver or waivers of the electric utility's ordinary terms and conditions in connection with services provided under tariffs on file with the Commission. The electric utility shall make such log available to the Commission upon request. The log shall contain the following information:
    i. the names of the affiliated interests and unaffiliated entities involved in the transaction;
    ii. a description of the transaction;
    iii. the time period over which the transaction applies; and
    iv. the quantities and locations involved in the transaction.

Internal Audits

a. Electric utilities shall conduct biennial internal audits on transactions with affiliated interests. These audits shall test compliance with this Part, with any applicable Commission orders, with the electric utility's affiliated interest operating agreement(s) and/or guidelines, with 83 Ill. Adm. Code 415, and with 83 Ill. Adm. Code 420. The audits shall include written reports of conclusions and associated workpapers that shall be available to the Commission Staff for review. The audit reports shall be submitted to the Commission's Director of Accounting within 30 days after completion. Any audit performed pursuant to this Section may be designated as confidential with the Commission's Director of Accounting.

b. The first such internal audit report shall be submitted on or before December 1, 1998. Succeeding audit reports shall be submitted on or before December 1 of each even numbered succeeding year.

c. Subsections (a) and (b) of this Section shall not apply to transactions with corporations that are affiliated interests of the electric utility solely because they share a common director or transactions with individuals that are affiliated interests of the electric utility solely because they are an elective officer or director of the electric utility.

NORTH CAROLINA

Rule: North Carolina Code of Conduct (as approved by the North Carolina Utilities Commission)[19]

This section contains the complete text of the "official" North Carolina Code of Conduct (hereinafter "Code of Conduct or "Code"), approved by the North Carolina Utilities Commission, which governs Duke Energy Carolina's (DEC) and Duke Energy Progress (DEP) transactions with affiliates. This Code applies in North Carolina and South Carolina.

CODE OF CONDUCT GOVERNING THE RELATIONSHIPS, ACTIVITIES AND TRANSACTIONS BETWEEN AND AMONG THE PUBLIC UTILITY OPERATIONS OF DEC, THE PUBLIC UTILITY OPERATIONS OF PEC, DUKE ENERGY CORPORATION, OTHER AFFILIATES, AND THE NONPUBLIC UTILITY OPERATIONS OF DEC AND PEC

GENERAL

This Code of Conduct establishes the minimum guidelines and rules that apply to the relationships, transactions, and activities involving the public utility operations of DEC, PEC, Duke Energy, other Affiliates, or the Nonpublic Utility Operations of DEC and PEC, to the extent such relationships, activities, and transactions affect the operations or costs of utility service experienced by the public utility operations of DEC and PEC in their respective service areas. DEC, PEC, and the other Affiliates are bound by this Code of Conduct pursuant to Regulatory Condition 6.1 approved by the Commission in Docket Nos. E-2, Sub 998, and E-7, Sub 986. This Code of Conduct is subject to modification by the Commission as the public interest may require, including, but not limited to, addressing changes in the organizational structure of DEC, PEC, Duke Energy, other Affiliates, or the Nonpublic Utility Operations; changes in the structure of the electric industry; or other changes that warrant modification of this Code.

DEC or PEC may seek a waiver of any aspect of this Code of Conduct by filing a request with the Commission showing that exigent circumstances in a particular case justify such a waiver.

STANDARDS OF CONDUCT

A. Independence and Information Sharing

1. Separation - DEC, PEC, Duke Energy, and the other Affiliates shall operate independently of each other and in physically separate locations to the maximum extent practicable. DEC, PEC, Duke Energy, and each of the other Affiliates shall maintain separate books and records. Each of DEC's and PEC's Nonpublic Utility Operations shall maintain separate records from those of DEC's and PEC's public utility operations to ensure appropriate cost allocations and any arm's- length-transaction requirements.

Disclosure of Customer Information:

(a) Upon request, and subject to the restrictions and conditions contained herein, DEC and PEC may provide Customer Information to Duke Energy, another Affiliate, or a Nonpublic Utility Operation under the same terms and conditions that such information is provided to non-Affiliates.

(b) Except as provided in Section III.A.2.(f) below, Customer Information shall not be disclosed to any person or company, without the Customer's consent, and then only to the extent specified by the Customer. Consent to disclosure of Customer Information to Affiliates or Nonpublic Utility Operations may be obtained by means of written authorization, electronic authorization or recorded verbal authorization upon providing the Customer with the information set forth in Attachment A; provided, however, that DEC and PEC retain such authorization for verification purposes for as long as the authorization remains in effect.

[19] https://dms.psc.sc.gov/Attachments/Matter/e71fb4fb-1518-41e6-895c-7c6e3f60bdfa

(c) If the Customer allows or directs DEC or PEC to provide Customer Information to Duke Energy, another Affiliate, or a Nonpublic Utility Operation, then DEC or PEC shall ask the Customer if he, she, it would like the Customer Information to be provided to one or more non-Affiliates. If the Customer directs DEC or PEC to provide Customer Information to one or more non-Affiliates, the Customer Information shall be disclosed to all entities designated by the Customer contemporaneously and in the same manner.

(d) Sections III.A.2.(a), 2.(b), and 2.(c) herein shall be permanently posted on DEC's and PEC's website.

(e) No DEC or PEC employee who is transferred to Duke Energy or another Affiliate will be permitted to copy or otherwise compile any Customer Information for use by such entity except pursuant to written permission from the Customer, as reflected by a signed Data Disclosure Authorization. Neither DEC nor PEC shall transfer any employee to Duke Energy or another Affiliate for the purpose of disclosing or providing Customer Information to such entity.

(f) Notwithstanding the prohibitions established by this Section III.A.2, DEC and PEC may disclose Customer Information to DEBS, PESC, any other Affiliate, a Nonpublic Utility Operation or a non-affiliated third party without Customer consent, but only to the extent necessary for the Affiliate, Nonpublic Utility Operation or non-affiliated third party to provide goods or services to DEC or PEC and upon their explicit agreement to protect the confidentiality of such Customer Information. To the extent the Commission approves a list of services to be provided and taken pursuant to one or more utility to-utility service agreements, then Customer Information may be disclosed pursuant to the foregoing exception to the extent necessary for such services to be performed.

(g) DEC and PEC shall take appropriate steps to store Customer Information in such a manner as to limit access to only those persons permitted to receive it and shall require all persons with access to such information to protect its confidentiality.

(h) DEC and PEC shall establish guidelines for its employees and representatives to follow with regard to complying with this Section III.A.2.

(i) No DEBS or PESC employee may use Customer Information to market or sell any product or service to DEC's or PEC's Customers, except in support of a Commission-approved rate schedule or program or a marketing effort managed and supervised directly by DEC or PEC.

(j) DEBS and PESC employees with access to Customer Information must be prohibited from making any improper indirect use of the data, including directing or encouraging any actions based on the Customer Information by employees of DEBS or PESC that do not have access to such information, or by other employees of Duke Energy or other Affiliates or Nonpublic Utility Operations of the Utilities.

(k) Should any inappropriate disclosure of DEC or PEC Customer Information occur at any time, DEC or PEC is required to promptly file a statement with the Commission in this docket describing the circumstances of the disclosure, the Customer information disclosed, the results of the disclosure, and the mitigating and/or other steps taken to address the disclosure.

3. The disclosure of Confidential Systems Operation Information of DEC and PEC (referred to hereinafter as "Information") shall be governed as follows: (l) Such Information shall not be disclosed by DEC or PEC to an Affiliate or a Nonpublic Utility Operation unless it is disclosed to all competing nonAffiliates contemporaneously and in the same manner. Disclosure to nonAffiliates is not required when disclosure to Affiliates or Nonpublic Utility Operations meets one of the following exceptions:

(i) The Information is provided to employees of DEC or PEC for the purpose of implementing, and operating pursuant to, the JDA in accordance with the Regulatory Conditions approved in Docket Nos. E-7, Sub 986, and E-2, Sub 998;

(ii) The Information is necessary for the performance of services approved to be performed pursuant to one or more Affiliate utility-to-utility service agreements;
(iii) A state or federal regulatory agency or court having jurisdiction over the disclosure of the Information requires the disclosure;
(iv) The Information is provided to employees of DEBS or PESC pursuant to a service agreement filed with the Commission pursuant to G.S. 62-153;
(v) The Information is provided to employees of DEC's or PEC's Utility Affiliates for the purpose of sharing best practices and otherwise improving the provision of regulated utility service;
(vi) The Information is provided to an Affiliate pursuant to an agreement filed with the Commission pursuant to G.S. 62-153, provided that the agreement specifically describes the types of Information to be disclosed;
(vii) Disclosure is otherwise essential to enable DEC or PEC to provide Electric Services to their Customers; or
(viii) Disclosure of the Information is necessary for compliance with the Sarbanes-Oxley Act of 2002.

(m) Any Information disclosed pursuant to the exceptions in Section III.A.3(a), above, shall be disclosed only to employees that need the information for the purposes covered by those exceptions and in as limited a manner as possible. The employees receiving such Information must be prohibited from acting as conduits to pass the Information to any Affiliate(s) and must have explicitly agreed to protect the confidentiality of such Information.

(n) For disclosures pursuant to exceptions (vii) and (viii) in Section III.A.3(a), above, DEC and PEC shall include in their annual affiliated transaction reports the following information:
(i) The types of Information disclosed and the name(s) of the Affiliate(s) to which it is being, or has been, disclosed;
(ii) The reasons for the disclosure; and
(iii) Whether the disclosure is intended to be a one-time occurrence or an ongoing process. To the extent a disclosure subject to the reporting requirement is intended to be ongoing, only the initial disclosure and a description of any processes governing subsequent disclosures need to be reported.

(o) DEC, PEC, DEBS, and PESC employees with access to CSOI must be prohibited from making any improper indirect use of the data, including directing or encouraging any actions based on the CSOI by employees that do not have access to such information, or by other employees of Duke Energy or other Affiliates or Nonpublic Utility Operations of DEC and PEC.

(p) Should the handling or disclosure of DEC's or PEC's Market Information, Transmission Information, or other CSOI by DEBS, PESC, or another Affiliate or Nonpublic Utility Operation, or their respective employees, result in (i) a violation of the FERC Standards of Conduct or Affiliate Restrictions, 18 CFR § 358 - Standards of Conduct for Transmission Providers and 18 CFR § 35.39-Affiliate Restrictions), or any other relevant FERC standards or codes of conduct, (ii) the posting of such data on an OASIS or other Internet website, or (iii) other public disclosure of the data, DEC or PEC shall promptly file a statement with the Commission in Docket Nos. E-7, Sub 986C, and E-2, Sub 998C, respectively, describing the circumstances leading to such violation, posting, or other public disclosure, any data required to be posted or otherwise publicly disclosed, and the mitigating and/or other steps taken to address the current or any future potential violation, posting, or other public disclosure.

(q) Should any inappropriate disclosure of CSOI occur at any time, DEC or PEC shall promptly file a statement with the Commission in Docket Nos. E-7, Sub 986C, or E2, Sub 998C, respectively, describing the circumstances of the disclosure, the CSOI disclosed, the results of the disclosure, and the mitigating and/or other steps taken to addressthe disclosure.

(r) Unless publicly noticed and generally available, should the FERC Affiliate Restrictions, the Transmission Standards, or any other relevant FERC standards or codes of conduct be eliminated, amended, superseded, or otherwise replaced, DEC and PEC shall file a letter in Docket Nos. E-7, Sub 986E, and E-2, Sub 998E, with the Commission describing such action within 60 days of the action, along with a copy of any amended or replacement document.

Nondiscrimination

1. DEC's and PEC's employees and representatives shall not unduly discriminate against non-Affiliated entities.

Marketing/Logo Usage

1. The public utility operations of DEC and PEC may engage in joint sales, joint sales calls, joint proposals, or joint advertising (a joint marketing arrangement) with their Utility Affiliates and with their Nonpublic Utility Operations, subject to compliance with other provisions of this Code of Conduct and any conditions or restrictions that the Commission may hereafter establish. Neither DEC nor PEC shall otherwise engage in such joint activities without making such opportunities available to comparable third parties.

2. Neither Duke Energy nor any of the other Affiliates shall use the names or logos of DEC or PEC in any communications unless a disclaimer is included that states the following:

(a) "[Duke Energy Corporation/Affiliate) is not the same company as [DEC/PEC], and [Duke Energy Corporation/Affiliate) has separate management and separate employees"; (b) "[Duke Energy Corporation/Affiliate] is not regulated by the North Carolina Utilities Commission or in any way sanctioned by the Commission";
(c) "Purchasers of products or services from [Duke Energy Corporation/Affiliate] will receive no preference or special treatment from [DEC/PEC]"; and
(d) "A customer does not have to buy products or services from [Duke Energy Corporation/Affiliate] in order to continue to receive the same safe and reliable electric service from [DEC/PEC]."

3. Nonpublic Utility Operations may not use the names or logos of DEC or PEC in any communications unless a disclaimer is included that states the following:

(a) "[Nonpublic Utility Operation] is not part of the regulated services offered by [DEC/PEC] and is not in any way sanctioned by the North Carolina Utilities Commission"; (b) "Purchasers of products or services from [Nonpublic Utility Operation] will receive no preference or special treatment from [DEC/PEC]"; and
(c) "A customer does not have to buy products or services from [Nonpublic Utility Operation] in order to continue to receive the same safe and reliable electric service from [DEC/PEC]."

The required disclaimer must be sized and displayed in a way that is commensurate with the name and logo so that the disclaimer is at least the larger of one-half the size of the type that first displays the name and logo or the predominant type used in the communication.

Transfers of Goods and Services, Transfer Pricing, and Cost Allocation

1. Cross-subsidies involving DEC or PEC and Duke Energy, other Affiliates, or the Nonpublic Utility Operations are prohibited.

2. All costs incurred by personnel or representatives of DEC or PEC for or on behalf of Duke Energy, other Affiliates, or the Nonpublic Utility Operations shall be charged to the entity responsible for the costs.

3. As a general guideline, with regard to the transfer prices charged for goods and services, including the use or transfer of personnel, exchanged between and among DEC or PEC, and Duke Energy, the other

Non-Utility Affiliates, and the Nonpublic Utility Operations, to the extent such prices affect DEC's or PEC's operations or costs of utility service, the following conditions shall apply:

(a) Except as otherwise provided for in this Section III.D, for untariffed goods and services provided by DEC or PEC to Duke Energy, a Non-Utility Affiliate, or a Nonpublic Utility Operation, the transfer price paid to DEC or PEC shall be set at the higher of Market Value or DEC's or PEC's Fully Distributed Cost.

(b) Except as otherwise provided for in this Section III.D, for goods and services provided, directly or indirectly, by Duke Energy, a Non-Utility Affiliate other than DEBS or PESC, or a Nonpublic Utility Operation to DEC or PEC, the transfer price(s) charged by Duke Energy, the Non-Utility Affiliate, and the Nonpublic Utility Operation to DEC or PEC shall be set at the lower of Market Value or Duke Energy's, the Non-Utility Affiliate's, or the Nonpublic Utility Operation's Fully Distributed Cost(s). If DEC or PEC do not engage in competitive solicitation and instead obtain the goods or services from Duke Energy, a Non-Utility Affiliate, or a Nonpublic Utility Operation, DEC and PEC shall implement adequate processes to comply with this Code provision and related Regulatory Conditions and ensure that in each case DEC's and PEC's Customers receive service at the lowest reasonable cost. For goods and services provided by DEBS and PESC to DEC, PEC, and Utility Affiliates, the transfer price charged shall be set at DEBS' and PESC's Fully Distributed Cost.

(c) Tariffed goods and services provided by DEC and PEC to Duke Energy, other Affiliates, or a Nonpublic Utility Operation shall be provided at the same prices and terms that are made available to Customers having similar characteristics with regard to Electric Services (such as time of use, manner of use, customer class, load factor, and relevant Standard Industrial Classification) under the applicable tariff.

(d) Subject to and in compliance with all conditions placed upon DEC and PEC by the Commission, untariffed non-power, non-generation, or non-fuel goods and services provided by DEC or PEC to DEC, PEC, or the Utility Affiliates or by the Utility Affiliates to DEC or PEC, shall be transferred at the supplier's Fully Distributed Cost.

4. To the extent that DEC, PEC, Duke Energy, other Affiliates, or the Nonpublic Utility Operations receive Shared Services from DEBS or PESC (or their successors), these Shared Services may be jointly provided to DEC, PEC, Duke Energy, other Affiliates, or the Nonpublic Utility Operations on a fully distributed cost basis, provided that the taking of such Shared Services by DEC and PEC is cost beneficial on a service-by-service (e.g., accounting management, human resources management, legal services, tax administration, public affairs) basis to DEC and PEC. Charges for such Shared Services shall be allocated in accordance with the cost allocation manual(s) filed with the Commission pursuant to Regulatory Condition 5.5, subject to any revisions or other adjustments that may be found appropriate by the Commission on an ongoing basis.

5. DEC, PEC, and their Utility Affiliates may capture economies-of-scale in joint purchases of goods and services (excluding the purchase of natural gas, coal, and electricity or ancillary services intended for resale), if such joint purchases result in cost savings to DEC's and PEC's Customers. DEC, PEC, Duke Indiana, Duke Kentucky, and PEF, may capture economies-ofscale in joint purchases of coal and natural gas, if such joint purchases result in cost savings to DEC's and PEC's Customers. Notwithstanding the foregoing, if any of the coal or natural gas jointly purchased by DEC, PEC, Duke Indiana, Duke Kentucky, or PEF is transferred to or utilized by another Affiliate within 12 months of the joint purchase, DEC and PEC will file a notification of such with the Commission. All joint purchases entered into pursuant to this section shall be priced in a manner that permits clear identification of each participant's portion of the purchases and shall be reported in DEC's and PEC's affiliated transaction reports filed with the Commission.

6. All permitted transactions between DEC, PEC, Duke Energy, other Affiliates, and the Nonpublic Utility Operations shall be recorded and accounted for in accordance with the cost allocation manuals required to be filed with the Commission pursuant to Regulatory Condition 5.5 and with Affiliate agreements accepted by the Commission or otherwise processed in accordance with North Carolina law, the rules and orders of the Commission, and the Regulatory Conditions.

7. Costs that DEC and PEC incur in assembling, compiling, preparing, or furnishing requested Customer Information or Confidential Systems Operation Information for or to Duke Energy, other Affiliates, Nonpublic Utility Operations, or non-Affiliates shall be recovered from the requesting party pursuant to Section III.D.3 of this Code of Conduct.

8. Any technology or trade secrets developed, obtained, or held by DEC or PEC in the conduct of regulated operations shall not be transferred to Duke Energy, another Affiliate, or a Nonpublic Utility Operation without just compensation and the filing of 60-days prior notification to the Commission; provided however, that DEC and PEC are not required to provide advance notice for such transfers to each other. DEC and PEC may request a waiver of this requirement from the Commission with respect to such transfers to Duke Energy, a Utility Affiliate, a Non-Utility Affiliate, or a Nonpublic Utility Operation. In no case, however, shall the notice period requested be less than 20 business days.

9. DEC and PEC shall receive compensation from Duke Energy, other Affiliates, and the Nonpublic Utility Operations for intangible benefits, if appropriate.

Regulatory Oversight

1. The State's existing requirements regarding affiliate transactions, as set forth in G.S. 62-153, shall continue to apply to all transactions between DEC, PEC, Duke Energy, and the other Affiliates.

2. The books and records of DEC, PEC, Duke Energy, other Affiliates, and the Nonpublic Utility Operations shall be open for examination by the Commission, its staff, and the Public Staff as provided in G.S. 62-34, 62-37, and 62-51.

3. To the extent North Carolina law, the orders and rules of the Commission, and the Regulatory Conditions permit Duke Energy, an Affiliate, or a Nonpublic Utility Operation to supply DEC or PEC with Natural Gas Services or other Fuel and Purchased Power Supply Services used by DEC or PEC to provide Electric Services to Customers, and to the extent such Natural Gas Services or other Fuel and Purchased Power Supply Services are supplied, DEC or PEC shall demonstrate in its annual fuel adjustment clause proceeding that each such acquisition was prudent and the price was reasonable.

Utility Billing Format

To the extent any bill issued by DEC and PEC, Duke Energy, another Affiliate, a Nonpublic Utility Operation, or a non-Affiliated third party includes any charges to Customers for Electric Services and non-Electric Services from Duke Energy, another Affiliate, a Nonpublic Utility Operation, or a non-Affiliated third party, the charges for the Electric Services shall be separated from the charges for any other services included on the bill. Each such bill shall contain language stating that the Customer's Electric Services will not be terminated for failure to pay for any other services billed.

MARYLAND

Rule: 2013 Maryland Code PUBLIC UTILITIES § 7-211 - Energy efficiency programs[20]
See also: 2016 SB 684[21], aimed at Prohibiting an affiliate of an electric company from using the electric company's trade name, logo, billing services, mail inserts, advertising, or computer services for a plan or program that provides heating, ventilation, air conditioning, or refrigeration services; requiring the Public Service Commission to determine just and reasonable compensation that an affiliate of an electric company shall provide to customers of the electric company's regulated services; etc.

(a) (1) In this section the following words have the meanings indicated.

(2) "Affiliate" has the meaning stated in § 7-501 of this title.

(3) "Demand response program" means a program established by an electric company that promotes changes in electric usage by customers from their normal consumption patterns in response to:

(i) changes in the price of electricity over time; or

(ii) incentives designed to induce lower electricity use at times of high wholesale market prices or when system reliability is jeopardized.

(4) "Electricity consumption" and "electricity consumed" mean the sum of retail electricity sales to all customers and reported electricity losses within the electric distribution system.

(5) "Peak demand" means the highest level of electricity demand in the State measured in megawatts during the period from May 1 to September 30 on a weather-normalized basis.

(6) "Per capita electricity consumption" means the result calculated by dividing the total gigawatt-hours of electricity consumed by electricity customers in the State as of December 31 of a year, as determined by the Commission, by the population of the State as of December 31 of that year, as determined by the Department of Planning.

(7) "Plan" means an electricity savings and demand reduction plan and cost recovery proposal.

(8) "Provide heating, ventilation, air conditioning, or refrigeration services" has the meaning stated in § 9A-101 of the Business Regulation Article.

(b) The General Assembly finds and declares that:

(1) energy efficiency is among the least expensive ways to meet the growing electricity demands of the State; and

(2) to provide affordable, reliable, and clean energy for consumers of Maryland, it is the goal of the State to achieve the following energy efficiency, conservation, and demand response targets, based on 2007 electricity consumption:

(i) a 15% reduction in per capita electricity consumption by the end of 2015; and

(ii) a 15% reduction in per capita peak demand by the end of 2015.

[20] https://law.justia.com/codes/maryland/2013/article-gpu/section-7-211/

[21] https://legiscan.com/MD/text/SB684/2016

(c) Beginning with the 2008 calendar year and each year thereafter, the Commission shall calculate:

(1) the per capita electricity consumption for that year; and

(2) the peak demand for that year.

(d) Subject to review and approval by the Commission, each gas company and electric company shall develop and implement programs and services to encourage and promote the efficient use and conservation of energy by consumers, gas companies, and electric companies.

(e) As directed by the Commission, each municipal electric utility and each electric cooperative that serves a population of less than 250,000 in its distribution territory shall include energy efficiency and conservation programs or services as part of their service to their customers.

(f) The Commission shall:

(1) require each gas company and electric company to establish any program or service that the Commission deems appropriate and cost effective to encourage and promote the efficient use and conservation of energy;

(2) adopt rate-making policies that provide cost recovery and, in appropriate circumstances, reasonable financial incentives for gas companies and electric companies to establish programs and services that encourage and promote the efficient use and conservation of energy; and

(3) ensure that adoption of electric customer choice under Subtitle 5 of this title does not adversely impact the continuation of cost-effective energy efficiency and conservation programs.

(g) Except as provided in subsection (e) of this section, on or before December 31, 2008, by regulation or order, the Commission shall:

(1) to the extent that the Commission determines that cost-effective energy efficiency and conservation programs and services are available, for each affected class, require each electric company to procure or provide for its electricity customers cost-effective energy efficiency and conservation programs and services with projected and verifiable electricity savings that are designed to achieve a targeted reduction of at least 5% by the end of 2011 and 10% by the end of 2015 of per capita electricity consumed in the electric company's service territory during 2007; and

(2) require each electric company to implement a cost-effective demand response program in the electric company's service territory that is designed to achieve a targeted reduction of at least 5% by the end of 2011, 10% by the end of 2013, and 15% by the end of 2015, in per capita peak demand of electricity consumed in the electric company's service territory during 2007.

(h) (1) (i) On or before July 1, 2008, and every 3 years thereafter, each electric company shall consult with the Maryland Energy Administration regarding the design and adequacy of the electric company's plan to achieve the electricity savings and demand reduction targets specified in subsection (g) of this section.

(ii) An electric company shall provide the Maryland Energy Administration with any additional information regarding the plan, as requested.

(2) On or before September 1, 2008, and every 3 years thereafter, an electric company shall submit its plan to the Commission that details the electric company's proposals for achieving the electricity savings and demand reduction targets specified in subsection (g) of this section for the 3 subsequent calendar years.

(3) The Commission shall consider any written findings provided by the Maryland Energy Administration regarding the design and adequacy of the plan.

(4) Each electric company shall provide annual updates to the Commission and the Maryland Energy Administration on plan implementation and progress towards achieving the electricity savings and demand reduction targets specified in subsection (g) of this section.

(5) (i) The plan shall include a description of the proposed energy efficiency and conservation programs and services and the proposed demand response program, anticipated costs, projected electricity savings, and any other information requested by the Commission.

(ii) The plan shall address residential, commercial, and industrial sectors as appropriate, including low-income communities and low- to moderate-income communities.

(iii) 1. If, in connection with a program or service, the electric company proposes to provide heating, ventilation, air conditioning, or refrigeration services for its customers, the plan shall include procedures for the competitive selection of heating, ventilation, air conditioning, or refrigeration service providers.

2. On request by the electric company and for good cause shown, the Commission may waive the requirement that the electric company competitively select heating, ventilation, air conditioning, or refrigeration providers under subsubparagraph 1 of this subparagraph.

Subsidization

(6) The plan and any updates shall include a certification or recertification by the electric company that, if an affiliate of the electric company provides heating, ventilation, air conditioning, or refrigeration services through any existing contract or obligation in connection with a program or service, the customers of the electric company's regulated services will not subsidize the operations of the affiliate.

(7) The Commission shall review each electric company's plan to determine if the plan is adequate and cost-effective in achieving the electricity savings and demand reduction targets specified in subsection (g) of this section.

(i) (1) In determining whether a program or service encourages and promotes the efficient use and conservation of energy, the Commission shall consider the:

(i) cost-effectiveness;

(ii) impact on rates of each ratepayer class;

(iii) impact on jobs; and

(iv) impact on the environment.

(2) The Commission shall monitor and analyze the impact of each program and service to ensure that the outcome of each program and service provides the best possible results.

(3) In monitoring and analyzing the impact of a program or service under paragraph (2) of this subsection, if the Commission finds that the outcome of the program or services may not be providing the best possible results, the Commission shall direct the electric company to include in its annual update under subsection (h)(4) of this section specific measures to address the findings.

(4) An electric company that enters into a contract or obligation with an affiliate of the electric company to provide heating, ventilation, air conditioning, or refrigeration services in connection with a program or service shall notify the Commission within 30 days after entering into the contract or obligation that the electric company:

(i) has entered into a contract or obligation with an affiliate of the electric company; and

(ii) certifies that the customers of the electric company's regulated services will not subsidize the operations of the affiliate.

(j) (1) At least once each year, each electric company and gas company shall notify affected customers of the energy efficiency and conservation charges imposed and benefits conferred.

(2) The notice shall be provided by publication on the company's website and inclusion with billing information such as a bill insert or bill message.

(k) On or before March 1 of each year, the Commission, in consultation with the Maryland Energy Administration, shall report, subject to § 2-1246 of the State Government Article, to the General Assembly on:

(1) the status of programs and services to encourage and promote the efficient use and conservation of energy, including an evaluation of the impact of the programs and services that are directed to low-income communities, low- to moderate-income communities to the extent possible, and other particular classes of ratepayers;

(2) a recommendation for the appropriate funding level to adequately fund these programs and services; and

(3) in accordance with subsection (c) of this section, the per capita electricity consumption and the peak demand for the previous calendar year.

(l) Notwithstanding any other law, the Commission may not require or allow an electric company to require an electric customer to authorize the electric company to control the amount of the electric customer's electricity usage, including through control of the electric customer's thermostat.

(m) (1) On or before June 30, 2013, by regulation or order, the Commission shall establish a pilot program for electric customers to recharge electric vehicles during off-peak hours.

(2) (i) An electric company may request to participate in the pilot program.

(ii) The Commission shall make every effort to include at least two electric companies in the pilot program.

(3) The pilot program shall include incentives for residential, commercial, and governmental customers to recharge electric vehicles in a manner that will:

(i) increase the efficiency and reliability of the electric distribution system; and

(ii) lower electricity use at times of high demand.

(4) Incentives may include:

(i) time-of-day pricing of electricity;

(ii) credits on distribution charges;

(iii) rebates on the cost of charging systems;

(iv) demand response programs; or

(v) other incentives approved by the Commission.

(5) On or before February 1, 2015, the Commission shall report to the Governor and, in accordance with § 2-1246 of the State Government Article, to the General Assembly on the experience of the pilot program and the Commission's findings.

FLORIDA

Florida Administrative Code 25-6.1351 Cost Allocation and Affiliate Transactions.[22]

(1) Purpose. The purpose of this rule is to establish cost allocation requirements to ensure proper accounting for affiliate transactions and utility nonregulated activities so that these transactions and activities are not subsidized by utility ratepayers. This rule is not applicable to affiliate transactions for purchase of fuel and related transportation services that are subject to Commission review and approval in cost recovery proceedings.

(2) Definitions.

(a) Affiliate – Any entity that directly or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with a utility. As used herein, "control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers or stockholders, voting trusts, holding trusts, associated companies, contracts or any other direct or indirect means.

Affiliate Transaction – Any transaction in which both a utility and an affiliate are each participants, except transactions related solely to the filing of consolidated tax returns.

(c) Cost Allocation Manual (CAM) – The manual that sets out a utility's cost allocation policies and related procedures.

(d) Direct Costs – Costs that can be specifically identified with a particular service or product.

(e) Fully Allocated Costs – The sum of direct costs plus a fair and reasonable share of indirect costs.

(f) Indirect Costs – Costs, including all overheads, that cannot be identified with a particular service or product.

(g) Nonregulated – Refers to services or products that are not subject to price regulation by the Commission or not included for ratemaking purposes and not reported in surveillance.

(h) Prevailing Price Valuation – Refers to the price an affiliate charges a regulated utility for products and services, which equates to that charged by the affiliate to third parties. To qualify for this treatment, sales of a particular asset or service to third parties must encompass more than 50 percent of the total quantity of the product or service sold by the entity. The 50 percent threshold is applied on an asset-by-asset and service-by-service basis, rather than on a product line or service line basis.

(i) Regulated – Refers to services or products that are subject to price regulation by the Commission or included for ratemaking purposes and reported in surveillance.

(3) Non-Tariffed Affiliate Transactions.

(a) The purpose of subsection (3) is to establish requirements for non-tariffed affiliate transactions impacting regulated activities. This subsection does not apply to the allocation of costs for services between a utility and its parent company or between a utility and its regulated utility affiliates or to services received by a utility from an affiliate that exists solely to provide services to members of the utility's corporate family. All affiliate transactions, however, are subject to regulatory review and approval.

(b) A utility must charge an affiliate the higher of fully allocated costs or market price for all non-tariffed services and products purchased by the affiliate from the utility. Except, a utility may charge an affiliate less than fully allocated costs or market price if the charge is above incremental cost. If a utility charges less than fully allocated costs or market price, the utility must maintain documentation to support and justify how doing so benefits regulated operations. If a utility charges less than market price, the utility must notify the Commission Clerk in writing within 30 days of the utility initiating, or changing any of the terms or conditions, for the provision of a product or service. In the case of products or services currently being provided, a utility must notify the Division within 30 days of the rule's effective date.

(c) When a utility purchases services and products from an affiliate and applies the cost to regulated operations, the utility shall apportion to regulated operations the lesser of fully allocated costs or market price. Except, a utility

[22] https://www.flrules.org/gateway/ruleno.asp?id=25-6.1351

may apportion to regulated operations more than fully allocated costs if the charge is less than or equal to the market price. If a utility apportions to regulated operations more than fully allocated costs, the utility must maintain documentation to support and justify how doing so benefits regulated operations and would be based on prevailing price valuation.

(d) When an asset used in regulated operations is transferred from a utility to a nonregulated affiliate, the utility must charge the affiliate the greater of market price or net book value. Except, a utility may charge the affiliate either the market price or net book value if the utility maintains documentation to support and justify that such a transaction benefits regulated operations. When an asset to be used in regulated operations is transferred from a nonregulated affiliate to a utility, the utility must record the asset at the lower of market price or net book value. Except, a utility may record the asset at either market price or net book value if the utility maintains documentation to support and justify that such a transaction benefits regulated operations. An independent appraiser must verify the market value of a transferred asset with a net book value greater than $1,000,000. If a utility charges less than market price, the utility must notify the Commission Clerk in writing within 30 days of the transfer.

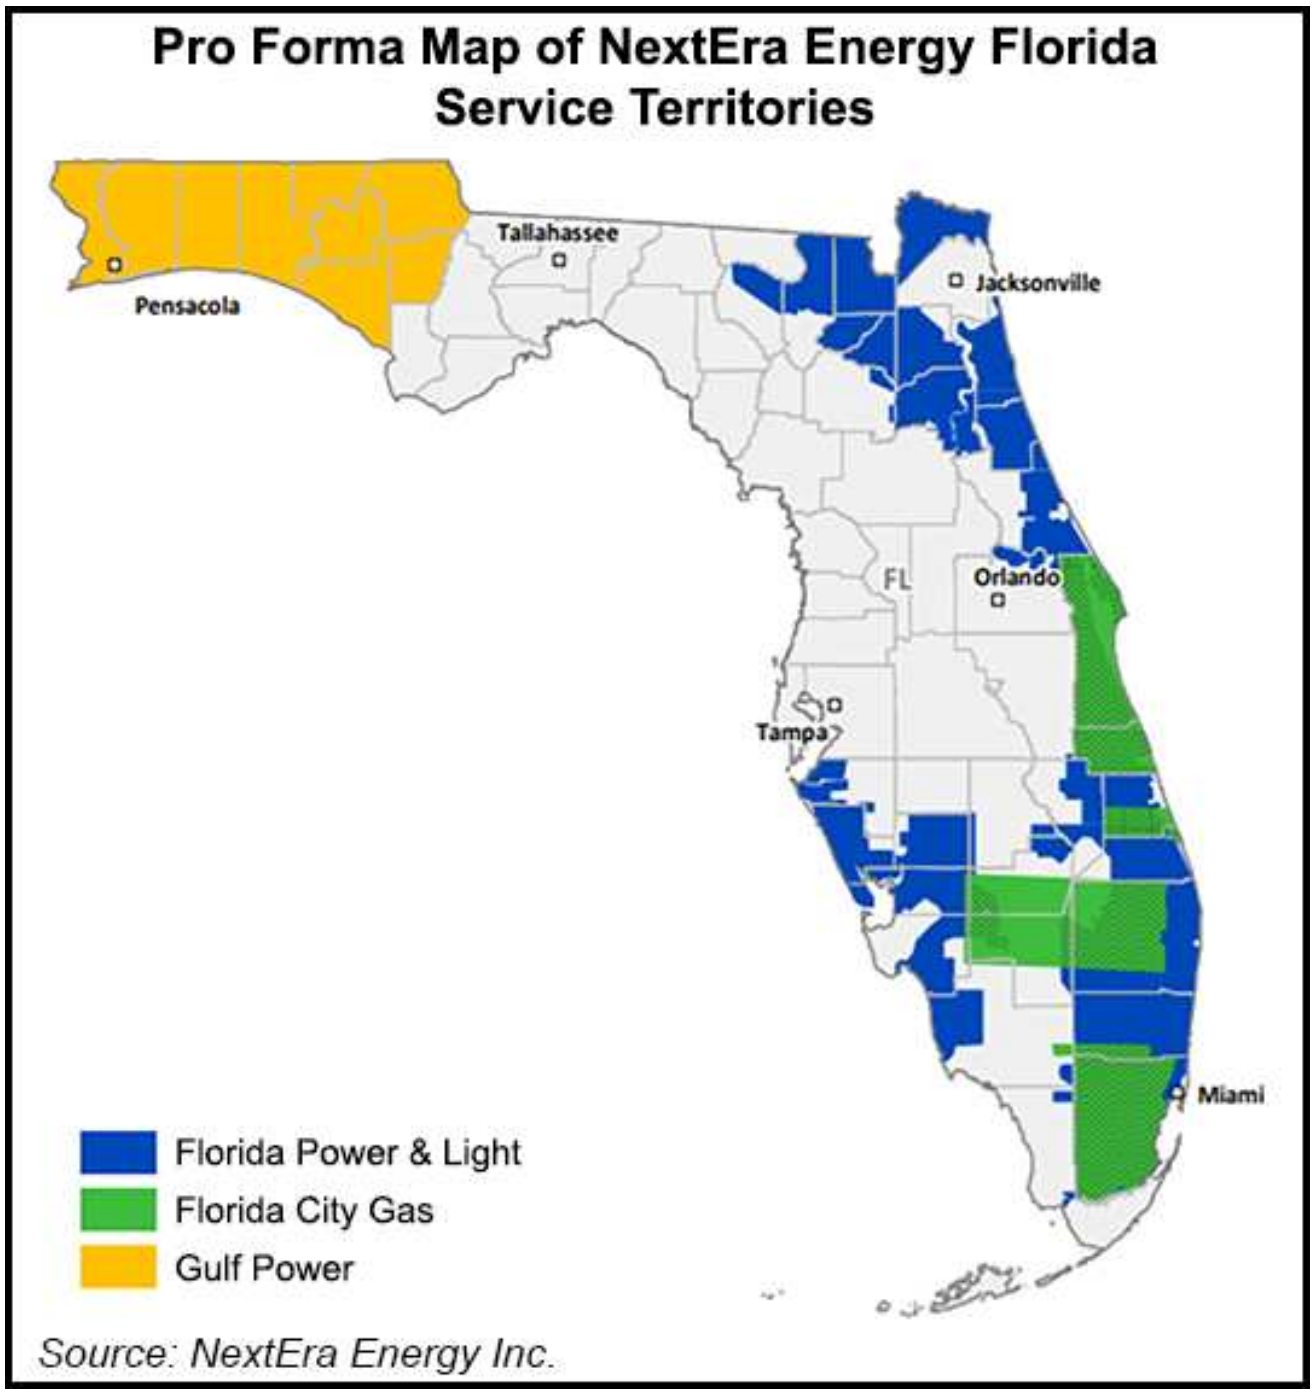
(e) Each affiliate involved in affiliate transactions must maintain all underlying data concerning the affiliate transaction for at least three years after the affiliate transaction is complete. This paragraph does not relieve a regulated affiliate from maintaining records under otherwise applicable record retention requirements.

(4) Cost Allocation Principles.

(a) Utility accounting records must show whether each transaction involves a product or service that is regulated or nonregulated. A utility that identifies these transactions by the use of subaccounts meets the requirements of this paragraph.

(b) Direct costs shall be assigned to each non-tariffed service and product provided by the utility.

(c) Indirect costs shall be distributed to each non-tariffed service and product provided by the utility on a fully allocated cost basis. Except, a utility may distribute indirect costs on an incremental or market basis if the utility can demonstrate that its ratepayers will benefit. If a utility distributes indirect costs on less than a fully allocated basis, the utility must maintain documentation to support doing so.



(d) Each utility must maintain a listing of revenues and expenses for all non-tariffed products and services.

(5) Reporting Requirements. Each utility shall file information concerning its affiliates, affiliate transactions, and nonregulated activities on Form PSC/AFD/101 (3/04) which is incorporated by reference into Rule 25-6.135, F.A.C. Form PSC/AFD/101, entitled “Annual Report of Major Electric Utilities,” may be obtained from the Commission’s Division of Accounting and Finance.

(6) Cost Allocation Manual. Each utility involved in affiliate transactions or in nonregulated activities must maintain a Cost Allocation Manual (CAM). The CAM must be organized and indexed so that the information contained therein can be easily accessed.

EXECUTIVE BRIEF

Florida's oversight of utility monopolies has failed.

The Florida Public Service Commission, the State Legislature, the Attorney General and all those charged with the protection of consumers have failed to act to provide reasonable regulatory oversight and restrictions on the expansion of utility monopolies. This leaves consumers, rate payers, small businesses and local communities at risk while utilities leverage their monopoly status and use ratepayer funds to subsidize expansion into new unregulated industries.

This has already been prohibited or regulated across much of the United States.
Florida has fallen behind most other states and has allowed powerful utility lobbyists and political donations to inhibit reasonable and responsible governance.

All businesses are driven by growth. Building shareholder value, increasing market share and growing profitability are the benchmarks for success especially among large publicly traded companies.

Utility companies, because they maintain vital public infrastructure, are granted special rights and privileges including monopoly-like status – the ability to operate as a sole supplier free from competition. All commercial and residential customers must use the one utility monopoly that services their area as there is essentially no reasonable alternative. In return for this special status and exemption from a myriad of laws designed to encourage competition, utility monopolies are regulated with special rules and laws designed to protect the rights of ratepayers and consumers who cannot choose another supplier if they do not think the company is providing good service, dealing with them fairly or pricing their services reasonably.

The job of protecting the ratepayer, consumer and citizen from the corporation's drive to grow and expand their monopoly status into greater market power and profitability falls to regulators charged to act in the public interest. Public Service Commissions, Attorneys General and state legislators have direct oversight responsibility to keep utility monopolies in check and protect citizens.

Using utility ratepayer funds to subsidize new businesses.
The expansion of regulated utility monopolies using ratepayer funds to enter unregulated businesses are not new. Over the past twenty years, many utilities have attempted to leverage their monopoly power, access to customer data and ratepayer funded infrastructure to subsidize easy entry into electrical, heating, air conditioning, plumbing and other industries.

States across the U.S. have enacted laws to regulate so-called **Utility Affiliate Transactions,** preventing regulated utilities from using ratepayer funded resources to subsidize nonregulated subsidiaries. Florida has yet to implement even the most basic regulatory protections.

Massive political spending, lobbying, and donations as well as contributions specifically targeted at those with the power to nominate members to the Florida Public Service Commission, the state regulatory authority, have all contributed to the undermining of regulatory oversight and reasonable safeguards against the misuse of ratepayer funds.

Undermining Regulatory Oversight

Major campaign donations. Florida's four largest energy companies contributed more than $43 million to state level candidates, political parties and political committees in the 2014 and 2016 election cycles.

- **Political spending increasing.** The energy companies spent more than twice as much in the most recent four-year period than in the previous ten-year period.
- **Lobby expenditures trending upward.** Utilities continue to have an outsized lobbying presence in the Florida Capitol, employing more than one lobbyist for every two legislators.
- **Trade associations used to lobby.** While the energy companies are not supposed to use customer dollars to lobby, regulators allow them to bypass the ban by paying dues to trade groups and associations that lobby.

Utility	Average Number of Contract Lobbyists Per Year 2014 – 2017	Total Paid 2014 - 2017
Duke Energy	25	$750,000
Florida Power & Light	32	1,760,000
Gulf Power Company	13	$940,000
TECO/Tampa Electric	24	$2,098,000
Totals	94	$5,548,000

(SOURCE: Power Play Redux: Political Influence of Florida's Top Energy Corporations: http://www.integrityflorida.org/wp-content/uploads/2018/05/Power-Play-Redux-final.pdf)

Our review of 13 states chosen randomly illustrates the type of restrictions used across the country to prohibit misuse of ratepayer funds and prevent subsidization. These regulations address the sharing of customer data, joint marketing, sharing of personnel and corporate infrastructure and much more in order to shield ratepayers, local businesses and entire industries from insurmountable and unfair competition.

Federal Trade Commission and Consumer Protections

The Federal Trade Commission weighed in on this issue and offers guidelines for utility/affiliate codes of conduct in their July 2000 report, "Competition and Consumer Protection Perspectives on Electric Power Regulatory Reform."

> ***"The chief concerns in the context of affiliate transactions in retail competition typically include discrimination as well as cross-subsidization or cost-shifting that favors the unregulated affiliate relative to its competitors. Consumers are harmed because discrimination and cross-subsidization may displace more efficient and innovative competitors and shift production to less efficient suppliers… Most states have rules or codes of conduct against cost shifts and cross-subsidization already in place because of the traditional concern about burdening ratepayers with unrelated costs."***

Moreover, the FTC dedicates an entire sub-section to logo usage, where they identify concerns of using a utility's logo resulting in consumer deception and cross-subsidization.

> ***"Harm to competition may occur because the unregulated affiliate's access to the logo of its regulated parent gives it a cost advantage through potential cross-subsidization that otherwise equally efficient competitors cannot match. The anticompetitive results may include (1) higher-than-necessary average operating (i.e., non-logo-related) costs for the industry and higher prices for consumers due to the continued operation of the affiliate, which can survive with higher-than-necessary costs due to the cross-subsidization; (2) greater market concentration and less competition than would occur absent the cross-subsidization;(78) and (3) discouragement of potential entry that likely would have occurred absent the cross-subsidization, including entry involving innovative products and production processes."***

There is no need to reinvent the wheel as most states have already successfully acted to reign in ratepayer subsidized utility expansions. Aggressive lobbying and political spending must not prevent legislators and regulators from doing their jobs and acting in the public trust. Florida must finally take action and enact real legislative and regulatory controls, as other states have done, to protect consumers, ratepayers and small businesses.

Other states have found a way through the wall of corporate lobbying and political spending to protect citizens. Failing to do so in Florida will result in irreparable harm and will be a distressing demonstration of a complete breakdown and abdication of legislative and regulatory oversight bought and paid for with utility ratepayer funds.

FLORIDA DRAFT LEGISLATION

Chapter 366, Florida Statutes, Public Utilities

Section 366.____ is created to read:

Section 366.____ Public utility or electric utility prohibited from engaging in construction contracting services, exceptions, penalty.—

(1) A public utility or electric utility, as defined in s. 366.02, may not engage in construction contracting services, as defined in ch. 489, unless otherwise provided in subsection (7).

(2) No affiliate or utility contractor may use any facility, electronic processing or communication mechanism, public relations or marketing product or service, vehicle, service tool, instrument, employee, or any other public utility or electric utility asset, the cost of which is recoverable in the regulated rate for utility service, to engage in construction contracting services unless the public utility or electric utility is compensated for the use of such asset at cost to the public utility or electric utility.

(3) No affiliate or utility contractor may use or combine any bookkeeping, billing, mailing, financing, legal services, or insurance product or service procured or owned by a public utility or electric utility for any activity related to construction contracting.

(4) A public utility or electric utility may not provide any affiliate or utility contractor with bookkeeping, billing, mailing, financing, legal services, or insurance product or service related to construction contracting, including service warranty or home warranty products or services under ch. 634 or construction liens under part I, ch. 713.

(5) A public utility or electric utility may not use or allow any affiliate or utility contractor to use the name, trade or service mark, logo, or slogan of such public utility or electric utility to engage in construction contracting services.

(6) A public utility or electric utility may not engage in or assist any affiliate or utility contractor in engaging in construction contracting services in a manner which subsidizes the activities of such public utility, electric utility, affiliate or utility contractor to the extent of changing the rates or charges for the public utility's or electric utility's regulated services above or below the rates or charges that would be in effect if the public utility or electric utility were not engaged in or assisting any affiliate or utility contractor in engaging in such activities.

(7) Any affiliate or utility contractor engaged in construction contracting services shall maintain accounts, bookkeeping and records separate and distinct from the public utility or electric utility.

(8) The provisions of this section shall apply to any affiliate or utility contractor engaged in construction contracting services that is owned, controlled or under common control with a public utility or electric utility providing regulated utility service in this state or any other state.

(9) The provisions of this section shall not be construed to prohibit a public utility or electric utility from providing emergency service, providing any service required by law, providing any service exempt from construction contracting licensure under s. 489.103(5), or providing a program pursuant to an existing tariff, rule or order of the Commission.

AMERICAN OVERSIGHT

FEDERAL ENERGY REGULATORY COMMISSION

Rule: Cross-Subsidization Restrictions on Affiliate Transactions, [Docket No. RM07-15-000; Order No. 707][1]

SUMMARY: In this Final Rule, pursuant to sections 205 and 206 of the Federal Power Act, the Federal Energy Regulatory Commission (Commission) is amending its regulations to codify restrictions on affiliate transactions between franchised public utilities that have captive customers or that own or provide transmission service over jurisdictional transmission facilities, and their market-regulated power sales affiliates or non-utility affiliates. These restrictions will supplement other restrictions the Commission has in place to protect captive customers of franchised public utilities or transmission customers of franchised public utilities that own or provide transmission service over jurisdictional transmission facilities from inappropriate cross-subsidization of affiliates.

Order No. 707 expands the applicability of recently-adopted affiliate transaction restrictions. FERC's restrictions are meant to prevent franchised public utilities (that is, utilities with franchised service obligations under state law) with captive customers from unfairly subsidizing their unregulated affiliates at the captive customers' expense. FERC traditionally has addressed this issue in the context of market-based rate sellers, and recently codified in its regulations a series of restrictions on transactions between franchised public utilities with captive customers and their affiliates that sell power at marketbased rates. Even more recently, in a 2007 order approving the acquisition of KeySpan by National Grid, FERC applied those conditions not only to the relationship between a franchised public utility with captive customers and its affiliates that sell power at market-based rates, but also to the relationship between the utility and all of its other affiliates, even those that do not engage in power sales.

Order No. 707 further broadens the scope of the affiliate transaction restrictions so that the rules adopted in the National Grid merger proceeding will apply to all FERC-jurisdictional franchised utilities that either (1) serve wholesale or retail customers under cost-based regulation, or (2) own or provide transmission service over FERC jurisdictional transmission facilities. However, FERC clarifies that if a franchised public utility has received a determination from FERC that it does not have captive customers, it may continue to rely on that determination. If a franchised public utility is subject to the affiliate restrictions under Order No. 707, it must comply with the following rules:

‡ FERC approval is required for any wholesale sale by the utility to an affiliate eligible to sell wholesale energy at market-based rates, or by such an affiliate to the utility.

‡ Sales of non-power goods and services to any affiliate must be at the higher of cost or market price.

‡ With the exception of purchases from "centralized service companies" (i.e., a service company providing legal, accounting, tax, human resources, and related services) purchases of non-power goods and services from any affiliate must be at a price no higher than the market price.

‡ Purchases by a franchised utility of non-power goods and services from a "centralized service company" must be at cost.[2]

FEDERAL TRADE COMMISSION

Competition and Consumer Protection Perspectives on Electric Power Regulatory Reform[3]

Limits on Transactions Between Regulated Utilities and Their Unregulated Affiliates

As discussed above, we have significant reservations about the effectiveness of relying exclusively on behavioral rules [to discourage discrimination in transactions between regulated utilities and their unregulated affiliates]. If the scale, scope, or vertical integration economies of affiliation are substantial and can be realized even in the presence of functional unbundling, [a state commission] may wish to strengthen its approach by requiring the affiliates to operate independently, on a bid-based, arm's-length basis. For example, [a state commission] may wish to require that the bulk of regulated utility purchases from unregulated affiliates be restricted to contracts won through an objective bidding process in which a third party evaluates the bids.

A critical element of workable bidding systems is the perceived and actual objectivity of the bid evaluation process. The system must be perceived as objective in order to attract bidders. Potential bidders, other than affiliates, may be unwilling to incur the costs of making a bid if the system is perceived as biased in favor of affiliates. The system must also be objective in fact in order to avoid raising costs for customers of the regulated utility. The use of third-party evaluations of the bids is one technique for achieving such objectivity.(70)

In addition, [a state commission] may wish to consider restrictions on asset transfers from the parent distribution utility to an affiliate. Some states are considering making such transfers subject to particular price bounds to assure that ratepayers do not unfairly subsidize the activities of the affiliate.(71) This proposal raises issues similar to determining the value of assets in assessing stranded costs. Just as some states, such as Massachusetts, have determined that the market is the best gauge of value to determine the value of generating assets in a stranded cost assessment,(72) [a state commission] may wish to use actual market values, rather than a band of prices, for asset transfers. The arm's-length bid process discussed above is an example of a method to establish actual market values.

Benefits and Costs of Allowing Unregulated Affiliates to Use the Parent, Regulated Distribution Firm's Logo

[A state commission] may wish to compare the benefits and costs of allowing affiliates of regulated distribution firms to use the corporate logo of the distribution firm.(73) One benefit of such use may be to reduce prices in the competitive markets served by affiliates. With access to the parent company's logo, the affiliate is likely to have lower marketing costs that may be passed along to consumers in a competitive market.(74) The lower prices of the affiliate may encourage other firms serving this market to charge lower prices as well, resulting in lower prices for the market as a whole.(75) If consumers' perceptions of the implications of an affiliate's use of the parent utility's logo are accurate,(76) a second prospective benefit may be reduced search costs for consumers.

On the cost side, we have identified two potential concerns about the use of logos by affiliates: deception of consumers and cross-subsidization.

(1) Potential Deception: [This is discussed in Chapter VIII.]

(2) Potential Cross-subsidization and the Use of the Parent Utility's Logo: Although some forms of cross-subsidization may be effectively addressed by transfer pricing rules,(77) other forms may be more difficult to assess. Cross-subsidization could take the form of cost-shifting among inputs used for both regulated and unregulated products, such as the use of a corporate logo in marketing the affiliate's products and services as well as the regulated parent utility's products and services. Costs of shared inputs could be assigned in a biased manner (i.e., with additional costs assigned to the regulated side of the business) so that the regulated entity can justify

[3] https://www.ftc.gov/reports/competition-consumer-protection-perspectives-electric-power-regulatory-reform#Limits

higher rates. This biased assignment of costs, which is often difficult for regulators to detect and remedy, distorts competition and produces inefficiencies in the unregulated business as well.

The risk of failing to detect anticompetitive cross-subsidization is heightened if (1) the reputation of the regulated parent utility is effectively embodied or represented by its logo; (2) the regulated parent firm can improve its reputation by incurring costs of the type that regulators would traditionally include in the rate base of the regulated firm; and (3) the unregulated affiliate can enhance its own reputation among consumers by using the logo of the regulated parent firm, even if elements of the regulated firm's reputation do not apply to the affiliate. When these factors are present, a regulated incumbent will have a heightened incentive to overinvest in reputation-building because it can expect to incorporate a greater share of these investments into its rate base than if the assets were not shared with the affiliate. Moreover, the affiliate would realize additional profits from its increased sales in the unregulated market. The principal obstacle to deterring this conduct is that it may be extraordinarily difficult to distinguish competitive from anticompetitive levels of investment in reputation-building. Harm to competition and consumers may result from such overinvestment and subsequent cross-subsidization.

Harm to competition may occur because the unregulated affiliate's access to the logo of its regulated parent gives it a cost advantage through potential cross-subsidization that otherwise equally efficient competitors cannot match. The anticompetitive results may include (1) higher-than-necessary average operating (i.e., non-logo-related) costs for the industry and higher prices for consumers due to the continued operation of the affiliate, which can survive with higher-than-necessary costs due to the cross-subsidization; (2) greater market concentration and less competition than would occur absent the cross-subsidization;(78) and (3) discouragement of potential entry that likely would have occurred absent the cross-subsidization, including entry involving innovative products and production processes.

If [a state commission] upon more detailed study determines that there are substantial economies of vertical integration that cannot be realized without allowing affiliates to use the logos of their respective regulated parent utilities, [a state commission] may wish to consider two policy alternatives that are designed to obtain some of the potential benefits of affiliate use of the parent distribution firm's logo without incurring the costs. First, some states are considering allowing the use of the logo by affiliates, contingent upon use of a disclaimer that avoids consumer deception. [A state commission] may wish to evaluate this alternative by examining the impression that consumers are likely to have with the use of the logo accompanied by a disclaimer, and whether that impression would be accurate.(79)Consumer research designed to investigate the effects of several alternative policies on consumers may be the most effective approach.(80) A disclaimer that suffices to avoid consumer deception also may suffice to discourage cross-subsidization in the form of excessive investment in reliability.

Another alternative for transfer of the rights to use the parent firm's logo is to require that the affiliate (and any other firms granted the right to use the logo) pay the parent for the right to use the logo.(81) Because the logo is an asset, use of the logo by other firms, including affiliates, represents an asset transfer from the parent firm, and [a state commission] may wish to treat it like other asset transfers.(82) In order to avoid cross-subsidization in such a transaction, the use of the parent logo must be fairly evaluated.

MASSACHUSETTS

Rule: 220 CMR 12.00 STANDARDS OF CONDUCT FOR DISTRIBUTION COMPANIES AND THEIR AFFILIATES[4] and Proposed Bills H3513 and H860[5]

Market Value Asset Transfers

A Distribution Company may sell, lease, or otherwise transfer to an Affiliate, including a Competitive Affiliate, an asset, the cost of which has been reflected in the Distribution Company's rates for regulated service, provided that the price charged the Affiliate is the higher of the net book value or market value of the asset. The Department shall determine the market value of any such asset sold, leased, or otherwise transferred, based on the highest price that the asset could have reasonably realized after an open and competitive sale.

A Distribution Company may sell, lease, or otherwise transfer to an affiliate, including a Competitive Affiliate, assets other than those subject to 220 CMR 12.04(1), and may also provide services to an affiliate, including a Competitive Affiliate, provided that the price charged for such asset or service is equal to or greater than the Distribution Company's fully allocated cost to provide the asset or service.

An Affiliated Company may sell, lease, or otherwise transfer an asset to a Distribution Company, and may also provide services to a Distribution Company, provided that the price charged to the Distribution Company is no greater than the market value of the asset or service provided.

A Distribution Company must maintain a log of all transactions with Affiliated Companies made pursuant to 220 CMR 12.04(1) through (3). The log shall include the date of the transaction, the nature and quantity of the asset or service provided, the price charged, and an explanation of how the price was derived for purposes of compliance with 220 CMR 12.04. All log entries must be dated and made contemporaneously with relevant transactions. The log shall be kept up to date. The Distribution Company shall file a copy of the log with the Department no later than January 15 of each year, covering the previous year.

Sharing Customer Data

A Distribution Company shall not release any proprietary customer information to an Affiliate without the prior written authorization of the customer.

To the extent that a Distribution Company provides a Competitive Affiliate with information not readily available or generally known to any Non-affiliated Supplier, which information was obtained by the Distribution Company in the course of providing distribution service to its customers, the Distribution Company shall make that information available on a non-discriminatory basis to all Non-affiliated Suppliers transacting business in its service territory. 220 CMR 12.03(10) does not apply to customer-specific information obtained with proper authorization, information necessary to fulfill the provisions of a contract, or information relating to the provision of general and administrative support services.

Joint Marketing

The Distribution Company shall not engage in joint advertising or marketing programs of any sort with its Competitive Energy Affiliate, nor shall the Distribution Company directly promote or market any product or service offered by any Competitive Affiliate.

[4] https://www.mass.gov/files/220_cmr_12.00_10_3_08.pdf

[5] https://malegislature.gov/Bills/187/H860

Sharing Employees

Employees of a Distribution Company shall not be shared with a Competitive Energy Affiliate, and shall be physically separated from those of the Competitive Energy Affiliate. The Distribution Company shall fully and transparently allocate costs for any shared facilities or general and administrative support services provided to any Competitive Affiliate.

Logo Usage

Subject to 220 CMR 12.03(12), a Distribution Company may allow an Affiliate, including a Competitive Energy Affiliate, to identify itself, through the use of a name, logo, or both, as an Affiliate of the Distribution Company, provided that such use by a Competitive Energy Affiliate shall be accompanied by a disclaimer that shall state that no advantage accrues to customers or others in the use of the Distribution Company's services as a result of that customer or others dealing with the Competitive Energy Affiliate, and that the customer or others need not purchase any product or service from any Competitive Energy Affiliate in order to obtain services from the Distribution Company on a non-discriminatory basis. The disclaimer shall be written or spoken, or both, as may be appropriate given the context of the use of the name or logo.

CALIFORNIA

Rule: Public Utilities Commission Affiliate Transaction Rules Applicable to Large California Energy Utilities[6]

Subsidization

Corporate Support: As a general principle, a utility, its parent holding company, or a separate affiliate created solely to perform corporate support services may share with its affiliates joint corporate oversight, governance, support systems and personnel. Any shared support shall be priced, reported and conducted in accordance with the Separation and Information Standards set forth herein, as well as other applicable Commission pricing and reporting requirements.

As a general principle, such joint utilization shall not allow or provide a means for the transfer of confidential information from the utility to the affiliate, create the opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates. In the compliance plan, a corporate officer from the utility and holding company shall verify the adequacy of the specific mechanisms and procedures in place to ensure the utility follows the mandates of this paragraph, and to ensure the utility is not utilizing joint corporate support services as a conduit to circumvent these Rules.

Market Value Asset Transfers

Transfer of Goods and Services: To the extent that these Rules do not prohibit transfers of goods and services between a utility and its affiliates, all such transfers shall be subject to the following pricing provisions:

1. Transfers from the utility to its affiliates of goods and services produced, purchased or developed for sale on the open market by the utility will be priced at fair market value.

2. Transfers from an affiliate to the utility of goods and services produced, purchased or developed for sale on the open market by the affiliate shall be priced at no more than fair market value.

3. For goods or services for which the price is regulated by a state or federal agency, that price shall be deemed to be the fair market value, except that in cases where more than one state commission regulates the price of goods or services, this Commission's pricing provisions govern.

4. Goods and services produced, purchased or developed for sale on the open market by the utility will be provided to its affiliates and unaffiliated companies on a nondiscriminatory basis, except as otherwise required or permitted by these Rules or applicable law.

5. Transfers from the utility to its affiliates of goods and services not produced, purchased or developed for sale by the utility will be priced at fully loaded cost plus 5% of direct labor cost.

6. Transfers from an affiliate to the utility of goods and services not produced, purchased or developed for sale by the affiliate will be priced at the lower of fully loaded cost or fair market value.

Sharing Customer Data

Customer Information: A utility shall provide customer information to its affiliates and unaffiliated entities on a strictly non-discriminatory basis, and only with prior affirmative customer written consent.

Non-Customer Specific Non-Public Information: A utility shall make non-customer specific non-public information, including but not limited to information about a utility's natural gas or electricity purchases, sales, or operations or about the utility's gas-related goods or services, electricity-related goods or services, available to the utility's affiliates only if the utility makes that information contemporaneously available to all other service providers on

[6] http://www.cpuc.ca.gov/General.aspx?id=1459

the same terms and conditions, and keeps the information open to public inspection. Unless otherwise provided by these Rules, a utility continues to be bound by all Commission-adopted pricing and reporting guidelines for such transactions. Utilities are also permitted to exchange proprietary information on an exclusive basis with their affiliates, provided the utility follows all Commission-adopted pricing and reporting guidelines for such transactions, and it is necessary to exchange this information in the provision of the corporate support services permitted by Rule V E below. The affiliate's use of such proprietary information is limited to use in conjunction with the permitted corporate support services, and is not permitted for any other use. Nothing in this Rule precludes the exchange of information pursuant to D.97-10-031.

Joint Marketing

A utility shall not participate in joint advertising or joint marketing with its affiliates. This prohibition means that utilities may not engage in activities which include, but are not limited to the following:

1. A utility shall not participate with its affiliates in joint sales calls, through joint call centers or otherwise, or joint proposals (including responses to requests for proposals (RFPs)) to existing or potential customers. At a customer's unsolicited request, a utility may participate, on a nondiscriminatory basis, in non-sales meetings with its affiliates or any other market participant to discuss technical or operational subjects regarding the utility's provision of transportation service to the customer;

2. Except as otherwise provided for by these Rules, a utility shall not participate in any joint activity with its affiliates. The term "joint activities" includes, but is not limited to, advertising, sales, marketing, communications and correspondence with any existing or potential customer;

3. A utility shall not participate with its affiliates in trade shows, conferences, or other information or marketing events held in California.

Sharing Employees

1. Except as permitted in Section V E (corporate support), a utility and its affiliates shall not jointly employ the same employees. This Rule prohibiting joint employees also applies to Board Directors and corporate officers, except for the following circumstances: In instances when this Rule is applicable to holding companies, any board member or corporate officer may serve on the holding company and with either the utility or affiliate (but not both). Where the utility is a multi-state utility, is not a member of a holding company structure, and assumes the corporate governance functions for the affiliates, the prohibition against any board member or corporate officer of the utility also serving as a board member or corporate officer of an affiliate shall only apply to affiliates that operate within California. In the case of shared directors and officers, a corporate officer from the utility and holding company shall verify in the utility's compliance plan the adequacy of the specific mechanisms and procedures in place to ensure that the utility is not utilizing shared officers and directors as a conduit to circumvent any of these Rules.

2. All employee movement between a utility and its affiliates shall be consistent with the following provisions:

    a. A utility shall track and report to the Commission all employee movement between the utility and affiliates. The utility shall report this information annually pursuant to our Affiliate Transaction Reporting Decision, D.93-02-016, 48 CPUC2d 163, 171-172 and 180 (Appendix A, Section I and Section II H.).

    b. Once an employee of a utility becomes an employee of an affiliate, the employee may not return to the utility for a period of one year. This Rule is inapplicable if the affiliate to which the employee transfers goes out of business during the one-year period. In the event that such an employee returns to the utility, such employee cannot be retransferred, reassigned, or otherwise employed by the affiliate for a period of two years.

Employees transferring from the utility to the affiliate are expressly prohibited from using information gained from the utility in a discriminatory or exclusive fashion, to the benefit of the affiliate or to the detriment of other unaffiliated service providers.

c. When an employee of a utility is transferred, assigned, or otherwise employed by the affiliate, the affiliate shall make a one-time payment to the utility in an amount equivalent to 25% of the employee's base annual compensation, unless the utility can demonstrate that some lesser percentage (equal to at least 15%) is appropriate for the class of employee included. All such fees paid to the utility shall be accounted for in a separate memorandum account to track them for future ratemaking treatment (i.e. credited to the Electric Revenue Adjustment Account or the Core and Non-core Gas Fixed Cost Accounts, or other ratemaking treatment, as appropriate), on an annual basis, or as otherwise necessary to ensure that the utility's ratepayers receive the fees. This transfer payment provision will not apply to clerical workers. Nor will it apply to the initial transfer of employees to the utility's holding company to perform corporate support functions or to a separate affiliate performing corporate support functions, provided that that transfer is made during the initial implementation period of these rules or pursuant to a § 851 application or other Commission proceeding. However, the rule will apply to any subsequent transfers or assignments between a utility and its affiliates of all covered employees at a later time.

d. Any utility employee hired by an affiliate shall not remove or otherwise provide information to the affiliate which the affiliate would otherwise be precluded from having pursuant to these Rules.

e. A utility shall not make temporary or intermittent assignments, or rotations to its affiliates.

Sharing Corporate Infrastructure

Corporate Support: As a general principle, a utility, its parent holding company, or a separate affiliate created solely to perform corporate support services may share with its affiliates joint corporate oversight, governance, support systems and personnel. Any shared support shall be priced, reported and conducted in accordance with the Separation and Information Standards set forth herein, as well as other applicable Commission pricing and reporting requirements.

As a general principle, such joint utilization shall not allow or provide a means for the transfer of confidential information from the utility to the affiliate, create the opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates. In the compliance plan, a corporate officer from the utility and holding company shall verify the adequacy of the specific mechanisms and procedures in place to ensure the utility follows the mandates of this paragraph, and to ensure the utility is not utilizing joint corporate support services as a conduit to circumvent these Rules.

Examples of services that may be shared include: payroll, taxes, shareholder services, insurance, financial reporting, financial planning and analysis, corporate accounting, corporate security, human resources (compensation, benefits, employment policies), employee records, regulatory affairs, lobbying, legal, and pension management.

Examples of services that may not be shared include: employee recruiting, engineering, hedging and financial derivatives and arbitrage services, gas and electric purchasing for resale, purchasing of gas transportation and storage capacity, purchasing of electric transmission, system operations, and marketing.

Logo Usage

1. A utility shall not trade upon, promote, or advertise its affiliate's affiliation with the utility, nor allow the utility name or logo to be used by the affiliate or in any material circulated by the affiliate, unless it discloses in plain legible or audible language, on the first page or at the first point where the utility name or logo appears that:

    a. the affiliate "is not the same company as [i.e. PG&E, Edison, the Gas Company, etc.], the utility,";

    b. the affiliate is not regulated by the California Public Utilities Commission; and

    c. "you do not have to buy [the affiliate's] products in order to continue to receive quality regulated services from the utility."
    The application of the name/logo disclaimer is limited to the use of the name or logo in California.

2. A utility, through action or words, shall not represent that, as a result of the affiliate's affiliation with the utility, its affiliates will receive any different treatment than other service providers.

3. A utility shall not offer or provide to its affiliates advertising space in utility billing envelopes or any other form of utility customer written communication unless it provides access to all other unaffiliated service providers on the same terms and conditions.

4. A utility shall not participate in joint advertising or joint marketing with its affiliates. This prohibition means that utilities may not engage in activities which include, but are not limited to the following:

    a. A utility shall not participate with its affiliates in joint sales calls, through joint call centers or otherwise, or joint proposals (including responses to requests for proposals (RFPs)) to existing or potential customers. At a customer's unsolicited request, a utility may participate, on a nondiscriminatory basis, in non-sales meetings with its affiliates or any other market participant to discuss technical or operational subjects regarding the utility's provision of transportation service to the customer;

    b. Except as otherwise provided for by these Rules, a utility shall not participate in any joint activity with its affiliates. The term "joint activities" includes, but is not limited to, advertising, sales, marketing, communications and correspondence with any existing or potential customer;

    c. A utility shall not participate with its affiliates in trade shows, conferences, or other information or marketing events held in California.

5. A utility shall not share or subsidize costs, fees, or payments with its affiliates associated with research and development activities or investment in advanced technology research.

MISSOURI

Rule: Code of State Regulations 4 CSR 240-40.015[7]

Subsidization

4 CSR 240-40.015 Affiliate Transactions

PURPOSE: This rule is intended to prevent regulated utilities from subsidizing their nonregulated operations. In order to accomplish this objective, the rule sets forth financial standards, evidentiary standards and record keeping requirements applicable to any Missouri Public Service Commission (commission) regulated gas corporation whenever such corporation participates in transactions with any affiliated entity (except with regard to HVAC services as defined in section 386.754, RSMo Supp. 1998, by the General Assembly of Missouri). The rule and its effective enforcement will provide the public the assurance that their rates are not adversely impacted by the utilities' nonregulated activities.

4 CSR 240-40.017 HVAC Services Affiliate Transactions

PURPOSE: This rule prescribes the requirements for HVAC services affiliated entities and regulated gas corporations when such gas corporations participate in affiliated transactions with an HVAC affiliated entity as set forth in sections 386.754, 386.756, 386.760, 386.762 and 386.764, RSMo by the General Assembly of the State of Missouri.

A regulated gas corporation may not engage in or assist any affiliated entity or utility contractor in engaging in HVAC services in a manner which subsidizes the activities of such regulated gas corporation, affiliated entity or utility contractor to the extent of changing the rates or charges for the regulated gas corporation's services above or below the rates or charges that would be in effect if the regulated gas corporation were not engaged in or assisting any affiliated entity or utility contractor in engaging in such activities.

Market Value Asset Transfers

(D) In transactions involving the purchase of goods or services by the regulated gas corporation from an affiliated entity, the regulated gas corporation will use a commission approved Cost Allocation Manual (CAM) which sets forth cost allocation, market valuation and internal cost methods. This CAM can use benchmarking practices that can constitute compliance with the market value requirements of this section if approved by the commission.

In transactions involving the purchase of information, assets, goods or services by the regulated gas corporation from an affiliated entity, the regulated gas corporation will use a commission-approved CAM which sets forth cost allocation, market valuation and internal cost methods. This CAM can use bench marking practices that can constitute compliance with the market value requirements of this section if approved by the commission.

Sharing Customer Data

Specific customer information shall be made available to affiliated or unaffiliated entities only upon consent of the customer or as otherwise provided by law or commission rules or orders. General or aggregated customer information shall be made available to affiliated or unaffiliated entities upon similar terms and conditions. The regulated gas corporation may set reasonable charges for costs incurred in producing customer information. Customer information includes information provided to the regulated utility by affiliated or unaffiliated entities.

Joint Marketing/Logo Usage

Marketing materials, information or advertisements by an affiliate entity that share an exact or similar name, logo or trademark of the regulated utility shall clearly display or announce that the affiliate entity is not regulated by the Missouri Public Service Commission.

[7] https://www.sos.mo.gov/cmsimages/adrules/csr/previous/4csr/4csr0308/4c240-40.pdf

TEXAS

Rule: Texas Administrative Code Title 16 Part 2 Chapter 25 Subchapter K RULE §25.272[8]
(See also: Project 41616 2014 Texas PUC Ruling[9] and Texas Court of Appeals Dissenting Opinion[10] for issues including logo sharing)

Subsidization

A utility shall not subsidize the business activities of any affiliate with revenues from a regulated service. In accordance with PURA and the commission's rules, a utility and its affiliates shall fully allocate costs for any shared services, including corporate support services, offices, employees, property, equipment, computer systems, information systems, and any other shared assets, services, or products.

Market Value Asset Transfers

Sale of products or services by a utility. Unless otherwise approved by the commission and except for corporate support services, any sale of a product or service by a utility shall be governed by a tariff approved by the commission. Products and services shall be made available to any third party entity on the same terms and conditions as the utility makes those products and services available to its affiliates.

Sharing Customer Data

1) Proprietary customer information. A utility shall provide a customer with the customer's proprietary customer information, upon request by the customer. Unless a utility obtains prior affirmative written consent or other verifiable authorization from the customer as determined by the commission, or unless otherwise permitted under this subsection, it shall not release any proprietary customer information to a competitive affiliate or any other entity, other than the customer, an independent organization as defined by PURA §39.151, or a provider of corporate support services for the sole purpose of providing corporate support services in accordance with subsection (e)(2)(A) of this section. The utility shall maintain records that include the date, time, and nature of information released when it releases customer proprietary information to another entity in accordance with this paragraph. The utility shall maintain records of such information for a minimum of three years, and shall make the records available for third party review within 72 hours of a written request, or at a time mutually agreeable to the utility and the third party. When the third party requesting review of the records is not the customer, commission, or Office of Public Utility Counsel, the records may be redacted in such a way as to protect the customer's identity. If proprietary customer information is released to an independent organization or a provider of corporate support services, the independent organization or entity providing corporate support services is subject to the rules in this subsection with respect to releasing the information to other persons.

    (A) Exception for law, regulation, or legal process. A utility may release proprietary customer information to another entity without customer authorization where authorized or requested to do so by the commission or where required to do so by law, regulation, or legal process.

---

8 https://texreg.sos.state.tx.us/public/readtac$ext.TacPage?sl=R&app=9&p_dir=&p_rloc=&p_tloc=&p_ploc=&pg=1&p_tac=&ti=16&pt=2&ch=25&rl=272

9 https://www.puc.texas.gov/agency/rulesnlaws/subrules/electric/25.272/41616adt.pdf

10 https://cases.justia.com/texas/third-court-of-appeals/2014-03-13-00358-cv-1.pdf?ts=1405646304

(B) Exception for release to governmental entity. A utility may release proprietary customer information without customer authorization to a federal, state, or local governmental entity or in connection with a court or administrative proceeding involving the customer or the utility; provided, however, that the utility shall take all reasonable actions to protect the confidentiality of such information, including, but not limited to, providing such information under a confidentiality agreement or protective order, and shall also promptly notify the affected customer in writing that such information has been requested.

(C) Exception to facilitate transition to customer choice. In order to facilitate the transition to customer choice, a utility may release proprietary customer information to its affiliated retail electric provider or providers of last resort without authorization of those customers only during a period prescribed by the commission.

(D) Exception for release to providers of last resort. On or after January 1, 2002, a utility may provide proprietary customer information to a provider of last resort without customer authorization for the purpose of serving customers who have been switched to the provider of last resort.

(E) Exception for release to State of Texas' Division of Emergency Management. Beginning January 1, 2011, a utility may provide proprietary customer information to the State of Texas' Division of Emergency Management, upon that agency's request for purposes of identifying the customer as a critical care residential customer pursuant to §25.497 of this title (relating to Critical Load Industrial Customers, Critical Load Public Safety Customers, Critical Care Residential Customers, and Chronic Condition Residential Customers).

2) Nondiscriminatory availability of aggregate customer information. A utility may aggregate non-proprietary customer information, including, but not limited to, information about a utility's energy purchases, sales, or operations or about a utility's energy-related goods or services. However, except in circumstances solely involving the provision of corporate support services in accordance with subsection (e)(2)(A) of this section, a utility shall aggregate non-proprietary customer information for a competitive affiliate only if the utility makes such aggregation service available to all non-affiliates under the same terms and conditions and at the same price as it is made available to any of its affiliates. In addition, no later than 24 hours prior to a utility's provision to its competitive affiliate of aggregate customer information, the utility shall post a conspicuous notice on its Internet site or other public electronic bulletin board for at least 30 consecutive calendar days, providing the following information: the name of the competitive affiliate to which the information will be provided, the rate charged for the information, a meaningful description of the information provided, and the procedures by which non-affiliates may obtain the same information under the same terms and conditions. The utility shall maintain records of such information for a minimum of three years, and shall make such records available for third party review within 72 hours of a written request, or at a time mutually agreeable to the utility and the third party.

3) No preferential access to transmission and distribution information. A utility shall not allow preferential access by its competitive affiliates to information about its transmission and distribution systems.

4) Other limitations on information disclosure. Nothing in this rule is intended to alter the specific limitations on disclosure of confidential information in the Texas Utilities Code, the Texas Government Code, Chapter 552, or the commission's substantive and procedural rules.

5) Other information. Except as otherwise allowed in this subsection, a utility shall not share information, except for information required to perform allowed corporate support services, with competitive affiliates unless the utility can prove to the commission that the sharing will not compromise the public interest prior to any such sharing. Information that is publicly available, or that is unrelated in any way to utility activities, may be shared.

Joint Marketing/Sharing Corporate Infrastructure

Corporate support services--Services shared by a utility, its parent holding company, or a separate affiliate created to perform corporate support services, with its affiliates of joint corporate oversight, governance, support systems, and personnel. Examples of services that may be shared, to the extent the services comply with the requirements prescribed by PURA §39.157(d) and (g) and rules implementing those requirements, include human resources, procurement, information technology, regulatory services, administrative services, real estate services, legal services, accounting, environmental services, research and development unrelated to marketing activity and/or business development for the competitive affiliate regarding its services and products, internal audit, community relations, corporate communications, financial services, financial planning and management support, corporate services, corporate secretary, lobbying, and corporate planning.

Examples of services that may not be shared include engineering, purchasing of electric transmission facilities and service, transmission and distribution system operations, and marketing, unless such services are provided by a utility, or a separate affiliate created to perform such services, exclusively to affiliated regulated utilities and only for provision of regulated utility services.

(h) Safeguards relating to joint marketing and advertising.
(1) Joint marketing, advertising, and promotional activities.
(A) A utility shall not:
i. provide or acquire leads on behalf of its competitive affiliates;
ii. solicit business or acquire information on behalf of any of its competitive affiliates;
iii. give the appearance of speaking or acting on behalf of any of its competitive affiliates;
iv. share market analysis reports or other proprietary or non-publicly available reports, with its competitive affiliates;
v. represent to customers or potential customers that it can offer competitive retail services bundled with its tariffed services; or
vi. request authorization from its customers to pass on information exclusively to its competitive affiliate.

(B) A utility shall not engage in joint marketing, advertising, or promotional activities of its products or services with those of a competitive affiliate in a manner that favors the affiliate. Such joint marketing, advertising, or promotional activities include, but are not limited to, the following activities:
i. acting or appearing to act on behalf of a competitive affiliate in any communications and contacts with any existing or potential customers;
ii. joint sales calls;
ii. joint proposals, either as requests for proposals or responses to requests for proposals:
iv. joint promotional communications or correspondence, except that a utility may allow a competitive affiliate access to customer bill advertising inserts according to the terms of a commission-approved tariff so long as access to such inserts is made available on the same terms and conditions to non-affiliates offering similar services as the competitive affiliate that uses bill inserts;

v. joint presentation at trade shows, conferences, or other marketing events within the State of Texas; and
vi. providing links between any of a utility's websites and social media platforms, and any of the websites and social media platforms of its competitive affiliates.

Sharing Employees

Sharing of employees, facilities, or other resources. Except as otherwise allowed in paragraph (3), (4), (5), or (7) of this subsection, a utility shall not share employees, facilities, or other resources with its competitive affiliates unless the utility can prove to the commission prior to such sharing that the sharing will not compromise the public interest. Such sharing may be allowed if the utility implements adequate safeguards precluding employees of a competitive affiliate from gaining access to information in a manner that would allow or provide a means to transfer confidential information from a utility to an affiliate, create an opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates.

(3) Sharing officers and directors, property, equipment, computer systems, information systems, and corporate services. A utility and a competitive affiliate may share common officers and directors, property, equipment, computer systems, information systems and corporate support services, if the utility implements safeguards that the commission determines are adequate to preclude employees of a competitive affiliate from gaining access to information in a manner that would allow or provide a means to transfer confidential information from a utility to an affiliate, create an opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates

(4) Employee transfers and temporary assignments. A utility shall not assign, for less than one year, utility employees engaged in transmission or distribution system operations to a competitive affiliate unless the employee does not have knowledge of confidential information. Utility employees engaged in transmission or distribution system operations, including persons employed by a service company affiliated with the utility who are engaged in transmission system operations on a day-to-day basis or have knowledge of transmission or distribution system operations and are transferred to a competitive affiliate, shall not remove or otherwise provide or use confidential property or information gained from the utility or affiliated service company in a discriminatory or exclusive fashion, to the benefit of the competitive affiliate or to the detriment of non-affiliated electric suppliers. Movement of an employee engaged in transmission or distribution system operations, including a person employed by a service company affiliated with the utility who is engaged in transmission or distribution system operations on a day-to-day basis or has knowledge of transmission or distribution system operations from a utility to a competitive affiliate or vice versa, may be accomplished through either the employee's termination of employment with one company and acceptance of employment with the other, or a transfer to another company, as long as the transfer of an employee from the utility to an affiliate results in the utility bearing no ongoing costs associated with that employee. Transferring employees shall sign a statement indicating that they are aware of and understand the restrictions and penalties set forth in this section. The utility also shall post a conspicuous notice of such a transfer on its Internet site or other public electronic bulletin board within 24 hours and for at least 30 consecutive calendar days. The exception to this provision is that employees may be temporarily assigned to an affiliate or non-affiliated utility to assist in restoring power in the event of a major service interruption or assist in resolving emergency situations affecting system reliability. Consistent with §25.84(h) of this title (relating to Reporting of Affiliate Transactions for Electric Utilities), however, within 30 days of such a deviation from the code of conduct, the utility shall report this information to the commission and shall conspicuously post the information on its Internet site or other public electronic bulletin board for 30 consecutive calendar days.

(5) Sharing of office space. A utility's office space shall be physically separate from that of its competitive affiliates, where physical separation is accomplished by having office space in separate buildings or, if within the same building, by a method such as having offices on separate floors or with separate access, unless otherwise approved by the commission.

(6) Separate books and records. A utility and its affiliates shall keep separate books of accounts and records, and the commission may review records relating to a transaction between a utility and an affiliate.

(A) In accordance with generally accepted accounting principles or state and federal guidelines, as appropriate, a utility shall record all transactions with its affiliates, whether they involve direct or indirect expenses.

(B) A utility shall prepare financial statements that are not consolidated with those of its affiliates.

(C) A utility and its affiliates shall maintain sufficient records to allow for an audit of the transactions between the utility and its affiliates. At any time, the commission may, at its discretion, require a utility to initiate, at the utility's expense, an audit of transactions between the utility and its affiliates performed by an independent third party.

(7) Limited credit support by a utility. A utility may share credit, investment, or financing arrangements with its competitive affiliates if it complies with subparagraphs (A) and (B) of this paragraph.

(A) The utility shall implement adequate safeguards precluding employees of a competitive affiliate from gaining access to information in a manner that would allow or provide a means to transfer confidential information from a utility to an affiliate, create an opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of affiliates.

(B) The utility shall not allow an affiliate to obtain credit under any arrangement that would include a specific pledge of any assets in the rate base of the utility or a pledge of cash reasonably necessary for utility operations. This subsection does not affect a utility's obligations under other law or regulations, such as the obligations of a public utility holding company under §25.271(c)(2) of this title (relating to Foreign Utility Company Ownership by Exempt Holding Companies).

CONNECTICUT

Rule: Department of Public Utility Control: Code of Conduct for Electric Distribution Companies Sec 16-244h1-7[11]

Subsidization

(5) An electric distribution company shall not share or subsidize costs, fees, or payments with its affiliates associated with research and development activities or investment in advanced technology research.

Market Value Asset Transfers

(3) An electric distribution company shall pay fair market value for all goods and services produced, purchased or developed by its generation entities or affiliates. The electric distribution company's purchasing practices shall be non-discriminatory and shall result in fair prices to its customers. All transfers from a generation entity or affiliate to its electric distribution company shall be posted on the affiliate discount internet web page referenced in section 16-244h-3(f) of the Regulations of Connecticut State Agencies within 24 hours of the time at which the service provided by the generation entity or affiliate is so provided.

Sharing Customer Data

(1) Unless the electric distribution company has received a form from a customer requesting that the customer's name, address, telephone number and rate class not be released, the electric distribution company may release such information to its generation entities or affiliates without customer consent, so long as such information is released only on a strictly non-discriminatory basis pursuant to the provisions of section 16-245o(d) of the Connecticut General Statutes. Customer consent is not required for an electric distribution company to provide load data concerning existing customers of its generation entities or affiliates necessary for customer billing and load reporting to the regional independent system operator, as that term is defined in section 16-1 of the Connecticut General Statutes.

(2) An electric distribution company shall receive prior affirmative written customer consent before releasing any customer information not referenced in subdivision (1) of this subsection. If an electric distribution company releases customer specific information not referenced in subdivision (1) of this subsection to its generation entity or affiliate, it shall make similar customer specific information available to other electric suppliers on a strictly non-discriminatory basis and on the same terms and conditions.

(3) If an electric distribution company releases customer information to its generation entities or affiliates for which no tariff or standard fee applies, within 24 hours of the time at which an electric distribution company releases such customer information, the electric distribution company shall post, either directly on or directly linked to the discount page required pursuant to section 16-244h-3(f) of the Regulations of Connecticut State Agencies, a notice providing the terms and conditions of such release of information. The notice shall include, but is not limited to:

(A) The name of the generation entity or affiliate receiving the information;
(B) The number of names provided;
(C) The type of information provided (e.g., customer specific load profiles);
(D) The price charged to the generation entity or affiliate; and
(E) The electronic form in which the information was provided.

Joint Marketing/Advertising/Logo Usage

(1) An electric distribution company shall not trade upon, promote, or advertise its generation entity or affiliate's affiliation with the electric distribution company, nor allow the electric distribution company name or logo to be used by the generation entity or affiliate in any advertisement or in any

[11] https://www.ct.gov/pura/lib/pura/regs/16-244h-1to7.pdf

material circulated by the generation entity or affiliate, unless it discloses in plain legible or audible language, on the first page or at the first point where the electric distribution company's name or logo appears that:

(A) The generation entity or affiliate ''is not the same company as [i.e. The Connecticut Light and Power Company, The United Illuminating Company], the electric distribution company,''; and

(B) ''You do not have to buy [the generation entity or affiliate's] products in order to continue to receive quality regulated services from the electric distribution company.''

The application of the name/logo disclaimer is limited to the use of the name or logo in Connecticut. Any written disclaimer shall be in bold print, and shall not utilize a typeface of less than eight points in size. Compensation for ratemaking purposes for the use of the electric distribution company's logo by a generation entity or affiliate shall be determined by the department in any rate case held pursuant to section 16-19 of the Connecticut General Statutes. The electric distribution company shall record any such use of its logo by its generation entity or affiliate.

(2) An electric distribution company, through action or words, shall not represent that, as a result of the generation entity or affiliate's relationship with the electric distribution company, its generation entity or affiliates will receive any different treatment than other service providers.

(3) An electric distribution company shall not offer or provide to any generation entity or affiliate advertising space in electric distribution company billing envelopes or any other form of written electric distribution company customer communication. The appearance of a generation entity or affiliate's name or logo on a customer bill to indicate the customer's choice of electric supplier shall not be considered trading upon or promoting the generation entity or affiliate's affiliation with the electric distribution company under subdivision (1) of this subsection, and shall not be considered joint advertising or joint marketing prohibited in subdivision (4) of this section. An electric distribution company shall offer each electric supplier the ability to display its name or logo or both on the customer bill, to indicate the customer's choice of electric supplier, under the same terms and conditions as those offered to the electric distribution company's generation entities or affiliates. The appearance of an electric distribution company's logo on a customer bill to indicate the provider of electric distribution services shall not require the disclaimers listed in subdivision (1) of this section.

(4) An electric distribution company shall not participate in joint advertising or joint marketing with its generation entities or affiliates. This prohibition against joint advertising or joint marketing includes, but is not limited to the following:

(A) An electric distribution company shall not participate with its generation entities or affiliates through joint sales calls, through joint call centers or otherwise, or through joint proposals (including responses to requests for proposals) to existing or potential customers. This subparagraph does not prohibit an electric distribution company from participating, on a nondiscriminatory basis, in non-sales meetings with its generation entities or affiliates or any other electric supplier to discuss technical or operational subjects regarding the electric distribution company's provision of transportation service to the customer. An electric distribution company shall maintain a record of all such meetings that shall include, but is not limited to, the customer's name and customer class, the customers electric supplier at the time of the meeting, the date of the meeting and a general description of the subject matter discussed. The record of meetings shall be open to inspection by the department and its staff consistent with the provisions of section 16-244h-5(b) of the Regulations of Connecticut State Agencies;

(B) Except as otherwise provided for by sections 16-244h-1 to 16-244h-7, inclusive, of the Regulations of Connecticut State Agencies, an electric distribution company shall not participate in any joint activity with its generation entities or affiliates. The term ''joint activity'' includes, but is not limited to, advertising, sales, marketing, communications and correspondence with any existing or potential customer;

(C) An electric distribution company shall not participate with its generation entities or affiliates in trade shows, conferences, or other information or marketing events.

(5) An electric distribution company shall not share or subsidize costs, fees, or payments with its affiliates associated with research and development activities or investment in advanced technology research.

Corporate Support/Sharing Employees

(f) Corporate Support:
(1) An electric distribution company, its parent holding company, or a separate affiliate created solely to perform corporate support services may share with its generation entities or affiliates joint corporate oversight, governance, support systems and personnel. Any shared corporate support shall be priced, reported and conducted in accordance with the separation and information standards set forth in sections 16-244h-1 to 16-244h-7, inclusive, of the Regulations of Connecticut State Agencies, as well as other applicable department pricing and reporting requirements.

(2) Such shared corporate support shall not allow or provide a means for the transfer of confidential information such as customer information or noncustomer specific non-public information from the electric distribution company to the affiliate, create the opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create opportunities for cross subsidization of generation entities or affiliates. In the compliance plan submitted pursuant to section 16-244h-7 of the Regulations of Connecticut State Agencies, a corporate officer from the electric distribution company and holding company shall verify the adequacy of the specific mechanisms and procedures in place to ensure the electric distribution company follows the mandates of this subsection, and to ensure the electric distribution company is not utilizing shared corporate support services as a means to circumvent sections 16-244h-1 to 16-244h-7, inclusive of the Regulations of Connecticut State Agencies.

(3) Examples of services that may be shared include, but are not limited to: payroll, taxes, shareholder services, insurance, financial reporting, corporate financial planning and analysis, corporate accounting, corporate security, human resources (compensation, benefits, employment policies), employee records, regulatory affairs, lobbying, legal, and pension management. Examples of services that may not be shared include: employee recruiting, engineering, hedging and financial derivatives and arbitrage services, electric purchasing for resale, purchasing of electric transmission, system operations and marketing.

(h) Employees:
(1) Except as permitted in subsection (f) of this section, an electric distribution company and its generation entities or affiliates shall not jointly employ the same employees. This prohibition against joint employees also applies to board of directors and corporate officers, except that if an electric distribution company and its generation entities or affiliates are controlled by a holding company, any board member or corporate officer may serve on the holding company and with either the electric distribution company or its generation entities or affiliates, but not both. In the case of shared directors and officers, a corporate officer from the electric distribution company and holding company shall verify in the electric distribution company's compliance plan submitted pursuant to section 16-244h-7 of the Regulations of Connecticut State Agencies the adequacy of the specific mechanisms and procedures in place to ensure that the electric distribution company is not utilizing shared officers and directors as a means to circumvent sections 16-244h-1 to 16-244h-7, inclusive, of the Regulations of Connecticut State Agencies.

(2) All employee transfers between an electric distribution company and its generation entities or affiliates shall be consistent with the following provisions:

(A) An electric distribution company shall track and report to the department all employee transfers between the electric distribution company and generation entities or affiliates. The

electric distribution company shall report this information to the department no later than July 1, 2000 and annually thereafter.
(B) Once an employee of an electric distribution company becomes an employee of a generation entity or affiliate, the employee shall not return to the electric distribution company for a period of one year. This prohibition is inapplicable if the generation entity or affiliate to which the employee transfers no longer transacts business in this state during the one-year period. In the event that an employee returns to the electric distribution company, such employee shall not be retransferred, reassigned, or otherwise employed by a generation entity or affiliate for a period of two years. An employee that is hired by the generation entity or affiliate and becomes an employee of the electric distribution company shall not be retransferred, reassigned, or otherwise employed by a generation entity or affiliate for a period of two years. Employees transferring from the electric distribution company to a from the electric distribution company in a discriminatory or exclusive fashion, to the benefit of the generation entity or affiliate or to the detriment of unaffiliated electric suppliers.

(C) Any electric distribution company employee hired by a generation entity or affiliate shall not remove or otherwise provide information to the generation entity or affiliate which the generation entity or affiliate would otherwise be precluded from having pursuant to sections 16-244h-1 to 16 244h-7, inclusive, of the Regulations of Connecticut State Agencies.

(D) An electric distribution company shall not make temporary or intermittent assignments, or rotations of its employees to its generation entities or affiliates.

(E) A transferring employee shall sign a statement attesting that the employee is aware of and understands the restrictions set forth in sections 16-244h-1 to 16-244h-7, inclusive, of the Regulations of Connecticut State Agencies and the attendant consequences of violations of those sections.

MAINE

Rule: PUC 65-407[12] Chapters 304 and 820

304 SUMMARY - This Chapter establishes standards of conduct applicable to both large and small investor-owned distribution utilities and affiliated competitive providers, a method of tracking the retail sales made by an affiliated competitive provider within the service territory of its affiliated distribution utility and a requirement that consumer-owned utilities notify the Commission of any wholesale generation sales.

820 SUMMARY: This rule describes the record keeping, accounting and structural requirements that Maine utilities must comply with if they engage in non-core business activities consistent with the requirements in 35-A M.R.S.A. §§ 503, 707, 708, 713, 714 and 715.

Subsidization (304)

No Subsidization. A distribution utility may not subsidize the business of its affiliated competitive provider at ratepayer expense in any manner not specifically authorized under this section.

Sharing of Customer Data (820)

i. Limits on Use of Customer Information.
   i. Use by Affiliate of Customer Specific Information (CSI) or Aggregate Customer Information (ACI). A utility affiliate must purchase any CSI or ACI it wishes to use from the core utility at market value.
   ii. Availability of CSI or ACI. If a utility makes CSI or ACI available to a non-core utility subsidiary, it must make the CSI or ACI available to any other entity requesting it, on the same terms.
   iii. Affirmative Permission of Customer Required. To use any CSI (as distinguished from ACI), the utility must obtain affirmative, written permission from the customer.

ii. Obligation to Provide Information. If a utility provides information to an affiliate related to its status as a public utility, it must provide such information upon request to nonaffiliated companies.

iii. Preferences Forbidden. The utility may not act in preference to its affiliate or affiliates in providing access to utility facilities or services or in influencing utility customers to use the services of its affiliates. A utility that provides the name of its affiliate to a customer interested in the services of its affiliate must also provide the names of non-affiliated entities providing such services.

iv. Additional Standards of Conduct. This rule does not limit the Commission from imposing additional standards of conduct on a utility's activities related to its affiliated interests to the extent necessary to protect the public interest.

Joint Marketing (304 and 820)

Joint Advertising or Marketing. Joint advertising or marketing is any advertising or marketing that includes, directly or indirectly, references to both the distribution utility and its affiliated competitive provider. It also includes the use by the affiliated competitive provider of the same or substantially similar name or logo as the distribution utility in a way that would require a payment for good will under Chapter 820.

i. Promotion of Affiliate; Joint Marketing.

[12] https://www.maine.gov/sos/cec/rules/65/chaps65.htm

1) Neither a distribution utility nor its affiliated competitive provider may give any appearance of speaking on behalf of the other.
2) Neither a distribution utility nor an affiliated competitive provider may in any way represent that any advantage accrues to customers or others in the use of the distribution utility's services as a result of that customer's or others' dealing with the affiliated competitive provider.

3) A distribution utility and its affiliated competitive provider may not engage in joint advertising or marketing.

4) The distribution utility may not in any manner promote its affiliated competitive provider or any product or service offered by its affiliated competitive provider nor may the affiliated competitive provider promote any product or service offered by the distribution utility.

5) The Commission shall maintain a current list of all competitive providers available to customers in each distribution utility's service territory. The Commission shall update the list and rearrange the names on the list in a random sequence at least every 60 days. If a customer requests information about competitive electricity providers or where the customer may obtain generation services, the distribution utility shall provide a copy of the most recent list of competitive electricity providers issued by the Commission.

6) Unless the distribution utility or affiliated competitive provider is specifically asked what the relationship is between the two entities or whether the distribution utility or affiliated competitive provider has an affiliation or association with a competitive provider or distribution utility, respectively, employees of those entities may not disclose the affiliation. If they are specifically asked, employees may disclose the affiliation but must inform the questioner that:
   a. The affiliated competitive provider is not regulated by the Public Utilities Commission;
   b. No advantage will accrue to any customer of the affiliated competitive provider due to the affiliate's relationship with the distribution utility; and
   c. Customers may select another competitive electricity provider.

   The distribution utility shall submit as part of its implementation plan under Section 5 a script containing the information specified above that distribution utility and affiliated competitive provider employees shall use in responding to inquiries regarding affiliated status.

Sharing Employees (304)

Sharing of Employee Prohibition. Employees of a distribution utility must be located in a separate building from the employees of the affiliated competitive provider. Employees may not be shared between a distribution utility and its affiliated competitive provider. An employee is considered to be shared if the employee performs work for both entities. The employees of a distribution utility and the employees of an affiliated competitive provider must be served by separate telecommunications and computer systems. An employee who is transferred from an affiliated competitive provider to the distribution utility cannot return to the affiliated competitive provider for at least one year.

1. Exemption.

   The Commission may approve an exemption from this subsection upon a finding that:

a. Sharing employees or facilities would be in the best interest of the public;
b. Sharing employees or facilities would have no anticompetitive effect; and
c. The costs of any shared employees or facilities can be fully and accurately allocated between the distribution utility and the affiliated competitive provider.

Any request for an exemption must be accompanied by a full and transparent allocation of costs for any shared facilities or general and administrative support services. The Commission shall allow a reasonable opportunity for parties to submit comments regarding any request for an exemption. An exemption is valid until the Commission determines that modification or removal of the exemption is necessary.

ARKANSAS

Rule: Arkansas PSC Order No. 7 Docket No. 06-112-R Affiliate Transaction Rules[13]
The purpose of these rules is to ensure that all transactions among or between a public utility and any affiliates or divisions do not result in rates which are unreasonable and in violation of Ark. Code Ann. §§ 23-4- 103 and 23-4-104; to ensure that the rates charged by public utilities do not provide any subsidy to affiliates or divisions of the public utility which are involved in non-utility activities or which provide services to the public utility; to prevent anti-competitive behavior, and market manipulation or market power; and to prevent financial risk to rate-regulated public utility operations which may arise from business endeavors of an unregulated affiliate.

Rule IV - Affiliate Financial Transactions

A. Except as otherwise provided in this Rule IV or in other applicable law, a public utility shall not engage in any affiliate transaction in which the public utility:
    1. provides to or shares with any affiliate any financial resource or financial benefit, including but not limited to any:
        a. loan, extension of credit, guarantee or assumption of debt, indemnification, pledge of collateral; or
        b. encumbrance of or restriction on the disposition of any public utility;
    2. incurs any debt for purposes of investing in, or otherwise supporting, any business other than the provision of public utility service in Arkansas.

B. A public utility may obtain financial resources from an affiliate for public utility purposes, provided that the cost to the public utility of such financial resource does not exceed the lower of market price or the affiliate's fully allocated cost.

C. Rule IV shall not apply to or prohibit any of the following unless the Commission finds, after notice and hearing, unless waived by the parties, and consistent with applicable law, that such arrangement is not consistent with the purposes of these rules as defined in Rule II:
    1. An inter-affiliate financial transaction integral to an affiliate transaction for goods or services subject to and consistent with Rule V.
    2. The payment of dividends by a public utility to affiliates that own stock in such public utility (including adjustments to the capital accounts of divisions within the public utility).
    3. Transactions in connection with the factoring of accounts receivable, the creation and use of special Purpose financing entities, and the creation and use of money pool or cash management arrangements, subject to safeguards to prevent cross-subsidization and unauthorized pledges or encumbrances of public utility assets.
    4. Any loan, extension of credit, guarantee, assumption of debt, restriction on disposition of assets, indemnification, investment, or pledge of assets by a public utility for the purpose of supporting the utility related business activities of an affiliate.
    5. Any debt incurred by a public utility, including debt that imposes any encumbrance on, or any restriction placed on the disposition of any assets of, the public utility for the purpose of supporting the utility related business activities of an affiliate.
    6. Receipt by a public utility of capital contributions or proceeds from the sale of common stock to its parent holding company.
    7. Receipt by a public utility of financial resources from an affiliate for any non-public utility Purpose, provided that the cost to the public utility of such financial resource shall not be recovered from the public utility's customers in Arkansas.

[13] http://www.apscservices.info/Rules/affiliate_transaction_rules.pdf

8. Any financing arrangement involving a public utility and any affiliate that was in existence as of the effective date of these rules; provided the public utility files with the Commission a description of each such arrangement involving a public utility and any affiliate having an annual value or amount in excess of $350,000 and such filing is received within 120 days of the effective date of these rules.
9. Any other affiliate financial transaction proposed by a public utility, provided that:
    a. the public utility first files with the Commission an application for approval of such proposed affiliate financial transaction including a detailed description thereof and any relevant supporting documentation, and
    b. the Commission finds, after notice and hearing, unless waived by the parties, on such application, that the proposed affiliate financial transaction is consistent with the purposes of these rules as defined in Rule II.

D. Nothing in this Rule IV shall alter or amend the Commission's authority or the obligation of public utilities set out in Rule 5.01 of the Commission's Rules of Practice and Procedure.

Rule V Affiliate - Transactions Other Than Financial Transactions

A. Except as otherwise provided in this Rule V, or in other applicable law, with respect to an affiliate transaction involving assets, goods, services, information having competitive value, or personnel, a public utility shall not:
    1. receive anything of value, unless the compensation paid by the public utility does not exceed the lower of market price or fully allocated cost of the item received; and,
    2. provide anything of value, unless the compensation received by the public utility is no less than the higher of market price or fully allocated cost of the item provided.

B. Rule V shall not apply to or prohibit any of the following unless the Commission finds, after notice and hearing, unless waived by the parties, and consistent with applicable law, that such arrangement is not consistent with the Purposes of these rules as defined in Rule II:
    1. Exchanges of information:
        a. necessary to the reliable provision of public utility service by a public utility, provided such exchange occurs consistently with guidelines published by the utility and applied equally to affiliates and nonaffiliate entities;
        b. required by or necessary to comply with federal statutes or regulations; or,
        c. between or among a public utility, its parent holding company, a service company and any affiliated rate-regulated utility in another State of the United States.
    2. The provisions of shared corporate support services, at fully allocated cost, between or among a public utility and any affiliate, including a service company.
    3. The provision, at fully allocated cost, of assets, goods, services, or personnel between or among a public utility and a affiliated rate-regulated utility in another State of the United States.
    4. The provision of assets, goods, services, information having competitive value, or personnel, at a price determined by competitive bidding or pursuant to a regulatory filed or approved tariff or contract.
    5. Any other affiliate transaction proposed by a public utility to be exempted from Rule V.A provided that
        a. the public utility first files with the Commission an application for an exemption of such proposed affiliate transaction from the requirements of Rule V.A, including a detailed description of the proposed transaction and any relevant supporting documentation, and

b. the Commission finds, after notice and hearing, unless waived by the parties, on such application and consistent with applicable law, that the proposed exemption is consistent with the Purposes of these rules as defined in Rule II.

Rule VI Books, Records and Procedures

A. Recordkeeping

1. The public utility shall:
    a. keep books and records separately from the books and records of its affiliates; and,
    b. maintain such books and records in accordance with the applicable rules and orders of the Commission, and with Generally Accepted Accounting Principles (GAAP) as amended;

   provided, that, any multi-jurisdictional public utility whose Arkansas rates are set pursuant to jurisdictional allocations among such public utility's various regulatory jurisdictions shall not be required to keep books and records other than on a combined basis including all its utility business.
2. Such books and records shall contain all information necessary to:
    a. Identify all affiliate transactions in which the public utility participated; and,
    b. Identify and allocate or impute all revenues and costs (both direct and indirect) associated with all such affiliated transactions.
3. Upon the creation of a new affiliate that will participate in affiliate transactions with a public utility, the utility shall, no later than 60 days after the creation of such affiliate, notify the Commission by letter to the Secretary of the Commission of the creation of such new affiliate, which notice shall include an explanation of how the public utility will implement these rules with respect to such new affiliate.
4. Each public utility shall maintain, for at least five years, records of each affiliate transaction in which it participated, and the records shall:
    a. Be made contemporaneously with each affiliate transaction;
    b. Be in a readily retrievable format, and;
    c. Include, for each affiliate transaction;
        (1) The identity of the affiliate involved in the affiliate transaction;
        (2) The commencement and termination dates of the affiliate transaction;
        (3) a description of the affiliate transaction, including the nature and quantity of value provided and received;
        (4) the dollar amount of the affiliate transaction and the manner in which such dollar amount was calculated;
        (5) all other terms of the affiliate transaction;
        (6) the direct and indirect costs associated with the affiliate transaction, including any allocation formula used to attribute indirect costs; and,
        (7) all information necessary to verify compliance with these rules and the accuracy of amounts stated on the public utility's books and records, such information to include, but not be limited to:

(a) invoices, vouchers, communications, journal entries, workpapers; and,
(b) information supporting the price of each affiliate transaction, including but not limited to the cost and allocation method of the affiliate transaction and, when the cost was the result of a competitive bidding process, the market price and basis for the market price of the affiliate transaction; and,

d. be summarized and said summary for the prior calendar year shall be filed annually with the Commission as part of the annual report required by Rule IX. Unless otherwise ordered by the Commission, a public utility may satisfy the requirement of this Rule VI.A.4.d by filing with the Commission a copy of Federal Energy Regulatory Commission Form 60, Annual Report of Centralized Service Companies.

5. Each public utility shall file contemporaneously with its annual report under Rule VI.A.4.d the following information: a summary report indicating the aggregate dollar amount of all transactions described in Rule III.G(1), (2), (3), and (4) which the utility has conducted with each affiliate, as defined under Rule III.A, including the name of each such affiliate.
6. Each public utility shall maintain, update annually, train appropriate employees in, and (within 120 days following the effectiveness of these rules, and thereafter, to the extent of material changes, in each annual report required under Rule IX) file with the Commission, written procedures which ensure compliance with these rules; and, such written procedures shall include, at a minimum:
    a. all internal rules, practices, financial record keeping requirements, and other policies governing affiliate transactions among or between the public utility and its affiliates;
    b. the names and addresses of all the public utility's affiliates that participate in affiliate transactions with the public utility;
    c. an organizational chart depicting the ownership relationships between the public utility and those affiliates that participate in affiliate transactions with the public utility;
    d. a description of the types of assets, goods and services provided in any existing affiliate transaction lasting more than one year; and,
    e. a cost allocation manual or other description of the methods used to determine allocations in affiliate transactions.

B. The Commission shall have access to all books and records, of a public utility and its affiliates that participate in transactions with the public utility, to the extent such access is relevant to determining compliance with all applicable Arkansas statutes and rules or establishing rates subject to the Commission's jurisdiction.

NEW HAMPSHIRE

Rule: Chapter PUC 2100 Affiliate Transaction Rules[14]

Subsidization

(d) Shared corporate support permitted by this section shall not:

(1) Allow or provide a means for the transfer of customer information or distribution system information from the utility to the competitive affiliate;

(2) Create the opportunity for preferential treatment, unfair competitive advantage, or cross subsidization of competitive affiliates; or

(3) Create customer confusion.

Market Value Asset Transfers

Puc 2105.09 Transfer of Goods, Services, and Assets.

(a) To the extent that these rules do not prohibit transfers between a utility and its affiliates, the permitted transfers shall be subject to the following pricing provisions:

(1) A utility may sell, lease, or otherwise transfer to an affiliate an asset, the cost of which has been reflected in the utility's rates for regulated service, provided that the price charged the affiliate is the highest of the net book value, fully loaded cost, and the current market value of the asset, as applicable;

(2) A utility may sell, lease, or otherwise transfer to an affiliate assets other than those subject to (1) above, and may also provide services to an affiliate, provided that the price charged for such asset or service is the highest of the net book value, fully loaded cost, and its current market value, as applicable;

(3) An affiliate may sell, lease, or otherwise transfer an asset to a utility, and may provide services to a utility, provided that the price charged to the utility is the lesser of the market value, the net book value, and the fully loaded cost, as applicable;

(4) Joint or shared costs allowed in Puc 2105.03 and Puc 2105.04 shall be allocated and shall be priced to the utility and its competitive affiliate based on fully loaded costs;

(5) Products or services which are price regulated by a state or federal agency shall be priced 'at the tariffed or regulated rate;

(6) In cases where more than one state commission regulates the price of products or services provided to or by a utility, this commission's pricing provisions shall govern such transactions in New Hampshire; and

(7) For purposes of this section, the market value of any asset sold, leased, or otherwise transferred, shall be determined based on the highest price that the asset could have reasonably realized after an open and competitive sale.

Customer Information

Puc 2103.02 Preferences to Competitive Affiliates Regarding Products and Services, Distribution System Information, and Customer Information.

(a) A utility shall provide its products and services, including but not limited to terms and conditions, pricing, and timing, to competitive affiliates, and to non-affiliated competitors in a non-discriminatory manner;

(b) A utility shall provide access to distribution system information to its competitive affiliates and to non-affiliated competitors in a non-discriminatory manner; or

(c) A utility shall not allow an employee, officer, director, or agent of a competitive affiliate access to customer information except as permitted in accordance with Puc 2104.01.

PART Puc 2104 DISCLOSURE AND INFORMATION

Puc 2104.01 Release of Customer Information to Competitive Affiliate. A utility shall not release any customer information to a competitive affiliate without the prior written authorization of the customer.

[14] https://www.puc.nh.gov/Regulatory/Rules/PUC2100.pdf

Puc 2105.04 Shared Services

(d) Shared corporate support permitted by this section shall not: (1) Allow or provide a means for the transfer of customer information or distribution system information from the utility to the competitive affiliate;

Puc 2105.06 Employee Transfers. All employee transfers between a utility and its competitive energy affiliates shall comply with the following provisions:

(j) Utility employees transferring from the utility to a competitive energy affiliate and shared utility employees shall not use customer information and distribution system information in a discriminatory fashion to the benefit of the competitive energy affiliate or to the detriment of non-affiliated energy competitors;

Joint Advertising and Marketing

Puc 2105.07 Joint Advertising and Marketing. A utility shall not:

(a) Engage in joint advertising or marketing programs of any sort directly or indirectly with its competitive energy affiliates.

(b) This section shall not prohibit a utility from participating, on a nondiscriminatory basis, in non-sales meetings with its competitive energy affiliates or any non-affiliated energy competitor to discuss technical or operational subjects.

Sharing Employees

Puc 2105.04 Shared Services.

(e) Examples of services, systems, and personnel that shall not be shared include, but are not limited to:

(1) Employee recruiting;

(f) Any shared corporate support shall be priced, reported, and conducted in accordance with the separation and information standards set forth in these rules and in other applicable commission pricing and reporting requirements.

Corporate Infrastructure

Puc 2105.02 Shared Facilities, Services and Data.

(a) Except to the extent necessary to perform shared corporate support functions permitted under Puc 2105.04, a utility shall not:

(1) Share office space, office equipment, services, or computer data with its competitive energy affiliates; or

(2) Allow its competitive energy affiliates to access its computer data.

(b) The separation required by this section shall, at a minimum, be accomplished by methods such as:

(1) Use of secure passwords and firewalls; and

(2) Occupation of separate floors of an office building, or distinct wings.

Corporate Identification/Logo usage

Puc 2105.08 Corporate Identification.

(a) Subject to Puc 2105.07, a utility may allow any affiliate to identify itself through the use of a name, logo, or both as an affiliate of the utility, provided that such use by a competitive energy affiliate shall be accompanied by a disclaimer stating that:

(1) No advantage accrues to customers or others in the use of the utility's services as a result of that customer or others dealing with the competitive energy affiliate; and

(2) The customer or others need not purchase any product or service from any competitive energy affiliate in order to obtain services from the utility on a non-discriminatory basis.

(b) The disclaimer referred to in (a) above shall be written or spoken, or both, as is appropriate given the context of the use of the name or logo.
(c) The disclaimer referred to in (a) above shall not be required where the name or logo is merely being used for identification of assets or employees and it is impractical to include such disclaimer, such as on the competitive energy affiliate's vehicles, business locations, equipment, employee business cards, or clothing.
(d) A utility shall not provide to its competitive affiliates:

(1) Advertising space in its billing envelopes used for regulated utility services unless it provides access on the same terms and conditions for all similarly situated non-affiliated competitors; or

(2) Access to any other form of written communication with utility customers unless it provides access on the same terms and conditions to all similarly situated non-affiliated competitors.

RHODE ISLAND

Rule: Public Utilities Commission Regulations for Utility Interaction with Gas Marketers R.I.G.L. § 39-1-11 and § 39-3-7[15]

INTRODUCTION

These regulations, enacted pursuant to R.I.G.L. § 39-1-11 and § 39-3-7, set forth the entry requirements for gas marketers and the standards of conduct for utilities with respect to gas marketers. They further apply to transactions, direct or indirect, between public utilities and gas marketers. The standards are intended to promote fair competition and a level playing field among all participants in the natural gas marketplace in Rhode Island.

"Gas marketer" means an entity which markets gas and gas-related services, and is authorized to provide services in Rhode Island in accordance with Section III of these regulations.

"Marketing affiliate" means a gas marketer residing within a corporate structure that includes a Rhode Island public utility. A marketing affiliate includes any arm of the utility or parent of the utility, either owned or subject to common control, or part of a separate legal entity, which functions as a gas marketer.

STANDARDS OF CONDUCT

A. PERSONNEL

1. (a) A utility employee may not do any of the following on behalf of a gas marketer:

Purchase gas, pipeline capacity or storage capacity. Market or sell gas and related services. Price or administer transportation upstream of the city gate and related tariff services, non-tariff and competitive products and services. Hire and train gas marketer employees.

(b) A utility employee may offer to sell or otherwise proffer gas, pipeline capacity or storage capacity, and related services to a gas marketer or to others on behalf of the utility. A utility employee may respond to transportation and related tariff service requests or inquires from the gas marketer as well as from others on behalf of the utility.

2. (a) A marketing affiliate may receive corporate-level support affiliated with the preparation of joint financial statements and shareholder relations.

(b) The use of shared employees shall be minimized. A shared employee shall record time in a manner consistent with the master service framework, if applicable.

3. The use of utility operating personnel, as established in a master service framework is permitted, subject to all of the following limitations:

(a)The use of a utility employee by a gas marketer or the use of a gas marketer employee by the utility is not allowed if it is likely to result in the sharing or exposure of market sensitive information or an unfair competitive advantage for either party.

Advice and assistance in human resource management shall be limited to general personnel and corporate matters. It shall not include job or position specific hiring or training advice or assistance dealing with the functions to be performed by the employee.

[15] http://www.ripuc.org/utilityinfo/natgas/gasregsmarket.html

4. Advice or assistance with regard to engineering and construction matters as well as gas consulting services shall be made available to all gas marketers on an equal basis

5. Utility operating personnel may engage in transactions involving natural gas supply, capacity, or both, with a gas marketer, but may not share with the gas marketer any information related to sales by other gas marketers of natural gas supply, capacity, or both.

6. An individual may not be an officer of both a utility and a gas marketer.

ADVERTISING

Promotional materials may allow marketers to be identified as affiliated with utilities. However, neither utilities nor marketing affiliate personnel may represent that any advantage accrues to customers or others in the use of the utility's services as a result of that customer or others dealing with the marketing affiliate. Joint promotions between the utility and the marketing affiliate are prohibited, unless such promotions are offered to all other competitors under the same terms and conditions. A utility and a marketing affiliate may not share trademarks or logos.

STANDARDS FOR COMPETITIVE GAS MARKETING

MARKETING LIMITATIONS

1. Utilities shall not provide leads to gas marketers and shall refrain from giving any appearance that the utility speaks on behalf of any gas marketer. Nor shall the marketing affiliate suggest that its receives preferential treatment as a result of its affiliation. If a customer requests information about marketers, a utility should provide a list of all approved gas marketers, including its affiliate, but should not promote its affiliate.

2. To the extent a utility provides a marketing affiliate information related to transportation which is not readily available or generally known to other gas marketers, including but not limited to utility customer lists, it must contemporaneously provide that information to all gas marketers on its system. A utility must file with the Commission procedures that will enable the Commission to determine how the utility is complying with this standard.

3. Utilities shall not condition or tie their agreements to release interstate pipeline capacity to any agreement by a gas supplier, customer or other third party relating to any service in which their marketers are involved.

B. CONDITIONS FOR COMPETITIVE SALES

1. A utility shall communicate with all market participants when it has gas supply or capacity, or both, available for release.

2. A utility may not sell gas supply or capacity to a marketing affiliate at less than a market-clearing price without either posting on an electronic bulletin board that is a well known source or placing an offering that would constitute an offering to the market of capacity or supply.

3. Utilities must apply any tariff provision relating to transportation in the same manner to the same or similarly situated gas marketers if there is discretion in the application of the provision.

4. Utilities shall uniformly enforce tariff provisions for which there is no discretion in the application of the provision for all transportation customers.

5. Utilities may not, through a tariff provision or otherwise, give a gas marketer or its customers preference over other gas marketers or customers in matters relating to transportation including, but not limited to, scheduling, balancing, metering, storage, standby service or curtailment policy. Utilities may not sell to their marketing affiliates gas and capacity on a bundled basis, unless such bundled service is offered contemporaneously on a similar basis to other gas marketers.

6. If a utility offers its marketing affiliate, or a customer of its affiliate, a discount, rebate, or fee waiver for transportation services, balancing, meters or meter installation, storage, standby service or any other service offered to shippers, it must contemporaneously offer the same discount, rebate, or fee waiver to all similarly situated non-affiliated gas marketers or customers by providing appropriate notification to the non-affiliated gas marketers or customers. A utility must file with the Commission procedures that will enable the Commission to determine how the utility is complying with this standard.

7. Utilities must process all similar requests for transportation in the same manner and within a similar period of time.

8. Utilities shall not disclose to any gas marketer any information obtained in connection with providing delivery or related services to another gas marketer or customer, a potential supplier or customer, any agent of such customer or potential supplier, or any other entity seeking to supply gas to a customer or potential customer.

VI. ADMINISTRATIVE STANDARDS

ACCOUNTING AND REPORTING

1. Utilities and their marketing affiliates shall keep separate books of accounts and records.

2. A utility shall keep sufficient records of transactions with a marketing affiliate to document, for all consummated sales or release transactions, all offers of, bids for, requests for, and sales of natural gas supplies, capacity, or both, including the evaluation criteria for acceptance and rejection. A utility shall maintain documentation of such marketing affiliates transactions, such as phone logs, so that the utility's activities can be audited.

3. If a utility provides tariffed on-system distribution services at a discounted rate, the utility shall maintain complete and accurate records of all service requests, service refusals, and service transactions arising under its tariffs.

4. A utility shall publicly disclose sales at wholesale or transfers of gas supply or capacity and related services for all transactions that are not tariffed transactions. A utility shall report all transactions within 30 days following the end of the month in which the transaction occurred.

5. For each transaction under Rule VI.A.4(a), disclosure shall include all of the following:

The date of the contract or arrangement.

The period covered.

The type of transaction (commodity, capacity, storage balancing, etc.).
Units sold or transferred.

Conditions or restrictions placed on the transaction.

The price for the transaction, including separate prices for each service offered on a stand-alone basis.

ENFORCEMENT

Should a utility or gas marketer be found to have violated these regulatory requirements, it will be subject to appropriate sanctions as determined by the Commission or any other entity having jurisdiction.

NEW JERSEY

Rule: NJ Administrative Code Title 14:4-3[16]

(a) This subchapter shall apply as follows:

1. N.J.A.C. 14:4-3.3 through 3.5 set forth standards of conduct applicable to transactions, between an electric public utility or gas public utility, including a related competitive business segment of an electric or gas public utility, and a related competitive business segment of the electric or gas public utility holding company providing or offering competitive services to retail customers in New Jersey or the public utility holding company itself providing or offering competitive services to retail customers in New Jersey;

2. N.J.A.C. 14:4-3.6 sets forth standards of conduct applicable to electric and/or gas public utilities and the related competitive business segments of each electric public utility and gas public utility, as well as the transactions, interactions and relations between an electric and/or gas public utility and a related competitive business segment of an electric and/or gas public utility; and

3. N.J.A.C. 14:4-3.7 through 3.9 address regulatory oversight, dispute resolution and violations and penalties applicable to electric and/or gas public utilities regarding affiliate relations, fair competition, accounting standards and related reporting requirements.

(b) A New Jersey electric and/or gas public utility, which is also a multi-state electric and/or gas public utility and subject to the jurisdiction of other state or Federal regulatory commissions, may file an application, requesting a limited exemption from this subchapter or part(s) thereof, for transactions between the electric and/or gas public utility and its affiliate(s) solely in its role of serving its jurisdictional areas wholly outside of New Jersey. To obtain such an exception, the applicant shall meet the requirements of N.J.A.C. 14:1-1.2(b).

Nondiscrimination

(a) An electric and/or gas public utility shall not unreasonably discriminate against any competitor in favor of its affiliate(s) or related competitive business segment.
(b) An electric or gas public utility shall not represent that, as a result of the relationship with the electric and/or gas public utility or for any other reason, a related competitive business segment of its public utility holding company, or customers of a related competitive business segment of its public utility holding company will receive any different treatment by the electric and/or gas public utility than the treatment the electric and/or gas public utility provides to other, unaffiliated companies or their customers.
(c) An electric or gas public utility shall not provide a related competitive business segment of its public utility holding company, or customers of a related competitive business segment of its public utility holding company, any preference (including, but not limited to, terms and conditions, pricing, or timing) over non-affiliated suppliers or their customers in the provision of products and/or services offered by the electric and/or gas public utility.
(d) Transactions between an electric and/or gas public utility and a related competitive business segment of its public utility holding company shall be prohibited, except for the following:

1. Tariffed products and services;

2. The sale or purchase of goods, property, products or services made generally available by the electric and/or gas public utility, by the PUHC or a related competitive business segment of its public utility holding company to all market participants through an open, competitive bidding process; or

[16] https://advance.lexis.com/documentpage/?pdmfid=1000516&crid=fd1cf359-9fc0-45c0-a207-b4629aa27d50&pdistocdocslideraccess=true&config=00JAA1YTg5OGJlYi04MTI4LTRlNjQtYTc4Yi03NTQxN2E5NmE0ZjQKAFBvZENhdGFsb2ftaXPxZTR7bRPtX1Jok9kz&pddocfullpath=%2Fshared%2Fdocument%2Fadministrative-codes%2Furn%3AcontentItem%3A5V8M-DSM0-00BY-K0JN-00008-00&pdcomponentid=234124&pdtocnodeidentifier=AAUAAEAAFAAB&ecomp=bgqfkkk&prid=c69df815-1e1b-4d1e-8aa0-22620d090d85

3. As provided for in N.J.A.C. 14:4-3.5(g) and (h), in (i) and (j) or 3.6(a) through (f), provided the transactions specified in N.J.A.C. 14:4-3.6 comply with all other applicable rules.

(e) An electric and/or gas public utility shall provide access to utility information, services, and unused capacity or supply on a non-discriminatory basis to all market participants, including affiliated and non-affiliated companies, except as provided for in N.J.A.C. 14:4-3.4, 3.5 and 3.6, provided the transactions specified in N.J.A.C. 14:4-3.6, Competitive utility products and/or services, comply with all other applicable rules.

1. If an electric and/or gas public utility provides supply, capacity, services, or information to a related competitive business segment of its public utility holding company, it shall make the offering available, via a public posting, on a non-discriminatory basis to non-affiliated market participants, which include competitors serving the same market as the related competitive business segment of the electric and/or gas public utility's holding company.

(*o*) Except as otherwise provided by this subchapter, an electric and/or gas public utility shall not provide any assistance, aid or services to its PUHC or related competitive segment of the PUHC if related to customer enrollment, marketing or business development unless offered to all competitors on a nondiscriminatory basis. By way of example, but not limited to, an electric or gas public utility shall not:

1. Provide leads to its PUHC or a related competitive business segment of its public utility holding company;

2. Solicit business on behalf of its PUHC or a related competitive business segment of its public utility holding company;

3. Acquire information on behalf of or to provide to its PUHC or a related competitive business segment of its public utility holding company;

4. Share market analysis reports or any other type(s) of proprietary or non-publicly available reports, including, but not limited to, market, forecast, planning or strategic reports, with its PUHC or a related competitive business segment of its public utility holding company;

5. Share customer usage or end use equipment information, obtained during the course of providing electric and/or gas public utility services, with its PUHC or a related competitive business segment of its public utility holding company;

6. Request authorization from its customers to pass on customer information exclusively to its PUHC or a related competitive business segment of its public utility holding company;

7. Represent or imply that the electric and/or gas public utility speaks on behalf of its PUHC or a related competitive business segment of its public utility holding company or that the customer will receive preferential treatment as a consequence of conducting business with the related competitive business segment of its public utility holding company; or

8. Represent or imply that its PUHC or a related competitive business segment of its public utility holding company speaks on behalf of the electric and/or gas public utility.

Information Disclosure

(a) An electric and/or gas public utility may provide individual proprietary information to its PUHC or a related competitive business segment of its PUHC, only with prior affirmative customer written consent, or as otherwise authorized by the Board, and only if that same proprietary information is provided to unaffiliated entities on a non-discriminatory basis with prior affirmative customer written consent, or as otherwise authorized by the Board.

(b) An electric and/or gas public utility shall make available non-customer specific non-public information acquired as a result of operating the public utility's distribution system, including information about an electric and/or gas public utility's natural gas or electricity purchases, sales, or operations or about an electric and/or gas public utility's gas-related goods or services, electricity-related goods or services, to a related competitive business segment of its public utility holding company only if the electric and/or gas public utility makes such information available, via a public posting, to all other service providers on a nondiscriminatory basis, and keeps the information open to public inspection.

1. An electric or gas public utility is permitted to exchange proprietary information on an exclusive basis with its PUHC or a related competitive business segment of its public utility holding company, provided it is necessary to exchange this information in the provision of the corporate support services permitted by N.J.A.C. 14:4-3.5(i) and (j).

2. The PUHC's or related competitive business segment's use of such proprietary information is limited to its use in conjunction with the permitted corporate support services, and is not permitted for any other use.

(h) An electric and/or gas public utility shall maintain complete and accurate records, documenting all tariffed and non-tariffed transactions with its PUHC and a related competitive business segment of its public utility holding company, including, but not limited to, all waivers of tariff or contract provisions.

(i) An electric and/or gas public utility shall maintain such records in compliance with the time frame required by N.J.A.C. 14:5-5.2 or longer if another government agency so requires.

(j) The electric and/or gas public utility shall make such records available for Board and/or Rate Counsel review upon 72 hours notice, or at a time mutually agreeable to the electric and/or gas public utility and the Board and/or Rate Counsel.

(k) An electric and/or gas public utility shall maintain a record of all contracts and related bids for the provision of work, products and/or services to and from the electric and/or gas public utility to and from the PUHC or related competitive business segments of its public utility holding company in compliance with N.J.A.C. 14:5-5.2 or longer if another government agency so requires.

Separation

(a) An electric and/or gas public utility, its PUHC and related competitive business segments of its public utility holding company shall be separate corporate entities.

(b) An electric and/or gas public utility and related competitive business segments of its public utility holding company shall keep separate books and records.

(e) An electric and/or gas public utility shall not share office space, office equipment, services, and systems with a related competitive business segment of its public utility holding company, except to the extent appropriate to perform shared corporate support functions as follows:

1. An electric and/or gas public utility may access the computer or information systems of a competitive related business segment of its PUHC or allow a related competitive business segment of its PUHC to access its computer or information systems, for purposes of the sharing of computer hardware and software systems and may share office space, office equipment, services and systems, provided adequate system protections are in place to prevent the accessing of information or data between the utility and its affiliate(s), which would be in violation of this subchapter.

i. Prevention of unauthorized access to computer and information systems shall be specifically addressed as part of an electric and/or gas public utility's compliance plan submitted pursuant to N.J.A.C. 14:4-3.7(b).

(i) An electric and/or gas public utility, its public utility holding company and related competitive business segments, or separate business segments of the public utility holding company created solely to perform corporate support services may share joint corporate oversight, governance, support systems and personnel. Any shared support shall be priced, reported and conducted in accordance with N.J.A.C. 14:4-3.4 and this section, as well as other applicable Board pricing and reporting rules.

(j) Such joint utilization shall not allow or provide a means for the transfer of confidential customer or market information from the electric and/or gas public utility to a related competitive business segment of its public utility holding company in violation of this subchapter, create the opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create significant opportunities for cross-subsidization of a related competitive business segment of the public utility holding company. In the compliance plan required pursuant to N.J.A.C. 14:4-3.7(a) through (e), a senior corporate officer from the electric and/or gas public utility and public utility holding company shall verify the adequacy of the specific mechanisms and procedures in place to ensure the electric and/or gas public utility follows the mandates of this subchapter, and to ensure the electric and/or gas public utility is not utilizing joint corporate support services as a conduit to circumvent this subchapter.

(k) A related competitive business segment of a public utility holding company shall not trade upon, promote, or advertise its relationship with the electric and/or gas public utility, nor use the electric and/or gas public utility's name and/or logo in any circulated material, including, but not limited to, hard copy, correspondence, business cards, faxes electronic mail, electronic or hardcopy advertising or marketing materials, unless it discloses clearly and conspicuously or in audible language that:

1. The PUHC or related competitive business segment of the public utility holding company "is not the same company as the electric and/or gas public utility";

2. The PUHC or related competitive business segment of the public utility holding company is not regulated by the Board; and

3. "You do not have to buy products in order to continue to receive quality regulated services from the electric and/or gas public utility."

(l) The requirement of the name and/or logo disclaimer set forth in (k) above is limited to the use of the name and/or logo in New Jersey.

(m) An electric and/or gas public utility, through action or words, shall not represent that, as a result of its PUHC or a related competitive business segment of the public utility holding company's relationship with the electric and/or gas public utility, its affiliate(s) will receive any different treatment than other product and/or service providers.

(n) An electric and/or gas public utility shall not offer or provide to its PUHC or a related competitive business segment of its public utility holding company advertising space in the electric and/or gas public utility's billing envelope(s) or any other form of electric and/or gas public utility's written communication to its customers, unless it provides access to all other unaffiliated service providers on the same terms and conditions.

(o) An electric and/or gas public utility shall not participate in joint advertising or joint marketing activities with its PUHC or related competitive business segments of its public utility holding company, which activities include, but are not limited to, joint sales calls, through joint call centers or otherwise, or joint proposals (including responses to requests for proposals) to existing or potential customers.

1. The prohibition in (o) above notwithstanding, at a customer's unsolicited request, an electric and/or gas public utility may participate, on a nondiscriminatory basis, in non-sales meetings with its PUHC or a related competitive business segment of its public utility holding company or any other market participant to discuss technical or operational subjects regarding the electric and/or gas public utility's provision of distribution service to the customer;

2. Except as otherwise provided for by this subchapter, an electric and/or gas public utility shall not participate in any joint business activity(ies) with its PUHC or a related competitive business segment of its public utility holding company, which includes, but is not limited to, advertising, sales, marketing, communications and correspondence with any existing or potential customer;

3. An electric and/or gas public utility shall not participate jointly with its PUHC or a related competitive business segment of the PUHC in trade shows, conferences, or other information or marketing events held in New Jersey. For the purposes of this paragraph, "joint participation" includes any sharing of costs or facilities associated with the event, such as using the same signage, handouts, transport, advertising, booth or space, or presentation time; and

4. An electric and/or gas public utility shall not subsidize costs, fees, or payments with its PUHC or related competitive business segments of its public utility holding company associated with research and development activities or investment in advanced technology research.

(p) Except as permitted in (i) and (j) above, an electric and/or gas public utility and its PUHC or related competitive business segments of its public utility holding company, that are engaged in offering merchant functions and/or electric related services or gas related services shall not employ the same employees or otherwise retain, with or without compensation, as employees, independent contractors, consultants, or otherwise.

1. Other than shared administration and overheads, employees of the competitive services business unit of the public utility holding company shall not also be involved in the provision of non-competitive utility and safety services, and the competitive services shall be provided utilizing separate assets than those utilized to provide non-competitive utility and safety services.

MICHIGAN

Rule: Public Act 141, MCL 460.10 Code of Conduct[17]

This code of conduct is intended to promote fair competition by establishing measures to prevent cross-subsidization, information sharing, and preferential treatment between the regulated and unregulated operations of electric utilities, alternative electric suppliers, and their affiliates. An electric utility or alternative electric supplier is prohibited from taking punitive action against any individual (including an employee) or entity who files a complaint with the electric utility, the alternative electric supplier, or the Commission, or otherwise causes an alleged violation of this code of conduct to come to the attention of the Commission.

II. Separation

An electric utility or alternative electric supplier that offers, itself or through its affiliates, both regulated and unregulated services shall do so with the structural or functional separation needed to prevent cross-subsidization, information sharing, and preferential treatment between the regulated and unregulated services. This includes, but is not limited to, the following:

A. An electric utility shall not offer unregulated services or products except through one or more affiliates or through other entities within the corporate structure, such as divisions.

B. An electric utility's or alternative electric supplier's regulated services shall not subsidize in any manner, directly or indirectly, the unregulated business of its affiliates or other separate entities.

C. An electric utility or alternative electric supplier shall maintain its books and records separately from those of its affiliates or other entities within its corporate structure. An electric cooperative offering unregulated services shall maintain an accounting system that allocates costs between its regulated and unregulated ventures on a fully allocated embedded cost basis, and any transfers of services, products, or property must be in compliance with the provisions of Section III, paragraph C.

D. An electric utility or alternative electric supplier and its affiliates or other entities within its corporate structure shall not share facilities, equipment, or operating employees, but may share computer hardware and software with documented protection to prevent discriminatory access to competitively sensitive information.

[17] https://www.michigan.gov/mpsc/0,4639,7-159-16377_17111-42901--,00.html

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005209

E. An electric utility's or alternative electric supplier's operating employees and the operating employees of its affiliates or other entities within its corporate structure shall function independently of each other and maintain separate offices.

F. An electric utility or alternative electric supplier shall not finance or co-sign loans for affiliates.

G. An electric utility may transfer employees between the electric utility and any of its affiliates or other entities within the corporate structure as long as the electric utility documents those transfers and files semi-annually with the Commission a report of each occasion on which an employee of the electric utility became an employee of an affiliate or other entity within its corporate structure and/or an employee of an affiliate or other entity within its corporate structure became an employee of the electric utility.

H. An electric utility and its affiliates or other entities within the corporate structure and an alternative electric supplier and its affiliates or other entities within the corporate structure offering both regulated and unregulated services or products in Michigan shall not engage in joint advertising, marketing, or other promotional activities related to the provision of regulated and unregulated services, nor shall they jointly sell regulated and unregulated services.

I. An electric utility or alternative electric supplier offering regulated service in Michigan shall not suggest that it will provide any customer with preferential treatment or service by doing business with the electric utility or the alternative electric supplier, affiliates, or other entities within the corporate structure offering unregulated services or products, nor shall the electric utility or alternative electric supplier suggest that any customer will receive inferior treatment or service by doing business with an unaffiliated supplier.

J. An electric utility or alternative electric supplier offering regulated service in Michigan shall not condition or otherwise tie the provision of a regulated service or the availability of discounts, rates, other charges, fees, rebates, or waivers of terms and conditions for regulated service to the taking of any unregulated goods or services from the electric utility or alternative electric supplier, affiliates, or other entities within the corporate structure.

K. An electric utility or alternative electric supplier offering regulated service in Michigan shall not allow its affiliates to use its logo unless the affiliate includes, in a clearly visible position and easily readable by customers, the following statement:

"(Affiliate name) is not regulated by the Michigan Public Service Commission."

L. If an electric utility, its affiliate, or other entity within the corporate structure offers an unregulated service, any use of its logo shall include, in a clearly visible position and easily readable by customers, the following statement: "(Service) is not regulated by the Michigan Public Service Commission."

M. None of the provisions of this code shall be interpreted to require a cooperative electric utility or an independent investor-owned utility with fewer than 60 employees to maintain separate facilities, operations, or personnel, used to deliver electricity to retail customers, provide retail electric service, or to be an alternative electric supplier.

III. Discrimination

An electric utility or alternative electric supplier that offers, itself or through its affiliates, both regulated and unregulated services shall not unduly discriminate in favor of or against any party, including its affiliates. This includes, but is not limited to, the following:

A. An electric utility or alternative electric supplier that offers, itself or through its affiliates, both regulated and unregulated service shall not provide any affiliate or other entity within its corporate structure, preferential treatment or any other advantages that are not offered under the same terms and conditions and contemporaneously to other suppliers offering services or products within the same service territory or to customers of those suppliers. This provision includes, but is not limited to, all aspects of the electric utility's or alternative electric supplier's service, including pricing, responsiveness to requests for service or repair, the availability of firm and interruptible service, and metering requirements.

B. If an electric utility provides to any affiliate or other separate entity, or customers of an affiliate or other separate entity within its corporate structure, a discount, rebate, fee waiver, or waiver of its regulated tariffed terms and conditions for services or products, it shall contemporaneously provide notice of and offer the same discount, rebate, fee waiver, or waiver to all alternative electric suppliers operating within the electric utility's service territory or all alternative electric suppliers' customers.

C. If an electric utility or alternative electric supplier offering regulated service in Michigan provides services, products, or property to any affiliate or other entity within the corporate structure, compensation shall be based upon the higher of fully allocated embedded cost or market price. If an affiliate or other entity within the corporate structure provides services, products, or property to an electric utility or alternative electric supplier offering regulated service in Michigan, compensation for services and supplies shall be at the lower of market price or 10% over fully allocated embedded cost and transfers of assets shall be based upon the lower of fully allocated embedded cost or market price.

D. If an electric utility provides a customer or potential customer with the names of its affiliates or other entities within the corporate structure that are alternative electric suppliers, it shall do so only by distributing their names along with the names of all licensed alternative electric suppliers.

E. An electric utility or alternative electric supplier offering regulated service in Michigan shall not provide information or consultation to an affiliate or other entity within the corporate structure offering unregulated electric service in Michigan regarding a potential business arrangement between that affiliate or other entity within the corporate structure and a potential customer.

F. An electric utility or alternative electric supplier offering regulated service in Michigan shall not refer a customer or potential customer to an affiliate or other entity within the corporate structure offering unregulated electric service in Michigan, nor steer a potential customer away from a non-affiliated entity offering unregulated electric service in Michigan, nor shall the electric utility or alternative electric supplier offering regulated service in Michigan provide a customer or potential customer with advice or assistance regarding the selection of or relationship with an affiliate, other entity within the corporate structure, or other service provider offering unregulated electric service in Michigan.

IV. Disclosure of Information

Information obtained by an electric utility or alternative electric supplier in the course of conducting its regulated business in Michigan shall not be shared directly or indirectly with its affiliates or other entities within its corporate structure unless that same information is provided to competitors operating in the state on the same terms and conditions and contemporaneously. This provision includes, but is not limited to, the following:

A. Customer specific names and addresses shall not be provided to an affiliate or other entity within the corporate structure unless the same information is offered on the same terms and conditions, and contemporaneously, to all competitors.

B. Customer specific consumption or billing data shall not be provided to any affiliate or other entity within the corporate structure or alternative electric supplier without prior written approval of the customer. Once each calendar year a request for up to 12 months of historic usage or billing data may be made at no cost.

C. If an electric utility or alternative electric supplier offering regulated service in Michigan provides non-customer specific, or aggregated, customer information to its affiliate or other entity within its corporate structure, it must offer the same information on the same terms and conditions, in the same form and manner, and contemporaneously to all competitors.

D. An electric utility shall not provide its affiliates or other entities within its corporate structure with information about the distribution system, including operation and expansion, without offering the same information under the same terms and conditions, in the same form and manner, and contemporaneously to all licensed alternative electric suppliers.

E. An electric utility or alternative electric supplier offering regulated service in Michigan shall not provide any information received from or as a result of doing business with a competitor to an affiliate or other entity within its corporate structure without the written approval of the competitor.

V. Electric Utility – Alternative Electric Supplier Relationship

Except for instances covered by Section 10a(3) of 2000 PA 141 or other instances approved by the Commission, an electric utility shall not in any way interfere in the business operations of an alternative electric supplier. This provision includes, but is not limited to, the following:

A. An electric utility shall not give the appearance in any way that it speaks on behalf of any alternative electric supplier.

B. An electric utility shall not interfere in any manner in the contractual relationship between the alternative electric supplier and its customers unless such involvement is clearly permitted in the contract between the customer and the alternative electric supplier or in tariffs approved by the Commission.

VI. Compliance Plans

Each electric utility or alternative electric supplier shall file a code of conduct compliance plan within 60 days of the order on rehearing on this code of conduct by the Commission. The compliance plan shall:

A. Designate a corporate officer of the electric utility or alternative electric supplier who will oversee compliance with the code of conduct and be available to serve as the Commission's primary contact regarding compliance with the code.

B. Include an affidavit signed by the designated corporate officer certifying that the electric utility or alternative electric supplier will comply fully with the code of conduct.

C. Include a clear organization chart of the parent or holding company showing all regulated entities and affiliates and a description of all services and products provided between the regulated entity and its affiliates.

The electric utility or alternative electric supplier shall file revisions to its compliance plan needed to keep the information contained therein current.

In the compliance filing, the electric utility or alternative electric supplier may request a waiver from one or more provisions of this code of conduct. The electric utility or alternative electric supplier carries the burden of demonstrating that such a waiver will not inhibit the development or functioning of the competitive market.

VII. Oversight, Enforcement, and Penalties

A. An electric utility or alternative electric supplier shall maintain documentation needed to investigate compliance with the code of conduct. All documentation shall be kept at a designated company office in Michigan. The electric utility or alternative electric supplier shall make this information available for review upon request by the Commission or its Staff. The designated officer will either be available or make personnel available who are knowledgeable to respond to inquiries by the Commission or its Staff regarding compliance with the provisions of the code of conduct.

B. The electric utility or alternative electric supplier shall use a documented dispute resolution process separate from any process that might be available from the Commission. This dispute resolution process shall address complaints arising from application of the code of conduct. The electric utility or alternative electric supplier shall keep a log of all complaints, including: (1) the name of the person or entity filing the complaint, (2) the date the complaint was filed, (3) a written statement of the nature of the complaint, and (4) the results of the resolution process.

C. Each electric utility or alternative electric supplier shall file an annual report with the commission summarizing the number and types of complaints received and their resolution.

D. Penalties for violations of the code of conduct will be as provided in Section 10c of the Customer Choice and Electricity Reliability Act, MCL 460.10c.

ILLINOIS

Rule: Public Utilities Act for Electric Utilities, Illinois Commerce Commission
TITLE 83: PUBLIC UTILITIES CHAPTER I: ILLINOIS COMMERCE COMMISSION SUBCHAPTER c: ELECTRIC UTILITIES
PART 450 NON-DISCRIMINATION IN AFFILIATE TRANSACTIONS FOR ELECTRIC UTILITIES[18]

Non-Discrimination

a. Electric utilities shall not provide affiliated interests or customers of affiliated interests preferential treatment or advantages relative to unaffiliated entities or their customers in connection with services provided under tariffs on file with the Illinois Commerce Commission (Commission). This provision applies broadly to all aspects of service, including, but not limited to, responsiveness to requests for service, the availability of firm versus interruptible services, the imposition of special metering requirements, and all terms and conditions and charges specified in the tariff.

b. Except for corporate support transactions and services that have been declared competitive pursuant to Section 16-113 of the Act, transactions between an electric utility and one or more of its affiliated interests in competition with alternative retail electric suppliers that are not governed by tariff sheets on file with the Commission shall not discriminate in relation to unaffiliated alternative retail electric suppliers.

c. Electric utilities and affiliated interests shall not notify potential or actual customers, either directly or indirectly, advertise to the public, or otherwise communicate that the electric utility provides any advantages relating to the scheduling, transmission or distribution of electricity to affiliated interests or their customers relative to unaffiliated entities and their customers.

d. A utility shall process requests for similar services provided by the utility in the same manner and within the same time period for its affiliated interests in competition with alternative retail electric suppliers and for all similarly situated unaffiliated alternative retail electric suppliers and their respective customers.

e. If discretion is permitted in application of a tariff provision, electric utilities shall maintain a log detailing each instance in which it exercised discretion, as required in Section 450.140(d).

f. If an electric utility offers affiliated interests or customers of affiliated interests a discount, rebate, fee waiver or waivers of its ordinary terms and conditions for services provided under tariffs on file with the Commission, it shall contemporaneously offer the same discount, rebate, fee waiver or waivers of its ordinary terms and conditions to all unaffiliated entities and customers of unaffiliated entities, to the extent consistent with the tariffs, provided, however, that this subsection shall not apply to billing experiments under Section 16-106 of the Act or competitive services under Sections 16-102 and 16-116(b) of the Act. Electric utilities shall maintain a log of such instances, as required in Section 450.140(d).

g. A customer's eligibility for participation in any billing experiments under Section 16-106 of the Act or contracts for competitive service under Sections 16-102 and 16-116(b) of the Act, except for those competitive services that have been declared competitive pursuant to Section 16-113 of the Act, shall not be conditioned on, nor tied to, the taking of any goods and services from the utility's affiliated interests. Electric utilities shall inform customers of this prohibition in writing before customers begin taking such service.

h. When providing delivery services as a component of any bundled service, an electric utility shall not offer affiliated interests or the customers of affiliated interests a discount, rebate, fee waiver or waivers of its ordinary terms and conditions for delivery services on file with the Commission unless delivery services have been declared competitive service pursuant to Section 16-113 of the Act or the electric utility

[18] ftp://www.ilga.gov/jcar/admincode/083/08300450sections.html

contemporaneously offers the same discount, rebate, fee waiver or waivers of its ordinary terms and conditions to all unaffiliated entities and customers of unaffiliated entities.

Marketing and Advertising

a. An electric utility shall neither jointly advertise nor jointly market its services or products with those of an affiliated interest in competition with Alternative Retail Electric Suppliers (ARES).

b. Nothing in subsection (a) shall be construed as prohibiting an affiliated interest in competition with ARES from using the corporate name or logo of an electric utility or electric utility holding company.

Customer Information

a. Customer information shall be made available in accordance with Section 16-122 of the Public Utilities Act [220 ILCS 5/16-122], without preference to affiliated interests or their customers. Electric utilities shall not provide any preferences to affiliated interests in requesting authorization for the release of customer information.

b. An unaffiliated ARES may submit, to an electric utility, a written standing request for any generic customer information concerning the usage, load shape curve or other general characteristics of customers by rate classification that the electric utility provides to its affiliated interests in competition with ARES. A standing request made pursuant to this Section shall expire one year after being received by the utility unless renewed in writing by the ARES.

c. The electric utility shall contemporaneously, and in the same form and manner, make available to any unaffiliated alternative retail electric suppliers that have submitted a standing request, pursuant to subsection (b) of this Section, any generic customer information concerning the usage, load shape curve or other general characteristics of customers by rate classification that the utility makes available to its affiliated interests in competition with alternative retail electric suppliers.

d. Any unaffiliated ARES that receives generic customer information pursuant to a standing request made under this Section or any affiliated interest in competition with ARES that receives generic customer information concerning the usage, load shape curve or other general characteristics of customers by rate classification from the electric utility shall, in accordance with Section 16-122(b) of the Act, pay the electric utility a reasonable fee in each instance that such information is provided.

Independent Functioning

a. Except in relation to corporate support and emergency support, electric utilities and affiliated interests in competition with ARES that provide services to customers within the utility's service territory shall function independently of each other and shall not share services or facilities.

Employees

a. Except in relation to corporate support and emergency support, electric utilities and their affiliated interests in competition with alternative retail electric suppliers shall not jointly employ or otherwise share the same employees.

b. Electric utilities shall not jointly employ or otherwise share employees engaged in providing delivery services with their affiliated interests in competition with alternative retail electric suppliers.

c. Subsections (a), (b) and (d) of this Section shall not apply to any employee covered by a collective bargaining agreement subject to federal labor law, including the Labor Management Relations Act and the National Labor Relations Act.

d. Each electric utility that has an affiliated interest in competition with ARES shall maintain a log detailing the transfer of employees: from the utility to its affiliated interests in competition with ARES; from the utility to its other affiliated interests; and from the utility's other affiliated interests to its affiliated interests in competition with ARES. This subsection shall not apply to employee transfers to or from corporations that are affiliated interests of the electric utility solely because they share a common director. The log shall be made available to the Commission upon request.

Transfer of Goods

a. Transactions between an electric utility and its affiliated interests shall not be allowed to subsidize the affiliated interests.

b. In connection with an application for a certificate of service authority filed by an affiliated interest of an electric utility, pursuant to Section 16-115 of the Act, the affiliated interest shall provide a copy of a Commission approved services and facilities or affiliated interest agreement that explicitly addresses the cost allocation and valuation methodology to be applied to any transfer of goods and services: between the electric utility and its affiliated interests in competition with ARES; between the utility and its other affiliated interests; and between the utility's other affiliated interests and its affiliated interests in competition with ARES. In the event that there is no Commission approved agreement addressing these issues, the applicant shall submit such an agreement for approval as part of its application.

c. Costs associated with the transfer of goods and services between an electric utility and its affiliated interests, including affiliated interests in competition with ARES, shall be priced as specified in, and allocated pursuant to, the Commission approved services and facilities agreement or affiliated interests agreement presented in the affiliated ARES certification proceeding. Any transfer of goods and services between an electric utility and its affiliated interests, including affiliated interests in competition with ARES, that is not explicitly addressed in a Commission approved services and facilities or affiliated interests agreement is prohibited unless the transfer has been otherwise specifically approved by the Commission pursuant to Section 7-101 of the Act or approval has been waived by statute or Commission rule.

Maintenance of Books and Records and Commission Access

a. An electric utility shall maintain books, accounts, and records separate from those of its affiliated interests.

b. In connection with an application for a certificate of service authority filed by an affiliated interest of an electric utility, pursuant to Section 16-115 of the Act, the affiliated interest shall provide a copy of a Commission approved services and facilities or affiliated interest agreement that explicitly sets forth both the cost allocation guidelines and the accounting conventions to be applied to any transactions: between the electric utility and its affiliated interests in competition with ARES; between the utility and its other affiliated interests; and between the utility's affiliated interests in competition with ARES and its other affiliated interests. In the event that there is no Commission approved agreement addressing cost allocation and accounting conventions, the applicant shall submit such an agreement for approval as part of its application.

c. Upon the request of the Commission, electric utilities shall make personnel available who are competent to respond to the Commission's inquiries regarding the nature of any transactions that have taken place between the electric utility and its affiliated interests, including but not limited to the goods and services provided, the prices, terms and conditions, and other considerations given for the goods and services provided.

d. Each electric utility shall maintain a log detailing: each instance in which it exercised discretion in the application of tariff provisions; each instance in which it offered affiliated interests or customers of affiliated interests services not governed by tariffs, except for corporate support transactions and services that have been declared competitive pursuant to Section 16-113 of the Act; and each instance in which it offered affiliated interests or customers of affiliated interests a discount, rebate, fee waiver or waivers of the electric utility's ordinary terms and conditions in connection with services provided under tariffs on file with the Commission. The electric utility shall make such log available to the Commission upon request. The log shall contain the following information:
    i. the names of the affiliated interests and unaffiliated entities involved in the transaction;
    ii. a description of the transaction;
    iii. the time period over which the transaction applies; and
    iv. the quantities and locations involved in the transaction.

Internal Audits

a. Electric utilities shall conduct biennial internal audits on transactions with affiliated interests. These audits shall test compliance with this Part, with any applicable Commission orders, with the electric utility's affiliated interest operating agreement(s) and/or guidelines, with 83 Ill. Adm. Code 415, and with 83 Ill. Adm. Code 420. The audits shall include written reports of conclusions and associated workpapers that shall be available to the Commission Staff for review. The audit reports shall be submitted to the Commission's Director of Accounting within 30 days after completion. Any audit performed pursuant to this Section may be designated as confidential with the Commission's Director of Accounting.

b. The first such internal audit report shall be submitted on or before December 1, 1998. Succeeding audit reports shall be submitted on or before December 1 of each even numbered succeeding year.

c. Subsections (a) and (b) of this Section shall not apply to transactions with corporations that are affiliated interests of the electric utility solely because they share a common director or transactions with individuals that are affiliated interests of the electric utility solely because they are an elective officer or director of the electric utility.

NORTH CAROLINA

Rule: North Carolina Code of Conduct (as approved by the North Carolina Utilities Commission)[19]

This section contains the complete text of the "official" North Carolina Code of Conduct (hereinafter "Code of Conduct or "Code"), approved by the North Carolina Utilities Commission, which governs Duke Energy Carolina's (DEC) and Duke Energy Progress (DEP) transactions with affiliates. This Code applies in North Carolina and South Carolina.

CODE OF CONDUCT GOVERNING THE RELATIONSHIPS, ACTIVITIES AND TRANSACTIONS BETWEEN AND AMONG THE PUBLIC UTILITY OPERATIONS OF DEC, THE PUBLIC UTILITY OPERATIONS OF PEC, DUKE ENERGY CORPORATION, OTHER AFFILIATES, AND THE NONPUBLIC UTILITY OPERATIONS OF DEC AND PEC

GENERAL

This Code of Conduct establishes the minimum guidelines and rules that apply to the relationships, transactions, and activities involving the public utility operations of DEC, PEC, Duke Energy, other Affiliates, or the Nonpublic Utility Operations of DEC and PEC, to the extent such relationships, activities, and transactions affect the operations or costs of utility service experienced by the public utility operations of DEC and PEC in their respective service areas. DEC, PEC, and the other Affiliates are bound by this Code of Conduct pursuant to Regulatory Condition 6.1 approved by the Commission in Docket Nos. E-2, Sub 998, and E-7, Sub 986. This Code of Conduct is subject to modification by the Commission as the public interest may require, including, but not limited to, addressing changes in the organizational structure of DEC, PEC, Duke Energy, other Affiliates, or the Nonpublic Utility Operations; changes in the structure of the electric industry; or other changes that warrant modification of this Code.

DEC or PEC may seek a waiver of any aspect of this Code of Conduct by filing a request with the Commission showing that exigent circumstances in a particular case justify such a waiver.

STANDARDS OF CONDUCT

A. Independence and Information Sharing

1. Separation - DEC, PEC, Duke Energy, and the other Affiliates shall operate independently of each other and in physically separate locations to the maximum extent practicable. DEC, PEC, Duke Energy, and each of the other Affiliates shall maintain separate books and records. Each of DEC's and PEC's Nonpublic Utility Operations shall maintain separate records from those of DEC's and PEC's public utility operations to ensure appropriate cost allocations and any arm's- length-transaction requirements.

Disclosure of Customer Information:

(a) Upon request, and subject to the restrictions and conditions contained herein, DEC and PEC may provide Customer Information to Duke Energy, another Affiliate, or a Nonpublic Utility Operation under the same terms and conditions that such information is provided to non-Affiliates.

(b) Except as provided in Section III.A.2.(f) below, Customer Information shall not be disclosed to any person or company, without the Customer's consent, and then only to the extent specified by the Customer. Consent to disclosure of Customer Information to Affiliates or Nonpublic Utility Operations may be obtained by means of written authorization, electronic authorization or recorded verbal authorization upon providing the Customer with the information set forth in Attachment A; provided, however, that DEC and PEC retain such authorization for verification purposes for as long as the authorization remains in effect.

[19] https://dms.psc.sc.gov/Attachments/Matter/e71fb4fb-1518-41e6-895c-7c6e3f60bdfa

(c) If the Customer allows or directs DEC or PEC to provide Customer Information to Duke Energy, another Affiliate, or a Nonpublic Utility Operation, then DEC or PEC shall ask the Customer if he, she, it would like the Customer Information to be provided to one or more non-Affiliates. If the Customer directs DEC or PEC to provide Customer Information to one or more non-Affiliates, the Customer Information shall be disclosed to all entities designated by the Customer contemporaneously and in the same manner.

(d) Sections III.A.2.(a), 2.(b), and 2.(c) herein shall be permanently posted on DEC's and PEC's website.

(e) No DEC or PEC employee who is transferred to Duke Energy or another Affiliate will be permitted to copy or otherwise compile any Customer Information for use by such entity except pursuant to written permission from the Customer, as reflected by a signed Data Disclosure Authorization. Neither DEC nor PEC shall transfer any employee to Duke Energy or another Affiliate for the purpose of disclosing or providing Customer Information to such entity.

(f) Notwithstanding the prohibitions established by this Section III.A.2, DEC and PEC may disclose Customer Information to DEBS, PESC, any other Affiliate, a Nonpublic Utility Operation or a non-affiliated third party without Customer consent, but only to the extent necessary for the Affiliate, Nonpublic Utility Operation or non-affiliated third party to provide goods or services to DEC or PEC and upon their explicit agreement to protect the confidentiality of such Customer Information. To the extent the Commission approves a list of services to be provided and taken pursuant to one or more utility to-utility service agreements, then Customer Information may be disclosed pursuant to the foregoing exception to the extent necessary for such services to be performed.

(g) DEC and PEC shall take appropriate steps to store Customer Information in such a manner as to limit access to only those persons permitted to receive it and shall require all persons with access to such information to protect its confidentiality.

(h) DEC and PEC shall establish guidelines for its employees and representatives to follow with regard to complying with this Section III.A.2.

(i) No DEBS or PESC employee may use Customer Information to market or sell any product or service to DEC's or PEC's Customers, except in support of a Commission-approved rate schedule or program or a marketing effort managed and supervised directly by DEC or PEC.

(j) DEBS and PESC employees with access to Customer Information must be prohibited from making any improper indirect use of the data, including directing or encouraging any actions based on the Customer Information by employees of DEBS or PESC that do not have access to such information, or by other employees of Duke Energy or other Affiliates or Nonpublic Utility Operations of the Utilities.

(k) Should any inappropriate disclosure of DEC or PEC Customer Information occur at any time, DEC or PEC is required to promptly file a statement with the Commission in this docket describing the circumstances of the disclosure, the Customer information disclosed, the results of the disclosure, and the mitigating and/or other steps taken to address the disclosure.

3. The disclosure of Confidential Systems Operation Information of DEC and PEC (referred to hereinafter as "Information") shall be governed as follows: (l) Such Information shall not be disclosed by DEC or PEC to an Affiliate or a Nonpublic Utility Operation unless it is disclosed to all competing nonAffiliates contemporaneously and in the same manner. Disclosure to nonAffiliates is not required when disclosure to Affiliates or Nonpublic Utility Operations meets one of the following exceptions:

(i) The Information is provided to employees of DEC or PEC for the purpose of implementing, and operating pursuant to, the JDA in accordance with the Regulatory Conditions approved in Docket Nos. E-7, Sub 986, and E-2, Sub 998;

(ii) The Information is necessary for the performance of services approved to be performed pursuant to one or more Affiliate utility-to-utility service agreements;
(iii) A state or federal regulatory agency or court having jurisdiction over the disclosure of the Information requires the disclosure;
(iv) The Information is provided to employees of DEBS or PESC pursuant to a service agreement filed with the Commission pursuant to G.S. 62-153;
(v) The Information is provided to employees of DEC's or PEC's Utility Affiliates for the purpose of sharing best practices and otherwise improving the provision of regulated utility service;
(vi) The Information is provided to an Affiliate pursuant to an agreement filed with the Commission pursuant to G.S. 62-153, provided that the agreement specifically describes the types of Information to be disclosed;
(vii) Disclosure is otherwise essential to enable DEC or PEC to provide Electric Services to their Customers; or
(viii) Disclosure of the Information is necessary for compliance with the Sarbanes-Oxley Act of 2002.

(m) Any Information disclosed pursuant to the exceptions in Section III.A.3(a), above, shall be disclosed only to employees that need the information for the purposes covered by those exceptions and in as limited a manner as possible. The employees receiving such Information must be prohibited from acting as conduits to pass the Information to any Affiliate(s) and must have explicitly agreed to protect the confidentiality of such Information.

(n) For disclosures pursuant to exceptions (vii) and (viii) in Section III.A.3(a), above, DEC and PEC shall include in their annual affiliated transaction reports the following information:
(i) The types of Information disclosed and the name(s) of the Affiliate(s) to which it is being, or has been, disclosed;
(ii) The reasons for the disclosure; and
(iii) Whether the disclosure is intended to be a one-time occurrence or an ongoing process. To the extent a disclosure subject to the reporting requirement is intended to be ongoing, only the initial disclosure and a description of any processes governing subsequent disclosures need to be reported.

(o) DEC, PEC, DEBS, and PESC employees with access to CSOI must be prohibited from making any improper indirect use of the data, including directing or encouraging any actions based on the CSOI by employees that do not have access to such information, or by other employees of Duke Energy or other Affiliates or Nonpublic Utility Operations of DEC and PEC.

(p) Should the handling or disclosure of DEC's or PEC's Market Information, Transmission Information, or other CSOI by DEBS, PESC, or another Affiliate or Nonpublic Utility Operation, or their respective employees, result in (i) a violation of the FERC Standards of Conduct or Affiliate Restrictions, 18 CFR § 358 - Standards of Conduct for Transmission Providers and 18 CFR § 35.39-Affiliate Restrictions), or any other relevant FERC standards or codes of conduct, (ii) the posting of such data on an OASIS or other Internet website, or (iii) other public disclosure of the data, DEC or PEC shall promptly file a statement with the Commission in Docket Nos. E-7, Sub 986C, and E-2, Sub 998C, respectively, describing the circumstances leading to such violation, posting, or other public disclosure, any data required to be posted or otherwise publicly disclosed, and the mitigating and/or other steps taken to address the current or any future potential violation, posting, or other public disclosure.

(q) Should any inappropriate disclosure of CSOI occur at any time, DEC or PEC shall promptly file a statement with the Commission in Docket Nos. E-7, Sub 986C, or E2, Sub 998C, respectively, describing the circumstances of the disclosure, the CSOI disclosed, the results of the disclosure, and the mitigating and/or other steps taken to addressthe disclosure.

(r) Unless publicly noticed and generally available, should the FERC Affiliate Restrictions, the Transmission Standards, or any other relevant FERC standards or codes of conduct be eliminated, amended, superseded, or otherwise replaced, DEC and PEC shall file a letter in Docket Nos. E-7, Sub 986E, and E-2, Sub 998E, with the Commission describing such action within 60 days of the action, along with a copy of any amended or replacement document.

Nondiscrimination

1. DEC's and PEC's employees and representatives shall not unduly discriminate against non-Affiliated entities.

Marketing/Logo Usage

1. The public utility operations of DEC and PEC may engage in joint sales, joint sales calls, joint proposals, or joint advertising (a joint marketing arrangement) with their Utility Affiliates and with their Nonpublic Utility Operations, subject to compliance with other provisions of this Code of Conduct and any conditions or restrictions that the Commission may hereafter establish. Neither DEC nor PEC shall otherwise engage in such joint activities without making such opportunities available to comparable third parties.

2. Neither Duke Energy nor any of the other Affiliates shall use the names or logos of DEC or PEC in any communications unless a disclaimer is included that states the following:

(a) "[Duke Energy Corporation/Affiliate) is not the same company as [DEC/PEC], and [Duke Energy Corporation/Affiliate) has separate management and separate employees"; (b) "[Duke Energy Corporation/Affiliate] is not regulated by the North Carolina Utilities Commission or in any way sanctioned by the Commission";
(c) "Purchasers of products or services from [Duke Energy Corporation/Affiliate] will receive no preference or special treatment from [DEC/PEC]"; and
(d) "A customer does not have to buy products or services from [Duke Energy Corporation/Affiliate] in order to continue to receive the same safe and reliable electric service from [DEC/PEC]."

3. Nonpublic Utility Operations may not use the names or logos of DEC or PEC in any communications unless a disclaimer is included that states the following:

(a) "[Nonpublic Utility Operation] is not part of the regulated services offered by [DEC/PEC] and is not in any way sanctioned by the North Carolina Utilities Commission"; (b) "Purchasers of products or services from [Nonpublic Utility Operation] will receive no preference or special treatment from [DEC/PEC]"; and
(c) "A customer does not have to buy products or services from [Nonpublic Utility Operation] in order to continue to receive the same safe and reliable electric service from [DEC/PEC]."

The required disclaimer must be sized and displayed in a way that is commensurate with the name and logo so that the disclaimer is at least the larger of one-half the size of the type that first displays the name and logo or the predominant type used in the communication.

Transfers of Goods and Services, Transfer Pricing, and Cost Allocation

1. Cross-subsidies involving DEC or PEC and Duke Energy, other Affiliates, or the Nonpublic Utility Operations are prohibited.

2. All costs incurred by personnel or representatives of DEC or PEC for or on behalf of Duke Energy, other Affiliates, or the Nonpublic Utility Operations shall be charged to the entity responsible for the costs.

3. As a general guideline, with regard to the transfer prices charged for goods and services, including the use or transfer of personnel, exchanged between and among DEC or PEC, and Duke Energy, the other

Non-Utility Affiliates, and the Nonpublic Utility Operations, to the extent such prices affect DEC's or PEC's operations or costs of utility service, the following conditions shall apply:

(a) Except as otherwise provided for in this Section III.D, for untariffed goods and services provided by DEC or PEC to Duke Energy, a Non-Utility Affiliate, or a Nonpublic Utility Operation, the transfer price paid to DEC or PEC shall be set at the higher of Market Value or DEC's or PEC's Fully Distributed Cost.

(b) Except as otherwise provided for in this Section III.D, for goods and services provided, directly or indirectly, by Duke Energy, a Non-Utility Affiliate other than DEBS or PESC, or a Nonpublic Utility Operation to DEC or PEC, the transfer price(s) charged by Duke Energy, the Non-Utility Affiliate, and the Nonpublic Utility Operation to DEC or PEC shall be set at the lower of Market Value or Duke Energy's, the Non-Utility Affiliate's, or the Nonpublic Utility Operation's Fully Distributed Cost(s). If DEC or PEC do not engage in competitive solicitation and instead obtain the goods or services from Duke Energy, a Non-Utility Affiliate, or a Nonpublic Utility Operation, DEC and PEC shall implement adequate processes to comply with this Code provision and related Regulatory Conditions and ensure that in each case DEC's and PEC's Customers receive service at the lowest reasonable cost. For goods and services provided by DEBS and PESC to DEC, PEC, and Utility Affiliates, the transfer price charged shall be set at DEBS' and PESC's Fully Distributed Cost.

(c) Tariffed goods and services provided by DEC and PEC to Duke Energy, other Affiliates, or a Nonpublic Utility Operation shall be provided at the same prices and terms that are made available to Customers having similar characteristics with regard to Electric Services (such as time of use, manner of use, customer class, load factor, and relevant Standard Industrial Classification) under the applicable tariff.

(d) Subject to and in compliance with all conditions placed upon DEC and PEC by the Commission, untariffed non-power, non-generation, or non-fuel goods and services provided by DEC or PEC to DEC, PEC, or the Utility Affiliates or by the Utility Affiliates to DEC or PEC, shall be transferred at the supplier's Fully Distributed Cost.

4. To the extent that DEC, PEC, Duke Energy, other Affiliates, or the Nonpublic Utility Operations receive Shared Services from DEBS or PESC (or their successors), these Shared Services may be jointly provided to DEC, PEC, Duke Energy, other Affiliates, or the Nonpublic Utility Operations on a fully distributed cost basis, provided that the taking of such Shared Services by DEC and PEC is cost beneficial on a service-by-service (e.g., accounting management, human resources management, legal services, tax administration, public affairs) basis to DEC and PEC. Charges for such Shared Services shall be allocated in accordance with the cost allocation manual(s) filed with the Commission pursuant to Regulatory Condition 5.5, subject to any revisions or other adjustments that may be found appropriate by the Commission on an ongoing basis.

5. DEC, PEC, and their Utility Affiliates may capture economies-of-scale in joint purchases of goods and services (excluding the purchase of natural gas, coal, and electricity or ancillary services intended for resale), if such joint purchases result in cost savings to DEC's and PEC's Customers. DEC, PEC, Duke Indiana, Duke Kentucky, and PEF, may capture economies-ofscale in joint purchases of coal and natural gas, if such joint purchases result in cost savings to DEC's and PEC's Customers. Notwithstanding the foregoing, if any of the coal or natural gas jointly purchased by DEC, PEC, Duke Indiana, Duke Kentucky, or PEF is transferred to or utilized by another Affiliate within 12 months of the joint purchase, DEC and PEC will file a notification of such with the Commission. All joint purchases entered into pursuant to this section shall be priced in a manner that permits clear identification of each participant's portion of the purchases and shall be reported in DEC's and PEC's affiliated transaction reports filed with the Commission.

6. All permitted transactions between DEC, PEC, Duke Energy, other Affiliates, and the Nonpublic Utility Operations shall be recorded and accounted for in accordance with the cost allocation manuals required to be filed with the Commission pursuant to Regulatory Condition 5.5 and with Affiliate agreements accepted by the Commission or otherwise processed in accordance with North Carolina law, the rules and orders of the Commission, and the Regulatory Conditions.

7. Costs that DEC and PEC incur in assembling, compiling, preparing, or furnishing requested Customer Information or Confidential Systems Operation Information for or to Duke Energy, other Affiliates, Nonpublic Utility Operations, or non-Affiliates shall be recovered from the requesting party pursuant to Section III.D.3 of this Code of Conduct.

8. Any technology or trade secrets developed, obtained, or held by DEC or PEC in the conduct of regulated operations shall not be transferred to Duke Energy, another Affiliate, or a Nonpublic Utility Operation without just compensation and the filing of 60-days prior notification to the Commission; provided however, that DEC and PEC are not required to provide advance notice for such transfers to each other. DEC and PEC may request a waiver of this requirement from the Commission with respect to such transfers to Duke Energy, a Utility Affiliate, a Non-Utility Affiliate, or a Nonpublic Utility Operation. In no case, however, shall the notice period requested be less than 20 business days.

9. DEC and PEC shall receive compensation from Duke Energy, other Affiliates, and the Nonpublic Utility Operations for intangible benefits, if appropriate.

Regulatory Oversight

1. The State's existing requirements regarding affiliate transactions, as set forth in G.S. 62-153, shall continue to apply to all transactions between DEC, PEC, Duke Energy, and the other Affiliates.

2. The books and records of DEC, PEC, Duke Energy, other Affiliates, and the Nonpublic Utility Operations shall be open for examination by the Commission, its staff, and the Public Staff as provided in G.S. 62-34, 62-37, and 62-51.

3. To the extent North Carolina law, the orders and rules of the Commission, and the Regulatory Conditions permit Duke Energy, an Affiliate, or a Nonpublic Utility Operation to supply DEC or PEC with Natural Gas Services or other Fuel and Purchased Power Supply Services used by DEC or PEC to provide Electric Services to Customers, and to the extent such Natural Gas Services or other Fuel and Purchased Power Supply Services are supplied, DEC or PEC shall demonstrate in its annual fuel adjustment clause proceeding that each such acquisition was prudent and the price was reasonable.

Utility Billing Format

To the extent any bill issued by DEC and PEC, Duke Energy, another Affiliate, a Nonpublic Utility Operation, or a non-Affiliated third party includes any charges to Customers for Electric Services and non-Electric Services from Duke Energy, another Affiliate, a Nonpublic Utility Operation, or a non-Affiliated third party, the charges for the Electric Services shall be separated from the charges for any other services included on the bill. Each such bill shall contain language stating that the Customer's Electric Services will not be terminated for failure to pay for any other services billed.

MARYLAND

Rule: 2013 Maryland Code PUBLIC UTILITIES § 7-211 - Energy efficiency programs[20]
See also: 2016 SB 684[21], aimed at Prohibiting an affiliate of an electric company from using the electric company's trade name, logo, billing services, mail inserts, advertising, or computer services for a plan or program that provides heating, ventilation, air conditioning, or refrigeration services; requiring the Public Service Commission to determine just and reasonable compensation that an affiliate of an electric company shall provide to customers of the electric company's regulated services; etc.

(a) (1) In this section the following words have the meanings indicated.

(2) "Affiliate" has the meaning stated in § 7-501 of this title.

(3) "Demand response program" means a program established by an electric company that promotes changes in electric usage by customers from their normal consumption patterns in response to:

(i) changes in the price of electricity over time; or

(ii) incentives designed to induce lower electricity use at times of high wholesale market prices or when system reliability is jeopardized.

(4) "Electricity consumption" and "electricity consumed" mean the sum of retail electricity sales to all customers and reported electricity losses within the electric distribution system.

(5) "Peak demand" means the highest level of electricity demand in the State measured in megawatts during the period from May 1 to September 30 on a weather-normalized basis.

(6) "Per capita electricity consumption" means the result calculated by dividing the total gigawatt-hours of electricity consumed by electricity customers in the State as of December 31 of a year, as determined by the Commission, by the population of the State as of December 31 of that year, as determined by the Department of Planning.

(7) "Plan" means an electricity savings and demand reduction plan and cost recovery proposal.

(8) "Provide heating, ventilation, air conditioning, or refrigeration services" has the meaning stated in § 9A-101 of the Business Regulation Article.

(b) The General Assembly finds and declares that:

(1) energy efficiency is among the least expensive ways to meet the growing electricity demands of the State; and

(2) to provide affordable, reliable, and clean energy for consumers of Maryland, it is the goal of the State to achieve the following energy efficiency, conservation, and demand response targets, based on 2007 electricity consumption:

(i) a 15% reduction in per capita electricity consumption by the end of 2015; and

(ii) a 15% reduction in per capita peak demand by the end of 2015.

[20] https://law.justia.com/codes/maryland/2013/article-gpu/section-7-211/

[21] https://legiscan.com/MD/text/SB684/2016

(c) Beginning with the 2008 calendar year and each year thereafter, the Commission shall calculate:

(1) the per capita electricity consumption for that year; and

(2) the peak demand for that year.

(d) Subject to review and approval by the Commission, each gas company and electric company shall develop and implement programs and services to encourage and promote the efficient use and conservation of energy by consumers, gas companies, and electric companies.

(e) As directed by the Commission, each municipal electric utility and each electric cooperative that serves a population of less than 250,000 in its distribution territory shall include energy efficiency and conservation programs or services as part of their service to their customers.

(f) The Commission shall:

(1) require each gas company and electric company to establish any program or service that the Commission deems appropriate and cost effective to encourage and promote the efficient use and conservation of energy;

(2) adopt rate-making policies that provide cost recovery and, in appropriate circumstances, reasonable financial incentives for gas companies and electric companies to establish programs and services that encourage and promote the efficient use and conservation of energy; and

(3) ensure that adoption of electric customer choice under Subtitle 5 of this title does not adversely impact the continuation of cost-effective energy efficiency and conservation programs.

(g) Except as provided in subsection (e) of this section, on or before December 31, 2008, by regulation or order, the Commission shall:

(1) to the extent that the Commission determines that cost-effective energy efficiency and conservation programs and services are available, for each affected class, require each electric company to procure or provide for its electricity customers cost-effective energy efficiency and conservation programs and services with projected and verifiable electricity savings that are designed to achieve a targeted reduction of at least 5% by the end of 2011 and 10% by the end of 2015 of per capita electricity consumed in the electric company's service territory during 2007; and

(2) require each electric company to implement a cost-effective demand response program in the electric company's service territory that is designed to achieve a targeted reduction of at least 5% by the end of 2011, 10% by the end of 2013, and 15% by the end of 2015, in per capita peak demand of electricity consumed in the electric company's service territory during 2007.

(h) (1) (i) On or before July 1, 2008, and every 3 years thereafter, each electric company shall consult with the Maryland Energy Administration regarding the design and adequacy of the electric company's plan to achieve the electricity savings and demand reduction targets specified in subsection (g) of this section.

(ii) An electric company shall provide the Maryland Energy Administration with any additional information regarding the plan, as requested.

(2) On or before September 1, 2008, and every 3 years thereafter, an electric company shall submit its plan to the Commission that details the electric company's proposals for achieving the electricity savings and demand reduction targets specified in subsection (g) of this section for the 3 subsequent calendar years.

(3) The Commission shall consider any written findings provided by the Maryland Energy Administration regarding the design and adequacy of the plan.

(4) Each electric company shall provide annual updates to the Commission and the Maryland Energy Administration on plan implementation and progress towards achieving the electricity savings and demand reduction targets specified in subsection (g) of this section.

(5) (i) The plan shall include a description of the proposed energy efficiency and conservation programs and services and the proposed demand response program, anticipated costs, projected electricity savings, and any other information requested by the Commission.

(ii) The plan shall address residential, commercial, and industrial sectors as appropriate, including low-income communities and low- to moderate-income communities.

(iii) 1. If, in connection with a program or service, the electric company proposes to provide heating, ventilation, air conditioning, or refrigeration services for its customers, the plan shall include procedures for the competitive selection of heating, ventilation, air conditioning, or refrigeration service providers.

2. On request by the electric company and for good cause shown, the Commission may waive the requirement that the electric company competitively select heating, ventilation, air conditioning, or refrigeration providers under subsubparagraph 1 of this subparagraph.

Subsidization

(6) The plan and any updates shall include a certification or recertification by the electric company that, if an affiliate of the electric company provides heating, ventilation, air conditioning, or refrigeration services through any existing contract or obligation in connection with a program or service, the customers of the electric company's regulated services will not subsidize the operations of the affiliate.

(7) The Commission shall review each electric company's plan to determine if the plan is adequate and cost-effective in achieving the electricity savings and demand reduction targets specified in subsection (g) of this section.

(i) (1) In determining whether a program or service encourages and promotes the efficient use and conservation of energy, the Commission shall consider the:

(i) cost-effectiveness;

(ii) impact on rates of each ratepayer class;

(iii) impact on jobs; and

(iv) impact on the environment.

(2) The Commission shall monitor and analyze the impact of each program and service to ensure that the outcome of each program and service provides the best possible results.

(3) In monitoring and analyzing the impact of a program or service under paragraph (2) of this subsection, if the Commission finds that the outcome of the program or services may not be providing the best possible results, the Commission shall direct the electric company to include in its annual update under subsection (h)(4) of this section specific measures to address the findings.

(4) An electric company that enters into a contract or obligation with an affiliate of the electric company to provide heating, ventilation, air conditioning, or refrigeration services in connection with a program or service shall notify the Commission within 30 days after entering into the contract or obligation that the electric company:

(i) has entered into a contract or obligation with an affiliate of the electric company; and

(ii) certifies that the customers of the electric company's regulated services will not subsidize the operations of the affiliate.

(j) (1) At least once each year, each electric company and gas company shall notify affected customers of the energy efficiency and conservation charges imposed and benefits conferred.

(2) The notice shall be provided by publication on the company's website and inclusion with billing information such as a bill insert or bill message.

(k) On or before March 1 of each year, the Commission, in consultation with the Maryland Energy Administration, shall report, subject to § 2-1246 of the State Government Article, to the General Assembly on:

(1) the status of programs and services to encourage and promote the efficient use and conservation of energy, including an evaluation of the impact of the programs and services that are directed to low-income communities, low- to moderate-income communities to the extent possible, and other particular classes of ratepayers;

(2) a recommendation for the appropriate funding level to adequately fund these programs and services; and

(3) in accordance with subsection (c) of this section, the per capita electricity consumption and the peak demand for the previous calendar year.

(l) Notwithstanding any other law, the Commission may not require or allow an electric company to require an electric customer to authorize the electric company to control the amount of the electric customer's electricity usage, including through control of the electric customer's thermostat.

(m) (1) On or before June 30, 2013, by regulation or order, the Commission shall establish a pilot program for electric customers to recharge electric vehicles during off-peak hours.

(2) (i) An electric company may request to participate in the pilot program.

(ii) The Commission shall make every effort to include at least two electric companies in the pilot program.

(3) The pilot program shall include incentives for residential, commercial, and governmental customers to recharge electric vehicles in a manner that will:

(i) increase the efficiency and reliability of the electric distribution system; and

(ii) lower electricity use at times of high demand.

(4) Incentives may include:

(i) time-of-day pricing of electricity;

(ii) credits on distribution charges;

(iii) rebates on the cost of charging systems;

(iv) demand response programs; or

(v) other incentives approved by the Commission.

(5) On or before February 1, 2015, the Commission shall report to the Governor and, in accordance with § 2-1246 of the State Government Article, to the General Assembly on the experience of the pilot program and the Commission's findings.

FLORIDA

Florida Administrative Code 25-6.1351 Cost Allocation and Affiliate Transactions.[22]

(1) Purpose. The purpose of this rule is to establish cost allocation requirements to ensure proper accounting for affiliate transactions and utility nonregulated activities so that these transactions and activities are not subsidized by utility ratepayers. This rule is not applicable to affiliate transactions for purchase of fuel and related transportation services that are subject to Commission review and approval in cost recovery proceedings.

(2) Definitions.

(a) Affiliate – Any entity that directly or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with a utility. As used herein, "control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers or stockholders, voting trusts, holding trusts, associated companies, contracts or any other direct or indirect means.

Affiliate Transaction – Any transaction in which both a utility and an affiliate are each participants, except transactions related solely to the filing of consolidated tax returns.

(c) Cost Allocation Manual (CAM) – The manual that sets out a utility's cost allocation policies and related procedures.

(d) Direct Costs – Costs that can be specifically identified with a particular service or product.

(e) Fully Allocated Costs – The sum of direct costs plus a fair and reasonable share of indirect costs.

(f) Indirect Costs – Costs, including all overheads, that cannot be identified with a particular service or product.

(g) Nonregulated – Refers to services or products that are not subject to price regulation by the Commission or not included for ratemaking purposes and not reported in surveillance.

(h) Prevailing Price Valuation – Refers to the price an affiliate charges a regulated utility for products and services, which equates to that charged by the affiliate to third parties. To qualify for this treatment, sales of a particular asset or service to third parties must encompass more than 50 percent of the total quantity of the product or service sold by the entity. The 50 percent threshold is applied on an asset-by-asset and service-by-service basis, rather than on a product line or service line basis.

(i) Regulated – Refers to services or products that are subject to price regulation by the Commission or included for ratemaking purposes and reported in surveillance.

(3) Non-Tariffed Affiliate Transactions.

(a) The purpose of subsection (3) is to establish requirements for non-tariffed affiliate transactions impacting regulated activities. This subsection does not apply to the allocation of costs for services between a utility and its parent company or between a utility and its regulated utility affiliates or to services received by a utility from an affiliate that exists solely to provide services to members of the utility's corporate family. All affiliate transactions, however, are subject to regulatory review and approval.

(b) A utility must charge an affiliate the higher of fully allocated costs or market price for all non-tariffed services and products purchased by the affiliate from the utility. Except, a utility may charge an affiliate less than fully allocated costs or market price if the charge is above incremental cost. If a utility charges less than fully allocated costs or market price, the utility must maintain documentation to support and justify how doing so benefits regulated operations. If a utility charges less than market price, the utility must notify the Commission Clerk in writing within 30 days of the utility initiating, or changing any of the terms or conditions, for the provision of a product or service. In the case of products or services currently being provided, a utility must notify the Division within 30 days of the rule's effective date.

(c) When a utility purchases services and products from an affiliate and applies the cost to regulated operations, the utility shall apportion to regulated operations the lesser of fully allocated costs or market price. Except, a utility

[22] https://www.flrules.org/gateway/ruleno.asp?id=25-6.1351

may apportion to regulated operations more than fully allocated costs if the charge is less than or equal to the market price. If a utility apportions to regulated operations more than fully allocated costs, the utility must maintain documentation to support and justify how doing so benefits regulated operations and would be based on prevailing price valuation.

(d) When an asset used in regulated operations is transferred from a utility to a nonregulated affiliate, the utility must charge the affiliate the greater of market price or net book value. Except, a utility may charge the affiliate either the market price or net book value if the utility maintains documentation to support and justify that such a transaction benefits regulated operations. When an asset to be used in regulated operations is transferred from a nonregulated affiliate to a utility, the utility must record the asset at the lower of market price or net book value. Except, a utility may record the asset at either market price or net book value if the utility maintains documentation to support and justify that such a transaction benefits regulated operations. An independent appraiser must verify the market value of a transferred asset with a net book value greater than $1,000,000. If a utility charges less than market price, the utility must notify the Commission Clerk in writing within 30 days of the transfer.

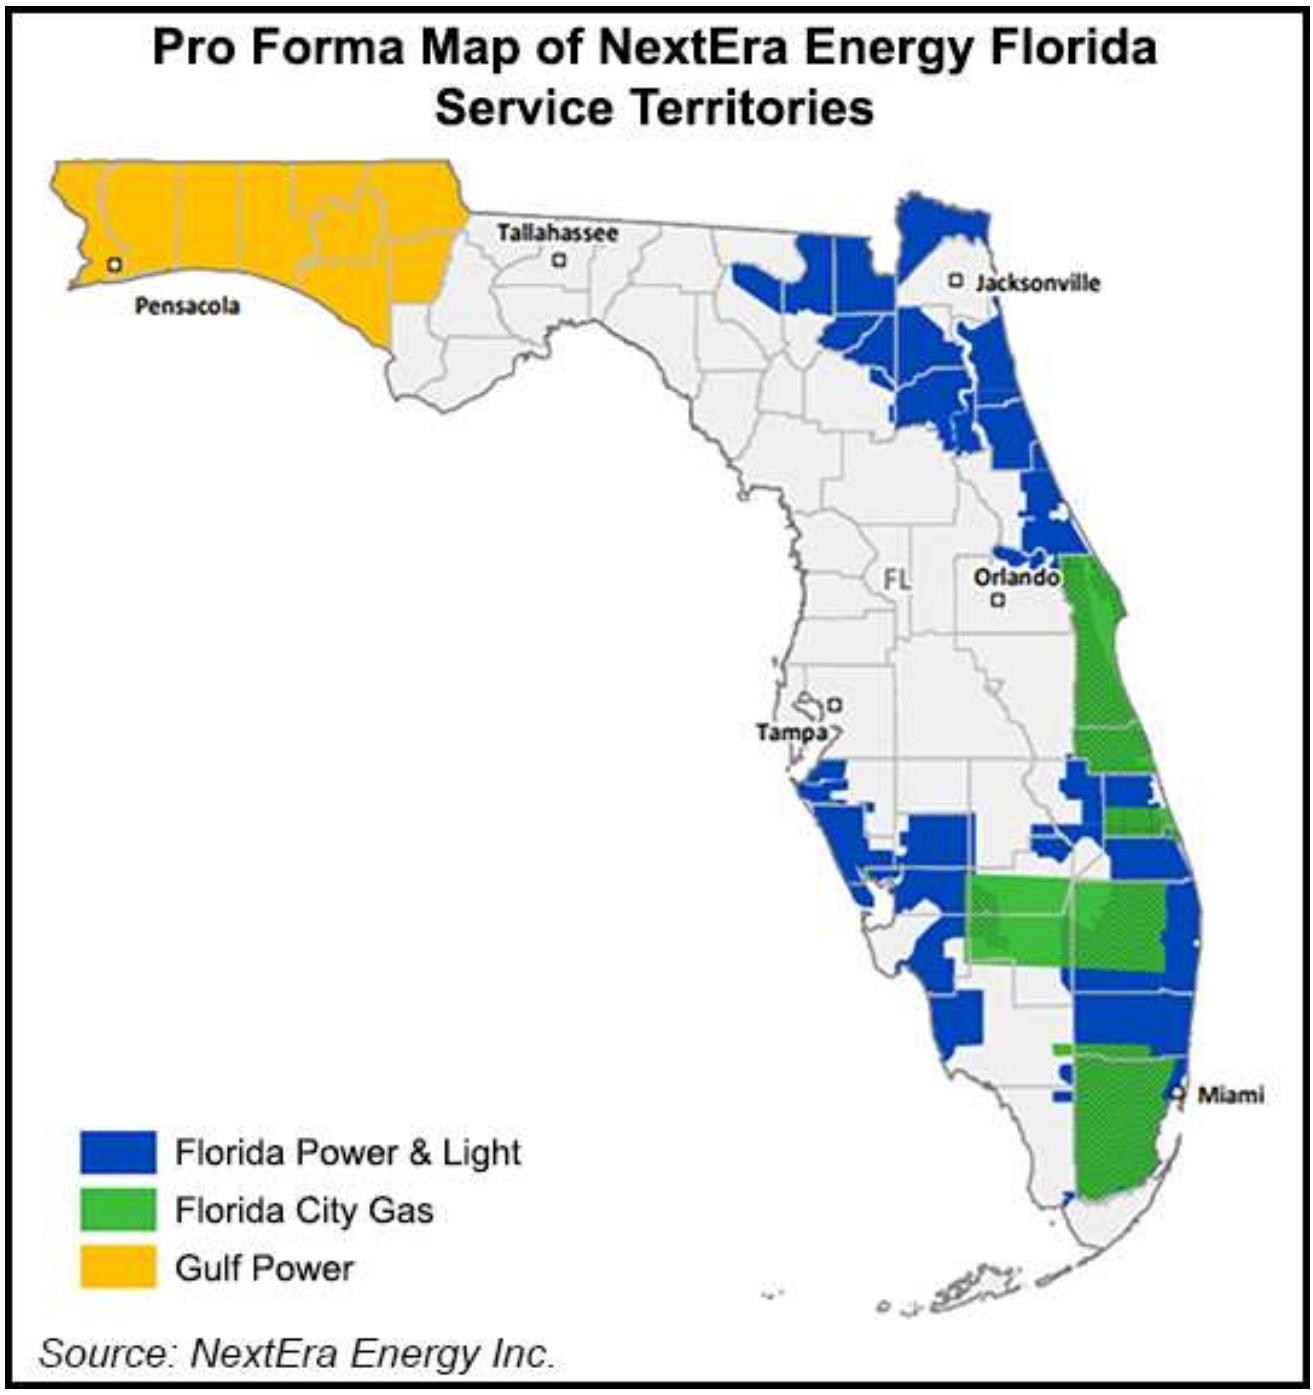
(e) Each affiliate involved in affiliate transactions must maintain all underlying data concerning the affiliate transaction for at least three years after the affiliate transaction is complete. This paragraph does not relieve a regulated affiliate from maintaining records under otherwise applicable record retention requirements.

(4) Cost Allocation Principles.

(a) Utility accounting records must show whether each transaction involves a product or service that is regulated or nonregulated. A utility that identifies these transactions by the use of subaccounts meets the requirements of this paragraph.

(b) Direct costs shall be assigned to each non-tariffed service and product provided by the utility.

(c) Indirect costs shall be distributed to each non-tariffed service and product provided by the utility on a fully allocated cost basis. Except, a utility may distribute indirect costs on an incremental or market basis if the utility can demonstrate that its ratepayers will benefit. If a utility distributes indirect costs on less than a fully allocated basis, the utility must maintain documentation to support doing so.



(d) Each utility must maintain a listing of revenues and expenses for all non-tariffed products and services.

(5) Reporting Requirements. Each utility shall file information concerning its affiliates, affiliate transactions, and nonregulated activities on Form PSC/AFD/101 (3/04) which is incorporated by reference into Rule 25-6.135, F.A.C. Form PSC/AFD/101, entitled “Annual Report of Major Electric Utilities,” may be obtained from the Commission’s Division of Accounting and Finance.

(6) Cost Allocation Manual. Each utility involved in affiliate transactions or in nonregulated activities must maintain a Cost Allocation Manual (CAM). The CAM must be organized and indexed so that the information contained therein can be easily accessed.

Additional information about Florida's investor-owned electric utilities is available from:
FPSC's *Statistics of the Florida Electric Utility Industry*, October 2015
http://www.floridapsc.com/Files/PDF/Publications/Reports/Electricgas/Statistics/2014.pdf

Explanation:

This legislation will ensure that utility companies are complying with both the letter and spirit of the law in Florida that protects Florida's citizens and ratepayers from improper business practices designed to enrich the non-regulated business of utility companies by use of ratepayer funds and efforts to increase market share to stop fair competition that is in the best interest of the consumer.

Regulated utility companies are not permitted to use ratepayer funds to further a company's non-regulated business ventures. The reason for this is that not one cent required to be paid by a utility customer should be used to further the non-regulated business interests of a utility company and its shareholders. Funds for non-regulated business ventures should come from investors, not utility customers.

Regulated utility companies also should not be permitted to offer or engage in non-regulated services under the guise of the regulated utility that is known to be specifically regulated by the Florida Public Service Commission. Without very clear and unambiguous representation, a consumer may be led to believe that non-regulated products or services, such as water heaters or heating and air equipment and related installation, are backed by the added regulation and oversight of the Florida Public Service Commission. This is not speculation – this misrepresentation is made today.

Draft Legislation:

Chapter 366, Florida Statutes, Public Utilities

Section 366.____ is created to read:

Section 366.____ Public utility or electric utility prohibited from engaging in construction contracting services, exceptions, penalty.—

(1) A public utility or electric utility, as defined in s. 366.02, may not engage in construction contracting services, as defined in ch. 489, unless otherwise provided in subsection (7).

(2) No affiliate or utility contractor may use any facility, electronic processing or communication mechanism, public relations or marketing product or service, vehicle, service tool, instrument, employee, or any other public utility or electric utility asset, the cost of which is recoverable in the regulated rate for utility service, to engage in construction contracting services unless the public utility or electric utility is compensated for the use of such asset at cost to the public utility or electric utility.

(3) No affiliate or utility contractor may use or combine any bookkeeping, billing, customer billing, mailing, financing, collections, legal services, or insurance product or service procured or owned by a public utility or electric utility for any activity related to construction contracting.

AMERICAN OVERSIGHT

(4) A public utility or electric utility may not provide any affiliate or utility contractor with bookkeeping, billing, customer billing, mailing, financing, collections, legal services, or insurance product or service related to construction contracting, including service warranty or home warranty products or services under ch. 634 or construction liens under part I, ch. 713.

(5) A public utility or electric utility may not allow any affiliate or utility contractor to use or license any name, fictitious name, trade or service mark, logo, slogan, or branding of such public utility or electric utility to engage in construction contracting services.

(6) A public utility or electric utility may not engage in or assist any affiliate or utility contractor in engaging in construction contracting services in a manner which subsidizes the activities of such public utility, electric utility, affiliate or utility contractor to the extent of changing the rates or charges for the public utility's or electric utility's regulated services above or below the rates or charges that would be in effect if the public utility or electric utility were not engaged in or assisting any affiliate or utility contractor in engaging in such activities.

(7) Any affiliate or utility contractor engaged in construction contracting services shall maintain accounts, bookkeeping and records separate and distinct from the public utility or electric utility.

(8) The provisions of this section shall apply to any affiliate or utility contractor engaged in construction contracting services that is owned, controlled or under common control with a public utility or electric utility providing regulated utility service in this state or any other state.

(9) The provisions of this section shall not be construed to prohibit a public utility or electric utility from providing emergency service, providing any service required by law, providing any service exempt from construction contracting licensure under s. 489.103(5), or providing a program pursuant to an existing tariff, rule or order of the Commission.

A bill to be entitled

An act relating to the availability of marijuana for ~~medical~~adult use; amending s. 381.986, F.S.; redefining the term "medical use" to include the possession, use, or administration of marijuana in a form for smoking; conforming a provision to changes made by the act; revising provisions related to the licensure of and functions of medical marijuana treatment centers (MMTCs); requiring the Department of Health to adopt by rule certain operating standards and procedures; requiring the department to adopt by rule a certain MMTC registration form; specifying registration requirements, including the submission of a specified performance and compliance bond that may be forfeited for failure to comply with certain provisions; requiring an applicant for an MMTC to submit registration forms for certain principals, employees, and contractors listed on the application; prohibiting the department from registering an applicant as an MMTC until such principals, employees, and contractors are registered and issued MMTC employee identification cards; providing for expiration of an MMTC registration; specifying that a registered MMTC must obtain separate operating licenses for the cultivation, processing, dispensing, and transportation of marijuana; specifying application requirements for an MMTC to obtain cultivation licenses and processing licenses; providing for the expiration of and renewal of such

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

licenses; specifying that an MMTC facility must obtain a facility permit before cultivating or processing marijuana; authorizing an MMTC licensed to cultivate or process marijuana to use contractors to assist with the cultivation and with the processing of marijuana under certain conditions; providing for the destruction of marijuana byproducts within a specified timeframe after their production; providing requirements for the cultivation and for the processing of marijuana; removing the requirement that each MMTC produce and make available for purchase at least one low-THC cannabis product; removing tetrahydrocannabinol limits for edibles; requiring a licensed processing MMTC to test marijuana before it is sold or dispensed; providing marijuana packaging requirements; providing application requirements for an MMTC to obtain a retail license; providing for the expiration of and renewal of such licenses; requiring an MMTC to obtain a facility permit before dispensing and before storing marijuana; prohibiting onsite consumption of or administration of marijuana at a dispensary facility; providing requirements for the dispensing of marijuana; deleting a provision prohibiting an MMTC from dispensing or selling specified products; providing application requirements for an MMTC to obtain a transportation license; providing marijuana transportation requirements; providing a process for the issuance and cancellation of vehicle permits; requiring that each permitted

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005240

vehicle be GPS-monitored; specifying that a permitted vehicle is subject to inspection and search without a search warrant by specified persons when transporting marijuana; authorizing an MMTC licensed to transport marijuana and marijuana delivery devices to deliver or contract for the delivery of marijuana to other MMTCs and to qualified patients and caregivers within this state; requiring a person delivering marijuana and a marijuana delivery device to a qualified patient or his or her caregiver to verify the identity of the qualified patient; establishing that a county or municipality may not prohibit deliveries of marijuana to qualified patients and caregivers within the county or municipality; requiring the department to adopt certain rules for the delivery of marijuana; providing for the permitting of cultivation, processing, dispensary, and storage facilities; requiring the department to adopt by rule a facility permit application form; requiring the department to issue or deny a facility permit within a specified timeframe; providing for the expiration of facility permits; requiring the department to inspect a facility for compliance before the renewal of a facility permit; requiring an MMTC to cease applicable operations if a facility's permit expires or is revoked; requiring cultivation facilities and processing facilities to be insured with specified hazard and liability insurance; providing cultivation facility and processing facility requirements; preempting to the state all matters

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005241

regarding the permitting and regulation of cultivation facilities and processing facilities; requiring dispensary facilities and storage facilities to be insured with specified hazard and liability insurance; providing dispensary facility and storage facility requirements; clarifying that a county or a municipality may prohibit a dispensary facility from being located in its jurisdiction, but may not prohibit a licensed retail MMTC or its permitted storage facility from being located in such county's or municipality's jurisdiction if the MMTC is delivering marijuana to qualifying patients; prohibiting the department from issuing a facility permit for a dispensary facility in a county or municipality that adopts a certain ordinance; authorizing a county or municipality to levy a local tax on a dispensary facility; authorizing the department to adopt specified requirements by rule; requiring the department to adopt rules to administer the registration of certain MMTC principals, employees, and contractors by a specified date; requiring an MMTC to apply to the department for the registration of certain persons before hiring or contracting with any such person; requiring the department to adopt by rule a registration form that includes specified information; requiring the department to register persons who meet specified conditions and issue MMTC employee identification cards; requiring a registered person and the MMTC to

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005242

update the department within a specified timeframe if the person's employment status changes; authorizing the department to contract with vendors to issue MMTC employee identification cards; requiring the department to inspect an MMTC and its facilities upon a complaint and to biennially inspect each permitted facility; authorizing the department to conduct additional inspections of a facility; conforming a provision to changes made by the act; establishing that each MMTC licensed by the department before a specified date may continue operations under s. 381.986, F.S. (2018), and any rules adopted thereunder until the department is able to register MMTCs and to issue operational licenses and facility permits under this act; requiring the department to register such licensed MMTC and issue it cultivation, processing, retail, and transportation licenses and the appropriate facility and vehicle permits as soon as practicable; providing for the expiration of such registration, operating licenses, and facility permits; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (l) of subsection (2) of section 212.08, Florida Statutes, is amended to read:

212.08 Sales, rental, use, consumption, distribution, and storage tax; specified exemptions.—The sale at retail, the rental, the use, the consumption, the distribution, and the

Commented [LD1]: New. This will allow medical marijuana to remain tax free while recreational marijuana will be taxed.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005243

storage to be used or consumed in this state of the following are hereby specifically exempt from the tax imposed by this chapter.

(2) EXEMPTIONS; MEDICAL.—

(l) Marijuana and marijuana delivery devices, as defined in s. 381.986, are exempt from the taxes imposed under this chapter when purchased by a qualified patient or caregiver, as defined in s. 381.986.

Commented [LD2]: new.

Section 21. Paragraph (j) of subsection (1) and subsections (8), (9), (10), and (17) of section 381.986, Florida Statutes, are amended to read:

381.986 Medical use of marijuana.—

(1) DEFINITIONS.—As used in this section, the term:

(j) "Medical use" means the acquisition, possession, use, delivery, transfer, or administration of marijuana authorized by a physician certification. The term does not include:

1. Possession, use, or administration of marijuana that was not purchased or acquired from a medical marijuana treatment center.

2. Possession, use, or administration of marijuana in ~~a form for smoking, in~~ the form of commercially produced food items other than edibles~~,~~ or of marijuana seeds ~~or flower, except for flower in a sealed, tamper-proof receptacle for vaping~~.

3. Use or administration of any form or amount of marijuana in a manner that is inconsistent with the qualified physician's directions or physician certification.

4. Transfer of marijuana to a person other than the qualified patient for whom it was authorized or the qualified

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005244

patient's caregiver on behalf of the qualified patient.

5. Use or administration of marijuana in the following locations:

a. On any form of public transportation, except for low-THC cannabis.

b. In any public place, except for low-THC cannabis.

c. In a qualified patient's place of employment, except when permitted by his or her employer.

d. In a state correctional institution, as defined in s. 944.02, or a correctional institution, as defined in s. 944.241.

e. On the grounds of a preschool, primary school, or secondary school, except as provided in s. 1006.062.

f. In a school bus, a vehicle, an aircraft, or a motorboat, except for low-THC cannabis.

For the purposes of this subparagraph, the exceptions for low-THC cannabis do not include the smoking of low-THC cannabis.

(8) MEDICAL MARIJUANA TREATMENT CENTERS.—

(a) ~~The department shall license medical marijuana treatment centers to ensure reasonable statewide accessibility and availability as necessary for qualified patients registered in the medical marijuana use registry and who are issued a physician certification under this section.~~

~~1. As soon as practicable, but no later than July 3, 2017, the department shall license as a medical marijuana treatment center any entity that holds an active, unrestricted license to cultivate, process, transport, and dispense low-THC cannabis, medical cannabis, and cannabis delivery devices, under former s. 381.986, Florida Statutes 2016, before July 1, 2017, and which~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005245

~~meets the requirements of this section. In addition to the authority granted under this section, these entities are authorized to dispense low-THC cannabis, medical cannabis, and cannabis delivery devices ordered pursuant to former s. 381.986, Florida Statutes 2016, which were entered into the compassionate use registry before July 1, 2017, and are authorized to begin dispensing marijuana under this section on July 3, 2017. The department may grant variances from the representations made in such an entity's original application for approval under former s. 381.986, Florida Statutes 2014, pursuant to paragraph (e).~~

~~2. The department shall license as medical marijuana treatment centers 10 applicants that meet the requirements of this section, under the following parameters:~~

~~a. As soon as practicable, but no later than August 1, 2017, the department shall license any applicant whose application was reviewed, evaluated, and scored by the department and which was denied a dispensing organization license by the department under former s. 381.986, Florida Statutes 2014; which had one or more administrative or judicial challenges pending as of January 1, 2017, or had a final ranking within one point of the highest final ranking in its region under former s. 381.986, Florida Statutes 2014; which meets the requirements of this section; and which provides documentation to the department that it has the existing infrastructure and technical and technological ability to begin cultivating marijuana within 30 days after registration as a medical marijuana treatment center.~~

~~b. As soon as practicable, the department shall license one applicant that is a recognized class member of *Pigford v.*~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005246

~~*Glickman*, 185 F.R.D. 82 (D.D.C. 1999), or *In Re Black Farmers Litig.*, 856 F. Supp. 2d 1 (D.D.C. 2011). An applicant licensed under this sub-subparagraph is exempt from the requirement of subparagraph (b)2.~~

~~c. As soon as practicable, but no later than October 3, 2017, the department shall license applicants that meet the requirements of this section in sufficient numbers to result in 10 total licenses issued under this subparagraph, while accounting for the number of licenses issued under sub-subparagraphs a. and b.~~

~~3. For up to two of the licenses issued under subparagraph 2., the department shall give preference to applicants that demonstrate in their applications that they own one or more facilities that are, or were, used for the canning, concentrating, or otherwise processing of citrus fruit or citrus molasses and will use or convert the facility or facilities for the processing of marijuana.~~

~~4. Within 6 months after the registration of 100,000 active qualified patients in the medical marijuana use registry, the department shall license four additional medical marijuana treatment centers that meet the requirements of this section. Thereafter, the department shall license four medical marijuana treatment centers within 6 months after the registration of each additional 100,000 active qualified patients in the medical marijuana use registry that meet the requirements of this section.~~

~~5. Dispensing facilities are subject to the following requirements:~~

~~a. A medical marijuana treatment center may not establish~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005247

~~or operate more than a statewide maximum of 25 dispensing facilities, unless the medical marijuana use registry reaches a total of 100,000 active registered qualified patients. When the medical marijuana use registry reaches 100,000 active registered qualified patients, and then upon each further instance of the total active registered qualified patients increasing by 100,000, the statewide maximum number of dispensing facilities that each licensed medical marijuana treatment center may establish and operate increases by five.~~

~~b. A medical marijuana treatment center may not establish more than the maximum number of dispensing facilities allowed in each of the Northwest, Northeast, Central, Southwest, and Southeast Regions. The department shall determine a medical marijuana treatment center's maximum number of dispensing facilities allowed in each region by calculating the percentage of the total statewide population contained within that region and multiplying that percentage by the medical marijuana treatment center's statewide maximum number of dispensing facilities established under sub-subparagraph a., rounded to the nearest whole number. The department shall ensure that such rounding does not cause a medical marijuana treatment center's total number of statewide dispensing facilities to exceed its statewide maximum. The department shall initially calculate the maximum number of dispensing facilities allowed in each region for each medical marijuana treatment center using county population estimates from the Florida Estimates of Population 2016, as published by the Office of Economic and Demographic Research, and shall perform recalculations following the official release of county population data resulting from each~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005248

~~United States Decennial Census. For the purposes of this subparagraph:~~

~~(I) The Northwest Region consists of Bay, Calhoun, Escambia, Franklin, Gadsden, Gulf, Holmes, Jackson, Jefferson, Leon, Liberty, Madison, Okaloosa, Santa Rosa, Taylor, Wakulla, Walton, and Washington Counties.~~

~~(II) The Northeast Region consists of Alachua, Baker, Bradford, Clay, Columbia, Dixie, Duval, Flagler, Gilchrist, Hamilton, Lafayette, Levy, Marion, Nassau, Putnam, St. Johns, Suwannee, and Union Counties.~~

~~(III) The Central Region consists of Brevard, Citrus, Hardee, Hernando, Indian River, Lake, Orange, Osceola, Pasco, Pinellas, Polk, Seminole, St. Lucie, Sumter, and Volusia Counties.~~

~~(IV) The Southwest Region consists of Charlotte, Collier, DeSoto, Glades, Hendry, Highlands, Hillsborough, Lee, Manatee, Okeechobee, and Sarasota Counties.~~

~~(V) The Southeast Region consists of Broward, Miami-Dade, Martin, Monroe, and Palm Beach Counties.~~

~~c. If a medical marijuana treatment center establishes a number of dispensing facilities within a region that is less than the number allowed for that region under sub-subparagraph b., the medical marijuana treatment center may sell one or more of its unused dispensing facility slots to other licensed medical marijuana treatment centers. For each dispensing facility slot that a medical marijuana treatment center sells, that medical marijuana treatment center's statewide maximum number of dispensing facilities, as determined under sub-subparagraph a., is reduced by one. The statewide maximum number~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005249

~~of dispensing facilities for a medical marijuana treatment center that purchases an unused dispensing facility slot is increased by one per slot purchased. Additionally, the sale of a dispensing facility slot shall reduce the seller's regional maximum and increase the purchaser's regional maximum number of dispensing facilities, as determined in sub-subparagraph b., by one for that region. For any slot purchased under this sub-subparagraph, the regional restriction applied to that slot's location under sub-subparagraph b. before the purchase shall remain in effect following the purchase. A medical marijuana treatment center that sells or purchases a dispensing facility slot must notify the department within 3 days of sale.~~

~~d. This subparagraph shall expire on April 1, 2020.~~

~~If this subparagraph or its application to any person or circumstance is held invalid, the invalidity does not affect other provisions or applications of this act which can be given effect without the invalid provision or application, and to this end, the provisions of this subparagraph are severable.~~

~~(b) An applicant for licensure as a medical marijuana treatment center shall apply to the department on a form prescribed by the department and adopted in rule. The department shall adopt rules pursuant to ss. 120.536(1) and 120.54 establishing a procedure for the issuance and biennial renewal of licenses, including initial application and biennial renewal fees sufficient to cover the costs of implementing and administering this section, and establishing supplemental licensure fees for payment beginning May 1, 2018, sufficient to cover the costs of administering ss. 381.989 and 1004.4351. The~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005250

~~department shall identify applicants with strong diversity plans reflecting this state's commitment to diversity and implement training programs and other educational programs to enable minority persons and minority business enterprises, as defined in s. 288.703, and veteran business enterprises, as defined in s. 295.187, to compete for medical marijuana treatment center licensure and contracts. Subject to the requirements in subparagraphs (a)2.-4., the department shall issue a license to an applicant if the applicant meets the requirements of this section and pays the initial application fee. The department shall renew the licensure of a medical marijuana treatment center biennially if the licensee meets the requirements of this section and pays the biennial renewal fee. An individual may not be an applicant, owner, officer, board member, or manager on more than one application for licensure as a medical marijuana treatment center. An individual or entity may not be awarded more than one license as a medical marijuana treatment center. An applicant for licensure as a medical marijuana treatment center must demonstrate:~~

~~1. That, for the 5 consecutive years before submitting the application, the applicant has been registered to do business in the state.~~

~~2. Possession of a valid certificate of registration issued by the Department of Agriculture and Consumer Services pursuant to s. 581.131.~~

~~3. The technical and technological ability to cultivate and produce marijuana, including, but not limited to, low-THC cannabis.~~

~~4. The ability to secure the premises, resources, and~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005251

~~personnel necessary to operate as a medical marijuana treatment center.~~

~~5. The ability to maintain accountability of all raw materials, finished products, and any byproducts to prevent diversion or unlawful access to or possession of these substances.~~

~~6. An infrastructure reasonably located to dispense marijuana to registered qualified patients statewide or regionally as determined by the department.~~

~~7. The financial ability to maintain operations for the duration of the 2-year approval cycle, including the provision of certified financial statements to the department.~~

~~a. Upon approval, the applicant must post a $5 million performance bond issued by an authorized surety insurance company rated in one of the three highest rating categories by a nationally recognized rating service. However, a medical marijuana treatment center serving at least 1,000 qualified patients is only required to maintain a $2 million performance bond.~~

~~b. In lieu of the performance bond required under sub-subparagraph a., the applicant may provide an irrevocable letter of credit payable to the department or provide cash to the department. If provided with cash under this sub-subparagraph, the department shall deposit the cash in the Grants and Donations Trust Fund within the Department of Health, subject to the same conditions as the bond regarding requirements for the applicant to forfeit ownership of the funds. If the funds deposited under this sub-subparagraph generate interest, the amount of that interest shall be used by the department for the~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005252

~~administration of this section.~~

~~8. That all owners, officers, board members, and managers have passed a background screening pursuant to subsection (9).~~

~~9. The employment of a medical director to supervise the activities of the medical marijuana treatment center.~~

~~10. A diversity plan that promotes and ensures the involvement of minority persons and minority business enterprises, as defined in s. 288.703, or veteran business enterprises, as defined in s. 295.187, in ownership, management, and employment. An applicant for licensure renewal must show the effectiveness of the diversity plan by including the following with his or her application for renewal:~~

~~a. Representation of minority persons and veterans in the medical marijuana treatment center's workforce;~~

~~b. Efforts to recruit minority persons and veterans for employment; and~~

~~c. A record of contracts for services with minority business enterprises and veteran business enterprises.~~

~~(c) A medical marijuana treatment center may not make a wholesale purchase of marijuana from, or a distribution of marijuana to, another medical marijuana treatment center, unless the medical marijuana treatment center seeking to make a wholesale purchase of marijuana submits proof of harvest failure to the department.~~

~~(d)~~ *Department responsibilities.*—The department shall:

1. Adopt by rule:

a. Operating standards for the cultivation, processing, packaging, and labeling of marijuana;

b. Standards for the sale of marijuana; and

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005253

c. Procedures and requirements for:

(I) The registration and registration renewal of medical marijuana treatment centers (MMTCs);

(II) The issuance and renewal of cultivation, processing, retail, and transportation operating licenses;

(III) The issuance and renewal of cultivation, processing, dispensary, and storage facility permits and of vehicle permits;

(IV) The registration of all principals, employees, and contractors of an MMTC who will participate in the operations of the MMTC; and

(V) The issuance of MMTC employee identification cards to registered principals, employees, and contractors of MMTCs.

2. Establish, maintain, and control a computer software tracking system that traces marijuana from seed to sale and allows real-time, 24-hour access by the department to data from all MMTCs ~~medical marijuana treatment centers~~ and marijuana testing laboratories. The tracking system must allow for integration of other seed-to-sale systems and, at a minimum, include notification of when marijuana seeds are planted, when marijuana plants are harvested and destroyed, and when marijuana is transported, sold, stolen, diverted, or lost. Each MMTC must ~~medical marijuana treatment center shall~~ use the seed-to-sale tracking system established by the department or integrate its own seed-to-sale tracking system with the seed-to-sale tracking system established by the department. Each MMTC ~~medical marijuana treatment center~~ may use its own seed-to-sale system until the department establishes a seed-to-sale tracking system. The department may contract with a vendor to establish the seed-to-sale tracking system. The vendor selected by the department

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005254

may not have a contractual relationship with the department to perform any services pursuant to this section other than the seed-to-sale tracking system. The vendor may not have a direct or indirect financial interest in an MMTC ~~a medical marijuana treatment center~~ or a marijuana testing laboratory.

(b) *Registration.*—

1. The department shall adopt by rule an MMTC registration form that must, at a minimum, require an applicant to provide:

a. Its full legal name;

b. The physical address of each location where it will apply for a facility permit to cultivate, process, dispense, or store marijuana;

c. The name, address, and date of birth of its principals;

d. The name, address, and date of birth of its current employees and contractors who will participate in the operations of the MMTC; and

e. The operation or operations in which it intends to engage, which may include one or more of the following:

(I) Cultivation.

(II) Processing.

(III) Retail.

(IV) Transportation.

2. To be registered as an MMTC, an applicant must submit to the department:

a. The applicant's completed registration form;

b. Personnel registration forms, as described in subsection (9), for all principals, employees, and contractors listed on the applicant's registration form who will participate in the operations of the MMTC. The department may not register the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005255

applicant as an MMTC until all principals, employees, and contractors listed on the applicant's registration form have registered with the department and are issued MMTC employee identification cards;

c. Proof that all principals listed on the applicant's registration form who will not participate in the operations of the MMTC have passed a level 2 background screening pursuant to chapter 435 within the previous year;

d. Proof that the MMTC has the capability to comply with seed-to-sale tracking system requirements;

e. Proof of the applicant's financial ability to maintain operations for the duration of the registration; and

f. A $1 million performance and compliance bond, to be forfeited if the MMTC fails to comply with:

(I) Registration requirements in this subsection during the registration period; or

(II) Material requirements of this section which are applicable to the functions the applicant intends to perform, as indicated on the registration form.

3. A registration expires 2 years after the date issued.

4. An MMTC must obtain an operating license for each operation it will perform. Registration as an MMTC is not sufficient to cultivate, process, dispense, or transport marijuana.

(c) *Cultivation licenses and processing licenses.*—

1. A registered MMTC may apply for a cultivation license, a processing license, or both. When applying, the MMTC must provide the department, at a minimum, all of the following:

a. A completed cultivation license or processing license

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005256

application form.

b. The physical address of each location where marijuana will be cultivated, processed, or stored.

c. Proof of an established infrastructure or the ability to establish an infrastructure in a reasonable amount of time which is designed for cultivation, processing, testing, packaging, and labeling marijuana and to maintain the infrastructure's security and prevent the theft or diversion of any marijuana, as applicable to the license or licenses requested.

d. Proof that the applicant possesses the technical and technological ability to cultivate and test marijuana or process and test marijuana, as applicable to the license or licenses requested.

e. Proof of operating procedures designed to secure and maintain accountability for all marijuana and marijuana-related byproducts that come into the applicant's possession, and to comply with the required seed-to-sale tracking system.

2. Cultivation licenses and processing licenses expire 2 years after the date issued. In order to renew a license, the licensee must meet all of the requirements for initial licensure; must provide all of the documentation required under subparagraph 1.; and must not have any uncorrected substantial violations of the standards adopted by department rule for the cultivation, processing, testing, packaging, and labeling of marijuana.

3. Before beginning cultivation or processing at any location, the licensee must obtain a facility permit from the department for that location pursuant to paragraph (g).

4. Licensees under this subsection may use contractors to

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005257

assist with the cultivation or processing of marijuana, as applicable, but the licensee is ultimately responsible for all of the operations performed by each contractor relating to the cultivation or processing of marijuana and is responsible for the physical possession of all marijuana. All work done by a contractor must be performed at a location with a facility permit issued by the department. All principals and employees of contractors who participate in the operations of the licensee must be registered with the department and issued MMTC employee identification cards.

5. All marijuana byproducts that cannot be processed or that cannot be reprocessed must be destroyed by the cultivation licensee or processing licensee or its contractor within 30 days after the production of the byproducts.

6. Licensees under this subsection may wholesale marijuana only to other registered MMTCs.

7. Transportation or delivery of marijuana outside of the property owned by a licensee under this subsection may be performed only by an MMTC that holds a transportation license issued pursuant to paragraph (f).

~~(e) A licensed medical marijuana treatment center shall cultivate, process, transport, and dispense marijuana for medical use. A licensed medical marijuana treatment center may not contract for services directly related to the cultivation, processing, and dispensing of marijuana or marijuana delivery devices, except that a medical marijuana treatment center licensed pursuant to subparagraph (a)1. may contract with a single entity for the cultivation, processing, transporting, and dispensing of marijuana and marijuana delivery devices. A~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005258

~~licensed medical marijuana treatment center must, at all times, maintain compliance with the criteria demonstrated and representations made in the initial application and the criteria established in this subsection. Upon request, the department may grant a medical marijuana treatment center a variance from the representations made in the initial application. Consideration of such a request shall be based upon the individual facts and circumstances surrounding the request. A variance may not be granted unless the requesting medical marijuana treatment center can demonstrate to the department that it has a proposed alternative to the specific representation made in its application which fulfills the same or a similar purpose as the specific representation in a way that the department can reasonably determine will not be a lower standard than the specific representation in the application. A variance may not be granted from the requirements in subparagraph 2. and subparagraphs (b)1. and 2.~~

~~1. A licensed medical marijuana treatment center may transfer ownership to an individual or entity who meets the requirements of this section. A publicly traded corporation or publicly traded company that meets the requirements of this section is not precluded from ownership of a medical marijuana treatment center. To accommodate a change in ownership:~~

~~a. The licensed medical marijuana treatment center shall notify the department in writing at least 60 days before the anticipated date of the change of ownership.~~

~~b. The individual or entity applying for initial licensure due to a change of ownership must submit an application that must be received by the department at least 60 days before the~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005259

~~date of change of ownership.~~

~~c. Upon receipt of an application for a license, the department shall examine the application and, within 30 days after receipt, notify the applicant in writing of any apparent errors or omissions and request any additional information required.~~

~~d. Requested information omitted from an application for licensure must be filed with the department within 21 days after the department's request for omitted information or the application shall be deemed incomplete and shall be withdrawn from further consideration and the fees shall be forfeited.~~

~~Within 30 days after the receipt of a complete application, the department shall approve or deny the application.~~

~~2. A medical marijuana treatment center, and any individual or entity who directly or indirectly owns, controls, or holds with power to vote 5 percent or more of the voting shares of a medical marijuana treatment center, may not acquire direct or indirect ownership or control of any voting shares or other form of ownership of any other medical marijuana treatment center.~~

~~3. A medical marijuana treatment center may not enter into any form of profit-sharing arrangement with the property owner or lessor of any of its facilities where cultivation, processing, storing, or dispensing of marijuana and marijuana delivery devices occurs.~~

~~4. All employees of a medical marijuana treatment center must be 21 years of age or older and have passed a background screening pursuant to subsection (9).~~

~~5. Each medical marijuana treatment center must adopt and~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005260

~~enforce policies and procedures to ensure employees and volunteers receive training on the legal requirements to dispense marijuana to qualified patients.~~

8.~~6.~~ When growing marijuana, a licensed cultivation MMTC ~~medical marijuana treatment center~~:

a. May use pesticides determined by the department, after consultation with the Department of Agriculture and Consumer Services, to be safely applied to plants intended for human consumption, but may not use pesticides designated as restricted-use pesticides pursuant to s. 487.042.

b. Must grow marijuana within an enclosed permitted cultivation facility ~~structure~~ and in a room separate from any other plant.

c. Must inspect seeds and growing plants for plant pests that endanger or threaten the horticultural and agricultural interests of the state in accordance with chapter 581 and any rules adopted thereunder.

d. Must perform fumigation or treatment of plants, or remove and destroy infested or infected plants, in accordance with chapter 581 and any rules adopted thereunder.

~~7. Each medical marijuana treatment center must produce and make available for purchase at least one low-THC cannabis product.~~

9.~~8.~~ An MMTC ~~A medical marijuana treatment center~~ that produces edibles must hold a permit to operate as a food establishment pursuant to chapter 500, the Florida Food Safety Act, and must comply with all the requirements for food establishments pursuant to chapter 500 and any rules adopted thereunder. ~~Edibles may not contain more than 200 milligrams of~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005261

~~tetrahydrocannabinol, and a single serving portion of an edible may not exceed 10 milligrams of tetrahydrocannabinol.~~ Edibles may have a potency variance of no greater than 15 percent. Edibles may not be attractive to children; be manufactured in the shape of humans, cartoons, or animals; be manufactured in a form that bears any reasonable resemblance to products available for consumption as commercially available candy; or contain any color additives. To discourage consumption of edibles by children, the department shall determine by rule any shapes, forms, and ingredients allowed and prohibited for edibles. MMTCs ~~Medical marijuana treatment centers~~ may not begin processing or dispensing edibles until after the effective date of the rule. The department shall also adopt sanitation rules providing the standards and requirements for the storage, display, or dispensing of edibles.

~~9. Within 12 months after licensure, a medical marijuana treatment center must demonstrate to the department that all of its processing facilities have passed a Food Safety Good Manufacturing Practices, such as Global Food Safety Initiative or equivalent, inspection by a nationally accredited certifying body. A medical marijuana treatment center must immediately stop processing at any facility which fails to pass this inspection until it demonstrates to the department that such facility has met this requirement.~~

10. When processing marijuana, a licensed processing MMTC ~~medical marijuana treatment center~~ must:

a. Process the marijuana within an enclosed permitted processing facility ~~structure~~ and in a room separate from other plants or products.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005262

b. Comply with department rules when processing marijuana with hydrocarbon solvents or other solvents or gases exhibiting potential toxicity to humans. The department shall determine by rule the requirements for MMTCs ~~medical marijuana treatment centers~~ to use such solvents or gases exhibiting potential toxicity to humans.

c. Comply with federal and state laws and regulations and department rules for solid and liquid wastes. The department shall determine by rule procedures for the storage, handling, transportation, management, and disposal of solid and liquid waste generated during marijuana production and processing. The Department of Environmental Protection shall assist the department in developing such rules.

d. Test the processed marijuana using a medical marijuana testing laboratory before it is sold or dispensed. Results must be verified and signed by two MMTC ~~medical marijuana treatment center~~ employees. Before dispensing, the MMTC ~~medical marijuana treatment center~~ must determine that the test results indicate that low-THC cannabis meets the definition of low-THC cannabis, the concentration of tetrahydrocannabinol meets the potency requirements of this section, the labeling of the concentration of tetrahydrocannabinol and cannabidiol is accurate, and all marijuana is safe for human consumption and free from contaminants that are unsafe for human consumption. The department shall determine by rule which contaminants must be tested for and the maximum levels of each contaminant which are safe for human consumption. The Department of Agriculture and Consumer Services shall assist the department in developing the testing requirements for contaminants that are unsafe for human

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005263

consumption in edibles. The department shall also determine by rule the procedures for the treatment of marijuana that fails to meet the testing requirements of this section, s. 381.988, or department rule. The department may select a random sample from edibles available for purchase in a dispensing facility which shall be tested by the department to determine that the edible meets the potency requirements of this section, is safe for human consumption, and the labeling of the tetrahydrocannabinol and cannabidiol concentration is accurate. An MMTC ~~A medical marijuana treatment center~~ may not require payment from the department for the sample. An MMTC ~~A medical marijuana treatment center~~ must recall edibles, including all edibles made from the same batch of marijuana, which fail to meet the potency requirements of this section, which are unsafe for human consumption, or for which the labeling of the tetrahydrocannabinol and cannabidiol concentration is inaccurate. The MMTC ~~medical marijuana treatment center~~ must retain records of all testing and samples of each homogenous batch of marijuana for at least 9 months. The MMTC ~~medical marijuana treatment center~~ must contract with a marijuana testing laboratory to perform audits on the MMTC's ~~medical marijuana treatment center's~~ standard operating procedures, testing records, and samples and provide the results to the department to confirm that the marijuana or low-THC cannabis meets the requirements of this section and that the marijuana or low-THC cannabis is safe for human consumption. An MMTC ~~A medical marijuana treatment center~~ shall reserve two processed samples from each batch and retain such samples for at least 9 months for the purpose of such audits. An MMTC ~~A medical~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005264

~~marijuana treatment center~~ may use a laboratory that has not been certified by the department under s. 381.988 until such time as at least one laboratory holds the required certification~~, but in no event later than July 1, 2018~~.

e. Package the marijuana in compliance with the United States Poison Prevention Packaging Act of 1970, 15 U.S.C. ss. 1471 et seq.

f. Package the marijuana in a receptacle that has a firmly affixed and legible label stating the following information:

(I) The marijuana or low-THC cannabis meets the requirements of sub-subparagraph d.

(II) The name of the MMTC ~~medical marijuana treatment center~~ from which the marijuana originates.

(III) The batch number and harvest number from which the marijuana originates and the date sold or dispensed.

~~(IV) The name of the physician who issued the physician certification.~~

~~(V) The name of the patient.~~

(IV) ~~(VI)~~ The product name, if applicable, and dosage form, including concentration of tetrahydrocannabinol and cannabidiol. The product name may not contain wording commonly associated with products marketed by or to children.

(V) ~~(VII)~~ The recommended dose.

(VI) ~~(VIII)~~ A warning that it is illegal to transfer medical marijuana to another person.

(VII) ~~(IX)~~ A marijuana universal symbol developed by the department.

11. The MMTC that packages the marijuana ~~medical marijuana treatment center~~ shall include in each package a patient package

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005265

insert with information on the specific product dispensed related to:

a. Clinical pharmacology.

b. Indications and use.

c. Dosage and administration.

d. Dosage forms and strengths.

e. Contraindications.

f. Warnings and precautions.

g. Adverse reactions.

12. Each edible shall be individually sealed in plain, opaque wrapping marked only with the marijuana universal symbol. Where practical, each edible shall be marked with the marijuana universal symbol. In addition to the packaging and labeling requirements in subparagraphs 10. and 11., edible receptacles must be plain, opaque, and white without depictions of the product or images other than the MMTC's ~~medical marijuana treatment center's~~ department-approved logo and the marijuana universal symbol. The receptacle must also include a list all of the edible's ingredients, storage instructions, an expiration date, a legible and prominent warning to keep away from children and pets, and a warning that the edible has not been produced or inspected pursuant to federal food safety laws.

(d) *Retail licenses.*—

1. A registered MMTC may apply for a retail license. When applying, the MMTC must provide the department, at a minimum, all of the following:

a. A completed retail license application form.

b. A statement by the applicant indicating whether the applicant intends to dispense by delivery. A retail licensee may

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005266

not deliver marijuana without also obtaining a transportation license pursuant to paragraph (f).

c. The physical address of each location where marijuana will be dispensed or stored.

d. Identifying information for all other current or previous retail licenses held by the applicant or any of the applicant's principals.

e. Proof of operating procedures designed to secure and maintain accountability for all marijuana that the applicant receives and possesses; to ensure that the allowed amount of marijuana and the specified type of marijuana is correctly dispensed to a qualified patient or his or her caregiver pursuant to a physician certification; and to monitor the medical marijuana patient registry and electronically update the registry with dispensing information.

2. A retail license expires 2 years after the date it is issued. The retail licensee must apply for a renewed license before the expiration date. In order to renew a license, a retail licensee must meet all of the requirements for initial licensure; must provide all of the documents required under paragraph (a); and must not have any outstanding substantial violations of the applicable standards adopted by department rule.

3. Before beginning to dispense or store marijuana, the licensee must obtain a facility permit from the department for each location where marijuana will be dispensed or stored. If a facility's permit expires or is suspended or revoked, the MMTC must cease all applicable operations at that facility until the department inspects the facility and renews or reinstates the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005267

facility's permit.

4. A dispensary facility may not repackage or modify marijuana that has already been packaged for dispensary sale by a cultivation licensee or processing licensee, unless the repackaging is of unprocessed marijuana and is done in accordance with instructions from the cultivator and such repackaging is documented in the required seed-to-sale tracking system.

5. A retail licensee may contract with an MMTC that has a transportation license to transport marijuana between properties owned by the retail licensee, to deliver the marijuana ~~to the residence of a qualified patient~~, and to pick up returns of marijuana.

6. Onsite consumption or administration of marijuana at a dispensary facility is prohibited.

7.~~13.~~ When dispensing marijuana or a marijuana delivery device, a licensed retail MMTC ~~medical marijuana treatment center~~:

a. May dispense any active, valid order for low-THC cannabis, medical cannabis and cannabis delivery devices issued pursuant to former s. 381.986, Florida Statutes 2016, which was entered into the medical marijuana use registry before July 1, 2017.

b. May not dispense more than a 70-day supply of marijuana ~~to a qualified patient or caregiver~~.

c. Must have the MMTC's ~~medical marijuana treatment center's~~ employee who dispenses the marijuana or a marijuana delivery device enter into the medical marijuana use registry his or her name or unique employee identifier.

Formatted:

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005268

d. Unless dispensing pursuant to s. 381.990, ~~M~~must verify that the qualified patient and the caregiver, if applicable, each have an active registration in the medical marijuana use registry and an active and valid medical marijuana use registry identification card, the amount and type of marijuana dispensed matches the physician certification in the medical marijuana use registry for that qualified patient, and the physician certification has not already been filled.

e. Unless dispensing pursuant to s. 381.990, ~~M~~must label the marijuana or the marijuana delivery device with the name of the physician who issued the physician certification and the name of the patient for whom the certification was issued before it is dispensed.

f.~~e.~~ May not dispense marijuana to a qualified patient who is younger than 18 years of age. If the qualified patient is younger than 18 years of age, marijuana may only be dispensed to the qualified patient's caregiver.

g. May sell marijuana to an adult 21 years of age or older pursuant to s. 381.990. When selling marijuana pursuant to s. 381.990, the employee selling the marijuana must determine that the appearance of the buyer is such that a prudent person would believe the buyer to be 21 years of age or older or must carefully check the buyer's driver license, identification card issued by this state or another state of the united states, passport, or United States Armed Services identification card to determine the buyer's age. Prior to selling marijuana pursuant to this sub-subparagraph, an MMTC must be authorized to make such sales by the Department of Business and Professional Regulation. In order to obtain such authorization an MMTC must

Formatted:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005269

demonstrate: XXXXXXX.

hg.~~f.~~ May not dispense or sell any ~~other type of cannabis,~~ alcohol~~,~~ or illicit drug-related product~~, including pipes, bongs, or wrapping papers, other than a marijuana delivery device required for the medical use of marijuana and which is specified in a physician certification~~.

ih.~~g.~~ Must, upon dispensing the marijuana or marijuana delivery device to a qualified patient or caregiver, record in the registry the date, time, quantity, and form of marijuana dispensed; the type of marijuana delivery device dispensed; and the name and medical marijuana use registry identification number of the qualified patient or caregiver to whom the marijuana delivery device was dispensed.

ji.~~h.~~ Must ensure that patient records are not visible to anyone other than the qualified patient, his or her caregiver, and authorized MMTC ~~medical marijuana treatment center~~ employees.

(e)~~(f)~~ *Security.*—To ensure the safety and security of premises where the cultivation, processing, storing, or dispensing of marijuana occurs, and to maintain adequate controls against the diversion, theft, and loss of marijuana or marijuana delivery devices, an MMTC ~~a medical marijuana treatment center~~ shall:

1.a. Maintain a fully operational security alarm system that secures all entry points and perimeter windows and is equipped with motion detectors; pressure switches; and duress, panic, and hold-up alarms; and

b. Maintain a video surveillance system that records continuously 24 hours a day and meets the following criteria:

Commented [LD3]: I'm still working on this part. I am currently unsure of what an MMTC must be required to show to the DBPR to obtain an authorization. If the senator has any specifics he would like included here, please let me know!

(I) Cameras are fixed in a place that allows for the clear identification of persons and activities in controlled areas of the premises. Controlled areas include grow rooms, processing rooms, storage rooms, disposal rooms or areas, and point-of-sale rooms.

(II) Cameras are fixed in entrances and exits to the premises, which shall record from both indoor and outdoor, or ingress and egress, vantage points.

(III) Recorded images must clearly and accurately display the time and date.

(IV) Retain video surveillance recordings for at least 45 days or longer upon the request of a law enforcement agency.

2. Ensure that the MMTC's ~~medical marijuana treatment center's~~ outdoor premises have sufficient lighting from dusk until dawn.

3. Ensure that the indoor premises where dispensing occurs includes a waiting area with sufficient space and seating to accommodate qualified patients and caregivers and at least one private consultation area that is isolated from the waiting area and area where dispensing occurs. An MMTC ~~A medical marijuana treatment center~~ may not display products or dispense marijuana or marijuana delivery devices in the waiting area.

4. Not dispense from its premises marijuana or a marijuana delivery device between the hours of 9 p.m. and 7 a.m., but may perform all other operations and deliver marijuana to qualified patients 24 hours a day.

5. Store marijuana in a secured, locked room or a vault.

6. Require at least two of its employees, or two employees of a security agency with whom it contracts, to be on the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005271

premises at all times where cultivation, processing, or storing of marijuana occurs.

7. Require each employee or contractor to wear a photo identification badge at all times while on the premises.

8. Require each visitor to wear a visitor pass at all times while on the premises.

9. Implement an alcohol and drug-free workplace policy.

10. Report to local law enforcement within 24 hours after the MMTC ~~medical marijuana treatment center~~ is notified or becomes aware of the theft, diversion, or loss of marijuana.

(f) *Transportation licenses; vehicle permits.*—

1. A registered MMTC may apply for a transportation license. When applying, the MMTC must provide the department, at a minimum, all of the following:

a. The physical address of the MMTC's place of business.

b. Proof of a documentation system in accordance with the required seed-to-sale tracking system, including transportation manifests, for transporting marijuana between licensed facilities and to qualified patients.

c. Proof of health and sanitation standards for the transportation of marijuana.

d. Proof that all marijuana transported between licensed facilities will be transported in tamper-evident shipping containers.

2. Marijuana may not be transported on the property of an airport, a seaport, a spaceport, or any property of the Federal Government.

3. A transportation licensee may transport marijuana and marijuana delivery devices only in a vehicle that is owned or

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005272

leased by the licensee or a contractor of the licensee and for which a valid vehicle permit has been issued by the department.

4. A vehicle permit may be obtained by an MMTC holding a transportation license upon submission of an application. The MMTC must designate as the driver for each permitted vehicle an employee or contracted employee who is registered with the department and who is authorized to possess marijuana when not on the property of the MMTC. Such designation must be displayed in the vehicle at all times. Each permitted vehicle must be GPS-monitored. A vehicle permit remains valid and does not expire unless the MMTC or its contractor disposes of the permitted vehicle or the MMTC's registration or transportation license is transferred, canceled, not renewed, or revoked by the department. The department shall cancel a vehicle permit upon the request of the MMTC or its contractor.

5. When transporting marijuana, a permitted vehicle is subject to inspection and search without a search warrant by authorized employees of the department, sheriffs, deputy sheriffs, police officers, or other law enforcement officers to determine that the MMTC is operating in compliance with this section.

6. An MMTC with a transportation license may deliver, or contract for the delivery of, marijuana and marijuana delivery devices to other MMTCs, ~~and~~ to qualified patients and caregivers within this state, and to adults over the age of 21 within this state. When delivering to a qualified patient or caregiver, an MMTC or its contractor must verify the identity of the qualified patient upon placement of the delivery order and again upon delivery. When delivering marijuana to an adult age 21 or older,

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005273

the an MMTC or its contractor must verify the age of the buyer upon placement of the order and again upon delivery. In order to verify the age of the buyer, the MMTC must determine that the appearance of the buyer is such that a prudent person would believe the buyer to be 21 years of age or older or must carefully check the buyer's driver license, identification card issued by this state or another state of the united states, passport, or United States Armed Services identification card to determine the buyer's age. Deliveries may only be made to the same qualified patient who placed the order or his or her caregiver. A county or municipality may not prohibit deliveries of marijuana and marijuana delivery devices to qualified patients within the county or municipality. The department shall adopt rules specific to the delivery of marijuana ~~to qualified patients and caregivers~~. Such rules must include:

a. Procedures for verifying the age and identity of the person submitting and receiving a delivery, as appropriate, including required training for delivery personnel; and

b. A maximum dispensary value for all marijuana and currency that may be in the possession of a registered MMTC employee or contractor while he or she makes a delivery. The value established by rule may not be less than $5,000.

7. Licensees under this subsection may use contractors to assist with the transportation of marijuana, but the licensee is ultimately responsible for all of the actions and operations of each contractor relating to the transportation of marijuana and must know the location of all marijuana at all times. All principals and employees of contractors contracted by a licensee under this subsection who will participate in the operations of

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005274

the licensee must be registered with the department and issued MMTC employee identification cards.

(g) *Facility permits.*—

1. Before cultivating, processing, dispensing, or storing marijuana at any location, an MMTC must apply to the department for the applicable facility permit for that facility. The department must adopt by rule an application form. Upon receiving a request for a permit from a licensee, the department shall inspect the facility for compliance with this section and rules adopted hereunder, and, upon a determination of compliance, shall issue a permit to the facility. The department must issue or deny the facility permit within 30 days after receiving the request for a permit.

2. A facility permit expires 2 years after the date it is issued. Each facility must be inspected by the department for compliance with this section and rules adopted hereunder before the facility's permit is renewed.

3. If a facility permit expires or is suspended or revoked, the MMTC must cease all applicable operations at that facility until the department inspects the facility and renews or reinstates the facility's permit.

4. Cultivation facilities and processing facilities must be:

a. Insured with at least $1 million of hazard and liability insurance per location; and

b. Secure, closed to the public, and unless an ordinance allows the facility to be located within 1,000 feet, be located at least 1,000 feet away from any existing public or private elementary or secondary school, a child care facility as defined

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005275

in s. 402.302, or a licensed service provider offering substance abuse services.

5. All matters regarding the permitting and regulation of cultivation facilities and processing facilities, including the location of such facilities, are preempted to the state.

6. Dispensary facilities and storage facilities must be:

a. Insured with at least $500,000 of hazard and liability insurance for each facility where marijuana is dispensed or stored; and

b. Located at least 1,000 feet away from any existing public or private elementary or secondary school, child care facility as defined in s. 402.302, or licensed service provider offering substance abuse services.

7. The governing body of a county or municipality may, by ordinance, prohibit or limit the number of dispensary facilities ~~from being~~ located within its jurisdiction but may not prohibit an MMTC with a retail license or its permitted storage facility from being located within its jurisdiction if the licensee is delivering or contracting to deliver marijuana ~~to qualifying patients~~ within the jurisdiction. The department may not issue a facility permit for a dispensary facility in a county or municipality where the board of county commissioners of that county or the city council or other legislative body of that municipality has adopted such an ordinance. A county or municipality may levy a local business tax on a dispensary facility. An ordinance adopted by a municipality or county pursuant to this paragraph may not:

a. Provide exclusive access to one or several individuals or entities to operate dispensary facilities within the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005276

jurisdiction.

b. Prohibit specific individuals or entities from operating a dispensary facility within the jurisdiction if the ordinance allows dispensary facilities to operate in the jurisdiction.

c. Prohibit the delivery of marijuana ~~to qualifying patients~~ within the jurisdiction by a properly licensed MMTC located within the jurisdiction.

8. The department may adopt by rule additional requirements for the permitting of cultivation, processing, dispensary, and storage facilities to ensure the sanitary, safe, and secure cultivation, processing, dispensing, storage, and sale of marijuana.

~~(g) To ensure the safe transport of marijuana and marijuana delivery devices to medical marijuana treatment centers, marijuana testing laboratories, or qualified patients, a medical marijuana treatment center must:~~

~~1. Maintain a marijuana transportation manifest in any vehicle transporting marijuana. The marijuana transportation manifest must be generated from a medical marijuana treatment center's seed-to-sale tracking system and include the:~~

~~a. Departure date and approximate time of departure.~~

~~b. Name, location address, and license number of the originating medical marijuana treatment center.~~

~~c. Name and address of the recipient of the delivery.~~

~~d. Quantity and form of any marijuana or marijuana delivery device being transported.~~

~~e. Arrival date and estimated time of arrival.~~

~~f. Delivery vehicle make and model and license plate number.~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005277

~~g. Name and signature of the medical marijuana treatment center employees delivering the product.~~

~~(I) A copy of the marijuana transportation manifest must be provided to each individual, medical marijuana treatment center, or marijuana testing laboratory that receives a delivery. The individual, or a representative of the center or laboratory, must sign a copy of the marijuana transportation manifest acknowledging receipt.~~

~~(II) An individual transporting marijuana or a marijuana delivery device must present a copy of the relevant marijuana transportation manifest and his or her employee identification card to a law enforcement officer upon request.~~

~~(III) Medical marijuana treatment centers and marijuana testing laboratories must retain copies of all marijuana transportation manifests for at least 3 years.~~

~~2. Ensure only vehicles in good working order are used to transport marijuana.~~

~~3. Lock marijuana and marijuana delivery devices in a separate compartment or container within the vehicle.~~

~~4. Require employees to have possession of their employee identification card at all times when transporting marijuana or marijuana delivery devices.~~

~~5. Require at least two persons to be in a vehicle transporting marijuana or marijuana delivery devices, and require at least one person to remain in the vehicle while the marijuana or marijuana delivery device is being delivered.~~

~~6. Provide specific safety and security training to employees transporting or delivering marijuana and marijuana delivery devices.~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005278

(h) *Advertising.*—An MMTC ~~A medical marijuana treatment center~~ may not engage in advertising that is visible to members of the public from any street, sidewalk, park, or other public place, except:

1. An MMTC dispensary facility ~~The dispensing location of A medical marijuana treatment center~~ may have a sign that is affixed to the outside or hanging in the window of the premises which identifies the dispensary by the licensee's business name, a department-approved trade name, or a department-approved logo. An MMTC's ~~A medical marijuana treatment center's~~ trade name and logo may not contain wording or images commonly associated with marketing targeted toward children or which promote recreational use of marijuana.

2. An MMTC ~~A medical marijuana treatment center~~ may engage in Internet advertising and marketing under the following conditions:

a. All advertisements must be approved by the department.

b. An advertisement may not have any content that specifically targets individuals under the age of 18, including cartoon characters or similar images.

c. An advertisement may not be an unsolicited pop-up advertisement.

d. Opt-in marketing must include an easy and permanent opt-out feature.

(i) *Online retail catalogs.*—Each retail MMTC ~~medical marijuana treatment center~~ that dispenses marijuana and marijuana delivery devices shall make available to the public on its website:

1. Each marijuana and low-THC product available for

Commented [LD4]: Keep at 18 or make 21?

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005279

purchase, including the form, strain of marijuana from which it was extracted, cannabidiol content, tetrahydrocannabinol content, dose unit, total number of doses available, and the ratio of cannabidiol to tetrahydrocannabinol for each product.

2. The price for a 30-day, 50-day, and 70-day supply at a standard dose for each marijuana and low-THC product available for purchase.

3. The price for each marijuana delivery device available for purchase.

4. If applicable, any discount policies and eligibility criteria for such discounts.

(j) *Sourcing of marijuana for medical use.*—MMTCs ~~Medical marijuana treatment centers~~ are the sole source from which a qualified patient may legally obtain marijuana.

Commented [LD5]: Adults also?

(k) *Rulemaking.*—The department may adopt rules pursuant to ss. 120.536(1) and 120.54 to implement this subsection.

(9) MEDICAL MARIJUANA TREATMENT CENTER PERSONNEL; REGISTRATION; EMPLOYEE IDENTIFICATION CARDS.—

(a) By October 3, 2019, the department shall adopt rules to administer the registration of MMTC principals, employees, and contractors who participate in the operations of an MMTC. Before hiring or contracting with any individual who is not registered with the department or who does not possess a current MMTC employee identification card, an MMTC must submit to the department an application to register that person as an MMTC employee. The department shall adopt by rule a form for such applications which requires the applicant to provide all of the following:

1. His or her full legal name, social security number, date

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005280

of birth, and home address.

2. A full-face, passport-type, color photograph of the applicant taken within the 90 days immediately preceding registration.

3. Proof that he or she has passed a level 2 background screening pursuant to chapter 435 within the previous year.

4. Whether the applicant will be authorized by the MMTC to possess marijuana while not on MMTC property.

(b) Once the department has received a completed application from an MMTC, the department shall register the principal, employee, or contractor associated with the MMTC and issue him or her an MMTC employee identification card that, at a minimum, includes all of the following:

1. The employee's name and the name of the MMTC that employs him or her.

2. The employee's photograph, as required under paragraph (a).

3. The expiration date of the card, which is 1 year after the date of its issuance.

4. Whether the employee is authorized by the MMTC to possess marijuana while not on MMTC property.

(c) If any information provided to the department for the registration of an MMTC principal, employee, or contractor or in the application for an MMTC employee identification card changes or if the registered person's employment status with the MMTC changes, the registered person and the MMTC must update the department with the new information or status within 7 days after the change.

(d) The department may contract with one or more vendors

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005281

for the purpose of issuing MMTC employee identification cards under this subsection.

~~(9) BACKGROUND SCREENING.—An individual required to undergo a background screening pursuant to this section must pass a level 2 background screening as provided under chapter 435, which, in addition to the disqualifying offenses provided in s. 435.04, shall exclude an individual who has an arrest awaiting final disposition for, has been found guilty of, regardless of adjudication, or has entered a plea of nolo contendere or guilty to an offense under chapter 837, chapter 895, or chapter 896 or similar law of another jurisdiction.~~

~~(a) Such individual must submit a full set of fingerprints to the department or to a vendor, entity, or agency authorized by s. 943.053(13). The department, vendor, entity, or agency shall forward the fingerprints to the Department of Law Enforcement for state processing, and the Department of Law Enforcement shall forward the fingerprints to the Federal Bureau of Investigation for national processing.~~

~~(b) Fees for state and federal fingerprint processing and retention shall be borne by the individual. The state cost for fingerprint processing shall be as provided in s. 943.053(3)(e) for records provided to persons or entities other than those specified as exceptions therein.~~

~~(c) Fingerprints submitted to the Department of Law Enforcement pursuant to this subsection shall be retained by the Department of Law Enforcement as provided in s. 943.05(2)(g) and (h) and, when the Department of Law Enforcement begins participation in the program, enrolled in the Federal Bureau of Investigation's national retained print arrest notification~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005282

~~program. Any arrest record identified shall be reported to the department.~~

(10) MEDICAL MARIJUANA TREATMENT CENTER INSPECTIONS; ADMINISTRATIVE ACTIONS.—

~~(a) The department shall conduct announced or unannounced inspections of medical marijuana treatment centers to determine compliance with this section or rules adopted pursuant to this section.~~

(a) ~~(b)~~ The department shall inspect an MMTC and its facilities, as appropriate, ~~a medical marijuana treatment center~~ upon receiving a complaint or notice that the MMTC ~~medical marijuana treatment center~~ has dispensed marijuana containing mold, bacteria, or other contaminant that may cause or has caused an adverse effect to human health or the environment.

(b) ~~(c)~~ The department shall conduct at least a biennial inspection of each MMTC ~~medical marijuana treatment center~~ to evaluate the MMTC's ~~medical marijuana treatment center's~~ records, personnel, equipment, processes, security measures, sanitation practices, and quality assurance practices.

(c) The department shall conduct at least a biennial inspection of each permitted facility. The department may conduct additional announced or unannounced inspections of a permitted facility within reasonable hours in order to ensure compliance with this section and rules adopted under this section.

(d) The Department of Agriculture and Consumer Services and the department shall enter into an interagency agreement to ensure cooperation and coordination in the performance of their obligations under this section and their respective regulatory

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005283

and authorizing laws. The department, the Department of Highway Safety and Motor Vehicles, and the Department of Law Enforcement may enter into interagency agreements for the purposes specified in this subsection or subsection (7).

(e) The department shall publish a list of all approved MMTCs ~~medical marijuana treatment centers~~, medical directors, and qualified physicians on its website.

(f) The department may impose reasonable fines not to exceed $10,000 on an MMTC ~~a medical marijuana treatment center~~ for any of the following violations:

1. Violating this section or department rule.

2. Failing to maintain qualifications for approval.

3. Endangering the health, safety, or security of a qualified patient or adult purchasing marijuana pursuant to s. 381.990.

4. Improperly disclosing personal and confidential information of the qualified patient.

5. Attempting to procure MMTC ~~medical marijuana treatment center~~ approval by bribery, fraudulent misrepresentation, or extortion.

6. Being convicted or found guilty of, or entering a plea of guilty or nolo contendere to, regardless of adjudication, a crime in any jurisdiction which directly relates to the business of an MMTC ~~a medical marijuana treatment center~~.

7. Making or filing a report or record that the MMTC ~~medical marijuana treatment center~~ knows to be false.

8. Willfully failing to maintain a record required by this section or department rule.

9. Willfully impeding or obstructing an employee or agent

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005284

of the department in the furtherance of his or her official duties.

10. Engaging in fraud or deceit, negligence, incompetence, or misconduct in the business practices of an MMTC ~~a medical marijuana treatment center~~.

11. Making misleading, deceptive, or fraudulent representations in or related to the business practices of an MMTC ~~a medical marijuana treatment center~~.

12. Having a license or the authority to engage in any regulated profession, occupation, or business that is related to the business practices of an MMTC ~~a medical marijuana treatment center~~ suspended, revoked, or otherwise acted against by the licensing authority of any jurisdiction, including its agencies or subdivisions, for a violation that would constitute a violation under Florida law.

13. Violating a lawful order of the department or an agency of the state, or failing to comply with a lawfully issued subpoena of the department or an agency of the state.

(g) The department may suspend, revoke, or refuse to renew an MMTC's registration, operating ~~a medical marijuana treatment center~~ license, and any vehicle permits or facility permits if the MMTC ~~medical marijuana treatment center~~ commits any of the violations in paragraph (f).

(h) the department shall refuse to renew the cultivation, processing, retail, or transportation license of an MMTC that has been issued such a license and has not to cultivate, process, dispense, or transport marijuana, respectively, by the date that the MMTC is required to renew such license.

(i) ~~(h)~~ The department may adopt rules pursuant to ss.

120.536(1) and 120.54 to implement this subsection.

~~381.986 Medical use of marijuana.—~~

(12) PENALTIES.—

(a) A qualified physician commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083, if the qualified physician issues a physician certification for the medical use of marijuana for a patient without a reasonable belief that the patient is suffering from a qualifying medical condition.

(b) A person who fraudulently represents that he or she has a qualifying medical condition to a qualified physician for the purpose of being issued a physician certification commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

(c) A qualified patient who uses marijuana, not including low-THC cannabis, or a caregiver who administers marijuana, not including low-THC cannabis, in plain view of or in a place open to the general public; in a school bus, a vehicle, an aircraft, or a boat; or on the grounds of a school except as provided in s. 1006.062, commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

(d) A qualified patient or caregiver who cultivates marijuana or who purchases or acquires marijuana from any person or entity other than a medical marijuana treatment center violates s. 893.13 and is subject to the penalties provided therein.

(e)1. A qualified patient or caregiver in possession of marijuana or a marijuana delivery device who fails or refuses to present his or her marijuana use registry identification card

Commented [LD6]: added

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005286

upon the request of a law enforcement officer commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083, unless it can be determined through the medical marijuana use registry that the person is authorized to be in possession of that marijuana or marijuana delivery device.

2. A person charged with a violation of this paragraph may not be convicted if, before or at the time of his or her court or hearing appearance, the person produces in court or to the clerk of the court in which the charge is pending a medical marijuana use registry identification card issued to him or her which is valid at the time of his or her arrest. The clerk of the court is authorized to dismiss such case at any time before the defendant's appearance in court. The clerk of the court may assess a fee of $5 for dismissing the case under this paragraph.

(f) A caregiver who violates any of the applicable provisions of this section or applicable department rules, for the first offense, commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083 and, for a second or subsequent offense, commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

Commented [LD7]: Review these to determine which are still applicable.

(g) A qualified physician who issues a physician certification for marijuana or a marijuana delivery device and receives compensation from a medical marijuana treatment center related to the issuance of a physician certification for marijuana or a marijuana delivery device is subject to disciplinary action under the applicable practice act and s. 456.072(1)(n).

(h) A person transporting marijuana or marijuana delivery devices on behalf of a medical marijuana treatment center or

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005287

marijuana testing laboratory who fails or refuses to present a transportation manifest upon the request of a law enforcement officer commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083.

(i) Persons and entities conducting activities authorized and governed by this section and s. 381.988 are subject to ss. 456.053, 456.054, and 817.505, as applicable.

(j) A person or entity that cultivates, processes, distributes, sells, or dispenses marijuana, as defined in s. 29(b)(4), Art. X of the State Constitution, and is not licensed as a medical marijuana treatment center violates s. 893.13 and is subject to the penalties provided therein.

Commented [LD8]: Still applicable?

(k) A person who manufactures, distributes, sells, gives, or possesses with the intent to manufacture, distribute, sell, or give marijuana or a marijuana delivery device that he or she holds out to have originated from a licensed medical marijuana treatment center but that is counterfeit commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. For the purposes of this paragraph, the term "counterfeit" means marijuana; a marijuana delivery device; or a marijuana or marijuana delivery device container, seal, or label which, without authorization, bears the trademark, trade name, or other identifying mark, imprint, or device, or any likeness thereof, of a licensed medical marijuana treatment center and which thereby falsely purports or is represented to be the product of, or to have been distributed by, that licensed medical marijuana treatment facility.

(l) Any person who possesses or manufactures a blank, forged, stolen, fictitious, fraudulent, counterfeit, or

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005288

otherwise unlawfully issued medical marijuana use registry identification card commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(14) EXCEPTIONS TO OTHER LAWS.—

Commented [LD9]: added

(a) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section, a qualified patient and the qualified patient's caregiver may purchase from a medical marijuana treatment center for the patient's medical use a marijuana delivery device and up to the amount of marijuana authorized in the physician certification, but may not possess more than a 70-day supply of marijuana, or the greater of 4 ounces of marijuana in a form for smoking or an amount of marijuana in a form for smoking approved by the department pursuant to paragraph (4)(f), at any given time and all marijuana purchased must remain in its original packaging.

(b) Notwithstanding paragraph (a), s. 893.13, s. 893.135, s. 893.147, or any other provision of law, a qualified patient and the qualified patient's caregiver may purchase and possess a marijuana delivery device intended for the medical use of marijuana by smoking from a vendor other than a medical marijuana treatment center.

(c) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section, an approved medical marijuana treatment center and its owners, managers, and employees may manufacture, possess, sell, deliver, distribute, dispense, and lawfully dispose of marijuana or a marijuana delivery device as provided in this section, s. 381.988, s. 381.990, and by department rule. For the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005289

purposes of this subsection, the terms "manufacture," "possession," "deliver," "distribute," and "dispense" have the same meanings as provided in s. 893.02.

(d) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section, a certified marijuana testing laboratory, including an employee of a certified marijuana testing laboratory acting within the scope of his or her employment, may acquire, possess, test, transport, and lawfully dispose of marijuana as provided in this section, in s. 381.988, and by department rule.

(e) A licensed medical marijuana treatment center and its owners, managers, and employees are not subject to licensure or regulation under chapter 465 or chapter 499 for manufacturing, possessing, selling, delivering, distributing, dispensing, or lawfully disposing of marijuana or a marijuana delivery device, as provided in this section, in s. 381.988, and by department rule.

(f) This subsection does not exempt a person from prosecution for a criminal offense related to impairment or intoxication resulting from the medical use of marijuana or relieve a person from any requirement under law to submit to a breath, blood, urine, or other test to detect the presence of a controlled substance.

(g) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section and pursuant to policies and procedures established pursuant to s. 1006.62(8), school personnel may possess marijuana that is obtained for medical use pursuant to this

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005290

section by a student who is a qualified patient.

(h) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section, a research institute established by a public postsecondary educational institution, such as the H. Lee Moffitt Cancer Center and Research Institute, Inc., established under s. 1004.43, or a state university that has achieved the preeminent state research university designation under s. 1001.7065 may possess, test, transport, and lawfully dispose of marijuana for research purposes as provided by this section.

Section 3. Section 381.990 of the Florida Statutes is created to read:

381.990 Adult Use of Marijuana.-

(1) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law but subject to the requirements of this section an adult 21 years of age or older may purchase from a medical marijuana treatment center licensed for retail sale by the department pursuant to s. 381.986 and authorized for sale of marijuana for adult use by the Department of Business and Professional Regulation, possess, use, and transport up to a 70 day supply of marijuana or 2.5 ounces of marijuana in a form for smoking and one or more marijuana delivery devices, as defined in s. 381.986. This section does not authorize any person or entity other than a medical marijuana treatment center to cultivate or sell marijuana. Marijuana authorized by this section may not be used in any public place. This section does not limit the ability of a private property owner to restrict the use of marijuana on his or her private property.

AMERICAN OVERSIGHT

24-00656D-20

A bill to be entitled

An act relating to electric vehicles; amending s. 316.003, F.S.; revising definitions; authorizing the Department of Transportation to adopt rules; amending s. 334.046, F.S.; revising the department's goals relating to mobility; creating s. 339.0802, F.S.; requiring that certain funds be used for specified purposes relating to the Electric Vehicle Infrastructure Grant Program, beginning in specified years; providing for future repeal of the requirement; creating s. 339.286, F.S.; requiring the department to establish the Electric Vehicle Infrastructure Grant Program; providing the purpose of the program; providing for the distribution of grants to certain entities to install electric vehicle charging infrastructure; providing grant requirements; providing requirements for equipment installed using grant funds; providing criteria for the distribution of grants; requiring that the department continually review emerging research, policies, and standards; authorizing the department to develop a model plan for local governments; requiring the department to adopt rules; amending s. 366.94, F.S.; specifying that certain rules adopted by the Department of Agriculture and Consumer Services may not require specific methods of sale for electric vehicle charging equipment used in this state; providing effectives dates.

Be It Enacted by the Legislature of the State of Florida:

AMERICAN OVERSIGHT

Section 1. Subsections (2) and (55) of section 316.003, Florida Statutes, are amended to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

(2) AUTOCYCLE.—A three-wheeled motorcycle that has two wheels in the front and one wheel in the back; is equipped with a roll cage or roll hoops, a seat belt for each occupant, antilock brakes that meet the requirements of Federal Motor Vehicle Safety Standard No. 122, a steering ~~wheel~~ mechanism, and seating that does not require the operator to straddle or sit astride it; and is manufactured in accordance with the applicable federal motorcycle safety standards in 49 C.F.R. part 571 by a manufacturer registered with the National Highway Traffic Safety Administration.

(55) PERSONAL DELIVERY DEVICE.—An electrically powered device that:

(a) Is operated on sidewalks and crosswalks and intended primarily for transporting property;

(b) Has a weight that does not exceed the maximum weight established by Department of Transportation rule ~~Weighs less than 80 pounds, excluding cargo~~;

(c) Has a maximum speed of 10 miles per hour or, if the Department of Transportation establishes by rule a maximum speed, has a speed that does not exceed that maximum; and

(d) Is equipped with technology to allow for operation of the device with or without the active control or monitoring of a

AMERICAN OVERSIGHT

natural person.

A personal delivery device is not considered a vehicle unless expressly defined by law as a vehicle. A mobile carrier is not considered a personal delivery device. The Department of Transportation may adopt rules to implement this subsection.

Section 2. Paragraph (c) of subsection (4) of section 334.046, Florida Statutes, is amended to read:

334.046 Department mission, goals, and objectives.—

(4) At a minimum, the department's goals shall address the following prevailing principles.

(c) *Mobility.*—Ensuring a cost-effective, statewide, interconnected transportation system. Improvement of travel choices to ensure mobility includes planning and establishment of infrastructure for innovative technologies, including electric vehicle charging infrastructure.

Section 3. Effective upon Senate Bill ___ or other similar legislation being enacted in the 2020 Regular Session or an extension thereof and becoming a law, section 339.0802, Florida Statutes, is created to read:

339.0802 Allocation of increased license tax revenues from licensure of electric and hybrid vehicles.—Funds that result from increased revenues to the State Transportation Trust Fund derived under s. 320.08001(2), (3), and (4) must be used as set forth in this section, notwithstanding any other provision of law.

(1) Beginning in the 2020-2021 fiscal year, and annually for 5 years thereafter, all increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

AMERICAN OVERSIGHT

(2) Beginning in the 2025-2026 fiscal year, and annually for 5 years thereafter, half of the increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(3) This section expires on July 1, 2030.

Section 4. Section 339.286, Florida Statutes, is created to read:

339.286 Electric Vehicle Infrastructure Grant Program.—

(1) The department shall establish the Electric Vehicle Infrastructure Grant Program. The purpose of the program is to provide financial assistance to encourage the installation of electric vehicle charging infrastructure.

(2) State agencies, public universities, public transit agencies, ports, airports, and local governments, including local housing authorities and libraries, may apply to the department for grants for the purpose of installing publicly available electric vehicle charging infrastructure on public or private property.

(3) A grant may be awarded for:

(a) Technical assistance for the development and adoption of:

1. A local or regional plan that establishes an electric vehicle charging infrastructure;

2. Any action plans necessary to address any infrastructure gaps; and

3. Steps necessary to complete the infrastructure plan.

A plan must address actions to deploy the necessary infrastructure in high-density housing areas and low- to moderate-income areas.

AMERICAN OVERSIGHT

(b) Assistance with the purchase of related equipment and the costs of installation of that equipment to provide electric vehicle charging. Such equipment must be capable of collecting and reporting data and must use standard connectors, and must be available to the public.~~.~~

(4)(a) An applicant may apply for a grant for both technical assistance and equipment purchase and installation. A grant for technical assistance requires a minimum match of funds from the applicant of 30 percent of the grant award, but such match is not required for an applicant that is located in a fiscally constrained county. A grant for equipment purchase and installation requires a minimum match of funds from the applicant in the amount of 50 percent of the ~~grant award~~total project cost for Level 2 charging infrastructure or~~,~~ 20 percent of the total project cost for direct current fast charging infrastructure~~or 20 percent for an applicant that is located in a fiscally constrained county~~. The matching funds must be from nonstate resources, but may include private funds provided through a partnership with a private entity or in-kind contributions such as the donation of equipment, services, or land or use of land for establishment of the electric vehicle charging infrastructure. Grant funds may not subsidize the cost for the use of electricity. 20 percent of the funds available under this grant program shall be reserved for applicants or projects in fiscally constrained counties.

(b) The department shall maintain a prioritized list of approved grant applications. The prioritized list must include recommended funding levels for each application and, if staged implementation is appropriate, provide funding requirements for

AMERICAN OVERSIGHT

each stage. Grants must be prioritized based on the extent to which the activities of the grant will encourage growth in the use of electric vehicles and increase the availability of charging locations along evacuation routes. A grant for equipment purchase and installation that will immediately and most effectively serve those who currently own or operate electric vehicles may receive priority. Applicants may engage private sector entities to install charging infrastructure on private property in the same county or local jurisdiction as the applicant.

(5) The department shall continually review emerging research, policies, and standards related to electric vehicle infrastructure. Using such information, the department shall publish best practices for the establishment of electric vehicle charging infrastructure, model infrastructure plan development and components, and other significant information for the implementation and use of electric vehicle charging infrastructure. The department may develop a model plan that local governments may use as a guide to establish an electric vehicle charging infrastructure plan.

(6) The department shall adopt rules to administer this section.

Section 5. Section 366.94, Florida Statutes, is amended to read:

366.94 Electric vehicle charging stations.—

(1) The provision of electric vehicle charging to the public by a nonutility is not the retail sale of electricity for the purposes of this chapter. The rates, terms, and conditions

AMERICAN OVERSIGHT

of electric vehicle charging services by a nonutility are not subject to regulation under this chapter. This section does not affect the ability of individuals, businesses, or governmental entities to acquire, install, or use an electric vehicle charger for their own vehicles.

(2) The Department of Agriculture and Consumer Services shall adopt rules to provide definitions, methods of sale, labeling requirements, and price-posting requirements for electric vehicle charging stations to allow for consistency for consumers and the industry. Rules implemented under this subsection may not require specific methods of sale for electric vehicle charging equipment and services provided~~used~~ in this state.

(3)(a) It is unlawful for a person to stop, stand, or park a vehicle that is not capable of using an electrical recharging station within any parking space specifically designated for charging an electric vehicle.

(b) If a law enforcement officer or specialist finds a motor vehicle in violation of this subsection, the officer or specialist shall charge the operator or other person in charge of the vehicle in violation with a noncriminal traffic infraction, punishable as provided in s. 316.008(4) or s. 318.18.

Section 6. Except as otherwise expressly provided in this act, this act shall take effect July 1, 2020.

AMERICAN OVERSIGHT

A bill to be entitled

An act relating to electric bicycles; amending s. 261.03, F.S.; revising the definition of the term "OHM" or "off-highway motorcycle"; amending s. 316.003, F.S.; revising definitions relating to the Florida Uniform Traffic Control Law; defining the term "electric bicycle"; amending s. 316.027, F.S.; revising the definition of the term "vulnerable road user"; amending s. 316.083, F.S.; revising a rule related to drivers of vehicles overtaking electric bicycles; amending s. 316.1995, F.S.; expanding exceptions to a prohibition on persons driving certain vehicles on sidewalks and bicycle paths; creating s. 316.20655, F.S.; providing electric bicycle regulations; providing for rights and privileges of electric bicycles and operators of electric bicycles; providing that electric bicycles are vehicles to the same extent as bicycles; providing that electric bicycles and operators of electric bicycles are not subject to specified provisions; requiring manufacturers and distributers, beginning on a specified date, to apply a label containing certain information to each electric bicycle; prohibiting persons from tampering with or modifying electric bicycles for certain purposes; providing an exception; requiring electric bicycles to comply with specified provisions of law; requiring electric bicycles to operate in a manner that meets certain requirements; authorizing operators to ride electric bicycles where

AMERICAN OVERSIGHT

bicycles are allowed; authorizing municipalities, counties, and agencies of the state to prohibit the operation of certain classes of electric bicycles under certain conditions; providing applicability; authorizing such municipalities, counties, and agencies to regulate the use of electric bicycles on certain trails; prohibiting persons under a specified age from operating class 3 electric bicycles; authorizing such persons to ride as passengers on such electric bicycles; requiring class 3 electric bicycles to be equipped with a speedometer that meets certain requirements; amending ss. 320.01, 322.01, and 324.021, F.S.; revising the definitions of the term "motor vehicle"; amending s. 320.08, F.S.; conforming a provision to changes made by the act; amending ss. 316.306 and 655.960, F.S.; conforming cross-references; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Subsection (4) of section 261.03, Florida Statutes, is amended to read:

261.03 Definitions.—As used in this chapter, the term:

(4) "OHM" or "off-highway motorcycle" means any motor vehicle used off the roads or highways of this state that has a seat or saddle for the use of the rider and is designed to travel with not more than two wheels in contact with the ground, but excludes a tractor, an electric bicycle, or a moped.

Section 2. Present subsections (22) through (104) of

AMERICAN OVERSIGHT

section 316.003, Florida Statutes, are redesignated as subsections (23) through (105), respectively, a new subsection (22) is added to that section, and subsection (4) and present subsections (41), (43), (44), (45), and (61) of that section are amended, to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

(4) BICYCLE.—Every vehicle propelled solely by human power~~, and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more than 20 miles per hour on level ground upon which any person may ride~~, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or a scooter or similar device. ~~A person under the age of 16 may not operate or ride upon a motorized bicycle.~~

(22) ELECTRIC BICYCLE.—A bicycle or tricycle equipped with fully operable pedals, a seat or saddle for the use of the rider, and an electric motor of less than 750 watts which meets the requirements of one of the following three classifications:

(a) "Class 1 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling, and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour.

(b) "Class 2 electric bicycle" means an electric bicycle

AMERICAN OVERSIGHT

equipped with a motor that may be used exclusively to propel the electric bicycle, and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour.

(c) "Class 3 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling, and that ceases to provide assistance when the electric bicycle reaches the speed of 28 miles per hour.

(42) ~~(41)~~ MOPED.—Any vehicle with pedals to permit propulsion by human power, having a seat or saddle for the use of the rider and designed to travel on not more than three wheels, with a motor rated not in excess of 2 brake horsepower and not capable of propelling the vehicle at a speed greater than 30 miles per hour on level ground and with a power-drive system that functions directly or automatically without clutching or shifting gears by the operator after the drive system is engaged. If an internal combustion engine is used, the displacement may not exceed 50 cubic centimeters. The term does not include an electric bicycle.

(44) ~~(43)~~ MOTOR VEHICLE.—Except when used in s. 316.1001, a self-propelled vehicle not operated upon rails or guideway, but not including any bicycle, electric bicycle, motorized scooter, electric personal assistive mobility device, mobile carrier, personal delivery device, swamp buggy, or moped. For purposes of s. 316.1001, "motor vehicle" has the same meaning as provided in s. 320.01(1)(a).

(45) ~~(44)~~ MOTORCYCLE.—Any motor vehicle having a seat or saddle for the use of the rider and designed to travel on not more than three wheels in contact with the ground. The term includes an autocycle, but does not include a tractor, a moped,

AMERICAN OVERSIGHT

electric bicycle, or any vehicle in which the operator is enclosed by a cabin unless it meets the requirements set forth by the National Highway Traffic Safety Administration for a motorcycle.

(46) ~~(45)~~ MOTORIZED SCOOTER.—Any vehicle or micromobility device that is powered by a motor with or without a seat or saddle for the use of the rider, which is designed to travel on not more than three wheels, and which is not capable of propelling the vehicle at a speed greater than 20 miles per hour on level ground. The term does not include an electric bicycle.

(62) ~~(61)~~ PRIVATE ROAD OR DRIVEWAY.—Except as otherwise provided in paragraph (84)(b) ~~(83)(b)~~, any privately owned way or place used for vehicular travel by the owner and those having express or implied permission from the owner, but not by other persons.

Section 3. Paragraph (b) of subsection (1) of section 316.027, Florida Statutes, is amended to read:

316.027 Crash involving death or personal injuries.—

(1) As used in this section, the term:

(b) "Vulnerable road user" means:

1. A pedestrian, including a person actually engaged in work upon a highway, or in work upon utility facilities along a highway, or engaged in the provision of emergency services within the right-of-way;

2. A person operating a bicycle, an electric bicycle, a motorcycle, a scooter, or a moped lawfully on the roadway;

3. A person riding an animal; or

4. A person lawfully operating on a public right-of-way, crosswalk, or shoulder of the roadway:

AMERICAN OVERSIGHT

a. A farm tractor or similar vehicle designed primarily for farm use;

b. A skateboard, roller skates, or in-line skates;

c. A horse-drawn carriage;

d. An electric personal assistive mobility device; or

e. A wheelchair.

Section 4. Subsection (1) of section 316.083, Florida Statutes, is amended to read:

316.083 Overtaking and passing a vehicle.—The following rules shall govern the overtaking and passing of vehicles proceeding in the same direction, subject to those limitations, exceptions, and special rules hereinafter stated:

(1) The driver of a vehicle overtaking another vehicle proceeding in the same direction shall give an appropriate signal as provided for in s. 316.156, shall pass to the left thereof at a safe distance, and shall not again drive to the right side of the roadway until safely clear of the overtaken vehicle. The driver of a vehicle overtaking a bicycle, an electric bicycle, or other nonmotorized vehicle must pass the bicycle, electric bicycle, or other nonmotorized vehicle at a safe distance of not less than 3 feet between the vehicle and the bicycle, electric bicycle, or other nonmotorized vehicle.

Section 5. Section 316.1995, Florida Statutes, is amended to read:

316.1995 Driving upon sidewalk or bicycle path.—

(1) Except as provided in s. 316.008, s. 316.212(8), s. 316.20655, or s. 316.2128, a person may not drive any vehicle other than by human power upon a bicycle path, sidewalk, or sidewalk area, except upon a permanent or duly authorized

AMERICAN OVERSIGHT

temporary driveway.

(2) A violation of this section is a noncriminal traffic infraction, punishable as a moving violation as provided in chapter 318.

(3) This section does not apply to motorized wheelchairs.

Section 6. Section 316.20655, Florida Statutes, is created to read:

316.20655 Electric bicycle regulations.—

(1) Except as otherwise provided in this section, an electric bicycle or an operator of an electric bicycle shall be afforded all the rights and privileges, and be subject to all of the duties, of a bicycle or the operator of a bicycle, including s. 316.2065. An electric bicycle is a vehicle to the same extent as a bicycle.

(2) An electric bicycle or an operator of an electric bicycle is not subject to the provisions of this code relating to financial responsibility, driver or motor vehicle licenses, vehicle registration, title certificates, off-highway motorcycles, or off-highway vehicles.

(3) Beginning on January 1, 2021, manufacturers and distributors of electric bicycles shall apply a label that is permanently affixed in a prominent location to each electric bicycle. The label shall contain the classification number, top assisted speed, and motor wattage of the electric bicycle, and must be printed in Arial font in at least 9-point type.

(4) A person may not tamper with or modify an electric bicycle so as to change the motor-powered speed capability or engagement of an electric bicycle, unless the label indicating the classification required in subsection (3) is replaced after

AMERICAN OVERSIGHT

such modification.

(5) An electric bicycle must comply with the equipment and manufacturing requirements for bicycles adopted by the United States Consumer Product Safety Commission under 16 C.F.R. part 1512.

(6) An electric bicycle must operate in a manner so that the electric motor is disengaged or ceases to function when the rider stops pedaling or when the brakes are applied.

(7)(a) An operator may ride an electric bicycle where bicycles are allowed, including, but not limited to, streets, highways, roadways, shoulders, bicycle lanes, and bicycle or multiuse paths.

(b) Following notice and a public hearing, a municipality, county, or agency of the state having jurisdiction over a bicycle or multiuse path may prohibit the operation of a class 1 electric bicycle or class 2 electric bicycle on that path, if the municipality, county, or agency finds that such a restriction is necessary in the interest of safety or to comply with other laws or legal obligations.

(c) A municipality, county, or agency of the state having jurisdiction over a bicycle or multiuse path may prohibit the operation of a class 3 electric bicycle on that path.

(d) This subsection does not apply to a trail that is specifically designated as nonmotorized and that has a natural surface tread that is made by clearing and grading the native soil with no added surfacing materials. A municipality, county, or agency of the state having jurisdiction over a trail described in this subsection may regulate the use of an electric bicycle on such trail.

AMERICAN OVERSIGHT

(8)(a) A person under the age of 16 may not operate a class 3 electric bicycle. A person under the age of 16 may ride as a passenger on a class 3 electric bicycle that is designed to accommodate passengers.

(b) All class 3 electric bicycles must be equipped with a speedometer that displays the speed at which the bicycle is traveling in miles per hour.

Section 7. Paragraph (a) of subsection (1) of section 320.01, Florida Statutes, is amended to read:

320.01 Definitions, general.—As used in the Florida Statutes, except as otherwise provided, the term:

(1) "Motor vehicle" means:

(a) An automobile, motorcycle, truck, trailer, semitrailer, truck tractor and semitrailer combination, or any other vehicle operated on the roads of this state, used to transport persons or property, and propelled by power other than muscular power, but the term does not include traction engines, road rollers, motorized scooters, micromobility devices, personal delivery devices and mobile carriers as defined in s. 316.003, special mobile equipment as defined in s. 316.003, vehicles that run only upon a track, bicycles, electric bicycles, swamp buggies, or mopeds.

Section 8. Subsection (27) of section 322.01, Florida Statutes, is amended to read:

322.01 Definitions.—As used in this chapter:

(27) "Motor vehicle" means any self-propelled vehicle, including a motor vehicle combination, not operated upon rails or guideway, excluding vehicles moved solely by human power, motorized wheelchairs, and electric ~~motorized~~ bicycles as

AMERICAN OVERSIGHT

defined in s. 316.003.

Section 9. Subsection (1) of section 324.021, Florida Statutes, is amended to read:

324.021 Definitions; minimum insurance required.—The following words and phrases when used in this chapter shall, for the purpose of this chapter, have the meanings respectively ascribed to them in this section, except in those instances where the context clearly indicates a different meaning:

(1) MOTOR VEHICLE.—Every self-propelled vehicle that is designed and required to be licensed for use upon a highway, including trailers and semitrailers designed for use with such vehicles, except traction engines, road rollers, farm tractors, power shovels, and well drillers, and every vehicle that is propelled by electric power obtained from overhead wires but not operated upon rails, but not including any personal delivery device or mobile carrier as defined in s. 316.003, bicycle, electric bicycle, or moped. However, the term "motor vehicle" does not include a motor vehicle as defined in s. 627.732(3) when the owner of such vehicle has complied with the requirements of ss. 627.730-627.7405, inclusive, unless the provisions of s. 324.051 apply; and, in such case, the applicable proof of insurance provisions of s. 320.02 apply.

Section 10. Section 320.08, Florida Statutes, is amended to read:

320.08 License taxes.—Except as otherwise provided herein, there are hereby levied and imposed annual license taxes for the operation of motor vehicles, mopeds, ~~motorized bicycles as defined in s. 316.003(4),~~ tri-vehicles as defined in s. 316.003, and mobile homes as defined in s. 320.01, which shall be paid to

AMERICAN OVERSIGHT

and collected by the department or its agent upon the registration or renewal of registration of the following:

(1) MOTORCYCLES AND MOPEDS.—

(a) Any motorcycle: $10 flat.

(b) Any moped: $5 flat.

(c) Upon registration of a motorcycle, motor-driven cycle, or moped, in addition to the license taxes specified in this subsection, a nonrefundable motorcycle safety education fee in the amount of $2.50 shall be paid. The proceeds of such additional fee shall be deposited in the Highway Safety Operating Trust Fund to fund a motorcycle driver improvement program implemented pursuant to s. 322.025, the Florida Motorcycle Safety Education Program established in s. 322.0255, or the general operations of the department.

(d) An ancient or antique motorcycle: $7.50 flat.

(2) AUTOMOBILES OR TRI-VEHICLES FOR PRIVATE USE.—

(a) An ancient or antique automobile, as defined in s. 320.086, or a street rod, as defined in s. 320.0863: $7.50 flat.

(b) Net weight of less than 2,500 pounds: $14.50 flat.

(c) Net weight of 2,500 pounds or more, but less than 3,500 pounds: $22.50 flat.

(d) Net weight of 3,500 pounds or more: $32.50 flat.

(3) TRUCKS.—

(a) Net weight of less than 2,000 pounds: $14.50 flat.

(b) Net weight of 2,000 pounds or more, but not more than 3,000 pounds: $22.50 flat.

(c) Net weight more than 3,000 pounds, but not more than 5,000 pounds: $32.50 flat.

(d) A truck defined as a "goat," or other vehicle if used

AMERICAN OVERSIGHT

in the field by a farmer or in the woods for the purpose of harvesting a crop, including naval stores, during such harvesting operations, and which is not principally operated upon the roads of the state: $7.50 flat. The term "goat" means a motor vehicle designed, constructed, and used principally for the transportation of citrus fruit within citrus groves or for the transportation of crops on farms, and which can also be used for hauling associated equipment or supplies, including required sanitary equipment, and the towing of farm trailers.

(e) An ancient or antique truck, as defined in s. 320.086: $7.50 flat.

(4) HEAVY TRUCKS, TRUCK TRACTORS, FEES ACCORDING TO GROSS VEHICLE WEIGHT.—

(a) Gross vehicle weight of 5,001 pounds or more, but less than 6,000 pounds: $60.75 flat.

(b) Gross vehicle weight of 6,000 pounds or more, but less than 8,000 pounds: $87.75 flat.

(c) Gross vehicle weight of 8,000 pounds or more, but less than 10,000 pounds: $103 flat.

(d) Gross vehicle weight of 10,000 pounds or more, but less than 15,000 pounds: $118 flat.

(e) Gross vehicle weight of 15,000 pounds or more, but less than 20,000 pounds: $177 flat.

(f) Gross vehicle weight of 20,000 pounds or more, but less than 26,001 pounds: $251 flat.

(g) Gross vehicle weight of 26,001 pounds or more, but less than 35,000: $324 flat.

(h) Gross vehicle weight of 35,000 pounds or more, but less than 44,000 pounds: $405 flat.

AMERICAN OVERSIGHT

(i) Gross vehicle weight of 44,000 pounds or more, but less than 55,000 pounds: $773 flat.

(j) Gross vehicle weight of 55,000 pounds or more, but less than 62,000 pounds: $916 flat.

(k) Gross vehicle weight of 62,000 pounds or more, but less than 72,000 pounds: $1,080 flat.

(l) Gross vehicle weight of 72,000 pounds or more: $1,322 flat.

(m) Notwithstanding the declared gross vehicle weight, a truck tractor used within the state or within a 150-mile radius of its home address is eligible for a license plate for a fee of $324 flat if:

1. The truck tractor is used exclusively for hauling forestry products; or

2. The truck tractor is used primarily for the hauling of forestry products, and is also used for the hauling of associated forestry harvesting equipment used by the owner of the truck tractor.

(n) A truck tractor or heavy truck, not operated as a for-hire vehicle and which is engaged exclusively in transporting raw, unprocessed, and nonmanufactured agricultural or horticultural products within the state or within a 150-mile radius of its home address is eligible for a restricted license plate for a fee of:

1. If such vehicle’s declared gross vehicle weight is less than 44,000 pounds, $87.75 flat.

2. If such vehicle’s declared gross vehicle weight is 44,000 pounds or more and such vehicle only transports from the point of production to the point of primary manufacture; to the

AMERICAN OVERSIGHT

point of assembling the same; or to a shipping point of a rail, water, or motor transportation company, $324 flat.

Such not-for-hire truck tractors and heavy trucks used exclusively in transporting raw, unprocessed, and nonmanufactured agricultural or horticultural products may be incidentally used to haul farm implements and fertilizers delivered direct to the growers. The department may require any documentation deemed necessary to determine eligibility before issuance of this license plate. For the purpose of this paragraph, "not-for-hire" means the owner of the motor vehicle must also be the owner of the raw, unprocessed, and nonmanufactured agricultural or horticultural product, or the user of the farm implements and fertilizer being delivered.

(5) SEMITRAILERS, FEES ACCORDING TO GROSS VEHICLE WEIGHT; SCHOOL BUSES; SPECIAL PURPOSE VEHICLES.—

(a)1. A semitrailer drawn by a GVW truck tractor by means of a fifth-wheel arrangement: $13.50 flat per registration year or any part thereof.

2. A semitrailer drawn by a GVW truck tractor by means of a fifth-wheel arrangement: $68 flat per permanent registration.

(b) A motor vehicle equipped with machinery and designed for the exclusive purpose of well drilling, excavation, construction, spraying, or similar activity, and which is not designed or used to transport loads other than the machinery described above over public roads: $44 flat.

(c) A school bus used exclusively to transport pupils to and from school or school or church activities or functions within their own county: $41 flat.

AMERICAN OVERSIGHT

(d) A wrecker, as defined in s. 320.01, which is used to tow a vessel as defined in s. 327.02, a disabled, abandoned, stolen-recovered, or impounded motor vehicle as defined in s. 320.01, or a replacement motor vehicle as defined in s. 320.01: $41 flat.

(e) A wrecker that is used to tow any nondisabled motor vehicle, a vessel, or any other cargo unless used as defined in paragraph (d), as follows:

1. Gross vehicle weight of 10,000 pounds or more, but less than 15,000 pounds: $118 flat.

2. Gross vehicle weight of 15,000 pounds or more, but less than 20,000 pounds: $177 flat.

3. Gross vehicle weight of 20,000 pounds or more, but less than 26,000 pounds: $251 flat.

4. Gross vehicle weight of 26,000 pounds or more, but less than 35,000 pounds: $324 flat.

5. Gross vehicle weight of 35,000 pounds or more, but less than 44,000 pounds: $405 flat.

6. Gross vehicle weight of 44,000 pounds or more, but less than 55,000 pounds: $772 flat.

7. Gross vehicle weight of 55,000 pounds or more, but less than 62,000 pounds: $915 flat.

8. Gross vehicle weight of 62,000 pounds or more, but less than 72,000 pounds: $1,080 flat.

9. Gross vehicle weight of 72,000 pounds or more: $1,322 flat.

(f) A hearse or ambulance: $40.50 flat.

(6) MOTOR VEHICLES FOR HIRE.—

(a) Under nine passengers: $17 flat plus $1.50 per cwt.

AMERICAN OVERSIGHT

(b) Nine passengers and over: $17 flat plus $2 per cwt.

(7) TRAILERS FOR PRIVATE USE.—

(a) Any trailer weighing 500 pounds or less: $6.75 flat per year or any part thereof.

(b) Net weight over 500 pounds: $3.50 flat plus $1 per cwt.

(8) TRAILERS FOR HIRE.—

(a) Net weight under 2,000 pounds: $3.50 flat plus $1.50 per cwt.

(b) Net weight 2,000 pounds or more: $13.50 flat plus $1.50 per cwt.

(9) RECREATIONAL VEHICLE-TYPE UNITS.—

(a) A travel trailer or fifth-wheel trailer, as defined by s. 320.01(1)(b), that does not exceed 35 feet in length: $27 flat.

(b) A camping trailer, as defined by s. 320.01(1)(b)2.: $13.50 flat.

(c) A motor home, as defined by s. 320.01(1)(b)4.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(d) A truck camper as defined by s. 320.01(1)(b)3.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(e) A private motor coach as defined by s. 320.01(1)(b)5.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(10) PARK TRAILERS; TRAVEL TRAILERS; FIFTH-WHEEL TRAILERS; 35 FEET TO 40 FEET.—

(a) *Park trailers.*—Any park trailer, as defined in s. 320.01(1)(b)7.: $25 flat.

AMERICAN OVERSIGHT

(b) *Travel trailers or fifth-wheel trailers.*—A travel trailer or fifth-wheel trailer, as defined in s. 320.01(1)(b), that exceeds 35 feet: $25 flat.

(11) MOBILE HOMES.—

(a) A mobile home not exceeding 35 feet in length: $20 flat.

(b) A mobile home over 35 feet in length, but not exceeding 40 feet: $25 flat.

(c) A mobile home over 40 feet in length, but not exceeding 45 feet: $30 flat.

(d) A mobile home over 45 feet in length, but not exceeding 50 feet: $35 flat.

(e) A mobile home over 50 feet in length, but not exceeding 55 feet: $40 flat.

(f) A mobile home over 55 feet in length, but not exceeding 60 feet: $45 flat.

(g) A mobile home over 60 feet in length, but not exceeding 65 feet: $50 flat.

(h) A mobile home over 65 feet in length: $80 flat.

(12) DEALER AND MANUFACTURER LICENSE PLATES.—A franchised motor vehicle dealer, independent motor vehicle dealer, marine boat trailer dealer, or mobile home dealer and manufacturer license plate: $17 flat.

(13) EXEMPT OR OFFICIAL LICENSE PLATES.—Any exempt or official license plate: $4 flat, except that the registration or renewal of a registration of a marine boat trailer exempt under s. 320.102 is not subject to any license tax.

(14) LOCALLY OPERATED MOTOR VEHICLES FOR HIRE.—A motor vehicle for hire operated wholly within a city or within 25

AMERICAN OVERSIGHT

miles thereof: $17 flat plus $2 per cwt.

(15) TRANSPORTER.—Any transporter license plate issued to a transporter pursuant to s. 320.133: $101.25 flat.

Section 11. Paragraph (a) of subsection (3) of section 316.306, Florida Statutes, is amended to read:

316.306 School and work zones; prohibition on the use of a wireless communications device in a handheld manner.—

(3)(a)1. A person may not operate a motor vehicle while using a wireless communications device in a handheld manner in a designated school crossing, school zone, or work zone area as defined in s. 316.003(105) ~~s. 316.003(104)~~. This subparagraph shall only be applicable to work zone areas if construction personnel are present or are operating equipment on the road or immediately adjacent to the work zone area. For the purposes of this paragraph, a motor vehicle that is stationary is not being operated and is not subject to the prohibition in this paragraph.

2.a. During the period from October 1, 2019, through December 31, 2019, a law enforcement officer may stop motor vehicles to issue verbal or written warnings to persons who are in violation of subparagraph 1. for the purposes of informing and educating such persons of this section. This sub-subparagraph shall stand repealed on October 1, 2020.

b. Effective January 1, 2020, a law enforcement officer may stop motor vehicles and issue citations to persons who are driving while using a wireless communications device in a handheld manner in violation of subparagraph 1.

Section 12. Subsection (1) of section 655.960, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

655.960 Definitions; ss. 655.960-655.965.—As used in this section and ss. 655.961-655.965, unless the context otherwise requires:

(1) "Access area" means any paved walkway or sidewalk which is within 50 feet of any automated teller machine. The term does not include any street or highway open to the use of the public, as defined in s. 316.003(84)(a) or (b) ~~s. 316.003(83)(a) or (b)~~, including any adjacent sidewalk, as defined in s. 316.003.

Section 13. This act shall take effect July 1, 2020.

AMERICAN OVERSIGHT

24-00656C-20

A bill to be entitled

An act relating to electric vehicles; amending s. 316.003, F.S.; revising definitions; amending s. 334.046, F.S.; revising the Department of Transportation's goals relating to mobility; creating s. 339.0802, F.S.; requiring that certain funds be used for specified purposes relating to the Electric Vehicle Infrastructure Grant Program, beginning in specified years; providing for future repeal of the requirement; creating s. 339.286, F.S.; requiring the department to establish the Electric Vehicle Infrastructure Grant Program; providing the purpose of the program; providing for the distribution of grants to certain entities to install electric vehicle charging infrastructure; providing grant requirements; providing requirements for equipment installed using grant funds; providing criteria for the distribution of grants; requiring that the department continually review emerging research, policies, and standards; authorizing the department to adopt a model plan for local governments; requiring the department to adopt rules; amending s. 366.94, F.S.; specifying that certain rules adopted by the Department of Agriculture and Consumer Services may not require specific methods of sale for electric vehicle charging equipment used in this state; providing effectives dates.

Be It Enacted by the Legislature of the State of Florida:

AMERICAN OVERSIGHT

Section 1. Subsections (2) and (55) of section 316.003, Florida Statutes, are amended to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

(2) AUTOCYCLE.—A three-wheeled motorcycle that has two wheels in the front and one wheel in the back; is equipped with a roll cage or roll hoops, a seat belt for each occupant, antilock brakes that meet the requirements of Federal Motor Vehicle Safety Standard No. 122, a steering ~~wheel~~ mechanism, and seating that does not require the operator to straddle or sit astride it; and is manufactured in accordance with the applicable federal motorcycle safety standards in 49 C.F.R. part 571 by a manufacturer registered with the National Highway Traffic Safety Administration.

(55) PERSONAL DELIVERY DEVICE.—An electrically powered device that:

(a) Is operated on sidewalks and crosswalks and intended primarily for transporting property;

(b) Weighs less than 80 pounds, excluding cargo;

(c) Has a maximum speed of 10 miles per hour or, if the Department of Transportation establishes by rule a maximum speed, has a speed that does not exceed that maximum; and

(d) Is equipped with technology to allow for operation of the device with or without the active control or monitoring of a natural person.

A personal delivery device is not considered a vehicle unless

AMERICAN OVERSIGHT

expressly defined by law as a vehicle. A mobile carrier is not considered a personal delivery device.

Section 2. Paragraph (c) of subsection (4) of section 334.046, Florida Statutes, is amended to read:

334.046 Department mission, goals, and objectives.—

(4) At a minimum, the department's goals shall address the following prevailing principles.

(c) *Mobility.*—Ensuring a cost-effective, statewide, interconnected transportation system. Improvement of travel choices to ensure mobility includes planning and establishment of infrastructure for innovative technologies, including electric vehicle charging infrastructure.

Section 3. Effective upon Senate Bill XXXX or other similar legislation being enacted in the 2020 Regular Session or an extension thereof and becoming a law, section 339.0802, Florida Statutes, is created to read:

339.0802 Allocation of increased license tax revenues from licensure of electric and hybrid vehicles.—Funds that result from increased revenues to the State Transportation Trust Fund derived under s. 320.08001(2), (3), and (4) must be used as set forth in this section, notwithstanding any other provision of law.

(1) Beginning in the 2020-2021 fiscal year, and annually for 5 years thereafter, all increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(2) Beginning in the 2025-2026 fiscal year, and annually for 5 years thereafter, half of the increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(3) This section expires on July 1, 2030.

AMERICAN OVERSIGHT

Section 4. Section 339.286, Florida Statutes, is created to read:

339.286 Electric Vehicle Infrastructure Grant Program.—

(1) The department shall establish the Electric Vehicle Infrastructure Grant Program. The purpose of the program is to provide financial assistance to encourage the installation of electric vehicle charging infrastructure.

(2) State agencies, public universities, public transit agencies, ports, airports, and local governments, including local housing authorities and libraries, may apply to the department for grants for the purpose of installing electric vehicle charging infrastructure.

(3) A grant may be awarded for:

(a) Technical assistance for the development and adoption of:

1. A local or regional plan that establishes an electric vehicle charging infrastructure;

2. Any action plans necessary to address any infrastructure gaps; and

3. Steps necessary to complete the infrastructure plan.

A plan must address actions to deploy the necessary infrastructure in high-density housing areas and low- to moderate-income areas.

(b) Assistance with the purchase of related equipment and the costs of installation of that equipment to provide electric vehicle charging. Such equipment must be capable of collecting and reporting data and must use standard connectors.

(4)(a) An applicant may apply for a grant for both

AMERICAN OVERSIGHT

technical assistance and equipment purchase and installation. A grant for technical assistance requires a minimum match of funds from the applicant of 30 percent of the grant award, but such match is not required for an applicant that is located in a fiscally constrained county. A grant for equipment purchase and installation requires a minimum match of funds from the applicant of 50 percent of the grant award, or 20 percent for an applicant that is located in a fiscally constrained county. The matching funds must be from nonstate resources, but may include private funds provided through a partnership with a private entity or in-kind contributions such as the donation of equipment, services, or land or use of land for establishment of the electric vehicle charging infrastructure. Grant funds may not subsidize the cost for the use of electricity.

(b) The department shall maintain a prioritized list of approved grant applications. The prioritized list must include recommended funding levels for each application and, if staged implementation is appropriate, provide funding requirements for each stage. Grants must be prioritized based on the extent to which the activities of the grant will encourage growth in the use of electric vehicles and increase the availability of charging locations along evacuation routes. A grant for equipment purchase and installation that will immediately and most effectively serve those who currently own or operate electric vehicles may receive priority.

(5) The department shall continually review emerging research, policies, and standards related to electric vehicle infrastructure. Using such information, the department shall publish best practices for the establishment of electric vehicle

AMERICAN OVERSIGHT

charging infrastructure, model infrastructure plan development and components, and other significant information for the implementation and use of electric vehicle charging infrastructure. The department may develop a model plan that local governments may use as a guide to establish an electric vehicle charging infrastructure plan.

(6) The department shall adopt rules to administer this section.

Section 5. Section 366.94, Florida Statutes, is amended to read:

366.94 Electric vehicle charging stations.—

(1) The provision of electric vehicle charging to the public by a nonutility is not the retail sale of electricity for the purposes of this chapter. The rates, terms, and conditions of electric vehicle charging services by a nonutility are not subject to regulation under this chapter. This section does not affect the ability of individuals, businesses, or governmental entities to acquire, install, or use an electric vehicle charger for their own vehicles.

(2) The Department of Agriculture and Consumer Services shall adopt rules to provide definitions, methods of sale, labeling requirements, and price-posting requirements for electric vehicle charging stations to allow for consistency for consumers and the industry. Rules implemented under this subsection may not require specific methods of sale for electric vehicle charging equipment used in this state.

(3)(a) It is unlawful for a person to stop, stand, or park a vehicle that is not capable of using an electrical recharging station within any parking space specifically designated for

AMERICAN OVERSIGHT

charging an electric vehicle.

(b) If a law enforcement officer or specialist finds a motor vehicle in violation of this subsection, the officer or specialist shall charge the operator or other person in charge of the vehicle in violation with a noncriminal traffic infraction, punishable as provided in s. 316.008(4) or s. 318.18.

Section 6. Except as otherwise expressly provided in this act, this act shall take effect July 1, 2020.

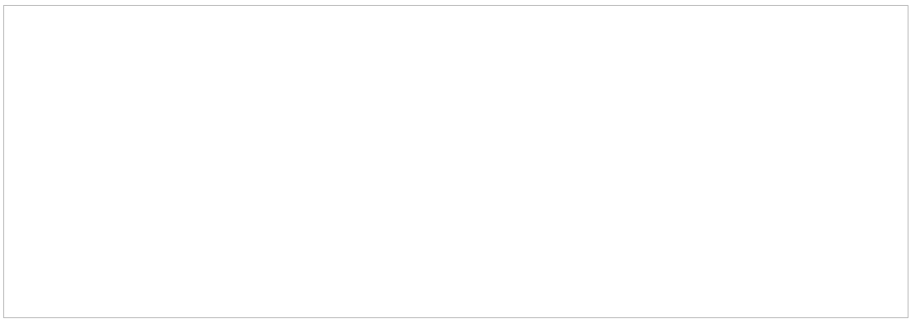
.



A State of Un-Peace: the EU’s Response to Asymmetric Threats

Video & key quotes

“‘Un-Peace’ is not the name of some new, snazzy UN agency,” observes Sir Julian King, European Commissioner for the Security Union. “Rather, it’s the state of international relations that has much in common with other words sharing the same prefix – unease, unrest, uncertainty.”

Deep Dive: IPCC Special Report on the Ocean and Cryosphere in a Changing Climate

Video & key quotes

“Ocean-based climate solutions can deliver up to one-fifth of the annual cut to greenhouse gas emissions needed by 2050 to keep global temperature rise below one-and-a-half degrees Celsius. That is the equivalent of taking two-and-a-half billion cars off the road,” said Ambassador Kåre R. Aas of Norway during an event on the UN Intergovernmental Panel on Climate Change’s first-ever Special Report on the Ocean and Cryosphere in a Changing Climate.

Myths and Realities of Japan’s Security Policy

AMERICAN OVERSIGHT

Video & key quotes

Global Fellow Narushige Michishita offers new insights in Japan's global security stance. "Pacifists don't support any use of force," he observed. "Japan supports the use of force that it considers to be legitimate."

Revolts, Realignments, and Reckonings in the Middle East

Wilson Center NOW

From the Arab Spring to the murder of journalist Jamal Khashoggi in 2018, the Middle East has experienced pervasive and violent tumult in recent decades. In this edition of Wilson Center NOW, we speak with Middle East Fellows and authors Marina and David Ottaway about their new book, *A Tale of Four Worlds: The Arab Region After the Uprisings* – an indispensable analysis of the region's profound upheavals.

Wilson in the News

Communist Party Celebrates 70 Years of Power in China (BYU Radio Top of Mind)
Rui Zhong says that the anniversary of the foundation of the People's Republic of China is an occasion for President Xi Jinping to cement his place as "as the architect of China's next chapter."

Jamal Khashoggi's Murder Haunts Saudi Arabia's Crown Prince (New Yorker)
Robin Wright observes that "Khashoggi's cold-blooded killing and the kingdom's troubled war in Yemen have intensified doubts in Congress about Saudi Arabia."

Whistleblower: Ukraine Felt It Needed to "Play Ball" with U.S. (CNN)
"Zelenskyy was trying to make a friend, trying to maybe shore up rhetorical support for the hot war Ukraine is fighting against Russia," says Nina Jankowicz.

New York Bail Reform: Bipartisan Chorus Of Local And State Officials Call For Repeal Of Bail Reform As Local Judge Declares The Law Unconstitutional

Dear Sen. Brandes,
It's been a busy week in the Empire State of New York as the repeal of "catch and release" bail reform continues to draw bipartisan support...
For states considering similar policies...you've been warned.
The fallout of New York's bail reform continued this week as critics of the new law blasted the restricting of judicial discretion to set bail by issuing automatic get-out-of-jail free cards.
First, a bipartisan coalition of law enforcement leaders and other important state officials from around the State of New York stormed the Capitol building on February 3, 2020, assembling on the 444 steps of the so-called "Million Dollar Steps" in Albany. At the rally, Mayor Steve Buckley said: "This dangerous and misguided [bail reform] legislation needs to be repealed."

Second, the Chair of the New York State Democratic Party, Jay Jacobs, recently said that the bail reform law is "going to be a problem if we don't do something." In fact, the public outrage and ire with the law is so overwhelming that Jacobs is worried, according to the New York Post, "**Democratic lawmakers running for re-election in competitive districts this fall could be defeated if Gov. Andrew Cuomo and the Democrat-run Legislature refuse to revise the controversial bail reform law that lets loose dangerous criminal defendants.**" Said Jacobs: "More Democratic seats will be put at risk — and it will be tough — if we don't do something."
RELATED: Jay Jacobs, chair of New York state Democratic Party, urges changes to bail reforms
Third, a local judge ruled on February 3, 2020 that the bail reform law was unconstitutional, although the order has apparently been stayed for a period of two weeks. In the order, Judge Thomas Marcelle held that the bail reform law was unconstitutional insofar as it constrained judicial discretion by preventing judges from imposing monetary bail in situations where other non-monetary conditions would be more restrictive.
RELATED: Cohoes judge issues order challenging state's bail reform law
In the Order, Judge Marcelle wrote...
The second restriction that the legislature placed upon the judiciary is to deny judges the ability to set bail in a certain category of cases. It is this categorical prohibition on judicial discretion that raises the question of whether the legislature impermissibly trespassed upon the judicial power.
...
Discretion to determine the means—including setting cash bail—for securing a defendant's appearance in court is essential to a court's ability to efficiently control the course of a criminal proceeding.
Finally, Sarah Wallace at NBC News 4 in New York recently did an NB4 I-Team report that noted that the battle over bail reform is raging, due to the intent of the law which was to release without bail 90% of defendants who otherwise would be stuck in jail without supervision or any other monitoring.
Thirty-Six days and counting and the results of New York's failed bail reform are clear...it's not working. According to the NYPD, total crime is up 16.9%, shootings up 28.8%, shooting victims up 41%, auto thefts up 72.5%, robbery up 36.8%, grand larceny up 10.7%, and felony assaults up 7.9%.
Perhaps Sheriff Errol Toulon, Jr. of Suffolk County said it best...

New York Bail Reform: Bipartisan Chorus Of Local And State Officials Call For Repeal Of Bail Reform As Local Judge Declares The Law Unconstitutional

Dear Vanessa,

It's been a busy week in the Empire State of New York as the repeal of "catch and release" bail reform continues to draw bipartisan support…

For states considering similar policies…you've been warned.

The fallout of New York's bail reform continued this week as critics of the new law blasted the restricting of judicial discretion to set bail by issuing automatic get-out-of-jail free cards.

First, a bipartisan coalition of law enforcement leaders and other important state officials from around the State of New York stormed the Capitol building on February 3, 2020, assembling on the 444 steps of the so-called "Million Dollar Steps" in Albany. At the rally, Mayor Steve Buckley said: "This dangerous and misguided [bail reform] legislation needs to be repealed."

Second, the Chair of the New York State Democratic Party, Jay Jacobs, recently said that the bail reform law is "going to be a problem if we don't do something." In fact, the public outrage and ire with the law is so overwhelming that Jacobs is worried, according to the New York Post, "**Democratic lawmakers running for re-election in competitive districts this fall could be defeated if Gov. Andrew Cuomo and the Democrat-run Legislature refuse to revise the controversial bail reform law that lets loose dangerous criminal defendants.**" Said Jacobs: "More Democratic seats will be put at risk — and it will be tough — if we don't do something."

Subject: Oppose HB1237/SB168

Dear Senator Jeff Brandes,

Please VOTE NO on HB1237 and SB1698.

I was one of the people who went to the Town Hall about stopping the sale of puppies from puppy mills. Other than the major contributions you have received from people who work in the industry, how could you possibly be thinking to overturn them? The people in those cities have spoken and they shouldn't be second-guessed. I can't believe that, after seeing videos of puppy mills, you won't protect them.

These preemption bills overturn 70 Florida municipal and county ordinances banning the retail sales of puppy mill puppies and block all future regulations.

Puppy Store lobbyists, led by Petland, are misleading you.

While this bill may seem reasonable by proposing regulations of pet stores, the stores know these regulations are completely unenforceable. Every past attempt to regulate this industry have already proven unsuccessful at protecting consumers and public safety.

The facts are clear:

FACT: In Florida, 95% of puppies sold in pet stores come from massive commercial breeding facilities (puppy mills). The majority of those are from five states: Indiana, Missouri, Kansas, Arkansas, and Ohio.
Florida cannot regulate out of state breeders.

FACT:The USDA has purged breeder inspection reports from the public record and redacted all information linking bad breeders to bad inspection results.

FACT: The vast majority of pet retailers DO NOT sell dogs. Stores like Petco, PetSmart, Pet Supermarket, and most of the largest pet retailers in the world voluntarily stopped selling puppies decades ago because they could not find healthy dogs in retail quantities.

FACT: Often the stores knowingly sell sick puppies costing customers thousands in veterinary bills and mislead customers by veterinarian self-referrals. The Florida Attorney General and the Florida Department of Ag and Consumer Services have hundreds of complaints from consumers on record.

FACT: Pet store puppies can make humans sick. The CDC recently linked two outbreaks of Campylobacter, a multi-antibiotic resistant disease to puppies sold in 13 states including Florida. Over half of these cases were directly linked to Petland puppies and employees

Please vote to protect consumers, children, and seniors.
Vote NO on HB 1237 and SB 1698.

Thank you,

Sincerely,
Michelle Rivera

To: Brandes, Jeff <BRANDES.JEFF@flsenate.gov>
Subject: Oppose SB64
Attachment(s): "OPPOSE SB64 - FINAL.pdf"

Good afternoon Senator Brandes,

I have attached a letter that I drafted stating my opposition to SB64. The letter contains court precedent showing how the bill violates our constitutional rights. I hope you take the time to read it. Thank you.

Sincerely,
Elizabeth Hook

AMERICAN OVERSIGHT

Dear Senator,

I would like to voice my opposition to SB64. SB64 seeks to remove religious exemptions for students in regards to vaccinations and school entry physicals. This bill not only violates our First and Fourteenth Amendment rights, but also our religious rights established in Florida's Religious Freedom Restoration Act and Florida's Educational Equity Act.

In regards to SB64 violating our First and Fourteenth Amendment rights, it helps to clarify that in *Abington School District v. Schempp*, the Supreme Court reinforced that the Fourteenth Amendment made the First Amendment wholly applicable to the States when passing legislation. 142 U.S. 203, 215 (1963). "Congress shall make no law respecting an establishment of religion (Establishment Clause), or prohibiting the free exercise thereof …" (Free Exercise Clause) U.S. Const. Amend. I. The Supreme Court stated that in order for a law to survive the restriction of the Establishment Clause, ask this question and the answer will determine if it has violated the Clause: "What is the purpose and the primary effect of the enactment? If either is the advancement or inhibition of religion then the enactment exceeds the scope of legislative power as circumscribed by the Constitution." *Id.* at 222. SB64 attempts to inhibit religious beliefs.

The Supreme Court also clarified limitations placed on the government by the Free Exercise Clause.

> It withdraws from legislative power, state and federal, the exertion of any restraint on the free exercise of religion. Hence it is necessary in a free exercise case for one to show the coercive effect of the enactment as it operates against him in the practice of his religion.

Id. at 223.

Florida's Compulsory Education Laws require children to obtain a formal education, whether that is public school, private school, homeschool, or something else. A child's non-enrollment in school can result in criminal prosecution for the parents, such as a second-degree misdemeanor. Fla. Stat. §§ 1003.21, 1003.26, 1003.27 (2019). If this bill is approved it would force parents to either cave to government vaccine mandates that violate their religious beliefs or they will face criminal charges, because their child would be denied access to school due to their religious beliefs. SB64 is coercive.

AMERICAN OVERSIGHT

However, to further clarify if the Establishment Clause of the First Amendment has been violated a three-prong test was established in *Lemon v. Kurtzman*, which relied upon the Court's opinion in *Abington School District v. Schempp*.

> The first prong is that the statute enacted has a secular legislative (neutral) purpose. Second, its principal or primary effect must neither advance or inhibit religion. Finally, the statute must not foster 'an excessive government entanglement with religion.'

Lemon v. Kurtzman, 403 U.S. 602, 612 (1971).

If the government policy can pass each of the prongs of the *Lemon* test, then the policy is not in violation. *Windmar v. Vincent*, 454 U.S. 263, 271 (1981). SB64 is not neutral. It is specifically targeted at parents exercising their religious rights. Additionally, SB64 not only inhibits, but removes parent's rights at exercising their religious beliefs when it comes to vaccine mandates. It fails the *Lemon* test.

The Supreme Court has had plenty of cases to interpret the Establishment Clause; however, not as many cases to interpret the Free Exercise Clause of the First Amendment, that is until *Church of the Lukumi Babalu Aye v. City of Hialeah* in 1993. The Supreme Court stated:

> At a minimum, the protections of the Free Exercise Clause pertain if the law at issue discriminates against some or all religious beliefs or regulates or prohibits conduct because it is undertaken for religious reasons.

508 U.S. 520, 532 (1993).

They further elaborated stating:

> If the object of a law is to infringe upon or restrict practices because of their religious motivation, the law is not neutral and it is invalid unless it is justified by a compelling interest and is narrowly tailored to advance that interest.

Id. at 520, 533.

It has already been explained why SB64 is not neutral.

AMERICAN OVERSIGHT

While many would consider mandating vaccinations is a compelling State interest, the Supreme Court went on to clarify what constitutes a compelling interest.

> Where government restricts only conduct protected by the First Amendment and fails to enact feasible measures to restrict other conduct producing substantial harm or alleged harm of the same sort, the interest given in justification of the restriction is not compelling.

Id. at 520, 547.

It could be found ironic that the legislature wants to mandate vaccinations to eliminate diseases, when, at the same time, many vaccines contain a live virus. Here are two examples of a live virus vaccine shedding. The following is from Merck's Rotavirus vaccine insert.

> Shedding of vaccine virus was evaluated among a subset of subjects in the Rotavirus Efficacy and Safety Trial 4 to 6 days after each dose and among all subjects who submitted a stool antigen rotavirus positive sample at any time. RotaTeq was shed in the stools of 32 of 360 vaccine recipients tested after dose 1.[1]

Here is what Merck has to say about the Varivax (Varicella Virus Vaccine Live) vaccine. "Due to the concern for transmission of vaccine virus, vaccine recipients should attempt to avoid, whenever possible, close association with susceptible high-risk individuals for up to 6 weeks following vaccination."[2] Vaccines claim to prevent diseases, but here are two examples of potential shedding of the very disease it is designed to prevent. A perfect example of "alleged harm of the same sort." *Id.* at 547. It helps to add that every vaccine insert states that the vaccine may not offer protection from contracting the disease it is designed to prevent.

Many are unaware of the health risks that vaccines possess. In 1986, Congress passed the National Childhood Vaccine Act removing liability from the vaccine manufacturers. Vaccine manufacturers were so overwhelmed by lawsuits due to vaccines injuries that it threatened to put them out of business. "No vaccine

AMERICAN OVERSIGHT

manufacturer shall be liable in a civil action for damages arising from a **vaccine-related injury or death** associated with the administration of a vaccine after October 1, 1988 …" 42 U.S.C. §300aa–22(b)(1). This Act resulted in the creation of the National Vaccine Injury Compensation Program (VICP). It has currently paid out $4,194,495,832.52 for vaccine injuries.[3] Compensation generally occurs if: the injury occurs from a VICP covered vaccine, the injury appears on their Vaccine Injury Table, and the injury occurred during a specific time after the vaccination.[4] Interestingly, potential side effects that are listed on certain vaccine inserts are not included on this table. However, if a petitioner's injury is not listed on the table, they have to provide evidence linking the injury to the vaccine. Imagine that task. Especially since "'underreporting' is one of VAERS (Vaccine Adverse Event Reporting System) main limitations. The term underreporting refers to the fact that VAERS receives reports for only a small fraction of actual adverse events."[5]

SB64 is targeting individual's religious beliefs regarding vaccinations on the basis of preventing the spread of diseases. However, there are three things to consider. First, many of the vaccines are capable of spreading the very same disease it is designed to prevent. Second, even if the vaccine does not spread the disease, it may not even offer the protection it claims. Finally, there is a risk of injury or death after every injection. It is also concerning that every vaccine insert contains a statement that they have never been evaluated for the potential to cause carcinogenicity, mutagenicity, or fertility impairments. The Supreme Court said it perfectly – a law restricting a First Amendment right is not compelling if it does not restrict conduct "producing substantial harm or the alleged harm of the same sort." *Id.* at 547.

Florida enacted Florida's Religious Freedom Restoration Act (FRFRA) in 1998 to further protect religious freedoms founded in the Constitution.

> (1) The government shall not substantially burden a person's exercise of religion, even if the burden results from a rule of general applicability, except that government may substantially burden a person's exercise of religion only if it demonstrates that application of the burden to the person:
> (a) Is in furtherance of a compelling governmental interest; and
> (b) Is the least restrictive means of furthering that compelling governmental interest.

AMERICAN OVERSIGHT

Fla. Stat. § 761.03(1)(a-b) (2019).

In fact, in *Warner v. City of Boca Raton*, the Florida Supreme Court specified that the protection offered to the free exercise of religiously motivated activity by FRFRA is broader than that afforded by the decisions of the United States Supreme Court. 887 So. 2d 1023 (Fla. 2004). Based upon Supreme Court precedent, a neutral law can infringe on an individuals' rights of free exercise of religion. However, under FRFRA, even a neutral law cannot infringe on this right, and if it does it must pass the compelling interest test established by Federal precedent that the Florida Supreme Court has accepted as the standard. *Id*. A law restricting a First Amendment right is not compelling if it does not restrict conduct "producing substantial harm or the alleged harm of the same sort." *Church of the Lukumi Babalu Aye v. City of Hialeah*, 508 U.S. 520, 547 (1993).

The Equal Protection clause of the Fourteenth Amendment also offers another perspective on how SB64 violates our rights. "No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; … nor deny to any person within its jurisdiction the equal protection of the laws." U.S. Const. Amend. XIV. In *Brown v. Board of Education*, the Court interpreted the Equal Protection Clause of the Fourteenth Amendment in regards to segregation in public schools. Chief Justice Warren states:

> We must consider public education in the light of its full development and its present place in American life throughout the Nation. Only in this way can it be determined if segregation in public schools deprives these plaintiffs of the equal protection of the laws. Today, education is perhaps the most important function of state and local governments. Compulsory school attendance laws and the great expenditures for education both demonstrate our recognition of the importance of education to our democratic society. It is required in the performance of our most basic public responsibilities, even service in the armed forces. It is the very foundation of good citizenship. Today it is a principal instrument in awakening the child to cultural values, in preparing him for later professional training, and in helping him to adjust normally to his environment. In these days, it is doubtful that any child may reasonably be expected to succeed in life if he is denied the opportunity of an education. Such an opportunity, where the state has undertaken to provide it, is a right which must be made available to all on equal terms.

AMERICAN OVERSIGHT

Brown v. Board of Education, 10 U.S. 486 (1954).

It helps to add that Chief Justice Warren found inspiration in a prior case that stated the detrimental effect separation based on race in public schools would have on African American children. Chief Justice Warren expounded on this by writing: "To separate them from others of similar age and qualifications solely because of their race generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone." *Brown v. Board of Education*, 10 U.S. 486, (1954). Now, replace the word race with religion and the effect is the same.

The Supreme Court held that segregation was in clear violation of the Fourteenth Amendment. Here we are again, but with legislation creating segregation among school-aged children because of religious beliefs. In fact, legislation is taking it a step further and denying children their right to a public education if they are not vaccinated due to religious beliefs. It is a good thing that Florida enacted the Florida Educational Equity Act.

> Discrimination on the basis of race, ethnicity, national origin, gender, disability, religion, or marital status against a student or an employee in the state system of public K-20 education is prohibited. No person in this state shall, on the basis of race, ethnicity, national origin, gender, disability, religion, or marital status, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any public K-20 education program or activity, or in any employment conditions or practices, conducted by a public educational institution that receives or benefits from federal or state financial assistance.

Fla. Stat. § 1000.05(2)(a) (2019).

How are people's religious rights being violated by SB64? Here are a few examples. Christians find guidance from the Holy Bible. The Holy Bible repeats our bodies are temples and to treat it with respect.[6] However, Christianity has many denominations that choose to practice their beliefs differently. To further broaden the scope, different religions have different beliefs and practices. Some choose to use prayer instead of medicine in times of sickness. Others follow dietary restrictions. While others scrutinize what they put into their bodies, for instance,

[6] 1 Corinthians 3:16-17; 6:19-20.

AMERICAN OVERSIGHT

toxic substances, animals, or even human tissue. Did you know the hazardous waste limit for mercury allowed to be present in drinking water set by the EPA is 0.2ppm or 200 parts per billion?[7] The flu vaccine, Fluvirin, contains mercury in the amount of 25,000 parts per billion. That is 24,800 over what the EPA deems as hazardous waste. Did you know that vaccines not only contain animal tissue, but aborted human tissue? Although, the aborted fetal tissue has been renamed to MRC-5 and WI-38. Collagen used from pigs in vaccines has been named Porcine gelatin. The following ingredients from chickens, dogs (Madin Darby Canine Kidney), monkeys, cows and insects (Spodoptera frugiperda cell proteins) can also be found.[8] Christians are opposed to abortion, as are Buddhists. They view abortion as an act of murder. So why would it be okay to have a vaccine that contain remnants of an aborted fetus being injected into their children? Jews and Muslims have dietary restrictions due to their religious beliefs. The Florida Supreme Court used Muslims and Jews consuming pork as an example of a substantial burden (compels you to act in a way forbidden by your religion). *Warner v. City of Boca Raton*, 887 So. 2d 1023 (Fla. 2004). So again, it must be asked why would they be okay injecting pork into their body if it is against their religious beliefs to consume it?

People are not objecting to SB64 due to an "anti-vax" sentiment, but because of the religious freedom it threatens to take away. The separation between church and state needs to be protected. It is why the First Amendment was written, to keep legislature from overstepping.

SB64 not only risks violating our constitutional rights, but damaging children's "hearts and minds" by casting them out of school with a message that they are "inferior". *Brown v. Board of Education*, 10 U.S. 486 (1954). You would be telling these children they do not deserve the same opportunities due to their religious beliefs because of a potential "health risk". The same health risk was demonstrated above as a possibility from vaccinated children. However, it is assuming the belief that the low percent of unvaccinated, school aged children in Florida are a threat for spreading diseases, but the remaining children, vaccinated with live viruses, are not.[9]

SB64 seeks to distort the line that separates church and state, but will you allow this? You swore an oath to support and defend the Constitution. So, will you? Will you protect the rights our Founding Fathers fought so passionately to secure so

Attachment(s): "AKC Breeders Code of Ethics re Pet Stores.pdf","Dr. Frank McMillan Executive Summary PM Studies.pdf","JAVMA Pet Store Puppies Study.pdf","FL SB 1698 Letter from BFAS.pdf"

Honorable Chair Simpson, Vice Chair Benacquisto and Committee members,
On behalf of Best Friends Animal Society and our Florida members, please find attached a letter respectfully urging you to oppose Senate Bill 1698, which would prohibit localities from enacting retail pet sales ordinances. Also attached are a few supporting documents that you may find helpful.

While this bill appears to be promote animal welfare, it is actually just a vehicle for local preemption. The pet industry has introduced similar preemption bills in other states, all with the intention of supporting the puppy mills that supply pet stores, to the serious detriment of pets, consumers and taxpayers.

Best Friends and our thousands of members throughout Florida thank you in advance for voting NO on this harmful bill.

Please do not hesitate to contact me if you have any questions.

Respectfully,

Elizabeth Oreck

AKC Breeder Code of Ethics re: Pet Store Puppies

If one visits the website of the American Kennel Club (AKC), one of the oldest and most respected breed club registries in the world, one can access the Breeder Code of Ethics on any of the websites listed in their national parent club directory for AKC-recognized breeds.* One of the most common provisos is that ***breeders must agree never to sell their puppies to pet stores.***

Below are several examples.

Airedale Terrier Club of America
(airedale.org)
Code of Ethics: *In sale/placement transactions, we endeavor to refuse to sell an Airedale Terrier of any age to pet dealers, catalog houses, or any other commercial sources of distribution.*

Alaskan Malamute Club of America, Inc.
(alaskanmalamute.org)
Code of Ethics: *No member shall knowingly be involved in the sale/placement of puppies/dogs through retail or wholesale outlets, mail order businesses, dog dealers/agents/brokers, or act as a finder for such operations.*

American Bloodhound Club
(bloodhounds.org)
Code of Ethics: *As a member of the American Bloodhound Club: I agree not to engage in the practice of providing any Bloodhound to any individual, commercial wholesaler, or retailer for the purpose of resale.*

American Cavalier King Charles Spaniel Club, Inc.
(ackcsc.org)
General Code of Conduct: *I will not: 1. Knowingly falsify a pedigree, health screening or breeding information. 2. Sell Cavaliers to pet shops, brokers or third party dealers. 3. Supply or sell Cavaliers for auctions, raffles, flea markets or any other such enterprise. 4. Knowingly sell to unethical breeders, or sell to persons whose intention is resale. 5. Purchase any Cavalier or any litter for resale either to an individual or a commercial establishment.*

American Fox Terrier Club
(aftc.org)
Code of Ethics: *Under no condition shall dogs be sold to pet dealers or any other source of commercial distribution.*

AMERICAN OVERSIGHT

American Whippet Club, Inc.
(americanwhippetclub.net)
Code of Ethics: *No member of this club shall engage in the wholesaling of litters of Whippet puppies, or the sale of breeding stock or individuals to pet shops or other commercial sources of distribution.*

Basset Hound Club of America
(basset-bhca.com)
Breeder Code of Ethical Conduct: *No member of this club shall engage in the wholesaling of litters or the selling of breeding stock to commercial sales operations.*

American Maltese Association, Inc.
(americanmaltese.org)
Member Code of Ethics: *I will not knowingly deal with dog wholesalers, commercial retailers, brokers or unethical dog breeders, nor supply dogs for raffles, "give away" prizes or other such projects.*

American Miniature Schnauzer Club, Inc.
(amsc.us)
Code of Ethics: *The breeder will not sell or dispose of any dog through pet shops, wholesalers, commercial dealers or paid agents.*

American Pomeranian Club, Inc.
(americanpomeranianclub.org)
Code of Ethics: *I will not sell my puppies to pet shops or commercial pet mill establishments, nor will I donate puppies for raffles or auctions.*

American Spaniel Club, Inc.
(asc-cockerspaniel.org)
Code of Ethics: *Breeders shall refrain from selling puppies to pet shops either outright or on consignment; refrain from supplying puppies for auctions, raffles, or other such enterprises; refrain from selling to persons whose intention to resell is known or suspected; refrain from breeding litters primarily for the pet market.*

Australian Cattle Dog Club of America
(acdca.org)
Breeder Code of Ethics: *As an ACDCA Code of Ethics Breeder, I agree that no puppies will be knowingly sold to franchised commercial facilities, puppy brokers, puppy mills or agents thereof.*

Boston Terrier Club of America, Inc.
(bostonterrierclubofamerica.org)
Code of Ethics: *I will sell no Boston Terrier to a commercial facility, puppy broker, pet shop, puppy mill or their agent.*

Bulldog Club of America
(bulldogclubofamerica.org)
Breeder's Code of Ethics: *Responsible breeders refuse to sell or recommend breeders who do not conform to the ideals and obligations expressed in this Code and shall not engage in wholesaling litters or in individual sales or consignments of pups or adults to pet shops, dealers, catalog houses or other commercial establishments, nor shall they be donated or given as prizes in contests, raffles, or fund-raising events, no matter how charitable.*

AMERICAN OVERSIGHT

Chihuahua Club of America, Inc.
(chihuahuaclubofamerica.com)
Code of Ethics: *I pledge to be responsible for all Chihuahuas that I have produced for their entire life-time by never buying, selling or trading my/our Chihuahuas to research laboratories, pet stores, or to auctions nor placing them in rescue groups.*

Chinese Shar-Pei Club of America, Inc.
(cspca.com)
Breeders Code of Conduct: *I agree to never sell or give any puppy or dog to pet stores either on consignment or outright.*

Collie Club of America, Inc.
(collieclubofamerica.org)
Code of Ethics: *No member shall knowingly sell or place, trade or give any Collie of any age to pet dealers, catalog houses, or other commercial sources; nor shall Collies be given as prizes, auctioned, or exploited to the detriment of the breed.*

Dachshund Club of America, Inc.
(dachshund-dca.org)
Code of Ethics: *To never supply a Dachshund to pet shops, commercial brokers or dealers, raffles or similar projects.*

Dalmatian Club of America, Inc.
(thedca.org)
Ethical Guidelines: I hereby pledge to ensure that puppies and adults produced by my brood bitch or stud dog are never knowingly sold or consigned to pet stores, wholesalers, or commercial dealers.

French Bull Dog Club of America
(frenchbulldogclub.org)
Code of Ethics and Sportsmanship: *As a member of the French Bull Dog Club of America, I will not sell a French Bulldog to anycommercial facility, puppy brokers, pet shop, puppy mill or agent thereof.*

German Shepherd Dog Club of America
(gsdca.org)
Club Code of Conduct: *No GSD will be sold to wholesalers or retail stores for the purpose of resale.*
Breeders Code: *I hereby pledge to refuse to sell or recommend breeders who do not conform to the ideals and obligations expressed in this Code and refuse all sales to dog wholesalers and retailers.*

Golden Retriever Club of America
(grca.org)
Responsibilities as a Breeder: *Members should not sell dogs at auction, or to brokers or commercial dealers.*

Greyhound Club of America
(greyhoundcluboramericainc.org)
Ethical Standards: *Breeders shall not knowingly sell or consign puppies or adult dogs to pet stores, puppy brokers or other commercial dealers.*

Havanese Club of America
(havanese.org)
Code of Ethics: *No Havanese will be sold to pet dealers, pet stores, pet wholesalers, or pet brokers either singly or in litter lots.*

AMERICAN OVERSIGHT

Miniature Pinscher Club of America, Inc.
(minpin.org)
Code of Ethics: *No Miniature Pinscher shall be sold to commercial facilities; research laboratories; pet shops; brokers who purchase litter lots or individuals for re-sale to pet shops or other commercial facilities, puppy mills or their agents.*

Newfoundland Club of America, Inc.
(ncanewfs.org)
Ethics Guide: *Responsibilities of Members: To refuse to sell Newfoundland dogs to any pet shop, or any wholesale dealer in dogs, or knowingly to sell or aid or abet the sale of any Newfoundland to a person or agent who will sell the animal through a pet shop.*

Old English Sheepdog Club of America, Inc.
(oldenglishsheepdogclubofamerica.org)
Code of Ethics: *Puppies may not be sold from any temporary marketplace or transient headquarters, no litters purchased or taken on consignment for resale, nor dogs wholesaled to pet shops, auctions, dealers, contest sponsors, raffles, etc.*

Papillon Club of America, Inc.
(papillonclub.org)
Code of Ethics: *No member of the Papillon Club of America will sell at wholesale or to retail outlets, brokers, pet shops, mail order houses, or businesses of similar commercial enterprise, or donate a dog to be offered as a prize.*

Portugese Water Dog Club of America, Inc.
(pwdca.org)
Section 1 All PWDCA Members shall: *Not sell, place or consign any Portuguese Water Dog to a commercial facility, business or agent thereof.*

Pug Dog Club of America, Inc.
(pugs.org)
Code of Ethics: *No member shall EVER sell or donate dogs for auctions or raffles, or to pet shops, catalog houses, brokers or for resale purposes.*

Rhodesian Ridgeback Club of the United States
(rrcus.org)
Code of Ethics: *Members will not knowingly furnish puppies or adult dogs for wholesale, pet shops, puppy brokers, commercial facilities, guard dog businesses or agents thereof, or dispose of them as "Give away" prizes or auction items; neither will they sell puppies to nor breed to dogs owned by those whom they have reason to believe may do so.*

Samoyed Club of America, Inc.
(samoyedclubofamerica.org)
Code of Ethics: *The SCA member does not sell, consign, or transfer puppies, or adults to pet shops, wholesale dealers, contest sponsors, or anyone who is known to degrade the Samoyed breed or purebred dogs, or to individuals contemplating breeding and/or sale to the aforementioned.*

Scottish Terrier Club of America
(stca.biz)
Code of Ethics: *Not knowingly sell a Scottish Terrier of any age to a pet shop, catalog house, laboratory or any wholesale dealer in dogs (a dealer being a person who regularly buys dogs for sale at profit), or to any person who sells to any of the above.*

AMERICAN OVERSIGHT

Siberian Husky Club of America, Inc.
(shca.org)
Code of Ethics: *I pledge that I will refuse to deal with dog wholesalers or to sell puppies or dogs to pet shops, and I will include in all stud contracts an agreement to be signed by the owner of the bitch that no puppies resulting from the mating will be wholesaled or sold to pet shops.*

Skye Terrier Club of America
(clubs.akc.org/skye)
Code of Ethics: *To refrain from knowingly selling, trading, or giving Skye Terriers or providing stud service to a commercial breeder, pet shop, research laboratory or any person known to be unethical in his/her dealings in purebred dogs.*

Spinone Club of America
(spinoneclubofamerica.com)
Code of Conduct: *Members will not sell, transfer or consign a dog to pet shops, unethical breeders, or other commercial ventures including lotteries, raffles or auctions.*

Staffordshire Bull Terrier Club of America
(sbtca.com)
Code of Ethics: *Litters shall not be sold to a person en-bloc, to commercial sources, or for purposes of resale.*

St. Bernard Club of America, Inc.
(saintbernardclub.org)
Guidelines and Statement of Policy: *No member shall buy or sell St. Bernards through commercial pet outlets, nor buy or sell in litter lots, nor sell to persons whose activities tend to degrade the Breed.*

Tibetan Terrier Club of America, Inc.
(ttca-online.org)
Guidelines for Responsible Breeders: *A responsible breeder does not sell or consign Tibetan Terriers to pet shops or other commercial dealers, nor does he breed his animals to their animals.*

Weimaraner Club of America
(weimaranerclubofamerica.org)
Code of Ethics: *The owner/breeder shall not breed, sell or consign puppies or adults to pet shops or other commercial dealers.*

Executive Summary: Scientific studies of dogs and puppies from commercial dog-breeding establishments (puppy mills)

BACKGROUND

Commercial breeding establishments, or puppy mills, are large-scale facilities where dogs are confined in small enclosures for their entire reproductive lives with little to no exercise or positive human contact. The sole purpose of such facilities is to mass-produce puppies to sell them for profit through retail pet stores and via the Internet.

SYNOPSIS

In two large-scale studies of dogs from high-volume commercial breeding establishments (one study focusing on the adult breeding dogs and the other on the puppies sold through pet stores), the evidence showed conclusively that these breeding facilities are highly injurious to both groups of dogs, resulting in severe, extensive and long-term harm to the behavioral and psychological well-being of the dogs.

Study 1: The adult breeding dogs

WHAT THE STUDY LOOKED AT

This study compared a wide array of psychological and behavioral characteristics of 1,169 dogs formerly kept for breeding purposes in commercial breeding establishments with pet dogs owned by members of the general public.

RESEARCHERS

Franklin D. McMillan, DVM, Best Friends Animal Society
Deborah L. Duffy, PhD, University of Pennsylvania School of Veterinary Medicine
James A. Serpell, PhD, University of Pennsylvania School of Veterinary Medicine

THE PUBLISHED PAPER

Mental health of dogs formerly used as ‘breeding stock’ in commercial breeding establishments. FD McMillan, DL Duffy, JA Serpell. *Applied Animal Behaviour Science* 2011; 135: 86-94.

WHAT THE STUDY FOUND

- The results showed a broad range of abnormal behavioral and psychological characteristics in the former breeding dogs from large-scale commercial breeding establishments, including significantly elevated levels of fears and phobias; pronounced compulsive and repetitive behaviors, such as spinning in tight circles and pacing; house soiling; and a heightened sensitivity to being touched and picked up.
- The psychological harm demonstrated in these dogs is severe and long-lasting. Much of the harm is irreparable and will remain a continued source of suffering for years after the dogs leave the breeding facility, in some cases for the entire lifetime of the dog.

AMERICAN OVERSIGHT

CONCLUSIONS

- Current laws at both the national and state levels are not based on current scientific knowledge of animal psychology, quality of life, suffering, and welfare, and are thus inadequate to protect dogs from the psychological harm resulting from living in commercial breeding establishments.
- Legislation to adequately protect the welfare of dogs in confinement needs to be updated to reflect current scientific knowledge.

To obtain a copy of the published study, contact Dr. Frank McMillan (dr.frank@bestfriends.org).

Study 2: The puppies

WHAT THE STUDY LOOKED AT

This study compared the psychological and behavioral characteristics of 431 adult dogs who were purchased as puppies from pet stores with adult dogs purchased as puppies from small-scale, private breeders.

RESEARCHERS

Franklin D. McMillan, DVM, Best Friends Animal Society
James A. Serpell, PhD, University of Pennsylvania School of Veterinary Medicine
Deborah L. Duffy, PhD, University of Pennsylvania School of Veterinary Medicine
Elmabrok Masaoud, PhD, Atlantic Veterinary College, University of Prince Edward Island
Ian Dohoo, DVM, PhD, Atlantic Veterinary College, University of Prince Edward Island

THE PUBLISHED PAPER

Differences in behavioral characteristics between dogs obtained as puppies from pet stores and those obtained from noncommercial breeders. FD McMillan, JA Serpell, DL Duffy, E Masaoud, IR Dohoo. *Journal of the American Veterinary Medical Association* 2013; 242: 1359-1363.

WHAT THE STUDY FOUND

- Dogs obtained as puppies from pet stores received significantly less favorable scores than breeder-obtained dogs on most behavioral variables measured. Compared with dogs obtained as puppies from noncommercial breeders, dogs from pet stores had significantly greater aggression toward human family members, unfamiliar people and other dogs; greater fear of other dogs and typical life events; and greater separation-related problems and house soiling.
- For no behavior evaluated in the study did pet store dogs score more favorably than noncommercial breeder dogs.
- The chances of a dog developing serious behavior problems is much higher for dogs purchased as puppies from pet stores, as compared to dogs obtained from small, noncommercial breeders.

CONCLUSIONS

- On the basis of these findings, combined with findings from earlier small-scale studies of dogs obtained from pet stores, until the causes of the unfavorable differences detected in this group of dogs can be specifically identified and remedied, the authors of this study withhold any recommendation that puppies be obtained from pet stores.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005369

- Dogs sold by pet stores are misrepresented to consumers as a high-quality product, because the data now shows that consumers are not receiving what they believe they are paying for. The increased risk of behavior problems that pet store customers face as their dog matures includes aggression issues, which pose a significant risk of human injury. Consumer protective legislation is urgently needed in this area.
- Legislation to improve the conditions in the large-scale commercial breeding facilities supplying puppies to pet stores is needed to assure that the puppies are not at any increased risk of maturing into adult dogs with serious behavior problems.

To obtain a copy of the published study, contact Dr. Frank McMillan (dr.frank@bestfriends.org).

Overall Conclusions

- Current laws provide inadequate protection against harm to breeding dogs and puppies associated with commercial breeding establishments.
- Consumers purchasing puppies from pet stores are unknowingly assuming a risk of difficult and serious behavior problems in their dogs, including dog behavior that can endanger their own safety.
- If dogs are to be bred to produce puppies for sale, all of the dogs and puppies should be assured a decent quality of life based on the most current scientific research.

28 January 2020

Florida Senate Committee on Innovation, Industry and Technology
404 S. Monroe St.
Tallahassee, FL 32399-1100

Re: Opposition to Senate Bill 1698

Honorable Chair Simpson, Vice Chair Benacquisto and Committee members,

On behalf of Best Friends Animal Society and our Florida members, I respectfully urge you to oppose Senate Bill 1698, which would prohibit localities from enacting retail pet sales ordinances.

Pet mills, particularly puppy mills, are a serious problem in the U.S. These facilities, which supply nearly 100% of retail pet stores and online retailers, are cruel and inhumane breeding factories in which profit takes priority over the health, comfort and welfare of the animals.

Although the USDA regulates these breeders, the minimum federal standards do not ensure a humane life for dogs. These types of kennels can legally have more than a thousand dogs in one facility, and these dogs are allowed to be confined to very small cages for their entire lives, breeding continuously in order to produce as many puppies as possible for the pet trade. And USDA inspection reports show that many USDA-licensed breeders continue to sell animals to local pet stores even after being cited for serious violations at their facilities. In other words, having a USDA license does **not** ensure responsible breeding.

Further, with the USDA no longer making inspection reports readily available to the public, there is no way for pet stores or consumers to know if the puppies for sale have come from breeding facilities with serious violations of the Animal Welfare Act. Therefore, the fact that a pet store may source from a federally regulated breeding facility, whether or not it has received USDA citations, does not offer protection for consumers or animals. Sourcing requirements that pertain to USDA violations are virtually unenforceable.

Pet stores rely on high-volume commercial pet mills and their distributors to supply their stores because reputable breeders won't sell to pet stores for two simple reasons: it's not financially viable and they don't sell to third parties. And this pledge never to sell a puppy to a pet store can be found in every reputable breeder's code of ethics, including virtually all of the parent breed clubs of the American Kennel Club.

Because the focus is solely on profit, commercial breeding operations typically cut all possible corners to keep their overhead low, at the expense of the health and well-being of their animals. For the unsuspecting consumer, this frequently results in the purchase of a pet facing an array of immediate veterinary problems or harboring genetic diseases that surface down the line. This creates a financial burden on the consumer and results in many of these animals being

AMERICAN OVERSIGHT

surrendered to overcrowded, taxpayer-subsidized shelters. Thus, this is not just an animal welfare issue but a consumer protection concern.

It makes little sense to continue manufacturing dogs and cats while so many are being killed for lack of space. Public education has been effective, but until communities take the initiative to limit the supply of pets being imported from substandard commercial facilities, there can be no hope of preventing these unnecessary deaths.

Also concerning is the fact that Florida is one of 21 states to have been hit by an outbreak of a strain of bacteria (Campylobacter) that is linked to puppies for sale at Petland. Campylobacter is resistant to antibiotics and contagious to humans. Florida residents should not continue to be exposed to this serious public health threat.

Those who benefit most from companion animal sales in pet stores are the retailers themselves. While they may profit from the practice of buying these pets at a low price from commercial brokers and then selling them at a high price (typically without first spaying or neutering them), it is the taxpaying public who pays for animal control to house and kill unwanted animals in the community.

Puppy mill-supplied pet stores can choose to be part of the solution rather than the problem by phasing out the sale of commercially bred pets in favor of other common revenue streams such as pet product sales, grooming and day care, and by offering space for animal rescue organizations to adopt out animals from those stores.

Pet stores that have transitioned from selling dogs and cats to offering rescued pets for adoption have found this humane model to be both viable and embraced by the communities in which the stores are located. Therefore, allowing localities to restrict the retail sale of pets does *not* prevent local pet stores from staying in business, but does, in fact, alleviate a significant burden on local shelters by increasing pet adoptions. Further, it does not prevent anyone from purchasing the pet of their choice directly from a private breeder.
